

MISSOURI ALUMNUS

February 1964

FUTURAMA

Created by the People of General Motors—One of the highlights of the World's Fair will be the General Motors Futurama. This magnificent, ultra-modern building and the wonders it contains represent the skill and work of GM people—*stylists, engineers, scientists, architects, show specialists.*

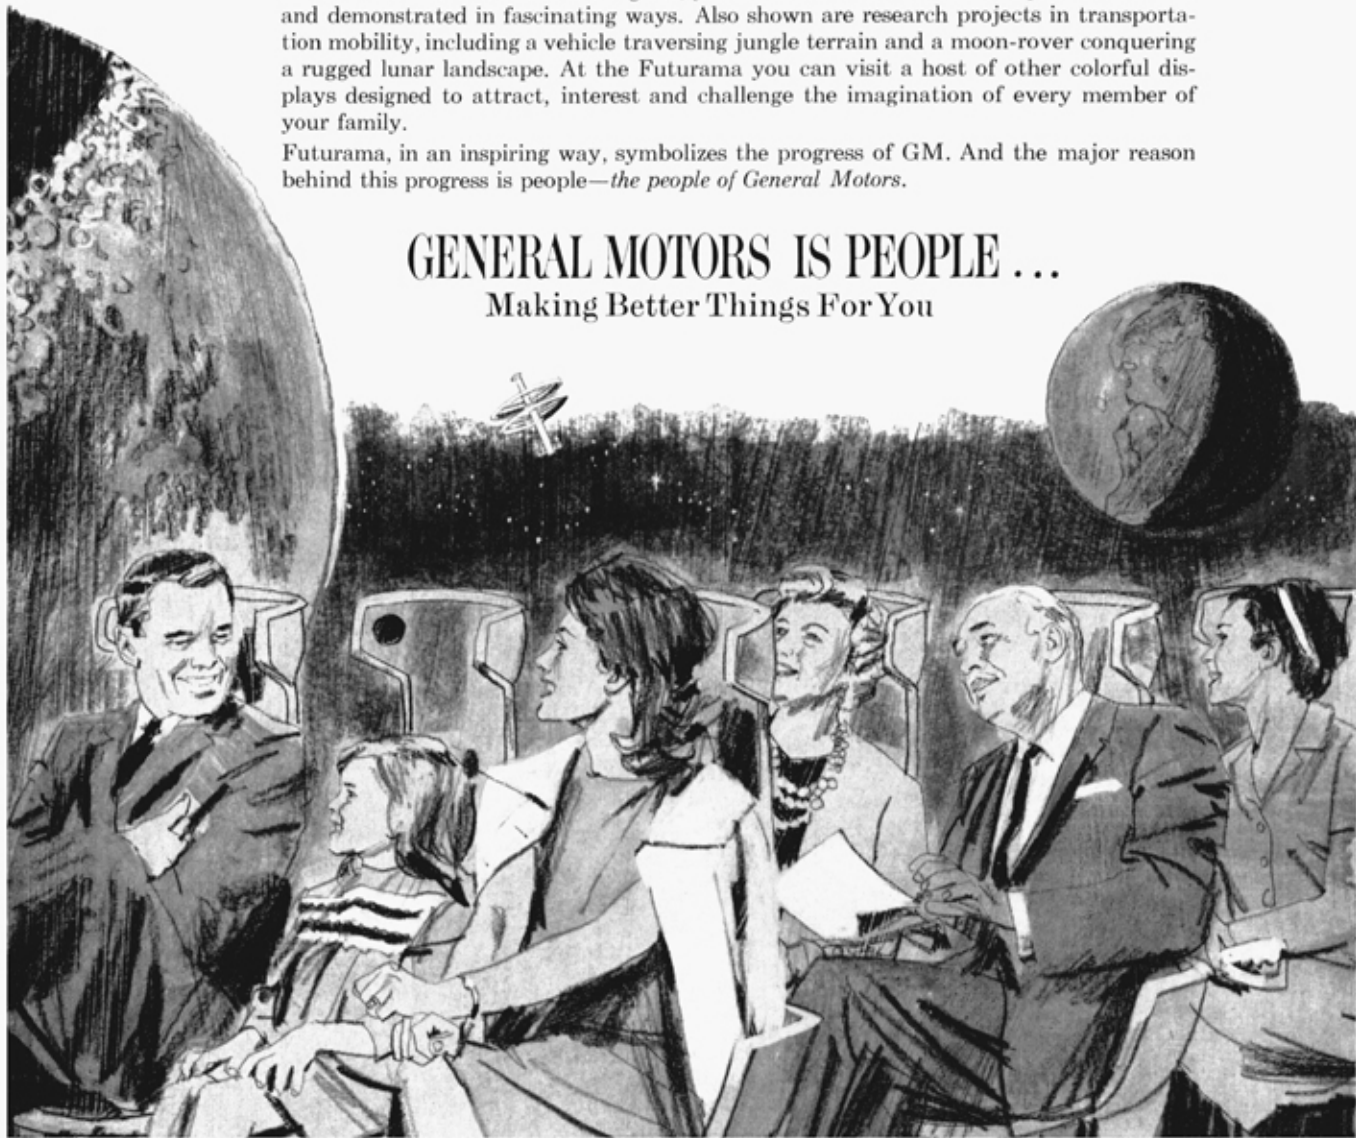

The building is 680 feet in length (a very long par three on any golf course). It's 200 feet wide (forty more than a football field), and from the stark beauty of the ten-story-high canopy entrance to the wide scope of the domed pavilion at the rear, it expresses one thing very clearly: *tomorrow!*

A high spot of the Futurama is a ride that surrounds you with wonders. In an unforgettable experience, you'll be carried through time and space—through desert and jungle—to polar regions and across the ocean floor. In a single day this dramatic ride can accommodate 70,000 people—the entire population, for instance, of Muncie, Indiana or Boulder, Colorado.

In the Futurama's Avenue of Progress, you'll see the newest sources of power described and demonstrated in fascinating ways. Also shown are research projects in transportation mobility, including a vehicle traversing jungle terrain and a moon-rover conquering a rugged lunar landscape. At the Futurama you can visit a host of other colorful displays designed to attract, interest and challenge the imagination of every member of your family.

Futurama, in an inspiring way, symbolizes the progress of GM. And the major reason behind this progress is people—the *people of General Motors.*

ABOUT THE COVER

This view of the dome of Jesse Hall was taken toward the end of winter and was removed from our collection of pictures made by Lee Battaglia, now of the staff of National Geographic magazine, when he was a student in the University several years ago. Two more Battaglia photos are reprinted on page 8.

THE MISSOURI ALUMNUS

is published monthly except July, August and January by the University of Missouri Alumni Association, 308 Jesse Hall, Columbia, Missouri and mailed to all active members in the Association. Entered as second class matter under the act of March 3, 1879. Active membership \$1.00 a year; life membership \$86. Member, American Alumni Council.

Reflections on The Supreme Law of the Land

By John W. Oliver

My title is borrowed from the Sixth Article of the Constitution of the United States, which states in no uncertain terms that:

"This Constitution, and the Laws of the United States which shall be made Pursuance thereof; . . . shall be the Supreme Law of the Land; and the Judges in every State shall be bound thereby, any thing in the Constitution or Laws of any state to the contrary notwithstanding."

I have been exposed to constitutions, to the law, to courts, to lawyers and to judges all my life. I am a graduate of the Law School of this University, as was my father and his father before him.

And yet, as I now endeavor to discharge the duties of a federal judge, I find that I reflect more and not less upon the question stated best by Judge Learned Hand in his now famous Spirit of Liberty address made during the critical hot war year of 1944.

Judge Hand said: "I often wonder whether we do not rest our hopes too much on constitutions, upon laws, and upon courts." He was speaking of those who would seek liberty under law and he concluded that hopes based solely on constitutions, laws and courts were indeed false hopes.

Judge Hand believed very deeply that "liberty lies in the hearts of men and women; when it dies there no constitution, no law, no court can save it; no constitution, no law, no court can ever do much to help it. While it lies there it needs no constitution, no law, no court to save it."

Learned Hand, of course, was not advocating the idea that we need no constitution, no laws, and no courts to preserve the liberties established by the Constitution, its Bill of Rights, and its other amendments; particularly those written in the blood of our Revolutionary and of our Civil Wars.

Any reflection on the Supreme Law of the Land therefore requires a particularized inquiry into the broader question of what it is that Americans must add to our constitutions, to our laws, and to our courts in order that our very complicated system of government under law will continue to serve us in the future at least as well as it has in the past.

Speaking for myself, I believe that the American record of government under laws rather than men has been, for the largest part, an exemplary record.

Of course, we have moved with painfully slow and

Federal Judge Oliver is pictured at left at Arts and Science Week banquet (see page 7) where he delivered this address, slightly condensed here. Photo by George W. Gardner.

with quite undeliberate speed in particular areas, but I am personally convinced that our total experience has taught us, if we wish to learn, what it is that has afforded the base upon which the reasonable operation of constitutions, laws and courts has rested. And, as I reflect upon it, we shall survive our present constitutional crisis if, but only if, we come to understand how very rare and essential is that which we add to make stable our system of liberty under constitutions and laws.

When de Tocqueville examined Democracy in America, in the very early days of our experiment, he became as convinced as did Judge Hand that "the best possible laws cannot maintain a constitution in spite of the customs of a country." His expressed definition of "customs" included the "habits, opinions, usages and beliefs" of a people.

De Tocqueville also suggested that "the importance of customs is a common truth to which study and experience incessantly direct our attention."

In fact, so firmly did he believe that the maintenance of constitutions and laws depends upon the habits, opinions, usages and beliefs of a people, he insisted that "if I have heretofore failed in making the reader feel the important influence of the practical experience, the habits, the opinions, in short, the customs of the Americans upon the maintenance of their institutions, I failed in the principal object of my work."

BEFORE WE EXPLORE THE HABITS AND OPINIONS, or, to use de Tocqueville's word, the "customs" that are necessary for the support of the Constitution and laws of the United States, we must first examine briefly the instrument that we declared one hundred and seventy-six years ago to be the Supreme Law of the Land. A hint as to the complexity of the task that Americans then undertook will be found in the preamble to the Constitution.

Without fanfare, that preamble declares that "WE, THE PEOPLE" do "Ordain and establish this CONSTITUTION for the United States of America," all in order to accomplish a number of particular purposes. The first thing we must note is that those declared purposes are incapable of an absolute or precise definition. They do not state any principle of law at all; they expressed, as both Jefferson and Lincoln noted, the best hopes of mankind.

It is one thing to state that the Constitution was established "in Order to form a more perfect Union"; it is quite another thing to make a determination of the practical political fact as to exactly what constitutes a more perfect union. And before one even reaches the question of whether a union is perfect, he must first determine what is a union.

The declaration of the general purpose of union is easy. The sorting and selection of different ideas as to how that purpose is to be accomplished, however, is most difficult. The latter problem has produced the classic and continuing disagreement about states rights versus federal power that erupted once

into open and violent war and has cloaked many of the political battles that have been fought both before and after those tragic days.

The preamble declares next that the Constitution was established to "establish justice." But what is justice? Again we must note that it is one thing to be able to agree, as did the Convention of 1787, that Article III of the Constitution should provide that "the judicial power of the United States shall be vested in one Supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish," and "that the Judges . . . shall hold their offices during good Behaviour . . ." but it is infinitely more difficult to reach any sort of an agreement that the courts thus established and the particular judges appointed to serve have in fact administered justice in any particular case.

I find, in fact, that some of my friends are quite satisfied to make their minds up about a particular decision of the Supreme Court, for example, before and even without ever reading the particular opinion about which they complain. And, if I were to be completely candid, I suspect that some of my friends have already made up their minds about cases that the Supreme Court has not even yet decided.

We need not reflect at any length upon the declared objections of insuring "domestic tranquility," of providing "for the common defense," and of promotion of "the general Welfare." Certainly in regard to those relative declarations we can understand that agreement is easy only in regard to the statement of the objective. We must also understand that the very nature of those objectives prompts radically different viewpoints as to the means that should be put into political operation to attain them.

So violently do uninformed people quarrel that I do not know whether to believe or disbelieve another friend of mine who once told me that he had been called a Communist because he had called his adversary's attention to the fact that one of the declared purposes for which the Constitution of the United States was established was to promote the general welfare. To the minds of some, execution of the declared purpose of promotion of the general welfare is to be equated to the promotion of Sin. And who is not against that?

The final declared purpose to "secure the Blessings of Liberty to ourselves and our Posterity" is even more complicated than the other declared objectives because certain definitive declarations of individual liberty were spelled out in the Bill of Rights. But even there, we must school ourselves to think in relative rather than absolute terms.

Some of the rights guaranteed in the first ten amendments, of course, do not present much of a problem. But others present quite the same difficulty we have noted as being inherent in the declaration of, as distinguished from, the means to be used, to attain the broad objectives stated in the Preamble to the Constitution.

For example, and to state first the areas of the

By Samuel B. Gould

THE DISAPPEARING

The author of the following article is president of Educational Broadcasting Corporation, operators of WNDT in New York, and chairman of the Board of the Broadcasting Foundation of America. He has had a long and distinguished career in education and communications. Formerly president of Antioch College and chancellor of the University of California at Santa Barbara, he has been proclaimed for his forthright ideas on education. Some of his speeches have been published in book form under the title, Knowledge Is Not Enough. This article is considered of timely interest in view of the National Conference on the Improvement of Teaching by Television and Radio, which is to be held on the University of Missouri campus March 2-4.

I.

Fifty years ago the American college or university proudly reflected the alleged characteristics of our present-day British "Establishment." It was intended for the few, comparatively speaking, and it kept its activities and its secrets to itself. In fact, it went still further, for once its own initiates had achieved their various degrees, even they were rather summarily ignored except for reunions, traditional gatherings at sports events, and requests for financial assistance.

But a radical change has come about in recent decades. The medieval slits in the ivory tower are being transformed into broad and open expanses of modern picture windows. These invite the curious to look in and they make such peeping easy, not only for the college or university alumnus but for everybody who is interested. They also invite the scholar to look out and see clearly his responsibility for developing the larger community culture. With so much more viewing area and so much less wall, the whole tower is beginning to weaken and will soon disappear. No greater blessing can be vouchsafed to a democratic nation. And no other single technological tool presently in existence can do more to bring about this blessing than can television when it is properly used.

II.

The history of this rather amazing phenomenon, one that within a space of twenty years has become the tyrant of public time and taste, is worth examining.

It was almost inevitable in America that television, the brainchild of scientific and technical workers, should have had its major force devoted to promoting values stemming from technology and materialism. Television was merely following a pattern that radio had previously established. In the 1920's the Federal Communications Commission assigned a large number of AM radio frequencies to educational purposes. One by one, however, either they were not taken up at all or when they were, they soon withered away from lack of financial support and stability. Gradually these frequencies gravitated to commercial interests quick to see the profit possibility, and a great opportunity to give education its place in the sun was lost.

