THE MISSOURI ALUMNUS

is published monthly except July, August and January by the University of Missouri Alumni Association, 101 Read Hall, Columbia, Missouri and mailed to all active members in the Association. Entered as second class matter under the act of March 3, 1879. Active membership \$4.00 a year; life membership \$80. Member, American Alumni Council.

Acting dean of Engineering

Dr. Joseph C. Hogan, professor of electrical engineering, has been named Acting Dean of the University College of Engineering and Acting Director of the Engineering Experiment Station. Dr. Hogan succeeds Dean Huber O. Croft, who has headed the College since he came to the University faculty in 1949. Dean Croft retired from the

Dr. Joseph C. Hogan

deanship and directorship on September 1, having reached the University's compulsory retirement age of 65 years for administrative officers; he will continue on the faculty as professor of mechanical engineering, with the additional title of Dean Emeritus. Dr. Hogan received his Master of Science in Electrical Engineering degree in 1949, from M.U. He has a B.S. in Electrical Engineering degree (1943) from Washington University in St. Louis, his birthplace, and a Ph.D. in Electrical Engineering (1953) from the University of Wisconsin. He has been a member of the University of Missouri staff since September, 1947. At Missouri Dr. Hogan has been teaching induction machinery power system analysis and stability, control systems, and matrix tensor analysis. He has been director of the network analyzer facility at the University. He has taught also at other universities and has been employed in private industry. Currently he is a consultant to the Aerojet General Corporation of Azusa, Calif. He is a registered professional engineer in Missouri and author of a number of technical articles.

Peck directs research activities

On September 1 Dr. Raymond E. Peck, professor of geology, became Associate Dean of the Graduate School in Charge of Research Activities. He will retain his title of professor of geology, but he will probably have to relinquish nearly all of his teaching duties to devote his efforts to research programs.

"This appointment is a recognition of the growing importance of research in our overall educational program," President Elmer Ellis said. "Our research projects are increasing both in number and in scope, and we have long realized the need for close coordination between the various University divisions to prevent possible duplication of reports, to attain maximum benefits from private and public grants supporting these programs, and to assure maximum opportunities for graduate students engaged in research." President Ellis added that Dr. Peck, "an active and acknowledged authority on organized research," will supervise and stimulate applications from members of the faculty for research grants, and will help direct the research programs to the best possible advantages.

The University awarded 614 degrees at the August 4 Commencement at the close of the 1961 Summer Session. Nearly half of the degrees went to graduate students. However, thirty of the degrees were earned off the M. U. campus by students who completed requirements for the M.Ed. at Southeast and Southwest Missouri State colleges at Cape Girardeau and Springfield. During the University's academic year, President Elmer Ellis conferred a total of 2,443 degrees. Speaker for the August Commencement was Dr. J. William Maucker, former member of the University faculty who is now president of Iowa State Teachers College at Cedar Falls.

The Professional Approach

By Karl R. Bopp

Commencement is a time to look—not backward, but forward—even though at our present state of development no one knows what the future holds. Suppose we begin by looking forward some two or three decades. By that time many of you will have attended graduation exercises for your own children.

What would you like to have your children think of you as they graduate? What can you do to merit such thoughts? Contemplating your children's presumed thoughts in this way is most likely to reveal what is really important—your basic motives. This is true because in dealing with your own child you are concerned with an individual you love deeply, who is of your own genes and blood. At the same time you are dealing with a person who is an individual in his own right, different from yourself and from everyone else. You must appeal to his heart and persuade his mind if you are to influence him as you wish. Unfortunately, you cannot be sure that you know what is best. Nevertheless, three decades from now you may well consider that being a parent is one of the most humanizing educational processes known to man.

* * * *

The basic origin of the explosive ideas that have kept the mind and the patent office open is the insatiable desire of man to know the unknown, to comprehend his role in the universe. You are aware that knowledge is like an island in a boundless sea of ignorance. The more you learn, the larger your island, the greater its periphery, the more aware you become of what remains unknown! Hence, you know that the extent of your education is not measured by the number of questions you can answer. The question, What is it? is only the starting point. Education begins when one asks: Why is it? What of it? What are we going to do about it?

It is when we ask such questions that we find either that science is silent or that scientists respond with conflicting voices. The area of agreement among scientists narrows rapidly as we ask more fundamental questions. There is no agreement at all at the deepest levels, such as the ultimate philosophical—and theological—implications of the DNA molecule. This makes one wonder how objective and impersonal science really is. Even logic, that powerful mistress of systematic thought, is not infallible. Indeed, she has been described—not altogether facetiously—as an organized way of going wrong with confidence. I say this not to soothe those who may have experienced difficulty with logic and science but rather to caution those who feel themselves masters not to expect more of these disciplines than they can deliver. The wind of change has opened even some of these most tightly closed doors.

Science has taken over large new territories through application of statistical methods. But, somehow, it does not really satisfy our inherent quest for certainty to be told that something has a very high degree of probability. Thus, the motions of the planets about

Continued on inside back cover

BOOKS FROM THE UNIVERSITY OF MISSOURI PRESS

The University of Missouri Press, barely past its third birthday, conducts itself in a manner quite grown-up for its age. As a precocious upstart in the book publishing field, the University Press has earned considerable notice in professional circles for the quality of its books. In no rush to produce books for the sake of their numbers, the Press' total output in these three years takes up no great deal of space on a bookshelf. Where this modest but growing collection impresses is in the matter of scholarly content and in the workmanship and handsomeness of the volumes.

Established in the summer of 1958, the Press had three books in production six months later; today it has a total of seventeen volumes in print, including a paperback reprint of a hardcover book. In various stages of production are several other books. In May, 1960, less than two years after it was founded, the Press was accepted for membership in the Association of American University Presses. This is like being listed in "Who's Who."

The Press functions primarily as an editing and selection point, inasmuch as it has no printing equipment; printing is done by contract. It operates under the control of an advisory committee of seven faculty

members appointed by the President, with the director and the production manager as ex-officio members. The Press publishes scholarly books and monographs, the University of Missouri Studies monographs, and books of merit in any area of general interest.

Each manuscript under consideration for publication as a Press book is read by several outside experts in the subject matter of the work. On the basis of these readers' reports, and with the aid and approval of the advisory committee, the editorial staff of the Press selects those manuscripts which best fit into the over-all publication schedule of the Press. After accepting a manuscript, members of the Press staff prepare it for printing. The sales and promotion manager contacts libraries, bookstores, and special interest groups by direct mail, exhibits, and advertising in selected publications.

The Press is particularly interested in the work of University of Missouri faculty members, whether it be scholarly, creative, or of a more general nature. Missouriana or regional material is especially welcome. As President Elmer Ellis said when establishment of the Press was announced in 1958: "We hope

to encourage publication of scholarly works, and of any really good work in any field, by putting such publication within the reach of authors who have spent time, money, and effort in the research necessary to produce a good manuscript."

In recent months the Press has become settled in more adequate quarters in Building T-2, after having been housed in old Lathrop Hall. In addition to editorial and business offices, there is a storeroom for the books now on hand, and a mailing room. Orders for the Press books come in daily, often in modest but steady numbers, occasionally in bigger spurts. A brief sketch of each of these books follows:

American Public Address: Studies in Honor of Albert Craig Baird, edited by Loren Reid. Of particular value to teachers of speech, this book will also interest historians and the general reader. An introductory essay discusses the career of Dr. Baird, Professor Emeritus of Public Address at the State University of Iowa, who has been a visiting professor of speech at Missouri. The other essays analyze the public speaking of fifteen prominent Americans during the last hundred years, and indicate the scope and influence of public address in America. Dr. Reid, who edited the volume, is professor of speech at the University of Missouri. The essays were written by professors of speech at several other American colleges and universities. The 330-page book is priced at \$5.95.

The Rights of Man in America, 1606-1861, by Gilman Ostrander, an associate professor of history at Michigan State University. Ostrander traces historically the creation of democratic practices in America from their seventeenth century English origins to fulfillment in the age of common man. Professor Ostrander analyzes the changes in the concept of equality from the aristocratic view to the democratic view; he examines the political, social, intellectual, literary, and religious forces which gave democracy its American meaning. Written for both layman and specialist, the book is of particular value to teachers and students of American history, political science, and literature. *The Journal of Southern History* commented: "This history is well-told and well-documented and provides an admirable orientation text for those who wish an up-to-date framework for the interpretation of familiar events from 1660 to 1860. . . ." In addition to the \$6.50 hard cover edition, the book is also available as a paperback Columns Reprint at \$1.95, published for students at colleges where the book has been assigned as supplemental reading in various courses.

Freedom and Equality: Addresses by Harry S. Truman. Edited by David Horton, who is professor of political science at Westminster College, Fulton, Mo., where Mr. Truman delivered the address, "What Hysteria Does to Us." Of this collection of nine addresses, the first three deal with the treatment of the largest minority group in the United States, the Negroes. Five addresses are concerned with meeting the internal threat of Communism without destroying

the freedoms guaranteed by the Bill of Rights. The final document—the veto message on the Immigration and Nationality Act of 1952—deals with the problems of both Communism and the treatment of minorities. In his introduction, Professor Horton discusses Mr. Truman's record on these issues as Senator and as President—the degree to which he translated ideals of freedom and equality into specific policies and practices. (118 pages, \$2.95).

Morals for Mankind. In a series of three lectures, Herbert W. Schneider, distinguished American philosopher, examines three aspects of progress toward a science of morals, which he believes to be in the making. This is the inaugural series of the Paul Anthony Brick Lectures. Herbert W. Schneider was professor of philosophy and religion at Columbia University from 1930 to 1937, served with UNESCO between 1952 and 1957, and has written several books. He is at present director of the Blaisdell Institute for Advanced Study in World Cultures and Religions. *The Personalist* says of this volume: "The author's arguments are presented in a lucid and forceful manner—a fact which makes this challenging book the rewarding reading it is." (82 pages, \$2.50).

