Welcome Home,
Woody

BY BILL CALLAHAN

Spring practice behind him, Woody Widener gears up for his first opening game as head coach. Here's the story of some great opening games at Faurot Field.

Collegiate Town USA

Couple recite tie that binds at Columns

Students interrupted their Frisbee game on Francis Quadrangle April 19 to applaud newlyweds Larry and Maryann Zoberis Schroeder, who were married at the Columns.

The couple chose the wedding site because of their devotion to Mizzou.

"The Columns stand for the institution. They've been here forever. This is the kind of foundation we want to build our marriage on," said

the bridegroom, a member of Mizzou Athletic Scholarship Associates and the Jefferson Club. A native of Branson, Mo., he works for a Chicago insurance company. The bride is a travel agent in the Windy City.

A horse-drawn carriage transported the wedding party to Campus. The couple's colors were yellow and gray.

The newlyweds left Campus in a black-and-gold Chevy van, license plate MIZURA, en route to their honeymoon in St. Maarten. They returned from their wedding trip in time for the Black and Gold Game May 4.

Firm foundation: Larry and Maryann Zoberis cement vows.

'Mo-sitters' move in

One day, the HARRS were living in married student housing; the next, in Providence Point, the President's home.

"It was such a surprise to us. We're glad it happened," says Doug Harr, 22, who with his wife, Debby, 21, take care of "Mo," the 10-year-old daughter of President C. Peter and Diane Magrath.

Mo, short for Monette, prefers the term "Mo-sit" to baby-sit.

"She's a bright, well-be-

haved little girl," says Doug, a graduate student in counseling psychology.

Doug also provides household security, and Debby, a graduate student in mechanical engineering, enjoys greeting dinner guests and giving visitors tours of Providence Point.

In exchange for their services, the HARRS live in an apartment within the house rent free.

"We're getting a lot of good experience," Doug says. "If we have children, when they're 10, we'll know more what's going on."

Snack bar gets facelift

This fall, the Brady Commons Snack Bar will sport new furnishings, a new name and new entrees.

The Brady Grill, decorated in dark hunter green and soft pastels with natural oak trim, will have booths and tables to seat 488, a 100-person increase. Alongside the grill will be a new deli and pizza parlor that will have extended hours to cater to late-night snackers.

Twirler crowned Miss Mizzou

Heather Dawne Smith's winter and spring were busy, a fact that forecasts a busy summer.

The Marching Mizzou feature twirler, 18, a freshman from Maryland Heights, Mo., received a \$500 scholarship for winning the Miss Mizzou Pageant Feb. 17. In July, she'll compete for the Miss Missouri title in Mexico, Mo.

In the scholarship pageant, the 5-foot-1, 96-pounder wore a self-designed white satin gown trimmed with ostrich feathers. For the talent competition, Smith performed a slapstick Charlie Chaplin routine.

Also in July, in pursuit of the Grand National Championship, she'll take on the American League winner as a result of winning the National League Twirling Championship April 3 in Las Vegas.

Shown here in a jacket her father customized with Mizzou lettering is Heather Dawne Smith, winner of the Miss Mizzou scholarship pageant.

Moon shines no more

The Harvest Moon restaurant closed unexpectedly in March after more than a decade at the foliage-filled location of 27 S. 10th St.

Owner Robert Randolph, who bought the Harvest Moon in 1983, told a *Columbia Missourian* reporter he was tired of the restaurant business. "I'm going fishing," he said.

Days later, a former manager was accused of embezzling more than \$14,000 from the restaurant.

Advertising stings ID manufacturers

Advertising was the downfall for Fabricators Inc.

The student business manufactured phony drivers licenses for \$10 a pop. Besides word-of-mouth, advertising consisted of propping a sign in a residence hall window.

In a small-scale testing operation, University Police used an undercover agent to produce a trail of evidence, says Chief Ron Mason.

Three students have been charged with forgery. A trial date is pending. If found guilty of the felony, all three face the possibility of yearlong jail sentences, Mason says. Another 20 students were apprehended for possession of altered licenses, a misdemeanor.

Shattered gears up for business

Crunched car parts decorate a new Columbia nightspot, appropriately named Shattered.

Mounted from ceiling and walls with 200-pound test wire are American auto parts, including the hood of a Cadillac Eldorado. As the business at Ninth and Cherry streets revs up, co-owner Johnny Lea Hodges anticipates updating the decor with exotic and foreign auto parts.

He and his brother, Rance, both of Southern California, hope the business doesn't stall, as a number of other bars have done in the same location.

New sorority rushes in

A chapter of Alpha Omicron Pi is colonizing on Campus.

The sorority, founded at Barnard College in New York in 1867, joins 19 sororities and 34 fraternities at Mizzou.

"The women will be living together in a residence hall next year," says Margy Harris, Greek Life coordinator. "Of course, ultimately, they hope to have a house of their own."

Experiencing the best of both worlds is the sorority's president, Dana Moreland, who also is president of the Residence Halls Association.

In other Greek news, women who want to go through fall formal rush should contact Karen Pils, 216 Read Hall, by Aug. 5. To participate in informal fraternity rush parties this summer, men should contact Jim Molsson at the above address.

Dan Marmer/Columbia Missourian

While at a Delta Sigma Phi fraternity formal, from left, UMC freshmen Annette Bade, Delus Johnson and Shane Cook saved a student's life.

Freshmen trio to the rescue

By instinct, three UMC freshmen administered cardiopulmonary resuscitation to a Rockhurst College student who had fallen into a water-fall during a fraternity formal at Crown Center in Kansas City.

Annette Bade of Springfield, Mo., administered mouth-to-mouth resuscitation to unconscious Dan Morris, while Shane Cook of High Ridge, Mo., pumped his

chest. Delus Johnson of St. Joseph, Mo., rolled Morris over and pumped the water out of his stomach.

A doctor in the crowd, impressed with the students' abilities, encouraged them to continue CPR. The victim regained consciousness when given oxygen by the hotel security staff.

Both the victim and Johnson have a happy ending to this story. "My mom loaned me money for the formal and after she heard that, she told me I didn't have to pay her back."

Students fight famine

Pi Kappa Alpha fraternity and the Horticulture Club were the first organizations to raise money this spring in a campuswide project to relieve hunger in Africa, the United States and Columbia.

For famine victims in Africa, the fraternity collected \$500 from downtown motorists and pedestrians. A Horticulture Club plant sale netted another \$50. To raise funds for the Missouri Food Bank, Stafford-Cramer resi-

dence hall group planned a volleyball marathon.

In addition, Mizzou was one of the first schools to join Students Against Famine in Ethiopia, a network of 20 colleges collecting money to aid hunger victims. "We have a guarantee through the Red Cross and USAID that 100 percent of the dollars raised will reach the famine area," says Doug Rudman, a sophomore political science major from Chesterfield, Mo., who initiated the Campus project.

"We fully realize we won't solve world hunger, but we can be part of the solution," he says. "It's an investment in mankind."

Zany student presses luck on TV show

Though Brian Hamilton struck out with three whammies during practice for "Press Your Luck," a CBS game show, "I was totally lucky not to get a whammy during the show," says the May business administration graduate from Buckner, Mo.

He raked in \$11,257 in prizes, including \$6,400 in cash, trips for two to London and Palm Springs, Fla., cookware, watches and \$25 worth of rice. The show was aired April 5.

During the Hollywood taping over spring break, Hamilton wore a University of Missouri-Columbia hat and sweatshirt. "The Alumni Association gave me a Tiger centerpiece to prop up in front of me, and when they broke for every commercial, they'd zoom in on that Tiger."

When asked about the Tiger's significance, the normally zany Hamilton waxed nostalgic, explaining that "it reflects the fierceness, pride and loyalty one has to one's school."

Around The Columns

Columnist speaks at commencement

Nationally syndicated columnist Carl Rowan delivered the 143rd annual May commencement address to the Class of '85, which had some 3,000 members.

A panelist on "Meet the Press" and "Agronsky & Company," Rowan also broadcasts "The Rowan Report" and is a roving editor for *Reader's Digest*. He is the author of five books and has won four Emmys and the George Foster Peabody Award.

Honorary degrees were presented to Rowan; U.S. Sen. Thomas F. Eagleton; Robert D. Partridge, BS Agr '38; and Bert Kruger Smith, BJ '36.

Eagleton, a former Missouri lieutenant governor, was elected U.S. senator in 1968 and plans to retire from politics upon completion of his third term in 1986.

Partridge of Alexandria, Va., served as president and general manager of the National Rural Electric Cooperative Association from 1968 until he retired in 1984. He is a past recipient of a UMC Faculty-Alumni Award.

Smith, a Texas resident, is a special consultant at the Hogg Foundation for Mental Health. She was host of the nationally broadcast radio program, "The Human Condition," for 10 years.

Student fees rise

A 7 percent student-fee increase for 1985-86 is expected to generate an additional \$4.4 million for instructional programs. The Board of Curators approved the increase, recommended by President C. Peter Magrath, at the March meeting.

The increase is lower than the 7.5 percent figure proposed to the board in July 1984. Faced with student opposition, curators delayed a decision at that time pending further study.

Sen. Nancy Kassebaum, R-Kan., is joined by her sister-in-law, Linda Jensen, BS Agr '56, left, and Dick Jensen, BS BA '56, of Shawnee Mission, Kan., after the May 3 Jefferson Club dinner. Even though the Jensens live in Kansas, they have strong Missouri ties. The last of their three children graduated from Mizzou this spring, and the Jensens are active Alumni Association members in the Kansas City area.

Jayhawker addresses Jefferson Club **Americans love/hate government**

HISTORY BUFF Sen. Nancy Landon Kassebaum, R-Kan., waxed philosophic about the Jefferson Club's namesake at the 14th annual dinner.

"Washington is a city we all love to hate," said the senator, first elected in 1978. "We want it to solve all our problems, but we don't want it to get the power needed to solve those problems."

Thomas Jefferson was apprehe-

sive about the powers of government, too, especially when he stretched the Constitution to make the Louisiana Purchase in 1803, she said.

"But he also saw the need for practical and effective government for the public good, and that's exactly what he did."

The Jefferson Club is Mizzou's highest-level gift club, composed of contributors of \$10,000 or more.

Basic instructional fees for full-time resident undergraduates will be \$689.50 a semester. Non-residents will pay \$1,379. Semester fees for graduate and professional students will be \$884 for residents and \$1,512 for non-residents.

In addition, the board approved

supplemental fee increases of about 17.5 percent for UMC medicine and veterinary medicine students. These fees will increase 77 percent for Mizzou law students, reducing the difference between UMC and UMKC supplemental charges by about one-half.

For 14 hours or more, UMC's supple-

mental fees per semester will be \$1,708 for medicine, \$847 for veterinary medicine and \$322 for law.

"Although I never find it easy to recommend fee increases, these are, in my best judgment, essential if we are to address inflation in higher education costs and continue our efforts both to maintain and improve the quality of the education we strive to provide our students," Magrath said.

Governor appoints three curators

Turner

Lichtenegger

Frazer

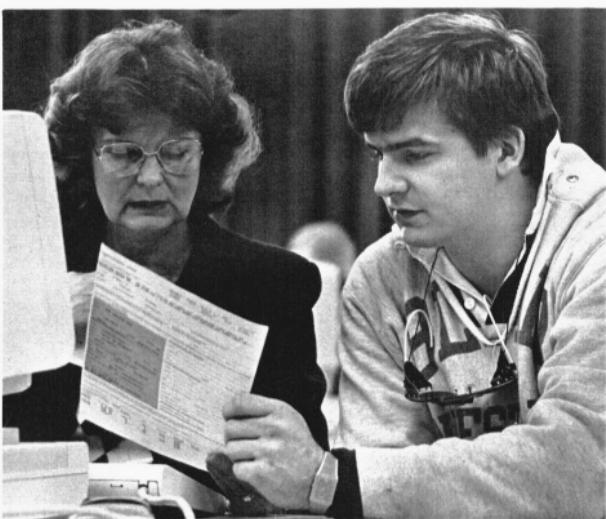

Gov. John Ashcroft has appointed three new members to the Board of Curators. They are Edwin S. Turner of Chillicothe, Mo., John P. Lichtenegger of Jackson, Mo., and Eva L. Frazer of St. Louis.

Turner, BS '62, a real estate and insurance broker, will replace David Lewis. Turner, 44, is a Democrat.

Lichtenegger, BS '69, JD '72, is an attorney and farmer. The 37-year-old Republican will replace Charles Kruse, whom Ashcroft chose to head the Missouri Department of Agriculture.

Frazer, 27, is a graduate of the UMKC School of Medicine. The physician at St. Mary's Health Care Center in Clayton, Mo., replaces Marian Oldham, one of three curators whose term was to expire in January 1985. Frazer is a Democrat.

In early May Ashcroft had not yet named a replacement for curator William G. Cocos Jr. of St. Louis.

Scott Takushi/Columbia Missourian

Computers ease preregistration

With help from computer terminal operator Mary Wood, freshman Edward Dawson of Washington, N.Y., completes computer preregistration for fall semester. Sixteen computer operators preregistered 15,566 students for summer and fall semesters in Brady Commons April 1 to 19. For students who kept their appointments, the six-minute or less procedure offered immediate feedback on course selection. "It's better and easier for the students," says Gary Freie, director of registration, records and student information systems.

Art goes on the auction block

The art department's first Art Auction May 3 was a rousing success.

"We're really tickled because we originally hoped to generate about \$200 to \$300," says art Professor Don Bartlett. But when all bidding was said and done, the department found it had raked in \$2,300 to help finance the Fine Arts Gallery and create art scholarships. About 45 art faculty and graduate students made contributions to the auction.

"Artists are constantly being asked to contribute to other people's auctions," Bartlett says, "but we have needs of our own, and that's why we decided to have the auction."

