Without the support of those listed on these pages, the 1991 MUtation would not be possible. These individuals have contributed to the community, to the University, and to the education of countless medical students. This is just one more example of their generous spirit. On behalf of all those who will enjoy this edition of the MUtation, we thank you.

Dean's Message

I truly believe it takes more courage to study medicine today than it did when my generation was in medical school. The study requirements and demand for commitment were just as great as they are now, but the society in which we worked was far friendlier to the medical profession.

You are facing intense challenges because health care is in a phase of transition that requires the same dedication to patient care as previous generations but with far less tolerance for your human shortcomings. Nevertheless, your faculty and I have great pride in your accomplishments and complete confidence in your abilities and your future. Go forward with the knowledge that you are as well prepared to meet the challenges of the future as the graduates of any other school of medicine.

Reflections

Dr. Goodge Steps Down as Course Director

I am grateful to have been given the opportunity to convey to the members of this graduating class, and to the many more that have preceded you, the feeling of pleasure I have had in taking part in the education of medical and other students here at the University of Missouri for twenty-six years. Although the intense pace of the courses has often been as wearing to me as to many of you, I have looked forward each academic year to the arrival of new students. I share the views of others that working with students helps to stimulate further study in ones' discipline and it seems to slow down the aging process. I have pursued many aspects of biology, but have found the complexities of human anatomy so interesting that I have wanted to share my knowledge of this with all who have been at least somewhat receptive to acquiring it. Of course we deal with a captive audience in the medical school class, but I have

tried to emphasize what is most relevant to your future needs.

I was asked to reflect on changes I have seen during my years in medical education. There has been a great reduction of class time allotted to anatomy in both the medical and pre-medical curricula. Although students have often felt overwhelmed by what there is that might be learned, most have been able to acquire a respectable amount of basic knowledge. Our understanding of structure has advanced greatly during my academic tenure. During this time the great discoveries related to electron microscopy and histochemistry were made. Before that even the existence of mitochondria was debated and only a few neurotransmitter substances were known. Even though gross anatomy has changed less, human variation was thoroughly studied and many aspects of functional anatomy are now better understood. As new surgical and diagnostic procedures were developed, the need for detailed anatomy of many organs increased and there has been a resurgence of sectional anatomy.

Despite all this, the basic knowledge that appears to be most useful to the medical student has changed very little. The structure, development and relationships of the major organs needs to be learned. Students continue to struggle with cranial nerves and the autonomic nervous system. Most of the classic central nervous system syndromes are presented now in a way similar to when I began teaching.

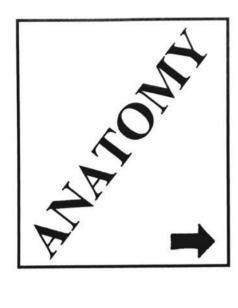

There have been obvious social changes during these years. During the sixties and early seventies students began to assume a greater role in the educational process and question authority. Faculty members often felt threatened by this and felt criticism was unduly harsh, but I must say that students of this period were more likely to ask broader, more functionally related questions. Of course the average age, the number of women and the national origins has changed over the years, but the medical student body has not appeared to me to be a homogeneous group, and I have always found this to be a plus.

Major changes appear to be coming for medical practice and medical education, but I believe the need for a broad base including anatomical science will continue.

> Sincerely, Bill Goodge

Why the Brain Needs Exercise

In teachers, lawyers, and business men, who do much thinking, the brain continues to grow until near the fortieth year of age, but in those who shovel coal or do the same work day after day requiring no thinking, the brain stops growing after the twentieth year of age. A muscle grows by use and the same is true of the brain. One cannot use the mind without using the brain.

The Medical Mecca

Orah Mae Mockbee

HOW HABITS ARE FORMED — The doing of one thing over and over again calls into action the same set of nerve cells, and they finally become so accustomed to act, that they do so without the aid of will, and often even against it. This is habit. A boy long accustomed to swearing, acting rudely, eating rapidly, or looking sullen cannot refrain from these ungentlemanly habits later in life, even when honestly trying to do so. The cultivation of agreeable manners and pleasant looks not only

makes friends in school, but success in later life.

THE DANGER OF BAD THOUGHTS — Evil thoughts passing often through nerve cells leave a blot there which can never be entirely erased.

The first step toward wrong doing is in wrong thinking. Many cases are known where the reading of books and newspapers describing wicked acts has affected the nerve cells so as to cause the reader to commit robbery and other crimes.

The youth who causes to pass

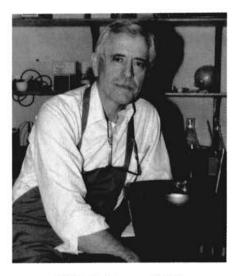

through his nervous system into his mind noble thoughts from good people and good books, and who learns industry, patience and politeness is sure of friends and success in life. The mind is like a piece of ground which if not sowed with good seed and cultivated, will grow up with worthless weeds. It is, therefore, important that one should keep in good company and think and talk about what will make life more pleasant and useful.

You Were Always Right, Right From the Start.

It would be nice to think that your medical educational experience was set up as a clever experiment to test your convictions and principles, to see if you really had the guts to speak out like the kid in the story of the EMPEROR'S CLOTH-ING, and challenge your medical school teaching programs. But being the new kid on the block, you entered the twilight zone of educational madness, reluctant to speak out, but suspecting that your intellectual instincts were correct and that serious educational and philosophical deficiencies were present.

When you got into medical school, you were pleased and made secret promises such as: I will really try to understand medicine, I will now use all my math and chemistry, the use of penetrating questions will unravel the mysteries of life and I will develop the skills to become a sensitive, caring, competent physician. Your worst fears were realized when you quickly discovered that medical school rarely utilized math or chemistry, that academic success was measured by your ability to memorize large amounts of unrelated material, and that penetrating questions

were often met by destructive criticism. But you were right, this form of information gathering is not a measure of either intelligence of a predictor of a physicians success. It really indicates a failure of educators to evaluate the entire student, our

Monica Zill, M.D.

Stephen Craig, PSF

Edward Adelstein, M.D.

most important responsibility.

You found out the academic community has chosen to accept the administrative standards of excellence which are measured by total grant dollars and number of publications. You were right again, the god teachers, the hard-working caring physicians and the dedicated researchers are the real substance of your educational experience.

Cont. on next page.

Cont. from previous page

You are observing medicine becoming a technical science, with physicians being only responsible for specific body parts. We are developing procedural oriented pay-as-you-go medicine and buying into the developing medical-industrial complex, which simply makes up monopolistic charges for medical care. You are right, we are losing control of health care delivery and the responsibility for human health care needs.

You have discovered that the constant bombardment of facts, without time for contemplations and scientific adventures, has reduced your ability for creative thinking and medical discovery fantasies. You are right, we have ignored the most critical part of your education, the ability to use information to solve problems and to establish role models for you in both health care and research.

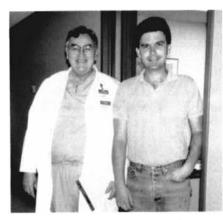

The good news is that we finally recognize that all you knew is correct. We are in the process of changing the major

emphasis of medical education to a problem solving, creative thinking program. Perhaps we are capable of understanding that it is not the structure of education but our philosophy of education that needs revision. We are showing signs of questioning the accepted values of academic success. We are beginning to understand that we need real doctors to take care of the entire person.

Most of all, you were right in choosing medicine as your profession. You can relieve suffering, you can change medical education, you can become the physician you always wanted to be. You can study and solve medical mysteries, you can challenge health care policies, you can become the person that you can be proud of. You can enjoy all the benefits of your profession. You are the future of medicine.

