\$1 million donation boosts Athletics

Anonymous gift brings Mizzou closer to completing track/soccer complex.

Mizzou has received a \$1 million donation that will enable the Department of Intercollegiate Athletics to work toward the completion of its new track/soccer complex, Athletic Director Joe Castiglione announced Oct. 8.

The contribution comes from an individual with a strong interest in track and field and soccer who, for the present, wishes to remain anonymous.

The gift will ensure that MU's track and field and women's soccer programs are allowed to develop with the benefit of a state-of-the-art facility that includes team and fan support amenities to go with the

areas for competition.

Castiglione said the University will immediately begin the planning process to enable construction of a track/soccer stadium within the next two years. It is anticipated that the stadium would include a grandstand that would seat up to 3,000 persons, and support areas including restrooms, concession stands, ticket booths, a press box, and appropriate team support facilities.

"We couldn't be happier for our track and soccer coaches, Rich McGuire and Bryan Blitz, and their student-athletes," Castiglione said. "In the near future, they

will be sharing a facility that will be spectacular. I'm also excited for our total athletic program.

"This gift adds to the realization of our dream to create the University of Missouri Sports Park, bringing all of our facilities together in an attractive setting that will be a significant part of the Columbia campus landscape. We're grateful this benefactor has expressed great confidence in our vision."

The University was without an outdoor track suitable for competition for more than 20 years before construction of an all-weather track was completed this summer. The track's infield is the site of a soccer field that serves MU's new women's soccer program, which debuted in August.

At the time the ground was broken a year ago, Castiglione said the department's long-term goal was to build a track and soccer field to provide the respective teams a state-of-the-art competition and practice venue, and that the remainder of the estimated \$3 million facility would be completed when funds became available. That time is now.

'This gift adds to the realization of our dream to create the University of Missouri Sports Park, bringing all of our facilities together in an attractive setting that will be a significant part of the Columbia campus landscape.'

— Athletic Director Joe Castiglione.

High-tech teaching

Virtual reality makes the classroom come to life.

Students in Bob Benfer's anthropology classes are able to explore the prehistoric village of Paloma on the coastal plain of Peru. They can walk

through the handful of grass huts in this 5,000-year-old fishing village a mile or two from the Pacific Ocean. Benfer's students also can try their hand at excavating

artifacts from some of the rich archaeological sites in Paloma, the oldest well-documented village in the western hemisphere.

But the huts weren't built by prehistoric fishermen, and the artifacts these students dig up weren't placed there by ancient hands. All that happened in a room on the third floor of the Memorial Union in MU's Digital Media Center. A

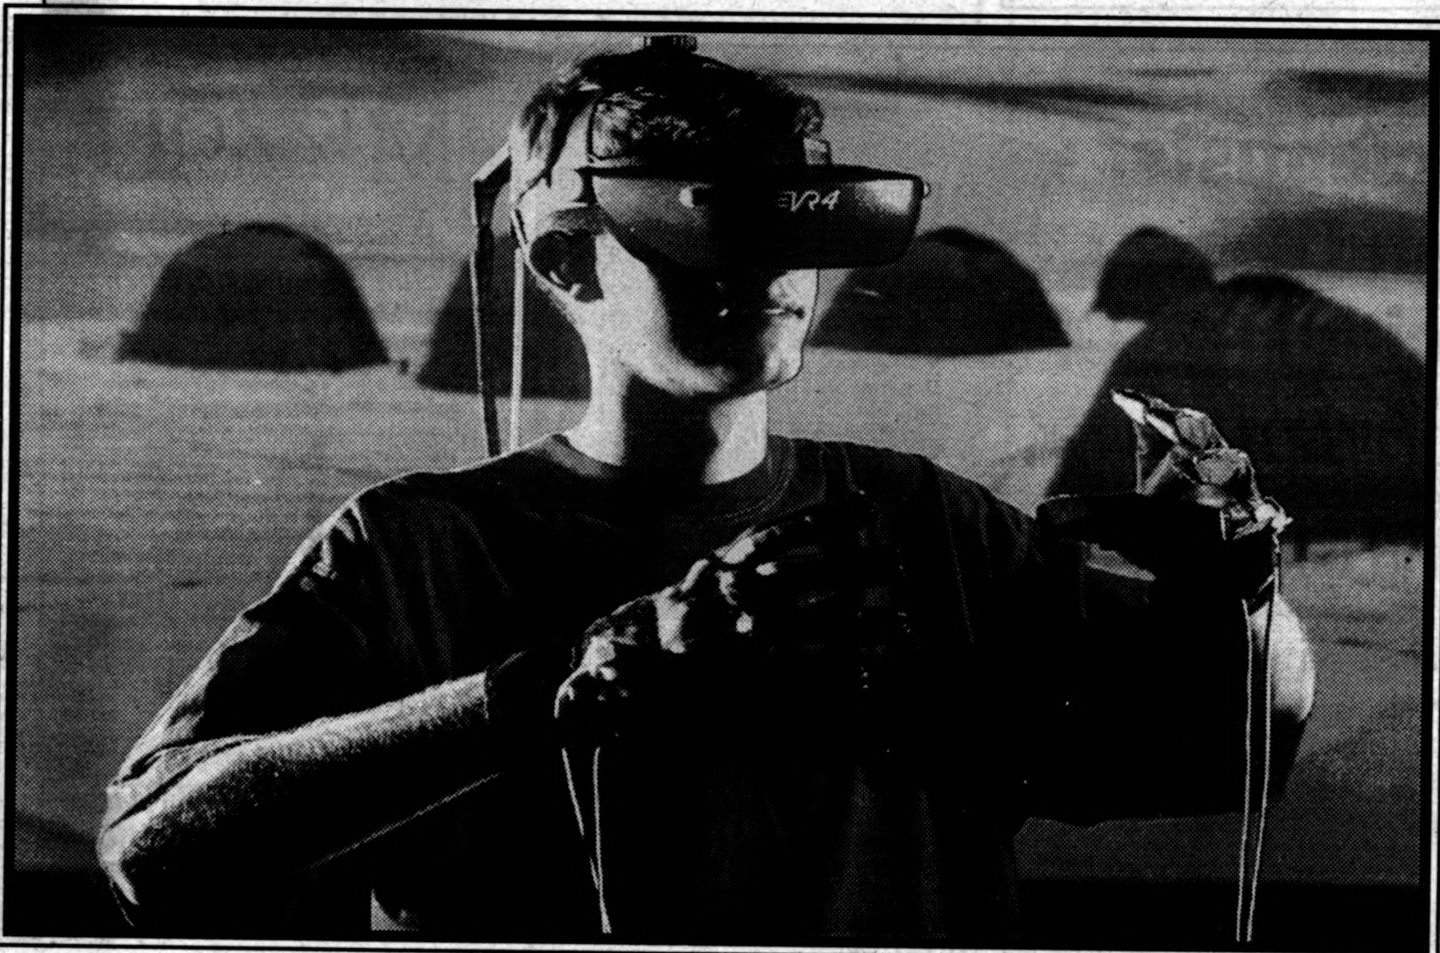

crew of computer enthusiasts — many of them students — work day and night at their banks of computers, building virtual reality environments like the Paloma village.

To tour those grass huts at Paloma, Benfer's students wear a special virtual-reality helmet that projects photographs and computer images so lifelike that the students actually feel that they're there. The excavations are done not with shovels and trowels, but with a virtual reality glove. Move the glove and it sends information to the helmet that simulates the exacting work of a real excavation.

