# Vet Med Update

## New MRI Advances Care and College's Research Mission

Diagnostic and research capabilities took a leap forward at the University of Missouri College of Veterinary Medicine May 29 with the launching of a new 3T Magnetic Resonance Imaging machine. The college held a ribbon cutting for the device and the facility housing it at the Veterinary Medical Teaching

## Upcoming Events

### Missouri State Fair

*The CVM will have a booth at the Missouri State Fair. Stop by and visit Aug. 7-14, 2014*

## Research Focus

Hospital.

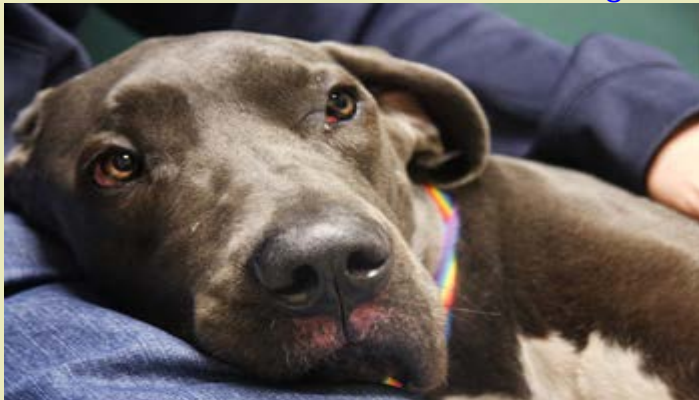

CVM Dean Neil C. Olson, DVM, PhD, told the group gathered for the event that a great veterinary college needs not only top-notch faculty, students and staff, but also up-to-date facilities and equipment. He noted that with the addition of the new MRI to the college's existing imaging capabilities, which include positron emission tomography (PET), computed tomography (CT), and superior digital radiography, MU becomes one of only a few veterinary schools in the country with such advanced technology available.
