BSME in Mechanical Engineering with emphasis in Aerospace Engineering

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence.

The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Options

The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

An Aerospace Emphasis area is available to students wanting to pursue careers in the aerospace industry. Completing the aerospace emphasis requires taking at least three senior MAE 4000+ electives from a selection of available courses. These can be chosen from the broad areas of structures/materials, thermal/propulsion, aerodynamics/fluids, flight mechanics/dynamics/controls, and design. Upon completion of the appropriate coursework, an Aerospace Emphasis is shown on the students transcript.

An entrepreneurship option may be added by taking and in the sixth and seventh semesters before the . These three courses combine to give the student a fundamental understanding of entrepreneurial methods. This option will add credits to the degree program.

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

Semester Plan

A sample plan of study has not been designed for this major. Students should either refer to the plan designed for the BSME in Mechanical Engineering or contact the academic department for assistance with academic planning.

Graduate

MS in Mechanical and Aerospace Engineering

Admission Contact Information

Marilyn Estes Nevels (nevelsma@missouri.edu)
E2413 Mechanical & Aerospace Engineering
Columbia, MO 65211
573-884-8610

Application Deadline for all applicants

Fall deadline: May 31
Spring deadline: October 31
Summer deadline: April 30

Admission Criteria

- BS in same or closely related field
- Minimum GPA: 3.0 during last 2 years
- Minimum GRE Score: 298 combined score on Verbal and Quantitative sections
- Minimum TOEFL score: 61
- Minimum academic IELTS overall score: 5.5

Note: Lower GPAs require special action and substantiation, such as good test scores on the GRE or other recognized examinations.

How to apply to the MAE master's program:

Step 1: All documents should be uploaded directly in ApplyYourself. Mailing in documents may delay your application process.

Step 2: Required documents:

- Official Transcripts (all Universities and Colleges attended)
- TOEFL/IELTS score - sent to University by ETS (Institution Code 6875 Department Code 1502)
- 3 letters of recommendation - uploaded in ApplyYourself
- GRE score - sent to us by ETS (Institution Code 6875 Department Code 1502)
- Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
- CV/Résumé

E2413 Lafferre Hall, Columbia, MO 65211
Questions: 573-884-8610

Plan of Study

A plan of study is developed by the student and the advisor, subject to approval. The minimum degree requirement is 30 hours with a minimum of 18 hours at the 8000 level. Included within the 30 hours must be a special project report or thesis. A special project consists of three to five hours of MAE problems.

Alternatively, programs directed toward a thesis shall include three to eight hours of MAE 8990 (Research). A thesis or a report is approved

by designated faculty committees and is deposited in the department libraries.

Passing the MS final committee fulfills the degree requirements.

PhD in Mechanical and Aerospace Engineering

Application Deadlines for all Applicants

Fall deadline: May 31
Spring deadline: October 31
Summer deadline: April 30

Admission Criteria

- Minimum GPA: 3.0
- Strong record in the MS program
- Minimum GRE score: 298 combined score on Verbal and Quantitative sections
- Minimum TOEFL score: 61
- Minimum Academic IELTS Overall score: 5.5

Note: Doctoral degree program applicants are closely and individually reviewed.

How to apply to the MAE doctoral program:

Step 1: All documents should be uploaded directly in ApplyYourself. Mailing in documents may delay your application process.

Step 2: Required documents:

- Official Transcripts (all Universities and Colleges attended)
- TOEFL/IELTS score - sent to MAE Department by ETS (Institution Code 6875 Department Code 1502)
- 3 letters of recommendation (preferably from MS advisor and 2 other letters) - uploaded in ApplyYourself
- GRE score - sent to MAE Dept by ETS (Institution Code 6875 Department Code 1502)
- Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
- CV/Resume

Questions: 573-884-8610

Degree Requirements

A minimum of 72 semester hours are required including the credit hours taken during the MS program. Students who received the MS degree

from other than MU may transfer a maximum of 30 hours from their MS course work.

A doctoral student must satisfy a special requirement, either proficiency in foreign languages or a collateral field. The collateral field requires a minimum of nine hours of course work in one area other than MAE.

Plan of Study

The PhD candidate plans a plan of study and research under the immediate supervision of an advisor and in close cooperation with the doctoral program committee approved by the dean of the Graduate School upon the department's recommendation.

Qualifying Examination

A qualifying examination is given soon after the student begins doctoral study. Successful completion of this examination is a prerequisite to formal acceptance into the PhD program.

Students with an MS from MU or another accredited U.S. engineering program will be exempt from the qualifying examination if their MS GPA and total GRE scores satisfy a departmental exemption rule. See <http://engineering.missouri.edu/mae/degree-programs/phd-mae/> for more information.

Comprehensive Examination & Dissertation

A comprehensive examination is given after all course work and language or collateral requirements have been satisfied. Upon completion of the plan of study and research a final examination, essentially a defense of the dissertation, is administered.

Nuclear Engineering

About the Nuclear Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year.

Undergraduate students may pursue an academic minor in nuclear engineering (a baccalaureate degree is not offered at this time).

The master's program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled.

The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Faculty

Professor Z. Chen, B. Deng, J. Gahl*, T. K. Ghosh**, N. Islam*, S. Jurisson*, S. Loyalka**, P. Pinhero, M. Prelas**, J. D. Robertson*, R. Thompson**

Associate Professor S. Kovaleski, J. Kwon, K. Trauth*, R. Winholz

Assistant Professor M. Bernards

Associate Teaching Professor G. Solbrekken

Assistant Teaching Professor S. Naz

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Minor in Nuclear Engineering (p. 477)

While MU does not offer undergraduate degrees specifically in nuclear engineering, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Engineering, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

About the Nuclear Science Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year. Educational programs are closely connected with the research foci of participating faculty members. The master's program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled. The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Illustrative Areas of Study

Course topics include nuclear materials management, aerosol mechanics, reactor safety analysis, nuclear energy conversion, reactor physics, reactor design, nondestructive testing and measurement, radiative heat transfer, neutron spectrometry, neutron and gamma ray transport, neutron activation analysis, nuclear waste management, nuclear plasma research, health physics, magnetic resonance imaging, radiation therapy and alternative and renewable energy concepts.

Students Admitted in 2012 and Earlier

Undergraduate

Minor in Nuclear Engineering

The Minor in Nuclear Engineering is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in nuclear power.

The minor requires a minimum of 15 credits of course work. As background preparation, the minor requires math through differential equations and two semesters of calculus-based physics.

Required courses:

ENGINR 2300	Engineering Thermodynamics	3
NU_ENG 4315	Energy Systems and Resources	3
NU_ENG 4346	Introduction to Nuclear Reactor Engineering I	3
NU_ENG 4391	Nuclear Radiation Detection	3
or CHEM 4600	Introduction to Radiochemistry with Lab	

Select one additional course from the list below:

NU_ENG 2201	Topics in Nuclear Engineering	3
NU_ENG 4303	Radiation Safety	3
NU_ENG 4330	Science and Technology of Terrorism and Counter Terrorism	3
NU_ENG 4353	Introduction to Fusion	3
ECE 7550	Introduction to Plasmas	3

engineering.missouri.edu/nuclear/

Preparation for the Program

Students with degrees in physics or chemistry are generally adequately prepared for the nuclear engineering graduate program. Those from other backgrounds may be required to complete engineering undergraduate courses in thermodynamics, advanced engineering mathematics and the full complement of calculus-based physics, based on the student's particular experience.

Application Deadlines

Fall deadline: March 1
 Spring deadline for International students: September 1
 Spring deadline for Domestic Students: October 1
 Applications received after those time frames will be reviewed for acceptance only as time permits.

Admission Criteria

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

- Minimum GRE score: none set
- Minimum GPA: 3.0 during last 2 years
- Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

Required Application Materials

To the Graduate School

All required Graduate School documents

- 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student's qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS adviser.)
- Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program

- Official GRE score report (Use Department Code 1609)

Degree Completion Requirements

The nuclear engineering master's degree program requires 31 hours, including a research project or thesis. The requirements are based on the assumption that the student is entering graduate study with a bachelor's degree in engineering from an ABET-accredited school. An original research project is required either in the form of a three-credit master's project or a six-credit master's thesis. Typical time-to-degree completion for the master's degree is 18 months.

MS in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nuclear Engineering program (<http://gradschool.missouri.edu/academics/programs/nuclear-engineering/masters.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Nuclear Engineering with Emphasis in Health Physics

- Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program

- Official GRE score report (Use Department Code 1609)

Qualifying Examination

The PhD program is a research program and is tailored to meet specific educational needs. To qualify for the research phase of the PhD program, the student must pass a comprehensive, multi-part qualifying examination, usually administered during the first semester of study for the PhD.

PhD Plan of Study

If the student is entering the PhD program, the planned course of study will be individually evaluated by the nuclear engineering faculty. A comprehensive examination covering the student's dissertation topic is required at least seven months before anticipated graduation. The PhD degree is a research degree, with a suitable dissertation topic to be chosen in the respective field and usually requires 24 classroom credits of advanced courses beyond the MS degree and 18 credits of research. Typical time-to-degree completion for the PhD degree is three years past the MS degree.

PhD in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Graduate Certificate in Nuclear Engineering

Eligibility & Mission

The objective of the graduate certificate in Nuclear Engineering is to provide graduate students and professional, non-degree students from various engineering and science departments at MU with a unique opportunity to develop expertise in nuclear engineering that will enhance their job opportunities in the nuclear field.

Requirements for Graduate Certificate in Nuclear Engineering

Students will be required to take the 12 credit hours of coursework from the Nuclear Engineering (NE) degree program curriculum. Co-

listed courses with the Nuclear Science and Engineering Institute NE classes may be considered towards this requirement. As permitted by the University Policy regarding Graduate Certificate offerings, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Engineering. However, total credit hours needed to complete their degree need not exceed Departmental or Graduate School requirements. Students will be required to take courses that broaden their knowledge and understanding in nuclear engineering.

The student must complete a Change of Academic Program form to enter the program. The student must also complete the “Course of Study for Graduate Certificate” form, which must be approved by Nisei before taking any courses. Without this prior approval, the Nisei has the authority to deny the certificate.

A student’s advisor and graduate committee from the host department and the Graduate Studies Director in the Nuclear Science and Engineering Institute will approve the courses. The selection of courses is restricted to the 7000 level or above and all courses must be successfully completed with a final grade of ‘B’ or above. Courses must be selected from the list shown in Table 1 at the certificate’s website (<http://nisei.missouri.edu/graduateCertification.html>), and documented on the Graduate School’s “Course of Study for Graduate Certificate” form. Course credit hours for the certificate could also be applied towards the total credit hours needed for the departmental degree requirements, if accepted by the student’s department.

Course Work

Students should take at least one course from each of the first three clusters listed in Table 1. The student may choose their fourth course from either the Basic Radiation Science Cluster or from any of the four (I, II, III, IV) clusters at the certificate’s site (<http://nisei.missouri.edu/graduateCertification.html>).

A minimum of 12 credit hours must be documented (using the Course of Study for Graduate Certificate form) in order to qualify for the Graduate Certificate in Nuclear Engineering.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/nuclear-engineering-graduate-certificate/nu-eng-ge/Gedt.html>

Graduate Certificate in Nuclear Safeguards Science and Technology

For additional information about this certificate, contact:

Dr. John Gahl, professor of Electrical Engineering, 573-884-7414, GahlJ@missouri.edu

Certificate Objectives and Requirements

The objective of offering the Graduate Certificate in Nuclear Safeguards is to provide graduate students and professional, non-degree-seeking, students in various engineering disciplines with an opportunity to develop unique skills and expertise that will enhance their performance in jobs requiring knowledge of nuclear material protection, control and accountability.

The graduate certificate program serves degree-seeking graduate students and also functions as a stand-alone graduate certificate program for professional, non-degree-seeking students. Both degree-seeking and non-degree-seeking students will be required to take four specific classes (12 credit hours) involving nuclear science, policy and safeguards. The student must complete a Change of Academic Program form to enter the program. The student must also complete the “Course of Study for Graduate Certificate” form, which must be approved by NSEI before taking any courses. Without this prior approval, the NSEI has the authority to deny the certificate.

For MU students, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Safeguards. However, total credit hours needed to complete their degrees need not exceed departmental or Graduate School requirements (see the Graduate School catalog for additional information contact Dr. Gahl)

Nuclear Safeguards Science and Technology Certificate Plan of Study

Four specific classes, comprising 12 hours of course credit, are required for a student to receive this graduate certificate in nuclear safeguards:

NU_ENG 7335	Nuclear Safeguards Science and Technology	3
NU_ENG 7331	Nonproliferation Issues for Weapons of Mass Destruction	3
NU_ENG 7303	Radiation Safety	3
NU_ENG 7391	Nuclear Radiation Detection	3
Total Credits		12

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/nuclear-safeguards-graduate-certificate/nu-safe-ge/Gedt.html>

Additional Minors and Certificates - Engineering

Undergraduate

- Minor in Aerospace (p. 481)
- Minor in Computational Neuroscience (p. 481)
- Minor in Energy (p. 482)
- Minor in Medical/Health Physics (p. 482)
- Minor in Naval Science (p. 482)
- Minor in Radioenvironmental Sciences (p. 482)

Graduate

- Certificate in Energy Efficiency (p. 482)

Undergraduate

Minor in Aerospace

Purpose

- To provide a fundamental grounding in aerospace engineering
- To prepare students to be competitive for positions in aerospace-oriented industries

Students will take courses from the 4 fundamental areas of aerospace engineering:

- aerodynamics
- aerospace structures
- flight mechanics
- propulsion

To Apply

- Meet with your advisor sophomore/junior year to plan minor courses into your schedule.
- Complete the necessary course work (at least 18 credit hours)
- Submit the application below in the semester before you are graduating.
- It will then appear on your diploma.

Required Course Work

Must take both:

MAE 3400	Fluid Mechanics	3
MAE 3600	Dynamic Systems and Control	3

Select at least 2 from:

MAE 4210	Aerospace Structures	3
MAE 4390	Aerospace Propulsion	3
MAE 4420	Intermediate Fluid Mechanics	3
MAE 4430	Introduction to Computational Fluid Dynamics and Heat Transfer	3
MAE 4440	Aerodynamics	3
MAE 4450	Gas Dynamics	3
MAE 4620	Aircraft Flight Performance	3
MAE 4630	Space Flight Mechanics	3
MAE 4940	Aircraft Design	3

Auxiliary Courses

A maximum of 6 credit hours can be counted toward the minor

MAE 4001	Topics in Mechanical and Aerospace Engineering (When taken as topics title "Applied Finite Element Analysis")	3
MAE 4280	Introduction to Finite Element Methods	3
MAE 4320	Design of Thermal Systems	3
MAE 4600	Advanced Mechanics of Materials	3
MAE 4720	Modern Control	3
MAE 4920	Advanced Computational Design	3

Minor in Computational Neuroscience

Computational neuroscience is becoming an important tool for neuroscientists to understand how complex brain circuits work, for example, what causes post-traumatic stress disorder. This intersection of engineering and neuroscience is allowing great advances in health care, manufacturing and communication.

Required for all students:

ECE/BIO_SC 4580	Computational Neuroscience	4
-----------------	----------------------------	---

Select 2 courses from the following list:

BIO_SC 3700	Animal Physiology	
BIO_SC 4310	Physics in Cell and Developmental Biology	
BIO_SC 4500	Neurobiology	
BIO_SC 4560	Sensory Physiology and Behavior	
BIO_SC 4986	Neurology of Motor Systems	
BIO_SC 4988	Nerve Cells and Behavior	
BIOL_EN 4070	Bioelectricity	
BIOL_EN 4080	Engineering Computation	
PHYSICS 4310	Physics in Cell and Developmental Biology	
PHYSICS 4500	Computational Biological Physics	

For students majoring in Engineering, Physics, Math, Psychology or Statistics, choose 6 credits from the following list of courses:

BIO_SC 1010	General Principles and Concepts of Biology (with BIO_SC 1020)	3
BIO_SC 1500	Introduction to Biological Systems with Laboratory	3-5
BIO_SC 2300	Introduction to Cell Biology	4
F_W 1100	Introductory Zoology with Laboratory	5
PSYCH 2210	Mind, Brain, and Behavior	3
PSYCH 4210	Physiological Psychology	3

For students majoring in Biology choose 6 credits from the following list of courses:

PHYSICS 1220	College Physics II	4
PHYSICS 2760	University Physics II	5
INFOTC 1040	Introduction to Problem Solving and Programming	3
BIOL_EN 2080	Introduction to Programming for Engineers	3
	Seminar for Undergraduates	1

Minor in Energy

Energy engineering requires many different types of engineers, and this minor lets you choose from several different tracks to fit your career interests. The minor requires completion of 18 credit hours between the core and the tracks.

Required Core Courses:

ENGINR 2100 or ECE 2100	Circuit Theory for Engineers Circuit Theory I	3
MAE 2300	Thermodynamics	3
CH_ENG 3261	Chemical Engineering Thermodynamics I	3
ECE 4470	Sustainable Electrical Energy Resources	3
IMSE 2710	Engineering Economic Analysis	3

Electric Utility Generation Track

ECE 3470	Introduction to Power Engineering	3
ECE 3510	Electromagnetic Fields	3
MAE 4320	Design of Thermal Systems	3
MAE 4660	Vibration Analysis	3
ECE 4410	Power Electronics I	4
CV_ENG 4250	Environmental Regulatory Compliance	3

Electric Utility Transmission & Distribution Track

ECE 3470	Introduction to Power Engineering	3
ECE 3510	Electromagnetic Fields	3
ECE 4410	Power Electronics I	4
CV_ENG 4250	Environmental Regulatory Compliance	3

Energy Infrastructure and Efficiency Track

MAE 4320	Design of Thermal Systems	3
MAE 4340	Heating and Air Conditioning	3
MAE 4660	Vibration Analysis	3
MAE 4290	Welding Engineering	3
CV_ENG 4250	Environmental Regulatory Compliance	3

Energy Storage Track

ECE 4001	Topics in Electrical and Computer Engineering	3-4
ECE 4410	Power Electronics I	4
CH_ENG 4464	Electrochemical Reaction Engineering Science	3

Minor in Medical/Health Physics

The Minor in Medical/Health Physics is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the biological effects of radiation in medical utilization and in occupational health and safety.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:

NU_ENG 4303	Radiation Safety	3
NU_ENG 4328	Introductory Radiation Biology	3
NU_ENG 4391 or CHEM 4600	Nuclear Radiation Detection Introduction to Radiochemistry with Lab	3

Select additional courses from the below options:

NU_ENG 2201	Topics in Nuclear Engineering	3
NUCMED 3256	Clinical Nuclear Medicine I	2
CHEM 4170	Medicinal Chemistry	3
NU_ENG 4319	Physics and Chemistry of Materials	3
NUCMED 4329	Radiopharmaceuticals in Nuclear Medicine	3
BIOL_EN 4570	Fluorescent Imaging	3
BIOCHM 3630	General Biochemistry	3

Minor in Naval Science

A minor in Naval Science is available upon the completion of 20 semester hours to include 11 hours of the lower level and 9 hours of the upper level Naval Science curriculum.

Minor in Radioenvironmental Sciences

The Minor in Radioenvironmental Sciences is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the environmental aspects of radiation and radioactive materials.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:

NU_ENG 4303	Radiation Safety	3
NU_ENG 4328	Introductory Radiation Biology	3
NU_ENG 4391 or CHEM 4600	Nuclear Radiation Detection Introduction to Radiochemistry with Lab	3

Select two additional courses from the list below:

NU_ENG 2201	Topics in Nuclear Engineering	3
NU_ENG 4330	Science and Technology of Terrorism and Counter Terrorism	3
NU_ENG 4350	Nuclear Forensic Analysis	3
NU_ENG 4379	Particulate Systems Engineering	3
CHEM 3300	Fundamentals of Physical Chemistry	3
CHEM 4280	Environmental Chemistry	3
CV_ENG 3200	Fundamentals of Environmental Engineering	4
CV_ENG 4220	Hazardous Waste Management	3
CV_ENG 4250	Environmental Regulatory Compliance	3

Advising and Scholarship Contact

SHP Student Services Office
 504 Lewis Hall
 (573) 882-8011

The School of Health Professions is Missouri's only state-supported health professions school on a campus with an academic health care center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving society through education, service and discovery in diagnostic, medical imaging, and rehabilitation sciences. The school is credited with establishing the nation's first baccalaureate degree program in respiratory therapy and the first master's degree program in diagnostic medical ultrasound. Its six departments and eight accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in Athletic Training, Communication Science and Disorders, Diagnostic Medical Ultrasound, Health Sciences, Occupational Therapy, Respiratory Therapy, Radiologic Sciences with emphasis in Radiography or Nuclear Medicine Technology, and Clinical Laboratory Sciences with an emphasis in Medical Technology. The school offers graduate degrees in Communication Science and Disorders with an emphasis of Speech-Language Pathology, Diagnostic Medical Ultrasound, Occupational Therapy and Physical Therapy.

Students gain valuable experience by participating in nationally recognized service centers including The Adult Day Connection, The Health Connection, the Speech and Hearing Clinic, Robert G. Comb's Language Preschool and more than eight hundred fieldwork sites.

Undergraduate

- Admissions (p. 483)
- Exploratory Courses (p. 483)
- Required Entry Level Courses (p. 483)
- School of Health Professions Scholars Guaranteed Admission Program (SHarP Scholars) (p. 484)
- International Admissions (p. 484)
- Academic Regulations (p. 484)
- Enrolling in Other Institutions Simultaneously (p. 485)
- Advising (p. 485)
- Career Placement (p. 485)

Admissions

Undergraduate students are enrolled in the School of Health Professions for academic advisement in order to complete University general education (p. 18) and prerequisite courses. Students will be advised by faculty of the department in which they have declared a major, or by an advisor in the Student Services Office. Students should contact the SHP

Advising Office to ensure satisfactory progress toward completion of the prerequisites.

Admission to the University and to the School of Health Professions as a pre-professional student does not constitute admission as a candidate for most Bachelor of Health Science degree programs. Pre-professional students are admitted to candidacy for the BHS only when they have been selected to participate in the professional component of a program. Application deadlines and requirements vary for each program (an application is not required for the health sciences programs). Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards pre-requisites, MU General Education (p. 18), and program requirements.

Exploratory Courses

The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

HLTH_SCI 1000	Introduction to the Health Professions	3
NUCMED 1000	Orientation to Nuclear Medicine	1
OC_THR 1000	Introduction to Occupational Therapy	1
PH_THR 1000	Introduction to Physical Therapy	1
RS_THR 1000	Introduction to Respiratory Therapy	1
DMU 1000	Introduction to Diagnostic Medical Ultrasound	1
C_S_D 1000	Introduction to Communication Science and Disorders	1
CL_L_S 1000	Orientation to Clinical Laboratory Science	1

Required Entry-level Courses

To be admitted into or continue in the School of Health Professions, all students with 55 or more credits must have completed MATH 1100 and ENGLSH 1000, or their equivalents, with grades in the C range or higher.

While completing prerequisite requirements, students must make formal application for admission to the professional component of the program of their choice. Enrollment is limited and is governed by program admission committees. Application to the professional component is also required for transfer students.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

To achieve the goals of diversity and equal opportunity, the School of Health Professions encourages the participation of minority students in its programs.

The application deadlines for the professional component of each program are shown below.

Professional Program	Application Deadline	Classes Begin
Athletic Training	February 1, freshman	Fall
Communication Science and Disorders	Feb. 1, sophomore	Fall
Occupational Therapy	Dec. 31, sophomore	Summer
Radiography	Feb. 1, sophomore	Summer
Physical Therapy	Jan. 24, senior	Summer

Nuclear Medicine	Dec. 1, junior	Fall
Respiratory Therapy	Feb. 1, sophomore	Summer
Diagnostic Medical Ultrasound	Feb. 1, sophomore	Summer
Clinical Laboratory Science	Nov. 1, junior	Summer
Health Sciences	N/A, freshman	Fall/Spring

School of Health Professions Scholars Guaranteed Admission Program (SHarP Scholars)

Eligibility Requirements for the SHarP Scholar's Program:

- Minimum 30 composite ACT score (1330 SAT).
- Top 10% high school (HS) rank at the time of application.
- Performance in college courses completed prior to HS graduation will be considered by the admissions committee.
- Completed applications must be submitted by March 1st during the senior year in high school or November 15th during the freshman year at MU.
- Four (4) hours of clinical observation in the discipline of choice (documented on the SHarP application). All applications must include recommendations from a high school teacher and from a high school counselor or principal.

*** Students who are accepted as SHarP Scholars may also have to complete additional application requirements prior to entering their professional program. Specific program requirements are communicated to students upon acceptance as SHarP Scholars.*

Application materials are available in the School of Health Professions Student Services Office and on the school's website (<http://shp.missouri.edu>).

Students accepted as SHarP Scholars who maintain participant status at MU are guaranteed admission into one of the following degree programs:

- Athletic Training
- Clinical Laboratory Sciences with an emphasis in Medical Technology
- Communication Science and Disorders (BHS program only)
- Occupational Therapy
- Diagnostic Medical Ultrasound
- Master of Public Health Program (upon completion of the Health Sciences BHS degree)
- Radiologic Sciences, with emphasis in *Radiography or Nuclear Medicine Technology*
- Respiratory Therapy
- Physical Therapy (Doctor of Physical Therapy program, upon completion of a baccalaureate degree)

International Admissions

Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements

See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University.

Graduation Requirements

In addition to degree and major requirements, students must complete university graduation requirements (p. 17), which include university general education (p. 18) requirements.

Degree Core Requirements

The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition to all University requirements (p. 17), including University general education (p. 18) requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements

To earn Latin Honors in the School of Health Professions, a student must meet the following requirements:

- 50 graded MU undergraduate credits
- At least a 3.0 MU cumulative GPA
- MU cumulative GPA equal to or greater than 3.5 or
- last 50 graded credits at MU equal to or greater than 3.5
- GPA for each level

Latin Honor	GPA
Cum laude	3.5
Magna cum laude	3.7
Summa cum laude	3.9

Academic Regulations

Time Limits on Credits Earned

Contact each department for information on time limits.

Credits by Examination

Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions Student Affairs Office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled

A student may not enroll for more than 17 credits in a term without permission from the associate dean.

Independent Study

Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades

A student wishing to enroll in a course on an S/U basis must receive permission from the faculty advisor in his or her department and from the SHP Advising Center.

Enrolling in Other Institutions Simultaneously

Students must receive approval from the SHP Advising Center before enrolling simultaneously at another institution.

Advising

Students may be assigned a faculty advisor in their program of study or a professional academic advisor in the Office of Student Services.

Students should select an area of interest prior to completing the first two years of college. To assist with career decisions, the School of Health Professions offers introductory courses and experiences to provide information and career opportunities in these areas.

Career Placement

Graduates of programs in the School of Health Professions are highly recruited and frequently hired prior to receiving degrees. The Career Services office in the School of Health Professions offers résumé, cover letter and personal statement review, mock interviews, and workshops to enhance students' career development. Students are encouraged to seek out and use the Career Services office early in their undergraduate career.

Graduate

The School of Health Professions offers a wide variety of programs of study for students interested in careers in healthcare. At the graduate level, we offer degrees in

- Communication Science and Disorders
- Occupational Therapy
- Physical Therapy
- Diagnostic Medical Ultrasound Program

The Graduate School confers an interdisciplinary **Master's of Public Health (MPH) degree. The MPH is available in two emphasis areas: Health Promotion and Policy or Veterinary Public Health. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences.**

Note: Prospective graduate students must apply to *both* the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Athletic Training

Interim Program Director & Clinical Education Coordinator:

Keith Belmore, MEd, ATC, CSCS

Athletic training is a professional field of study that primarily addresses the well-being of the athlete. The Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings that include: high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. Of late, the practice of athletic training has expanded to include a variety of settings apart from the traditional athletic population which now include: physicians' offices, corporate and industrial institutions, the military, and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act.

The Department of Physical Therapy, Athletic Training Program offers a Bachelors of Health Science (BHS) degree in Athletic Training.

Disclaimer: The Athletic Training Program at the University of Missouri is NOT accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Only graduates of CAATE accredited programs are eligible to sit for the Board of Certification exam. The program is anticipating submission of application for accreditation and subsequent site visit for accreditation in the Spring 2016. Application and site visitation for accreditation does not guarantee accreditation.

Faculty

Assistant Teaching Professor K. Belmore, B. Mann, S. Wehring
Adjunct Faculty J. Artioli, D. Belmore, C. Hairston, J. Heitmeyer, T. McClelland, A. Mosel, R. Sharp

Undergraduate

- BHS in Athletic Training (p. 486)

Graduate

While MU does not offer graduate degrees specifically in athletic training, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Athletic Training

Major Program Requirements

The Athletic Training major consists of a one-year pre-professional phase followed by a three-year professional phase. The major is a professional preparation program requiring admission into the program and a clinical component. Clinical experiences are completed at on- and off-campus locations during the three-year professional phase. All required Athletic Training courses must be completed with a grade of "C" (2.0) or higher.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the below degree requirements.

Major Core Requirements

ATHTRN 1100	Athletic Training Skills I	2
ATHTRN 1200	Athletic Training Skills II	2
ATHTRN 2100	Principles and Fundamentals of Athletic Training	3
ATHTRN 2150	Athletic Training Practicum I	3
ATHTRN 2250	Athletic Training Practicum II	3
ATHTRN 2500	Elementary Human Anatomy	3
ATHTRN 2600	Human Physiology	3
ATHTRN 3150	Athletic Training Practicum 3	3
ATHTRN 3100	Mental Health in Athletic Training (course pending final approval)	3
ATHTRN 3250	Athletic Training Practicum 4 (course available Spring 2015)	3
ATHTRN 3300	Lower Extremity, Trunk, Spine Assessment	3
ATHTRN 3350	Lower extremity, Trunk, Spine Assessment Lab	2
ATHTRN 3400	Upper Extremity and Head Assessment	3
ATHTRN 3450	Upper Extremity and Head Assessment Lab	2
ATHTRN 3500	Rehabilitation of Athletic Injuries	4
ATHTRN 3600	Administration of Athletic Training (course available Spring 2015)	3
ATHTRN 3700	Therapeutic Modalities	4
ATHTRN 3800	General Medical Conditions (course available Spring 2015)	3
ATHTRN 4150	Athletic Training Practicum 5 (course available Summer/Fall 2015)	3
NUTR_S 4200	Sports Performance and Conditioning	3
HTH_PR 4250	Human Kinesiology	3
PH_THR 4420	Foundations of Therapeutic Exercise	3
ATHTRN 4500	Nutrition for Athletic Performance and Rehabilitation	3
PH_THR 4790	Pharmacology in Rehabilitation	2
ATHTRN 4970	Seminar in Athletic Training I (course available Summer/Fall 2015)	3
ATHTRN 4990	Seminar in Athletic Training II (course available Spring 2016)	3

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR
ATHTRN 1100	2 ATHTRN 1200	2
MATH 1100	3 ATHTRN 2100	3
BIO_SC 1010 & BIO_SC 1020	5 ATHTRN 2500	3
HIST 1100, 1200, or POL_SC 1100	3 ENGLISH 1000	3
Elective	3 PSYCH 1000	3
	16	14
Second Year		
Fall	CR Spring	CR
ATHTRN 2150	3 ATHTRN 2250	3
ATHTRN 2600	3 ATHTRN 3400	3

ATHTRN 3300	3 ATHTRN 3450	2
ATHTRN 3350	2 Humanities (Writing Intensive)	3
2000+ Humanities	3 2000+ Behavioral or Soc Science	3
	14	14

Third Year		
Fall	CR Spring	CR
ATHTRN 3150	3 ATHTRN 3500	4
ATHTRN 3100 Mental Health in Athletic Training - Approval in Process	3 ATHTRN 3250, AT Practicum IV - Offered Spring 2015	3
ATHTRN 3700	4 ATHTRN 3600, Administration in AT - Offered Spring 2015	3
HTH_PR 4250	3 ATHTRN 3800 General Medical Conditions - Offered Spring 2015	3
PH_THR 4420	3 PH_THR 4790	2
	16	15

Fourth Year		
Fall	CR Spring	CR
ATHTRN 4500	3 NUTR_S 4200	3
ATHTRN 4150, AT Practicum V - Offered Fall 2015	3 ATHTRN 4990, Seminar in Athletic Training II - Offered Spring 2016	3
ATHTRN 4970, Seminar in Athletic Training I - Offered Fall 2015	3 Elective	3
Physical Science	4 Elective	3
Humanities	3 STAT 1200 (or STAT 1300 or ESC_PS 4170)	3
	16	15

Total Credits: 120

*The Freshman year is considered "pre-professional". Students apply into the "professional" portion of the program during the Freshman year. All students applying into the "professional" portion of the program must meet the minimum requirements for application into the BHS in Athletic Training degree program.