"When kids write to us about our program and inquire about scholarships, and we have to tell them we don't

have any—well, they lose interest pretty fast."

Curators approve artificial turf for Faurot Field

A \$1,146,350 contract with Sportec International Inc. of Kenmore, N.Y., for the installation of Omni-Turf on Faurot Field was approved by the Board of Curators at its May meeting in Rolla.

The competing bid was by Sport Install Inc. of St. Charles, Mo., for Monsanto's AstroTurf at a contract price of \$1,511,211.

The new artificial turf is to be ready for Missouri's opening football game Sept. 14. Mizzou was the only school in the Big Eight to have natural grass in its stadium.

Omni-Turf has a unique one-inch

sand base that is said to provide a softer playing surface, thus reducing injuries. However, curator Tom K. Smith of St. Louis, a former Monsanto officer, predicted that the Tigers would be "playing in a sand pile" in a few years. The University of Oregon has the only American installation of Omni-Turf. Smith and fellow curator John P. Lichtenegger voted against the Omni-Turf proposal.

Total cost of the project is set at \$1,276,000. Of that amount the athletic department will provide 25 percent (\$319,000), and the remaining \$957,000 will be borrowed. The loan will be paid back within 10 years through a combination of gifts and a 50-cent ticket surcharge.

The 50-cent surcharge already is in place, being used to pay off the loan used to construct the south stands. The \$75,000 remaining on that loan is being paid to allow next season's surcharge to be used entirely for the turf.

Gafke assumes permanent post

Roger Gafke, acting vice chancellor for Development, University and Alumni Relations, will continue in that position permanently, Chancellor Barbara S. Uehling announced in February.

Gafke began the interim assignment in June 1984. Previously, he was a fellow in administration sponsored by the American Council on Education, and a faculty member and associate dean in journalism.

Faculty honored

Fifteen winners of faculty awards were honored during the April Faculty Recognition Ceremony.

Dr. Richard A. Finkelstein, professor and chairman of the microbiology department, received the \$3,000 Chancellor's Award for Outstanding Faculty Research and Creative Activity in the Biological Sciences.

Recipient of the \$3,000 Chancellor's Award for Outstanding Research and Creative Activity in the Creative and Performing Arts and the Humanities was Dr. Edward J. Mullen, professor of Romance languages.

Drs. Thomas B. Alexander, profes-

sor of history, and Sudarshan K. Loyalka, professor of nuclear engineering, each received a \$2,000 Byler Distinguished Professor Award.

Dr. John Miles Foley, professor of English, was named the Byler Distinguished Chair in the Humanities, which provides a \$5,000 award for each of three years.

The 1985 Alumnae Anniversary Faculty Award, a \$1,000 bonus, was presented to Dr. Catherine Neal Parke, associate professor of English.

Drs. John M. Kuhlman, professor of economics, and Robert T. Marshall, professor of food science and nutrition, each received a \$1,500 Amoco Foundation Undergraduate Teaching Award.

Dr. Diana G. Helsel, assistant professor of agronomy, was recipient of the \$500 Elizabeth F. Cooper Faculty of Excellence Award.

Dr. Karl Nolph, professor of medicine and director of the Division of

Nephrology, received the Loren E. Broadus Distinguished Professorship, a \$7,500 annual stipend.

Dr. Samuel A. Werner, professor of physics, received the Marvin and Rose Ann Millsap Distinguished Professorship in the College of Arts and Science, which provides a \$7,500 annual stipend.

Dr. Nigel J. Kalton, professor of mathematics, received the Mahala and Rose Houchins Distinguished Professorship, a \$7,500 annual stipend.

Dr. Arvarh E. Strickland, professor of history, was recipient of a \$1,000 Thomas Jefferson Award (see Page 16).

The \$10,000 Weldon Spring Presidential Award for Research and Creativity was presented to Dr. Margaret Sayers Peden, Middlebush Professor of Romance Languages.

Dr. William "Mack" Jones, professor of English, received the \$2,000 Maxine Christopher Shutz Award for Distinguished Teaching.

Mizzou scholars nab elite awards

Mizzou students, alumnae and faculty received prestigious academic honors this spring.

Sophomores Sarah Baker of Camdenton, Mo., and Kenneth Brashier of Aurora, S.D., are among 105 recipients nationwide of 1985 Harry S. Truman Scholarships. They each will receive a \$5,000 annual scholarship, renewable for up to four years. Baker, an economics and foreign-language major, plans to study law. Brashier, a German and journalism major, hopes to work in international relations.

Mizzou is one of 11 schools to have two Truman scholars named this year. Seven UMC students have been selected Truman Scholars in the past five years. The Harry S. Truman Foundation administers the program, authorized by Congress as a memorial to the 33rd U.S. president.

The roster of 1985 Mellon Fellows includes Debra Roy of Shelbina, Mo., a senior majoring in English literature; Jayne Blankenship, AB '67, of Denver; and Nancy Locke, AB '84, of St. Louis. They are among 119 American and Canadian college seniors and graduate students chosen from among 1,425 candidates. Mizzou led the Big Eight in this year's Mellon honors, and was the only school in Missouri with Mellon fellows.

The Woodrow Wilson National Fellowship Foundation awards the renewable Mellon fellowships, which cover tuition and fees for the first year of graduate school, plus an \$8,000 cash stipend.

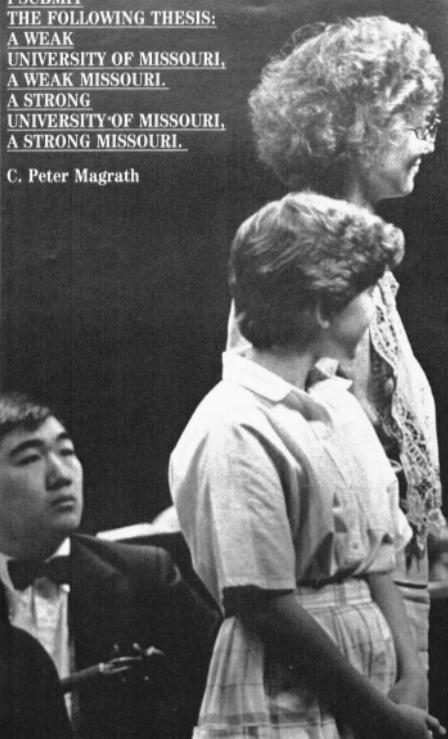

Dr. Michael Ugarte, assistant professor of Romance languages, has been named a 1985 Guggenheim Fellow. The award will support for one year his research on post-Civil War Spanish literature in exile. He is one of 270 fellows chosen from among 3,548 applicants from the United States and Canada.

Above, Jay Felton, student representative to the curators, welcomes Magrath. UMC staff member Cynthia Morris Pepmiller, MBA '82, provides deaf interpretation.

**MAGRATH RECEIVES THE PRESIDENTIAL
MEDALLION FROM CURATOR PRESIDENT DOUG RUSSELL
AS MAGRATH'S WIFE, DIANE, AND
THEIR DAUGHTER, MO, LOOK ON.**

Below, Chancellor Barbara S. Uehling chats with Edwin S. Turner, BS '62, a new curator from Chillicothe, Mo. Current and past curators attended the inauguration.

THE INAUGURATION OF C. PETER MAGRATH

PRESIDENT C. PETER MAGRATH invited Missourians to join in building a brighter tomorrow at his April 25 inauguration. "People are our society's greatest natural resource, and with education, are a perpetually renewable resource."

Magrath, who took office as the University's 17th president Jan. 1, stressed four-campus unity in his address to 1,100 guests in Jesse Auditorium. Keynote speaker was Robert L. Clodius, president of the National Association of State Universities and Land-Grant Colleges. A white tent equipped with ceiling fans was the site of a garden-party reception on Francis Quadrangle.

Music by a jazz combo was muffled by the anti-apartheid chants of some 200 students protesting the University's \$86 million in investments in U.S. firms that do business in South Africa. UMSL students organized the demonstration, similar to others at campuses nationwide. Some protesters later took a seat in the tent to dine on the gourmet delicacies prepared for inauguration guests. — *Carol Again*

Above, Magrath greets Alumni Association Treasurer Eleanor Frasier, BS Ed '61, M Ed '65, at the outdoor inaugural reception hosted by the Board of Curators.

Left, students demanding divestiture of the University's investments in firms operating in South Africa flank the Magraths as they enter the reception.

Photos by Larry Boehm

FOR DECADES some of the nation's best humor has come out of college campuses, and Mizzou students have always done their share for the cause. Now, as the *maneater* celebrates its 30th anniversary, a quintet of cartoonists has invaded the newspaper.

John Schuler, John Pruitt, Bob Berry, Barb Fajen and Todd Schowalter are the newest contributors to Mizzou's "cartooning" legacy, of which many talented people are a part.

Like their predecessors, the new cartoonists always find something to laugh at or laugh about, and, like their predecessors, they've stirred their share of controversy.

"I'm never trying to hurt anybody, but I think people are insecure if they can't laugh at themselves," says Schowalter, the creator of "Campus."

Schowalter was called a bigot after he did a strip about foreign T.A.s and inhumane after doing a strip about bag ladies. "It's ironic," says the 21-year-old, "because every Saturday you'll see me around Campus with my Hefty bag collecting cans so I can buy my dinner on Sunday. I guess you could say I'm a bag guy."

A theater major, he someday hopes to support himself through acting and through the funny pages.

One example of a Mizzou loony tooner who made it in "the real world" is John Beshears, BS Ed '74, who has been cartooning and illustrating for newspapers ever since his strip "Moonshadow" appeared in the

CAMPUS BY TODD SCHOWALTER

BY JIM KELTY

TODD SCHOWALTER

Todd Schowalter, 21, began his drawing career at age 2 when he took a tube of red lipstick to his mother's white couch. His only reward was a red bottom. "But soon I moved on to bigger and better things—like the walls," says the theater major.

maneater in 1973-74. Beshears is now a staff artist for the *Long Beach Press-Telegram*.

Another alumnus who made good is Bill Wilson, BFA '79, now a full-time illustrator for *The Sporting News*. Wilson created the *maneater's* "M.U. Omar," which ran from 1977-79, and like Beshears, he values his college-level experience. "With the *maneater*, you worked two nights a week, sometimes all night long. That's where I really learned to draw under pressure, and in the publishing industry that's a big plus."

Chuck Sperry, who drew *maneater* editorial cartoons from 1980-84, also recalls those Read Hall all-nighters. "You'd have rock 'n' roll blaring, people shouting and chasing each other around,"

says Sperry, now a free-lance illustrator for the *Columbia Daily Tribune*. "It was complete zaniness, and there I would be drawing in the middle of all this stuff flying around. But that's where I really learned to draw because it taught me how to concentrate. I could draw in the middle of a hurricane now."

Though he never had the opportunity to work for the *maneater*, Mort Walker, AB '48, is far and away Mizzou's biggest success story. The creator of "Beetle Bailey" is the only cartoonist in the world with six comics in daily syndication.

12 and during his high-school years in Kansas City he financed all his dates by selling cartoons, mostly to trade journals. At Mizzou, he continued his cartooning career as editor of the Campus humor magazine, *Showme*.

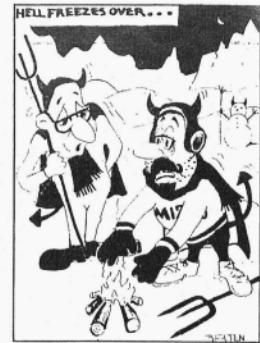

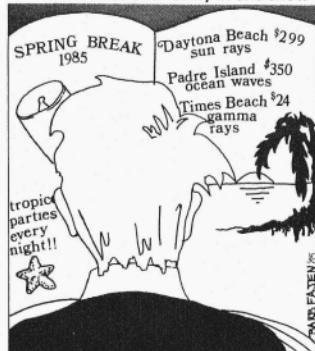

His first big break came in 1950 when King Features Syndicate accepted "Beetle Bailey" for syndication. Beetle started out as a college campus cutup rather than a soldier. The strip's early characters were patterned after Walker's Kappa Sigma fraternity brothers. When

True to its name, "Reuben's Wild Kingdom" is filled with animals. "Animals lend themselves to different personalities and different types of people," says 21-year-old John Pruitt, a housing and interior design student. "Without drawing an ugly person or a beautiful person you can draw a funny animal and still get the same point across."

Barb Fajen is an art major who hopes to someday land a job as an illustrator for children's books. The 23-year-old enjoys the challenge of single-frame cartoons rather than strip material. "It's tough to make something both clear and funny in one shot."

Craig Pasmussen photo, courtesy of the manager

"I wonder if they cancelled school at UMC today."

MAKING THE GRADE BY BOB BERRY

BOB BERRY

In "Making the Grade," the mood and artwork are "Trudeaulish," says 21-year-old English major Bob Berry. "But the strip is much less politicized than 'Doonesbury.' I'm just trying to make people laugh . . . I don't want the Young Republicans burning down my house."

the Korean War heated up in the early 1950s, Walker decided to induct Beetle into the Army.

Being banned from one newspaper probably helped the strip's circulation more than anything else. *Stars and Stripes*, the military newspaper, disapproved of Beetle's laziness and lack of discipline and decided to remove the cartoon. The ensuing publicity skyrocketed Beetle's popularity.

Three decades later the strip now appears in more than 1,650 newspapers in 51 countries and is read by an estimated 200 million people. Only Peanuts and Blondie are more widespread.

"I've always felt that a good education and strong literary background

are important tools for a cartoonist," says Walker, now living in Stamford, Conn. He adds that strips based on social commentary or autobiographical material are the ones that have found recent success in world of syndication.

"Knowing how to draw seems to be secondary these days because in a lot of the cartoons being syndicated the drawing looks very amateurish. Perhaps if it looks too good it doesn't look autobiographical enough."

