

NEW AND POWERFUL WAYS TO MEASURE LEARNING

A Presentation to
MSBA/MASA Annual Conference

Bill Elder and Howard Jones
Office of Social and Economic Data Analysis
University of Missouri
October 22, 2010

SESSION GOALS

- Explore the power of data to inform instructionally relevant decisions – Getting focused.
 - Explore different ways of looking at student performance to view progress over time at the district, school, class and individual student levels – ***“Growth Models”***
-

Office of Social and Economic Data Analysis University of Missouri

- Data
- Information
- Knowledge
- Wisdom

“The construction of knowledge involves more the orderly loss of information than it’s meaningless accumulation.”

-- Kenneth Boulding

[Http://WWW.OSEDA.MISSOURI.EDU](http://WWW.OSEDA.MISSOURI.EDU)

OSEDA Mission:

***Collaborate* with partners
to conduct *analysis* that contributes
to *improvements* in the health,
education and well-being of people
and communities in Missouri and
the world.**

Utilization Focused Information

“Answers” are ***“useful”*** when they reduce the risks of making the wrong ***decision***.

To know you have asked the “right” questions and produced “useful” answers....focus on decision makers and decision-making In particular...

Instructional decision-making

Governance, Administration, Teachers

Parents and Students

Educational Decision-Making

- **Formative**

- “Improve”
- Periodic and timely
- Focus on program activities and outputs
- Leads to early recommendations for program improvement

- **Summative**

- “Prove”
- Were resources committed worthwhile?
- Focus on outcomes and impact
- Measures value of program based on impact

“Summative” Result

Plotting a Course → Estimating Position → Choosing and Getting to Port
(Making a plan) (Where we might be) (Where we’re going)

“Formative” Information

Challenging Times....

The MSIP Educational Framework

Demographic Context

Educational Resources

Challenging Times....