Earlier University of Missouri Press books, previously reviewed in the *Alumnus*, include:

The Wild Mammals of Missouri, by Charles and Elizabeth Schwartz. (341 pages, 400 illustrations, \$5.95). This handsome book has already won two top awards for design, typography, illustration, and book-making. Reviewers remark: ". . . the finest and most complete memoir on the mammals of any state that has been published."—Remington Kellogg, *The Smithsonian Institution*. ". . . unquestionably the best book that has been published in this field."—*Journal of Mammalogy*. "This book brings further distinction to . . . biologists already internationally known for their bird and mammal research as well as for fine artistry with brush and camera."—*Journal of Wildlife Management*.

My Lifetime in Letters, by Upton Sinclair. (412 pages, \$6.50). The Pulitzer prize-winning author of some eighty books, Upton Sinclair conducted one of the most amazing correspondences in history. He has selected these 400 letters which, with his engaging commentary, constitute an informal essay on both Mr. Sinclair and the literary, intellectual and social history of his epoch. Included are letters from Jack London, George Bernard Shaw, Luther Burbank, Mahatma Gandhi, Albert Einstein, and Theodore Roosevelt.

The Face of Missouri, by Elio Lee Battaglia. (116 pages, 103 photographs, \$7.50). Each photograph in this collection communicates to the viewer an experience of a foreign-born citizen in a Midwest American state. In Mr. Battaglia's words, the collection depicts "a small portion of what one personality found memorable and meaningful." Mr. Battaglia, born in Italy, became an American citizen upon completion of military service in Japan and Korea, earned a B.J. degree at Missouri, and is now an assistant

illustrations editor for National Geographic magazine. While he was a student here, Mr. Battaglia handled numerous photographic assignments for the *Alumnus*. John Barkham of the Saturday Review Syndicate wrote of this book: "The wider lesson to be drawn from this collective portrait is that, though it was made in Missouri . . . this is, in fact, the face of America." William O'Neal commented in the Richmond News Leader: "That these photographs . . . come within the province of art is unquestioned. Mr. Battaglia is a master of light, of concentration, and of composition."

The White Hound, stories by Ward Dorrance and Thomas Mabry. (205 pages, \$3.75). Granville Hicks comments in *The Saturday Review*: "We can thank the University of Missouri Press for a fine collection." The stories appeared originally in top quality literary magazines.

Seventeenth Century Songs and Lyrics (460 pages, \$6). Few of these more than 400 English songs and lyrics have been previously published. Collected and edited from original music manuscripts in such repositories as the Bodleian Library at Oxford and the British Museum, this volume is the work of John P. Cutts, formerly a member of the University of Missouri faculty. He has published many articles on Renaissance music and literature. Dr. Cutts at present is a member of the Department of English at the University of Alberta, Canada.

Poems and Stories, by Thomas McAfee, a member of the Department of English at the University. This first of a New Writers Series is a paperback edition of 111 pages, \$1.95. Many of its forty-three poems and six short stories appeared previously in national magazines. Of the poems, the *Virginia Quarterly Review* remarks that they "show a remarkable talent for varied expression." Of the stories, the St. Louis Globe-Democrat says: "The reader receives the hard edges of experience of Americans who are 'at the bottom, looking up' through no choice of their own."

Elmer Ellis: Teacher, Scholar, and Administrator, edited by Gilbert Fite. Underwritten and prepared by former students as a tribute to the University of Missouri's President, this book demonstrates that Ellis is one of the nation's outstanding educators. It will be of interest to all those concerned about American education. This volume contains three essays about Dr. Ellis written by former students or colleagues; a short biographical sketch, a discussion of his teaching career and writing, and an examination of his administrative career. In addition, there are generous selections from President Ellis' published writings and addresses. (304 pages, \$5.95).

The People of Mushan: Life In a Taiwanese Village, by Howard Rusk Long. These photographs record the life of a Formosan village in its daily, seasonal and annual cycles. Here is a book which is of interest to everyone who can be stirred by the recognition of his own needs and purposes in men of a distant land. Dr. Long, who holds three degrees from M.U. and is a former faculty member, heads the

journalism department of Southern Illinois University. (153 pages, 170 photographs, \$7.50).

Four University of Missouri Studies have appeared in book form through the Press facilities. The first was *Theatrical Entertainments in Rural Missouri Before the Civil War*, by Elbert R. Bowen (140 pages, \$3.50). *The Quarterly Journal of Speech* remarks on the "fresh, well-documented account of the amateur theater," concluding that the book is "certainly a useful factual tool for the American theater scholar." The book was previously reviewed in the *Alumnus*.

The other Studies are:

The Grasses of Missouri, by Clair L. Kucera. (240 pages, \$4.50). This manual is a comprehensive treatment of the native and naturalized species of the grasses of Missouri. Dr. Kucera, professor of botany at the University, recognizes and describes 79 genera and 245 species distributed among 12 tribes, and also includes a number of varieties and forms. While primarily a botanical study of state significance, *The Grasses of Missouri* is of regional interest, for approximately 50 per cent of the grasses described occur also in all eight states bordering Missouri.

Louis Houck: Missouri Historian and Entrepreneur, by William T. Doherty, Jr. (152 pages, \$3.50). Louis Houck (1840-1925) was a Missouri lawyer, short-line railroad builder and operator, historian, and patron of higher education. As a small business man he played the part of David to a Goliath who was none other than Jay Gould. He achieved success and profit by utilizing on a small scale the weapons and tactics of his adversary. His affluence enabled him to devote his later years to historical research and to support of the State College in Southeast Missouri. *The Mississippi Valley Historical Review* calls this account of Houck's life and work "an excellent historical essay" and "worthy of a place in the collection of any university history department." Dr. Doherty is professor of history and chairman of the department at the University of Mississippi.

David Rice Atchison of Missouri: Border Politician, by William E. Parrish. (271 pages, \$3.95). Atchison is remembered principally for his long, courageous and astutely fought battles in the United States Senate to protect the rights of the slaveholders of the nation. This biography presents his early efforts in Missouri to protect the rights of the Mormons in their conflict with their neighbors, and his strong stand in the Senate for the annexation of Texas and for the acquisition of the whole of the Oregon Territory. Dr. Parrish is a member of the Department of history of Westminster College, Fulton, Mo.

The University of Missouri Press is also distributor for *Studies in the Role of the Public School Teacher*, by Biddle, Rosencranz and Rankin; and *The Prairie Chicken in Missouri*, by Charles W. Schwartz, published by the Conservation Commission of Missouri, presenting 85 full page photographs which, with their text, summarize a three-year study of the factors which determine the survival or extinction of the prairie chicken in Missouri. (182 pages, \$5).

Problems talked out

By Arthur B. Pine

A student recently wandered disconcertedly through an emotional maze, where fear conjured up only one solution to his problem and inexperience blocked out all others. The only way out, he thought, was to leave school. A psychologist at the University's Mental Hygiene Clinic talked over his dilemma with him. After several hours, the student had selected one of the alternative solutions the two had talked about, and the fear, the problem and the thought of leaving school had disappeared.

For more than 270 such students each year, whose problems range from exhibitionism and emotional instability, shyness and trouble in dating, to the superior student who is exploring his own identity and the meaning of life, staff members at the Clinic provide help and an opportunity for the student to solve his own problems. The clinical psychologists' jobs are to encourage the student to see more than just one way to look at his problem and more than one way to solve it—and the Clinic is outspokenly oriented toward a "developmental-educational philosophy, not merely a curative one."

What this means, according to the Clinic's director, Dr. Alvin W. Landfield, is that "the Clinic is not a mental hospital. We try to stimulate new learning and personal growth. Most students are basically healthy. They often go through certain stages before they experience new developments or growth in their personalities. We try to accelerate the normal growth processes to help students make better social decisions.

"There's a marked similarity between our staff members and any very stimulating teacher on campus. Both provide a context for students to grow mentally and emotionally."

When a student tells the Clinic he's baffled or disturbed by some emotional problem, staff members begin talking it over with him to trace the trouble to its roots. Together, they explore alternative ideas and their consequences, and, together, they reach a conclusion that the student feels he can accept. Landfield and his staff always keep in mind that a student's confusion about a problem often may be a part of the creative process leading to a psychological change.

In mind also, are two objectives—the bases for the Clinic's approach to student problems:

1. To appreciate continually the student's emotional and intellectual abilities to digest new thoughts.
2. To teach that one idea shouldn't be the only basis for action; the student must learn to consider

Continued on page 16

Robert Choisser, serving as a model, posed for this picture of "a worried student." Choisser is prominent in acting roles in University Theater stage productions.

A poet and higher education

Not even literature concerns Professor Donald F. Drummond as much as higher education. "It requires time and devotion," he once said, somewhat unconditionally. More than 25 years of teaching in high schools and colleges has built into Drummond a frank appreciation of "the increasing importance of higher education in American life." And his enthusiasm in giving it time, devotion and a little bit more is obvious both in his classes and his private life.

In front of a blackboard, Drummond's 6-foot-2, 220-pound frame makes him look more like a football player than an educator. But his ability to show students how to relate literature to life and his skill at extracting appreciation of writing from almost anyone in the class have resulted in an upperclass recommendation: "Be sure to take one of Drummond's courses before you get out of here."

"I want to help the fermentation of every idea," Drummond says. "If literature doesn't reach into life, it doesn't perform more than half its purpose. The teacher's job is to help students learn to think over everything they read and hear."

To do that, Drummond first makes sure he's teaching on the students' level—not down to them, but up with them. He fills in each lecture with his own interpretations of literature and encourages students to tell him theirs, too. And to add even more life, he gestures emphatically and spices his lectures with stories of some of the great writers, like Wolfe and Anderson, whom he has met.

Drummond is as pleased with students as they are with him. "There's been a big change in Missouri in the past 13 years," he says. "Students today are more concerned with their work and better equipped to handle it. There are fewer students today who enroll in courses 'just for the credit'—a dangerous thing to try in one of Drummond's courses—and there seems to be a greater interest in literature and writing as a serious business. Maybe it's just that I'm getting older; I doubt that, though."

