A matter of quality

Columbia business, opinion leaders urged to support higher education campaign.

The Missouri Senate most likely will consider legislation early next year calling for an election to increase taxes for higher education, Senate President Pro Tem James Mathewson, D-Sedalia, told Columbia business and opinion leaders at a luncheon Oct. 11.

"It does no good for people to sit around and criticize us for not appropriating more money for higher education," Mathewson told more than 100 people at a forum at the Ramada Inn, sponsored by Missourians for Higher Education. "The money is not there. There has to be more in the well."

Mathewson told the group that the state's Business and Education Partnership Commission is scheduled to release a report in December on Missouri's higher education system. Should that occur, he said, the Senate is prepared to consider a package early in the session that would authorize an

election for a tax increase. MHE leaders have said they hope such an election could be held next summer, and have said \$367 million in additional funds is needed.

"Let's give the people an opportunity to vote," Mathewson said. "Let's give them the chance to join us in this dream — of doing the most important thing we can do to improve the quality of life for the next generation."

MU served as the host for the forum in its effort to help MHE with the tax-increase campaign. Chancellor Haskell Monroe welcomed the group.

State Sen. Roger Wilson, D-Columbia, told the community leaders that 25,000 students were turned away from Missouri's colleges and universities last year because they couldn't afford to attend — and the state couldn't afford to help with student aid. "We're working with equipment that is inferior to the equipment in some high schools," Wilson

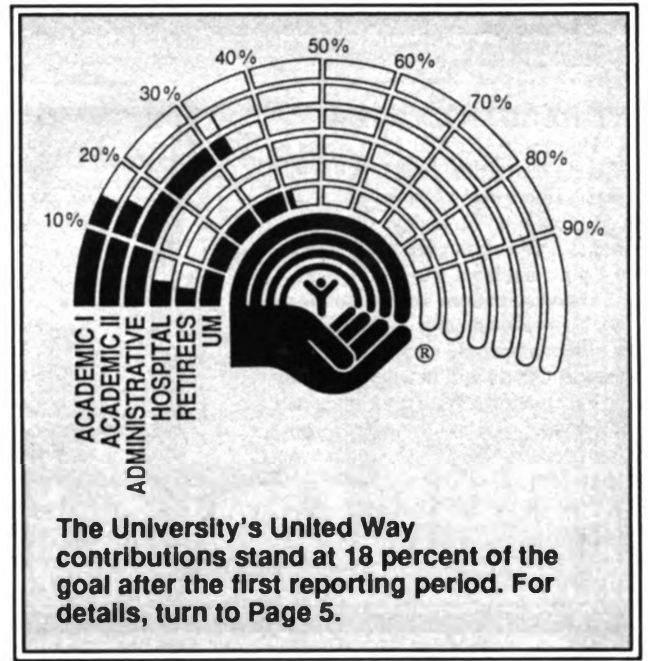

'God is not going to give us a fifth down in this contest.'

— Chancellor Haskell Monroe

said. "We're facing maintenance and repair work that we've neglected since revenue sharing ended.

"It will take all of us to convince the rest of Missouri that what we're doing is right."

Also speaking were C. Peter Magrath, president of the UM System; Ed Elliott, president of Central Missouri State University and chairman of the MHE legislative/lobbying

