Letter to the Graduates...

To the Class of 2007:

Congratulations to each of you for completing a momentous step in your medical career. You now face the challenges of residencies, fellowships and the continuous education required by our profession. As you proceed on your professional journey, I encourage you to remember your formative years at the University of Missouri-Columbia School of Medicine.

Remember the dedicated teachers who guided you through problem-based learning, lectures and clinical rotations. Their timeless lessons will help you overcome many obstacles.

Remember the fellow students who shared your curiosity, excitement and anxiety. They, along with your teachers, will remain some of you most cherished friends.

And remember your first patients. By learning to care for them, you gained the ability and confidence to care for others. The well-being of patients will always be your greatest reward.

Medicine has never had so much to offer patients and the best is yet to come. The opportunity to help and to heal is unsurpassed in human history. As doctors of medicine, it is your privilege and responsibility to embrace this opportunity and lead others in health care to do the same.

On behalf of the faculty and your fellow alumni, I offer you the never-ending support of the MU School of Medicine. We wish you the very best both personally and professionally.

Clubs and Activities
MSAC

President: Joel Brockmeyer
Secretary: Kerry Massman
Treasurer: Scott Matz
SNMA had several service activities, including multiple trips to the Boys and Girls Club, and mentoring in Dr. Ingram’s monthly high school science club, CALEG. Other annual activities include offering high school students from St. Louis the opportunity to work through a PBL case through the Excellence in Learning program, and similarly giving Mizzou undergraduates the chance to shadow both a medical student and a physician during our Minorities in Medicine Outreach week. This is just one way that we partnered with our undergraduate SNMA group, MAPS.

We also organized a bone marrow registration drive in January, and a blood drive in April to specifically benefit sickle cell anemia patients in the area. Both these drives were motivated by the traditionally low numbers of minorities donation to the respective registry, and we were able to have student and faculty volunteers from all ethnic backgrounds contribute to make the drives a success.

The medical school received our second annual Multicultural Food Festival well; several students and faculty members from various ethnic backgrounds volunteered to cook, and dozens of people tasted new food from the variety of cultures represented.

In the fall we travelled to Kansas City for our regional conference, and this spring we went to San Francisco for the SNMA’s national medical conference. The school year culminated with our annual celebration of graduating members. This has been a great year, and we, as always, look forward to the many opportunities to serve all populations next school year.

~Margaret Umah
Military Medical Student Association

President: Joel Brockmeyer
Vice President: Andy Basnett
Secretary: Sidney Bruce
Treasurer: Liz Douglas

This year in MMSA, we worked to try to keep our numbers up by working with the recruiters. Also, we took our first field trip ever to Fort Leonard Wood. There, we ate some awesome barbeque and shelled out ungodly amounts of money on uniforms. The end of the year banquet at Coliseum Bistro was a great night of dinner, drinks, dessert, and a rambunctious 3-year-old.

~Joel Brockmeyer
The Geriatrics Interest Group provides medical student the opportunity to learn how to better care for the elderly generation regardless of their future specialty. As reflected by Dr. Erik Lindbloom, co-faculty director of GIG, "With the exception of pediatricians, all physicians graduating in the upcoming years can expect to treat a large number of elderly. Even pediatricians will deal with grandparents and elderly caretakers of children."

The wide variety of topics discussed at the GIG meetings help attract students to different interests. Topics discussed at this year's meetings included "Medicare: What's It Really About?", "The Importance of Connecting with Your Patients: Bedside Manner," and "Elder Abuse" in addition to a panel of Geriatricians featuring some of MU's Leading physicians. Also, the MU Geriatrics Interest Group has taken an active interest in the community. The annual Reflections of Aging Photo Contest, sponsored by the Geriatrics Interest Group and a grant from the Donald W. Reynolds Foundation, continues to draw large numbers of entries. By sponsoring such an event, the GIG is working to eliminate many of the stereotypes currently facing the elderly while reflecting the great character and experiences of many in our senior population.

~Karli Echterling
Radiology Interest Group

Presidents: Jason Cox and Matt Donnelson
Vice President: Khandarp Bhatt
Secretary: Allen Missoi

Besides club meetings this year our biggest thing is that we, along with Dr. Fickenscher, are starting an experimental evening pager coverage service for the radiology department starting in a couple of weeks. Basically, we will be answering pages for the residents from 5-9 during the evenings and performing a triage service. If someone needs results we will give them or if it is an emergency we can expedite the process of getting a read. We are receiving training from the radiology department, the positions are paid, and when not busy we can study or participate in the reading room. They need this service because they get so many pages that they aren’t able to respond to them all and read the films so they get behind on one or the other.

