

MISSOURI ALUMNUS

Sweeney New Director of Development

The development program in alumni support and special fund raising is being given new impetus with the appointment of John W. Sweeney as director of development for the Columbia campus. He has been manager of the annual giving program at the University of Michigan, Ann Arbor.

JOHN SWEENEY

Chancellor John W. Schwada, in announcing the appointment, said Sweeney has had an important role in development activities at one of the major universities and should be able to contribute valuable service to the expansion and effectiveness of the development program here. He has been associated with the University of Michigan since 1956 and has managed the annual giving program since last July.

One of Sweeney's achievements at Michigan has been to help build the Michigan Alumni Fund into an organization of 30,000 donors who give more than \$1 million annually. In the past 11 years the fund has raised in excess of \$8 million from alumni and friends of the university at Ann Arbor.

During his service at Michigan he also helped organize and promote the University of Michigan Presidents Club, an organization of 545 special gift donors, and assisted in the three successful capital campaigns, the last raising more than \$72 million for the university.

G. H. (Bus) Entsminger, University-wide vice president for University development, said Sweeney will operate within the overall framework of the University development and alumni program with his emphasis on aspects of that program relating to the Columbia campus.

Six Alumni Meetings Held In Southeast, Southwest

Swings through the Southeast in January and the Southwest in February by Don Faurot, assistant director of alumni activities, resulted in six alumni chapter meetings and membership drives.

Thirty-seven persons attended the Miami meeting; 48 persons attended the Atlanta, Ga., meeting; and 58 were at the Memphis, Tenn. dinner.

In the Southwest get-togethers were held at Phoenix, 54 persons attended, San Diego, and Santa Barbara.

Besides the membership drives, the meetings also featured a slide presentation showing scenes from the Columbia campus and a 10-minute football highlight film.

Form New Chapters In Florida, Arizona

Two new chapters, St. Petersburg-Tampa, Fla., and Tucson, Ariz., have been organized for the Alumni Association.

At the St. Petersburg-Tampa meeting, attended by 46 persons Jan. 18 in St. Petersburg, the following officers were elected: Mark Stein, president; Harold (Bud) Protiva, vice president; Mrs. John Phillips, secretary, and Dr. James Allee, treasurer.

The Tucson get-together, attended by 41 persons on Feb. 15, resulted in the election of the following officers: Roy Tatum, president; Ray McNally, vice president; Mr. and Mrs. Tom Esteppe, secretary-treasurer.

Don Faurot, assistant director of alumni activities, attended both meetings.

University Receives DC-3 Plane from Johnson Wax

A 16-passenger DC-3 airplane has been given the University by the Johnson Wax Co.

Another DC-3, two Beechcraft and one Aero Commander comprise the University fleet of planes. Maintenance schedules are established to keep four of them always available, providing maximum capacity of moving 52 passengers. The new plane has a full instrument panel and is radar equipped.

G. H. Entsminger, University vice president for development, pointed out that such gifts contribute immeasurably to the educational and service activities.

The University is used 75 per cent of the time for the "educational air-lift" program — flying faculty and staff members to distant points in the state to conduct extension courses.

Law School Alumni Contributes \$115,000

A campaign to raise \$100,000 for the Law School Foundation of the University of Missouri — Columbia has "gone over the top" by \$15,000. Dr. Joe E. Covington, dean of the School of Law, and Clarence O. Woolsey, president of the Foundation, have announced.

Contributions and pledges amounting to \$115,000 came from alumni of the Law School in the "Margin for Excellence" campaign which began in October and ended in mid-February. Lowell L. Knipmeyer of Kansas City was general chairman.

"The loyalty of our alumni was never better demonstrated than in the generous support they have given this campaign to effect additional improvements in the program and services of the School of Law," Dean Covington said.

The dean also said that the Office of University Development "contributed heavily to the success of the drive by lending professional assistance in the step-by-step planning. Edwin Sims of the Development Office spent many hours consulting with our staff so that we could approach the campaign on a sound and systematic basis."

Chancellor John W. Schwada commented that "this is a fine example of what can be accomplished when there is a reasonable and worthwhile goal, an efficiently organized group of volunteer leaders, and a program the alumni are proud to support."

Explaining how the \$115,000 will be utilized, Dean Covington said funds will be applied to five areas: Faculty aids—support of research and other financial aids to the present faculty and aid to bring higher quality faculty members than would be otherwise available; student aids — scholarships and loans; visiting lecturers — outstanding lawyers, judges and professors to spend time on the campus with students; teaching aids — books and equipment for the new law library, visual aids, aid to the moot court program; equipment — for seminar rooms and "extras" to make the law school building, Lee H. Tate Hall, more attractive.

The campaign was conceived and planned by the late John Divivbis, professor of law and an alumnus of the school, whose unexpected death occurred shortly after the fund drive was launched.

Vice chairmen in the campaign were A. D. Sappington, Columbia; Gerald B. Rowan, Kansas City; and Kenneth Teasdale, St. Louis.

City chairmen were Columbia—Scott Orr; Jefferson City — John Hendren; Joplin — Karl Blanchard; Kansas City—Irvin Fane; St. Joseph — O. W. Watkins, Jr.; St. Louis — Richmond C. Coburn; and Springfield — Clarence O. Woolsey.

Zone chairmen were Ike Skelton, Jr., Lexington; Paul Hess, Macon; Lynn Ewing, Jr., Nevada; Weldon W. Moore, Rolla; and James E. Reeves, Caruthersville.

Battles With Nature Aid Student Growth

School begins every day at 5:30 a.m. — or earlier — at the Colorado Outward Bound School. The campus, ranging from 9,000 to 14,000 feet in altitude, has its base of operations near 'the ghost town of Marble, Colo. The course of instruction includes training in mountaineering, rock climbing, and wilderness survival. The purpose is to help young people "discover their own abilities by putting them against a constant and impartial nature."

Jim Stuckey, BS ED, AM '61, is an Outward Bound instructor and administrative assistant to the school's director. He is proof that one need not be born on a mountainside to become a competent mountaineer. Until graduation from the university, practically all of his non-school time was spent on his father's farm at Lathrop, Mo. He then taught mathematics and science at Columbia's Jefferson Junior High School for two years while working for his master's degree. Though he preferred to remain in Missouri, he was offered a teaching and counseling position he liked by the Denver Public School System. He accepted, and while teaching math and science at Denver learned of the Outward Bound program.

Introduced to a mountaineering course, Stuckey accepted as a regular instructor and has been in the hills every subsequent summer. To talk with Jim Stuckey is to talk with a teacher. He displays an excitement for teaching.

During the summer of 1965 until the spring of 1967, he traveled widely throughout the United States as a teacher and lecturer for the U.S. Atomic Energy Commission's Oak Ridge Institute of Nuclear Studies. This, he feels, is the period during which he began to believe that education actually could be made much more palatable and important than most school

systems allow it to be. He visions Outward Bound as a program and an education. The range of social background is made possible through a scholarship program. These funds are private donations of corporations, businesses and individuals.

Upon their arrival at Marble, the students are assigned to patrols of nine, and begin their training immediately with a two-mile uphill ascent to the school. On a "typical" course, but no two courses at the school have been precisely the same, the patrol will spend the first three to five days in basic training at the school's permanent facility. Instruction there includes fire-fighting, rock-climbing, belaying, rappelling, river crossing, and the

rope course, which consists of a variety of tests and obstacles made of logs and ropes, strung high between Aspen trees. The ropes course is a network of exercises designed for strengthening muscles, developing and refining balance, and acquainting the boys with the feeling of some distance between them and the ground.

After the initial training period, the patrol moves out on a series of expeditions, covering increasingly longer and more difficult routes, and during which all their training is put into practice as they continue learning. The lessons at Outward Bound are immediately important

Stuckey teaches student use of tyrolean traverse for mountain climbing.

Around the Columns

with Jean Madden

With the increased mailing costs and the increased complexity of our data processing equipment, America's most migratory creature, the university alumnus becomes more of a problem. A recent meeting of the Big 8 alumni, development and publications people revealed that everybody has the problem and nobody has the solution for keeping alumni records up-to-date. We all seem to be spending more and more money with less and less effective results in keeping track of our alumni. Almost one third of you move or make some basic change in your records each year. In addition, some 3500 new graduates annually come into the fold.

This helps explain, but it doesn't justify the mistakes we make with our records. So, if we have moved you or called you by the wrong name or anything worse, we want you to know that we are at least working on doing a better job. We have a bright, young graduate student currently working on a records' analysis for us, and he just gave us a six-page preliminary report on the things we have to do to modernize and update our system. We intend to study this report, make some comparisons with places like Texas A & M and Indiana, which seem to be doing a better job, and ultimately come up with a new and better way of doing things at Old Mizou.