Paloma is just one project under development at the Digital Media Center. English classes studying the African-American novel will be able to take a virtual tour of homes, churches and cabarets during the Harlem Renaissance of the 1920s. Medical students studying heart disease can use the same technology to explore the human heart, touring the four chambers of the heart and watching simulated blood flow.

Also new to campus this fall is a 50-seat virtual reality classroom, where a special curved screen, digital sound and 3D stereo graphic glasses will allow students to use the latest technology in a

SAVING LIVES IN A BIG WAY

Mizzou will be trying to break its own record when students, faculty and staff roll up their sleeves for the annual Homecoming blood drive. In 1990, MU broke the national record by collecting 3,826 pints of blood over Homecoming. Since then, the blood drive has netted a total of 18,570 pints of blood for the American Red Cross. This year Mizzou students are shooting for 4,000 pints.

A ribbon cutting ceremony at 11 a.m. Oct. 13 in the Hearnes Center will officially open the 1996 Homecoming blood drive. The MU

and Columbia communities can donate blood from 11:30 a.m. to 5:30 p.m. Oct. 13 and 14 at the Hearnes Center, and Oct. 15-18 at Rothwell Gymnasium. The process takes about an hour and all participants receive a donor care package, which includes gifts from area merchants and a commemorative Homecoming blood drive T-shirt. The blood drive is sponsored by the Mizzou Homecoming committee and the American Red Cross.

TIGERS LAUDED FOR OUTREACH EFFORTS

MU's football program was praised for its community outreach efforts in the September/October edition of *Sidelines* magazine, published by the College Football Association. Senior cornerback Derrick Miller is pictured on the cover signing the T-shirt of Nick Bailey, a Special Olympics medalist. The MU football team spent time with a group of Missouri Special

Olympians during the team's annual press photo day in August.

"We were all impressed with Missouri's outstanding community service programs," wrote Susan Hiller, the magazine's editor, in a letter to MU. "Sixty of the CFA's 70 members responded to our community outreach survey and we selected (Missouri) to grace our cover because of the extraordinary effort put forth by the athletic department and the student athletes. You are all to be commended."

Coach Larry Smith's

commitment to community activities is further detailed in the magazine's cover story, especially his work promoting food donations to the Central Missouri Food Bank. For instance, fans who attend the Black and Gold spring football game are asked to donate canned goods to the food bank. Over the last three years, that effort has brought in 37,000 pounds of food and \$5,000 in donations. Smith also has established the "Score Against Hunger" program which has raised \$150,000 from businesses and individuals for the food bank.

Teaching

From Page 1

classroom setting. All these efforts underscore MU's commitment to

'It's like the old teaching maxim: "Tell me and I will forget. Show me and I will remember. Involve me and I will understand."

Ali Hussam, director,
Digital Media Center

advanced computing to give students and faculty a high-tech edge in their studies.

Virtual reality might have all the ge-whizz bells and whistles, but at Mizzou,

rapid advancements are under way in all phases of instructional technology. Auditoriums and classrooms are being refitted with equipment to handle multimedia lecture presentations. Foreign language students are using computer-generated voice charts that show them how closely their speech matches that of a native speaker. Students in writing classes can use the Online Writery, which offers electronic tutoring when they get stumped on a writing assignment.

The technology won't make teaching any cheaper, but it can make the learning environment better in certain classes, Benfer says. "Students have been sitting in classes for 12 or 15 years of their lives. If you can get them involved, they'll do better," he says. "When they're not in class they can go and explore and learn in a way I can't even present in a class."

Ali Hussam, director of the Digital Media Center, agrees that involving students can make a difference in teaching. "It's like the old teaching maxim," Hussam says. "Tell me and I will forget. Show me and I will remember. Involve me and I will understand."

FAMILY MATTERS

One of MU's most prestigious lecture series will continue its long tradition when Leon Eisenberg from Harvard Medical School presents the Margaret Mangel Lecture "The American Family: Is It Obsolete?" Eisenberg will speak at 1:40 p.m. Oct. 11 in the Columns Room at the Reynolds Alumni and Visitors Center.

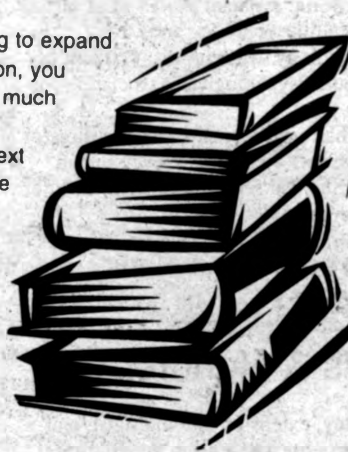

Eisenberg, a psychiatrist, is professor and chair of the Department of Social Medicine and Health Policy at Harvard. He is the co-editor of two recent books: *World Mental Health: Problems and*

Priorities and The Best Intentions: Unintended Pregnancy and the Well-Being of Children and Families. The Margaret Wilson Mangel Endowed Lectureship was established in 1977 to honor Mangel, who retired that year as dean of Human Environmental Sciences. The lectureship supports the interaction of the arts, social sciences and physical sciences and encourages the application of such interactions to solving problems of individuals and families.

HIGH VOLUME SALES

If you're looking to expand your book collection, you don't have to look much farther than the Heames Center next week. That's where the Friends of the Libraries will hold its annual book sale Oct. 17 to 19 to benefit the MU Libraries.

With more than 10,000 volumes on sale, this year's sale

will be one of the biggest ever. As in past years, there will be a collectors' table and a silent auction for those bibliophiles who are looking for different and unusual items. The sale will be held in the concourse area of the Heames Center from 5 to 8 p.m. Oct. 17, 10 a.m. to 8 p.m.

Oct. 18, and 10 a.m. to 4 p.m. Oct. 19. It's not too late to make a donation to the sale. You can drop off books at the MU Libraries gift and exchange department in 52 Ellis, or call 882-4757 for more information.

Knight Foundation gift creates endowed chair

The Knight chairholder will establish and head a national Knight Center for Editing Excellence with a goal of stimulating teaching, outreach and research programs focused on the role of editors, from entry-level newspaper copy editors to executive editors.

Center for Editing Excellence.

A state program that matches such grants will increase the total endowment for the Knight Chair in Journalism to \$3 million. The Knight chair brings to 10 the number of endowed chairs at MU that have been funded through this unique private-public partnership.

"The new Knight chair and program in editing will give our journalism school the resources to become a world center for teaching and research on editing — a function that becomes even more crucial in this age of online technology," said interim Chancellor Richard Wallace. "We believe the program is an exciting example of the possibilities for private-public partnerships. The combination of funding from Knight Foundation and the expertise of our top-ranked journalism school will assure a program that will have worldwide impact on the quality of journalism and journalism education."

The Knight chairholder will establish

and head a national Knight Center for Editing Excellence with a goal of stimulating teaching, outreach and research pro-

Since 1992, Knight Foundation has made \$42 million in grants toward the education of current and future journalists and to support a free press and the protection of First Amendment rights.

grams focused on the role of editors, from entry-level newspaper copy editors to executive editors.

The chairholder will help build a model program for the teaching of editing, and will work with newspaper editors and MU faculty to develop editing curriculum models to capitalize on new technologies.

The chair also will coordinate an applied research and dissemination program on the changing role of editors and will develop methods to attract talented students to editing as a career.

