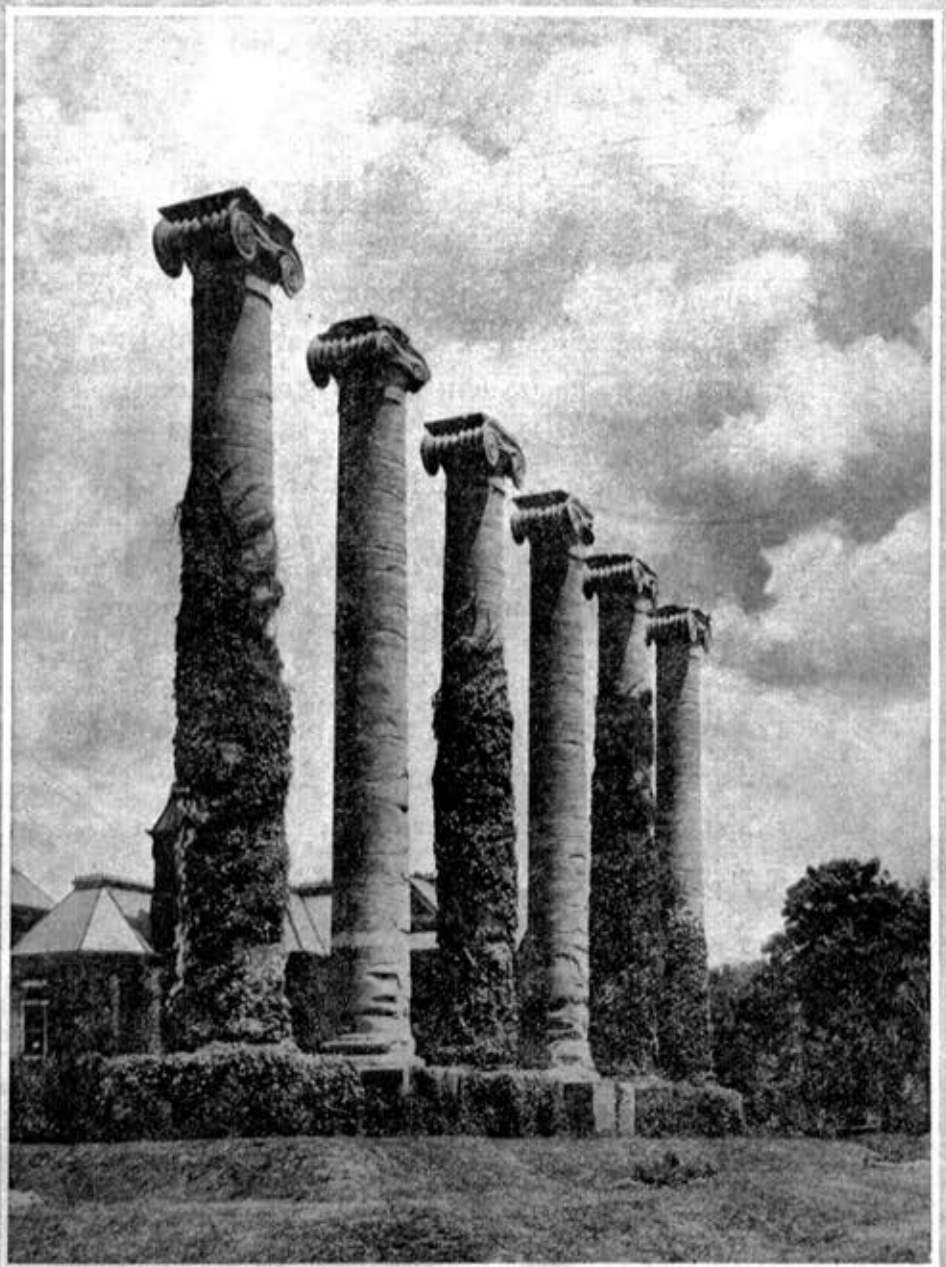
THE MISSOURI ALVMNVS



DEPARTMENT STUNTS —all of them, according to plans now under way, may be held COMMENCEMENT WEEK

VOL. I. NO. 5 FEBRUARY, 1913

For the Alumni

THE sole purpose in the plan now under consideration by students and faculty at Missouri to have all the department stunts Commencement week is to make the week a more enjoyable one for alumni and former students who return to the campus.

DO THE Alumni want these stunts at Commencement time?

IF YOU do, write a line or two approving the plan and send it to The Alumnus. Let's show the students that their offer of entertainment is appreciated.

BUT *you* write the line—don't say "that's good" and then wait for some other alumnus to speak up.

The

Emery, Bird, Thayer Co.

extends to you the courtesies of its store devoted to wearing apparel and dress accessories complete for men, for women, for children and to the complete outfitting of the home—in every case presenting merchandise of the highest order of merit characteristic of this store.

Especial attention is directed to the store accommodations—to the Tea Room, to the Parlor Floor with its Writing Room, Women's Lavatory, Rest and Reception Rooms, Telephone Room with free service, to the free Parcel Checking Booth, to the United States Postal Sub-Station and many other conveniences which make shopping here pleasant at all times. This is *"The Store Accommodating."*

GRAND AVENUE, WALNUT AND ELEVENTH STREETS
KANSAS CITY, MISSOURI

VOLUME 1 NUMBER 5

THE MISSOURI ALUMNUS

Published by the Alumni Association of the University of Missouri

HARRY E. RIDINGS, Managing Editor.

Subscription Price, $2.00 a Year.

OFFICERS OF THE ASSOCIATION

ODON GUITAR, JR., St. Louis.....President
N. T. GENTRY, Columbia.....Vice-President
MRS. SARAH GENTRY ELSTON, Kansas City.....Vice-President
HARRY E. RIDINGS, Columbia.....Secretary
S. F. CONLEY, Columbia.....Treasurer

THE MISSOURI ALUMNUS is issued nine months each year, the first number just after the opening of school and the last just after commencement.

SUBSCRIPTION to The Missouri Alumnus is two dollars a year. Subscriptions should be sent to the Secretary, Columbia, Mo.

CHANGES OF ADDRESS of alumni should be received at the Alumni Office in Columbia before the fifteenth of the month to insure the prompt delivery of the magazine for that month.

LETTERS should be addressed to The Missouri Alumnus, Columbia, Mo., or to the Secretary of the Alumni Association, Columbia, Mo.

OFFICERS OF LOCAL ALUMNI ASSOCIATIONS

ST. LOUIS

W. T. Nardin, president,
815 Central Nat. Bank Bldg.
J. E. Chasnoff, secretary,
The Republic.

CHICAGO

James C. Baird, president,
Morgan Park, Ill.
Wiley F. Corl, vice-president,
105 S. La Salle St.
Nora Edmonds, secretary-treasurer,
6525 Parnell ave.

OKLAHOMA (STATE)

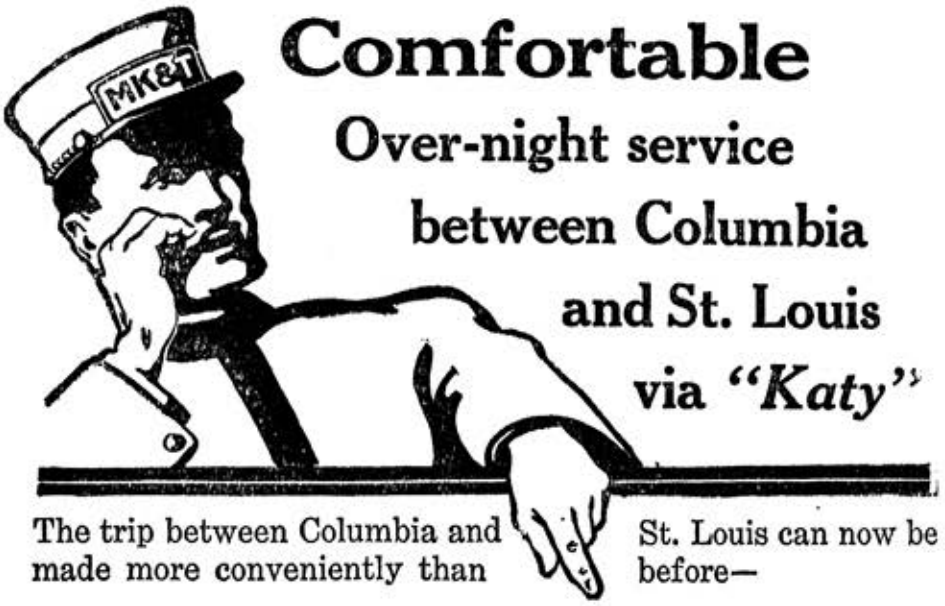
R. A. Kleinschmidt, president,
Patterson Bldg., Oklahoma City.
M. F. Highley, vice-president,
Oklahoma City.
P. W. Bonfoey, treasurer,
Oklahoma City.
Redmond S. Cole, secretary,
Pawnee, Okla.