Last May 31 Dr. Drummond reached the age of 47. He entered Westminster College in Salt Lake City at the age of 16 and began his teaching career—because the depression left him with no money to continue school—when he was 18. Drummond went to college during the summers, transferring to Colorado State College after two years at Westminster. During the academic year, he taught in schools at Lost Cabin and Hudson, in Wyoming, and in 1931 was appointed

principal of the junior high school at Lander, Wyo. The next year, he received an A.B. in English at Colorado State. He continued in graduate school, but never received his M.A.

At Westminster, he had begun "fiddling around and writing poetry." His interest in writing developed into more than a hobby and by 1937 he already was working on a book. That year he attended a writer's conference in Colorado, where he met Sherwood Anderson, Thomas Wolfe and others. "Meeting them didn't change me any," Drummond says. "It just made me admire these people more. I think they're essentially great writers." After the publication of his first book, "Adobe," the next year, Drummond says he "couldn't write a thing for six or seven years."

Another important person Drummond met in 1937 was a teacher from Indiana, Priscilla Borthwick, who was attending a meeting in Wyoming. "We met one afternoon, sitting around a swimming pool," Drummond says, "and that same year we decided to get married."

When the war broke out, Drummond joined the Maritime Service as a seaman and served in the Pacific for a year. Then, he left the service to teach—this time in an unpopular job: "The Japanese-Americans unfortunately were mistreated after Pearl Harbor," Drummond says, "and many of them—among them some of our best American citizens—were placed in relocation centers. They needed a junior high school principal for a relocation center school in Colorado and so I volunteered. People told me I'd never get another job with that on my record; but they've been wrong, obviously. I thought it was something that I ought to do."

In the spring of 1945, Drummond worked with the government to re-establish Japanese-Americans in the California area. Later, he was appointed chairman of the English department at Menlo Junior College and also began work at Stanford University toward an Ed.D., which he received in 1949. After a brief stay as professor of English at Colorado State College, where "I promised them I'd come back," Dr. Drummond came to the University of Missouri. That same year, his second book, "No Moat, No Castle," was published. In 1956, he finished "Battlement," his third book of verse. Another book, "The Drawbridge," to be published this year, is both critical and analytical. And Drummond has written stories for several national magazines.

At Missouri, he teaches courses in modern litera-

Photo by George W. Gardner

ture and writing of fiction and poetry. "Of course," he says, "you can't teach creativity. But you can discover it, cherish it and encourage it in students. We want to turn out as many professional writers as we can, in various fields. Dr. William Peden (also of the English department), for example, has done a remarkably fine job of producing writing in depth," Drummond says.

But above literature and writing, Drummond worries about higher education. From 1955 to 1957 he was on leave from the University to serve as director of education for the U.S. Air Force (Southeast Asia) in Manila. And today, he's active on the Committee for Improvement of Teaching in Higher Education for the National Education Association.

As an educator, his views on his important interest are frank and forward:

On relationships with students: "They should be on a personal level where such a relationship would benefit the student."

Overloading professors: "Any man who pretends

to serve higher education must keep time to think."

Foreign students: "They add a lot to the school; they see a wide cross-section of American life here at Missouri and they give us a different viewpoint in return."

Teaching grammar: "One must learn grammar, but it's better to try to teach grammar through foreign languages. Since English is essentially an analytical language and depends so much on syntax, foreign languages often provide a more pure form to study language structure. I'd like to see colleges increase language requirements."

And, on literature and writing: "Fundamentally, writing is more important when it somehow encompasses what is valuable to human beings in the experience of man. Writing has a purpose; it goes to the center of human experience rather than explicating the various diseases of humanity. It isn't didactic. Literature is more than a case history; somehow it involves the enlightenment of human spirit. Great literature is just."

On the eve of the new football season, prospects for the 1961 Tiger team are sized up something like this: Potentially it will be a better passing team, with its quarterbacking in good hands and its kicking game improved, but the team will not be very solid at the halfback and end positions. From tackle to tackle the line should be sturdy. But if the Tigers are to prove as formidable as a year ago, Coach Dan Devine and his staff must find new running punch at the halfbacks, as well as capable ends and defensive backs.

Without question, the halfback problem is the most acute. Gone are Mel West, Donnie Smith and Norris Stevenson. Gone too is Fullback Ed Mehrer, whose blocking played a big role in the Tigers' rushing attack that averaged 250 yards a game; only six teams in the nation surpassed that average. The

two other departing halfbacks, Fred Brossart and Skip Snyder, were fixtures in the No. 1 defensive secondary.

Norm Beal and Andy Russell did the bulk of their playing on defense last year, and plans to use them more on the attack this fall puts a further crimp in the secondary defense. Halfback Beal is rated as the squad's best open-field tackler, and fullback Russell the sharpest pass defender.

The only returning backfield regular is Ron Taylor at quarterback. He is backstopped by Keith Weber, touted rookie from Jefferson City, and Jim Johnson, the big southpaw who was second string most of last year. The Tigers appear to be well fortified at quarterback. The 5-8 Taylor led Missouri to 10 wins in 11 tries on the playing field a year ago. Weber's versatility is expected to add much to the quarterback position; Johnson is ticketed for defensive chores at safety.

Gerald Stevenson (brother of Norris) and Daryl

Paul Henley, pictured on opposite page, is the 1961 captain of the Tigers. An all-conference guard, he is a superior student in Engineering. Paul is married and is from Kirkwood.

**MISSOURI TIGERS' 1961
FOOTBALL SCHEDULE**

September 23—Washington State
here

September 30—At Minnesota

October 7—California here

October 14—At Oklahoma State

October 21—At Iowa State

October 28—Nebraska here
(Homecoming)

November 4—At Colorado

November 11—Oklahoma here

November 18—Kansas State here

November 25—At Kansas

Mike Hunter, shifted from quarterback position, is expected to see plenty of action as halfback.

Krugman both had knee surgery last spring after showing up well as ball carriers, and this further clouds the halfback picture. If Krugman can stay whole, he will rate just below Beal while Stevenson will challenge Bill Tobin, veteran place kicker, for the regular right half job. Speedster Bob Thomas and Carl Crawford are among top rated right halfbacks. Crawford may be used on defense only; Thomas was a holdout last fall.

Candidates for left halfback include Mike Hunter, who is a quarterback by trade; Bruce Geiger, slender junior; Paul Underhill, a 190-pound holdout last year; and Bob Neumann.

The fullback post is greenish after Russell. Sophomores Mack Gilchrist and Al Schultz rounded out the depth chart as practice began. Russell, the 6-2 junior, gives Missouri a fast hitting threat at fullback, if not the sharp blocking that was Mehrer's trademark. He will probably do considerable line-backing when he's not sharing time with Gilchrist.

Three of 1960's top four ends are gone: Dan LaRose, consensus All America selection, Gordon Smith and Tom Carpenter. Conrad Hitchler, the tall bow-legged ex-Marine, is the only end with any appreciable experience. He understudied LaRose. Hitchler and John Sevcik, a sophomore, are expected to man the right wing; while Don Wainwright and Larry Nichols, 1960 squadmen, are 1-2 on the left side. Wainwright, as a third teamer, lettered. Other ends who will battle for travel squad rating are Jim Sevcik (John's twin), Steve Jansen and Carl Maples—all recruits—along with Jack Palmer, squadman.

How about Bill "Bucky" Wegener, one of last year's tri-captains who was sidelined all season? If Bill regains his 1959 form, Missouri will have four huskies digging in at the tackles. Since his power lawn mower accident of August 1960, Wegener has had two foot operations, designed to restore full movement. He was in highway construction work during the summer.

Keith Weber, sophomore quarterback, another Jefferson City product.

Ed Blaine, two-year standout, and Bill Siekierski, a powerful junior, are the left tackles. Jerry Wallach is the right side tenant along with Wegener. Four sophomores—George Seals, Bobby Brown, Dave Gill and Jerry Crumpler, are the chief rivals for third-string jobs. Seals may get a tryout at end.

The Tigers' deepest and best-equipped positions may be the guards. Of the six mainstays from 1960, five are back again. Heading the list is Capt. Paul Henley, all-conference pick; his running mate, Paul Garvis; Tom Hertz and Tom Smith. Then there are Fred Schueler, a two-year squadman, and Gene Oliver, a good young prospect who may be groomed as a center. The first string center is Bill McCartney, unless the hard hitting senior is troubled by a knee that required summertime therapy. Bill was on the No. 2 unit last season, spelling Mike Langan. Next in line are Jimmie Vermillion and Roger Phillips, both squadmen; Vermillion had a good spring, while

Phillips moved over from his former post at guard.

So, with sixteen holdover lettermen, the 1961 Missouri Tigers have good enough assets to field another exciting team, one that should be capable of contending for Big Eight Conference honors. A good indication of how far the Tigers can go in this campaign should be afforded after the shakedown tests with three non-conference foes: Washington State here on Sept. 23, Minnesota there on Sept. 30, and California here on Oct. 7. Last year's "dream" team, which had only one nightmare—the loss to Kansas here—will have many more fans this season, partly because of its high rating and the televised Orange Bowl victory over Navy last January. It finished fourth in the UPI final poll, and fifth in the AP poll. Season tickets have been selling at a record clip. New stands have been constructed at Memorial Stadium to provide about 9,500 additional permanent seats.

Track Coach Tom Botts, returning from European tour, greeted by his new assistant, Bob Teel (right).

Botts aids U.S. track team

Tiger Track Coach Tom Botts has returned from the U. S. Track Team's triumphal tour of Europe. He was one of three American coaches selected for this honor, the others being Jim Elliott of Villanova and Oliver Jackson of Abilene Christian College. The touring American team was made up of the first and second place finishers in the 1961 AAU meet, and it was jointly sponsored by the AAU and the State Department.

Coach Botts worked particularly with the men's teams high and intermediate hurdlers, the discus throwers, the broad jumpers, the five thousand and ten thousand meter runners, and the decathlon performers in the Russian meet, the only one in which they performed. Those who followed the American team's fortunes closely will appreciate the fine individual work he did in getting the red, white and blue thin-clads ready for their convincing triumphs over Russia, West Germany, England and Poland.

With typical modesty, he disclaims any credit for the fine showing of the American men's team; but he will concede with his easy, eye-wrinkling grin that he did learn something himself: coeducational coaching would not be his cup of tea.