Whether UMC's new generation will ever crack the elite world of syndi-

cation is hard to say. For now, they're having fun spoofing the world around them, just as the *maneater's* first cartoonist, Earl C.A. Thompson, Arts '56, did 30 years ago. Thompson also is a former editor of the now-defunct *Showme*.

"I feel," Thompson once said, "that we have the material on this campus to put out the best humor magazine in the nation." □

Cartooning is an addiction for art major John Schuler, 21, who even sells shirts featuring "Collegetown" characters. "To preserve your sanity you have to take what you do seriously without taking yourself seriously," he says. "Cartoons help keep me in the right frame of mind."

JOHN SCHULER

**WORKING WIVES NEED SOMEONE TO TAKE CARE OF
THE HOMEFRONT WHILE THEY TAKE CARE OF BUSINESS. WITHOUT A "WIFE,"
WOMEN FACE BURNOUT, UNDERACHIEVEMENT AND STRESS
FROM DOING**

DOUBLE DUTY

By KAREN WORLEY

Current society structures and mores prevent women from living up to their potential, says Dr. Ann Rosenow, a researcher of family-career role conflict. "Since humans are society's most valuable resource," she says, "we're potentially robbing society of contributions from half of its members."

NEVER MIND the posh paychecks and career satisfaction. All is not well with today's two-career couples.

As wives experience conflict from the multiple roles as worker, spouse and mother, marriages may be strained. Without the maps previous generations followed, couples are winging it through a transition period neither really understands.

The primary responsibility for home management and child care continues to fall on women's shoulders, says Dr. Ann Rosenow, associate dean and director of graduate studies in the School of Nursing. At best, society meets wives' career success with ambivalence; at worst, subtle sabotage or outright hostility.

"Because of that, career women need even more support than men, and the support systems just aren't there," says Rosenow, who has been studying family-career conflict since her dissertation research at the University of Chicago in 1981. "Not only does she not have a wife, she also is expected to be one."

The researcher, teacher, administrator and registered nurse has written a chapter, "Without a Wife," for a book, *Socialization, Sexism and Stereotyping*; gives seminars on the subject; and has been interviewed by journalists from all over the world.

Fifty percent of married women without children, 48 percent of married women with children under 6, and 61 percent of married women with children ages 6 to 17 are in the labor force. Yet, they have little potential for receiving practical help with child care and home management; receiving emotional support in terms of advice, sympathy and encouragement for their professional roles; and receiving direct contributions—researching a work project, preparing a resume or attending important social functions—to their career advancement, she says.

While attitudes and behavior of women have changed, traditional family attitudes and social structures haven't. The "ideal" professional career, in our society, is a two-person situation—a man with a supportive wife who manages home and child care, and nurtures his career commitments.

Some career choices—medicine, religion and public service—make it

doubly difficult for spouses to have a career of their own.

An example is University President C. Peter Magrath and his wife, Diane Skomars Magrath. When they married in 1978, she left her career in student activities to coordinate the heavy social responsibilities of her husband's position. The twist in Magrath's situation is that he pays her \$30,000 of his \$100,000 salary.

"Maybe this is the new wave, the new direction we need to go in," Rosenow says. It raises some questions, such as: Should someone without a spouse be paid less? Should corporations budget in \$30,000 for a spouse's salary? Do we expect husbands to fill the spouse role?

In the meantime, "Can a woman have a successful career without a wife?" she asks. Probably not. Some women might reduce interference by choosing not to marry or have children. However, "women should not have to make those choices any more than men have had to make those choices." Rosenow's research with nurses indicate women who do both encounter fatigue, burnout, underachievement, needless stress and, ultimately, health problems.

Since career women are never going to have wives, Rosenow recommends substitutes for practical, emotional and direct-aid support.

CREATIVE COMBINATIONS of family and employed help are sources of practical support. Although not an option for most, 15 percent of the successful nurses Rosenow studied had house-husbands. If affordable, hired help is a blessing, "but there are still a million small details left to do in the management of the home," Rosenow says. Of course, families can lower their standards, but it's the woman who will be evaluated negatively when guests drop by unexpectedly.

In her research, Rosenow interviewed women who said they had supportive husbands, when, in fact, their husbands merely allowed or tolerated their careers. One told Rosenow, "My husband is happy that I work, but I can't work late because I have to be home to get dinner."

If this sounds familiar, Rosenow advises communicating to the family in a non-threatening, cooperative manner.

"Present the problem, not the solution. Seek the family's input. Come up with a solution everybody can live with."

As one working mother says, "Practical support makes the house run, but emotional support helps me run." Rosenow found that professional colleagues are women's major source of emotional support. Professional and social organizations, women's groups and networks also scored high. Books, magazines and television programs can help, too.

To further their careers, working women, just like men, need direct aid, such as help writing speeches or doing research. Often colleagues who provide direct aid are emotionally supportive as well, she says.

THE WORKING WORLD was set up for men, not women, and employers need to tune into that, Rosenow says. If women do have primary responsibility for home and family, they need flexibility when children get sick. If day-care centers were close by, mothers could take an hour off work to breast-feed their babies, or fathers could have lunch with their children. The result would be happier, more productive employees.

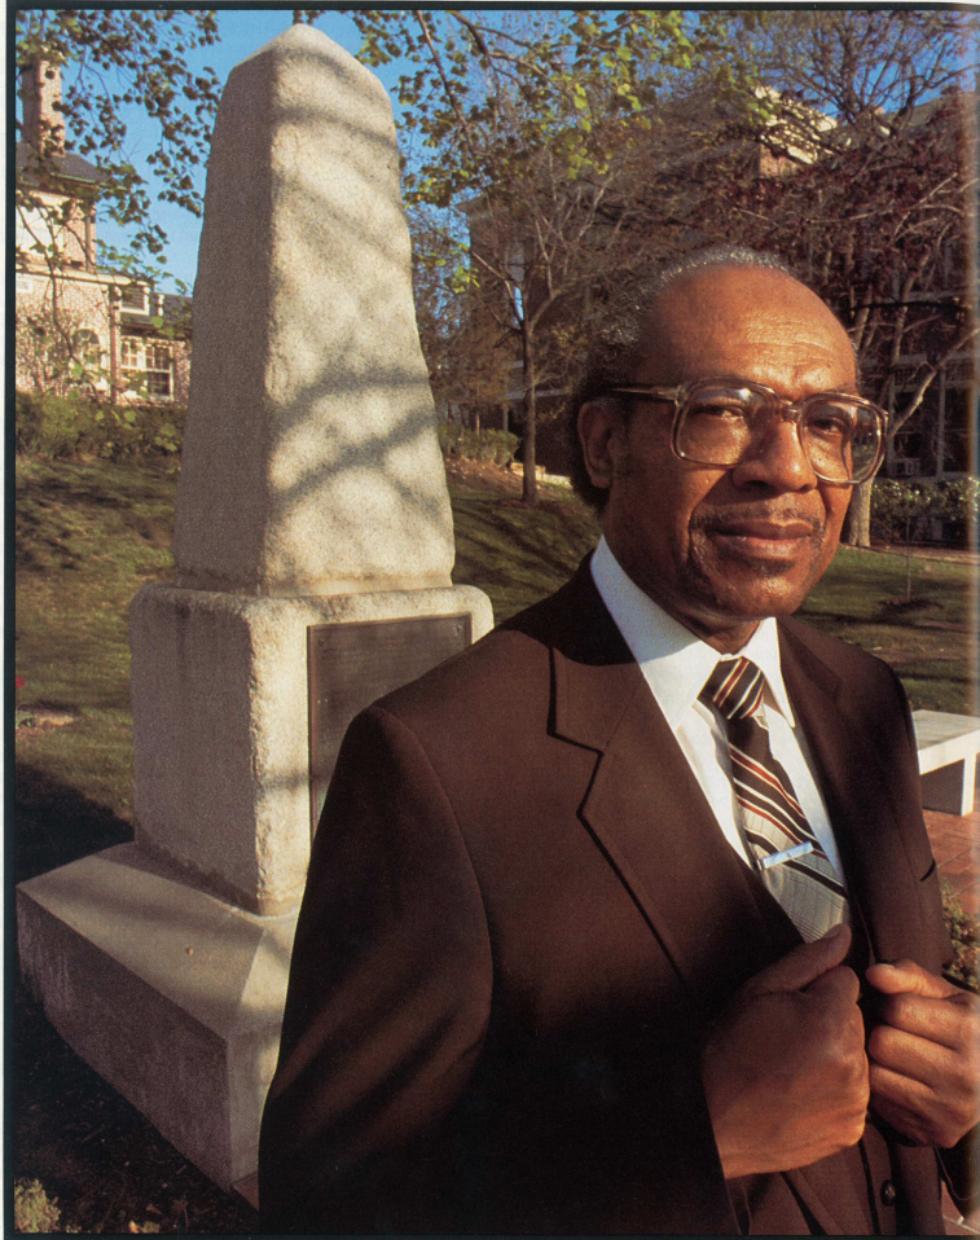

The current work world supports the fast track, however. From research, Rosenow found the most successful women had uninterrupted career patterns: They went straight from college into their careers, maybe taking a year off for graduate studies or six weeks for maternity leaves. Part-time work had the least correlation with success.

"Part-time work needs to be looked at as a career, not a diversion," Rosenow says.

As work structures and policies change to accommodate new attitudes, patterns for family life and careers will emerge so that both women and men get the support they need.

DUAL-CAREER COUPLES can work out beautifully, but it takes awareness, negotiation and work." Couples of today are the pioneers in changing philosophy that home and family life are shared responsibilities.

"That's the difference between tolerance and active support. It runs much deeper than deciding who does the dishes."

ARVARH STRICKLAND BRINGS JEFFERSONIAN PRINCIPLES TO THE CLASSROOM

BY CAROL AGAIN

"Enlighten the people generally, and tyranny and oppression of the body and mind will vanish like evil spirits at the dawn of day."

THOMAS JEFFERSON

MORE THAN 150 YEARS after Thomas Jefferson crusaded for public education, Arvarh E. Strickland began his high-school studies in the heart of Dixie. "I could not praise the city fathers and citizens of Hattiesburg, Miss., for providing a first-class school," he says of the building set aside for black students during the 1940s. "They did not intend that."

Nonetheless, Strickland says he had every advantage. "We had dedicated and committed teachers who took us and, you might say, demanded that we succeed according to their formula for success: to do the best we could with what we had. They were always after us to do better."

Today, nearly 40 years later, it's obvious he learned these lessons well. This spring, Strickland, a professor of history, received a \$1,000 Thomas Jefferson Award, given annually to University faculty members who best exemplify Jeffersonian principles and ideals "through personal influence and performance of duty in teaching, writing and scholarship, character and influence, devotion and loyalty to the University."

Dr. Patricia A. McIlrath, curator's professor of theater at UMKC, also received a 1985 Jefferson award.

Jefferson's original headstone, which he designed, stands on Francis Quadrangle. The marker was given to Missouri because it is the first state university in the Louisiana Purchase, which Jefferson negotiated during his presidency. The epitaph Jefferson wrote neglects his two presidential terms, but includes his founding of the first state university in Virginia.

"I think there is some relation to what I would consider to be Jeffersonian principles and my career," Strickland says. "In teaching, I like to bring students to see the great people in history, not as plaster saints, but as human beings who were able to rise above the common run."

"I relate to Jefferson in that category. Even though he was a slave holder, he also saw the dangers in that, and it worried him. He was looking for ways to get from the society that was, to the society that ought to be. When I have played a part in moving any portion of society, I can relate to anyone who thinks in that way as an American."

Strickland arrived on Campus in 1969 to become, unwittingly, UMC's first black faculty member. "I had never thought of the fact that there weren't any other black faculty here. It had not dawned on me that I would be in any way pioneering." The first black students had arrived more than a decade earlier, most to pursue graduate or professional degrees.

In the role thrust upon him, Strickland became a catalyst for all students, says Dr. N. Gerald Barrier, professor and chairman of the history department. "He professionally has been a role model for minority students, and spends much of his time interacting with them, giving them help and encouragement."

"He's challenged non-minority students intellectually, and besides raising the normal issues, has forced them to look at their values and to look at aspects of the black experience as an American experience they may not have encountered," Barrier says. "I've spoken to several non-minority students who said he opened up new vistas."

Strickland began teaching UMC's first Afro-American history course at the high point of the civil rights movement. Ninety percent of his students were white, a reflection of low black enrollment. "Some were quite disappointed when the course was reduced down just to plain, old, dull history. It was the only way to keep it from becoming Rap I and Rap II."

Still, he says, "It was an exciting time. Students had questions and very strong opinions." In the Jeffersonian

"In teaching, I like students to see people in history as human beings, not plaster saints."

tradition, Strickland was, and remains, tolerant. "As a teacher, I have to be able not only to respect but to deal with and work with people of many shades of belief and opinion, people who think diametrically opposed to what I think. I

try to get students to examine critically the way they think, not get them to think the same way I think."

However, he does not tolerate an idle mind. "It's much more comfortable not to think. Students will resist with

**"I have to be
able to respect
and work with
people of many
shades of
belief and opinion."**

all their being. So I try to work at it. Any person who counts himself an educated person must be able to think critically."

In addition to undergraduate and graduate classes in Afro-American history, Strickland usually teaches an American history survey course to incoming freshmen. "It's interesting to see students when they first get to Campus, before they become so sophisticated and collegiate," says Strickland, who was the first history department chairman elected by colleagues, serving from 1980 to 1983. "I like helping them in the first few months on Campus."

As an undergraduate at Tougaloo College in Mississippi in the late 1940s and early 1950s, Strickland remembers, "I was expected to succeed from the day I walked on campus. Everything there seemed programmed on the assumption that I would succeed." Strickland graduated summa cum laude with a bachelor's degree in history and English and went on to complete master's and doctoral degrees at the University of Illinois.

