University of Missouri-Columbia /Feb. 12, 1992

Back to the future

Arts and Science Week will take a special look ahead to the 21st century.

"Discovering New Worlds" is the theme for the 1992 Arts and Science Week, Feb. 17 to 21. The weeklong celebration will recognize the achievements of faculty, staff, students and alumni of MU's largest college.

The week also will feature special events by student clubs and organizations. Alumni of the college will be coming back to campus to receive awards and to visit with undergraduates.

The culmination of the week's events will be the college's annual reception and banquet, at 6 p.m. Feb. 21 at the Holiday Inn Executive Center. Seven distinguished alumni awards and a distinguished service award will be presented.

"We try to come up with a range of people whose professional accomplishments underscore the diversity and

vitality of the arts and sciences," says Ted Tarkow, associate dean. "This year, for example, we have a U.S. congressman, a renowned academic historian and a very popular sports broadcaster."

And Tarkow has a prediction for the 1992 Arts and Science Week: "It's going to be a good one." The recipients of this year's awards are: James Irwin, AB '64, radio voice of the Green Bay Packers, the Milwaukee Bucks and University of Wisconsin football; Karen Ordahl Kupperman, AB '61, professor of history at the University of Connecticut and an expert on Colonial America; Ike Skelton, AB '53, LLB '56, U.S. representative from Missouri's fourth district; Hugh Stephenson Jr., AB '43, BS Med '43, first faculty member of the School of Medicine's surgery department and currently the school's associate dean for clinical development and chief of staff at University Hospital; Suk-Ryul Yu, MA '70, PhD '74, lecturer in political science at South Korea's Seoul National University and the country's leading authority on North Korea; Jack N. Thornton, BS '54, chief executive officer of Wadsworth Inc., a group of college textbook publishing companies; and William Trogon, AB '61, MA '62, PhD '73, BJ '78, author of the best-selling books *Blue Highways* and *Prairie Earth*, published under his pen name, William Least Heat Moon.

Robert J.M. Selsor, AB '82, JD '85, will receive the 1992 Distinguished Service Award. Selsor, a St. Louis attorney, helped create the Arts and Science Alumni Association while a student at Mizzou.

The week will kick off with a scholarship and award ceremony at 3:40 p.m. Feb. 17 in the Memorial Union

Russell OKs plan

MU's five-year budget reallocation plan, submitted to UM System President George Russell on Feb. 1, is expected to be forwarded soon to the Board of Curators.

Gerald Brouder, provost and interim chancellor, says he discussed the plan last week with Russell, who recommended only that some minor, stylistic changes be made. "We're changing some of the wording to make the plan sound more positive — to show how it will benefit the campus," Brouder says. Adds Russell: "The MU faculty and Chancellor Brouder did a good job of screening programs and activities. I intend to forward the recommendations to the board."

MU's plan lists \$6.47 million in cuts, to be reallocated toward campus priorities: salaries, University Libraries, computing, and repair and maintenance. More than half of the cuts would come in administrative areas, while four academic departments would be eliminated: Community Development, and undergraduate Civil Engineering, Electrical Engineering and Mechanical Engineering in Kansas City. In addition, selected programs would be eliminated in Health and Physical Education.

The curators are expected to discuss the reallocation plans of all four campuses at their meeting in St. Louis March 19 and 20.

Faculty-Alumni Lounge. That evening, faculty and students will take part in a panel discussion, "Liberal Arts Education: A Choice for the '90s," in Hulston Hall.

In keeping with the theme of the week-long celebration, events will focus on the arts and sciences in the next century. "Discovering New Worlds: The Arts in the 21st Century" will be at 7 p.m. Feb. 18 in N214-215 Memorial Union. "Discovering New Worlds: Technology in the 21st Century" will be at 7 p.m. Feb. 19 in the Whitmore Recital Hall in the Fine Arts Building. "Discovering New Worlds: Science in the 21st Century" will be at 8 p.m. Feb. 20 in 120 Physics Building.

Give 'em what they want

Single rooms, air conditioning in plans to lure students back to residence halls.

Roger Fisher, director of Residential Life, knows that a declining freshman enrollment means trouble for his budget. "Fewer freshmen translates to fewer students in the residence halls," he says. So he's trying to make the best of the situation.

Realizing that many students move off campus as juniors and seniors, he's trying to keep them on campus. This fall, two residence hall groups will provide the types of features that students say they want — single rooms, dining options, air conditioning and living in a hall with others their own age. More than \$6.5 million in renovation work is transforming the Pershing group and Johnston-Wolpers, and Fisher is excited.