Resources

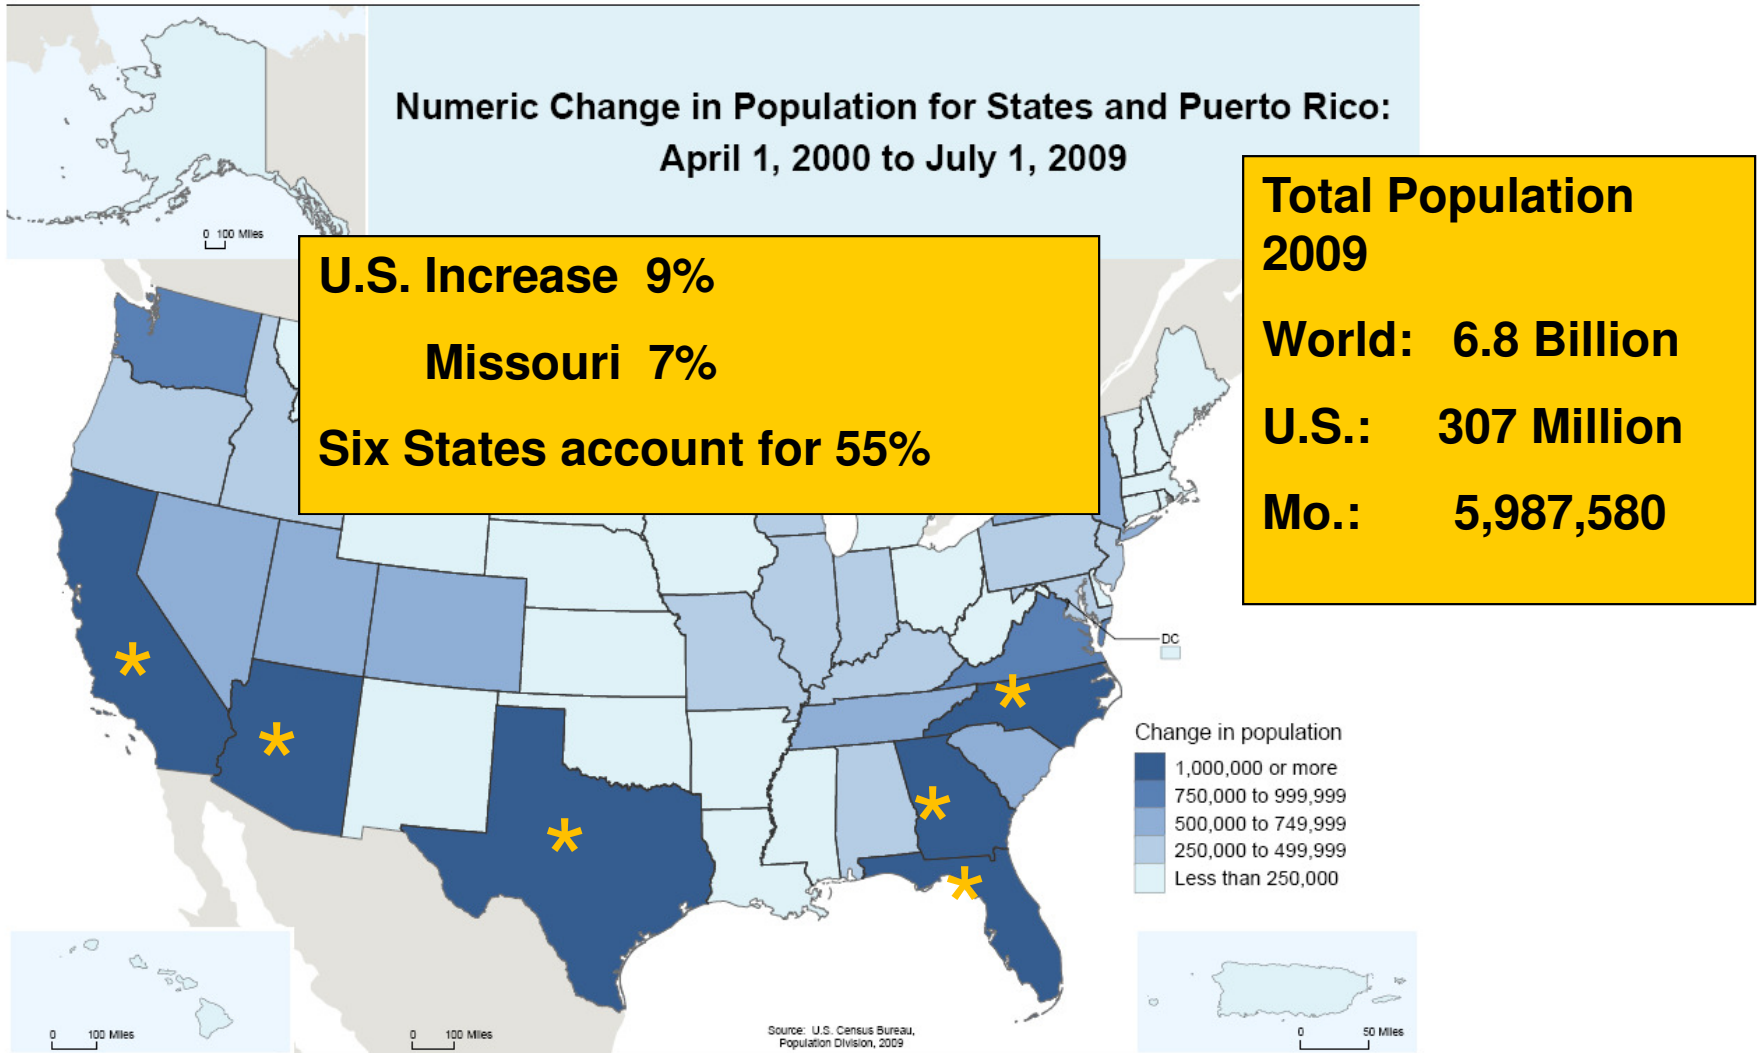

Maximum Calendar Days and Hours, 2005-2009

Year	2005	2006	Missouri		
			2007	2008	2009
Total Calendar Days	175	174.9	173.8	174.3	174.6
Total Calendar Hours	1,095	1,100	1,099	1,092	1,095
Length of the Day (Hours)	6.2	6.2	6.2	6.3	6.3