KANSAS CITY

J. A. Kurtz, President,
831 Scarritt Building.
S. R. Freet, secretary,
3403 Chestnut Avenue.

BOONE COUNTY

Marshall Gordon, president.
Mrs. L. M. Defoe, vice-president.
E. B. Cauthorn, vice-president.
J. S. Rollins, secretary.
S. C. Hunt, treasurer.



Comfortable

Over-night service between Columbia and St. Louis via *"Katy"*

The trip between Columbia and St. Louis can now be made more conveniently than before—

Leave Columbia	**11:55 P. M.**	**Leave St. Louis**	**11:38 P. M.**
Arrive St. Louis	**7:30 A. M.**	**Arrive Columbia**	**7:00 A. M.**

You lose less business time

You can board the sleeper at 9:30 p. m., —at either terminal—get a good night's rest and arrive at your destination in ample time for the days business.

Try *"The Katy"* on your next trip

An easy run over a smooth track—splendid accomodations—"on time" arrivals.

THE MKT 489

Any railroad agent will gladly give you particulars about ***Katy*** Service—or write

H. L. Wilson, Agent, Columbia, Mo.

Alumni Business and Professional Guide

This guide is published for the convenience of Missouri Alumni of the various professions who may wish to obtain reliable correspondents at a distance to transact business for them.

Alumni of all professions who are in a position to be of service to other alumni are invited to place their cards in the guide.

The charge is only $1.35 for the remaining four issues—33 cents a month.

VOL 1 FEBRUARY, 1913 No. 5

STUNT WEEK IN JUNE

By W. M. REGAN, '12

A Stunt Week is the latest innovation planned at the University. The purpose of the Stunt Week is primarily to improve our commencement exercises. Every graduate of the University is struck by the inadequacy of the exercises as they now are. Probably the most uninteresting week of a man's entire college career is commencement week and commencement exercises can only be improved by the introduction of something that is typical of Missouri. If there is anything that is typical of Missouri it is the stunts. With this in view arrangements are being made to hold all the stunts during commencement week.

The faculty is now considering a plan whereby the commencement exercises will be held during the week preceding examinations. President A. Ross Hill and Dean F. B. Mumford of the College of Agriculture have expressed themselves as being heartily in favor of the proposed plan.

The students are also co-operating. Alpha Phi Sigma, the society of senior women, has voted to hold the girls' annual May Day stunt commencement week. The Agricultural Club has decided to give the Farmers' Fair at this time. No definite action has been taken by the other departments but the sentiment of the Engineers, the Lawyers and School of Education is favorable to this plan.

If this plan is put into effect, instead of having the stunts scattered throughout the school year there will be one grand carnival week in which there will be no classes. The students will be in a position to enjoy to the utmost these stunts. The parents of the Seniors and the visiting friends will have an opportunity to see the brighter side of college life, instead of a week of uninteresting inactivity as it has been in the past. The students will make a special effort to have their friends visit the University at this time, and it will thus serve as one of the great advertisements for the University. But to the alumni it will be of chief concern in that they will have an opportunity not only to return and participate in their department's stunt but also meet students of their day. As it is, more Farmers and Engineers come back to see Farmers' Fair and St. Patrick's Day than come back to the commencement exercises.

If class reunions are properly organzied, this plan will give a nucleus around which Missouri can undoubtedly build the best commencement exercises of any school in the West.

It is further planned to obtain an immense tent with a seating capacity of at least five thousand persons, which will be placed between the columns and Academic Hall, to accommodate the large crowd which it is anticipated will be in attendance during the week.

Under this plan old Class Day exercises together with the Senior Play will be abolished. However, Com-

mencement Day, the Senior Ball and the President's Reception probably will be given much the same as they have in the past. This will take much of the work off the seniors and enable them to enjoy the week with the rest of the students. Since it is planned to excuse all seniors from examinations.

N. T. Gentry, vice-president of the Alumni Association, has promised to take the matter up with the Executive Committee of the Association as soon as the plan is officially adopted by the students and faculty.

Alumnus, what do you think of this plan?

It is of as much concern to you as to anyone. Will you be willing to help make it a success by returning to your Alma Mater at a time when the students are all here with an opportunity of participating in your department's stunt and meeting friends of by-gone days?

A NOTED ASTRONOMER

By J. S. SNODDY, '83

(This article, together with a three-column picture of Mr. See, was printed in The New York Sun recently.)

Much has been written recently in scientific periodicals about the "capture theory of cosmical evolution." Few readers of these periodicals, even those who are interested in science, fully realize the importance of this theory and appreciate the fact that the man who has by mathematical demonstration proved this theory is an American who has already made a reputation for himself by his work on double stars and other phases of research work in astronomy.

The man who recently solved this important problem is T. J. J. See, professor of mathematics in the United States navy, who at present is at Mare Island, Cal., where in a little unpretentious Government cottage with his family and his books he is enjoying a quiet life. A quiet life, but not a hermit's life; for just across the bay from Mare Island is the busy little town of Vallejo, where the shipbuilder's hammer is heard day and night.

With Prof. See's mail come daily newspapers that keep him in touch with the outside world. Busy as he is with his scientific work, he never loses interest in important current events. But most of his time is devoted to scientific research. A few steps from his cottage is the United States naval observatory, to which he has free access and where by means of up to date mathematical instruments and apparatus he is enabled to keep up his work with that zeal and unflagging energy which have been characteristic of him ever since he was graduated from the University of Missouri twenty-three years ago.

And what is this capture theory—the theory which has by Prof. See's discoveries and demonstration become a new science in cosmogony? The old theory with regard to the origin of the planets held by early astronomers was that the planets had originally been parts of the solar nebula and had in the course of time on account of the rapid rotation of the sun been detached from the sun and had become separate bodies which have ever since been revolving about the sun, and the satellites had in turn in like manner been detached from the separate planets. Thus the moon, which astronomers thought had originally been a part of the terrestrial globe, had in the course of time been thrown off from the earth and had become a satellite for the earth.

The old theory which was maintained by early astronomers and which has more recently been taught by Laplace, Lord Kelvin, Sir George Darwin, Poincaré and other eminent astronomers, is, according to Prof. See's theory, incorrect. By his new theory, the capture theory, Prof. See means that the planets were originally independent bodies; but were subsequently captured by the sun and made to revolve about the sun as parts of the solar system.

The satellites too were originally independent bodies which had been captured by the sun and made to revolve about it as planets, but later were again captured by larger planets and made to revolve about them. The satellites of Jupiter, Prof. See says, were at one time planets which moved about the sun as other planets do, but later were captured by Jupiter and made to revolve about him as his satellites. Our moon too was at one time a planet, but was subsequently captured by the earth and made to revolve about the earth as a sort of servant for the earth—a servant which is now made to light up the earth's night by the reflected light of the sun.

According to this new theory then the planets which have been captured by the sun from the outer parts of the solar nebula are in no sense of the word children of the sun; and the satellites which have been captured by the planets are not children of the planets and grandchildren of the sun, but are captured bodies which originally were independent planets moving in regular elliptical orbits about the central mass of our system and were subsequently captured by the planets about which they now revolve as satellites.

Prof. See's recent book, "The Capture Theory of the Cosmical Evolution," is the result of over twenty years of labor. Before the publication of the book much of its contents had been made known through public lectures by Prof. See and through articles by him printed in magazines and periodicals, and had already been approved of by leading astronomers, both American and foreign. Prof. H. Ludendorff of the Astrophysical observatory at Potsdam, says that this new theory "will mark an epoch in cosmogony;" Prof. Elis Stroemgren, director of the observatory at Copenhagen, says: "It revolutionizes our thought in many lines." Prof. H. Poincaré of the University of Paris, who until recently maintained the old theory, says that he is now advocating Prof. See's theory in his lectures before his classes in astronomy at the University of Paris.

The adoption of Prof. See's theory by so many eminent astronomers makes it of interest to know more about the man who has proved this new theory. Many know the name of T. J. J. See as that of a prominent government astronomer, but few know many of the details of his life or how he has done in the short space of twenty-two years a vast amount of work.

Prof. See is a native of Missouri. His first American ancestors came from Prussian Silesia in 1734, settled in Pennsylvania and removed to Virginia in 1745. Several members of the See family were prominent in the war of the Revolution and the War of 1812. Part of the family removed to Missouri in 1837. Prof. See, a member of that branch of the family, is the third son and sixth child of a family of nine.

His father, Noah See, who died in 1890, was a remarkable man of natural mathematical ability and highly accomplished as a civil engineer and architect. He became a wealthy land holder by strictly legitimate industry and frugal habits. He was twice elected county surveyor of Montgomery county, and served for over thirty years as Bridge Commissioner.

