The manifest art and integral part
of The Supreme Soul.

An Adaptation
These volumes are the result of a determined and unwavering commitment to an ideal, an ideal which is fundamental to the practice of librarianship. The creation of bibliographies and the subsequent improvement of access to information have been traditional concerns of the library field. Obviously, the more accurate and complete such listings are, the more useful they will be. The goal of Dr. and Mrs. Nagar in the volumes they have thus far completed is to develop as perfect a bibliography as possible.

The project began as an attempt to systematize the bibliographic records of Indian periodicals held by American libraries. Because of the innate difficulty of tracking serial publications—difficulties caused by title changes, incorrect numbering, changes in the name of the issuing agency, etc., Dr. Nagar developed a "bio-biblio-data-recorder" (BBDR). This device is able to accommodate more than one hundred categories of bibliographic information. After it was thoroughly tested on a sample of 10,000 serial titles, the Nagars proposed to expand their efforts to encompass Indian serials held by libraries throughout the world.

Each data element contained in the TULIP record has been checked and verified to the extent possible. Hindi and Sanskrit titles have been transliterated, and all of the data exists in machine-readable form. Thus far, titles beginning with the letters A through F have been compiled and formatted using the BBDR. But what is quite amazing is that this was accomplished without grant support or external funding! These volumes are a testimony to what commitment, dedication and hard work can achieve.

I have known Dr. and Mrs. Nagar for four years. For more than 20 years, Dr. Nagar has served the University of Missouri-Columbia Libraries as South Asian and International Studies Bibliographer. He has an extraordinary grasp of the literature of
India, its libraries and intellectual traditions. It has been a pleasure for me to be associated with a person of such scholarship and vision. His work and many achievements are in the very best traditions of librarianship.

Dr. Thomas W. Shaughnessy
Director of Libraries
INTRODUCTION

The great sadukti (word of wisdom) just presented on the frontispiece of this TULIP offering well epitomizes the sufferings of the union list compilers. If one were to ask me today whether he (of course she too) may undertake the task of compiling a union list, my immediate response would be: Better go and climb the Mount Everest without any gear, equipment, or food whatsoever, but do not even think of compiling a union list without first securing adequate finance, sufficient personnel, and conducive environment—both physical as well as intellectual! One may grow a tree without the seed, earth and water, but not a union list without the three essential prerequisites just enumerated! Many a time during our arduous journey, we thought of abandoning the attempt altogether, but then another wise sage of India would appear before us and admonish:

anarambho manusyanam prathamam buddhilaksanam.
Arabdhasyantagamanam dvitiyam buddhilaksanam.

The first sign of wisdom is not to begin at all.
But the next is to finish what's once begun.

So we had no choice but to continue our pilgrimage toward the great goal inspite of all the obstacles, and here is the first offering of the first bouquet of our TULIP.

Now we depend entirely upon the patronage of our prospects—potential customers and purchasers. If we receive adequate support from them, the second volume shall soon be out, and the third, and the fourth, and the total work completed in no time in about ten (10) volumes. There is a great responsibility on the shoulders of the users of our offering—the libraries, academic community, and the booktrade. We are sure TULIP will prove beneficial to them, and their adequate support and encouragement will certainly enable us to complete this Project in due course of time.

- vi -
Means Becomes the Ends

TULIP began as a means to compile a union list of Indian serials in American libraries. In course of time it acquired the status and value of an end itself. Yet it can still serve the purpose of being a means if someone, somewhere, sometime, gets adequate time, money, and other facilities to use these data as the basis for preparing and publishing a union list, featuring the holdings of libraries located in a specific region or country. The volume as presented herewith can be used as the Master List for recording the holdings of the participating libraries either by the specific library staff itself, or a special staff appointed and commissioned by the compiling agency.

We had talked about this "Master List" a decade ago (see the "Primary Proposal" in TEST: The Eternal Saga of TULIP:)

If and when we get additional funds, a working edition of this check-list will be prepared and circulated among major libraries in the U.S.A. and Canada where the titles covered by the list might be available. The participating libraries will be requested to report and add their own holdings. It will be necessary to visit representative American libraries. Consequently there will emerge a "Union List of Learned Indian Serials in the Humanities and Social Sciences Available in American Libraries." A subject index can be an additional useful feature. Since my card file already locates Indian titles in other union catalogs (listed above) it also serves as an index to the major union catalogs of serials in India, England, and the U.S.A. Consequently, the final product will emerge as the "World Union Catalog of Indian Serials." Of course, it will cover only the specified subjects.

Relative Authenticity

The TULIP bouquet as presented herein is a loving offering of the blossoms gathered by us from various gardens. We have merely collected the data, organized them, and featured them. We did not create them.

- vii -
UNIV. LIST OF IND. PERIODICALS

So TULIP cannot be right in its own right. The strength of a chain is determined by its weakest link. TULIP can be authentic only to the extent the sources used in deriving the data are authentic. In this connection we are reminded of an incident. I was in India's National Library in Calcutta talking with the In-charge Librarian of the Periodicals Room. He was going through the Master List of TULIP. Suddenly he thought he had found an error! I said to him: "Let us go to the source." Fortunately the source too was right there. It was a Government of India publication! Still it was wrong. TULIP stood vindicated. Although we have provided for approximately one hundred categories of information or data elements, we could not gather all the data in all the cases. Libraries in the future may cooperate and provide the data not only to fill the gaps, or correct the errors, but also add new information on the titles that are not yet listed in the TULIP. The work may get enriched day by day and someday may truly become the most authentic, systematic, comprehensive, universal list of Indian periodical publications ever presented on the globe. This has been our goal. God Almighty alone may fulfill it.

Objectives & Achievements

TULIP is an international bibliographical project which has been trotting along since 1975, excepting some fast galloping in India during the academic year 1978/79. Of course, it had begun hopping as far back as 1969! At least forty thousand work hours in terms of time, two hundred and fifty thousand dollars (250,000) in terms of money, and an immeasurable physical as well as intellectual energy have already been invested into the total operation. If there seems to be an incompatibility of the number of work hours with the amount of dollars invested, the explanation lies in the fact that a good deal of work was accomplished in India where labor is much cheaper as compared to the U.S.A. Also we have had some substantial voluntary contribution of professional services—all labor of love!

