

# Soybean (Double-Crop) Planning Budget

Using this planning budget, soybean producers may estimate their costs and returns for 2026. Table 1 presents estimates for double-crop soybeans (after wheat) production in northern, central and southwest Missouri. Assumptions were based on price forecasts as of October 2025. Detailed prices and practices are summarized in Tables 2 and 3. The production practices used to develop these cost estimates are common for Missouri farms. Use the “Your estimate” column to plan your operation’s costs and returns for 2026.

Operator labor	10.10	
Machinery fuel	8.38	
Machinery repairs and maintenance	17.95	
Management	11.58	
Operating interest	10.19	
<b>Total operating costs<sup>1</sup></b>	<b>291.37</b>

<b>Total ownership costs<sup>2</sup></b>	<b>56.33</b>	
<b>Total costs<sup>3</sup></b>	<b>347.70</b>	
<b>Income over operating costs</b>	<b>94.54</b>	
<b>Income over total costs</b>	<b>38.21</b>	
<b>Return to land and management</b>	<b>49.79</b>	

Note: Totals may not sum due to rounding.

1. Operating costs per bushel = \$7.87.
2. Ownership costs per bushel = \$1.52.

3. Total costs per bushel = \$9.40.

4. These expenses were charged to wheat production since soybeans were planted in the same year wheat was harvested.

Table 2 shows input assumptions for the double-crop soybean budget. Price estimates reflect harvest time prices. Costs or returns from storage or other marketing methods are not included. Farm business overhead includes liability insurance, utilities, accounting, etc. Real estate charge was not included but could be allocated between the soybean and wheat crops.

Table 3 details the field activities assumed in this budget and their machinery costs. Machinery costs were estimated using typical life (years), use (hours) and performance (fuel and labor) factors for each power unit and implement used.

1. Machinery operating cost is the sum of fuel, repairs, maintenance and the value of labor.
2. Machinery ownership cost is the sum of machinery overhead and depreciation.

Producers can customize this budget using the [Missouri Crop Budgets workbook \(XLSX\)](https://extension.missouri.edu/media/wysiwyg/Extensiondata/Pro/AgBusinessPolicyExtension/Docs/crop-budgets.xlsx) (extension.missouri.edu/media/wysiwyg/Extensiondata/Pro/AgBusinessPolicyExtension/Docs/crop-budgets.xlsx). Each crop budget has an accompanying sensitivity analysis so producers can see how their financial return to land and management varies with different crop yields and crop prices.