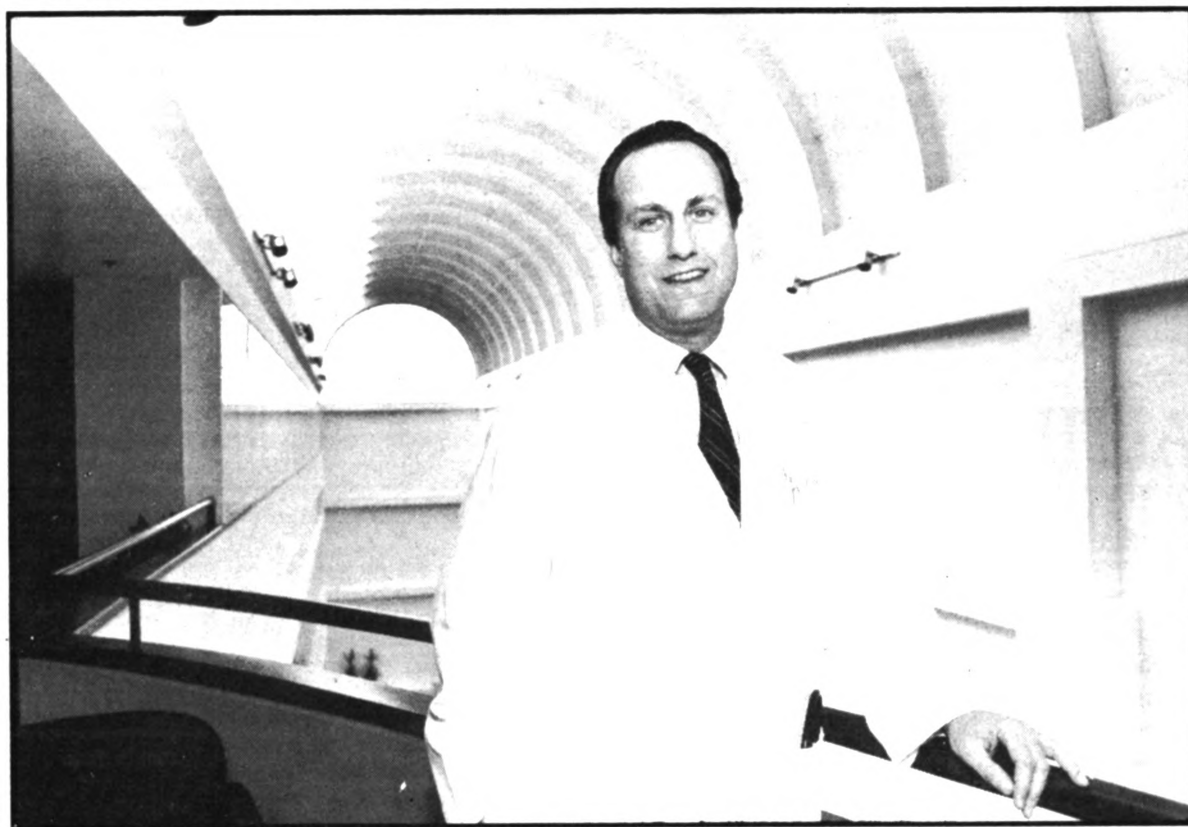

committee; and Andy Scott, business and development specialist for the Economic Development Corp. of Kansas City, and a member of the Kansas City Consensus/Confluence St. Louis task force.

Earlier this year, that task force, composed of citizens groups from the two cities, urged that Missouri spend an additional \$300 million annually on higher education and also called for a one-time bond issue of \$311 million. "We need the money to stay competitive with other states and to help us compete in the world market," Scott said. "Education is the key to the future of this state."

Monroe told the group that 10 years ago, MU's library system was the 30th largest in the country. "Now it's 42nd," he added. In the coming years, he said, MU will struggle with \$54 million in deferred maintenance and will try to compete with other universities for the nation's best teachers.

"We're living on borrowed time," Monroe said. "We can't keep producing the quality level of education that this state needs and deserves without adequate funding. Time is running out as we try to stay competitive with other schools and states." He paused. "God is not going to give us a fifth down in this contest."

Karl Weber comes to Mizzou from the University of Chicago and brings four team members and \$3.5 million in grant money with him.

Tammy Sichel photo

where we might have special expertise," he says.

His immediate goal is to establish a heart failure program similar to ones he developed in Chicago and at the University of Pennsylvania in Philadelphia. Weber's research centers around the root causes for the abnormal growth of the heart's cells that lead to heart failure. "We're working to better understand the basic mechanisms of heart failure," he says.

Weber sees one of the academic missions of his division as "establishing an absolutely first-rate postdoctoral training program here." And he is looking forward to working with researchers in other disciplines at MU.

"There are wonderful basic scientists here," he says. "The opportunity to work with them at an intellectual level, and on the level of laboratory resources, is just wonderful. I'm all for building bridges at many levels between clinical medicine and the basic sciences.

"Our research benefits from being able to work with the basic sciences. I love bringing observations from the bedside to the laboratory."

In Chicago, Weber conducted research under a \$12 million grant program with funding from the National Institutes of Health, the American Heart Association and the pharmaceutical industry. Approximately \$3.5 million of that funding will be transferred to MU. In his move to Missouri, Weber brought along four team members as new faculty for the division.

His work is considered innovative by national and international scientists. He has given invited lectures to groups across the United States, Canada, Europe and Asia. Weber is associate editor for *Circulation Research* and serves in an editorial capacity for several other prominent journals, including the *Journal of the American College of Cardiology*. He has a bachelor's degree from Moravian College in Bethlehem, Pa., and a medical degree from Temple University in Philadelphia.

Getting to the heart of the matter

Karl Weber, MU's new cardiology director, focuses his research on the root causes of heart failure.