When television came into being, education once more was neither willing nor ready to take on the expense and responsibility of operating VHF channels. With almost no exceptions such channels were taken over by commercial interests, just as had occurred in radio. A huge and powerful industry emerged, dominating virtually all the available channels and pointing its energies toward reaching and holding a great mass audience of all age levels and of all social, economic, and educational conditions.

That the first television activity of consequence in this country was geared to commercialism is significant. Its artistic and educational possibilities were sublimated from the beginning to those essential for advertising and sales. Programs of quality and variety do develop from a policy of commercialism, it is true, but all too many programs of inferior quality or questionable purpose also develop because of this policy.

Today's concentration upon the advertising of products and the development of programs sure to please and rarely intended to tax the mind has led to an emphasis upon values in life that are compatible with a technological and materialistic society. The possession of *things* in larger quantity and bet-

IVORY TOWER

ter quality than ever before, already a dominant part of American life before the existence of television, has become even more important. Humane and individualistic values have been dealt with cavalierly. Adventure has been so completely equated with violence and bloodshed that a callousness toward the dignity of individual human life has unwittingly been fostered, with a minimum of countervailing portrayals of gentleness and graciousness. Conformity of many sorts has been encouraged—in dress, habits of eating, drinking, smoking, and the like; in recreational pleasures; in transportation; and even in family relationships. Correspondingly, a strong sense of the importance of security and an almost pathological avoidance of controversy have made their mark upon the values of the viewer.

Just as this medium affects consumer habits and values, so does it also affect and alter standards of taste. If ratings are to be believed, the mass taste of our citizenry tends very largely toward western drama, family situation comedy, detective fiction, popular ballad singers, and comedians. It reflects a willingness to view the same stock plots and stereotypical characters week after week together with an equal willingness to forgo any subtleties of dramatization or characterization. It reflects wholesale acceptance of the slick, the smooth, the competent program in preference to the provocative. It reflects a kind of hypnosis or suspension of critical judgment overcoming the viewer as he sits hour after hour before his set.

Another unmistakable influence of television relates to the disappearing regional differences in our population. Through network broadcasting and syndicated programs the same drama, music, comedy, special events, and even commercial messages are seen from border to border. Urban and rural citizens are subject to the same stimuli. The same catchwords are parroted everywhere from the television screen, and the same star performers are idolized. All this testifies to the power and importance of the word "mass" inherent in the term "mass communications."

It should be noted that as these phenomena of mass taste have developed, a minority of respectable size has also emerged, a minority searching for the occasional program of high purpose and merit with

which the total television schedule is dotted. Educational television seeks to provide a broader set of cultural choices for this minority and also undertakes to explore more systematically the instructional possibilities of the medium.

At present there are over eighty educational television stations, with more to come. They vary greatly in size, power, financial stability, and program emphasis. There are also a number of closed circuit operations in school systems and universities. Together these illustrate the three purposes of educational television: to offer instruction through open circuit transmission, thus making the broadcasts available in school or at home; to offer instruction through closed circuit transmission, thus limiting the broadcasts to a single building or group of buildings; to offer to the community cultural programs encompassing discussion of literature, art, or public affairs and performances of music, dance, drama, and so on.

The most important possibility of educational television stems from the tradition of education itself, when properly interpreted. This tradition holds the individual in great respect, recognizing his potentiality for growth and endeavoring to help him toward fulfillment of that potentiality. A sound process of education tries constantly to raise the level of understanding, to encourage students to higher expectations of their individual possibilities, and to protect them from being frozen into a conformist mass. If educational television is to perform its mission well, it must operate according to this self-same tradition, for if it questions the intellectual capacity of its viewers, it ceases to be creative and merely perpetuates mediocrity.

III.

So much for the history and characteristics of the medium. Of what importance is all this to alumni?

The potentialities of television should be of interest to college and university alumni for at least three significant reasons. First, from a purely personal and selfish point of view, alumni should recognize the greatly expanded "refresher" possibilities television can make available. Some institutions of higher education, sensing the need for a deeper

IVORY TOWER

sort of relationship between themselves and alumni, are attempting systematically to revive the intellectual interests of their graduates. A goodly number present such a revival opportunity, for example, through the so-called "alumni college," usually organized for a few days at commencement time; a few institutions provide similar opportunities at periodic intervals of the academic year; a very few maintain an outgoing process of alumni education that parallels the regular program at least partially. The newly created Alumni Center at M.I.T. is an outstanding example of this kind of effort.

But it is frequently difficult for one to return to school for a sustained period of time or even for an occasional evening or weekend in order to be updated in one's professional specialty or even in more general areas. And it is even more difficult today for the institution to find rooms and other resources to mount such a program, being so absorbed in the almost overwhelming problem of how to provide education adequately for the increasing number of undergraduate students.

A logical solution would be the offering of telecourses for alumni, the subject matter fields chosen according to the wishes of alumni themselves, the courses presented by the college faculty and made available not only to alumni but to all who have the urge to participate. A systematic, academically worthwhile program could be developed without the red tape and clutter of rules about course credit hours and all the rest. It could be adult or continuing education based upon its finest motivation, namely that of learning for the joy of learning and nothing more. It could encompass literature, the arts, the sciences, and world affairs. And it would require no classrooms, no subway or bus or automobile rides, no large number of faculty, no registration procedures, no examinations.

Second, from such a beginning in adult education by television, spurred by the interest of alumni, could come more confidence on the part of our institutions of higher education in the adaptation of this approach for the undergraduate student also—a more complicated procedure for the latter, perhaps, but nonetheless possible. Results of experiments show conclusively that there are many ways to use television effectively, ways that make possible new tech-

niques of instruction or that help in coping with enormous student bodies and inadequate physical facilities. This is not to advocate the substitution of television for all our conventional methods; it is rather to plead for its intelligent and proper use where it performs a particular service otherwise not practicable. For example, it can bring each student in a class of three hundred as close to the slide under the biology professor's microscope as though he were at the professor's side. Similarly, it can guarantee that the maximum number of students will have the opportunity to benefit from the instruction of the most distinguished and ablest faculty members.

Third, the potentialities of television should make alumni realize more fully their responsibilities as educated men and women for the cultural development of their communities. This powerful instrument can open new vistas to great numbers of people hitherto unreached. Mass education and mass culture can be raised to new levels of understanding and appreciation once there is an awareness of how important and how attainable such levels are. Democratic approaches to culture are not predestined to culminate in mediocrity. Only because there has been a passive attitude or even a snobbish attitude on the part of intellectual leaders has such mediocrity come into being. But with intelligence and perseverance on the part of the community leaders and with the use of all the communicative means at hand, new emphasis can be placed upon the fundamental values by which we live and the gracious attributes of an enlightened society.

College and university alumni must be in the forefront of such a community movement since they are fitted by background for the task. And in performing this task they can and should turn to the exciting and rewarding possibilities of reaching into every home by television. The process of elevating the public taste may be slow but, if properly and assiduously pursued, it will be sure. Television can carry on this process inexpensively and effectively, offering a rich and varied sampling of all aspects of education and culture and strengthening the inner fibre of America.

Here, then, is a new mission for alumni—contemporary, vital, unceasing, and dynamic.

Mrs. M. Stanley Ginn

Judge John W. Oliver

Dr. Chester G. Starr

Three Awarded Citations

Three prominent graduates of the University were honored at the annual Arts and Science Week banquet held in Memorial Student Union on December 10. Receiving the Citation of Merit, presented by the University of Missouri Alumni Association and the College of Arts and Science, were Mrs. M. Stanley Ginn, A.B. '33; Judge John W. Oliver, A.B. '34 and LL.B. '36 and Dr. Chester G. Starr, A.B. (WD) '34 and A.M. '35. Officiating in the ceremonies were Dr. W. Francis English, Dean of the College of Arts and Science, and Bradford Brett of Mexico, Mo., president of the Alumni Association.

ROSEMARY LUCAS GINN has been an active leader in the fields of politics, education and civic affairs, her record of accomplishments extending to national and state levels and to her community of Columbia.

Mrs. Ginn is a member of the Executive Committee of the Republican National Committee and of the committee on arrangements for the 1964 Republican Convention. She was alternate delegate-at-large at the national convention of the party in 1956. Mrs. Ginn has served as president of the Missouri Federation of Republican Women's Clubs.

At the University she was recognized for scholarship and leadership by election to Mortar Board. From 1948 to 1955 she was national president of Mortar Board. She also headed the Association of College Honor Societies in 1955-57. She was elected to Phi Beta Kappa in 1958.

In community service, Mrs. Ginn has been a director of the United Fund and a member of the Columbia Board of Health and the Boone County Hospital Auxiliary board. She is now parliamentarian of the Missouri American Legion Auxiliary.

In 1934 she married M. Stanley Ginn, LL.B. '34; they have two daughters. Mrs. Ginn has been a director of the Missouri Stores Company since 1939.

JOHN W. OLIVER was appointed to the United States District Court for the Western District of Missouri by President Kennedy in 1962. Judge Oliver began the practice of law in 1936 with the Kansas City firm of McCune, Caldwell and Downing. He

earned the reputation of being one of the outstanding trial lawyers in western Missouri.

Judge Oliver has served as chairman of the Board of Election Commissioners of Kansas City and was a member of the Jackson County Charter Commission. He has served as president of the Missouri Board of Law Examiners.

A native of Cape Girardeau, Judge Oliver was president of the Student Government Association at the University where he served on the editorial boards of the *Savitar*, the *Missouri Student* and the *Missouri Law Review*. He won memberships in Order of the Coif, Mystical Seven and Blue Key.

Judge Oliver's association with the University and the School of Law has deep family roots. His grandfather, Robert Burret Oliver, Sr., graduated in 1877; his father, Robert B. Oliver, Jr., and an uncle, Allen L. Oliver, continued the tradition. Judge and Mrs. Oliver have four children.

CHESTER G. STARR, historian and educator, joined the faculty of the University of Illinois in 1940. He headed the Division of Humanities from 1953 to 1955 and the Department of History in 1960-61. This year he is a visiting professor at the University of Washington.

Professor Starr is an author with many published works to his credit. His books include *Roman Imperial Navy, From Salerno to the Alps: A History of the Fifth Army*, *The Emergence of Rome as Ruler of the Western World*, *Civilization and the Caesars: The Intellectual Revolution in the Roman Empire* and *The Origins of Greek Civilization, 1100-650 B.C.* He has edited a book of essays, *The Intellectual Heritage of the Early Middle Ages*.

At the University, Professor Starr was elected to Phi Beta Kappa and was the recipient of several scholarships. During his doctoral study at Cornell University he was awarded the Boldt Fellowship. After earning his Ph.D. in History in 1938 he spent the next two years as a Fellow of the American academy in Rome. He was twice a Guggenheim Fellow.

Dr. Starr is a native of Centralia, Missouri. He and Mrs. Starr have four children.

Bradshaw Writing B&PA History

Dr. William L. Bradshaw, Dean Emeritus of the University's School of Business and Public Administration, is writing a comprehensive history of the School,

Dr. W. L. Bradshaw

which is observing its 50th anniversary. Dean Bradshaw outlined the School's history in a chapter he prepared for *A History of the University of Missouri, 1839-1939*, by the late Jonas Viles. His present project is an expansion on that chapter and will treat the School's history far more exhaustively. The finished product will provide an authoritative reference and source work on the first half century of the School. Dr. Bradshaw has been a member of the faculty since 1927, and retired as Dean in August, 1961 after 15 years in that position. He continues to teach as a professor of political science.

which is observing its 50th anniversary. Dean Bradshaw outlined the School's history in a chapter he prepared for *A History of the University of Missouri, 1839-1939*, by the late Jonas Viles. His present project is an expansion on that chapter and will treat the School's history far more exhaustively. The finished product will provide an authoritative reference and source work on the first half century of the School.

In one of the completed chapters, Dean Bradshaw relates that the background of the School can be traced to the Department of History and Political Economy which the University established in 1891. The first courses devoted exclusively to economics or political science were started the following year. In the next ten years the social sciences expanded rapidly. Separate departments were established in economics, history, political science, and sociology.

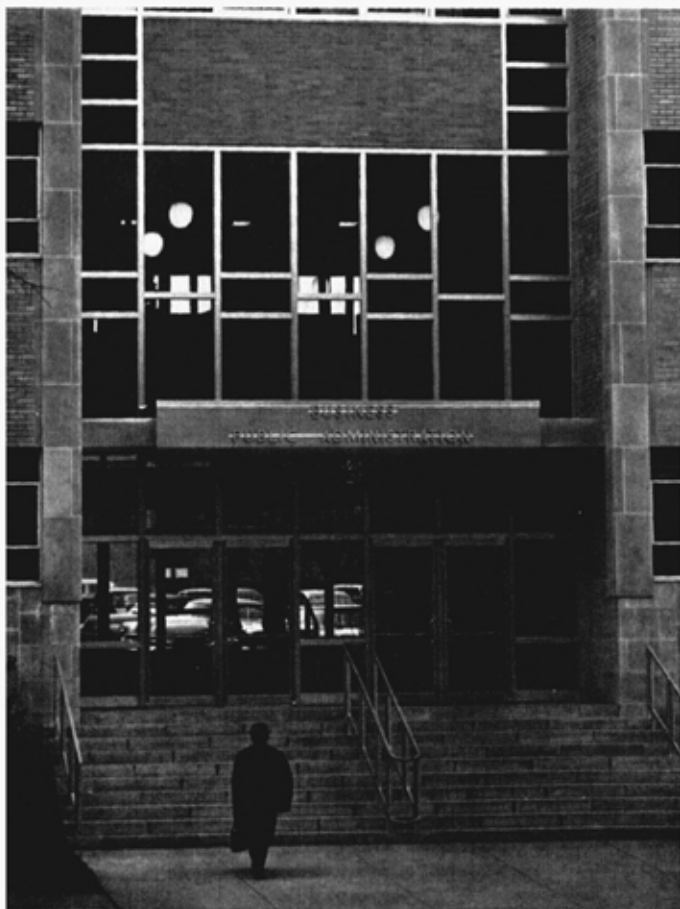

In late 1913 President A. Ross Hill proposed the organization of a School of Commerce to the University faculty, which formulated the essential requirements for such a School. The Board of Curators approved President Hill's recommendation to establish the School, which opened in September, 1914. The faculty was appointed in the following February. Dr. H. J. Davenport, professor of economics, became Dean of the Faculty. One of the ten initial members listed by Dean Bradshaw was Dr. Thorstein Veblen, professor of economics, who had already published his widely-known book, "The Theory of the Leisure Class."

In 1916 Dean Davenport resigned and the Board of Curators appointed as his successor Dr. Isidor Loeb, who had since 1910 been Dean of the University Faculty. The School's name was changed to School of Business and Public Administration in 1916.