~Jason Cox
Orthopaedic/Sport Medicine Interest Group

Co-presidents: Jonathan Vigdorchik and Ann Gietler
Vice President: Benjamin Turnbow
Treasurer: Brandon Roller

We had several meetings:

Dr. White, orthopaedic sports medicine and team doctor for MU, gave a talk on what it is like to be a team doc and shared his experience with the Houston Astros and Houston Texans.

Trip to Body Worlds 2 exhibit in Chicago

Paintball with the orthopaedic residents.

~Jonathan Vigdorchik
OB/Gyn Student Interest Group

President: Alison Wolters
Vice President: Liz Cohen
Treasurer: Ada Sum
Secretary: Jill Webster

The OB/Gyn Student Interest Group represents the MU student chapter of ACOG. Our mission is to provide students with information regarding the future of health care for women, provide a forum for discussion of issues related to women’s health, work to improve women’s health education at the medical school and within the community through committees and service projects. Our group works to help out members gain an understanding of what is involved in a career in OB/Gyn, provide them with a forum to ask questions about the field of OB/Gyn and to introduce them to faculty and residents in the departments for which they can rely on for help in furthering their career. This was our second year in existence at MU and we hosted such events as a get to know each other BBQ, participated in the AMSA National Primary care week by hosting a lecture on midwifery, offered a tour and information on how to help with Open Arms Crisis Pregnancy Center in Columbia, MO, put together a panel discussion on how to apply to residency and provided a knot tying lab in which residents assisted in teaching knot tying skills to the members. Our group continues to grow each year and next year we look forward to adding more events and becoming more involved in our community.

~Alison Wolters
Wilderness Medical Society

Co-Presidents: Jenn Stuth, Adam Stevens, Drea Long
Secretary: Clayton Butcher
Treasurer: Erik Korte

The Wilderness Medical Society seeks to promote education on how to recognize and treat injuries in the wilderness. We hold lunch lectures on a wide variety of topics, do skill workshops that allow students to apply their basic knowledge in a real setting, and have social activities such as bike rides and camping. Recently, we sent two teams to Virginia to participate in MedWAR (Medical Wilderness Adventure Race). In this competition, our teams dealt with emergencies such as drowning victims, jellyfish stings, tension pneumothorax, anaphylaxis, and climbing accidents, as well as having to demonstrate basic wilderness skills such as orienteering and starting a fire. Through the national organization students are able to attend the yearly conference and learn about new advances in technique and research. Fourth year students are also able to take advantage of a WMS elective held each year in March, where they can further their wilderness skills.

~Drea Long
EMERGENCY MEDICINE INTEREST GROUP

President: Lauren Gaston
Vice President of Administration: Matt Donaldson
Vice President of Journal Club: Jeff Spear
Treasurer: Elliot Pennington

We held journal club meetings, had a casting lab, organized helicopter ride-alongs for this coming year, and started a stope smoking program in the University ED.
The American Medical Student Association (AMSA) chapter at Mizzou is affiliated with the national AMSA organization, the oldest and largest independent association of physicians-in-training in the United States. It is completely student led and governed and represents medical students, premedical students, interns, and resident. During the 2006-2007 school year the Mizzou chapter was involved in many events and activities. We started off the year with the medical school apparel sales and were able to make a sizable donation to Camp Quality of Central Missouri—a week long summer camp for kids with cancer and their siblings. We sponsored a “How to survive your first year of medical school” a panel for the M1’s, the annual residency fair, and the annual Primary Care Week. New events for the year included Dr. Bondeson giving a non-biased talk on the stem cell initiative and Erin Elliott, Director of UM Government Relations/MU Healthcare, giving an update on what was going on with healthcare legislation in Missouri. We also joined forces with SNMA to help them out with their bone marrow drive, SIGHT to help them out with AIDS week, and AMA to bring speakers form the Missouri legislature to speak on the new MO HealthNet program. Six members also attended the national convention in Washington DC in March.