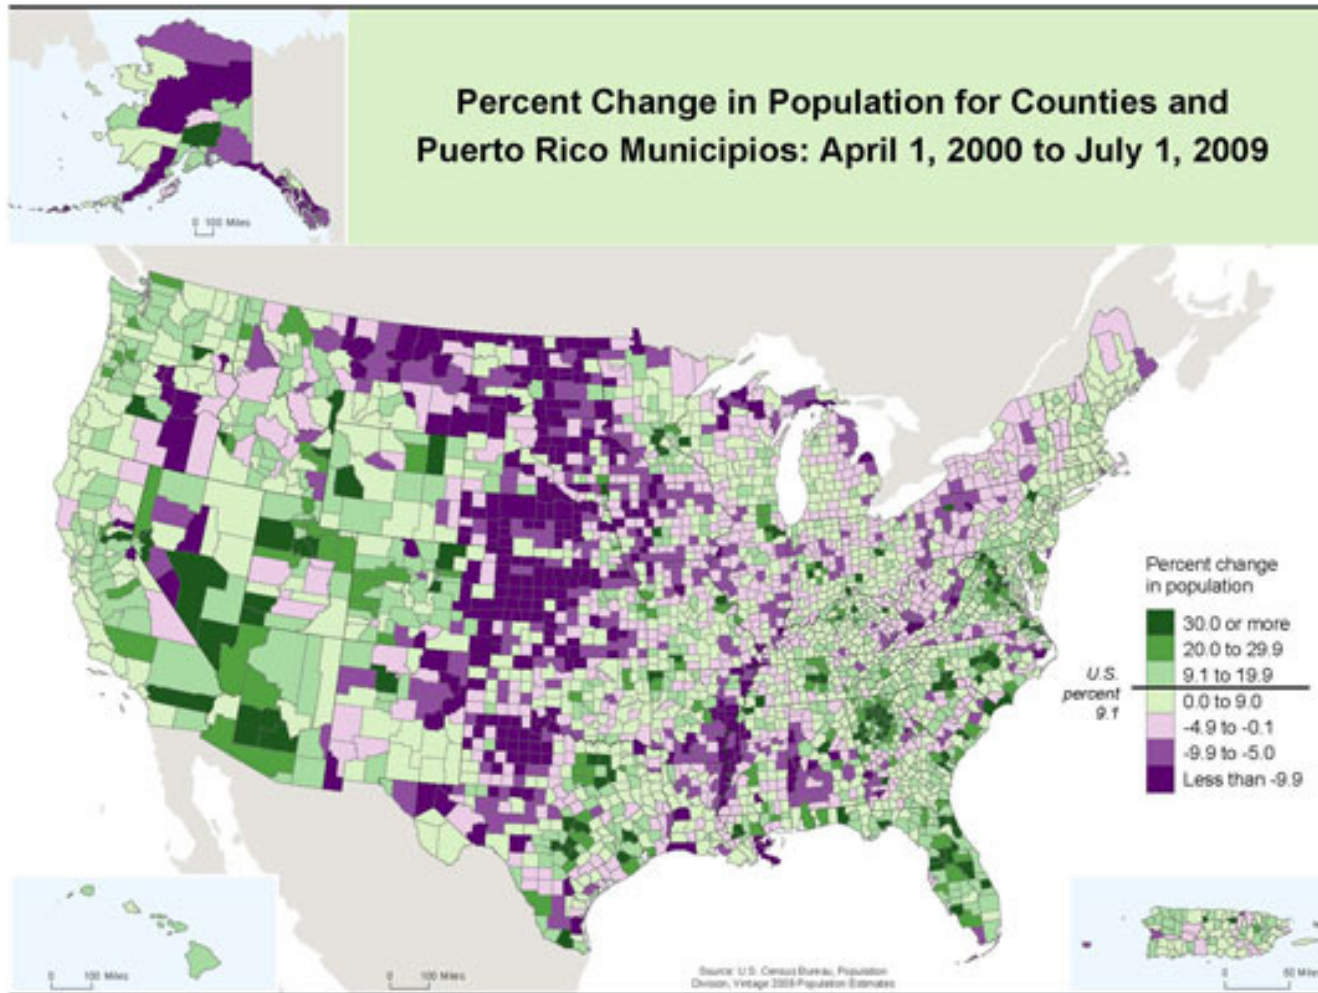

Demographic Context

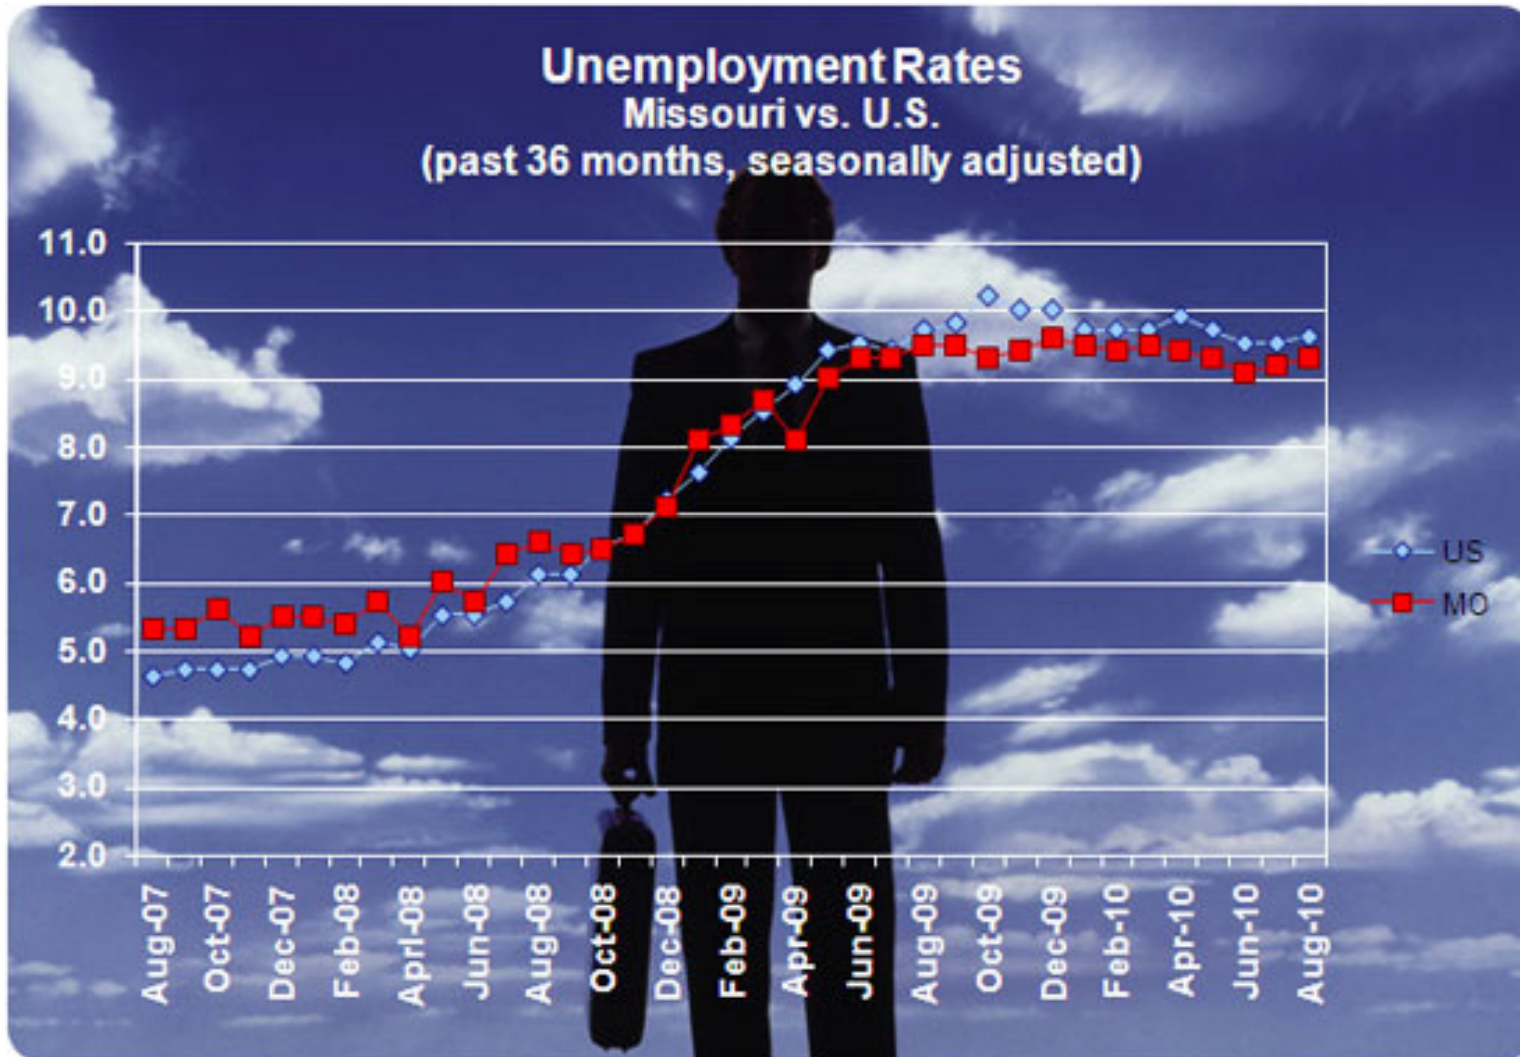

Quick Review of Demographics