Dr. Frederick A. Middlebush became Dean in 1925, when Dr. Loeb resigned to accept a similar position at Washington University in St. Louis. Dr. Middlebush, now President Emeritus of the University, was Dean until he became President in 1935 after serving a year as Acting President. During 1934-36, Harry G. Brown, professor of economics, was Acting Dean, and in 1936 Roy E. Curtis, professor of economics, was named Dean. Dr. Curtis served until 1942 when he began a series of leaves of absence to enter Federal administrative service; he resigned his professorship with the University in 1946; meanwhile, Prof. Brown again became Acting Dean, serving four years, until the appointment of Dr. Bradshaw in 1946.

When Dean Bradshaw reached the compulsory retirement age for an administrator and retired as Dean in 1961, Dr. John W. Schwada, professor of political science and Dean of the Faculties, was Acting Dean of the School for a year until Dr. William H. Baughn took over the deanship in 1962.

Among the outstanding faculty members, in addition to Dr. Veblen and Dr. Loeb, have been Karl R. Bopp, now president of the Federal Reserve Bank in Philadelphia, who is also an alumnus of the School; Dr. Davenport, for many years at Cornell University; Dean Bradshaw, who has served on numerous State commissions, and as a delegate-at-large to the 1943-44 Missouri Constitutional Convention had an important role in drafting and bringing about adoption of the new Constitution; and Dean Schwada, who was given leave of absence to serve under two governors as Budget Director and Comptroller of Missouri.

missouri memo

Stephen E. Raymond, award-winning education editor of the Tampa (Fla.) Tribune (and a survivor of the Bataan Death March), has a new assignment on the paper—city editor of Women's Affairs. The Tribune's managing editor, "Red" Newton, musing over the number of red hairs he had yielded over the years in encounters with women editors, decided to toss in the dish towel—so handed the assignment to Raymond. Said one young woman on the staff, "We thought it was a good idea, and it promises to be interesting. He's an idea man." Besides being a seasoned newsman, Mr. Raymond is a champion bowler and a great outdoors-man, yet he also has some experience in things feminine, having lent desk support in the women's department during the summer vacation upsets. According to colleagues, his sojourn there was either unnerving or intoxicating, for when it was all over he burst into print detailing with disbelief his adventures in the world of fashion and society. Mr. Raymond, who holds B.J. ('49) and A.M. ('50) degrees from the University, made a name for himself in the field of education, receiving honors from the Florida Education Association two years in a row for best education coverage and writing. He has been an editorial writer for the Tampa Times, and once owned the Palmetto (Fla.) News. And what does the new women's editor have to say? "It's a challenge, a real challenge."

Charles W. Henning, B.J. '50, recently returned from a five weeks' trip to the Far East. He saw several fellow-Missourians—some old, some new acquaintances—and has sent news of them to the *Alumnus*. While in Tokyo, he saw "Skip" Troelstrup, B.J. '57 (see December *Alumnus*) and Donald J. Brydon, B.J. '46, with United Press International (Hqrs. U.S. Forces Japan, APO 94, San Francisco, Calif.). Next, he saw Arnold Dibble, B.J. '39, formerly with UPI, currently

doing public relations for a Formosa-based airline (Public Relations Advertising Director, Civil Air Transport, Taipei, Formosa). In Hong Kong, he met Charles Smith, B.J. '56 (United Press International, Mainichi Shimbun Bldg., Yuraku Cho Chiyodaku, Tokyo, Japan). In Djakarta, Indonesia, the USIS man lining up interviews for Mr. Henning turned out to be Richard "Dick" Joyce, B.J. '41 (c/o USIS, APO 156, San Francisco, Calif.). Finally, as a group of newsmen were discussing their alma maters in Saigon, South Vietnam, an AP man, Edwin White, turned out to be a Missouri B.J. '43, stationed in Tokyo, Japan (c/o Associated Press, Central P.O., Box 607). Mr. Henning is Colorado division manager of the Rocky Mountain Oil and Gas Association, with offices at 1045 Petroleum Club Bldg., Denver 2, Colo.

Dr. Robert L. Heller, A.M. '43, Ph.D. '50, is director of the Earth Science Curriculum Project. Also on the steering committee with Dr. Heller are two other University alumni, Chalmer J. Roy, A.B. '29, A.M. '30, dean of the College of Sciences and Humanities at Iowa State University of Science and Technology at Ames; and Dr. Samuel P. Ellison, Jr., A.M. '38, Ph.D. '49, professor of geology at the University of Texas at Austin. Dr. Walter D. Keller, professor of geology at the University, attended a recent E.S.C.P. conference (designed to improve teaching methods and teacher training in earth science courses), in Boulder, Colorado.

William T. Bookman, B.J. '44, editor of the White Plains, New York Reporter Dispatch, has two Missouri alumni working with him. James Dean, Arts '63, is a reporter on the Dispatch, and Wayne Nicholas, B.J. '63, covers urban renewal and city hall beats. Mrs. Nicholas is the former Anne Loomis, B.J. '63, a copy editor for the Reader's Digest.

Dan E. Miller, B.S. in Agriculture '24, is serving as president of the Missouri Angus Association. For the two preceding years, he was vice-president of the M.A.A. and for twenty-one years served as secretary of the group. During this time he has been raising registered Angus cattle on his farm near Fayette, Missouri. His daughter, Mrs. Fred Alexander, the former Barbara Miller, lives in Fayette. She graduated in 1956 with a B.S. in Home Economics and was selected for membership in Gamma Sigma Delta—an honor her father also had as a student. Mr. Miller has four brothers, all University graduates. John A. Miller, B.S. in Agriculture '25, lives in Raytown, Missouri; Dr. Clint L. Miller of Lee's Summit, Missouri, earned his B.S. in Medicine in 1929; Col. Alva E. Miller received his B.S. in Medicine in 1932. He is engaged in private practice in psychiatry at Tacoma, Washington; and Melvin P. Miller, B.S. in Agriculture '41, is a youth agent living at Las Vegas, Nevada. Dan Miller, who served as county agricultural agent for 22 years in Howard and Randolph counties in Missouri, has two nieces and three nephews who are also M.U. graduates. He and his wife live on DeMillermere Farm, Fayette.

Dr. F. Norwood Marquis, M.Ed. '45, D.Ed. '52, has been named Director of the Teacher Education Program at Miami University, Oxford, Ohio. He returned recently from two years in Colombia as an elementary education advisor for the International Cooperation Administration. Dr. and Mrs. Marquis have two grown children.

Dr. M. P. Leech, A.B. '34, B.S. in Med. '36, has succeeded fellow alumnus Dr. William J. Shaw as chief of staff at Keller Memorial Hospital in Fayette, Missouri. Dr. Shaw, who received a B.S. in Medicine in 1943, is serving on the hospital's board of directors as secretary-treasurer.

Robert B.
Diemer

New honor for Robert Diemer

Robert B. Diemer, of Pasadena, California, became an Honorary Member of the American Society of Civil Engineers recently as the professional society of civil engineers had its annual meeting in San Francisco. Mr. Diemer's citation said the honor was "in appreciation of outstanding public service rendered in a lifetime devoted to developing and conserving water resources, especially in California."

Mr. Diemer retired in 1961 as general manager and chief engineer of the Metropolitan Water District of Southern California after an outstanding career in the water works field. During his long tenure with the Metropolitan Water District, he carried to completion the Colorado River Aqueduct, selected by ASCE in 1955 as one of the "Seven Modern Civil Engineering Wonders of the United States."

Born in Palmyra, Mo., Mr. Diemer received his Bachelor of Science degree in Civil Engineering from the University in 1911. He made Tau Beta Pi and received his "M" as a shortstop on the Tiger baseball team. From 1911 to 1926, he was employed on the construction of irrigation works for the U. S. Bureau of Reclamation in Nebraska and Wyoming. In the latter year he resigned to accept a similar assignment in Mexico for the J. G. White Engineering Corporation.

In July 1929 Mr. Diemer was retained by the City of Los Angeles to make estimates and designs for an aqueduct to carry water from the Colorado River to Southern California—a distance of 300 miles across the desert and through mountain ranges. Surveys and studies to determine the best and most economical route for the Colorado River Aqueduct initially were conducted by the City of Los Angeles. After the Metropolitan Water District of Southern California was organized, the work was taken over by the District, in May 1930, and Mr. Diemer was transferred from the City of Los Angeles to the District. When Mr. Diemer was assigned to the Colorado River Aqueduct project, it was supposed to be for a period of six months. He was there for 30 years.

In September 1931 Southern California voted a bond issue of \$220,000,000 to finance the building of the first stage of the Colorado River Aqueduct. Mr. Diemer rose from the position of engineer on loca-

tion to division engineer in charge of the construction of forty miles of 16-ft. tunnels. In 1934 he became distribution engineer, responsible for the location, design, and construction of 150 miles of giant pipelines.

With the completion of the aqueduct system in 1941, he became assistant general manager and chief engineer, a position he held to the end of 1956. During this decade he was front man for all construction and operating problems on the entire system. From January 1, 1952, to his retirement in 1961, he was general manager and chief engineer of the District, which now covers about 1,000 square miles in the counties of Los Angeles, Orange, San Diego, Riverside, San Bernardino and Ventura, and includes Los Angeles and 94 other cities. This represents a significant growth since 1928, when the District had 640 square miles and 11 cities. Its population has increased from 2,000,000 to 7,800,000 and its assessed valuation from \$1.6 billion to nearly \$15 billion. Needless to say, this spectacular growth would not have been possible without the Colorado River Aqueduct.

During the last eight years under Mr. Diemer's direction, the District spent about \$200 million on expansion of its facilities to meet increasing water needs. Now it has been brought to its full planned delivery capacity, and is capable of delivering more than a billion gallons of water daily—one of the world's largest water supply systems.

Upon his retirement, Mr. Diemer was cited by the Metropolitan Water District, and the Lower Feeder Filtration and Softening Plant was named for him. Pasadena, where he resides, named him its director on the District Board.

Among other honors accorded him are the Beaver Award for Outstanding Achievement in Heavy Engineering Construction; honorary membership in the American Water Works Association; the Missouri Honor Award for Distinguished Service in Engineering; and the Elliott Award from the California Section of the American Water Works Association.

Bedford off to Afghanistan

Jimmy (Pete) Bedford, who teaches journalism at the University of Maryland, is off on his travels again. This time the roaming photographer, writer and teacher is bound for Afghanistan, where he has a Fulbright teaching fellowship at the University of Kabul for the next academic year. Jimmy has three degrees from M.U. He taught at the University of Kansas for four years, and in 1958 embarked on a two-year world tour. His trip was financed by pictures and articles sold to various publications. The *Alumnus* featured one of his articles which described his motor scooter safaris in Africa. Since joining the Maryland faculty he has spent his summers on trips. One summer he traveled the length of the Rhine river in a rubber raft; another summer was spent in Finland.

Ruth's global enterprises

A journalist, a radio broadcaster, an executive . . . "I do so many different jobs, it's difficult to tell anyone *what* I do," says Ruth Kinyon Whiteside Fisher.

An American in London married to Robert Fisher (an Austrian by birth and a graduate of the University of Vienna who speaks multiple languages), Ruth's varied interests and enterprises take her to many countries of the world in her search for antiques.

Serving as a center of her diverse activities are new offices at Robert Fisher (Shipping) Ltd., which was founded by her husband in 1921. The firm is located on a gas-lighted street near the bright lights area of Piccadilly Circus.

As Mrs. Robert Fisher, director of the company,

Ruth is out on new business calls, or hatching up promotional campaigns. As Ruth Kinyon Fisher, she is a commissionaire to international buyers of antiques and to interior decorators. Through her husband's company she is in contact with many people in the world of art, such as Huntington Hartford of A. & P. stores and Vincent Price, buyer for the Sears-Roebuck collection. The Fishers give a direct personal service in import-export and customs, and handle books, modern and vintage cars, animals by air—or supply clients with a car, chauffeur and interpreter. "We are dealers to dealers; there is no longer a national but an international market," says Ruth.

A European network of contacts for antiques means exciting trips to the continent for the Fishers. A typical business year invariably finds them in Italy in September and October; in Germany (and sometimes Denmark and Sweden) in May—and just for fun, a mid-winter trek to Switzerland, Yugoslavia, Finland, Turkey, Greece, the Soviet Union and Belgium are often included in their itinerary, too. "We never work harder than on continental trips, up early and until everything is closed, then write up office calls, antique and decorating reports and a map for future routings." Or in London, "The days are so fascinating we forget we are dead tired; with full brief cases the job is carried on after hours," she adds.

"I try to keep up my journalistic activities, too," says Ruth. Before her marriage she spent two years abroad making tapes for the Columbia Broadcasting System. When she and Robert were married in 1959, Ruth set up her Overseas Features, Ltd.—a news-behind-the-news press service. She continues as its managing director and still takes press party tours. Also,

as British correspondent for the American magazine *Travel*, she writes a monthly column under the by-line of Ruth Kinyon Whiteside. Despite her continued interest in journalism, she says she turns down more work than she turns out.

Travel is not new to Ruth. Born in Kansas City, Missouri when her father, Henry H. Kinyon, A.B. '12, B.J. '12, worked for the Star, the family soon moved to Tokyo where Mr. Kinyon continued his newspaper career. When Ruth was eight, they moved to Long Island, N. Y. It was her father's transfer to Columbia, Missouri that brought Ruth to the Journalism School at the University. In 1938 she graduated with a B.J. degree in advertising.

For the next several years, Ruth was with advertising firms in New York City—the J. Walter Thompson Company, and ten years as director of research with Charles W. Hoyt Company. She was a member of the board of directors of Advertising Women of New York, and a director of the Advertising Federation of America; later she was treasurer of the International Association of Women in Radio and Television.

The Fishers are currently on a business trip in the States. They will return to England late this month and move into their newly purchased home on Ricketts Lane, at Paddock Green, Salfords, Surrey—about thirty minutes by train from their London office. Mr. Kinyon, who lives at Candlelight Lodge, Columbia, Missouri, will join them in the spring.

Antiques? "Our home at Paddock Green is piled high," says Ruth. "Typically female, I can't bear to let some lovely things go—so I keep them."

Alumni named to bench

James A. Moore and Alvin C. Randall have been named judges of the Jackson County, Missouri, Circuit Court. Both appointees are lawyers with a background of varied civic responsibilities in Kansas City.

Mr. Moore, who received an A.B. degree from the University in 1931, is a member of the law firm of Gage, Hodges, Moore, Park and Kreamer. He was a member of the Kansas City liquor control board of review from 1950 to 1956 and was a charter member and former president of the lawyers association.

Mr. Moore served three terms as chairman of the Chamber of Commerce local government committee. A native of Kansas City, he has been a member of the Missouri Bar since 1934. He is married, has five children, and lives at 450 West 50th Street.

Mr. Randall has practiced law in Kansas City nearly 15 years. He is a partner in Houts, James, Randall, Hogsett and McCanse, and is a recipient of the Lon Hocker Trial lawyer award.