—Ashlee Brown
Mizzou Medical Society

MU Chapter of the American Medical Association

President: Sarah Lovinger
President-elect: Emily Lange
Vice President: Megan Kowal
Secretary: Melissa Smarr
Treasurer: Ben Martin
Recruitment Chair: Colin Sauer
National Delegate: Chris Connor
National Alternate Delegate: Gabe Rice
State Delegate: Logan Frank
State Alternate Delegate: Josh Stilley
Historian: Jacob Becker
Community Service Chair: Jill Webster
The Mizzou Medical Society chapter of the American Medical Association (AMA) has had a successful year. Recruitment went well, and we continue to be the largest medical student organization at MU. Meetings included an introduction to the Missouri State Medical Association (MSMA), and tips for involvement in organized medicine by our faculty advisor, Dr. Karen Edison. We also sponsored a presentation on the new MO HealthNet in which members of the Governor's office spoke and answered questions. Several students participated in the Physician of the Day program and spent a day in Jefferson City discussing ideas with legislators and helping with medical concerns that came up during the day. Once again, we sponsored the annual Halloween party, "Terroroma", and were able to donate over $1,000 in proceeds to the Family Health Center. With the support of the MSMA, we sent three students to the National AMA meeting in Chicago, four students to the Interim AMA meeting in Las Vegas, and one student to the Regional meeting in Chicago. There were also several members at the Annual MSMA meeting in Kansas City. At all of these meetings, Mizzou Medical Society members were active participants in discussing health policy and future legislation.

Pathology Interest Group

President: Faye Chang
Vice President: Rob Hillard
Secretary: Carisa Petris
Treasurer: Neesann Puangsuvan

Rural Medicine Interest Group

President: Jennifer Dowling
Vice-President: Jamie Dost
Secretary: Jill Webster
Treasurer: Leah Smith
Off-Campus Relations Chair: Karrisa Grellner
MSFC
Medical Students for Choice

President: Valerie French
VP: Liz Cohen
Secretary: Katie Connolly
Co-Treasurers: Shayna Norman and Claire Bolander

Medical Students for Choice is dedicated to ensuring that women receive the full range of reproductive healthcare choices. MSFC recognizes that one of the greatest obstacles to safe and legal abortion is the absence of trained providers. As medical students and residents, we work to make reproductive health care, including abortion, a part of standard medical education and residency training. This past year, members of MSFC at Mizzou went to the leadership training conference as well as the Regional Conference in Chicago and National conference in St. Petersburg, Florida.
FMIG
Family Medicine Interest Group

§ Officers:
- Co-Chairs: Dana Galbraith, M4; Laura Morris, M4
- Webmaster: Landon Hough, M3
- TarWars Chair: Karrisa Grellner, M2
- Treasurer: Leah Smith
- MSAC (Medical Student Government) Liaison: Adam Fitzgerald, M2
- AAFP Liaison: Wes Trueblood
- State and National Events Coordinator: Wes Trueblood
- M1 Recruitment Chair: Leah Smith

§ Class representatives:
- Resident: Mendi Hecker
- M4: Dana Galbraith, Sarah Lovinger, Laura Morris
- M3: Emily Burns, Crystal Cook, Jamie Dost, Wes Harden, Landon Hough, Emily Lange, Nikki Rice, Luke Stephens, Dustin Tripp, Amy Youngyeun
- M2: Bryan Cannon, Adam Fitzgerald, Leah Smith, Bryon Thornton, Wesley Trueblood, Karrisa Grellner
- M1: Adam Alter, Andrew Ausmus, Savita Fanta, Timothy Kobold, Cole Scherder, Joshua Stilley
o BROWN BAG LUNCHES – “Brown Bag” lunch meetings are open to both current and prospective FMIG members. Held during the lunch hour, these sessions are intended to provide information relevant to the practice of family medicine in today’s society, as well as opportunities for hands-on learning.

§ Residency and Beyond in the Field of Family Medicine (August 2006)
- Dr. Erika Ringdahl, MD, from the Department of Family and Community Medicine and Residency Director for the MU Family Medicine Department, discussed the various options for Family Medicine residents and physicians as far as practice location (urban vs. rural), type of practice (in-patient, out-patient, obstetrics, sports medicine, acute care vs. chronic disease, etc.), and lifestyle outside of the office. She also talked about fellowships available to family medicine residents and physicians. This Brown Bag served as an introduction to FMIG for prospective members. Over 60 people attended, and the food went fast!

