Ozone levels prompt another air quality alert

Area health officials issued an ozone alert for Friday after ozone levels in the Wichita and Topeka metro areas exceeded allowable levels.

It was the fourth week this summer that area residents were notified that the air quality in the region was unhealthy due to the presence of smog-forming pollutants. Residents and employers are encouraged to take the following tips to drive as little as possible.

- Reduce idling and avoid congested traffic areas.
- Reduce vehicles in the parking area and do not top off their fuel tanks.
- Avoid using gasoline-powered leaf blowers.
- Reduce idling and avoid congested traffic areas.