Our objective still remains the preparation and publication in an automated form of a comprehensive, systematic, and authentic universal
list of India’s periodical publications, preserved and being served in major libraries of the world. This bibliographical undertaking has grown by now into such enormous proportions that it can be completed only in sections, phases, or stages. We begin with the organization and publication of detailed data on some select Indian periodical publications in three major languages of India (English, Hindi, and Sanskrit), each publication, nevertheless, receiving due attention in terms of bio-bibliographical description and cataloging treatment, conditioned only by certain circumstances beyond our control, mainly the lack of finance.

The bio-bibliographical and cataloging data relative to India’s periodical publications that are being offered here as the first bouquet form part of a vast reservoir built over a long period of fifteen years, including one year’s intensive labor devoted exclusively to extensive field work in India, supplemented by some substantial editorial and organizational work performed during the past six years. Work accomplished until July 1979 was reported in my Report on the preparation of a systematic and comprehensive list of Indian periodical publications in the Humanities and Social Sciences as a means to compile an American Union List (2nd ed., rev. & enl., Columbia, MO: University of Missouri, 1980. 148 p.). What we have accomplished since then may be summarized as follows:

a) We have conducted an intensive survey and census of some major American library bibliographic sources and resources, such as ULS, NUC, NST, and OCLC, and have secured additional data and locations for the publications reported herein;

b) We have tried to fill in what was lacking or found to be new, and thus enriched the data collection. We have also added many new instruments of access, such as LCCN, ISSN, and OCLC Control Number;
c) We have verified and authenticated the data, and have also brought them in conformity with national cataloging and bibliographic standards and practices as far as possible;

d) We have organized, cataloged, and edited these data for final presentation;

e) We have converted the data into computer readable form, thus securing their capability for being incorporated into a national data base, such as OCLC or RLIN, if and when practicable.

f) We have printed and published a part of the TULIP data base collection as a handbook for the benefit of scholars and libraries here and abroad. These can also be made available in electronic form on disks, for the benefit of those who prefer this medium; and, finally

g) We have completed, by executing the above tasks, the first part (component) of a comprehensive, international PROJECT TULIP.

All the above operations have led to the emergence of the potential for a helpful research tool in the form of a unified list of India's periodical publications available in major research libraries in America, India, and England.

Background

TEST: The Eternal Saga of TULIP describes in detail the innumerable problems we faced in the execution of this Project TULIP. Dr. Ainslee T. Embree, past President of the American Association for Asian Studies and once the Counselor for Cultural Affairs, USICA, with the American Embassy in New Delhi, recognized the true nature and spirit of our
activities and achievements in the most thoughtful manner and wrote to me as far back as January 29, 1980:

You have undertaken a stupendous task, and the results are very impressive....It will indeed be an important tool for research in Indian studies.

I enjoyed going through the report, as it gives a very vivid picture of the problems you have faced and ingenuity in solving them.

This Project is the first attempt of its kind in the world. As already stated above, it originated in 1969, but systematic work began only in 1975. My official duties as the South Asia Librarian at the University of Missouri--Columbia did not allow me to do full justice to this great bibliographical undertaking. Nevertheless, by the end of 1977, I had already collected valuable data pertaining to approximately 3,000 titles on 12,000 index cards. (see samples on pp. 78-87 of the TULIP Report)

In 1978 the American Institute of Indian Studies awarded me a Smithsonian Senior Research Fellowship for a year's work in India. In addition, my own University granted me not only sabbatical leave, but also some financial assistance through its Research Council. My wife, Sarla Devi, a trained and experienced librarian, and I reached India in early October 1978. We established an office in Mysore under the generous auspices of the University of Mysore. We engaged the services of four professional librarians and an equal number of experienced typists. This team of ten worked vigorously for ten months, my wife and I working more than ten hours a day and seven days a week, without any holidays or respite whatsoever! It was an extensive operation involving a substantial financial investment in terms of Indian economy.

Approximately forty union catalogs and lists of periodical publications produced in India, as well as some individual library catalogs, were consulted, and extensive basic data pertaining to about 12,000 titles were collected on about 20,000 cards. These were arranged and integrated into one alphabetical sequence. The total information
then was transferred onto 10,000 data sheets, developed by me and termed as "Bio-Bibliographic Recording Device (BBDR)," each BBDR comprising four pages (of 8 1/2 x 11" size paper) and having provision for recording data relative to over one hundred categories of information or data elements. (see samples on pp. 88-95 of the TULIP Report) The total information was then typed consecutively on plain sheets of paper. This compact form of the "Master-List" extended to 1,000 pages and featured information in 10,000 entries. (see pp. 108-110 of the TEST) Subsequently, I visited some libraries in Madras, Hyderabad, Calcutta, Varanasi, and Delhi, and collected additional information. I returned to Columbia in July 1979. Work was continued since then within the limitations of available time and financial resources. Most of what is accomplished since then represents the selfless services of my Co-Project-Director, Mrs. Sarla Devi Nagar.

Leading South Asia specialists around the country, who studied the pre-form of the TEST, and my fellow faculty members on the UMC campus who also examined and evaluated the "Master List," found the quality and quantity of the work performed very impressive (see pp. 112-128 of The TEST: The Eternal Saga of TULIP). In terms of our final goal, however, much remained yet to be done. The reason is obvious. We are not just preparing a finding list; our objective has been all along the preparation and publication of an exhaustive, systematic, authentic, and definitive "descriptive-catalog" of all the Indian periodical publications, in every subject, whether current or extinct. Our final goal is not just to reproduce in a limited list what is already known and easily accessible, but to search and locate the data on the Indian titles in the most intensive as well as extensive manner, by examining all the available library-bibliographical resources, including the census and survey of major research libraries all over the world, if possible, and to prepare a comprehensive, authentic, automated union catalog of the highest order, featuring all the possible characteristics of information relative to every periodical publication ever published in India! This offering of the first bouquet of our TULIP may serve as a significant demonstration project, and may enable
INTRODUCTION

us to secure the needed support from our users, and complete the total project someday in the future. What our patrons are holding now in their hands and examining is an evidence not as much of what has been already accomplished as it is of what still remains to be done, and can be done, if sufficient funds and opportunities are made available. This TULIP bouquet is only a sample, a specimen, and yet a model.