The astronomer's mother's maiden

name was Miss Mary A. Sailor. Her parents came from Kentucky to Missouri in 1823. She still lives at the old country place in Montgomery county, Missouri, is in the eightieth year of her age and is a woman of great force of character. Naturally she is proud of her famous son, but she is not the only one who is proud of him. All of Prof. See's boyhood acquaintances and others who live in the vicinity of his old home take pride in honoring him. When he lectured in May, 1911, at Montgomery City, the county seat of his native county, the largest auditorium of the town was crowded to overflowing. Most of the county folk for miles around gathered there to give him welcome.

In personal appearance Prof. See is a commanding figure. He stands six feet four inches in height, a veritable Western giant. When he entered the University of Missouri as a freshman in the fall of 1885 he might have been selected as good material for the "gridiron," but football had not at that time become a fad at that institution.

But if he had been selected for an honor of that sort he would have declined. He has never had any inclination to the strenuous side of life. His manners are simple and refined. During his undergraduate days at the University of Missouri he was popular among the students. He took an active interest in debates and oratorical contests, and when he was graduated in June, 1889, with the degrees A.B., S.B. and L.B., cum laude, he won the Laws medal in mathematics, an honor to which only those are eligible who make distinction in all courses in science and mathematics.

It was during his undergraduate days that he attracted the attention of David R. Francis, who was then Governor of the State of Missouri, and of Champ Clark, who was a member of the Legislature of that State and who was representing the district which included the future astronomer's native county. He and the two noted Democratic leaders have ever since been intimate friends.

Immediately after Mr. See was graduated from the University of Missouri he went to Germany, and in the fall of 1889 he entered the University of Berlin. His career as a student at that university was even more distinguished than it had been at the University of Missouri. Here he wrote his celebrated work, "The Origin of Double Stars," which was submitted as a thesis for his doctor's degree in 1892. It was the excellent work that he did in the writing of this thesis that established his reputation. Even Emperor William was told by the director of the Royal Observatory of the work done at the observatory in the preparation of this thesis by the American astronomer.

The first work that Prof. See did after leaving Berlin was to organize the department of astronomy at the University of Chicago and to assist in organizing plans for the work at the Yerkes Observatory near Chicago. After remaining in charge of the work in astronomy at the University of Chicago for two years he resigned in order to join Prof. Percival Lowell at Flagstaff, Ariz. Here he made an extensive survey of the double stars, in the southern hemisphere. In 1898 he lectured at the Lowell Institute, Boston, Mass.

When President McKinley's attention was called to this series of lectures, he immediately appointed Mr. See professor of mathematics in the United States navy, a position which he still holds. During the three years he was connected with the naval observatory at Washington he measured all the planets and satellites of the solar system and obtained results which have been recognized the world over.

At the recent Monist Congress in Hamburg, Prof. Svante Arrhenius of Stockholm, who delivered the prin-

cipal address of that occasion, dwelt at length on the discoveries of Prof. See as taking the first place in the new philosophy of our time. But this noted astronomer is not alone in recognizing the merits of the capture theory. Similar recognition has been extended to the work of the distinguished American astronomer by French, by English, by Germans, by Norwegians, by Dutch, by Danes, by Russians, by Swiss and by Italians. The capture theory of cosmical evolution is now established. It has been established by mathematical proof, while Laplace's theory, which is now being discarded, has never been anything but an hypothesis.

The French, who would, everything being equal, naturally adhere to the teaching of their own countryman, have discarded the Laplace theory and are now following the lead of their greatest living astronomer, Prof. H. Poincaré, who recently adopted Prof. See's theory.

In England a little jealousy was aroused when Prof. See overthrew the theory of Lord Kelvin and Sir George Darwin on the origin of the moon. But this little jealousy has practically been put aside, as is made evident by the fact that the capture theory was approved of by the late Sir William Huggins, ex-president of the Royal Society of London, and has more recently been adopted by Prof. Dysen, Astronomer Royal for Great Britain, and by Prof. Klotz of the Dominion Astronomical Bureau at Ottawa, Canada.

Since the capture theory has been approved of by so many, and has been adopted by so many eminent astronomers, as a practical theory of the solar system, on which they are now basing their work, it seems to have marked an epoch in the science of astronomy, scarcely secondary to that made by Copernicus, by Kepler or by Newton. Out of the chaos so long existing in cosmogony Prof. See has created a most beautiful science.

As a pure astronomical science it will probably be ranked as the first to be developed by an American. Prof. William B. Smith of Tulane University, in praise of the capture theory, calls it "majestic, magnificent—a monument more lasting than brass, more lofty than the kingly form of pyramids." Speaker Champ Clark, who was at one time an instructor in a college, and who still finds time even when he is in the busy whirl of politics, to turn aside for the nonce and take an interest in anything that is new or progressive in science, refers to Prof. See as the "American Herschel —the greatest living astronomer."

RECENT VISITORS TO M. U.

The University of Missouri has attracted capitalists from New York, famous educators from all over the world, governors, senators, scientists and renowned lecturers to Columbia in the last three years—all just to instruct and amuse the 2500 students during the convocation hour twice a week. Of course a world celebrity cannot be found in Columbia twice every week in the year, so the University usually has to resort to its own talent between 10 and 11 o'clock Tuesdays and Thursdays when the students congregate to hear the University news and announcements.

The conferring of honorary degrees has been responsible for the visits of a number of celebrities. The late Mark Twain was thus honored in 1902. Thomas H. Benton, former United States Senator, received the same degree in 1847, four years after the University was founded. The

same degree has been given to four Missouri governors; David R. Francis in 1891, W. J. Stone in 1893, J. W. Folk in 1906 and Herbert S. Hadley in 1910. Others who have received the degree are: Elmer Bragg Adams of St. Louis, United States circuit judge; W. K. Bixby, St. Louis manufacturer and capitalist and vice-president of Washington University; R. S. Brookings, St. Louis merchant; Norman Jay Colman, journalist; F. W. Lehman of St. Louis, solicitor general of the United States.

HADLEY CAME THROUGH MUD.

When Governor Herbert S. Hadley received the degree in June, 1910 the University commencement exercises were held until 1 o'clock in the afternoon for the governor to get here. A railroad wreck caused the governor to drive from Jefferson City in an automobile. He was a mud-bespattered governor when he did arrive.

E. St. Elmo Lewis, Thomas Balmer, William C. Hunter, M. P. Gould, Walter G. Bryan and Herbert Kaufman, all advertising men of national repute, have made addresses on advertising topics before the students.

Walter Wellman, Washington correspondent, Artic explorer and airman, who attempted to fly across the ocean in 1910, made an address before the students in February, 1909 on "The Washington Correspondent."

C. P. Steinmetz is, perhaps, the most widely known engineer who has visited the University. He is the author of several books on engineering besides being consulting engineer for the General Electric Company at Schenectady, N. Y. He made an address at the University January 7, 1910, on "The Law of Conservation of Energy and Conservation of Matter.

MANY EASTERN EDITORS.

J. G. Schurman, president of Cornell University and professor of philosophy, made an address December 10, 1908 on "The Ideal of a University in Its Historical Development and Modern Significance."

The School of Journalism has brought several widely known visitors in the last four years. Will Irwin, a magazine writer, and Arthur Brisbane, editorial director of the Hearst newspapers, both wrote articles about the University after their visit. Mr. Irwin wrote on the School of Journalism. Chief Josephine got her first national reputation through Mr. Brisbane's editorials about her. Among the other journalist visitors are Oswald G. Villard, editor of the New York Evening Post; Charles H. Grasty, editor and proprietor of the Baltimore Sun; Norman Hapgood, editor of Collier's Weekly; Samuel Bowles, editor of the Springfield Republican; George S. Johns, editor of the St. Louis Post-Dispatch,; Henry King, editor of the St. Louis Globe-Democrat; Hamilton Holt, editor of the New York Independent.

C. F. M.

M. U. ATHLETICS FOR GIRLS

In few things is the University girl willing that her brother should surpass her. From a possible endeavor to turn Phi Beta Kappa into a feminine bridge party to a series of inter-class games of basketball, her interest in the various phases of University life is not to be ignored.

The popularity of athletics for women has kept proportionate pace with the progress of the higher education for women. The ultra-lady-like girl who, when she sauntered forth for a gentle game of croquet, must wear kid gloves and a veil and be attended by a gallant carrying a sunshade lest a horrid freckle mar her dainty nose, has disappeared. In fact, she was never very much in evidence in University life. She usually preferred to spend her time at home, surrounded by water-color sketches of her own make, spending her time in intricate embroidery stitches, and pursuing, either with or without piano accompaniment, Gottschalk's (or anybody else's) "Last Hope," till she finally managed to land him.

GIRLS FIRST PLAYED TENNIS.