Sincerely, Dr. Edward Adelstein

Useful Helicopter Facts

Continued from page 11

4200 pounds 5000 pounds

Stump your friends; confound your enemies.

The BK-117 helicopter, known affectionately as the death star, epitomizes the high-tech state of the art medicine practiced here at Mizzou.

Weight: with fuel and equipment maximum normal take off

Fuel: Jet A, 42 gallons per hour per engine

Engine: two 650 horsepower turbines

Speed: 180 mph maximum, 100 mph cruising Operating conditions: Visual approach only Navigation: Compass, inertial gyroscope

LORAN C radio locator

Main rotor speed: 384 RPM

Color Scheme: Teal green, charcoal, white Flight costs: \$300 base charge, \$10.50/mile

Commonly asked questions:

- Q: I once drove a VW with 11 people in it; how many will the helicopter hold?
- A: Normally 6 can ride, but if everyone inhales from helium balloons, 14 can ride.
- Q: Why fly the round-about way to refuel?
- A: To scare the hell out of the VA PTSDers.
- Q: What do I have to do to get a ride?
- A: Roll a pickup at 90 miles an hour.

Two vets have a smoke and contemplate heli-facts.

The Year in Review

How soon we forget . . . while we were studying anatomy, biochemistry, medicine and surgery we sometimes noticed medical events making news, but how much were we aware of the current events taking place around us? This is a synopsis, biased though it be, of some of the years events outside of medicine. We can also wonder whether, in ten years, if any of these major events of the day will then mean anything or remind us of this past year of medicine.

IRAQ. Iraqnophobia, as one commentator called it, was the pervasive theme of this year. August 2, as M-1's were trying to figure out where S-261 was, Saddam Hussein was invading Kuwait, claiming it as Iraq's 19th In the months that followed, a multinational force led by the United States bolstered Saudi Arabian defenses, fearing that Hussein would invade it next. United Nations' resolutions were passed ordering Hussein out of Kuwait. An ultimatum was eventually issued, and Hussein called the worlds bluff. In mid-January, war was begun with massive air strikes. In February, a ground war was started which lasted only four days, with the formidable Iraqi army crushed in a complete rout. The war was over, but there was much to do in the following months. At press time, the troops are just beginning to return home.

LATVIA, LITHUANIA, ESTONIA. The Baltic republics of the Soviet Union each have tried to declare their independence from Moscow, but without success. Gorbachev resorted to using force to put down uprisings, drawing only mild condemnation by the Western world which was embroiled in the Persian Gulf.

BORIS YELTSIN. Is he Gorbachev's nemesis or just a flash in the pan? Only time will tell. but Boris Yeltsin made world headlines when he resigned from the Communist party. He was elected president of the Republic of Russia and continued to push Gorbachev for further reform. He had almost as many supporters as he did enemies, but he definitely knew how to get attention.

EAST AND WEST GERMANY. Germanys merged with a surprising lack of interest on our part. After the tumbling of the Berlin Wall in 1989, the economically stressed Soviets withdrew their army, writing the final chapter of WWII. The rest of Europe watched with some anxiety as reunification drew near. Would Germany emerge as an even greater economic threat than West Germany had been previously? What will be the fate of East German women's shot putters jokes?

KEATING FIVE. No, they weren't the latest group to hit the charts. These five senators were linked to Charles Keating, president of the failing Silverado Savings and Loan in a bribery/conflict of interest scandal. The S and L crisis has yet to be solved, and we're still

DONALD TRUMP. Only crocodile tears were shed when it was learned that "The Donald" wasn't quite as rich as he had purported. Rather than billions, Trump was down to a few million dollars. This bit of information was uncovered in the midst of his divorce from his wife Ivana. Yes, indeed, Trump went from "The Art of the Deal" to "Brother, can you spare me a dime?"

IBEN BROWNING. He predicted that the city of New Madrid, Missouri would be the center of a major earthquake on December 3, 1990. He claimed to have predicted the San Francisco earthquake and other natural events. The press, not pass up a good story fanned the public into senseless hysteria. Life in New Madrid goes on.

MARION BARRY. The former mayor of Washington D.C. was found guilty for possession of cocaine and entered a drug rehabilitation program. Our nations capital has the dubious distinction of the highest murder rate in this country.

NANCY CRUZAN. She was the focal point of a right-to-die case that went before the Supreme Court. She had been in a persistent vegetative state since a car accident seven years ago. Her parents wished to follow through with her stated desire to not live in such a condition. The Supreme Court ruled that with sufficient evidence of the persons wishes, removing such life support was legal. She

MARGARET THATCHER. After serving eleven years as Britain's prime minister, the "Iron Maiden" resigned from office amidst party squabbling. All was not lost as her choice of successor was named as the new prime minister.

VACLAY HAVEL. No, he is not a chess champion as one classmate said. After forty years, Czechoslovakia held its first free elections. Vaclav Havel was elected the new president. Formerly a political prisoner, he now had the enormous task of rebuilding his country.

NELSON MANDELA. South Africa's new president, F. W. DeClerk, freed Nelson Mandela who had been a prisoner for twenty-seven years. Analysts tried to figure out of this was the beginning of the end of apartheid or just a savvy political move. In any case, it soon became readily apparent that the African National Congress had problems of its own, even with Mandela back in action. Meanwhile, Winnie Mandella stands trial for battery.

TUITION:

How much is a medical education worth?

Something's terribly wrong with fees and stipends at the University of Missouri. A second year student will pay \$8082 tuition for the entire '91-92 year. Considering the other expenses and the loss of potential income during school, the financial commitment required to become a physician now makes it out of reach for many.

Looking back twenty years, a second year medical student paid \$250 for a full year, including activity fees. Tuition has increased by a factor of 32 in only twenty years. Granted, inflation was high in the seventies, but is this increase representative for this institution? To answer this question, it is informative to examine resident salaries. In 1971 a first-year resident at the University of Missouri made \$5500. Projecting the 32-fold increase in tuition to the 1971 R-1 salary, today's R-1's should be earning \$176,000. Not bad; if this were truly the case, a lot of MBA's would be flocking to medicine. To approach this from a different direction, the current R-1's earn \$23,700, which is 4.3 times their 1971 salary. If tuition had kept pace with this increase, students would be paying \$1077, rather than \$8072.

Shifting the financial burden onto the student has farreaching effects. Graduates will be forced to choose a field based on salary in order to repay massive debts. Fewer people will be able to enter primary care specialties, and only the wealthy will be able to attend medical school.

Personally, I would like to see our hospitals increase R. 1 salaries to \$176,000. Think of the upsurgence in applications; Departments would no longer have to worry about recruiting residents.

The people responsible for these tuition increases should be ashamed of their actions. As graduates of UMC, we should pledge to do our small part to watch-dog the University curators and state legislators, putting the pressure on to lower tuition and increase state support. We have to educate those around us, to make them understand why the state should fund our medical school at a level comparable to that of other midwest state universities.

Sincerely, Luke B. Sloan Editor

In 1987, the national mean debt of graduating medical students was \$29,289. In 1990, the national mean debt of graduating medical students was \$45,840.

