THE MISSOURI ALUMNUS

Vol. XIX. No. 10

JUNE, 1931

Columbia, Mo.

PRESIDENT WILLIAMS CONFERS 816 DEGREES AT 89TH COMMENCEMENT

Some eight hundred new alumni were automatically added to the tens of thousands of Missouri-trained men and women this month when President Walter Williams conferred degrees on the largest graduating class in the history of the University of Missouri. Twenty-nine states of the Union and four foreign countries—Chile, China, Mexico and Japan—were represented among the throng of graduates. A total of 816 degrees were awarded.

Annual commencement exercises the eighty-ninth in the history of the University—came as a climax to four colorful days of student activities during which the graduating class heard the eloquent plea of Dr. Hugh Black of Union Theological Seminary for religion and the church at the annual baccalaureate services, and an equally eloquent appeal from the lips of Manley O. Hudson of Harvard University for patriotism and internationalism commencement day.

Following a strenuous week of final examinations, commencement week began Sunday, May 31, with the baccalaureate services in Brewer Field House. Monday was class day with breakfast and luncheon meetings of many honorary societies, a senior-alumni-faculty golf tournament, and a concert by the University Cadet Band at the columns in the evening. As a feature of the day, permanent class officers of the graduating class were elected: president, Arch Downing, of Chilhowee; vice-president, Joseph Lutz, Charleston; secretary, Lucy Wilson, Columbia; and treasurer, Karl Goetz, St. Joseph. Presidents of the student bodies of the various divisions of the University were named as vice-presidents of the class, as follows: Charles Shepherd, Arts and Science; Ralph Hargrave, Agriculture; Jack Chadwick, Engineering; Kathryn Urban, Fine Arts; Rufus Smith, Business and Public Administration; Jessie Cosgrove, Journalism; Charles Lusk, Medicine; William Pegg, Law; and Mary Jim Barns, Education.

Ivy was planted at the base of the columns by the new officers of the senior class, and Constance Read, secretary of the student government association, placed a wreath in Memorial Tower as the tribute of the class of 1931 to the University's war dead.

Tuesday was alumni day. Dr. Robert H. Baker, formerly professor in the University and now head of the astronomy department at the University of Illinois, addressed the joint luncheon of Phi Beta Kappa and Sigma Xi. And in the evening the Curators, President and Faculty gave an informal reception to visiting guests,

alumni, former students, parents, graduates and the friends of graduates.

Wednesday was the big day, as the thousand students, faculty members and Curators assembled in caps and gowns in Jesse Hall to march in academic procession around the Quadrangle and out to Brewer Field House. Five thousand persons packed the commencement hall.

The invocation was pronounced by the Rev. Frank C. Tucker of the Missouri Methodist Church, and music was furnished by the University Band.

Speaking on "Citizenship in the Modern World," Dr. Hudson, who was born at St. Peters, Missouri, attended William Jewell College and taught for several years in the law school of the University said:

"It is a common premise today that education is going to solve the social and political problems which confront our generation. The thought of many people seems to be that university training necessarily equips men and women to meet the issues which they will encounter as public servants or as voters or as citizens. But this formula seems to be based upon two assumptions which may well be open to question: first, that the informed opinion of educated men is bound to prevail over the un-informed opinion of their untutored fellows; and second, that education alone will produce a capacity to understand and govern.

"The first of these assumptions is defied by the situation which prevails in America today, where it seems far easier to get a hearing for a rampant prejudiced view of any problem than for the calmer statement of its essentials. Much of our public opinion is based on fears and prejudices and survivals which are wholly unrelated to any intelligent view of our public questions. To such opinion, an advertising slogan is frequently more persuasive than a profound analysis.

Some of us, said Dr. Hudson, may think it would have been more comfortable to live in the days when all public questions could be threshed out in a local town meeting. . . "some of us may sigh for a return to the time when a national economy provided the sustenance of our lives; some of us may wish that our politics could stop at the water's edge; but none of us is quite willing to confine his wants to the limits which any of these reversions would entail."

"We do not propose to give up our coffee for breakfast, and hence our dependence on the farmers of Brazil or Java or Yemen; we do not propose to stop wearing silk stockings, and hence our dependence on the industries of China or India or Japan; we do not propose to abandon the automobiles which are taking the world off its feet,

and hence our dependence on the tin mines and the rubber plantations of the Malay peninsula.

"Not even the most extreme protectionist manufacturer would suggest that the richest country in the world should confine its consumption to what it can produce for itself, and no labor leader fails to realize that some part of the product of our workers must be sold in markets which our continental free trade cannot open.

"We live, and we propose to continue to live, in a world which embraces other peoples, other nations, and other continents, and as citizens of one country we have to know what that world is in order that we may handle its current problems as they affect our daily lives.

"The thought which I would place before you is not a vague ideal of world citizenship. It is not a doctrinaire internationalism. It is not even a plea for world peace. I am not urging any mitigation of the loyalty which each of us feels toward his own community, nor of the patriotism which all of us have for our own country. I am not advocating that interests of other peoples should be put above our own.

"I am suggesting a world outlook for a citizen of America because it seems to me to be necessitated by America's own interest, by our interests as Americans. I am suggesting that we cannot play our role as citizens in this age unless we see our own country as a part of a larger world, and unless we see that world as a whole society."

At the conclusion of Dr. Hudson's address, President Williams announced awards and honors of the year and conferred fifteen various degrees on the candidates from ten divisions of the University.

One by one the deans of the University divisions moved to the front of the speakers platform and presented to the President the candidates from their divisions. "By virtue of the authority invested in me by the Board of Curators, I confer upon you—" Dr. Williams repeated, as group after group of candidates rose to its feet at the nod of their dean, and sat down again when the President had conferred on them the degrees for which they had labored.

Finally came the candidates for graduate degrees, and as Dean William J. Robbins read the list of candidates, and the candidates walked onto the platform to receive their hoods and their diplomas and to shake hands with the President, for the first time in the history of the University a President conferred upon his wife a

(See next page, please)

degree from the University. Mrs. Walter Williams, wife of the President, received a Master of Arts degree.

Then when the hundred M.A. and Ph.D. degrees had been awarded, Dr. Williams called forth the three men on whom the University was to bestow its highest academic honor, the Doctor of Laws degree.

"Manley Ottmer Hudson," said the President, "lawyer, scholar, author, publicist, former member of the secpublist, former member of the secadviser in international relations, active worker in the cause of peace, I confer on you the degree of Doctor of Laws from the University of Missouri, with all the honors and privileges thereunto appertaining."

Next, the degree was bestowed on William Benjamin Smith, professor of physics and mathematics in the University from 1885-1893 and now professor emeritus of Tulane University, "a personality in whom university training and university ideals have borne the finest fruition: mathematician, philosopher, critical theologian, classicist, authority on a variety of subjects, poet—in the fullest and richest sense of the word, a humanist."

And then, Wilbur Andrew Cochel, president of the University Alumni Association, editor of the Weekly Kansas City Star: "editor, international authority on the cattle industry of the world, professor of animal husbandry at Purdue University, Pennsylvania State College, and Kansas State Agricultural College; member of the Kansas Council of defense and advisory committee of five on beef production during the World War; author, agricultural leader and distinguished citizen."

Arthur Doerr Bond, vice-president of the Alumni Association and member of the first class to recite the pledge of allegiance, then administered the pledge, and the eight hundred newly created alumni rose and repeated after him:

"I, (and each student gave his name), as a graduate of the University of Missouri, hereby pledge to her my loyalty and my devotion. I dedicate to her welfare the gifts that I have received from her; and those ideals of honor, of truth, and of service that she has inspired I take as the guiding ideals of my life."

The audience and graduating class then sang "Old Missouri," the benediction was said, and the eighty-ninth annual spring commencement and the school year 1930-31 came to a close.

ATHENAEAN HALL A MILITARY PRISON

Judge N. T. Gentry Tells of Escape of Thirteen Confederates at Night

The Athenaeon society hall was on the second floor of the old main building, on the South side, and Prof. Bolivar S. Head, later of Randolph county, had his class room on the floor above; this class room was many years later the class room of the late Dr. J. C. Jones. During the Civil war, the University of Missouri was practically closed, and Federal soldiers quartered in the building, and their horses were kept in the back campus. In February 1862, this third-floor class room was used as a prison for Con-

federate soldiers, and a guard was kept at the door on that floor. At one time, thirteen prisoners were there confined, among them two old Athenaeans, Walter W. Stone and James Wilson, both of Boone county. They well knew the situation of the rooms, and especially the old society hall just below them. Mr. Stone's mother had long lived in Columbia and came highly recommended, so she obtained permission to bring her son a baked turkey for Sunday dinner. But in the dressing of the turkey, she concealed a knife and a saw; and they were so nicely covered over with gravy that the guards never detected them. The saw made too much noise; but with that knife Stone and Wilson cut a hole in the floor and through the ceiling of the Athenaeon hall, and made ropes of their bed clothes. These young men were equal to any athletes of to-day; for at midnight all thirteen climbed down that rope, hand over hand, and made their escape through the back campus, crawling on the ice and snow, in between the horses and wagons. Stone said that one horse became frightened and gave a snort, which to him sounded as loud as a pistol shot. The boys sprang to their feet and ran like modern track men, perhaps surpassing the records of the trained foot racers of today. All of them were retaken except Stone and Wilson, who made their way on foot to a point near Providence, on the Missouri river. There, they borrowed a skiff, while the owner was asleep; and in that skiff they floated down the Missouri to the Mississippi, and down the Mississippi to Memphis, where they again joined their regiment, remaining in the service till the end of the war. Mr. Stone then located in Mississippi and became State Auditor of the commonwealth. The fact that the mother of Stone furnished the young men with a knife was not known till after the war.

Mabel Emma Blair, A.B. '29, is living in Jefferson City, 1120 Moreau Drive.

THE SOUTH WING OF THE MEMORIAL UNION

The work on the South wing of the Memorial Union is going on rapidly. The contract calls for the completion of this first unit, which includes the foundation and the walls up to the floor of the Great Hall, on July 31, 1931, but the contractor assures us that this work will be completed by July 1, 1931.

The work is being done in a thoroughly satisfactory manner, and already we can see that architecturally this South wing will be the most attractive building on the campus.

It is in the highest degree important that subscriptions should be paid up so that the Memorial Committee may have the funds, not only for paying for this first unit, but also for proceeding with the work so that the building may be completed at the earliest possible moment.

VISITS UNIVERSITY

Wm. L. Seddon, who was graduated from the College of Engineering as a Topographical Engineer in 1881, visited the University during Commencement Week, the first time he had been in Columbia in many, many years. He is chief consulting engineer for the Receivers of The Seaboard Air Line Railway Co., with headquarters in Norfolk, Va.

THE HUMAN SIDE

Rex B. Magee, '14, advertising manager of the Lamar Life Insurance Co., Jackson, Miss., was recently made chairman of the Southern regional group meeting of the Insurance Advertising Conference, has had one of those colorful careers which come to so many newspaper men. He began his career as a reporter and sporting editor of the News-Herald in Joplin, Mo. Next he became advertising manager in Missouri and Kansas for the Taylor Isaacs Drug Co. of Louisville. Next jump was to the newspaper business again. He became traveling reporter for the Merchants Trade Journal; then sporting editor of the Columbia (Mo.) Tribune; next city editor of the Daily News, Jackson, Miss.; state editor of the Daily States, New Orleans; night editor, Associated Press, New Orleans. Along came the World War and he was a first lieutenant and then a captain. He became federal prohibition inspector in charge of Mississippi. Returning again to journalism he was managing editor of the Jackson, (Miss.) Daily News. Then he was made state service commissioner and department adjutant of the American Legion; editor and publisher of the Mississippi Veteran for the state department of the Legion; and finally got into life insurance as publicity director of the Lamar Life. He is making a good job of this post.