A native of Wayne County, Missouri, Mr. Randall graduated from the University in 1949 with an LL.B. degree. He was active in political campaigns in the Kansas City area in 1952, 1954 and 1956. Married and the father of two children, he lives at 1100 West 74th Street.

class notes

08 D. HOWARD DOANE, BS Agr., MS Agr. '09, founder and former president of the Doane Agricultural Service, St. Louis, has been presented the Distinguished Service to Agriculture Award of the American Agricultural Editors Association. Mr. Doane is retired; he and his wife now live at Grassland Farm near McCredie, Mo.

NORMAN HOBART, Sr., Arts, has been appointed an agent for National Life of Vermont. His address is 825 Walnut, Kansas City, Mo.

09 WILLIAM STAVA, BS CE, is an advisory engineer for the California Water and Telephone Co., in San Francisco, where he lives at 2363 Van Ness Ave., Apt. 400.

O. D. "Chris" CHRISMAN, Engr., 8710 Venice Blvd., Los Angeles, Calif. 90034, has a son, Dr. Donald Chrisman, and two grandsons, Nicholas, 13, and Abbott, 11.

10 RAY A. BURNS, Eng., is in his 50th year with the La-Clede-Christy Corporation now known as the H. K. Porter Co. Mr. Burns lives at 6916 Pershing Ave., St. Louis, Mo.

13 M. W. TALBOT, BS For., is retired and living at 2590 Cedar St., Berkeley 8, Calif. He has two children: Lee, an ecologist with the United Nations, and a daughter, Mrs. William P. Mott, both University of California graduates.

14 CHARLES H. PHILPOTT, AB, AM '15, Ph.D. '27, represented the University at the installation of Douglas Maitland Knight as president of Duke University on Dec. 11. Now retired, Dr. Philpott is a former director of Education curriculum research and development in the public schools of St. Louis. He lives at 2260 Cranford Rd., Durham, N. C.

17 ROY R. COX, BS CE, a 33-year veteran with the Missouri State Highway Department, has been appointed assistant chief of the Division of Bridges. A native of Cairo, Mo., Mr. Cox started work with the Highway Department in 1924. He also served as a designer, special assignments engineer and bridge designer before being promoted to senior engineer III in 1953. Mr. Cox lives at 1108 Vineyard Sq., Jefferson City, Mo.

HENRY L. HERBERT, Journ., Arts, R-D 2, Newtown, Pa., has become a life member of the University Alumni Association.

EARL J. RENICK, Arts, Agric., has been appointed an agent for National Life of Vermont. His office is at 4153 Broadway, Kansas City, Mo.

18 JULIAN CAMERON STOY, BS Ed., formerly business manager of Bronxville (N.Y.) School, is now retired and living at 224 E. Anderson St., Mexico, Mo.

20 J. CRAIG RUBY, AB, has joined the H. V. Jones Co., of Kansas City, in the business sales department. A member of the basketball team while at M.U., Mr. Ruby attended the 1948 team reunion in Columbia last summer. He lives at 8723 Aberdeen, Kansas City, Mo.

JOHN D. McCUTCHEON, AB, St. Louis investment broker, has engaged in a 50-year quest for world understanding without ever being overseas. He recently resigned after ten years as chairman of the St. Louis Committee on Foreign Relations. His group exists to stimulate its members' interest in foreign affairs and takes polls of their opinions. Samplings are taken of members' ideas, which are forwarded to the parent Council on Foreign Relations in New York.

PAUL M. BERNARD, BS Agr., AM '22, is Farm Director for station KMOX-TV. He lives at 1170 Kirkham, Glendale, Mo.

CLAYTON S. GORDON, Sr., AB, is retired and living at 13033 Chief Joseph Rd., Apple Valley, Calif.

21 V. P. "Vip" CROWE, LL.B., senior law partner of the firm of Crowe, Boxley, Dunlevy, Thweatt, Swinford and Johnson, 570 First National Bldg., Oklahoma City, Okla., has been named chairman of the Section on General Practice of the American Bar Association. Mr. Crowe was admitted to the Missouri Bar in 1920, the Oklahoma Bar in 1921, and admitted to practice before the U.S. Supreme Court in 1928.

E. T. ITSCHNER, BS Agr., AM '38, professor of dairy husbandry at the University, has retired after a 42-year tenure. He joined the extension service staff in

1921 as assistant county agent in Jefferson County; he served as county agent in Holt County before becoming State 4-H Club agent in 1935. Mr. Itschner transferred seven years later to the dairy husbandry department. He and his wife have three children: John, a University senior; Mrs. Jimmy T. Elliott of Alton, Ill., and Mrs. Robert Barnes of Grinnell, Ia. He also has six grandchildren.

HOWARD W. HAILEY, Arts, Journ., retired business manager of the Rocky Mountain News, Denver, Colo., now lives at 4190 Hessel Rd., Sebastopol, Calif.

BURDETTE GREEN, BS For., 13000 Skyline Blvd., Los Gatos, Calif., is president of Key Equipment Co.

22 T. FISKE MARBUT, BS Engr., after retiring from the contracting business, has been named City Commissioner of Emporia, Kan., where his address is Box 626.

NORMAN D. TWICHELL, AB, is retired and living at 303 47th S-C" 14, San Diego 2, Calif.

23 CONRAD L. ECKERT, BS BA, is collection manager of the National Association of Credit Management, Kansas City division, and serves as an instructor in the evening division of Rockhurst College. He also is president of the Westport Historical Society and a member of the Native Sons of Kansas City. Mr. Eckert and his wife (ISABELL SEARS, AB) have two married daughters and seven grandchildren, and live at 6831 Locust, Kansas City, Mo.

"Friends laughed when I planted my fruit orchard in Canyon (Texas). They said you couldn't raise fruit trees in this climate." But, Miss ISABEL ROBINSON, BS Ed., professor emeritus of art and once the head of the West Texas State College art department, still has that orchard planted years ago in the then cactus covered and open prairie lot on which she now lives. The subject of a recent feature article in the Canyon News, Miss Robinson adopted two girls when they were six—Young Boon Lee, 15, of Seoul, Korea, and a Navajo girl from Chinle, Ariz., Rositta Yazzi, 13. Although neither lives with her, they correspond regularly. Miss Robinson is a native of Adair County, Mo. Following her graduation from M.U., she taught at Novelty, Mo., and at Gilford College, a Quaker school in Greensboro, N. C. After receiving her AM degree in 1924, she taught at Ohio University and at Bloomsburg State Teacher's College in Pennsylvania, then joined the faculty at West Texas in 1926 where she remained until her retirement in 1960. Her address is P.O. Box 247, Canyon, Texas.

ALMA KINKADE, BS Ed., is employed by the Los Angeles Board of Education as a teacher. She lives at Joshua Tree, Calif.

Miss HILDA PIEPMEIER, AB, BS Ed. '24, is a retired teacher living at 610 W. 67th Terr., Kansas City 13, Mo.

25 ROY A. MIDDLETON, BS Eng., is with American Telephone and Telegraph Co. He and his wife (INDIA MORGAN, BS Ed. '28) have a granddaughter, born Oct. 4, 1963. Their daughter is Mrs. PATRICIA JANE MIDDLETON Covington, BS Ed. '61. The Middletons live at 1208 W. 70th St., Kansas City, Mo.

26 Dr. CLAY J. ANDERSON, Sr., BS Ed., AM '27, economic advisor to and an officer of the Federal Reserve Bank of Philadelphia, is currently presenting a series of Economics lectures at Lebanon Valley College, Annville, Pa. The series is sponsored by the Department of Economics and Business Administration at the College and by the Peoples National Bank of Lebanon. Dr. Anderson has contributed to books and professional journals and has served as a professor and lecturer and as an economist in the U.S. Department of Commerce and in the Federal Reserve System. He has acted as advisor to the newly established bank in Burma and visited the central banks of Pakistan, Italy, Switzerland, West Germany, The Netherlands, Sweden, France, and England.

HARRY F. BARR, Engr., is vice-president of the engineering staff at General Motors Corporation's Technical Center in Warren, Ohio.

Mrs. Axel (MILDRED KEITH) Nelson, BS Ed., is a retired high school teacher. Her son, Nils, is a teacher at the Purdue University branch at Hammond, Ind. Mrs. Nelson's address is 502 W. Columbia St., Farmington, Mo.

Mrs. MARIAN BOWERS Beeler, AB, 6132 Glen Holly, Hollywood, Calif., says she is still pursuing a theatrical career—stage, TV, pictures. She also works in various offices on a part-time basis. Her son, William G. Thomas, is working on his Ph.D. degree at U.C.L.A. and heads the placement bureau there. Mrs. Beeler also has four grandsons.

27 WILLIAM ZALKEN, BJ, public relations director of the St. Louis (Mo.) Symphony Society and Municipal Opera, has been elected secretary of the Media Club of St. Louis.

ROBERT N. (Bob) MILLER, Arts, former M.U. grid star under Gwinn Henry and M Men's Club member, officiated at his last football game on Dec. 28, in Jacksonville, Fla. The executive director of the Big Eight conference said that Bob, who has passed the mandatory retirement age, was assigned to the Gator Bowl as a "going-away present." Bob and a fellow-official, George Bourrette (who

Gen. Ralph P. Swofford, Jr.

Swofford honored, assumes new command

On January 1, Lt. Gen. Ralph P. Swofford, Jr., took command of the Air University, Maxwell Air Force Base, Montgomery, Alabama, after completing a tour of duty as NATO Commander, Allied Air Forces of Southern Europe, Naples, Italy.

During change-of-command ceremonies in Naples, it was announced that President Johnson had awarded the Distinguished Service Medal to Gen. Swofford, who, according to the accompanying citation, "distinguished himself by exceptionally meritorious service to the U. S. in a position of great responsibility as commander, Allied Forces Southern Europe, from May 4, 1960, to December 31, 1963. During this period his dedicated efforts and dynamic leadership contributed significantly to the security of the U. S. and the North Atlantic Treaty Organization."

A native of Kansas City, and a former student in engineering at M. U. (1925-26), Gen. Swofford graduated from the U. S. Military Academy, West Point, N. Y., in 1930, with the rank of second lieutenant. He advanced through grade to an Air Force major general by 1953. During this period he served as assistant chief of staff, operations, First Airborne Army, Europe, 1944-45; as chief of staff, U. S. Military Academy, 1945-47; and as special assistant to the chief of staff, USAF, Washington, D. C., 1947-48. In 1949, Gen. Swofford became chief of the engineering division, Air Materiel Command, Wright-Patterson AFB, Ohio, where he also served as deputy commanding general, Air Research and Development Command, 1950-51, and as Commandant, USAF Institute of Technology, 1951-55. He then went to Washington, D. C., where he was director of Research and Development until his assignment in Naples.

Gen. Swofford wears the Bronze Star with Oak Leaf Cluster and the Croix de Guerre with Palm, and he is a member of the American Society for Engineering Education. He and Mrs. Swofford, the former Martha Ann Martin, Arts '29, have four children: Frank, an Air Force second lieutenant stationed in Denver; Ralph III, with the U. S. Army in Germany; Ann, a college junior; and Susan, 16.

Mrs. Swofford's father, the late Frank L. Martin, was on the faculty of the University's School of Journalism from 1909 (only a few months after its founding) until his death in 1941; he was named associate dean of the school in 1930, and became dean in 1935. The Swoffords maintain their permanent address at the home of her mother, Mrs. Frank L. Martin, 402 Edgewood Ave., Columbia, Missouri.

has officiated many Missouri football and basketball games), escaped unharmed from the Roosevelt Hotel fire in Jacksonville, on Dec. 29. "We just fought our way out of the smoke, walked down the back stairs and got out of the building," said Bob in an interview following their escape. Bob lives at 221 W. 18th St., Kansas City, Mo.

28 IRVIN FANE, AB, LL.B., 4515 Wornall Rd., Kansas City, Mo., has been elected chairman of the board of trustees of the Union of American Hebrew Congregations. He is the 15th person (and first Missourian) to be named to the highest elective office in the UAHC, an organization comprised of 685 Reform Jewish congregations in the U.S., Canada and Central America. Mr. Fane is a senior partner in the law firm of Spencer, Fane, Britt and Browne, Kansas City. He was named two years ago by President Kennedy to an 85-member body to study the procedures of all administrative agencies and executive departments; he was also appointed to the legal advisory committee of the Federal Power Commission's national power survey in 1962. Mr. Fane is married and has two sons, Lawrence, assistant professor at the Rhode Island School of Design in Providence, and BRUCE FANE, BS BA '59, of the City National Bank in Kansas City.

HARRY B. ROBINSON, AB, BS Ed. '33, is assistant regional director of the National Park Service, and lives at 1493 Marbee Dr., Apt. 2, Omaha, Neb.

JAMES E. "Jim" WILD, BS Ed., "philosopher of the fairways and staunch supporter of area golf," has retired after many years as a newspaperman. A native of Hermann, Mo., he started his career in sports at the Baltimore (Md.) News-Post in 1933, and shifted to the Baltimore Sun in 1937. He progressed to makeup editor, to the war desk, and to feature writer before moving permanently to sports in 1950. He took over as the Sun's golf writer in 1954. In over a decade, Jim covered ten Masters, four national Opens and four P.G.A. "Champ's" tournaments. He left on Jan. 6 for a vacation in Honolulu—a farewell gift from his many friends, who also paid tribute to him at a testimonial dinner on Dec. 9, in Baltimore. Jim's address is 3611 Clifmar Rd., Baltimore, Md. 21207.

29 ROBERT C. MEHRLE, B&PA, is secretary-treasurer of the McCarty Gin Co., Caruthersville, Mo. He and his wife (LORENE KERSEY, BS Ed. '31) have three children: PARKER C. MEHRLE, Agric. '51, Robert Mehrle, and Mrs. Julian (MARILYN MEHRLE) Boyd, Educ. '54. The Mehrles live on Route U, Caruthersville.

NEWELL K. JONES, BS Eng., is vice-president of Missouri Natural Gas Co., and lives at 521 Maple St., Farmington, Mo.

Dr. ASA BARNES, AB, BS Med., of Louisville, Ky., has been named Area Medical Administrator of United Mine Workers Districts in Beckley and in Charleston. For the past 15 years, he had served in the same position in Louisville. A native of Missouri, Dr. Barnes is president of the Kentucky Tuberculosis Association, and until Jan. 1, served on the teaching faculties of the Universities of Louisville and Cincinnati schools of medicine. Dr. Barnes divides his time in serving both the Beckley and Charleston offices, and he and his wife now live at Beaver, Ky.

