## ON THE INSIDE

Page 4 A \$500,000 gift underscores 40 years of strong ties between MU and South Korea.

Page 5 MU research will help heart attack patients.

## Looking ahead

*Recommendations are in from MU Planning Council and academic planning committee.*

Over the summer, MU's two planning groups worked steadily on a list of issues vital to the University's future. Last week, the academic planning committee and the MU Planning Council forwarded reports to Gerald Brouder, provost and interim chancellor, with recommendations on issues ranging from computer technology to increased fund raising and financial aid for students.

The academic planning committee, after exploring the options, recommended that the schools of social work and of library and informational science not be relocated to UM-St. Louis.

"It was the committee's firm recommendation that those two schools remain here," Brouder says, adding that there was "good and compelling rationale" for the decision. He notes that MU's long-range plan calls for an increased emphasis on graduate education. "The School of Library and Informational Science is only a graduate program, and this is the campus with the major research library," he adds.

"An argument was made that the School of Social Work might be funded better in St. Louis, and that students might be afforded greater opportunities for field experiences. The analysis shows that the program is better suited to rural social work."

Now that the reports are in, Brouder says he will be examining the recommendations carefully "to derive from that volume of paper what aspect of the planning process we will focus on next." He adds that the structure of the process also will be examined to see if the two planning groups should be merged.

"Like other parts of the University, the planning process is in continual change," he says. Brouder also notes that Charles Kiesler, who takes over as chancellor Nov. 1, is "an

important new player" in long-range planning.

Kiesler says he will approach planning with an open mind. "The planning process that the University has had in the past couple of years seems especially fitted for cuts," he says. "The new one should focus on where we need to invest our resources."

"I'm not coming in with a rigid process in mind. I do believe, however, that deans should play an important role in any self-assessment plan. We should look at all departments and ask ourselves, 'What is it that we're trying to accomplish? And how do we get there?'"

Judson Sheridan, vice provost for research and spokesman for the MU Planning Council, notes that one of his group's recommendations is being tried already. The program, "Your Ideas Count," provides cash awards for employee suggestions that save money or improve efficiency.

On some issues, the planning process is far from over. Peter Markie, professor of philosophy and chairman of the academic planning committee, says a subgroup of his committee is still reviewing information on program mergers submitted by deans.

"The committee is sitting there now with the information coming in. It takes a lot of work to review it," Markie says. "In no way are we finished looking at those issues."

## A dream come true

*University Club will offer faculty, staff fine dining privileges in elegant setting.*

For John Bauman, the new University Club is more than a grand dining and meeting facility on the second floor of the Reynolds Alumni and Visitor Center. It's the fulfillment of a 30-year dream.

"I came to Mizzou in 1961, and we've been trying to get something like this all that time," says Bauman, professor of chemistry and chairman of the University Club's social committee. "It's wonderful. It definitely will serve a need."

The University Club, which opens for meal service Sept. 16, offers dining and meeting privileges to faculty, staff, retirees and alumni at a fee of \$120 a year. There also is a \$25 initiation fee. Memberships will not be checked the first couple of months, however. "We want to invite faculty and staff to stop in and try us out," Bauman adds.

This year, monthly luncheons with guest speakers, and brunches before home football games will be open to members and non-members alike. Other special events are available only to members. Those include a wine-tasting series, dinner theaters, and buffets before certain Concert Series events.

Bauman sees several advantages for faculty and staff who decide to join. "You'll get to meet people from other departments," he says. "Faculty in chemistry, for instance, might never see faculty from law and English. This way you will."

"It will give us a place to share excitement about the University. We can meet over lunch and talk about a new book we're writing or a research project we're beginning. It will give us a beautiful setting in which to

entertain guests, and we'll have the chance to meet with alumni, too."

Faculty and staff who are used to brown-bagging it may have to change their lifestyles a bit. "But those who venture over will enjoy the new club," Bauman says.

