

Fig. 4.—Chart illustrating a typical sequence of various blossoms on normal and treated nitrogen-low plants. **A.** Control (normal). **B.** First seven flowers removed. **C.** Half-mature pods removed (at arrow). **D.** Pistils removed continuously. Figures indicate average number of flowers per plant.

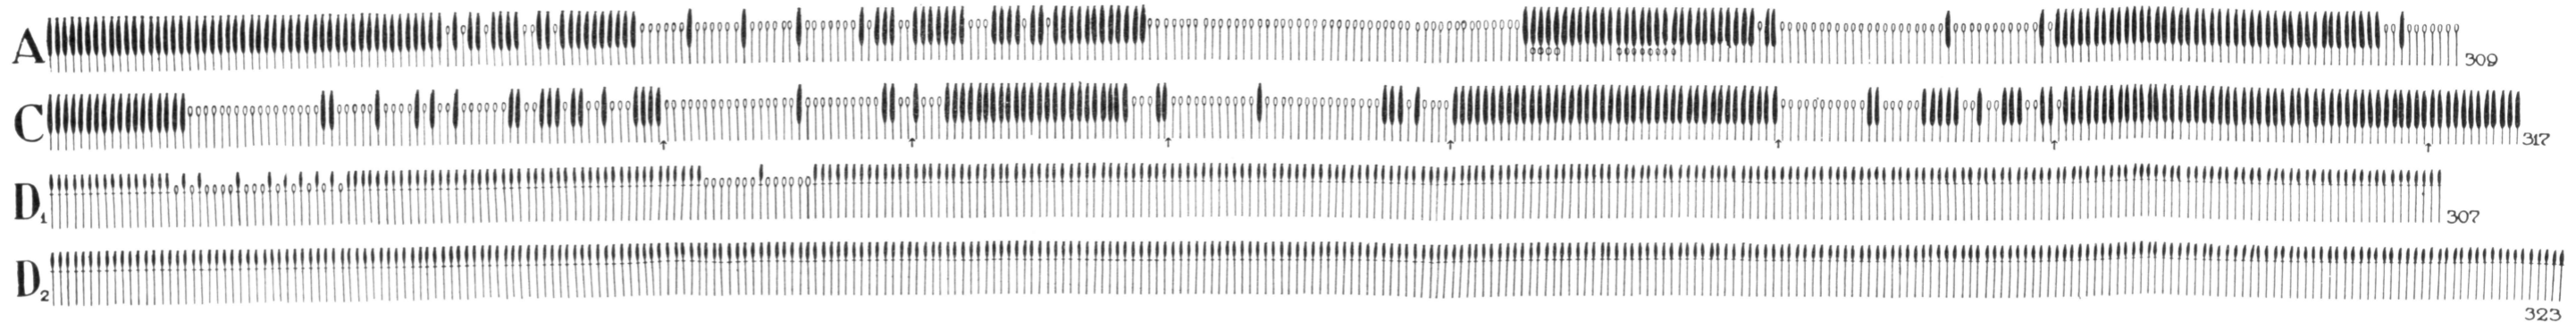

Fig. 5.—Chart illustrating a typical sequence of various blossoms on normal and treated nitrogen-high plants. **A.** Control (normal). **C.** Half-mature pods removed (at arrows). **D₁** Pistils removed continuously—response somewhat slow. **D₂** Pistils removed continuously—response immediate. For legend to symbols see Fig. 4.

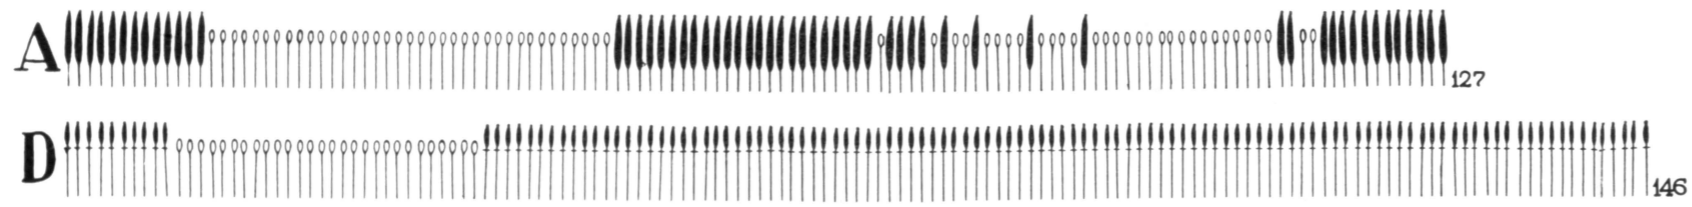

Fig. 6.—Chart illustrating a typical sequence of various blossoms on control and treated branches of two-stemmed plants. **A.** Control branch. **D.** Depistillated branch. For legend to symbols see Fig. 4.