The girl who started out to obtain a higher education had other ideals. She found that those work best who play hardest, and that athletic exercises stimulated the mental powers. Besides that, she had begun to enjoy athletics. Being no longer dependent upon her personal appearances alone for her hopes of happiness in this life, she rolled up the sleeves of her blouse, donned shoes that made her feet look exactly twice as large, thrust in an extra hatpin or so, picked up a racket and sallied forth as a tennis player. And she often became a good player, too, as dazed young men who tolerantly offered to teach her the game afterward learned.

At the University of Missouri there were athletic organizations among the girls for years before there was a department of athletic instruction in the University. It is only very recently that gymnasium exercises have been compulsory for any of the girls.

In 1894 there was a regular athletic organization with a teacher in charge. Three years later, in '97, military drill was required of all the girls. They drilled, marked-time, marched and counter-marched in much the same way that their brothers did. Their uniform was a suit, with coat and short skirts, and a cap like that the boys wore, and the guns that the boys carried were borrowed for the girls' drill on alternate days of the week. A picture taken of the girls while drilling is interesting, showing the statuesque pose and the dignified air that seems to be assumed with the symbolic military caps. Miss Bee Brandenburger, a graduate of the University who is now a successful teacher in the state, was the captain of the corps.

PLAYED OUTSIDE TEAMS.

In 1899 the women, as well as their brothers, had an equipped gymnasium. In that year one hundred women were enrolled in the gymnasium classes. Prof. Y. P. Rothwell was athletic instructor for both the men and the women of the school.

In 1900 the University girls had a series of basketball with the two girls' colleges in Columbia. This was the beginning of a number of games with other colleges and universities. Several intercollegiate games were played, both in Columbia and in other college towns, by the basketball teams. The intercollegiate games, however, were not considered satisfactory by the athletic

instructors, as they tended to train a few of the girls for a public contest, rather than to improve the general physical strength of all girls in the University.

At the present time, gymnasium work is required of all freshmen, and open to all girls. The Women's Athletic Association, a voluntary organization to which all University women may belong, has as advisers and trainers the instructors in gymnasium work. The present Athletic Association is ambitious for many things in the promotion of athletic interests and physical training among University girls. With the co-operation of all girl students it can do much for the University girl in the encouraging of active, helpful and healthful athletics.

J. M. McD.

BUILDING STATE CAPITOL

Missouri's new state capitol is to be built under the direction of a commission headed by an alumnus of the University of Missouri, E. W. Stephens of Columbia. Mr. Stephens received an A.B. degree in '67, an A.M.in '70, and the honorary LL.D. in '05.

The new capitol will be the finest in the United States, Mr. Stephens believes. In talking recently of the plans just accepted, Mr. Stephens said:

"I do not mean that the structure will compare with the big buildings in size," said Mr. Stephens "but I think it will be more imposing than any other capitol building. W. B. Ittner of the advisory board of architects, which helped the commission select the plans, thinks the same thing. Mr. Ittner says that he did not know there was a firm of architects anywhere that could design such fine plans as have been selected as the plans for Missouri's capitol building.

"The building will be 420 by 220 feet in size and the dome will rise 232 feet above the ground floor. The main part of the building will be 88 feet high. It will be in the exact geographical center of the capitol ground and the main entrance will face south. The rear entrance will be on the north, facing the river.

"The new capitol will be more than four times the size of the old one. It will have a sub-basement, basement and three stories above. It is much smaller than buildings called for by some of the other plans submitted.

"The architects estimate that the cost of the building will be about $2,200,000. It can be built very economically, considering its size and magnificence.

"A 30-foot stairway leads up to the building and a flood of light from the dome will attract the attention of the visitor as soon as he enters. The executive offices are on the first floor, while the legislative halls are on the second. The governor's office will be on the north side of the building, facing the river."

Mr. Stephens says that the capitol commission is making plans for a historical museum to occupy the basement of the building. "It will be a fine place to exhibit Missouri's resources and to preserve relics of its past," he said.

A driveway will run under the building and automobiles and other vehicles can go under it without difficulty.

The main floor of the building will be fifteen feet above the level of the ground. The approach will be very imposing, according to Mr. Stephens.

Missouri limestone will be used in

the construction of the building, but it is not known as yet where the stone will come from.

"The building will be built of Missouri materials throughout," said Mr. Stephens. "There will be engaged columns between the windows all around the building and all the way up. The structure will be in the shape of a rectangle.

"The architects seem to have provided for everything imaginable. I am almost led to believe that the plans are too good to be carried out. The railroad tracks back of the building are to be covered with concrete, doing away with all the dirt and noise. This will enable one to get off a steamboat at the river bank and walk up to the capitol. A series of walks and drives around the grounds has already been planned and the surroundings of the building will be as beautiful as the structure itself.

"I think the edifice will be completed within four years and that it will be occupied before the close of the next state administration."

WHERE STOCK JUDGERS ARE

What the men who have composed the live stock judging teams at the University of Missouri since 1904 are doing now is printed here from information gathered for the Alumnus by R. L. Hill, editor of Animal Husbandry, and S. T. Simpson. Each of the teams was coached by Prof. E. A. Trowbridge. There was no team in 1906.

1905

C. B. Hutchison, assistant professor of agronomy at Missouri.

C. G. Starr, farming, Centralia, Mo.

H. P. Rusk, associate in animal husbandry, University of Illinois, Urbana.

T. E. Woodward, U. S. Department of Agriculture, Washington, D. C.

E. W. Rusk, manager of A. S. Burr estate, Bement, Ill.

1907

M. G. Coe, farming, Bend, Ore.

S. D. Dow, farming, Sedalia, Mo.

W. R. Cockefair, farming, Warrensburg, Mo.

D. H. Doane, professor of farm management at Missouri.

E. J. Rhodekohr.

Maurice Field, farming, Higginsville, Mo.

1908

H. P. Griffin, manager Pitchfork Ranch, Meeteetse, Wyo.

T. R. Wright, instructor in animal husbandry, Kansas State Agricultural College, Manhattan.

W. L. Fowler, assistant professor of animal husbandry, University of Arizona, Tucson.

H. E. McNatt, assistant in dairy husbandry, University of Illinois, Urbana.

E. C. O'Neal, farming, Paris, Mo.

E. S. Vanatta (alternate), Missouri State Soil Survey, Columbia.

J. E. Ryland (alternate), farming, Harrisonville, Mo.

1909

H. Hackedorn, instructor in animal husbandry at Missouri.

L. A. Weaver, instructor in animal husbandry at Missouri.

B. P. Smoot, farming, Centralia, Mo.

C. M. McWilliams, county adviser, Cape Girardeau, Mo.

J. E. Ryland, farming, Harrisonville, Mo.

W. S. Williams (alternate), farming, Belton, Mo.

T. R. Douglass (alternate), instructor in agronomy at Missouri.

1910

W. R. Hechler, assistant professor of field crops, Ames, Iowa.

W. S. Williams, Belton.

T. R. Douglass, Columbia.

G. S. Templeton, assistant professor of animal husbandry, Texas Agricultural College, College Station.

S. T. Simpson, assistant in animal husbandry at Missouri.

Stockton Fountain (alternate), farming, Centralia, Mo.

F. M. McCroskey (alternate), managing farm near Springfield, Mo.

1912

T. R. Haden, assistant in animal husbandry, Clemson College, South Carolina.

W. T. Wasel, student at Missouri.

G. T. Lipp, farming, Paris, Mo.

E. C. King, farming, Sweet Springs, Mo.

Alonzo White, farming, Palmyra, Mo.

H. F. Williams, Michigan Agricultural College, West Lansing.

R. E. L. Hill, graduate student at Missouri.

W. E. Cromer, student at Missouri.

OKLAHOMA REUNION

Twenty-four loyal Missourians participated in the second annual reunion and dinner of the Oklahoma Association of University of Missouri Alumni in Oklahoma City, December 27. What the reunion lacked in numbers it more than made up in enthusiasm. The reunion suffered because of several circumstances that could not have been foreseen. A number of alumni arranged to attend a banquet given by the Missouri Teachers' Club which was held at the Skirvin Hotel at the same hour as the alumni banquet. Others who might have attended were prevented from doing so from various causes.

Redmond S. Cole of Pawnee, of the class of 1905, acted as toastmaster. A number of delightful toasts were given. The unexpected appearance and the highly appreciated toast by Prof. James K. Hosmer was the feature of the evening. The professor has passed his eightieth milestone but in his speech he completely captivated those present. The professor was born and reared in the atmosphere of culture and refinement, having for his teachers such men as Longfellow, Bryant, Agassiz and Horace Mann. His father before him was a college man, being president of Antioch College. Professor Hosmer is an alumnus of Harvard. He came to Missouri in 1872 but remained only two years. He then faithfully served Washington University for eighteen years.