"We're now able to offer some things that we've been wanting to offer for years," Fisher says. "The students choosing to take advantage of this will have to pay more, but we have indications that they will."

MU's freshman enrollment dropped 11.4 percent this year. Gary Smith, director of Admissions and Registrar, cites fewer high school graduates, increases in fees and higher admission standards as reasons to suspect that the decrease will continue. The effect is being felt already; McDavid and McReynolds halls, on the northwest part of campus, closed last year. "Except for Colorado, every school in the Big Eight is housing fewer students," Fisher says. "We certainly are not alone."

Of the buildings in the Pershing Group, just south of the Student Recreation Center, only four will remain as residence halls this fall. Graham will cater primarily to honors and international students, and Cramer will house students 21 and over. Stafford will be offered only to juniors and seniors,

and Defoe will be for graduate and professional students. Each building will have kitchenettes.

The four other buildings in the group are being rented to University Hospital and Clinics. "That's a win-win situation," Fisher says.

In addition, the old Pershing dining hall will be converted to what Fisher envisions as "a giant Break Time." "There will be daily hot meals with limited seating, or you can buy food, take it back to your building and prepare it there." By arranging an Upfront account with Campus Dining Services, students can charge meals and other purchases on their ID card. "Our goal is to meet students' needs, and they've been telling us that they want more options," adds Julaine Kiehn, CDS assistant director.

But the biggest change will be at Johnston-Wolpers — halls that go back to the 1940s "and have been beaten up pretty badly," Fisher says. Both buildings are being outfitted with central air conditioning; new heating, electrical and fire systems; new carpeting and furniture, and an elevator. A renovated dining hall will offer a wide variety of meals, including stir fry, fast food and salad bars. "It will be a dining hall unlike anything we've ever had on campus," Fisher says.

A Columbia advertising agency, Hanna-Stanley-St. John, is helping Fisher market the changes. "There are many good reasons for living on campus, and we'll be pointing that out," he says. As for the extra cost — \$700 annually for living in Johnston-Wolpers, \$180 for a single room in the Pershing group — Fisher believes students will pay it. "Back in 1986, when the University bought Mark Twain Hall, we had to charge a lot more for the air conditioning, semi-private bathrooms and the pool. But it filled up quickly."

Fisher, who has been at MU since 1980, was a student at Ball State University in Indiana in the 1960s. "I lived in a residence hall. It was two to a small room, old furniture, tile floors, and a choice in the cafeteria — take it or leave it," he says with a laugh.

"But things have changed. Today's students want more comfort, and are willing to pay for it. We're happy we can provide it."

Campus Dining Services Director Jim Korner, left, and Roger Fisher, director of Residential Life, look over construction progress at Johnston Hall. An elevator and new dining facilities are the most visible changes at the hall.

HAVE LUNCH WITH NORM

Faculty and staff are invited to two basketball luncheons this season with Coach Norm Stewart.

The luncheons will be at noon Feb. 18 and March 10, both in the Tingle Tiger Lounge at Memorial Stadium. Stewart will discuss the basketball program and answer questions.

The cost is \$5. To reserve your spot, call 882-2076. In each case, the reservation deadline is four days before the event.

YOU CAN LEARN THE LINGO

An intermediate Spanish course for faculty, staff and graduate students will begin this week.

The class will meet four hours a week for 12 weeks, and the cost is \$75. An organizational meeting will be at noon Feb. 13 in 202 Arts and Science Building to decide on the times and dates for the class. With questions, call Nancy Solorzano at 882-2151 or 474-5744.

WATCH THAT WITHHOLDING

If you notice an increase in your next paycheck, it's not a windfall — or a salary increase. New federal regulations call for an immediate reduction in the withholding rates for middle- and low-income wage earners.

That change will affect many University employees, beginning with the Feb. 12 bi-weekly paychecks.

But even though withholding rates are going down, your federal income tax liability will stay the same. That means that with less federal tax money withheld from your paycheck, you might wind up owing more in income tax at the end of the year.

The Payroll Office can help you change your W-4 form so you can match more closely your actual tax liability to the tax withheld. To get an estimate of how the change will affect you, stop by the Payroll Office at 16 Jesse Hall.