Required Application Materials

- Acceptance into the University of Missouri.
- Declaration of "Pre-Athletic Training" area of interest.
- Demographic Information ATP Form.
- Written statement of professional interests and goals.
- Signed Technical Standards.
- Minimum overall Grade Point Average of 2.75/4.0.
- Minimum grade of a "C" in ATHTRN 1100, 1200, 2100, 2500, MATH 1100 College Algebra, ENGLISH 1000 Exposition, BIO_SC 1010 Biological Science & Lab (or equivalent). *May be currently enrolled in courses during application process, but must successfully complete for full program acceptance.*
- Completion of Blood-borne Pathogen training. (Done in ATHTRN 1100)
- Completion of observation hours. (Done in ATHTRN 1100)
- Signed Confidentiality Waiver. (Done in ATHTRN 1100)
- Completed a minimum of 12 semester hours and enrolled in at least 12 semester hours during time of application.
- Personal interview with ATP Selection Committee

Clinical Laboratory Sciences

Clinical Laboratory Science

School of Health Professions
605 Lewis Hall
(573) 882-8011 and (573) 884-1847
Director: Steven Starr

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine – chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators -- and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient's diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 16 hours of both Biology and Chemistry, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 11 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska's Medical Center in Omaha. After the initial 11 weeks in the program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites, which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran's Hospital. Students graduate with a Bachelor of Health Science degree in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

Faculty

Clinical Professor G. D. Heggie*

Clinical Instructor S. Starr

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Clinical Laboratory Sciences with Emphasis in Medical Technology (p. 488)

The Department of Clinical and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

While MU does not offer graduate degrees specifically in clinical laboratory sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of

Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Clinical Laboratory Sciences with Emphasis in Medical Technology

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Professional Certification: Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

Major core requirements

Prerequisites		
ENGLISH 1000	Exposition and Argumentation	3
COMMUN 1200	Public Speaking	3
MATH 1100	College Algebra	3
STAT 1200	Introductory Statistical Reasoning	3
or STAT 1300	Elementary Statistics	

Social science requirement

Select one of the following:		3
HIST 1100	Survey of American History to 1865	
HIST 1200	Survey of American History Since 1865	
POL_SC 1100	American Government	

Social science/behavioral science requirement		6
Humanities electives		6
Electives		6-8
Writing intensive elective *		3
MPP 3202	Elements of Physiology	5

Biological sciences elective (at least 16 hours of Biology)

BIO_SC 1500	Introduction to Biological Systems with Laboratory	5
BIO_SC 2200	General Genetics	4
BIO_SC 2300	Introduction to Cell Biology	4
MICROB 3200	Medical Microbiology and Immunology	4
or BIO_SC 3750	General Microbiology	
MICROB 4304	Immunology	3

Physical sciences requirement (at least 16 hours of Chemistry)

CHEM 1320	College Chemistry I	4
CHEM 1330	College Chemistry II	4
CHEM 2100	Organic Chemistry I	3
CHEM 3200	Quantitative Methods of Analysis with Lab	4
BIOCHM 3630	General Biochemistry	3
or CHEM 2110	Organic Chemistry II	

Core Requirements

CL_L_S 4412	Clinical Laboratory Science Theory, Application and Correlation	5
CL_L_S 4414	Chemistry I	4
CL_L_S 4415	Chemistry II	3

CL_L_S 4416	Clinical Hematology I	4
CL_L_S 4417	Clinical Hematology II	3
CL_L_S 4418	Clinical Microbiology I	4
CL_L_S 4419	Clinical Microbiology II	3
CL_L_S 4420	Clinical Immunology	1
CL_L_S 4422	Immunoematology I	3
CL_L_S 4423	Immunoematology II	2
CL_L_S 4424	Phlebotomy	1
CL_L_S 4426	Body Fluid Analysis	1
CL_L_S 4970	Clinical Laboratory Management I	2

Advising Contact

Jill S. Diener
(573) 882-8011

Communication Science and Disorders includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master's or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS and PhD degrees (p. 490).

Faculty

Associate Professor J. C. Goodman**, S. A. Wagovich**
Assistant Professor M. Dietrich, M. Fagan**, E. S. Kelley, M. Kuruvilla
Clinical Associate Professor B. L. Brinkman, D. R. Fritz, B. A. McLay*
Clinical Assistant Professor L. B. Lawrence*, M. A. Scheneman
Clinical Instructor G. Hull, G. Nolan
Research Associate Professor Emerita L. S. Day*

- * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

- MHS in Communication Science and Disorders (p. 492)
 - with emphasis in Speech-Language Pathology (p. 492)

About Communication Science and Disorders

The field of Communication Science and Disorders, or CSD, encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders. Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation and voice problems. Audiologists specialize in the prevention, identification, assessment and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master's and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master's degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master's degree prepares students for national certification in speech-language pathology and for professional clinical practice in both health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master's degree in preparation for a career in research and college teaching or administration.

Career Opportunities

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master's degree, which is the entry-level degree for speech-language pathologists, typically takes two to three years beyond the undergraduate degree depending on the student's undergraduate field of study. Students wishing to pursue a career in audiology will need to attend a program that offers clinical doctorate in audiology (AuD), the entry-level degree for audiologists.

Facilities and Resources

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, Missouri Rehabilitation Center, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the state. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs Language Preschool, and the Accent Modification and Pronunciation

Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master's thesis option is available to students interested in conducting research.

Funding

All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships.

Undergraduate

BHS in Communication Science and Disorders

Major Program Requirements

Students are required to apply to the Communication Science and Disorders major. Applications into the BHS program are considered once a year, and they must be submitted by February 1 of the student's sophomore year. Applicants must have completed at least 42 hours of college credit before applying, and students who are admitted must have completed 60 hours of college credit before beginning coursework as Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are required for acceptance into the BHS program. Meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program.

In addition to university (p. 17), college and degree requirements, including university general education (p. 18), students must complete the following:

Major core requirements

ENGLISH 1000	Exposition and Argumentation	3
COMMUN 1200	Public Speaking	3
PSYCH 1000	General Psychology	3
PSYCH 2410	Developmental Psychology	3
MATH 1100 or MATH 1160	College Algebra Precalculus Mathematics	3-5
STAT 1200 or STAT 1300 or ESC_PS 4170	Introductory Statistical Reasoning Elementary Statistics Introduction to Applied Statistics	3

Social Sciences Requirement

HIST 1100 or HIST 1200 or POL_SC 1100	Survey of American History to 1865 Survey of American History Since 1865 American Government	3
---	--	---

Biological Science Requirement

Select one of the following:		5
BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory	
BIO_SC 1500	Introduction to Biological Systems with Laboratory	

Physical Science Requirement

PHYSICS 1150 or PHYSICS 1210 or CHEM 1100	Concepts in Physics College Physics I Atoms and Molecules with Lab	3-4
---	--	-----

Total Credits: 122

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to reach the University requirements of 120 total hours.

Graduate

MHS in Communication Science and Disorders

Admission Contact Information

Julie Aston mucsd@missouri.edu
 301 Lewis Hall; Columbia, MO 65211
 573-884-2940

Admission Criteria

Deadline for Summer entrance (required for all applicants): January 15

- Undergraduate GPA: 3.0 (on last 60 hours of course work)
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100*	600

* Minimum TOEFL (iBT) score of 100, with minimum score of 28 on speaking

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1000 (preferred)	
On or After August 1, 2011	300 (preferred)	

Required Application Materials

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must apply through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) at www.csdcas.org. The CSDCAS Applicant Portal Link will open on September 17, 2014 to begin accepting applications for the 2015-16 academic year. Additional information may be found on the MHS Admissions (<http://shp.missouri.edu/csd/admission.php#mhs>) web page.

Personal interviews may be requested.

Students who are accepted into the MHS program and commit to attending the University of Missouri will be required to complete the MU

Graduate School's online application which includes an additional fee. Information will be provided when admission is offered.

Admission Process

The current graduate admission process in Speech-Language Pathology is highly competitive nationwide. All MHS admission decisions are made by the Departmental Graduate Admissions Committee.

Prerequisite Course Work

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must have completed, or be in the process of completing, standard prerequisite course work in CSD. Any prospective applicant with an undergraduate degree in a major field other than Communication Science and Disorders should contact the Department prior to submitting an application to the MHS program. Prerequisite course work must be approved by the CSD Director of Graduate Studies prior to application. Many options exist for completing prerequisite course work nationwide. Please contact the Department for more information.

Financial Aid from the Program

All applicants accepted for admission to the MHS program will be considered for departmental financial aid.

Plan of Study

MHS candidates are required to complete a minimum of 48 semester hours in graduate-level courses with grades of B- or higher. No fewer than 24 hours must be earned in 8000/9000-level course work offered by the program. A maximum of 9 hours in clinical practicum courses may be counted toward the 48-hour requirement.

Thesis Option

The student may choose the thesis option for the master's degree; work toward the thesis may count for up to six semester hours of credit.

Examination

During the final semester of course work, we expect master's degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program's online Graduate Student Handbook for additional information.

MHS in Communication Science and Disorders with Emphasis in Speech-Language Pathology

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHS in Communication Science and Disorders (<http://gradschool.missouri.edu/academics/programs/communication-science-and-disorders/master-of-health-science-emphasis-in-speech-language-pathology.php>) and the minimum

requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

Diagnostic Medical Ultrasound

Diagnostic Medical Ultrasound

- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Diagnostic Medical Ultrasound (p. 494)

The Diagnostic Medical Ultrasound (DMU) Program in the School of Health Professions (<http://shp.missouri.edu>) at the University of Missouri (<http://www.missouri.edu>) offers a Bachelor of Health Science (BHS) in Diagnostic Medical Ultrasound. The DMU Program is a 35-40 hours per week, 52 weeks per year Clinical Education Program. The DMU program has over 25 clinical sites through the state of Missouri in which students are placed during their clinical training.

Graduate

Diagnostic Medical Ultrasound

School of Health Professions
 409 Lewis Hall
 (573) 884-2994
 Director: Moses Hdeib

- MHS in Diagnostic Medical Ultrasound (p. 495)

The Master of Health Science in Diagnostic Medical Ultrasound is offered by the School of Health Professions, Department of Clinical and Diagnostic Sciences. The Diagnostic Medical Ultrasound Program (DMU) is a 35-40 hours per week, 52 weeks per academic year clinical education program.

Future Certification and Careers

Upon successfully completing the requirements of the DMU Program, MHS Graduates will be eligible to apply to the American Registry of Diagnostic Medical Sonographers (ARDMS) for registry in Abdomen, Obstetrics and Gynecology, Vascular Technology and Cardiac Ultrasound.

Financial Aid

Please contact the financial aid office. Some programs require an application and extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Undergraduate

BHS in Diagnostic Medical Ultrasound

Major Program Requirements

The Diagnostic Medical Sonographer uses high-frequency sound waves to perform a variety of diagnostic examinations. The sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment and knowledge. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Any student interested in applying to the DMU Program should seek advisement as soon as possible to assure that all general education and prerequisite courses including the criteria for application have been completed.

Students must complete the courses listed below in addition to degree and university requirements (p. 17), which include university general education (p. 18) requirements.

Major core requirements

Prerequisites		
PSYCH 1000	General Psychology	3
CHEM 1320	College Chemistry I	4
COMMUN 1200	Public Speaking	3
BIO_SC 1010	General Principles and Concepts of Biology	3
BIO_SC 1020	General Biology Laboratory	2
ENGLSH 1000	Exposition and Argumentation	3
Select one of the following:		
HIST 1100	Survey of American History to 1865	
HIST 1200	Survey of American History Since 1865	
POL_SC 1100	American Government	
SOCIOL 1000	Introduction to Sociology	3
or RU_SOC 1000	Rural Sociology

** DMU 1000 Introduction to Diagnostic Medical Ultrasound required for application to the DMU Program. Prospective students may enroll in the fall semester or the spring semester.

Graduate

MHS in Diagnostic Medical Ultrasound

Admission Contact Information

Dr. Moses Hdeib hdeibm@health.missouri.edu
406 Lewis Hall
Columbia, MO 65211
573-884-2994

Admission Criteria

Deadline for spring entrance: December 1

- Minimum TOEFL scores:
The minimum TOEFL score for the Diagnostic Medical Ultrasound Program is 100 in the new scoring model. This is equivalent to a paper-based score of 600. Test of Written English (TWE) - 4.5
- Minimum GRE score: check with Program Director of Graduate Studies
- Undergraduate GPA minimum: 3.00 (A=4.0) for the last 60 hours of college work

Potential applicants who have all the prerequisites for admission to the program should submit their application early (before November) in the fall of the academic year in order to be considered for early acceptance with start in the following spring semester. Please contact the director of graduate studies.

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- GRE scores

To the Diagnostic Medical Ultrasound Program:

- Departmental Application
- Transcripts

Degree Requirements

Graduate students must maintain a 3.0 grade point average in all courses required for the degree. Failure to achieve a semester cumulative grade point average of 3.0 in required courses will result in delay of graduation or dismissal from the program. Students are expected to maintain full-time enrollment in the sequenced curriculum and complete the degree requirements as outlined in the course of study.

Health Science

R. Hogan, Chair
School of Health Professions
501 Clark Hall
(573) 882-8422
hoganr@health.missouri.edu

The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the Bachelor of Health Sciences program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including Public health, Psychology, Sociology, Medical Anthropology, Education, and Social Work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, access to healthcare, and suicide prevention. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS concurrently with the Masters of Occupational Therapy (p. 500).

Students can only earn the BHS concurrently with the Doctor of Physical Therapy (p. 503).

Faculty

Associate Professor E. Schatz*

Associate Clinical Professor R. Hogan

Associate Teaching Professor D. Hume*, M. Kuhnert

Assistant Professor N. Cheak-Zamora*, J.Chen, A. Kabel*, N. Khosla, W. Majee, V. Shaffer, M. Teti*, M. Thullen

Assistant Clinical Professor K. Flynn Peters

Assistant Teaching Professor B. Blackburn, R. Bowman, C. Orbann, D. Gerhart

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Health Science (p. 497)

The Department of Health Sciences' BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the BHS degree program may also be qualified to enter either graduate or professional health science programs such as Physical Therapy, Health Administration and Public Health. The Health Sciences program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS).

Departmental Requirements

Courses may be delivered using traditional or distance delivery methods. The Health Sciences degree program credits must include a minimum of 120 university-level credit hours including: General education requirements comprise a minimum of 42 credit hours; Health Sciences core course requirement comprise a minimum of 19 credit hours; Health Sciences approved elective courses comprise a minimum of 18 credit hours; Electives fulfilling the student's concentration area comprise the remaining 41 credit hours.

Students are required to file a graduation plan for the BHS degree by the time they have completed 90 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall, summer and spring semesters. Students who transfer from another institution or another school/college at MU with more than 60 hours must file their graduation plan within their first semester of coursework in SHP and at MU.

Residency Requirement

There is a residency requirement for Health Sciences majors. Students must complete, at minimum, the 30 hours of coursework for the degree as declared Health Sciences majors in the School of Health Professions. Students must be in the Health Sciences major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students transferring into the major during the semester will begin the following semester.

Admission to the BHS in Health Sciences

The BHS in Health Sciences program does not require an application. Students may declare their major in the BHS program by indicating the program on the MU application (for new students), filling out a transfer of division form (for current MU students), or indication of their intention to declare a health science major to their academic advisor (for current SHP students). There is a 2.0 MU cumulative and term GPA requirement to declare a major in Health Sciences. The cumulative GPA is calculated on all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve that GPA may stay in the program for two probationary semesters. If the 2.0 term or cumulative GPA is not achieved after two probationary semesters, students must transfer out of the Health Sciences program.

Graduate

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Health Science

Major Program Requirements

- Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve a 2.0 GPA may stay in the program for two probationary semesters,

and if they fail to earn a 2.0 term or cumulative GPA after the two probationary semesters, students must transfer out of the Health Sciences program.

- All required core and elective coursework for the BHS in Health Sciences program, including requirements outside the department, must be completed with a grade of C- or higher.
- Students may repeat a core required course one time.
- Students must complete all university requirements, including general education (p. 18), and Departmental Requirements (p. 497), in addition the degree requirements below.
- Students may only repeat a core required course one time.

Capstone Requirement

The BHS capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH_SCI 4975 offers ways to complete the capstone experience through internships. The internship will be approved by the internship advisor and faculty internship coordinator. Students may find their own internship experience or work with the course instructor/ internship advisor to identify an appropriate placement given interests and goals.

Students may choose from:

- an internship at an agency, company, or corporation of their choice. For an internship to be approved as a capstone experience, it must help students solidify and explore areas of concentration. Internships must have prior approval from the Health Sciences Internship advisor;
- service learning project which allows a student to serve approximately 50 clock hours in an organization. This can be arranged with the Internship advisor or through the Office of Service Learning on campus, and
- an approved study abroad program

Required Core Courses

Required Core Courses

HLTH_SCI 1000	Introduction to the Health Professions	3
HLTH_SCI 2100	Health Sciences Seminar	1
HLTH_SCI 3300	Public Health Principles and Practice	3
HLTH_SCI 3900	Introduction to The Research Process and Evidence Base	3
HLTH_SCI 4300 or HLTH_SCI 4300H	Health Care in the United States Health Care in the United States - Honors	3
HLTH_SCI 4975	Internship in Health Sciences	1-6
HLTH_SCI 4985	Healthcare Organization and Leadership	3
HLTH_SCI 4480	Clinical Ethics	3

General Education Requirements

MATH 1100 or MATH 1160	College Algebra Precalculus Mathematics	3-5
ENGLISH 1000 or ENGLISH 1000H	Exposition and Argumentation (or equivalent) Honors Exposition English equivalent	

Biological, Physical, and Mathematical Sciences requirement (9 or more credits)

Biological Science

BIO_SC 1010 & BIO_SC 1020 or BIO_SC 1500	General Principles and Concepts of Biology and General Biology Laboratory Introduction to Biological Systems with Laboratory	
--	---	--

Physical Science

Mathematics Science

STAT 1200 or STAT 1300	Introductory Statistical Reasoning Elementary Statistics	
Math Reasoning Proficiency Course	Typically fulfilled by one of the following:	3
STAT 1200	Introductory Statistical Reasoning	
STAT 1300	Elementary Statistics	
CHEM 1320	College Chemistry I	
PHYSICS 1210	College Physics I	4
PHYSICS 1220	College Physics II	4

Behavioral and Social Sciences (9 or more credits):

Behavioral Science

Social Science

HIST 1100	Survey of American History to 1865	
HIST 1200	Survey of American History Since 1865	
POL_SC 1100	American Government	
Or other approved course		

Humanities and Fine Arts (9 or more credits required from 2 different areas)

12 or more credits of a single foreign language may be used to fulfill this requirement		
---	--	--

Distribution of Content:

Students must have at least one 2000 level or above course in two of three areas:

1. Biological/Physical/Mathematical Science	
2. Behavioral/Social Science	
3. Humanities/Fine Arts	

BHS Electives

Students must complete 18 hours of approved elective courses.

At least 9 credit hours must be from 3000/4000 level courses.

Students must complete course work in at least two out of these three thematic areas: Social/Behavioral; Medical/Biological; Administrative/Leadership.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year

Fall	CR Spring	CR
HLTH_SCI 1000	3 HIST 1100, 1200, or POL_SC 1100	3
MATH 1100	3 ENGLISH 1000	3

Total Credits: 120

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to teach the University requirement of 120 total hours.

[^] BIO_SC 1500: Intro Biological Systems with Lab can be taken in lieu of BIO_SC 1010 and BIO_SC 1020.

[#] Denotes Health Sciences elective coursework. These specific courses will count towards the 18 hours required for completion of the Health Science Degree program.

Occupational Therapy

Department of Occupational Therapy
 School of Health Professions
 801B Clark Hall
 Columbia, Missouri 65211
 (573) 882-3988

Advising Contact
 MUOT@health.missouri.edu

Scholarship Information Contact
 MUOT@health.missouri.edu

Occupational therapists are skilled health professionals who provide services to infants, children, adults and older persons experiencing physical, emotional or mental limitations in performing everyday activities. The department's philosophy supports a holistic model that emphasizes empowerment and the mind, body, spirit. The curriculum focuses on the value of occupation in relationship to health and wellness. The department's mission is to produce competent practitioners who can meet the challenges and changes occurring in institutions, community-based programs and educational settings in both urban and rural areas of Missouri.

Occupational therapists are employed in public and private schools, hospitals, rehabilitation centers, mental health facilities, nursing homes, home health agencies, community health programs and industry. As independent health practitioners, they are also involved in business, working with disability claims, in work-hardening programs and wellness/health promotion, or as proprietors of their own therapy services. Occupational therapists also work as educators, administrators, consultants and researchers.

The department offers a Bachelor of Health Science in Occupational Therapy (BHS) followed by the entry level master degree (MOT). To become a registered therapist the master degree is required.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD 20814-3425, (301) 652-2682.

Faculty

Assistant Professor K. Hebert**, D. Smith**, A. Bonsall**

Graduate

Department of Occupational Therapy

School of Health Professions
 801B Clark Hall, Columbia, MO 65211
 573-882-3988; FAX 573-884-2610
<http://shp.missouri.edu/ot/>

- MOT in Occupational Therapy (p. 502)

The School of Health Professions offers an entry level master's degree in occupational therapy. Students apply to the Department of Occupational Therapy as an undergraduate, receive a Bachelor of Health Sciences in Occupational Therapy (BHS-OT) and continue on to graduate level courses. Student with completed bachelor degree at time of application to the program may opt to take all program courses at graduate level. Graduate courses are only offered to students enrolled in the program. The degree program is approved to meet accreditation requirements requiring a graduate degree. Contact the Department of Occupational Therapy for more information regarding the degree.

Accreditation & Certification

The Department of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD, 20814-3425, (301) 652-2682.

Graduates are eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT), Inc. 12 South Summit Ave., Suite 100, Gaithersburg, MD 20877-4150, telephone (301) 990-7979; Fax (301) 869-8492.

Financial Aid from the Program

Check the School of Health Professions website at <http://shp.missouri.edu> for scholarship information.

Undergraduate

BHS in Occupational Therapy

Major Program Requirements

The professional degree program requires three years of course work after completion of all prerequisites and university general education requirements. Six months of field experiences in affiliated clinical and community-based sites, must be completed within 24 months after required didactic courses.

Students with a bachelor's degree must complete the prerequisite courses and meet the university and OT admission requirements.

The following are MU courses. Students transferring from other institutions should seek advisement from the school and OT advisors and select appropriate prerequisite courses for admission. Medical terminology proficiency and 30 hours of observation is required. In addition to university, college and degree requirements, students must complete the following:

Major core requirements

Prerequisites to the major		
COMMUN 1200	Public Speaking	3
Select one of the following:		5
BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory	

BIO_SC 1500	Introduction to Biological Systems with Laboratory	
PSYCH 2510	Survey of Abnormal Psychology	3
PHYSICS 1210	College Physics I	4
H_D_FS 2400	Principles of Human Development	4
MPP 3202	Elements of Physiology	5
SOCIOL 1000	Introduction to Sociology	3
or ANTHRO 1000	General Anthropology	
PSYCH 1000	General Psychology	3
ESC_PS 4170	Introduction to Applied Statistics	3
or STAT 1300	Elementary Statistics

Total Credits: 161

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to reach the minimum amount of credit hours (59) needed to be eligible for the OT Professional Program.

Graduate

MOT in Occupational Therapy

Leanna Garrison, Department Manager
809 Clark Hall; Columbia, MO 65211
573-884-2113

Admission Criteria

Application Deadline for Summer entrance: December 31

- Minimum MAT score: none set
- Undergraduate GPA: 3.3 or higher (4.0=A)
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

- Completion of all undergraduate/OT prerequisites
- 30 hours of occupational therapy observation
- 20 hours of volunteering
- Completion of all required application materials
- Acceptance to program

Required Application Materials

To the Graduate School:

- All required Graduate School documents (only for degreed students opting to take courses at graduate level)

Required Application Materials to the Program (Occupational Therapy):

- Go to <http://shp.missouri.edu/ot/> for departmental application forms (available Oct. 1-Dec. 31)
- Apply at the "Occupational Therapy Centralized Application Service (OTCAS)" found at <https://portal.otcas.org>.
- Observation Forms, Volunteer Forms, supplemental fee

Requirements for Masters Degree in Occupational Therapy

The Department of Occupational Therapy offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements to apply. The occupational therapy graduate courses include a minimum of 34 credits beyond the bachelor's degree in OT. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.

Physical Therapy

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
801 Clark Hall
(573) 882-7103
Fax: (573) 884-8369
mushppt@missouri.edu
<http://shp.missouri.edu/pt/>

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master's degree or terminal undergraduate degree in Physical Therapy are available.

Admissions

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

Information regarding the admissions procedures and curriculum for the Doctor of Physical Therapy (p. 503) program can be found on the graduate tab.

Faculty

Professor M. Brown*, M. A. Minor*

Associate Professor E. A. Dannecker**, T. M. Guess, S. P. Sayers**

Associate Teaching Professor K. Gibson*, M. S. Hargrove*, K. L. Wingert

Assistant Teaching Professor J. Bridges*, T. Briedwell*, J. Krug*, J. B. Mann, D. E. Martin, E. Prost*, K. Stephens*

Clinical Professor C. C. Abbott*

- DPT in Physical Therapy (p. 503)

Starting in 2007, students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

Financial Aid from the Program

Students may apply for scholarships during the professional phase of the program. Check the program website or ask the program contact for availability and details.

Undergraduate

BHS in Pre-Professional Physical Therapy

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

DPT in Physical Therapy

Admission Contact Information
Beverly Denbigh
School of Health Professions
801 Clark Hall
573-882-7103
573-884-8369 (fax)

Application and Admission Information

Applicants who will have an undergraduate degree prior to entering the program will apply to the Graduate School online admission process in addition to the Departmental Application. Graduate School applications must be submitted by January 17th.

Departmental applications are required and are due in the PT office by January 17th.

Students who are admitted without a degree will receive a bachelor's degree at completion of the first year.

All students are strongly encouraged to contact the department office for advisement and planning well in advance of application.

Admission Criteria

Fall deadline: N/A

Summer deadline: January 17

- Minimum TOEFL scores:

Internet-based test (iBT) Area	iBT Score	Paper-based test (PBT) Area	PBT Score
Reading	20	Listening	55
Listening	21	Structure/Written	55
Speaking	26	Reading	55
Writing	17		
TOTAL	100	TOTAL	600

- Minimum GPA: 3.0

Prerequisites for the Doctoral Degree

Note: The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor's degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

Regular applicants must have at least a 3.0 GPA in the core required courses and the cumulative GPA in the last 60+ credit hours.

On-campus interviews are required for admission to the professional program.

Students who enter without a bachelor's degree must have satisfied the MU general education and graduation requirements and taken two Writing Intensive courses at MU. These applicants must possess a 3.5 GPA.

Applicants are notified of the selection committee's decision by March.

All students are strongly encouraged to contact the School of Health Professions Student Affairs Office for advisement and planning well in advance of application.

Admission to the program is selective.

Required Application Materials

To the Graduate School:

- All required Graduate School documents/application fee

To the Program <http://shp.missouri.edu/pt/>

- Uploaded Departmental application/application fee
- 2 letters of recommendation (resume) as specified by the application guidelines
- Curriculum Vitae (resume) as specified by the application guidelines
- Unofficial transcripts (year of application, fall grades must be recorded on transcript)

- GRE scores must be sent to MU

Plan of Study

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years (including two summer sessions), beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy (CAPTE). Graduates are eligible for licensure anywhere in the United States.

Degree Requirements

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program. Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.

Radiologic Sciences

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission.

Emphasis in Radiography

Radiography

School of Health Professions

607 Lewis Hall

(573) 884-2623

Director: Patricia Tew

Radiographers are highly skilled health professionals who work closely with physicians and specialize in the use of x-rays. They provide patient services using a variety of imaging modalities. In addition to conventional x-ray procedures, the radiographer also works with computerized axial tomography (CT), magnetic resonance imaging (MRI), cardiovascular-interventional technology, mammography, bone densitometry, and quality management.

More About Radiography

Established in 1960, the Radiography Program is the only baccalaureate level program at a public institution of higher education in Missouri.

This discipline provides preparation for leaders in the field by offering a Bachelor of Health Science degree. Graduates have demonstrated their superior achievement through their performance on national certifying examinations with a 100% overall pass rate. After graduating from the program, students may choose to do an additional clinical externship in computerized tomography or magnetic resonance imaging, which will lead to a certificate of completion and eligibility to take the national certifying examination in that area.

Mission Statement

The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

Emphasis in Nuclear Medicine

Nuclear Medicine

School of Health Professions

605 Lewis Hall

(573) 884-7843

Director: Glen Heggie

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

More About Nuclear Medicine

Nuclear Medicine uses extremely small amounts of radioactive compounds in order to image and assess the function and state of

health of many of the body's internal organs, and to treat some forms of cancer. It is a multidisciplinary field dependent upon contributions from Physics, Chemistry and Medicine. This highly sophisticated discipline is at the forefront of discovering and understanding the complex physiologic processes of our bodies. This discipline is of enormous importance to medical specialties such as Cardiology (heart), Neurology (nervous system), Oncology (cancer), Orthopedics (bone), Endocrinology (hormone system), Hematology (blood), Nephrology (kidney), and Pulmonology (lung).

Faculty

Clinical Professor G. D. Heggie*

Clinical Associate Professor C. M. Allen

Clinical Assistant Professor M. Feldman, M. C. Sebacher, P. A. Tew

- * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Radiologic Sciences (p. 506)
 - with emphasis in Nuclear Medicine Technology (p. 506)
 - with emphasis in Radiography (p. 507)

The Department of Clinical and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Radiography Program

Instructional Plan

Radiography program faculty advise interested students throughout their college career. During the first two years, students enroll in general education courses (p. 18) and complete required prerequisite courses. Students apply to the radiography program during spring semester of their sophomore year (by February 1st). Upon acceptance into the program, students begin their professional radiography courses starting summer semester of their Junior year. This professional phase of the program runs for 24 consecutive months (6 consecutive semesters).

In addition to general requirements and courses pertinent to radiography, students in the program will take interdisciplinary courses in cardiology, research, healthcare organization and management, radiation safety, and radiation biology. They will also have an opportunity to experience problem based learning (PBL) cases.

While in the program, students will receive clinical instruction at several clinical affiliates such as University of Missouri Hospital Center, Women's & Children's Hospital, Harry S Truman Veteran's Administration Hospital and Boone Hospital Center. Our clinical affiliates provide students with a broad base of learning experiences. Other clinical rotations may include radiation therapy, nuclear medicine, diagnostic medical ultrasound, CT, MRI, veterinary medicine, mammography and trauma/emergency imaging.

Essential Requirements

Before beginning the professional phase of the School of Health Professions' Radiography Program, we want you to have certain information available to you. We encourage you to read through the Essential Requirements (http://shp.missouri.edu/rs/download/Essential_Requirements.pdf). The Radiography Program is a serious commitment—for you and for us. More than anything else, however, it is a serious commitment to patients, including those you will see and work with as students and, most importantly, those for whom you will be responsible later in your careers.

Graduate

While MU does not offer graduate degrees specifically in radiologic sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Radiologic Sciences

Major Program Requirements

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine Technician. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission. All degree requirements are listed that the emphasis level.

Semester Plan

Refer to the Semester Plan for the emphasis areas.

BHS in Radiologic Sciences with Emphasis in Nuclear Medicine Technology

Major Program Requirements

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 17), including University general education (p. 18) requirements.