§ Sports Medicine Musculoskeletal Workshop: Examination of the Shoulder (Nov 2006)
- Dr. J.P. Simanis, Sports Medicine Fellow at MU, presented the topic of “Examination of the Shoulder in the Athlete”. Dr. Simanis first gave a presentation about shoulder anatomy then took students through the physical exam techniques for differentiating rotator cuff injuries, nerve impingement syndromes, and dislocations. The students got a chance to practice the exam techniques on each other, and Dr. Simanis concluded the talk with information on treatment for common shoulder injuries.

§ Lunch Meeting with Dr. Joe Scherger, MD, MPH (February 2007)
- Dr. Joe Scherger, Professor of Clinical Family and Preventive Medicine at the University of California – San Diego, Director of the San Diego Center for Patient Safety, Medical Director of Quality Improvement Education, and Director of Quality Improvement in Correctional Medicine at UCSD, spoke with 8 members of the FMIG leadership group about his vision for the future of family medicine. Dr. Scherger is involved with improvement in quality and safety through the redesign of health delivery systems with emphasis in incorporating internet-based systems into patient care. The students got a chance to discuss with Dr. Scherger ideas about how patient care will be delivered in the next 50 years. Among the topics discussed were the replacement of what Dr. Scherger calls “Hamster Medicine” (inefficient telephone and paper-based practice) with a more efficient system involving computer-based scheduling and updates, coordination of preventative care, and personal health pages for patients. The discussion was dynamic and the students were motivated to become the new wave of family physicians.

§ Cervical Check Workshop (March 2007)
- Dr. Cari Worley, Assistant Professor of Clinical Family and Community Medicine at MU, presented a workshop designed to give students hands-on practice with cervical checks. Dr. Worley gave a short introduction about cervical exams then assigned values for dilation and effacement to each student. The students made cervical models out of Play-Doh to represent their assigned length and dilation, then examined each model to test their cervical check accuracy. Twenty students attended, including several clinical students preparing for their OB/Gyn rotations.

o TAR WARS ANTI-TOBACCO CAMPAIGN
§ Tar Wars is MU FMIG’s largest annual activity. This year, 10 MU med students gave Tar Wars presentations to over 350 elementary students in rural mid-Missouri. The goal of our chapter’s program is to provide positive role models for students in rural communities who do not receive much exposure to medical students or public health programs. Winners of the annual Tar Wars Student Poster Contest receive a Tar Wars t-shirt from our chapter. One M2 FMIG class representative chairs the program and organizes the planning, training, and completion of all Tar Wars presentations.

o TIME-2-SERVE SERVICE EVENTS – During the first half of each academic block, FMIG leadership plans a service activity in the local community. This year, students completed three Time-2-Serve projects.

§ Apple Picking (September 2006)
- FMIG members volunteered to pick apples at a local apple orchard in Columbia and the owners of the orchard agreed to donate the apples we picked to the Central Missouri Food Bank. Everyone had a great time filling up apple boxes and we picked a massive amount to be donated.

§ Pediatrics Halloween Party
- Before Halloween, 12 FMIG members spent an afternoon making decorations, painting pumpkins, and eating cookies with pediatric inpatients in University Hospital. Both kids and older kids enjoyed the festivities.

§ Central Missouri Food Bank (Jan. 2007)
- The Central Missouri Food Bank distributes millions of pounds of donated food to 33 counties in Missouri. Eight FMIG members along with friends and family, our faculty advisor, and another physician helped package common household items such as toilet paper, paper towels, and trash bags. These items will be distributed to families throughout central Missouri.

o DINNER FORUMS – Sponsored by the Missouri Academy of Family Physicians
§ Winter Forum – Fellowships in Family Medicine (January 2007)
Dr. Erik Lindbloom, MD, Assistant Professor of Family and Community Medicine and former Geriatric Medicine Fellow, spoke about fellowships available for family medicine residents and physicians. Dr. Lindbloom covered the various fellowships offered and also discussed how the fellowship program works (number of years, locations, pay, resident vs. physician applicants, certificates of added qualification). Thirty-nine people attended, including students, faculty, and many former and current fellows from different areas. Among the fellowships represented were Sports Medicine, Geriatric Medicine, Research, and Teaching. Boone Tavern Restaurant provided a wonderful dinner and the Missouri Academy of Family Physicians graciously funded this event.