Thom Guthrie, general manager, says members will have access to conference and meeting facilities in the Reynolds Center,

**'This isn't fast food. We want people to relax and enjoy themselves.'**

—John Bauman, professor of chemistry

and will have reciprocal privileges at more than 100 faculty clubs at universities in North America. He's shooting for 1,500 members the first year; right now the total is at 400. Applications will be mailed next week.

"The emphasis will be on leisurely dining at a fine restaurant," Guthrie says. Adds Bauman: "This isn't fast food. We want people to relax and enjoy themselves." The restaurant, which seats 96, and an adjoining lounge provide a splendid view of Jesse Hall. Breakfast and lunch will be served Monday through Friday, and dinner will be served Friday and Saturday evenings, beginning Sept. 25.

"We see this as a gathering place in the heart of campus," Guthrie says. "It's a place where alumni can return and reunite, and a place where faculty and staff can retreat and relax." With questions, call 882-6512.

The talents of Chef Rick Lampe will provide fine dining for University Club members and guests.

Rob Hill photo

### BOWLING LEAGUE IS BEGINNING

A faculty-staff-graduate student mixed bowling league has begun, and new teams are welcome.

Any combination of men and women, up to five per team, plus substitutes, is allowed. Bowling is at 6:30 p.m. Mondays at the Oakland Plaza Lanes, 2116 Vandiver Drive. Cost is \$6.50 per person, plus a fee for bowling conference membership cards.

To sign up, or with questions, call Bill Hainen at 882-4331.

### COLUMBIA, THE GOOD LIFE

Living costs in Columbia are 10.1 percent below the national average, the Columbia Chamber of Commerce reports.

For the first quarter of 1992, Columbia received a composite index figure of 89.9. That means that goods costing \$100 in an average U.S. city would cost \$89.90 in Columbia. Other Missouri city indexes range from 85.3 in Nevada to 96.1 in St. Louis. New York City has the highest index in the nation with 219.1.

Columbia's indexes by category are grocery items, 91.9; housing, 85.4; utilities, 74.2; transportation, 94.9; health care, 102.2; and miscellaneous goods and services, 93.7. For information on other cities, call the chamber office at 874-1132.

### BENTON FILM WINS GRAND PRIZE

*Tom Benton's Missouri*, a UM System film about the famous mural in the Missouri Capitol, has won top honors at the Great Plains Film Festival in Lincoln, Neb.

The \$1,000 prize went to coproducers Frank Fillo, executive producer of UM System film and video productions, and James Bogan, art professor at UM-Rolla. They spent more than four years planning, shooting, editing and raising funds for the film.

The mural, a montage of images from Missouri's frontier days through the Depression, was commissioned by the General Assembly in 1936. Benton, a Neosho native who had gained fame for his vivid regionalist paintings, persuaded legislators that the state needed its own "social history."

To order a copy, call 882-7794. The cost is \$30, including shipping and handling.

## Jobs plentiful for graduates in several fields

Recent graduates from the School of Health Related Professions have found the job market is "fabulous," says Richard Oliver, director of the school.

"This is definitely one of the hottest areas in the country for new graduates," he says. "Basically, every graduate who looked received at least one job offer, and most received multiple offers."

More than 95 percent of May graduates from the school have accepted job offers. On the average, 60 percent of MU health related professions graduates work in Missouri. Within the field, physical therapy and occupational therapy are the hottest careers, with demand for qualified therapists far exceeding the supply. Most physical therapists start work at average salaries ranging from \$30,000 to \$35,000. However, some graduates may begin their careers making \$50,000 or more.

Oliver says a major reason for the high demand for health-related professionals is that Americans generally are living longer and require more long-term health care and therapy as they age.

Rose Porter, associate dean of nursing,

echoes Oliver's sentiments and says graduating nurses also are entering a wide-open job market. "There is a huge demand for long-term care and home health-care nurses," she says. About 80 percent of nursing graduates had jobs at graduation, and Porter says the rest probably have been offered a job by now. The average starting salaries reported by graduates are in line with the national average, at about \$25,500.