Emphasis Core Requirements

Prerequisites to the nuclear medicine emphasis

BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory (or BIO_SC 1500)	5
CHEM 1320	College Chemistry I	4
CHEM 2100	Organic Chemistry I	3
CHEM 4600	Introduction to Radiochemistry with Lab	3
ENGLISH 1000	Exposition and Argumentation	3
MATH 1100	College Algebra	3
MATH 1400	Calculus for Social and Life Sciences I	3
PSYCH 1000	General Psychology	3
PHYSICS 1210	College Physics I	4
PTH_AS 2201 & PTH_AS 2203	Human Anatomy Lecture and Human Anatomy Laboratory	5
NUCMED 1000	Orientation to Nuclear Medicine	1
RADIOL 4328	Introductory Radiation Biology	3
RA_SCI 4303	Radiation Safety	3
MPP 3202	Elements of Physiology	5
STAT 1200 or STAT 1300 or ESC_PS 4170	Introductory Statistical Reasoning Elementary Statistics Introduction to Applied Statistics	3
SOCIOL 1000 or ANTHRO 1000	Introduction to Sociology General Anthropology	3
PHYSICS 1220	College Physics II	4
CPD 2190	Medical Terminology	3
CPD 4480	Clinical Ethics	3
CPD 4955	Introduction to Research	3

Core requirements for the nuclear medicine emphasis

NUCMED 4329	Radiopharmaceuticals in Nuclear Medicine	3
NUCMED 3263	Morphological Correlations in Nuclear Medicine I	3
NUCMED 3256	Clinical Nuclear Medicine I	2
NUCMED 3255	Orientation to Clinical Practice	2
NUCMED 4940	Clinical In Vivo I	6
NUCMED 4268	Clinical Nuclear Medicine II	3
NUCMED 4327	Nuclear Medicine Instrumentation	3
NUCMED 4941	Clinical In Vivo II	7
NUCMED 4232	Clinical In Vitro	3
NUCMED 4299	Morphological Correlations in Nuclear Medicine II	3
NUCMED 4269	Clinical Nuclear Medicine III	1
NUCMED 4330	PET in Nuclear Medicine	3
RA_SCI 4110	Sectional Anatomy	3
RA_SCI 4150	Computed Tomography: Physics and Procedures	5
CPD 3460	Cardiovascular and Pulmonary Diagnostic Applications I	3

Students are strongly encouraged to take the following course:

CPD 4440	Organization and Administration	3
Total Credits		120

Professional Certification

Upon completion of the program, students are eligible to take the national certifying examinations given by the Nuclear Medicine Technology

Certification Board. Students may also pursue credentials offered through the American Registry of Radiologic Technologists.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year			
Fall	CR Spring	CR	
MATH 1100	3 NUCMED 1000	1	
PSYCH 1000	3 ENGLISH 1000	3	
HIST 1100, 1200, or POL_SC 1100	3 CHEM 1320	4	
BIO_SC 1010 & BIO_SC 1020 (or BIO_SC 1500)	5 COMMUN 1200	3	
	STAT 1200 or ESC_PS 4170	3	
	14	14	
Second Year			
Fall	CR Spring	CR	
PTH_AS 2201 & PTH_AS 2203	5 MPP 3202	5	
PHYSICS 1210	4 PHYSICS 1220	4	
CPD 2190	3 Behavioral/Social Science (level 2000+)	3	
CPD 4955 (Writing Intensive)	3 Humanities 2000+ Level Course	3	
	15	15	
Third Year			
Fall	CR Spring	CR Summer	CR
NUCMED 3255	2 CHEM 2100	3 NUCMED 4232	3
NUCMED 3263	3 CHEM 4600	3 CPD 4480	3
NUCMED 4329	3 NUCMED 3256	2	
RA_SCI 4303	3 NUCMED 4299	3	
RADIOL 4328	3 Humanities	3	
	14	14	6
Fourth Year			
Fall	CR Spring	CR	
NUCMED 4268	3 NUCMED 4269	1	
NUCMED 4327	3 NUCMED 4330	3	
NUCMED 4940	6 NUCMED 4941	7	
RA_SCI 4110	3 RA_SCI 4150	5	
	15	16	

Total Credits: 123

BHS in Radiologic Sciences with Emphasis in Radiography

Major Program Requirements

Radiographers are highly skilled health professionals who work closely with physicians specializing in the use of x-rays. They provide patient services using a variety of imaging modalities such as general x-ray, computed tomography, magnetic resonance imaging, mammography, interventional radiography, and bone densitometry. The radiographer must apply the principles of radiation protection, must be competent in

the use and maintenance of delicate equipment and must have the ability to deal with patients and medical professionals.

Accreditation of the program is granted by:

The Joint Review Committee on Education in Radiologic Technology
 20 North Wacker Drive, Suite 2850
 Chicago, Illinois 60606-3182
 312-704-5300
 mail@jrcert.org

Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission.

Students must complete these courses in addition to major, degree and University requirements (p. 17), including University general education requirements (p. 18).

Emphasis core requirements

PREREQUISITES FOR RADIOGRAPHY EMPHASIS

MATH 1100	College Algebra	3
ENGLISH 1000	Exposition and Argumentation	3
HLTH_SCI 1000	Introduction to the Health Professions	3

Humanities and Fine Arts

COMMUN 1200	Public Speaking	3
Humanities (Elective)		6

Behavioral/Social Sciences

HIST 1100	Survey of American History to 1865	3
or HIST 1200	Survey of American History Since 1865	
or POL_SC 1100	American Government	
PSYCH 1000	General Psychology	3
Behavior Sciences (Elective)		3

Biological/Physical Sciences

BIO_SC 1010 & BIO_SC 1020 or BIO_SC 1500	General Principles and Concepts of Biology and General Biology Laboratory Introduction to Biological Systems with Laboratory	5
CHEM 1320	College Chemistry I	4
PTH_AS 2201 & PTH_AS 2203	Human Anatomy Lecture and Human Anatomy Laboratory	5
MPP 3202	Elements of Physiology	5
ESC_PS 4170	Introduction to Applied Statistics	3
CPD 2190	Medical Terminology	3

CORE REQUIREMENTS FOR RADIOGRAPHY EMPHASIS

RA_SCI 3110	Radiography Procedures I	2
RA_SCI 3120	Fundamentals of Radiography	3
RA_SCI 3130	Basic Radiographic Skills	2
RA_SCI 3140	Principles in Radiographic Exposure I	3
RA_SCI 3150	Radiologic Pharmacology	3
RA_SCI 3160	Radiologic Physics	3
RA_SCI 3170	Imaging Modalities	2
RA_SCI 3180	Radiography Procedures II	2
RA_SCI 3190	Radiography Procedures III	3
RA_SCI 4110	Sectional Anatomy	3
RA_SCI 4140 or RA_SCI 4150	Magnetic Resonance Imaging: Physics and Procedures Computed Tomography: Physics and Procedures	5
RA_SCI 4303	Radiation Safety	3
RA_SCI 4947	Radiography Overview	3
RA_SCI 4980	Imaging Pathology	3

Respiratory Therapy

Respiratory Therapy

School of Health Professions

614 Lewis Hall

(573) 882-9722

Program Director: Monica Schibig

The University of Missouri Respiratory Therapy Program was established in 1967. The program is credited to be among the country's first baccalaureate degree programs in Respiratory Therapy. The University of Missouri's Respiratory Therapy program prepares graduates for the Advanced Practitioner level, Registered Respiratory Therapist (RRT) and students graduate with a Bachelor of Health Science in Respiratory Therapy.

The Mission of the University of Missouri Respiratory Therapy Program is to coordinate superior classroom, laboratory, and clinical experiences to prepare advanced Respiratory Care Practitioners, develop learners who will effectively engage in professional leadership roles, and provide an environment where research and service are expectations.

Faculty

Clinical Professor G. D. Heggie*

Clinical Associate Professor K. S. Moss*, M. A. Schibig

Clinical Assistant Professor L. M. Lair

Clinical Instructor J. L. Keely, S. W. Parker

- * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Respiratory Therapy (p. 509)

The Department of Clinical and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

While MU does not offer graduate degrees specifically in respiratory therapy, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

BHS in Respiratory Therapy

Major Program Requirements

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists

administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician.

The two-year, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain on campus at MU Health Care. The MU RT program has a satellite campus at Mercy Hospital-St. Louis for those students living in the St. Louis area.

Accreditation of the program is granted by the Commission on Accreditation for Respiratory Care (CoARC) www.coarc.com (<http://www.coarc.com>).

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements, which include University general education requirements.

Major core requirements

Prerequisites		
BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory (or BIO_SC 1500)	5
ENGLISH 1000	Exposition and Argumentation	3
CHEM 1320	College Chemistry I	4
ESC_PS 4170	Introduction to Applied Statistics	3
HIST 1100	Survey of American History to 1865	3
or HIST 1200	Survey of American History Since 1865	
or POL_SC 1100	American Government	
MATH 1100	College Algebra	3
CPD 2190	Medical Terminology	3
MICROB 3200	Medical Microbiology and Immunology	4
or MICROB 2800	Microbiology for Nursing and Health Professions	
MPP 3202	Elements of Physiology	5
PHYSCS 1210	College Physics I	4
PTH_AS 2201 & PTH_AS 2203	Human Anatomy Lecture and Human Anatomy Laboratory	5
RS_THR 1000	Introduction to Respiratory Therapy	1
SOCIOL 1000	Introduction to Sociology	3
or ANTHRO 1000	General Anthropology	
Core requirements		
CPD 3200	Essentials of Pathology	2
CPD 3460	Cardiovascular and Pulmonary Diagnostic Applications I	3
CPD 4440	Organization and Administration	3
CPD 4460	Cardiovascular and Pulmonary Diagnostic Applications II	3
CPD 4500	Bioterrorism in Healthcare	1
CPD 4955	Introduction to Research	3
RS_THR 3000	Fundamentals of Respiratory Care	1
RS_THR 3220	Equipment and Techniques	5

RS_THR 3290	Cardiopulmonary Pharmacology	2
RS_THR 3420	Principles of Mechanical Ventilation	3
RS_THR 3440	Mechanical Ventilation Lab	3
RS_THR 3941	Clinical Practice I	2
RS_THR 3942	Clinical Practice II	4
RS_THR 3943	Clinical Practice III	2
RS_THR 4020	Perinatal/Neonatal Respiratory Care	3
RS_THR 4040	Respiratory Pathophysiology	5
RS_THR 4220	Community and Patient Education I	1
RS_THR 4240	Pulmonary Rehabilitation	3
RS_THR 4420	Pediatric Respiratory Care	3
RS_THR 4460	Evidence-Based Medicine in Respiratory Care	3
RS_THR 4620	Pulmonary Function Technologies	1
RS_THR 4940	Clinical Practice IV	5
RS_THR 4973	Clinical Practice V	4
RS_THR 4983	Clinical Practice VI	5
RS_THR 4993	Clinical Practice VII	5
Total Credits		121

RS_THR 3941	2	RS_THR 4020	3	RS_THR 4240	3
RS_THR 4040	5	RS_THR 3420	3		
	16		16		9
Fourth Year					
Fall		CR Spring		CR	
RS_THR 4420	3	RS_THR 4460	3		
RS_THR 4620	1	RS_THR 4920	1		
RS_THR 4940	5	RS_THR 4973	4		
CPD 4440	3	RS_THR 4983	5		
CPD 4500	1	RS_THR 4993	5		
CPD 4955	3				
	16		18		

Total Credits: 138-140

Professional Certification

After graduation, students are eligible to take the Entry Level and Advanced Level Examinations given by the National Board for Respiratory Care. Application for admission due February 1 of the sophomore year.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR
MATH 1100	3 CHEM 1320	4
PSYCH 1000	3 ESC_PS 4170 or STAT 1200	3
BIO_SC 1010 & BIO_SC 1020	5 COMMUN 1200	3
Humanities	3 HLTH_SCI 1000	3
HIST 1100, 1200, or POL_SC 1100	3 ENGLSH 1000	3
	17	16

The College of Human Environmental Sciences addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research, preparing professionals and providing outreach.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development.

Undergraduate

- Admissions (p. 511)
- Advising (p. 511)
- Career Services (p. 511)

Admissions

Undergraduate students may enter the College of Human Environmental Sciences as freshmen. Some programs have requirements beyond those of the University. An entering freshman has the first year to explore the departments and the college as well as the combinations of subject areas for positions in fields such as education, health and welfare, business, industry and government.

All freshmen entering the College of Human Environmental Sciences enroll in GN_HES 1100 Introduction to Human Environmental Sciences or SOC_WK 1110 Introduction to the Social Work Major. These courses emphasize career decision-making, provide an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life in the near environment.

Transfer Student Application

Human Environmental Sciences

Students in another MU school or college, or from another UM System campus, must have a cumulative GPA and term GPA of 2.0 or better to be eligible for admission to the College of Human Environmental Sciences. For students who transfer to the UM System from another institution and then apply for transfer into the college, transcripts are re-evaluated by the college to determine what courses will apply to the degree.

A student ineligible to enroll in another school or college may not enroll in the College of Human Environmental Sciences during the period of ineligibility. An appeal for admission may be made after the period of ineligibility is over.

School of Social Work

Undergraduate students who have been admitted to the University after attending another college may request a social work major. Those who have completed more than 55 credits need a GPA of 2.5 or higher on all college work attempted.

Advising

Professional advising staff in the Student Services Office assists the students in planning their college programs.

Students earning credit from another institution will have a transfer equivalencies form completed by faculty for course work in their professional program. Transfer work is evaluated by the Office of Admissions. The HES Office of Student Services determines how transferred courses fit into a particular degree program.

It is the student's responsibility to initiate a graduation check to be certain that all requirements are met. An application for graduation should be submitted to the HES Student Services Office the semester preceding graduation. The application is available online at: http://hes.missouri.edu/students_evalforgrad.html

Career Services

Career services cover a spectrum of career programs. These include business, education and agriculture career services offices on the campus. The Student Services Office and individual advisers provide information regarding procedures. Career exploration and preparation information may be obtained in the Career Center.

Graduate

The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master's and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

Architectural Studies

Human Development & Family Studies

Nutrition & Exercise Physiology

Personal Financial Planning

Textile & Apparel Management

Social Work

The School of Social Work (<http://ssw.missouri.edu>), housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to *both* the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College's online graduate degree programs, see Mizzou Online.

Architectural Studies

R. B. Tofle, Chair
College of Human Environmental Sciences
137 Stanley Hall
(573) 882-7224
<http://arch.missouri.edu>

The Department of Architectural Studies promotes connections between people and place and between interior design and architecture with the intention of preparing our graduates to become lifelong designers of the built environment.

The Department is a dynamic and personal place engaged in the processes, procedures, observations and techniques essential to the development of environmental designs for human living, work and leisure. It can be placed between the world of physical realities and the imaginary.

Architectural studies uses the arts and the sciences: the exact science for its stability and durability, thermal and acoustic capabilities of buildings; and the social sciences to develop a better understanding of people's relationship with places and time.

Faculty

Professor B. Schwarz**, R. B. Tofle**
Associate Professor R. G. Phillips**, N. D'Souza**
Assistant Professor B. Balakrishnan**
Teaching Assistant Professor M. Goldschmidt*, H. Cai*
Instructor L. Bartlett, H. Sheward
Professor Emeritus R. Helmick*
Associate Professor Emeritus G. Hennigh
Assistant Professor Emeritus P. Hildebrand

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSHES in Architectural Studies (p. 515)
 - with emphasis in Architectural Studies (p. 515)
 - with emphasis in Interior Design (p. 516)
- Minor in Architectural Studies (p. 517)

The Department of Architectural Studies offers a Bachelor of Science in Human Environmental Sciences with emphasis areas of either Interior Design or Architectural Studies. Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) its products, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

Students may receive a minor in Entrepreneurship with required courses in Architectural Studies, an internship, and an additional 4 credits of specified coursework. See Undergraduate Minor in Entrepreneurship (p. 667) for more information.

The department offers some undergraduate coursework taught 100% online in asynchronous delivery for distance learners. For distance learners seeking degree completion, some courses meet MU general education requirements. Students may also enroll as post-baccalaureate or non-degree undergraduate students. In addition, selected courses could be used toward a 15-credit Minor in Architectural Studies. On-campus and distance-learners are taught by the same accomplished professors. This is a fully *integrated model* of online instruction with established quality. For more information see MizzouOnline (<http://online.missouri.edu/course-search>).

Portfolio Review and Admission to Studio Sequence in the Department of Architectural Studies

Students must apply for admission to the studio sequence required for undergraduate majors. Applications are made at the end of the spring semester of the freshman level for enrollment in ARCHST 2811 Studio I.

Application forms with deadlines are available from the department and the department website. Admittance decisions are based on:

1. Review of design work submitted in a portfolio, which should include:
 - Satisfactory completion of ARCHST 1200 Architectural Drafting and Working Drawings
 - Satisfactory completion of 2-dimensional design coursework from: ARCHST 1100 Visual Design OR ART_GNRL 1030 Basic 2-D Design
 - Satisfactory completion of ART_DRAW 1050 Drawing I
2. Overall grade point average (including transfer courses), grades received in courses completed, and ACT scores (or equivalent for transfer students)
3. Enrollment capacity (approximately 40 students)

Laptop Computer Requirements

A laptop computer is required for the studio sequence at the beginning of the sophomore year. See department website for recommended specifications.

Graduate

- MA in Architectural Studies (p. 517)
 - with emphasis in Design with Digital Media (p. 518)
 - with emphasis in Environment and Behavior (p. 519)
- MS in Architectural Studies (p. 519)
 - with emphasis in Design with Digital Media (p. 520)
 - with emphasis in Environment and Behavior (p. 521)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Architectural Studies (p. 534).

A Design Research Concentration is developed for

- Designers engaged in architecture, interior design, graphic, or interaction design who require applied research skills from companies/ organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The Design Research concentration can be taken as independent coursework for professional advancement or applied to a Masters (30 cr) or PhD program. Four courses comprise the concentration:

- ARCHST 7961 Design Research and Service Design (3 credits)
- ARCHST 7963 Human Factors Research for Design (3 credits)
- ARCHST 7962 Information Visualization and Visual Analytics (3 credits)
- ARCHST 7964 Design Thinking and Creative Process (3 credits)

About the Program

The department's mission is to educate future design practitioners, advance research of the built environment and disseminate knowledge of architectural studies to improve quality of life for people. The philosophy of the Department of Architectural Studies embraces the synergy created between interior design and architecture. Having a symbiotic relationship, both fields explore the design process and its final products. Promoting the meaning and value of physical settings and responding to the human condition, the program investigates the interaction between people and their surroundings to create a more beautiful and sustainable world.

The program encourages an interdisciplinary, scholarly climate celebrating aesthetic values and the human sciences. Consistent attention is placed on planning and designing physical environments that support human needs and aspirations. Course work may include courses in supportive areas such as the human and physical sciences, art, humanities and allied design professions.

Online Study

On-campus and distance-learners are taught by the same accomplished professors. This is a fully *integrated model* of online instruction with established quality. The Department of Architectural Studies offers 100% online graduate education in the following formats:

- Master of Arts (http://arch.missouri.edu/academics_masters.html#page_MA) in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).

- Master of Science (http://arch.missouri.edu/academics_masters.html#page_MS) in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Doctor of Philosophy (http://arch.missouri.edu/academics_phd.html) in HES and in the major area of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html).
- Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) as stand-alone coursework or as part of a masters or doctorate.
- Stand-alone courses for non-degree (<http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants>) graduate students. Students select online courses from an extensive menu for professional advancement. Up to 12 credit hours of graduate credit taken as a non-degree graduate student may be applied to a graduate degree program upon approval of the academic program if the student is accepted.

Graduate courses are delivered as:

- Asynchronous or Synchronous. Asynchronous coursework is completed independently according to the provided schedule. Synchronous courses will include real-time discussion during arranged weekly class periods.
- Semester-based or self-paced online.

See Mizzou Online <http://online.missouri.edu/course-search/> for a complete listing of online course offerings and enrollment procedures. All graduate core courses are offered online. Transfer of credit (http://arch.missouri.edu/academics_transfer.html) to a degree program is allowed with the approval of the student's adviser and approval of the director of graduate studies and Graduate School.

Professional Opportunities

Career opportunities for master's and doctoral graduates of the Department and College include leadership positions in design; consultation practices in industry, government and education; and academic and administrative positions in higher education and research. Graduates from the MA degree program may pursue careers in the design professions, building construction industry, government, education and the advertising and entertainment industries. Graduates of the MS and PhD degree programs pursue academic and professional careers integrating design theory with their research skills.

Financial Aid from the Program

Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and are based on the match between the department's needs and candidate's background.

Graduate Program Requirements

The academic program should be developed in consultation with an adviser by the end of the first full semester or at the successful conclusion of at least nine credit hours. See Graduate School website ('Doctoral Plan of Study and Degree Requirements') for guidelines and requirements regarding course work and role of dissertation committee. Students complete the online Graduate Student Progress System. Annual reviews of graduate students will be conducted to include the indicators listed by the Graduate School.

Architectural Studies Graduate Degrees & Concentration

Graduate programs offer two emphases: 1) environment and behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees and 2) design with digital media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.

Undergraduate

BSHES in Architectural Studies

Major Program Requirements

The BSHES in Architectural Studies is an interdisciplinary combination of interior design, architecture, the human sciences and aesthetics to improve quality of life. Students are engaged in the processes, procedures, observations, and techniques of design.

The BSHES is offered with two emphasis area options: [Interior Design](#) and [Architectural Studies](#). Both emphasis areas focus on the development of environmental designs for human living, work, and leisure. The Interior Design emphasis results in a terminal bachelor's degree accredited by the Council of Interior Design Accreditation (CIDA). The Architectural Studies emphasis is a pre-architecture bachelor's degree or pre-professional option and students continue their education with the M Arch to become practicing architects.

Some courses in the Professional Program area double count for General Education (p. 18) requirements. See degree information at the emphasis level.

Semester Plan

Refer to the Semester Plans at the emphasis level.

BSHES in Architectural Studies with Emphasis in Architectural Studies

Major Program Requirements

The Architectural Studies emphasis prepares students at the undergraduate level for application to professional architecture programs as well as for other roles in society in related fields - in research, government, development, management, planning, etc. While many of these occupations do not require a professional license, they do require an understanding of a professional education.

Students may choose to continue their program of study for a master's degree in architecture (M. Arch) at another university. A program reciprocity agreement was developed with the University of Kansas (KU) where students pay Kansas in-state tuition. All students interested

in continuing their education are encouraged to maintain regular communication with the cooperating institution because application and transfer procedures are subject to change. Students also continue at many other M. Arch programs in the U.S. where scholarships and financial support may be available as determined by the institution.

BSHES in Architectural Studies with Emphasis in Interior Design

Major Program Requirements

The Interior Design emphasis is a four-year, first-professional baccalaureate interior design program accredited by the Council for Interior Design Accreditation (CIDA).

The program's mission is to provide academic training with high-quality educational experiences to prepare students for their successful careers as interior designers. The program addresses health, safety, and welfare and strives to provide students with experiences and design skills that allow them to design meaningful interior spaces to enhance human life. The program emphasizes a quest for true artistic beauty, use, and techniques based on precision, truthfulness and sincerity. See interior design definition at NCIDQ (<http://www.ncidq.org/aboutus/aboutinteriordesign/definitionofinteriordesign.aspx>).

Minor in Architectural Studies

A minor in the Department of Architectural Studies is comprised of a minimum of 15 credits.

Minor core requirements		
ARCHST 1600	Fundamentals of Environmental Design	3
Electives		
Select from the following:		
ARCHST 1100	Visual Design	3
ARCHST 1200	Architectural Drafting and Working Drawings	3
ARCHST 2100	Understanding Architecture and the American City	3
ARCHST 2220	Introduction to CAD	3
ARCHST 2310	Building Systems	3
ARCHST 2315	Introduction to Building Systems Laboratory	1
ARCHST 2316	Advanced Building Systems Lab	2
ARCHST 3100	Color and Light	3
ARCHST 4320	Materials, Methods and Products	3
ARCHST 3860	Human Factors Programming	3
ARCHST 4323	Sustainable Technologies and Systems	3
ARCHST 4430	Guiding Design with Historic Preservation	3
ARCHST 4435	History of the Designed Environment to 1750	3
ARCHST 4440	Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution	3
ARCHST 4620	Environment and Behavior	3
ARCHST 4630	Shaping Human Settlements	3
ARCHST 4700	Place-Making in Community Design	3
ARCHST 4961	Design Research and Service Design	3

ARCHST 4962	Information Visualization and Visual Analytics	3
ARCHST 4963	Human Factors Research for Design	3
ARCHST 4964	Design Thinking and Creative Process	3

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

Graduate

MA in Architectural Studies

Admission Contact Information

Dr. Newton D'souza (dsouzan@missouri.edu)
 137 Stanley Hall; Columbia, MO 65211
 573-882-7496

Admission Criteria

Fall deadline: January 15
 Minimum GPA: 3.0
 Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

Required Application Materials

To the Program:

- Application statement of graduate goals and educational objectives discussing which of the department's emphasis areas is of interest; intentions regarding MA or MS; and request for a specific advisor.
- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online.
- Graduate School application or mailed directly to the program.
- For MA applicants only, electronic portfolio of images and/or publications. (Do not mail originals.)

Master of Art

The creative, project-based, MA plan of study is often undertaken in preparation for careers in the design professions and education, as well as in the advertising and entertainment industries. The project is conducted in the area of design with digital media using high-end computer software. The culmination of the degree is a professionally reviewed, visual project.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study.

Environment and Behavior Studies Emphasis

The Environment and Behavior Studies focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and related environmental design disciplines. A design project leads to the MA and research leads to the MS or PhD degrees.

Current study areas in environment and behavior include:

- Design Research
- Design Education
- Learning Environments for Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Health Care Design
- Sustainable Environments
- Housing, Neighborhood Design
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D'souza for more information about the department's graduate program or the emphasis in environment and behavior.

Design with Digital Media Emphasis

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines. This program of study has an emphasis on design with digital media leading to MA or MS degrees. The MA is a project-based program of study, whereas the MS is research-based.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media Dr. Bimal Balakrishnan for course content and research proposals.

MA in Architectural Studies with Emphasis in Design with Digital Media

MU's Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and transdisciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the Digital + Media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to MA, MS, and PhD degrees. MA is a project-based program of study, whereas the MS is research-based.

The graduate courses can either be taken as a MA/MS or Doctoral program. MA is a project-based program of study, whereas MS is research-based. The MA/MS courses are generally two year courses. The duration of the PhD may range from 3.5-6 years.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

See resources in our immersive visualization lab, the **ilab** (http://arch.missouri.edu/resources_ilab.html), and the **ilab web site**. (<http://arch.missouri.edu/ilab>)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, **Dr. Bimal Balakrishnan** (http://arch.missouri.edu/faculty_balakrishnan.html), for course content and research proposals. \

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Architectural Studies program (<http://gradschool.missouri.edu/academics/programs/architectural-studies/masters.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/>

minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MA in Architectural Studies with Emphasis in Environment and Behavior

The Environment and Behavior Studies focus is on the multifaceted relationships between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines.

A design project leads to the MA and research leads to the MS or PhD degrees.

Emphasis areas in environment and behavior include:

- Design Education
- History of the Designed Environment
- Design Planning and Analysis
- Interior Design Systems
- Universal Design/Accessibility
- Environment and Aging
- Quality of Life and Design
- Health Care Design
- Housing, Neighborhood Design, and Sustainability
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact **Dr. Newton D'Souza** (http://arch.missouri.edu/faculty_dsouza.html) at dsouzan@missouri.edu for more information about the Department's Graduate program or the emphasis in environment and behavior.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Architectural Studies program (<http://gradschool.missouri.edu/academics/programs/architectural-studies/masters.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Architectural Studies

Admission Contact Information

Dr. Newton D'souza (dsouzan@missouri.edu)
137 Stanley Hall; Columbia, MO 65211
573-882-7496

Admission Criteria

Fall deadline: January 15
Minimum GPA: 3.0
Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

Required Application Materials

To the Program:

- Application statement of graduate goals and educational objectives discussing which of the department's emphasis areas is of interest; intentions regarding MA or MS; and request for a specific advisor.
- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online.
- Graduate School application or mailed directly to the program.

Master of Science

The design and research-based MS plan of study is often undertaken in preparation for professional practice or design education. The project is conducted in emphasis areas as described below. Within each of these emphases, specific course work is selected based on subject matter, the type of design project and its research application. The culmination of the degree is a professionally reviewed design project with supporting written report. The research-based MS plan of study is often undertaken as preparation for the doctoral degree.

Research is conducted in one of two emphasis areas — design with digital media or environment and behavior studies. Within each emphasis area, specific course work is selected based on subject matter and the type of research method selected — quantitative, qualitative or a combination of both methods. The culmination of the degree is the written research thesis.

MS students must complete a final oral examination by an approved faculty committee and submit a presentation proposal at a professional conference or a manuscript in a professional journal.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study.

Environment and Behavior Studies Emphasis

The Environment and Behavior Studies emphasis area focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and related environmental design disciplines. A design project leads to the MA and research leads to the MS or PhD degrees.

Current study areas in environment and behavior include:

- Design Research
- Design Education
- Learning Environments for Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Health Care Design
- Sustainable Environments
- Housing, Neighborhood Design
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy Evaluation

Contact Dr. Newton D'souza for more information about the department's graduate program or the emphasis in environment and behavior.

Design with Digital Media Emphasis

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines. This program of study has an emphasis on design with digital media leading to MA or MS degrees. The MA is a project-based program of study, whereas the MS is research-based.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Simulation
- Human-computer interaction aspects of digital tools for design

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media Dr. Bimal Balakrishnan for course content and research proposals.

MS in Architectural Studies with Emphasis in Design with Digital Media

MU's Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and transdisciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the Digital + Media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Assistant Professor P. M. Landhuis*, H. Leidy**, V. Vieira-Potter*, J. Pailla*

Teaching Associate Professor D.E. Brigham*

Teaching Assistant Professor M. Raedeke*

Joint Faculty M. J. Petris**, L. Pulakat**, R. S. Rector**

Adjunct Faculty F. W. Booth*8, K. L. Fritsche**, L. Hillman*, J. A. Ibdah**, D. Lubahn**

Adjunct Instructor A. Cohen, L. Hudson*, J.B. Mann, T. Roberts, J. Schnell, R. Sharp, D. Showers, D. Smith

Extension Faculty J. Britt-Rankin*, C. Gabel

Professor Emeritus R. P. Dowdy*, M. McDonald, B. L. O'Dell, T. R. Thomas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in exercise physiology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- PhD in Exercise Physiology (p. 522)

About the Program

The **Exercise Physiology PhD program** is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

The **Exercise Physiology Graduate Program offers a PhD degree.**

This exercise physiology degree is designed to prepare students for careers in exercise physiology or exercise physiology/nutrition. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantships are available on a competitive basis.

Graduate

PhD in Exercise Physiology

Degree Requirements

The PhD program requires a minimum of 72 hours beyond the bachelor's degree. A committee of 4 faculty members must approve all graduate courses, including those from other universities. The graduate course work includes 15 hours in exercise physiology, plus coursework in physiology, nutrition and biochemistry. Research requirements include NUTR_S 7500 (9 hours of research projects) and NUTR_S 9090 (12 hours dissertation). One semester of teaching experience is required, as is participation on a major external grant proposal. NUTR_S 8850 Advanced Exercise Physiology is used as your competency course and the student must earn a B or better. If the student has a similar course in their transfer courses from a masters, then another course will be used - this must be approved by the graduate director and committee.

Note: Specific Masters courses (36 hours maximum) may be counted on the doctoral program at the discretion of the student's committee (3 members in dept., 1 member outside). Target ~ 72 hours beyond B.S.)

Exercise Science (Major Field)

NUTR_S 7001	Topics in Nutritional Science	1-99
NUTR_S 7500	Research in Nutritional Sciences	9
NUTR_S 7970	Sports Nutrition	2
NUTR_S 8850	Advanced Exercise Physiology	3

Physiology Area (1st support area)

MPP 7310	Mammalian Cell Function	3
----------	-------------------------	---

MPP 9430	Cardiovascular Physiology	3
NUTR_S 8870	Exercise Metabolism	3
V_BSCI 8420	Veterinary Physiology	5
V_BSCI 9435	Skeletal Muscle	3
Nutrition (2nd support area)		
BIOCHM 7270	Biochemistry	3
BIOCHM 7272	Biochemistry	3
NUTR_S 7340	Human Nutrition II Lecture	3
NUTR_S 8085	Problems in Nutritional Sciences	3
NUTR_S 8310	Nutritional Biochemistry of Lipids	3
NUTR_S 8340	Nutrition in Human Health	3
Research and Statistics		
ESC_PS 8630	Qualitative Methods in Educational Research I	3
ESC_PS 9620	Qualitative Methods in Educational Research II	3
3rd Advanced Statistic or Design Course		3
Other Courses		
AN_SCI 8420	Endocrinology	3
AN_SCI 9442	Vitamins and Minerals	4
V_BSCI 9467	Neural Control of the Circulation	3
NUTR_S 9090	Doctorate Research in Nutritional Sciences	12

Sample Plan of Study

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encouraged to work out their plan of study with their advisor.

Qualifying Process

NUTR_S 8850 Advanced Exercise Physiology is used as your competency course and the student must pass with the grade of B or better. If the student comes in with a master's course similar to NUTR_S 8850, then another course can be used as the competency course and will be approved by the committee and graduate director (e.g. NUTR_S 8870 Exercise Metabolism).

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidates doctoral program committee, must embody the results of original and significant investigation and must be the candidates own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Deadline for Fall entrance: Dec 30

Minimum TOEFL Scores

Internet-based test (iBT)	Paper-based test (PBT)
100	600

Minimum GRE Scores

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to Aug. 1, 2011	500	500	3.5
On or after Aug. 1, 2011	150	150	3.5

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (<http://gradschool.missouri.edu/academics/programs/exercise-physiology/phd-in-exercise-physiology.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied.