Coach Tom is shown above being welcomed home by his new assistant coach, Bob Teel. The lethal looking weapon in his hand was not part of his official coaching equipment; it's an ax used in a ceremonial Polish dance, and it's just one of the many handsome souvenirs he brought back from his memorable trip.

Clutch performances picked

What have been the most outstanding "clutch" plays or performances by a Missouri football player during the post-war period 1946 through 1960?

A panel of 12 sportswriters and sportscasters, close to the M. U. scenes for the past 15 years, recently mulled over past heroics and their ballots produced a two-way deadlock for top honors.

On a point basis, they chose Bus Entsminger's quarterbacking of the 20-14 S.M.U. upset in 1948—and Norris Stevenson's big role in the 41-19 win over Oklahoma at Norman last year as the two most noteworthy performances. The co-winners wound up with 19 points apiece.

Barely edged out in third place was Bob Haas, who moved Missouri 78 yards in a little more than two minutes against Michigan in 1959 for a touchdown that beat the Wolverines, 20-15. Haas scored on a sneak with two seconds left.

Behind these three choices, the panel—polled by Missouri's sports publicist, Bill Callahan—singled out in order (4) the Dale Pidcock-Ron Toman joint tackle of Kansas' John Hadl on the one-yard line in 1959, short of a winning touchdown; (4) Norm Beal's 90-yard scoring run on an intercepted pass against Navy at Miami last Jan. 2; and (6) Chuck Mehrer's tackle of a K.U. back in the end zone for a two-point safety and a 15-13 win in Coach Don Faurot's 1956 farewell game.

Entsminger collected the most first-place votes (3); however, Stevenson was mentioned on the most ballots (7 of 12). Haas appeared on six ballots. Entsminger, now director of University Development and Alumni Relations, gained 87 rushing yards in the upset of S.M.U., which had won 16 straight games. It was the Mustangs' only defeat in a 9-1 season.

Stevenson netted 169 rushing yards against O.U.—a new record by a Sooner foe—and had touchdown runs of 77 and 60 yards. His 60-yarder, coming after Oklahoma had closed the gap to 25-19, insured the first Tiger win at Norman since 1945.

Four to advisory board

Four new members have been appointed to the Alumni Athletic Advisory Board by J. Gordon Blackmore of Trenton, Mo., president of the University of Missouri Alumni Association. He also reappointed one member—Warren O. McIntyre, B.J., '34, Mexico, Mo. The newly appointed members are Clarence O. Woolsey, LL.B., '36, Springfield, Mo.; Hardin C. Cox, B.S. in B.A., '51, Rock Port, Mo.; William Clark, B.S. in B.A., '43, Trenton, Mo.; and Victor F. Swyden, A.B. '38, B.S. in B.A., '39, Kansas City. All are appointed for two-year terms.

The appointees are replacing the members whose terms have expired: Dr. Arch Lowe, Jr., Springfield, Mo.; Dr. Gilbert Kelley, Savannah, Mo.; Allen Moore, Chillicothe, Mo.; and Ralph Taylor, Kansas City.

Chicagoans to meet Nov. 1

A big gathering of Missourians in the Chicago area is scheduled for November 1, when formation of a Chicago chapter of the M.U. Alumni Association will get under way formally. President Elmer Ellis and other University officials will be present for the dinner meeting, to be held at the Lake Shore Club, 850 Lake Shore Drive. More than 1500 University alumni live in the Chicagoland area, and several hundred are expected at the fall meeting.

Several planning sessions have been held by the Chicago Area Alumni Executive Committee, of which J. C. Hoover is temporary chairman. Harry Barger is vice-chairman, heading the committee on membership and attendance promotion, whose members are John Schram, John Kerstetter, Bill Pence, Norm Clizer, Louis Kohn, Guy Steagall, George Thompson, and L. E. Lockwood.

Leslea Wenk Miller is secretary, Mark Cox is program chairman and Paul Christman program committee member, William V. Kahler is arrangements chairman, Fred Seidner is publicity and promotion chairman, and Gerry Thorne is chairman of the nominating committee whose members are M. V. Maxwell, Don Thompson, Bob Newman and Dick Toft.

CENTRAL INDIANA CHAPTER

The Central Indiana alumni chapter of the University of Missouri held an informal cookout at the home of Mr. and Mrs. Irwin Barnett, 4609 Karen Drive, Lawrence, Ind. Saturday evening June 17th.

Miss Pauline Hamra assisted as co-hostess. Members and invited guests present were: Mr. and Mrs.

Stanley Cebula, Mr. and Mrs. John Crose, Mr. and Mrs. Robert Dorsey, Mr. and Mrs. Irving Freeman, Mr. and Mrs. Charles Kaufman, Mr. and Mrs. Leon McGaughey, Mr. and Mrs. William Murphy, Mr. and Mrs. Jack Shultz, and Mr. and Mrs. Joseph Sloopman. Officers of the chapter are: Pauline Hamra, president; Irwin Barnett, vice-president; Herbert Kasle, treasurer, and Pauline Barnett, secretary.

The next meeting is planned for October 14th at the home of Mr. and Mrs. William Murphy.

BUSY IN KANSAS CITY

Alumni in Kansas City, after a fine Achievement Fund effort, currently are concentrating on two football-connected events: the Rock Island special train to the Minnesota game on Sept. 30, sponsored by the K. C. Quarterback Club; and plans for the traditional dinner and rally preceding the Tiger game at Lawrence. Incidentally, tickets for Missouri home games (except Oklahoma) are on sale at Eddy's.

NEBRASKA CHAPTER

C. W. Nibler, president of the Nebraska chapter reports from Lincoln that it is likely that quite a few "Cornhusker Tigers" will make it to Columbia for Homecoming on Oct. 28. Last time the M. U. alumni in the Lincoln area got together was late in May when a Sunday picnic attracted 40 adults and 25 youngsters. Classes were represented from 1911 to 1955. Among those attending were Mr. and Mrs. Jiles Haney, who now spend part of the year at Scottsdale, Ariz., who treated the group to some grapefruit on their Arizona acreage. Prof. Haney, now retired, was for years a member of the electrical engineering department faculty at Nebraska U.

Dr. Spurling honored at Louisville

Glen Spurling, M.D., University alumnus who has won international fame as a neurosurgeon, was honored on "Glen Spurling Day" at the University of Louisville, where he served on the faculty for 35 years and headed the section on neurosurgery from its inception. Dr. Spurling retired from administrative duties at the end of the academic year. He is continuing in private practice and is teaching at the U. of L. as Distinguished Professor of Neurosurgery.

"Glen Spurling—the Man" was the theme of an awards banquet on the night of May 20 at the Brown Hotel following a day of scientific presentations by seven nationally known neurosurgeons and four presentations by his faculty colleagues. Major Thomas Hartford, M.D. U.S. Army, Acting Surgeon General, conferred upon Dr. Spurling the Meritorious Civilian Service Award; and President Philip Davidson of the University of Louisville, read a citation adopted by the university's board of trustees.

Dr. Spurling was Neurosurgical Consultant to the Surgeon General and later became Senior Neurosurgical Consultant to the European Theater of Operations. He was flown back to Europe as a consultant when General George Patton received fatal injuries. Dr. Spurling returned to the M.U. campus in 1957 to receive an honorary Doctor of Science degree. He received an A.B. in 1920, a two-year certificate in medicine in 1921, and an A.M. degree in 1923, all from M. U.

Dr. Glen Spurling

Tatum gift to aid students

Robert L. Tatum of Shreveport, La., has given the University \$10,000 to establish a new endowment fund primarily for use in the College of Engineering.

Mr. Tatum expressed a desire that priority in use of the fund be given to scholarships in engineering, yet he did not place any definite restrictions on its administration. He suggested that it be used according to recommendations of the dean of the College of Engineering and the University's committee on aids and awards.

"We are extremely grateful to Mr. Tatum for his continued interest in the University," President Elmer Ellis said, "and particularly for his desire to help deserving students attain their educations. Since we are a state university, we must depend almost entirely upon contributions of this type for support of the scholarship program as well as for basic research."

Mr. Tatum is a native Missourian and a graduate of the University. Born in Howard County, near Glasgow, he received his B.S. in Civil Engineering degree from the University in 1907. He served for many years as consulting engineer to private industries and public agencies, and for more than 20 years has headed his own firm in consulting engineering in Shreveport.

He visited the University campus during the Commencement Week alumni reunion. He said he had provided for a legacy to the University in his will,

but upon realizing the immediate need of students to meet increasing costs of getting an education he decided to provide some help now.

"Mr. Tatum's gift will help some student or students to obtain their degrees who might otherwise have had to quit because of financial difficulties," said Engineering Dean Huber O. Croft. "We are truly grateful."

Research grant to Dr. McGrew

Dr. Roderick E. McGrew, associate professor of history, has been awarded a research grant jointly by the American Council of Learned Societies and the Social Science Research Council to provide assistance during a year of research into Russian social and political thought in the late eighteenth and early nineteenth centuries.

He has been granted a sabbatical leave of absence for the period from Sept. 1, 1961, to Aug. 31, 1962, to spend on the research supported by the grant. The grant was made to Dr. McGrew through the Joint Committee on Slavic Studies of the two donor organizations. Dr. McGrew plans to make Vienna, Austria, his base of operations for six or seven months of his research, and he expects also to spend about two months in Paris and about two months in London. If possible he also will spend some time in Russia, to do research at the Institute of Historical Studies and the Academy of Sciences in Moscow.

Testimonial dinner for Frank P. Briggs

Frank P. Briggs, B.J. '15, Macon, Mo., Assistant Secretary of Interior for fish and wildlife management, was honored at a testimonial dinner in Macon on May 29 by more than 300 friends and associates. The speakers and program participants are pictured above: M. U. Journalism Dean Earl English, William E. Towell, director, Missouri Conservation Commission; Sen. Stuart Symington; Mr. Briggs; the Rev. V. B. Skinner, pastor of the First Baptist Church, who was commentator for a "This Is Your Life" feature; Missouri Governor John M. Dalton; Sen. Edward V. Long; and Bruce Hunt, Grand Master, Missouri Grand Lodge; inset, Dru L. Pippin, who succeeded Briggs as a Commission member, was the M.C.