CUTTING COSTS

In a new economy move, financial advisor Conway Jones has announced that Shakespeare's Pizza, the Sub Shop, and all bars will now be off limits to medical students. The savings will be enormous, according to Conway. Some students will reduce their expenses by as much as two to three thousand dollars per year. When asked how this would be enforced, an anonymous but large member of the Dean's Office felt that a brand or tattoo on each student would be best. However, for the present time they will start with a program entitled "Problem-based Learning", which will consist of 100 extra hours of lectures per year for first and second year students, most of which will be scheduled over the lunch hour. In addition, Saturday testing for the M-1's will be moved to 9:00 p.m. to further reduce bar attendance.

M-1's on wheels! (Karen F., Ger L.)

THE END!!

Above: Denise Jackson IS Okra Wimpy. Right: Bill Senf (Don Morris) explains his kinder, gentler way of handling cheaters.

M-2's displaying M-1 Antigens (Andy Harrison, Holly Hite, Steve Tucker, and Jeff Thompson)

De De Willis has to choose one of the three stud bachelors to keep for her very own. (Matt McGlothin)

Don Morris (Grant Piepergerdes) is Godfather of the M-2s even to Matt Tiefenbrunn. (Kevin Dishman)

Center: Dr. Sandy Sharp (Barbara Gruner) demonstrates that A-Review is the bridge that connects the M-1s and M-2s. Left: Deborah Weems unveils the truth behind our Profs. Below: The Three Bachelors: Mr. Wimp (Brett Penney), Mr. Jerk (Mike Maurizi, and Mr. Hot-Shit (Rob Hibbard)

Kevin Dishman, affectionately known as The Kitchen, acts as M.C.

Steve Tucker demonstrates an old favorite, Erotica Asphyxia.

Diane Schoentag (Andrea Arvan) elaborates on her opinion of "Stinking Cheaters" to Okra Wimpy (Denise Jackson)

Rt: Doug Mills displays his talent on the guitar. Center Page: Dr. Has Been (Bob Stanley) reveals the mystery of life (GOD is a surgeon)

Mike Maurizi (Rick Knittig) is "assisted" by his Fuji Massage Parlor favorite girl (Jim Kurz)

Dr. Duncan (Stephanie Carron) responds to Dr. Dunkerly's lecture.

Sarcoma Botryoides What else is there to say?

Mondides Seize the Moment

We all must come upon a crossroads at some point in our life. Perhaps, in a sad way, it is our loss of innocence. It is like finding out that there is no such thing as a Santa Claus or an Easter bunny, that magic is a visual lie, or that wishes don't necessarily come true by blowing off seeds from a dandelion. As we progress in our years, we find out more about life that makes us appreciate the blissful ignorance of our childhood. Properitius stated it with sadness attempting to grasp stoicism, "Me dolor et lacrimae merito fecere peritum ... (Experience is mine at the cost of tears and suffering . . .)" There are many stressors that a medical student faces such as studying for hours on end, receiving unsatisfactory grades, and being hung up on social and intellectual insecurities by fabricating more inadequacies than we need. This combination of intellectual drive and social harnessing leads to a somewhat cynical individual; so they say. Students are but mere pawns in a chess game between society's wants and the administration's demands with no room for achieving their own definition of self. But I say otherwise.

As I look towards entering my clinical years, I look back nostalgically at my suffering and in a perverse way of how I enjoyed it. This year of serving as the M-2 class president has taught me a great deal, not only about organization and how to deal with groups of people or public speaking, but about my own character and that of my classmates. I have faith in all of us. We have strived for a common goal, helping each other along the way, and each still chiseling away at sculpting themself as a unique individual. We have stood up for what we believe in despite the consequences. "Mea mihi conscientia pluris

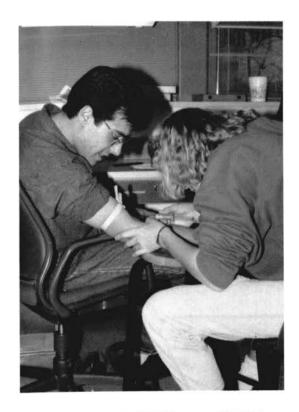

Elvira visits the sperm bank. Tassie and Deborah as siamese twins, "It's awkward at times, but it makes sex interesting."

est quom omnium sermo. (My own conscience is more to me than what the world says. — anonymous)."

Dosteovsky, in The Insulted and the Injured (perhaps written about medical students), states, "It is not the brains that matter most, but that which guides them - the character, the heart, generous qualities, progressive ideas." Medicine encompasses truth and love as its basic tenets in its study and practice. Most of us holding these beliefs close to our character came here seeking to perfect it within ourselves and use these healing arts to express it. This will truly be an accomplishment. There are many things in life that take us down, but once in a while we find something that is uniquely pleasant and changes us. Seize the moment; for it may not come again. Keep that passion and optimism that makes us work for what we believe in and keep believing. "Why abandon a belief merely because it ceases to be true. Cling to it long enough, and . . . it will turn true again, for so it goes." - Robert Frost. As long as we are surrounded by kids and dandelions, Santa Claus and the Easter bunny will continue as will magic and hope for wishes blown in the breeze.

Lt: Back alley HLA testing (Bill James, Renee Boulicault). Above: Crystel visits the sperm bank; Bill Senf, a proud father. Center: John Richart is displeased with his Path grade (Michele McNally).

Life is mostly froth
and bubble,
Two things stand
like stone,
Kindness in another's
trouble,
Courage in your own.

"I have tried lately to read Shakespeare, and found it so intolerably dull that it nauseated me." — Charles Darwin

It's a good thing he didn't try Robbins.

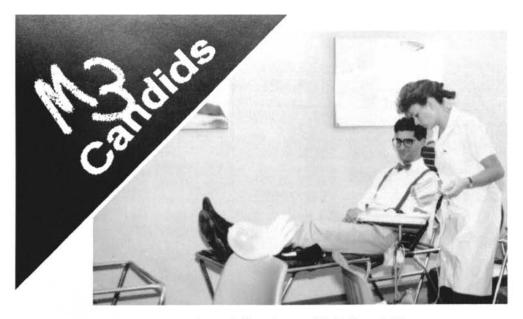

Back Lt to Rt: Andy Wayne, Roger Edelen, Kyle John, Monica Chaudhary, Cheri Landers, Andrea Arvan, Tony Richmond, Laurie Fowler, Jerry Mank, Sue Pereira, Ramilo Gatapia, Chris Andershock, and Dr. Rosenholtz.

Above: Roger Edelen displays that a-fashionitis is curable. Above Rt: Kevin Gillian, Barbara Dietrich, Jeff Gao, Susan Orth, Sandy and Brian Mahaffey. Rt: Little does Kim Crawford know that there is a hidden camera in the Ophthalmoscope head.

Jerry, I thought you didn't like girls?

Sam grabs his kid, as Frank grabs Tricia.

Well ladies, thumbs up, the pregnancy test was negative."

"All right you guys, where did you hide Dr. Havey?"

Andy I love you, but get your hands out of my pants.

Bill Davis and love slave, Suzy Vandiver.

"Shit Alina, this Russian vodka is good"

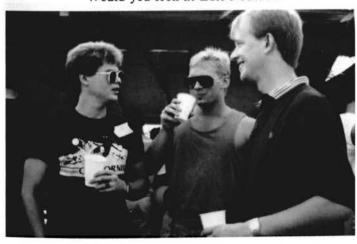

"Dan, I can't take it any longer, you have to make a choice between the two of us." — Lori or Helen?

"Would you look at Edie's butt . . ."

Ted Rasoumoff explaining to Dennis Younglove the art of picking up a one night stand.