Exercise and Physiology Program Applicants must have a 3.00 undergraduate GPA, a 3.5 graduate GPA and meet the minimum GRE scores to be admitted. TOEFL scores are required from international applicants. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

Undergraduate

- BSHES in Human Development and Family Studies (p. 525)
 - with emphasis in Child Development and Education (p. 526)
 - with emphasis in Child Life Specialist (p. 527)
 - with emphasis in Family and Consumer Sciences Education (p. 528)
 - with emphasis in Family and Lifespan Development (p. 528)
- Minor in Human Development and Family Studies (p. 529)

The Department of Human Development and Family Studies (HDFS) combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields.

The department offers the BS HES with a major in Human Development and Family Studies. The student working with children and/or adults is encouraged to maximize the resources offered by the family. The student concerned with the quality of family life must also recognize the intricate spiral of changing needs in the developing individual. Students in the HDFS major must select one of the emphasis areas listed below. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Director of Graduate Studies: Ashlie Lester

- MA in Human Development and Family Studies (p. 529)
 - with emphasis in Early Childhood Development (p. 530)
 - with emphasis in Family and Community Services (p. 530)
 - with emphasis in Family Studies (p. 531)
 - with emphasis in Gerontology (p. 531)
 - with emphasis in Lifespan Development (p. 531)
 - with emphasis in Youth Development (p. 531)
- MS in Human Development and Family Studies (p. 531)
 - with emphasis in Early Childhood Development (p. 532)
 - with emphasis in Family and Community Services (p. 533)
 - with emphasis in Family Studies (p. 533)
 - with emphasis in Lifespan Development (p. 533)

The College also offers a PhD in Human and Environmental Studies with an emphasis Human Development and Family Studies (p. 535). They also offer Graduate Certificates in the following related areas: Youth Development Specialist (p. 568), Youth Development Program Management and Evaluation (p. 568), Gerontology (p. 568), and Geriatric Care Management (p. 568).

The Department of Human Development and Family Studies offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Selected in 2002 and again in 2007 as the Most Outstanding Graduate Department on campus, we have a nationally recognized faculty whose research productivity consistently has been ranked in the top 5% of the 235 family studies programs across the country. Our department houses former journal editors as well as a past president of the National Council of Family Relations.

We have a well-established mentoring program, which begins as soon as the student is accepted into HDFS. We actively prepare our students to become successful academic scholars both in terms of research and teaching. The range of careers for which we prepare our students is unparalleled. Since 2000, our program has placed more faculty into research extensive family studies departments than any other program in the U.S. We also prepare PhDs and master's students for applied careers in administration, program evaluation, and program development. Our alumni have positions with universities and colleges in the United States, Canada, and Korea. We have developed an outstanding reputation as a place to study individual and family diversity and multiculturalism across the life course. Because we define diversity and multiculturalism broadly, our focus is on the multitude of ways that individuals and families may differ, including, but not limited to race, ethnicity, socioeconomic status, age, family structure, nationality, geographic location, and sexual orientation.

Financial Aid from the Department

All applicants for the on-campus program are automatically considered for assistantships, fellowships, and other funding packages. Check the HDFS website or ask the program contact for additional details.

About the Master's Degrees

The Department of Human Development and Family Studies offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Areas of Study

On-campus students selecting the MA or MS degree may specialize in family studies, child life, early childhood development, life span development, family mediation, human services program (emphasis in administration or policy), or a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in gerontology, youth development, or family and community services.

Master's Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Human Services Administration: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours

- Dual MSorMA/JD: approximately 113 hours

About the PhD

The Department of Human Development and Family Studies PhD degree prepares students for careers in research, college or university teaching, or leadership positions in public and private human service institutions.

PhD Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (<http://hdfs.missouri.edu/>).

About the Online Certificate Programs

The Department of Human Development and Family Studies offers four online graduate certificates with specialization in youth development, youth development program management and evaluation, gerontology, and geriatric care management.

Note: Courses taken for any of the above certificate programs may be applied toward the related online MA degrees in youth development and gerontology. Up to 12 credits of coursework from the courses taken for any of the certificate programs may be applied toward their related online MA degrees described above.

For more information please follow the link to the certificate of interest (p. 567).

Undergraduate

BSHES in Human Development and Family Studies

Major Program Requirements

Majors in all of the emphasis areas in HDFS must complete the core courses below:

Grade of 2.0 (C) or better required in these core classes:

Major Program Requirements		16
H_D_FS 1600	Foundations of Family Studies	3
H_D_FS 2200	Research Methods in Human Development and Family Studies	3
H_D_FS 2300	Multicultural Study of Children and Families	3
H_D_FS 2400	Principles of Human Development	4
H_D_FS 3420	Early and Middle Childhood	3

Child Development Laboratory Courses such as H_D_FS 3500, H_D_FS 3700, and H_D_FS 4971 have prerequisites and require the consent of the instructor. Students must have full HDFS status. Because enrollment is limited, students must see the HDFS advisor to be placed on the waiting list a minimum of two semesters before anticipated enrollment. Students in Families and Lifespan Development may substitute another practicum experience with consent of department advisor.

In addition to the required courses, the degree program is completed with courses selected from within the department, from other areas in the College of Human Environmental Sciences, and from the social sciences and allied professional fields such as education, recreation, business and health. For some students, courses in the arts, humanities, or biological sciences may be appropriate.

BSHES in Human Development and Family Studies with Emphasis in Child Development and Education

Major Program Requirements

This emphasis is designed to prepare graduates for positions of responsibility and leadership in public and private preschool programs, child-care centers, infant-care programs, after-school programs and other educational and social service settings that serve families and children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

The general goal of the emphasis area is to provide instruction and experience to help students gain competence in working with young children and their families. The emphasis is on understanding human development, with primary focus on child development, early childhood education, and children's relationships with family members. Attention is also devoted to the development of working relationships with professional colleagues and community workers.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

A. Requirements in H D FS

Subject area requirements in HDFS		61
H_D_FS 1600	Foundations of Family Studies *	3

Total Credits: 123-127

BSHES in Human Development and Family Studies with Emphasis in Child Life Specialist

Major Program Requirements

This emphasis prepares graduates to provide for the social-emotional needs, and support the optimum growth and development of children and their families in a variety of health care settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support, help them understand children's psychosocial needs, and provide tools to help them minimize psychological trauma.

Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences (evidence-based practice). Students who successfully complete the degree program should be well prepared to take the Child Life Professional Certification Exam presented by the Child Life Council Certification Committee. The student's last semester is spent outside Columbia in a 480-clock-hour (minimum) clinical internship in a pediatric hospital setting.

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical internship experiences to attain this degree, as well as be eligible to take the national Child Life Certification Exam to obtain the CCLS credential. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must also pass mandatory drug screens, criminal background checks, and any other additional qualification checks prior to beginning any clinical education experience in child life.

Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to the beginning of these experiences may result in dismissal from the child life degree program in HDFL. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (p. 17), including general education (p. 18), **in addition to** the degree requirements below. All courses in sections A-B below are required.

A. Requirements in HDFL			68
H_D_FS 1600	Foundations of Family Studies *		3

* Student must earn 2.00 (C) or better in course.

** Students are admitted to H_D_FS 4130 on a competitive, space-available basis. Interview applications are considered the semester before the student wishes to take H_D_FS 4130. Student must have attained a 3.0 CUM GPA to be eligible to interview, in addition to completing coursework requirements. See advisor for more information.

*** Students are admitted to H_D_FS 4993 after successful completion of H_D_FS 4130 (grade of 3.0 or higher). Students must be selected by hospitals outside of Columbia through a student initiated competitive application process.

**** Should be completed prior to end of sophomore year.

BSHES in Human Development and Family Studies with Emphasis in Family and Consumer Sciences Education

Major Program Requirements

This emphasis prepares graduates for certification to teach family and consumer sciences from birth to grade 12 in public schools. The program combines courses in the human sciences with courses in teacher preparation from the College of Education. This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Due to changes from the Missouri Department of Elementary and Secondary Education (DESE) that affect certification beginning in 2017, new students are not being accepted into this program at this time.

Semester Plan

There is not a semester plan built for this emphasis area.

BSHES in Human Development and Family Studies with Emphasis in Family and Lifespan Development

Major Program Requirements

Courses required for Certified Family Life Educator can be found at <http://hdfs.missouri.edu/current.html> under the CFLE Certification information.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

A. Requirements in H D FS		56-62
STAT 1200	Introductory Statistical Reasoning	3
or STAT 1300	Elementary Statistics	
or STAT 1400	Elementary Statistics for Life Sciences

Supporting Coursework	3 General Elective	3
	16	15-18

Total Credits: 120-123

Minor in Human Development and Family Studies

A minor in HDFS may be obtained by taking 16 credits in the following courses:

H_D_FS 1600	Foundations of Family Studies ¹	3
H_D_FS 1610	Intimate Relationships and Marriage	3
H_D_FS 2300	Multicultural Study of Children and Families ¹	3
H_D_FS 2400	Principles of Human Development ¹	4
H_D_FS 3420	Early and Middle Childhood (or equivalent) ^{1,2}	3
or H_D_FS 3430	Adolescence and Young Adulthood	
or H_D_FS 3440	Adulthood and Aging	
		16

Total Credits 16

1 Students must earn a 2.0 or better in these courses

2 Students who have completed PSYCH 2410, ESC_PS 2500 cannot receive credit for H_D_FS 3420.

Admission Criteria for Campus Programs

Fall deadline: December 15

Spring deadline: November 15

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

Minimum GRE scores:

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1, 2011	50th percentile	50th percentile	50th percentile
On or After August 1, 2011	50th percentile	50th percentile	50th percentile

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
Required Application Materials for Campus Programs (submitted online via the apply yourself system)
- Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

Admission Criteria for Online Programs

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Online Programs

submit online via the applyyourself system

- Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors).
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Family Mediation: 36 hours
- Human Services: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master's students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student's advisor and approved by the student's faculty committee. Students who wish to pursue the thesis option must petition the department's graduate

faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (<http://hdfs.missouri.edu/>).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student's program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (<http://hdfs.missouri.edu/>).

Time Limits for Masters' Degree Completion

Students working toward the master's degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

Human Environmental Sciences

Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subject-matter area of interest. In addition, a master's degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Faculty

Professor L. Ganong**, J. Ispa**, S. Jorgensen*, B. Schwarz**, R. B Tofle**

Millsap Professor G. Carlo**

Curator's Professor M. Coleman**

Associate Professor T. Cooney**, R. Phillips**, D. Rudy**, D. L. Sharpe**, R. O. Weagley**

Assistant Professor B. Balakrishnan**, N. D'souza**, S. Killoren, L. Manfra**, C. Proulx**, R. Ravert**, D. Schramm**, R. Yao*

Assistant Teaching Professor M. Goldschmidt*, S. L. Green-Ivey, F. Palermo, C. Reeser*

Assistant Research Professor M. Herzog*

Professor Emeritus R. Helmick*, K. Thornburg*

Instructor R. Law, AFC

Associate State Personal Finance Specialist B. Procter, L. Schrader, A. Zumwalt

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in human environmental sciences, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

137 Stanley Hall
882-7224

Director of Graduate Studies: Sandy Rikoon

- PhD in Human Environmental Sciences (p. 534)
 - with emphasis in Architectural Studies (p. 534)
 - with emphasis in Human Development and Family Studies (p. 535)
 - with emphasis in Personal Financial Planning (p. 536)
 - with emphasis in Textile and Apparel Management (p. 537)

Graduate

PhD in Human Environmental Sciences

Students are required to pick an emphasis area to obtain the PhD in Human Environmental Sciences. Please see the individual emphasis degree requirement pages (p. 534) for more information.

PhD in Human Environmental Sciences with Emphasis in Architectural Studies

Admission Contact Information

Dr. Newton D'szoua (dsouzan@missouri.edu)
137 Stanley Hall; Columbia, MO 65211
573-882-7496

Admission Criteria

Fall deadline: January 15

Minimum GPA: 3.0

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

Required Application Materials

To the Graduate School:

- All required Graduate School documents.
- Statement of graduate goals and educational objectives discussing which of the department's emphasis areas of interest; intentions regarding PhD; and request for a specific adviser (upload to online application).

To the Architectural Studies Program:

- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online Graduate School application.

Doctor of Philosophy

The Doctor of Philosophy (PhD) degree is designed for individuals who are interested in acquiring the knowledge and skills that are needed to conduct substantive, innovative, and original research that contributes to the theoretical and methodological foundation of architecture and interior design, and the dissemination of this research through teaching, publication, and practice. To this end, the curriculum is structured so that students move gradually from overview of architectural research to the identification and pursuit of major and minor areas of specialization and, finally, to highly specialized original dissertation research. This framework promotes stimulating intellectual discourse among individuals with varying research philosophies and interests.

Both faculty and students interact within this framework to develop an enhanced understanding of how specialized research contributes to the definition and evolution of an improved theoretical and methodological basis for architectural studies.

In order to pass examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:

- It demonstrates authority in the candidate’s field and shows evidence of command of knowledge in relevant fields;
- It shows that the candidate has a thorough grasp of the appropriate methodological techniques and an awareness of limitations;
- It makes a distinct contribution to knowledge because of the originality of the approach and/or interpretation of the findings and, in some cases, the discovery of new facts;
- It demonstrates an ability to communicate research findings effectively in the professional arena and in an international context;
- It is a careful, rigorous and sustained piece of work demonstrating that a research “apprenticeship” is complete and the holder should be admitted to the community of scholars in the discipline.

Doctoral study in Architectural Studies, College of Human Environmental Sciences, is research-based and expands knowledge in the “major” areas of either environment and behavior or design with digital media. The major area is defined as that area of specialization in the doctoral program within which the student is expected to write his/her dissertation.

Students will choose a “supportive cognate area” which is intended to reinforce the development of an understanding of the discipline. Supporting cognate area courses are selected from a broad spectrum of disciplines providing students with the opportunity to design an individualized program of study that capitalizes on their unique interests and talents.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/ organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry -- Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study.

PhD Requirements

The University of Missouri requires a minimum of 72 semester hours beyond the baccalaureate degree for the PhD. Coursework from the Design Research concentration can be applied to the program of study. The doctoral program committee provides departmental approval of the student’s plan of study (Form D-2), a list of the courses and the credit to be earned in each of them, which will, when completed:

- Prepare the student for research or scholarly investigation in the chosen field of study.
- Satisfy the credit-hour and residency requirement of the department.
- Satisfy any special requirements (collateral field, other special research skills) imposed by the department.
- Satisfy the Graduate School’s requirement for a minimum of 15 hours of course work at the 8000/9000 level (exclusive of research, problems and independent study experiences).

The committee also recommends to the vice provost/dean, as part of the plan of study, any request for transfer of graduate credit. The student must substantially complete the course work outlined in the plan of study to the satisfaction of the doctoral program committee and the Graduate School before being declared ready for the comprehensive examination.

The research-based plan of study leads to the written doctoral dissertation. The dissertation is distinctive because it demonstrates the ability to conceive of and execute scholarly research, and it makes a contribution of new knowledge to the discipline. Research is conducted in one of the two interest areas — environment and behavioral studies or design with digital media. Specific course work is chosen based on subject matter and the type of research method selected— quantitative, qualitative or a combination of both.

PhD students must complete a final oral examination by an approved faculty committee and submit a presentation proposal at a professional conference or a manuscript in a professional journal.

- Official Transcripts

Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (<http://hdfs.missouri.edu/>).

Qualifying Process for Doctoral Students

To be officially admitted to the HDFS doctoral program, students generally must have completed a master's degree in HDFS or a related field, although exceptions are granted.

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student's program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (<http://hdfs.missouri.edu/>).

PHD Comprehensive Matriculation Exam

The comprehensive exam consists of two parts. Part I involves an in-house written and oral examination over

1. theory, methods, and statistics,
2. the student's area of specialization and core content, and
3. the student's collateral area.

The advisor is responsible for collecting questions from all five committee members, constructing the exam, and getting approval for the final version of the exam from available committee members. It is expected that the written exam will take the student no longer than 8 hours (e.g., two half-days or one full day) to complete. The written exam will be assessed by the committee and the student will meet with the committee for an oral defense of the written exam. If this part of the exam is passed the student moves to Part II of the comprehensive exam, which involves writing a grant pre-proposal and, if approved, a full grant proposal as outlined in the HDFS Graduate Handbook. For a detailed description of the comprehensive exam timeline please refer to the Handbook found on the HDFS website (<http://hdfs.missouri.edu/>).

Admission to Candidacy

After students pass Parts I and II of the comprehensive examination, they complete the D3 form to apply to the Division of Graduate Studies for admission to doctoral candidacy. Following admission to candidacy, students complete a prospectus for the dissertation project. The prospectus includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student's dissertation prospectus.

Time Limits on Degree Completion

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts the semester that the first class beyond the master's degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study. HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

Petitions for Extension

On petition of the candidate, an extension of 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate's department, an extension of this time limit may be granted by the Graduate School.

PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning

College of Human Environmental Sciences
239 Stanley Hall
573-882-9343
<http://pfp.missouri.edu/>

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

Application Deadlines

Fall deadline: February 1
Spring deadline: October 1

Admission Criteria

- Minimum TOEFL scores (for ESL applicants only):

Internet-based test (iBT)	Paper-based test (PBT)
79	550

We also accept IELTS scores

Item	Score
International English Language Testing System (IELTS)	6.5

- Minimum GPA: 3.0 in last 60 hours

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- 3 letters of recommendation
- GRE or GMAT scores

- Statement of Purpose
- Official transcripts

PhD in Human Environmental Sciences with Emphasis in Textile and Apparel Management

Admission Contact Information

Leona Nichols (nicholslm@missouri.edu)
 137 Stanley Hall; Columbia, MO 65211
 573-882-7317
http://tam.missouri.edu/academics_grad.html

Application Deadlines

Fall deadline: February 1 (January 15 for early financial support considerations)
 Spring deadline: September 1

Admission Criteria

- Minimum GPA: 3.0 in last 60 hours
- Bachelor’s degree from an accredited college or university in textile and apparel management or related field. Those with unrelated majors will need to do make-up work
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
79	550

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	500/500	160
On or After August 1, 2011	153/144	3.0

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Statement of professional objectives (upload to application)
- Departmental application (upload through the Graduate School application or send directly to department)
- Three letters of recommendation (upload preferred, or send directly to department)
- Official transcripts from every college or university you have attended
- GRE Scores
- Latest vitae or resume
- TOEFL scores if international student

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Adjunct Instructor A. Cohen, L. Hudson*, J. B. Mann, T. Roberts, J. Schnell, R. Sharp, D. Showers, D. Smith

Extension Faculty J. Britt-Rankin*, C. Gabel

Professor Emeritus R. P. Dowdy*, M. McDonald, B. L. O'Dell, T. R. Thomas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in exercise physiology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the

University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MS in Nutrition and Exercise Physiology (p. 538)
 - with emphasis in Exercise Physiology (p. 538)
 - with emphasis in Nutritional Sciences (p. 539)

Graduate

MS in Nutrition and Exercise Physiology

The MS in Nutrition and Exercise Physiology has two emphasis areas. Please see the emphasis area pages in Nutritional Sciences (p. 539) and in Exercise Physiology (p. 538) for degree information.

MS in Nutrition and Exercise Physiology with emphasis in Exercise Physiology

About the Program

The graduate program in Nutrition and Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

Exercise physiology faculty seek to develop new knowledge in the area of exercise training, exercise metabolism, and obesity. The current focus of the program is physical inactivity, exercise and nutrition strategies for weight management and the prevention of lifestyle related diseases. The mission of the Exercise Physiology Graduate Program is to train graduate students who will provide professional leadership and research developments in areas of human health and sports conditioning.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Exercise physiology research emphasizes human studies, but other exercise models are available on campus, including the pig (Vet. Biomedical Sci.) and the rat (Medical School and VA).

Degree Requirements

Students in Nutrition and Exercise Physiology emphasis will choose between two options for final completion: thesis or internship. The

course curriculum will be the same for both options. Students will complete a minimum of 36 credits of graduate coursework beyond the bachelor's degree. For a full explanation of the thesis/non-thesis options, see section below on Thesis/Non-Thesis Requirements (p. 539) or view the information on the programs website: <http://ns.missouri.edu/exphyma.html>.

Prerequisite courses for the program are a B or better in General Chemistry, Physiology, Human Anatomy, Kinesiology and Physiology of Exercise. Biochemistry, Organic Chemistry and Nutrition are recommended.

Core Graduate Courses		
ESC_PS 8630	Qualitative Methods in Educational Research I	3
ESC_PS 8840	Quantitative Analysis in Educational Research II	3
NUTR_S 7085	Problems in Nutritional Sciences	1
NUTR_S 7340	Human Nutrition II Lecture (biochem. prereq.)	3
NUTR_S 7500	Research in Nutritional Sciences	3
NUTR_S 7970	Sports Nutrition	2
NUTR_S 8090	Masters Research in Nutritional Sciences	4
or NUTR_S 8095	Internship in Exercise Physiology	
NUTR_S 8850	Advanced Exercise Physiology	3
Suggested Electives (14 hours)		
NUTR_S 7001	Topics in Nutritional Science (Etiology of Obesity)	3
NUTR_S 7200	Sports Performance and Conditioning	3
NUTR_S 7330	Human Nutrition II Laboratory	2
NUTR_S 7840	Cardiovascular Health and Fitness	3
NUTR_S 8030	Etiology of Obesity	3
NUTR_S 8310	Nutritional Biochemistry of Lipids	3
NUTR_S 8340	Nutrition in Human Health	3
NUTR_S 8870/ MPP 9431	Exercise Metabolism	3
BIOCHM 7270	Biochemistry	3
BIOCHM 7274	Biochemistry Laboratory	5
V_BSCI 8420	Veterinary Physiology	5
V_BSCI 9435	Skeletal Muscle	3
Select to give 36 hours total		

Thesis/Non-Thesis Requirements

1. Internship Option

This option is oriented toward improving a practitioner's professional proficiency in the applied aspects of exercise physiology. The program of study will include courses and learning experiences that will develop the student's knowledge in the theoretical aspects of exercise physiology. They will be required to complete an approved internship (300 hours minimum) which will provide them with experience in an applied or clinical setting. The student is responsible for identifying and securing the internship. Students selecting this option will graduate with the some preparation for credentialing from organizations including the American College of Sports Medicine (ACSM) and the National Strength and Conditioning Association (NSCA). Completion of this degree as well as obtaining certification will prepare students for careers such as registered clinical exercise physiologists, strength and conditioning coaching, personal trainer or wellness coach, health/fitness instructor, as well as in other health professions.

2. Thesis Option

This option is research-oriented, focusing on designing and conducting research in exercise physiology. The program of study will include courses and learning experiences that will maximize a student's progress in developing lab skills and critical thinking that will enable the student to continue his/her education in a research-oriented area. The thesis option requires a minimum of 36 hours of graduate credit. A written thesis, based upon original research, that is the student's own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

Exercise Physiology Program Applicants must have a 3.0 undergraduate GPA and competitive GRE scores to apply. TOEFL scores are required from international applicants. Entering MS students are expected to have a B or better in undergraduate training in biology, chemistry, anatomy/physiology, and exercise physiology. It is also advantageous to have nutrition, biochemistry and organic chemistry, but not required. Courses should be taken at an accredited institution.

Applications to our graduate programs should be **submitted by December 30th**. While applications received after that date will still be considered, there is no guarantee that we will have space for additional students. Admission at the beginning of spring semester is possible, but limited.

Minimum TOFEL Scores

Internet-based test (iBT)	Paper-based test (PBT)
100	600

Minimum GRE Scores

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to Aug. 1, 2011	500	500	3.5
On or after Aug. 1, 2011	150	150	3.5

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

MS in Nutrition and Exercise Physiology with emphasis in Nutritional Sciences

About the Program

The Nutritional Sciences Graduate Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant

writing. Graduate study in Nutritional Sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and MU Nutritional Center for Health (MUNCH). The graduate program is administered by the Department of Nutrition and Exercise Physiology in association with the College of Human Environmental Sciences, the College of Agriculture, Food and Natural Resources, and the School of Medicine.

On or after Aug. 1, 2011	150	150	3.5
--------------------------	-----	-----	-----

Degree Requirements

The program consists of a total of 30 hours of credit beyond the bachelor's degree, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and/or Problems courses. The master of science degree is awarded in part for the completion of a thesis. The thesis is based upon original research, that is student's own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The minimum department course requirements for the master of science degree are:

NUTR_S 7340	Human Nutrition II Lecture	3
BIOCHM 7270 & BIOCHM 7272	Biochemistry and Biochemistry	6
NUTR_S 8310	Nutritional Biochemistry of Lipids	3
NUTR_S 8340	Nutrition in Human Health	3
AN_SCI 9442	Vitamins and Minerals	4
Statistics		6
NUTR_S 8087	Masters Seminar in Nutritional Sciences	1
NUTR_S 8090	Masters Research in Nutritional Sciences	4
Total Credits		30

Thesis/Non-Thesis Requirements

The M.S. program in Nutritional Sciences only offers a thesis option.

Students earning this degree must provide a written thesis, based upon original research, that is student's own work and that demonstrates a capacity for research and independent thought. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

Minimum TOFEL Scores

Internet-based test (iBT)	Paper-based test (PBT)

Undergraduate

- BSHES in Nutritional Sciences (p. 542)
 - with emphasis in Medical Dietetics (p. 542)
 - with emphasis in Nutrition and Fitness (p. 543)
 - with emphasis in Nutritional Sciences (p. 544)
- Minor in Nutritional Sciences (p. 545)

The program leading to the BS in Human Environmental Sciences with a major in Nutritional Sciences offers designated emphasis areas in medical dietetics, nutrition and fitness, and nutritional sciences. A minor is also available in nutritional sciences. The department administers graduate programs in nutrition and exercise physiology, nutritional sciences and exercise physiology.

Students who want to explore the major can take NUTR_S 1034 Nutrition, Current Concepts and Controversies or NUTR_S 1340 Introduction to Exercise and Fitness.

The department has a set GPA requirement for students entering each program. The specific requirements can be found on our department website <http://ns.missouri.edu>

Dietetics - This is a Professional Program. Admission is competitive and application requirements include a minimum cumulative grade point average of 3.2 on a 4.0 scale and completion of (or in progress at the time of application) the following prerequisite courses: 15-20 hours of general education requirements, human physiology with laboratory, organic chemistry with laboratory, biochemistry, basic nutrition with physiology and chemistry prerequisites, and food preparation with chemistry prerequisite.

Nutrition and Fitness - students may transfer into the program as pre-N&F, but will be unable to take the upper level courses until they advance into the program. To advance, a student must earn a minimum 2.65 CUM GPA after 30 credit hours, including completion of CHEM 1320, BIO_SC 1010/BIO_SC 1020 or BIO_SC 1500, MATH 1100 or equivalent, NUTR_S 1340 and Physiology (MPP 3202 or MPP 3333 /MPP 3337) or Anatomy (PTH_AS 2201). These classes require a C or better.

Nutritional Sciences (pre_Med)- To transfer into the Nutritional Sciences Program, students are required to have a minimum GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course to be eligible.

Graduate

Information on our graduate degrees can be found under the following listings:

Nutrition Area Program (p. 656) (PhD)

Nutrition and Exercise Physiology (p. 538) (MS)

Exercise Physiology (p. 522) (PhD)

The catalog provides a complete list of degree options (p. 5) at the University of Missouri.

Undergraduate

BSHES in Nutritional Sciences

Major Program Requirements

The BSHES in Nutritional Sciences is offered with three emphasis options: Medical Dietetics, Nutrition and Fitness, and Nutritional Sciences. All degree requirements are listed at the emphasis level.

Semester Plan

Refer to the Semester Plans in the emphasis areas.

BSHES in Nutritional Sciences with Emphasis in Medical Dietetics

Major Program Requirements

The Coordinated Program in Dietetics combines academic course work with supervised practice in healthcare and other practice settings. Enrollment is limited to a maximum of 15 students per year. To apply, students must have completed (or be enrolled in) prerequisite courses and have a GPA of at least 3.2. Students must achieve a course grade of "B-" or better in BIOCHM 3630 and NUTR_S 2340 or equivalent transfer courses approved by faculty.

Graduates are eligible to take the Registration Examination for Dietitians, which is required to obtain the RD (Registered Dietitian) or RDN (Registered Dietitian Nutritionist) credential. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. For additional information, please go to <http://ns.missouri.edu/>.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

Emphasis Core Requirements

Pre-Professional Requirements

BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory (and)	5

BSHES in Nutritional Sciences with Emphasis in Nutrition and Fitness

Major Program Requirements

Graduates of this program are prepared for employment in fitness and community nutrition or to continue in graduate studies in a variety of areas, including exercise science. Many students move into the health professions fields from this degree or seek out additional certifications. This is a rapidly expanding area with opportunities in corporate and commercial industries, government and non-profit sectors. Typical employment responsibilities include fitness assessment, nutrition education, health and wellness, exercise supervision and program administration.

Students desiring to declare Nutrition and Fitness as a major are required to have earned a minimum overall GPA of 2.65 after 30 credit hours, including completion of the following courses or their equivalents with a minimum grade of "C":

BIO_SC 1010 & BIO_SC 1020 or BIO_SC 1500	General Principles and Concepts of Biology and General Biology Laboratory Introduction to Biological Systems with Laboratory	5
CHEM 1320	College Chemistry I	4
MATH 1100	College Algebra	3
NUTR_S 1340	Introduction to Exercise and Fitness	3
MPP 3202	Elements of Physiology	5
PTH_AS 2201	Human Anatomy Lecture	3

Prior to achieving these requirements, students will be considered "Pre-Nutrition and Fitness" and are not eligible to take upper-level Nutrition and Fitness courses. Students must complete all university

requirements, including general education (p. 18), in addition to the degree requirements below.

Science Foundation

BIO_SC 1010 & BIO_SC 1020 or BIO_SC 1500	General Principles and Concepts of Biology and General Biology Laboratory Introduction to Biological Systems with Laboratory	5
CHEM 1320	College Chemistry I	4
CHEM 2030	Survey of Organic Chemistry	3
CHEM 2130	Organic Laboratory I (recommended))	2
BIOCHM 3630	General Biochemistry	3
MPP 3202 or MPP 3333 & MPP 3337	Elements of Physiology Fundamentals of Human Physiology and Human Physiology Laboratory	5
PTH_AS 2201	Human Anatomy Lecture	3
PTH_AS 2203	Human Anatomy Laboratory (recommended))	2

BSHES in Nutritional Sciences with Emphasis in Nutritional Sciences

Major Program Requirements

This program of study provides a strong foundation in science with a focus on human nutrition. Graduates are prepared for advanced study in human nutrition, medicine, dentistry or other health-related careers. This program is an excellent choice for pre-dental or pre-medicine students.

To transfer into the nutritional sciences program, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required NUTR_S course.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Science Foundation

BIO_SC 1500	Introduction to Biological Systems with Laboratory	3-5
CHEM 1320	College Chemistry I	4
CHEM 1330	College Chemistry II	4
CHEM 2100	Organic Chemistry I	3
CHEM 2110 & CHEM 2130	Organic Chemistry II and Organic Laboratory I (&)	5
PHYSICS 1210 & PHYSICS 1220	College Physics I and College Physics II (&)	8-10
or PHYSICS 2750 & PHYSICS 2760	University Physics I and University Physics II	

Math and Statistics

MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5

STAT 2500	Introduction to Probability and Statistics I	3
or ESC_PS 4170	Introduction to Applied Statistics	
Core Curriculum		
NUTR_S 2340	Human Nutrition I	3
NUTR_S 2450	Nutrition Throughout the Life Span	3
NUTR_S 4330	Human Nutrition II Laboratory	2
NUTR_S 4340	Human Nutrition II Lecture	3
NUTR_S 4950	Capstone: Research in Nutritional Sciences	2
NUTR_S 4951	Nutrition Research Communication	1
BIOCHM 4270	Biochemistry	3
BIOCHM 4272	Biochemistry	3
BIO_SC 2200	General Genetics	4
BIO_SC 2300	Introduction to Cell Biology	4
MPP 3202	Elements of Physiology	5
or MPP 3333 & MPP 3337	Fundamentals of Human Physiology and Human Physiology Laboratory	
or BIO_SC 3700	Animal Physiology	

Choose a minimum of 5 hours from selected courses in biochemistry, chemistry, food science, medical pharmacology and physiology, nutritional sciences or molecular microbiology and immunology

Electives to equal 120 credit minimum

Additional courses may be required to meet college requirements or career objectives. On-campus research internships are available and highly recommended.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year

Minor in Nutritional Sciences

The minor in nutritional sciences is intended for students majoring in biological sciences, biochemistry, health and exercise sciences or related fields.