"I often get the idea, particularly with minority students, that at UMC sometimes we give them the feeling that we expect them to fail. Many who could succeed don't because, as human nature, we live up to the expectation people have of us, especially those in authority.

"Many of us have been trying to change that kind of image and feeling. I think in many ways in some areas we have been successful. In a large place it takes longer. Then there's the history (of segregation), too."

Memories of that era boiled two years ago when arts and science faculty considered a proposal to increase the standardized-test score required for admission to Mizzou. Supporters quoted statistics relating test scores to academic success; opponents showed that the proposed score would have excluded 40.3 percent of black freshmen admitted in fall of 1981.

Faculty squelched the proposal after hearing an impassioned speech by Strickland: "We can do more with our pseudo-intellectual data here at the University than a hundred Klan members wearing bedsheets and throwing stones, because the only hope for striving forward is to come here and get an education."

In retrospect, he says, "I don't think an activist needs to be out yelling. I would rather have had a group of intelligent academicians see this as discriminatory, rather than one of us having to get up and rant and rave and call them racist to make them wake up. I would prefer rational methods."

For minorities, Strickland says, standardized tests are no more than barriers. "You cannot take one of these tests and accurately gauge the potential of the minority population. It does not predict for certain groups of whites, either."

Potential financial barriers also cause concern. "We all understand the necessity for continuing increases in student fees, but I would hope that the Legislature would come through in ways that this trend will not have to continue.

**"I feel a great
accomplishment
in seeing
students' eyes
light up with
new understanding."**

If we are becoming more attractive to minority students, we must find some ways to help them support their education financially. It won't help if we become a place where they feel welcome, and then put up financial barriers so they can't attend."

Also important is hiring black professors, says Strickland, who in 1972 served as special assistant to the chancellor to help recruit minority faculty. "This University has a lot to offer. Many of the things that make this University attractive to white faculty make it attractive to black faculty, too."

The national reputation of UMC's history department lured Strickland from Chicago State College 15 years ago. Another attraction was the Columbia community. "I felt it would be an ideal place for rearing children." One of his sons, Bruce, will be a senior at Mizzou next fall. Duane, a graduate of Syracuse University, is a captain in the U.S. Army.

The prospect of teaching at a major public university also affected Strickland's decision in 1969. "I determined that I needed to either go to a predominantly black institution and work with black students, or go to a PhD-granting institution and work with all students and have the opportunity to train some black PhDs in history who would, I hoped, teach in predominantly black schools."

Strickland's first PhD student, who was white, chose a teaching career at a predominantly black college in Georgia. His other three PhD students were black; two teach at predominantly black schools, one at a predominantly white university. "They have assisted very much in the recruiting process through their loyalty to UMC."

Working with doctoral candidates has been the greatest satisfaction of his career, says Strickland, author of three books and winner of numerous honors, including a 1983 Faculty-Alumni Award. "It's my way of paying some dues, and helping the University to pay some dues. We can't sit around and talk about needing black faculty if we're not producing any."

Other accomplishments, he says, are more diffuse. "I could say that I am proud of being involved in creating the Black Studies program, but as a teacher, I feel a greater accomplishment in seeing students' eyes light up with understanding something they didn't before, or coming up with some kind of formula they didn't think they were capable of. I feel good every time a student says to me, 'I got something from having this class with you that has made me a better person.'"

WELCOME HOME, WOODY

By Bill Callahan, Mizzou Sports Information Director

Football Saturday. Home opener. Faurot Field. Excitement. Color. Fun. Anticipation. Is this the year? Welcome home, Woody!

When Coach Woody Widenhofer leads his 1985 Tigers onto Faurot Field Sept. 14 against Northwestern, it will mark the stadium's 60th home opener. But this one is special: A new coach who also is a Mizzou graduate, a new all-weather turf and what seems to be a new enthusiasm for Tiger football.

Athletic officials hope the enthusiasm translates into fans—something Mizzou's games have been somewhat short of lately—and that Woody will be welcomed by a crowd that rivals the record 62,168 for home openers.

The game will have difficulty rivaling the first home contest of 1948: the Tigers' 20-14 win over Southern Methodist. That one was an upset of national reverberations, a stunner over the Mustangs and Doak

Walker, that, through the years, has had an incomparable aura of distinction for season-opening games, or any game for that matter, played in Missouri's sunken stadium.

SMU CHARGED into the stadium with a No. 4 national ranking Oct. 9, 1948. The scenario on that perfect Indian summer afternoon pitted Madison "Matty" Bell's Mustangs, winners of 16 straight games, against Don Faurot's best postwar Split T team. The Texans had beaten Pittsburgh, 33-14, and Texas Tech, 41-6, while Missouri lost to Ohio State, 21-7 at Columbus and then walloped St. Louis U., 60-7, in St. Louis.

Fittingly, a record Memorial Stadium crowd of 30,892 watched the unforgettable classic. For the Mustangs, Walker's all-around skills were coupled with sharpshooter Gil Johnson's deadly passing (13-for-19). Ol' Mizzou countered with the option wizardry of quarterback Bus Entsminger—and a textbook Split T running game that totaled 356 ground yards.

Mizzou came back from a 7-0 halftime disadvantage to score three times, getting the clincher after a timely fumble recovery by fullback-linebacker Win Carter. Halfback Loyd Brinkman danced 50 yards down the sidelines to set up the game-winning score. Entsminger also broke on a 58-yard carry in the second half.

When the heart-stopper was over, a visiting SMU band remained in the stands for almost an hour to entertain appreciative spectators. Tiger fans buzzed about the All-America heroics of Walker, whose contribution in a losing effort was both SMU touchdowns, two conversions, two interceptions and several touchdown-saving tackles.

Coach Faurot was acclaimed Coach of the Week nationally by United Press International. Southern Methodist never lost another game all season, repeated as Southwest Conference champion and returned to the Cotton Bowl, defeating Oregon, 21-13.

It was a game to remember, a handsome victory to savor, a forever conversation piece among those who saw the game or heard the broadcast.

Since being named head coach last December, Woody Widenerhofer has crisscrossed the state, recruiting, mending fences and generally enthralled alumni. During spring practice, Widenerhofer got to do what he likes best: teach. As the photos demonstrate, the Tigers are getting lots of personal attention.

SEPTEMBER'S Mizzou-Northwestern game won't rival the first contest ever played in Memorial Stadium, either. The new artificial turf will see to that.

Two weeks of incessant rain precluded the historic christening of the new stadium Oct. 2, 1926, and a contest involving Missouri and Tulane. The wettest summer in many years delayed sodding the playing field. Tanbark and sawdust were used as substitutes. A crowd of 10,000, clad in multicolored slickers, was the second largest turnout ever to see a football game in Columbia.

The Tigers, coached by Gwin Henry, turned back a fourth-quarter Tulane drive to earn a 0-0 stand-off, aptly labeled a "mudpie tie" by sportswriter Bob Broeg in his *Of' Mizzou* football chronology. Curiously, just 15 years later, that muddy scene was re-enacted in a Tiger home opener against Colorado. The occasion was another historical milestone—a "first" that was undoubtedly of little significance to the scant 5,000 fans who braved an unrelenting rain. Only one-third of that turnout was around at the finish.

So it was that the unveiling of Faurot's brand new Split T formation for the home folks did poorly at the box office. On that dismal afternoon—Oct. 4, 1941—Mizzou came away a 21-6 victor. Despite the horrendous field conditions, described by *The Kansas City Star* as "a bog that . . . turned the silver-clad Buffaloes and the gold-clad Tigers into unrecognizable men from

Mars," the Missourians' new offensive wrinkle baffled the Buffs. A Mizzou backfield of Harry Ice, Erv Pitts, Bob Steuber and Don Reece led the 346-yard rushing romp.

Long plays abounded. Steuber had a 65-yard scoring sprint, and Maurice "Red" Wade duplicated that feat on a 64-yard breakaway. Ice returned a punt 73 yards for the third score. Those '41 Tigers, equipped with a better football formation that would be around for a long time, finished as college football's best rushing team that season with a 307-yard average per game, en route to a Big Six championship and a Sugar Bowl date with Fordham.

FAUROT'S BEST-EVER team at Missouri? Probably so, even conceding that those Tigers had an element of surprise going for them. How about the 1969 football gang coached by Dan Devine? Were they the most talented of his 13 productions at Mizzou? Again, probably so.

But that group narrowly avoided a booby trap in their opener against Air Force Academy in Columbia.

With 32 seconds left, the spunky Falcons grabbed a 17-16 lead on a 68-yard air strike. That should have been a mortal thrust, but Mizzou quarterback Terry McMillan unloaded a first-down bomb following the kickoff that was taken in stride by wide receiver John Henley for a 66-yard pickup.

MEL GRAY, the Tigers' fleet deep threat, was double-covered on the play, and McMillan chose Henley as his secondary target. Two running plays and clock-stopping timeouts moved the football to point-blank field-goal range. Henry Brown then kicked his fourth three-pointer of the day, a 24-yarder, to salvage a 29-17 thriller and supply the impetus for a 9-1 co-championship and Orange Bowl season.

Three years later, Al Onofrio's Tigers duplicated that frenetic fieldgoal finish on Faurot Field. Greg Hill's placekick with six seconds left defeated Oregon, 24-22, in a yo-yo game, nullifying Dan Fouts' brilliant passing. John Cherry, who would be the quarterback hero of the Notre Dame upset five weeks later, brought Missouri back into contention with two TD passes and a clutch

pass completion to Jack Bastable to set up Hill's 31-yard kick.

Warren Powers' teams enjoyed more success in opening games than any of his immediate predecessors—Onofrio, Devine or Faurot. Two of his team's most notable, inaugural wins were the 3-0 upset of Notre Dame at South Bend in 1978, and the 28-18 ambush of Illinois on Faurot Field in 1983.

SIGNIFICANTLY, favored Illinois—similar to SMU's stunt after the '48 upset here—blazed through the rest of its schedule without a defeat, won the Big Ten title and the Rose Bowl bid.

Nevertheless, on Sept. 10, 1983, Marlon Adler choreographed a 344-yard offensive outburst against an Illinois team that returned nine defensive starters, and Mizzou's young defense also distinguished itself.

Adler passed for two touchdowns, and when Illinois made it close after lagging 21-7 at halftime, he weaved 21 yards on an option run for the clinching score.

Powers' 6-1 scoreboard for all opening games (5-2 for home openers) included a 45-15 defeat of San Diego State in 1979—a contest witnessed by the aforementioned top crowd of 62,168 for an opening home game.

Onofrio's teams were 4-3 for all openers, and 4-3 at home. Devine-coached clubs were 7-6 for all openers, and 9-4 in Columbia. Faurot's teams, so often pitted against powerhouses Ohio State and Maryland, were 7-12 for all openers—and 11-8 for openers at home.

That's the box-score for the past 50 years, excluding Chauncey Simpson's three wartime years as head coach and Frank Broyles' one term as Missouri's football leader. Trivia buffs note: Only one tie game was recorded during that span—Broyles' 1957 Tigers played to a 7-all deadlock with Vanderbilt in a night game at Nashville. There haven't been any opening-day ties at home since that first one 60 years ago. Don't expect Coach Woody to start any new trends along that line. □

Schools and Colleges

AGRICULTURE

Programs offer alternatives for rural areas

UMC has added both short-and long-term initiatives to assist Missouri's farmers and rural businesses during the current crisis in the American farm economy.

"Alternatives for the '80s" strives to provide new choices for rural communities for the remainder of the decade. These choices include developing home-based businesses or services, such as crafts and day-care for the young or the elderly. Horticultural or new crop enterprises—such as blueberry harvesting—also could be possibilities to meet the demand for high-quality fruits and vegetables.

"We're trying to provide new income sources for people having stress out in the country," says extension education Professor Dick Lee. The new program draws on experts from the colleges of Agriculture, Home Economics, and Public and Community Services, and University Extension Division and Lincoln University.

The colleges of Agriculture, Business and Public Administration, Public and Community Services, and Home Economics also are teaming up on "Rural Missouri 1995—Challenges and Issues." James Boillot, BS Agr '58, MS '59, former director of the Missouri Department of Agriculture, is leading the long-term, action research project.

Boillot's project, involving 60 leaders from government, the University and private industry, will appraise existing conditions, suggest achievable expectations and recommend solutions to problem areas.

Starting in late May, he will take those ideas to 20 rural communities for public debate.

"The University needs to take a proactive role," says Ken Schneeberger, assistant dean for agricultural research. "There are some towns that are going to make it and some that aren't." For Missouri's agriculture in the 21st

Actress moves up to Hollywood

BRIGHT LIGHTS AND GLAM-OUR are forecast for former University actress Amy Hunt.

Since last winter when she performed in the University production of *Daughters*, Hunt has moved to Santa Monica, Calif., employed an agent, auditioned for two television sit-coms, a mini-series, a soap opera, a made-for-television movie and eight films. She also has struck up a steady friendship with actor Gary Coleman.

All this began, Hunt says, in January when she attended a party following a performance of *Daughters* at the regional competition of the American College Theatre Festival. At the party she was approached by Hollywood agent Victor Perillo, who asked her to read for him and possibly fly to Los Angeles for an audition.

"I thought, 'Yeah, right, sure I will,'" Hunt says, but after doing the reading she was surprised to find an airplane ticket waiting for her at home.

In California, Perillo initiated Hunt to the routine of Hollywood auditioning and introduced her to Coleman, one of his clients, who now calls on Hunt frequently.

"I found a job waitressing, and right now I'm just trying to pay the bills and I'm waiting for my SAG (screen actors guild) card," says 21-year-old Hunt. The Fulton, Mo., native might get her first break in the television sit-com "Charles in

Actress Amy Hunt embraces Leslie Brott in *Daughters*, a three-act play about mother-daughter relationships. A Hollywood agent discovered Hunt during the American College Theatre Festival.