"Since when are drugs illegal?" - Scott Smithpeter

"Oh Koop stop being so serious, and smile for the camera." — Edie Sigmund

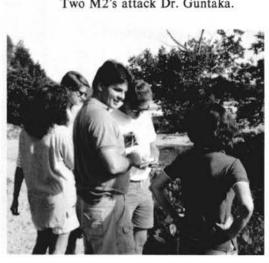

"Oh my god, Tim Anderson is so cute." Becca Zinck

Edie conducting a Luke Sloan look alike contest.

Two M2's attack Dr. Guntaka.

3 out of 4 people not understanding Pete Montgomery's humor.

"How much longer must I endure working with women?" - Steve Theis

"Mike, I've really got the munchies . . . pass the bong." — Mary Even.

Dr. Koop obtains consent for a breast exam.

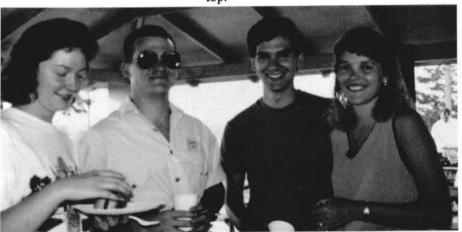

Brian Toalson, "chick hunting."

"Lori, the wife's here, not now" - Tom Alcox

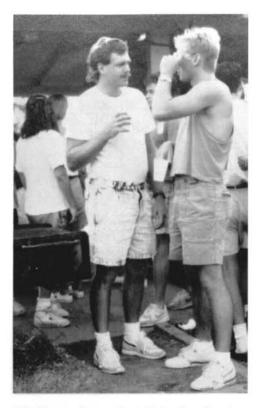

Brian Rudman caught "in the act" on the roof-top.

Two happy couples.

Mike Wackowski and wife once again forget their costumes for the Halloween Party.

"Todd, you know that Estee Lauder tanning lotion causes decreased libido." "No kidding Brad . . . I thought it might have been the tight underwear."

Jim Koeller as a hula popper.

"Hmm . . . I wonder if they'll ever find out that I nominated myself for AOA?" — Steve Carder

O.K. Edie, point your tongue to the drunk Chinaman.

"Hi, I'm Randy Latorre and I'm really not as big of a slut as everyone says."

Nick DiCiro before . . .

... and after, a Smithpeter special.

Bev Fingerhood in shock at how good Neal is.

Alina obviously pissed they're not speaking Russian.

"So, Mike what do I do after I have my tongue out?" — Tom Whalen

"Hey Annette, who the hell is that guy?" Rich Feldenberg

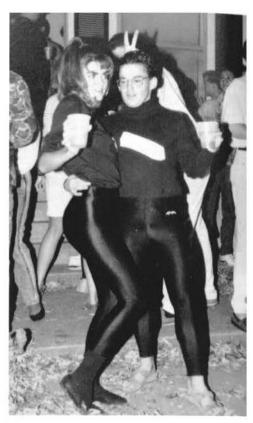

Dan the hand man.

A very stiff Bob Frolichstein.

Jim Borders with his pornographic etch-a-sketch.

Deeter Sprocket asking his fraulein to touch his monkey.

The Jack-O-Lantern at Whalen and Plurad's Halloween Party before people started drinking.

"Carolyn, I don't think your head's that big ... what do you think of mine?" Frank Divincenzo

"Sarah, you know I'm married but what the hell ... your marriage is arranged anyway." — David Barnes

Paul Gelvin and wife Gayla enjoy licking the creamy filling first.

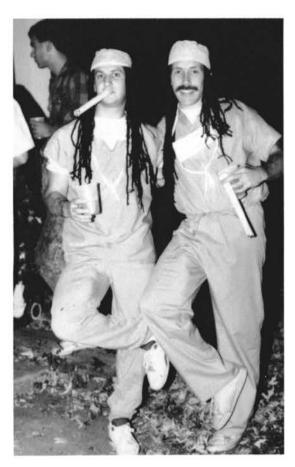

Mish takes a page out of Troy Potter's family album.

"Take the god damn picture, would ya?" Lori Smith

Tom Whalen, best thighs and stinkiest feet in the M3 Class.

The Rasta surgeons.

Pete Montgomery playing computer dating.

Bill Davis with a grin after Brad Lickliker, nurse on 7 east, accepted his offer for dinner at his place.

Frank points out 2 key principles of medicine.

"If we pinch these loaves out faster, nobody will catch us." The Turtles $\,$

He's married to a nurse, has had a hair weave and is often called Frank.

"Lower, Stephanie lower." - Steve Riley

Pharmaceutical Rep. and laboratory rat.

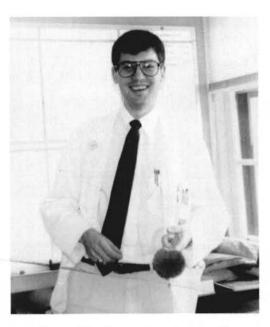

Rudman and Shanker, amused that Reed's not circumcised.

Karuna and Amy relive anatomy with Heather.

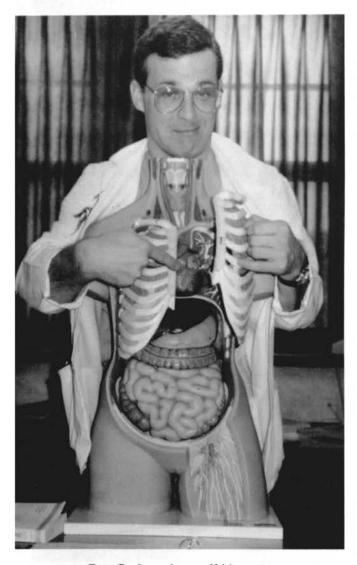

"No, I don't have a condom now." - Steve Theis.

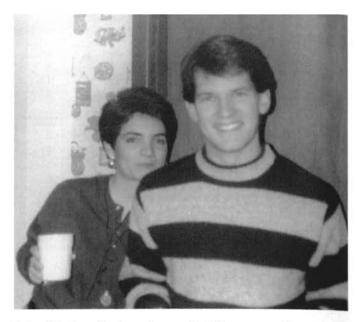

Steve Martin as relaxed as usual.

Tricia Smith and the 8AM Monday morning surgery lecture, don't mix.

Dan Gysbers shows off his anatomy.

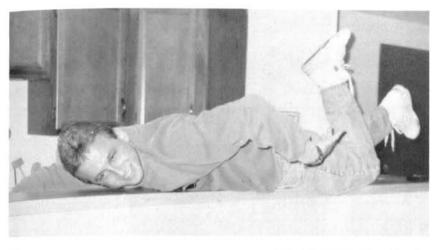

Brian Toalson displays the art of picking up any Stevens' girl.

Align your mind and soul, Grasshopper.

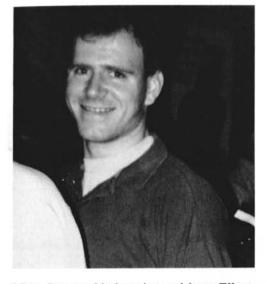

Another surgery sleeper, John Zimmerschied.

Sam Simms version of autoeroticism.

"So Rich, what's the deal with you and Rita Logan?" — David Barnes

Matt Jung at his happiest, without Ellen.