Minor core requirements consist of a minimum of 15 hours of nutrition (not exercise/fitness) courses, including NUTR_S 2340: Human Nutrition I (this class is only offered in the spring semester) plus 12 hours from the list of approved nutrition courses.

Minor core requirements

NUTR_S 2340	Human Nutrition I	3
Select 12 credits from the following approved nutrition courses:		12
NUTR_S 1310	Basic Concepts of World Nutrition (spring/summer)	
NUTR_S 2222	Landscape of Obesity (spring)	
NUTR_S 2380	Diet Therapy for Health Professionals (fall, spring, summer)	
NUTR_S 2450	Nutrition Throughout the Life Span (spring)	
NUTR_S 2460	Eating Disorders (fall)	
NUTR_S 3131	International Nutrition and Exercise Physiology (intersession)	
NUTR_S 4330	Human Nutrition II Laboratory (fall)	
NUTR_S 4340	Human Nutrition II Lecture (fall)	
NUTR_S 4360	Nutritional Assessment (fall)	
NUTR_S 4370	Nutrition Therapy I (spring)	
NUTR_S 4380	Nutrition Therapy II (fall)	
NUTR_S 4590	Community Nutrition (summer)

Admissions

Students must have a University of Missouri cumulative GPA of at least a 2.5 (2.25 for Financial Counseling), based on at least 50 credits attempted, and a C (2.0) or better in FINPLN 2183 and FINPLN 3283 to be admitted to either the Personal Financial Planning or Financial Counseling professional programs of the department. Personal Financial Management Services cumulative GPA of at least a 2.0, based on at least 50 credits attempted, and a C (2.0) or better in FINPLN 2183 and FINPLN 3283. A grade in the D range is allowed in only one course in the professional program, regardless of emphasis area.

Faculty

Associate Professor D. L. Sharpe**, R. O. Weagley**, R. Yao**

Assistant Professor M. Guillemette*

Teaching Assistant Professor S. Ivey

Instructor R. Law

Extension Assistant Professor L. Schrader, A. Zumwalt

Extension Associate G. McCaulley

Emeritus Professor E. Metzen, P. Lieurance

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSHES in Personal Financial Planning (p. 547)
 - with emphasis in Financial Counseling (p. 547)
 - with emphasis in Personal Financial Management Services (p. 547)
 - with emphasis in Personal Financial Planning (p. 548)
- Minor in Personal Financial Management Services (p. 549)
- Minor in Personal Financial Planning for Agricultural Economics majors (p. 549)¹

- Minor in Personal Financial Planning for Finance majors (p. 549)¹

An undergraduate certificate in Personal Financial Planning is currently under review at the Coordinating Board for Higher Education. For current status contact Robert Weagley @ WeagleyR@missouri.edu.

- ¹ These minors will be discontinued if the undergraduate certificate in Personal Financial Planning is approved.

Graduate

Personal Financial Planning Graduate Programs
College of Human Environmental Sciences
239 Stanley Hall
573-882-9343
<http://pfp.missouri.edu/>

Director of Graduate Studies: Rui Yao

- MS in Personal Financial Planning (p. 550)
 - with emphasis in Consumer and Family Economics (p. 550)
 - with emphasis in Personal Financial Planning (p. 551)
- Certificate in Personal Financial Planning (p. 551)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Personal Financial Planning (p. 536).

Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students' programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.

Certification Information

Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning and an Applied Master's Degree. There is also a registered graduate certificate leading to the CFP® certification examination.

Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid

If you wish to be considered for internal assistantships, fellowships or other funding packages, check the program website or contact the director of graduates studies, Rui Yao (yaor@missouri.edu) for details.

Faculty Areas of Study

Students have opportunity to work closely with department faculty who are widely recognized professionals in various aspects of personal financial planning and consumer and family economics. Faculty research

interests cover a broad spectrum of financial and economic issues, including, but not limited to college savings and affordability, retirement savings, health care financing, risk analysis, labor supply and household production choices, consumer behavior, consumer expenditure patterns, consumer credit use, insurance demand, and low-income financial literacy. More information is available at: <http://pfp.missouri.edu/research.html>.

Undergraduate

BSHES in Personal Financial Planning

Major Program Requirements

The Department of Personal Financial Planning offers a major in Personal Financial Planning with three emphasis areas: Personal Financial Planning, Financial Counseling, and Personal Financial Management Services. In each option, the student must complete requirements for each phase of the degree program listed below:

- University general education requirements (p. 18)
- College of Human Environmental Sciences graduation requirements
- Major core courses
- Professional specialization

Major core requirements

FINPLN 2083	Financial Planning Careers	1
FINPLN 2183	Personal and Family Finance	3
FINPLN 4188	Community Agencies and Volunteerism	3
FINPLN 4380	Assessing the American Dream	3
FINPLN 4387	Consumer and Household Economics	3

Social and Behavioral Sciences requirements

PSYCH 1000	General Psychology	3
SOCIOL 1000	Introduction to Sociology	3
ECONOM 1014	Principles of Microeconomics *	3
or AG_EC 1041	Applied Microeconomics	
ECONOM 1015	Principles of Macroeconomics *	3
or AG_EC 1042	Applied Macroeconomics	

Total Credits 25

* Require a minimum grade of C (2.0).

Semester Plan

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

BSHES in Personal Financial Planning with Emphasis in Financial Counseling

Major Program Requirements

This emphasis prepares students to be financial counselors. Financial counselors require expertise in a variety of financial counseling and planning strategies, therefore students take a mix of classes in financial counseling, financial planning, human development and family studies (HDFS) and social work. This emphasis satisfies the academic requirements for the Accredited Financial Counselor (AFC) designation and allows the graduate to sit for the AFC exam, which is offered by the Association for Financial Counseling and Planning Education (AFCPE). Graduates must complete education requirements, pass the AFC exam, obtain professional experience and agree to adhere to the AFCPE code of ethics before being able to use the AFC mark.

Students must complete all university requirements, including general education (p. 18), major core requirements and social and behavioral sciences requirements (p. 547), in addition to the degree requirements for the professional specialization below.

Professional specialization requirements

ACCTCY 2036	Accounting I	3
or ACCTCY 2010	Introduction to Accounting	
ECONOM 3229	Money, Banking and Financial Markets	3
FINPLN 3282	Financial Counseling	3
FINPLN 3283	Financial Planning: Computer Applications	3
FINPLN 4187	Tax Planning	3
FINPLN 4382	Financial Planning: Risk Management	3
FINPLN 4383	Financial Planning: Investment Management	3
FINPLN 4993	Internship in Personal Financial Planning	3
H_D_FS 4610	Stress and Resilience in Families	3
H_D_FS 4620	Family Interaction	3
H_D_FS 4630	The Process of Divorce	3
MANGMT 3540	Introduction to Business Law	3
MATH 1400	Calculus for Social and Life Sciences I	3
SOC_WK 2000	Exploration in Social and Economic Justice	3
SOC_WK 4710	Social Justice and Social Policy	3
STAT 1300	Elementary Statistics	3
or STAT 2500	Introduction to Probability and Statistics I	
Total Credits		48

BSHES in Personal Financial Planning with Emphasis in Personal Financial Management Services

Major Program Requirements

This emphasis prepares students for entry into a variety of positions that require expertise in the management of individual and family financial resources, combined with a specialized focus in a supportive area of study. Positions are available in a wide array of occupations.

Students must complete all university requirements, including general education (p. 18), major core requirements and social and behavioral sciences requirements (p. 547), in addition to the degree requirements for the professional specialization below.

Emphasis core requirements

MATH 1400	Calculus for Social and Life Sciences I	3
FINPLN 3282	Financial Counseling	3
FINPLN 3283	Financial Planning: Computer Applications	3
FINPLN 4187	Tax Planning	3
FINPLN 4382	Financial Planning: Risk Management	3
FINPLN 4383	Financial Planning: Investment Management	3
ACCTCY 2036	Accounting I	3
or ACCTCY 2010	Introduction to Accounting	
ECONOM 3229	Money, Banking and Financial Markets	3
MANGMT 3540	Introduction to Business Law	3
STAT 1300	Elementary Statistics	3
or STAT 2500	Introduction to Probability and Statistics I	

Professional specialization electives

These courses are selected by students from a list of approved courses to complement their degree. Suggested tracks are provided below. Each track represents nine of the eighteen required professional electives. Contact the Student Services Office of the College of Human Environmental Sciences or your departmental advisor to focus your additional credits in a specific area. (NOTE: Tracks will not appear on diploma or transcript.)

Total Credits 48

Tracks: Students may choose one cluster as nine hours of the eighteen hours of Professional Electives. Each cluster, when combined with the Supporting Course Requirements, meets the requirements for a minor in the College of Business, or Economics. Students are strongly encouraged to focus their remaining nine hours in course work that complements their sub-emphasis. At least one of these courses shall be at the 4000 level, or above.

Real Estate Track

FINANC 3000	Corporate Finance	3
FINANC 4500	Principles of Real Estate	3
FINANC 4510	Real Estate Appraisal	3
or FINANC 4520	Real Estate Finance and Investment	
Additional Approved Credits		9

Personal Investments Track

FINANC 3000	Corporate Finance	3
FINANC 4020	Investments	3
FINANC 4220	Portfolio Management	3
Additional Approved Credits		9

Relationship Banking Track

FINANC 3000	Corporate Finance	3
FINANC 4030	Financial Intermediaries and Markets	3
FINANC 4130	Management of Financial Institutions	3
Additional Approved Credits		9

Sales Marketing Track

MRKTNG 3000	Principles of Marketing	3
MRKTNG 4220	Consumer Behavior	3
MRKTNG 4380	Buying and Supply Chain Management	3
Additional Approved Credits		9

Benefits Administration Track

MANGMT 3000	Principles of Management	3
-------------	--------------------------	---

MANGMT 4020	Human Resource Management	3
MANGMT 4210	Management Science	3
Additional Approved Credits		9

Consumer Behavior Research Track

MRKTNG 3000	Principles of Marketing	3
MRKTNG 4050	Marketing Research	3
MRKTNG 4220	Consumer Behavior	3
Additional Approved Credits		9

General Economics Track

ECONOM 3251	Theory of the Firm	3
ECONOM 4351	Intermediate Microeconomics	3
ECONOM 4353	Intermediate Macroeconomics	3
ECONOM 4325	The International Monetary System	3
Additional Approved Credits		9

Generalist Track

Eighteen hours approved by the departmental advisor or other faculty member. At least nine of these hours must be at the 4000 level, or above.

Semester Plan

A sample plan is not currently available. Contact the department for additional information.

BSHES in Personal Financial Planning with Emphasis in Personal Financial Planning

Major Program Requirements

The Personal Financial Planning emphasis is registered with the Certified Financial Planner Board of Standards. This emphasis satisfies the academic requirements for the Certified Financial Planner™ certification and allows the graduate to sit for the comprehensive CFP® certification examination. Graduates must complete education requirements, pass a national professional exam, obtain professional experience, and agree to adhere to the professional code of ethics before being able to use the CFP® marks. This is the best option.

Students must complete all university requirements, including general education (p. 18), major core requirements and social and behavioral sciences requirements (p. 547), in addition to the degree requirements for the professional specialization below.

ACCTCY 2036	Accounting I	3
ACCTCY 2037	Accounting II	3
ECONOM 3229	Money, Banking and Financial Markets	3
FINPLN 3282	Financial Counseling	3
FINPLN 3283	Financial Planning: Computer Applications	3
FINPLN 4187	Tax Planning	3
FINPLN 4382	Financial Planning: Risk Management	3
FINPLN 4383	Financial Planning: Investment Management	3
FINPLN 4386	Financial Planning: Employee Benefits and Retirement Planning	3
FINPLN 4389	Financial Planning: Capstone	3
FINPLN 4393	Financial Planning: Estate and Gift Planning	3
FINPLN 4993	Internship in Personal Financial Planning	1-99
MANGMT 3540	Introduction to Business Law	3

MATH 1400	Calculus for Social and Life Sciences I	3
STAT 2500	Introduction to Probability and Statistics I	3
STAT 3500	Introduction to Probability and Statistics II	3

Semester Plan

A sample plan is not currently available. Contact the department for additional information.

Minor in Personal Financial Management Services

This minor is intended for majors other than Finance and Agricultural Economics.

Required Courses:

FINPLN 2083	Financial Planning Careers	1
FINPLN 2183	Personal and Family Finance	3
FINPLN 3283	Financial Planning: Computer Applications	3
FINPLN 4387	Consumer and Household Economics	3
Choose at least two of the following:		6
FINPLN 3282	Financial Counseling	
FINPLN 4187	Tax Planning	
FINPLN 4380	Assessing the American Dream	
FINPLN 4382	Financial Planning: Risk Management	
FINPLN 4383	Financial Planning: Investment Management	
Total Credits		16

Minor in Personal Financial Planning for Agricultural Economics majors

Students can minor in Personal Financial Planning to complement their degrees in journalism, business, arts and science or other disciplines that provide expertise in matters related to personal financial management. A specific agreement exists with the Department of Agricultural Economics allows students from those departments to complete a particular set of courses and be awarded a minor in Personal Financial Planning that, upon completion, allows them to sit for the CFP® certification examination.

Minor in Personal Financial Planning

FINPLN 2083	Financial Planning Careers	1
FINPLN 2183	Personal and Family Finance	3
FINPLN 3283	Financial Planning: Computer Applications	3
FINPLN 4387	Consumer and Household Economics	3
Select at least one of the following:		3
FINPLN 4382	Financial Planning: Risk Management	
FINPLN 4383	Financial Planning: Investment Management	
Total Credits		13

Majors Incorporating the Personal Financial Planning Minor

These minors, when combined with appropriate courses in the major, create a CFP® Board Registered degree option. Please see a faculty advisor for details.

PFP Minor with Agricultural Economics

FINPLN 2083	Financial Planning Careers	1

Total Credits		22

Graduate

MS in Personal Financial Planning

Degree Information

Master of Science (thesis option)

The thesis-based Master of Science program requires a minimum of 30 hours. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills. Course work culminates in a master's thesis.

Five-Year Bachelor of Science/Master of Science Option

The curriculum of this 150-Hour Program provides students with a comprehensive background in financial planning procedures and practice, meeting the Certified Financial Planner Board of Standards' education requirement, allowing a student to sit for the CERTIFIED FINANCIAL PLANNER™ exam. Coursework encompasses root disciplines of economics, mathematics, and statistics and focuses on the interaction between the household and the financial sector. Students will acquire a broad background in business related courses, as well as skills in communication, professional practice, and use of computer information systems.

Applied Master of Science (non-thesis option)

The Applied Master of Science is a 36 hour program. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ exam and to broaden the practitioner's understanding of the various factors that can affect and enhance a client's financial security and economic well-being. Coursework culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning. (This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA degree option also requires 36 hours to complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

Application Deadlines

Fall deadline: February 1

Spring deadline: October 1

*Exceptions will be considered on a case by case basis

Admission Criteria

- Minimum TOEFL scores (for ESL applicants only):

Internet-based test (iBT)	Paper-based test (PBT)
79	550

We also accept IELTS scores

Item	Score
International English Language Testing System (IELTS)	6.5

- Minimum GPA: 3.0 in last 60 hours

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- 3 letters of recommendation
- GRE or GMAT scores
- Statement of Purpose
- Official transcripts
- Résumé

MS in Personal Financial Planning with emphasis in Consumer and Family Economics

Degree Requirements

Please review the **Resident Research and Policy Master's Degree Program Handbook** or the **Resident Applied Master's Degree Program Handbook**. (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf)

Sample Plan of Study

Each student's plan of study will vary to some degree, depending on the specific program and the student's background, needs, and career plans. Please review the **Resident Research and Policy Master's Degree Program Handbook** or the **Resident Applied Master's Degree Program Handbook**.

Thesis/Non-Thesis Track

The resident **Research and Policy Master of Science** track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus. This masters degree also prepares students for subsequent work on a doctoral degree.

Acceptance to this program requires GRE or GMAT scores that meet department standards. This program requires a minimum of 30 hours to complete.

Download the **Resident Research and Policy Master's Degree Program Handbook**.

The resident **Applied Master of Science** is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation.

Acceptance to this program requires GRE or GMAT scores that meet department standards. The Applied Master's program is a non-thesis 36-hour program. This program is registered with the Certified Financial Planner Board of Standards, Inc. and is designed to prepare students to sit for the CFP® exam.

Download the **Resident Applied Master's Degree Program Handbook**.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (<http://gradschool.missouri.edu/academics/programs/personal-financial-planning/masters.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Personal Financial Planning With Emphasis in Personal Financial Planning

Degree Requirements

Please review the **Resident Research and Policy Master's Degree Program Handbook** or the **Resident Applied Master's Degree Program Handbook**. (http://pfp.missouri.edu/documents/graduate/Applied_MS_handbook.pdf)

Sample Plan of Study

Each student's plan of study will vary to some degree, depending on the specific program and the student's background, needs, and career plans. Please review the **Resident Research and Policy Master's Degree Program Handbook** or the **Resident Applied Master's Degree Program Handbook**.

Thesis/Non-Thesis Track

The resident **Research and Policy Master of Science** track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus. This masters degree also prepares students for subsequent work on a doctoral degree.

Acceptance to this program requires GRE or GMAT scores that meet department standards. This program requires a minimum of 30 hours to complete.

Download the **Resident Research and Policy Master's Degree Program Handbook**.

The resident **Applied Master of Science** is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation.

Acceptance to this program requires GRE or GMAT scores that meet department standards. The Applied Master's program is a non-thesis 36-hour program. This program is registered with the Certified Financial Planner Board of Standards, Inc. and is designed to prepare students to sit for the CFP® exam.

Download the **Resident Applied Master's Degree Program Handbook**.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (<http://gradschool.missouri.edu/academics/programs/personal-financial-planning/masters.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

Graduate Certificate in Personal Financial Planning

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program designed to prepare students to sit for the national CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor's degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard's education requirement, which is one of four requirements leading to approval to use the CFP® designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP® code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

Courses Required for the Applied Master's Degree and the Graduate Certificate in Personal Financial Planning:

FINPLN 7382	Financial Planning: Risk Management	3
FINPLN 7383	Financial Planning: Investment Management	3
FINPLN 7187	Financial Planning: Tax Planning	3
FINPLN 7386	Financial Planning: Employee Benefits and Retirement Planning	3
FINPLN 7393	Financial Planning: Estate and Gift Planning	3
FINPLN 7389	Financial Planning: Capstone	3

Elective Courses

Since the Personal Financial Planning Certificate is a registered program under the oversight of a professional organization granting a professional designation, all courses are required. Electives may be taken as part of the Applied Master of Science (non-thesis options), the Master of Science (thesis option) and the doctoral programs.

Undergraduate

- BSW in Social Work (p. 554)

Social work is a dynamic and growing human service profession that plays an increasingly important and visible role in our everyday lives. The major educational objective of the undergraduate program in the School of Social Work, which is a unit in the College of Human and Environmental Sciences, is to prepare students for competent and skillful first-level professional social work practice.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by, and a charter member of, the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers.

Departmental Honors

Candidates for departmental Honors must be students in the BSW professional program with a 3.5 or higher GPA. The student must complete honors designated sections of SOC_WK 4951 Research for Social Work Practice, SOC_WK 4952 Research Methods for Social Work, and SOC_WK 4971 Undergraduate Field Practicum - Honors section .

- To be considered the applicant must have 30 graded MU cumulative hours.
- The student must submit his/her application.
- The student must submit a personal statement from outlined questions presented by the BSW Faculty.
- Students are rated by Faculty and accepted or denied based upon the presented information.
- The BSW Field Instructor, Faculty and Student identify early the Field Placement site, Learning Agreement that he/she will complete while in their field placement. The Learning Agreement will identify strategic research information that the student will compile for the agency to utilize in the future.
- The student will complete these outlined research criteria within the 400 clock hours learning plan for his/her field placement.
- Career & Employment Outlook

Jobs in social work are expected to grow faster than average into the 21st century. Through social work's unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students are allowed only two grades of a C+ in the professional program.

The Professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will participate in a social service agency for a 400 hour supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional social work program if they meet the following criteria:

1. At least 42 credits completed (second semester sophomore status) by the application deadline and
2. 55 credits expected before the beginning of the first semester (fall) of the BSW foundation curriculum
3. Minimum 2.5 cumulative GPA required
4. Completion of required liberal arts prerequisite courses (denoted with *) with minimum grades in "C" range or higher.
 - Anthropology* (student's choice) (Recommend ANTHRO 1300, ANTHRO 1350, ANTHRO 2030)
 - BIO_SC 1010*
 - College Algebra*
 - COMMUN 1200*
 - Economics (macro or micro)*
 - ENGLISH 1000*
 - History* (HIST 1100, HIST 1200, HIST 1400, HIST 2440, HIST 2210) and Political Science (POL_SC 1100, POL_SC 2100)
 - Philosophy* (PHIL 1000, PHIL 1100, or PHIL 1200 recommended)*
 - PSYCH 1000*
 - SOCIOL 1000*
5. Submission of BSW Professional Program application, includes personal statement of outlined questions, 3 references (1 work related experience or volunteer work experience, one academic related experience) is necessary for consideration, and transcript by early deadline of February 15 or late deadline of May 15.

Students wanting to explore social work as a major may take the following exploratory courses:

SOC_WK 1110	Introduction to the Social Work Major	1
SOC_WK 1115	Social Welfare and Social Work	3
SOC_WK 2000	Exploration in Social and Economic Justice	3

- Graduate Certificate in Military Social Work (p. 559)

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri's premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri's tightly interlocked missions of teaching, research, outreach, and economic development.

Careers

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates for leadership in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

Undergraduate

BSW in Social Work

Major Program Requirements

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Degree Core Requirements

English Composition (grade must be C range)

ENGLSH 1000	Exposition and Argumentation *	3
-------------	--------------------------------	---

Writing intensive classes

Writing intensive classes ¹		6
--	--	---

Humanities (grades for communication and philosophy must be in the "C" range)

COMMUN 1200	Public Speaking	3
-------------	-----------------	---

Select one of the following: 3

PHIL 1000	General Introduction to Philosophy	
-----------	------------------------------------	--

PHIL 1100	Introduction to Ethics	
-----------	------------------------	--

PHIL 1200	Logic and Reasoning	
-----------	---------------------	--

Additional humanities ² 3

Science and Math Reasoning Proficiency (grades must be in the C range)

BIO_SC 1010	General Principles and Concepts of Biology (with a minimum grade in the C range)	3
-------------	--	---

or BIO_SC 1500 Introduction to Biological Systems with Laboratory

Lab Science AND Physical or Mathematical Science		9
--	--	---

Approved for social work students:

SOC_WK 4310	Social Statistics	
-------------	-------------------	--

ESC_PS 4170	Introduction to Applied Statistics	
-------------	------------------------------------	--

STAT 1200	Introductory Statistical Reasoning	
-----------	------------------------------------	--

STAT 1300	Elementary Statistics	
-----------	-----------------------	--

College Algebra

MATH 1100	College Algebra ^{*,3}	3
-----------	--------------------------------	---

Social science (minimum grade for anthropology, economics and government must be in the C range)

Economics (micro or macroeconomics) *		3
---------------------------------------	--	---

Anthropology (student's choice) *		3
-----------------------------------	--	---

History *		3

Social work elective (4000-level) in a field of practice		3
--	--	---

Total Credits 112

- Students accepted into the professional BSW program must take SOC_WK 2220 and SOC_WK 4951, which must both be designated "WI." No additional "WI" courses are required.
- Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.
- One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.
- Two courses that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, foreign civilizations, religious studies and human development and family studies, black studies and women and gender studies. SOC_WK 2000 Exploration in Social and Economic Justice, is strongly preferred as one of the courses. Students are urged to check with their advisor before selecting courses.
- In addition to the above liberal arts requirements and the 46-credit Professional BSW Core (inclusive of SOC_WK 2220), students select electives to reach the total credit requirement. SOC_WK 1115 Social Welfare and Social Work is strongly recommended.

Capstone Requirements

All students accepted into the professional BSW program must take SOC_WK 4971 Undergraduate Field Practicum and SOC_WK 4970 Senior Professional Seminar as their capstone experience.

Basic Skills Credit Limitations

No more than 4 credits may be taken from "skills" courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR
ENGLSH 1000*	3 COMMUN 1200*	3

Graduate

MSW in Social Work

Admission Contact Information

Crystal Null (nullc@missouri.edu)
 724 Clark Hall; Columbia, MO 65211
 573-884-9385
<http://ssw.missouri.edu/msw.html>

The University of Missouri's Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all

sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private. The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.

Application Deadlines

Fall deadline: January 15
 Spring deadline: September 15
 Summer deadline: January 15

Admission Criteria

- Minimum GPA: 3.0
- Bachelor's degree from an accredited college or university with the applicant's undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (iBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

Test Portion	Total Minimum Score
Listening	22
Reading	21
Writing	23
Speaking	26

Minimum IELTS scores:

Test Portion	Total Minimum Score
Listening	6.5
Reading	6.5
Writing	6
Speaking	8

Prerequisites

All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. SOC_WK 4310 is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, , STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the statistics course prior to application submission is preferred and strongly recommended. If an applicant is enrolled in a statistics course at the time of application and accepted into the MSW Program, the acceptance will be "pending successful completion of the approved statistics class".

Note: Priority admission deadline for Regular Standing Applicants: January 15. A student qualifies for Regular Standing Admission if s/he has an undergraduate degree in any field other than Social Work. Any applicant who applies after the priority deadline will be considered on the rolling admission cycle until April 15.

Note: Priority admission deadline for Advanced Standing applicants: January 15 (for summer admission), September 15 (for spring admission). An applicant qualifies for Advanced Standing admission if they have a bachelor's degree in Social Work earned within the last seven (7) years. Any Advanced Standing applicant who applies after the priority deadline of January 15 for summer admission will be considered on a rolling admission cycle until April 15. Any Advanced Standing applicant that applies after the priority deadline of September 15 for spring admission will be considered on a rolling admission cycle until November 15.

Read more about Regular vs. Advanced Standing below.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the MSW Program:

- Personal statement (see department instruction)
- Resume/CV
- Three letters of reference from persons who can address the applicant's intellectual ability and interpersonal skills, potential for graduate education, and potential for professional social work practice through observation in an educational or work (paid or volunteer) setting. Letters of reference should not be submitted from friends or family
- Unofficial transcripts
- Advanced standing students only: the most recent copy of your field evaluation (see department instruction)

Plans of Study

Preparation for professional leadership encompasses two major components:

Foundation

Develops knowledge and skills related to social interaction, human development, community dynamics, social policy and societal values applicable to generalist social work practice.

Foundation Courses

SOC_WK 7710	Social Policy and Service Delivery in Social Work	3
SOC_WK 7720	Foundations of Human Behavior	3
SOC_WK 7730	Direct Practice	3
SOC_WK 7740	Community and Organization Dynamics	3
SOC_WK 7760	Foundations of Justice	3
SOC_WK 7952	Research Methods in Social Work	3
SOC_WK 7971	Graduate Field Practicum I	6
Total Credits		24

Concentrations

The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within

these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

Advanced Clinical Social Work Practice: includes strategies of clinical intervention with socially and economically disadvantaged individuals, families, and small groups in a variety of health, mental health, family and children services, and senior citizen agencies.

Concentration Courses: Clinical

Advanced Clinical Selective (choose 1 from those offered) *		3
Advanced Policy Elective (choose 1 from those offered) *		3
Advanced Diversity Elective (choose 1 from those offered) *		3
Elective (must be graduate level; could be an additional Diversity Elective or Policy Elective course) *		3
SOC_WK 7770	Strategies of Clinical Social Work Intervention	3
SOC_WK 7820	DSM V and Psychopathology: A Social Work Perspective	3
SOC_WK 8952	Evaluative Research in Clinical Social Work Practice	3
SOC_WK 8970	Professional Practice Seminar I	3
SOC_WK 8971	Graduate Field Practicum II	12
Total Credits		36

* Please note: Clinical electives, policy electives, diversity electives, and other elective courses offered will vary from year to year.

Policy, Planning and Administration in Human Services: includes intervention strategies that effect change at the organizational, interagency, community, and societal levels to advance social and economic justice for consumers of social and human services and to empower practitioners within those agencies.

Concentration Courses: Policy, Planning & Administration

Advanced Policy Elective (choose 1 from those offered) *		3
Advanced Diversity Elective (choose 1 from those offered) *		3
Elective (must be graduate level; could be an additional Diversity Elective or Policy Elective course) *		3
SOC_WK 7780	Fundamentals of Social Work Administration	3
SOC_WK 7920	Advanced Foundations of Human Behavior for Administrators	3
SOC_WK 8350	Management of a Social Agency	3
SOC_WK 8953	Evaluative Research in Social Work Planning and Administration	3
SOC_WK 8970	Professional Practice Seminar I	3
SOC_WK 8971	Graduate Field Practicum II	12
Total Credits		36

* Please note: Clinical electives, policy electives, diversity electives, and other elective courses offered will vary from year to year.

Course Format

On Campus MSW Program courses are primarily offered in-person. A few foundation, concentration & elective courses are offered online through

Blackboard, learning management system licensed to the University of Missouri for online courses. An occasional elective course is offered in a combined format (ITV and in-person), with the on-campus MSW student attending in-person while the course is broadcast to the Off Campus MSW Program students through Interactive Television (ITV).

Traditional in-person courses offered to the Off Campus MSW Program are held on the campuses of collaborating regional universities for these programs: Southeast Missouri State University (SEMO), Missouri University of Science and Technology in south central Missouri, Missouri Western State College and Northwest Missouri State University in northwest Missouri and Truman State University in north central Missouri.

The Off-Campus program also collaborates with a number of offices throughout the state to provide courses through Interactive Television (ITV). Other courses are offered online through Blackboard, a learning management system licensed to the University of Missouri for online courses. Elective courses offered online or ITV elective courses may have both on and off campus students enrolled in a common section. When this occurs with courses offered through ITV, on campus students attend the ITV classroom where the class is originated.

An Online MSW Program for Advanced Standing students will be offered beginning Fall 2014. The online MSW is designed for part-time study with two courses, typically 6 credit hours of course work, per semester. All courses are offered online through Blackboard with the exception of the practicum, which requires 680 hours of supervised work at an approved agency.

Regular Standing: Non-Social-Work Bachelor's

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time students to the regular 60-credit hour program at the beginning of the fall semester only. Part-time students are admitted at the beginning of fall and spring semester.

Advanced Standing: Bachelor's in Social Work (BSW)

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

Starting Dates

On-campus students admitted to the Regular Standing Program are admitted either in fall semester (full-time or part-time study) or spring semester (part-time study only). On-campus students admitted to the Advanced Standing Program are admitted either in the spring or summer session. On-campus Advanced standing students in the policy, planning and administration concentration must enter in the spring semester. Off-campus students admitted to the Regular Standing Program are admitted for fall semester (part-time) in even numbered years and off-campus students admitted to the Advanced Standing Program are admitted for fall semester (part-time) in odd numbered years.

Length of Study & Satisfactory Progress

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and

graduate in 12-17 months (3 semesters of study). Part-time Regular Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

PhD in Social Work

Admission Contact Information

Shannon Mezzanotte (mezzanottes@missouri.edu)
724 Clark Hall; Columbia, MO 65211

About the Program

The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.

Financial Aid from the Program

Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Admission Criteria

Early priority fall deadline: Midnight October 31

Rolling admission fall deadline: Midnight January 15

- Minimum GPA: 3.0; 3.5 in graduate study
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

- An MSW or related master's is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This requirement may be waived for applicants with additional graduate work.
- Minimum of two years post-master's practice experience encouraged.

Note: These criteria are used flexibly to assess the applicant's potential for study and research in this program.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Director of the Doctoral Program in Social Work (either via the grad schools online application system or mailed in hard copy):

- Cover letter
- Three letters of recommendation
- Resume

- Writing proficiency sample
- Personal statement
- GRE test scores from within the last 7 years
- A personal interview is required, and if possible, will be arranged at MU. A Skype interview may be utilized in some cases.

Plan of Study

The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master's degrees. The curriculum consists of a minimum of 51 post MSW semester credit hours or, for applicants without an MSW, 63 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Graduate Certificate in Gerontological Social Work

The Graduate Certificate in Gerontological Social Work at the University of Missouri is designed to expand the pool of professionals who are qualified to work in settings with older adults and their families. The certificate focuses on practice strategies of social work intervention from micro, mezzo, and macro perspectives.

This certificate will be available to students enrolled in the MU School of Social Work master's program as part of their graduate training as well as a stand-alone certificate to graduate level clinical social work practitioners and graduate level policy and administration social work practitioners who wish to augment their knowledge and skills in this area. Approval of the MSW Program Director and Committee, and Director of the Graduate certificate in Gerontological Social Work is required for admission to the certificate program.

