The idea of trust is important in understanding a school’s climate and culture.

“Trust is an individual’s or group’s willingness to be vulnerable to another party based on the confidence that the latter party is benevolent, reliable, competent, honest, and open” (Hoy & Tschannen-Moran, 1999, p.189).

Trust

“In general terms, trust relationships involve risk, reliability, vulnerability, and expectation (Hoy & Tschannen-Moran, 2003; Young, 1998). If there is nothing at stake, or if one party does not require anything of the other, trust is not an issue” (Brewster & Railsback, 2003, p.4)
Components of Trust

- Benevolence
- Reliability
- Competence
- Honesty
- Openness
Five Components of Trust

“Five key components commonly used to measure trustworthiness:

1. Benevolence: having confidence that another party has your best interests at heart and will protect your interests
2. Reliability: refers to the extent to which you can depend upon another party to come through for you, to act consistently, and to follow through.
Five Components of Trust

3. Competence: has to do with belief in another party’s ability to perform the tasks required by his or her position.

4. Honesty: a person’s integrity, character, and authenticity all dimensions of trust.

Barriers

- Top-down decision making that is perceived as arbitrary, misinformed, or not in the best interest of the school
- Ineffective communication
- Lack of follow-through on or support for school improvement efforts and other projects
- Unstable or inadequate school funding
- Failure to remove teachers or principals who are widely viewed to be ineffective
- Frequent turnover in school leadership
- High teacher turnover
- Teacher isolation (Brewster & Railsback, 2003)
Barriers

“Perhaps the greatest obstacle that schools experiencing a lack of trust must overcome, however, is their past” (Brewster & Railsback, 2003, p.11).
Building Trust between Leaders and Teachers

- Demonstrate personal integrity
- Show that you care
- Be accessible
- Facilitate and model effective communication
- Involve staff in decision making
- Celebrate experimentation and support risk
- Express value for dissenting views
- Reduce teachers’ sense of vulnerability
- Ensure that teachers have basic resources
- Be prepared to replace ineffective teachers (Brewster & Railsback, 2003)
Building Trust among Teachers

“If relationships between teachers are to change significantly, teachers themselves must work to identify barriers to trust within the faculty and take the initiative to improve, repair, and maintain relationships. Some places to begin:
Building Trust among Teachers

- Engage the full faculty in activities and discussions related to the school’s mission, vision, and core values.
- Make new teachers feel welcome.
- Create-and support-meaningful opportunities for teachers to work collaboratively.
- Identify ways to increase and/or improve faculty communication.
- Make relationship building a priority.
- Choose a professional development model that promotes relationship-building” (Brewster & Railsback, 2003, pp.15-17).