O. T. Coleman

Friends honor 'Sam' Coleman

O. T. "Sam" Coleman, long-time extension soils specialist at the University who retired May 31, was given a "going away" party at McCredie by members of the soils department on June 25. The accompanying picture, showing him with a special cake baked in his honor, was taken at the affair attended by many of his colleagues and friends. His son, Mills Coleman, '49, sales manager of the Southeast division, Metal and Thermit Corp., Atlanta, Ga., and grandson Robert were among the guests.

Although now in retirement, "Sam" Coleman is far from idle. Still on his schedule are a number of speaking engagements to be filled and these will no doubt be enhanced by some of his tricks of magic. This device, in fact, he has utilized through the years to illustrate his subject matter, and it has made him a favorite with youth groups. At his going away party "Sam" was given a certificate good for \$50 in magical equipment to be purchased at a supply house in St. Louis, where he will attend a national meeting of magicians.

Coleman is well known throughout the state for his work with county soil testing laboratories. He took charge of the soil testing program in 1947 when there were ten county laboratories. Under his leadership, this number increased to 103 such laboratories. He has been identified with numerous other extension programs and has appeared at many of the

annual county soils and crops conferences. Last year, Clay County designated its conference as "Sam Coleman Day."

A 1920 agricultural graduate of the University, the veteran soils specialist first joined the Extension Service in 1925 as county agent in Marion County. Earlier he had taught vocational agriculture at Auxvasse and Palmyra for five years. He grew up on a farm in Shelby County and after graduation from Shelbina High School in 1912 he taught country school for two years before serving in World War I two years. After the war he attended Cambridge University in England for one term. Coleman is a member of numerous professional and honorary societies; last year Epsilon Sigma Phi, honorary extension group, recognized him for his service to agriculture.

U. Singers' big dates

The University Singers, concert vocal group, will perform with the Kansas City Philharmonic Orchestra in three programs this season.

The Singers and three nationally-known soloists will assist the Philharmonic in "Carmina Burana," a scenic cantata by the contemporary Bavarian, Carl Orff. The first performance of "Carmina Burana" will be given Nov. 14 in the Kansas City Music Hall for the second subscription concert of the Philharmonic. The cantata will be repeated the next night (Nov. 15) at the Music Hall for the Association of Land Grant Colleges. The following night (Nov. 16) it will be given in Columbia when the Philharmonic makes its appearance in the University of Missouri Concert Series at Jesse Auditorium.

A number of former students of Dr. Gerald Breckenridge attended a reunion on the campus on June 3 on the occasion of his retirement as professor of chemistry. They came from six states. Front row: Helen Phillips, Esther Wright, Dr. Breckenridge, Margene Gerfen, Jean Crane, and Alma Barger. Back row: Harold John, Lee Phillips, J. Paul Morris, N. Arthur Anderson, Floyd Erickson, Elizabeth Jane Erickson, Charles Wright, and Lois Barger.

Problems talked out

from page 5

alternative solutions. He must learn to play with many ideas and to use them as tools.

"Most of the students seen at the Mental Hygiene Clinic seem to fall roughly into two overlapping categories," Dr. Landfield says. "There are those students who are more preoccupied with obvious problems of socialization and getting along at college; and those who are more preoccupied with inner thoughts and conflicts.

"The therapist is not the 'giver of the word' by any means; students are free to reject any of the solutions the two talk about. The therapist just puts structure on the problem area which will facilitate the student's coming up with his own solution."

About 45 per cent of the students who come to the Clinic do so on their own initiative. Another 36 per cent are referred by physicians of the Student Health Service.

Dr. William Galeota, director of the health service, says the Clinic "plays an important role in the total treatment of the student who is ill, either physically or emotionally. The clinical psychologist and the medical doctors work as a team, when necessary, to make it possible for the student to remain competent and effective."

The other 19 per cent of the cases the Clinic deals with are referred from "other sources"—academic deans, administrative officials, faculty conduct committees, etc.

Last semester a sophomore came into the Clinic and asked for help in solving a "personal" problem. He wanted to become a musician, but his classmates told him it wasn't manly. During his conversation with a staff psychologist, the student was asked, "What qualities does a real man have?" He replied, "I think he has guts, for one thing." The psychologist continued: "Doesn't it take guts to become a good musician?" The student apparently thought so and now is happy with his choice. (This case and ones which follow have been altered to protect the identity of the individual).

Earlier last year a pretty, platinum-blonde coed was the concern of her entire sorority house. She came to the Clinic with a problem: she had a reputation for being "fast." After two sessions of talking with a psychologist, she realized why she had been such a "hot date," in spite of her own conservative code of values. She wanted to be a close friend of someone, thought that her sorority sisters had rejected her and so sought companionship by "heavy necking" with a host of boyfriends. When she realized her problem, she reviewed her actions, let her hair return to its natural brunette and began meeting her own needs for affection in more appropriately rewarding ways.

"A lot of our cases," says clinical psychologist Dr. Denis O'Donovan, "result because students come to the University filled with cultural stereotypes and myths that have been stressed by hundreds of so-called authorities on mental hygiene.

"Students think they must be perpetually happy, without any sadness. A married student told me he never argues with his wife; perhaps a good venting of suppressed emotions is just what the couple needs. A student who was on the all-state football team or in the honor society in high school feels he's a failure because he hasn't achieved equal fame in college—he doesn't realize he's competing with the cream now, not the entire crop. Students often think they must be complete successes to be popular—with the alternative being complete failure. These are unfortunate misconceptions."

Most of the Clinic's clients are underclassmen—about 34 per cent freshmen and 24 per cent sophomores. One of the reasons for this is that younger students often haven't yet learned how to see themselves in more than one dimension or value. The staff tries to urge students to seek less-competitive values in some areas if they are having great difficulty. If a student can't excel in one field, chances are he has strong points in other areas—he must recognize these as well.

Some students can see no gray—just complete black or white. A freshman refused to read an English assignment in one of Faulkner's works because her religious training had taught her that dancing and dating and reading Faulkner were in bad taste. She saw only two alternatives—to reject her religion or to reject her assignment. After talking it over with Clinic staff members, she learned to preserve her own values while respecting the rights of people to differ. A problem arising later in the student's career may concern values placed on one's role in life: junior and senior women may say they're deeply in love, but can't accept the idea of being "just a housewife" after college. "Perhaps they haven't thought that housewives can be happy and emotionally satisfied as well as career-girls can," O'Donovan says.

In all, about 85 per cent of the students who visit the Clinic are in what the staff describes as "the normal range—not at all pathological." The Clinic's first job is to make sure the student can handle the academic side of his college career. Once a student

thought he would surely flunk out—but he really didn't have an academic problem. A staff member asked him to consider what would happen if he flunked out of school. When he realized the consequences would not destroy him completely, his fear of flunking out disappeared and he was able to function even more effectively.

The Clinic staff works only with students whose problems are primarily emotional. In close harmony with the Student Health Service, the Clinic includes three full-time staff members—all Ph.D.'s in psychology: Dr. Landfield, as director, splits his time between his administrative job and teaching in the psychology department; Professor Ruth Allee and Dr. O'Donovan, also clinical psychologists, spend about one-fourth of their time teaching and the bulk as Clinic staff members.

Also on the Clinic staff are Ph.D. candidates who serve as interns under a clinical training program that has been fully accredited by the Education and Training Board of the American Psychological Association, in cooperation with the University department of psychology. In addition, the Clinic has help and consultation when needed from the University's Testing and Counseling Service and from a Jefferson City psychiatrist, Dr. Henry Guhleman.

"When students come to see us," Landfield says, "they may need us in the role of a father, mother, brother or friend. Sometimes they develop images of us, patterned after what they expect us to be." A girl once peered closely at Landfield as she was saying goodbye: "I thought you had gray hair," she said. "You *don't*, do you?"

While his years at the Clinic have produced no gray hairs, the staff's perceptiveness has taken note of a few trends:

Prof. Allee noted that today's students are coming to college with superior technical knowledge about everything from sex to psychology—but they too often lack the understanding of these areas to be able to use and appreciate that knowledge. They can toss around dictionary definitions of psychological terms, almost carelessly; they can understand every scientific facet of man-woman relationships, but be completely naive about the emotional side of love. This last is seen as "surface sophistication."

Students coming to the University from small towns sometimes have a hard time adjusting because of exposure to many new ideas and different cultural orientations. The urban student may see restrictions in the University community.

Ironically, it's the brighter student, Landfield says, who is more likely to come to the Clinic for help. "Brighter students will see more of the dilemmas of life," he says. "They're more likely to go through emotional problems and less likely to be afraid to come to the Clinic. To them, talking things over is a way of exploring ideas."

Also, sometimes emotional problems run in fads. A certain pattern of upset will flare up in a particular dormitory and may spread through the group.

To enable the psychologists to see the students

with the most urgent problems first, staff members give each new client an "intake interview." His problem is evaluated and perhaps solved during that first half-hour talk. If more help is needed, a convenient schedule is arranged. The average client—who must be a student (no University staff member is given service)—can solve his problem within about five or six interviews.

The first problem the therapist has is to establish rapport with the student. Then, the psychologist, directly or indirectly, communicates the Clinic's educational-developmental philosophy, which seeks to give the student a choice of alternatives. Perhaps a few tests may be given.

Although such interviews are the Clinic's most well-known service, it works in three other areas. One is the training of Ph.D. candidates in clinical psychology as interns attached to the Clinic staff. Such training is under careful hour-by-hour supervision by the senior staff members. Numerous requests are received from the deans of the various schools for an evaluation of the student in instances where there is the likelihood of academic failure. The Clinic advises the dean after the evaluation. In these instances, any detailed information is kept confidential, in locked Clinic files.

The Clinic has grown to be an integral part of faculty-student relationships where there is some hope that a student's poor academic or social behavior may be caused by psychological problems.