The journalism programs at MU and at Washington and Lee University in Virginia were selected for endowments this year from among 46 institutions that submitted proposals to the Knight Foundation. "Missouri, consistently one of the premier, larger journalism programs, presented a proposal capitalizing on its traditional strength in editing," said Del Brinkman, director of Knight Foundation's journalism programs.

Established in 1950, the John S. and James L. Knight Foundation makes national grants in journalism, education and the field of arts and culture.

It also supports organizations in communities where the Knight brothers were involved in publishing newspapers, but is wholly separate from and independent of those newspapers.

Since 1992, Knight Foundation has made \$42 million in grants toward the education of current and future journalists and to support a free press and the protection of First Amendment rights.

October 7-11th

FIRE

SAFETY WEEK

Safety tips from Campus Facilities

Keep storage areas clean. Store combustible materials or ignitable fuels in a proper storage cabinet. Keep corridors and stairwells clear.

Know the evacuation routes for your building. If there's a fire-call 911 and evacuate the building. Don't use the elevator.

Know locations of fire alarm pull stations. If you pull the alarm, you still have to call 911.

Know locations and types of your fire extinguisher and how to use them properly.

Don't misuse extension cords.

Campus Facilities

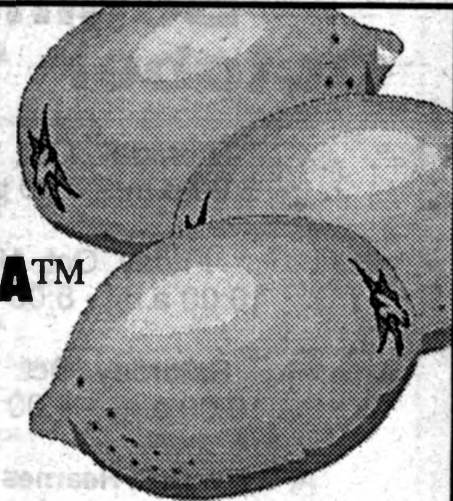

BUILDING SERVICES ENERGY MANAGEMENT PLANNING DESIGN & CONSTRUCTION MAINTENANCE & GROUNDS

Q: How many lemons go into a glass of Chick-fil-A™ lemonade?

A: Plenty.

Brady Food Court employees squeeze lots of lemons every morning to make each glass of Chick-Fil-A lemonade a treat for your tastebuds.

Fresh squeezed lemonade: just for you at Brady Food Court.

MIZZOU PEOPLE

Appointments & Promotions

Allen Bluedorn, associate professor of management, was appointed to a three-year term as chair of the Academy of Management's new teaching committee of the organizational behavior division.

Billie Cunningham, assistant professor of accountancy, was elected academic vice-chair of the teaching and curriculum section of the American Accounting Association.

Pat DeLong, administrative associate II in the business and public administration dean's office, and **Mary Meyer**, executive staff assistant I in accountancy, received Business and Public Administration Outstanding Staff Service Awards in May.

Jere Francis, professor of accountancy, was appointed director of the accountancy doctoral program.

Lori Franz, associate dean and professor of management, is serving as program chair for the 1996 Decision Sciences Institute meeting which will take place in November in Orlando, Fla.

Glenn Good, associate professor of psychology, has been elected to serve as the 1998 president of the Society for the Psychological Study of Men and Masculinity, a division of the American Psychological Association.

Lee Henson, coordinator of programs/services for persons with disabilities, was reappointed a member of the Governor's Council on Disability.

Brick Johnstone, assistant professor of clinical health psychology and neuropsychology, was elected president of the Missouri Psychological Association for 1998-99.

Jo Turner, has been named statewide director of the Missouri 4-H Youth Development program. She had served as interim director since February.

Earl Wilson, professor of accountancy, was appointed director of the School of Accountancy.

Awards & Honors

Wayne Bailey, extension entomologist, and **Jerry Carpenter**, extension agricultural engineer, were named outstanding agricultural specialists and received the J.W. Bursch Agricultural Extension Award in September.

David Baker, associate dean for agriculture, food and natural resources extension, received a distinguished service award from the National Association of County Agricultural Agents in September in Nashville, Tenn.

V.S. Gopalaratnam, associate professor of civil engineering, has been named a Fellow of the American Concrete Institute. He was a pioneer in the development of stable closed-loop tension-testing techniques for plain concrete.

Alan St. John, director of the Missouri Training Institute, received the Governor's Award for Quality and Productivity for service as a member of an inter-department team which is redesigning the state's workforce development system.

Ron Turner, UM System vice president for University Outreach, received the National Storytelling Association's 1996 Leadership Award for the South Central Region in July.

Grants & Fellowships

Peter Bloch, professor of marketing, received a MU Research Council grant for his project "The Development of a Scale to Assess Product Design Centrality."

Thomas Crowe, assistant professor of industrial engineering, received a \$28,512 UM System Research Board grant to study multimedia alternatives to costly manufacturing labs.

Kristofer Hagglund, associate professor of clinical health psychology and neuropsychology, received a \$37,924 UM System Research Board grant for his project, "Evaluation of a Medicaid Management Care Program For People with Disabilities."

Cerry Klein, associate professor of industrial engineering, received a \$225,000 grant from the National Science Foundation to develop course offerings for freshmen that integrate materials they are learning in physics, calculus, chemistry and fundamentals of engineering.

Jim Noble, assistant professor of industrial engineering, received a National Science Foundation grant to assist the Nordyne Co. in streamlining its assembly-line process.

Lee Peyton, associate professor of civil engineering and director of MU's Center for Waste Management, received a \$46,648 UM System Research Board grant to help develop environmental degree programs over the Internet.

Charles Slivinsky, professor of electrical engineering, was awarded a \$35,930 UM System Research Board grant to develop a prototype and evaluate a cybercourse in multimedia systems

National & International Presentations

Shankha K. Banerji, professor of civil engineering, presented a paper and a poster in May at the Joint Conference on the Environment by the Hazardous Substance Research Center and Waste-Management Education and Research Consortium in Albuquerque, N.M.

N. Gerald Barrier, professor of history, presented the keynote address, presented two papers and chaired two panels at the International Sikh Studies Conference in Ann Arbor, Mich., in August.

Allen Bluedorn, associate professor of management, presented a co-written paper, "The Structure of Corporate Entrepreneurship and the Relationship Between Corporate Entrepreneurship and Strategic Management," at the 1996 meeting of the Academy of Management in Cincinnati, Ohio.

Gordon Brown, professor and director of health services management, presented a paper on the impact of managed care on health system design and the role of management at the Latin American Conference of Health Administration Education in Santiago, Chile.

Zhen Chen, assistant professor of civil engineering, presented a paper in May at the annual Engineering Mechanics Conference at Fort Lauderdale, Fla.

Martin Childers, associate professor of physical medicine and rehabilitation, presented a talk on "The Use of Botulinum Toxin in the Management of Spasticity Following Traumatic Brain Injury" in April at the annual meeting of the Central Society

THE GIFT OF LIFE

Darrel Cash of Thayer, Mo., tries to belt one out of the park Sept. 28 at a softball game for University Hospitals' heart transplant patients. The event at Stankowski Field drew nearly a dozen heart transplant recipients to celebrate the gift of organ donation. Cash became the University's first heart transplant in June 1989. Since then, MU cardiothoracic surgeon Jack Curtis and his team have transplanted hearts into 60 Missourians ranging in age from 16 to 67.