Faculty want voice in computer decision

Faculty will be consulted before the UM System makes any decision on possible changes in the current computer setup, Jim McGill, vice president for administrative affairs, told the Faculty Council Feb. 6.

The council invited McGill to speak on computer and early retirement issues. He noted that there are three mainframe data bases on this campus: an academic computing system for Mizzou; an administrative system for the UM System; and an administrative system for University Hospital and Clinics. He added that the University System stands to save as much as \$1.5 million by combining the systems into one data base.

"Several questions still need to be answered," McGill said. "Would the University operate it? Would it stay here, but someone else operate it? Or would we move the data center to another location?" He noted that George Russell, UM System president,

and consultants have been discussing the matter but have not reached a decision.

Several members of Mizzou's academic computing task force attended the meeting and criticized the process. "I was appalled when I learned that no faculty were consulted on this," said Allen Hahn, professor of veterinary medicine and surgery. "I came here in 1972 because of the potential for top-notch academic computing. We've made some progress in the past couple of years, and now you're wanting to take it away from us."

"Please don't destroy computing on this campus."

Also speaking were task force members Gordon Springer, associate professor of computer science, and Joyce Mitchell, associate professor of medical informatics. Both urged that any savings be redirected into academics at MU.

McGill responded by saying that Russell

is planning to assemble a committee to examine the various options. "Faculty will be included in that group," he added. He stressed that cost savings is not the only goal. "We want to maintain the same level of computing as we have now, if not increase it."

In regard to the early retirement program, McGill said 195 faculty and staff across the UM System have signed up. The deadline is Feb. 28. "Most of those who have signed up are staff," he added.

UM System officials earlier had estimated that one-third of the roughly 1,600 eligible faculty and staff would sign up. If that occurred, payroll savings would be about \$21 million a year. "Nearly 900 employees have requested detailed information on the program, which is encouraging," McGill said. "But obviously, we won't know the final number until Feb. 28."

On another topic, the council approved a resolution supporting the student conduct committee in its handling of the Jamal Coleman case. Coleman, a basketball player who pleaded guilty to a stealing charge, had been suspended by the committee but took the case to U.S. District Court. There, Judge Scott Wright overruled the committee's decision and blasted the group for its racial

makeup; Coleman is black and all faculty committee members are white. He also said the committee erred in not allowing students to serve on the group.

The original resolution, written by the council's executive committee, supported the committee's decision and urged "appropriate authorities" to investigate "the fitness of Judge Wright" to serve on the bench. But several council members said they could not vote for it. "You don't criticize a federal judge like this," said Ed Hunvald, professor of law. "We weren't there; we don't know what happened." Other members, including John Bauer, professor of medicine; Pat Plummer, professor of chemistry; and Richard Hoft, professor of engineering, said the resolution was inflammatory.

Other members, however, said the committee needed the council's support. "They've been beaten to a pulp over this," said Andrew Twaddle, professor and chairman of sociology. Malcolm Asplund, professor of animal science, proposed an amended resolution stating that the council "affirms its confidence in the conscientiousness and integrity" of the committee members. The resolution passed 20-5, with one abstention.

List of minority, women vendors available through computer

University policy encourages departments to use vendors that are owned by minorities and women. For the past three years, a directory of those businesses has been compiled by Procurement and Materials Management for use by employees on all four campuses of the UM System.

Now the directory is available on-line, through the University's mainframe UMINFO system. The Business Policy Manual and the Personnel Policy Manual also are available on-line.

Each year the directory almost doubles in size. This year's directory contains 300 more vendors than last year. Since the directory now is being provided on an on-line basis, more frequent updates will be possible. Of the 217 classes of goods and services, 207 are available from businesses owned by minorities and women, and include everything from building materials to blood-testing equipment.

All departments that have discretionary purchasing authority (D-Numbers) or other

contract authority are encouraged to refer to this directory before making a purchase. Operational procedures are set out in the MU Business Policy and Procedure Manual, section 3:012; or the on-line manual, section 3.04.

There are two easy ways to access the directory. If you have a CMS user ID on UMVMA, log on to CMS using your ID. On the COMMAND line, type UMINFO and press (ENTER). This will provide you with a predefined printer selection based on your ID.

If you do not have a UMVMA CMS user ID, go to the CMS log on screen. For assistance in getting to this screen, contact the Campus Computing help desk. On the USERID line, type UMINFO and press (ENTER). Once into the UMINFO system, choose the PF3 option that refers to the Registered Minority/Women Vendor Directory. The directory has a HELP option listed in the opening menu. There are also PF keys listed on the screen that will help you carry out many functions.