Charge." She has discussed a role with the show's writers. "They want to give the main character a new girlfriend and

they seem interested in me." The additional character is scheduled to be introduced next season.—*Jim Kelly*

century. "We need to figure out our strengths and build on them."

Awards bestowed during Ag Week

Alumni and leaders in agriculture were honored during Ag Science Week in February.

Recipients of Citation of Merit awards are Don Faurot, BS

Ag '25, MA '27, of Columbia, Missouri's head football coach from 1935-1956; Clyde Duncan, BS Ag '52, MA '57, of Jonesboro, Ark., retired UMC faculty member and author; John Harvey, BS Ag '57, of Wilmington, Del., product information supervisor for DuPont Agricultural Chemicals.

Carl Feaster, MA '47, PhD

'50, of Tempe, Ariz., research leader of the USDA Agricultural Research Service Cotton Breeding and Production Research Unit; and Grant Shrum, BS Ag '48, of Rockville, Md., president and chief executive officer of the National 4-H Council.

Three contributors to agriculture were presented honorary

membership in the college's alumni group. They are William McNamee, BJ '49, of Clarksdale, Miss., former editor and publisher of *Delta Farm Press*; Ronald R. Poor, president and chief executive officer of the City Bank and Trust Co. in Moberly, Mo.; and crop farmer Jack Tipton of Carutherville, Mo.

ARTS & SCIENCE

Tapes offer refresher course in humanities

If you're having trouble remembering the difference between Elizabethan and Romantic literature, or think you might like to learn a little more about Tom Sawyer and Huckleberry Finn, a series of 20-minute tapes by an English professor could provide just the right humanities "refresher course."

Dr. William "Mack" Jones has written and narrated the first four tapes in a series called "The Library of Essential Knowledge." The tapes outline essential knowledge about Shakespeare, the tragedy of Hamlet, a survey of English literature and Mark Twain.

Jones says the tape series is essential in two ways. First, the content of each tape provides a basic, essential outline of the topic. "We could not include any superficial material," he says.

The material in the tapes is also essential in providing knowledge that is necessary for a full life, says Jones. "This is the stuff that gets to the joys in life beyond food, shelter and clothing."

The first four tapes are available for \$9.95 each through the office of Conferences and Specialized Services, 344 Hearnes Building, Columbia, Mo. 65201.

Researcher studies primate 'speech'

An assistant professor of psychology has received a career development award from the National Institutes of Health for ongoing

studies of primate models of speech perception.

Dr. Charles Brown hopes to answer two key questions: Do non-human primates communicate to each other using vocal signals that are similar to human speech sounds? If so, can the monkey be a tool for trying to understand how humans perceive speech?

"A hunch is that some species already have developed a speech communication system similar to that of humans," Brown says, adding that human speech may have evolved from primate vocal signals.

During the next five years, the NIH award will provide \$403,695 for Brown's research, and a salary stipend of \$199,260. He will travel to Africa next year to conduct field studies of primates' natural communication systems.

Students learn business nuances of the French

A new offering in the Romance languages curriculum allows students to learn the vocabulary, customs and practices of the French business world.

Business French, taught by Professor Ben Honeycutt, provides background on the overall structure of French enterprises and covers more narrowly defined topics such as the jargon of French accounting and computing.

"The course is useful to students who are combining language degrees with other fields, such as business or journalism," says Honeycutt, who began teaching the course winter semester. Last summer Honeycutt spent three weeks in Lyon, France, intensely studying French business life.

As a part of his course, students learn the nuances of interacting with fellow workers as well as the finer points of transacting business.

"Business letters in French are much more formalized than in the United States, especially the introductions and closings, which are very flowery," Honeycutt says. "And the degree to which the

handshake is used also differs. For example, when you arrive at the office in the morning and when you leave in the afternoon, you should always shake hand with each of your co-workers."

College honors computer expert

A scientist selected to set up one of four supercomputer centers in the nation was presented the college's Outstanding Alumnus award during Arts and Science Week this spring.

With a \$75 million grant from the National Science Foundation, Larry Smarr, AB '70, MS '70, will institute a supercomputer center at the University of Illinois, where he is an astrophysicist.

While on Campus, Smarr conducted a special supercomputer seminar as Professor for a Day. His work has been reported in *The Wall Street Journal* and *Time* magazine.

BUSINESS & PUBLIC ADMINISTRATION

Married couples to join faculty

Less than a decade ago, the first woman joined the B&PA faculty. This fall another first will occur with the addition of three married couples to the faculty.

Drs. Kay Poston Harmon and W. Ken Harmon, both teachers at Drexel University in Philadelphia, will join the accountancy faculty.

Dr. Brad Jordan, a faculty member at the University of Georgia in Athens, will teach in the finance department. His wife, Assistant Professor Susan Jordan, started work at UMC in January.

Drs. Lori and Charles Franz, professors at the University of South Carolina in Columbia, will teach in the management department.

Department chairmen are enthusiastic about their new faculty. Management Chairman Allen Shusher thinks the event reflects

the movement of women into business. About the Jordans, finance Chairman Gary Trennepohl notes they were hired independently: "We hired her first and him second," Rick Elam, director of the School of Accountancy, feels lucky to get the Harmons. "The demand for accounting professors is far higher than the supply. There are 10 new jobs for every new PhD."

Alumni honored with citations

Five alumni were awarded Citations of Merit at the April 19 honors banquet.

They are Ralph W. Babb Jr., BS BA '71, executive vice president of Mercantile Bancorporation Inc. in St. Louis; Mary Ann Graves, BS BA '61, director of financial services at SRI International in Menlo Park, Calif.; B. Edwin Litton, BS BA, MA '50, senior partner at Arthur Andersen and Co. in New York City; and S. Keith McSpadden, BS '49, director of human resources at Texaco Inc. in White Plains, N.Y.

Marvin M. Komen, BS Ed. MA '43, retired director of corporate distribution for Brunswick Corp. of Skokie, Ill., received a Special Citation of Merit.

EDUCATION

Class challenged with assignment

To heighten students' awareness of how difficult it is to change attitudes and behaviors, Dr. Arni Dunathan had his Classroom Communication students solicit scholarship donations on Lowry Mall.

The students learned to expect avoidance behavior—people on Lowry Mall ignored them, sped their pace or appeared to be busy.

When the education students become teachers, their students also will avoid efforts to change their behaviors and attitudes, Dunathan says.

"You have to have credibility reside in your expertise. You have

to be an authority," he says. If a teacher's credibility is only based on his or her authoritative position, "then all you'll get is resistance."

"If you keep your credibility high, then you're trying to influence from being an authority, and they'll listen and respect you."

In 30 minutes' time, the students raised \$106.94 for the Norman Lawnick Memorial Scholarship Fund. Lawnick, an associate professor of health and physical education, died Oct. 8, 1984.

Alumni receive merit citations

Four educators received Citation of Merit awards at the April 6 alumni awards banquet.

Carl E. Burkel, BS Ed '49, M Ed '50, is chairman of the music department at Jefferson City High School. Dr. John L. Ferguson, M Ed '51, EdD '53, is professor of educational and counseling psychology at UMC.

Dr. Neila T. Pettit, BS Ed '58, M Ed '67, EdD '70, is professor of curriculum and instruction at Mizzou. William J. Wasson, M Ed '56, of Jefferson City is deputy commissioner of education.

ENGINEERING

Alumni, faculty recognized for service

Four alumni were among honorees at the Engineering Honor Award banquet March 8.

Recipients of 1985 Missouri Honor Awards for Distinguished Service in Engineering were Raymond M. Butcher, BS ME '48, of Leawood, Kan., executive partner and manager of engineering power division, Black & Veatch; Ralph Denton, BS Eng '33, of Fayetteville, N.Y., owner of R.J. Denton Co.; Donald J.L. Lin, BS ME '50, of Dallas, president and chairman of the board of Quill Inc.; Bruce M. Davidson, academic dean, Department of the Navy; and Kurt Pfahl, corporate director of corporate technical research and engineering for Hallmark.

James E. "Bud" Moulder, BS CE '53, MS '55, received the Engineering Alumni Organization's Citation of Merit award. He is chief executive officer and chairman of the board of Booker Associates Inc. of St. Louis.

Senior Melanie White displays a model of a spacecar for the "Meteorite Monsoon," a space-age version of bumper cars she created for Donald Creighton's Comprehensive Design class.

Class project more than fun and games

AMUSING. Seniors in Professor Donald Creighton's Comprehensive Design class spent their semester thinking about roller coasters, bumper cars and other amusements. They were working on an assignment that required them to dream up and design an original theme amusement park.

The mechanical and aerospace engineering project was not entirely fun and games. After deciding on a futuristic "Space Odyssey" theme, eight groups used their imaginations as well as their engineering

know-how to come up with a feasible project.

That meant painstaking research into materials, labor, safety and assembly. The students also had to consider costs against projected revenues to determine whether the park would be a money-making business venture.

Senior Melanie White of Kansas City led a group that designed the Meteorite Monsoon, an outer-space version of bumper cars in which riders drive "spaceships" that float on compressed air.

Other rides included the Intergalactic Shuttle, the Lunar Rover, the Jet Pack and the Black Hole, a roller coaster enclosed within a dark building that zooms riders through meteor-packed "skies" and ends with a corkscrew spiral into a black hole.

White thinks the amusement park is feasible, both from engineering and business perspectives. "Any contractor who could get his hands on these drawings would be in luck," she says.

—Laurie Navar

Dr. Jay McGarraugh, professor of civil engineering, received the 1985 Engineering Development Fund Excellence in Teaching Award.

Engineers need education, not training

In a speech noting the 100th anniversary of UMC's electrical engineering department and the publication of Mark Twain's *Adventures of Huckleberry Finn*, Dr. John B. Slaughter said both have inspired the imagination and influenced the quality of American life.

"For 30 years I have heard the argument that engineers, by necessity, are trained rather than educated," said the chancellor of the University of Maryland at College Park, who delivered the 1985 Croft Lecture in Engineering Feb. 19. "At some point, educators must come to grips with the need for engineering students to have a greater appreciation for both Milton and molecules, Marx and microcomputers, Carlyle and chemistry, and Picasso and picarards."

Slaughter, director of the National Science Foundation from 1980-82, expressed concern about the underrepresentation of

women and minorities in the sciences, especially engineering. "Those of us here today need to ask ourselves when we last extended an encouraging hand to a youngster struggling to advance in a scientific field."

Alumni generous with bequests

Bequests from early 1900s alumni will enable the college to buy equipment and award scholarships.

Walter G. Smauder, BS EE '09, of Dallas left the electrical engineering laboratory \$426,000 to purchase new equipment and

pay for maintenance expenses.

A \$60,400 bequest from the late Kathryn Irwin Thornton in honor of the late Frank Thornton Jr., BS EE '08, will fund scholarships and student loans.

FORESTRY, FISHERIES & WILDLIFE

Student promotes awareness of forestry

Brett States puts a lot of stock in young folks.

As a service project, he and other Forestry Club members spent a week in early April sowing information about Arbor Day to Boone County fourth graders.

"These kids are sharp. They know their trees," says States, BSF '85, of Chesterfield, Mo.

Now a forest ranger in Florida, States looks forward to working with youth through Boy Scouts when he's not fighting fires, in training or doing maintenance work.

"The kids of today are the voters of tomorrow," he says. "People who appreciate nature are going to take care of nature. The better awareness we can create today among those future voters, the better off our field will be in the future."

HEALTH RELATED PROFESSIONS

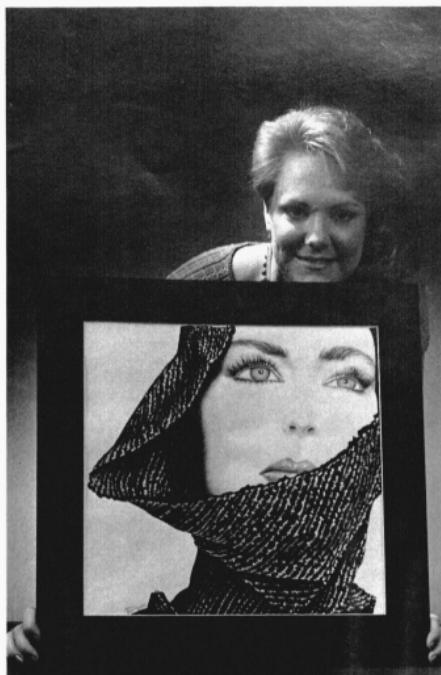

Student receives national award

A graduate student in the health services management program is one of 14 recipients of a scholarship awarded annually by the Federation of American Hospitals Foundation.

Victor Saghi of Wichita, Kan., is pursuing master's degrees in health services management and business administration. He hopes to be chief operating officer for a hospital in a small-to-medium-size community.

"The environment for hospitals is changing so rapidly" due to the new Medicare reimbursement system, Saghi says. "It has created incentives for hospitals to become more efficient and also puts them at risk."

Illustrator wins contest

Home economics senior Wendy Frankenbach of Desoto, Mo., displays a fashion illustration that was part of her first-place entry in a contest sponsored by Fashion Group of Kansas City. "The illustrations should bring out a human emotion as well as a reaction to the fashion garment," says Frankenbach, who won a \$400 scholarship. She competed against 25 students from Missouri, Kansas and Nebraska colleges. This summer Frankenbach will be an intern with Costume Collection of New York City.

In nominating Saghi for the award, Dr. Gordon D. Brown, director of the health services management program, says, "He is going to be one of the bright, young leaders in the future, and has the potential of making a significant contribution to the field."