Steve Zumbro photo

FOR THE RECORD

Stressed out? Does your work or home life have you up against the wall? You can learn about handling that overload at MU's Stress Management Clinic. Small groups for faculty and staff are forming now and are free to all employees. The clinic is in the Counseling Center, second floor, Parker Hall. Call the Employee Assistance Program at 882-6701.

Fall pre-retirement planning sessions for University employees will be held for four weeks beginning Oct. 21. These two-hour sessions cover all phases of planning for retirement and are geared for individuals who are five to 10 years from retirement. For more information, call the retirement department at Faculty and Staff Benefits at 882-9810.

MU's Distance Learning Design Center will host a live satellite program that will provide participants with the latest information on the significance of style in the teaching and learning process. Tony Grasha, professor of psychology at the University of Cincinnati, will speak on "Teaching With Style: Enhancing Learning by Understanding Teaching and Learning Styles" from noon to 2 p.m. in Ketcham Auditorium.

Concerts & Plays

Thursday, October 10
STUDENT ENSEMBLE SERIES:
Symphonic Band and Jazz Ensemble will perform at 8 p.m. in the Missouri Theatre. For ticket information, call the Music Department at 882-2604.

Friday, October 11
STUDENT ENSEMBLE SERIES:
Symphonic Wind Ensemble will perform at 8 p.m. in the Missouri Theatre. For ticket information, call the Music Department at 882-2604.

Sunday, October 13
INTERNATIONAL CONCERT EVENT:
H.P. Chaurasia Flute Recital will be presented at 8 p.m. in the Missouri Theatre.

Monday, October 14
STUDENT ENSEMBLE SERIES: Jazz Bands 3 and 4 and Combos will perform at 8:30 p.m. in Whitmore Recital Hall in the Fine Arts Building.

Tuesday, October 15
FACULTY RECITAL: The Missouri Quintet will perform at 8 p.m. in Whitmore Recital Hall.

Thursday, October 17
THEATER SERIES: The Department of Theatre will present "West Side Story" Oct. 17-19 and 23-27 at the Rhynsburger Theatre. A benefit reception for the Terry R. Perkins Memorial Scholarship will be held at 7 p.m. Oct. 24 preceding the performance. For ticket and show time information call 882-PLAY.

Conferences

Friday, October 11
OSTEOPOROSIS WORKSHOP: The workshop will be offered at the Lenoir

Community Center. For information and a registration brochure, call 876-3289

Friday, October 18
ENGINEERING CONFERENCE: The College of Engineering will sponsor an informational conference for community college advisers Oct. 18-19. For information, call Paula Koebel at 882-0197.
NURSING CONFERENCE: "Promoting Excellence in Women's Health Care" will be offered from 7:30 a.m.-4:15 p.m. at the Holiday Inn-East. For cost and registration information, call 882-0215.

Courses

BEGINNING CHILDBIRTH: Course will be offered from 7-9 p.m. Tuesdays through Nov. 26 at Ellis Fischel Cancer Center. You should begin this course three months before your baby is due. Cost: \$45. To register, call 882-6973.

Thursday, October 10
L.E.A.N. FOR LIFE: Course will be offered at 5:30 p.m. at the Cosmopolitan International Diabetes Center classroom at University Hospital and Clinics. This is a free introductory session to a 10-week weight management program. To register or for more information, call 882-2251.

Wednesday, October 16
ARTHRITIS SELF-HELP CLASS: Course will be offered from 10 a.m.-noon Oct. 16, 22 and 29 at the Old Alumni Center. Cost: \$20. For information or to register, call 882-6565.
NEW EMPLOYEE ORIENTATION: Course will be offered from 1:30-5 p.m. in Columns 3, Reynolds Alumni Center. The course is open to all new benefit-eligible employees.

Exhibits

BINGHAM GALLERY:
"Baskets: Structuring Space, Empty and Enclosed" will be on display through Nov.

1. A reception for this exhibit will be held from 7-9 p.m. Oct. 11 in the gallery. Located in the Fine Arts Building, the gallery is open from 10 a.m.-4 p.m. weekdays.

BRADY COMMONS GALLERY:
MU Student Fibers Exhibit will be on display through Oct. 11.

Brady Gallery, located in 203 Brady Commons, is open from 10 a.m.-5 p.m. weekdays.

MUSEUM OF ANTHROPOLOGY: The museum, located in Swallow Hall, is open from 9 a.m.-4 p.m. weekdays.

MUSEUM OF ART AND ARCHAEOLOGY:
"Art of the Eye: An Exhibition on Vision" will be on display Oct. 12- Dec. 15. Scott Nelson, exhibit organizer, will speak about the exhibit at 5:45 p.m. Oct. 18 at the Museum of Art and Archaeology.

Ongoing exhibits:
•"Mark Rothko Loan"
•"The Saul and Gladys Weinberg Gallery of Ancient Art"
•"Byzantine and Early Christian Gallery"
•"European and American Gallery"
•"Expressions of Africa"
•"Isms and Others in the Twentieth Century"
•"The Kress Study Collection"

The museum, located in Pickard Hall, is open from 9 a.m.-5 p.m. Tuesday through Friday, 6 p.m.-9 p.m. Thursday, noon-5 p.m. Saturday and Sunday. Closed Mondays and national holidays.

ROGERS GALLERY: "Territories of Secrets- Images in Water-Color Paintings, Photographs, and Prose Poetry" by Ruth Brent, professor and chair of environmental design, will be on display through Oct. 31. The gallery, located in 148 Stanley Hall, is open from 8 a.m.-4 p.m. weekdays.

STATE HISTORICAL SOCIETY:
"Thomas Hart Benton's Original Illustrations for Mark Twain's *The Adventures of Huckleberry Finn*" will be on display in the gallery through mid-December. The gallery is open 8:30 a.m.-4 p.m. weekdays.

"Decades: 1886-1966, Editorial Cartoons" are on display in the east-west corridor. The works of Missouri artists, Algot Nordstorm and David Laughlin are on display in the north-south corridor through mid-December. The corridors are open from 8 a.m.-4:30 p.m. weekdays and 9 a.m.-4:30 p.m. Saturday.

WESTERN HISTORICAL MANUSCRIPT COLLECTION: "Landmark Presidential Elections" featuring political materials from the collection will be on display through Nov. 8. The collection, located in 23 Ellis Library, is open from 8 a.m.-4:45 p.m. weekdays and until 9 p.m. on Tuesdays.

Saturday, October 19
Ma Saison Preferee will be shown at 7 and 9:30 p.m. in Ellis Auditorium. Cost: \$2 advance, \$2.50 at door.

Lectures & Seminars

Thursday, October 10
LUNCHTIME CONVERSATIONS ABOUT WRITING: Byron Scott, professor of journalism, will present "Listen Up! Getting Students to Take Rough Drafts Seriously" from 11:45 a.m.-12:45 p.m. in 325 GCB. For information, call 882-4881.

PROFESSIONAL DEVELOPMENT WORKSHOP: Michael Hosokawa, professor of family and community medicine, will present "Preparing for Tenure and Promotion" from 1:40-2:30 p.m. in N214 Memorial Union.

OVERHOLSER ALUMNI LECTURE: Henry Foster, the founder of the "I Have a Future" program and a former nominee for U.S. Surgeon General will speak on "Health Care for the Coming Millennium" at 3:30 p.m. in the School of Medicine Auditorium.