§ Spring Forum – Where can Family Medicine Take You – International Medicine
- Dr. Joseph LeMaster, MD MPH, Assistant Professor of Family and Community Medicine, discussed the topic of international health care, and specifically, his experience as a family physician during the 1990’s in Nepal. He used his unique experience to talk about opportunities for future physicians to do international medicine with various programs all over the world. The topics ranged from existing programs such as Medicins-sans-Frontieres and others, to how to have a positive impact in international health by developing lasting relationships with an international community. He stressed not only delivery of medicine, but public health, sanitation, and doing the work that is needed in the international environment. He also talked about how rising students can begin to get involved with ongoing programs.
Co-Presidents - Jared Bayless and Phil Hart  
Secretary - Dana Galbraith  
Treasurer - Kody Finstad

The Christian Medical & Dental Associations’ mission is to motivate, educate, and equip Christian physicians and dentists to glorify God by living out the character of Christ in their homes, practices, communities and around the world. This past year the group had weekly meetings at school and meetings monthly at the home of Christian physicians. In addition to weekly meetings this year’s group held a Welcome BBQ during the first week of school and a Hayride and Bonfire in the fall. The group also raised funds to send over 10 students to Valladolid, Mexico to spend a week on a medical mission trip with the national CMDA organization and Global Health Outreach.
Our journalistic roots at Mizzou run deep enough to stretch over to the medical school. The Bearded Dean, the medical school's most unofficial news source, was founded near the turn of the century by the Class of 2004. A time when scandal and upheaval within the administration was going unnoticed by the student body, a voice contrary to the OME's newsletter, arose. Several brave individuals made light of these events in an underground newsletter entitled, "The Anti-Crist." After student uproar over the name and a rash mission statement, it was later changed to The Bearded Dean, after one of the school's first deans, Andrew McCaulester, who had a beard thicker than a bird's nest. Today, the tradition continues, exposing those who attempt to pull the wool over our eyes, and those who just deserve a good lashing. Included are some of this year's articles.

The Bearded Dean Editor:
Jake Quick
Docappella makes noise in more ways than one

Docappella broke onto the Columbia music scene a few months ago when they opened for Gainor and Friends, at a concert in the hospital atrium. But it wasn’t easy. They had to overcome a few obstacles before they’d become one of the premier bands on Hospital Drive.

After playing such huge venues like S255 and M105, the group decided to branch out and go for the big money. “We thought the stairway by the library would really get us in the public eye,” said Elliot Pennington, one of the group’s original members. “We were out there belting out a love ballad, when Dr. Hosokawa came out waving a broom and telling us to ‘shoo.’ It was a big scene, and we had to scatter.”

In general, the student body has been supportive of their efforts to bring outdated music to the masses. However, others haven’t been as supportive of the group. “The Missourian asked a simple question a few months ago when they entitled an article, ‘Is there a doctor in the band?’ The problem with their title is that the answer is simply, ‘No.’ Docappella is an aberration and a farce. They aren’t doctors,” explained M3 Shayna Norman. “Dude,” M2 Jen Jolley yells down the hall, “can you guys please shut the hell up. Nobody cares.”

That didn’t stop the octet however. “We were determined to push forward,” said Clayton Butcher, a member of the group. The group struggled to land new gigs. After being tossed out of the library, the ER and, of all places, the operating room, they received some important news.

Apparently being single for 24 years finally paid off for James Peppers and the rest of his crew. “Columbia Magazine was doing a Valentine’s Day issue where they featured me,” said Peppers. “I talked up the band, and we had instant credibility. By the way, I’m still single.”

Since then, they’ve booked sold out shows in Brady Park and the bus stop north of the medical school. “We’ve got big plans, including a little something we’ve got planned for the common area near the M1 labs,” exclaimed Matt Fieleke, “We’re gonna be huge.”
A Few Headlines...

Megan Dulohery, M3, angry that you just mispronounced her name in your head.

M1 Deiter Duff says “hello.”

M2 Kevin Stockard convinced “real medicine,” is nothing but pathology slides and mustaches.

Russian students push for glasnost regarding the perestroika of PLOG.

Lucas Buffaloe is angry that you’re laughing at his name.

M1 hopes to save enough lives as a surgeon to make up for being a douchebag.

