College of Veterinary Medicine
 Small Animal Medicine and
 Critical Care Short Course
 November 15, 2014

8:30 a.m. - Registration
 9:00 a.m. - Lectures begin
 6:00 p.m. - Lectures conclude

Please join us for this day full of updates for medical and surgical topics in Small Animal Medicine and Critical Care. We will provide both traditional lectures as well as case discussion on topics useful to your practice. **We would love to see you!**

**Emergency and Critical Care
 Surgery: Helpful Tips of the Trade**

Dr. Tony Mann
 2 hours

This lecture will discuss both the techniques and perioperative management of some commonly performed emergency procedures.

Parvovirus: A Critical Illness

Dr. Marie Kerl
 1 hour

This is still a common presenting complaint for puppies on emergency. Learn the fine points of addressing this critical illness

**Pattern-based Recognition of
 Respiratory Diseases**

Dr. Carol Reinero
 2 hours

Make more complete interpretations of patient respiratory illness through the use of video-based presentation of abnormal breathing patterns in dogs and cats

**Antibiotic Therapy:
 What to Choose When**

Dr. Leah Cohn
 1 hour

Veterinarians prescribe antibiotics several times a day. Learn new tips and tricks for prescribing and using both common and novel classes of antibiotics.

**Managing Urinary Tract
 Infections Wisely**

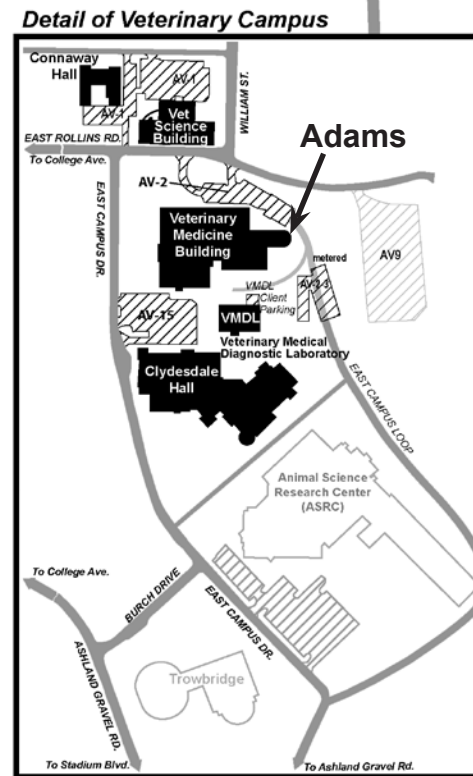

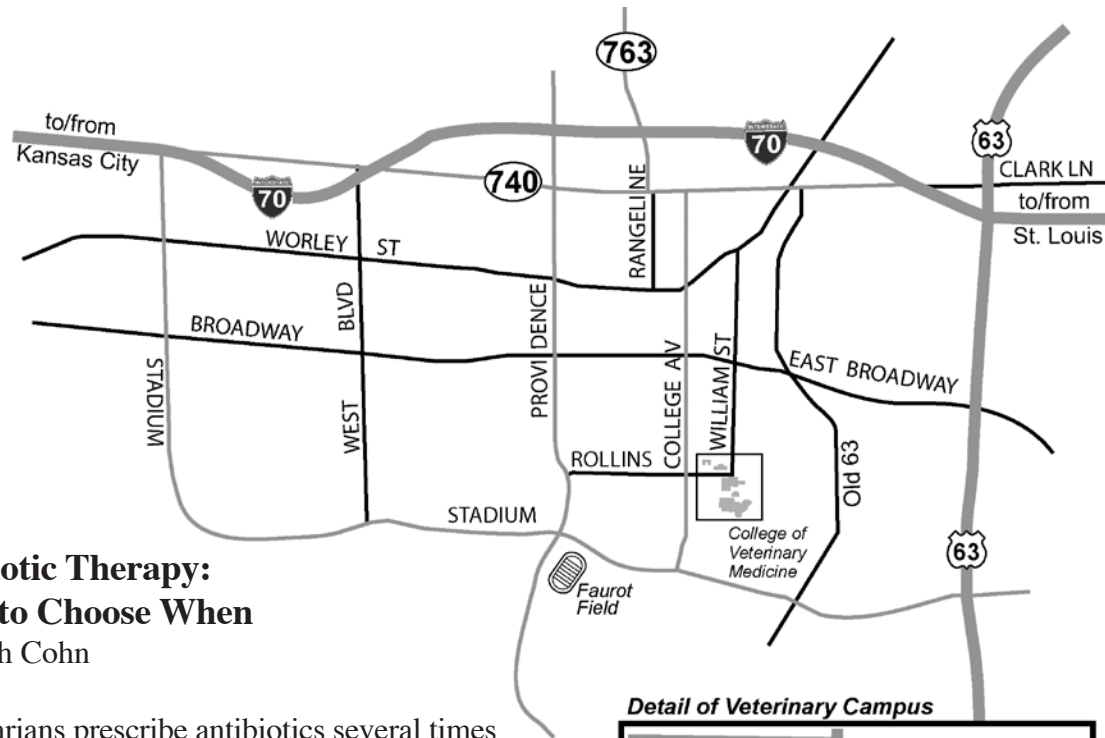

Dr. Leah Cohn
 1 hour

Recurrent urinary infections are frustrating problems. Learn the latest about urinary infection diagnosis and management.

**Building a Hospital Infection
 Control Plan**

Dr. Marie Kerl
 1 hour

With the rise of antibiotic-resistant bacterial strains, a sound hospital infection control program has become vital. This lecture will present the steps involved in starting or updating your program wisely.
