Discussion Settings

Default article settings
- Attempt to notify any blogs linked to from the article
- Allow link notifications from other blogs (pingbacks and trackbacks)
- Allow people to post comments on new articles
(These settings may be overridden for individual articles.)

Other comment settings
- Comment author must fill out name and e-mail
- Users must be registered and logged in to comment
- Automatically close comments on articles older than 14 days
- Enable threaded (nested) comments 5 levels deep
- Break comments into pages with 50 top level comments per page and the least page displayed by default

E-mail me whenever
- Anyone posts a comment
- A comment is held for moderation

Before a comment appears
- An administrator must always approve the comment
- Comment author must have a previously approved comment

Comment Moderation
- Hold a comment in the queue if it contains 2 or more links. (A common characteristic of comment spam is a large number of hyperlinks.)

When a comment contains any of these words in its content, name, URL, e-mail, or IP, it will be held in the moderation queue. One word or IP per line. It will match inside words, so “press” will match “WordPress”.