Virgil W. Surber, B.S. E.E. '11, Tau Beta Pi, Eta Kappa Nu, is the Ohio Manager of the Indiana Engineering & Construction Co., Federal Oil & Gas Bldg., Akron. He was graduated from the Moberly (Mo.) High School in 1903. He takes an active part in alumni affairs.

EDWIN WILLIAM STEPHENS

1849-1931

Edwin William Stephens, who died at his home in Columbia May 22, was born in Columbia, Missouri, January 21, 1849, the son of James Leachman Stephens, for whom Stephens College was named. Mr. Stephens resided all his life in the city of his birth, and was prominently identified with various phases of public life in the state of Missouri. He was never a candidate for any political office, although for a number of years was urged by his friends and by the press to become the standard bearer of his party for the office of governor.

Mr. Stephens was a graduate of the University of Missouri, class of A.B. 1867, A.M. 1870, and was later honored both by that institution and by William Jewell College, at Liberty, with the degree of LL.D. He served as president of the Board of Curators of the State University, also as president of the honorary society of Phi Beta Kappa, and of the Missouri Union. For forty years he headed the Board of Curators of Stephens College, in which position he gave the best energies of his life and the fruits of his educational training, as well as liberal contributions of his means.

By profession a newspaper man, Mr. Stephens began his career in 1870 as publisher of the Columbia, Missouri Herald, known for many years because of its editorial and typographical excellence as "America's Model Weekly." Starting with that newspaper as a foundation, he afterwards built up a large publishing business, the products of which have found their way into many states. The plant specialized first in publication of Supreme and Appellate Court Records, and official legal publications of various states, notably: Missouri, Tennessee, Iowa, Arkansas, Georgia, Mississippi, Nebraska, Oklahoma, Texas, and Mexico. It is now given over to the manufacture of large edition books.

While active in the newspaper business, Mr. Stephens was president of the Missouri Press Association, the National Editorial Association, and Vice-President of the World's Press Congress, elected at Liege, Belgium.

Mr. Stephens not only attained leadership in his profession and in the cause of education, but became one of the most prominent laymen in the Baptist Church of America. For twenty years he was president of the Southern Baptist Convention, within whose realm are more than five million communicants. Upon him was conferred the unusual honor of being elected also Vice-President of the Northern Baptist Convention. He was moderator of his district association, treasurer of

the European Baptist University, and of the Roger Williams Memorial Church, Washington, D. C., American representative to the Baptist World Alliance in London in 1905, for twenty-six years chairman of the Missouri Baptist Board of Home and Foreign Missions, and also for a time president of the Young Men's Christian Association of Missouri.

During the course of his life the subject of this sketch has been identified with practically every public enterprise in his county and community, active always in religious, moral, and educational movements, and responsive to the call of his state for public service. He was pioneer advocate of good roads before the day of highway building programs, and his work as head of "The Old Trails" Association did much to have it later designated as the main cross-state highway of Missouri, and a part of the federal U. S. Route 40 from coast to coast.

In 1886 Mr. Stephens was appointed a member of the commission to locate and build State Hospital number 3 at Nevada, Missouri. He was elected chairman of the commission. In 1911 he was chosen by the state officials on Missouri, headed by Governor Herbert S. Hadley, to become a member of a bi-partisan board for the erection of a new state capitol building. Mr. Stephens was elected president of the Board, and the crowning achievement of his life was to have a part in the construction of one of the handsomest public buildings in America, without hint of scandal or mismanagement, extravagance, or fraud. Out of an appropriation of four million dollars the state

capitol of Missouri was built, furnished, additional grounds purchased, and a balance turned back to the treasury. The reproductive value of the property at this time is estimated at over ten million dollars.

While devoted to movements of state-wide and national scope, his chief interest in public affairs was centered around his native community. For half a century he was the leader in the principal efforts for upbuilding of Columbia. When the University was burned in 1891, he not only contributed liberally of his means, but led a bitter fight for its relocation in Columbia. He served as Chairman of organizations which secured for his city the Hamilton-Brown shoe factory, one hundred thousand dollars for local roads, and the erection of the Daniel Boone Tavern. In addition to being a liberal contributor to all public enterprises, he raised more money for the institutions of Columbia than any other citizen.

For thirty years as editor of the Columbia Herald, Mr. Stephens contributed to the editorial columns of that paper and became famous for his forceful writing and trenchant style. For a considerable time he contributed weekly articles to the Central Baptist of St. Louis, containing comments on the International Sunday School Lessons. A world-wide traveller, he wrote extensively of his travels, and is the author of a volume entitled "Around the World," written in 1908.

The mother of Edwin W. Stephens was Amelia Hockaday, the daughter of Irvine O. Hockaday and Emily Mills, who came to Callaway County, Missouri, at an early day from Winchester, Kentucky. Upon his father's side he was descended from the Stephens and Renfrow families who came first from Scotland, settled in North Carolina before the Revolutionary War, and thence moved to Garard County, Kentucky and Boone County, Missouri. He was married in Columbia, Missouri, September 26, 1871, to Miss Laura Moss, daughter of Col. James H. Moss, well known lawyer and soldier of the Mexican War, and granddaughter of Judge Warren Woodson, prominently identified with the early history of central Missouri. Mrs. Stephens has achieved all as a woman and mother that Mr. Stephens has as a man. In all Christian and charitable work she has been his complement; in every task he has undertaken she has been a wise counsellor, and ever in sympathy with his undertakings. Of the ten children born to this union, four survive: Hugh Stephens, of Jefferson City; James L. Stephens, of Los Angeles; E. Sydney Stephens, of Columbia; and Mrs. Ashley Gray, of St. Louis.

With the Alumni Associations

JOURNALISM COMMITTEES APPOINTED

Egger Announces Plans for Journalism Alumni Activities

The Journalism alumni are to have a constructive program for the future, according to plans which have just been completed by E. R. Egger, President of the Journalism Alumni Association.

"Two outstanding proposals made by School of Journalism alumni gathered in Columbia for the twenty-second annual Journalism Week merit the thoughtful consideration of each graduate and former student," according to President Egger. "These are (1) establishment of an Alumni Foundation for the School of Journalism, and (2) the holding of an annual reunion of journalism alumni in Neff Hall on Homecoming Day each fall.

"It is an honor to have been graduated from or attended the School of Journalism at Missouri. As the first school of its kind in the world, it stand pre-eminent in this field of professional training. Further dignity and honor attaches to the institution through the fact that its founder, Dr. Walter Williams, now occupies the chair as President of the University. His selection for this high post is fitting recognition of his international prestige, won through his untiring efforts in behalf of the School of Journalism.

"Establishment of an Alumni Foundation will do much to further the fine work done by Dr. Williams and Dean Frank L. Martin. In taking this step, the Journalism alumni will be following the fine example set by alumni of other schools. Realizing the necessity for careful consideration before final action is taken, I hereby appoint the following committee to study existing plans and report recommendations for the establishment of such a foundation at a meeting of alumni to be held on Homecoming Day next fall: J. Harrison Brown, Vice-President, A. P. Green Fire Brick Co., Mexico, Mo., Chairman; Ward A. Neff, Publisher, Corn Belt Dailies, Chicago; James W. Caudle, President, Herald-Statesman Publishing Co., Columbia, and Lawrence E. Whitehead, Advertising Manager, A. S. Aloe Co., St. Louis. With a view to making the plans for the Foundation conform with the needs and future plans of the School of Journalism, I have taken the privilege to appoint Dean Frank L. Martin as Advisory Member of this committee.

"The plan to make Homecoming Day the occasion for an annual reunion of Journalism alumni also calls

for considerable thought and preparation. To further this object, I have appointed the following committee, to proceed along such lines as it sees fit: Thomas C. Morelock, Associate Professor, School of Journalism, Columbia, Chairman; John C. Stapel, Publisher, Atchinson County Mail, Rock Port; Harold L. Hancock, Advertising Manager, Corticelli Silk Co., New York, and Ben G. Kline, Consolidated Press Association, San Francisco. It is my pleasure to appoint Robert L. Hill, Director of Alumni Activities, and a former student in the School of Journalism, as Advisory Member of the Homecoming Reunion committee.

"I pledge my best efforts to carry on the work of the Journalism Alumni Association so ably conducted during the past year by Chas. E. Kane. I am certain that I shall be efficiently aided by Vice-President Herschel M. Colbert and Secretary Tom Morelock in carrying out the tasks set before us."

WALTER WILLIAMS HAM LUNCHEON in the DISTRICT OF COLUMBIA

Miss Elizabeth Northcutt, Secretary-Treasurer of the University of Missouri Alumni Association in the District of Columbia, has reported for the Alumnus what was called the "Walter Williams Ham Luncheon."

Following the visit of President and Mrs. Williams to Washington, where they were entertained by the District of Columbia Alumni Association, as reported in the May issue of the Alumnus, President and Mrs. Williams presented the District of Columbia Alumni with a very fine large ham, the product of Rockhurst, the farm home of Mr. Marshall Gordon.

The ham was served at the weekly luncheon of the Alumni at the University Club on May 13. The ham was consumed with great gusto, and acknowledged to be superior to the well known brand of Smithfield hams, which are ordinarily considered the best hams in the Washington market. A vote of thanks was unanimously passed and forwarded to President and Mrs. Williams by Miss Northcutt Secretary of the District of Columbia Alumni Association on behalf of its membership.

The members of the District of Columbia Alumni Association, who enjoyed feasting on the Walter Williams ham were:

Milo Brinkley
F. F. Espenchied
John B. Gordon, President, District of Columbia Alumni Association
Mrs. John B. Gordon
Dr. Charles R. L. Halley, Vice-President, District of Columbia Alumni Association
Floyd F. Hanly
John Hornback
Roy E. Miller
Miss Elizabeth Northcutt, Sec'y-Treas., District of Columbia Alumni Association
Miss Ethel Owings
Ollie E. Reed

Miss Madge Reese (Speaker)
Preston Richards
Mrs. F. B. Scheetz
Professor John W. Scott
L. M. Short
H. L. Shrader
Dr. W. J. Spillman
J. C. Spotts
G. B. Thorne
James H. Van Waggenen
Mrs. Jena DeImhoff Young

It is customary at each luncheon of the District of Columbia Alumni Association for one of the members of the Association to deliver an address on some interesting phase of his or her work. At the "Walter Williams Ham Luncheon" Miss Madge J. Reese, field agent of the Home Demonstration and Club Work of the Department of Agriculture, western section, was the speaker. A brief resume of Miss Reese's remarks follows:

"The United States Department of Agriculture cooperates financially and otherwise with the 48 States, Territories of Hawaii, Alaska and Porto Rico, in the Cooperative Extension Work in Agriculture and Home Economics. The service is a great educational system which takes the University to the farming population. It takes the findings of the experiment Stations and research to the farm people. It works over scientific information into understandable language and instructs, assists and guides men, women, boys and girls to make the practical application in improving methods and practices on their own farms, in their own farm homes and in their community activities and developments.