All this, though, will be to no avail without your help. The most important part of our record system is an accurate list of paid members who receive this newspaper. You are the people we are most concerned about. Please take the initiative and keep us informed as to changes in your address. This will help obviate both delays and expense in getting our mailings to you. It may seem like a little thing, but apparently a good record system is built from lots of little things.

In fact, we need your help in many other ways to remind us that you are real people. Please let us hear from you when we do something that displeases you. You might even tell us if you like something. Let us know when you need help, where you're going and why you are or are not rejoining the Association.

You're the Association's most important asset. Help us to know you better.

Citations Given At Ag Barbecue

Dr. George M. Browning, of Ames, Ia.; Harold W. Thieman, of Kansas City, Mo.; and Homer Young, of Concordia, Mo., received citations of merit from the national Alumni Association and the College of Agriculture Alumni Association at the annual Ag Barbecue Feb. 9 in Columbia.

Made honorable ag alumni were Patterson (V) Bain, of Columbia, 1959 graduate in charge of the nation's engineering and architecture; and A. V. Couch, a manager of Ralston Purina's Kansas City plant.

Dr. Browning, regional director of the American North Central Agricultural Experiment Stations, received his bachelor's degree from the University in 1932. His graduate degrees are from the University of West Virginia. Browning was the soil scientist in West Virginia for the United States Department of Interior from 1934 to 1935 during the formative days of the soil erosion demonstration projects. He became soil conservatist for USDA in charge of soil and water conservation research, at Morgantown, W. Va., in 1936 and remained in that position until 1941. From 1941 to 1946, he served in the same capacity as senior soil conservatist in Ames, Iowa.

In 1946 he joined the Iowa State University staff as research professor of soils and in 1949 was made professor in charge of outlying experimental farms. After one year in this position, he was appointed as assistant director of the Agricultural Extension Service. In 1951 he was promoted to associate director of the Experiment Station, a post he held until March, 1957. He serves on the Iowa State faculty as a collaborator status as professor of agronomy.

Thieman was graduated with a B.S. degree in Agriculture in 1937 from the University of Missouri. After graduation, Thieman returned to the home farm in Lafayette County to actively produce and improve Polled Shorthorn cattle and to farm. Since 1931 the Thieman herd has won over one-third of all International Grand Championships in Polled Shorthorns. Thieman cattle have been sold for export to Canada, Argentina, Australia, New Zealand, South Africa, Scotland, and five Canadian Provinces and 15 states in the United States.

He also has judged at many leading state fairs and livestock shows throughout the country.

Young, who retired in 1967 as president of Farmland Industries, has devoted his life to the organization and development of cooperatives. He worked for the Missouri Farmers Association from February 1926 until 1931 when he accepted a position with the Union Oil Co., which became the Consumers Cooperative Association in 1935, and on September 1, 1966 was named Farmland Industries, Inc. In 1949 Young was made assistant general manager of Consumers Cooperative Association (CCA) in charge of distribution. In 1961 he was elected president. The sales volume was \$367,000 for the last of his six-year tenure as president.

Boles, '15 and Fehsenfeld, '16

A high light of the barbecue, attended by more than 500 alumni and friends, was the gathering of the "Old Timers," who set together at a special table. Included in this group were: Lewis W. Thieman, '04; Henry Taylor, '08; Ashleigh Boles, '15; Alorzo White, '12; Charles Cardwell, '13; H. A. Henley, '13; A. R. Troxell, '14; C. W. Sheppard, '16; John D. Fehsenfeld, '16; W. D. Keller, '15; F. Paul Ward, '16; Antone Stankusky, '24; J. L. Buntin, '11; Ralph E. Williams, '13; Emmett C. O'Neal, '32; W. L. Barrett, '18; Robb S. Crough, '17; Paul Schowengerdt, '18; Henry Taylor, '08; Longwell, '18; H. G. Condry, '18; Preston Walker, '16.

Stuckey speaks to human relations class in Denver high school.

Battles With Nature Aid Growth

and purposeful, enabling the patrol to operate with safety and skill, and with some degree of comfort. Stuckey says, "The miracle of the program is that learning and experience are simultaneous and equivalent, that the student is not always being prepared for the future; rather, the future and present are continuous."

Every day is a test, a series of challenges. Man's interdependency with other men is an excellent topic for discussion in a college dormitory or fraternity house, but when a young man literally holds the life of another in his hands as he belays him up a rock face, or across the Capitol Peak knife edge, the meaning of interdependency is dramatically known. That knowledge is probably even more intense for the man being belayed.

Important learning in human relations is an inevitability when a boy lives very closely, day and night, with eight others. The students come from a vast variety of backgrounds: colleges, public and private schools, juvenile courts. The patrols are constructed as heterogeneously as possible on bases of physical size and strength, economic and occupational level, race, religion, geographic origin and school situation. The range of social background is made possible through a scholarship program. These funds are private donations of corporations, business and individuals.

Outward Bound, a private, non-profit organization, strives to allow its student the opportunity to discover what qualities he actually has to increase the accuracy of his self-evaluation. Students are not asked to accept any dogma or creed or specific beliefs. Outward Bound rather seeks only to impel them into experience and asks them to think about those experiences. From this, Stuckey believes, all other benefits derive. "Under conditions of stress a person has an unequalled opportunity to observe his and others' thoughts, emotions, and actions. Stress situations about: the hunger and loneliness of the solo survival, three days and three nights alone in the wilderness without food or companionship; the fatigue of walking up and down mountainsides 12 hours with a 45-pound pack, or of the last two miles of a six-mile marathon; the fear of one's first rappel, a descent by rope of a 210 foot sheer rock face. Though interdependence and the necessity of cooperation are constantly present, the school is ultimately an individual ex-

perience. The greatest competition is between the student and himself. "This is a unique learning situation; a student learning about himself, not as he is compared with others, his perceived superiorities and inferiorities, but from himself within an impersonal but forbidding environment. The man does not conquer the mountain, he conquers himself, his fears and uncertainties."

Outward Bound was founded in 1941 when a merchant shipper named Lawrence Holt grew alarmed at the number of seamen who died in emergency situations. A survival program was devised by Kurt Hahn, who had already been using adventure and service with school boys. The course was not one of intricate techniques, but rather a series of experiences designed to show these young men that they could endure more than they had imagined, and that no matter how grim the task, life was valuable enough to withstand and finish that task.

Stuckey sees Outward Bound's role now as survival training—survival of the human spirit. He refers to Thoreau's search for what life has to teach: "He (Thoreau) wanted to discover the value of human life in its pure essence, unadorned by the comforts and glitter of civilization. I can look back and see that, before I had heard of Thoreau, even before I learned to think, I have wanted to live deeply and fully. I've always valued the classroom as an educational environment, but I have also realized the importance of experiential learning, for only through experience can a person get an adequate picture of himself."

Winter months are divided among program administrative work and speaking engagements. He and his wife, Barbara, have recently bought a house in Denver, an old millionaire's mansion in much need of attention. "They both attend classes at Denver University. Their plan is to rent the house "gloriously renovated and restored" former glory and power" for the summer, preferably to teachers or university students, while they reside on Outward Bound's campus in the mountains.

"They admit that they do not know where they will be or exactly what they will be doing in five or 10 years, but they have no doubt that whatever the situation, they will both be teaching and learning."

Forty-six persons from Adair County attended the annual annual gathering Feb. 23 at Kirksville, Mo. Pictured are, left to right, Mr. and Mrs. Sam Burk and Mr. and Mrs. Cordell Tindall. Tindall, from Fayette, Mo., and a member of the Alumni Association's national board of directors, spoke on agricultural research at the University of Missouri. Burk was toastmaster. New secretary elector, were Francis Maritz, president; and Mrs. Edward R. Jayne, secretary-treasurer. Mrs. Jayne and Mrs. Bob N. Reed were in charge of arrangements for the dinner.

MISSOURI ALUMNUS

April 1968 Volume 57 Number 3

The Missouri Alumnus is published monthly except July and August by the Alumni Association of the University of Missouri-Columbia, 308 Jesse Hall, Columbia Mo. 65201. E. W. Robinson, president; Steve Shinn, editor; Barbara Johnson, assistant editor; class notes editor. Second class postage paid at Columbia, Mo. Active membership \$4 a year. Life membership \$80.

Mizzou Wrestlers Move Toward Top With 18-0-1 Mark

by Ron Feinlein,
Student Assistant
Athletic Information Office

"This is the practice room of the greatest wrestling team in the history of the University of Missouri," reads a sign in the small, low-ceilinged room in the attic of Rothwell Gym. That's no exaggeration. It's an understatement.

