## TERMINAL

From Page 1B

rules require that the DBE participation be in place "at the time the contract is executed, not on bid day."

"The Airport Authority has misinterpreted the DBE rules," he said.

Hoch also objected to the bid board process, saying "it's my best new example of the definition of a kangaroo court."

He read the council a letter from the airport to a federal aviation official that he said indicated the bid board had rejected Dondlinger/Hunt a month before the case was argued before the board.

"I couldn't believe that a city board that was part of our appeals process, that we hadn't gotten to yet by almost a month, had been asked to make a recommendation against us one month earlier, and they did," he said.

A lawyer representing the authority staff argued that the rules were clear and fair and said the airport staff had done nothing wrong.

Attorney Polly Jessen of Denver said rebidding the contract would be unfair since all the bidders have now

shown their hands. "As a matter of law, rebidding is not a favored remedy," she said.

She compared the Dondlinger appeal to children on a playground.

"Anyone who has ever played a game is familiar with the concept with children of a do-over," she said. "And you have a do-over if someone couldn't concentrate or there was cheating or you didn't agree with the calls. The whole point when someone wants a do-over is because they didn't win and they really wanted to win."

"In this instance what they were asking for is a do-over because they didn't provide the required documentation and their bid was determined non-responsive, the way the airport does this routinely."

Mayor Carl Brewer and council members James Clendenin, Lavonta Williams, Jeff Longwell and Janet Miller voted to reject Dondlinger's call for a rebid.

"It's very clear to me that (the disadvantaged business) information was to be provided on bid day," Miller said. "That was shown to us in writing."

"I don't think there has been any abuse of judgment (by airport staff) and the facts speak very clearly for them-

selves that that (Dondlinger) bid was not responsive," she said.

Council members Pete Meitzner and Michael O'Donnell supported the Dondlinger position.

"It seems that there was a whole lot of confusion during the bid process," O'Donnell said. "It seems like there were some questionable actions taken by people associated with this contract working for the airport in particular."

"Proceeding without just rebidding is going to subject us to further courtroom litigation setting the project back a little bit further and that concerns me," he said.

Airport director Victor White said he was pleased with the council's decision but disappointed that the appeal has delayed the start of construction by almost five months. Construction had been scheduled to begin last month with completion of the new terminal scheduled for late 2014.

The delay will likely push the project into 2015, although now there's no firm time line, he said.

"We need to regroup and find out exactly what happened," he said.

## OAKLAWN

From Page 1B

director of Sedgwick County's Department of Code Enforcement. "The homeowners were required to get engineers' evaluations of the structural damage and give the required list of repairs for each house."

After the inspection, homeowners like Tafoya could file a permit to rebuild. This is standard procedure after storms, fires, tornadoes and other disasters, Lett said.

During the rebuilding process, the homes will also be inspected multiple times to make sure they are up to code, Lett said.

"Anything that is going to be concealed when finished is looked at — plumbing, mechanical, electrical," Lett said. "We want to make sure every-

thing that's being concealed has been installed to code."

Rick Waylan had 10 homes that were marked unsafe to occupy. His company, Oakview at the Park, owns and rents approximately 300 homes in the Oaklawn area, and he is currently rebuilding his damaged properties.

"Like a new build, (the county) has to make sure it meets safety standards," Waylan said.

Sedgwick County Commissioner Jim Skelton visits the Oaklawn community once or twice a week. He's glad to see homeowners rebuilding.

"It indicates that things are going to slowly return to the way things were," Skelton said. "It's much better than how it was after the tornado."

Andree Sisco, the Oakland Improvement District board treasurer, doesn't know when the area will be "back to normal," but she hopes most of the homes will be completed

within a year's time.

"It's going to take those with more properties longer to finish," Sisco said.

"For us to have some of these homes rebuilt, it shows people care," Sisco said. "It means a lot."

At Tafoya's house, the roof and siding are repaired, but she still has to fix her shed, awning and fencing. She says the work is "going slowly."

"There's so many people out here fixing (things), you have to wait," she said.

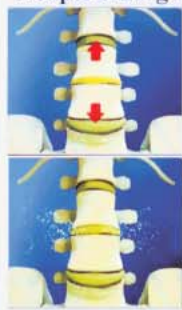

According to a Sedgwick County damage assessment released earlier this year, the tornado caused an estimated \$146.3 million in damage to homes and businesses. The tornado also caused extensive damage to the Pinaire Mobile Home Park, and it heavily damaged Spirit AeroSystems.

## "I would recommend it to anyone I know who is experiencing low back pain."

"Before treatment I was having lower back pain and nerve pain in my right leg from my groin to my knee area. I was diagnosed with two herniated discs and had been experiencing pain for one to two years prior. Before trying the DRX 9000 I had been to the Emergency Room several times and they gave me injections. Nothing seemed to work. I could not stand, sit or do anything comfortably. After I began treatment I started to notice a difference around the third visit. Today, I am four visits from the end of treatment and I feel 95%-100% better! I am so glad I tried the DRX and I would recommend it to anyone I know who is experiencing low back pain."

Derek G., Wichita, KS

**Spinal Decompression Therapy specifically targets an injured or degenerative disc relieving pressure on the pain-producing nerve.**

This procedure repositions the disc and rehydrates it allowing water, oxygen, and nutrients to be absorbed

## New Technology Treats Back Pain Without Surgery or Injections

We have had tremendous results alleviating back pain caused by

- Herniated Discs
- Slipped Discs
- Bulging Discs
- Facet Syndromes
- Sciatica
- Degenerative Discs
- Ruptured Discs
- Relapse or Failure

### Following Surgery

Spinal Decompression Therapy works by widening or decompressing the space between the spinal bones where the disc is located, relieving pressure on pain-producing nerves and allowing the discs to return to their natural state. Most patients describe the treatment as a gentle stretching of the back. In fact, the treatment is so gentle that it's common for patients to fall asleep during the procedure

"I have 2 Spinal Decompression units in my practice and the great majority of patients I see that I would have previously done back surgery on do not need back surgery after being treated with spinal decompression. The treatment is very gentle and the results are long lasting."

—Robert Hudgins, M. D. Neurosurgeon, Presbyterian Hospital, Dallas, Texas

In addition to Spinal Decompression Therapy, we have licensed Physical Therapists on staff. This allows us to not only heal the disc with decompression, but also to strengthen the surrounding structures for longer lasting results. While our main focus is on the treatment of low back pain, our therapists also treat other joint and musculoskeletal disorders.