Uniqueness of TULIP

A true union catalog is a unified catalog of catalogs. It is not merely a combined finding list. It must give complete biographical and bibliographical information relative to a periodical publication before the holdings of libraries are listed. My earlier work, the Union List of Learned American Serials in Indian Libraries (ULLAS), described on pp. 54-97 of the TULSI was an innovation and exemplified this ideal. TULIP follows the same standard. Moreover, TULIP is not merely a union catalog either. It gives all the information on the present as well as the past of a given title before it displays the holdings <limited to citations for the time being and the PL480 acquisition details>. Thus it combines the features of a union catalog with those of a directory (see TEST: The Eternal Saga of TULIP, pp.99-101). TULIP comes out as the first attempt of its kind. Let us explore this issue in greater details.

The Union List of Serials in Libraries of the United States and Canada (ULS) (3rd ed. 1965) stops with 1949. It is now a permanently closed book. It will never see its fourth edition. No publication commencing after 1949 will ever find a place in it, even though it might have been acquired by an American Library since the ULS was released. No reprints of the old sets, however valuable, will be featured in it. No doubt the ULS provides a great deal of bio-bibliographical details, but it does not yet exhaust the universe of periodicals in terms of titles, even of those that originated before 1949. For example, as many as forty percent of the titles featured in the British Union Catalogue of Periodicals (London: 1955-58) do not find a place in the ULS!
UNIV. LIST OF IND. PERIODICALS

New Serial Titles begins with 1949. Its entries are extremely brief. Neither it is exhaustive in its coverage of libraries, nor in reporting their holdings as compared to the ULS. No publication issued prior to 1949, even if reprinted, will ever find a place in it.¹

The National Union Catalog is comparatively detailed, yet it does not report the individualized holdings of serials (see TEST: The Eternal Saga of TULIP, pp. 117 and 121-122).

Finally, the Ulrich's International Periodicals Directory is concerned only with the current publications. It provides many bio-bibliographical details not found in the three sources cited above. However, Ulrich's is not a union catalog of periodicals. It is only a "directory." Moreover, it is very limited indeed as far as the coverage of the Indian publications is concerned. For example, the 1983 edition contains only a total of thirteen entries beginning with the word "Panjab" and "Punjab," which, by the way, extends through both India and Pakistan!

Eclectic TULIP

TULIP is planned in such a way that it might potentially contain the best features of all the four types of reference resources listed above. It blazes a new trail; it shows a new path. TULIP is designed to be retrospective as well as current. Its entries feature maximum possible bio-bibliographical details. It is a union list as well as a directory of periodicals. Furthermore, as shown on page 4 of my TULIP Report, one of the most useful features of TULIP is that, unlike the traditional union catalogs, it does not locate a title in a specific library, but in some major union catalogs which report the title in reference. Therefore, it is an index to the world union catalogs--a

¹ This was written before 1981-84 NST was seen! Now the situation has changed. NST reports even pre-1949 publications if they are covered by CONSER! So, the world is progressing. What was non-existent until today may appear tomorrow!!
master union catalog of union catalogs for Indian periodical publications. Now a reader interested in a specific title need not wade through, say, two score and ten union catalogs to locate which libraries in the world hold the desired title, but can consult only one, i.e. TULIP, and locate which specific union catalog reports the title sought.

River of Serials

A union list well typifies a running river of flowing water. It is not a pond of stagnant water. It is a living organism that continues to grow as it flows. It should be possible to incorporate in it fresh entities of information and to revise or remove the existents. The system must admit of change—every conceivable change, because the UL is an attempt to secure total control over the world of periodical publications, a world which, by its very nature, is ever-changing, ever-growing, and ever-becoming. Periodical publications are the embodiments of nascent thought. New publications appear; old ones disappear. There are divisions; there are mergers. There are unions; there are separations. There are marriages; there are divorces, so to speak. New titles are acquired by libraries regularly. By "new" we do not mean necessarily "newly published," but "newly acquired," those which are not already available in a specific library. Old, valuable, out-of-print sets are reprinted every now and then. Their acquisition generates changes also in the "holdings" component. To talk in terms of creating and maintaining a collective record of such a changing world of periodical publications by conventional and traditional means and methods, and then trying to publish the total record through type-composition, or even by photo-mechanical reproduction, is to deceive one's own self when we are passing through an age of communications revolution. Such a changing world cannot be controlled by rigid, old printing technology, a product of which goes out of date even before the press copy goes to the press! It is absolutely essential that we be able to manipulate and organize the data in any way we desire, if we want to retrieve and feature the needed information in any required order, group, or arrangement.
UNIV. LIST OF IND. PERIODICALS

Computer Programming

The most appropriate way to secure complete bibliographical control over the enormous mass of nascent thought embodied in periodical publications, on a continuous basis, is to secure the services of the latest instruments developed in the field of computer technology and to maintain the totality of records "on line." There should be full scope for additions, alterations, deletions, and substitutions—all types of changes, if we want to meet the challenges posed by the ever-changing world of periodical publications. We must prepare ourselves for the future, using the past as our spring board.

Computer Manipulability

As we proceeded with recording our initial data, we were able to identify and isolate approximately one hundred categories of information or data elements. Since these data were collected analytically under distinct categories, they had the potential of enabling us to sort, organize, and feature the total information with ease, economy, and efficiency. Consequently, they could be subjected to efficient and effective computerization. Dr. Ralph H. Parker, Dean Emeritus, UMC School of Library & Information Science, had assured me long ago that my "idea of putting this data into computerized form to facilitate the addition of holdings of American libraries appears to be feasible" and that "when completed this list will be particularly valuable because of the capability of analyzing its contents by language, area, subject, etc." (p. 116 of the TEST).

The Joint Committee on the Union List of Serials had stressed the need for such analyses in their Permanent Program (Washington, D.C.) as early as 1957:

It would moreover offer some means whereby the material listed could be located and segregated in accordance with those characteristics which are considered of importance by the people who use the material. Among such characteristics are subject content, availability within a given locality or
INTRODUCTION

region, country of origin, currency, language, and period of publication (p.2).

TULIP Upon SPIRES

It was our intention to use a highly sophisticated software named SPIRES (Stanford Public Information Retrieval System). It is a very powerful interactive system for data management and manipulation. It also hosts the national MARC Format and is quite capable of performing the tasks of manipulation, organization, and dissemination we are planning to undertake.