The 1967-68 season was a renaissance for Missouri wrestling. It took eight years from the resumption of wrestling in 1959 to produce a talented, powerful squad which raced through an unbeaten season with an 18-0-1 dual mark in the Big 8 tournament. Mizzou finished fifth, only one point out of fourth, their highest finish ever.

Coach Hap Whitney and his Tigers proved that nice guys were no longer winning prizes for Kansas State, North-west Missouri State, Illinois and Purdue. Missouri whipped these traditional tormentors for the first time this season. In addition, first-time opponents such as Colorado and South Dakota State felt the wrath of an aroused Tiger.

Missouri's wrestlers do not meet Iowa State, Oklahoma or Oklahoma State as these teams compete in the Big Eight conference in the nation. Whitney plans to bring his squad along gradually in order to work up to their level. The progress the Tigers made this season may have accelerated his timetable.

The difference between an undefeated team and the 7-10 season which preceded it were simple but crucial. First, the addition of talented sophomores on wrestling scholarships was a big boost. They joined a nucleus of three juniors who were the first to receive wrestling stipends. Second, these spots flooded the upper weights where Missouri has traditionally been weak. This gave the team balance. Third, the team stayed healthy. Injuries to key personnel made the previous season a disaster. Whitney took the same lineup to the Big Eight Tournament and dual match which concluded in the first dual match in December. Minor hurts and a case of the measles were the only physical problems the squad had.

The team seemed to sense their own power early in the fall. They landed and worked but did everything as a team. "We had a real feeling of togetherness back then," sophomore Bob Knudsen (191) said. "We probably played more than we worked but we did everything as a team."

Captain Ed Lampitt (145) and Gary Frieders (hvt) were the only seniors in the lineup when the Tigers opened competition in December. Three talented juniors Steve Cavanaugh (129), Bill Shepherd (157) and Rick Thompson (160) were expected to carry much of the load as they had the year before. Cavanaugh had placed second in the Big Eight and Thompson looked fourth in the west class. Shepherd epitomized the problems of '67 as he missed the tourney with a shoulder separation.

But they were all healthy for the new season, and they were helped by sophomore Bill Williams (130), Brad Zimmel (152), John Palazzolo (167), Jon Thomas (177), and Knudsen (191).

The first indication of the team's future success came at Springfield in the All-Missouri College Tourney in which the Tigers stole everything except city hall. With 11 first place medals at stake, Mizzou went nine with the other two Tigers coming back for consolation championships. It also served to weld together the solid team unity.

Whitney annually named Kansas State, Illinois and Northwest Missouri State as the teams to beat, and annually he had been disappointed on all three counts. But the 67-68 team was the coach's own words "the strongest group of kids." They edged Kansas State 16-13 in December and a month later bumped off Northwest, 18-17.

But the weekend which made the season a success came at Nebraska. Instead

Coaching staff for 1959 Big 6 Champions included, left to right, Don Faurot, Phil Bengtson, Herb Bunker, and Chauncey Simpson.

New Packer Coach Started With Tigers

The big news in sports in February was the stepping down of Vince Lombardi, Green Bay Packer coach. But for Missourians and University graduates, the biggest news was that the new coach was a man who began his career as an assistant to Coach Don Faurot and the Missouri Tigers. That man is Phil Bengtson.

An All-American tackle for the University of Minnesota in 1934, Bengtson was hired right out of college in 1935 as the first line coach to serve under Faurot at Missouri. In an interview with Bill Richardson of the Kansas City Star, Faurot said "Phil was a personable young man with a lot of enthusiasm for the game. He had all the attributes of a fine coach." Naturally pleased with Bengtson's new appointment, Faurot, former MU head coach for 18 years and now on the Alumni Activities staff, continued, "That's a real tough situation he's in, stepping in to follow Vince Lombardi, but I'm sure if anyone can handle the assignment, Phil can."

That's probably true. Although not generally well known, Bengtson's defensive unit of the Packers three times gave up the fewest points in the NFL and was never lower than third. And for the past nine seasons it has been Bengtson who has called all the Packer defensive signals.

Bengtson's respect and admiration is just as great for Faurot as the former MU head coach's respect is for his one time assistant coach. "I want to thank Don particularly, a man who I've respected as a real fine football coach and whose experience and knowledge I've been able to capitalize on as a coach," said Bengtson in an interview with Jim Irwin, sports director for Station WLUX TV in Green Bay and former University graduate.

"We worked hard," he continued. "Our hours were long and, as active and intense as Don was, just following him was a real experience and rather tiring, even for a young coach. I don't think I could keep up with him even now."

Not only has Bengtson experienced a winning streak with the Packers, but the Tiger team he helped coach went

to the Orange bowl in his last season at MU. Next year, when he was on the staff at Stanford, the team under Clark Shaugnessy won a Rose bowl victory over Nebraska. Bengtson was at Stanford from 1939 until he served with the Navy and then again until 1951, when he joined the San Francisco 49ers as a defensive assistant.

In 1959, Bengtson joined the Packers and "the indomitable Lombardi," the only man ever to coach a team to three straight titles since the NFL adopted the playoff system in 1933," said a wire story in the Columbia Missourian.

But it's not only football that brings fond memories of the University to Coach Bengtson. Here at Missouri, he met his future wife, the former Mary Kathryn O'Leary. She had attended the University for two years but was forced to drop out when the depression hit. Seven months later she returned to the University to work in the registrar's office.

Part of her job was to evaluate transcripts of athletes in order to place the student in a division. She told Jim Irwin in his interview that one day Hi Simmons, Missouri's present baseball coach who was on Faurot's same football staff with Bengtson, came into the office with Bengtson and brought her a transcript.

"Hi introduced Phil to me, but I really didn't catch the name. I evaluated the transcript, handed it back to Phil and said, 'Well, you enter you in the College of Agriculture.'" But this meeting turned out to be important. Two and a half years later they were married. They have four children, Jay, 25; Bob, 22; Betty, 20; and Brian, 18.

The Bengtsons make a trip to Missouri at least once every two years. Mrs. Bengtson's relatives live in Moberly and they stop in Columbia to see the Faurots and the Simmonses. As Faurot recently commented "I guess we should have met Stanford's offer back in '39." But then maybe Phil Bengtson wouldn't be Green Bay Packer coach today and, after all, his most exciting years are probably just beginning.

of the usually tight match with the Cornhuskers, Missouri rolled easily, 25-8. As part of the five-team meet, the Tigers met Colorado and South Dakota State for the first time ever on the same night. The Buffs went down first 15-14 and State fell 18-13 in the evening session.

"That was definitely a turning point," Whitney said. "It put our program ahead two years."

A week later in a quadrangular meet at Illinois, the Tigers missed Shepherd who was out with the measles. They were tied by Kansas State 14-14 but overcame Illinois 24-9 and Purdue 24-8.

Individually, it was a record-breaking season with Cavanaugh closing the dual season at 19-1-1 including the last 14 victories consecutively. Shepherd broke a team mark for the most pins in a season while every regular finished far above 500.

It was a season in which Missouri could finally show its wrestling muscles. But the ultimate testimony to this team is still years away. That will be when it becomes known as "the first of the great wrestling teams at the University of Missouri."

Tomlinson's 394 Points Set Sophomore Record

Missouri's basketball team finished the season with a 10-16 record, their best record since 1964-65. Don Tomlinson scored 394 points, the biggest season's production ever by a Tiger sophomore.

Missouri Scores Near Sweep In Recruiting Grid Prospects

By RICK HARGRAVES
Manchester Sports Writer

With almost a 100 per cent response from the St. Louis and the out-state areas, the Missouri football staff has "just about committed the total amount of scholarships we can award," Clay Cooper, recruiting coordinator, said.

Allowed to give out 45 full athletic grants, Missouri already has received 37 signatures on Big Eight letters of intent. Several others are good possibilities, Cooper said.

"We had almost a clean sweep of all prospects from St. Louis and our out-state prospects," he said. "In fact, with the exception of Kansas City, we got just about everybody we wanted. Of the three blue-chip prospects in Kansas City, KU got one and we got the others."

Although the Big Eight tender only prohibits a player from attending another conference school, Cooper pointed out, "Missouri has very few guys defect. We make it clear when they sign this that we expect them to be at Missouri."

"Actually, the national letter (which binds a player to the school) is routine here because 95 to 99 per cent of our Big Eight recruits are final." The national tender may not be signed until mid-May.

Cooper said that the Tiger coaches were looking for added backfield depth and were primarily interested in running backs.

"Of course, we're committed to getting all the good Missouri boys, regardless of position, to come to the University. But, our out-state recruiting was aimed at the running backs."

While noting that it is difficult to predict how the group will turn out, Cooper admitted that "all the coaches are enthusiastic about the prospects. We definitely have a high-caliber bunch signed boys that are athletes, students, and competitors."