GENETICS SEMINAR: Joel Shore, a biologist from York (Ontario) University will speak on "Genetics and Evolution of Breeding Systems in *Tunera*" at 3:40 p.m. in 106 LeFevre.

CHEMICAL ENGINEERING SEMINAR: Leo Liau, doctoral candidate in chemical engineering, will present "Degradation of Using TG/FT-IR" at 3:40 p.m. in W0009 Engineering Building East.

WOMEN'S CENTER EVENT: Everett Dietle, co-coordinator of the Lesbian/Gay/Bisexual Resource Center, will speak on "Who Dunnit? The Gay Butler!" at 4 p.m. in 229 Brady Commons.

MUSEUM LECTURE: Basket artist Jane Sauer will present "The Art and Craft of the Basket" at 6 p.m. in Pickard Hall Auditorium.

ENVIRONMENTAL ENGINEERING SEMINAR: William Lee of the US Army Corps of Engineers Kansas City District will present "Innovative Groundwater Cleanup Via Directional Drilling/In Situ-Air Stripping" from 7:30 -9 p.m. in S203 Memorial Union.

PEACEWORKS LECTURE: Allan Nairn, award-winning investigative journalist, will speak at 8 p.m. in Allen Auditorium. For information, call 875-0539.

Friday, October 11
MARGARET MANGEL LECTURE: Leon Eisenberg from the department of social medicine at Harvard Medical School will present the Margaret Mangel Lecture "The American Family: Is It Obsolete?" at 1:40 p.m. in the Columns Rooms at the Reynolds Alumni and Visitors Center.

CHEMISTRY COLLOQUIUM: James Rigby from Wayne State University will present "Novel Cycloaddition Strategies for Natural Product Synthesis" at 3:40 p.m. in 103 Schlundt.

CREATIVE WRITING GRADUATE STUDENT READINGS: Penelope Pelizzon and Tina Hall will present their works at 4 p.m. in 103 Tate Hall.

Monday, October 14
SOIL AND WATER RESOURCES SEMINAR: William Stringer, associate dean of agriculture, food and natural resources, will present "Professionalism in Graduate Studies and Sciences" at 3:40 p.m. in 133 Mumford.

BIOCHEMISTRY SEMINAR: Jan Buss from Iowa State University will present "Lipid Modifications of p21ras: Rules, Results and Regulation" at 3:50 p.m. in S255 School of Nursing.

Tuesday, October 15
PHARMACOLOGY RESEARCH SEMINAR: Mike Mueckler from Washington University's cell biology and physiology department will present "Molecular Biology of Glucose Transport in Skeletal Muscle" at 11:40 a.m. in M558 Medical Sciences Building.
BIOLOGICAL SCIENCES SEMINAR: Howard Ochman from the University of Rochester will speak on "Molecular

Do you, or someone you know, have Alzheimer's disease?

The University of Missouri-School of Medicine is conducting a study of a new investigational medication for the treatment of Alzheimer's disease.

Qualifying participants need to meet the following criteria:

- 1) Age - 40 years and above
- 2) Mild to moderate Alzheimer's disease
- 3) Living at home with a caregiver
- 4) Have a caregiver who is able to participate in the study
- 5) Be in general good health
- 6) Minimum one year history of Alzheimer's disease symptoms

If you are interested in participating or would like more information about this study, please call (573) 882-8040.

Evolutionary Genetics" at 3:40 p.m. in 18 Tucker Hall.

WOMEN'S CENTER EVENT: Tola Pearce, associate professor of sociology and women studies, will speak on "The Health of Working Women in Third World Countries" at 4 p.m. in 229 Brady Commons.

WAKONSE COLLOQUIUM: Bob Bailey, assistant dean of law, will present "AIDS Awareness and RAIN" at 5:30 p.m. in Bingham Dining Hall.

Wednesday October 16

MIDDAY GALLERY EVENT: Christine Neal, curator of European and American art, will present "The Art of the Eye: An Exhibition on Vision" at 12:15 p.m. in the Museum of Art and Archaeology in Pickard Hall.

PHYSIOLOGY SEMINAR: Mark Ziedel, chief of the renal electrolyte division at the University of Pittsburgh, will present "Mechanism of Water Flow Across Membranes" at 2:40 p.m. in M437 Medical Sciences Building. Refreshments will be served at 2:15 p.m.

WOMEN'S CENTER EVENT: Shannon Prindiville of the Women's Center staff will present "And Justice For All . . . Women and the Criminal System: A Feminist Perspective" at 7 p.m. in 229 Brady Commons.

ECOLOGY, EVOLUTION & BEHAVIOR SEMINAR: William Resertarits from the Illinois Natural History Survey will present "The Maintenance of Species Diversity in Temporary Ponds" at 7:30 p.m. in 106 Lefevre Hall.

Thursday, October 17

TRAINING AND DEVELOPMENT SEMINAR: "What is CQI?" will be offered from 8 a.m.-noon in S203 Memorial Union. To enroll call 882-2603.

NOEL GIST INTERNATIONAL AFFAIRS LUNCH SEMINAR: Brown bag lunch event will feature David O'Brian, Valeri Patsiorkovski and Larry Dursham speaking on "Economic and Psychological Adaptation of Russian Peasant Households" at noon in S204 Memorial Union.

CHEMICAL ENGINEERING SEMINAR: Tom Bechtel, doctoral candidate in chemical engineering, will present "Optimal Regulatory Control of a Nonisothermal CSTR" at 3:40 p.m. in W0009 Engineering Building East.

Friday, October 18

MICROBEAM ANALYSIS AND MICROSCOPY MEETING: A joint meeting of the Microbeam Analysis Society and the Central States Microscopy Society will be held from 8:30 a.m. to 3 p.m. in Memorial Union Auditorium. Dale Newbury from the National Institute of Standards and Technology will present "Lies, Damned Lies and Standardless Analysis" at 10:30 a.m. MU faculty and students also will make presentations, and participants may tour the Electron Beam Analytical Facility in geological sciences, or the Electron Microscopy Core Facility in veterinary medicine. For information, call 882-4777 or contact: <www.missouri.edu/~geosclmr/ebaf/ebaf.html>

TRAINING AND DEVELOPMENT SEMINAR: Retha Nichols, coordinator of the tax deferred annuity program, will present "Tax Deferred Annuities" from 9-11 a.m. in 146 Heinkel. To enroll call 882-2603.

LUNCHTIME CONVERSATIONS ABOUT WRITING: Jo Ann Vogt of the Campus Writing Program will present "Learning As We Go: Tips for Making Grading Less Time-Consuming and More Effective" from 11:45 a.m.-12:45 p.m. in 325 GCB. For information, call 882-4881.

DISTANCE LEARNING SATELLITE PROGRAM: Tony Grasha, professor of psychology at the University of Cincinnati, will present "Teaching With Style: Enhancing Learning by Understanding

Teaching and Learning Styles" from noon-2 p.m. in Ketcham Auditorium.

MUSEUM LECTURE: Scott Nelson, originator of "Art of the Eye: An Exhibition on Vision," which is on display at the Museum of Art and Archaeology, will speak on "Art of the Eye" at 5:45 p.m. in Pickard Hall Auditorium.

Meetings

Thursday, October 10

STAFF ADVISORY COUNCIL: Will meet at 1:15 p.m. in S206 Memorial Union.