A few overzealous M2s, in an unprecedented move, complained IPC tests were too easy.

M3 Dan Jackson not telling anyone why he’s going into OB/GYN, but he is planning on couples matching with fellow M3, Jason Foil.

Unfortunately, 90% of Mizzou students state that they would have participated in the “Bone Marrow Drive” had it been titled “Cheek Swab Drive.”

M4 John Bises walks alone.

M1 Parker Hu finds people asking, “Parker who?”

M1 Kay Rogers embarrassed ... finally

A Review was really cool until the M2’s ruined the tradition.
M3 Colin Sauer was on the fifth floor of Maryland Garage last Thursday evening when he was assumed to be a Mid-Missouri Mental Hospital escapee.

"I was just minding my own business, you know, avoiding eye contact with everyone," says a baffled Sauer. "Before I knew it, these men in uniform came at me shouting for me to hold up and stop. Naturally, I was scared and started to run, but I didn't get very far after they tazered me."

Student doctor Sauer was subsequently locked up in Mid-Mo, but the mistake was rectified when the psych team he was on found him on rounds two days later.

M1's cut back on gross anatomy lab

University of Missouri - Columbia School of Medicine has determined that human anatomy is useless in medical education, citing the marked infrequency of USMLE questions pertaining to anatomy. In an attempt to honor the persistent request of first-year medical students to keep gross anatomy in the curriculum, the OME has decided to "cut back" on the dissection portion of the course.

"You can learn a lot from the left forearm," says associate dean Michael Hosokawa, commenting on the dissection assignment for the first 10 weeks of medical school.

By the end of the first year, the class of 2010 is on pace to complete the dissection of their cadavers' left arm, right thigh, left eye, and genitalia.

"I'm okay with it," says M1 Steve Ioke, "But I'd love to see a gall bladder before I graduate."

This new trend is quite concerning to surgeons, internal medicine doctors, pediatricians, and all other physicians that take care of humans with human bodies.

When asked about his thoughts on the matter, Cadaver #7 declined comments.
Balzer Weighs-In on New Purchase

Peeps,
Contrary to popular belief, my new Porsche is the nicest car in the Maryland Ave garage. What’s that, M1 ladies? Hmm? You don’t know what I’m talking about? Okay, okay, so I bought a Porsche. That’s right. A Porsche. It’s a red Porsche Boxster-S with a black convertible top, a fat 2.7L 6-cylinder engine with a pimp 295 horses to tug this train...oh, and pimped rims. The driver’s leather seat fits my butt just fine, and I’m quite sure that the passenger side will wrap any hottie tight. Sure, the stereo is stock, but stock on a Porsche rocks hard! Most people don’t know this about me, but I have a funky side, and I’ve been known to toss a chill groove into the CD player and crank it loud.

I make sure that I hit the gas really hard when the light turns green. People love it. You should see the crowd outside Quentins everytime I drive by. They all making noise and all that, trying to get a peek out the window. I bet they assume it’s a doctor driving it. Sometimes I wonder what my classmates would give up just to get a ride in my Porsche I mean, um, obviously they’d want me to drive wherever we go. I know Scott Norris’s wife (or maybe it was Scott) had a great time when she (he?) rode along with the top down the other day.

For those of you who know me, you all remember that I totally trashed out my Honda Civic. For example, sometimes I would lose my stethoscope in there and not have it for days. I mean, that’s nothing like the time I dropped it in the potato chip aisle at Gerbes and lost it for a week, but that’s another story.

I’ll never trash the Porsche, though. I’m totally going to change that part of my life. I’m going to have it together now that I have a Porsche. Clean apartment, beautiful car...and the girlfriend will naturally follow. Of course, at some point she’ll get cold. And my white coat will quickly warm her up.

- Balzer
Recently engaged student doctor, Zak Hugo, agreed to contribute an op-ed piece for the Bearded Dean regarding his recent appearance in The Columbia Daily Tribune:

Okay, look guys. I understand the concern about blood diamonds, referring to the recent upheaval surrounding the movie, “Blood Diamond.” I don’t want to support senseless killing in Africa. However, you have to admit that there’s something very attractive about linking human sacrifice to the engagement ring. So, I decided to make a special request to my local jeweler:

“Ma’am, please give me proof of blood-shed in the history of this diamond if you want full price.”