Two reasons why the coaching staff is so enthusiastic are a pair of hard-running Prep All-America backs, Lorenzo Brinkley of Beaumont and Bill Mauer of Belleville (Ill.) West.

"A lot of schools were after those boys," Cooper said. "And that indicates that a lot of people think they can play college football."

In what Cooper termed a continual search for "good quarterbacks, Missouri landed another much-sought after prospect in Bethallo's (Ill.) Ricci Stotler. A two-year All-Metro selection, Stotler had been strongly recruited by Notre Dame and other schools.

Alumnus Brings Education to Samoans

What's it like to be the only American family on a native island for two years? In fact to be the first non Samoans to have a home in the village of Fiti'uta on the remote South Pacific island of 'Tutu.

Cameron Pulliam since he received his masters in education at the University in 1966 has been living on a six-mile-long and two-mile-wide island in the territory designated as American Samoa. Here he is the principal of the elementary TV school, a part of the American Samoan educational television projects sponsored by their government and the U.S. Department of the Interior. The aim is to raise the entire cultural level of the people.

What does an American family encounter on this isolated island? The natives had never seen an automobile or any machinery with wheels until a bull dozer was used to build the school and Pulliam home. Clothes for petite American women like Mrs. Pulliam can't be found — the native women are just much larger. Native homes have no furniture, just mats, and no glass windows. Women do their wash in a common water trough, and no one has ever had a warm bath because of the lack of fresh water.

In addition electricity is rationed at about 65 hours a week, running water shortages are common, and transportation exists only by inter-island steamer and native long boat. Communications is by single-side-band radio telephone.

But the Pulliams also found a beautiful country, "the best place in the world to be on a blustery, gold Missouri day. I can't describe the beauty of these endless beaches and green mountains." The people are warm and friendly, and most of all Cameron Pulliam found a challenge to develop education on this island and has been fortunate in already seeing results.

"To establish a new government school in the village was our sole purpose for coming here. We accepted a two year appointment with the understanding that the second year would be spent Pago Pago," a more populated industrial city.

The year was up, the Pulliams were looking forward to a little more luxurious living. Pulliam had already received his appointment to be director of language arts curriculum in a junior high school.

But things didn't turn out the way they had planned. The natives of the village Fiti'uta were afraid to lose the Pulliams. They knew how much the family had instituted change, like improving the government water system, and upgrading education for their children including a hot-lunch program. Pulliam had also been a little mystical to them with his knowledge of fixing broken generators, or his many trips up the 50-foot tower on the edge of a hill 350 feet above the ocean to fix the antenna so the families could watch Bonanza and other television programs.

And it was more than just losing Cameron Pulliam's ability and leadership. They would lose Donna Pulliam, who was teaching a music class and helping the natives to cultivate more. And their two children, Joy and Dale, had taken a bright spot in all their hearts. In fact, even though they had been the first white family in the village, the Pulliams had fit in beautifully and the people didn't want them to leave.

Instigated by the pastor in the village, a petition was begun and sent to the board of education and the governor to make the Pulliams stay another year. With the promise of additional conveniences and changes in the village, the Pulliams were easily persuaded to stay.

"We couldn't help but to go back and we won't ever forget them," Mrs. Pulliam said. What followed was a party where the Pulliams were guests of the chief, an extremely high honor.

And so another year has been spent in Fiti'uta. "I'm setting up a weather bureau station here," Pulliam wrote this winter. "The equipment just came in the mail. No one has ever measured the rainfall on this eastern-most tip of American Samoa." Pulliam continues to be principal and aids the teachers who teach the children.

"We're not trying to change their culture but to raise the literacy level." The 15-year program, in its seventh year now, is providing the Samoans with the equipment and knowledge to upgrade themselves. After the 15th year, the Samoans will carry out the program. In Fiti'uta the zest for knowledge is great. The school was built by the town people themselves. Even today, the children work every Thursday afternoon to make it the prettiest school on the islands. At 6:30 in the morning the 180 unformed children wait outside for the doors to open at seven.

"We've managed to talk the government into a water reservoir on our school complex. We now have electricity all day but things are much better." Electricity must be turned off from 10 at night until 7 in the morning and 1:30 in the afternoon to 6 in the evening. At night there are six lanterns for the program in such things as agriculture and hygiene for adults and entertainment from New Zealand, United States, Britain, and Canada.

Pulliam was particularly concerned with the water supply because of the lack of fresh water. Skin diseases like ring worm were quite common but the salt water on the other hand is a great benefit for

Pulliam speaks to "his children" in front of the school.

Above Cameron works at his office. Right, delighted children gather around the first water fountain they have ever seen.

The first year in Fiti'uta, Dale was to enter the second grade but the English language is used only in the third grade and higher. Mrs. Pulliam helped him at home to keep up with the third graders.

Joy and a playmate, center, President and Mrs. Johnson tour American Samoa in 1966. Right, the school morning at ways begins with prayers and songs. The Pulliam home is in the background.

food supplies. "The abundance of seafood is marvelous. They only fish here for a sport, because fish just naturally collect when the tide goes out." By digging holes in the sand when the tide is out, the holes fill with fish when the saltwater comes back in. For other food the Pulliams have to order by radio telephone from the pastor's home. They are able to buy fresh meat from New Zealand and keep it in a freezer which runs even when the electricity goes off. "After while New Zealand seems awfully close." Pulliam laughs, "It's only 2100 miles away."

Education certainly has not been all from Pulliam to the natives, but a definite reciprocal process has occurred. They've watched the natives building houses with a circle of posts. The roofs are cane thatched overlaid with palm leaves. Small pebbles from the beach are on the floor. Mats are used to keep the rain out of the homes. Pulliam has taught them many new things about medicine and the Samoans have taught

them something about earth tremors—ignore them. "I fully expected this little volcanic island to blow all to bits, but the Samoans live here year after year in peace and quiet." He does add though, still not convinced by the native's calm, that there are boulders the size of a garage which have rolled down the mountain during previous earthquakes.

The Pulliams aren't sure where they will go next. "We're hoping to return to Columbia in June. I'd like to pick up a few more courses, and Donna wants to complete her degree in home economics." Previously Pulliam taught English in the Fulton, Mo. Junior High School and was principal of the Russell Boulevard School in Columbia. "I hope to write a book" among other things, he says.

They think they'll be back in the U.S., but those native chiefs can be pretty persuasive. After all they know it isn't often they can get a man like Cameron Pulliam.

1900

TOM BRUCE, Arts, was selected to receive a national citation as Loyal School Dad. He lives at 820 N. Calhoun, Mexico, Mo.

'09

PATTERSON BAIN, BS CE, was given honorary membership in the University's College of Agriculture. As an engineer, he worked with the U. S. surveying the Mississippi River and worked on the Panama Canal in 1914 and "helped to turn on the tractor." After World War I he joined the Missouri State Department of Agriculture and the Missouri State Horticulture Society and helped establish a marketing division for vegetable growers.

'10

DR. HARLOW SHAPLEY, AB, AM '11, LL.D. '27, has had several speaking engagements this fall in the Midwest. He has written more than a dozen books on astronomy, has served as president of eight national scientific organizations, and has been awarded honorary degrees from 17 major universities around the world. He lives at Sharon Cross Road, Peterborough, N. H.

'13

JAY BARTON, BS Ed., represented the University at the inauguration of Sister Marie Carolyn Klinkhamer, O.P., as president of Saint Dominic College on Jan. 26 at St. Charles, Ill. Barton is a retired industrialist living at 405 Union Ave., Batavia, Ill.

'16

MRS. MERZEE MARVIN Seeburger, BJ, was honored as a 50-year member of Theta Sigma Phi, professional journalistic society for women, at San Diego. She is still active in journalism and writes "Pet Father," a column which appears in several midwestern newspapers. She resides at the San Diego Hotel, San Diego.

'18

DR. MARJORIE CARPENTER, AB, BS Ed. '18, AM '20, a Stephens College faculty member, has been included in the new edition of "Who's Who of American Women." She has served as chairman of the humanities division and dean of administration at Stephens College and resides at 1504 Wilson, Columbia.

'21

WESLEY HENRY MAURER, AB, BS PA '22, BJ '23, represented the University at the inauguration of Roben Wright Fleming as president of the University of Michigan on March 11. Maurer is chairman of the department of journalism at the University of Michigan and resides at 1510 Harding Rd., Ann Arbor.

'23

C. P. LITZER, BJ, is assistant to the president of Gulf South Research Institute, where he is doing public relations and research. He also teaches a class in journalism at Louisiana State University. He and his wife, the former KATHERINE BEAVEN, BS Ed. '23, live at 2000 Myrtle Ave., Baton Rouge.