But we could not implement our plans and proposals due to lack of funds. Data were entered with the idea of basing our total operation on SPIRES. But we had to abandon the plans because this operation required a huge investment of time and money which we did not have at this stage of our development. Someone, sometime, somewhere may be blessed with the necessary financial support and go beyond the point we have been able to reach. We wanted to convert the total data into computer-readable form following a system, and we have achieved that goal! A special program was worked out for entering, formatting, and arranging the entries. Dr. Thomas W. Shaughnessy, the present Director of UMC Libraries, not only bestowed upon us his tremendous moral support and global encouragement, but also sufficient financial assistance in the form of computer time. Dr. Sushil Jajodia of the Department of Computer Science donated his time and attention toward the process of computerization. Mr. Steven Mark England, one of Dr. Jajodia's ablest students, proved to be a real blessing in perfecting the computer program and in producing the present print output. His was merely a labor of love, a self-sacrifice, coupled with sincerity and devotion. We also owe a deep debt of gratitude to some of our friends in the Department of Physics. In fact they initiated the process of computerization. But for all these contributory factors, TULIP in this present form could never have blossomed to please its users. The Project Directors do not find adequate words to thank these benefactors. Their help has manifested itself in the form of this bouquet of TULIP.
UNIV. LIST OF IND. PERIODICALS

The satisfaction they will derive from the fructification of their help and cooperation itself would be a great reward for them. We cannot give them anything in return except these words of sincere gratitude and appreciation.

**Superior Cataloging**

Some compilers begin with the assumption that the titles they are union-listing are already cataloged in full and described in detail in some other source; therefore, they need not repeat the performance! But the South Asia periodicals that we have tried to union-list here are not generally cataloged, and even if they are, they are not cataloged fully.

There is a feeling floating up in the air that the Library of Congress (LC) catalogs every publication that comes to America under PL480 and so no other library should ever attempt to duplicate the work. It is a myth only and not a reality! Even if it were a reality, the cataloging of many South Asian periodical publications, performed at the LC, suffers, many a time, from inadequacy. This statement is as true as it is bold. Not that the LC does not possess a sufficient number of catalogers. It does, and in sufficient numbers. Not that those LC catalogers do not possess sufficient technical knowledge. They do, and in sufficient quality as well as quantity. What LC does not possess is the WILL to do so, the need to do so, the priority to do so. LC does not want to catalog Indian publications adequately because it cannot afford to do so due to lack of funds and many other factors. Moreover, it does not have adequate data at hand. It does not find any need either to go out and search for them. Also LC cannot and does not catalog all the Indian publications. Even when it does, it cannot give them all the same kind of top priority and full cataloging treatment as it can to, say, an American publication on energy, which is in much greater demand. It is a matter of demand and supply and the availability of financial resources on continuous basis.

Let us take as an example a very important publication, entitled *AICC Economic Review* (1949-70), a journal of the Economic and Political Research Department of the All India Congress Committee of the Indian
INTRODUCTION

National Congress, the Congress of Gandhi, Nehru, and Indira that secured political freedom for India and set her on the path of peace, progress, and prosperity. Not even a single library in the United States, nor even in England, has volume one of this valuable journal! Therefore, no American or British source can tell us when it originated. Some sources (for example OCLC) say "1947- ." Others make it 1948! And still others would want us to believe that it started in 1951! In reality it originated in 1949 (probably on May 1). To solve such problems we have to seek the help of an Indian library holding vol. 1, especially if we want to verify whether the periodical publication did originate on May 1, which is only an inference at the present state of our knowledge. (Subsequent research has proved that it originated on May 15!)

Exhaustiveness of Data

Our TULIP entries (in majority of the cases) contain full bio-bibliographical details—not only those which are easily available but also those which are very difficult to obtain. Whether we have succeeded in our goal is left to the users to decide. If some entries are still inadequate or incomplete, it is a measure of the lack of the material resources made available to us, and not of our unwillingness to do a complete job in each and every case. We wanted to show what can be achieved and we have shown it. This idea has been set forth time and again. Generous critics will appreciate our limitations.

There is another myth down on the earth that OCLC has got everything! Agreed that the OCLC Network System is one of the largest reservoirs of bibliographical records, and may become some day, if it is not already, the largest in the world!! Yet a representative sampling of TULIP titles was checked against it. Approximately 50 percent of the TULIP titles did not appear at all in OCLC! Of the 50 percent that were found in it, half were too sketchy to be of any use to us. ¹ Only a

¹ See OCLC serial records bearing MUL in the field no. 040.

-xix-
fraction were detailed enough to complement or supplement the rich bibliographic data already contained in TULIP.

While supporting the publication of LC's classified holdings arranged by title, L. Quincy Mumford, a former Librarian of Congress, argued that only a fraction of LC's holdings are incorporated into OCLC! Here are his actual words: "Because of the overwhelming size, longevity, and international scope of LC's holdings, the great majority of the 6.5 million records in its classified collections have never been included in MARC, OCLC, or any other data base."

It was our ardent desire to catalog all the titles fully and to revise the entries so as to bring them in conformity with the requirements of AACR-II. This was essential if we wanted to achieve consistency as well as uniformity and also to secure collocation as well as integration of the records of the titles. Unfortunately we could not fulfill our desire in full because of, once again, the lack of funds. Yet this remains our ultimate goal and we shall continue our efforts to acquire the needed funds so that this goal too could be fulfilled someday in the future. If not...well, let us not even think of the dark side of the shining moon.

TULIP, Truly Universal

From the point of view of India, including what is now Pakistan and Bangladesh, TULIP is an attempt to make a census and survey of her periodical publications—the embodiments of her cultural heritage—and its resultant recovery and dissemination all over the world. In fact, our objective shall ever remain the preparation and publication of an exhaustive report of what was ever published in India and where it is available now!

And from the American point of view, the publications that were planned to be ultimately featured in TULIP are either already in American libraries, or are worthy of being acquired by at least some of them. Those which are already here have become integral parts of the American library heritage. However, most of these titles are still uncataloged, or even if cataloged, their cataloging is, in many

- xx -
instances, inadequate and unsatisfactory as already explained above. We have tried to be as detailed as possible.

Termination of PL480

There is one more compelling reason why America must support a promising research resource such as TULIP immediately in every way possible. For, if ever there was a need of TULIP in the U.S.A., it is here and now. The U.S.-owned rupees supporting the Special Foreign Currency Program (former PL480) of the Library of Congress for the acquisition of publications from India are totally exhausted and the participating libraries are now required to spend their own dollars. Authorities administering this program and the libraries deriving its immense benefits have been trying to effectuate this transition as smoothly and effectively as possible. They are investigating how to minimize the adverse effects of this imminent drought. They are engaged in reviewing the means, methods, and contents of the past acquisitions and in determining the future course of action. It is absolutely essential, under the circumstances, to evolve a cooperative acquisition program and share the resources. A concerted effort will have to be made by the group to fill in the gaps.