The following toasts were given at the banquet: "President's Address," Judge J. F. Sharp, '89, Purcell; "The Old Gold and Black," Prof. J. F. Paxton, '91, Norman; "The University Man as a Citizen," Judge J. F. King, '82, Newark; "Auld Lang Syne," Dr. James K. Hosmer, Oklahoma City; "The Columns," Prof. L. N. Gray, '91, Idabel; "The Old Campus," Judge B. M. Dilley, University of Missouri Curator 1889-1893, Oklahoma City: "Reminiscences," Frederick B. Owen, '03, Oklahoma City.

At the business session held immediately after the banquet the following officers were elected for the ensuing year: President, R. A. Kleinschmidt, Oklahoma City; vice-president, Mont F. Highley, Oklahoma City; treasurer, P. W. Bonfoey, Oklahoma City; secretary, Redmond S. Cole, Pawnee; executive committee, R. A. Kleinschmidt, W. F. Wilson, P. W. Bonfoey, Judge B. M. Dilley, Walter A. O'Banion, all of Oklahoma City; Judge J. F. King of Newkirk and Redmond S. Cole of Pawnee.

It was the view of all those present

that the reunions be made permanent and steps were taken at once to increase the attendance at the 1913 meeting. In addition to those already named the following were present:

Mr. and Mrs. W. F. Wilson, Oklahoma City; M. A. Floyd, Norman; Miss Edith Allen Phelps, Oklahoma City; C. M. Lieb, Henryetta, Mrs. L. N. Gray, Idabel; Edwin R. Barth, Oklahoma City; Mr. and Mrs. Mont F. Highley, Oklahoma City; C. F. Fulton, Randlett; Mr. and Mrs. D. R. Bonfoey, Oklahoma City; Mrs. W. A. O'Banion, Oklahoma City. C.

AROUND THE COLUMNS

Football With Illinois U.

Missouri's first football game with a Big Nine team will be October 11, this year, with the University of Illinois team at Champaign. A two-year contract has just been arranged with Illinois. This will bring the Illinois team to Columbia in 1914.

As the football schedule stands now, Missouri will play five games on Rollins Field and three away from Columbia. The five games here are: Drury, Rolla, Oklahoma, Drake and Kansas. Those on other gridirons are: Ames, Washington and Illinois.

Win First Two in Basketball.

The first two Conference games in basketball were easy victories for the Tigers, against Ames. The score of the first was 28 to 14, and of the second 25 to 13. These victories, however, will not be considered in deciding the Conference championship as Ames is in the northern division.

Although Captain Edwards was out of these games because of an injured leg, the Tigers out-classed their opponents in each contest. At the end of the first half in the first game the regular Tigers were taken out and substitutes put in.

Missouri's line-up was: Craig and Taaffe, forwards; Bernet, center; Palfreyman and Stern, guards, and Goldman, Marcom, Carson and Brodie, substitutes.

The opening game of the season for the Tigers was with Central College. It was an easy victory for the Tigers; the score was 39 to 24.

The game with the Warrensburg five, coming second on the schedule, was not so easy. The score was Missouri 23, Warrensburg 22. The Tiger line-up against Warrensburg was: Craig and Taaffe, forwards; Bernet, center; Palfreyman and Capt. Edwards, guards.

A Meet With Minnesota U.

The University of Minnesota track team will meet the Tiger team in Columbia, April 12. The arrangement for the meet was announced recently. The first time Missouri met a "Big Nine" team was the Illinois meet on Rollins Field last spring. This year offers of indoor meets were received from Illinois and Wisconsin, but Prof. C. L. Brewer preferred the one with Minnesota.

The indoor schedule is:

March 7—K. S. A. C. at Kansas City.
March 14—K. U. at Kansas City.
March 15—M. A. C. at St. Louis.

The schedule for outdoor meets is:

April 12—Minnesota at Columbia.
April 19—Drake relay games at Des Moines.
April 26—Pennsylvania U. Intercol-

legiate meet, Missouri invited to send representatives.

May 3—Annual High School Day.

May 17—Kansas at Lawrence.

May 31—Conference Meet in St. Louis.

June 7—Western Conference meet at Chicago.

Special preparations will be made this year for training the track men for the indoor meets at Kansas City and St. Louis. Just west of the gymnasium a wooden track will be built, duplicating so far as possible the track in Convention Hall, Kansas City; it will be twelve laps to the mile and will have a sixty-yard straight-away. This will enable the men to train in regular indoor track shoes, while in former years they have trained in tennis shoes and then run in the meets at Kansas City with indoor shoes.

Biggest Farmers' Week Crowd.

Farmers' Week at the University this year, which closed with a big banquet January 17, drew the largest crowd which has ever attended these meetings. There were farmers present from 104 of the 114 counties in Missouri, and from twelve states. The total number of visitors who registered was 1581. Many more graduates and former students in agriculture attended the meetings this year than before, it is said.

A Trip for Mandolin Club.

The University Mandolin Club will play in several cities in the state the latter part of February. Already concerts have been arranged for in Kansas City February 22, Lexington and Slater, February 24 and 25. Other places being considered are Sedalia, Liberty, Joplin, Kirksville, and St. Louis.

A Journalism Scholarship.

The Eugene Field scholarship in journalism was accepted by the Board of Curators at their meeting in January. The funds used for the scholarship were collected several years ago, through the efforts of J. West Goodwin of Sedalia and others, to build a memorial to the poet at the University. The form the memorial was to take was not decided upon until at a recent meeting of the directors. The directors of the fund are: Mr. Goodwin, W. O. L. Jewett of Shelbina, Gardiner Lathrop of Chicago, John R. Kirk of Kirksville, R. M. White of Mexico, W. E. Spratt of St. Joseph, and Walter Williams of Columbia.

$10,000 Profit in Football.

This year's football season netted the University a profit of approximately $10,000, according to the financial report. The total receipts reached nearly $18,000.

The Kansas game brought in the largest receipts for Missouri, $9,648.63. This is 50 per cent of the total receipts of the game. Sixty per cent of the activity ticket proceeds was given to the football fund. This amount is $3,202.56. The Nebraska game gave the largest profit other than the Kansas receipts, the amount being $1,156.

The profits of football are the largest in the last five years, with the exception of 1910, when they were more than $11,000. The expenses this year were more than $2,000 less than for any other year in the last five, and $6,000 less than in 1909.

The expenses were divided among equipment, advertising, doctor's bills, miscellaneous, about $2,000; officials, about $500; visiting teams, about $2,900; expense of trips, $2,200.

Nebraska was paid $881, the largest amount to any visiting team. Ames received $775. Each visiting team received 50 per cent of the receipts, minus one-half the expenses of the officials, with the exception of Central and Rolla, which received a straight guarantee.

The receipts of the games this year

were as follows: Central, $270.25; Rolla, $302.15; Ames, $1056.50; Nebraska, $1136.50; Washington, $973.50; Oklahoma 1063.35; Drake, $769.75; Kansas $9649.63. The sale of score cards and privileges, freshman games and refunds brought in $151.55, and the activity tickets gave to the football fund $3202.56.

Kappa Alpha House Burns.

The roof, third floor, and part of the second floor of the Kappa Alpha fraternity house at 713 Hitt street was burned January 11. The house was rented by the fraternity, and the owners had insurance to cover the loss on it. The furniture loss also was covered by insurance. The men living in the house lost about $1200 in personal property. The fire was first seen about 11 o'clock Saturday night. There was the usual perfect attendance of students.

Instructor Now Citizen of U. S.

M. P. Weinbach, a native of Roumania, instructor in electrical engineering at Missouri, received the naturalization papers which make him a citizen of the United States from the circuit court in Columbia in January. Mr. Weinbach has been in this country ten years, and has been teaching in the University about five years. His parents and relatives live in St. Louis.

Two Into Phi Mu Alpha.

Dr. Walter Miller and Hugh J. MacKay were recently initiated into Phi Mu Alpha, the musical fraternity.

Christmas Spirit at M. U.

The members of the Kappa Alpha Theta sorority showed their Christmas spirit by lending their chapter house during the recent holidays to the girl students who remained in Columbia. All the members of the sorority were at their homes, and the house was placed in charge of an officer of the Y. W. C. A. Fifteen girls who remained here through the holidays lived in the house and had Christmas dinner together there.

Delay in New Buildings.

The new Chemistry building at the University of Missouri will not be occupied until next fall. It will probably be ready for occupancy sometime the second semester, but it will not be practical to move into it in the semester.

The new Physics building is nearer completion. It will be occupied very soon after the beginning of the second semester this year. A delay in this building has been caused by the slate for the roof not reaching Columbia when it was expected. Practically all the plastering, wiring, and plumbing are finished.

Lieut. Eby Is Commandant.