'23

DR. MILTON D. OVERHOLSER, AB, AM '24, professor of anatomy and department chairman in the University's School of Medicine, was elected an honorary lifetime member of the Boone County State Medical Society. He lives at 1106 Brandon Rd., Columbia.

PAUL JONES, BJ, Representative (Dem.) Missouri has announced his retirement after 20 years in Congress and several years in state and local offices.

'24

C. N. PAINTER, BS BA, executive vice-president of Armstrong Cork Co., has retired from active service with the company. He resides at 1855 Ridge Rd., Lancaster, Pa.

G. M. THRELKELD, Arts, former public information director of the Missouri

Class Notes

state highway department, was promoted to administrative assistant to the chief engineer. He lives at 2014 Livingston Dr., Jefferson City.

'25

THALIA J. TARRANT, BS Ed, AM '31, will retire as assistant professor of history at Illinois State University on Aug. 31. She has been teaching at ISU since 1955.

EDWIN B. SHANNON BS Agr., has retired as vice president of Cullen Center, Inc., and is opening his own real estate office and will work as a consultant in Houston. He is living at 1121 Post Oak Park, Houston.

'28

MRS. GERTRUDE BISHOP Haffter, BS Ed, AM '48, manager of the St. Louis board of Education Radio Station KSLH, was recipient of the "Golden Mike" award for achievement in communications presented by the American Women in Radio and Television. She lives at 17 W. Swon Ave., Webster Groves, Mo.

'29

VANCE JULIAN, AB, LL.B. '30, was appointed assistant director of the Missouri Legal Aid Society, a new project of the Missouri Bar Association. He will be located at 326 Monroe, Jefferson City when not traveling to rural areas where legal aid is requested.

DR. H. H. LONDON, AM, professor of industrial education at the University, was commissioned a "Kentucky Colonel" by the governor of Kentucky, in appreciation for Dr. London's direction of Kentucky students in graduate programs here and for working in the capacity as consultant to some Kentucky colleges.

LOWELL M. PUCKETT, BJ, has retired after more than 34 years of government service with the U. S. Bureau of Land Management and its predecessor agencies within the Department of the Interior. He has been serving in Denver as assistant to the associate director of the Bureau in Washington. He and his wife reside at 1035 South Elizabeth St., Denver.

LAWSON ROMJUE, AB, LL.B. '32, is circuit judge of the 41st judicial district. He was formerly a special assistant to the U. S. Attorney General. He lives at 102 Lamb Ave., Macon, Mo.

J. P. SCHEETZ, BJ, was promoted to senior vice president of Rust Engineering Co. in Beverly Hills, Calif. Since joining the company in 1946, he has served as a director and vice president of nine Rust affiliated companies. He is also president of PALNCO-RUST, the company's Mexican subsidiary which serves all of Latin America.

'30

R. A. HICKMAN, BS BA, manager of marketing for the Government Affairs Department of the Dow Chemical Co., served as general chairman of the ninth Joint Industrial-Military Government Packaging Handling, Transportation Symposium and Exposition in Washington, D. C. He lives at 4202 Chelsea Ct., Midland, Mich.

SANFORD W. STUCK, AB, chairman of the board of Western Typesetting Co., was selected as Graphic Arts Man of the Year during International Printing Week in January. He lives at 2303 W. 59th St., Shawnee Mission, Kan.

WILLIS MOORE, AB, AM '31, chairman of the philosophy department at Southern Illinois University at Carbondale,

has conducted a seven-year experiment in teaching philosophy to high school students. He maintains that the subject is not too difficult, too abstract, nor too disturbing for high school juniors and seniors. He has taught at SIU since 1955.

'33

RALPH WATTERS, Journ Arts, recently became the night editor of the Los Angeles Herald-Examiner. Previously he was editor of the South Gate Press and other McGuffin Co. Southern California newspapers. He lives at 6133 Leona Joan Ave., Pico Rivera, Calif.

'34

DR. E. V. SIMISON, BS Med, eye-ear-nose and throat specialist in Pocatello Idaho since 1938, will leave private practice next summer to become the first dean of Idaho State University's new college of Medical Arts. He and his wife, the former DIXIE WOODS, GN '31, live at 84 Valley View Dr., Pocatello.

C. J. YAEGER, BS Eng., has become assistant to the director of sales at the A. P. Green Refractories Co. in Mexico, Mo., where he lives at 1004 Olive St.

Major ADELA LOUISA RIEK Scharr, AM, one of the first U. S. women pilots, now a St. Louis school teacher, was presented her certificate of retirement from the U. S. Air Force Reserve. During World War II, she was ferrying aircraft for the Air Transport Command. She was the first woman to fly a P-39 single-engine fighter plane and the first woman to fly the Boeing C-135 four-engine jet transport. At present she has flown nearly every type aircraft in the Air Force inventory.

'36

Mrs. CLARISSA START Davidson, BJ, columnist and feature writer for the St. Louis Post-Dispatch, was one of seven area women to receive the Outstanding Working Woman award presented at Brentwood St. Louis. She resides at 300 N. Gore, Webster Groves.

'37

DR. WILLIAM JACKSON JARMAN, AB, minister of Park Avenue Christian Church in New York City, has been named

1915-22 MU Cagers Reminisce

By IVAN G. GOLDMAN

(reprinted from the Kansas City Times)

In the old days of college basketball a lanky, muscular player who could mete out and sustain crushing physical contact was the man who succeeded. The willowy, towering cage artists of today wouldn't have lasted out the first half.

"We were on the floor as much as we were on our feet," a former participant of the "old" game said.

Several players on the University of Missouri teams which thrilled fans in the years between 1915 and 1922 gathered in February at the home of Dr. Ralph R. Coffey, a former Missouri player.

According to the rules they used, the man explained, if an opposing player got in your way, you could knock him down. "If you had the ball and a man blocked you (which was also legal) you could charge right into him or sweep him aside with a pivot," a former team member said.

"Phil Scott was thrown into the bleachers more than once," one man remembered. Scott, who was at the reunion, confirmed the remark with a grimace.

And in that rough-and-tumble game of yesterday—played on gnarled hardwood floors, the players' only protection was knee and elbow pads, and more important—speed and endurance.

"The shoes weren't as good as today's," someone remarked. "It wasn't as easy to stop."

And the 32-inch ball was neither balanced nor completely round. They were proud of their record. They were conference champions in 1918, 1920 and 1921. In 1922 they shared the title with the University of Kansas. Both teams compiled a 15-1 record.

One of the highlights was the 1921 game with Oklahoma. They defeated them 65-12 on the Sooners' home court, someone remembered wistfully.

But the Mizou players had great respect for their opponents.

"Some of those guys we played against were poison," a man said.

Craig Ruby, who was team captain for two years, went on to coach the 1921 and 1922 teams. Now retired, he coached University of Illinois teams between 1923 and 1936. One of his

players said Ruby, compiled an 81-7 record in his coaching years at Mizzou.

In those days the players received no financial aid for their efforts.

"We played because we loved to play," a man remarked.

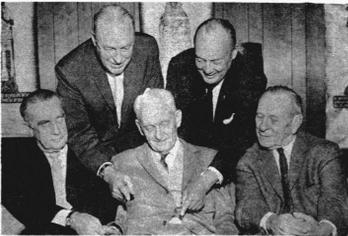

"We paid our own room and board."

The team's accommodations and mode of travel were also something less than fancy.

"We'd take a street car when we got off the train. No cabs for us," he said.

Another teammate recalled a hotel in Manhattan, Kan., which furnished a rope for a fire escape. Due to lack of finances, often the team went on the road with only one coach and eight players.

"But we had an awfully good time," someone hastened to add.

Former Basketball teammates at the University of Missouri—Columbia recall college days while examining an old scrapbook. From left: Phil Scott, Dr. John S. Knigh, Eric Schwab, Dr. Ralph R. Coffey and Craig Ruby. (Photo by Don Dea, Kansas City Times)

Columbia Post Office Has a Woman Postman

"I'm running a little late," she said as she hurried from the post office loading dock with a cart bulging with mail to her car already partially filled with packages.

For Mrs. Hartley Richardson, Monday mornings begin at five o'clock. For she is one of Columbia's two women postal carriers.

During the peak Christmas season, she worked fulltime, but now she just substitutes for the regular carrier on alternate Mondays. All this just started as a bridge club joke.

Glady's Richardson is the type of woman who loves to be busy, loves a challenge, and mail carrying was one thing she hadn't tried. She heard the post office needed help one day while playing bridge and told the wife of a post office employe she was interested.

visiting minister at Lexington Theological seminary for the remainder of the 1968 academic year.