Designing MU

Whether it's a minor office change or a major building remodeling, Campus Facilities Planning and Design Services can handle your needs.

Howie Beauchamp, architectural assistant for Design Services works to provide quality and meet University requirements while meeting his client's needs at a reasonable cost. It can be a big job, but nobody understands the needs of a client in this University's setting better than Howie and the other architects and engineers in Planning and Design Services. And if the job demands are such that an outside design consultant is needed, Planning and Design Services will handle all the details and provide you with a representative to make sure your needs are met by the consultant.

Howie Beauchamp, another of...

The Many Faces of Campus Facilities

SINGLES GROUP MEETS FEB. 22

Single members of MU's academic community are invited to join a loosely structured group that meets monthly for good food, good conversation and friendship.

The next gathering will be at 6:30 p.m. Feb. 22. With questions, call 445-1263, 445-3388 or 875-5065.

ROSES FOR YOUR SWEETIE

The Horticulture Club has a bloomin' good idea for Valentine's Day.

The club's annual Valentine's sale will be from 8 a.m. to 5 p.m. Feb. 14 in Greenhouse 16, just west of the Physics Building. Roses will be featured, and will be available tissue-wrapped or boxed. Prices range from \$3.50 for a single rose to \$25 for a boxed dozen. An array of blooming potted plants also will be available.

ENVIRONMENTAL CONFERENCE TONIGHT

Those concerned about the environment may want to come to the Memorial Union Auditorium this evening.

At 6:45 p.m., the First National Teleconference on Environment and Development will be beamed by satellite into the auditorium. It will provide information on the Earth Summit Conference, scheduled in Rio de Janeiro in June. "We'll be discussing the 21 working issues of the conference, and there will be a question-answer session," says Robert Wixom, professor of biochemistry and chairman of the MU Environmental Affairs Council.

The council, the MU Earth Week steering committee and the College of Agriculture, Food and Natural Resources are sponsoring the two-hour event.

Deans discuss summer hours option

The Council of Deans met Jan. 31 and discussed the possibility of retaining normal 8 a.m. to 5 p.m. office hours across campus during the summer.

Several deans complained about MU's current policy, which gives offices and departments the option of switching to summer hours — normally 7:30 a.m. to 4 p.m., with a half-hour lunch break. "Many times you need to reach someone after 4 p.m., and no one is there," said Anthony Hines, dean of engineering. "The inconsistency hurts us." Dean Mills, dean of journalism, agreed. "When it's after 4 and you need to refer someone to another office, and that office is closed, it's bad P.R."

But other deans said eliminating the op-

tion could hurt staff morale. "First we tell our people that we can't give them raises, and now we're facing budget cuts," said Mary Lenox, dean of library and informational sciences. "Now, on top of that, we're going to tell them that they can't have summer hours? I don't think that's a good idea." Don Swoboda, vice provost for extension, said he believes his employees would object to the change. "Staff have gotten used to working from 7:30 to 4 in the summer," he said.

Gerald Brouder, provost and interim chancellor, urged the deans to discuss the issue with their employees. He said he will discuss the matter with the Staff Advisory Council. "We'll come to a conclusion in March," Brouder said.

On another topic, the deans learned that a consultant has been hired to help the University determine its fund-raising needs. Roger Gafke, vice chancellor for Development, University and Alumni Relations, said the consultant, Robert Alsbrook, will be on campus during the next two months. "He'll be talking to you about any ideas you might have, and the report should be available in April," Gafke told the deans. "We're looking at the best ways to obtain private support." Gafke noted that MU's current fund-raising campaign ends in June 1993.

MIZZOU WEEKLY

Vol. 13

No. 22

A publication of the University of Missouri-Columbia faculty and staff, published every Wednesday during the academic year and twice a month during the summer by Publications and Alumni Communication, a department of Development, University and Alumni Relations Division, 1100 University Place, 882-7357. News deadline is noon Wednesday the week before publication. Annual subscriptions are available for \$20.

Graphic editor: Nancy Daniel

Chancellor search begins

A search is under way for a new chancellor at MU. Former Chancellor Haskell Monroe resigned in December after serving as Mizzou's chief academic and administrative officer since 1987.

UM System President George Russell named the nine-member committee, which includes faculty, deans and curators. Russell's charge to the search committee is to do a national search "to find the best available person" for the chancellorship.