"The methods are more or less demonstrational. Some wise men say we learn at least ninety-five per cent of what we know through the eye. We believe people learn to do, and to be, by doing. One early founder and philosopher, Dr. Seaman Knapp, said, 'What one hears he often doubts, what one sees he sometimes doubts, but what one does, he cannot doubt.'

"Like in many other worthwhile educational movements and developments a Missourian helped to lead, gave vision to the world. The Missourian that gave encouragement in the initiating of the Extension Service was Dr. W. J. Spillman, who is one of the Directors of the District of Columbia Alumni Association. Great tribute was paid Dr. Spillman at the Silver or Twenty-Fifth Anniversary of the Cooperative Demonstration Work held at Houston, Texas, in 1928.

"Today the service employs 6,126 men and women, 71 per cent are extension agents in counties, known as agricultural agents, home demonstration agents and 4-H boys' and girls' club agents. Others employed are directors, supervisory leaders, and specialists in the many phases of agriculture and home economics. In addition, 293,000 farm men and women in 1930 gave volunteer service as local leaders. 822,000 rural boys and girls between the ages of ten and twenty belonged to the 4-H Boys' and Girls' Clubs.

"The list of the extension activities and the means and agencies used in extension work are: (1) farm and home visits; (2) demonstration meetings of various kinds; (3) popular and scientific publications; 4) circular letters;

(5) state and local press; (6) radio; (7) exhibits; (8) conducted tours; (9) lantern slides, strip film and motion picture; (10) achievement day events; (11) encampments. The grand total attendance at all meetings sponsored by the extension service in 1930 ran into the thirty millions.

"The extension work is fundamental economic and takes into consideration pre-economic forces, economic forces and post-economic forces. Pre-economic forces have to do with the cultivation of brains, the economic forces with the conquest of bread and the post-economic forces with the capture of beauty for the countryside.

"The Cooperative Extension Service was organized July, 1930 in Alaska at the Territorial Agricultural College at Fairbanks. A cable has just been received stating that the first territorial appropriation for extension work had been granted by the territorial assembly.

"The Cooperative Extension Service was organized in the Territory of Hawaii, July, 1928, and the work is progressing nicely. Hawaii is a very important part of the United States. The territory pays more Federal tax than sixteen of our states on the mainland. The most interesting thing in Hawaii is the harmonious working together of a large number of different nationalities in an Americanized manner—Hawaiian, Japanese, Chinese, Chinese-Hawaiian, Portuguese, Filipino, European whites and American-born whites. They work together in civic affairs, in church and in all educational affairs."

Miss Reese's connection with the service is in the capacity of Field Agent representing the Federal Office of Cooperative Extension Work in the Western Section which comprises the eleven Western States, and the Territories of Hawaii and Alaska.

CHAS. W. HERALD, JR., HEADS ST. LOUIS ALUMNI

Chas. W. Herald, Jr., B.S. in Forestry '17, Alpha Tau Omega, real estate and real estate appraiser, 715 1/2 Chestnut St., was elected President of the St. Louis Alumni Association, at their annual dinner meeting at the Kingsway Hotel on May 18. Campbell Alexander, A.B. '29, was elected

Vice-President, and Miss Edna Baack, B.J. '29, of the St. Louis Globe-Democrat, Secretary.

Professor Chas. E. Germane of the School of Education and Lawrence McDaniel, '03-05, Attorney of St. Louis, were the principal speakers.

Marvin E. Boisseau, the retiring President, presided at the dinner.

Don't forget the daily luncheons of the St. Louis alumni at the Busy Bee.

Missouri University Day at the State Fair, Sedalia, will be Big Thursday, August 27th.

There will be a 12:10 o'clock noon luncheon at Mrs. Kahler's Dining Hall on the grounds. Alumni, former students, students, and friends of the University are cordially invited to attend this delicious luncheon during which there will be music by an orchestra, singing by University singers, and singing of varsity songs. Following the luncheon there will be short talks by interesting University speakers.

The luncheon and program will last but an hour. University folks should plan to attend the luncheon, enjoy the meeting of old friends, meet new friends, keeping alive the varsity spirit.

Vernon Nash and Shigeo Soga

Honolulu. He visited Mr. Nash in Peking during the first Journalism Week held at Yen-ching University.

C. B. ROLLINS GIVES ANNUAL QEBH DINNER

The annual dinner given to the members of QEBH by C. B. Rollins, Jr., A.B. '12, LL.B. '14, was held at the Tiger Hotel on May 19. Each year Mr. Rollins is host to the members of QEBH and the members-elect. The members this year are: James A. Finch, Chas. J. Hughes, Chas. E. Shepherd, Albert C. Pull, J. Mack Gladden, J. Kenneth Gerdel, Julius L. Fogel, M. Karl Goetz. The members-elect are: Edgar L. Barbee, John R. Graves, Wm. H. Harrison, Joseph A. McCollum, Jack V. Pollitt, James E. Shepherd, James C. Wilson.

Professor L. M. Defoe, Albert K. Heckel, Dean of Men, and R. L. Hill, Director of Alumni Activities, were guests and speakers at the dinner.

PRESIDENT OF DAILIES

Ward A. Neff, B.J. '13, who since May, 1929, has been President of the Corn Belt Farm Dailies, and has been Vice-President of all the subsidiaries; Drovers Journal Publishing Co., Journal-Stockman Co., Reporter Publishing Co., and Secretary of the Drovers Telegram Co., was recently made President of all, with headquarters in Chicago, 836 Exchange Ave.

UNIVERSITY APPROPRIATIONS INCREASED

Governor Signs Bill Giving University Quarter Million More

The University of Missouri appropriations bill has been signed by Governor Caulfield which provides approximately a quarter of a million dollars more for the coming biennium than was received two years ago.

Due to the lack of revenue the Governor was compelled to veto items amounting to \$78,940 and to hold up items amounting to \$351,000, which in all probability, will be made available in time to prevent any embarrassment to the University program.

The Governor had already vetoed items in a building bill passed by the legislature which included \$300,000 for a new wing to the University Library and \$115,000 for the purchase of land and improvements for the College of Agriculture.

The following items in the university appropriations bill were held up by the governor, subject to revenue becoming available for their release:

| Personal Services | |
|----------------------------------|------------|
| Salaries, university, | \$100,000. |
| Agricultural extension, | \$5,000. |
| Outlying experiment fields, | \$3,650. |
| Hatch experiment fields, | \$1,400. |
| University extension, | \$6,000. |
| Additions | |
| University, | \$50,000. |
| Agricultural experiment station, | \$1,000. |
| Outlying experiment fields, | \$1,000. |
| Hatch experiment farm, | \$4,625. |
| Repairs and Replacements | |
| University, | \$50,000. |
| Agricultural experiment station, | \$2,000. |
| Outlying experiment fields, | \$950. |
| Hatch experiment farm, | \$1,875. |

DEAN F. B. MUMFORD IS GRANTED LEAVE

To Spend Six Months in Europe
Doing Research.

F. B. Mumford, Dean of the College of Agriculture, has been granted a six months leave of absence from his duties with the University, by the Board of Curators. He sailed from New York on the nineteenth for Europe and will spend most of his time in England, France, and Germany making a first-hand study of agricultural conditions and governmental plans for farm aid in Europe. Dean Mumford goes as a representative of the United States Department of Agriculture and the American Association of Land Grant Colleges.

The chief objectives of Dean Mumford's mission will be to study the enlarged plans of European governments for agricultural research and agricultural education since the World War; to obtain first-hand information on the policies and activities the European governments have developed to aid farmers in overcoming the deflation following the war; and to attempt to form a clear conception of the real economic situation of the farmers of the world, the agricultural situation in Europe and what effect it has on American agricultural enterprises.

Dean Mumford has been continuously in the service of the University for thirty-six years and for twenty-two years dean of the College of Agriculture. In his absence Professor M. F. Miller will act as dean.

Dean Mumford has three degrees from his alma mater, Michigan State; B.S., M.S. and Doctor of Agriculture; also the degree of D.Agr. conferred by the University of Nebraska. He studied at the University of Leipzig in 1900 and at the University of Zurich in 1901. He is the author of a very successful College text on animal breeding and of many monographs and articles on related subjects. Besides his work as an educator, he has to his credit a record of distinguished services to the Nation during the World War, when he was chairman of the Missouri State Council of Defence and Federal Food Administrator.

During the 22 years that F. B. Mumford has been dean and director, the College of Agriculture has developed and expanded until it is now recognized as one of the outstanding institutions of its kind in the world. When Mr. Mumford first became identified with the College in 1895 there were but four teachers besides himself. There are now on the staff of the institution, at Columbia and throughout the state more than 220 persons serving agriculture as investigators, teachers or extension workers.

S. F. MERRIAM APPOINTED GENERAL TRAFFIC MANAGER

S. F. Merriam, E. E. '13, formerly Division Traffic Superintendent, Baltimore, for the Chesapeake and Potomac Telephone Company of Baltimore City, has been appointed General Traffic Manager for the C. and P. Company in Virginia.

Mr. Merriam began his telephone career with the Southwestern Bell, at St. Louis, in 1913. He became Engineer, in the Plant Department, in 1915. Later, he was transferred to the Traffic Department, and after various promotions, was made Traffic Chief, at St. Louis, in 1924. The following year he became an engineer in the Operation and Engineering Department of the American Telephone and Telegraph Company, at New York City.

Berryman Henwood, LL.B. '04, cum laude, Phi Delta Phi, is Justice of Supreme Court, Jefferson City, Mo. He married Miss Adele Tucker, former student. They have four children, one son and three daughters.

Mrs. William L. Skaggs, A.M. '24, was recently re-elected county superintendent of schools of Greene county, Ark.

Gerald Annin, B.S. in Ag. '26, Alpha Zeta, is living in Madison, Wis., 1800 University Ave.

Fletcher Cowherd, LL.B. '79, Phi Beta Kappa, is president of the Fletcher Cowherd Co., Real Estate & Investments, 900 Grand Ave., Kansas City.

Dr. J. V. Bell, A.B. '17, Kappa Alpha, is a physician, 1800 Federal Reserve Bank Bldg., Kansas City. He married Miss Olive House of Chicago.

James T. Cross, Pe.P '81, is a lumber dealer, 311 North Clark St., Moberly,

NEW MANAGER, DALLAS INSURANCE AGENTS' ASS'N.

Alfonso Johnson, B. J. '22, Acacia, Alpha Delta Sigma, Kappa Tau Alpha, director of the trade extension division of the Dallas Chamber of Commerce, has been chosen manager of the Dallas Insurance Agents' Association. He will assume his duties August 1. Mr. Johnson was for several years business manager of The Columbia Missourian and from 1918 to 1920 was Business Manager Japan Advertiser, Toyko. He married Miss Dott Walker, former student.

Mo. He writes, "it has been just fifty years since I graduated at the University, but I still read the ALUMNUS with much interest." Mr. Cross was mayor of Moberly in 1919-1920.

Henry Elliott, Jr., A.B. '08, LL.B. '10, Phi Delta Phi, Delta Sigma Rho, Phi Beta Kappa, Theta Kappa Nu, is an attorney in Seattle, Wash., 495 Dexter Horton Bldg. He married Miss Juliet Thomas, a graduate of Stephens College, Columbia. They have a son, Thomas Henry, fourteen, and a daughter, Virginia Lee, six.