While the health-care industry leads the pack in job opportunities for new graduates, job seekers are finding many other strong career fields.

Barbara Breen, career services manager in the College of Engineering, says "well-rounded, qualified graduates can get work and are more frequently taking jobs at small to medium-sized consulting firms, rather than with large firms that traditionally employ the majority of graduates." More than half of the reporting undergraduate engineering students who graduated in May have accepted positions, while about 20 percent are preparing to enter graduate school.

In particular, demand for chemical and

civil engineers is increasing to deal with current environmental concerns, Breen says. Most students who graduated in those fields had little trouble finding jobs that pay an average of \$38,000 for chemical engineers and \$28,000 for civil engineers.

Accounting continues to be a solid field in the business arena, says Karen Shelton, director of the College of Business and Public Administration's office of career services. More than 90 companies made job offers to the college's graduates last spring, and Shelton says most will receive offers within six months of graduation. Salaries for new accountants average \$28,250 for the large "Big Six" firms and \$25,000 for smaller firms, figures that mirror current national averages.

Graduates of the College of Agriculture, Food and Natural Resources are finding many available agriculture sales positions offering salaries from about \$24,000 to about \$33,000, along with a variety of attractive benefits such as cars and expense accounts. "All aspects of the agriculture field have rebounded from the farm crisis of the 1980s," says Dana Brown, placement director for the

college. During the past academic year, more than 100 potential employers visited the college, conducting more than 950 student job interviews.

In addition, hotel and restaurant management continues to be a strong area, supporting a national trend of more available jobs in the service industry.

The College of Education is reporting an increased demand for special education teachers throughout the country. Math and science teachers also are finding positions widely available. Because a number of school systems do not hire new teachers until mid to late summer, many recent graduates are finding their new positions at this time.

The School of Law is reporting a placement rate of about 70 percent as of last May. Average salaries for new attorneys are about \$38,000. However, some lawyers in large metropolitan firms can make from \$50,000 to \$80,000 in their first year.

New journalism graduates are finding a more difficult market than existed several years ago. However, the School of Journalism reports that graduates are finding work in a variety of positions across the country, including jobs at Cable News Network, the Asian Wall Street Journal and the Associated Press.

## MU tops Big Eight schools in biotechnology grants

It's official: MU scientists lead the Big Eight in competing for grants from the Midwest Plant Biotechnology Consortium.

Mizzou was awarded grants totaling \$140,000 for three research projects in the emerging field of plant biotechnology. Iowa State is the only other Big Eight school to receive as many grants. The University of Nebraska received two and Kansas State received one.

MU scientists June Bourque and Michael Zwick, research assistant professors in the biotechnology program, received new grants of \$49,000 and \$54,000, respectively, for their projects aimed at using genetic engineering to help plants defend themselves against viruses or control fruit ripening while avoiding the use of chemicals. Ed Coe, professor of agronomy, received a renewal grant of \$37,000 to continue leading the effort to create a genetic map of the 10 chromosomes in corn. The map would take years off the time needed for breeders to develop hybrids.

"The University of Missouri-Columbia clearly is competitive in the emerging fields of biotechnology and plant genetics," says Dorin Schumacher, executive director of the consortium. "To receive a grant, scientists must go through a rigorous review process that includes input from industries and scientific peers."

Last year American companies spent \$1.5

billion on biotechnology research, much of which was proprietary. Biotechnology is a major area of focus for MU's Food for the 21st Century Program, a cooperative effort between the colleges of human environmental sciences, veterinary medicine and agriculture, food and natural resources.

"Food for the 21st Century was expressly designed to bring together teams to address some of the most exciting issues in biotech-

nology," says Roger Mitchell, dean of agriculture, food and natural resources. "The very kind of genetic engineering being discussed in the Flavr Savr tomato is being perfected by several of our faculty in plant biotechnology. They are developing transgenic plants that may have more efficient yield patterns, improved disease resistance and more efficient nitrogen utilization."