Members of the search committee are: James Westbrook, professor of law, chairman; Jay Dix, associate professor of pathology; Don Sievert, professor of philosophy; Larry Clark, dean of the College of Arts and Science; Roger Mitchell, dean of the College of Agriculture, Food and Natural Resources; Bea Smith, dean of the College of Human

Environmental Sciences; curator John "Woody" Cozad, Kansas City attorney; curator Webb Gilmore, Kansas City attorney; and curator Cynthia Thompson, St. Louis businesswoman.

Westbrook says the group plans to start reviewing applications April 1. "We're going to try to finish up in early summer," he said. "We don't have a rigid deadline. I don't believe that's possible right now."

Members of the University community and other interested people are invited to submit nominations and applications to the committee. Those suggestions will be part of the national search to develop the best available list of prospects. In addition, the committee will advertise in national publications and take other steps to identify specific candidates.

cost is \$30, including shipping and handling.

In 1935, the Missouri legislature commissioned Benton to paint the mural. Benton, who was born in 1889 in Neosho, completed the work in December 1936. He said *Social History* was intended to portray "a variety of people involved in their natural daily activities that did not require being polite."

In making the film, Fillosays, "We wanted to try to recreate for the viewer the experience of standing in front of this mural. We hope that seeing the film will be like looking through the eyes of a sensitive and knowledgeable spectator."

The UM System plans to make *Tom Benton's Missouri* available to more than 1,100 schools and 28 television stations in Missouri, as well as to public and cable television stations nationwide. With questions, call 882-4591.

Video of Benton's mural on sale by UM System

Thomas Hart Benton's mural, *Social History of the State of Missouri*, a bold and colorful depiction of Missouri from its pioneer roots to the Great Depression, is the subject of a half-hour documentary film by Frank Fillo, a film and television producer for the UM System, and James Bogan, professor of art at the University of Missouri-Rolla.

A videopackage, including *Tom Benton's Missouri* and *George Caleb Bingham*, is available on VHS format from UM System University Relations, 826 Lewis Hall. The

PROJECT A.D.A.P.T. ALCOHOL AND DRUG ABUSE PREVENTION TEAM

Speakers Needed:

Concerned individuals are needed who are willing to assist us by volunteering to be on our "speakers' list." This means you would be available to present a program on substance abuse or related topics such as coping skills or stress management to campus groups.

If you would like to be included in this worthwhile endeavor or need more information, contact Jill Mosher at 205 Brady Commons or (314)882-4634. Thanks for helping us help others.

...just a friendly word from Project ADAPT

STRESSED? ANXIOUS?

You don't have to be! If you have been:

- Constantly worried for months
- Feeling keyed up and on edge
- Having difficulty sleeping
- Experiencing dry mouth
- Irritable or easily tired
- Restless or unable to concentrate
- Sweating or having chills

You may qualify for a free program being conducted by the University of Missouri Hospital and Clinics that involves the use of an investigational anxiety-reducing medication. If you are between the ages of 18 and 65, and you have no serious medical illnesses, then call

(314) 882-0408

and ask for the Anxiety Study today.

LABORATORY FOR FERTILITY AND CRYOBIOLOGY

Semen Donors Wanted

The laboratory is seeking semen donors for its sperm bank program. The program is confidential and all donors will be compensated.

As a potential donor, you will undergo non-invasive screening procedures to insure good health and fertility potential. You must be between the ages of 20 and 40. If you are interested, call 882-7199.

MINORITIES ARE NEEDED

Lynn Hindley comes to Mizzou from the University of Massachusetts.

New horizons

Coordinator cites value of study in another country.

Lynn Hindley is enthusiastic about her new job as coordinator of Mizzou's study abroad programs. But then, there's good reason; a study trip to Scandinavia changed her life eight years ago.

As an undergraduate at Washburn University in Topeka, Kan., Hindley traveled to Denmark one semester to study international business. "It was a wonderful experience," she says. "We were taught by experts in the field. The people were warm and helpful. I stayed with a terrific family in Copenhagen. I loved absorbing the culture — not just reading about it from a book, but living it."

"I came back a different person. And one of my thoughts was, 'I'd like to help other students do something like this.'"

Over the next several months, Hindley volunteered at Washburn's International Center. And in 1987, following graduation and a brief stint as a shoe merchandiser, she was selected as a study abroad advisor at the University of Massachusetts. She comes to Mizzou after four years in that position.