Henry Newton Ess, LL.B. '12, S. A. E., Tomb & Key, is an attorney in Kansas City, 1500 Dierks Bldg. He married Miss Mildred McBaine, former student. They have two children, Henry N., Jr., and Elizabeth.

Horace R. (Hunk) Davis, A.B. '10, is in the Ambassador Bldg., St. Louis. His home address is 7631 Westmoreland Ave., Clayton.

John W. Graves, B.S. in B.A. '26, Delta Tau Delta, Tri Chi, Alpha Kappa Psi, is in the telephone business, 100 West Monroe St., Chicago. He lives at 1209 Sherwin Ave.

John Thomas Garrett, T.E. '88, C.E. '89, is president of the Missouri Bridge & Iron Co., 1000 Fullerton Bldg., St. Louis.

"Wherever we look the work of the chemist has raised the level of civilization, and has increased the productive capacity of the nation."

—CALVIN COOLIDGE, *Address to the Delegates of the American Chemical Society at the White House, April 24, 1924.*

All the large industries of the country employ several chemists and a number of them employ scores of chemists. There is practically no business today whose welfare and interest is not bound up with chemistry. What are some of the fields in which the chemist renders conspicuous service?

Of the 25,000 chemists in the United States the majority are connected directly with industry. Chemistry is a practical science. Like its sister science, physics, it touches everyday life on every hand. None presents more opportunities for employment. Some sciences offer relatively few openings for professional service outside of teaching. But the large industrial field beckons to the qualified chemist. He may find employment in the large field of metallurgy, including the iron and steel plants, the winning from their ores of the metals, copper, zinc, lead, aluminum, nickel, chromium, and the precious metals. The purification of these metals and their conversion into useful compounds demands control work by the chemist at each step in the process. He is employed in establishments for the production of foods, fertilizers, soaps, paints, oils, drugs, rubber, photographic supplies, explosives, plastics, paper, cement, gas, beverages, and a variety of synthetic products. He may be engaged in research to prevent waste, to utilize by-products and to create new compounds, or devise new uses for old ones. In any case by the very nature of his service, he will be near the heart of industry, and if he puts his wits to work, he will rise in his profession. He will be called to assume a position of responsibility in the organization in charge of production or in the executive staff. In a few

WHY STUDY CHEMISTRY?

By

HERMAN SCHLUNDT, *Chairman Dept. of Chemistry, Professor of Physical Chemistry*

fields of chemistry women have a good chance for service.

So broad is the field of chemistry and so diversified are its applications that the American Chemical Society has organized special divisions for its different groups. Besides the divisions of Agricultural, Physical, Organic, and Industrial Chemists, there are divisions in still more specialized fields such as Cellulose, Colloids, Dyes, Paint and Varnish, Rubber, Sugar, Petroleum, Water Sewage and Sanitation. At the Spring and Fall National Meetings of the Society each of these Divisions holds several sessions for the presentation of papers and discussions.

To get an idea of the large number of theoretical and technical papers that are published yearly in the field of chemistry one should take a look at the "annual volume of Chemical Abstracts," published by the American Chemical Society. When the twenty-five issues for the year are assembled, the volume is not unlike a dictionary in size, about 5000 pages. The abstracts are brief, sometimes too brief, for if the original papers published for the year, 1930 alone, were assembled, the volumes would demand a book shelf thirty feet long.

Chemistry is organized as a department in the College of Arts and Science. As a department it ranks first in the number of students enrolled in it as majors. During the session 1930-1931 a total of 112 students (Juniors and Seniors) were classified as majoring in chemistry; and during the last semester 89 students were actually enrolled with chemistry as their major. This enrollment does not include the twenty odd students (upperclassmen) in the College of Engineering who are classified as Chemical Engineers; nor does it include the students in the College of Agriculture who are majoring in Agricultural Chemistry nor the students majoring in the newly established Department of Bio-chemistry. In this count are not included the students who make chemistry their major field of study and who are registered in the School of Mines and Metallurgy at Rolla.

To keep abreast of the rapid advances in chemistry and to promote and maintain a professional interest in chemistry the American Chemical Society has organized Local Sections, calling for a minimum membership of twenty-five. The University of Missouri Section now has about forty active members, and holds regular monthly meetings for the presentation of papers. These meetings are frequently addressed by distinguished chemists from other institutions; and

chemists prominent in some of the chemical industries. During the past ten years with one exception the local section has been honored each year by a visit of the President of the American Chemical Society.

The students in chemistry maintain two professional organizations. One of these, Alpha Chi Sigma, was formed in 1906, and now has an active membership of twenty-five men. Pi Delta Nu, an organization of women majoring in chemistry has headquarters in the New Chemistry Building where its regular meetings are held. Both of these groups have been helpful in promoting departmental activities and in entertaining distinguished guests.

Chemistry has developed rapidly with a general gain in the enrollment of students in the University from year to year. The Chemistry Department, thirty years ago, when I joined the staff as instructor, shared the Old Chemistry Building near the Columns, with Agricultural Chemistry and Medical Bacteriology. Some years later the overflow freshmen were given laboratory instruction in the new Veterinary Building. Later, the freshmen were assigned laboratories and class rooms in Schweitzer Hall. Seven years ago the freshman year of work in chemistry was transferred to the New Chemistry Building on the White Campus and the course work in Analytical Chemistry was moved from the old Chemistry Building to the top floor of Schweitzer Hall, leaving in the Old Building the divisions of Organic and Physical Chemistry and the new Department of Chemical Engineering.

The importance of chemistry either as a science or in its practical bearings cannot be overestimated. It is the cornerstone of medicine, pharmacy, sanitation, agriculture, and other sciences. There is no business today whose welfare and interest are not bound up with chemistry.

The chemist is not a destroyer; he is a builder, a creator. The chemist is making a new world. The great French chemist, Berthelot, calls chemistry the most creative of the sciences, because it penetrates most profoundly into the nature of things and deals with the atoms of which things are made. The atoms the chemist has further analyzed, and found to consist of protons and electrons, the elemental building units in the universe of matter. The chemist begins by taking things apart; he analyzes the physical world; then he proceeds to put atoms and molecules together again and sometimes in an entirely new pattern, and thus synthesizes new products, which are often quite different from anything that ever existed on earth (Turn to page 304, please)

SUMMER SCHOOL ENROLLMENT SHOWS INCREASE

With an enrollment of 2641 the 1931 summer session of the University reaches a new high mark, exceeding by 162 the previous record of two years ago and by 192 the registration of last summer. Of the total 2210 are enrolled at Columbia as compared with 2100 two years ago, and 431 are registered for work at Rolla where the enrollment was 379 two years ago.

Graduates of fifteen years ago returning to the University find more students on the campus this summer than greeted them when they entered the regular session as freshmen in the fall of 1912. They find nearly three times as many students as were enrolled in the summer of 1912 and almost twice as many as were enrolled in any summer prior to 1924.

Increases over 1930 are shown in the College of Agriculture, the School of Journalism and the Graduate School. The other divisions have about the same number of students as last year. One of the most gratifying features of enrollment is the marked upward trend in the Graduate School. The graduate enrollment passed the thousand mark for the first time in the history of the University either in regular or summer sessions. Graduates of more than 60 other colleges and universities are registered the current session for work leading to the Masters and Doctors degrees and 150 or more of them expect to complete the requirements for one or the other of those degrees. When one compares that number plus the June class (99 Masters and 8 Doctors) with the class of 1920, for example, with 47 A.M.s. and 2 Ph.D.s. the increasing importance of the University of Missouri as a center of advanced study and research work is better appreciated.

The Rolla branch of the summer session has been conducted since 1924 largely for the convenience of teachers of the south central section of Missouri. It has no connection with the School of Mines except that the plant and facilities of the School, including the gymnasium, swimming pool and athletic grounds are placed at the disposal of the summer session. The same standards prevail at Columbia and at Rolla. The faculty of the Rolla summer session is selected from the regular faculty at Columbia, from the faculty of the School of Mines with a few men of high standing invited from other colleges and universities.

Formal commencement exercises close both divisions of the summer session, July 31 at Columbia and August 1 at Rolla.

| Enrollment by schools and colleges: | |
|--|------|
| Agriculture | 132 |

| Operation | |
| Soil survey, \$5,000. | |
| Horticultural experiment substations, including potatoes, \$7,000. | |
| Reimbursement of endowment fund, \$6,440. | |
| Promotion of bee industry in the state, \$2,500. | |
| The Governor has released \$50,000 of the \$100,000 appropriated for the Crippled Children's service in the University Hospital, the other half of which may become available if sufficient revenue is received. | |

WHY STUDY CHEMISTRY

(Continued from page 303)

before. "He thus creates a new world of environment, comfort, and beauty." Then, "Why Study Chemistry?" Chemistry opens the 'eyes of the mind' to the mysteries of the world about us; it unfolds the marvelous structure of the world of matter; it transforms the simple inorganic elements of nature into complex organic forms, and so reveals to us a wonderful universe, inspiring and challenging. Who can say with more reverence than the chemist—Great are the works of the Lord?

The Missouri Alumnus

Established 1912

Vol. XIX JUNE, 1931 No. 10

R. L. (BOB) HILL, Editor and Manager

Officers of the University of Missouri Alumni Association.

W. A. Cochel, A. B. '97, B. S. in Ag. '05, Kansas City, Mo., President; Louis V. Stigall, LL. B. '10, St. Joseph, Mo., First Vice-President; Arthur D. Bond, A. B. '25, Mexico, Mo., Second Vice-President; R. L. (Bob) Hill, B. S. in Ag. '12, M. S. '13, Columbia, Secretary; S. F. Conley, A. B. '90, Columbia, Treasurer.

Board of Directors composed of representatives of Alumni Associations of Divisions in the University; Agriculture, Guy Q. McDaniel, Bolivar; Engineering, L. W. Helmreich, Jefferson City; Law, Wallace W. Fry, Mexico; Education, A. G. Capps, Columbia; Arts, Judge Kimbrough Stone, Kansas City; Journalism, J. Harrison Brown, Mexico; Business and Public Administration, T. S. Vickroy, St. Louis; Medicine, Dr. Edwin L. Miller, Kansas City; Graduate, Ralph Watkins, Columbia; Fine Arts, Dillon Greenlee, Curryville.

THE MISSOURI ALUMNUS—Published ten months each year by the sons and daughters of the University of Missouri. Entered as second class matter October 8, 1912, at the postoffice at Columbia, Mo., under Act of March 3, 1879.

HOMECOMING REUNIONS

Fourteen class reunions will be held Homecoming Day, November 14, the day the Tigers play Oklahoma in Memorial Stadium. This is the first time that the officers of the Alumni Association have departed from the custom of holding class reunions during Commencement Week. Lack of interest and attendance at Commencement class reunion prompted this change. The result of this experiment will be studied with considerable interest.

These classes will hold reunions: 1861, 1866, 1871, 1876, 1881, 1886, 1891, 1896, 1901, 1906, 1911, 1916, 1921, 1926. Committees will be appointed from the membership of each class to look after the local arrangements for the respective meetings. Notices and circular letters will be sent to all the members of all the classes. Every member will be urged to return and bring the wife or husband and, if any, the children. Opportunities will be provided for breakfast, luncheon or dinner meetings. Each class will be assigned a room in Jesse Hall for the big meeting on Homecoming morning. Each class will elect officers. The general Homecoming week-end program will furnish a diversification of entertainment.