Charles McH. Eby, first lieutenant in the Twelfth Cavalry, is the new commandant of cadets at Missouri. He was ordered here to take the place formerly occupied by Lieut. Ellery Farmer.

More Time Between Classes.

Class periods at Missouri will begin ten minutes after the hour, beginning the second semester, according to a rule recently passed by the faculty. This gives ten minutes between classes instead of the five minutes formerly given.

Forestry Professor Leaves M. U.

J. A. Ferguson, who has been head of Missouri's forestry department since its establishment two years ago, left in January to become dean of the forestry school at Pennsylvania State College. Professor Ferguson came to Missouri from Pennsylvania State.

NEWS OF ALUMNI

Alumni in Missouri Legislature.

Only nine of the members of the present General Assembly of Missouri are graduates of the University of Missouri. Doubtless many times this number have attended the University, but the present records in the alumni office include only those persons who have received degrees.

Eight of these nine members are graduates of the School of Law. They are: Walter C. Goodson, '99, of Macon, and Albert E. L. Gardner, '91, of Kirkwood, both in the Senate; and the representatives are O. H. Swearingen, '97, of Kansas City; Lucien B. Baskerville, '04, of Montrose; Floyd S. Tuggle, '06, of Gallatin; Frank G. Harris, '98, of Columbia; N. M. Houx, '88, of Lexington; Madison C. Schofield, '99, of Hannibal, and M. D. Watson, '07, of New London. Mr. Tuggle is the only member who is not a law graduate. Mr. Swearingen is chairman of the appropriations committee.

Holds Down St. Louis Lid.

Thomas L. Anderson, LL.B.'88, has been appointed excise commissioner of St. Louis by Governor Major. Here is part of what The Republic said in announcing the appointment:

"Just as soon as the Senate confirms Gov. Major's appointment of Thomas Lilbourne Anderson as excise commissioner, 206 pounds of Pike County advoirdupois is going to plump down on the St. Louis lid and hold it stationary for four years.

"Mr. Anderson carries with him into his new position eight years of experience gained while he was city attorney of St. Louis, and was brought in close contact with the saloon problems and its attendant complexities."

Wants Woman School Directors.

Mrs. George A. Still (Ethel A. Dockery), A.B.'01, is working for the introduction in the present session of the Missouri legislature of a bill to admit women to membership on school boards in this state. Mrs. Still's home is at Kirksville. She is chairman of the department of legislation of the Missouri Federation of Women's Clubs.

"Bottles" Burress at Assembly.

W. B. ("Bottles") Burress, A.B. LL.B.'02, was the speaker at the regular University assembly January 9. His subject was "Opportunities in the Insurance Field." Mr. Burress has been in the life insurance business about ten years. He is now a general agent in Virginia. He is thinking now of locating at Springfield, Mo., and continuing his insurance business.

M. A. Pyles Undergoes Operation.

M. A. Pyles, LL.B.'09, who has been practicing law at Muskogee, Okla., underwent an operation in December at the Mayo Brothers hospital in Rochester, Minn.

On Big Missouri Dam.

T. O. Kennedy, '08, School of Engineering, who has been working for the Henry L. Doherty Company of New York, has had active charge of the construction of a dam being built on the White River in Taney county, Missouri, for the last year. The dam is being built for the Ozark Water and Power Company. It will cost $1,500,000 when completed. The powerhouse at the dam will supply electrical power for distribution in

Springfield and Joplin and is one of the biggest propositions of its kind ever undertaken in Missouri.

L. P. Scott, engineer'10, is employed as one of the draftsmen on the job. Working under Mr. Kennedy are graduates from Boston Tech and many other schools of engineering.

The Prosecuting Attorneys.

Floyd E. Jacobs, A.B. LL.B.'08, who became prosecuting attorney of Jackson county, Missouri, the first of the year, selected as three of his eight assistants graduates of the Missouri Law School. They are Virgil Yates, '09, Roscoe Conkling, '12, and Ralph S. Latshaw, '12.

Jesse M. Owen, LL.B.'98, has just taken up the duties of prosecuting attorney of Franklin County. His home is at Union, Mo.

George S. Starrett, LL.B.'09, was appointed assistant prosecuting attorney of Boone County, Missouri, the first of the year.

J. D. Elliff Returns.

J. D. Elliff, A.B.'03, A.M.'07, inspector of high schools for the University, has just returned from New York City where he has been attending Columbia University the last semester.

Returns from Germany.

H. O. Schwabe, A.B.'09, who has been studying in Germany, has returned from abroad and is now at the University of Chicago. His address is 119 Middle Div. Hall.

C. B. Davis in New Law Firm.

Charles B. Davis, A.B.'02, LL.B.'05, is a member of a new law firm announced in St. Louis the first of this year. The firm is Falkenhainer, Rudolph & Davis, and their offices occupy Suite 510-514 Times Building.

On the Governor's Staff.

Joseph T. Davis, LL.B.'04, of St. Louis, was chosen as a colonel on the personal staff of Governor Major of Missouri. Mr. Davis was a candidate for the nomination for attorney-general on the Democratic ticket.

Graduate Women Elect.

The women of the Graduate School have chosen Miss Sophie Hersch president of their organization. Miss Eva M. Marquis was selected as representative on the Women's Council.

Two Locate in Kansas City

Marshall Neal, a former student and member of Sigma Alpha Epsilon, recently went into business as secretary of the Kansas City Terra Cotta & Faience Company, a newly formed corporation in which he is one of the principal stockholders.

George Lockridge, LL. B. '12, is practicing law with the firm of House and Manarel, in the Commerce Building. Lockridge is a member of Phi Delta Theta and Phi Alpha Delta legal fraternity.

BIRTHS

Mr. and Mrs. Walter Stemmons announce the birth January 2 of a son, to whom they have given the name Ralph Davis. Mr. and Mrs. Stemmons are both former students at Missouri. Mr. Stemmons received a B.S. in Journalism in 1912; he was editor of the Savitar in 1909. Since his graduation he has been city editor of the Joplin News-Herald until the first of this year when he accepted the position of college editor at the Agricultural and Mechanical College at Stillwater, Okla.

WEDDINGS

Forrest C. Donnell, '07.

Forrest C. Donnell, A.B.'04, LL.B. '07, was married January 29 to Miss Hilda Hays, a daughter of Mr. and Mrs. Frank P. Hays of St. Louis. Mr. Donnell is a member of the law firm of Spencer & Donnell. Miss Hays is a graduate of Christian College.

Jefferson B. Kennedy, '08.

Jefferson B. Kennedy, B.S. in E.E. '08, and Miss Edna Buchanan were married January 2 at the home of her parents in Portland, Ore. Mr. and Mrs. Kennedy will live in Boise, Idaho, where he is an electrical engineer with the Beaver River Power Company.

Miss Elida C. Kirchner, '02.

Miss Elida C. Kirchner, A.M.'02, and Hugo Muench were married January 8 in St. Louis. They will be at home in St. Louis after May 1.

C. M. McWilliams, '11.

C. M. McWilliams, B.S. in Agr.'11, was married January 1 to Miss Agnes Morton of Jackson, Mo. They will make their home at Cape Girardeau, Mo., where he is county farm adviser.

Mr. McWilliams is a member of Alpha Zeta, an honorary fraternity in the College of Agriculture; was a member of the stock judging team in 1909 and won the $50 prize at the American Royal Show in Kansas City for the highest individual score.

Frederick D. Richards.

Frederick D. Richards, a student in the College of Agriculture about five or six years ago, was married recently to Miss Hazel Grace Clough at South Orange, N. J. Mr. Richards is in agricultural work with the government at Washington, D. C.

William F. Switzler, '00.

The engagement of William F. Switzler, A.B.'00, of St. Louis, and Miss Maud Marine Biddle was announced recently.

Miss Laura Snodgrass, '11.

Miss Laura Snodgrass, A.B., B.S. in Ed.'11, was married December 19 in Kansas City to Dexter W. Hewitt. They will be at home after May 1 at Mont Claire, N. J.

Charles G. Dunwoody.

Charles G. Dunwoody, a student at Missouri last year and a member of the Sigma Nu fraternity, and Miss Marguerite Morris of Victoria, Texas, eloped to Winchester, Ky., January 6 and were married there. Mr. Dunwoody was attending Kentucky University and Miss Morris was a student at Sayre College, at Lexington, Ky. They visited in Columbia about a week later.

Miss Clara Vivian Miller, '12.

Word has just reached The Alumnus of the wedding last July of Miss Clara Vivian Miller, B.S. in Ed.'12, to Clifford A. Nichols. Mr. and Mrs. Nichols are now living at Millersburg, Pa.

W. H. Gregory.

W. H. Gregory, a student at Missouri in 1910-11, and Miss Frances Marie Bassett of Paris, Mo., were married in December. Miss Bassett was graduated from Christian College last June. Mr. Gregory is a member

of the Sigma Chi fraternity. They will live in St. Louis.