30 Air Force Reserve Brig. Gen. ROBERT W. SMART, AB, retired chief counsel of the House Armed Services Committee, was awarded the Distinguished Civilian Service decoration at a Pentagon ceremony recently. A native of Crane, Mo., who practiced law in Aurora, Mo., Gen. Smart is the first Congressional staff member to receive the Army's highest civilian award. He was appointed to the staff in 1947 and became chief counsel in 1951. After his retirement on Nov. 30, he became assistant to the president of North American Aviation Corporation at Santa Monica, Calif.

CHARLES J. MILLER, BS Engr., since 1961 a regional vice-president of the General Electric Co., has his headquarters in Cleveland, Ohio. With the east central

Charles J. Miller

region as his area assignment, he serves the marketing centers of Detroit, Grand Rapids, Akron, Toledo, Cleveland, Columbus, Dayton, Cincinnati, Fort Wayne and Pittsburgh. Earlier, Mr. Miller served as manager of aviation sales in Dayton, followed by district and regional sales manager assignments. Active in many civic organizations, he is a general vice-president and member of the executive board of the Ohio Chamber of Commerce, and a trustee of the Cleveland Engineering Society Foundation, and Cleveland Development Foundation, to name a few. Mr. Miller is also a member of the American Institute of Aeronautics and Astronautics. He and Mrs. Miller (ALICE INSKEEP, BS Ed., '30) have two sons, CHARLES K. MILLER, BJ '62, of 1333 Cove Ave., Apt. 111, Lakewood, Ohio, and Phillip, at school in Philadelphia; they live at 12520 Edgewater Dr., Apt. 805, Lakewood.

31 Mrs. DOROTHY JOHNSON CALDWELL, BFA, BJ '19, AM '51, editor of the Missouri Historic Sites catalog, has visited 70 of the state's 114 counties in order to round out information obtained in the first statewide survey of historic sites. She also is assistant editor of the Missouri Historical Review, quarterly publication of the State Historical Society of Missouri. Mrs. Caldwell and her husband, J. C. CALDWELL, BS Agr. '21, MS '62, co-ordinator of the India program in the University College of Agriculture, live at 1607 Ross St., Columbia, Mo.

Home base for C. E. "Bud" SHEPHERD, Jr., AB, world traveler and former Kansas City businessman, is at 422 Green St., Key West, Fla., where his shingle reads: "Fat Charlie's," named for his favorite Buddha picked up in Hong Kong in 1926. Bud's imported curio shop, located in Wolkowsky's restoration of old Conchtown, is packed with zany gifts from around the world. "The more unusual the better, is my motto," says Bud, "so people can get those out-of-the-way gifts for friends who have everything." A collection of autographed records from Dixieland Hall in New Orleans—he collects them but they are for sale, too—helps pep up the trade.

HUBERT U. CAMPBELL, BS Ed., has been appointed assistant superintendent of schools in charge of business at St. Joseph, Mo., and also named secretary to the school board. He has been administrative assistant since 1957. Mr. Campbell, who joined the St. Joseph school system in 1931, is married and has a son, Jerry, a senior at M.U. The Campbells live at 3011 Summit, St. Joseph.

OTTO H. MEYER, AB '29, CE, BS Engr., 67 Junipero Serra Ave., San Rafael, Calif., recently established his own architectural engineering and building contracting firm there. He and his wife (DOROTHY BABCOCK, AB '32, AM '33) have two children: a daughter, Mrs. Charles Williams, who, with her Army captain husband and two daughters, lives in Germany, and a son, Colton, a mechanical engineer living in Fresno, Calif.

VERA W. PEALER, B&PA, is a cashier at Remington Rand in Arcadia, Calif., where she lives at 612 W. Camino Real.

32 WARD E. BARNES, AM, superintendent of the Normandy (Mo.) school district and a leader in the successful effort to establish a division of the University in that area, has been named recipient of the St. Louis Newspaper Guild's Page One Award. This award, given annually since 1948, goes to persons outside the field of journalism for exceptional community service. It consists of a scroll and a stick of newspaper type.

FRANK E. BITTNER, BS Ed., is a teacher at Montebello school at Downey, Calif., where he and his wife live at 9362 Gainford St.

HENRY C. GROSS, BS Eng., 2138 S. 61 Ave., Omaha, Neb., is a structure engineer with the AFRCE-MR (Strategic Air Command).

WILLIAM C. ECKLES, BS Agr., AM '33, is general manager of Pure Milk Products Cooperative at Fond du Lac, Wis., where he lives at 175 Hoyt St.

33 WALLACE W. BEACH, Arts, 7930 Cooper Rd., Kenosha, Wis., is general manager of the Guardian Container Co. of Kenosha.

Col. E. RUSSELL "Rusty" POWELL, BS Ed., AM, is stationed with the ROTC at the University of Nebraska. His address is PM&S Army, 4200 B. Lincoln, Neb.

FRANK ZIEBA, BS BA, is cashier at the United Bank of Farmington, Mo., and lives at 318 Boyce St.

Miss MARION E. PRICHARD, BS Ed., teaches kindergarten at Torrance, Calif. She lives at 2600 W. 225th St.

When you
think
insurance—
think 'Blue Chip'

Before you buy insurance look into the 'Blue Chip' company

that's low in net cost, too

Take two life policies. On the surface: same benefits and cost. But a closer look shows one gives you many additional values—if it's written with Connecticut Mutual. That's the finding of astute men who have analyzed and compared. For this 117-year-old institution has a record for investing most profitably. Our higher earnings come back to policyholders in higher dividends. This reduces insurance cost. Now add to low net cost the counseling services of professional insurance men, company-trained to serve you. And add to that a choice of more than 90 generous benefits and options to suit your own personal needs. It all adds up to insurance well worth looking into—CML Blue Chip insurance. Low in cost, but second to none in value.

Formerly a

*Picture of a Lady
drying clothes* **ELECTRICALLY!**

Of course you're free to watch television—when all you do is take clothes from your automatic washer, put them in the electric clothes dryer and set the dial. You'll enjoy yourself—while electricity does the work!

Clean, gentle electric heat dries clothes quickly, completely. Take them out—you'll find them cleaner, softer, more fluffy than when dried outdoors on the finest day.

And just think of all the conveniences you'll enjoy. You'll dry clothes anytime, day or night, in any weather—you'll be free forever from lifting and carrying, stooping and stretching to hang up wet, heavy clothes. See the new automatic electric clothes dryers at your dealer's today.

LIVE BETTER...Electrically

KANSAS CITY POWER & LIGHT COMPANY

Navy public relations officer, he also worked in public relations for the Southwestern Bell Telephone Co. in St. Louis. Mr. Parsons resides at 42 Upland Rd., Sharon, Mass. 02067.

2/Lt. KENNETH E. SNAVELY, AM, of Grenada, Miss., recently completed a nine-week officer orientation course at the Army Chemical Center, Fort McClellan, Ala. He is also a 1961 graduate of Missouri School of Mines and Metallurgy at Rolla.

Does the very finest always cost more?

Ninety-nine times out of a hundred, you do pay more for the finest thing in its field.

But there's one big exception. Life insurance . . . and the planning it takes. You can have the very finest agent analyze your needs and tailor your life insurance program—and it won't cost you one penny more.

You can, in fact, have the man from Mass Mutual.

Throughout the insurance field he's recognized as a pro among pros. Take, for example, one of the highest honors

in the business—membership in the Million Dollar Round Table. *Nine times* as many Mass Mutual men have qualified for it as the industry average. And *four times* as many have earned the Chartered Life Underwriter designation—the recognized symbol of professional competence.

If you're like most people, your life insurance will be your most valuable asset. Isn't it wise, then, to call in a Mass Mutual agent—and get the very finest advice? It will cost no more. In fact, in the long run it may save you money.

Miss Lois Elaine Wampler and JACK LEE SINGER, Arts, on Oct. 20, at Hale, Mo. They live on a farm west of Hale.

61

Miss LOUISE DIECKMANN, BS Ed., and Arnold Siefker, on Nov. 28, at Levasy, Mo. She teaches at the high school in Sweet Springs, Mo., and he is an accountant at General Motors Acceptance Corporation in Kansas City.

Miss Frances Mae Shirrell and DAVID L. LANEY, Engr., on Oct. 6, at Farmington, Mo. They live in St. Louis, where she is an audiologist for Dr. Harkins and he is employed at the Presstite Chemical Co.

Miss Adrienne Fox and DONALD M. KREISMAN, BS Ed., on Aug. 11, in St. Louis. He is chairman of the science department at Holman Junior High School there.

Miss Marlyn Moses and MARTY SOBEL, AB, on Sept. 16, 1962, at home at 2327 W. Farwell, Chicago, Ill. 60615.

Miss Irene Kirwin and JOHN L. BATES, Jr., Engr., on Aug. 10, at White-man AFB, where he is stationed with the Air Force. At home at 4140 Oak St., Kansas City, Mo.

62

Miss NANCY LOU HARPER, BS Ed., and Thomas Grant Fleming, on Dec. 22, in Columbia, Mo. At home at 1172 Oak Park Ave., Oak Park, Ill. She teaches in the high school at LaGrange, Ill., and he is employed in the purchasing department of Motorola Co. in Chicago.

Miss KAREN MARCUM, Educ., and CHARLIE STOCK, BS Agr. They live in California, Mo.

Miss JUDITH ANN MARSHALL, BS Ed., and John Ray Streu, on Oct. 27, in Marshall, Mo. They live at 4719 N. Highland, Kansas City North 16, Mo. She teaches in North Kansas City and he is a civil engineer with the Missouri State Highway Department.

Miss MARGARET McCLOSKEY, BS BA, and E. W. Hammons, on Nov. 16, at home at 3627 Shaw, Cincinnati 8, Ohio.

Miss Ruth Ann Tribble, University senior, and JAMES M. SHOEMAKER, BS Agr., MS '63, on Dec. 21, in Mexico, Mo. At home at 603 N. Jefferson, Mexico; he is employed by Ralston Purina Co.

Miss JUDY GAY FRALEY, Arts, and Charles J. Taylor, on Oct. 8, at Thayer, Mo. At home at 4248 Baline Ave., St. Louis, Mo. He is employed at the Railway Express Agency in St. Louis.

Miss Linda Reid Baughman, University junior, and EDWARD A. GLENN III, AB, on Oct. 1, in Columbia, Mo. They live in University Village, Columbia; he is a student in the University School of Medicine.

Miss ALICIA ELAINE LUDY, Educ., and Maxwell Lynn Close, on Sept. 14, in St. Louis, Mo. They live at Fort Belvoir, Va., where he is stationed with the Army Corps of Engineers as a second lieutenant.

Miss SANDRA KATHRYN THUR-MAN, 2-yr. Sec. Cert., and James B. Nete-meyer, on Oct. 5, at St. Marys, Mo. They live in St. Louis, where she is employed at Moritz, Inc., and he is a business analyst at the St. Louis Bank for Coop-eratives.

Miss JUDITH ANN KLEIN, BJ, and ERIC JON ENGBERG, BJ '63, on Oct. 20, in Kansas City, Mo. At home at 1307 Robert Ray Dr., Rt. 6, Columbia, Mo. She is employed on the news staff of the Columbia Daily Tribune and he is radio station KFRU news director and instructor at the M.U. School of Journalism.

Miss Kathleen Patricia Whittlesey and Eus. DEAN DAVID HENRICKS, BS Agr., were married recently in Mexico City, Mexico. He was recently awarded his naval aviation observer's wings, and is stationed at San Diego, Calif. They live in Coronado, Calif.

Miss PAT BERRY, BS Ed., and Lawrence L. Lammert, on June 15. He is an accountant for Consumers Cooperative Association and she teaches at Meadowbrook elementary school, both in North Kansas City, where they live at 301 E. 28th Ave.

Miss THEO HOMEYER, BS Ed., and FRANK PAUL FOX, BS Ed., on Aug. 10, at Ferguson, Mo. They live in St. Charles, Mo. He teaches at Hazelwood (Mo.) High School and she teaches at Ferguson (Mo.) Junior High School.

Miss Dixie Marie Moss and DAVID F. KOELLING, BS BA, on Aug. 10, at Bourbon, Mo. They live in Brentwood, Mo.

Miss Robin Elizabeth Page and KENNETH DWAIN MESERVEY, BS Agr., on Aug. 31, at Galt, Mo. They live on a farm near Trenton, Mo.

Miss HETTIE ROBINETT, M.Ed., and Samuel D. Wright, on June 30, in Springfield, Ill. At home at 211 Village Dr., Syracuse, N. Y. 13206. He is an electrical engineer with the Niagara-Mohawk Power Corporation.

Miss Patricia Ann Wessing and JOHN MATTHEW DAVIS, BS Agr., on Sept. 28, at Pilot Grove, Mo. At home at 508 LeRoy, Boonville, Mo.

63

Miss Jean Elizabeth Crawford and Lt. DONALD F. BITTNER, BS Ed., on Dec. 28, in Columbia, Mo. At home at Camp Le Jeune, N. C., where he is stationed with the Marine Corps.

Miss LINDA LOUISE BLACKMORE, BS Ed., and JOHN LOUIS BENNER, BS BA, on Dec. 28, in Trenton, Mo. At home at 10531 Lookaway Dr., St. Louis, Mo.

Miss KAREN GOTTRY, BS Ed., and Marvin H. Blakemore, University senior, on Dec. 21, in Columbia, Mo. They live at Pine Crest Trailer Court, Columbia.

Miss JEAN HARWELL, BS Ed., and Barney Bear, University student, the fall of 1963.

Miss Elizabeth Gail Elliott and STANLEY PAUL MENGEL, AB (WH), on Dec. 27, in Independence, Mo. He is a graduate student at Stanford University, on a Woodrow Wilson scholarship. They live at 733 Sutter, Palo Alto, Calif.

Miss BETTY YATES, BS Ed., and Charles Jackson, on Aug. 18. They live in St. Joseph, Mo.

Miss ELAINE MILDRED HUONKER, BS HE, and Lt. RICHARD THEN, BJ, on Oct. 5, in St. Louis, Mo. He is assigned to the staff and faculty of the U. S. Army Artillery and Missile School at Fort Sill, Okla. Their address is 107 N. Fifth St., Lawton, Okla.

Miss JUDITH ANN YOST, BS Ed., and GARY CRABTREE, BS BA '62, on Nov. 16, in Heidelberg Castle, Heidelberg, Germany. Army Lt. Crabtree is now stationed at Fort Holabird, Baltimore, Md. Their address there is 1698-E Rickenbacker Rd.

Miss Judith Nichols Vogt and HENRY SHAW, Jr., BJ, on Sept. 11, at Washington, D. C. They live in Rochester, N. Y.

Miss Donna Lee Nixon and BILL R. CROCKETT, BS Ag.E., on Oct. 26, at Auxvasse, Mo. At home at 1906 Gordon St., Columbia, Mo. She is a secretary at MFA and he is employed at the Water Pollution Board in Jefferson City, Mo.

Miss GEORGIA ANN LOWREY, AB, and RALPH MAX HUMPHREYS, AB, on Oct. 26, in Columbia, Mo. At home at 4809 Rainbow Blvd., Shawnee Mission, Kan.