The last area of the Clinic's activities is in research. Under a U.S. Public Health Service grant for the past year, it has just accepted a two-year grant to study the interaction of value systems between therapists and clients. "But," Landfield says, "the research is done in such a way so as not to obstruct our other services; no student can feel that he is in any way a guinea pig."

A. G. Hogan memorial library

The library and reading room for agricultural chemistry and nutrition in Room 101, Schweitzer Hall, is to be designated as the A. G. Hogan Memorial Library in honor of the late Dr. A. G. Hogan, professor of animal nutrition and noted researcher at the University of Missouri for many years. Dr. Hogan died Jan. 25.

Dean Elmer Kiehl of the College of Agriculture announced that friends and colleagues of the late Dr. Hogan had asked permission to furnish and equip the room and dedicate it in memory of Dr. Hogan. This permission was granted by the President and the Board of Curators.

Dr. Merle E. Muhrer, chairman of the department of agricultural chemistry, said a valuable collection of books and private papers of Dr. Hogan will be included in the materials to be installed. Some new furniture and furnishings will also be purchased for the room.

missouri memo

About 300 friends of John Stapel decided it was time to give him a recognition dinner. This developed when Mr. Stapel, B.J. '15, moved to Indianapolis to take up a new job as secretary of the National Association of Mutual Insurance Companies. In 1955 he was president of the association, but that was an honorary job; now he works—at a time when many men his age are in retirement. On the night of July 17, at the Holiday Inn, the spotlight was on John and his life. Toastmaster was Dean Earl F. English of the School of Journalism. Tributes came from Forrest Smith, former governor; Richard Ash, Rector, Calvary Episcopal Church; Dean W. Francis English, then acting presi-

dent of the University; James Kirkpatrick, publisher, Windsor Review; and Herb G. Bruns, president, Missouri Association of Farm Mutual Insurance Companies. Darrell K. Seltsam, secretary, Farmers Mutual Hail Insurance Co., presented a volume of letters to John from scores of his friends, and then John responded appropriately. He is noted as a storyteller and toastmaster, and known for his leadership in the mutual insurance field, in newspaper publishing and theater ownership, and for his services as a churchman, civic leader, and loyal M. U. alumnus. He has been secretary since 1923 of the Farmers Mutual Hail Insurance Co. and president since 1958 of Farmers Mutual Windstorm Insurance Co.

Students seeking two professional degrees rarely try for the M.D. and LL.B. combination, but Dr. M. Eugene Windmiller (above) had such a dual goal, and made it. The surgeon, in practice in Columbia since 1949, became a part time law student at M. U. in 1955. The desire for a law degree was an old one, stemming from his belief that his medical training left him with a narrow educational base. Now he plans to take the bar examination in February and continue his education, pursuing either a rapid reading course or a foreign language. Dr. Windmiller, who received his LL.B. in August, earned A.B. and B.S. degrees at M.U. in '37 and '38, and his M.D. at Louisville. He is a member of the Columbia school board. Mrs. Windmiller, the former Elizabeth Douglas, earned a B.S. in Home Ec in '38. They have four children.

Vernon C. Myers was the subject of a personality feature in a recent issue of *Printers' Ink*. Myers, publisher of *Look*, received his B.J. at Missouri in 1932 and won the Missouri Honor Award for Distinguished Service in Journalism in 1957. He is a member of the Magazine Publishers Association, the Magazine Promotion Group and the board of directors of the Advertising Research Foun-

ation. As *Printers' Ink* points out, Myers has prompted many a self-searching look at the industry he serves, as he did in a speech before the MPG in New York. "Vern," says another publisher, "can sure stir things up. But when he speaks, this industry listens." The magazine adds, "And while executives in competing advertising media may squirm under Myers' well-placed barbs at their claims of superiority, they respect his ideas, his honesty, his outspokenness."

Roswell (Bud) Messing, Jr., president of World Color Press, Inc., St. Louis, noting the catch of a 26-pound Amberjack on a 12 lb. test line by George C. Willson, sends in this report: "In March we were in Acapulco. As with most fishermen when they are sailfishing, I was fishing with two lines: one a 40 lb. test and one a 14 lb. test. After losing a fish on the 40 lb. line, due to a bit of over anxiety on my part to 'set the hook,' I did manage to hook another one very shortly thereafter on the 14 lb. test line. Exactly 33 minutes later, I managed to bring in a Sailfish that weighed 96 pounds." As proof, Bud sent along a snapshot which also showed his son with a shark—125 pounds—that the lad landed.

class notes

05 WILLIAM J. WEESE, M.D., who has made his home for 48 years in Ontario, Ore., where he is co-founder of the Ontario Clinic and is now emeritus physician, attended the first day of the class reunions on the campus in June, having to leave early because of other commitments. After receiving a BS in Ed degree and an AB from the University in '05, he was superintendent of schools at Bowling Green for two years, then returned to M.U. for medical studies in 1907-09. He earned his M.D. at Johns Hopkins in '11, interned at Kansas City General Hospital, and located in Ontario in 1913, entering general practice. He has done post-graduate work at Johns Hopkins, Harvard, Washington U. of St. Louis and University of Pennsylvania. Dr. Weese was vice-president of the Oregon State Board of Health 1938-42, and became president of the Oregon State Medical Society after serving on its council for eight years. From 1949 to 1958 he was a member of the Council on Rural Health, American Medical Association. Dr. Weese, who is a native of Gentry County, Missouri, was a railroad surgeon for thirty years; he was first president of the Kiwanis Club in Ontario, where he served 25 years on the City Council, 12 years on the school board, 25 years as chairman of the Red Cross and 25 years as City Physician. His wife and associate through the busy 48 years was Rebecca Biggs, of Bowling Green, Mo., a native of Springfield, who majored in piano in college and was once a pupil of Ernest Kroeger of St. Louis. Mrs. Weese died Feb. 12, 1961. The Ontario Clinic, which Dr. Weese helped found in 1928, has eight physicians and is located at 195 S.W. Third Ave., Ontario, Ore.

07 RUDOLPH E. BURGER, BS EE, represented the University at the inauguration of the new Chancellor of the Municipal College System of New York City in April. Mr. Burger is a public utilities consultant in New York City, and lives on Middle Neck Rd., Sands Point, Long Island, N. Y. He has been an engineer

and executive in the electric light and power industry for more than 45 years, is former president of both the Cities Service Power & Light Co., and Ohio Public Service Co., and former chairman of the executive committee of Ohio Edison Company.

10 A. ROY OLIVER, BS EE, is treasurer of the Daniel Boone Shrine Association, St. Charles, Mo. He and Mrs. Oliver (LILLIAN H. HAYS, BS Ed. '24) live at 127 North Fifth St., St. Charles.

WINIFRED MARY REMLEY, AB, BS Ed., 223 N. 49th St., Omaha, Neb., is a retired school teacher.

Gold Medallion Homes also offer a totally new concept in better living . . . a complete Modern Electric Home Heating system!

If you are planning to remodel your present home, talk to your Architect or Building Contractor about bringing your house up to Bronze Medallion Home standards.

KANSAS CITY POWER & LIGHT COMPANY

master's Key" which took 18 years to earn. He is now assistant Scoutmaster of Troop 93 in Noel.

25 JACK C. COFFEY, BJ, 81 W. Laurel, Lake Forest, Ill., has been invited to join the Mathon Kyritsis Expedition to the Island of Melos, Greece, to help search for the Venus de Milo's arms. Jack and Mrs. Coffey plan to meet the Kyritsis group in the spring of 1962. Mr. Kyritsis and a small exploratory party are now in Greece. According to the legend of the island, Venus was found by a Greek farmer. For years he kept the statute in his barn, worshipping it alone. This story spread. In 1820 the French heard about the statue. They investigated and proceeded to take the statue forcibly. As the statue was being loaded on a French ship in the bay, her arms were knocked off. The French won the fracas. And now, 140 years later, Venus from the Island of Melos is in the Louvre in Paris, armless, but as beautiful as ever. Jack operates an audio visual supply manufacturing firm and publishes "Patterson's American Education," a directory of school executives in public and private schools, as well as universities and colleges. His business address is in North Chicago, Ill.

26 Dr. FINIS ENGLEMAN, AM, was commencement speaker at Bolivar, Mo., high school in May. Drawing of newly announced short-to-medium range Boeing 727 jetliner. First 727 sale was largest in transportation history. More airlines have ordered—and re-ordered—more jetliners from Boeing than from any other manufacturer.

Boeing KC-135 jet tanker-transport is U. S. Air Force's principal aerial refueler. Thirty C-135 cargo-jet models of KC-135 have been ordered for Military Air Transport Service.

Dyna-Soar manned space glider is shown, in artist's concept, atop Titan ICBM for launching. Design will permit return for conventional landing. Boeing is prime contractor for glider and system.

Boeing gas turbine engine powers this pleasure boat demonstrator. In other applications, Boeing engines power U. S. Navy boats and generators.

CAREER BULLETIN FROM **BOEING**

The continuing expansion of advanced programs at Boeing offers outstanding career openings to graduates in engineering, scientific and management disciplines. At Boeing you'll find a professional climate conducive to deeply rewarding achievement and rapid advancement. You'll enjoy many advantages, including up-to-the-minute facilities, dynamic industry environment, and company-paid graduate study programs (Masters and Ph.D.).

For further information, write today to Mr. Conrad E. Brodie, The Boeing Company, P.O. Box 3822 - UMI, Seattle 24, Washington. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin.

Minuteman, nation's first solid-fuel intercontinental ballistic missile, shown on initial flight—most successful first flight in missile history. Boeing holds major Minuteman contract responsibility.

Boeing Scientific Research Laboratories where scientists expand the frontiers of knowledge in research in solid state physics, flight sciences, mathematics, plasma physics and geo-astronomy.

Boeing-Vertol 107 helicopter shown with famous Boeing 707 jetliner, world's most popular airliner. Boeing is world leader in jet transportation.

Boeing B-52H shown carrying mockups of Skybolt air-launch ballistic missiles. B-52s are also jet-fast platforms for Hound Dog guided missiles, and in addition carry regular load of gravity bombs.