"We're pleased to have such a competent and enthusiastic addition to our staff," says John Heyl, director of the Center for International Programs and Studies. Hindley is pleased as well. "This is the type of work I've wanted to do since my trip to Denmark," she says.

As study abroad coordinator, Hindley administers MU's eight exchange programs and four regular programs. About 200 Mizzou students study each year in countries including Taiwan, Germany, Mexico, the Commonwealth of Independent States (the former Soviet Union), Spain, France, Japan, Australia and England. About 30 students from other countries come to MU for

a year under the exchange programs. "I make sure that the students have everything they need to enter the programs successfully — both academically and personally," she says. "We have 200 students now, but are shooting for about 400 within five years. I think we'll make it."

She also works with Heyl and campus departments to initiate new programs. "We're really close to finalizing plans for one in France," she says. "That's where our biggest demand is right now."

Hindley refutes the common misconception that most program participants are studying a foreign language in western Europe. "Certainly, we have students who want to go to Paris and study French, or travel to Munich and study German," she says. "But virtually every discipline can benefit from international study — philosophy, journalism, ag economics. You name it."

She wants faculty, staff and students to know that her office is willing to help. "We can give presentations to your department or group, or supply you with various materials," she says. "We also advise students one-on-one, and encourage you to send them to us if they have any questions about studying abroad." The center is in 205 Lowry Hall, and advisement hours are from 10 a.m. to noon Monday and Wednesday, and from 1:30 to 4 p.m. Monday through Thursday. The phone number is 882-6007.

In the past three years, Hindley has led student groups to Leningrad and Japan — experiences that are among her most memorable. "Especially in Japan, where whites are a minority, you gain a new awareness of diversity," she says. "It changes you. You come back with more understanding of the people around you, and you know a little more about who you really are."

"That's a major part of the learning process. It's exciting to see students return from studying abroad, their eyes sparking from new knowledge and experiences. That's what it's all about."

Q&A

Q. What are the proper channels to go through to have a campus building designated as non-smoking? Campus Facilities and Environmental Health and Safety have studied the ventilation and air flow in the Telecommunications Building. It was determined that the current ventilation system in our break room was not designed to accommodate massive smoke removal, but

a smoking area not frequented by non-smokers has not been established.

A. The University's smoking policy is administered on a building-by-building basis by the campus building coordinators, says Kee Groshong, vice chancellor for Administrative Services. Coordinators of the Telecommunications Building are Beverly Blackwell, manager of Telecommunications; and Jim Yeager, manager of Campus Computing's production services.

Telecommunications has had a smoking policy in force since September 1987, nearly a year before Mizzou instituted a campuswide policy. Blackwell says that because of continued resistance by non-smokers to the campus

policy, the Telecommunications Building policy was further revised and restricted last April. The current smoking policy there permits smoking only in private offices, in the loading dock area of the first floor computer center, and in the break room after 12:30 p.m. Blackwell says that fewer than 20 percent of the building's 46 employees are smokers. When the weather is good, they're encouraged not to smoke inside the building but to use an area outdoors with a picnic table and benches. Blackwell says the use of "clean air" machines was considered, but postponed because of the cost and the anticipation of a more stringent campuswide policy.

There are three tables in the break room.

"Designating one table as a smoking table really doesn't work," Blackwell says. "Until the campus adopts a smoke-free policy for all buildings, Jim Yeager and myself are working to create an atmosphere of compromise between smokers and non-smokers. We believe the existing smoking policy in the building is fair." She adds that they are reconsidering the use of air-cleaning equipment because these machines not only clean the air of smoke, but of germs and pollen as well.

Send your questions about campus matters to *Mizzou Weekly*, 1100 University Place. You must include your name and phone number so we can reach you, if necessary. All questions remain anonymous.

MIZZOU PEOPLE

Susan Porter Benson, associate professor of history, attended the American Historical Association meeting in December in Chicago, where she was chairwoman of a panel, "Economic Inequality Among and Within U.S. Households."

An article by John Bullion, "British Ministers and American Resistance to the Stamp Act," has been published in *The William and Mary Quarterly*. Bullion is professor and chairman of history.

Larry D. Clark, dean of arts and science and professor of theater, has published the

sixth edition of his textbook, *Acting is Believing*.

Patricia Cook received the Staff Recognition Award for February from the College of Agriculture, Food and Natural Resources. She is a secretary in agronomy extension.