Surprisingly, she quickly complied. After a brief glance in both directions, she pulled a small cutting board from under the counter. Quickly eyeballing the serial number on the underside of the board, she promptly spoke:

“Here you go. This one is from... Tanzania. The boy’s name was Kyubo, and he no longer has a left hand.”

“Sweet. She’ll love it.”

M3 Mistaken for Jesus

Third-year student Justin Dyer has played the role of many people in his day, but never had he been expected to fill the role of J.C. until Wednesday morning.

“I was busy prerounding on my medicine patients, when I walked into a room of four detox patients on the floor praying,” said the unsuspecting Dyer. “I didn’t think too much of it, those guys are always partying in their own worlds.”

But what happened next wasn’t run of the mill. When they turned to look at who had interrupted their worship, there stood, who they believed to be Jesus.

“One man fainted, and another woman started screaming all kinds of crazy Latin stuff,” said Dyer. “For a second, I thought I was still feeling the effects of the night before, but then the nurses came in to try to calm them down, and I realized they were praying to me, when one of them grabbed my coat and said, ‘Save me Jesus.’”

“After that, I was like ‘Holy s##t,’” explained Dyer, “I’m having a religious experience.”

This experience has led Dyer to reexamine his own beliefs, and now is contemplating the fact that he may be a prophet, and plans to give morning sermons on 4E for those interested.

Making our mark around the world
During the first six months of 2006, digital track sales (paid downloads of songs to computers or cell phones) matched the full-year totals for 2005.

The Wii, made by Nintendo, became available in November 2006. This video gaming console is the first of its kind to use remotes that detect three-dimensional movement.
Deaths...

Gerald Ford, 38th President of the United States, died on December 26 of ‘heart failure’ at the age of 93.

Saddam Hussein, who was president of Iraq from 1979 to 2003 was captured by U.S. forces and the Iraqi High Tribunal sentenced him to death for crimes against humanity. He was executed by hanging on December 30, 2006 in Baghdad. He is known for his involvement in wars against Iran (Iran-Iraq War, 1980-90) and Kuwait (Persian Gulf War, 1990-91).

Celebrity Anna Nicole Smith dominated daytime television after her mysterious death on February 8, 2007. She is known for her tabloid popularity after marrying an 89-year-old Texas billionaire at the age of 26.

Nick,
We are very proud of doctor #2 in our family.
Love, Mom and Dad

Angela Etzenhouser,
Congratulations on seizing your dream. We are proud of you beyond what words can express.
Love, Mom and Dad

Dear Andy:
You have worked so hard and we are so proud of you. We love you, Dr. Abeles.
Your Entire Family

Congratulations, Jennifer
We love you!
When Kristen was 11 years old; she asked my wife, "Mom is there a doctor in the family?"
My wife said, "No." Kristen then said, "Dr. Sanfilippo; mom I think that has a nice sound."

Congratulations Dr. Kristen Marie Sanfilippo

Love Dad

Lindsey,
We are extremely proud of you! You have achieved a very significant goal, which will have a long lasting impact on your life. You accomplished this without losing sight of who you are as a person. We love you, Mom, Don, Nathan, and Josh.

Sarah,
We are very proud of you! You have achieved your lifelong goal. Our family now has another "Dr. Lovinger." May the Lord guide you in South Carolina, and always.

Congratulations Brandon!
You are an amazing father, husband, and friend.
We are so proud,
Karen, Sammy and Ian
John Bisges - Your family is very proud of you. We know medical school has been challenging. You will be a great doctor because of your caring as well as knowledge. We love you.

Matt, your entire family is so very proud of you. You have worked so hard for so long, and finally graduation day has come. No one could be prouder than your Mom and Dad. We love you a lot, Big Boy!! (make that "Dr. Big Boy")

Good Luck, Graduates

From the Office of Medical Education
Congratulations to everyone in the class of 2007! The past four years have been great, and I pray that the friendships we've developed here at WIlson stay with us throughout our careers.

Finally, Suzanne Netter, for help throughout the year, would like to thank the OME staff, especially and access to Facebook.com accounts. I also want to thank everyone who contributed information, pictures.

I would like to thank the wonderful tradition. I have thoroughly enjoyed this endeavor and feel honored to have participated in this project. I have thoroughly enjoyed the past year, as the edition and the people involved have done my best to document as much as possible.

I hope you have enjoyed the 2006-2007 Marathon Edition.