"At the same time, MU animal reproductive biologists are identifying genetic material, cloning it and gaining a better understanding of the effect on certain key incidents in the reproductive process in beef, swine and sheep. In addition, we are using biotechnology in food engineering studies.

"In every instance, these MU scientists are understanding the basic system better so their colleagues in other universities or industry can do what American agriculture has done so well for so many years — improve efficiency and provide the consumer with a safe, reliable and economical food supply."

The consortium awarded nearly \$2 million in matching funds to 24 research teams at 11 universities during the 1992 competition. Other institutions that received grants include the University of Chicago, the University of Illinois, the University of Minnesota, Michigan State University, Ohio State University, Purdue University and the University of Wisconsin.

## CLASSIFIEDS

### FOR SALE

2,900-SQUARE-FOOT lovely home west of town. Four years old. Four bedrooms, three baths, hand-cut stone, spacious kitchen with skylight, formal dining. Highly energy efficient. \$159,900. Call Dave at 445-1061, or Jim Durand at (804) 385-7250.

### WANTED

ONE OR TWO PEOPLE to join carpool from Centralia to MU. Permanent hours 7:30 a.m.-4 p.m. Must be punctual. Call (314) 682-2803 or (314) 682-2346 evenings.

WOULD LIKE TO RECRUIT two additional persons for an established car

pool from Mexico to MU. Work hours are 8 a.m.-4:30 p.m. Please call (314) 581-3250.

### SERVICES

FALL CLEAN-UP. Raking leaves, tilling garden plots, painting and repair of houses and outbuildings. Mature and dependable. Call 874-8160. Leave message if no answer.

COUNSELING & PSYCHOTHERAPY — personal, educational, vocational, marital and relationship — by appointment. Call Don Eggeman, psychologist, 449-6910, for appointment or additional information.

HOUSECLEANING WITH A PERSONAL TOUCH! Reasonable rates, good references. Weekly, monthly, or as-needed to fit your schedule. Free estimates! No job too large; no job too small. Call 442-8224.

MEDIATION OR LEGAL REPRESENTATION in family matters: dissolution, post-dissolution, parenting issues, child support, name change, wills, social security disability. Call 874-7989 for more information. Lynn M. Malley, mediator and attorney.

The Classified Advertising Section is open only to faculty and staff members and retirees. A home phone number is required in all classified ads. No refunds will be given for cancelled ads.

REACHING FOR THAT STAR

## Turning a Disability Into a Possibility

1-4:15 p.m.  
Tuesday, Sept. 15  
Columbia Mall Community Room

In recognition of National Rehabilitation Week, Rusk Rehabilitation Center presents "Turning a Disability Into a Possibility," a series of free programs designed to share the latest information in rehabilitation medicine. If you are disabled or have a loved one who is disabled, you are cordially invited to attend this seminar offered just for you.

- 1-1:45 p.m. Taking Steps With the Parastep. A physical therapist explains this new system for helping paraplegics walk and stand. The system will be on display.
- 1:45-2:30 p.m. Moving Toward Independence. An assistive technology specialist shows adaptive equipment and shares new technology that makes day-to-day activities easier.
- 2:30 p.m. Refreshment break.
- 2:45-3:30 p.m. Life Without a Voice? You're visiting a friend you haven't seen for months, and you don't have the ability to talk or speak clearly. A speech/language pathologist explores other ways to "talk."

- 3:30-4:15 p.m. Caring For the Caregiver. While you are caring for your disabled loved one, who is caring for you? Social workers focus on the needs of the family.

For more information, call 882-6565.

Korean political leader Soon Sung Cho announces a \$500,000 gift to MU. Larry Clark, dean of the College of Arts and Science, says the gift is seed money for the Harry S. Truman Institute for Asian Studies.