Participants in the Gerontological Social Work Certificate program build awareness and expertise for work in settings that serve older adults and their families. Participants are trained in micro, mezzo, macro and clinical strategies known to be effective in work with older adults and their families. An interdisciplinary, multi-level emphasis will be provided in the program since a large component of elder care is the coordination and management of services provided by various disciplines. Course work will utilize a bio-psycho-social-cultural perspective emphasizing the ecological perspective, Lawton's theory of environmental press, resiliency, and the functional age model of family work. In addition, students will build awareness of aging policies and services, and policies that impact persons with disabilities and women.

As a result of earning the Gerontological Social Work Graduate Certificate, practicing MSW's or Post-MSW degree practitioners can expect enhanced employability due to the development of new skills that respond to growing societal need. Current MSW students benefit from the graduate certificate by completing a concentrated course of study on a

population group and obtaining specialty training with population/services needing graduate level social workers.

Because all of the Gerontological Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a current MSW student can conveniently earn the Gerontological Social Work Graduate Certificate while completing their MSW. No additional coursework is required.

The Gerontological SW Grad Certificate consists of 12 credit hours.

Required Courses		6
SOC_WK 7480	Helping Strategies with Older Persons	
SOC_WK 8240	Social Policy for Older Adults	
Choose one:		3
Clinical Selective		
SOC_WK 7490	Family Treatment	
SOC_WK 8050	Resiliency and Solution-Focused Practice	
SOC_WK 8030	Client Case Management, Networking, and Advocacy	
SOC_WK 8040	Narrative Approaches to Social Work Practice	
Policy, Planning & Administrative students choose from:		
SOC_WK 8230	Women, Poverty, and Mental Health	
SOC_WK 8210	Disability Rights Advocacy	
Students will choose from a variety of acceptable interdisciplinary courses for fourth class		3

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with older adults. The Director of Field in conjunction with the Director of the Graduate Certificate in Gerontological Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience.

For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Colleen Galambos at galambosc@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/gerontological-social-work-graduate-certificate/gerontol-sw-ge/Gedt.html>

Graduate Certificate in Military Social Work

The School of Social Work offers graduate certificates in Military Social Work and in Gerontological Social Work.

The Graduate Certificate in Military Social Work is designed to expand the pool of professionals who are qualified to work in settings with military personnel, veterans, and their families. The Certificate focuses on clinical practice strategies of social work intervention with military personnel and their families to improve the mental health and health of this population.

This certificate is available both to students enrolled in the MU School of Social Work Masters of Social Work (MSW) Program as part of their graduate training as well as a stand-alone entity to civilian graduate level clinical social work practitioners who wish to augment their knowledge and skills in this area. Only Clinical MSWs and MSW Clinical students will

be accepted to the Military SW Graduate Certificate Program. Approval of the MSW Program Director is required for admission into the graduate certificate program.

Because all of the Military Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a student can conveniently earn the Military SW Graduate Certificate while completing their MSW. No additional coursework is required.

The Military SW Grad Certificate consists of 12 credit hours.

Required courses

SOC_WK 7340	Military Culture (counts as diversity elective)	3
SOC_WK 7485	Military Social Work (counts as free elective)	3
SOC_WK 8060	Trauma Practice and Crisis Intervention (counts as clinical selective)	3

Elective (choose one)

SOC_WK 8210	Disability Rights Advocacy	3
SOC_WK 7470	Organizational Issues in Social Work Practices in Child Welfare (counts as policy elective)	3

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with military personnel, veterans or their families. The Director of Field in conjunction with the Director of the Graduate Certificate in Military Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience. For additional information about the Graduate Certificate in Military Social Work, please contact Dr. David Albright at albrightd@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/military-social-work-graduate-certificate/military-sw-ge/Gedt.html>

Faculty

Professor J. Hawley**, P. S. Norum**,
Associate Professor J. Ha-Brookshire**, J. Parsons**
Assistant Professor M. Sohn*, S. Song*
Instructor K. McBee-Black
Professor Emeritus K. G. Dickerson, D. Saxon, L. E. Wilson**
Associate Professor Emeritus B. Dillard*, J. H. Pry

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSHES in Textile and Apparel Management (p. 562)
- Minor in Textile and Apparel Management (p. 565)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM's award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through course work, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to be a top recruit for industry positions.

Students who major in Textile and Apparel Management may choose from several options and tracks:

- Apparel Marketing and Merchandising
- Apparel Product Development

- International Apparel Marketing and Merchandising
- International Apparel Product Development

These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses (p. 562). Students may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 17) including University general education (p. 18).

Students who want to explore Textile and Apparel Management may take the following classes:

T_A_M 1100	Introduction to the Textile and Apparel Industry	3
T_A_M 1200	Basic Concepts of Apparel Design and Production	3
T_A_M 1300	Softgoods Retailing	3
T_A_M 2200	Science of Textiles	3
T_A_M 2400	Global Consumers	3

Graduate

Director of Graduate Studies: Jung Ha-Brookshire

- MA in Textile and Apparel Management (p. 565)
- MS in Textile and Apparel Management (p. 566)

The College also offers a PhD in Human Environmental Sciences with an emphasis Textile and Apparel Management (p. 537).

Graduate programs in textile and apparel management offer the following areas of study: apparel manufacturing management; apparel marketing and merchandising; e-commerce, supply chain management, economic/trade issues related to domestic and global textile and apparel industry; historical and cultural aspects textiles and dress; and consumer marketplace concerns.

Careers

Career opportunities for graduates exist in many areas, such as higher education, industry analysis, museums, product development, production management and cooperative extension.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Undergraduate

BSHES in Textile and Apparel Management

Major Program Requirements

There are four tracks available in Textile and Apparel Management: (1) Apparel Marketing and Merchandising, (2) International Apparel Marketing and Merchandising, (3) Apparel Product Development, or (4) International Apparel Product Development. These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas.) Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college requirements, students must meet all University graduation requirements (p. 17) including University general education. Some courses in the Professional Program are allowed to double count for General Education requirements (p. 18). This program can be completed in 120 hours. The following courses are required of all students majoring in Textile and Apparel Management (TAM).

Core Requirements

T_A_M 1100	Introduction to the Textile and Apparel Industry	3
T_A_M 1200	Basic Concepts of Apparel Design and Production	3
T_A_M 1300	Softgoods Retailing	3

Minor in Textile and Apparel Management

An undergraduate minor in Textile and Apparel Management is available for students pursuing a major in other departments. Students who wish to complete a minor should declare the minor by completing the form at http://hes.missouri.edu/students_minorapp.html. A minimum of 18 credit hours is required with at least six hours at the 2000 level or above. Prerequisites for all courses must be met, or the student must have the permission of the instructor.

Required Courses:

T_A_M 1100	Introduction to the Textile and Apparel Industry	3
T_A_M 2200	Science of Textiles	3
Select 12 hours from list below in consultation with a TAM Advisor:		
Apparel Industry Studies		
T_A_M 2400	Global Consumers	3
T_A_M 3200	Softgoods Quality Evaluation	3
T_A_M 4110	Global Sourcing	3
T_A_M 4400	The Clothing/Textile Consumer: Research and Analysis	3
T_A_M 4549	International Experiential Learning in Textiles and Apparel	1-99
T_A_M 4949	Field Training in Textiles and Apparel Management	1-99
T_A_M 4998	Experiential Learning in Textiles and Apparel	1-99
Historical/Behavioral Studies in Dress		
T_A_M 2500	Social Appearance in Time and Space	3
T_A_M 3510	History of Western Dress	3
T_A_M 3520	19th and 20th Century Western Dress	3

Apparel Merchandising & Retailing		
T_A_M 1300	Softgoods Retailing	3
T_A_M 2300	Retail Finance and Merchandise Control	3
T_A_M 3700	MultiChannel Retailing in the Digital World	3
T_A_M 4300	Softgoods Brand Management and Promotion	3
T_A_M 4990	Retail Marketing and Merchandising	3
Apparel Product Development		
T_A_M 1200	Basic Concepts of Apparel Design and Production	3
T_A_M 2280	Apparel Production	4
T_A_M 2380	Integrated Apparel Design and Production I	3
T_A_M 2480	Apparel and Textile Presentation Techniques	3
T_A_M 2580	Digital Textile and Apparel Applications	3

Admission Criteria

Fall deadline: February 1 (January 15 for early financial support considerations)

Spring deadline: September 1

- Minimum GPA: 3.0 in last 60 hours
- Bachelor's degree from an accredited college or university in textile and apparel management or related field. Those with unrelated majors will need to do make-up work
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
79	550

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	500/500	160
On or After August 1, 2011	153/144	3.0

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Statement of professional objectives (upload to application)
- Departmental application (upload through the Graduate School application or send directly to department)
- Official transcripts from every college or university you have attended
- Three letters of recommendation (upload preferred, or send directly to department)
- GRE Scores

- Latest vitae or resume
- TOEFL scores if international student

- Certificate in Youth Development Specialist (p. 568)

Undergraduate

Minor in Financial Literacy for Helping Professionals

The School of Social Work has collaborated with Personal Financial Planning department within the College of Human Environmental Sciences to develop a minor in Financial Literacy for Helping Professionals. As front line helping professionals encounter clients who face challenging economic situations, skills in addressing those challenges and knowledge of foundational personal finance information will aid in helping clients. Knowledge of predatory lending practices, social welfare policy designed to help the working and non-working poor and tax strategies to enhance financial situations will be addressed. This minor hopes to embrace the imperative need to educate our graduates on the role of financial literacy for those professionals who will serve others.

Students who complete the financial literacy minor may not refer to themselves as BSW-level social workers upon graduation. Fifteen credits are required to complete the financial literacy minor.

Minor Requirements

FINPLN 2183	Personal and Family Finance *	3
FINPLN 3282	Financial Counseling *	3
FINPLN 4188	Community Agencies and Volunteerism (taught in spring semester only; students will need to attend workshop in order to certify for IRS compliance)	3
SOC_WK 4750	Interaction Skills Workshop	3
Select one of the following:		3
SOC_WK 2000	Exploration in Social and Economic Justice	
SOC_WK 4710	Social Justice and Social Policy	
Total Credits		15

* Completion of these two courses, as well as the proposed curriculum for the minor, will allow the student to sit for the Accredited Financial Counselor Exam.

Note: Satisfactory completion (as defined by C range grade or above) of Microeconomics and College Algebra is required. Satisfactory completion (as defined by C range grade or above) of each required course is

necessary in order to attain this minor. This minor is available to students regardless of major.

Minor in Social Justice

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 credits, comprised of the courses below, is required to complete the social justice minor.

Minor core requirements

SOC_WK 1115	Social Welfare and Social Work	3
SOC_WK 2220	Human Behavior and the Environment	3
SOC_WK 2000 or SOC_WK 4710	Exploration in Social and Economic Justice Social Justice and Social Policy	3

Social work electives

Select two of the following:		6
SOC_WK 4101	Topics in Social Work	
SOC_WK 4330	Addiction Treatment and Prevention	
SOC_WK 4350	Deaf Culture: A Social Work Perspective	
SOC_WK 4360	Working with Minority Youth	
SOC_WK 4370	Delinquency, Corrections and Social Treatment	
SOC_WK 4380	Social Work Practice With Minorities: African-American Emphasis	
SOC_WK 4390	Helping Strategies With Children and Adolescents	
SOC_WK 4400	Domestic Violence	
SOC_WK 4410	Law and Social Work Practice	
SOC_WK 4440	International Social Work Practices and Principles	
SOC_WK 4450	Professional Perspectives on Child Welfare Services in the 21st Century	
SOC_WK 4455	Latino/a Immigrants and Receiving Communities	

Total Credits 15

Graduate

Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student's financial and housing counseling skills and to prepare a student to sit for the Accredited Financial Counselor and Certified Housing Counselor exam offered through the National Association for Financial Planning and Counseling Education. Students with this

background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at <http://www.gpidea.org/index.html?page=majorsDegreesCourses.html&anchor=programAnchor1>.

Graduate Certificate in Geriatric Care Management

The Geriatric Care Management certificate is a web-based, four course certificate designed for those who provide independent case management services to elder Americans or who wish to do so in the future. The certificate provides an educational credential in addition to preparing students to sit for certification examinations given by national credentialing organizations.

About the School

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist's Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master's degree.

Undergraduate

- Required Entry-Level Courses (p. 571)
- Special Programs (p. 572)
- Academic Regulations (p. 572)
- Advising (p. 574)
- Opportunities for Graduate Study on MU Campus (p. 574)

Admissions

(Effective Fall Semester 2013)

Students must be admitted to the School of Journalism to pursue the Bachelor of Journalism degree. Students are admitted in one of two categories:

Directly Admitted Students

A freshman applicant will be directly admitted to the School of Journalism if he or she meets standard MU admissions requirements and any one of the following three criteria:

- Ranks in the top 10 percent of his or her high school class.
- Scores 29 or higher on the ACT Composite.
- Scores 1290 or higher on the math-verbal portions of the SAT.

Pre-Journalism A&S Students

Students accepted by MU who do not meet one of the criteria for direct admission are admitted as pre-Journalism students in the College of Arts and Science and apply for admission to Journalism as the student is completing the fifth journalism course, which is either JOURN 2100-News or JOURN 2150-Fundamentals of Multimedia Journalism. That usually occurs in the second semester of the sophomore year as the student is completing 60 credits and all other requirements.

NOTE: All undergraduate admissions to MU are handled by the Office of Undergraduate Admissions, not the School of Journalism, and no exceptions are made to the standards for direct admission to Journalism. A student either meets one of the admissions standards or does not. *There is no appeals process for direct admission.*

However, once accepted to MU as a pre-Journalism student, the student may continue to take the ACT or SAT to try to improve his or her score. If the student receives the necessary score for direct admission, once the score is received by the Admissions Office the student may request a change of admissions status. The new test score must be received by the Admissions Office at least one month before the student is to begin classes at MU. Similarly, a student who was admitted outside the top 10 percent of his or her class but who subsequently achieves top 10 percent standing at the end of the senior year of high school may request a change of admissions status. *No change is possible later than one month before the student begins classes at MU.*

Differences in the Admission Categories

Directly admitted students have several advantages over students admitted as pre-Journalism students in the College of Arts and Science. Directly admitted students:

- Advance automatically to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon completion of 60 credit hours and fulfill all other requirements.
- Are guaranteed admission to the upper-class interest area of their choice provided they maintain a cumulative UM GPA of record of 3.0 or higher.
- Have access to a far larger portion of the School of Journalism's freshman scholarship pool. The School of Journalism annually awards more than \$450,000 in scholarships in addition to scholarships awarded by the Admissions Office and others. To apply for all scholarships, including those offered by the School of Journalism, apply through the Office of Financial Aid (<http://>

financialaid.missouri.edu/index.php). Priority consideration is given to those who apply by Dec. 1.

To continue to enjoy these benefits, directly admitted students are expected to maintain a UM cumulative GPA of 3.0 or higher. Those without GPAs of at least 3.0 after completion of 60 credit hours lose these benefits and will be placed in a pool with pre-Journalism students and considered individually for upper-class status through a process outlined below.

Unlike directly admitted students, pre-Journalism A&S students:

- Are not guaranteed to advance to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon completion of 60 credit hours and after fulfilling all other requirements. Students in this category instead are accepted on a space-available basis. However, to date no one who has earned a 3.0 cumulative GPA or higher has been rejected, and space has been available. The School merely reserves the right to reject students should overcrowding occur in the future.
- Are not guaranteed an interest area of choice even with a cumulative GPA of record of 3.0 or higher. Admission to the interest area of choice is dependent upon space availability. To date, no one with a 3.0 GPA or higher has been denied admission to an area of choice.
- Have access to fewer scholarships from the School of Journalism. The school has only four scholarships available to pre-Journalism Arts and Science students. That's because most scholarships are designated for "Journalism students," and pre-Journalism A&S students have not yet been accepted to the School of Journalism. To apply for all scholarships, including those offered by the School of Journalism, apply through the Office of Financial Aid (<http://financialaid.missouri.edu/index.php>).

The School of Journalism is eager to accept hard-working pre-Journalism students who have demonstrated aptitude and drive into upper division interest areas of our program.

Admission to Upper-Division Interest Area

As noted above, directly admitted students who maintain a UM GPA of record of 3.0 or higher and complete the necessary coursework are automatically admitted to upper-division status and their interest area of choice upon completion of 60 credits and other requirements for upper-division status.

Students who do not meet the criteria for direct admission and directly admitted students who have not maintained a cumulative UM GPA of record of 3.0 or higher must apply for upper-division status upon completion of 60 credit hours and fulfillment of all other requirements for upper-division status. Committees of faculty in each emphasis area will review applications for admission, and admission will be by interest area based on space available in that program.

GPA alone will **not** be used to evaluate the applications of pre-Journalism students and directly admitted students with UM GPAs below 3.0. In addition to GPA, the committees will consider a student's stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school activities or participation in journalism student groups), needs of the profession, etc. For example, it is possible for a student with a 2.87 GPA who has demonstrated strong commitment to the field to be selected over one with a 2.95 GPA who has shown no similar commitment. Students applying

through this process must submit brief letters of application (not to exceed two pages) stating a case for admission to an interest area.

The School will attempt to match interests of students applying through this process with openings in the School's various academic disciplines. The School does not guarantee first choice of interest area to students admitted through this process. It may be necessary from time to time to limit enrollment in high-demand areas.

Students who are rejected for upper-division status through this process must transfer to another MU division and will no longer be considered Journalism or pre-Journalism students. If, however, a student subsequently spends a semester taking non-journalism courses and raises his or her cumulative GPA of record above 3.0, the student may reapply. No such application will be accepted after a student has completed 70 or more hours of college credit.

Transfer Student Admissions Standards

Transfer students are admitted to upper-division status in Journalism when they complete 60 credit hours, fulfill all prerequisites and establish a cumulative GPA of record of at least 3.0. Completion of at least three terms at MU is required for transfer students to qualify for admission. Because of that, students who plan to major in Journalism are encouraged to transfer to MU after taking no more than 30 credit hours elsewhere.

Transfer students who have completed 60 credit hours and the necessary coursework but who do not have a 3.0 UM GPA of record are placed in the same pool of applicants as pre-Journalism students and will be considered using the same process. Criteria used in evaluating these applications are similar to those for pre-Journalism applicants and direct admits who do not maintain 3.0 GPAs. The Admissions Committee will review the student's GPA of record as well as a student's stated desire to work in the fields of journalism or strategic communication, demonstrated commitment to journalism or strategic communication (as evidenced by work with student or professional media, high school or community college activities, or participation in journalism student groups), needs of the profession, etc. A transfer student in this category also must submit a brief letter of application (not to exceed two pages) stating a case for admission.

Unless otherwise specified by a formal articulation agreement that allows additional hours, up to 64 credits may be transferred from two-year colleges at any time before graduation. Students must also complete 30 of their last 36 hours in MU coursework. The Office of Undergraduate Admissions, not the School of Journalism, determines transfer equivalencies for the University. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students also should contact an advisor to see how these courses would apply toward a degree at MU. The School of Journalism may accept up to six journalism credit hours transferred from other accredited journalism programs or from Missouri colleges with which the school of Journalism has working agreements. The six credits eligible for transfer are those that equate to Principles of American Journalism, Cross-Cultural Journalism, News, Multimedia Journalism, History of American Journalism and Communications Law. Other courses may be accepted on a case-by-case basis by the Associate Dean for Undergraduate Studies. Current Missouri journalism students may not transfer journalism credits from other institutions. Many communications courses are similarly rejected and may not be used toward graduation requirements even as electives. Some other

courses may not count toward the degree. See the *Undergraduate Handbook* (<http://journalism.missouri.edu/wp-content/uploads/2012/12/handbook-2012.pdf>) for additional guidance.

Transfer Credit

The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism.

The School of Journalism accepts transfer credit according to the transfer credit equivalency report. Transfer credit from two-year colleges can transfer only as lower-level credit.

The School of Journalism accepts a maximum of six transfer credits from other schools accredited by the Accrediting Council on Education in Journalism and Mass Communications. It also accepts journalism credits from those two-year colleges with which the School has articulation agreements.

Transfer students from other accredited schools and colleges in Missouri should check the website of the Office of Undergraduate Admissions to see how course work will transfer to MU.

International Admission

A minimum score of 100 (internet), 600 (paper) or 250 (computerized) on the Test of English as a Foreign Language (TOEFL) is required for all pre-Journalism and Journalism students whose native language is other than English. Alternatively, students may take the International English Language Testing System (IELTS) exam: overall-7.0, no band below-6.0.

Required Entry-Level Courses

Prior to admission to an interest area in the School of Journalism, the student must complete a course of study that includes at least 60 credits of work at MU or another accredited two- or four-year institution. The courses listed below are required for students to be admitted to an interest area in journalism.

English Composition (3 credits):

- (3 credits) with a grade of "B" or better OR a grade of "C" and a satisfactory score on the Missouri College English Test. AP and IB test credit may satisfy this requirement.

College Algebra (3 credits):

- MATH 1100 College Algebra with a C- range grade is required, or an exemption from College Algebra.

Foreign Language (12-13 credits):

- Unless students have completed four or more years in a single foreign language in high school, they must complete 12-13 credits in a single foreign language at the college level.
- The final 3-credit course may be taken the first semester in an interest area in the School of Journalism. In this case, it will count as elective credit. Placement and proficiency exams are available in French, German and Spanish.
- If you have four or more years of high school credit and elect to take a lower-level course in the same language, you negate the option of satisfying your language requirement based on high school credit. You must either continue through level 3 or request that the credits for the lower-level course not be counted toward graduation.

Biological, Mathematical and Physical Science (9 credits):

- Statistics (3 credits): STAT 1200 Introductory Statistical Reasoning, STAT 1300 Elementary Statistics or its equivalent in transfer may be accepted.
- Additional courses (6 credits) from the following areas: biological anthropology, astronomy, biology, chemistry, CMP_SC 1050 Algorithm Design and Programming I, geology, math and physics. One course must include a lab.
- Note that College Algebra, with a C-range grade, must be the prerequisite for math courses counting in the science area. MATH 1140 Trigonometry, counts as general elective credit only.

Social and Behavioral Science (14 credits):

- American History: HIST 1100, HIST 1200, HIST 1400, HIST 1410, HIST 2210 or HIST 2440
- American Government OR State Government: POL_SC 1100 or POL_SC 2100.
- Economics: ECONOM 1051/ECONOM 1051H or ECONOM 1014 and ECONOM 1015, or AG_EC 1041 and AG_EC 1042
- A 3-credit behavioral science course

Note that ECONOM 1014 is the prerequisite for ECONOM 1015

Humanistic Studies (6 credits):

- Any literature course, including foreign language literature courses.

Additional courses (3 credits):

- Communication/film studies/theatre
- History or appreciation of art or music
- Humanities
- Non-US civilization or classics
- Philosophy
- Religious studies

Journalism (13 credits, effective fall semester 2013):

- JOURN 1010 Career Explorations in Journalism (1 credit). Should be taken the first semester on campus. Graded S/U.
- JOURN 1100 Principles of American Journalism
Restricted to first-time college students with a high school core GPA of 3.00 or higher and 15 college credits (dual, AP, IB or other), or current students with 15 completed credits and UM GPA of 2.75. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
- JOURN 2000 Cross-Cultural Journalism
Sophomore standing required. Prerequisites: JOURN 1100 and UM GPA of 2.8. Should be taken concurrently with JOURN 2100 or JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
- JOURN 2100 News
Sophomore standing required. Prerequisites: ENGLISH 1000 with a B- grade or higher, JOURN 1100 and UM GPA of 2.8. May NOT be taken concurrently with JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
- JOURN 2150 Fundamentals of Multimedia Journalism
Sophomore standing required. Prerequisites: JOURN 1100 and UM GPA of 2.8. May NOT be taken concurrently with JOURN 2100. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.

Laptop Computer Requirement

Journalism courses require the use of a computer. Students must demonstrate word-processing proficiency. Incoming freshmen and transfer students are required to have a wireless laptop computer for their work in the School of Journalism.

Special Programs

The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (<http://honors.missouri.edu>) and take honors courses whenever possible. Such courses are taught by some of MU's best professors. The School recognizes incoming high-ability students with two special designations and the following benefits:

Journalism Scholars Program

Qualifications: Any incoming freshman journalism major who has a composite ACT score of 29 or higher (or 1290 or higher on the combined math and verbal portions of the SAT) and who ranks in the top 10 percent of his or her high school graduating class qualifies for:

- Direct admission to the Missouri School of Journalism
- Designation as a Missouri Journalism Scholar
- Student's who are eligible for the Honor's College are automatically accepted into the Journalism Scholars program

Benefits:

- The opportunity to participate in a Freshman Interest Group designed exclusively for Journalism students, space permitting
- Special advisement and programs directed by the school of Journalism's associate dean for undergraduate studies and administration
- Regular meetings with various members of the journalism faculty
- Space permitting, assignment to residence halls set aside for Journalism Scholars
- The opportunity to participate in many on-campus journalism events, and journalism clubs and organizations
- Social activities planned exclusively for Journalism Scholars

The Walter Williams Scholars Program

The highest-achieving Journalism Scholars win separate designation as Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school's founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri.

Qualifications: To win acceptance into the exclusive circle of top Walter Williams scholars, incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). They also must rank in the top 20 percent of the high school class (if the school ranks) or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. Admission is by invitation only.

Benefits:

Walter Williams Scholars are also Journalism Scholars and have all of the rights and privileges enjoyed by that group. Additional benefits include:

- Placement in a special Freshman Interest Group, space permitting
- Assigned individual faculty mentors

- A \$1,000 scholarship that can be used for study abroad or in our New York or Washington programs. The scholarship can be used at any time before graduation
- Automatic admission to the one-year BJ/MA program at the School of Journalism, which allows students to complete their graduation degrees in one year rather than two. Admission is contingent upon the following criteria:
 - Maintenance of a 3.25 GPA in your journalism coursework and for your cumulative average, throughout your undergraduate career
 - Submission of a complete MA application, including payment of the application fee, and with two (out of three) of your letters of recommendation from journalism faculty. You do not need to take the GRE. Details can be found on the Master's Application Checklist: <http://journalism.missouri.edu/programs/masters/admissions/>

Academic Regulations

Dual-Degree - Bachelor of Arts/Bachelor of Journalism

To receive two bachelor's degrees, a Bachelor of Arts and a Bachelor of Journalism, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the department of major interest in the College of Arts and Science.

Science and Agricultural Journalism

The College of Agriculture, Food and Natural Resources, in cooperation with the School of Journalism, offers an inter-divisional Bachelor of Science degree in Science and Agricultural Journalism. This is not considered a dual degree. For more information, see the College of Agriculture, Food and Natural Resources (p. 31) in this catalog.

Credit Restrictions

Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Academic Assessment

Students in convergence, magazine, photojournalism, print and digital news, and Radio-TV news must compile a portfolio prior to graduation showing their preparedness for employment or graduate education. This is a requirement for graduation. Information about the assessment process is sent to students from their faculty chair during their final semester in school. Strategic communication students must complete this requirement as part of the capstone course.

Independent Study

Mizzou Online offers a variety of courses that can be taken on your own through correspondence or online. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 3 hours per semester of online semester based or self-paced (9 months) courses. Any more than 3 hours per semester will have to be approved by an academic advisor.

Standards for Academic Performance

The School of Journalism is a competitive environment in which students are expected to maintain high standards of academic achievement.

In general, the faculty expects each student to maintain a grade point average of 3.0 or higher to be considered in good standing. The faculty has established rules for handling students who fall below that level. Those rules follow:

1. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.5 during the first 29 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.
2. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.75 after completion of 30 to 70 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.
3. Students with 70 credits who have still not earned admission to the School of Journalism will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.
4. Directly admitted freshmen with 70 credits who have still not earned admission to an emphasis area will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.
5. Students must repeat any required journalism course in which they do not earn a grade of C- or higher.

Probation, Suspension and Dismissal

Journalism students are placed on probation when either their journalism or their overall (term or cumulative) grade point average falls below 2.0. Students may remain on probation no more than one term. They regain good standing when their term and cumulative grade point averages, for journalism and overall, climb to 2.0 or higher.

First semester freshman journalism students are placed on final probation when their first term grade point average falls between 0.50 - 1.99. Students may remain on final probation no more than one term. They regain good standing when their term and cumulative grade point averages climb to 2.0 or higher.

First-semester freshman journalism students are dismissed and become ineligible to enroll for a period of one calendar year when their first- term grade point average is below 0.50.

Students may be placed on academic probation and may be declared ineligible to enroll if they neglect their academic duties.

Students are suspended and become ineligible to enroll for a period of one regular semester when their term grade point average (journalism or overall) is below 1.5, when they pass less than one-half of their work in any term or when they are on probation and their term grade point average is 2.0 or lower.

Students are dismissed and become ineligible to enroll for a period of one calendar year when their term grade point average (journalism or overall) is below 1.0, when they pass less than one-fourth of their work in any term or when they fail to perform their academic duties.

A student may be placed on probation, suspended or dismissed for excessive in-completes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. That time limit shall be no more than one calendar year from the scheduled completion of the course and may be a shorter duration. The associate dean also may place limitations on the number of additional credit hours in which the student may enroll before the in-completes are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

A student who fails to achieve an acceptable grade (C- or better) in a required journalism course for the second time will be permanently dismissed from the School of Journalism for lack of acceptable progress toward the degree. That student may be readmitted only with the consent of the faculty chair of the student's emphasis area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair then will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

A student who fails to achieve an acceptable grade (C- or better) in two or more required journalism courses may be placed on probation, suspended or dismissed at the discretion of the associate dean for undergraduate studies in consultation with the faculty chair and the instructors of record.

Satisfactory/Unsatisfactory Grading System

No required course or courses in a required area may be taken on a Satisfactory/Unsatisfactory basis either before or after admission to the School of Journalism. Only elective, non-journalism courses may be taken S/U and only one per semester. Journalism courses offered only as S/U courses are exceptions.

Ethics of Journalism

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students are expected to observe strict honesty in academic programs and as representatives of school-related media.

Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in assigned work, he or she may be subject to a failing grade from the course teacher and such disciplinary action as may be recommended pursuant to university regulations.

Non-Journalism Majors

Students from other divisions with junior or higher standing may take non-laboratory courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the skills in the media are usually not open to students while they are undergraduates in other disciplines. Students from other schools or colleges admitted to journalism courses are expected to meet the

course prerequisites and grade point averages required of students in the School of Journalism.

Advising

Students directly admitted to Journalism as freshmen have a full-time academic advisor in the school.

Pre-Journalism students receive academic advising from the College of Arts and Science. Students admitted to an interest area in the school have a full-time academic advisor in the school and a faculty advisor from their selected emphasis area. Students are expected to seek the advice of the academic advisor in the selection of courses. The faculty advisor provides career counseling and specific journalism related issues.

The school provides advising checklists so that students can maintain a record of academic course work. The forms are used by the student and advisor to plan the student's program. Students are responsible for determining an appropriate schedule of courses each semester; however, the course schedule should be approved by the student's advisor. The responsibility for meeting admission and graduation requirements rests with the student.

Opportunities for Graduate Study on MU Campus

The five-year combined bachelor/master degree program was designed for students in the Missouri School of Journalism who desire a graduate education after the undergraduate program is complete. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master's degree. The program requires students to carry an intensive load (12-15 credits) each semester. Course work in the program builds on the undergraduate program and enhances student's skills and understanding of the chosen area of journalism. At the present time, students can focus their program in areas such as strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Graduate

About Our Graduate Programs

The University of Missouri's School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko's, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, high-tech approach to traditional agriculture, food and natural resources. Our students are highly engaged with expert faculty mentors who are

impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.

Journalism

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist's Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master's degree.

Undergraduate

- BJ in Journalism (p. 578)
 - with emphasis in Convergence Journalism (p. 579)
 - with emphasis in Magazine Journalism (p. 582)
 - with emphasis in Photojournalism (p. 584)
 - with emphasis in Print and Digital News (p. 585)
 - with emphasis in Radio-Television Journalism (p. 589)
 - with emphasis in Strategic Communication (p. 592)
- Minor in Journalism (p. 594)

Undergraduate students in the School of Journalism pursue their degrees in one of six Emphasis Areas approved by the University Board of Curators and the Missouri Coordinating Board of Higher Education. These are Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News, Radio-Television Journalism, and Strategic Communication. Degrees are awarded only in one of those six areas.

Each Emphasis Area, however, has separate tracks that permit students to prepare for employment in more specialized fields. These are called Interest Areas, and students select from more than 30 choices among these. Interest Areas do not appear on transcripts or diplomas, although the transcript coursework should provide evidence of competency in the appropriate area.