FACULTY COUNCIL: Will meet at 3:40 p.m. in S110 Memorial Union.

Thursday, October 17

TOASTMASTERS: Will meet from 4-5 p.m. in Room 1W19 University Hospital and Clinics. For information, call Sue Austin Boren at 882-1492.

Special Events

FLU SHOTS: Free flu shots will be available to seniors, high-risk individuals, and HMO and POS members who have a University primary care physician from 9 a.m.-noon and 3-6 p.m. every Wednesday and Thursday during October at the Health Information Center in Columbia Mall. For other individuals, the shots cost \$5. For information, call 882-6565.

Thursday, October 10

DEPRESSION SCREENING: Free screening will be offered from 9 a.m.-8 p.m. at the Psychological Services Clinic, 211 S. Eighth St. Appointments are required and can be made by calling 882-4677.

NOEL GIST INTERNATIONAL AFFAIRS

LUNCH SEMINAR: Brown bag lunch event will feature Lee Payton and Zhan Chin of the College of Engineering who will speak on "Public Works in the Third World" at noon in S204 Memorial Union. For information, call 882-6008.

Friday, October 11

NATIONAL COMING OUT DAY

RECEPTION: Lesbian/Gay/Bisexual Resource Center open house from 11 a.m.-3 p.m. in 232 Brady Commons.

BLACK AND GOLD WELCOME: The College of Engineering will hold tours and discuss its programs from noon- 4 p.m. in Engineering Building East.

EDUCATION RESOURCE CENTER

OPENING: The College of Education will celebrate the grand opening of the Reflector, the college's new educational technology resource center from 3-6 p.m. in 100 Townsend Hall.

Sunday, October 13

HOMECOMING BLOOD DRIVE: The Mizzou Homecoming committee and the American Red Cross will sponsor a blood drive from 11:30 a.m. to 5:30 p.m. daily beginning today through Oct. 18. The drive will be held Oct. 13 and 14 in the Hearnes Center, and from Oct. 15 to Oct. 18 in Rothwell Gymnasium.

MATERNITY FAIR: The fair will be held from 1-4 p.m. in the lobby of University Hospital and Clinics.

Thursday, October 17

LIBRARY BOOK SALE: The annual Friends of the Libraries book sale begins today from 5-8 p.m. and continues through Oct. 19 in the Hearnes Center concourse area. The hours for Oct. 18 are from 10 a.m. to 8 p.m., and for Oct 19 from 10 a.m. to 4 p.m.

WOMEN'S CENTER EVENT: The film, *Once Were Warriors* will be shown at 4 p.m. in 229 Brady Commons.

Friday, October 18

BLACK AND GOLD WELCOME: The College of Engineering will hold tours and discuss its programs from noon- 4 p.m. in Engineering Building East.

of Physical Medicine and Rehabilitation at Lake Ozark, Mo. Childers presented a lecture on the same topic in May at the 1st Mediterranean Congress of Physical Medicine and Rehabilitation in Herzylia, Israel.

Vicki Curby, director of the McNair Scholars Program and adjunct assistant professor of educational leadership and policy analysis, co-presented a workshop "Developing Computer Skills of McNair Scholars" in September at the 15th annual conference of the National Council of Educational Opportunity Associations in Washington, D.C. **Cassandra Chretien**, coordinator for the McNair Scholars Programs, assisted Curby with a talk on "Powerpoint and McNair Scholars." Curby participated in the Network Montana Project, part of National Science Foundation's National Infrastructure for Education Initiative during August at the University of Montana.

Linda Day, assistant professor of communication science and disorders, presented "Phonology, Orthography and the Development of Short-Term Memory" in July at the International Conference on Memory in Padova, Italy.

Michael Devaney, associate professor of electrical engineering, presented two papers and led a session in May at the IEEE Instrumentive and Measurement Technology Conference in Brussels.

Tom Dougherty, professor of management, and doctoral candidate Monica Forret presented their paper, "Networking Activities and Career Outcomes of Managerial and Professional Employees," in August at the national meeting of the Academy of Management in Cincinnati, Ohio.

John Foley, professor of classical studies and

English, presented a plenary lecture in June at a conference on the Textualization of Oral Tradition Epic at Turku University, Finland. He gave a series of three presentations at a conference on Epos and Logos: Oral Tradition in the Ancient World at the University of Natal in Durban, South Africa. Foley presented the keynote address in August at a symposium on Oral Literature in Modern China at the Nordic Institute of Asian Studies in Copenhagen, Denmark. Foley presented a guest lecture on ancient Greek epic in September at Odense Universitet, Denmark.

Jere Francis, professor of accountancy, presented "The Effect of Audit Market Deregulation on the Pricing of Brand Name Reputation" in August at the annual American Accounting Association conference in Chicago; made a presentation at the Hong Kong University of Science and Technology in June; presented "Do Accounting Accruals Lead to Auditor Reporting Conservatism" in June at the University of Southern California and at the International Symposium on Audit Research at the University of Limburg, Holland; presented "A Model of Errors and Irregularities as General Framework for Risk-Based Audit Planning" in May at the University of Kansas/Deloitte & Touche Symposium on Auditing Problems and has been appointed to the editorial board of *The Accounting Review* and *Auditing: A Journal of Practice and Theory*.

Michelle Gibler, coordinator of the Missouri HEADS UP Program, moderated an injury prevention session in May for the Missouri Head Injury Advisory Council Annual Conference in Jefferson City, Mo. Gibler and **Penny Bailey** of the Missouri HEADS UP Program were featured as general session speakers in June at the Governors Conference on Traffic Safety in Appleton, Wis.

Steve Gnatz, associate professor and chairman

of physical medicine and rehabilitation, presented a program review of the Missouri Arthritis Rehabilitation Research and Training Center in April for the National Institute on Disability and Rehabilitation Research in Washington, D.C.

Adrienne Hoard, associate professor of fine arts and curriculum and instruction, presented a paper on her South African research, "Soul Aesthetic: A Cross-Cultural Event," in August at the annual conference of the Afro-Latin American Research Association in Salvador, Bahia, Brazil.

Dale Huffington, director, **Margaret Gunderson**, instructional designer, **Nancy Thompson**, technology specialist, all of the Distance Learning Design Center; **Aji Hussam**, director, and **Ali Merayan**, senior systems engineer, both with Digital Media Research and Development Group, gave a joint presentation on "Creating an Active Learning Environment with CD-ROM Technology" in August at the 12th annual conference on Distance Teaching and Learning in Madison, Wis.

Harold Jeffcoat, vice chancellor for development and alumni relations, presented "The University as Polis" in August at the 7th Annual Symposium of Philosophy and Interdisciplinary Research at the International Olympic Academy, Olympia, Greece.

Nicholas Kalaitzandonakes, assistant professor of agricultural economics, presented "Firm-Level Productivity Growth Decomposition: A Non-Parametric Malmquist Approach" which was co-written with Q. Zeyuan and D. Wellman and "Alternative Funding Mechanisms for Agricultural Research: Moving Toward or Away from Optimality?" in July at the American Agricultural Economics Association annual meeting in San Antonio, Texas.

Raghuram Krishnapuram, associate professor of computer engineering and

computer science, presented papers in June at the IEEE conference on Computer Vision and Pattern Recognition, and the North American Fuzzy Information Processing Society Conference in San Francisco, Calif.