Suggestions for these Homecoming class reunion plans will be welcomed by the Alumni Association officers.

Having left the University of Missouri thirty-two years ago to enlist in the United States Army for the Spanish-American War, Felix Z. Gray, former student '98, returned to Columbia recently for his first visit since leaving, to find that many of his professors and classmates are still living in Columbia.

Mr. Gray commented on how greatly the University has changed and grown since the three years he spent here, and delighted to see the progress the school has made and is making.

Mr. Gray has lived in Douglas, Alas-

ka for the last twenty years, and is auditor, accountant and Industrial Manager of the Alaska Gold Mines Co., Thane. Mr. and Mrs. Gray have just returned from Annapolis, Maryland with their son, Hugh Douglas, who was graduated this month from the United States Naval Academy. Another son, William Gordon Gray was enrolled in the University from 1926 to 1928 in the Engineering School.

One of the most impressive incidents of Commencement Day is the pledge of allegiance which the members of the graduating class make to the University just before the class sings OLD MISSOURI and only a moment prior to their breaking ranks. Is it impressive? You bet! It causes the old Adam's apple to come into play and the tears just can't be held back.

THE PLEDGE

"I, as a graduate of the University of Missouri, hereby pledge her my loyalty and devotion. I dedicate to her welfare the gifts that I have received from her, and those ideals of honor, of truth and of service that she has inspired I take as the guiding ideals of my life."

The pledge was first administered to the class of 1925. Arthur Doerr Bond was a member of that class. As vice-president of the Alumni Association he administered the pledge to the members of the class of 1931.

Dr. Walter Williams was the guest of honor at a banquet at the Tiger Hotel on May 28 given by the members of the Chamber of Commerce, Junior Chamber of Commerce, and the Lions, Kiwanis and Rotary Clubs. It was a good-will party, a love-feast, and dissolved all the imaginary barriers between town and gown. President L. A. Nickell of the Chamber of Commerce presided. The speakers were Dr. James Gordon, Mayor; W. L. Nelson for the Kiwanis Club, C. A. Carmichael for the Junior C. C., George C. Helm for the Lions Club, and O. M. Bartlett for Rotary. Dean F. B. Mumford presented Dr. Williams with a scroll bearing the names of everyone present.

President Williams made many worthwhile suggestions which if adopted will do much for the benefit of Columbia and the University. He reminded everyone that anything which reacts detrimentally to the University likewise affects the town in the same manner.

We hope the Kansas City alumni will influence Roy Roberts of the Kansas City Star to send Tarzan of the Apes down here to school this fall. Coach Stankowski could use him on the Freshman team.

Several of our alumni who sell insurance have recently written policies naming the University of Missouri the beneficiary. Fine! This is good work and just such work as we need for the support of the University. Missourians generally, whether alumni or not, are beginning to realize that the State

University needs and deserves their support, both moral and financial.

The alumni deserve commendation for their thoughtfulness in extending courtesies to the members of the graduating class each year. These courtesies are varied and helpful. Alumni do everything possible to welcome the graduate, to help him secure pleasant and profitable employment, make him acquainted with other alumni, take him to alumni gatherings and look out after his welfare generally. The alumni of Missouri have provided this commendable service and they are to be praised for their thoughtfulness. The members of the 1931 class are now in the field. Before they left the campus we told them that they could expect unstinted cooperation from the alumnae.

Hundreds of letters come to the alumni office inquiring about the qualifications of graduates who have applied for positions. We are happy to provide these letters of recommendation. Any alumnus who takes advantage of this little service should by all means see that we have his record on one of our alumni data blanks. And by all means keep us posted of any change in residence or business address. Don't fail to furnish the alumni office with an address where mail will always reach you.

W. A. Cochel, President of the Alumni Association, is eager to increase the circulation of The Alumnus. We shall send personal appeals this summer to all of our alumni who are not subscribers. You who are subscribers can be of tremendous help in this effort by urging every alumnus to subscribe to THE ALUMNUS. Won't you please help us? Let us all work to the end that THE MISSOURI ALUMNUS will have a record circulation.

The most pleasant and interesting occupation in the world, bar none, is trying to make good as Director of Alumni Activities of the University of Missouri. The alumni are the salt of the earth and to work with and for them is a real pleasure.

The members of the University band stayed over for Commencement this year, the first time they have done this for years. It is hoped that this is a permanent arrangement. Their contribution to the Commencement program is a great one.

James L. Parks, Dean of the School of Law, and Mrs. Parks, entertained the members of the senior law class at their home a week prior to Commencement. This is a most interesting party and a fine thing to do.

Mrs. Sara Lockwood Williams, B. J. '13, wife of President Walter Williams, has written a new book, entitled, THE BIOGRAPHY OF THE COUNTRY NEWSPAPER, which is to be published this fall. THE COLUMBIA HERALD is the subject of the biography, which paper was edited by Dr. Williams, founder and Dean of the first School of Journalism in the world.

Impressions of a Chinese Student at the University of Missouri

By

DAVID C. LU, Exchange Student from Yenching University

It is said that a Chinese student in an American university has four regular "hangouts"—the classroom, laboratory, library, and bedroom. This gives the general impression that Chinese students, as a whole, take little time for recreation, take no part in college life and social activities, study from early morning till late at night; in other words, they come to America to be bookworms. Although much of this may be true, the American reader should be reminded that these students travel 10,000 miles, spend thousands of dollars, are absent from home for several years, and undergo unforeseen dangers to get western education. Naturally they have to be diligent; to cram in as much as they can during their limited stay in this country. This does not only hold true in American universities, but also in Chinese institutions. Probably it would not be too radical to say that students in China, who are able to get a university education, are considered fortunate and can be placed in the semi-privileged category.

Thus when I embarked on my American college career—a career desired by many young Chinese students—I determined to live up to the conventions of the students who have gone before me, not merely to be impressionistic, but because my days were limited and I too, had to make hay while the sun was shining.

Before coming to America I had heard much about the University through contacts with Missouri alumni in China, and particularly about the School of Journalism. To me and other Chinese students, the very word "Missouri" is synonymous with "journalism" and Dean Williams. Ask any returned student in China what university he studied in during his days in the United States, and if the answer should be Missouri, it would immediately suggest the "Dean" of deans and the "mother" of schools of journalism. The fighting grounds of the Tigers, the Columns, the Memorial Tower and Lover's Leap were all familiar places to me before I came here because I had heard many stories about these famous Missouri landmarks. And when I arrived, it was "love at first sight"; it was like coming home.

I remember prior to my leaving the Orient I was warned against the American flapper and the dangers of becoming Americanized. I was urged to preserve my Chinese culture and teachings, and above all to be a good example to the American people.

One academic year has elapsed since I entered the University. This is what I wrote to my friends giving them my impressions of the community and school life during the past year:

"I think it will be a consolation to you and my other friends in China to know that after a year in the University of Missouri I am still as Chinese as when I first left my native shores a year ago. I have honorably kept up with the conventions of the other Chinese students by paying my daily visits to the four popular 'hangouts,' but at the same time, instead of limiting myself to the four walls of the library, books and laboratory instruments, I have enlarged by environment. I have included Harris', Davis', Givan's and other popular student rendezvous. I have joined many a 'bull sessions' and 'jelly hours' and I frankly admit that I have learned much through these contacts and conversations. I have not drawn myself into the shell, so to speak, but have taken a part in the student life, which is so interesting to a new comer.

"I have come with an attitude to preserve the best of my own culture and to try to infuse the best of American civilization into what I have learned. Of course I have kept within certain limits, and I am glad to say that I have been sensible enough to observe what is not good for me and what is.

"For these reasons I have become associated with students of all types in this school. I do not mean to take individual and scattered instances whom I have met under every conceivable circumstance, to generalize the student body. I have become acquainted with the happy-go-lucky fellows, and the hey-hey type. Although they put too much emphasis on good times, they are, after all, well meaning. I admire their frankness and their opportunity to come to college. These students, I am sure can be found in any institution and in every country. On the other hand, I have known intimately students who put their studies before everything else. I remember one evening last winter three of us were sitting before an open fireplace eating nuts and discussing poems of Kipling, Keats and Johnson. Although I could not contribute anything to the learned discussion, I was quite amused to note how earnest they went into the subject. I also have student friends who make their language studies practical by having their own 'German table' or 'French table' where they converse in the language they learn in the classroom. There are innumerable smaller organizations and scholastic fraternities where students and faculty members meet un-

officially out of the classroom to discuss subjects in their special fields and interests. These all tend to convince me that American students as a whole, are earnest in their quest for knowledge.

"Although I have not taken an active part in the college activities, I have watched with keen interest as a sideliners of what has taken place. The first college political campaign which I saw last year is probably as heated as a Chinese revolution or civil war. Students running for office are so serious that it seems like a matter of life or death to them. I have attended many fraternity and sorority dances, where I enjoy with no less degree, although I do not dance, the social contacts and atmosphere of the jazz music, or I should say 'noise,' and the conversation with chaperons and students.

"There is one thing that I will always remember here and that is the friendly atmosphere in Columbia and the University. I had heard that in the South there is some race discrimination. But during all the time I have been here I have never been taken as a 'foreigner' or excluded from any social circle or contacts. I have always been regarded as one of them. Instead of being known as 'Mr. Lu' I am today greeted as just 'Davie.'

"In coming as the first Yenching-Missouri fellow in journalism I feel that I have been accorded special privileges by the University. The authorities in the School of Journalism, in particular, have given me every opportunity to learn about American journalism. I may add, from my observations, that this school not only holds the reputation of being the oldest in the world, but has some of the most loyal students of any institution. I have come as an unofficial good will ambassador. I have been asked about the political, economic and social problems of my country and probably every possible question that indicates that American students are interested in Chinese affairs. I have come to live among American students, knowing their habits, tastes, likes and dislikes. I have known people both high and low, including President Williams, Dean Martin, the city mayor, professors, students, politicians, editors, religious leaders, janitors, laundrymen, barbers, chauffeurs, and even the journalist canine, Oscar.

"I have often wondered, that if more Chinese students could experience what I have in the last year, and learned what I have learned from American students in Missouri, not merely in the classrooms, could there be any misunderstanding between the countries of the United States and China? I am sure that if I cannot contribute much after I return to China, this knowledge of American life and students, these ideas and experiences can be a justifiable compensation."

TWENTY FIVE YEARS AGO THIS MONTH

JOSEPH FREUDENBERGER, B.J., A.B., M.A.

It was a great commencement in 1906. The students admitted it. The faculty admitted it. The Herald proclaimed it. And the alumni recognized it as the forerunner of yet larger commencements in a yet greater University.

Twenty-five years later, the graduating class of '06 remains as one of the outstanding classes in the University's history, renowned for its loyalty and devotion to the University. With pleasure alumni look back to those hot days from June 2 to 6, 1906, when the graduating class of almost two hundred strolled along familiar paths for the last time and half-jokingly, half-seriously went through the exercises that ended their four-year contact with their alma mater.

Many remember the class day exercises on Saturday when Carter Alexander—now assistant director of the Teachers College, Columbia University, New York—read the humorous class history, when Robert W. Jones—now professor of journalism in the University of Washington at Seattle—read the class poems, and Merrill E. Otis—now federal judge in Kansas City—delivered the class oration.