'38

LEON M. McCORKLE, BS Agr., and his wife, the former MARY C. CARBRINGTON, BJ, now live in Sao Paulo, Brazil, where he is headquartered as regional director for Ralston-Purina operations in Brazil, Argentina, and Chile. He has recently acquired a 1700-acre fazenda (plantation) with 900 acres of coffee trees, corn, soybeans, sugar cane, and citrus in addition to livestock.

ALEXANDER BODI, BJ, (editor of the Palo Alto (Calif.) Times, has received the annual Brotherhood Award for his efforts to help minority groups on the Mid-penninsula.

Dr. WILLIAM H. TAFT, BJ, AM '39, professor of journalism at the University, has announced that he is a candidate for the Columbia School Board. Before joining the University in 1932, he taught at Hiram, Youngstown and Defiance colleges, all in Ohio, and at Memphis State University. He has also held positions in newspaper and public relations work. He and his wife live at 107 Sondra Ave.

RALPH M. VORHIES, BS Agr., AM '41, ED '64, represented the University at the inauguration of Robert E. Kennedy as president of California State Polytechnic College. He is an instructor in the crops department at California State Polytechnic.

'39

A. M. HULL, BS BA, vice president-marketing in the Sealright, a packaging subsidiary of Phillips Petroleum Co., corporate office in Kansas City, was elected to the board of directors of the company.

PAUL O. RIDINGS, AM, was elected president of the North Texas chapter of the Public Relations Society of America. He is owner of Paul Ridings Public Relations of Ft. Worth and Dallas and resides at 600 Green River Trail, Ft. Worth.

Although the job of "postman" is more than just stopping to fill the mail boxes, Mrs. Richardson is terribly enthusiastic about her job. Before leaving the post office at 8:30 in the morning the mail must be sorted. "That takes three hours and sometimes I even work on Sunday evenings." And then there's five hours of delivering mail to over 400 people in a 64-mile route. "Of course it's a lot more pleasant now that the weather is warmer," she recalls, remembering the sub-zero mornings.

Mrs. Richardson is used to driving on country roads. "I got plenty of experience driving on country roads when I was young. When my dad lived with us for seven years, I drove him to his farm each day and that was 35 miles round trip."

What does she find hardest about her new job. "Oh I suppose when I began it was keeping track of the people who got packages in addition to letters." Grouped in her car according to area, Mrs. Richardson used to stick red slips next to the mail where a package in her trunk also had to be delivered.

Postal work seems to hold some kind of attraction to this pert 59-year-old woman. Two years ago she filed an application for postmaster. "If they didn't want me for postmaster, I thought I can at least

carry the mail" she said jokingly.

"It's not hard to guess that this woman has had a busy and unusual life previous to her new job. After she was graduated from the University in 1939 with a degree in education, she taught in Centralia, Ashland and Eldon, Mo. But she has also been a telephone operator, a secretary to the state superintendent of schools, a secretary of Stephens College, a real estate seller, and administrative assistant in Washington, D.C. for Morgan Moulder, former representative from Missouri. In addition, Mrs. Richardson has done graduate work in accounting and statistics and, most important, been a mother.

Just being a mail carrier doesn't seem to be enough to keep Mrs. Richardson busy, though. She's active in Red Cross, president of the Women's Democratic Club, plays bridge, antiques, knits, and takes care of her grandchildren.

Postmaster Smiley Herrin feels Mrs. Richardson may well be setting a trend of women mail carriers. What do the other postmen think? "Oh I suppose they thought I was odd at first, but now they don't." And they have been more than helpful especially with heavy packages most postal workers can carry, that is the ones who are men.

REBA STAGGS, AM, was recently named to the World Food and Agriculture Foundation of Madison, Wis. She is director of home economics for the National Live Stock and Meat Board, Chicago, and is living at 1100 N. Dearborn, Chicago.

CHARLES V. METZ, A & S, is author of "Divorce and Custody for Men" which has been published by Doubleday & Co.

'40

LAVERGA CLAIBORN, AM, is serving his third year as superintendent of the Andrew County R-III school district in Missouri. He lives at 1008 Price Ave., Savannah, Mo.

WILLIAM KELSO JOURNEY, LL.B., Clinton and former state senator, was appointed by Gov. Hearnes as judge of the 27th Judicial Circuit. His address is RFD 1, Clinton.

CARL H. THEDE, A & S, is named general sales manager for building products in General Aniline & Film Corporation's building and industrial products division. He and his wife and three children reside at 99 Chicken St., Wilton, Conn.

DUTTON BROOKFIELD, BS B.A., president of Unitag Co. in Kansas City, was elected to the board of trustees of the Northwestern Mutual Life Insurance Co. of Milwaukee. He is also a director of the Kansas City Power & Light Co., First National Bank of Kansas City, and the Southwestern Bell Telephone Co. of St. Louis. He lives at 1735 Cherry St., Kansas City, Mo.

Mrs. LUCILLE HARRISON Hall, a teacher at Osgood School in Overland Park, has been named one of the outstanding early education teachers in the U. S. by Grade Teacher Magazine. She lives at 6223 West 76th St., Prairie Village.

'41

WILBUR F. STEGNER, BS ME, was appointed district 7 engineer for the Missouri State Highway Department headquarters in Joplin.

ROBERT L. DAVIDSON, BS CHE, M CHE '47, currently senior editor for the Chemical Engineering magazine, co-edited Petroleum Processing Handbook, the first comprehensive handbook to cover every major aspect of modern petroleum refining. He is also author of several other books.

'45

HAROLD J. HUDSON JR., BS BA, LL.B. '48, was selected as one of 160 students executive and government officials to participate in the Advanced Management Program conducted by the Harvard University graduate school. He lives at 1440 N. Lake Dr., Apt. 8 E., Chicago.

Dr. J. KERN SEARS, AM, Ph.D. '47, was appointed a research specialist by Monsanto Company's organic chemicals division. He lives at 827 Newport Ave., Webster Groves, Mo.

'46

M. L. HAMMER, BJ, was named to the newly-created position of general public relations manager for Southwestern Bell Telephone Co. in Kansas. Previously he was general advertising manager for the company in St. Louis.

DAVID HAMILTON HORNE, AM, was appointed assistant director of Harvard University Press. Prior to that he was assistant director for editorial affairs at Harvard. He and his wife and three children live at 7 Deacon Haynes Rd., Concord, Mass.

MARK A. THOMSON, Ag. Joun, was appointed chairman of the Savings Bond Committee in St. Charles County, Mo. He is president of the Banner News Co. and publisher of the Daily Banner News in St. Charles.

Mrs. MARIELLA SWENSEN Manville, AB, was named executive director of the Midland Empire Girl Scout Council. She was previously a field adviser on the council's professional staff. She lives in Wathena, Kan.

'48

LOUIS E. BRET JR., BS BA, manager of finance of General Electric's communication products department in Lynchburg, Va., has been appointed general manager of G. E.'s process computer department in Phoenix, Ariz.

Dr. JAMES I. LORE, M.ED, ED.D. '51, was appointed assistant associate regional health director for the Bureau of Health Manpower. He will be located in Chicago where he will assist institutions which train personnel in the health professions.

ROBERT G. NEEL, BS BA, president of Asher Peter and the Woodlawn Memorial Park Mausoleum in Orlando, Fla., has recently assumed the presidency of the Chamber of Commerce in Orlando. He and his wife and four children reside at 1415 County Club Ln.

SAM C. SHERWOOD JR., BS BA, vice president of the Kansas City title division of Chicago Title Insurance Co., was appointed divisional president and ad-

Receiving a plaque for distinguished service from the National Turkey Federation is E. M. Funk, AM '27, professor of poultry husbandry at the University. He was also elected a honorary life member of the Federation. W. P. Funk is Elmer Krich, dean of the University's College of Agriculture.

"Broadcasting Mr. Clean" Is President of AAF

The American Advertising Federation's good fortune has been the National Association of Broadcasters' loss, wrote Advertising Age in January, when the news was broken that Howard Bell had resigned as Code Authority director to become the AAF's new president.

Howard Bell, who has often in the last four years been labeled "Broadcasting's Mr. Clean," was responsible for setting standards of restraint and taste in broadcasting. As head of that self-regulatory board, to which radio and television stations subscribe to increase their reputable standing, Bell was not always liked for his decisions. In an *Alumnus* magazine feature in June 1966, Bell was quoted as saying: "I'm not the most popular individual. The better I do my job, I suppose the more disliked I become."

Ad Age says that as a director, Bell was "dedicated and willing to fight for what he believed in." It will be hard for the NAB to replace Howard Bell. He was a man who worked well with the broadcasters. He was a journalist and a lawyer. He had had 16 years experience in association with Washington politics. He was young, vigorous and was greatly respected.

