Qiuming Yao, Computer Science

What we have achieved

Through this project, we have achieved a location-based information exchange and sharing platform on campus. This platform can let people in university search for and post information based on specific campus locations selected on a map. The applications based on PC part have almost done. For smart phone part, we are still programming and developing. We are planning to publish the PC based beta version before the beginning of 2010 fall semester. The application can help students locate information on campus such as finding interesting activities, events and announcements. The platform will provide more accurate and efficient information exchange and sharing among students, which will greatly improve campus life.

Expenses

All expenses we have spent until now are list in table 1.

Table 1 Expenses for Equipments

Items	Cost (\$)
Dell Latitude E6500	1199.00
Dell Latitude E6500	1199.00
Dell Latitude E6500	1199.00
Macbook Pro 2.53GHz	1399.00
iPhone 3Gs	1000.00(*)
Palm Pre - Sprint	1000.00(*)
Verizon Droid	1000.00(*)
HTC Hero	1000.00(*)

Total	8996
--------------	------

(*) means the cost need to be confirmed with Dr. Dale Musser

Things need to be carried over in FY 2011

Since we haven't finished up the development job of smart part, we need to continue this work in the next financial year. In addition, after the publication of the initial PC based beta version, we believe, there should be some further test and maintenance work to do. After we get the whole system done, we will also need to advertise, maintain and improve the whole system.