Likewise many will not fail to recall the baccalaureate sermon Sunday by the Right Reverend Ethelbert Talbot, bishop of Central Pennsylvania, or the delight with which the excellent sermon was heard.

What loyal Tiger could forget, in connection with those 64th annual commencement exercises, the victory over the Kansas baseball team Monday afternoon—7 to 0, for the third straight victory over the Jayhawkers that year? Or who could forget the senior class play, the QEBH exercises, the alumni address of the Hon. John C. McKinley, lieutenant-governor of the state, the Phi Beta Kappa banquet where toasts were drunk to state and to nation, and the Senior Ball in the new Rothwell Gymnasium Tuesday evening, where 150 couples danced away their remaining undergraduate hours at peace with the University and the world at large?

And the valedictorians—guess where they are. John R. Riggs, you remember, won the honors in medicine. He moved to Colorado. W. A. Franken, valedictorian in law, now lives in Carrollton. H. S. Wayman, ranking student in agriculture, is at Oak Groves. And W. K. Seitz, prize engineer, is now city manager of Melbourne, Fla. W. A. Hurwitz, valedictorian in the Teachers College, today is assistant professor of mathematics in Cornell University. And Miss Maude Williams, who won the honors in the academic division, is now

Mrs. C. F. Martin of Warrensburg.

Of course, no loyal member of the class of 1906 can ever forget that sultry commencement day, June 6, when almost two thousand students, alumni, faculty and friends packed the University Auditorium to hear the Commencement plea for citizenship and service delivered by the Hon. Frederick W. Lehmann of the St. Louis Bar and to see and hear the exercises by which the University conferred upon its young men and young women the degrees for which they had toiled.

Who has forgotten the awarding of honorary degrees to Governor Joseph W. Folk, to Dr. John M. Green, St. Louis surgeon, and to Frederick N. Judson, lawyer and publicist? Or the Paul Schweitzer memorial volume in green leather, wherein signatures and autograph letters from 403 of Prof. Schweitzer's former students from all over the world were bound and presented to the man who for thirty-four years had taught in the University?

How many of the class of 1906 do you remember? Here they are:

In the Department of Medicine, the degree of Doctor of Medicine was conferred by the University upon the following students: William Hammach Goodson, August William Kampschmidt, Richard Stephen MacCabe, Frank Pitman Osborn, John Max Riggs, Grace Lillian Scholz, Ruth Seever, Craig Worth.

In the Department of Law, the degree of Bachelor of Laws was conferred on: William Alwileous Franken, Fred Kelsey, A.B. University of Missouri; Claude Otis Pearcey, Robert Turner Abernathy, A.B. University of Missouri; John Malcolm Anderson, Henry Vincent Beeman, Lafayette Lee Bowman, William Henry Burgess, Milton Clarence Burk, A.B. University of Missouri; James Henry Chinn, James Robert Clalborne, Jr., Boyle Gordon Clark, Fred Hiner Dale, George Nelse Dance, Waldo Edwards, Everett Frieze, A.B. University of Missouri; Jere Inman Galbraith, Elias Greenman, Jacob Joseph Gunther, Joseph Reeves Hedenburg, Quintus Arthur Kaune, Ben Drew Kimpel, Fred Kincannon, James Feurt Meade, Roy Bondurant Meriwether, Maurice Patrick Murphy, Clark Nichols, James Allen Parks, Edward Nelson Sears, A.B. University of Missouri; Lewis Bliss Shelby, Thomas Tilden Simmons, Oliver Lee Steele, A.B. University of Missouri; Luther Wesley Tennyson, A.B. University of Missouri; Enoch Lee Thomas, William Ernest Wells, John Benjamin Wilson, Randall B. Young.

The degree of Bachelor of Science in Agriculture was conferred on: Mary Alice Cochel, Charles Arthur Cole, Fannie Taylor Hartman, John Samuel McDaniel, Chester Gibbs Starr, Daniel Benjamin Thleman, Harry Selwyn Wayman, Howard Welch.

The degree of Bachelor of Science in Civil Engineering was conferred on: Harry Bashore, Don Hewitt Blanks, Ernest Dinkle Edwin Leroy Driggs, David Richardson Durant, Roy West Emmert, Robert Edward Gilmore, Vernon Adelbert Hart, Benjamin Franklin Heidel, Carl Pozter Hoff, Clarence Sylvester Jarvis, Frank Leroy Lockwood, Earl Querbach, Edward Robert Romberg, William Kerlin Seltz, James Louis Vandiver, Ross Clark Wells Ivan Forrest White.

And the degree of Bachelor of Science

in Electrical Engineering was conferred on: Harry Edward Bagby, Robert Leo Baldwin, James Harry Barns, Jr., Hayden Burnley Clements, Lindley Gilmore Coleman, Leslie Nathaniel Crichton, William Harris Floyd III, Veit Aull Hain, Arthur James Jobson, James Franklin Kidd, Raymond Alvin Kizer, Franklin Marion Nash, John Eaton Richardson, Earl Alfonso Rosebush, Homer Kephart Smith, Albert William Spaht, Ira Guy Walborn.

And the degree of Bachelor of Science in Mechanical Engineering was conferred on: Charles Franklin Alt, Daniel Lee Brundige, Charles Horace Fessenden, Marshall H. Monlux, Louis John Schrenk, Otto Barnett Will.

The degree of Bachelor of Science in Education was conferred on: Madeline Branham, Helen Frances Bridges, Gloria Washington Carr, Ella Sara Foglesong, Harry Franklin Fore, Fannie Virginia Guthrie, Jane Annetta Harrison, George Ray Johnson, Gussye Kahn, Emma McCallon, Anna Katharine Lash, Adriana May Liepsner, Frances Winifred Nacy, Cora Matilda Newkirk, Miranda Allen O'Rear, Rose Shoemaker, Mary Madeline Smith, Saidee May Stean, Earl Graves Tyler, Hazel White, Maude Williams, Beatrice Winn.

The degree of Bachelor of Arts was conferred on: Wilkie Myrtle Adams, Carter Alexander, Etta Mildred Alder, Grace Lillian Allen, Benjamin McAlester Anderson, David Wylie Anderson, Louise Arnold, Gloria Washington Carr, Winifred Bryan Cole, James Herman Craig, Lyle Miner Daley, Samuel Arthur Dew, James Daniel Ellis, Edwin Rush Fleming, Ella Sara Foglesong, Charles Wisdon Fristoe, John Virgil Goodson, Eleanor Madge Gordon, John Gasser Grossenbacher, Jane Annetta Harrison, Russell Edward Holloway, Uriel Wright Hughes, Josephine Henry Ikenberry, Louise Etienne Imbert, Robert William Jones, Gussye Kahn, Anna Katharine Lash, Gardner Joseph Lucitt, Leo Loeb, Benjamin Franklin Lutman, James Robert McChesney, Maude McCormick, Edwin Burch Miller, Frances Winifred Nacy, Cora Matilda Newkirk, John Henry Newman, Merrill Edward Otis, Henry Gordon Peck, John Edmund Perry, Candace Powers, Morton McNutt Prentiss, Lakennan Moss Price, Maud Cannell Quayle, Lillian Mary Seurlock, Elba Seymour, Clara Lillian Shelton, Stanley Sisson, Mary Madeline Smith, Saidee May Stean, Fred Lee Trewitt, Floyd Smith Tuzgle, Elsie Winship Wadell, Dixie Rush Westlake, Hazel White, Harold Spencer Williams, Maude Williams, Beatrice Winn.

The degree of Master of Science in Agriculture was conferred on: Conner Melbourne Long, William Henry Chandler, Ralph Erskine Hyslop.

And the degree of Civil Engineer on: Frank Leslie Wilcox.

And the degree of Mechanical Engineer on: Edwin Allan Fessenden, James Roy Wharton.

And the degree of Master of Arts in the Teachers College on: John Crockett Edwards, Hollis Hendrix Thurston.

And the degree of Master of Arts (Academic) on: Edmond Bonnot, Redmond Seleeman Cole, Hertha Amella Eitzen, Mary Fitch, Wallie Abraham Hurwitz, Charles William Leaphart, Charles Harvey McCord, Willie Isadore Smoot, George Arthur Underwood, James Gordon Ward, Lois Welby.

Chas. Wesley King, B.J. '30, Delta Tau Delta, Sigma Delta Chi, Track, '28, '29, and '30, is with the News-Messenger, Marshall, Tex.

Frederick L. Hisaw, A.B. '14, Ed. '15, A.M. '16, Gamma Alpha, Phi Delta Kappa, Sigma Xi, is Professor of Zoology in the University of Wisconsin, Madison.

C. D. Lockwood, B.J. '25, Phi Gamma Delta, Mystical Seven, is publisher of the Texas Daily Oil Report in Ft. Worth, 209 Petroleum Bldg.

Pierce Huss, B.J. '29, Sigma Delta Chi, Kappa Tau Alpha, is manager of the International News Service, Mexico City, Mexico.

He no longer flies alone!

Formerly a man a mile above the earth was shut off more completely than if he were

in the heart of Africa or the depths of the frozen north.

Now the Western Electric radio telephone ends that isolation. The flier whose plane is equipped by Western Electric is always in touch with ground stations, and he flies with greater dispatch and greater safety.

This telephone for airplanes grew out of many years' experience in making telephones and other apparatus for the Bell System. It is one more example of Western Electric's skill in the art of voice reproduction.

Freshmen Win Two Big Six Telegraphic Meets

Records of First Year Men Indicate Revival of Track Victories for Tigers Next Year.

George Edwards
"His Sport Page"

Definite indications that track at Missouri is beating back to the high level it once enjoyed were shown when the reports of the freshmen telegraphic meets for Big Six schools were totaled.

Two meets were held this spring and Missouri won both. The regular meet in which the individuals were placed according to the record made found the Tiger cubs leading the field with 74½ points for the most decisive victory in the history of the meet. Nebraska was second with 48½, Kansas State was third with 35¾; Oklahoma scored 31 points; Kansas 12; and Iowa Missouri freshmen placed in each event. Foxtow, E. Dunkin, and Hatfield took the first three places in the 220 yard dash with the winner's time caught at 21.5 seconds. Foxtow also tied with Parsons of Kansas State in the 100 yard dash with a record of 10 seconds. Sniveley won the low hurdles with Johnson second and Coburn fourth. E. Dunkin set a new record in winning 440 yard run in 49.8 seconds, and then took second to Asher of Nebraska in the half mile run. His twin brother, Delbert, won the two mile run and placed third in the one mile.

Also Win the Frosh Relay Meet

Missouri freshmen also won the Big Six telegraphic relay meet. Scoring was figured by teams with the totals of four best men in each event as the record. Missouri scored 41 points, Nebraska was runner-up with 35; Kansas State third with 34; Oklahoma fourth with 10; Iowa State fifth with 5. Kansas did not enter a team.

Missouri placed in every event except the javelin throw and won firsts in the 220 and 440 yard dashes, and both hurdle races.

Twenty-Four M Men Are Graduated

Missouri athletic teams suffered the loss of twenty-four letter men by graduation this month. Not all of those graduating have completed three years of competition, but the earning of a degree makes them ineligible.