It is interesting to recall here that the program was originally called the PL480. Subsequently it was named the "Special Foreign Currency Program of the Library of Congress." Now it is termed, and appropriately too, as the "Cooperative Acquisitions Program."

Numerous Values of TULIP

The Project TULIP has been called a "Million Dollar Project." If and when truly completed, it will facilitate any systematic future planning, and also strengthen the existing library resources. Therefore, we must publish all the volumes as early as possible. The case of the ARYA (journal) presented on pages 54-58 and 71-74 of the TEST: The Eternal Saga of TULIP demonstrates how TULIP could prove beneficial to the American libraries. TULIP is a global undertaking. Its bountiful results will extend far beyond the boundaries of North
UNIV. LIST OF IND. PERIODICALS

America and permeate all the countries of the world wherever these periodical publications are acquired, preserved, and served.

The appreciative writings presented on pages 112-128 of the TEST: The Eternal Saga of TULIP provide a good idea of how valuable the contents of TULIP are. The discussion on the Arya (cited above) concludes with the following remarks:

When I got my own set I eagerly consulted it to see if any library in the U.S.A. held the title. Yes! There was only one library in the whole of the country which had a copy of the journal (the Arya) in reference! It was Harvard!!

It is quite natural that the Harvard University Library, the oldest and the largest library in New England, which provided a fertile ground for the flourishing of transcendentalism and the origin and development of Indic studies in the United States of America, should have a copy of the Arya! But how sad it is that the Library has only two volumes of the set and even those two are incomplete!

Is it too much to expect that at least one library in the United States possesses a set of this valuable journal? Let us assume that a library is willing to acquire it. But how would it know that such and such journal exists? Let us assume further that the Harvard University Library itself decides to complete its set. How would it know where does a set exist, which can at least be reproduced, so that its incomplete set is completed? Here may lie some contribution of TULIP. It will provide a complete history of the journal, as well as some information as to its location in a library in England, India, or the U.S.A.

The Project TULIP will be of immense value to the specialists on India all over the world. It surveys India's periodical publications, the embodiment of her cultural heritage, preserved and served in major libraries of the world. It is retrospective as well as current. It is not only a union list, but also a directory of periodicals.
Enrichment of the Data

As stated earlier, we have checked the contents of our "TULIP Master List" against some major American library-bibliographical sources, such as NUC, NST, ULS, and OCLC, and have ascertained whether the titles listed by us are contained in any of them, and if our data can be further enriched. It is possible that many periodical publications included in TULIP might not be available in the U.S.A. at present. We have already mentioned that forty percent of the titles appearing in the British Union Catalogue of Periodicals (BUCOP) do not find a place in the ULS. Some titles like the Arya may be here, but the set may be so incomplete and truncated that it might amount to nonentity. TULIP may prove to be a great instrument for acquiring such titles and completing the sets. This point is well documented in my original proposal, appearing on pages 4-5 of the TEST: The Eternal Saga of TULIP. I reproduce my words:

I wish to prepare a 'Union list of learned Indian serials in the humanities and social sciences available in major libraries of the United States and Canada.' No one has attempted such a project as yet. Just as ULLAS has proved to be a great source of information, the proposed union list will become an important tool for research in Indic studies. It will also be an effective tool for interlibrary loan and acquisition at the national/international level. It will enable American librarians to acquire, if not in original at least in reproduction, Indian serials that have not yet found their way into any American library, and to fill in their gaps by getting the missing parts reproduced. The libraries will be helped in two ways: 1) They will acquire titles still unknown to them, and 2) fill the gaps in their existing holdings.

While we have examined the above sources to ascertain which titles contained in our file are also contained in those sources (so that we could verify the existing data and add new ones, if available),

- xxiii -
it was not possible for us to reverse the process, i.e. scan through these extensive American bibliographical sources to ascertain which titles contained in them are not yet represented in our file—titles which may be quite valuable and could be profitably added to our file. This is a separate operation, a very gigantic one. We have no resources for it. Someone, someday, somewhere may try to accomplish this Himalayan climbing. This is, however, absolutely essential. It will not only enable the enterprising souls to add new titles, but also enrich the data that have been already collected so far.

Hope for the Future

While we are on this topic we are reminded of the sagacious words of the Great King Visaladeva Vigrarahaja of Cahamana dynasty, who expected his progeny to continue and complete what he had begun. He declared:

Brute samprati Cahamanatilakah Sakambharibhupatih
Srimadvisaladeva esa vijayi santanajan atmanah.

Asmabhii karadam vyadhayi Himavadvindhyantaralam bhuvah
Sesasvikaranaya mastu bhavatam udyogasunyam manah.

(Delhi Siwalik Pillar Inscription of Visaladeva.
Samvat 1220 (1163/64 A.D.) Indian antiquary
19 (July 1890): 215.

Translation by F. Kielhorn:
The ornament of the Chahamanas, the illustrious Vigrarahaja, the victorious, now addresses those born or yet to be born in his lineage: "We have made tributary the land between Himalaya and Vindhya; let not your minds be void of exertion to appropriate the remainder of the earth."

- xxiv -
INTRODUCTION

Thus the future generation of librarians, our followers and successors, have a great responsibility placed on their shoulders. TULIP can never be finished. It can only be complemented and supplemented, revised and updated. It may continue to flow for ever. Like the divine river Ganga (Bhagirathi), the River of ULS has only the beginning. It has no end!

Categories of Information

The categories of information or data elements that may serve as the recipients of the information into TULIP PP records are shown in the Bio-Biblio-Data-Recorders appearing in this "Introduction." They have been isolated and evolved over a long period of time and represent the outcome of considerable working and testing. They have been constantly added to, revised, and enriched. Naturally, the "tags" for them too have received the same treatment.

Instruments of Access

Many additional data and instruments of access\(^1\) have been added to the TULIP since 1979. They are:

- DC Class No.
- ISSN (International Standard Serial No.)
- LC Added entries (tracings)--a corollary.
- LC Card No.
- LC Class No.
- LC Subject headings.
- OCLC Control No.

\(^{1}\) The PL480 "Acquisition Number" also should be made an access point, because some libraries might have arranged the material by that number alone. Until a document is cataloged--and many will remain uncataloged for a long time--the PL480 AN will serve as an effective instrument for storage and retrieval.