Rob Hill photo

## BUILDING BRIDGES

*\$500,000 gift will fund U.S.-Korean meetings, plant seed for program in Asian studies.*

Please pardon Larry Clark if he seems overly excited about a \$500,000 gift from the Korean Foundation. But it could mean a new institute for Asian studies in the College of Arts and Science.

Clark, dean of the college, announced the gift at a news conference with Soon Sung Cho, a former MU professor and now a political leader in South Korea. The gift will fund conferences on U.S.-Korean relations, beginning in Columbia in fall 1993.

More than that, though, the gift represents the first component of the Harry S. Truman

Institute for Asian Studies, a project that Clark would like to see established within five to 10 years. A total of \$10.5 million will be sought for such things as endowed chairs, faculty development, library resources and exchange programs. "We will depend heavily upon alumni support for this institute," Clark says. "It would be absolutely unique because of the focus on Harry Truman."

Truman is viewed as the liberator of South Korea, and as a result, MU and the state of Missouri have had a deep relationship with Korea for the past 40 years. "From 1953

through 1970, Koreans attending MU did not have to pay tuition," Cho says. "Literally thousands of Korean students began or finished college here." Today Koreans make up about 10 percent of the University's total international student population.

With 185 members, the Korean Alumni Association is the largest MU alumni chapter outside the United States. Many leading South Koreans are Mizzou alumni, including six members of the Korean National Assembly, the past three ministers of finance for South Korea, numerous presidents and

chief executive officers of businesses, and several professors.

Cho, an MU political science professor from 1968 to 1988, is now chairman of foreign affairs for the Democratic Party in Korea. He sponsored the legislation that resulted in the \$500,000 gift. Fees on passports and visas in South Korea will go to the Korean Foundation, which funds projects at only three schools: MU, Harvard University and the University of California-Berkeley.

"I'd say that puts us in pretty good company," Clark adds with a smile.

## Project attempts to reduce accidents on highways

While about 40 percent of automobile accidents on Missouri highways occur in rural areas, statistics show that 80 percent of fatal auto accidents occur there. To save lives, a Mizzou engineer is evaluating rural road improvements.

"Like most states, Missouri has a lot of rural highways that are significantly below today's construction standards," says Mark Virkler, associate professor of civil engineering. He is working with David Guell, associate professor of civil engineering, and the state on a project to reduce the number of accidents.

"Many of these highways were built during the New Deal," Virkler says. "The state would like to improve them, but it will take a tremendous amount of money. They asked me to develop a formula to help them prioritize improvements so they can get the most for their money."

The \$128,000 project, funded by the Missouri Highway Department, will study 22,000 miles of rural roadway which carry fewer than 3,500 vehicles a day. The study will focus on improvements to shoulder and lane width, roadside obstacles, slope of the ground next to the road, narrow bridges, severe curves and sight distance at intersections.

The state's recent gas tax increase is intended to be used for such improvements.

In a December 1991 report to the department, Virkler outlined a mathematical formula to prioritize lane and shoulder width improvements. The mathematical model depends on average daily traffic at a particular site, current lane width, current paved or unpaved shoulder width, and proposed lane and shoulder widths.

When the numbers are punched in, the model can predict the number of head-on, sideswipe and single-vehicle accidents that should be eliminated if proposed improvements are made to a specific section of highway. The results can be used to determine a ratio of benefits to costs, upon which decisions can be made.

"A lot of studies have been done on the effect of changing one aspect of a road, such as improving a particular curve or widening a lane. But not a lot has been done about choosing which improvements to make if you're looking at 15 different things," Virkler said. "The idea is for the highway department to look at a particular site where accidents have occurred and decide what changes could be most effective. And if drivers can save time, that's an extra benefit."

# MU research aids heart attack victims

The School of Medicine was a major participant in a study of heart attack patients that was published in the Sept. 3 issue of the *New England Journal of Medicine*.

The study found that early use of a drug called captopril, which is commonly prescribed for heart failure and hypertension, significantly reduces the risk of recurring heart attack and deterioration of cardiac function in heart attack victims.