Diverse Trends: Regions within Regions – and within urban areas

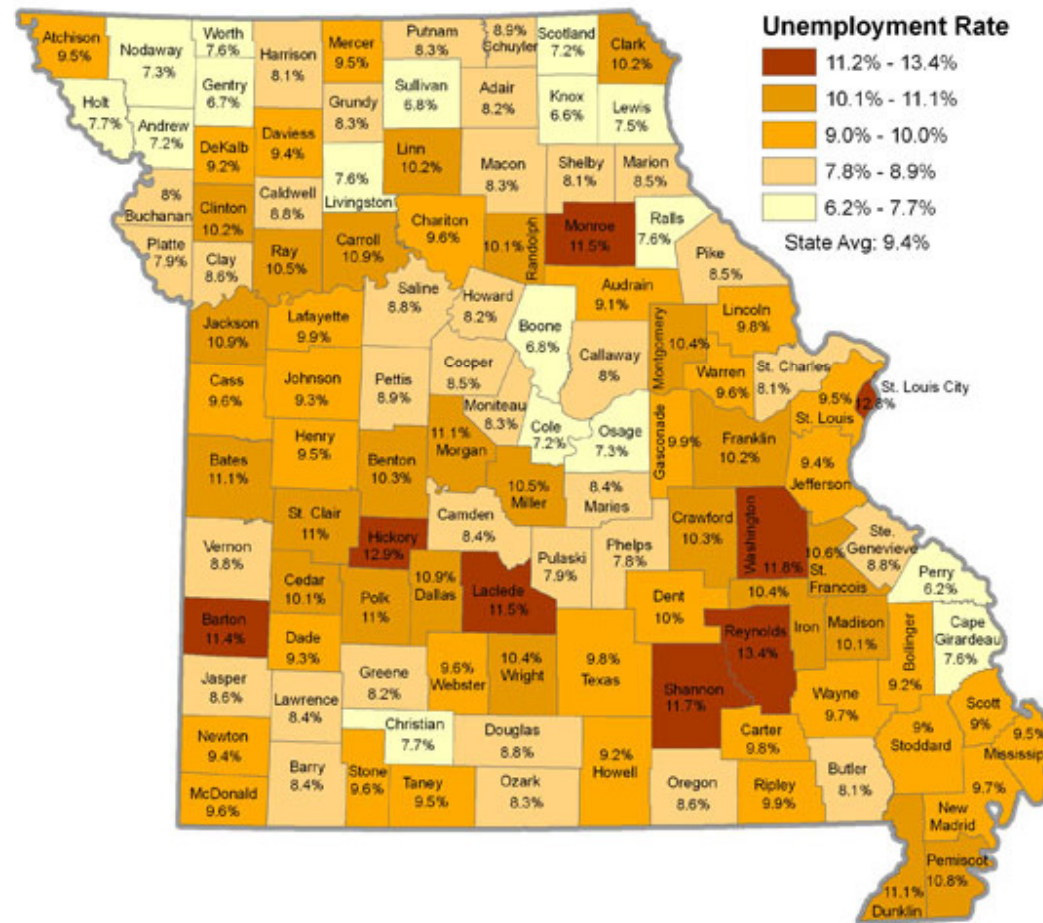

Challenging Times....