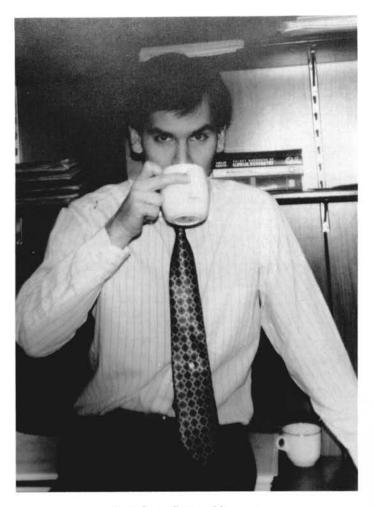

Dave Andes in, "Dreams About Kathy"

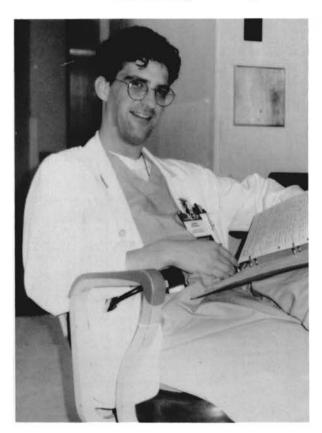

Lisa Burgett modeling a beautiful dress from Liz Claiborne's Spring Collection.

"Don't even think about it Ken, I'm married." - Karuna

Rob Sexe fingers his mug.

GQ Magazine's "Man of the Year"

Tricia Smith stares admiringly at Tim Anderson's butt and fantasizes . . . John Zimmerschied stares admiringly at Tricia and fantasizes.

Rich Feldanberg in one of his more ecstatic moods.

Stephanie Womack won't like this picture either.

Frank Divencenzo coyly sneaks a feel of Carolyn Hathaway's breasts.

Mish and Moe

As with girls, Randy Latorre straddles the fence.

The dreaded Red Surgery Sleeping Sickness strikes again.

Angie Longwell, in happier times.

"Now John, you're gonna feel some pressure \dots man, you have a nice butt \dots do you want to feel my hair?" — Frank

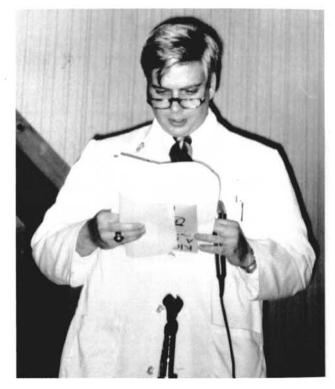

Stapp

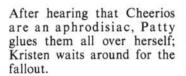

... but I, Giorgio, could do it much better. (Ted Rasoumoff)

Delving deeper into the Proud family tree. (Rob Hunter)

Match Results For the Class of 1991

Student Perspective

Well friends, we've survived four years of sleepless nights, countless lectures and nearly 1200 round trips to and from Hearnes. The University of Missouri has indeed been a great value in medical education as the Class of 1991's Match Day performance shows. Graduates, pat yourselves on the back, we deserve it! However before we leave, we want to document some positive and negative aspects from a students perspective, our view of "The Big Picture."

Most disturbing to all of us is the lack of commitment from the Legislature of Missouri to all higher education, including Medicine. Already, a large part of the budget for this school is met by revenues generated by our Attending Physicians (in addition to their complete support of the hospital). Salary freezes will make even the most dedicated faculty look elsewhere where their services are appreciated and compensated. Opportunities for tenure through the clinical tract should be encouraged, since the existence of a medical school depends upon teaching new physicians as it primary mission, with research necessary, but of secondary importance.

Parking has raised almost every students ire at some time. The shuttle system for students does not run during the odd hours most of our 'classes' meet. There is a lack of crosswalks at both Stadium Drive intersections, no sidewalks on either side of Stadium playing havoc with our dress clothes. There is little accommodation for students to commute to Green Meadows or Ellis Fischel. We would like to see, at minimum, a shuttle bus service which accommodates all students (including medical students on clinical rotations), sidewalks, safe controlled crosswalks. and readily available security escort for students leaving late at night. Also a tube system, like the VA, only bigger, to shuttle us back and forth would be really great. We realize this is a long term goal, given the cost, but as new alumni, we should work toward lofty ideals.

The issue of obtaining Hepatitis b vaccination for medical students has been a hard fought battle. It appears that the federal government will soon force medical schools to immunize students, per OSHA guidelines. But until that time we still must pay approximately \$140 or wait until we've been injured with contaminated material to receive immunization. We would like to see the school provide vaccines for all students and promote prevention while protecting students and patients where they can.

We've had a new man at the helm for the past two years and we realize he will have a difficult time securing monies given the state's past record of support. On the positive side, we have new chairmen for the departments of Medicine and Pediatrics, continued improvement of the physical plant, and great new teal green color. However, we feel out of touch with the political, and departmental affairs of this school, and out of touch with the dean. We would appreciate the dean taking the time and making the effort to stay in touch with us and keeping us informed of current issues affecting the Medical School and us.

In closing, we should mention the multitude of Attending Physicians, Basic Science Faculty, and residents who took the time and cared enough to make the Big Picture a little clearer. We could not ask for a nicer Student Affairs Office. Thank you Drs. Groshong and McCallum for listening and for caring. Godspeed, Class of 1991, as we go out into the world to paint our part of the Big Picture.

Mutation editorial staff
Mike Rush
Luke Sloan
Chuck Schrock

Toby smiles for the picture but secretly tries to decide who that smell is coming from.

Laura and Tim cling to the memories.

Lora and Amy say, "We're just two girls looking for fun." A panel of 4 out of 5 judges dispute at least one of these claims.

I'm telling you, Barb made the graduation list. Mike Carney and Jeff Huff.

Johnathon working up to his PlayGirl centerfold appearance. (See ad on page 200)

Come to me Darling. You know what they say about goalies, and their hands. (Tim Herr)

Separated at birth, Maria and Stephen

Hey! He who smellt it, dealt it!

Tim, Johnathon, Rob, and Mark sing 69 Makos on the bed.

Chris Roberts asks what comes after kissing . . . everyone struggles to suppress laughter.

Neil finds out Playboy magazines are now on the bottom shelf at the store.

Not just 2 sex changes, but the 1st-ever sex exchange. (Thom Davis and Jim Lund)

I just really hate it when they start telling me stories about Rob's Ex. (Kim, Michelle and Sandy)

Why zoning is good.

A study in Ann Havey's PMS, by Amy Slagle.

Rauba goes incognito after defaulting on his car mortgage.

Luke, Edie, Tim & Amy enjoy the Incredible Goosing Couch.

Mike tells his patient: "The better to see you with, my dear."

Once again, the old "I'll bet you're a Virgo" line fails for Keith.

Number one in Amy's list of the four basic food groups.

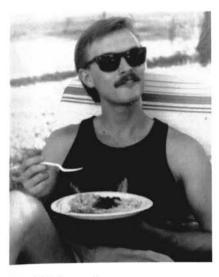

Luke gives new meaning to the phrase 'Tongue in cheek'.

Jonathon tries to convince Shelley that it says studs, not scuds.

Scott accepts Sanjay's marriage proposal.

Geoff Yule, undercover campus cop, detects hashish in the potato salad.

Tom replies, "Sure, Mako, I have protection."

Mike Rush tries to see his own bald spot.

A statement in favor of mandatory sterilization.

Rob works Kim up to her usual fever pitch of passion.

Dr. Bateman and his first delivery.

Rub-a-dub-dub, Amy and three vets in a tub.

Tune in next week when Chris adds weights to the bar.

MATCH DAY

A matched set of M-4's (Lynn and Kristen)

Steve Ellis expressing himself in sign language for the hearing impaired.

Actions speak louder than captions (Thom Davis)

I've got two women, but only one beer! (Tim, Amy, and Laura)

Sandy is Denver bound!