"This study's findings give physicians an important new therapeutic tool in the management of heart attack patients," says cardiologist Greg Flaker, associate professor of internal medicine and a principal investigator in the study. Flaker says this information could save the lives of as many as 15,000 heart attack victims each year.

"We went into the study with the expectation that captopril would be effective in preventing the heart enlargement and heart failure that often follows myocardial infarction," he says. "Not only was this hypothesis validated, but we discovered the drug prevents subsequent heart attacks, an exciting result that was not anticipated and certainly calls for additional study."

MU researchers enrolled 100 heart attack patients in the five-year trial, which began in 1987 and concluded in January. Patients treated with the medication within three to 16 days after a heart attack experienced a 19 percent reduction in mortality, a 25 percent reduction in subsequent heart attacks and a 24 percent reduction in overall adverse cardiovascular events, Flaker says.

"Our results clearly indicate that use of the drug captopril significantly reduces mortality and prevents heart failure in patients with a damaged myocardium due to heart attack," Flaker says. The myocardium is the muscular wall of the heart.

The Survival and Ventricular Enlargement trial (SAVE) involved a total of 2,231 men and women at 45 participating medical centers in the United States and Canada. It was funded by a grant from Bristol-Myers Squibb.

Captopril is one of a class of drugs known as angiotensin converting enzyme inhibi-

tors. Previous animal studies involving captopril suggested possible cardioreparative and cardioprotective effects, but Flaker says the study was the first large-scale clinical trial to test this hypothesis in patients after a heart attack.

"SAVE investigators made an important

finding that will be very helpful to heart attack victims," Flaker says. "Now we need to understand how this drug acts to prevent recurring myocardial infarction. Once we understand the mechanisms that led to this result, we may find the potential for even broader applications."

Campus Facilities

*A Decade of Progress*

# CALENDAR

Send calendar items in Campus Mail to Michelle Holden, 407 Reynolds Center, by noon Wednesday the week before publication. Events are free and open to the public unless otherwise noted.

## 9 Wednesday

**CRAFT STUDIO:** Five-week workshops in beginning pot throwing, basic photography and lost wax casting (jewelry) begin today. Call 882-2889 for fees and times.

**EMPLOYEE DEVELOPMENT SEMINAR:** Dixie Lenau, manager of Training and Office Support Services, will present "Managing the Student Worker" from 9 a.m.-noon in 146 Heinkel Bldg.

**MSA/GPC EVENT:** Student Services will present an activities mart from 9:30 a.m.-3 p.m. on Lowry Mall.

**MIDDAY GALLERY EVENT:** The video *The Grand Museum: The Louvre*, part I, will be shown at 12:15 p.m. at the Museum of Art and Archaeology.

**PHYSIOLOGY SEMINAR:** Sandra Petersen, assistant professor of medicine, will speak on "Regulation of LHRH Biosynthesis and Release" at 2:40 p.m. in M437 Medical Sciences Bldg.

**ANTHROPOLOGY LECTURE SERIES:** Philip Arnold, assistant professor of religious studies and adjunct assistant professor of anthropology, will speak on "Interpretation and Occupation: Indigenous and Colonial Strategies of Inhabiting the Valley of Mexico" at 3:40 p.m. in 2047 Engineering Bldg.

**ADVANCEMENT EVENT:** The Quarterback Club will have a rally and auction at 5:30 p.m. at the Holiday Inn Executive Center, I-70 and Stadium Boulevard.

**ECOLOGY AND EVOLUTION SEMINAR:** Mike Webster of the University of Chicago will present "My Friend, the Oropendula —

Or the Dynamics and Consequences of Intra-sexual Competition in a Harem-Polygynous Bird" at 7:30 p.m. in 106 Lefevre Hall.

**MSA/GPC SPECIAL EVENT:** Magician-comedian Brad Montgomery will perform at 8 p.m. in the Memorial Union Lounge.

**FINE ARTS SERIES:** The play *Ordinary People* will be performed at 8 p.m. at the Rhynsburger Theater. Cost: \$7 public; \$6 faculty/staff/senior citizens; \$5 students.