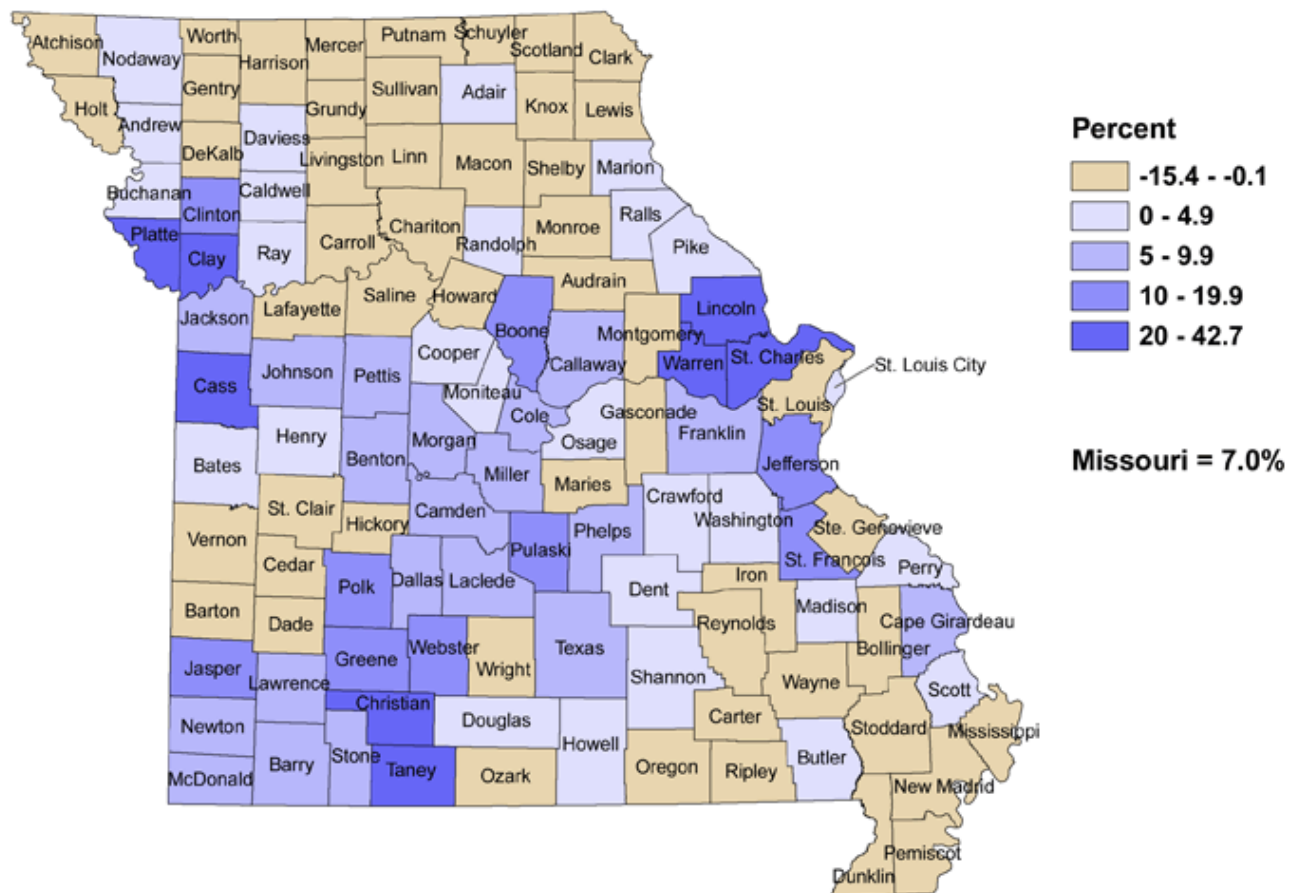

Challenging Times ... Regional Differences

Unemployment Rates - August 2010
Not Seasonally Adjusted

Patterns of Growth

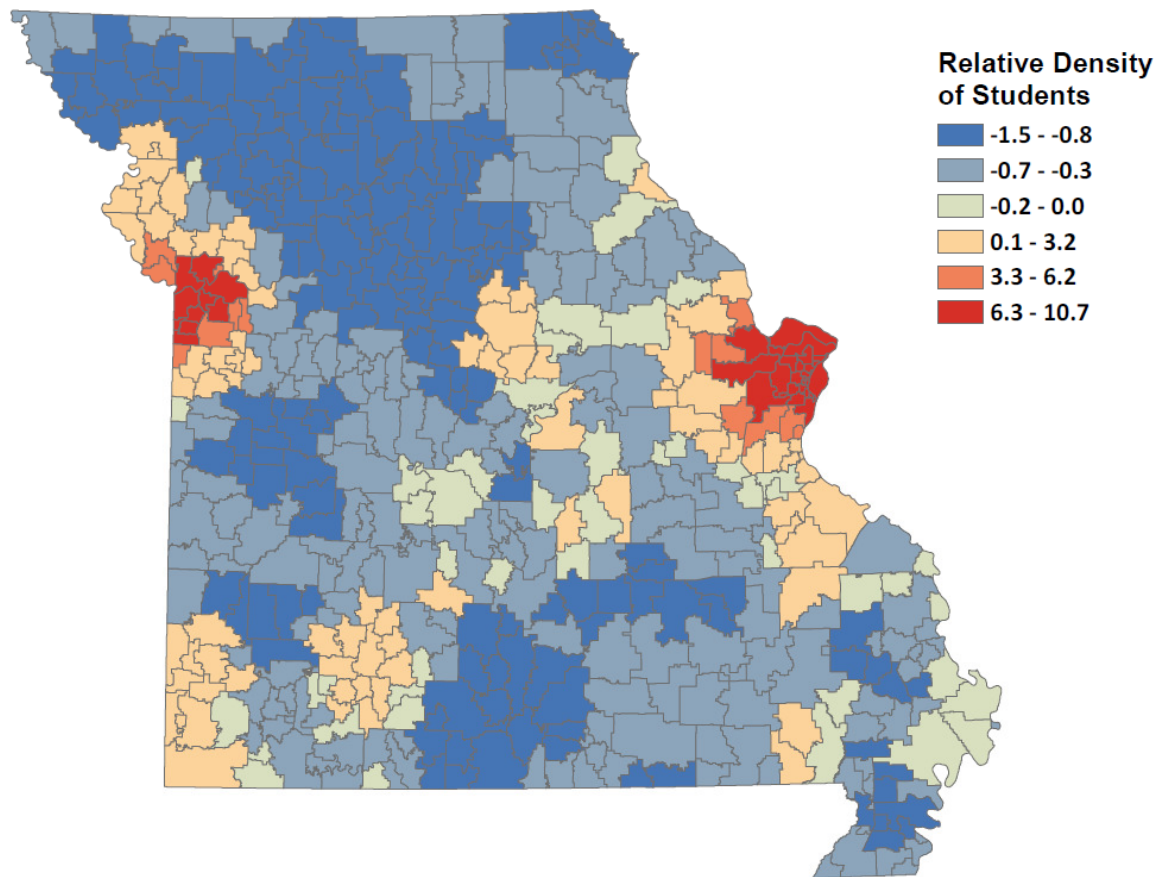

Percent Change in Total Population by County, 2000-2009

Data Source: USDC, Bureau of the Census, Federal State Cooperative for Population Estimates, 2009
 Map Prepared By: University of Missouri Extension, Office of Social and Economic Data Analysis (OSED)A
 Map Generated On: 15 Jun 2010

Patterns of Growth

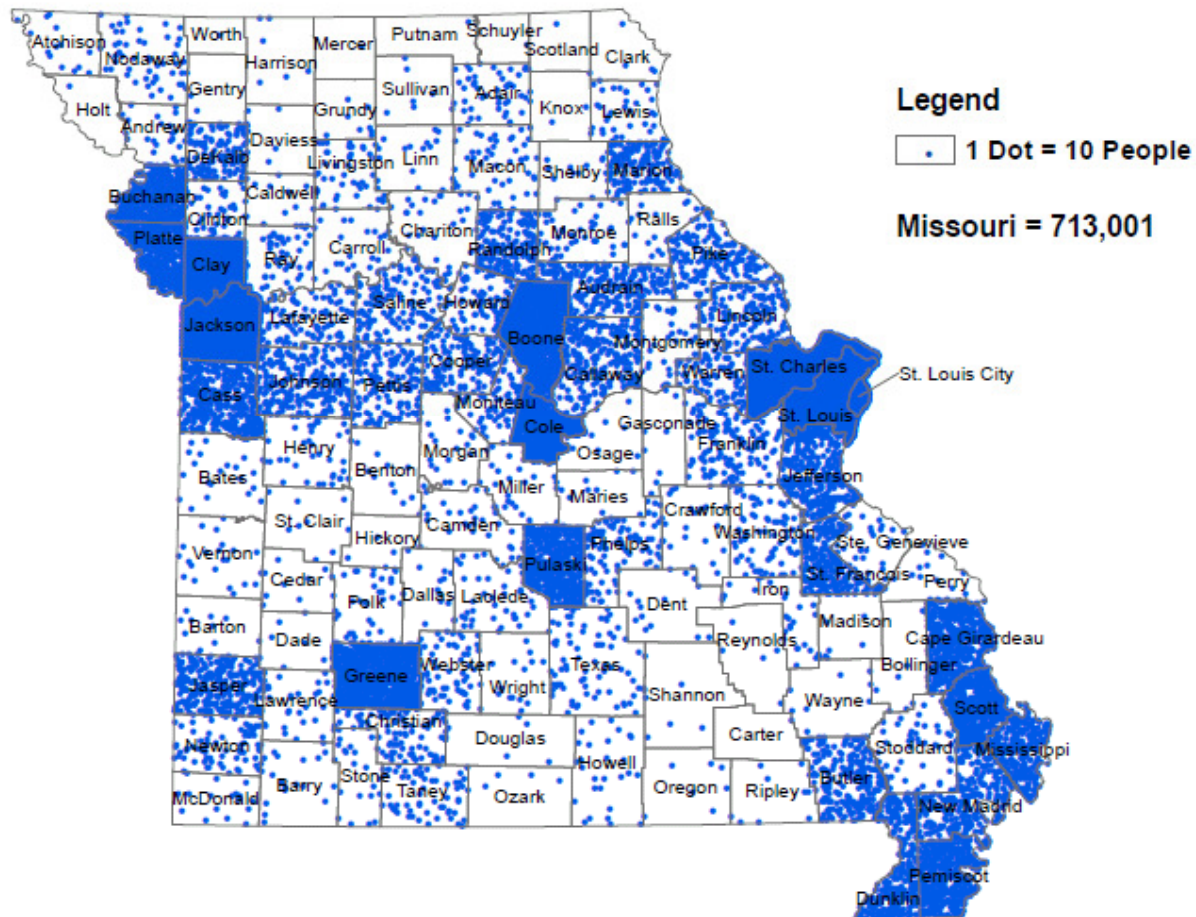

K-12 Relative Density of Student Enrollment by School District, 2010

Data Source: Department of Elementary and Secondary Education, 2010
Map Prepared By: University of Missouri Extension, Office of Social and Economic Data Analysis (OSEDA)
Map Generated On: 21 Sep 2010