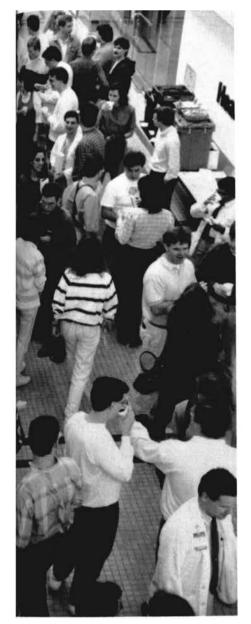

Jim hasn't been this excited since . . .

To those who are about to intern, we salute you! (Sanjay, Dave and Rob)

Missy and Chris: "If only I could match every day!"

Roger wonders what the Pathology equivalent of a GTA might be (and likes it).

Deann and Tim do their impression of a table set for two.

"Really, Lora, this is how Julie taught me all 76 steps of the physical exam." (John, Lora and Julie)

Kaoru, a SCHMOO, and Who?

MATCH DAY

Doug Dripps: "Don't think of it as a bald spot; think of it as a solar panel on a love machine."

Mike Shafe: "My blood alcohol level is on its way to becoming my own worst emergency."

Neil tries to explain to whoever will listen.

On one hand there's Brian...

Three blond streaks, two striped shirts, and a full set of teeth.

I wonder if he'll offer to clean my teeth?

Now our checks won't have to say Dr. and Mr. Reyno.

Lora Mills, a smile to melt any heart.

Landon and Chris enjoy Match . . .

... and on the other, Steve

Laurie B., "I always look this happy."

Just what does he plan to photograph, Marie wonders.

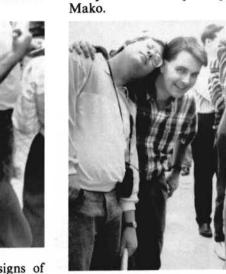

Luke, Laura and Nancy make plans to open their own Pediatric Dermatologic Rehabilitation clinic.

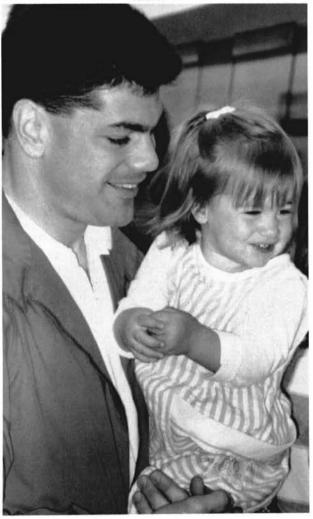

"I'd really like to clean her teeth"

Everyone wants to pick up Mako.

Thom is spent by emotion; Mark is bent by the weight.

Sajben, the next generation.

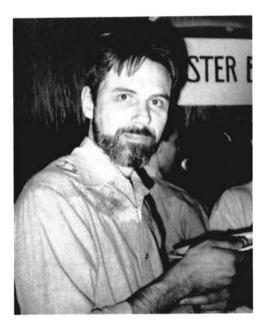

... while Tim shows signs of stress and Amy & Laura revert to the oral stage of life.

MATCH DAY

Being an M-4 is hard work, but someone's gotta do it (Keith Ryan)

This is just another day for Andy.

Indefatigable optimists. Sharon and Steve George

What is in this beer? Andy Pool and Chris Roberts

Tim and Joni - Crest Kids

"No, really, I used to be only this tall" (Karie Anderson and Connie Simmons)

Another 4 years at UMC, what was I thinking? Rick Fraser

Fentanyl and Versed - tell me later what I did tonight. Joe Meyer

Yeah, I like kids. What's it to you? Future child shrink Brad Robinson

Nystagmus? Why would that be a problem in OB? (Kody Kunda)

Another example of master resembling dog. Daryl Zinck

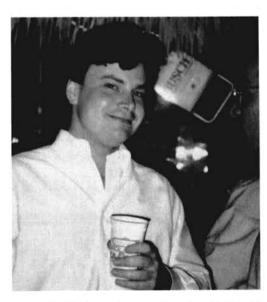

Ha-ha-ha-ha! I matched! Ha-ha-ha . . . Patrick Greenwood

The latex king. (Dave Lowe)

Hey sailor . . . (Michelle Bachtel)

Bill, pull this beer sign out of my head. (David Auer)

I don't know what's in the cup, but I matched, so I'll drink it anyway (Dave Duesenberg)

MATCH

Kim Morris says "Look out, Denver!"

Rob Hunter's and Tim Hall's country cousins have never understood why anyone would not want to attend the Ozark Med/Vet doctoring school.

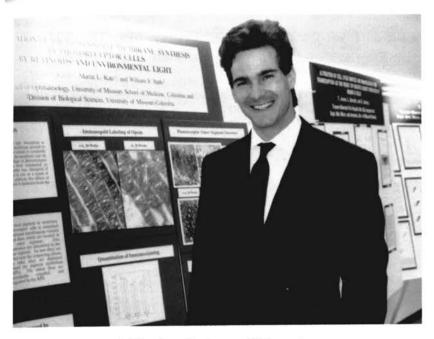

Jeff tells John: "Yep, I'm telling you this is the car Elvis died in. Got it real cheap — can't get the smell out, though."

Chuck, Larry, Jon, Thom, Nancy, Mark, and Laura express their excitement at the Match Day results.

SCHOOL OF MEDICINE

HONORS AND AWARDS CONVOCATION

The School of Medicine Honors and Awards Convocation was held Friday, May 10, 1991 to honor students and faculty for outstanding achievement. Recipients are listed below:

Alpha Omega Alpha

General Scholarship

Richard A. Knittig, M-2

Parker B. Francis Memorial Scholarship

Michael A. Grouws, M-3

Joseph E. Flynn Memorial Scholarship

Neal A. Honickman, M-4

Anatomy and Neurobiology

Outstanding Scholastic Achievement in Anatomy

Lindall A. Perry, M-1

Ancsthesiology

Parker B. Francis Award for Excellence in Anesthesiology

Jennifer A. Dye Herfkens, M-4

Russell D. Shelden Award for Excellence in Anesthesiology

Mark R. Briesacher, M-3

Biochemistry

Medical Biochemistry 206 Award

Lindall A. Perry, M-1

Medical Biochemistry 208 Award

James E. Kurz, Jr., M-2, Michael G. Maurizi, M-2

Child Health

Robert L. Jackson Award for Outstanding Performance in Pediatrics

Laura A. Rosenberger, M-4

Family and Community Medicine

Family Practice Award

Sharon M. George, M-4, Mary S. Michener, M-4

Thomas Browne Award

Kyle Steven John, M-2

Social and Behavioral Science Outstanding Achievement Award

Lisa K. Jacobs, M-3, Mary Deborah Even, M-3

Medicine

Department of Medicine Award for Outstanding Achievement

Robert F. Fraser, II, M-4, Geoffrey J. Yule, M-4

Division of Dermatology Outstanding Student Award

Lora J. Plattner, M-4

Molecular Microbiology and Immunology

Microbiology Award

Andrew R. Harrison, M-2

Obstetrics and Gynecology

Outstanding Student in OB/GYN

Robert F. Fraser, II, M-4

Ophthalmology

John Aure Buesseler Award for Excellence in Ophthalmology

Michael Joseph Kutryb, M-4

Pharmacology

Pharmacology Honors Award

Steven A. Carder, M-3

Physiology

Physiology Award

Andrew R. Harrison, M-2

Psychiatry

Outstanding Student Achievement in Psychiatry

Jeffrey Benson Huff, M-4, Mark Albert Napier, M-4

Surgery

Department of Surgery Award

Andrew W. Brown, M-4

Michael E. DeBakey Scholar in Cardiothoracic Surgery

Stephen P. Haggerty, M-2

Interdisciplinary Award

Outstanding Scholastic Achievement in Neuroscience I

Carol L. Morcos, M-2

Lange Medical Publications Student Award

Mary S. Michener, M-4, Donald G. Morris, M-2

McGraw-Hill Award

Barbara Redel Howard, M-1, Christopher J. Tocco, M-1

Upjohn Achievement Award

Karen L. Weismantle, M-4

American Medical Association - Medical Student Section

Membership Recruitment Award

Maria Evans, M-4

American Medical Women's Association

Janet J. Glasgow Memorial Achievement Citation

Nancy L. Clore, M-4, Sharon M. George, M-4, Mary S. Michener, M-4, Karen L. Weismantle, M-4