To quote NAB president, Vincent T. Waslewski who said, upon accepting Bell's resignation, "Under your leadership, the Codes have made steady progress. They have grown in strength and numbers, the administration and enforcement machinery have been made more effective, and, as a result, the Codes have earned a new measure of respect in the eyes of the industry and the public."

For the AAF, who spent four months looking for the right man, this is why Howard Bell was chosen. The former AAF president, Charles W. Collier, retired to serve as a consultant in advertising, public relations, legislation and educa-

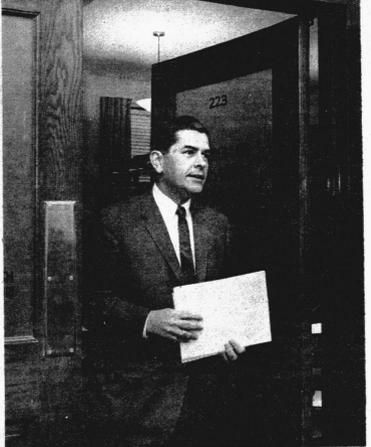

tion. Collier, like Bell, is University graduate from the School of Journalism.

The new job will undoubtedly offer Bell a new challenge. It was only three or four years ago that the Advertising Association of the West and the Advertising Federation of America merged into the AAF. Today, faced with bringing the association to its highest level, Bell said: "I hope I can help this organization realize its full potential. AAF has the capacity and potential to perform very important government and public relations services." Ad Age quoted.

In some respects Bell will still be connected with NAB as they are an affiliate of AAF. Forty thousand individual members in 173 affiliated advertising clubs belong to AAF, along with 700 company members and 25 affiliated national organizations.

Interestingly enough, Bell's new appointment continues the seeming tradition of Missouri graduates heading up the giant advertising organizations. Aside from the AAF, formerly held by graduate Collier, the American Association of Advertising Agencies is directed by John Crichton, BJ '40.

Bell came to the University in 1945 under the V-12 program. He was serving on the Navy ship — journalism. His comment in the June '66 *Alumnus* that "You can't help but look back on college days as the best period in life," was probably influenced by the fact that he met Corinne Chandler here who he married in 1947. She had been a cheerleader, was graduated with an AB in 1947 and worked at the University Hospital until Bell was graduated in 1948. He was granted a law degree from Catholic University of America. Today, they have three children, Mary Elizabeth, 16, Jeffrey, 14 and Laurie, 10.

Bell visited the University in 1966.

ministrative officer. He, his wife, and three children live at 9410 Northeast 49th Terrace, Kansas City.

Dr. LORIN W. ROBERTS, AB, AM '50, Ph.D. '52, professor of botany at the University of Idaho, has just completed the Fulbright Scholarship at the University of Kyoto, Japan. He will remain on Sabbatical leave through June in order to complete research at Istituto di Botanica dell' University in Italy.

'49

Dr. A. E. BLUM, BS Agr., MS '33, DVM '54, was named Veterinarian of the Year by the Missouri Veterinary Medical

Association. He is on the board of trustees of Jefferson County College, and the Jefferson County Health Department.

ARTHUR A. HOBBS, III, B.J. represented the University at the inauguration of Wallace Billingsley Graves as president of the University of Evansville on Feb. 20. Hobbs is currently business editor of the *Evansville Courier* and resides at 207 Tyler Ave., Evansville, Ind.

K. C. JONES JR., BS BA, was elected president of the Jefferson City Alumni Association.

DANIEL B. MEADOR, AM, was named assistant professor, pomology extension, in the department of horticulture at the University of Illinois.

KENNETH MORITZ, BJ, was elected an assistant secretary of the Hartford Insurance group. Previously he was a manager of the company's fidelity, burglary and glass division. He resides at 57 Vernon Rd., Vernon, Conn.

M. PINSON NEAL JR., AB, BS Med. '51, chairman of the division of diagnostic radiology at the Medical College of Virginia in Richmond, is chairman elect of the Southern Medical Association.

JAMES C. OWENS, BS EE, BS BA '50, was promoted branch manager of the International Business Machines Corp. data processing branch in Shawnee Mission, Kan. He and his family reside at 621 Overbrook, Mission Hills.

JOE M. SHAVER, BS BA, was elected secretary of the New York Chapter of the National Association of Accountants. He lives in White Plains, N.Y.

LUTHER R. SMITH, M. Ed., superintendent of the Oak Ridge School in Jackson, Mo., will resign June 30. He will continue to make his home on a small farm near Oak Ridge.

Mrs. ROSEMARY MORTIMER-YEYER, BS, HE, assistant home service director with Laclede Gas Co., was recently named one of five home economists in the nation to receive the American Gas Association's annual home service award for consumer-oriented programs. She lives at 2904 Poe Ave., Overland, Mo.

E. D. WHITE, BJ Agr., BS Agr., was director of sales development at AGRICO

Chemical Co., was promoted a manager of advertising and promotion. He lives at 4843 Mockingbird Ln., Memphis, Tenn.

HAROLD L. WELBORN, Educ., was named factory manager of the A. B. Chance Co.'s Centralia (Mo.) Allen St. factory. He was previously manufacturing engineering manager.

LEONARD KNOERNSCHILD, BS Agr., soil conservationist for the Missouri Soil Conservation Service, has been assigned to Houston, Mo. He previously worked in Higginsville. His wife, the former DOROTHY NISSING, BS Ed., '49, teaches vocational home economics. They have five children.

'50

FRED M. BERNARD, BS BA, consignee sales coordinator at Cities Service Oil Company's general offices in Tulsa, has transferred to the firm's New York marketing region as service station sales manager.

LI. COL. JOE DICUS, BS BA, has left New Jersey and will serve a three-year tour of duty in Holland and will then retire from service.

Maj. ROBERT C. HARPSTER, BS BS Agr., is a construction engineer on duty at Phan Rang AB, Vietnam. Previously he was stationed at Wurtsmith AFB, Mich.

KENNETH C. JOHNSON, BJ, was named director of Gardner Advertising company's new department of personnel and communications. He and his wife and two children live at 43 Garretson Rd., White Plains, N. Y.

Dr. CATHERINE F. TITUS, AM, PhD '55, professor of English and director of the honors program at Central Missouri State College in Warrensburg, was recently included in "Who's Who of American Women."

L. D. SANDERS JR., BS GE, was named a vice president at Del E. Webb Corp. of Phoenix. Before joining Webb in 1961, he served with the U. S. Bureau of Reclamation. He lives at 30 W. Pasadena in Phoenix.

'51

THOMAS DAVIS, BS Ed., is the newly appointed extension recreation specialist for the University department of recreation and park administration. He is mar-

ried to the former JANE BUTTERFIELD, AB, '52.

Mrs. MABEL KUNCE Gibby, M. Ed. Ed. D. '62, clinical psychologist and coordinator of counseling psychology at the Veterans Administration Hospital in Coral Gables, Fla., is recipient of the Federal Woman's Award for outstanding contribution to the quality and efficiency of services to the federal government. She and her husband, Dr. JOHN F. GIBBY, BS Med '52, live at 10260 Southwest 56th, Miami with their seven children.

EDWARD C. NIESHOFF, AB, was promoted to product sales manager for Owens-Corning Fiberglass Corp.'s fiberglass underground gasoline storage tanks. He was formerly market supervisor. He and his wife and three children live at 7570 Stanford, University City, Mo.

RICHARD MAC SMITH, AM, was elected assistant vice-president of Interstate Securities Co. He will serve as director of computer services, in charge of data processing, systems and pro-

At 6'4" tall, this band director presents a problem for his woodwind players in the first row to watch him constantly. He towers over them. John Patterson, who received a BS Ed. in 1959 and M Ed in 1964, is carrying out a wish he's had since he was 10 — to be a music teacher. Today he is concert band director at Hickman High School in Columbia and a member of the Collegium Musicum at the University with his wife. The former Nancy Alvis also received bachelors and masters degrees from the University in music education.

Newsweek Writes Of Jane Froman's Singing Career

Jane Froman was the center of news 25 years ago when she was among 15 survivors of a Pan American airliner crash. Newsweek magazine in late February recalled this event to "one of the most glamorous and popular wartime singers."

With a crushed left ankle, compound fracture of the right ankle, fractured shin, three smashed ribs and a broken right arm, the star made a miraculous comeback. "Eight months after the accident, even though she couldn't walk and had to be carried around the stage, she starred in the Broadway musical 'Artists and Models.'"

Newsweek recounts her continued career with a 35-pond cast on her leg. In 1952, Hollywood made a movie, "With a Song in My Heart," of Jane Froman's life.

Today she is Mrs. Rowland H. Smith, the wife of the University's associate director to the office of public information. She and Smith had met at the University when they were both in school in 1929.