Divisional Achievement Award recipients for November at University Hospital and Clinics were: Frances Tompkins, telecommunications; Linda Korte, senior licensed practical nurse; Randy Flanagan, registered respiratory therapist; and Barbara Culwell, licensed practical nurse.

Weldon Durham, associate dean for academic programs, is co-chairman of the research awards committee of the Association for Theater in Higher Education. The committee selects winners of ATHE's \$1,000 prize for book-length studies in the-

er practice and pedagogy.

Mary Lenox, dean of library and informational science, discussed "Curriculum of Inclusion: African-American History and Cultural Enrichment" at an in-service session for staff of Columbia's school system.

Shirley Patterson, M-TIKES coordinator; Ron Gillam, assistant professor of communicative disorders; and Bob Busch, professor of special education, presented a mini-seminar, "Integrating Preschoolers with and without Disabilities: A Transdisciplinary Approach," in November at the annual convention of the American Speech-Language Hearing Association in Atlanta.

Fred N. Springsteel, professor of computer science, attended two short courses last fall: Oracle Corp.'s classes on Data Base Architecture and Data Base Administration at the

Denver Technical Center, and MIT's Summer Seminar on "Ethical Conflicts in Recent American Science."

Charlie Warner, associate professor of journalism, discussed "The Future of Broadcasting" for the Illinois Broadcasters Association in Chicago in October.

Betty Winfield, professor of journalism, discussed "Media and the Political Process: The 1992 Election Coverage" at the Freedom Forum Media Studies Center's symposium, "Media at the Millennium."

Have you been promoted, won an award or presented a paper recently? The 'People' column wants to know about it. Send your news to Terry Jordan at 1100 University Place. But please be patient; we receive many entries, and publish them in the order in which they are received.

Be good to your heart during HeartBeat '92
Saturday, Feb. 15
Columbia Mall

Make an appointment for an electrocardiogram and cholesterol screening. Join the University Hospital's Mallwalkers Club and walk your way to a healthy heart. Enjoy fitness demonstrations from Center Stage and visit heart-healthy, educational booths.

Join hosts Dan Corkery (K102), Sonya Duhé (KOMU-TV 8) and Terry Overfelt (Columbia Mall) at Center Stage. Check out your risk for heart disease by picking up a heart risk test at University Hospital's Health Information Center, American Heart Association or KOMU-TV 8.

8-9 a.m. **Mallwalkers Club Registration.** Come for a free continental breakfast at the Health Information Center. All new Mallwalkers will receive a free Mallwalkers T-shirt and are eligible for special discounts or benefits at the following Columbia Mall merchants: Arby's, Burger King, Columbia Book Store, Foot Locker, Hurst's Diamond Shop, Payless Shoe Source, Sterling Optical and Taco Bell. To join the club, just stop by and fill out a registration form.

10 a.m. - 4 p.m. **HeartBeat Cards—\$15.** Electrocardiograms reduced to a wallet-size card, so you can carry your heart history with you. In the event of a cardiac emergency, this baseline EKG can save valuable time when presented at an emergency center. Appointments are necessary. Call 882-6565.

Cholesterol screenings—\$5. A total blood cholesterol level will be offered with immediate results and nutrition counseling by registered dietitians. Appointments are necessary. Call 882-6565.

HeartBeat News Series. Heart disease is the number one killer in mid-Missouri and it's preventable. Join Sonya Duhé, KOMU-TV 8, for an in-depth look at heart disease in a special five-part series airing at 6 p.m., Feb. 10-14, on NewsCenter 8.

HeartBeat 30-minute News Special. At 6:30 p.m., Sat., Feb. 15, Sonya Duhé, KOMU-TV 8, interviews leading heart doctors who explain how heart disease is treated in mid-Missouri.

Heart Risk Test. Find out if you're at risk for heart disease by picking up the Heart Risk Test at the Health Information Center at Columbia Mall, KOMU-TV 8 or the American Heart Association.

WINTER '92 C-BASE TESTING

Attention Faculty and Undergraduate Advisers

All undergraduate students who have completed 60 or more hours of course credit will be required to take the Undergraduate Assessment Test (C-BASE) before registering for next semester. This requirement has been established by the University Board of Curators and must be completed.

REGISTRATION:

Students must register in person for a specific examination time. Registration is from 8 a.m. to 5 p.m. Feb. 17-28 at 208 Brady. Students with disabilities requiring special accommodations must register through the Test Administration Services office.