Supersonic Boeing BOMARC, longest-range air defense missile in U. S. Air Force arsenal, is now operational at Air Defense Command bases. New "B" model has range of more than 400 miles.

Drawing of 115-foot hydrofoil craft Boeing is building for U. S. Navy. Riding out of water, craft will "fly" at speeds up to 45 knots on underwater wings.

BOEING

Dr. B. H. KUBIK is a dentist in Memphis, Tenn. He and Mrs. Kubik (ZELMA W. WHITESIDE, BS HE '36) live at 151 Avon, Memphis 17.

FRANCES M. (BUD) BARNES, AB, 546 W. Santa Inez Ave., Hillsborough, Calif., is an attorney for Crown Zellerbach Corporation.

RUTH C. ALEXANDER, M Ed., State Director of Home Economics Education from 1945 to 1957, retired in June after sixteen years of service with the State Department of Education, recently serving four years as Supervisor in the Southwest area of Missouri. Miss Alexander was the adult organizer of Future Homemakers of America in Missouri, serving as State Adviser from 1946 to 1953. An award of merit for outstanding economics education was presented to her by the Chamber of Commerce of Springfield, Mo. Miss Alexander will continue to make her home in Buffalo, Mo.

KARL WICKSTROM, BS Agr., recently became public relations director of Producers Creamery, Springfield, Mo., a position he previously held from 1952 to 1957; he had been editor of the *Milking Shorthorn Journal* since 1957. Mr. Wickstrom has been active in FFA work and was guest speaker at the annual parent-son FFA dinner in Carthage, Mo., in May.

42 ORVILLE W. FOX, M Ed., has been elected superintendent of the Moniteau R-VI school system. Mr. Fox had been superintendent of the Seneca, Mo., school system for the past 18 years. Mr. and Mrs. Fox have a daughter, Donna, who is a sophomore in high school.

WILLIAM C. HOPKINS, M Ed., is an insurance executive and now lives at 814 W. Fourth St., Sedalia, Mo. From graduation until a few months ago, Mr. Hopkins was with the FBI, and in June gave a talk at the Carrollton, Mo., Kiwanis Club on the role of the Federal Bureau of Investigation in peace and war.

H. W. HILKER, BS ME, is a division manager for Bailey Meter Co., and he and Mrs. Hilker live at 3012 Stoneley Dr., Pasadena, Calif.

LULA BARTLOW, BJ, AB '41, is a TV Editor for CBS. Her home address is 1542 Thorndale Ave., Chicago, Ill.

FRANK L. BUTZ, Jr., BJ, is vice president of Symonds MacKenzie & Co., Chicago. He and Mrs. Butz (JOSEPHINE GILKINSON, BS Ed. and AB '41) live at 612 Courtland St., Park Ridge, Ill.

43 FAY (BIRDSONG) TURNER, BJ, and her husband, Col. David C. Turner of the U.S. Army, have two daughters, ages ten and five, and make their home at 6003

Russell F. Bright, '43

Westbury Rd., McLean, Va. After her graduation, Mrs. Turner worked as a reporter on the Alexandria (La.) *Town Talk*, as editor of the *Trenton (Mo.) Republican-Times*, and as a reporter and then as a copy editor of the *San Antonio Light*. Since their marriage in 1946, the Turners have traveled widely in the United States and other countries, and spent three years in Japan and three years in Germany.

CHARLES St. JOHN, BS Agr., 2502 W. Main, Jefferson City, Mo., received a pleasant surprise this summer when he was at White Sulphur Springs, Va., swimming in a motel pool. He discovered an old classmate from Defoe Hall, ELMO FRIESZ, BS BA '49, and they had quite a session recalling campus days. Elmo is a plant manager for Kaiser Aluminum at Point Pleasant, West Virginia.

Maj. JOE BAKER, Jr., of Route 3, Everton, Mo., completed the 1960-61 regular course at the U. S. Army Command and General Staff College at Fort Leavenworth, Kans., in June.

Mrs. FLORA BURTON Larson, M Ed., dean of students of Eastman School of Music was honored in June by University of Rochester citation for outstanding student service, awarded by the Alumni Federation. She went to Eastman School of Music as Director of Residences in 1946 and became Dean of Students the following year.

JOHN WILLIAM GUINNEE, BS CE, 1607a Marian Dr., Jefferson City, Mo., is a soils research engineer with the Missouri State Highway Department.

45 Mrs. Adrian J. Durant, Jr. (JACQUELINE HALL, BS Ed.) is a primary teacher at Towell Terrace School, St. Charles, Mo. Her home address is 802 Monroe, St. Charles.

Dr. WILLIAM K. ROBINSON, BS CE, was selected as one of 20 men to attend the Oak Ridge Institute of Nuclear Studies Summer Institute for Small College Physics Teachers, an 8-week training program conducted by the Oak Ridge Institute and National Laboratory and the U. S. Atomic Energy Commission. Dr. Robinson has been with the physics department at St. Lawrence University, Canton, N. Y.

46 Dr. DAVID ELLIS, AB, AM '48, Ph.D. '50, is with Litton Systems, Inc., Los Angeles, and is manager of the Medical Electronics and Bionics Department, located in Woodland Hills. According to Dr. Ellis, as quoted in the *Litton News*, muscle-response studies now in progress there are leading to hardware capable of speeding up or replacing muscle functions. Current studies include an investigation of such advanced concepts as the *sero soldier* and similar man-machine theories of physiological modification of the human organism to facilitate man's adaptability to military situations requiring unusual endurance. In addition, the department headed by Dr. Ellis is analyzing the feasibility of modifying man for the unique environments of outer space through the use of artificial organs. Dr. Ellis' father, Dr. ROY ELLIS, recently retired as president of Southwest Missouri State College at Springfield. The younger Dr. Ellis lives at 12515 Pacific Ave., Los Angeles 66, Calif.

RICHARD F. LEE, BS BA, was recently appointed assistant resident comp-

Richard F. Lee, '46

troller of Chevrolet Motor Division's automobile and truck assembly plant in Norwood, Ohio. He has been administrative supervisor in the financial department of Chevrolet's assembly plant at North Tarrytown, N. Y.

47 Maj. WALTER F. JONES, of 223 S. Sixth St., Columbia, Mo., completed the 1960-61 regular course at the U. S. Army Command and General Staff College at Ft. Leavenworth, Kans., in June and planned to resume studies at M. U. with the Fall semester.

KEITH D. PARKER, BS Ed., received a Master of Science in Health and Physical Education degree at Washington University, St. Louis, in June.

Mrs. GOLAH NAYLOR DeWitt, M Ed., teaches vocational home economics at Crystal City High School.

RICHARD E. PALMER, AB, 11820 Fairhaven Dr., Baton Rouge, La., is an executive on the staff of the State-Times and Morning Advocate, Baton Rouge.

E. LEE LAMAR, BS CE, 2502 Forest Ave., St. Joseph, Mo., is a field engineer with Portland Cement Association. The Lamars have one daughter.

ARTHUR R. CHAVES, BS PA, is assistant treasurer of the Leach Corporation. He lives at 2639 Imperial Highway, Inglewood, Calif.

CURTIS WINTERS, 11728 Sunset Blvd., Los Angeles 49, Calif. is president of the Curtis Winters Advertising Agency.

OLIVER F. HOOK, BS BA, 133c W. Hillsdale Blvd., San Mateo, Calif., is a broker with Schwabacher & Co.

GLEN G. ANTLE, BS Agr., AM '48, was recently named district marketing agent for fruits and vegetables for the Michigan State University Cooperative Extension Service. He operated his own farm at Exeter, Mo., from 1951 to 1956, and was an area horticultural agent from 1956 to 1961 at Kennett, Mo.

OLIVER N. HOWARD, BS Agr., is a technician for the Soil Conservation Service. His address is Box 375, New London, Mo.

Dr. Smith is survived by a daughter, QUEEN SMITH, BJ '22, AB '23, 501 E. Rollins, Columbia, Mo., an assistant professor of journalism at the University.

James N.
Burkeholder, M.D.

Dr. Burkeholder's most rewarding month

For Dr. James N. Burkeholder, A.B. '58, last June was a full and eventful month: He received his Doctor of Medicine degree from the University, he was honored in New York for placing third in an international essay contest, and he took a bride.

At a dinner of the American College of Chest Physicians in New York City, Dr. Burkeholder was presented a \$200 prize and a certificate as third-place winner in the 1961 Prize Essay Contest. First place went to a medical student at the University of Buffalo and second place to a medical student in England.

Dr. Burkeholder completed his essay, "Obstructive Patterns of Coronary Artery Disease," while a student in the M.U. School of Medicine and presented the paper to the Society of Vascular Surgery at the American Medical Association convention in New York. His research was done under the direction of Dr. Hugh E. Stephenson, Jr., professor of surgery, who was recently named first U.S. traveling physician of the James IV Society to spend six weeks during 1962 in the British Isles exchanging information with surgeons there.

Dr. Burkeholder was co-winner this year of the Surgery Award in the School of Medicine established in 1959 by Dr. Stephenson in honor of Dr. William J. Hinton. In 1960, Dr. Burkeholder won the same award, which is given annually "for original effort or investigation by an inquiring mind" to any student in the department of surgery. In 1959 he received a \$600 fellowship from the St. Joseph Heart Association to do research. In 1956 Dr. Burkeholder was Community Ambassador to Holland from Columbia. He is serving his one-year internship at the State University of Iowa Hospital. Dr. Burkeholder's wife, the former Nelle Anne Hutcheson of Bolivar, Mo., whom he married in June, will continue her studies in the SUI School of Nursing in Iowa City, where they live at S-306 Parklawn Apartments.

One more June event: At the same Commencement where Dr. Burkeholder received his M.D. degree, his father, John H. Burkeholder, State Club Agent for Northwest Missouri, received his M.S. degree in rural sociology.

GEORGE G. ROBERTSON, AB '99, June 23, at Pueblo, Colo., of a stroke.

NED V. SCOTT, '46, Sept. 25, 1960, of a heart attack. He is survived by his wife, Mrs. BELLE HOWELL Scott, '21, Route 100 Box 175a, Palatka, Fla.