Expanding Stakeholder Groups

African American Population, 2009

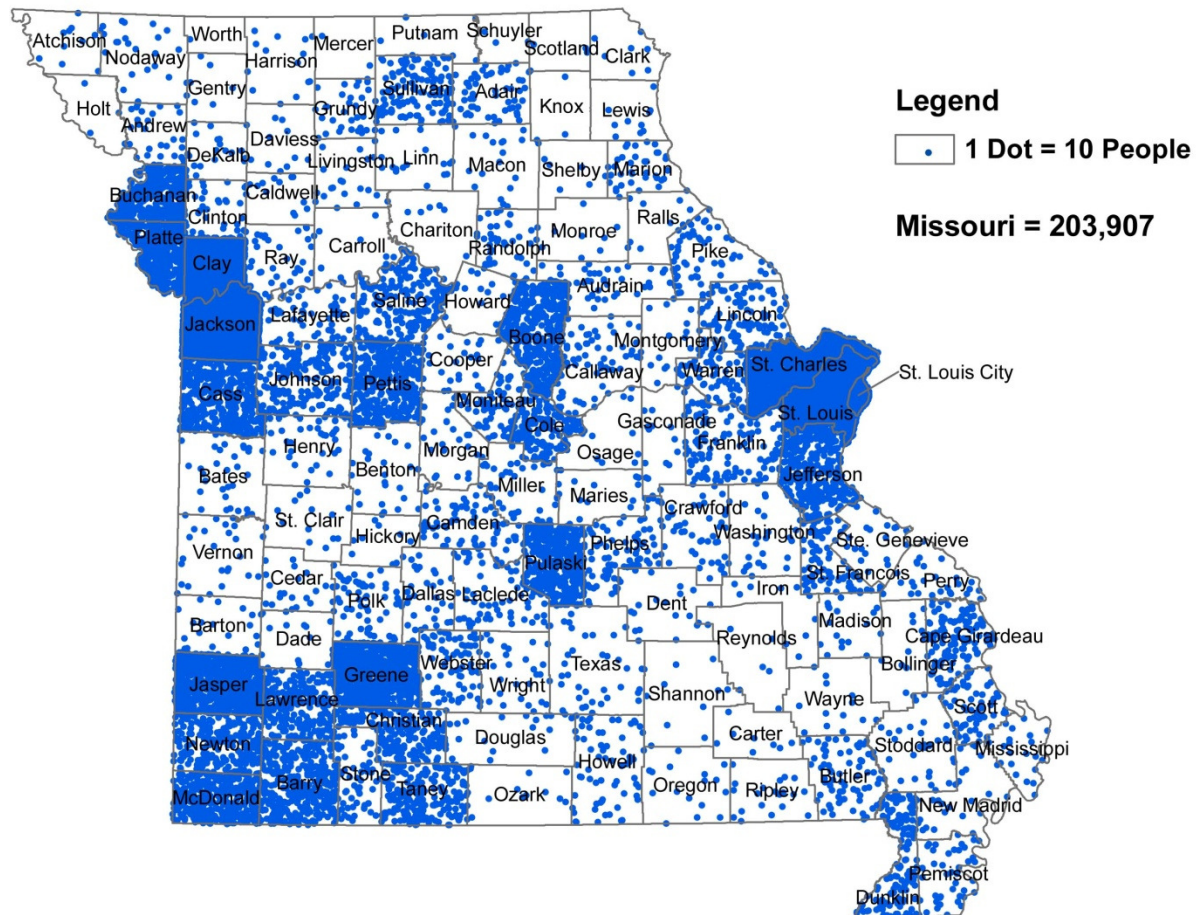

Data Source: U.S. Census Bureau, Population Division, Population Estimates, 2010
Map Prepared By: University of Missouri Extension, Office of Social and Economic Data Analysis (OSED)

