

**GRADUATE SCHOOL
DEGREES CONFERRED**

1961-1965

University of Missouri, Columbia

FOREWORD

Three previous bulletins have been published reporting degrees granted by the Graduate School of the University of Missouri. The first covers the period 1892 to 1948, the second, 1949 to 1955, and the third, 1956 to 1960. The total number of degrees conferred through the previous bulletins was 12,649. The number of degrees recorded in this bulletin is 4,226, making the total 16,875.

Each degree is listed twice in this bulletin. In the first half of the bulletin is an alphabetical list of students and the degrees they received. This list is followed by an alphabetical list of the departments in which the degrees were conferred.

To conserve space, each degree is designated by letter. Thus, A refers to the Masters of Arts degree: B to Master of Arts for teachers: C to Master of Business Administration, and so forth.

Information regarding a student is obtained by referring to the alphabetical list which starts on page 6. This gives the full name of the student, the letter indicating the degree which he received, the date on which the degree was conferred, and an abbreviation to indicate the department in which the candidate did his major work. As an illustration: Adams, Albert Cone, J61Eng, is the full name and indicates the degree of Doctor of Philosophy with a major in English was conferred in 1961. Turning to the table of abbreviations we find under Doctor of Philosophy, English (Eng), and next the reference to page 91. Under 1961 on page 91, we find the above name listed with the thesis entitled, "A Study of the Ethics of John Milton." In some departments a thesis is optional.

Information regarding the department is obtained by referring to the abbreviation and then to the appropriate section in the last half of the bulletin.

A separate section beginning on page 98 lists the Master of Science degrees conferred by the University of Missouri School of Mines and Metallurgy at Rolla.