When Karl Weber took over this summer as head of MU's Division of Cardiology, it underscored the School of Medicine's commitment to building a preeminent cardiovascular program.

Weber, an internationally prominent clinician and researcher, came to MU from the University of Chicago, where he had been professor of medicine since 1983. He also served as director of the division of cardiology and the Cardiovascular Institute at

Michael Reese Hospital and Medical Center in Chicago.

"Karl Weber is one of the leaders in American cardiology today," says Michael Perry, chairman of the Department of Medicine, of which cardiology is a division. "We want to have the best cardiology division in the Midwest, if not in the country. He's got the energy and the vision to bring it about."

Weber shares that ambition. "We'd like to work toward several specific programs

FLU SHOTS OFFERED AT HEALTH CENTER

University Hospital and Clinics is offering flu vaccination clinics at the Health Information Center in Columbia Mall Thursdays through Dec. 20. The clinics are from 10 a.m. to 1 p.m. and from 4 to 7 p.m.

The vaccinations are free to those in a high-risk category — people 65 or older and people with chronic disease. Others will be charged \$2 for the vaccinations. With questions, call 882-6565.

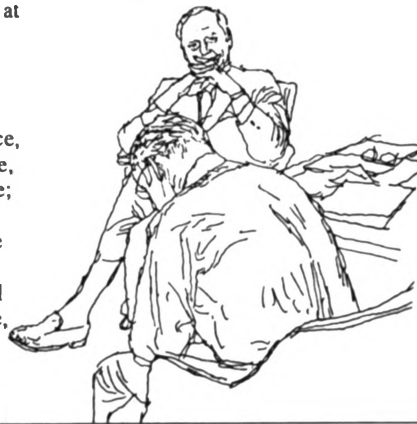

STOP IN AND TAKE A LOOK

MU's newest office, the Alcohol and Drug Abuse Prevention Team (ADAPT), will have an open house at its quarters, 205 Brady Commons, from 10 a.m. to 4 p.m. Oct. 26.

The Office of Student Development received a two-year, \$167,000 grant to establish the office, which will be directed by Kim Dude, assistant director of Residential Life; she will handle both duties. The office will provide a referral service for people with alcohol and drug problems, and will offer educational programs on alcohol and drug abuse, including problems encountered in dating situations. ADAPT officials say faculty and staff can help by

referring "at risk" people to the office, or, if employees have personal experiences to share, by volunteering for ADAPT's speakers' bureau.

PSYCHOLOGY PIONEER HERE NEXT WEEK

An internationally known researcher in cognitive psychology will deliver two lectures on campus next week. Bernie Weiner, professor of psychology at UCLA, is known for his work in attribution theory. Weiner demonstrated that students' perceptions of success were as important as "objective" success rates in determining their subsequent performance.

Weiner will give a talk, "On Emotions," at 4:15 p.m. Oct. 23 in N214 Memorial Union. A reception will follow. He will present "Metaphors and Motivation and Attribution" at 3:45 p.m. Oct. 25 in Townsend Auditorium.

Computer training program discussed

Karen Touzeau came to the Oct. 11 Staff Advisory Council meeting to tell members about the progress being made on MU's mission statement. She stayed to hear concerns expressed about an employee education program administered by her office. Touzeau, assistant vice chancellor for Personnel Services/Affirmative Action, represents the council on MU's long-range planning committee.

This semester, her office began a computer training program for secretarial workers. Because of a tight budget, the program is limited to new employees. Pauletta King, administrative associate in veterinary medicine, asked if the program would be expanded to cover all clerical workers.

"At this point we don't have the resources for that," Touzeau said. She added that her

Staff Advisory Council

WORKING FOR YOU

office had squeezed the money for the program out of its present budget. "We didn't use a dime of new money," Touzeau said. "We try to open it up to other people, but we're full all the time."

King said limiting the training to new clerical workers could put other employees

at a disadvantage. "It seems to me that we bring people in from the outside and provide training so they can do better than people who are already here," King said. "I have a problem with that."

Touzeau also updated council members on the University's long-range planning process, and asked for their input in reviewing a draft version of the mission statement. "We still have a long way to go," she said of the committee's work. "We're struggling with important issues for the entire institution."

In other action, the council:

- received a letter of resignation from council member Frances Williams, administrative assistant in Campus Facilities. She cited time commitments as the reason for her resignation. Jo Pflieger, administrative as-

sistant in veterinary microbiology and council chairwoman, said she would fill the remaining year of Williams' term by appointing the runner-up from the last council election.