Miss Gertrude Crowell.

Miss Gertrude Crowell, a sophomore in the College of Arts and Science, and Walton Allen of Butler, Mo., were married in Kansas City in December. Miss Crowell left school three or four days before the wedding, telling her friends she was ill and was going to her home in Butler. She is a daughter of Frank H. Crowell, a member of the Board of visitors of the University.

Dr. Virgil Loeb, '03.

Dr. Virgil Loeb, A.B.'03, of St. Louis, was married to Miss Theresa Meltzer of Newark, N. J., in January. The ceremony was performed at the Hotel St. Regis in New York City. Dean Isidor Loeb of the University of Missouri, a brother, was best man. Dr. and Mrs. Loeb will be at home in St. Louis after a wedding trip in the South.

DEATHS

Mrs. John W. Norton, '81.

Mrs. John W. Norton (Mary Ruth Moore), B.S.'81, died December 7, in Los Angeles, Cal., where she had been the last year on account of ill health. The funeral was from the home of W. S. Norton at Liberty, Mo. Mrs. Norton's home was in Kansas City.

A daughter, Louise Ruth Norton, was graduated from Missouri in 1910.

Thomas W. Shastid, '56.

Thomas Wesley Shastid, M.D.'56, died in a Chicago hospital December 6, 1912. He was 81 years old. His home was in Pittsfield, Pike County, Illinois, and he was the oldest practitioner in the county.

IN ST. LOUIS

By LOUIS B. PORTNER

We were recently honored by the election of William T. Jones, Arts,'96, and Irvin V. Barth, Arts,'97, Law,'99, to the circuit bench on the Democratic ticket. Judge Jones is a member of the law firm of Carter, Collins, Jones & Barker with offices in the Third National Bank Bldg. Judge Barth is the junior partner in Leahy, Saunders & Barth, whose offices are in the Bank of Commerce Bldg.

George H. Moore, Law,'02, exercised an important influence in the 1912 campaign as president of the Young Men's Democratic Club. He is prominently mentioned as President Wilson's probable choice for U. S. District Attorney. He has a law office in the Rialto Bldg.

Marvin E. Boisseau, Arts,'09, Law, '12, is with Eliot, Chaplin, Blayney & Bedal in the Third National Bank Bldg. Boisseau is a member of the Kappa Alpha fraternity.

"Tod" Curtis, who was in the engineering school from '08 to '11, and who became famous because "Bill" Roper discovered him and made him an all Missouri-Valley half-back, is with the Bell Telephone Company here. Osmer N. Edgar, Eng.'11, is with the same firm.

Arthur M. Idler, Law,'11, Kappa Alpha, is practicing law in the office of Judge John M. Wood in the Merchants-Laclede Bldg.

Albert M. Schweitzer, Law,'11, is a claim attorney for the Ocean Accident & Guaranty Corps with offices in the Pierce Bldg.

"Dave" H. Leitch, a former student in the law school at Missouri has resigned his position as a salesman for the American Tobacco Company in Detroit and has taken up his residence here again. Dave was a Beta Theta Pi and was in school from 1908 till January, 1911.

COMMUNICATIONS

Coming Back in June.

The Alumnus: So many things do you people of the Alumnus touch upon that are of intense interest to all those whose names have been put down by the recording angel, that one can with difficulty decide just which subject appeals to him most.

Foremost, though, must come the acknowledgement of your laudable effort to reach "the faithful" once a month. I am sure I am going through a state or process of rejuvenation—1907 if you please—just thru reading the "who's he, or she, and where" columns.

Now there seems to be no "who's he" of 1907—and we had the Hon. Wm. Nardin and our pride, Forrest Donnell, in our midst, to say nothing of some 125 others "among those present." I'm going to try to see to it that we have some notice given to 1907, so for nominations for permanent organization:

Since W. T. Nardin was all-senior president, it seems peculiarly fitting that he should be president—at least during good behavior; Harry LaRue, engineer, vice-president; Miss Emma Langenberg, academic, secretary.

I'm interested, too, in that "get-together movement" for next June. I am expecting to be there and to see many of the class of 1907, if I have to send a personal appeal to some of them. In fact as former class secretary, I've been thinking about doing that very thing.

Keep us informed of any who say they are coming back to "God's country."

FAYE L. STEWART, B.S.in Ed.'07.
501 Taylor St., Fort Worth, Texas.

Did you know this: Dan McFarland is city hall reporter and E. A. Remley is sporting editor of the Star-Telegram here.

Mrs. Herbert Henne (Miss Inez Gordon) is living in New Braunfels, Texas.

Mrs. J. W. Swayne (Josephine Latham) A.B.'80, A.M.'82, is living in Boulder Colo., and is working for a doctor's degree at the university there.

Miss Frances Pickerill, '08 is teaching in St. Louis.

Mrs. Lawrence Potts (Charlotte Tapley), A.B.'08, lives in Snyder, Okla.

Carl Crow, '05, now in Shanghai, China, is the author of a book "How to See China." It is now in bookstalls.

F. S.

An Association in Portland.

The Alumnus: The Missouri Alumni in Portland have formed an association which are overhauled and enjoyed again. Our distance from Columbia prevents our and are holding regular weekly luncheons. Every Monday noon University history for ten years back is ransacked for interesting events, big and little, hearing much current news, but The Alumnus furnishes a monthly summary, and one or two stray bits usually find their way here between times.

So far we have rounded up ten of the old boys, whom I have listed here:

F. C. Howard, '09, attorney, with Wilbur & Spruce, Board of Trade Bldg.

Harry Beckett, '07, attorney, also with Wilbur & Spruce.

Fred Hesse, '07, attorney, Spalding Bldg.

H. C. Kendall, '04, traffic engineer, Portland Railway, Light and Power Company.

F. I. Roth, '09, principal assistant engineer, Elliot & Scoggin, consulting engineers.

A. W. Lafferty, '96, representative in Congress from this district.

P. S. Lafferty, '97, attorney, Lewis Bldg.

George F. and Preston C. Alexander, attorneys, Chamber of Commerce.

FRANK GEARY, B.S. in C.E.'11.
Portland, Ore., Jan. 15, 1913.

Engineers in St. Louis.

The following persons met at the American Hotel, December 20, 1912, and formed a permanent organization of the Engineering Alumni at St. Louis. The club meets once a month. O. N. Edgar was elected president, J. A. Whitlow, vice-president, and J. M. Chandlee, secretary and treasurer.

J. T. Garrett, 1000 Fullerton Bldg.
C. M. Talbert, City Hall.
J. L. Hamilton, 1409 Penrose St.
J. L. Woodress, 19th and Olive St.
Chas. H. Langford, 19th and Olive St.
Stanley Stokes, 5611 Etzel Ave.
L. N. VanHook, Ferguson, Mo., 106 Hartford Ave.
J. F. Rooker, 2020 S. Spring Ave.
Herrick Johnson, 17 Maple Ave., Webster Groves.
H. J. Wobus, 915 Locust St.
L. W. Helmerich, Rankin School, 4400 Cook Ave.
J. A. Whitlow, 4306 McMillan.
E. W. Stapf, 3833 Marine Ave.
Hiram Phillips, 5161 Kensington Ave.
N. C. Mann, 4253 Botanical Ave.
N. T. Tell, 4049 Washington Ave.

L. H. Curtis, 1564 Irving.
A. C. Edwards, 4144 Morgan St.
F. T. Kennedy, 2035 D. St., Granite City, Ill.
A. B. Wilder, 5702 Maple Ave.
C. T. Yates, 1286a Delaware Ave.
O. N. Edgar, 5622 Vernon Ave.

J. M. CHANDLEE,
Secretary.

5356a Ridge Ave., St. Louis, Jan. 9.

Broadway, New York City.

The Alumnus: Am in charge of investigating economic and financial status of various public utility and industrial concerns which come to Mr. Williams' notice for possible financing or investment.

Am married to a graduate of U. of Chicago '11. Happy home on Staten Island, down the bay from Manhattan.

CLARENCE J. PRIMM, A.M.'07.

60 Broadway, New York City.

Like a Letter From Home.

The Alumnus—Enclosed find check covering subscription to The Alumnus. I am always deeply interested in every worthy enterprise that affects the welfare of my Alma Mater. Unfortunately many of us cannot always do what our hearts would prompt us to do.

You may rest assured, however, that the messages which you send out are of vital interest to all of the Alumni. They awaken a feeling that is very near akin to the sensations aroused by a letter from the "old folks at home."

The world is large and its interests many. We sometimes seemingly forget our Alma Mater. Alma Mater seemingly forgets us; she has so many children and they are scattered over such a vast territory. There is a bond, invisible though it be, the fibers of which somehow become entangled with our heartstrings and hold us together. We go the full length of our tether sometimes, but the other end is securely anchored to the old Columns.