Chi. Sow. Shanta Bai and Chi. M. K. SETHU RAO, MS, on Nov. 23, in Mysore, India. At home at 2807, Jayanagar, Mysore. Mr. Sethu Rao is technical assistant, Office of the Director of Agriculture, Bangalore, India.

Miss NANCY JETT, BS, BS Ed., and Carl Underwood on June 9, in Moberly, Mo. At home at 3936 Pennsylvania, Apt. 4, Kansas City, Mo. She is employed with the Spencer Chemical Co., Research Center, Merriam, Kan., and he works for the Schwenk Sheet Metal Works.

Miss NANCY JANE McMILLIN, 2 yr. Cert. Sec. Prof., and Dennis J. Sowka, on Nov. 9, in Eldon, Mo.; at home at 10171 Chestnut St., Franklin Park, Ill. He is employed with the Local Loan Co., Chicago.

Miss Carol McLure and ARTHUR H. TISCHER, LL.B., on Aug. 21; at home at 428 Brookside Apts., 601 Four Mile Dr., Arlington, Va. He is a patent examiner, Washington, D. C.

DEATHS

Prof. HERMAN FERMAIN HARRIS, Pe.P. '92, AB '94, BP '94, AM '97, on Nov. 31, 1963, at Casselberry, Fla.

MARVIN L. OREAR, Arts '02, of Kansas City, Mo., on Dec. 3, 1963, at Ottawa, Kan.; a native of Orearville, Mo., he owned the Orear Insurance Agency in Kansas City, and had been active in

banking and real estate; served three years as chairman of the Mayor's Christmas Tree fund; had been treasurer of the Kansas City Art Institute and School of Design; survivors include his wife, of 7221 Belleview Ave., Kansas City, and a son, Charles, 2800 W. 71st, Prairie Village, Kan.

Miss William (HELEN BELL MONTGOMERY) Harlan, Sr., AB '02, BS Ed. '09, in June 1963, at Farmington, Mo.

LAURA GORDON Farley (Mrs. William), Arts '01, on Dec. 4, at her home in Vero Beach, Fla.; formerly a registered nurse in Columbia, Mo.; moved to Vero Beach with her husband in the early 1920's, where they owned an orange grove; survivors include two daughters, Eileen Farley and Mrs. Raymond Sawyer, and a grandson, all of Vero Beach.

GEORGE P. NARDIN, AB '01, on Dec. 8, in Greeley, Colo.; a former resident of Columbia, Mo., he taught in several Missouri schools; before his retirement he was an editor with Houghton-Mifflin Co. of Boston, publishers, in the department of elementary education textbooks, and often wrote articles for special occasions; his wife died in 1963; survivors include three sons, George F. Jr., Littleton, Ohio, Lt. Col. John G., El Paso, Tex., and Prof. James T., Baton Rouge, La., and a sister, Miss LOUISE NARDIN, BS Ed. '07, AM '13, Ph.D. '14, of 1313 Cowan Dr., Columbia, Mo.

ELMER G. PARSONS, AB '08, AM '12, in December 1961, at Harrisonville, Mo.

La FAYETTE LILLARD, BS Agr. '08, on May 15, 1962; survived by his wife, of 6215 S. Grant, Littleton, Colo.

Miss VIOLA MAE CORWIN, AB '10, on Sept. 7, 1960, at Maryville, Mo.

LOUIS J. PORTNER, AB '10, on Jan. 3, in St. Louis, Mo.; a practicing attorney in St. Louis for more than 50 years; active in state and city bar association activities; headed the ethics and grievance committees of the St. Louis Bar Association; at one time taught business law at St. Louis University; survivors include his wife, of 1090 Springwood Dr., Clayton 21, Mo., and a daughter.

Dr. SAMUEL A. FUQUA, Sr., Arts, Med. '15, on June 3, 1963, at La Habra, Calif.

MARGARET SPRINGE Metz (Mrs. John Irving), Arts '16, on Sept. 24, 1959, at University City, Mo.

CHARLES C. HOKE, AB '16, BS Eng. '17, on May 3, 1963, at Clayton, Mo.; survived by his wife, of 7411 York Dr., Clayton 5, Mo.

ELIZABETH FOMBELLE Crain, BS Ed. '18, in 1960; survived by her husband, R. G. Crain, RFD 1, Holliday, Mo.

MILLARD C. BAHR, BS Agr. '21, on July 13, 1963, at Springfield, Mo.

FRED C. RICHMOND, BS Agr. '24, on Oct. 2, 1959, at Doniphan, Mo.

GERTRUDE MINNICK Cope (Mrs. John R.), BS Ed. '25, AM '26, on Sept. 23, 1962, at Columbia, Mo.

SAMUEL R. THOMPSON, BS Agr. '25, a florist at Quincy, Ill., died there on Dec. 1, 1963.

SUTTON E. CHRISTIAN, Journ. '26, on Nov. 22, 1963, at Hampton, Va.; former San Francisco bay area publisher; also former editor-in-chief of the Shanghai, China, Press; later he was managing editor of the Santa Cruz (Calif.) Sentinel and published a newspaper at Mountain View, Calif.

MILLARD LEWIS COPE, BJ '27, on Jan. 4, at his home in San Angelo, Tex.; publisher of the San Angelo Standard-Times and a director of the Associated Press; widely known in Texas and national newspaper circles, he was also president of the Southern Newspaper Publishers Association; named last year by President Kennedy to the National Advisory Council for the Peace Corps; a top official of the Harte-Hanks newspaper group of Texas; he had been with the group 35 years; survived by his wife, of San Angelo; a son, Millard, Jr., of the San Antonio Express and News; a daughter, Mrs. Ray Bailey of Austin; and his father, J. A. Cope, a retired real estate man of San Angelo.

A. L. LUTHER, LL.B. '28, on April 30, 1963; survived by his wife, of #1 Hudson, Memphis, Mo.

EDWIN D. MYERS, Sr., AM '29, on Dec. 11, in St. Louis, Mo.; art and music teacher at Webster Groves (Mo.) High School for 30 years; directed for 28 years the summer drum and bugle corps activities at Culver Military Academy, Culver, Ind.; surviving are his wife and son, Edwin D. Jr., both of 1520 Grant Rd., Webster Groves.

IVA PULSIFER ADAMS, AM '29, on Oct. 8, 1963, at Albany, Mo.; survived by her husband, EDGAR RAY ADAMS, AM '29, who has moved to Kansas City to make his home with a daughter.

Mrs. ADA WALLACE Sibson, BS Ed. '29, on April 25, 1959, in Rosenberg, Tex.

Dr. L. O. LITTLE, AM '30, D.Ed. '43, on Jan. 7, at Quincy, Ill.; superintendent of Quincy schools, and past president of the Illinois Association of School Administrators; went to Quincy in 1949, after heading school systems in North Kansas City, Neosho and Bolivar, all in Missouri; active in developing courses of study for gifted and for retarded children; survivors include his wife, of 721 Kenwood Ave., Quincy, two brothers and a sister.

CECIL RHODES, BS BA '30, on Oct. 12, 1963; survived by his wife, of 4623 Maury Rd., Jackson, Miss.

MARY ELEANOR PUTSCH Williams (Mrs. Eddie W.), Educ. '31, on Dec. 3, 1963, in an automobile accident in Kansas City, Mo.; active in many civic and social activities; supported the American Royal livestock auction and assisted her husband as a crew member at sail boat races throughout the nation; had been hostess to meetings in Kansas City of the International Snipe Club; survived by her husband, president of the Williams Meat Co., and twin daughters, Mary Eleanor and Marie Elynn, all of the home at Lake Lotawana, Mo., and a brother, JUSTUS W. PUTSCH, BS Ed. '29, 805 W. Meyer Blvd., Kansas City.

Mrs. James E. (MAXINE ELLIOTT) Shepherd, BS Ed. '31, of Concord, Mass., died in June 1962.

HAROLD L. ELFENBEIN, BJ '32, 211 Paul Court, Hillsdale, N. J., died in June 1963.

Dr. HAL ELSON FREEMAN, BS Ed. '28, BS Med. '32, on July 13, 1963, in Springfield, Mo.

MABEL McCOY Goldsberry (Mrs. H. V.), AM '32, died in 1961, at Armstrong, Mo.

The *Alumnus* has received word of the deaths in San Angelo, Tex., of MILDRED BILLINGTON ABBOTT, BS HE '31, on April 20, 1961, and her husband, EUGENE F. ABBOTT, Jr., AM '33, on June 10, 1962.

BERTHA MAY SPAUGH, BS Ed. '33, died in January 1963, at Farmington, Mo.

RAY VAN BLOMFIELD, AM '34, on Nov. 26, 1963, in St. Joseph, Mo.; for 18 years assistant superintendent of St. Joseph public schools in charge of business; taught in North Carolina before going to St. Joseph in 1929, where he served as teacher and assistant coach at Central High School and as coach at the Junior College; he also had been principal of several junior high schools there; he was associated with many civic undertakings and a member of numerous civic clubs and organizations; survived by his wife, of the Century Apts., St. Joseph.

OLIVER L. LINCK, LL.B. '35, of Los Angeles, Calif., died on March 28, 1963.

HARRY C. CHAMBERLAIN, AM '37, of Joplin, Mo., died on Sept. 15, 1963.

SUSAN PASLEY Tobey (Mrs. David S.), BJ '37, on Dec. 14, 1963, at her home in Phoenix, Ariz.; elected to membership in Theta Sigma Phi (journalism sorority) at M. U.; served overseas with the Red

Cross during World War II; survived by her husband, of 4901 E. Brill St., Phoenix 8, a brother, JAMES L. PASLEY, Arts '41, and her mother, Mrs. J. O. (SUSAN LEE) Pasley, AB '12, both of 111 Cornelia, St. Louis 22, Mo.

ILA HARDY Roman (Mrs. William F.), BS Ed. '39, on June 8, 1962, in Washington, D. C.

Maj. JOHN R. PEACOCK, Engr. '41, on Jan. 1, in Denver, Colo.; a former Air Force Officer who flew doctors and serum into the jungles of Costa Rica, Panama and Nicaragua to help control an outbreak of yellow fever among natives; retired from the Air Force last Nov. 30; in 1951 the government of Costa Rica named a gold medal in his honor, and in 1962 the Brazilian government honored him for evacuating survivors of an airplane crash from the jungles; survivors include his wife, the former RUTH CHAMBLISS, Arts '32, and seven children, all of the home at 1310 Oneida, Denver.

KARL E. AKARS, M.Ed., '49, on Dec. 19, at Kingsville, Mo.; superintendent of schools there the last four years; earlier he taught in several school systems in Northwest Missouri; member of the Missouri Teachers and Johnson County Teachers associations; survived by his wife, of Kingsville, an adopted daughter, Mrs. Dale Odum of Centerview, Mo., three grandsons, and a brother, MELVIN AKARS, BS Ed. '29, BS Agr. '32, of Holt's Summit, Mo.

OLON T. GEE, Jr., BS Agr. '49, on Dec. 18, in a Sikeston (Mo.) hospital; manager of the E. B. Gee Cotton & Grain Co. at Marston, Mo. since 1950; fourth vice-president of the Missouri Cotton Producers Association, chairman of the New Madrid County Weed Control Board, and assistant chairman of the Board of supervisors of the County Soil Conservation Service; prominent New Madrid County farmer; survivors include his wife and four children, all of the home on Rt. 1, Lilbourn, Mo., two sisters and three brothers. A sister, Mrs. John R. (CHARLOTTE GEE) Adams of Sikeston, Mo., was in the education school at M. U. in 1939; a brother, DONALD M. GEE, Greenville, Ill., earned a BS in Agriculture in 1945.

DURWARD ALLEN SCOTT, Engr. '57, was killed on Jan. 3, in an automobile accident seven miles south of Warsaw, Mo.; an employee of the Warsaw Post Office; survived by his parents, Mr. and Mrs. Durward Scott, Fristoe, Mo., and two sisters.

Dr. ROBERT L. GOLDEN, BS Agr. '61, DVM '61, was killed Dec. 21, 1963, in a motor car accident near Jefferson City, Mo.; a veterinarian in St. Louis, Mo., he formerly lived in Kansas City; surviving are his parents, Mr. and Mrs. William Golden, 4326 Forest, Kansas City, Mo., three brothers and three sisters.

Students to pay increased fees next fall

President Elmer Ellis of the University has announced approval by the Board of Curators of an increase of \$15 per semester in the University's incidental fee for the regular (fall and winter) semesters, effective with the 1964-65 fall semester. The incidental fee is now \$100, and will be increased to \$115.

The fee will apply to the University's Columbia campus, the University School of Mines and Metallurgy at Rolla, and to the University of Missouri St. Louis Campus. It will apply to the University of Missouri at Kansas City in the fall of 1965.

Also effective with the 1964-65 fall semester is an increase of \$25, to a total of \$175, in the non-resident (out-of-state student) tuition for the regular semesters.

The Board, in another action, has approved an increase in the Student Union fees from the present \$7.50 per semester for the regular (fall and winter) semesters to a total of \$10, effective with the 1964-65 fall semester. All students are required to pay the Student Union fee along with the incidental fee, making the total fee \$125 for a regular semester effective next fall for the full-time resident student.

Under the University's new fee schedule the full-time resident student will pay incidental and Student Union fees of \$250 a year (two semesters) where the total has been \$215. The total incidental, tuition and Student Union fees for non-residents of Missouri will increase from \$515 a year to \$600.

Dr. Ellis said the increase in the incidental fees has been made necessary by the increased costs of instruction, plant operation, and the many services which the University renders to students. He pointed out that among the Big 8 and Big 10 universities only two have fees for state residents lower than has the University of Missouri, and that even with the increase this University will be among the five lowest in fees among Big 8 and Big 10 institutions, for residents of the state.

"The Legislature appropriated more money to the University for the next two years than it did for the previous biennium, and the University is deeply grateful for the increased resources and the friendly attitude of the General Assembly," Dr. Ellis said. "However, the state has many needs, in addition to those of higher education, and the appropriations had to be pared to fall within anticipated revenues. The General Assembly therefore was not able to provide the University with all the funds necessary to meet the needs.

"The University thus is faced with the problem of raising additional revenues necessary to continue the proper scope and quality of services to an enrollment which is increasing rapidly, particularly at the more expensive upperclass, professional, and graduate levels, and to render the educational and research services that Missouri must have from its University in order to maintain and improve the State's cultural and economic status. Therefore the University must

pass on to its students a little greater responsibility in meeting the cost of instruction. This increase will assist in the accommodation of more students and will help to avoid a need for restriction of enrollment."

The Curators Scholarships and Curators Awards, each of which is equivalent to the incidental fee for two semesters, will be increased to cover the higher incidental fee.