Missouri State Medical Association

Honors Graduation Award for Outstanding Achievement in the Study of Medicine

Michael L. Dawdy, M-4, Patrick K. Ellison, M-4, Sharon M. George, M-4

Boone County Medical Society Auxiliary

Outstanding Performance and Academic Excellence

James E. Kurz, M-2, James A. Lund, M-4

Sandoz Award

Joseph T. Basler, M-2

Missouri Chapter - American College of Emergency Medicine

Excellence in Emergency Medicine

Patrick J. Greenwood, M-4

Society for Academic Emergency Medicine

SAEM Excellence in Emergency Medicine

Micheal D. Rush, M-4

Student National Medical Association

1991 Graduation Recognition Award

Jorge Reyno, M-4

Certificate of Recognition

Richard A. Holmes, M.D.

Student Affairs Council

Faculty Service Award

Mitchell Rosenholtz, M.D.

American Medical Student Association

Golden Apple Award

James Sowash, M.D., Donald York, Ph.D., Ann Havey, M.D.

Samuel P.W. Black Prize for Excellence in Neurosurgery

Scott R. Gibbs, M-4

Scott A. Willis Memorial Scholarship

ALPHA OMEGA ALPHA

Back Row - Rick Fraser, Jim Lund, Geoff Yule, Alan Rauba, Sharon George, Steve George, Steve Carder. Middle Row - Brian Toalson, Jennifer Herfkins, Lora Plattner, Nancy Clore, Patrick Ellison, Lisa Jacobs, Joe Meyer. Front Row - Peggy Murphy, Neal Honickman, Karen Weismantle, Mary Michner, Bridget McCandless

MSAC

Back Row - Bart Sak, Kevin Jones, John Richart, Carl Peters, Kathy Oriel, Dean Norton, Michael Grouws, Amy Davis, Becca Zinck, John Delzell. Front Row - Denise Jackson, Sharon Curtis, Moustafa Kabeer, Mike Wackowski, Annette Wardell, Jane Yang, Jen Tuteur, Luke Sloan, Edie Sigmund.

GRADUATION EVENTS

Piggin' out.

A couple of real swingers.

Dan, Dave, Mrs. Dave and Edie

Hey look, Toby and his daughter have the same haircut.

The eye dentist and his far sighted friend.

Earth Father
- Daryl Zinck

183

Steve identifies his body morphology type.

Geoff Yule, Hot Dogger.

\$10,000 clearinghouse winners - Pat and Lori

"Want some candy little girl?" - Mike and Dawn

Doctor Mom

The double D Mako

An experiment with hypothermia.

Rick and his date from Mid-Mo.

"Becky, I've been meaning to tell you where we matched, really." Tom McCormack

It looks like Diamond Dave is between a rock and a hard place.

That's cheese, Tim, not cheesey.

2.5 Michners.

To Rob's surprise, Huff and Houk debate his Axis II.

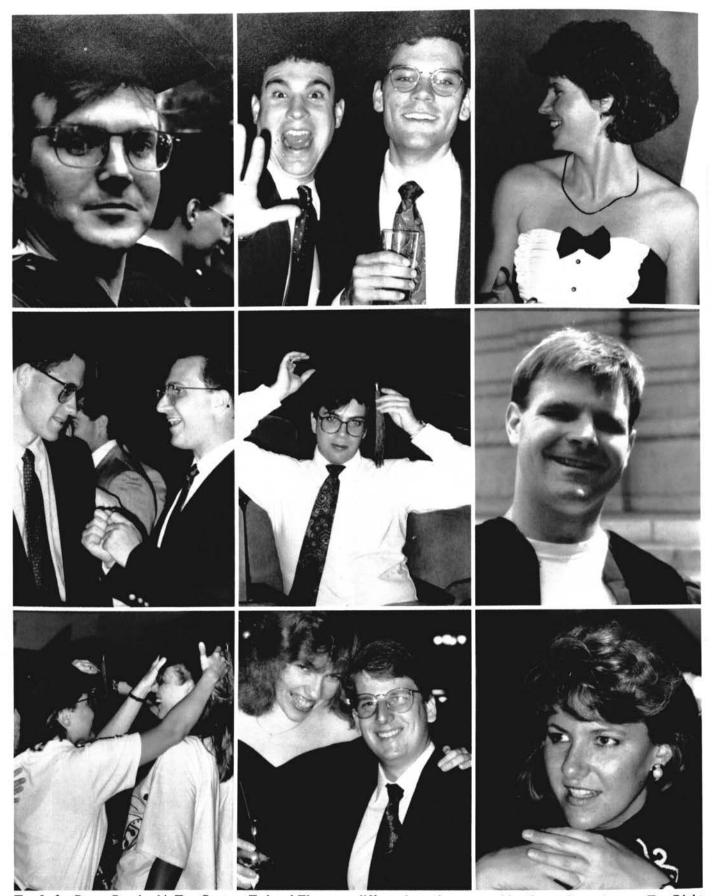

Loy says, "Cremaster's intact."

Patrick Ellison - professional prostate palpater.

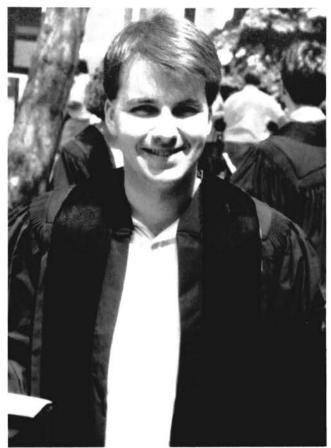

"Lynn, Rob is a married man." Kim Tackitt.

Top Left - Roger Rembecki, Top Center - Ted and Tim react differently to the approaching Laura Rosenberger. Top Right - A little drop of Super Glue is all it takes to keep this puppy up. Middle Left - . . . and it has a built in CD player, power windows. . . Center - When I grow up I want to be just like Hugh Stevenson. Middle Right - Andy Poole Bottom Left - Karie Anderson and Laurie Barozinsky. Bottom Center - Premarital Bliss. Bottom Right - "3 days till graduation, I guess I'll start working on the E. R. paper." - Lora Plattner.