HOME ECONOMICS

Students receive scholarships

Two fashion-merchandising students are recipients of Sheila Stevens Memorial Scholarships.

Marilyn Leibovitz, a junior

from St. Louis, and Karen M. McGee, a senior from Florissant, Mo., each received a \$350 scholarship at the Greater Kansas City Fashion Group's annual fashion seminar in February. The fashion group established the scholarships as a memorial to Stevens, BS HE '79, who died in 1984.

College presents annual awards

Two faculty members, two alumnæ and a Missouri state representative were honored at the alumni awards banquet April 12.

Gary Hennigh, associate professor of housing and interior design, received the excellence in teaching award. Dr. Jean Hamil-

ton, assistant professor of clothing and textiles, was presented the excellence in advising award.

State Rep. Kaye H. Steinmetz of North St. Louis County received an honorary alumni membership for her family advocacy legislation. Steinmetz has been involved in passing laws on drug paraphernalia, child welfare and child custody.

Grace Hoover, BS HE '47, MA '48, of Cape Girardeau, Mo., received the Citation of Merit. Jeanine Chapman, BS HE '78, of Columbia was awarded the Junior Citation of Merit.

JOURNALISM

Six honor medals reward service

Four journalists, an advertising executive and a newspaper are 1985 recipients of the Missouri Honor Medal for Distinguished Service to Journalism.

Honored at Journalism Week ceremonies in April were Bill Bray, BJ '48, of Columbia, executive director of the Missouri Press Association; Jo Foxworth, BJ '39, of New York City, president of the Jo Foxworth Inc. advertising agency; Fred W. Friendly, former president of CBS News and currently the Edward R. Murrow Professor Emeritus of Broadcast Journalism at Columbia University Graduate School of Journalism in New York; Sarah McCloud, BJ '31, Washington newspaper, radio and television journalist; photographer Arnold Newman of New York City; and *Doug A Ibbot*, the largest independent daily newspaper in Korea.

Given in recognition of long term outstanding service in journalism, Missouri Medals have been awarded continuously since 1930.

Placement rate tops 85 percent

A survey conducted by the school's placement office indicated that 85 percent of the 1983-84 graduates have found jobs in journalism.

Eighty-three percent of those who earned bachelor's degrees have found journalism-related employment, as have 97 percent of those who received master's degrees. Two of the three who earned doctoral degrees have found employment in journalism.

The placement report also indicated that average starting salaries for journalism graduates have increased. Entry-level journalists with bachelor's degrees are earning an average of \$374.28 a week in public relations. Those with MA working in magazines and corporate communications are earning an average of \$383.06 per week.

Students operate PR agency

Setting up a public-relations agency while still in college seems like pretty heady stuff, but for a go-getter like Jon Goldman, it's just a matter of course.

In 1984 the marketing major started Professional Communications Inc., a non-profit, full-service PR agency. Now a total of 30 journalism and marketing students have gotten the firm off the ground and running.

"ProComm's job is to increase public awareness of its clients and enhance their image," Goldman says. "We place ads, design logos, organize fund-raisers, identify target markets, and provide marketing research and strategies." All this is done at no cost to the clients; they pay only out-of-pocket costs.

"Working for ProComm is good experience for students," Goldman says. "It gives them a chance to broaden their resumes and their portfolios."

Though ProComm has no office from which to operate, it handles eight clients, including the Missouri Bookstore, the local chapter of Professional Secretaries International, and Big Brothers and Big Sisters.

Vicki Weber, manager of the Missouri Bookstore, put ProComm in charge of the store's semiannual book-buy-back program. "Our image is very sensitive with students. ProComm put together a fresh, creative campaign," Weber says.

Even though Goldman will graduate, the agency will carry on next year. As for Goldman, he has a couple of new projects to keep him busy. This summer he'll lead a group of teenagers on a trip to Israel and, at the same time, he'll be conducting a "Hire Jon Goldman Sweepstakes" with advertising agencies across the country. The winner gets to hire Goldman.

"The advertising world changes so fast," Goldman says,

"and this is my way of keeping my name in the forefront while I'm out of the country."

LAW

Pupils' essays describe freedom

To 10-year-old Barbara Robbins, freedom implies responsibility. "I have the freedom to have a cat but it's my responsibility to take care of her or I will lose that freedom," she wrote in the first-place fourth-grade entry in an essay contest sponsored by the Student Bar Association.

Some 306 Columbia elementary school pupils entered the contest, which was hoped to promote the image of the Law School in the community. Prizes were \$15 for first-place winners, \$10 for second place and \$5 for third.

"Freedom is lying in the fresh grass under a tree in spring and feeling the cool breeze tingle through your hair," wrote prize-winning fifth-grader Megan Poe. Sixth-grade winner Marcy Rapp wrote, "Freedom is the bald eagle that stands for our country. It stands for freedom because it flies free in the sky."

LIBRARY & INFORMATIONAL SCIENCE

Book shows how to gain access to local documents

A new book explains which county and city records are available to citizens of Columbia, and describes its court system and regional organizations, such as the Columbia Board of Education.

Access to Public Information: A Resource Guide to Government in Columbia and Boone County was written by library science instructor Aurora Davis. While the book is specifically about Columbia and Boone County, the principles of finding information apply in other communities, she says.

The book discusses pertinent laws and gaining efficient access to information. Sources covered include ordinances, minutes, financial statements and departmental reports.

The book costs \$8 and is

available from the Freedom of Information Center, P.O. Box 858, Columbia, Mo. 65205.

MEDICINE

Scholarship honors Jerry Gold

A scholarship honoring Dr. Jerry Gold, MS '69, PhD '74, who retired as a faculty member in the surgery department for medical research in 1982, has been established at the University.

The Association for the Advancement of Medical Instrumentation made the initial contribution.

Interest income from the fund will be used to grant one or more annual scholarships to students in the electrical engineering department who have an interest in bioengineering and have financial need.

A St. Louis native, Gold did postdoctoral work in biomedical engineering and later specialized in ventricular fibrillation.

Brain changes with age

As the body ages, so does the mind. A biochemist at the University has identified rapid chemical changes that occur in the brains of the elderly.

"We thought at first the changes would be gradual but found, instead, a rapid and marked increase, starting in the 50s and 60s," said Dr. Eric G. Brunngraber, professor of biochemistry at the Missouri Institute of Psychiatry.

In one of the first studies of normal brains, he looked at the brains of men ranging from age 25 to 85, who had died from accidents, heart attacks or other non-brain related causes.

Brunngraber measured the different types of glycoproteins, which are complex carbohydrates and proteins, in the brain, and he found the amounts changed in the older brains.

Glycoproteins in the gray matter decreased with age, while those in the white matter increased.

He speculates that the brain may have a lifespan of sorts—that it can last only so long before wearing out. "At some point, the brain may not be able to function anymore."

He compares it to a tape

that can be "played over and over only so many times before getting 'used up.'

New clinic helps travelers

The new international Travelers Clinic helped by Dr. E. Dale Everett, director of infectious diseases, helps people prepare for foreign travel by providing proper immunizations, medication and information in one location.

Physicians review travel plans and offer up-to-date recommendations for prevention of illness, including dietary precautions and information about symptoms. They administer immunizations needed for specific areas of the world to prevent yellow fever, cholera and other diseases. They also prescribe medications for the prevention of malaria.

All medications, even those that are rare or hard to find, are available in the outpatient pharmacy.

The clinic opened in January and is staffed by specialists in infectious disease who have had additional training in the prevention, diagnosis and treatment of unusual diseases occurring outside the United States.

Appointments should be made at least six weeks in advance of the travel date, Everett says.

Medical alumni earn awards

UMC's Medical Alumni Organization presented four awards during its April luncheon at the Missouri State Medical Association's annual meeting in Kansas City.

Dr. L. Howard Hartley, MD '59, won the 28th Citation of Merit in Medicine. Hartley is director of cardiac rehabilitation service and associate professor of medicine at Harvard Medical School in Cambridge, Mass.

Two Young Physician awards, honoring alumni under the age of 45, were given to Dr. J. Regan Thomas, MD '72, assistant professor of otolaryngology in the division of facial plastic and reconstructive surgery at Washington University in St. Louis; and Dr. David H. Rosen, MD '70, associate professor of psychiatry at the University of Rochester (New York) School of Medicine.

The award for community service was given to Dr. Thomas E. Ashley, MD '42, a surgeon in

private practice in Springfield, Mo. Ashley was president of the Medical School Foundation from 1975 to 1978.

NURSING

Medicare system hampers caring

Medicare's new method of reimbursement is not designed to facilitate caring but to maximize the use of resources, says Dr. Susan Taylor, associate professor. "Caring is costly" is the current cliche in the health-care field, but it's true."

The new system determines the average cost of care for a particular diagnosis, not the real cost for a particular patient. Thus, hospitals make money if they can treat a patient for less than the fixed amount assigned to specific diagnoses.

One way to cut costs is to reduce nursing staffs, Taylor says. "Nurses will meet their patients' physical needs first, and then feel guilty about not having enough time to meet their emotional needs, too."

When hospitals are short-staffed, she says, nurses will first do high-visibility tasks and meet the institution's expectations. "One ignores the patient anxious about upcoming surgery and, instead, considers it more important to change dressings."

According to a report released by the U.S. General Accounting Office, the average length of hospital stay dropped by two days after the new Medicare system went into effect.

"It's more cost-efficient for the hospitals to see more patients and keep them for fewer days," Taylor says. But patients going home sooner still need care, and community health nurses may not be equipped and trained to deal with seriously ill patients, she says.

Nursing programs reaccredited

The school received an eight-year accreditation, the maximum length granted, for both the graduate and undergraduate programs from the National League for Nursing this spring.

The review process included an intensive self-study and site visit this past October. The school

Dog wash raises funds

David Martin, VM2, of Rocheport, Mo., and other members of the student chapter of the American Veterinary Medical Association braved fleas, splashes, licks and ticks during the group's second annual dog wash May 11. Pet owners paid \$4 a pooch for wash, rinse and towel dry. Proceeds from the event, sponsored by the student public education committee, will buy a walk-on scale for the small-animal clinic. Last year's profit paid for a black-and-gold paint job of a wagon drawn by Hilda and Louise, the College of Veterinary Medicine's mules.

was evaluated in relation to 36 criteria; changes were recommended in five of those areas.

"I'm very pleased with the outcome," says Dean Phyllis Drennan. "I hope that recommendations made by the board of review will strengthen the school in relation to accreditation criteria."

SOCIAL WORK

Courses focus on management of agencies

During his sabbatical last year, Dr. Vincent Faherty, associate professor, added an MBA to his

master's and doctoral degrees in social work.

"I wanted to further my knowledge of the business community and how it approaches training of managers," he says of his executive training program at the International Management Institute in Geneva, Switzerland.

Training managers is important to Faherty, who teaches Management of a Social Agency, and Advanced Policies for Planning and Administration courses, because in the non-profit sector, managers are called administrators.

"I found 75 to 80 percent of the content relevant to my teaching and research," he says. He

now incorporates marketing, finance, accounting and operations management into his classroom teaching in order to train better social work administrators.

PUBLIC & COMMUNITY SERVICES

Researchers find 'burnbright' among camp staff

Staff burnout does occur in the fifth or sixth week of an eight-week camp session, according to research conducted by David Szymanski and a colleague. But they also found that an equal, 10 percent of camp staff "burnbright."

Szymanski, assistant professor of recreation and park administration, and David Austin, an associate professor at Indiana University, studied 55 staff members serving 80 campers with disabilities last summer at Bradford Woods in Martinsville, Ind.

"Those who burnbright see themselves as charting their own destiny," Szymanski says. Instead of blaming external factors, they draw on internal strength and initiative to improve the situation.

This summer, Szymanski and Austin plan to test techniques to reduce the level of burnout or identify it sooner at Bradford Woods. Their questions: "Should directors offer camp staff an extra night off, hold cabin meetings among staff, give 'atta boy' awards, be more flexible in time off, provide more showers or air-condition their rooms?"

VETERINARY MEDICINE

Department heads named

Dr. H. Richard Adams, a noted researcher in cardiac response to injury and trauma, and Dr. James E. Creed, an expert in small-animal surgery, have been appointed department chairmen.

Adams heads the veterinary biomedical sciences department. Creed, BS Agr '54, DVM '61, directs the veterinary medicine and surgery department, and the Veterinary Teaching Hospital and Equine Center.

From The Association

The phones are still red hot from the Kansas City chapter's Feb. 25 and 26 National Merit/Achievement Scholarship telethon. The event's co-chairmen, Neil Sprague and Jack Revare, report about \$15,000 worth of contributions.