Football, losing eight, heads the list. Baseball will have five vacancies, track four, basketball, wrestling, and the two mile team, two each, and tennis one.

The complete list:

Football—Robert Armstrong, James Baker, Paul Brayton, Hubert Campbell, Stanley Cox, Luther Kilgroe, Lawrence McCauley, and Captain Leonard McGill.

Track—Howard Lawler, G. F. Weinke, Ousley Welch, and Captain Dick Swartz.

Baseball—Bernard Feldcamp, M. E. Fruit, James Harutun, Arthur Monroe, and Captain Sam Carter.

Basketball—Co-captains Hubert Campbell and Charles Huhn.

Wrestling—Von A. Robbins and Perry Munday.

Two-Mile team—C. F. Weinke and Captain Dick Swartz.

Tennis—Captain Robert Williams.

DELTA TAU DELTA TAKES FIFTH TITLE

For the fifth consecutive year Delta Tau Delta won the all-sports interfraternity championship when the totals had been added after the swimming events held during the closing week.

The champions were able to win first place in only two of the thirteen sports on the intra-mural program, but scored 50 per cent or better in ten of the others to bring their total to 1261.2 points for the year. Beta Theta Pi was second with 1164.2 points.

Delta Kappa was third with 1083.2 and Sigma Alpha Mu was fourth with 1008.8. Thirty-four fraternities entered teams in the program.

Delta Tau Delta's championships came in basketball and volleyball, while Beta Theta Pi won the titles in golf, swimming, and playground ball. Delta Kappa won track and relays; Sigma Alpha Mu won handball; Alpha Tau Omega was first in marksmanship; Sigma Chi took the fall track meet; Alpha Gamma Rho was winner of wrestling; and Phi Kappa won the horseshoe tournament.

This was the fifth in a seven year cumulative program conducted by A. J. Standowski, director of intramural athletics, for permanent possession of a large loving cup offered by the athletic department to the fraternity maintaining the high score average during that period. Delta Tau Delta by virtue of its five consecutive championships leads in the race with 5621.7 but is closely pressed by Beta Theta Pi with 5055.2.

The thirteen sports in which the fraternities engaged brought together 352 teams in 789 contests in which 2249 men participated.

WILLIAMS AND A. ROVIN CHOSEN TENNIS CAPTAINS

Robert Williams, senior in the School of Journalism, was elected captain of the varsity tennis team at the close of the spring campaign. The team operated during the season without a captain. No former letterman was among the members and the squad express the desire to await the close of play to select its leader.

Williams played the number two singles position and won every match in which he participated in conference competition. His best performance was against Kansas in which he defeated Prosser in three grueling sets. Teamed with Richard Hanwell, he formed one of the doubles combinations.

Adolph Rovin, of St. Louis, was

elected captain of the team for 1932. A. Rovin played number three singles and with his brother Charles formed the leading doubles team. Three of the four members of the tennis team are eligible for competition next season. The squad lost but one match this year and tied with Kansas, Big Six champion, in the only contest against the Jayhawkers. Several matches were rained out and Missouri was relegated to third place in conference standing since Oklahoma, defeated by Kansas, was able to play more matches and to take second place in percentage.

Jackson Elected Track Leader

William F. Jackson, of St. Louis, crack sprinter on the track team was elected by his teammates as captain of the 1932 squad. Jackson, student in the School of Law, came from Kemper Military School, and has been a sprinter and relay runner on the varsity track team for the last two seasons.

HARUTUN WIN BIG SIX SCHOLARSHIP AWARD

James Harutun of Joplin, a senior in the School of Law, was awarded the Big Six scholarship medal as the highest ranking graduating athlete at Missouri. This award is made annually by the conference to the senior varsity letter winner in each school with the best grades.

Harutun played center field on the baseball team for the last three years. While an exceptional fielder and splendid thrower he was most valuable for his timely hitting. This last campaign finished with his batting average at .417.

Missouri Grads Win Golf Match

Missouri alumni and coaches won the first annual golf tournament for the former athletes and coaches of Missouri, Kansas, and Kansas State held in Kansas City the first week in June. The tournament is conducted by a Kansas City Sporting goods company which offers a cup for the school winning the event three times.

Fred Williams, basketball captain in 1917 and letterman in track and tennis, proved to be the best of the old grads in golf with a medal score of 75 and a low net of 66. The surprise round was played by George Edwards who broke all of his former golf scores with an 86 and tied with Williams for low net.

Missouri won the trophy with the lowest foursome, and Williams took the drive for accuracy when he laid a 160-yard shot within three of the pin. Alumni who competed for Missouri included Earl Rennick, Jay Minton, James Channon, Kenneth Yunker, and Ted O'Sullivan. Coach Gwinn Henry and Edwards represented the Missouri staff. Brutus Hamilton, former Tiger track athlete, and now coach of track at Kansas led the Jayhawk cohorts against his old school but fell a little short of the record made by Williams.

The Adventurer-Surgeon

The Life of Dr. Justus Ohage,
of St. Paul

By JUSTUS G. SCHIFFERES, B.A., M.A.

Reprinted by permission of THE JOURNAL-LANCET
Vol. 51; No. 3, Feb. 1931

The youngest soldier in the Army of the Potomac lay wounded in the hospital at City Point, Virginia. It was April of the year 1865, and Lee had just surrendered at Appomattox. Abraham Lincoln was in the vicinity and he came to visit the hospital where the young soldier lay. When he heard from the chief surgeon the true story of the lad's great bravery and extreme youth, Lincoln came directly to his cot, shook the boy's hand and said to him, "My boy, I thank you for the help you gave us. I hope you will be well soon and with your father and mother. God bless you!"

Lincoln's hope was fulfilled, for by fall of the year '65, the erstwhile youngster soldier of the Army of the Potomac was back in Hannover, Germany, his parent's home, and pursuing again with zeal the studies that his romantic impulses had driven him to abandon for the sake of adventuring in the New World. Besides his classical studies, Greek and Latin, which he learned with great thoroughness, the boy found time to pick up some of the rudiments of medical and surgical knowledge at his father's clinic. For his father was a doctor, as his father had been before him, and for several generations back. The boy was Justus Ohage, and his father, Dr. Georg Ohage, of Hannover.

Justus Ohage was born in Hannover on October 13, 1849. He attended the Gymnasium and Lyceum in that city but always with some distaste, for he was by nature an athletic and energetic person whom the routine of the school-room cramped. His various adventures to escape from the tedium of school finally culminated in the runaway trip to America, which gave him the opportunity of fighting in the Civil War and of making the opportunity of fighting in the Lippincott, an older companion of his in the Eighth Regiment of the New Jersey Volunteers, of the glories of the American outdoors. This love for the great outdoors, fostered by the Maine backwoodsman, has never left Dr. Ohage, though he now approaches his eighty-second birthday. He leaves a record of his adventures as a woodsman, fisherman, and hunter in a book of his, privately printed and distributed among his friends, "Sixty Years With Rod and Gun." All these adventures, extraneous as they may seem to the career of medicine, nevertheless go to show the temperant of boldness and accuracy which are the characteristic equipment of a great surgeon; and it is in the field of surgery that Dr. Justus Ohage has done some of his most significant work.

It is interesting to note, however, that much extraordinary training and many odd adventures were to come upon the man before he had even chosen medicine as his profession. From the years 1865 to 1870, he was studying and working with his father and Prof. Werner Langebeck, nephew of the great Langenbeck, of Berlin, and an associate of his father in the clinic at Hannover. In the war of 1870 we find him serving as a stretcher bearer in Europe, but in the year 1872, after having crossed the ocean back and forth several times as a common sailor before the mast, the great American outdoors has drawn him back to this country and he is serving as a medical assistant on the construction crew of the Topeka, Atchinson Railroad. Here again the young man brushes against another well known destiny, for the man

who supplied meat to this hard working construction crew was none other than Buffalo Bill Cody himself.

After this railroad job of his, the young medical assistant found some excellent relaxation on hunting grounds that have always attracted him, the Missouri Bottoms, particularly in the vicinity of the Quiver River. This neighborhood has since become one of the most expensive and exclusive hunting grounds in America.

From Missouri, he went up to Toledo, Ohio, where he spent some time with an old family friend, Dr. Wuesterfeld. Here he was joined for some months by his younger brother, Georg, a chemist; and here too he fell in with a Frenchman, Chateau, who first brought him up to hunt big game in that part of the country whose beauty and grandeur of scenery was later to induce him to make it his permanent home—the great Northwest.

In 1876, however, attracted again by the fine wild fowl hunting, he returned to the Missouri Bottoms. Nevertheless, his first purchase after his return had nothing to do with hunting or fishing. It was a piano. In spite of all his roaming, the young man had found time to develop a great skill and fine appreciation of music. About this time he happened to meet a young medical student, Thomas Ensor, whose tastes in dogs, guns and horses were very akin to his own. Young Ensor introduced Ohage, then twenty-seven years old, to his father, Dr. Sidney Ensor, a graduate of Guy's Hospital and Thomas Hospital, London, and to his sister, Augusta Jane. The result of these introductions was the marriage of Augusta Ensor and Justus Ohage on the tenth of May, an important day in the young man's calendar because it was also the date of his mother's birthday, 1877, and his immediate decision to go up to the medical school at the University of Missouri, in Columbia, to get his degree in medicine. He helped to work his own way through school and served as a prodissector in anatomy during his senior year. He was graduated M.D. in June, 1880.

After graduation he left immediately for Germany, taking his wife and child with him, and with characteristic zeal and energy he plunged into an extended course of postgraduate medical study, with especial emphasis on surgery. He studied at Göttingen, his father's university, and at Kiel. Here he worked under the famous Professor von Esmarch and saw, among many other things, the first cure of sarcoma of the jaw by an accidental infection of erysipelas. Further work at Berlin brought him under the tutelage of von Virchow, the great pathologist, and Bernard von Langenbeck, the celebrated surgeon. Later he went to England, where he worked at the hospitals from which

G. W. HAGENBUCH,
D. P. A.,
719 Walnut St.,
Kansas City, Mo.

his father-in-law had graduated, Guy's and Thomas's. From there he went on to Edinburgh, and had instruction in abdominal surgery from Keyes.

In the winter of 1881, he returned to Hannover and served an internship in the "Henriettentstift." Realizing the necessity of getting down seriously to the business of medicine, he plunged into his work as an interne with such pertinacity and eagerness that his remarkable record still lingers as a legend in that hospital.

Having thus compressed his internship into a small space of time, he brought his family back to America in the spring of 1881. On May tenth, his double anniversary day, he arrived in St. Paul, and being particularly attracted by the natural beauty of its location, set among white cliffs and green bluffs in a bend of the mighty Mississippi, he decided to set up in practice here. His first office was at Seventh and Wacouta Streets, and his first office associates, men who were his very good friends, were Dr. Parks Ritchie and Dr. Edward Spencer. Another of his friends was Dr. William Worrell Mayo, of Rochester, who thought so much of Dr. Ohage as a surgeon that he used to send his sons, Will and Charles, up to St. Paul, to watch him operate on surgically interesting cases. This was in the late 80's when Dr. Ohage's fame as a surgeon had spread far.