In addition, the Curators Awards program has been broadened in scope to include those in the upper third scholastically in their graduating class and on the Statewide Testing Program, where financial need exists. In the past such financial help has been limited to those students in the upper fifth scholastically and in the testing program.

In an announcement of the establishment of the new Curators Awards sent to high school counselors, the Committee on Curators Scholarships reports:

"Studies have shown that there is little scholarship aid available to students ranking between the 66th percentile and 80th percentile of the graduation classes and on the Statewide Testing Program. Therefore, Curators grants-in-aid have been established to cover the incidental fees for one year of a number of students at Columbia, Rolla, or St. Louis," where the student can establish need for such assistance.

The new schedule of incidental fees for residents of Missouri set up by the Board of Curators effective with the 1964-65 fall semester is as follows:

For one semester of 18 weeks (10 or more hours), \$115; for one term of 12 weeks (7 or more hours) \$80.50; for one term of eight weeks (5 or more hours) \$57.50; for any other sessions not specified above and for partial enrollments, for each credit hour or fraction thereof, \$11.50.

Non-resident tuition will be:

For one semester of 18 weeks, \$175; for one term of 12 weeks, \$122.50; for one term of eight weeks, \$87.50 and for other sessions per credit hour or part of one, \$17.50. Student Union fees are used for retiring outstanding bonds on the Student Union buildings and for the Student Union activities program.

A Business and Professional Women's Seminar will be held March 7 at the University. The sessions, for business and professional women of the State, will be held in the Memorial Student Union Auditorium. Speakers featured at the one-day session will include Miss Virginja R. Allan, Wyandotte, Mich., president of the National Federation of Business and Professional Women's Clubs, Inc., whose topic will be "Women and Management, the Changing Role;" Dr. Charles B. Ratchford, dean of the University Extension Division, and Dr. Raymond W. Lansford, assistant dean of the School of Business and Public Administration.

Ellis heads big association

President Elmer Ellis of the University is the new president of the Association of State Universities and Land-Grant Colleges. His election was announced November 13 at the 77th annual land-grant meeting in Chicago. At that time the merger of two other national organizations with the land-grant group was formalized. The other groups were the National Association of State Universities and the State Universities Association.

In commenting on the consolidation of the three college and university organizations, President Ellis said: "It unites 98 colleges and universities supported, at least in part, by state funds into a single organization of institutions which conduct a large share of the research carried on in this country as well as the training of graduate students for college teaching and for research. This should make the work of the organization far more effective than it was in the past when organized into three different, even though overlapping, organizations." He called the merger "an important trend in organization in higher education."

As president of the Association, Dr. Ellis succeeds Novice G. Fawcett, president of Ohio State University. The land-grant meeting also gave recognition to Dean C. Bryce Ratchford of the University Extension Division. The Association's Division of Agriculture elected him chairman of the Extension Committee on Organization and Policy, and the Division of General Extension named him a member of the Committee on Relations With Other Educational Agencies.

Mid-America Assembly here

The University will co-sponsor a Mid-America Assembly from February 13 through February 16. President Elmer Ellis has announced. The topic will be "The Population Dilemma."

This will be the third such assembly held on the campus. In 1958 the topic was "Atoms for Power," and in 1961 it was "The Office of the Secretary of State." The Mid-America Assembly at M. U. will be one of ten regional assemblies on "The Population Dilemma." Purpose of the assemblies is to get a national consensus on important questions of public policy.

At the University, a symposium on United States and world population problems will have as participants approximately 70 prominent leaders in demography, public health, government, business, agriculture, labor, religion, and the professions. Discussion will be in Memorial Student Union.

The Assemblies are co-sponsored by the American Assembly of Columbia University, New York, and are supported by a grant from the American Assembly. The American Assembly was founded by former President Dwight D. Eisenhower in 1950 as a national, non-partisan educational organization which pub-

lishes studies and holds conferences on important topics of the day.

Participation in the Assembly will be by invitation only. Selection of participants will be made on the basis of regional prominence as well as professional competence, according to Dr. Robert L. McNamara. He is chairman of the department of rural sociology and the department of sociology and anthropology, and is the director of the Assembly at the University. President Ellis will act as general chairman of the Assembly.

Mrs. Bert Smith writes book

"No Language But a Cry" is the title of a new book by Mrs. Bert Kruger Smith, B.J. '36, to be published next year by the Beacon Press.

A mental health specialist for the University of Texas' Hogg Foundation for Mental Health in Austin, Mrs. Smith has just sent off the last chapter of the book and signed a contract for its publication.

Writing is not new to Bert Smith. During her junior year at M.U., she won the Mahan Essay Contest and a year later was named winner of the Atlantic Monthly Essay contest.

For nearly a decade, Mrs. Smith has worked with the Junior League of Austin, writing pamphlets and helping produce a film, all on the subject of mental health. It was her pamphlet, "Children of the Evening," that prompted the editor of the Beacon Press to write her that any time she was ready to write a book on any phase of mental health, he was ready to publish it.

"No Language But a Cry" is about emotionally disturbed children, what is being done for them and what can be done for them. Mrs. Smith has tried to break the problem down into solvable parts: she identifies the emotionally disturbed child, explains services for him and how a parent would decide what would be best for his child, and then tells what a community's responsibility is.

"In this book I am speaking for those who cannot speak for themselves," she says. "It's personally gratifying to give them a voice." Although she hasn't talked with the publisher about this yet, Mrs. Smith plans to dedicate the book to the Smiths' son, Jerry, who died of polio.

Mrs. Smith, her realtor husband Sidney S. Smith, B.J. '32, and their daughter live at 2404 Sonora Courts, Austin, Texas.

Senator Thruston B. Morton of Kentucky and Representative Thomas B. Curtis of Missouri will headline the Mock Political Convention to be held on the campus Feb. 20-22 by University students. Major activity of the year for the Missouri Students Association, the convention will duplicate as nearly as possible an actual national convention. More than a thousand students are expected to take part in the convention, which is open to the public.

Development Council, new official agency for gifts

A new official University of Missouri agency to receive and coordinate all gifts to the University has been authorized by the Board of Curators. President Elmer Ellis said the organization will be known as the University of Missouri Development Council and will have a 25-member Board of Trustees. The Council will ultimately have a large membership.

President Ellis was authorized by the Curators to establish the Development Council as a central University agency in matters concerned with gifts to the University from individuals or from organizations. As in the past, donors may continue to designate their gifts for special purposes.

The Council will not be involved with grants, which are in a separate category from gifts. Its purpose will be to coordinate all activities concerned with raising funds for the University other than grants and the regular operating and capital improvement funds.

Guy (Bus) H. Entsminger, Director of University Development and Alumni Activities, said creation of the Council will mean an improvement in a number of services essential to an extensive gifts program. One of these improvements, he said, will be the greater attention that can be given to individual donors as to their plans and wishes in regard to University

support. The number of such donors has been increasing steadily each year, he said, and with the fund raising activities of all University-connected groups coming under the coordinating functions of the Council, he foresees "greater efficiency and effectiveness in servicing the individual donors."

The Council will include five members by virtue of their offices in connection with the University. They are President Ellis; Mr. Entsminger; R. H. Bezoni, University Comptroller; James A. Finch, Jr., Cape Girardeau, President of the Board of Curators; and Bradford Brett, Mexico, Mo., President of the University Alumni Association. The five automatically become members of the Board of Trustees. Of the 20 additional members of the Board of Trustees, ten will be selected by the president of the Alumni Association, and ten by the president of the Board of Curators.

The appointed trustees will normally serve for four years, but those on the first Board will be named to varying terms to prevent all terms expiring at the same time. The Board of Trustees will make the rules and regulations for the Council, subject to approval by the Board of Curators.

Jones retires—but not quite

For the last 44 years, Ray D. Jones has headed the farm department of the J. C. Nichols Company of Kansas City. He has bought and sold farm and ranch properties valued in the millions of dollars—yet has never owned a farm himself.

"The ownership of a farm or ranch takes a lot of personal time and attention, and frankly, I've never had the time to do this," comments the 72-year-old native Missourian.

Now he is retiring—but not really. Upon leaving his duties at Nichols, he started real estate operations through his own company—the recently formed Ray D. Jones Real Estate Company with offices in Kansas City's Colonial-Belleview Building, 4434 Belleview Avenue. The building is owned, incidentally, by his son, Ray D. Jones, Jr., B.S. in Business Administration '47, and LL.B. '49, a lawyer and investor.

This is Mr. Jones' third major business venture. Born on a farm near Novelty, Missouri, he earned his B.S. in Agriculture at the University in 1914. He then became a partner in and manager of a large stock farm near Stanley, Kansas. After five successful years of operation, the farm was sold and a handsome profit was achieved. In 1920, he and the late J. C. Nichols created a farm brokerage department, which continues to this day.

Mr. Jones has acquired a wide reputation for his knowledge of agriculture, and farm operation, prices and trends. He holds brokerage licenses in Missouri, Kansas and Colorado, and has participated in negotia-

tions in most of the Middlewestern and Western states, not to mention one deal in Canada.

He is married to the former Lillian Clay, who attended the University the summer of 1912. In addition to their son Ray Jr., they have a daughter, Mrs. Helen Jones Lea, a former student at M.U. in 1952, 5021 Sunset Drive, Kansas City. The elder Jones' live at 2720 West 69th Street, Shawnee Mission, Kansas.

Three Turk brothers go far

Three University graduates, the Turk brothers, all have A.M. and Ph.D. degrees and each has a worldwide reputation for his work and writings.

Dr. Laurel Turk, head of the Romance Language Department at DePauw University, Greencastle, Indiana, earned his A.B. degree at M.U. in 1924. He has authored sixteen books and has headed the Hispania Society since its inception.

Dr. Kenneth Turk received his B.S. in Agriculture in 1930. He is Director of International Agricultural Development for the Rockefeller Foundation and is past head of the Department of Animal Husbandry at Cornell University, Ithaca, New York.

Dr. Lloyd Turk is assistant dean at Michigan State University. He is the author of a book on soil chemistry, already translated into many languages. His three academic degrees are all from M. U.—B.S. in Agriculture, 1928; A.M., 1929; and Ph.D., 1931.

The three brothers were born in Mount Vernon, Missouri.

Dr. John Harty sees the culmination of a dream

Dr. John Harty saw the culmination of a dream while attending the National Science Fair-International in Albuquerque, New Mexico, last summer.

Dr. Harty, director of the first six New Mexico State Science Fairs before retiring to San Clemente, California, in 1958, started campaigning back in 1954 to bring the National Science Fair to Albuquerque.

A professor emeritus of physics at New Mexico Institute of Mining and Technology at Socorro, he now lives at 123 West Avenue, Cadiz, California. He writes a weekly column, "I've Been Thinking," for the Sun-Post and is considered the paper's science editor.

Dr. Harty is called "a pioneer" in making special efforts to stimulate the interest of youth in science promotion programs in New Mexico and was honored this year at the National Science Fair.

Realizing the dire need for more scientists in the nation, Dr. Harty in 1952—five years before the first Sputnik—started orbiting about New Mexico as a one-man signal, urging the youth of the state to become interested in careers in the science world.

The six-foot, three-inch physics professor became a science teacher-at-large. Working in cooperation with science and mathematics teachers and school officials throughout New Mexico, Dr. Harty went directly into classrooms and laboratories in the state's schools. There, he performed thought-provoking science experiments, taught science classes, led discussions in math and lectured on "Things Worth Striving For."

He urged students to enter projects in National Science Talent Search and helped them locate scientific equipment for their studies. He and his wife even offered cash prizes to winners of the NSTS.

Dr. Harty, in 1955, served as president of the New Mexico Academy of Science, which holds sessions each fall in conjunction with the New Mexico Education Association convention in Albuquerque and each spring in Socorro in conjunction with the State Science Fair.

Dr. Harty was instrumental in getting the State Board of Education to increase science subject matter requirements for science teachers in the state in order to gain teacher certificates; he also urged state colleges to add more science courses during the summer sessions. Dr. Harty says that "too often—in the past—our teachers have gone back to college during the summer and taken additional professional education courses when courses in subjects they teach might have done them more good." These steps forward are encouraging to a man who has spent more than 40 years in science education. "But much work lies ahead," he said.

On his retirement from NMIMT, Dr. Harty and his wife, Bess, were acclaimed "Mr. and Mrs. Science Fair." She accompanied him on his trips around the

state and assisted him with science promotion programs by giving demonstrations in biology classes and staying after school to meet with science clubs.

A native of Missouri, Dr. Harty holds a B.S. degree from Southeast Missouri State College, where he once served on the faculty, and his A.M. and Ph.D. degrees from the University. He joined the NMIMT staff in 1946 after teaching at St. Louis University. Earlier he taught physics at Northeast Missouri State College, Kirksville, in addition to SMSC at Cape Girardeau. He is co-author of a textbook on solving problems in physics.

"His pioneering work as a teacher-at-large and his promoting of local science fairs and the State Science Fair are a crowning accomplishment of a long and useful career," said Dr. William Hume, special assistant to the president at NMIMT. "His influence in New Mexico will be felt for years to come."

Dr. Harty's niece, Mildred S. Bradsher, is a Food and Nutrition Specialist and assistant professor of Home Economics at the University.

Wright begins new duties

Jackson A. Wright assumed his duties as assistant counsel of the University on January 1. Mr. Wright, who has been practicing law in Mexico, Mo., since 1944, has been associated with the firm of Edwards, Wright and Seigfreid. In his new capacity he serves as first assistant to Paul M. Peterson, general counsel of the University.

Mr. Wright has been active in the Missouri Bar and American Bar Associations. He was president of the Missouri Bar Association in 1961-62, and is president-elect of the American Counsel Association. After attending Northwest Missouri State College he came to the University where he received his B.S. in Business Administration in 1940 and an LL.B. degree in 1944. Mrs. Wright, the former Edith Dailey, received A.B. and LL.B. degrees from the University. They have three children. The family plans to move to Columbia after the close of the school year.

To Western Electric helm

Paul A. Gorman has been elected president of the Western Electric Company. At the time of his election, he was executive vice-president of American Telephone and Telegraph Company, a position he had held since 1959. He came to that post from the presidency of New Jersey Bell Telephone Company. Prior to that, Mr. Gorman had been with Western Electric except for a period as assistant vice-president, personnel, at AT&T. He joined Western Electric as an accounting clerk in 1929, upon graduation from the University with a B.S. in B.A. degree, and became a Western Electric vice-president in 1954.

Supreme Law

from page 3

Bill of Rights that are relatively free of complication, we can readily understand that the range of real or even potential disagreement must be limited as to whether a particular defendant received a "speedy and public trial." Or, for probably an even better example, from the same Sixth Amendment, no one can present much of an argument about whether a particular defendant was or was not tried in the "district wherein the crime shall have been committed," or whether or not he was in fact "confronted with the witnesses against him."

No one can really argue very long or very loud about whether or not a particular defendant was so tried. He either was, or he wasn't. If the method of determining the facts was fair, most people would say that justice was done.