JOHN L. DEISTER, A.B.'00.

Professor of Romance Languages, University of Mississippi, University, Miss.

Alumni in Liberty, Mo.

The Alumnus: Liberty is a college town, second only to Missouri's Athens in educational facilities, and naturally most of its graduates are alumni of the local schools. However, the University is well represented and the town claims the distinction of having among its citizens one of the earliest graduates as well as the oldest living alumnus.

Captain Louis B. Dougherty, now in his 85th year, was graduated in 1847. The last forty years he has been connected with the Commercial Bank of Liberty. He is hale and hearty, and still loyal to his Alma Mater.

James Love secured his degree in 1853 and that fall came to Liberty to become a member of the first faculty of William Jewell College. He taught mathematics and natural sciences. In 1854, the first county teachers' institute in the state was held in Clay County with Mr. Love as president. A little later he opened a seminary for young ladies which set the standard for schools in the West. He is 92 years old, but is able to walk out to greet his friends on sunny days. He says two others of his class still survive, though the faculty he knew is no more. No man's influence on the intellectual life of a community has been greater or of longer duration than that of Mr. Love.

Pascal Parker, '90, Phi Delta Theta, is president of the Liberty Telephone Company.

Dr. R. R. Fleet, A.M.'00, is professor of mathematics at William Jewell. He married Miss Ellis and has one son and one daughter.

Dr. William H. Goodson, A.B.'03; M. D.'06, has a lucrative and growing practice. In 1908 he was married to Miss Luella Hoffman, A.B.'04, of Sedalia. Two children, William Jr. and Eleanor, increase their joys and cares. Mrs. Goodson is a worker in the local W. C. T. U. and is a member of the D. A. R.

Mrs. S. E. Stout (Frances Blodgett) A. B.'04, taught in the Bethany High School and in 1905 was married to Dr. S. E. Stout of the William Jewell faculty.

R. I. Johnson, A.B.'09, teaches English at William Jewell. His wife was formerly Miss Maude Stuart, a student in the University during the years 1907-1909.

Snowden Hunt, a former student in Agriculture is on a farm adjoining Liberty. In 1911, he was married to Miss Mary Finley.

Miss Anna Moore, A.B.'09, came from Paris, Mo., in September, 1912 to fill the chair of history at Liberty Ladies College, and incidentally raise the standard of the school in the eyes of the University authorities. She with others would like to see an Alumni Association in Liberty for Clay County.

MRS. ROBERT S. WITHERS.
(Ethel Massie), A.B.'03.

Liberty, Mo.

Final for Class Officers

Twenty names have been added to the list of nominations for class officers printed in last month's issue of The Alumnus.

When elections have been made from these nominations, the names of the officers will be printed each month just beneath the year in the "Notes of the Classes." Communications from members of the class may be addressed to the officers, or the general secretary.

Any message which the officers of the class wish to give to the classmates will be printed also in the "Notes of the Classes."

Four issues of the magaxine will be printed this school year, three of them before Commencement week. There is yet time for effective work through class organization toward arranging for class reunions this June.

To make the organization effective this year, however, requires *immediate action.*

The election results will be printed in the next issue of The Alumnus.

Please take a minute and a postcard NOW and indicate a choice for your class officers.

This minute, please!

To save space the words "president," "vice-president," and "secretary-treasurer" have been omitted below. Figures are used this way: 1 meaning president, 2 vice-president, 3 secretary-treasurer.

Morris S. McGuire, m., is a physician at Arrow Rock, Mo.

'96

C. E. Hawkins, ac., is traveling for Carson, Pirie, Scott & Company of Chicago with head-

Whom do you wish to greet on the Quad next June?

The old friends you would like most to meet naturally are the ones who would like to return to the campus at the same time you do.

Just let them know that you are planning to be back for Commencement—this will be an added inducement to them.

The chief satisfaction in returning to Alma Mater is in meeting friends of college days. You can help bring back the classmates of your day by dropping a card to The Alumnus saying you are planning to return in June?

What about '03 and '88?

quarters at Kansas City. His home is at Independence, Mo.

Clarence Loeb, ac., A.M.'97, is a physician at 208 Humboldt Building, St. Louis, Mo.

James H. Lay, law, is a lawyer in the Edwards Building, Jefferson City, Mo.

Walter T. LaFollette, law, is practicing at Siloam Springs, Ark.

'97

Henry H. Lotter, C.E., is a consulting civil engineer at Vancouver, Wash.

Robert E. Jarvis, law, is the northwestern representative of the West Publishing Company, publishers of law books. His office is at 802 Lowman Building, Seattle, Wash.

George H. Hunker, ac., is an attorney at law at Las Vegas, N. M.

'98

Clarence M. Jackson, ac., M.S.'99, M.D.'00, is professor of anatomy and dean of the School of Medicine at the University. His address is Columbia, Mo.

G. E. Huggins, ac., has an office at 299 Broadway, New York City.

C. A. Henderson, ac., is a Unitarian clergyman. His home is at 213 West Nineteenth street, Wilmington, Del.

Edward R. Hamilton, law, is a farmer on route number 2, out of Columbia, Mo.

'99

Lee Utley, ac., LL.B.'00, is an attorney at 692 Valencia street, Los Angeles, Calif.

Orville H. Turner, eng., is an electrical sales engineer with the Union Electric Company, St. Louis, Mo.

Charles Thom, Ph.D., is a mycologist in the United States Department of Agriculture at Storrs, Conn.

Clyn Smith, ac., is a physician at Clovis, N. M.

'00

Theodore E. Hamilton, A.M., Ph.D.'08, is assistant professor of Romance languages at Ohio State University. His address is 220 West Ninth avenue, Columbus, Ohio.

Westley Halliburton, ac., is an attorney at law at Carthage, Mo.

Clarence E. Ziegenbein, eng., is an engineer at Cameron, Mo.

'01

William D. Moore, ac., is an attorney at 4236 Russell avenue, St. Louis, Mo.

George H. Moore, law, LL.M.'02, is a lawyer with offices in the Rialto Building, St. Louis, Mo.

Franklin Miller, ac., is junior partner of the law firm of Wagner & Miller, 830 Pierce Building, St. Louis, Mo.

'02

Benjamin F. Wilhite, ac., is a teacher at Culver, Ind.

Albert D. Whealdon, ac., is teaching chemistry at the State Normal School, Superior, Wis. His address is 807 North Sixteenth street.

James T. Walter, law, is a lawyer at 805 Colcord Building, Oklahoma City, Okla.

Does *your* local have a luncheon?

In Portland, Ore., the Missouri Alumni, have just started having weekly luncheons.

In St. Louis luncheons are held each Thursday at the American Hotel.

In Kansas City these alumni gatherings are held each week.

The Alumnus wants to print a list of these Missouri luncheons each issue, so visitors may enjoy them also.

Drop a line to the magazine telling *when* and *where* your luncheon is held.

Maurice Wallbrum, ac., is a merchant in the hardware and paint business. His address is 327 South Clark street, Chicago, Ill.

'03

Mrs. J. G. Rowell (Miss Caroline Stoner), ac., lives at 2931 East Twenty-eighth street, Kansas City, Mo.

Ira T. G. Stone, ac., is cashier in the Central Bank, Columbia, Mo.

Burns Stewart, eng., is an electrical engineer. His address is 48 North Second street, Memphis, Tenn.

O. L. Steele, ac., LL.B.'06, has a law office in the Van Antwerp Building, Mobile, Ala.

William E. Smith, eng., is an engineering contractor at 740 West Twentieth street, Oklahoma City, Okla.

'04

F. C. Hilder, eng., C.E.'07, is a civil engineer. His address is The Alcazar. Eleventh and Massachusetts avenue, N. E., Washington, D. C.

Virgil Kicks, law, has a law office at Sapulpa, Okla.

'05

Lacy P. Schooling, ac., is a minister at Standard, Alta, Canada.

Miss Clara Schmitt, ac., and ed., is a psychologist at the Juvenile Psychopathic Institute, Chicago, Ill.

James R. Rothwell, law, is a lawyer and abstracter at Warrensburg, Mo.

Show that you're a Missouri "Grad"

Display some emblem of your Alma Mater—let the visitor in your office or home see that you believe in the University of Missouri.

The Columns best typify Missouri. The marble replicas imported from Italy make a life-long remembrance. They are 8 inches high. $2.

In leather and felt goods we have everything. Send today for a catalog of Pennants, Banners, Pillows and other leather goods bearing emblems of Missouri. Catalog in colors contains University and fraternity designs.

A post card today will bring the catalog to you by return mail. **Mail a card Today.**

Why don't *you*
spend a postcard
and half a minute
to vote for officers
for your class?

Seriously, *why?*