Administratively, the School of Journalism is divided into Faculties, not Departments as in most other Schools and Colleges at MU. For administrative purposes, all Interest Areas are assigned to one of those Faculties except for two International Interest Areas, which are administered by the School of Journalism's International Programs Office. International programs, however, merely indicate an international interest. The degree is still awarded under the appropriate Emphasis Area.

To ensure maximum flexibility for students, the School also offers an Individually Designed Interest Area. Working with three faculty members, and with the approval of the associate dean for undergraduate studies, a student can design his or her program by selecting from the School's robust offerings of more than 100 courses. Students who pursue this option must do so within accrediting guidelines and within one of the six approved Emphasis Areas.

Students who desire more information on a particular program should see an Academic Advisor or seek out a member of the supervising Faculty, which is indicated following the description of the Interest Area.

Students interested in one of the international programs should seek out an advisor in the International Programs Office. Interdisciplinary Programs, those that cross traditional media boundaries or depend on skills-based coursework from other MU divisions, are assigned to one of the School's Faculties as indicated.

Degree with Honors Requirements

Graduation with honors is based on the grade point average during the final 60 graded credits in residence. *Cum laude* requires 3.5, *magna cum laude* 3.7, and *summa cum laude* 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. The School computes the grades to three decimal points and does not round up. A student must request consideration for graduation with honors when applying for graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

Individually Designed Interest Area

Students who find that none of the existing Interest Areas meet their needs may work with the faculty to construct a tailored Interest Area to meet their educational objectives. To do this, students work with a faculty mentor and at least two other faculty members to design a course plan using existing courses in the School of Journalism, relevant courses outside the School and no more than six credits of Problems, Topics or Communications Practice courses. The student will enroll and be granted a degree in the emphasis area that aligns with their faculty mentor. Because of large enrollment, students are not able to tailor an Interest Area in Strategic Communication. Students wishing to pursue an individually designed Interest Area should start by seeing a journalism advisor in 76 Gannett Hall.

Electives to Achieve the Interest Area's Goal 16

The student must complete 16 hours of elective journalism courses mutually agreed to in advance by the student and the three supervising faculty members. These courses must form a coherent plan that leads to competency in the targeted area of expertise and must fit within one of the approved Emphasis Areas of the School.

Journalism or Non-Journalism Electives (6 Non-Journalism Credits) 6

In consultation with the faculty mentor, the student should choose a minimum of six non-journalism credits that complement the program's objectives. For example, if a student were to design a program in some aspect of entrepreneurial journalism, six or more credits in business courses might be desirable. In the absence of relevant courses for the targeted interest area, these credits become general electives for students.

Capstone 3

Students pursuing this interest area should choose from among the School's available capstone courses to find one that best meets the model's objectives. In the absence of a clear choice, JOURN 4990: Journalism and Democracy, is recommended. Students also are required to complete an upper-division Writing Intensive (WI) course. Some capstones carry WI designation. Others may be found in the journalism curriculum or outside the school.

Approval Procedure

Students who wish to construct a special interest area may pick up a form for that purpose in Students Services, 76 Gannett. After meeting with the three faculty members chosen to oversee progression through the program, the student will submit the form - complete with the signatures of the student and the three supervising faculty members - to the Associate Dean for Undergraduate Studies. The student must win approval of the tailored program from the associate dean before beginning the program. Thus, a student must file a proposal for approval by the time he or she has completed no more than 70 total credits. Once approved, the proposal goes to the student's academic advisor, who places it in the student's file and uses it to help the student navigate the remainder of the curriculum.

Total Credits for the Degree and their Breakdown

Students pursuing a tailored program must complete 123 credit to include:

- The same 60 credits that all students must complete before entering upper-division status.
- Not more than 44 journalism credits.
- A total of at least 79 non-journalism credits.

Graduate

- MA in Journalism (p. 595)
 - with emphasis in Health Communication (p. 596)
 - with emphasis in Interactive Media (p. 597)
 - with emphasis in Media Management (p. 597)

Master's Programs: journalism.missouri.edu/programs/masters/

Doctoral Programs: journalism.missouri.edu/programs/doctoral/

While most graduate journalism students will find that these graduate programs meet their needs, some may wish to structure an independent model. Such a model takes into account the student's prior education and experience, as well as their unique professional goals. Refer to the MA in Journalism (p. 595) for additional models.

About Journalism's Graduate Degree Programs

The Missouri School of Journalism awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively. The master's and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

For the master's program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients. Our students have created advertising and public

relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko's, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Graduate Minor in Law and Conflict Resolution

This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 600).

Facilities and Resources

A variety of special facilities and resources are available to help students meet their educational objectives. The Columbia Missourian, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service, KOMU-TV, an NBC affiliate, KBIA-FM, a National Public Radio station, Mojo Ad Agency and Vox magazine provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Service Journalism program, based in the magazine sequence, focuses on how to effectively provide information to consumers and offers workshops for professionals, covering such topics as health and nutrition, travel, science and minorities coverage.

The Center for Advanced Social Research provides survey and other services to a broad variety of governmental, corporate and media organizations. It employs more than 50 graduate students from around the MU campus.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP's interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew's 10 Centers of Excellence. CORP is affiliated with Religion Writers Association.

Founded in 2003 with a generous gift from the Donald. W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing and testing new ways to improve journalism through new technology and improved processes.

Special Events

Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

Honor Society

Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

Funding

An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed.

Undergraduate

BJ in Journalism

Major Program Requirements

Effective Fall Semester 2013, the Bachelor of Journalism degree requires 44 journalism credits and 79 non-journalism credits.

To obtain the Bachelor of Journalism degree, a student must:

- Be regularly admitted to an interest area within the school
- Complete at least 31 upper-division credits of acceptable journalism course work
- Complete at least 31 credits of acceptable course work outside the school
- Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all journalism courses
- Complete all University graduation requirements (p. 17), including University General Education (p. 18) requirements

Major Core Requirements

JOURN 4000	Communications Law	3
JOURN 4568	History of Photojournalism	3
or JOURN 3000	History of American Journalism	
Electives outside Journalism		31
Must be numbered 3000 or above or Honors courses numbered 2000H or above		
Behavioral, biological, physical and mathematical science		3
Select from anthropology, biology, computer science, chemistry, geology, psychology, physics, sociology, statistics or mathematics.		
Social Science		6
Select from: economics, history, political science or geography.		
Humanities		9

Select from: history or appreciation of art or music, non-US civilization or classics, humanities, literature, philosophy, appreciation of communication and theatre or religious studies.

Non-journalism electives 13

Must be numbered 3000 or above or 2000H or above.

General Electives

Electives necessary to complete a minimum of 79 credits of non-journalism classes. Any course acceptable to the School and advisor is allowed.

Special Offerings

International Journalism (Interdisciplinary)

The next generation of journalism students must be equipped to work in a global environment. This Interest Area is designed to capitalize on Missouri's international reputation and its international resources by placing under one umbrella the school's existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this Interest Area may take courses within any of the existing or prospective areas to complement their international interests. *This degree is granted in the student's emphasis area of choice (Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News or Radio-TV Journalism) but is administered by the School's International Programs Office.*

Required Journalism Classes 15

Take one of these:

JOURN 4258	Global Communication	3
JOURN 4650	International Issues Reporting	3
JOURN 4656	International News Media Systems	3
JOURN 4658	International Journalism	3

Take one of these:

JOURN 4308	Broadcast News III	3
JOURN 4450	News Reporting	3
JOURN 4556	Fundamentals of Photojournalism	3
JOURN 4804	Convergence Reporting	3

Take one of these capstones:

JOURN 4980	The Picture Story and Photographic Essay	3
JOURN 4990	Journalism and Democracy	3
JOURN 4992	Reporting, Editing and Marketing of Converged Media	3

If Radio-TV track take one of these capstones:

JOURN 4974	Advanced Internet Applications for Radio/TV News	3
JOURN 4976	Seminar in Radio/TV News	3
JOURN 4978	Media Management and Leadership	3
Journalism Study Abroad		6

(It is recommended that the student study abroad in the second semester of their junior year or the first semester of their senior year.)

Suggested Journalism Electives

JOURN 4050	Communications Practice	
JOURN 4258	Global Communication	
JOURN 4300	Broadcast News I	
JOURN 4306	Broadcast News II	
JOURN 4450	News Reporting	
JOURN 4556	Fundamentals of Photojournalism	
JOURN 4650	International Issues Reporting	

JOURN 4656	International News Media Systems
JOURN 4658	International Journalism
JOURN 4660	Media Forces Shaping the European Union
JOURN 4662	Global News Across Platforms
JOURN 4730	Journalism and Conflict

Semester Plan

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

BJ in Journalism with Emphasis in Convergence Journalism

Major Program Requirements

All Convergence Interest Areas teach multimedia storytelling by having students take the three core convergence classes, JOURN 4804 Convergence Reporting, JOURN 4806 Convergence Editing and Producing; and the capstone, JOURN 4992 Reporting, Editing and Marketing of Converged Media. Students then choose to specialize by taking classes from selected requirements and electives.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Emerging Media (Interdisciplinary)

The journalism industry is constantly changing as it discovers new ways of covering the news and new technologies to deliver it. This Interest Area is for the student who wants to learn and work with some of the latest developments in journalism, such as delivery of news via mobile devices and tablets. Classes in this area provide a wide range of opportunities from content creation, and Web and application development to classes working with content created by other journalists. This program of study is primarily for students interested in online, social and mobile delivery of news and information and organizations. *Administered by the Convergence Faculty.*

Required Journalism Classes		15
JOURN 4804	Convergence Reporting	3
JOURN 4806	Convergence Editing and Producing	3
JOURN 4992	Reporting, Editing and Marketing of Converged Media	3

Select two of the following:

JOURN 4502	Multimedia Planning and Design	3
JOURN 4700	Participatory Journalism	3
JOURN 4810	Advanced Global Converged News	3
JOURN 4812	Online Audience Development	3

Suggested Journalism Electives

Select 10 credits from the following: 10

JOURN 4430	Computer-Assisted Reporting	
JOURN 4436	Investigative Reporting	
JOURN 4438	Business and Economics Reporting	
JOURN 4508	Information Graphics	
JOURN 4662	Global News Across Platforms	
JOURN 4700	Participatory Journalism	
JOURN 4720	Internet Law	
JOURN 4810	Advanced Global Converged News	
JOURN 4812	Online Audience Development	
JOURN 4940	Internship in Journalism	
JOURN 4974	Advanced Internet Applications for Radio/TV News	
JOURN 4978	Media Management and Leadership	

Suggested Non-Journalism Electives

INFOTC 4500	Team-Based Mobile Device Application Development	
IS_LT 4360	Introduction to Web Development	

Entrepreneurial Journalism (Interdisciplinary)

More and more of today's journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Students in this Interest Area will learn about current markets in journalism and what audiences want. They also will study the relative marketability of content. Students will learn the market value of their own work, how to build their own brands and how to market. *Administered by the Convergence Faculty.*

Required Journalism Classes		12
JOURN 4804	Convergence Reporting	3
JOURN 4806	Convergence Editing and Producing	3
Select one of the following:		3
JOURN 4734	Journalism and Chaos: How to Understand and Cover 21st Century Business Models	
JOURN 4812	Online Audience Development	
Capstone:		
JOURN 4992	Reporting, Editing and Marketing of Converged Media	
Required Non-Journalism Electives		
INFOTC 4500	Team-Based Mobile Device Application Development	3
Suggested Journalism Electives		
Select 10 credits from the following:		10
JOURN 4150	Using Infographics	
JOURN 4406	News Editing	
JOURN 4410	Intermediate Writing	
JOURN 4416	Science, Health and Environmental Writing	
JOURN 4148	Interviewing Essentials	
JOURN 4436	Investigative Reporting	
JOURN 4438	Business and Economics Reporting	
JOURN 4440	Mapping for Stories and Graphics	
JOURN 4462	Emerging Technologies in Journalism	
JOURN 4500	Publication Design	
JOURN 4502	Multimedia Planning and Design	
JOURN 4506	Magazine Design	
JOURN 4508	Information Graphics	
JOURN 4510	Visual Communication	
JOURN 4550	Basic Photography and Photo Editing	
JOURN 4562	Photojournalism Business Practices	
JOURN 4700	Participatory Journalism	
JOURN 4718	Law and the Courts	
JOURN 4728	Confronting Controls on Information	
JOURN 4738	Thought, Language and Journalism	
JOURN 4940	Internship in Journalism	
JOURN 4950	Understanding Audiences	
JOURN 4986	Advanced Writing	
Suggested Non-Journalism electives		
ACCTCY 2010	Introduction to Accounting	
ACCTCY 2036	Accounting I	
MRKTNG 3000	Principles of Marketing	
MRKTNG 4050	Marketing Research *	
MRKTNG 4420	Sales Management *	
MRKTNG 4650	e-Marketing *	

* Required prerequisite for these courses is MRKTNG 3000.

Multimedia Producing (Interdisciplinary)

The focus of this Interest Area is planning and producing content across medium platforms. A student in this area will have the knowledge and skills to work in traditional newsrooms, Web-only newsrooms, non-traditional news organizations and other growing media areas. A student choosing this path is one who is less interested in a traditional reporting track and is more interested in working with content created by others. *Administered by the Convergence Faculty.*

Required Journalism Classes		
JOURN 4502	Multimedia Planning and Design	3
JOURN 4804	Convergence Reporting	3
JOURN 4806	Convergence Editing and Producing	3
JOURN 4992	Reporting, Editing and Marketing of Converged Media (capstone)	3
Select one of the following:		3
JOURN 4554	Visual Editing for Multimedia	3
JOURN 4972	Photo and Visual Editing	3
Suggested Journalism Electives		
Select 10 credits from the following:		10
JOURN 4430	Computer-Assisted Reporting	
JOURN 4436	Investigative Reporting	
JOURN 4438	Business and Economics Reporting	
JOURN 4508	Information Graphics	
JOURN 4662	Global News Across Platforms	
JOURN 4700	Participatory Journalism	
JOURN 4720	Internet Law	
JOURN 4810	Advanced Global Converged News	
JOURN 4812	Online Audience Development	
JOURN 4940	Internship in Journalism	
JOURN 4950	Understanding Audiences	
JOURN 4974	Advanced Internet Applications for Radio/TV News	
JOURN 4978	Media Management and Leadership	
Suggested Non-Journalism Electives		
INFOTC 4500	Team-Based Mobile Device Application Development	
IS_LT 4360	Introduction to Web Development	
IS_LT 4364	Flash Authoring	

Convergence Photojournalism (Interdisciplinary)

This course of study is for those interested in communicating largely through photography and other visual mediums. Skills acquired include documentary photography, lighting and studio techniques, and photo editing with both still and moving images. Students build an appreciation for and understanding of visual communication and can expand into illustrative graphics, video and multimedia management. Students are prepared for careers as photojournalists for print and online publications and as freelancers. *Administered by the Convergence Faculty.*

Required Journalism Classes		
JOURN 4556	Fundamentals of Photojournalism	3
JOURN 4804	Convergence Reporting	3
JOURN 4806	Convergence Editing and Producing	3
JOURN 4992	Reporting, Editing and Marketing of Converged Media (capstone)	3
Select one of the following:		3

JOURN 4558	Advanced Techniques in Photojournalism	
JOURN 4566	Electronic Photojournalism	
Suggested Journalism Electives		
Select 10 credits from the following:		10
JOURN 4502	Multimedia Planning and Design	
JOURN 4430	Computer-Assisted Reporting	
JOURN 4436	Investigative Reporting	
JOURN 4438	Business and Economics Reporting	
JOURN 4508	Information Graphics	
JOURN 4510	Visual Communication	
JOURN 4554	Visual Editing for Multimedia	
JOURN 4558	Advanced Techniques in Photojournalism	
JOURN 4560	Staff Photojournalism	
JOURN 4566	Electronic Photojournalism	
JOURN 4568	History of Photojournalism	
JOURN 4662	Global News Across Platforms	
JOURN 4972	Photo and Visual Editing	
JOURN 4700	Participatory Journalism	
JOURN 4720	Internet Law	
JOURN 4810	Advanced Global Converged News	
JOURN 4812	Online Audience Development	
JOURN 4940	Internship in Journalism	
JOURN 4950	Understanding Audiences	
JOURN 4974	Advanced Internet Applications for Radio/TV News	
JOURN 4978	Media Management and Leadership	

Suggested Non-Journalism Electives		
ART_PHOT 3600	Intermediate Photography	
ART_PHOT 4600	Advanced Photography	
FILM_S 3005	Topics in Film Studies - Humanities	
INFOTC 4500	Team-Based Mobile Device Application Development	
IS_LT 4360	Introduction to Web Development	
IS_LT 4364	Flash Authoring	

Convergence Radio Reporting and Producing (Interdisciplinary)

This interest area is for the student wanting to work largely in audio reporting. This area includes a wide range of reporting classes and producing/management classes, giving the student a sense of radio work both as a reporter and as a behind-the-scenes producer. Several courses offered provide the opportunity for training in media management. *Administered by the Convergence Faculty.*

Required Journalism Classes

JOURN 4050	Communications Practice	3
JOURN 4310	News Producing (Radio Section)	3
JOURN 4804	Convergence Reporting	3
JOURN 4806	Convergence Editing and Producing	3
JOURN 4992	Reporting, Editing and Marketing of Converged Media (capstone)	3

Suggested Journalism Electives

Select 10 hours from the following:		10
JOURN 4330	From Murrow to Moore: What Good Journalists Read	
JOURN 4428	Health Reporting Skills	
JOURN 4430	Computer-Assisted Reporting	

JOURN 4436	Investigative Reporting	
JOURN 4438	Business and Economics Reporting	
JOURN 4502	Multimedia Planning and Design	
JOURN 4508	Information Graphics	
JOURN 4554	Visual Editing for Multimedia	
JOURN 4650	International Issues Reporting	
JOURN 4662	Global News Across Platforms	
JOURN 4700	Participatory Journalism	
JOURN 4720	Internet Law	
JOURN 4810	Advanced Global Converged News	
JOURN 4812	Online Audience Development	
JOURN 4940	Internship in Journalism	
JOURN 4950	Understanding Audiences	
JOURN 4974	Advanced Internet Applications for Radio/TV News	
JOURN 4978	Media Management and Leadership	

Convergence Television Reporting (Interdisciplinary)

This Interest Area is for the student wanting to work largely in television reporting. This area includes a wide range of reporting classes and producing/management classes, giving the student a sense of television reporting in front of the camera. Other courses in multimedia prepare the student well for Web-based journalism as it complements television. *Administered by the Convergence Faculty.*

Required Journalism Classes

JOURN 4050	Communications Practice	1
JOURN 4306	Broadcast News II	3
JOURN 4308	Broadcast News III	3
JOURN 4804	Convergence Reporting	3
JOURN 4806	Convergence Editing and Producing	3
JOURN 4992	Reporting, Editing and Marketing of Converged Media (capstone)	3

Suggested Journalism Electives

Select 9 credits from the following:		9
JOURN 4310	News Producing	
JOURN 4320	Advanced Broadcast Reporting	
JOURN 4330	From Murrow to Moore: What Good Journalists Read	
JOURN 4428	Health Reporting Skills	
JOURN 4430	Computer-Assisted Reporting	
JOURN 4436	Investigative Reporting	
JOURN 4438	Business and Economics Reporting	
JOURN 4502	Multimedia Planning and Design	
JOURN 4508	Information Graphics	
JOURN 4554	Visual Editing for Multimedia	
JOURN 4650	International Issues Reporting	
JOURN 4662	Global News Across Platforms	
JOURN 4700	Participatory Journalism	
JOURN 4720	Internet Law	
JOURN 4810	Advanced Global Converged News	
JOURN 4812	Online Audience Development	
JOURN 4940	Internship in Journalism	
JOURN 4950	Understanding Audiences	

JOURN 4974	Advanced Internet Applications for Radio/TV News
JOURN 4978	Media Management and Leadership

Semester Plan

See your advisor to set up a semester plan.

BJ in Journalism with Emphasis in Magazine Journalism

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Arts and Culture Journalism (Interdisciplinary)

This interdisciplinary Interest Area gives students the opportunity to expand their understanding of the arts as they develop critical thinking skills about society, culture and the media. Students are encouraged to see culture as a central part of the journalistic enterprise as they learn about art, music, theatre, popular culture and critical reviewing. This is intended to lay the groundwork for careers not only in traditional and emerging forms of journalism but also as communicators in cultural institutions, museums, nonprofit agencies, government programs and community arts organizations. *Administered by the Magazine Faculty.*

Required Journalism Classes

JOURN 4410	Intermediate Writing	3
JOURN 4418	Critical Reviewing	3
Select one of the following:		3
JOURN 4450	News Reporting	
JOURN 4804	Convergence Reporting

THEATR 3770 The Theatre Experience: From Page to Stage and Screen

Magazine Editing

Students in this Interest Area focus on the finer aspects of microediting: grammar, style, syntax and usage. They also gain hands-on experience in macroediting: pitching and assigning stories, writing display type, coordinating photography and art, working with designers, fact checking, proofreading and following a publication through all stages of print or online production. Classes provide an analysis of the industry and study of innovative techniques and delivery platforms. Recommended for those who seek careers as editors in the magazine and book-publishing industries. *Administered by the Magazine Faculty.*

MRKTNG 3000	Principles of Marketing
SOCIOL 2310	Culture and Mass Media

Magazine Writing

This Interest Area uses an “intra-disciplinary” approach grounded in magazine traditions, theories and practices. Students learn the power of revision and learn to tell stories with frankness and intimacy. They learn to use narrative storytelling tools: character, key moments, dialogue, telling details and place. The students learn to track the notion of the journalist as a savvy, articulate, thoughtful and emphatic witness of events. *Administered by the Magazine Faculty.*

BJ in Journalism with Emphasis in Photojournalism

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Photojournalism Interest Areas

Photojournalism

This Interest Area educates students in the history, theory and skills of photojournalism, including still and moving images, as well as audio. Also covered are the principles and practice of visual editing and design for print and online. Photojournalism students learn to create truly integrated multimedia projects, incorporating audio, video and stills into compelling visual story-telling projects. The program's essential element remains understanding the power of image, and it embraces all the new technologies in presentation. Students are prepared for careers as photojournalists for print and online publications and as freelancers. *Administered by the Photojournalism Faculty.*

BJ in Journalism with Emphasis in Print and Digital News

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Print and Digital News Interest Areas

Business and Economics Journalism (Interdisciplinary)

This Interest Area is for journalism students interested in learning the skills of reporting business and economics news across platforms. It allows students to add a focus on economic, business and consumer reporting and emphasizes the use of financial data analysis in reporting. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as basic accounting, or advanced economics and finance. Students will gain the skills to work covering Wall Street, government economics, consumer and personal finance issues, and local business. A minor in Economics or Business is suggested. *Administered by the Print and Digital News Faculty.*

POL_SC 4320	Public Policy

* If you are not planning to pursue a R/TV focus in this interest area (i.e. Taking Broadcast I, II & III) you can enroll in JOURN 4300 only on a space available basis.

** Note: Students who want to do business reporting with KOMU must be in or have taken JOURN 4308 Broadcast News III

Multiplatform Design (Interdisciplinary)

This Interest Area teaches students to tell stories visually across online and print platforms. Students learn to make decisions about the framing and packaging of information, and the effects of those decisions on user perceptions. They learn to design in a way that lets the users take control of their information consumption and to use multimedia tools to enhance a story or persuasive message, not distract from it. *Administered by the Print and Digital News Faculty.*

Required Journalism Classes

JOURN 4502 Multimedia Planning and Design 3

Select one of the following: 3

JOURN 4450 News Reporting

News Design

This Interest Area teaches students to tell stories using the tools of visual journalism. Students learn to make decisions about the framing and packaging of information, and the effects of those decisions on user perceptions. Through hands-on-work in the Columbia Missourian newsroom, students gain real-world experience that prepares them to organize information and be clear visual communicators. The program of study prepares students for jobs in online and print publications, including newspapers, magazines and nonprofit organizations. *Administered by the Print and Digital News Faculty.*

Sports Journalism

This Interest Area is for those interested in pursuing a career in sports journalism at any level. Covering sports today includes not only knowing the games but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study through a specific emphasis area (convergence journalism (p. 579), magazine journalism (p. 582), or print and digital news (p. 585)), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

Required Journalism Classes 15

Select one of the following: 3

JOURN 4450	News Reporting
JOURN 4804	Convergence Reporting

Select one of the following: 3

JOURN 4460	Advanced News Reporting
JOURN 4806	Convergence Editing and Producing

** Note: Students who want to do sports reporting with KOMU must be in or have taken JOURN 4308 Broadcast News III.

Watchdog Journalism (Interdisciplinary)

This Interest Area is for journalism students interested in learning the skills of investigative and computer-assisted reporting across platforms. It allows students to add a strong investigative-watchdog focus and emphasizes the use of data analysis in reporting. The program encourages students to develop a specialty area, such as covering health care or religion, but that is not required. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as introductory accounting (though again, this is not required). Students will gain the skills to work in computer-assisted reporting or investigative reporting. Students choose a core course of study through a specific emphasis area (convergence journalism (p. 579), magazine journalism (p. 582), print and digital news (p. 585)), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

See your advisor to set up a semester plan.

BJ in Journalism with Emphasis in Radio-Television Journalism

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Radio-Television Interest Areas

Radio-Television Producing

This Interest Area teaches students how to structure, write and build a newscast. They will receive instruction in newsroom leadership and practice guiding a newscast to completion in the professional newsrooms and control rooms of KBIA Radio and KOMU-TV. *Administered by the Radio-TV Faculty.*

Required Journalism Classes

JOURN 4300	Broadcast News I	3
JOURN 4306	Broadcast News II	3
JOURN 4308	Broadcast News III	3
JOURN 4310	News Producing	3

Select one of the following capstones: 3

JOURN 4974	Advanced Internet Applications for Radio/TV News	
JOURN 4976	Seminar in Radio/TV News	
JOURN 4978	Media Management and Leadership	

Suggested Journalism Electives

Select 10 credits from the following: 10

SCI_AG_J 4480	Will Write for Food (and Wine)	
JOURN 4116	Managing and Leading People	
JOURN 4320	Advanced Broadcast Reporting	
JOURN 4328	Advanced News Communication

Radio-Television Sports Journalism

This interest area is for those students who are preparing for a career in sports journalism at any level. Covering sports today includes not only knowing the games, but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study in the radio-television journalism emphasis area. Students then pick from a wide range of electives to round out their skills and work in other media. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

Required Journalism Classes 15

JOURN 4300	Broadcast News I
JOURN 4306	Broadcast News II
JOURN 4308	Broadcast News III
JOURN 4422	Sports Journalism *

Take one of these capstones:

JOURN 4974	Advanced Internet Applications for Radio/TV News
JOURN 4976	Seminar in Radio/TV News
JOURN 4978	Media Management and Leadership

Suggested Journalism Electives 10

JOURN 4148	Interviewing Essentials
JOURN 4150	Using Infographics
JOURN 4320	Advanced Broadcast Reporting (The Sports Section)
JOURN 4406	News Editing
JOURN 4410	Intermediate Writing
JOURN 4416	Science, Health and Environmental Writing
JOURN 4436	Investigative Reporting
JOURN 4438	Business and Economics Reporting
JOURN 4440	Mapping for Stories and Graphics

* Students who want to do sports reporting with KOMU-TV must be in or have taken JOURN 4308 Broadcast News III.

Radio-Television Watchdog Journalism

This interest area is for journalism students interested in learning the skills of investigative and computer-assisted reporting for radio and television news. Students choose their core course of study in radio-television journalism. The interest area builds student skills in investigative reporting and using data analysis in reporting. It also encourages, but does not require students to use elective coursework to develop a specialty area such as business news, health care or religion reporting. Through this interest area, students will gain the skills to work as an investigate reporter or producer in radio or television news.

Required Journalism Classes 18

JOURN 4430	Computer-Assisted Reporting
JOURN 4436	Investigative Reporting *
JOURN 4300	Broadcast News I
JOURN 4306	Broadcast News II
JOURN 4308	Broadcast News III

BJ in Journalism with Emphasis in Strategic Communication

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Strategic Communication Interest Areas

Strategic Communication

This Interest Area educates students in the principles and practice of all communication designed to create a desired response from a given audience. It includes focused study and hands-on practice within the Pathways of Account Management, Art Direction, Copywriting, Media Planning, Public Relations, Research and Interactive-and prepares students for careers in these seven areas. Crossover between these Pathways is permissible and encouraged. *Administered by the Strategic Communication Faculty.*

International Strategic Communication

The next generation of strategic communication students must be equipped to work in a global environment. This Interest Area is designed to capitalize on Missouri's international reputation and its international resources by placing under one umbrella the school's existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this area take Strategic Communication courses to complement their international interests. *The Strategic Communication Interest Area is administered by the School's International Programs Office.*

Minor in Journalism

Journalism Minor Policies and Procedures

The School of Journalism's minor consists of 15 credit hours of journalism coursework and is for students within other MU academic divisions who wish to broaden their understanding of the news media's role in society. Courses for minors parallel MU's broader liberal arts traditions and are not skills-oriented.

Admissions

JOURN 1000 is open to any MU student who is a non-journalism major in good academic standing. To declare a minor, a student must be in good academic standing at MU and have completed 60 credits.

Pre-Journalism students who follow the School of Journalism's general education requirements are preferred for admission. Pre-Journalism students who complete either JOURN 1100 and JOURN 2100 or JOURN 1100 and JOURN 2150 with a C or better (and then decide to minor within the School of Journalism) are eligible to take 9 more upper division (3000 or 4000 level course) credits within the School. Pre-Journalism students who decide to minor after completing JOURN 1100 are ineligible to take JOURN 1000.

Other MU students with a 3.0 GPA or higher are eligible on a space available basis. Journalism majors are ineligible for the journalism minor program.

All students apply to be a journalism minor and complete a form that is available from a designated staff liaison in the Journalism Student Services Office, 76 Gannett Hall. Journalism minors must apply to be eligible to register for courses.

All admissions and other requirements apply to both current and transfer students. Transfer students may use up to three credit hours of approved journalism transfer credit toward a journalism minor.

Courses

Up to 15 credits selected from the following classes:

JOURN 1000	The News Media: Journalism and Advertising in a Democratic Society	3
or JOURN 1100	Principles of American Journalism	
JOURN 2000	Cross-Cultural Journalism	3
JOURN 3000	History of American Journalism	3
JOURN 4000	Communications Law	3

JOURN 2100 News and JOURN 2150 Multimedia Journalism are not open to journalism minors. However, Pre-Journalism students who complete JOURN 2100 or JOURN 2150 as part of their requirements and then decide to minor in journalism may count these courses toward their minor.

Other eligible courses: (all require permission of course instructor emailed or sent to the designated advisor for minors):

JOURN 4568	History of Photojournalism	3
JOURN 4656	International News Media Systems	3
JOURN 4658	International Journalism	3
JOURN 4990	Journalism and Democracy	3

These are the classes the School of Journalism currently offers for international and U.S. exchange, MU interdisciplinary and general studies majors plus non-degree seeking undergraduate students. These courses are not skills oriented and frequently have room for non-majors to enroll. JOURN 1000 also was intended as a class for non-majors.

The selected courses focus on news media and society issues. Students can choose whatever combination of classes they wish to reach 15 credits. Journalism minors are ineligible to take any other courses with the School of Journalism. Journalism minors may take no more than 15 credits within the School of Journalism.

Registration

MU students can register for JOURN 1000 through regular procedures. For all other classes, journalism minors place their course preference on a waiting list. Students are eligible to enroll after course registration by journalism majors is completed. The School's designated liaison for journalism minors will inform students when course space is available following registration periods each semester.

Academic Status

Journalism minors are subject to probationary or suspension status as determined by the division in which each student's major resides. Journalism minors who receive lower than a C- in any journalism course must repeat it and complete with a C- or better. Journalism courses may only be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

Fees

Journalism minors must pay School of Journalism activity fees for all journalism courses.

Advising

Journalism minors will not be assigned a faculty advisor or an academic advisor within the Journalism School. Academic advising occurs in the division of each student's major. Journalism minors are free to consult

with the school's designated liaison and with the School of Journalism faculty on course-specific matters at any time. Journalism minors also can consult on longer-range career and professional issues with journalism faculty. However, faculty advising priority is given to journalism majors.

Career Services

Journalism minors are ineligible to interview with prospective employers who visit the School of Journalism. Journalism minors should interview employers in their home division. The School of Journalism's placement website is open for use by journalism minors. Journalism minors can consult with the School of Journalism's Career Service Coordinator, although priority is given to journalism majors and Pre-Journalism students.

Other Disciplinary Actions

Disciplinary actions for Journalism minors are the same as for Journalism majors. All cases of alleged academic misconduct will be immediately forwarded and reviewed by the MU Provost's office. All cases of classroom misconduct will be immediately forwarded and reviewed by the office of the Vice Chancellor for Student Affairs.