Through with her career in singing, Mrs. Smith was quoted by Newsweek "I stopped singing because I had been in the business for 22 years, and that was long enough. I was tired and I thought everybody was tired of me. Now I'd rather make spaghetti than sing. And when you enjoy cooking spaghetti more than singing you know you are really retired." Her last public appearance was on "The Ed Sullivan Show" in 1962.

Wife Gets First Job, But Husband Now VP

When Gordon A. Jamieson was graduated from the University with a bachelor of science in business administration, he went to New York to look for a job. His wife, the former Virginia Grace Prunty, BS BA '49, found a job the first day.

But Jamieson spent a week waiting in lines at employment services without results. Finally, he got a tip that there was an opening at a bonding firm. Unaware by the Wall Street address. He went to seek the position and got it.

The bonding firm, Blyth & Co., Inc., one of the nation's largest, recently promoted Jamieson to vice president.

Troelstrup Accompanies Navy 'Seals'

No newsmen have ever been allowed to go on a mission with the U.S. Navy Seals commando. That is no one until Glenn C. (Scip) Troelstrup, a Time magazine staffer, was given permission in January.

The Seals, which stand for Sea, Air and Land, are a tough group of elite guerrillas who use Viet Cong tactics and have conducted nearly 600 raids into enemy-held areas in the last year and a half.

Troelstrup, who was graduated from the Missouri School of Journalism in 1957, has had a full and varied life in writing. He came to Columbia in the fall of 1948, but left in 1950 to join the U.S. Air Force. While in the service, he worked with the Armed Forces Radio and was a staff member of Pacific Stars and Stripes, later becoming its assistant art director and cartoon editor. Troelstrup was also news editor and announcer with the AFR service in the Philippines.

Returning to the University, he was art editor of the famed humor magazine, Showme, and in many activities including listing in Who's Who in American Colleges and Universities.

In 1957 he joined the editorial staff of the Asahi Evening News of Tokyo where he met his wife, Ryoko Baka of Japan. They were married in 1960. He left the Asahi News to join NBC's Far East Bureau and handled five news pieces nightly under the pseudonym of Clark Peterson. He was later assistant to the chief of the Far East News Bureau for NBC and east Asia correspondent for Radio Press International.

More recently, Troelstrup has worked for the U.S. News and World Report magazine in Tokyo and narrated Japanese export documentary movies and contributed to Japanese publications.

While he has been in Saigon and on the Seals invasion into Viet Cong country southeast of Saigon, where surprise is the main ingredient of their attacks, his wife has been living in Singapore.

Glenn Troelstrup and his wife in Tokyo in 1960

gramming. He resides at 7235 Wallace, Kansas City.

CLINTON J. STARKE, BS CHE, was recently appointed to the board of trustees and national vice president of Phi Kappa Theta of which he was a member at the University. Starke is product manager for FMC Corp. in New York and lives at 5 First St. in Westport, Conn. He and his wife, the former JOANNE HILGER, AB '54, have six children.

WILLIAM A. SHRAKE, AB, was a recently appointed secretary of Travelers Insurance Co., Hartford, Conn. He was formerly assistant secretary. He and his wife reside at 70 Lincoln St., Lake Garda, Unionville.

Postman Moves Up to Postmaster

Braving the cold weather, the rain, vicious dogs and the miles of walking that typically have accompanied the job of a postman have paid off for Smiley C. Herrin Jr., who was named Columbia's postmaster the first of this year.

When Herrin was graduated from the University in 1939, he received a bachelors degree in education. For part of one year he taught general science and math at Gileon, Mo. Then came an Herrin Jr., who was named Columbia's postmaster the first of this year.

Actually, Herrin was a mail carrier for only several months. But he does remember one large Labrador retriever. "I used to drop my mail sack between us so the dog would bite on it and not me. One day I got the idea that maybe I could handle him, so I made a weak solution of ammonia and water and when he came leaping towards me I squirted him with a water gun." It worked. "You know he never bothered me again, in fact, in time I could pet him."

Moving into the position of mail clerk, Herrin was able to learn the business from the bottom up.

Although he continued to advance, serving as accounting assistant for four years, foreman of outgoing mails for eight years and superintendent of mails for three years, Herrin didn't think that some day he'd be postmaster. "Oh I always hoped there would be advancements and I hoped someday I could be assistant postmaster, but I didn't consider that I'd ever get this job."

Characterizing his new job as one of challenge, he says the one characteristic factor in the post office business today is change. "When I first became clerk, it wasn't necessary to have addresses on mail. The town was sufficient." Then there were only 15 routes. Today there are 36. In the future it will probably be mandatory to have zip codes even in first class mail. "That will be the day when all mail is sorted by optical scanner."

The father of three daughters, two graduates of the University and one who is a senior, Herrin remembers back when he first met his wife, the former Evelyn Thurston, Arts '38. "I

was playing in the University band and taking tickets at the movie theater to pay my tuition." A friend came to the theater with what Herrin thought was a good looking date. "I asked him who his date was and he laughed. It was his sister." They were married in 1938 while they both were still in school. Herrin recalls that his wife must have been bored to death when they were first dating as she would sit through the same movie four nights a week in order to be with him.

Her daughter, Jane, who is now Mrs. Hugh Lundman, got a BS in Nursing in 1967. She is a registered nurse and head nurse on the fifth floor of the Medical Center, Ann, now Mrs. Daryl Hartley, who graduated in 1962 with a BMS, is a registered medical technologist and head of the hematology lab at the Medical Center. Lea will graduate in June and plans to teach French next year.

"One of the things that makes Smiley Herrin most happy about his new job is the morale boost it has given the 209 employees. "They now visibly can see the opportunities for advancement in postal work. It's certainly true that we all need a goal to strive for in order to do a good job."

Smiley Herrin did, only his good work paid off in a goven greater than he had hoped for.

GERRY SMITH, BS Ed, M Ed '63, principal at Eugene Field School, St. Joseph, Mo., was named outstanding young educator by the Junior Chamber of Commerce. He is also director of Young Life in St. Joseph. He and his wife have two children and reside at 2820 E. Circle Dr.

ROBERT G. RUSSELL, LL.B., has become a partner in the law firm of David J. Dizon in Warrensburg, Mo. Previously he was a member of the firm of Popham, Thompson, Popham, Trusty and Conway of Kansas City. He is married and has two children.

University Has Medical Team in Saigon

In the February Viet Cong raids on Saigon, the Cholon Hotel, which was housing all U.S. medical personnel working in Vietnam under the sponsorship of the American Medical Association and AID, had to be evacuated.

Although its occupants were unhurt, the location was reported to be heavily hit. Among those working in the Cholon Hotel were six staff members from the University Medical Center, two of which are graduates.

What were they doing there? The University School of Medicine Pathology Department and the University of Saigon began an exchange program last year with the purpose of improving medical education and ultimately medical treatment in South Vietnam.

Two technologists had just arrived in January. They were Jan Parks, AB '56, AM '67, and Barbara Atherton, Jan Parks, who recently returned to Columbia was administrative assistant of the pathology department. She was in Vietnam to develop administrative procedures for laboratories and write a laboratory manual and standards operations procedure.

Since the start of the program, members of the department have been rotating on a two to three month basis to teach, advise and assist the Vietnamese medical faculty at the University of Saigon. Dr. R. H. Van Preen, Laura Horrel, Paulette Snyder, BMS '65, and Margaret Jackson went there in September. Dr. S. Earl Kerr left for Vietnam at the end of February.

Participating in the exchange, Dr. Nguyen Can, chairman of the pathology department at University of Saigon, is a visiting professor on the Columbia campus. There are also three South Vietnamese technicians here taking courses until next December.

Despite the hardships, the danger and now setting up new facilities in the Caravelle Hotel in Saigon, the University staff members think the program is both rewarding and fascinating. Dr. Donald Senhauser, who recently returned, remarked on the amazing ability of the South Vietnamese to maintain a medical education system in spite of 20 years of war. "There is a great dedication to improvement among professors and the student's drive and desire to learn is fantastic."

NORMAN M. WEBER, MD, spent three years with Medical Missions in Ghana, West Africa, and is now attending the School of Public Health and Hygiene at Johns Hopkins. His new address is 925 St. Paul St., Baltimore.

Sgt. DAVID ESTES, FOR, has re-enlisted in the U. S. Air Force at Scott AFB, Ill. He is a maintenance scheduler at Scott with a unit of the Military Aircraft Command.

JESSE C. ALEXANDER, BS CHE, MS CHE '65, a chemical engineer in the basic research laboratory at Aberdeen Proving Ground, Md., was named post soldier of the year at Aberdeen. He was selected for his soldierly appearance, knowledge and performance of duties and military courtesy.
