FOREWORD

Two previous bulletins have been published reporting degrees granted by the Graduate School of the University of Missouri. The first covers the period 1892 to 1948, and the second, 1949 to 1955. The total number of degrees conferred through 1955 was 10,064. The number of degrees recorded in this bulletin is 2,582, making a total of 12,649 degrees.

Each degree is listed twice in this bulletin. First, there is an alphabetical list of students who received degrees, which constitutes roughly the first half of this bulletin. This is followed by an alphabetical list of the departments in which the degrees were conferred. The abbreviations employed in the page references follow this foreword.

To conserve space, each degree is designated by letter. Thus, A refers to the Masters of Arts degree; B to Master of Education, and so forth.

Information regarding a student is obtained by referring to the alphabetical list which starts on page 6. This gives the full name of the student, the letter indicating the degree which he received, next the date on which the degree was conferred, and finally an abbreviation to indicate the department in which the candidate did his major work.

Information regarding the thesis is obtained under the name of the department in the last half of the bulletin. Here the departments are arranged alphabetically, and under each department the degrees are arranged chronologically; and finally under each year the names of the recipients are arranged alphabetically. As an illustration: Adams, James Warren, A59Geol, is the full name and indicates the degree of Master of Arts with a major in Geology was conferred in 1959. Turning to the table of abbreviations we find under Master of Arts, Geology, Geol, and next the reference to page 30. Under 1959 on page 31, we find the above name listed with the thesis entitled, "Rocks of the Precambrian Basement and Those immediately Overlying it in Missouri and Parts of Adjacent States." In some departments a thesis is optional.

Information regarding the department is obtained by referring to the abbreviation and then to the appropriate section in the last half of the bulletin.

A separate index precedes the enumeration of degrees conferred by the Missouri School of Mines and Metallurgy at Rolla. This will be found on page 71.