It is called Overseas Acquisition Number. OCLC has a separate field for it.
Transliteration of Hindi Titles

All Hindi titles not in standard, systematic form are treated as if they were written in original Devanagari script. They are transliterated properly in systematic form strictly following the international standards. This standard or correct form is used as the "Entry name" or "Entry word." The popular or corrupt form, as it appears in our source, follows the standard form in parenthesis. It is linked with the standard form by a cross-reference. This procedure has automatically eliminated many duplicates. The users will be helped in so many ways. This matter is discussed on pages 85-90 of the TEST.

It is to be noted here that even the preliminary pages of a PP may contain a non-scientific, unsystematic form of the name. Many Hindi books show this aberration. Our decision is based on the following principle:

We should choose the most scientific form whether we have the title before us or not. We will assume that we are cataloging from the original in Devanagari script. For example, a title may appear as "Vishwamitra" or "Vishvamitra" or "Wiswamitra", anyway imaginable, (e.g. even Vishwamitter or Biswamitter!). However, we will take for our main entry the most scientific form, i.e., Visvamitra.

The Vedas declare: Ekam sad vipra bahudha vadanti—"Truth is one; sages name it differently." True form is one; aberrations many. This is our philosophy of rendering the names of our own Indian languages into a foreign tongue, here the English.

We tender our sincere apologies for not having been able to provide the essential diacritical marks not only in the present discussion but throughout our TULIP Bouquets. Our computer print-out did not provide for it! Period. Let it be made quite clear here that we did not give them not because we disregarded them, but because we were helpless. There lies the difference between those who reject outright and those who want to accept but are not able to do so because of the circumstances beyond their control.

While the computer has blessed us with many facilities, it has denied certain others. The life is a compromise. And we are not alone.
INTRODUCTION

in being subjected to the realization of our limitations. Even the
giant and gigantic operation of the Library of Congress at New Delhi has
failed to provide the diacritical marks in its Index to South Asia
Acquisitions List! Why! Because their computer is not able!

However, we would like to assure our users and consumers that if
"TULIP Blossoming" is continued, and if we go to the letter-press, or if
the computers are able to provide facilities when future volumes of
TULIP appear, we will certainly make full use of all of them.

Once we thought of adopting a new policy with regard to Hindi and
Sanskrit titles. The idea came to our mind that it would be more
helpful if in the final version of TULIP, Hindi and Sanskrit titles are
separated from English and arranged into a separate sequence of each.
This is what AL has done. But we abandoned the thought. We have kept
all languages together in one sequence, because our computer can easily
separate them if there is a demand.

Cross References

When data are collected from so many sources, the ultimate output
is bound to be quite rich. However, it tends to be complex and
conflicting at times, since these sources do not follow any uniform,
identical system of collecting, rendering, and featuring the data.
Advantages accompany disadvantages. Here is an example:

1. Baroda Museum and European Art Gallery
2. Baroda Museum and Picture Gallery
3. Baroda State Museum
4. Baroda State Museum and Picture Gallery.

We have tried to secure correlation and coordination between the
"Referred from" and the "Referred to" headings. Also we have verified
all the existing headings for relevance and appropriateness. It is
essential that not only the "Referred to" must exist in the file, but it
must also appear in that specific form. There is no justification in
making a reference to what does not exist in that form, or worse yet,
does not exist at all! We have accomplished this arduous task within
the limitations of the available time, money, and other facilities.
UNIV. LIST OF IND. PERIODICALS

Computer-Readability

We have secured computer-readability of the TULIP data so that the "list" could be mechanically composed, if and when feasible, by an automated photo-typesetter. The transcribed medium may serve as a means for the development of a national, comprehensive data base of periodical publications available in American libraries, a data base that can be mechanically manipulated to obtain the desired sorts and access points, including their ultimate incorporation into a national network, such as OCLC or RLIN. However, at present TULIP is being published as a computer output and duplicated by offset process. It is computer-generated. All the data are available on-line, if desired to be accessed.

What is Included and Why?

Shri Wajid in his "Introduction" to PiH narrates how the scope of his "union catalog" got narrowed down gradually. The case of TULIP is exactly the opposite. The project began as a means. We wanted to cover only such publications that were already in the American research libraries, or were likely to be acquired by them if known and made available. A time came soon when we found out that the American "divine" granting agencies were not willing to bestow any boon upon us. By that time we had already visualized how extensive the world of Indian periodical publications is. So we decided to widen our scope and collect the data on all Indian periodical publications without any consideration whether they were in an American library or would be acquired by any.

Originally our idea was to exclude the government publications, because Duke was engaged in covering them. Subsequently we found that their scope was extremely limited. So we widened our scope in that area too. We started collecting data on Government publications as well.

Therefore, TULIP as it stands now is THE UNIVERSAL LIST OF ALL INDIAN PERIODICAL PUBLICATIONS deposited in major libraries of the world. However, our present world is limited to three countries--India, U.K., and the U.S.A. We have covered all the subjects, all types of
periodical publications. We may ourselves not be able to reach the final goal, yet we have shown what should be the goal of those who may follow us, if at all our steps are worth being followed! By no means we can claim any exhaustiveness in any sphere. Far from it. We are just sampling.

However, we have tried to give priority to reference works in all branches of knowledge. Yes, our cut off date now is 1980. Of course, we begin with the beginning of the publishing activity. Since we begin so early, we have also covered those geographical regions of India which are now called Pakistan or Bangladesh. For example, a publication that commenced in Dacca before 1947 deserves a place here and may be here. If it is not here, well, it is not the lack of our desire but the lack of the facilities that we could muster and master.

Yet we had to use some discretion in not including a type of serial! Yes, a type, not a specific title!! We had no such rule—No film India, as Krishnan advocated in the Wheat Loan Library Workshop (Delhi, 1962).