**MSA/GPC FILM:** *Better Off Dead* will be shown at 8 p.m. in Ellis Aud.

**WOMEN'S CENTER:** "Astronomy for an Autumn Night" will be presented from 10 p.m.-midnight at Rock Bridge State Park. Meet at 9:30 p.m. in 229 Brady Commons.

## 10 Thursday

**CRAFT STUDIO:** Five-week workshops in beginning pot throwing and stained glass begin today. Call 882-2889 for fees and times.

**EMPLOYEE DEVELOPMENT SEMINAR:** Karen Touzeau, assistant vice chancellor for Personnel Services/Affirmative Action, will present "Coaching for Improved Performance" from 9 a.m.-4 p.m. in 146 Heinkel Bldg.

**WOMEN'S CENTER:** "Black Sororities: What they Mean to African-American Women Today" will be presented at noon in 229 Brady Commons by representatives from black sororities. "Lesbian Roundtable: Pet Show" will be at 7 p.m. at the center.

**STAFF COUNCIL:** Group will meet at 1:15 p.m. in S110 Memorial Union.

**FACULTY COUNCIL:** Group will meet at

# EXHIBITS

**BINGHAM GALLERY:** The Annual Art Faculty Exhibition, featuring works in painting, drawing, graphic design, sculpture, fibers, ceramics, jewelry, printmaking and mixed media, will be on display through Sept. 25. Hours: 10 a.m.-4 p.m. Monday through Friday and 2-4 p.m. Sunday. Gallery is in the Fine Arts Building.

**JESSE HALL:** "Principles of Conservation," which deals with the conservation of art pieces, is on display on the second floor through Sept. 15.

**MEMORIAL UNION:** "The Public Journal Is a Public Trust," an exhibit about the School of Journalism, is on display in the south wing exhibit cases through October. The exhibit was prepared by University Archives, with cooperation from the School of Journalism Museum.

**MUSEUM OF ANTHROPOLOGY:** Archaeological collections include millions of artifacts dating from 9000 B.C. to modern times. The focus of exhibits is on the prehistory of Missouri and the Midwest. Hours: 9 a.m. to 4 p.m. Monday through Friday and 9 a.m. to 1 p.m. on home football Saturdays. The museum is located in Swallow Hall.

**MUSEUM OF ART AND ARCHAEOLOGY:** "Focus on the Figure: Twentieth-Century Nudes from the Permanent Collection" is on display through Sept. 20. The museum, in Pickard Hall, open from 9 a.m.-5 p.m. Tuesday through Friday and noon-5 p.m. Saturday and Sunday.

**ROGERS GALLERY:** "Advanced Computer Graphics and Animation for Art and Design," a visual report by Richard Helmick, will be presented through Oct. 31. Hours: 8:30-11:30 a.m. and 1:30-4:30 p.m. Monday through Friday. Gallery is on the first floor of Stanley Hall.

## Health Care Questions?

## Call Our Nurse First.

The Newcomer Nurse at University Hospital and Clinics is the one to see if you need help finding a physician, transferring your medical records, or you just want a question answered. Stop in and visit with our Newcomer Nurse, Jane Cooper, RN., at the Health Information Center at Columbia Mall. Or give Jane a call at 882-4736. She even makes house calls!

## CAMPUS COMPUTING

# Short Courses

The following non-credit short courses are free of charge and open to MU faculty, staff, graduate and undergraduate (where noted) students. Registration is required. To enroll, please call 882-2000.

**Course:** Beginning CMS  
**Dates & Times:** Section 1: September 1 & 2, 6-9 pm  
Section 2: September 5 & 12, 9am-noon  
Section 3: September 9 & 10, 6-9 pm  
Section 4: September 10 & 17, 1:30-4:30 pm  
Section 5: September 14 & 15, 6-9 pm  
**Place:** 137 Physics

Open to undergraduates. A beginning-level hands-on course for CMS (Conversational Monitor System) directed toward student use. CMS is the principal operating system used for instruction and research purposes on the mainframe. The course covers logging on, creating files, using email, using an interactive editor and submitting jobs to print.