EXAMINATION TIMES:

DAY	DATE	TIME
Tuesday	March 3	1:30 p.m. to 5:30 p.m.
		6 p.m. to 10 p.m.
Wednesday	March 4	2:15 p.m. to 6:15 p.m.
		6 p.m. to 10 p.m.
Thursday	March 5	1:30 p.m. to 5:30 p.m.
		6 p.m. to 10 p.m.
		• 6 p.m. to 10 p.m.
Saturday	March 7	8 a.m. to noon
Tuesday	March 10	• 1:30 to 5:30 p.m.
		2:15 p.m. to 6:15 p.m.
Wednesday	March 11	6 p.m. to 10 p.m.
		2:15 p.m. to 6:15 p.m.
Thursday	March 12	6 p.m. to 10 p.m.
		1:30 p.m. to 5:30 p.m.
Saturday	March 14	6 p.m. to 10 p.m.
		8 a.m. to noon

• Reserved for College of Education students only.

UNIVERSITY POLICY:

- All students (including transfer students) who have earned 60 or more credit hours are required to take the exam.
- Students who have earned 45 through 59 credit hours are eligible to take the exam.
- The following students are exempt from taking the exam:
 - Students who have earned more than 75 credit hours prior to Fall Semester 1991.
 - Students who have taken C-BASE previously to fulfill College of Education requirements.
 - Students who have already earned one or more bachelor's degrees.

MSA/GPC FILM: *Love Story* will be shown at 8 p.m. in Ellis Aud. Cost: \$1.50 public, free for MU students with ID.

Advisors are using email!

Over 30 members of MU's Advisors Forum are using email on UMCVMB to communicate with each other, the University community and colleagues across the country.

The Newsletter of the Advisor's Forum can now be viewed on INFORMU under "Faculty & Academic Unit Topics/Issues." And many advisors are using ACADV, an electronic discussion group sponsored by the National Academic Advising Association, to exchange ideas and information on how to better serve MU students.

In October '91, MU advisors even started their *own* electronic discussion group, MUADV-L, to communicate University-wide. For information about using these services, please contact Linda Blockus by phone at 2-5979 or email at BIOSLB@UMCVMB.

LETTERS

On Jan. 13, the Staff Advisory Council sent a letter to President George Russell. The council offered its assistance in recommending staff members to serve on the search committee that reviews candidates for the chancellor's position. We sent our letter because we felt that it was vitally important to have staff represented. As we stated in our letter, "Staff are vital to this institution and play an important part in its future, as does the person who will be named chancellor."

We are extremely disappointed that staff, the second largest constituency group on this campus, will not be represented. The person who will be named chancellor represents the whole campus, and therefore we feel it is essential to have diversity on the search committee. In a letter we received Feb. 4 from President Russell, he indicated that "a large group would not be doing the executive search," and therefore a staff person would not be added to the committee. Staff feel that the importance of having the major constituency groups represented should far outweigh concern about the size of the committee.

Staff can be effective and provide valuable input in the process of filling this important position. We would like the opportunity to prove that.

Linda Cook, Chairwoman
Staff Advisory Council

FOR THE RECORD

CLARIFICATION: An item in the Feb. 5 *Mizzou Weekly* stated that copies of the University's personnel policies, procedures and rules are available at the Personnel Services office. Faculty and staff who wish to review the University Collected Rules and Regulations, including the grievance procedure, may do so at the following locations: Personnel Services/Affirmative Action, Heinkel Building; Personnel Services, University Hospital; Office of the Vice Provost for Minority Affairs and Faculty Development, 116 Jesse Hall; and the reserve desk at Ellis Library.

HOME COMING: The dates for Homecoming Week 1992 are Oct. 17 through 24. The week's activities will culminate with the football game with Nebraska on Oct. 24.

PESTICIDE SAFETY: A 116-page handbook with the latest safety information on "Designing Facilities for Storing, Handling and Using Pesticides" is available from MU's Agricultural Plan Service. The handbook is designed to help agricultural chemical dealers and farmers comply with pesticide containment regulations. Copies of the handbook (MWPS-37) can be ordered for \$17.50 from the Agricultural Plan Service, 205 Agricultural Engineering Building.

The 'For the Record' column gives MU departments and units the opportunity to advertise used or unneeded equipment for sale. There is no charge for this service. Send your notice to John Beahler at 1100 University Place, or call 882-5918.