Map Generated On: 28 Sep 2010

Latino Growth

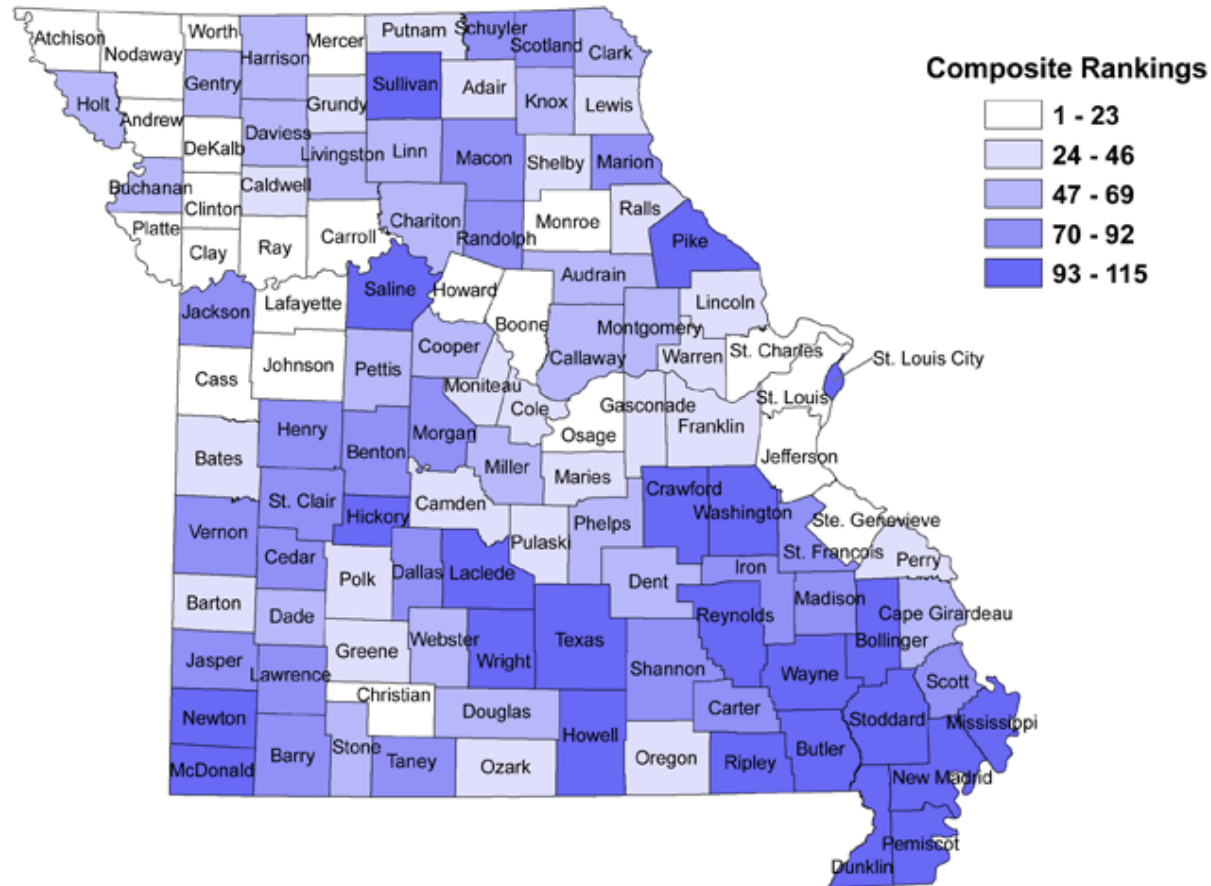

Hispanic or Latino Population, 2009

Data Source: U.S. Census Bureau, Population Division, Population Estimates, 2010
Map Prepared By: University of Missouri Extension, Office of Social and Economic Data Analysis (OSEDA)
Map Generated On: 23 Sep 2010

Quality of Life --- Children

Missouri Kids Count, 2009 Composite County Rankings

Data Source: Missouri Kids Count, 2009

Map Prepared By: University of Missouri Extension, Office of Social and Economic Data Analysis (OSED)

Map Generated On: 02 Feb 2010

On the Brink of New Data

- New ***American Community Survey***
- New (5 year) ACS in December
- New 2010 counts in December
- ***Be careful with small areas***
 - ***Plus and Minus of Estimates is large***

Educational Processes Professional Practice

The Advance Questionnaire (AQ)

- Perceptual data obtained through a questionnaire(s)
- Provides a voice for all key stakeholder groups
- Includes questions based on critical research-based elements
- Allows development of additive scales consistent with Effective Schools Research

Selected Additive Scales/Definitions

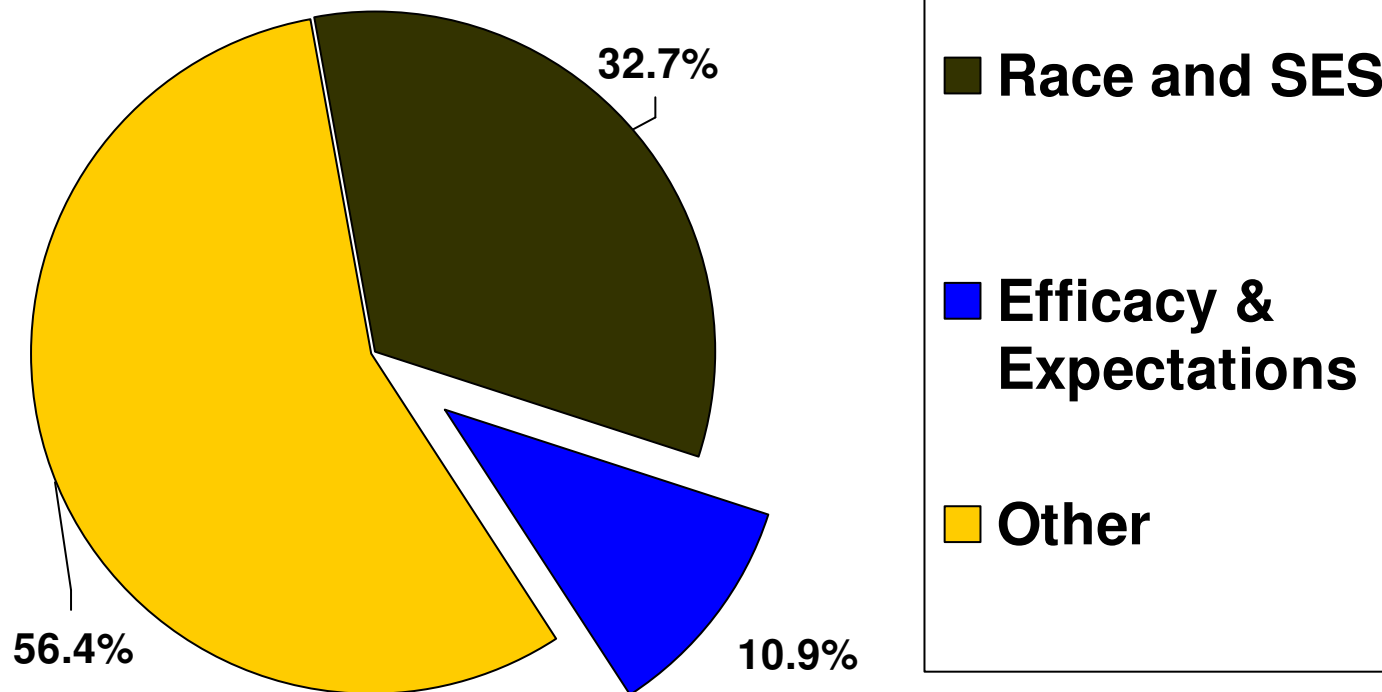

- **Leadership:** This scale identifies the degree to which leadership is perceived as effective in improving student learning.
- **School Climate:** This scale identifies the degree to which all students feel respected and valued.
- **Efficacy and Expectations:** This scale identifies the degree to which teachers and students believe that they are capable of impacting student achievement.

Efficacy/Expectations Scale (Faculty)

1. There are effective supports in place to assist students who are in jeopardy of academic failure.
 2. I emphasize the importance of effort with students.
 3. I have the skills necessary to meet the needs of all learners in my classroom.
 4. I believe that I can positively impact student performance.
-

FACULTY: Efficacy & expectations explains 10.9% of the variance in communication arts achievement

Efficacy/Expectations Scale

(Students)

1. If I do well in school, it will help me when I grow up.
2. Being successful in school today will help me in my future.
3. I can do well in school.
4. I learn a lot in this school.

Efficacy/Expectations Scale

(Students)

5. My teachers think I can learn.
6. My family believes that I can do well in school.
7. My teachers expect very good work from me.