**Course:** Introduction to the Macintosh  
**Dates & Times:** Section 1: September 3, 1:30-4:30 pm  
Section 2: September 16, 1:30-4:30 pm  
Section 3: September 21, 1:30-4:30 pm  
**Place:** To be announced

A course for new users who want to know the basic procedures for using a Macintosh personal computer. Topics will include step-by-step looks at how to start the computer, start and exit user programs such as word processors, use the mouse, use pull-down menus, prepare a floppy disk to receive files and duplicate and erase disk files.

**Course:** Introduction to DOS I  
**Dates & Times:** Section 1: September 8 & 9, 1:30-4:30 pm  
Section 2: September 14 & 15, 1:30-4:30 pm  
Section 3: September 22 & 23, 1:30-4:30 pm  
**Place:** To be announced

A course for new users covering the basic procedures for using a personal computer. Topics include step-by-step looks at how to use the DOS 5.0 operating system to start the computer, start and exit user programs such as word processors, identify the different types of floppy disks, and preparing and using hard disks and directory structures.

### Campus Computing

## THE ECLECTIC ARTS SERIES IS BACK FOR THE 1992-1993 SEASON.

Five new shows have been scheduled for this season, including classical guitarist **Billy McLaughlin** and another outstanding play by the **Chicago New World Theater Company.**

Keep looking for new shows and more details, This year the MSA/GPC Fine Arts Committee is bringing more top quality entertainment to Columbia.

For more information, call 882-4640.

# Q&A

**Q.** The swimming pool at Lewis and Clark halls has been filled with dirt and planted with grass and three trees. What are the University's plans for this area?

**A.** The pool had not been used for several years and would have required extensive maintenance to be used again, says Phil Shocklee, assistant director of Campus Facilities. Therefore, a decision was made to fill in the pool with dirt and to landscape the area, a project which has been completed.

Send your questions about campus matters to *Mizzou Weekly*, 407 Reynolds Center. You must include your name and phone number so we can reach you, if necessary. All questions remain anonymous. *Mizzou Weekly* will not answer unsigned questions.

## FOR THE RECORD

**TOP SENIOR:** MU senior Patrick McClung, of Kearney, Mo., has been named by the Geology Society of America as one of the top seniors among geology majors in the United States. The society will provide him with complimentary registration and free housing during its annual meeting in Cincinnati Oct. 26 through 29. McClung also received a scholarship this year from the Pearl Todd Sando Scholarship Fund, established to support worthy MU students majoring in geology.

**MISSOURI ARTS BIENNIAL:** The Museum of Art and Archeology has been selected to organize the Missouri Visual Artists Biennial. Sponsored by the Missouri Arts Council, the program recognizes outstanding artists living and working in the state. The work of three Missouri artists will be included in an exhibition that will travel throughout the state. As organizer of the program, the museum will be host for the opening of the exhibition next March in Columbia.

**STAFF DEVELOPMENT AWARDS:** There is an Oct. 1 deadline for applications to be submitted for the latest round of Staff Development Awards. The awards provide funding for staff members to attend courses, classes or workshops that enhance their professional or personal development.

Individual awards may not exceed \$3,500, and group awards are limited to \$7,000. Retroactive funding and certification exams will not be considered for the awards, nor will proposals that are eligible for the University's educational assistance or adult education programs. Application forms have been mailed to eligible staff members and also are available from the Staff Advisory Council office at 319 Jesse Hall. With questions, call 882-4269.

The 'For the Record' column gives MU departments and units the opportunity to advertise used or unneeded equipment for sale. There is no charge for this service. Send your notice to John Beahler at 407 Reynolds Center, or call 882-5918.