Mark Pfitzner

Ric Wolkowitz, Ray Woodmansee, Mike Rush, Dave Auer, Troy Potter, Patrick Greenwood

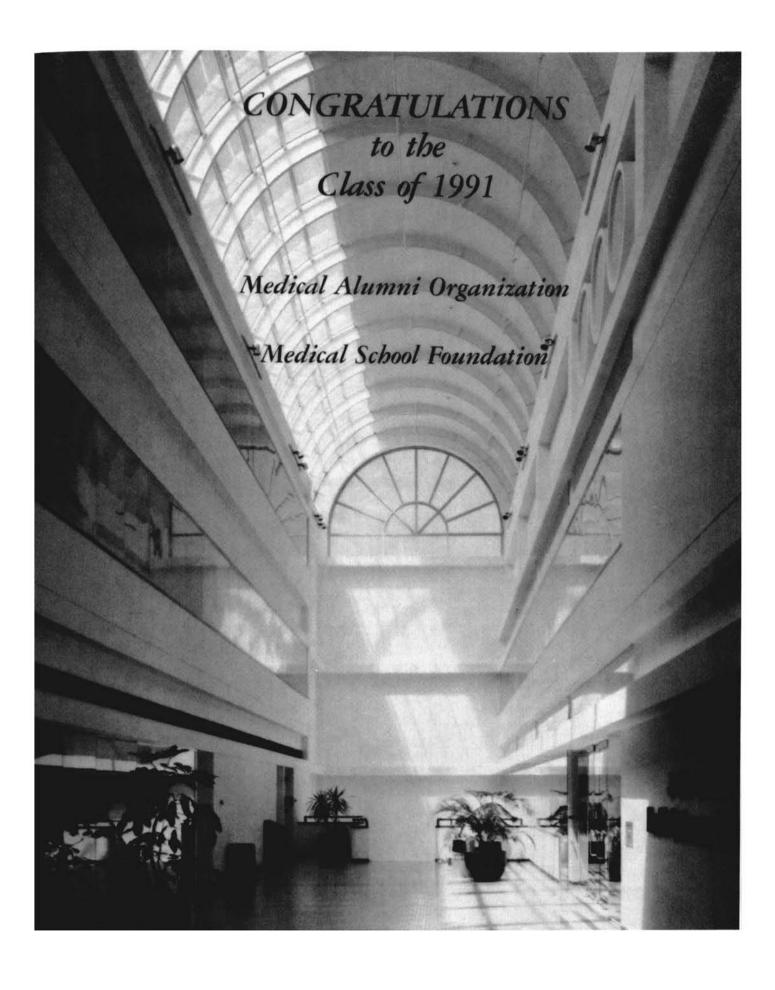

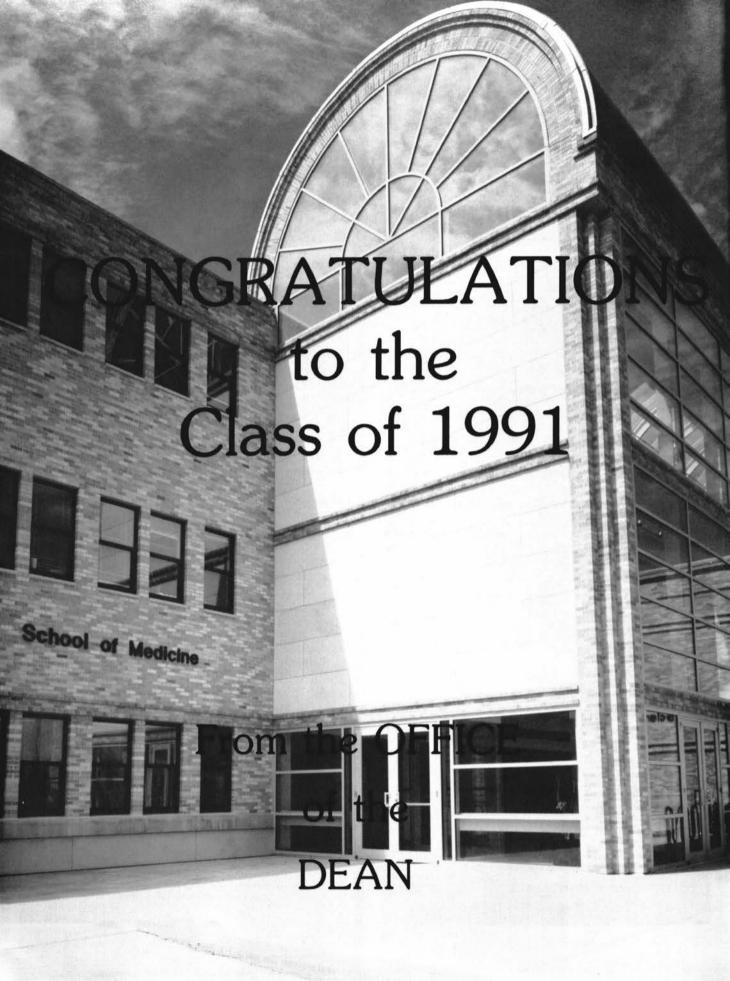

Congratulations to the Graduating Class UMC School of Medicine

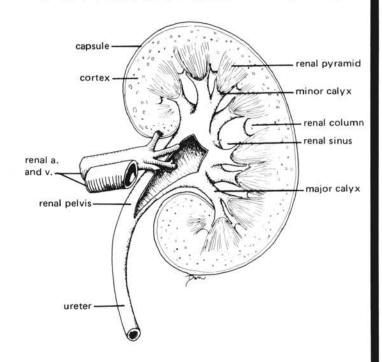

Serving the area medical community since 1902.

GOOD LUCK to the Class of 1991 from the Dept. of Child Health

You Should Be This Proud.

Medical school demands your best, and you have every reason to feel proud. The Staff for Life shares your pride and extends best wishes for success as you pursue your medical career.

CONGRATULATIONS FRUM TRE DRUCEROR OF OTOLARYBEDLORY

Congratulations to the Class of 1991 from Pulmonary, Critical Care and Environmental Medicine

It's Time You Stopped Learning...

... Long Enough To Consider All You Have Mastered

As a physician in an age of changing technology and scientific breakthroughs, you never can know it all. But now is a time to pause, see how far you have come, and be proud. Congratulations on your success from University Physicians.

FACTS ABOUT VAGINAL TAMPONS

Clinical studies indicate cotton vaqinal tampons like Meds meet the catamenial requirements of the normal menstruating woman.

This careful research shows that when vaginal tampons are used:

- rmal tissue remains healthy with their use.3, 3, 4, 7, 4
- 1. Roomal tissue remains healthy with their use, handle 2. They do not cause cramps.
 2. They do not back up flow into the peritional cavity, h. h. h. f. Proper sizes do not alter normal anatomic virginity.
 3. They help avoid contamination from the anus.
 4.
 5. They have a affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.

 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic flors or pH.
 6. They do not affect the bacteriologic

IN A RECENT NATIONAL SURVEY made by the Johnson & Johnson Research Foundation among 884 gynecologists and obstetricians, 5 out of 6 doctors reported tampons acceptable for normal women.

MEDS were designed by a gynecologist to give new freedom and comfort in sanitary protection. On the basis of authoritative clinical evidence you may safely recommend MEDS2, the modern sanitary protection, to all normal women for greater comfort and peace of mind during menstruation. Your patients and friends won't know they're wearing one. Meds mean no chafing or odor... no pads, pins or belts.

Editor's Note

It is a good feeling to have reached this point in producing the thirty-first edition of the Mutation. Many individuals have contributed time and money to complete this book. I want to thank those who helped. Notable is the staff of the Dean's office: Roberta Settergen, Ted Groshong, Charmian Boyle, Denise Boessen, Denise Payne, Sheri Boland, Traci Stacy and Lynn Gluntz.

It took over a hundred rolls of film, 5000 sheets of photographic paper and gallons of white-out correction fluid to create this collection. We tried to catch all mistakes but I'm sure many slipped by, oh well, given the nature of this beastly job, I am very happy with this collection and hope you enjoy it.

Luke Sloan Editor