- heard a report from Steve Briscoe, shift sergeant for University Police and a member of the staff benefits committee, on the selection process for Staff Development Awards. Briscoe said 57 applications were received before the deadline, and committee members are reviewing the applications.

- acted on Chancellor Haskell Monroe's request for recommendations on MU's smoking policy. Several council members said they felt the policy, which allows smoking only in designated areas of most buildings, was not being applied evenly across campus. They agreed to draft a letter asking for a more equal enforcement of the policy. "We agree with this," Pflieger said of the present policy. "We just want it enforced."

Faculty want involvement in data base

Faculty involvement in the dissemination of information about MU, its programs and its students was a subject of discussion at the Oct. 11 Faculty Council meeting.

The topic was raised during a discussion of a proposed institutional data base for the UM System. Susan Taylor, associate professor of nursing a council representative to the Intercampus Faculty Council, said the inter-

campus group discussed the data base at its most recent meeting.

Taylor said the UM System wants to establish the data base to better collect information from the four campuses and distribute it to people or groups that request it. "This would be like a central warehouse of information," she told the council. "If someone wanted to know our ACT scores, for instance, this would be a way to distribute it."

She told the council that the intercampus group recommended that faculty be included in monitoring the type of information to be included in the data base. "If a committee is appointed to oversee the operation of the data base, we recommend that it be com-

posed of faculty and chancellors — not just chancellors," Taylor said.

Allen Hahn, professor of veterinary medicine and surgery and Faculty Council chairman, said the topic is a timely one for the 1990s. "We have some faculty who work one-on-one with patients," he told the council. "We have others who lecture to classes of 300. The way that information is reported is something not to be taken lightly. Its implications could be great."

Taylor told the council that the start-up cost of the data base is estimated at \$500,000, with a yearly cost of \$250,000. The council will discuss the matter further at its next meeting Oct. 25.

Dick Dowdy is president of the Columbia Area United Way.

For the greatest good

Achieving the greatest good for the greatest number of people is a personal goal for Dick Dowdy. As volunteer president of the Columbia Area United Way this year, Dowdy says he can help the organization contribute to the many human services needs in the area.

"I have a desire to help people help themselves," says Dowdy, associate professor of human nutrition and foods at MU. "The United Way coordinates that effort efficiently

— it gets the most bang for the buck. It's a central source through which multiple agencies can raise funds."

Twenty-nine human services agencies benefit from the Columbia Area United Way. They include the American Red Cross, the Central Missouri Food Bank Network and Community Nursery Schools Inc. The University's Eldercare Center joins the list of agencies this year.

Dowdy says he became involved with the

organization 12 years ago after discovering how cost-effectively it fulfills its purpose. In that time he has served as a regional chairman and coordinator of fund allocations.

"One of the benefits of the United Way is that we minimize the cost of administration overhead," he says. Of the money raised each year, only about 15 percent goes for administrative costs. "I don't know of any other agency that has that low of an overhead. Also, the United Way is very accountable to those who give."

Dowdy adds that he is attracted to the United Way because of his profession. As a teacher of nutrition science, he has an interest in diseases such as osteoporosis, a nutrition-related condition in which bones become weakened. Osteoporosis mostly afflicts older people — an increasing segment of the population in communities such as Columbia, and a segment served by United Way agencies.

Though there are many demands on his time, Dowdy manages to make time for the United Way. "We all have the time," he says. "We just have to choose to use it."

First UW report encouraging

MU raised \$36,428, or 18 percent, of its \$200,000 United Way goal during the first week of the drive, campaign workers were told at the first report meeting Oct. 10.

"We're all very excited," says Bob Bailey, assistant dean of law and co-chairman of MU's campaign. "We have a large campaign staff, and, from past support, we look for-

ward to once again reaching our goal."

Mizzou's effort is a part of the Columbia Area United Way's campaign toward a goal of \$1.07 million. The next report meeting will be at 7:30 a.m. Oct. 17 in N243 Memorial Union. The campaign ends Nov. 2. With questions or to make a contribution, call 882-7254.

Phil Bradley is Homecoming grand marshal

Phil Bradley, former Tiger football and baseball star and now an outfielder for the Chicago White Sox, will be grand marshal of Homecoming activities this weekend.

The 1990 Homecoming, with the theme "MU & Football: First & Goal to the Future," comes during the 100th anniversary of the football program. It is also a year when the football team has gained a certain degree of notoriety; the Oct. 6 game with Colorado received national recognition when the officials lost track of the downs in the final minute, allowing Colorado to score the game-winning touchdown on a extra, fifth-down play. The week before, MU upset Arizona State, 30-9.