But let us look a moment at the First Amendment. What is the "establishment of religion"? What is an "abridgement" of the "freedom of speech, or of the press"? The initial reaction to and the vast amount of preliminary uninformed comment that followed particular recent Supreme Court decisions involving these First Amendment questions that were necessarily ruled in the public school prayer decisions and in the obscenity cases illustrates how violent can be the disagreement that is aroused by a specific application of one of the broad historical concepts incorporated into the First Amendment.

Much the same thing must be said about the Fourth Amendment's right to be secure "against unreasonable searches and seizures." Have you not overheard conversations that include the following: "Are you for or against wire tapping? If against—do you also oppose Mother, Home, and J. Edgar Hoover? Oh, so you are really in favor of Crime? What are you afraid of then? Are you afraid that someone will find out whether you have quit beating your wife? So much for but one of the problems involved in the application of the Fourth Amendment.

There also seems to be a quite large area of apparent misunderstanding about whether the Fifth Amendment to the Constitution or whether some of the present members of the Supreme Court appointed by President Eisenhower, particularly the Chief Justice, established as a part of the Supreme Law of the Land the principle that "no person . . . shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property without due process of law."

Apart from the quite technical problem of what is meant by the language "in a criminal case," is it not apparent that what one person may think is "due process of law" might not find ready acceptance by many of his fellow citizens?

Without discussion of the Eighth Amendment's prohibition against "excessive" bail or even mentioning other relative standards of expression that may be cited in the Bill of Rights and other parts of the

Constitution, is it not also clear that the Founding Fathers did not bequeath to us an instrument that is easy to apply or to administer?

HOW THEN HAVE AMERICANS BEEN ABLE TO MAKE IT WORK? What has been our secret? What "customs" have been added to our Constitution, to our laws, and to our courts that have supplied the mortar that has held the stones together? What have we learned, often by the hardest of ways, are the consequences of any radical departure from our "experience," from our "habits," and from our "opinions," to use de Tocqueville's full definition of the word "customs"?

And finally, must not each of us personally, inquire whether any duty rests upon each of us to join, as Thomas Jefferson once urged George Wythe to join "a crusade against ignorance" so that there may be a general "diffusion of knowledge among the people" in regard to the difficulties that are inherent in the determination of and in the operation of the Supreme Law of the Land.

Mr. Jefferson said that he believed that only widely diffused liberal education could afford a "sure foundation . . . for the preservation of freedom and happiness." Is Mr. Jefferson's conviction valid today? And if it is, what sort of a job are we doing to make that dream come true?

We must, I think, seek our answers by a critical examination of the principles that the Founding Fathers assumed would be accepted and acted upon by the governed as they wrote our Constitution and as they provided for courts to administer the laws written for the then new United States of America.

The first principle that those Americans accepted was the quite new, but quite fundamental, idea that the vote of a majority shall establish policy until another majority votes to change it. The vote, of course, was to be a vote by representatives of the people. It was not at all contemplated that there would be a national referendum on anything except the election of the representatives to whom the duty and responsibility of deciding was delegated. And it was contemplated that those representatives would vote so that questions would be decided.

As we reflect upon it, it is clear that the leaving of matters of importance to a vote of representatives was indeed a risky business unless those represented were whole-heartedly in accord with the idea that no better system exists under which decisions may be made.

Certainly the fact that 51 people out of 100 vote "yes" on any particular proposition is not very convincing evidence to the 49 that voted "no" that they were actually wrong when they voted "no." And are we not familiar with the fact that in many countries, a 51-49 vote, whether it is a vote for a representative of the people or whether it is a vote by elected representatives, would not be accepted, even temporarily? In this country, however, apart from a few elections that are contested in a court, Americans

Supreme Law

have a truly remarkable historical record of accepting the results of close votes and close elections.

How has this come about? Upon what does it truly rest?

I think de Tocqueville's analysis is still the best expression with which I am familiar. He suggested that "in America the citizens who form the minority associate together in order, first, to show their numerical strength and so to diminish the moral power of the majority; and, secondly, to stimulate competition and thus to discover those arguments that are most fitted to act upon the majority; for they always entertain hopes of drawing over the majority to their own side, and then controlling the supreme power in their name."

Would any American familiar with our history and the best of our "customs" dream that a 51-49 vote was a signal for revolution? Certainly not.

The American tradition confirms that practically all of the 49 who voted "no" would believe in their very hearts that each was in sole possession of at least three, if not more, arguments that were capable of converting at least two of the "yes" votes into the "no" column—thus changing the vote from a 51 to 49 vote, to a 49 to 51 vote in favor of the former minority position.

The phenomena of this acceptance of the political method of counting noses was so unusual in the world of de Tocqueville's time that he felt compelled to comment on it in detail.

He first pointed out that: "Our [*i.e.*, French] inexperience with liberty leads us to regard the liberty of association only as a right to attack the government." De Tocqueville contrasted the basic differences between the purposes of political association in America and those then existing in early 19th Century Europe.

In regard to the purposes of such associations in Europe, he suggested that "the principal aim of these [European] associations is to act and not to debate; to fight rather than to convince," which meant to de Tocqueville that Europeans were "naturally led to adopt an organization which is not civic and peaceable, but partakes of the habits and maxims of military life." He continued that "they also centralize the direction of their forces as much as possible and entrust the power of the whole party to a small number of leaders."

De Tocqueville was describing a 19th Century European association and not any particular modern organization in the United States that might advertise itself as being the sole possessor of 100% Americanism when he added that "the members of those associations respond to a watchword, like soldiers on duty . . . they at once abjure the exercise of their own judgment and free will, and the tyrannical control that these societies exercise is far more insupportable than the authority possessed over society by the government which they attack."

WHEN OUR COMMUNITY, OR OUR STATE, OR OUR NATION gives approval by its silence to the aims and practices of such associations, then our community, our state, and our nation is in real danger. When we excuse our silence by rationalizing our failure to speak out we must pay the price of an abandonment of the first great unwritten custom that makes our system work. Our silence must mean that we are willing to say that it is not our business that the preachments of hate of well financed political organizations that are not willing to debate in order to convince is not a basic threat to our very existence as an open society. It must mean that we are content to let tyrannically organized minorities force action, to advocate violence, and to attempt to control the very policies of our government without ever bothering to have their dictated policies put to the traditionally accepted test of a majority vote. So much for the principle of majority rule.

The second established principle that underlies our system, I suggest, has a more complicated history than the principle that accepts majority rule. As background, let us remember that one of the questions left open by the Constitutional Convention of 1787 was the question of who was to have the final say as to what the Constitution means. How and who was to definitively and finally decide all the knotty questions concerning what is meant by "interstate commerce," by "due process of law," and all of the other questions of relative degree of which we took note a moment ago?

I need not detail the technical history of the development of the doctrine of judicial supremacy as first announced by Chief Justice John Marshall, nor of its earlier acceptance as a principle that has guided us for most of our national life. I think, in spite of the vast range of scholarship that has been devoted to the growth of the doctrine of judicial supremacy, that the best explanation for the practical political necessity of accepting the idea that the Constitution is what the Supreme Court says it is, was that expressed by Jefferson before he began his lifelong fight with John Marshall.

On May 29, 1792, Jefferson, in his letter to George Hammond, recognized that the Supreme Court must serve "as the last means of correcting the errors of others, and whose decrees are, therefore, subject to no further revisal." This, Mr. Jefferson suggested, was "one of those inconveniences flowing from the imperfections of our faculties, to which every society must submit; because there must be somewhere a last resort, wherein contestations may end."

Fortunately for us, most Americans, throughout most of our history, have recognized and acted upon the principle that the Supreme Court is the "last resort, wherein contestations must end." That acceptance has meant that the Supreme Law of the Land has been a political fact rather than a fancy. But it is important that we understand that just as the rejection of the principle of majority rule, the rejection of the principle that accepts the finality of a decision of the Supreme Court leaves only anarchy as an alter-

native. In the latter instance, it is clear that any profession that we may make that we are governed by law rather than by men becomes a hollow mockery. We delude ourselves if we do not recognize that we face another of a long series of constitutional crises today. The toleration of shrill cries that the Chief Justice should be impeached are but symptomatic of a more fundamental unrest.

WHAT I HAVE HAD TO SAY THUS FAR WAS in draft form before tragedy again struck our Nation on November 22, 1963, in Dallas. I had also prepared in outline form a section that would discuss in some detail the 13th, 14th and 15th Amendments to our Constitution adopted after the Civil War. In those amendments slavery was abolished, all citizens, regardless of race, color, or previous condition of servitude, were guaranteed the privileges and immunities of all other citizens and their right to vote was constitutionally recognized. I am confident that all of us have reflected fully on the problems posed by those amendments in the days that have followed the death of President Kennedy.

It is sufficient that we recognize that our failure to solve what Myrdal, twenty years ago, called our American Dilemma, has created another constitutional crisis that poses once again the basic question of whether we as a people intend to support or to reject the Constitution of the United States as the Supreme Law of the Land. The violence of Little Rock, of Oxford, of Birmingham, and the attitudes and opinions expressed in almost any town or city in which we live—North, South, East or West force recognition that the problems of liberty and freedom for all Americans must be faced; that the pattern of postponement is no longer viable in the world in which we live.

In the last sentence of the draft that was written before the assassination, I wrote that "our failure to recognize that this is the basic question in this most recent of our long series of constitutional crises can lead only to unforeseen but wholly predictable consequences."

By that sentence I wanted to bring home a brooding sense of the potential disaster that I have felt for some time as I have looked across our land and have seen the rampant growth of a type of thought and of organization that de Tocqueville saw, not in America, but in the Europe of his day; the type of thought and organization that seeks not to debate but to act; the type dedicated to fight rather than to convince; the type that views the precious liberty of association only as a right to attack all government by any means, fair or foul; and the type that centralizes the direction of their forces in unelected leaders who are followed like soldiers on duty and who demand and receive tyrannical response to their uncomplicated watchwords.

Such a pattern seemed to me to reject the basic principles upon which the operation of our constitution, and courts, and our laws, in the final analysis, depend.

I am not at all satisfied that what I have tried to say carries with it the power of conviction and the sense of urgency that I believe is involved.

Particularly after Dallas, are we not forced to ask ourselves, as a people, when and where did we somehow begin to act, or, by our silence, to tolerate the idea that liberty under law can somehow be preserved by constitutions and by courts alone.

Must we not also ask ourselves whether we have lost sight of what Mr. Jefferson called an essential principle of government in his great First Inaugural? He insisted that our system would not work unless there was a full "diffusion of information, and the arraignment of all abuses at the bar of public reason."

How well have those of us who profess to believe in equal and exact justice and the principle of majority rule discharged our duty of diffusion of information so that all abuses of our paradoxically tough yet delicate system be arraigned at the bar of public reason?

How effectively have students and graduates of our School of Journalism, for example, learned that they must report and must explain to all the people how the pattern of current attacks upon the Supreme Court fits in the perspective of the history of similar fanatical attacks on that court and on the Constitution from John Marshall's time to our own?

Have our lawyers and our judges, students and products of our Law School, all of whom bear a specialized duty in regard to teaching the public concerning matters of our Constitution and our laws, made clear that the Constitution is what the Supreme Court of the United States says it is and that there is no practical alternative to an acceptance of that doctrine except anarchy?

Do the students and graduates of the College of the Arts and Science truly learn the necessity for the maintenance of open minds and of tolerance for other people's ideas within the framework of liberty and law? Do those students and graduates take those convictions back to the communities in which they choose to live?

And more important, do all of us, whatever may be our place in the community, use what this University has taught us in order that we diffuse the necessary information to the public at large in order that this system of ours will operate and endure?

In brief, what customs, habits, and opinions do we as individuals foster?

We can only ask questions here tonight; we cannot answer them. But let us not forget that the future insists that the questions raised by these reflections must be answered and acted upon.

What answers will we give? And, more important, what will each of us do to see that history does not record that our professions of faith, though said in the language of the angels, become but sounding brass and tinkling cymbals because of our failure to practice what we preach.

What, my friends, will the answers be?

Around the University

Books written or edited by Dr. Lewis E. Atherton, professor of history, and Dr. William H. Peden, professor of English at the University, have been selected for inclusion in the White House Library. Dr. Atherton's book, *The Cattle Kings*, is an account of the cultural and economic role for cattlemen in the Trans-Mississippi West. Dr. Peden's book, *Notes on the State of Virginia*, is the first edition of the only full-length book written by Thomas Jefferson. As previously announced, three books by Dean Emeritus Frank Luther Mott of the School of Journalism have been included in the Library.

President Elmer Ellis has announced the appointment of Marion Spencer DeWeese, M.D., as professor of surgery and chairman of the Department of Surgery at the University's School of Medicine. Dr. DeWeese is now associate professor of surgery at the University of Michigan. His appointment is effective June 1.

Col. William H. Anderson, M.D., has assumed duties as associate professor of psychiatry at the School of Medicine. He has been chief of the Department of Psychiatry and Neurology at Walter Reed Army Medical Center in Washington.

The Woodrow Wilson National Fellowship Foundation has allocated the University Graduate School a subsidy of \$6,000 to assist graduate students beyond their first year of graduate study toward college teaching careers. The University has presently three students with Woodrow Wilson Fellowships enrolled in their first year of graduate work, and one supported by last year's grant to the University.

Dr. Frank B. Engley, Jr., is the author of a concise comprehensive 338-page *Pocket Reference Guide to Medical Microbiology* which has recently been published by Little, Brown and Company of Boston. Dr. Engley is professor of microbiology and chairman of the department at the School of Medicine.

Dexter (Mo.) Statesman photo.

The third in a series of seminars for University Alumni Association leaders was held at Dexter on January 21. The Southeast Missouri leaders were briefed on the Association, the Development Fund, and membership plans. They also heard of University changes, plans and growth. Speakers were Dean Jack Matthews, Development and Alumni Director G. H. (Bus) Entsminger and Assistant Alumni Director Jean Madden. Shown above, seated, from left: Dean Matthews, Harold Treasurer of Kennett, Harry

Bock of New Madrid, John Younts of Bloomfield; Marvin C. Dobbs, extension director of Dunklin County; and Clarence Powell, district chairman of the Association, Dexter. Standing, from left: Prof. Dale R. Spencer, School of Journalism; Messrs. Entsminger and Madden; Lee Bowman of Sikeston, Wayne French of Painton; Tom Byown, Stoddard County extension director, Bloomfield; Gene Heitman of Lutesville, Bert Robbins of New Madrid, Judge Marshall Craig of Sikeston, and John Ringer of Dexter.

Close by if you need her

No matter what the hour—through the day or the darkness of the night—there's always an operator as close as your telephone. Just a single turn of the dial and she is there!

Helping people in emergencies. Working on

calls that require special attention. Answering calls for information. Providing personal, individual service in so many, many ways.

And seeking to do it always in a friendly, courteous and competent manner.