Among those attending the 50-year reunion and banquet April 26 were from left, first row: Marjorie Hanson Gibson, Columbia; Robert J. Charlton, Leawood, Kan.; James R. Hanson, Webster Groves, Mo.; Francis W. Gapp, Vienna, Va.; Robert I. Meagher, Fredericktown, Mo.; and Eugene S. Gibson, Columbia. Second row: Sam J. Lewis, Hillsboro, Mo.; John S. Ayres, Kansas City; Alfred Beckmeyer, Hartsburg, Mo.; Louise Higgs Stephens, Columbia; Allean Lemmon Hale, Urbana, Ill.; Scotty Guletz, Jackson, Calif.; Dorothy Brown Meinershagen, Chillicothe, Mo.; Mady Haynes Hobart, Dallas; and Peggy Elsea Werley, Moberly, Mo. Third row: John P. Miller, Prairie Village, Kan.; Leslie J. Jones, DeSoto, Mo.; Marvin E. Fender, Jamesport, Mo.; Maxwell E. Springer, Knoxville, Tenn.; George C. Gundlach Jr., Dearborn, Mich.; Flavius Freeman, Springfield, Mo.; Mary F. Owsley Hogenauer, Kennett Square, Penn.; Charles R. Donham, Wichita, Kan.; and Idell Durrett Hays, Amarillo, Texas. Fourth row: Harriet Williams Kennedy, Carthage, Mo.; James M. Wallace, Benton, Mo.; William Shrader, Hermann, Mo.; Dorothy Heckmann Shrader, Hermann, Mo.; and Emily Marshall Ellis, Pensacola, Fla. Fifth row: Edward B. Kennedy, Carthage, Mo.; Harold "Eutsy" Johnson, Columbia; Everett G. Dickson, Paris, Mo.; Mildred Menefee Wardlow, Pasadena, Calif.; Carl D. Siegel, Kansas City; Carter Hilsabeck, Austin, Texas; and William Fleeman, Pasadena, Calif. Sixth row: Lester Silbernagel, Pine Bluff, Ark.; Ray Cummings, St. Louis; Roy Cummings, Kirkwood, Mo.; Sam J. Justice, Yonkers, N.Y.; Helen Gibler Montgomery, Panama City, Fla.; Spencer M. Allen, Cocoa Beach, Fla.; and Russell Elsea, Cameron, Mo. Seventh row: Will Fleming, Moberly, Mo.; George Beimdiek, Carthage, Mo.; Howard Young, Chesterfield, Mo.; Jack D. Shelly, Ames, Iowa; Latney Barnes, Mexico, Mo.; Betty Michaelle Jorgensen, Durham, N.C.; Robert E. Seiler, Jefferson City; Kenneth A. Jorgensen, Durham, N.C.; Mark Gibson, Columbia; and Charles C. Allis, Independence, Mo.

At the April 30 Legislative Recognition Day, former curator and Jefferson Club trustee Avis Tucker of Warrensburg, Mo., receives a 1985 Presidential Award from Thomas Mayer, Alumni Alliance president, and C. Peter Magrath, University president.

Ruth Friar photo

Cynthia and Bob Phillips of Mansfield, Mo., fancy step to the down-home fiddle of Taylor McBaine and guitar of John Stewart. The couple are among 99 Alumni Seminar Weekenders who explored Missouri's Legends and Legacies April 19 to 21.

More than 3,000 feet pound the downtown St. Louis pavement April 14 in the first-ever LA Beer/Mizzou Run. Six of those feet belong to, from left, C. Peter McGrath, University president; Bill Lenox, Association president; and John Rieser, St. Louis chapter president and founder of the event. The 10- and three-kilometer competitions run up a total of \$3,400 for the chapter's Alumni Scholar fund.

News About Alumni

CLASSNOTES

'28

James Carlton "Jack" Miller, BS Agr, MA '29, PhD '37, of Bryan, Texas, wrote *A Settin' Hen Never Gets Fat*. The book contains more than 200 true short stories and essays on nostalgia, farm life, animal science, college life, and interesting characters and places from more than 80 years of Miller's life.

'29

Punahou, a college preparatory school in Honolulu, inducted

John Fenton Fox, BS Ed, into its athletic hall of fame Jan. 10. Fox was president of the school for 24 years.

'30

G.J. Cottier, MA '30, professor at Auburn (Ala.) University, received a special award from the Alabama Veterinary Medical Association for his dedication and contribution to students and the veterinary profession.

R. Allan Hickman, BS BA, and his wife, Martha, of Rogers, Ark., recently celebrated their 50th wedding anniversary. He is a retired manager of state government affairs for Dow Chemical Co.

Designed EXCLUSIVELY for The Kaffeeklatsch!

Jesse Hall and the Memorial Union handcrafted by WILTON ARMETALE.

Made in America of non-toxic metals that impart the warmth and patina of fine pewter. Very practical. Oven-proof, engravable and unbreakable... perfect for shipping! Jesse Hall tray measures 11" x 7" x 1 1/2". Memorial Union, engraved on the original Armetale mug, measures 4 3/8" across the base x 4 3/4" in height. To order: Send \$19.50 for each mug or tray (please specify) plus \$3.00 to cover shipping and handling. Missouri residents add \$1.19 sales tax. Payment by check, money order, VISA and Master Card accepted. Credit card orders: send card number and expiration date.

'31

On March 3, 1984, **LaDaw Wainscott Bridges**, BS Ed, and her husband, Frank, of Carbondale, Ill., celebrated their 50th wedding anniversary. She is a retired educator.

'33

During the spring '85 semester, **Elmer Lower**, BJ, DHL '75, was a distinguished visiting lecturer in the telecommunications and film department at San Diego State University. Lower, former president of ABC and former dean of journalism at Mizzou, is a visiting lecturer at the William Allen White School of Journalism at the University of Kansas at Lawrence.

'34

The Missouri Department of Elementary and Secondary Education gave **Rei S. Wood**, MA, a Pioneer in Education Award Aug. 28. Wood, who lives in Joplin, Mo., was a superintendent of schools for 44 years before he retired in 1969.

'37

Leon Forman, BS Ed, MA '39, former track coach at Long Beach (Calif.) Poly High School, was inducted into the California Interscholastic Federation Southern Section Hall of Fame in May 1984.

'39

Robert Toulouse, BS Ed, M Ed '47, EdD '48, will retire in August as dean of the graduate school and vice president of academic affairs at North Texas University in Denton. Toulouse has been at NTU for 36 years.

'40

William Longgood, BJ, of Truro, Mass., has written a book, *The Queen Must Die: And Other Affairs of Bees and Men*, which provides information on bees and beekeeping, and offers insights into the similarities and differ-

ences between bees and their human counterparts.

'41

Ellis Jackson, MA, retired educator, businessman and civic leader, was named Marshfieldian of the Year in January by the Marshfield (Mo.) Chamber of Commerce.

'42

Robert C. Hanger, BJ, is executive director of advertising and marketing services for Farmland Industries Inc. in Kansas City.

'44

Dor E. Flinn, BS Med, is chairman of the psychiatry department at Texas Tech University in Lubbock.

'47

Margaret "Peggy" Mengis Duplantier, BJ, of River Ridge, La., was elected president of the Civic Council of East Jefferson Inc. in January.

'48

O.W. Brauss, BS BA, recently established his own marketing and management consulting service, O.W. Brauss Associates, in Dallas. He retired Oct. 1 as district manager at Shell Oil Co.

Last fall **William Bray**, BJ, of Columbia received the meritorious public service medal from the National Association of Secretaries of State for educating young people in journalism, representing the best interests of the newspaper profession and rendering outstanding public service to the state. Bray is executive director of the Missouri Press Association.

H. Bailey Gallison, AB, is executive director of Community Campership Council, a United Way agency that provides funds for underprivileged children in San Diego.

John Stevens Robling, BJ, of Chicago retired from Encyclopedia Britannica and formed his own company, John Stevens Robling Corp., which has acquired the movie and television rights to

The Kaffeeklatsch

Biscayne Mall • Columbia • 65203
(314) 445-5916

all of the Albert Champion detective stories, written by Margery Allingham.

W. P. "BILL" SAPPENFIELD, BS Agr, PhD '52, a plant breeder at Mizzou's Delta Center in Portageville, Mo., received the 1984 Cotton Genetics Research Award for developing cotton that resists disease and insects.

'49

Raymond A. Barr, Grad, retired after 24 years as superintendent of the Marshfield, Mo., school system.

'50

Tom Brown, Arts, Grad, will retire at the end of the current academic year after more than 30 years as an educator. For the past 18 years, he was an instructor in political science and American history at Trenton (Mo.) Junior College.

Ronald R. Johnson, BS Agr, of Tulsa, Okla., recently was elected vice chairman of the Potash and Phosphate Institute board of directors. Johnson, executive vice president of Agrico Chemical Co., also was elected vice chairman of the Foundation for Agronomic Research board of directors.

'51

George F. Knollmeyer, BS ChE, was appointed director of the total quality program at Monsanto Industrial Chemicals Co. in St. Louis.

'53

Lois Miller Bush, AB, recently was promoted from proofreader to people and living editor at the *Neosho (Mo.) Daily News*.

Harry Stonecipher, Bl. MA '55, of Carbondale, Ill., retired in fall 1984 after teaching for 15 years at Southern Illinois University. He was a professor of journalism.

'54

David W. Lewis, BS BA, a past president of the University of Missouri Board of Curators, retired

Duane Dailey photo

At a recent College of Agriculture event, Cordell Tindall signs copies of his book on the college's impact on the state.

Tindall stays involved

THEY'RE IN THE STARTING GATE, a-a-a-and they're off. **Cordell Tindall**, BS Agr '36, has been off and running since his retirement.

After spending 44 years with *Missouri Ruralist* magazine, the former editor retired in 1979 from the job but not from work.

Since then he has served as co-chairman in a successful \$600 million state bond issue campaign and was treasurer of a state committee working for the successful constitutional Amendment No. 7 that established three categories of real property and eliminated the merchants and manufacturers inventory tax. But his major efforts have gone into a book and his role as "public information spokesman" for parimutuel betting.

Tindall's book, *IMPACT, The Technology Years*, evaluates the influence of the UMC College of Agriculture on Missouri. He drew on his decades of experience with *Missouri Ruralist*, and spent more than a year compiling information for the book.

"Generally, Missourians enjoy the good life," Tindall

writes in a beginning chapter. The reasons for this are twofold. "Certainly, major credit must go to our agricultural production and processing complex. And, of course, we must give credit to our democratic system of government."

Tindall attributes ever-increasing farm production to University researchers, who deliver "more for the money invested." They provide a steady flow of useful discoveries.

Tindall's tie to the parimutuel campaign also had agricultural threads. "A boost to horse breeding would provide an alternative farm enterprise," he says. The revival of the horse industry also would increase the production and value of grass crops, especially alfalfa. "I don't give a damn about gambling," Tindall says. "My interest is strictly what it might do for the economy of this state."

Tindall's work may never be done. He is a member of the management committee for the UMC Alumni Center and is a lifetime member of the Alumni Alliance.

Cordell Tindall is running strong. —John D. Marsh

Feb. 1 as board chairman and chief executive officer of United Missouri Bank in St. Joseph, Mo.

Alvin E. McQuinn, BS Agr, chief executive officer and chairman of the board of Ag Chem Equipment Co. Inc. in Minneapolis, was elected Feb. 5 to a three-year term on the board of directors of The Fertilizer Institute in Washington.

'55

Robert Hampton Marty, BS BA, of Mexico, Mo., received one of five 1984 community service awards from the United States Gypsum Co. He is an export sales manager for the A.P. Green Refractories Co., a USG subsidiary.

'56

On Jan. 25 **Francis M. Corry**,

BS Agr, MD '65, was installed as president of the 374-member Green County Medical Society. Corry is a surgeon in Springfield, Mo.

'57

In June 1984 **Bill C. Brantley**, BS Agr, MA '58, became a member of the Million Dollar Round Table, an exclusive life insurance sales association. Brantley is an estate analyst and business insurance specialist in Des Moines, Iowa.

Harold E. Hatch, BS BA, who received professional certification from the Mortgage Bankers Association of America, was promoted to senior vice president and senior real estate loan officer at United Missouri Bank of Kansas City.

'58

Robert R. Bryson, BS ME, is a member of the engineering staff at TRW Inc. in Redondo Beach, Calif. Formerly, he was vice president of business affairs at California Baptist College in Riverside.

In November, **Donald L. Biatte**, BS CE, was named district engineer for the Missouri Highway and Transportation Department at St. Joseph. He was a utilities engineer in the department's surveys and plans division at Jefferson City.

'59

John A. Armstrong, BS Agr, and his wife, **Frances Street Armstrong**, BS Nur '60, M Ed '76, live in Orrick, Mo., where he is executive vice president and chief executive officer of The Bank of Orrick.

John Fox Arnold, AB, JD '61, is president of the 14,000-member Missouri Bar. Arnold is a partner in the St. Louis law firm of Lashly, Cartathers, Baer and Hamel.

Midland Bank in Lee's Summit, Mo., elected **Vernon B. Mucke**, BS BA, to its board of directors in January. Mucke is a principal, president and chief executive officer of Retirement Centers of America Inc. in Lee's Summit.

Bill Northcutt, BS Agr, M Ed

'66, of New London, Mo., was named a member of the Asgrow/O's Gold Seed Co.'s sales agent advisory council.

Carl Pierce, BS Agr, of Maryville, Mo., retired from the Soil Conservation Service after 34 years of service. Since 1972 he was district conservationist for DeKalb County.

'60

Dee Danford Acuff, BS Ed, of Lee's Summit, Mo., was elected to the board of directors at Midland Bank in November.

Stan Pederson, Bl, was promoted in October from station manager to vice president and general manager at KYTV in Springfield, Mo.

Lowell M. Schake, BS Agr, MS '62, is professor and head of the animal industries department at the University of Connecticut in Storrs. Formerly, he was a teacher and researcher in the animal science department at Texas A&M University in College Station.

Gary Schmedding, Bl, is general sales manager at KHQH-TV in Quincy, Ill.

Art Wallhausen Jr., AB, is coordinator of news services at Southeast Missouri State University in Cape Girardeau. He previously was managing editor of the Charleston, Mo., *Enterprise Courier*.

Learning is a lifelong process, one which can be impeded by financial and time constraints. The Center for Independent Study at the University of Missouri offers a flexible approach to education, beyond the classroom walls. People of all ages and academic backgrounds can enroll year-round—for university, continuing education, or high school credit, or simply for personal enrichment. Students have up to nine months to complete each course.

The University of Missouri has offered instruction through correspondence since 1911. The curriculum has grown to over 210 courses, and last academic year the program attracted more enrollments than any other university-sponsored program in the nation: 16,227.

Enjoy a flexible, self-paced education through independent study. At the University of Missouri.

Jean Elizabeth Hardesty Hazell, BJ '31, BS Ed '52, April 14 in Columbia at age 76. She was a former UMC cashier. Survivors include two sons.