His most important operation was the first cholecystectomy performed in this country. The operation had been performed several times before in Europe, and of this fact Dr. Ohage's acquaintance with European medical literature and his frequent clinical trips back to Europe made him well aware. Dr. Ohage's operation, which was brilliantly successful, was performed at St. Joseph's Hospital on September 24, 1886, and was, incidentally, reported to the medical world at large in THE NORTHWESTERN LANCET for October, 1886. There was a great deal of doubt as to the feasibility of this operation before Dr. Ohage performed it. Little was then known of the diseases or the surgical treatment of the diseases of the gall bladder, and certain physicians warned Dr. Ohage that he might be indicted for manslaughter if his operation should fail. It succeeded, however, and its success marked another advance toward healing along the intrepid path of surgery. The next year, in 1887, Dr. Ohage was able to publish a long and important article on the surgical treatment of gall bladder diseases, in the course of which article, he defended the practice of antiseptic as well as aseptic surgery. Not more than six months ago 2,000 delegates to the Interstate Postgraduate Medical Association of North America paid tribute to Dr. Ohage for his splendid pioneer work in surgery.

It must not be inferred, however, that Dr. Ohage's surgical skill was not acknowledged in the early days. He was soon recognized as one of the foremost physicians and surgeons in the State. He had the honor of being elected president of the Ramsey County Medical Association for two successive terms, 1889 and 1890, and was also made president of the Minnesota State Medical Society in 1895. He was a charter member of the Minnesota Academy of Medicine. He was appointed clinical professor of surgery at the University of Minnesota in 1890 and did not relinquish this position till 1899. He further held the office of president of the State Board of Medical Examiners for several years. International honors came to him, too, and he was made a member of the Imperial Surgical Society of Berlin.

During the Spanish-American War he took a very active interest in the Red Cross and was elected president of the German-American Red Cross Society. For this service and his other important accomplishments in the field of medicine, the Emperor of Germany, in 1907, awarded him the Order of the Red Eagle, a medal of distinction.

Before this, however, Dr. Ohage had made an important decision to enter the field of public health. In 1889, at the height of his surgical career, he accepted a poorly paid appointment as Health Commissioner of the City of St. Paul, and immediately threw himself into his new and difficult duties with characteristic vigor. Many and violent political enemies rose up to oppose the measures that he was promoting for the sake of public health; but the adventurous spirit that could enter into an entirely new field, that of health administration, at an age when most men are looking forward to retirement, was not to be beaten. His enemies were conquered. His own measures carried the day. Pure food laws were enforced. Birth and death certificates were filed according to an orderly system. Compulsory vaccination was adopted into the

schools. City garbage was properly collected and efficiently disposed. Quarantine laws were strictly enforced. All milk sold in the city was made subject to inspection and many herds of tubercular cows were ordered killed. Public baths were instituted. In many of these measures, Dr. Ohage initiated much needed reforms, showing the proper road to public health to the civic administrations of other cities; and many newspaper clippings attest the interest with which public health projects in St. Paul were regarded by other communities. Finally, at the St. Louis World's Fair, 1904, five years after Dr. Ohage had accepted the position of Health Commissioner, St. Paul was declared the healthiest city in the world, and Dr. Ohage was awarded a medal for having made it so.

Among the many projects which Dr. Ohage fostered until he resigned from the Health Commissionership, in 1917, there is one deserving of particular mention. That is the establishment of the public baths on Harriet Island. The baths were opened in May, 1900. They were centrally located in the city, and little did anyone then foresee that all of Minnesota's ten thousand lakes would soon be available by automobile. Not only did Dr. Ohage give of his time and energy to the direction of the opening and beautification of these public baths, but also he actually gave to the City of St. Paul the island on which they were situated. This generous gift was made despite the fact that Dr. Ohage had already had large offers for his centrally located fifty acres from several industrial firms. His whole-souled devotion to civic betterment was publicly acknowledged last year by his election to the American Civic Association, an organization of individuals distinguished for their civic service.

Dr. Ohage is now 81 years old. He lives with his daughters at his old home, 59 Irvine Park in St. Paul. It is Dr. Ohage's desire to remain in the active practice of medicine for fifty years. His father did it and he sees no reason why he should not do the same.

Harry Herron Westbay, Jr., A.B. '26, Sigma Chi, and Mrs. Westbay, and their son, Harry Herron, III, are living in London, England, where Mr. Westbay is Sales Supervisor, Group Insurance Division, Metropolitan Life Insurance Co.

George F. Shulze, E.E. '15, Tau Beta Pi, is a telephone engineer with the Bell Telephone Laboratories, 463 West St., New York City. He married Miss Myrtle Potter, who was enrolled in the summer session of 1913. They have a son, John Stanley Shulze, born June 19, 1919.

Miss Margaret McClay, who is teaching in Potosi, Mo., was elected Queen of the Missouri Lions Club at their Convention in Carthage late in May. The election entitled her to a trip to the International Lions Convention in Toronto in July. The Lions Club Convention will be held in Columbia next year. John Dalton, LL.B. '23, Jefferson City, is Governor of this district.

Houston Harte, B.J., '15, San Angelo, Texas, publisher, was recently elected President of the West Texas Chamber of Commerce.

Colonel Frank D. Wickham, '90-93, U. S. A. retired, has changed his address in San Francisco to 15 Retiro Way.

Albert Leonard, Ag. '23, is head of the dairy extension department of Purina Mills, St. Louis.

Dr. C. W. Digges, Columbia dentist, who is the dental surgeon for the Crippled Children's clinic in the University, was recently re-elected Secretary of the Missouri State Dental Association at their annual meeting in Kansas City.

Judge Samuel A. Dew, A.B. '06, Beta Theta Pi, Glee Club, former judge of the circuit court in Jackson county, Mo., is practicing law in Kansas City, 1120 Dierks Bldg.

'01, and A.M. in '03, following which she taught for two years in Christian College. She is survived by a brother, John F. Green, Attorney of St. Louis, and two sisters, Mrs. Artie Hamilton, Dwight, Ill., and Bessie Green of Kirksville.

Ralph A. Murphy

Lieut. Ralph A. Murphy, A.B. '24, Phi Gamma Delta, who was an instructor at March Field, Riverside, Calif., was killed in an airplane crash there on May 22. Burial was in the Arlington National Cemetery.

Frank H. Hoffstrom

Frank H. Hoffstrom, E.E. and T.E. '79, died on January 6, 1931 following an attack of heart trouble at his home in Cedar Falls, Wash., according to word just received from Mrs. Hoffstrom, who lives in Seattle, 1210 E. 65th St.

Mrs. Angie Richmond Ridgway

Mrs. Angie Richmond Ridgway, wife of Frank Ridgway, alumnus of the College of Agriculture and School of Journalism, was fatally injured on May 23, when she fell from a fifth floor window of their home in Washington, D. C. Mrs. Ridgway had gone to the window to call her eight year old son, Chas., who was playing below. She was recovering from illness and apparently became dizzy and fell.

Mr. Ridgway is Director of Information for the Federal Farm Bureau in Washington. He is a member of Kappa Sigma and Farm House.

Mrs. Adelaide Louise Munday

Mrs. Adelaide Louise Munday, wife of Dr. Bert Munday, physician of New York City, died there on May 22. She is survived by Dr. Munday and son, Perry Ligon Munday, who is enrolled in the School of Medicine in the University. Dr. Munday was graduated from the University with the degree of B.S., M.S. and M.D. in '97, '98, and '99, and is a member of Phi Beta Kappa. His son is a member of Alpha Kappa Kappa.

James L. Woodress, B.S. E.E. '04, graduate of the Trenton (Mo.) High School, is sales manager for the Century Electric Co., in St. Louis. He married Miss Jessie E. Smith of Golden, Colo., in 1909.

Ben Long, Eng. '16, represented the University on the occasion of the inauguration of Dr. Everett Brackin Tucker, President of Austin College, Sherman, Tex., on June 1.

TO THE LADIES OF THE SUMMER SESSION:

One of the experiences of attendance at a Summer Session in Columbia and one which all enjoy talking about in the months to follow is the purchase of a worthwhile and practical garment from Fredendall's. For years and years and years Fredendall's has been catering to the students and members of the faculty and has gained their wholehearted good will due to the eagerness of Fredendall's to give service at most reasonable prices. The name Fredendall's guarantees quality and satisfaction. The store is known to hundreds, yes, thousands of alumni and former students of the University. It is the headquarters in Columbia for wearing apparel for girls during the Summer Session. The Summer Session students in years past make it their headquarters. This year above all others the ladies of the Summer Session, both students and faculty members, should avail themselves of the opportunities furnished by Fredendall's for the finest and best and most reasonably priced ladies apparel.

Fredendall's

ATTENTION!

Summer Session Students

There is a store for men in Columbia devoted to the interest of the men who are enrolled in the Summer Session in the University, and to the members of the Summer Session faculty. It is a place where you can get the best that is provided for men's wearing apparel. It is a place that has been catering to students and faculty members of the University ever since the Unlowest possible price. It is known in every state in the Union for selling the best material at the lowest possible price. It is known for loyalty to its friends—it is the Barth Clothing Co. To have gone to school in Columbia and not to have purchased a suit or a hat or something from Barth's is to have missed the greatest experience of a University year. When you go to Barth's ask for the old side-kick himself, Mr. Isadore Barth. He is the salt of the earth.

Don't miss buying something from

BUY FURNITURE NOW!

House Furnishings Should Be
Purchased Now; Prices Low,
Quality High

Every family in Columbia whether in a private home or keeping roomers and this applies to fraternities and sororities as well, should not overlook the fact that this year above all others furnishes the best opportunity that has been available for years and years and years to buy modern up to the minute at the lowest prices in the history of the business. Unquestionably, there are numerous families who need new furniture, rugs and other household equipment and the purchase of these should be made now—this summer.

Our attractive summer furniture appeals to all. One of the comforts of summer is to have an appealing lot of summer furniture—buy it now. So arrange now to equip your home this fall with everything you need to make it comfortable and attractive for you will never have such an opportunity again.

The Parker Furniture Co., has been catering to the needs of Columbians and Boone Countians ever since Columbia was started. The courtesies which Parkers always extend has made it among the most popular of Columbia's stores. The liberality and loyalty of the members of the firm prompts everyone to trade in Parkers.

Whatever you do this summer take advantage of fully equipping your home with the best in furniture when the prices are within the reach of all.

PALATIAL SINCLAIR TAVERN

Tiger students, faculty members, alumni, here is luxury at the price often paid for mediocrity.

Aloof from the city's noise, near the University of Missouri, new, modern, fireproof, this is the ideal stopping place for relatives visiting students, for alumni, for the discriminating public generally.

Replete with comfort, modernness and good taste are the forty bedrooms each an outside one, each containing two double beds. A private bathroom, tiled and having tub, shower and electric fan, running ice water and other conveniences, adjoins each bedroom. The basement is a garage, free to guests.

Wire, telephone, write or call for reservations.

This hotel is part of the Sinclair Tavern located one mile west of Columbia on U. S. Highway 40. Close to the hotel is the terminal building containing a 154-person-capacity restaurant serving meals epicures relish and popular for banquets, dinner-dances and other events. Here again the prices are moderate. The French renaissance rest room for women is royal in comfort and beauty.

The other Sinclair Taverns are on U. S. Highway 66 near Rolla, Mo., and Miami and Tulsa, Okla. The hotel at the Rolla terminal is identical in style with the one near Columbia. Both are official A.A.A. hotels.

The courteous service at Sinclair Taverns is far-famed.

Sinclair Automobile Service Corp.