Henry Liu, professor of civil engineering and director of MU's Capsule Pipeline Research Center, led a workshop on pipeline research, sponsored by the American Society of Civil Engineers in March in Leesburg, Va.

David Mandy, professor of economics, attended the 23rd annual Rate and Regulatory Symposium in Kansas City, Mo. in May.

Thomas Marrero, associate professor of chemical engineering and associate director of the Capsule Pipeline Research Center, presented a paper and an exhibit in March at the International Technical Conference on Coal Utilization and Fuel Systems, in Clearwater, Fla.

William H. Miller, professor and chairman of nuclear engineering, presented a paper in June at the American Nuclear Society's annual meeting in Reno, Nev.

Peter Mueser, professor of economics, presented "Explaining the Divergence Between Measure of Willingness to Pay and Willingness to Accept" in April at the Public Choice Society and Economic Science Association in Houston, Texas.

Robert M. O'Connell, associate professor of electrical engineering, presented a paper in March at a National Science Foundation workshop at the University of Central Florida.

Luis G. Occena, associate professor of industrial engineering, organized and led a session at the annual Industrial Engineering Research Conference in Minneapolis, Minn. He also presented a paper and disseminated results of an NSF laboratory instrumentation grant in June at the American Society for Engineering Education's annual conference, in Washington, D.C.

Lawrence Okamura, associate professor of

history, chaired a session on Germanic law and society in late antiquity in September at an international colloquium on the 1,500 anniversary of the "Schlacht bei Zulpich" at Burg Langendorf, Germany. Okamura is the author of an article on late Roman treasure-troves published in the *Saalburg-Schriften* vol. 3.

Allan Pennington, professor of marketing, presented "Retailers in Motion" in May at The Quest Futures Group in Chicago, Ill., in August to IBM executives in Santa Clara, Calif., and in September to the retail division of the U.S. Postal Service in Orlando, Fla.

Richard Pettway, professor of finance, organized a panel session and attended the Rate and Regulatory Symposium in May in Kansas City, Mo. Pettway made two presentations, one to the faculty and graduate students in the College of Business at Chonnam National University, Kwangju, Korea and the other to researchers from the Korean Securities Research Institute, Korean Ministry of Finance and Economics, and Korean Stock Exchange in Seoul, Korea. Pettway presented a paper, "Short-Term Impacts of Major Restructuring in Telecommunication Industry" in June at the 1996 Western Conference of Public Service Commissioners in Snowbird, Utah. He presented "Japanese IPOs: Short-Term Returns, Winner's Curse, Structural Changes in Pricing, Volume and Underwriter Quality" in July at the University of Tsukuba, Tokyo.

Michael Podgursky, professor of economics, presented "Teacher Pay and Teacher Quality" in May to the School of Labor and Industrial Relations at the University of Illinois-Champaign Urbana. Podgursky was invited as a roundtable discussant for "Outsourcing the Management of Public Schools" in July at the Center for Research on Contracts and the Structure of Enterprise of the Katz Graduate School of Business at University of Pittsburgh, Pa. Podgursky participated in Edventures '96 Conference during August at Marquette University in Milwaukee, Wis.

David Retzlloff, associate professor of chemical engineering, presented a paper at the annual meeting of the American Mathematical Society in Orlando, Fla.

Jon Rupright, assistant professor of physical medicine and rehabilitation, presented on the topics of "Low Back Pain Rehabilitation," "Head Injury in the Work Place" and "Myofascial Pain in the Injured Worker" in May at the St. Mary's Health Center Workman's Compensation Seminar at the Runge Nature Center in Jefferson City, Mo.

Lisa Scheer, assistant professor of marketing, organized and chaired a session in June at the 1996 Research Conference on Relationship Marketing at Emory University in Atlanta where she presented a paper, "The Case for a Bi-Dimensional Model of Relationship Dependence." Scheer also presented "Romanian Retailer Attitudes Toward Change and Retail Evolution" at the 3rd CIRASS/EIRASS International Conference on Retailing and Service Sciences, in Innsbruck, Austria; and "The Antecedents of Relationship Termination Costs" to the AMA 1996 Summer Educators' Conference.

Jonathan Sperber, professor of history, present a paper, "Von 1789/93 bis 1849/49 In der Rheinlanden" in a panel on images of the French Revolution of 1789 in the European Revolutions of 1848/49 in September at the biennial meeting of German historians in Munich.

Frederick Springsteel, professor of computer engineering and computer science participated in working group on evaluation of technology in June at the 1st international Symposium on Integrating Technology into Computer Science Education in Barcelona, Spain. Springsteel represented MU at the American Association of University Professors 82nd annual meeting in June in Washington D.C.

Jim Wall, professor of management, presented a paper, "U.S. Army Peacekeeping" in

August at the Academy of Management meeting in Cincinnati, Ohio. Wall presented a paper, "North American Conflict Management," in June at the International Association of Conflict Management meeting in Ithaca, N.Y.

Earl R. Wilson, professor of accountancy and director of the school of accountancy, presented a co-written paper, "The Effect of New Issue Accounting Information on Seasoned Bond Prices" in August at the annual meeting of the American Accounting Association in Chicago, Ill. His co-written paper, "The Value-Relevance of Accounting Information in Segmented Markets for

Initial Public Offerings" was presented to a forum session at the same meeting.

H.K. Yasuda, professor of chemical engineering and director of MU's Surface Science and Plasma Technology Center, taught a short course this summer for the NATO Advanced Studies Institute in Italy.

**University Hospital's
Small Miracles Maternity**

1 p.m. - 4 p.m.
Sunday, Oct. 13
University Hospital's main lobby

If you're a new expectant parent or just thinking about starting a family, this free Maternity Fair is for you.

Educational Booths: Pre-pregnancy fitness, selecting a caregiver for yourself or your infant, nutrition for mom and baby, pain relief techniques during labor and birth, breast-feeding and bottle-feeding your infant, infant safety, day care and more.

Activities and Displays: Join us for cake and punch and enjoy a maternity fashion show, maternity unit tours and a diaper-bag packing contest for dads. Browse through a JCPenney mini-store with baby furniture, maternity displays and infant merchandise.

Free Gifts: Your choice of gifts from University Hospital includes a free tippy cup, pregnancy test (100 value) and a pregnancy calendar. Plus, you can register for other gifts, including a baby layette gift, a baby monitor, portrait studio packages and frames, infant car seat seats from the Missouri Division of Highway Safety, a savings bond from Boone County National Bank and much more!

Grand Prize from JCPenney: Register to win a \$500 nursery from JCPenney, including crib with mattress and rocker.

New this year
Mini-seminars: Learn from the experts. Maternity Fair offers 15-minute seminars packed with important information presented by physicians and health-care providers from the University of Missouri Health Sciences Center.

1:15 p.m., Pre-conception health — getting fit for pregnancy. Certified Nurse Midwife Donna Scheideberg, School of Nursing.

1:45 p.m., How to choose a pediatrician. Dr. Tommie J. B. General Pediatrics.

2:15 p.m. and 3:15 p.m., Pain control during labor. Dr. Nila Gupta, Obstetrics and Gynecology.

2:45 p.m., What to expect with a baby your first night. Dr. John Delzell, Family and Community Medicine.

Free parking in the garage on the east side of University Hospital. For more information, call University Hospital Health Information Center at 882-6565.

Project Whistlestop is leaving the station

College of Education creates a partnership with Missouri schools.