Mrs. MARY MELTON Hall, '47, June 15, at Canton, Mo. She took creative writing at the University, and wrote a weekly column for about a year for the Cooper County Record, Boonville, Mo. Mrs. Hall is survived by her husband, Harry E. Hall, superintendent of schools at Canton, Mo., and by four sons.

Dr. JOHN P. MILLER, AB, July 29, at Cambridge, Mass., of bubonic plague. He had recently returned from New Mexico, where he headed a U. S. Geological Survey team. Dr. Miller was a consultant and expert witness for the U. S. Justice Department on problems and litigation involving surface waters and the U. S. Geological Survey. He also worked at Los Alamos, during WW II on the atomic bomb project. He is survived by his wife, Mrs. LAURA CRAMER Miller, BS Ed., and their four children, Julie, Kirk, Sally and Roger, of 3 Cabot Rd., Arlington 74, Mass.

NED M. TRIMBLE, AB '49, BJ '49, June 27 in an airplane crash near La Push, Washington. He was travel editor and music critic for the Kansas City Star, and one of five persons on a scenic tour of Washington, Oregon and Idaho. Mr. Trimble first worked in the Kansas City, Kan., office of the Star and later worked in the paper's Clay County bureau. He is survived by his wife, Mrs. Julia Cross Trimble, and a son Gerald, 3, of 14 W. 10th St., North Kansas City, Mo.

WILLIS E. DYSART, AB and BJ '49, July 10, of a heart attack, in St. Louis. He had been on the staff of the Columbia Daily Tribune, Columbia, Mo. after graduation, joined the sports staff of the Louisville Times in 1955, and joined the sports staff of the St. Louis Post-Dispatch last May. He is survived by his wife, the former MARTHA LOGAN, BS Ed. '55, and two sons, Mark 3, and Christopher 2, of 8820 Washington, University City 24, Mo. Mr. Dysart is also survived by his mother, Mrs. Earle S. Dysart of 6 Edgewood Ave., Columbia, Mo.

SAMUEL JOHNSON WEST, sophomore in the School of Engineering, in an automobile accident near De Quincy, La., July 28. He is survived by his parents, President and Mrs. Samuel E. West of Kemper Military School, Boonville, Mo.

page thirty-six

Those who flee Columbia for the summer need not feel sorry for those of us left behind. It is true that life in the community slows down. Many business places in the campus area close their doors for about six weeks. An aura of peaceful calm settles over the town. Gone are the shouts and shrieks of students, the screeching of auto brakes and tires. There are places to park. This is the time of year when pastoral Columbia becomes a place of contentment and rest, if you can forget the humidity and the world situation. In these brief halcyon days one may probe his inner feelings and ponder his destiny; he may meditate on the nobler things offered by life and contemplate his basic needs, such as the specifications for one's own fallout shelter.

Things do happen in Columbia in the summer time. Old Lathrop Hall disappeared. The wrecking company did a painstaking job, allowing the natives time to observe the daily stages of devastation. Brick from the venerable structure was offered at a penny each, and the market was brisk. Dean Matthews, who had spied the terra cotta eagle on a high perch, arranged to buy it on condition it was brought down safely, which it was. (Somewhere on this page we present a view of the Lathrop Hall roof as it appeared in its last stages, when only the rafters were left). There were changes in the air, too. Returning students trying to tune in KBIA will hear those call letters no more. The new owners call it KCGM and would prefer to think that KBIA never existed, apparently; anyway, they killed off the rock 'n' roll records and installed listenable ones. Meanwhile KFRU quadrupled its power to 1,000 watts. The University Theater and the Columbia Civic Chorus came through with good productions; the Lyceum Theater got off to a good start at Arrow Rock—alumni and students were active in all these enterprises. For those who take their culture seriously, a circus came to town and the Boone County Fair held forth again. So you see there's plenty going on in Columbia the year round.

The biggest news in town this summer was a hole in the street. It started modestly enough, just a sinking spot in Kentucky Avenue between the women's dorms and the Lambda Chi house. The city and the University arranged for the depression to be cleaned out and filled. It seemed a minor task at the time. The hole got bigger and deeper as the weeks went by. Every time the excavators thought they had "hit bottom" and could halt the digging, there'd be a new cave-in or water would spout up. As time went on, with more machinery hauled into action and more earth being piled up over a large area, the site got to be quite an attraction for the natives who, as pointed out above, already had enjoyed a rousing summer. Finally the excavation got to be about 45 feet across and something like 60 feet deep. People were beginning to wonder if this were a bottomless pit, or if the diggers might come upon a long-buried civilization. The city and the University were growing a little impatient. At long last it was decided the probing had gone far enough; it was time to start filling up. Large limestone blocks were tossed into the crater, and somebody was generously adding various articles of junk—old fence posts, an ancient car seat, and the inevitable beer cans. At least one dog had to be rescued from the hole. Concrete was to be poured on top, and eventually the street levelled off, with all concerned hoping the whole thing could be forgotten. So, this summer anyway, Columbia really had news in depth.

Most of the establishments around the campus that cater to human hunger and thirst are closed during August. This forces the hirelings still on the job to forage for the daily necessities of coffee and doughnuts. It is in this season that home brewing of coffee reaches its greatest volume. In this corner and in that cubby hole may be found little groups around percolators. These are people who usually go out for coffee, but in an emergency can make their own. They would prefer to sip in secret, but the familiar aroma advertises their oasis. The campusite in quest of java need not be frustrated, if he but directs his steps wisely. This he can do if he merely follows his nose. If the intruder has an ounce of personal appeal (and if the revelers have an ounce of decency) he will be invited to join the delicious debauchery. The happy wanderer should not return to this haven too often, however, lest his welcome wear thin; so it behooves him to look farther and build up a reserve list of such oases. Occasionally he may observe coins of varying worth tossed loosely upon a table. The visitor, if forced to dwell on it, may assume that the coffee service is a cooperative effort with each imbibor paying his own freight. Commercialism of this sort, of course, is depressing to the coffee drinker who loves genuine hospitality and prides himself on his free-loading ability. After the usual amenities he will go on his way, to cultivate other spots where genteel manners and generosity to strangers go hand in hand.

Not a skeleton of a covered bridge, but the roof of Lathrop Hall in its final stages.

THE PROFESSIONAL APPROACH

from page one

the sun can be described and predicted accurately on the basis of scientific laws. No one, however, at this stage of our development, pretends in any serious sense to "understand" the laws of motion and of gravitation.

A University plays a dual role in our society. On one hand it is a repository of accumulated knowledge. It has a faculty whose members master the intellectual heritage received from our forebears and pass it on to selected members from each new generation. It undertakes to train men and women who will shape their society on the basis of the accumulated knowledge from the past. On the other hand, the professors are forever in quest of new truth which makes contemporary knowledge and contemporary society obsolete. This does not mean that a university is schizophrenic, working against itself. Instead, it functions in harmony with a society that is not static but developing. Mankind is forever reaching beyond itself, and universities are among the chief agencies through which it does so. Should your University ever come under attack because it is discharging this function, I urge you to rise vigorously to its defense.

In this perspective, a contemporary test of a man's education is the degree to which he maintains an open mind toward attempts to learn more about the universe in which we live. The educated man will not harbor "the old conceit of being wiser than posterity—wiser than those who will have had more experience," as Jeremy Bentham phrased it. He will reveal himself in such qualities as his zest for life; his sense of humor; his empathy with his fellow man; the largeness and humility of his spirit; the character of his mind, as reflected in the questions he asks as well as the processes by which he reaches conclusions.

It is reasonable to assume that you will have growing opportunities to shape the character of the institutions that you join. Contemporary society is looking to its leaders to develop a new philosophy of the role and purpose of its institutions, particularly of the business enterprise.

One facet of this new role is the importance of recognizing the ambitions of the members who comprise the staff. Of course, there are individuals whose aspirations are beyond their competence. We should not, however, use this as an excuse to lower our sights with respect to the critical importance of human relations. In the final analysis, institutions exist to serve individuals, not the other way around.

An institution which strives for quality is marked by the attitude of its management toward the problems of human relationships. Among the goals are:

1. To have each individual be and feel himself a necessary and therefore indispensable part of the institution.
2. To have each individual feel a compulsion to perform at the peak of his ability.

3. To reward each individual in proportion to his contribution to the joint product.
4. To have supervisors at all levels who want their subordinates to make good, who help them make good, and who rejoice with them when they do make good.
5. To prepare for the perpetuity of the institution despite the mortality of every individual in it.

By this time you will appreciate that the main burden of my message is an appeal to permeate our lives and the lives of our institutions with the professional approach. This approach is not something to be taught in a formal training program or to be added for decoration. It should reflect itself in all that we do—as it will, if it is real.

You may say that I am being impossibly naive or idealistic in appealing for professional standards, in urging the pursuit of quality. I do not think so. After all, exceptional educational privileges impose corresponding responsibilities. It may be that the professional approach is one of those feelings that must be experienced and not merely observed or read about to be understood. If so, my appeal is to strive for the experience. To repeat, it encompasses a sense of duty to serve others as part payment for the thrill of sharing society's great adventure; a sense of humility before the mysteries of the universe, coupled with a burning desire to unravel them; a sense of pride in the achievements of institutions whose destiny one has helped to shape; a sense of contentment in having helped others to self-fulfillment.

The foregoing is based on excerpts from the June 6 Commencement address at the University by Dr. Karl R. Bopp, president of the Federal Reserve Bank of Philadelphia. Dr. Bopp, a former member of the faculty, holds three degrees from the University, including an LL.D. awarded him in June.

Veteran sportscaster Mahlon Aldridge (second from right) of the Missouri Sports Network and a representative of his sponsor, Frank Stonner (right), visit Head Coach Dan Devine and Capt. Paul Henley during "picture day" preceding Tiger workouts. Once more Aldridge will broadcast all the Tiger football and basketball games in 1961-62, with an assist from Sparky Stalcup on the grid games, under the sponsorship of the State Farm Mutual Insurance Company, of which Stonner, B.S. Agr. '22, is deputy regional vice-president. The network has 41 radio stations, a new high, lined up for the Tiger games.