We claim that we have tried to include—or at least that has been our major objective—all the Indian periodical publications preserved and being served in major libraries of the world! Now if a publication is listed in NUC, NST, ULS or BUCOP, or any of the SSDC series of catalogs, it is preserved somewhere in a library. We had no doubt about it. We had to include it. However, we had to use some discretion with regard to such titles which were selected from CIPE, IPiP or PiP, because these do not report any library holdings; these are mere listings. So, if we thought that a particular title was not likely to be retained by a research library, we tried not to include it. In brief, our criterion was whether a library is holding the title or not. Of course, some of the titles recorded by us may be regarded by a Krishnan as equivalent to Film India. Well, we tender our apologies. So, if a title held by a library is recorded by us and some other critic holds it to be an "ephemeral," well, the librarian of that specific library bears the responsibility, not TULIP. Thus many of the house journals, school magazines, and government documents of marginal value
UNIV. LIST OF IND. PERIODICALS

will not be found here, unless, of course, let it be repeated, they were held by a library. Of course, we cannot claim even in our wildest dreams that what we are presenting here—even in these letters of the alphabet—is co-extensive with what our sources have listed. If we have been able to cover even ten percent of the vast oceans we have dipped into, we will think ourselves lucky. Our material resources were extremely limited, while our bibliographic and library resources were totally unlimited, at least in terms of our own physical, mental and monetary resources. We will regard all our labors fully rewarded if our attempts prompt the "gods of wealth (dhana-kuberas)" to shower their gold on us, or on our successors, if TULIP deserves any support, and continuation, and perpetuation!

Contents and Scope in Figures (Bouquet A and B)?

- Total no. of titles 1350
- Total no. of entries 2110
  (including added and cross-references)
- Total no. of pages 323
- Total no. of entries per page 9
- Average no. of lines per entry 8
SOME EDITORIAL NOTES AND EXPLANATIONS

Symbols to Separate Fields and Languages

When the typing of the "Master List" was started in Mysore, we did not use any sign or symbol to separate one field from another. Subsequently we used "/" or slash. But this symbol was also used for the separation of languages when the publication contained more than one language. LC differentiates between "and" & "or", e.g. "English and Sanskrit", and "English or Sanskrit." Since we did not have the original publication with us, we could not say whether the same material (thought-content) was identical in both the languages and whether we should use "and" or "or". So we had to use "/". Subsequently we used "--" (two dashes) for separating two fields. We could have used the oblique to separate two languages, but we preferred a comma.

Arrangement of Entries

The arrangement of entries is strictly alphabetical, disregarding all the punctuation marks, such as . , - etc. etc. All the acronyms and initialisms in the title of a periodical publication are kept as they appear in the title of a periodical, but the initial letters standing for the name (acronyms) of a Corporate Body are separated by a full stop (period). This was necessary if we wanted to provide them with the priority they deserve. All this was dictated by the mechanism of our computer software.

Example of a title:
1. A.I.R. miscellany
2. ABC social science

Example of a corporate body:
1. A.P.O.
2. A.I.M.O.

110 = Arrangement and Location of the States

We have taken some liberty in placing "West Bengal" right after Bengal in the form of "Bengal (West)." Had we not done so, "West
Bengal" would have been separated by hundreds of pages! In fact, it would not have appeared at all in this bouquet!! The British Government in India tried to divide Bengal eighty-two years ago, but they failed miserably. What they were not able to do then, their progeny has achieved now! Bengal was divided. A region called "East Pakistan" came into being. It fought and won its independence from its mother country and changed its name and form and everything. Now it is called Bangladesh! Well, we the bibliographers cannot keep pace with our great lords, the politicians. But we did not succumb to their plans and procedures. East Pakistan and Bangladesh are still in Bengal if the periodical publication originated before 1947.

If our readers and critics insist on the dictates of our political leaders, we may take West Bengal right at the end provided we are able to reach that end in this life span!

Some General Guidelines

All the institutions are entered under their names and identified with the name of the city at the end. For example, Agra. Kendriya Hindi Samsthan is listed as:

Kendriya Hindi Samsthan, Agra.

The names of such cities that were states as well as cities are differentiated from the states by the addition of the word "city" in parenthesis ( ) e.g. Bombay state is entered as Bombay, while Bombay city is represented as Bombay (City).

210 and 212 = Individualization of Titles

Unless there were two periodical publications bearing identical titles, we did not need any further individualization. However, even if we had to add an individualizing characteristic, we added the year of commencement rather than the place of publication or language, etc. as some other compilers have done, e.g. PIH, which adds the place-name, e.g. Bharati (Varanasi).

Volume-Numbering

- xxxii -
INTRODUCTION

Now, sometimes we have to denote or designate a specific constituent number or issue of a volume. For example, Asian labour. v.11(8)- Sept. 1963. Here the specific figure representing the specific number or issue (8) is enclosed in circular brackets. Some other UL's, e.g. BUCOP, use the superscript. It was not easily available on our computer system and we could not afford the heavy expenditure involved in providing it. The word "number" or its abbreviation "no." does not appear in such cases.

On the other hand, when a set of numbers or issues, constituting an alternative or parallel numbering as a substitute for volume numbering is to be denoted, the abbreviated form "no." is also used along with the figures of numbers, all being enclosed in circular brackets. For example, Adhyeya. v.1-4(no.1-45); -Feb. 1973.

252 = Change of Title

ALC76 has two separate entries for the same title when there is a change either in the name of the corporate body (author) or title. The question is, why to bring all the details of the earlier title in the later title? For further explanation and examples see under field no. 601 and 602.

470 = Current/Ceased

Unless otherwise stated, it is assumed that the PP is current.

480 = The Address of the Publisher <Including PIN CODE>

The Joint Committee on the Union List of Serials had emphasized the need for drawing regionalized lists from major union catalogs. Ranganathan did not want to make his UC "an address-book." We have made our TULIP not only an address-book, but we have gone way beyond. We have tried to ascertain India's PIN CODE (Postal Index Number, similar to the Zip Code in U.S.A.) in as many cases as possible and have incorporated it into our entries. We believe this PIN CODE may achieve something highly desirable. It has potential for helping us to derive regionalized lists to any depth--state, district, city, even the
locality (Mohalla). This PIN CODE reaches great depth in geographical subdivisions.

520 = Frequency

These symbols denoting frequency of publications are currently used by MARC and its followers. We have adopted them for uniformity. Also because they did not generate any conflict with our way of doing. There is only one exception. We have used i for "irregular," since the symbol for it was not available on our computer system (and hence it could not be shown here under either!)

\[ i = b \text{ irregular} \\
    u \text{ unknown} \\
    z \text{ other} \\
    d \text{ daily} \\
    c \text{ semiweekly (twice a week)} \\
    3 \text{ times a week} \\
    w \text{ weekly} \\
    e \text{ biweekly (every two weeks)} \\
    m \text{ monthly} \\
    b \text{ bimonthly} \\
    q \text{ quarterly} \\
    t \text{ three times a year} \\
    f \text{ semiannual} \\
    a \text{ annual} \\
    g \text{ biennial (every two years)} \\
    h \text{ triennial (every three years)} \\
    k \text{ quinquennial (every five years)} \]

601 = Connection with Preceding Publication

The two phenomena of "Continuation" and "Succession" were identified, isolated, and differentiated by us on the basis of whether there is continuity in volume-numbering or not. If the volume-numbering is continued, it was regarded a case of "continuation." In such a case, only one entry was made for the preceding as well as the succeeding

- xxxiv -
title. These (titles) were linked by the phrases "Continued by" and "Continued from." If there was a new sequence in volume-numbering, the PP was regarded as a new title and a new (separate) entry was made.

However, the new rules of the AACR-II disturb the whole line of our thinking and procedure. If there is a change in the title or the name of the sponsoring body (as author) AACR-II regards it a new title, a new personality, even if the volume-numbering is continued. Of course, both the entries are linked by suitable references.

Examples:

1) March of Mysore, and
2) March of Karnataka

and

1) Institute of History of Medicine, and
2) Indian Institute of History of Medicine.

Of course, if our procedure is followed, we would give a "see reference" for the preferred (i.e. latest) title, which will have full data. On the other hand, if the authority of the AACR-II is followed, both will have full details and there will be a "see also" references from both to both.

This is an example of the changes that will have to be made if we decide to follow the AACR-II strictly and rigorously. A great deal of revision and reorganization will be called for. But we are not in a mood to do it now. We will do it only if our patrons tell us, or a granting agency provides the needed funds and makes it possible for us to do so.

Here is a Case of Succession

1) Nagpur law journal.
   v.1-45; 1918-1962.
2) Maharashtra law journal.
   v.1-1963-

This is a case of succession because a new era begins. Even if we make two separate entries in both the cases, still we can use our own terminology, i.e. "Continued by" and "Continued from" or "Succeeded by" and "Succeeded from."
UNIV. LIST OF IND. PERIODICALS

The question naturally arises: When is a title a new title? The answer is: When a new personality emerges. And when does a new personality emerge? Well, we will have to think about it!

SSDC makes a distinction between "continuation" and "supersession." If the original volume numbering is continued, even after the title is changed, they would use the term "contd. from" or "contd. as." But if a new sequence in volume numbering is adopted, and there is also the change in title, they would say "supersedes" or "superseded by."

ALC76 lists one title:

Van vikas.
Hyderabad, India.
Supersedes Aranya vikasa and continues its volume numbering.

The question is: Why to use "supersedes" when the volume numbering is continued? They do not make any distinction between "supersedes" and "continues."

The Random House Dictionary gives the meaning of "supersede" as to set aside as void, useless or obsolete, usually in favour of something maintained."

The great OED says: "be superior"; "to render superfluous or unnecessary"; "to be set aside as useless or obsolete"; "to be replaced by something which is regarded as superior."

Thus the term "supersedes" is not appropriate, unless we regard what is dubbed as "superseded", to be void, useless, or obsolete.

#### 828 = Geographical Component of TULIP CODE

The constituent element of space used in constructing our TULIP CODE has been represented by a capital letter and an additional lower case letter wherever necessary. For example,

- **M** = Madras
- **Mi** = Madurai.

Since the names of the states and cities are also given in the address component (field # 480), there will be no ambiguity at all.

This TULIP CODE NO has also the potential of generating linguistic and chronological divisions. TULIP CN is fully discussed on pages 184-190 of the TEST. Examples appear in TULIP Bouquets. See at the end of this BBDR.

The following Abbreviations for the states in India have been used in constructing the TULIP CODE.

- xxxix -
sense including all the data that go along with it in normal circumstances.

Companion Publications

Two companion publications are being released along with the two bouquets of TULIP. In fact the release of the bouquets was considerably delayed because the full beauty of the TULIP cannot be visualized without consulting the two companion volumes; the essence of TULIP can be well appreciated only if the other two volumes are kept to the left and right! These two volumes may serve as the vases. They will hold the TULIP bouquets quite well.

1. The first publication is entitled: TULSI: The Union Lists of Serials: History: Literature: Philosophy. It discusses briefly the preparation and publication of union lists all over the world.

2. The second publication is entitled: TEST: The Eternal Saga of TULIP or Composing a Union List of Serials in the Computer Age.

Why Publish TULIP?

We cannot claim by any means that TULIP as published now is perfect and complete. Far, far from it. The question then naturally arises: Why did we publish it at all? There are many reasons. The first is: Something is better than nothing! We just wanted to demonstrate in concrete form what can be achieved if an adequate cluster of resources is mustered. The other reasons are:

We wanted to create a favorable atmosphere conducive to the growth and development of TULIP. We approached many granting American agencies during the past six years for adequate funding, but the outcome was negative. Maybe, the times change. Some new Indo-US cooperating agency emerges and gives us the needed money to enable us to show in full the value and beauty of TULIP. We also wanted to draw the attention of the Government of India and her granting agencies, such as the University Grants Commission and the Ministry of Education. After all, as we have
INTRODUCTION

pointed out also in our TEST and TULSI, we are working towards the preparation and publication of a comprehensive universal list of India's periodical publications, the embodiments of her cultural heritage, preserved and being served in major libraries of the world. TULIP may lead toward the recovery and dissemination of India's glorious cultural heritage all over the world! We believe any Indian agency interested in the promotion of Indian culture would find TULIP a worthy object of support and promotion!

And finally we wanted to explore the possibilities of getting the support also from the users and consumers, who are our ultimate resort—the final refuge. They are the final judges of the internal and external values of TULIP. All our talk about the beauties and usefulness of TULIP are meaningless if this class of patrons is not satisfied.

So, these are some of the reasons for us to go out and stand the test. We are reminded of a great sadukti (wise saying) of one of the greatest poets of the world, Kalidasa:

Tam santah srotum arhanti sadasadyaktihetavah.
Hemnau samlaksyate byagnau visuddhih syamikapi va.

The noble critics may now hear and judge my composition, because they are blessed with the power of discerning what is worthy and what is not. The purity or blemish of the gold distinctly comes out in fire.

We are ready to stand the fire—get tested and evaluated. That is the only way to provide any justification for prosperity—nay, even the survival.

Since the TEST and TULSI are being simultaneously released to serve as the bases for the two TULIP bouquets, we do not think it appropriate to lengthen this Introduction.

May the readers and users be blessed with eternal bliss!