House decorations will be judged and viewed in Greektown Friday evening, beginning at 7 p.m. The Homecoming parade begins at 9 a.m. Saturday at Fifth Street and Conley Avenue, and will wind through campus and the downtown area. The Tigers will play Kansas State at 1:30 p.m. Saturday on Faurot Field; tickets are \$16. Also at that game, the athletic department will announce

the 25-man all-century team, as decided by a vote of fans. Members of the team will be introduced at half time.

Bradley will be the special guest at a meeting of the Black Alumni Organization Saturday evening. The event, at 7 p.m. in N201-202 Memorial Union, will honor former MU football lettermen. Faculty and staff are invited at no charge, but are asked to make reservations at 882-6611.

Bradley, one of MU's best all-around athletes, became a quarterback on the football team his freshman year and guided the Tigers to bowl games in 1978, 1979 and 1980. In baseball, he starred as an outfielder on Missouri teams that won the Big Eight championship in 1980 and went to the NCAA Tournament in 1980 and 1981. He was drafted out of MU by the Seattle Mariners, and also played with the Philadelphia Phillies and Baltimore Orioles. He received a bachelor's degree in business administration from the University in 1982.

New rules this year are designed to limit the consumption of alcohol during Homecoming. For the first time, alcohol will not be allowed on fraternity or sorority property during house decoration competition. Police officers and cadets will be positioned at street barricades and will patrol the streets in Greektown Friday evening. In addition, alcohol will not be permitted at the parade.

Parking, appeals committees will face challenges

Members of the parking and transportation committee and of the traffic appeals committee were told Oct. 9 that they will be called upon to help make some important decisions in the coming year.

"There's a lot going on around campus right now and we'll need your help," Jim Joy, director of Parking and Transportation Services, told the two groups at a meeting at the Memorial Union. "These are matters in which committee input is vital." Among those issues:

- parking permit hangtags for convertibles. Joy noted that some MU employees have both convertibles and hardtops. "Normally, when an employee has two cars and switches his or her hangtag between the cars, it's no problem. But you can't leave a hangtag on a convertible. How do you want to handle this?"

- traffic rules and regulations on campus. "These need to be revised," Joy told the groups. "It's been several years since we've updated them."

- parking for recently moved departments or offices. Joy told the group that when a department or office moves into a new building, faculty and staff want to be reassigned to nearby spaces. But most times, those spaces are already occupied by other people in the area. "What do you want to do about this?" he asked the parking committee.

- a request by Tom Ray, president of the Missouri Students Association, that the MSA Student Court be allowed to help with the appeals of some student traffic tickets. "We may want to look at this as a possibility," Joy said.

Keel Groshong, vice chancellor for Administrative Services, reviewed new construction projects on campus, including the Turner Avenue garage, being built in the area bounded by Turner, Conley and Maryland avenues and Sanford Street. The garage, which will hold 1,300 cars, is scheduled to open next summer.

Both advisory committees report to Groshong, who noted that the joint meeting was unusual. "We wanted to get you all together

to review current projects before you begin your work for the year," he said. Both groups plan to meet later this month.

Members of the parking committee are: Bettyann Dubansky, associate professor of social work, chairwoman; Harold Kerr, associate professor of agronomy; Verna Rhodes, associate professor of nursing; Clint Welsh, assistant professor of surgery; Ralph Anderson, professor of dairy science; Shirley Delbert, coordinator in Visitor Relations; Bill Blackwell, administrative associate II in Extension Administration; Debra Jones, administrative assistant in Faculty and Staff Benefits; and Rob Rebman, a senior marketing major from St. Louis.

*'You can't leave a
hangtag on a
convertible. How
do you want to
handle this?'*

— Jim Joy

Members of the traffic appeals committee are: Anne Edwards, librarian III at Ellis Library, chairwoman; Harley T. Wright, assistant professor of family and community medicine; Robert Hall, associate professor of entomology; Won Chang, professor of advertising; Robert Frank, associate professor of physical medicine and rehabilitation; Betty Martin, associate professor of practical arts and vocational-technical education; Joie Schoonover, manager in Campus Dining Services; Dixie Lenau, manager of Stenographic Services; Sheila Lynn Pauley, senior secretary in Extension Conferences; Kathy Smith, administrative assistant in the Law Library; Judith Stock, administrative assistant in the Energy Management Office; Michael Drennan, a senior in human environmental sciences from Ballwin, Mo.; Matthew Neigh, a senior in arts and science from Columbia; Denise Reddick, a senior in business and public administration from Columbia; and Mike Phillips, a second-year law student from Columbia.