Students nationwide will be able to learn about Harry S. Truman's presidency online using the most current technology, thanks to the MU Partnership for Educational Renewal at the College of Education (MPER).

Mizzou educators are working with a team of teachers and administrators from Blue Springs, Independence, Lee's Summit and Platte County school districts. The group collaborated on an idea that became Project Whistlestop. Earlier this month, the U.S. Department of Education awarded the partnership \$406,814 to implement the first year of the project. That funding is part of a five-year \$1.9 million challenge grant for technology in education.

The project is the first of a number of opportunities that the MU-based partnership would like to create for school districts in Missouri, says James Oglesby, interim director of MPER and research assistant professor of practical arts and vocational-technical education. "It's the type of collaboration that can enhance teaching and learning opportunities for children in the state of Missouri," Oglesby says. "Further, it demonstrates the collaboration that can occur between higher education and local school districts."

The goal of Project Whistlestop is to give teachers and students online access to the Harry S. Truman Presidential Library and Museum, which houses the source documents from Truman's presidency. Using this online information, teachers and students will create online instructional materials, develop curriculum materials aligned to the Show-Me Standards of Missouri schools, and create research portfolios.

While Project Whistlestop gives Internet users access to the Truman Library via a World Wide Web database, the project's concept can be

applied to other presidential libraries as well, expanding the quantity and quality of online information educators and students can access.

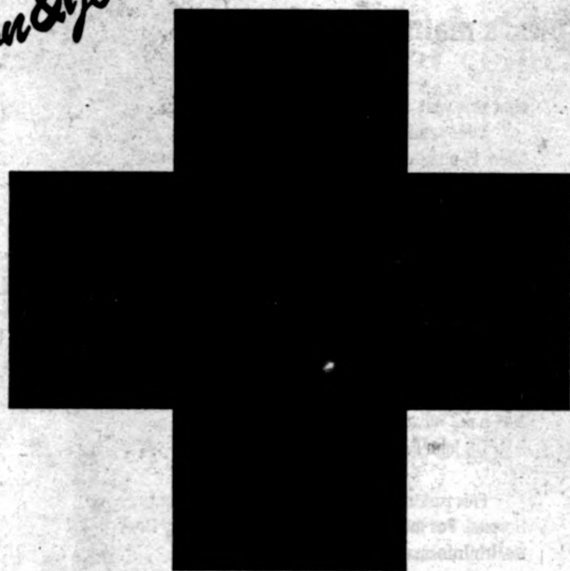

Marty Pope, a mathematics teacher at Platte City (Mo.) High School, came up with the idea for Project Whistlestop this spring. "A single teacher in a single school can have a good idea that can be implemented," says Richard Andrews, dean of education. "Initial ideas can spring up from anywhere. The business of the MPER is to facilitate the development of an idea. This grant is a perfect example of that."

Paul Pitchford, research assistant professor of educational leadership and policy analysis, brought the coalition together and will work with the partnership throughout the implementation. Pitchford also is executive director of the MU Regional Professional Development Center, and that group will be working with teachers in the project through training and professional development. The college's Center for Technology Innovations in Education will play a critical role in developing the technological tools used in Project Whistlestop.

The Independence (Mo.) School District serves as the fiscal agent for the grant, and is one of 24 school districts in 16 states to receive the challenge grants for technology in education this year. The grants, which total \$23 million and range in size from \$300,000 to \$1.5 million a year for five years, are awards to help schools integrate technology into the classroom.

The Kansas City (Mo.) School District will investigate the issues of the Sante Fe Trail after receiving \$732,761 from the same program. The Kansas City District also will work in cooperation with the MU Partnership for Educational Renewal.

Opening the doors to graduate school

The Heartland's Alliance for Minority Participation (HAMP), will host its first graduate fair for students interested in pursuing graduate degrees in science, engineering and mathematics this fall at MU. Representatives have been invited from higher education institutions across Missouri as well as from institutions in the Big 12, the Big Ten and the Southeastern Conference.

"The fair is a chance for students to get a feel for not only how to apply for graduate school and the necessary requirements, but also what to expect from certain programs around the country," says Charles Sampson, HAMP project director and

associate dean of MU's Graduate School.

The fair will be held Friday, Nov. 22 at the Hearnes Center. In addition to the colleges and universities that will be represented, there will be workshops on taking the Graduate Record Exam as well as funding opportunities and financial aid for graduate students.

While HAMP was created to increase minority participation in the fields of science, engineering and mathematics, the graduate fair is open to any and all students interested in graduate programs. There is no fee to attend the fair.

"It is our intent that students who participate in the fair will receive information

HAMP is a five-year project sponsored, in part, by the National Science Foundation, which is committed to increasing the number of minority graduates in the fields of science, engineering and mathematics.

institutions. Accordingly, we will offer workshops that will feature professionals from the Graduate Records Examination Board and information on the affordability of graduate study," Sampson says.

"This is all part of HAMP's effort to increase minority participation in graduate studies in science, engineering and mathematics, on the one hand, and the MU Graduate School's interest in promoting graduate studies for all American citizenry."

HAMP is a five-year project sponsored, in part, by the National Science Foundation, which is committed to increasing the number of minority graduates in the fields of science, engineering and mathematics.

The project collaborates with families, communities, organizations and corporations to offer students more opportunities in the science, engineering and mathematics disciplines.

on opportunities for graduate work at research institutions as well as learn how to make impressive applications to these

Murphy was an Optimist!

MURPHY'S LAW

Fall semester got off to a very rocky start as demand for shared computing resources and hardware problems made the first part of the semester very rough for everyone on campus, and ***we apologize for the inconvenience these problems have caused.***

In the first few weeks of the semester we ran into three types of problems both expected and unexpected.

First, we had a series of unanticipated hardware problems; a machine which had run flawlessly for years experienced a system board outage, and two days later, a hard drive failed. The failure rate among this type of machine is very low. We replaced both parts, but not before it caused problems for many people on campus.

Second, as you may already know, this semester every enrolled student was allocated a SHOWME user ID. At present we have nearly 30,000 user

IDs on SHOWME. We tried to anticipate some of the problems associated with this increased volume on

the machines by increasing the SHOWME environment by 40 percent overall. Unfortunately we were not able to complete all of the planned upgrades, which included tripling the power of the Email machine and doubling the number of modems in the modem pool, before the beginning of school.

And third, we could not anticipate the sheer

volume of mail this fall, and how the machines would handle it. There has been a tenfold increase in Email use in the last 18 months, and a similar increase in the World Wide Web traffic in the

last 12 months. Last April, the machines handled 400,000 pieces of mail a day, and we could not predict how they would handle just shy of a *million* pieces of mail until it actually happened (which it did, two weeks ago).

So, since the beginning of the semester, "Murphy's Law" has asserted itself and right at the WRONG time we experienced unprecedented outages in addition to the unprecedented demand. But certainly the sum of the situation was frustration for you and for us, and a very rough start to the fall semester.

The good news is we are increasing the modem pool (from 233 modems currently to 456 available for use) and improving the dial-in technology, and for next semester we look forward to expanding the SHOWME complex AND closing the door on Murphy!

MU Campus Computing Training Group Online Documentation Page

Due to some building renovations, the Short Courses, Focus on Faculty sessions and CATS class schedules are temporarily on hold. We will offer courses later in October and also November. Until then, you might be interested in accessing our Online Documentation page at the following web site:
