Professor Maria Len-Rios

Love you Pa, Ma and Jaya; thanks for everything.

ACKNOWLEDGEMENTS

I would like to express my great appreciation for Dr. Glen T. Cameron. He had been extremely helpful supervisor and advisor for me, always performing both the roles with great expertise. I learnt from him how to untangle the complexities of theories and link them with professional practices. He encouraged me to be more creative and think beyond the limits, and helped me at every stage of it. I consider him to be an exemplary model of a good human being, who has a deep understanding of heart and mind of students.

I am also grateful to Dr. David Sleper, who always encouraged me and helped me understand the technical issues related to genetic engineering. His simple way of talking and explaining things infused a great sense of confidence in me.

I thank Dr. Fritz Cropp for providing rich insights and valuable references on European Union. I also express my gratitude toward Dr. Maria Len-Rios who helped me with her valuable comments.
