

Independent Practice with KidSkills™ #2

Scenario:

Homework assignments can often be problematic for students, especially when they begin to have numerous assignments with a variety of due dates. Katalina seems to have difficulty with long-term assignments like book reports and special projects. Sometimes she has problems with completing homework if she has other out-of-school activities like sports or clubs. Think of a tool in either eKidSkills or iKidSkills that might be useful and helpful to Katalina to plan her homework, long-term assignments, and free-time activities.

This is what a completed Homework Planner might look like.