John W. Logan, BS Engr '31, Jan. 22 in Concord, Mass., at age 75. He was a former executive for General Electric Co. and Simplex Wire Co. Survivors include his wife and three sons.

Clifton Francis McCormick, MA '31, Feb. 26 in Springfield, Mo., at age 80. He was a retired educator. Survivors include his wife and two daughters.

Francis E. Neale, MA '31, Feb. 6 in Centralia, Mo., at age 84. She was a retired educator.

Joseph F. Wood, BS BA '31, Feb. 12 in Laguna Hills, Calif., at age 74. He retired in 1975 from

Seymour Food Co. of Topeka, Kan. Survivors include his wife, son and daughter.

Kendall D. Clowe, BS BA '32, Nov. 24 in Poplar Bluff, Mo., at age 74. He was a retired banker. Survivors include his wife and son.

Louise Main Ashworth, BS Ed '33, of Pullman, Wash., April 23 in Spokane, Wash., at age 71. Survivors include two daughters and three sons.

Aubrey D. Hibbard, MA '33, PhD '37, Nov. 18 in Columbia at age 76. Hibbard, known as Mr. Horticulture, retired as professor emeritus from UMC in 1978. He specialized in fruit and nut tree crop management practices, and tree biochemistry and physiology. Survivors include his wife and daughter.

Alexander D. Estes, Arts '34, Feb. 14 in Columbia at age 75. He was a retired owner and president of Columbia Office Equipment Co. Survivors include his wife and three sons.

Van Doren Woodward, RJ '34, of North Truro, Mass., Jan. 20 at age 71.

Lester B. Fisher, Journ. Arts '36, Feb. 26 in Jefferson City at age 75. He was a retired executive director of the Taxpayers Research Institute of Missouri, former publisher of the *Pacific Meramec Valley Transcript* and former member of the industrial relations staff at Shell Oil Co. Survivors include his wife, two sons and a daughter.

Sally T. McKemy, MA '35, Feb. 14 in Richmond, Mo., at age 91. She was a retired high-school educator.

Carl F. Wymore, JD '35, Jan. 17 in Sun City, Ariz. He was a former senior vice president of Employers Reinsurance Corp. Survivors include his wife and daughter.

Marwyn D. Cohen, BS BA '36, of Prairie Village, Kan., Dec. 10 in Kansas City at age 71. He was a retired chairman of the board of Glasco Electric Co. Survivors include his wife, son and daughter.

TA Duckworth, JD '36, Feb. 7 in Wausau, Wis., at age 72. He was a retired chairman of the board of Wausau Insurance Cos. In 1975, he received a UMC Faculty-Alumni Award. Survivors include his wife and three daughters.

Mary Barbara Ketter Glassco, BS Ed '36, Oct. 8 in Chevy Chase, Md., at age 71. She was chairman of the English department and a resource teacher at Sligo Junior High School in Silver Spring, Md., and retired in 1977 after 20 years in the system. Survivors include her husband, two sons and a daughter.

Val Wright, BJ '36, of Libertyville, Ill., Dec. 12 in Evanston, Ill., at age 71. He was Midwest editor of *Modern Plastics* and *Modern Packaging* magazine, and director of editorial services at Nightingale-Conant Corp. Survivors include his wife, daughter, and two sons, including **Gordon Wright**, BJ '61.

Dorothy Sue Dixon Christianson, BS Ed '37, of Norridge, Ill., Oct. 9 at age 68. Survivors include her husband.

Edna Mae Webb Haas, BS Ed '37, Dec. 6 in Mexico, Mo., at age 73. She was a retired educator. Survivors include her husband.

Mildred B. Karsch Knecht, BS Ed '37, MA '38, Nov. 7 in Riverside, Calif., at age 71. She taught in the Bakersfield (Calif.) Unified School District for 15 years. Survivors include her husband, a son and two daughters.

William E. Montgomery, BS Ed '38, of Walnut Creek, Calif., Jan. 4 at age 70. Survivors include his wife.

Ross J. Silkett, MA '38, Feb. 25 in Holly Springs, Miss., at age 87. He was a program-planning specialist with the USDA's Foreign Agricultural Service. Survivors include his wife, two sons and a daughter.

Fern Ellen Staggs, MA '38, Dec. 7 in Newburg, Mo., at age 78. She retired in 1971 as associate professor of home economics at the University of Texas-Austin.

Lena Heller Ewing, M Ed '40, March 4 in Fremont, Calif., at age 75. She was a retired educator. Survivors include a son and daughter.

Frank Verbrugge, MA '40, PhD '42, Jan. 15 in St. Paul, Minn., at age 71. He was a professor emeritus of physics, an associate dean and a former director of computer services at the University of Minnesota. Survivors include his wife, three daughters and a son.

Paul B. Burcham, Arts '41,

March 13 in Columbia at age 69. Burcham, who retired from UMC in 1981 as professor emeritus, joined the mathematics faculty in 1946, and was department chairman from 1948 to 1966. Survivors include his wife and two daughters.

Lee L. Johnson, PhD '41, Jan. 5 in Waco, Texas, at age 92. He retired in 1972 from West Texas State University, where he had operated the campus bookstore and was head of the business administration department. Survivors include his wife, son and three daughters.

Roy Ver Parker, BS Agr '41, Nov. 8 in Cambria, Calif., at age 66. He was a cattleman and live-stock specialist for 33 years for the Agricultural Extension Service of California. Survivors include his wife, son and daughter.

Corrine D. Harper, M Ed '42, Ed '51, Feb. 17 in Lee's Summit, Mo., at age 70. She was a professor of teacher training at the University of Northern Iowa in Cedar Falls for 37 years before she retired in 1982. Earlier, she had taught school in Kansas City.

David Conner Keller, BS Agr '42, Jan. 15 in Columbia at age 66. He was a safety representative for UMC's environmental health and safety office when he retired in 1983. Survivors include his wife, daughter and son.

Martha L. Jones, BS Ed '43, Dec. 8 in Columbia at age 63. Jones, who was a steward and a judge for the American Horse Shows Association, taught horsemanship at Stephens College from 1949 until she retired in 1981.

Ruth Frances Thomson, MA '43, Jan. 14 in Kansas City at age 79. She was a retired educator.

Bobbie G. Caldwell, BS ChE '44, of Midland, Mich., May 13, 1984, in a boating accident at age 63. He was general manager of the Michigan division of Dow Chemical Co. Survivors include his wife, **Helen Levinge Caldwell**, Educ '42.

Woodford C. Wilson, M Ed '44, Jan. 9 in Independence, Mo., at age 80. He was a retired school administrator and educator. Survivors include his wife and two daughters.

William Milton "Jack" Angle, BS Agr '46, March 9 in Clinton, Mo., at age 61. He retired

from the U.S. Soil Conservation Service in 1980. Survivors include his wife, son and two daughters.

Edwin A. Blumenberg, M Ed '46, Feb. 17 in Cape Girardeau, Mo., at age 74. Blumenberg, former Cape Girardeau County assessor, taught for 29 years in several Missouri schools. Survivors include his wife.

Paul Kelso, M Ed '46, Ed '48, Feb. 23 at age 65 in Cedar Falls, Iowa, where he was director of institutional research at the University of Northern Iowa. Survivors include his wife and two daughters.

William P. Arnold, BS BA '47, of Greenwich, Conn., Sept. 4 at age 59. He was chairman of the executive committee of Associated Dry Goods Corp.

James W. Cobble, BS Agr '47, MA '48, PhD '51, of Jackson, Mo., Jan. 7 at age 64. He was a former dean of agriculture at the University of Rhode Island, and an agricultural consultant for the U.S. Agency for International Development. Survivors include his wife and two daughters.

Wayne Borron McMichael, Law '47, Feb. 5 in North Kansas City at age 63. He was a Clay County associate circuit judge for 18 years. Survivors include his son and two daughters.

Carl Ray Armentrout, BS Agr '48, M Ed '56, Sept. 16 in Shawnee Mission, Kan., at age 65. He taught vocational agriculture in several Missouri high schools for 30 years. Survivors include his wife, son and daughter.

Charles W. Baker, Arts, Engr '48, of Knoxville, Mo., Dec. 31 in Richmond, Mo., at age 59. He was an inspector for Murphy Industries Inc. in Excelsior Springs, Mo. Survivors include his wife, **Mary Edith Weber Baker**, BS Ed '49, a son and two daughters.

Harold W. Condra, BS BA '48, Sept. 17 in Columbia at age 61. He retired from UMC in 1980 as director of housing and food services. Survivors include his wife and son.

Audrey Dalgaard Dobish, BJ '48, Sept. 22 in Minneapolis at age 65. From 1972 to 1982, she was managing editor of the Post Newspapers Inc. of Appleton, Wis. Survivors include three daughters.

James E. Durley, JD '48, Jan.

13 at age 63 in Sedalia, Mo., where he was a partner in the law firm of Durley and Keating. Survivors include his wife, son and daughter.

James W. Riley, BS EE '48, March 13 in North Kansas City at age 61. He was a real estate agent for Eugene D. Brown Co. Realtors and a former division manager for Southwestern Bell Telephone Co. in Oklahoma City.

Pleasant Smith, BS BA '49, of Mexico, Mo., Feb. 19 at age 61 while vacationing in Tucson, Ariz. Smith, a farmer and real estate broker, was a member of the Board of Curators from 1965 to 1977 and was its 1970-71 president. Survivors include his wife, three sons and a daughter.

Memorial contributions may be made to the Westveld Scholarship Fund, School of Forestry, Fisheries and Wildlife, 1-30 Agriculture Building, Columbia, Mo. 65211.

FORUM

Turfed view

To the editor:

Congratulations to your layout editor on a brilliant juxtaposition, or at least an interesting coincidence.

The article, "Accreditation: What It Means to Mizzou," in the March-April issue was most informative. Likewise, the article I read immediately following it, "Artificial turf to replace football field's natural grass."

Noted with particular interest was the cost of the new turf as \$700,000 to \$1 million, apparently already approved by the Board of Curators. That is roughly the same figure in next year's requested budget increase for the College of Veterinary Medicine. Perhaps the board can see fit to act on that item as quickly as it did the "critical" question of footing for football cleats.

I will be the first to admit that a number of the criteria used for accreditation are secondary to

the true educational experience. Furthermore, polymer grass may be cheaper in the long run than the chlorophyll kind.

But, as a journalism graduate, I have been through the distress of having departments in my school threatened with the loss of accreditation.

However, we are talking about equipment, facilities and an environment conducive to education. Even the most rabid Tiger fan would not put a veterinary lab, a law library or a forestry classroom in the same category as 100 yards of permanently dyed plastic in Faurot Field.

Let's hope the board and the state Legislature recognize the University for what it is—an institution of higher learning, not a carpet layer for future NFL stars. Gayly Gardner Open, BJ '70 Chicago

Credit due

To the editor:

The recent issue of *Missouri Alumnus* [March-April 1985] gave mention to a study conducted by Debbie Phelps under my direction. It did accurately state that some of the findings were published in the *Employee Services* magazine. However, Debbie's name was not mentioned. I would greatly appreciate it if you could see that she receives the credit due as the senior author of the article, "Views From The Top: Employee Recreation as Perceived by Chief Executive Officers."

Thank you.

Keith B. Roys Sr.,
Professor of recreation and park administration
Columbia

Three nickels could buy a meal

To the editor:

Young Carl Siegel writes in your March-April issue that he "takes exception" to Mr. Shuepbach's statement about 15-cent meals in Columbia during the Depression. He shouldn't, because 15-cent meals were not only a fact but a necessity of life for some of us.

I remember vividly and gratefully a lunchroom about 1½ blocks north of the Red Campus. Meals were 15 cents, and on Wednesdays they served chicken dinners. I ate there whenever I could raise the 15 cents, and by loading the hominy with ketchup and the coffee

with cream and sugar, it was possible to cram in enough calories for daily survival.

Fifty-odd years and some 75 pounds later, I still get hungry whenever I think of those times. But I seem to have lost completely my taste for hominy, with or without the ketchup.

Frank B. Conselman, PhD '34
Ransom Canyon, Texas

TGIF charter member

To the editor:

Many years ago, "Pop" Givan had a sign painter correctly designate his eatery as the "birthplace and headquarters of the THANK GOD IT'S FRIDAY CLUB." Yes, it all started just a short walk from J-School. Our regular Friday afternoon letdown at Givan's was a ritual for **Murray Amper**, BJ '41; **Saul Pett**, BJ '40; assorted female reporters and yours truly. Who could foresee a whole chain of restaurants that took our TGIF thought and nursed it to where it is today.

Givan's is where many J-School themes for the annual musical show were hatched. It's where I wrote "Tears" and "You've Got What It Takes" for the *To Swing or Not to Swing* of 1935 . . . or was it 1936? It was a long time ago, for sure.

I just had my 70th birthday and am still writing music after a

successful career in retail advertising and merchandising. Incidentally, my latest "I Saw Your Name on the Men's Room Wall!" is on a country-western album to be released this summer. Milton "Mickey" Sharp, BJ '38 Rancho Mirage, Calif.

Veni, vidi, TNT

To the editor:

In her letter in the January-February 1985 issue, Mary F. Hutchison mentions Janet Cross Robards as co-founder of the Tiglettes. I remember Janet as my practice teacher in third-year Latin in the old University High School building. Janet had a dynamite personality. William R. Etheridge, BS BA '39, MA '46 Cookeville, Tenn.

Recollections recount

To the editor:

Regarding Carl Siegel's 50-year recollections in the March-April issue, if I recall correctly, the University's enrollment for 1931-35 just reached 4,000.

As for times spent in the small home economics building in 1935, I also recall working in Dr. Bisbey's white rat laboratory. Hannora Priest, BS HE '35 St. Louis