STUDENTS: Efficacy & expectations explains 17.2% of the variance in communication arts achievement

CLASSROOM OBSERVATION TOOL

- Provides a means to maintain a longitudinal record of prevailing instructional practice
- Provides a means to look at instructional practice by subject area, grade level, school, etc.
- Provides a means to examine instructional leadership within each school

Educational Performance

Student Growth Models

Student Growth Percentiles

PERFORMANCE DATA

- Annual Performance Report (APR)
- APR and AYP disaggregated by gender, race, free and reduced lunch, etc.
- MAP/EOC Results
- Benchmark or Common Assessments
- Student Growth Data

Growth Models Explored to Date

- Missouri AYP “Increment” Model
- Student Growth Percentiles using R (SGP)
- Hierarchical Linear Models (HLM)
- Ordinary Square Regression (OLS)
- Mixed Models

All of these have advantages depending on the question and the audience

All Models are Highly Correlated

Spearman's Rho Correlations of Growth Percentiles among Growth Models

Data: MAP 2006-2008 Communication Arts, Cohort Grade 5 in 2008 (N=56,231)

Growth Models	SGP	HLM	OLS	Mixed Model
SGP_Betebenner	1.000			
HLM	.990	1.000		
OLS	.986	.989	1.000	
Mixed Model	.986	.989	.999	1.000

Note. SGP = Student Growth Percentile; HLM = Hierarchical Linear Modeling; OLS = Ordinary Least Squares.

What is a Student Growth Percentile (SGP)?

- A student's progress compared to other students with similar MAP score history
- A student's growth percentile indicates the percentage of students, starting at the same place, that the student's growth exceeded
- Typical growth is equal to 50th percentile
- Similar to pediatric growth charts

Scott Marion & Damian Betebenner
Center for Assessment

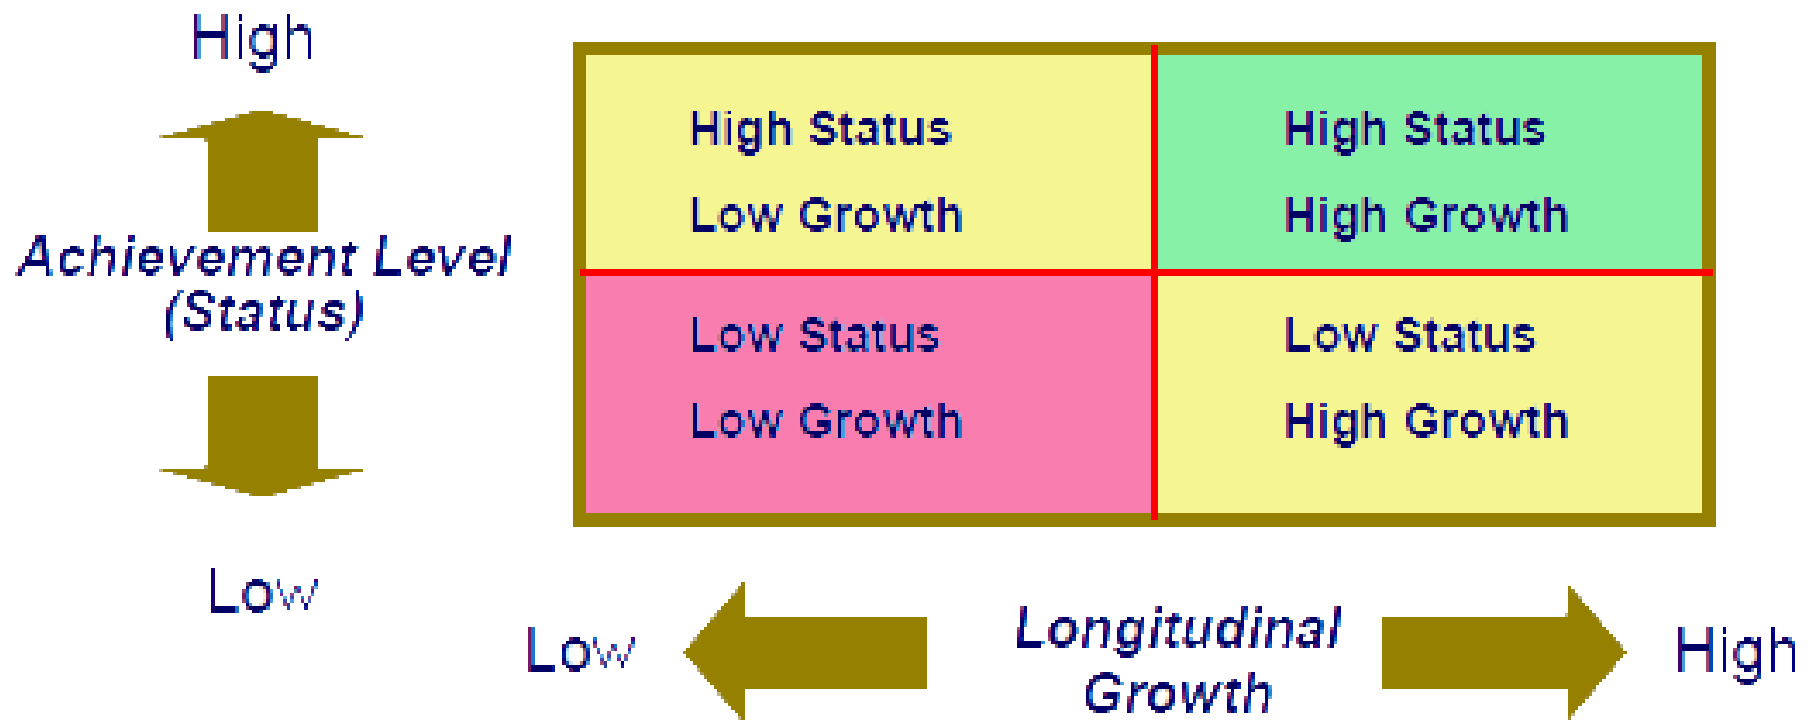

Questions Answered by Growth Model

- How much growth did a child make in one year? (*What is?*)
- How much growth is enough to reach proficient or advanced? (*What should be?*)
- How much growth is the best in Missouri (*What could be?*)

Relationship of Status to Growth

CONCLUDING THOUGHTS YOURS AND OURS

- What about leadership?
- How can we make evidence based instructional decision making more accessible and meaningful?

THE POWER OF DATA ANALYSIS TO INFORM IMPROVEMENT

A Presentation to
MSBA/MASA Annual Conference