Graduate

MA in Journalism

Admission Contact Information

Journalism Graduate Studies
179 Gannett Hall
Columbia, MO 65211
573-882-4852

Email: jourgraduatestudies@missouri.edu
(jourgraduatestudies@missouri.edu)

<http://www.journalism.missouri.edu/graduate/masters/>
<http://journalism.missouri.edu/programs/online/>

About the Master of Arts

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media and mass communications; expansion of previous professional preparation and experience (e.g. newspaper editing) into a new area (e.g. broadcasting reporting); comprehensive academic preparation for careers in journalism teaching and research; and combinations of the three.

Degree Options

Program Models

Students choose from more than 20 program models, covering the full range of skills and media of journalism. Because the faculty periodically updates these models, students should visit the school's Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

Five-year Bachelor to Master Program

Another option for students who seek a master's degree is the 5-year bachelor to master's program (<http://journalism.missouri.edu/programs/masters/models-and-programs/five-year-bjma-models>). To be eligible for this option, students must have completed a bachelor's degree in journalism from Missouri. Students following the 5-year plan are expected to carry 10-12 hours per semester and will graduate after completion of two semesters of course work and a third semester of project or thesis. Only graduates of Missouri Journalism's undergraduate program are eligible for the BJ/MA program.

Joint Journalism and Law Programs

The School of Journalism and the School of Law have created joint programs (<http://journalism.missouri.edu/programs/masters/models-and-programs/journalism-law-programs>) that provide an opportunity to earn a MA in Journalism and either a JD or a LLM from Law. Students in the joint programs complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

Dual-degree option with Masters of Public Health

The School of Journalism and the program in Public Health have created a dual-degree option (p. 662) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

Distance Learning

Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format. Health communication, interactive media, media management and strategic communication models are available through distance learning to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master's programs here <http://journalism.missouri.edu/graduate/online/>.

Master's Admission Criteria

Campus program deadlines:

Fall deadline: January 1
Spring deadline: September 1

Online program deadlines:

Fall deadline: July 1
Spring deadline: November 15
Summer deadline: April 15

- Minimum Academic IELTS scores:

Item	Score
Listening	
Reading	
Speaking	7.0
OVERALL Score	7.0

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
Speaking: 25	
100	600

- Suggested GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	1100
On or After August 1, 2001	V: 153-160; Q: 144-148

- Minimum GPA: 3.0 in last 60 hours

Note: Deadlines are adhered to strictly, and no applicant is considered for admission until all required information is received.

Required Application Materials

To the Graduate School

All required Graduate School documents

To the Journalism Master's Program:

Please upload the following application materials into the online Graduate School application in Apply Yourself:

- 3 essays as specified on Departmental application website
- Résumé
- 3 letters of recommendation (use the online Graduate School application system)

Please submit official GRE scores to:

Earl English Graduate Studies Center
 Missouri School of Journalism
 University of Missouri
 179 Gannett Hall
 Columbia, MO 65211-1200

Financial Aid from the Program

Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

Plan of Study

Two-year students are required to complete a minimum of 37 hours, at least half of which must be in 8000-level courses. Five-year BJ-MA students complete a minimum of 30 hours (15 hours at the 8000-level). Specific course requirements vary depending on the option selected.

Professional Project or Thesis

Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in 8190, Area Problem (for projects) or 8090, Research (for Thesis). Students earn an additional nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates program in WASHINGTON DC, BRUSSELS and BUENOS AIRES which are supervised by full-time faculty members. In the Missouri state capital the school has a program focusing

on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Length of Study

The degree must be earned within eight years of beginning the program.

MA in Journalism with Emphasis in Health Communication

Degree Requirements

The Health Communication emphasis area is available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000	Mass Media Seminar	3
JOURN 8006	Quantitative Research Methods in Journalism	3
or JOURN 8008	Qualitative Research Methods in Journalism	
JOURN 8070	Proseminar in Communications	1-3
JOURN 8080	Media Ethics	3

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

JOURN 7000	Communications Law	3
JOURN 7256	Public Relations	3
JOURN 7268	Strategic Communication Practicum	3
JOURN 7416	Science, Health and Environmental Writing	3
JOURN 8018	Strategic Communication Research II	3
JOURN 8020	Principles and Tools in Strategic Communication Planning	3
JOURN 8042	Health News and Promotion	3
JOURN 8056	Theory of Mass Communication	3
JOURN 8058	Communication in Media Organizations	3

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 MA Thesis Seminar, or JOURN 8098 MA Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (<http://gradschool.missouri.edu/academics/programs/journalism>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Interactive Media

Degree Requirements

Core Requirements

The program core is completed by all students:

JOURN 8000	Mass Media Seminar	3
JOURN 8006 or JOURN 8008	Quantitative Research Methods in Journalism Qualitative Research Methods in Journalism	3
JOURN 8070	Proseminar in Communications	1-3
JOURN 8080	Media Ethics	3

Emphasis Area Requirements

Students may select 15-17 hours of the following courses:

JOURN 7150	Using Infographics	1
JOURN 7256	Public Relations	3
JOURN 7262	Interactive Advertising I	3
JOURN 7510	Visual Communications	2-3
JOURN 7700	Participatory Journalism	3
JOURN 7736	Changing Media Business Models	3
JOURN 8056	Theory of Mass Communication	3
JOURN 8058	Communication in Media Organizations	3

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (<http://gradschool.missouri.edu/academics/programs/journalism>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Media Management

Degree Requirements

The Media Management emphasis area is available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's adviser, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000	Mass Media Seminar	3
JOURN 8006 or JOURN 8008	Quantitative Research Methods in Journalism Qualitative Research Methods in Journalism	3
JOURN 8070	Proseminar in Communications	1-3
JOURN 8080	Media Ethics	3

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

JOURN 7000	Communications Law	3
JOURN 7436	Investigative Reporting	3
JOURN 7700	Participatory Journalism	3
JOURN 7736	Changing Media Business Models	3
JOURN 7978	Media Management and Leadership	3
JOURN 8056	Theory of Mass Communication	3
JOURN 8058	Communication in Media Organizations	3

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program

(<http://gradschool.missouri.edu/academics/programs/journalism>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Strategic Communication

Degree Requirements

The Strategic Communication emphasis area is available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's adviser, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000	Mass Media Seminar	3
JOURN 8006	Quantitative Research Methods in Journalism	3
or JOURN 8008	Qualitative Research Methods in Journalism	
JOURN 8070	Proseminar in Communications	1-3
JOURN 8080	Media Ethics	3

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

JOURN 7256	Public Relations	3
JOURN 7262	Interactive Advertising I	3
JOURN 7436	Investigative Reporting	3
JOURN 8018	Strategic Communication Research II	3
JOURN 8020	Principles and Tools in Strategic Communication Planning	3
JOURN 8056	Theory of Mass Communication	3
JOURN 8058	Communication in Media Organizations	3

Thesis/Non-Thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (<http://gradschool.missouri.edu/academics/programs/journalism>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. PhD in Journalism

Admission Contact Information

Sarah Smith-Frigerio (smithfrigerios@missouri.edu)
 179A Gannett Hall
 Columbia, MO 65211
 573-882-6194
<http://www.journalism.missouri.edu/graduate/doctoral/>

About the Doctorate

The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Doctoral Admission Criteria

Fall deadline: December 15
 Spring deadline: September 1

- Minimum Academic IELTS scores:

Item	Score
Listening	
Reading	
Writing	
Speaking	7.0
OVERALL Score	7.0

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
Speaking: 25	
100	600

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	1100
On or After August 1, 2011	V: 156+; Q: 146+

- Minimum GPA: 3.0, undergraduate, 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass

communication or a related field. A degree (bachelor's or master's) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master's program may be required to complete a project to demonstrate their ability to do independent research.

Deadlines for application are December 15 for fall entry and September 1 for spring. Deadlines are firm, and no applicant is considered for admission until all required information is received.

Required Application Materials

Upload the following application materials into the Graduate School's online application system:

- All required Graduate School documents
- Statement of Doctoral Objectives
- Résumé
- An abstract of your master's thesis (or thesis proposal, if your thesis is not yet complete)
- Unofficial transcripts
- 3 letters of recommendation (use the online Graduate School application system)

Financial Aid from the Program

Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

Plan of Study

Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the adviser and doctoral committee. Course selections are based on the intellectual requirements of the dissertation and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master's or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Proseminar I (JOURN 9000), Doctoral Proseminar II (JOURN 9006), Doctoral Seminar (JOURN 9010) and Doctoral Research Seminar (JOURN 9087) are required of all PhD students.

Qualifying Examination

Students are admitted to the PhD program in journalism when they have passed the doctoral seminar (qualifying examination), which must be taken the semester in which the student completes 18 hours. Graduate School regulations about comprehensive examinations, dissertations, plans of study, residency and other matters are specified in the Degree Requirements section of the catalog.

Foreign Language & Research Tool Requirements

Students are expected to have a background in a foreign language and to develop a research tool. The language requirement may be met by three semesters of college-level foreign language courses or an equivalency acceptable to the doctoral faculty. At the discretion of the student's doctoral committee and the associate dean for graduate studies, a second tool may be used to substitute for the language requirement.

There are four research tool options:

1. competency in a second foreign language. This may be satisfied by two years of college-level work recently passed with a grade of C or better or an acceptable ETS score. A foreign language is one that is non-native or not the primary language used in the student's school system;
2. computer proficiency as evidenced by completion of two computer courses or an equivalency acceptable to the doctoral faculty;
3. two courses in statistics;
4. two 7000 or 8000-level research methods courses outside the School of Journalism.

A grade of A or B must be made in any course used for options 2, 3 or 4.

Teaching

Doctoral students who plan to teach will participate in a teaching program. Each student's teaching skills will be evaluated in the first year of study, at which point planning for the student's future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100 or JOURN 2100 during their third semester in the program.

In the student's fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student's ability and desire, students might teach a course independently during later semesters.

Additional Minors and Certificates - Journalism

Undergraduate

Graduate

- Minor in Law and Conflict Resolution for Journalism Doctoral Students (p. 600)

Graduate

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department. Under the program, students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 9 credits of electives. The Minor will appear on the student's transcript.

Required Core Courses

LAW 5450	Conflict and Conflict Management	3
LAW 5760	Media Law	3
or JOURN 8038	Seminar in Communications Law	

Electives

Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability varies by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student's curricular needs.

General Electives

JOURN 7718	Law and the Courts	3
JOURN 7720	Internet Law	3
JOURN 8046	Controls of Information	3
BUS_AD 7330	Business Law/Regulation	2-3

Electives - Track 1: Civil Rights and International Law

LAW 5220	Constitutional Law *	1-4
LAW 5240	Criminal Procedure	1-3
LAW 5350	Arbitration *	1-3
LAW 5380	Bioethics Seminar	1-3
LAW 5410	Children and the Law	1-3
LAW 5415	Constitutional and Civil Rights Litigation	1-3
LAW 5435	Comparative Law	1-3
LAW 5525	Education Law	1-3
LAW 5530	Elder Law *	1-3
LAW 5540	Employment Discrimination	1-3
LAW 5565	European Union Law	1-3

LAW 5575	Family Law *	1-3
LAW 5590	Freedom of Speech and Association	1-3
LAW 5595	Gender and the Law	1-3
LAW 5620	Immigration Law	2-3
LAW 5660	International Human Rights	1-3
LAW 5665	International Law	1-3
LAW 5750	Local Government Law	1-3
LAW 5780	Mental Disability and the Law *	1-2
LAW 5865	Religious Liberty and Church-State Relations	1-3

Electives - Track 2: Business Law

Those students who anticipate covering general business issues as working journalists, or who anticipate careers in media management and strategic communication should consider these courses. LAW 5395 is recommended and is often a prerequisite for other courses.

LAW 5340	Antitrust Law	1-3
LAW 5350	Arbitration *	1-3
LAW 5365	Bankruptcy	1-3
LAW 5375	Basic Federal Income Taxation	1-4
LAW 5395	Business Organizations	1-4
LAW 5455	Copyright Law	1-3
LAW 5677	Internet Law and Practice	1-3
LAW 5540	Employment Discrimination	1-3
LAW 5640	Intellectual Property	1-3
LAW 5695	Labor Law	1-3
LAW 5795	Modern Payment System	1-3
LAW 5810	Negotiation *	1-3
LAW 5820	Patent Law and Policy	1-3
LAW 5880	Sales and Leases of Goods	1-3
LAW 5890	Securities Regulation	1-3
LAW 5905	Sports Law	1-3
LAW 5920	Trademark Law	1-3
LAW 5940	White Collar Crime	1-3

Electives - Track 3: General Law

The following courses permit students a wide range of options for exposure to law, and also permit further emphasis in civil justice, criminal justice, environmental, health care and international law, depending upon student needs and preferences.

LAW 5010	Civil Procedure I	1-3
LAW 5015	Civil Procedure II	1-3
LAW 5220	Constitutional Law *	1-4
LAW 5240	Criminal Procedure	1-3
LAW 5260	Evidence *	1-4
LAW 5310	Administrative Law	1-3
LAW 5320	Advanced Legal Research *	1-2
LAW 5350	Arbitration *	1-3
LAW 5530	Elder Law *	1-3
LAW 5545	Environmental Law	1-3
LAW 5575	Family Law *	1-3
LAW 5615	Health Care Law: The Doctor-Patient Relationship	1-3
LAW 5700	Land Use Controls	1-3
LAW 5720	Law and Literature	1-3
LAW 5725	Law and Social Sciences	1-3

LAW 5745	Legislation	1-3
LAW 5765	Mediation *	1-3
LAW 5810	Negotiation *	1-3
LAW 5835	Products Liability	1-3
LAW 5840	Public Policy Dispute Resolution	1-3
LAW 5845	Publicly Held Corporation	3
LAW 5910	State Constitutional Law	1-2

* Limited Enrollment. Course likely to be full. Law students have first priority.

School of Nursing

Administration

Office of Student Affairs

S235 Nursing School Bldg.

(573) 882-0277

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The School of Nursing is approved by the Missouri State Board of Nursing and has national accreditation.

The undergraduate program is approved by the Missouri State Board of Nursing. The Baccalaureate Program at the University of Missouri is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Undergraduate

- Admissions (p. 602)
- Advising (p. 603)
- Health Care (p. 603)

Admissions

Traditional BSN Option

The freshman and sophomore years are designated as the “pre-nursing” years. The junior and senior years are designated as the “clinical nursing major” years. *Pre-nursing students apply for admission to the clinical major during the last semester of general education and prerequisite coursework.* Students are admitted to the clinical nursing major on a competitive and space-available basis when prerequisite courses have been completed. Any student who is a Nursing Scholar is guaranteed admission into the clinical nursing major. Please see the Nursing and/or Honor’s College websites for eligibility information and application details.

Each student’s application is reviewed systematically and considered holistically for each admission period. The School values MU’s Commitment to Diversity and the call of the American Nurses Association that the nursing workforce should reflect the diversity of the population.

The School is also committed to rural health care and to educating nurses for practice in rural Missouri. Therefore, the School seeks to ensure that the student body includes persons from rural Missouri and persons of backgrounds that are underrepresented in the nursing workforce.

Clinical application and admission criteria include:

- Successful completion of all general education and prerequisite coursework prior to beginning clinical coursework;
- Satisfactory grades from biology, chemistry, and two of the three advanced lab sciences (microbiology, anatomy, physiology) to be eligible to apply for the clinical nursing major;

- Minimum cumulative grade-point average of 3.0 (on a 4.0 scale) for all college/university courses;
- Competitive grade-point average in nursing prerequisite courses;
- Minimum GPA of 3.0 for any nursing prerequisite courses;
- Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and
- Evidence of motivation toward a nursing career

RN to BSN Option

The RN to BSN online option is for registered nurses who have earned a diploma or associate degree in nursing with a cumulative GPA of a 2.8 or higher and seek a bachelor’s degree in nursing. RN to BSN courses are offered via the Internet with limited trips to campus for some nursing course.

RN to BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

BSN Accelerated Option

The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:

- A baccalaureate or higher degree from an accredited college or university.
- Two letters of reference from individuals that can attest to the student’s motivation and ability to complete a course of intensive study.
- Statement of career goals
- Description of the applicant’s view of nursing as a profession.
- A personal interview.
- Evidence of academic achievement of a 3.0 cumulative GPA or higher on a 4.0 scale on undergraduate degree.
- Completion of prerequisite courses with a minimum of a C or better
- Evidence of potential and motivation for nursing.
- Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students

Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:

- Appropriate GPA for credit hours attempted, 3.0 cumulative GPA or higher

- Approval from the associate dean's office

Transfer students must apply for admission through the MU Admissions Office.

International Students

In addition to the admission criteria described above, international students must meet the following criteria:

- Test of Written English (TWE) score of 4 or higher
- Test of Spoken English (TSE) score of 50 or higher
- TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)
- English Language Support Program Test taken with success

Advising

The academic advisor's office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty advisor who is available for consultation about academic or professional matters.

Health Care

Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at <http://studenthealth.missouri.edu/>.

Graduate

Nursing Graduate Programs

Sinclair School of Nursing

573-882-0277
<http://nursing.missouri.edu/>

About the Sinclair School of Nursing

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university's first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master's program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Technology Requirements

- Student will require a computer with a video card (responsibility of the student).
- Computer plus laptop is ideal for clinical courses and on-campus sessions.
- For home: 384K minimum download/upload speed; a business connection best for quality. If using satellite or wireless – connection

delays may be a problem and you are expected to find a site near your home to make connection for classes.

- For work: firewalls need to be evaluated, conducive location when at work – not interfering with work.
- Quality – testing (initial, and 30 minutes before classes and as needed)
- Logitech camera (webcam)
- Headset with microphone or speakers and microphone.
- Windows XP or newer, with 1GB RAM, 80GB Hard Drive, 2.0Ghz or better processor (Core 2 Duo -Dual Core preferred).
- Microsoft Office – latest version (to purchase)
- Endnote (to purchase)
- E-mail capabilities
- Functional Anti-Virus Software (example: Norton-Symantec/McAfee) (software)

Career Preparation

The **DNP program** prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult or Pediatric CNS, FNP, PNP, or FMHNP) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to *both* the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Nursing

The school offers a baccalaureate program that prepares students for the general practice of nursing, a master's degree program that prepares advanced-practice nurses and a doctoral degree program. The continuing education program serves practicing nurses throughout the state to update and increase nursing knowledge and skills.

The graduate of the baccalaureate program is a generalist in the practice of nursing, able to design, implement and evaluate nursing systems for individuals, families and small groups. As a generalist, the graduate uses a general concept of nursing as a framework for integrating and organizing specific knowledge in nursing, the sciences and the humanities. Graduates begin their professional careers with a focused nursing perspective and, along with other professional health providers, assume responsibility for meeting the health needs of our society.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSN in Nursing (p. 606)

Academic Regulations

Credit by Examination

RN to BSN and Accelerated BSN students may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a support course with a grade lower than C is not

eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available. More information on CLEP examinations is available through MU Testing Services.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

- Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

Class	Semester	Credits	GPA
Freshman	1st semester	1-15 credits	2.8
Freshman	2nd semester	16-30 credits	3.0
Sophomore	3rd semester	31-45 credits	3.0
Sophomore	4th semester	46-60 credits	3.0

- A grade of C or better is required for anatomy, biology, chemistry, ENGLISH 1000, human development, microbiology, nutrition, physiology, nursing courses and Writing Intensive courses. A grade of "C-" or better is required in algebra or statistics. A grade of "F" is unacceptable for any course.
- Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.
- Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

- Progression into the next semester's nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester's courses.
- A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.
- A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires ap-approval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing.
- Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.

Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.

Pre-nursing Years

- Students who do not meet the requirements set forth in the progression criteria are placed on academic probation. They must attain the cumulative grade point average required for their classification, as outlined previously, within two semesters or they are ineligible to re-enroll in the School of Nursing, and must transfer divisions.
- A student whose semester GPA falls below 1.0 is ineligible to re-enroll at MU for the period of one year.

Clinical Nursing Years

- A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
- A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
- Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:

- Valid CPR certificate
- yearly TB tests
- Hepatitis B series
- School of Nursing medical form showing current immunizations
- Negative drug screen
- Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:

- University of Missouri Health Care
- Boone Hospital Center
- Truman Veterans Hospital
- Fulton State Hospital
- Mid-Missouri Mental health Center
- Multiple county and city health departments
- Long-term care facilities
- Day-care centers
- Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered

nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

Graduate

- MS in Nursing (p. 607)
 - with emphasis in Adult Health Clinical Nurse Specialist (p. 608)
 - with emphasis in Adult Mental Health Nurse Practitioner (p. 608)
 - with emphasis in Advanced Public Health Nurse (p. 608)
 - with emphasis in Advanced Public Health/School Health Nurse (p. 608)
 - with emphasis in Family Mental Health Nurse Practitioner (p. 608)
 - with emphasis in Family Nurse Practitioner (p. 609)
 - with emphasis in Leadership in Nursing and Health Care Systems (p. 609)
 - with emphasis in Nurse Educator (p. 609)
 - with emphasis in Pediatric Clinical Nurse Specialist (p. 610)
 - with emphasis in Pediatric Nurse Practitioner (p. 610)
- PhD in Nursing (p. 615)
- DNP in Nursing Practice (p. 610)
 - with emphasis in Adult-Gerontology Clinical Nurse Specialist (p. 611)
 - with emphasis in Family Nurse Practitioner (p. 612)
 - with emphasis in Family Psychiatric and Mental Health Nurse Practitioner (p. 612)

 - with emphasis in Pediatric Clinical Nurse Specialist (p. 614)
 - with emphasis in Pediatric Nurse Practitioner (p. 614)

About the Sinclair School of Nursing

Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
<http://nursing.missouri.edu/>

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university's first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master's and Doctor of Nursing Practice (DNP) program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Facilities and Resources

Graduate students in the School of Nursing have access to all campus libraries and the various services they provide. The School of Nursing building is adjacent to University Hospital and Clinics, MU Psychiatric Center and Ellis Fischel Cancer Center. Women and Children's Hospital is located nearby. A variety of learning experiences also are available

at other hospital and health and social service agencies in and around Columbia.

Career Opportunities

Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

Funding

Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

Undergraduate

BSN in Nursing

Major Core Requirements

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Completion of all University graduation requirements (p. 17), including University general education requirements (p. 18)

Pre-Nursing requirements

Curriculum is based on prerequisite of one year of high school biology with lab and grades of C or better. The student must meet all University general education requirements.

General courses

ENGLISH 1000	Exposition and Argumentation	3
HIST: American History or American Government		3
Humanities/Fine Arts **		9-13
Upper-level behavioral science		3
STAT 1200	Introductory Statistical Reasoning (MP)	3
or ESC_PS 4170	Introduction to Applied Statistics	
MATH 1100	College Algebra *	3

Foundation courses

BIO_SC 1010	General Principles and Concepts of Biology	3-5
or BIO_SC 1500	Introduction to Biological Systems with Laboratory	
CHEM 1100	Atoms and Molecules with Lab	2-3
or CHEM 1000	Introductory Chemistry	
PTH_AS 2201 & PTH_AS 2203	Human Anatomy Lecture and Human Anatomy Laboratory	5
MPP 3202	Elements of Physiology	5
MICROB 2800	Microbiology for Nursing and Health Professions	4
or MICROB 3200	Medical Microbiology and Immunology	
H_D_FS 2400	Principles of Human Development	4
NUTR_S 2380	Diet Therapy for Health Professionals	3

PSYCH 1000	General Psychology	3
SOCIOL 1000	Introduction to Sociology	3
or RU_SOC 1000	Rural Sociology	
NURSE 2000	Nursing as a Profession	3
NURSE 2100	Psychosocial and Communication Issues in Nursing	2

Clinical nursing requirements - professional courses

NURSE 3170	Nursing Skills, Technologies, and Simulation	4
NURSE 3200	Pathophysiology and Therapeutics	4
NURSE 3270	Foundations of Nursing: Physical Assessment and the Nursing Process	6
NURSE 3300	Pharmacology and Nursing Implications	4
NURSE 3470	Mental Health Nursing	4
NURSE 3670	Nursing of Adults I	6
NURSE 3870	Gerontological Nursing Care	3
NURSE 3900	Introduction to Nursing Science	3
NURSE 4200	Nursing Ethics and Law	3-4
NURSE 4270	Nursing of Children	5
NURSE 4300	Nursing Issues/Leadership and Management	2
NURSE 4470	Nursing of Women and Newborns	5
NURSE 4870	Nursing of Adults II	7
NURSE 4970	Nursing in Communities	5

Total Credits 122-130

* Denotes University General Education Requirements

^ Denotes Degree Program Requirements

** If taking a Foreign Language for humanities credit, you will complete the sequence of foreign language courses that could total 13 hours.

Admission to the nursing clinical major is a requirement to take these courses.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year

Fall	CR Spring	CR
BIO_SC 1010 or 1500 [^]	3 Major Science	4-5
CHEM 1100 or 1000 [^]	3 ENGLISH 1000 [*]	3
HIST 1100, 1100H, 1200, 1200H, POL_SC 1100, or POL_SC 1100H [*]	3 PSYCH 1000 [^]	3
MATH 1100 [*]	3 STAT 1200 or ESC_PS 4170 [^]	3
SOCIOL 1000	3 Humanities/Fine Arts Course [*]	3
	15	16-17

Second Year

Fall	CR Spring	CR
Major Science	4-5 Major Science	5
NURSE 2000 [^]	3 NUTR_S 2380 [^]	3
H_D_FS 2400 [^]	4 NURSE 2100 [^]	2
Humanities/Fine Art	3 Behavioral/Science Elective 2000 level [*]	3
	Humanities/Fine Arts Course	3
	14-15	16

Third Year		
Fall	CR Spring	CR
NURSE 3170 [^]	4 NURSE 3470 [^]	4
NURSE 3200 [^]	4 NURSE 3670 [^]	6
NURSE 3270 [^]	6 NURSE 3870 [^]	3
NURSE 3300 [^]	4 NURSE 3900 [^]	3
	18	16
Fourth Year		
Fall	CR Spring	CR
NURSE 4270 [^]	5 NURSE 4870 [^]	7
NURSE 4200 [^]	3-4 NURSE 4970 [^]	5
NURSE 4300	2	
NURSE 4470	5	
	15-16	12

Total Credits: 122-125

* Denotes University General Education Requirements

[^] Denotes Degree Program Requirements

** If taking a Foreign Language for humanities credit, you will complete the sequence of foreign language courses that could total 13 hours.

NOTE: Third Year and Fourth Year curriculum subject to change.

Graduate

MS in Nursing

About

Students in the distance mediated Master's of Science program obtain advanced nursing preparation in one of two areas:

- Nursing Education (<http://nursing.missouri.edu/academics/master-of-science/areas/nurse-educator.php>)
- Leadership in Nursing and Healthcare Systems (<http://nursing.missouri.edu/academics/master-of-science/areas/leadership.php>)

Degree Requirements

A minimum of 30 hours beyond the bachelor's degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master's degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

- Complete an approved plan of study with a cumulative GPA of 3.0
- Successfully defend a written thesis or complete the Master's Exam
- Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (<http://online.missouri.edu/prepare/computer.aspx>)).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage (<http://nursing.missouri.edu/academics/master-of-science/areas-of-study.php>).

Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of a thesis or Master's Exam (MS exam).

Thesis Option

The Master's Thesis (N8090) requires the student to use the research process to discover and/or further develop new knowledge applicable to nursing practice. After completion of the research project, a formal written report using Graduate School guidelines and the *American Psychological Association Manual, 6th edition* is required. In the final semester, the student must successfully present (defend) the thesis. Three members of the student's committee must sign the Report of the Master's Degree Examining Committee (pdf) (M-3), <http://gradschool.missouri.edu/forms-downloads/repository/m3.pdf>, which is then forwarded through the academic program's director of graduate studies to the Graduate School by the semester deadline. Details about the thesis option can be found on the School of Nursing Master's Student Handbook (<http://nursing.missouri.edu/handbooks/grad-programs-handbook.pdf>).

Non-Thesis Option

In the School of Nursing, the Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master's program with their faculty advisor. The Critical Review of the Literature master's exam is now the only option available. Details about the Master's examination can be found on the School of Nursing Master's Student Handbook (<http://nursing.missouri.edu/handbooks/grad-programs-handbook.pdf>).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (<http://nursing.missouri.edu/apply/master-of-science>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

*** Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: <http://online.missouri.edu/about/stateauthorization.aspx>.**

Deadline for Summer entrance: February 1

DNP in Nursing Practice

About

The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Pediatric & Adult-Gerontology Clinical Nurse Specialist,

(<http://nursing.missouri.edu/academics/dnp/areas/adult-gerontology-and-pediatric-cns.php>) Family Nurse Practitioner (<http://nursing.missouri.edu/academics/master-of-science/areas/family-nurse-practitioner.php>), Pediatric Nurse Practitioner (<http://nursing.missouri.edu/academics/master-of-science/areas/pediatric-np.php>), Family Psychiatric & Mental Health Nurse Practitioner (<http://nursing.missouri.edu/academics/master-of-science/areas/mental-health-fmhnp.php>) and Leadership and Innovation in Health Care (<http://nursing.missouri.edu/academics/dnp/areas/leadership.php>). Our program strengths include a strong clinical focus and a well-developed trajectory for the development of clinical scholarship. Unique aspects of our program are a focus on rural and underserved populations and the opportunity for students to select electives in family dynamics, financial management, nursing education, or symptom management. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Degree Requirements

The DNP in nursing requires a minimum of 72 credits beyond the baccalaureate degree. Of the 72 hours, 36.5 credits must be completed at the University of Missouri.

Ultimately, the student, in collaboration with their DNP residency committee, determines the student's plan of study and total credit hours necessary to adequately prepare the student to successfully complete their DNP residency project.

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

- Current required immunizations
- Satisfactory criminal background check
- Satisfactory drug screen
- Current CPR certification
- Proof of undisciplined nursing licensure

To ensure that your computer is set up and ready to begin your online course, your computer must comply with the Mizzou Online Computer Requirements webpage.

DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. All clinical courses will have required on campus days that range from one to four days during the semester (see required On Campus dates (<http://nursing.missouri.edu/academics/master-of-science/on-campus-dates.php>)).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing DNP webpage (<http://nursing.missouri.edu/academics/dnp/areas-of-study.php>).

Doctor of Nursing Practice Residency Project Requirements

The DNP Residency Project is an in-depth, evidence-based practice change project that will focus on a theoretically and clinically relevant problem impacting a rural or other underserved population or critical healthcare system need. Specifics of the DNP Residency Project can

be found the in the Sinclair School of Nursing DNP Student Handbook (<http://nursing.missouri.edu/handbooks/grad-programs-handbook.pdf>).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Doctor of Nursing Practice program (<http://nursing.missouri.edu/apply/dnp>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied."

*** Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in several states. You may find more information at this link: <http://online.missouri.edu/about/stateauthorization.aspx>.**

Application Deadlines: November 1 (for early acceptance) and March 1

PhD in Nursing

About the PhD Program

The PhD program prepares scholars to conduct original research, thereby; advancing the body of knowledge that guides nursing practice and contributes to improving population health and healthcare systems. Successful completion of the program prepares graduates for college or university faculty positions as well as leadership roles in nursing, health care, industry, and governmental agencies.

The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options.

- **Distance-Mediated PhD Program Option:** PhD coursework may be accessed online through the Distance-Mediated PhD program option by learning over the World Wide Web using the Blackboard learning platform. This option also requires a 5 Day On Campus visit (held on the Columbia campus) the first summer of enrollment and 3-4 Day On Campus Intensives every April until coursework is completed (see PhD On Campus Dates (<http://nursing.missouri.edu/academics/phd/on-campus-dates.php>)). Because the program is distance-mediated, students are responsible for obtaining the required technology for successful participation in synchronous distance-mediated courses (see Computer Requirements (<http://online.missouri.edu/prepare/computer.aspx>));
- **International Residential PhD Option:** Through the International Residential PhD option, international students attend the MU campus hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Distance-Mediated student cohort participates electronically. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the 9 credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

The PhD curriculum and program requirements are the same whether you choose the Distance-Mediated PhD option or the International Residential PhD option. Only the method of course delivery varies.

Degree Requirements

The PhD in Nursing at MU requires a minimum of 72 credit hours beyond the baccalaureate degree. Students entering with a master's degree can transfer in a maximum of 30 credits. A minimum of 42 credit hours must be completed at the University of Missouri. There are two curricular options (<http://nursing.missouri.edu/academics/phd/curriculum.php>): (a)

post-baccalaureate (BS-PhD) and (b) post-master's (MS-PhD). For both options, the doctoral curriculum is divided into three categories:

- **Nursing and Health Care Content areas** - Minimum of 20 credit hours (theory analysis and development, specialty area applied sciences, substantive science seminars, and education courses, as well as teaching practicum experiences)
- **Research and Inquiry** - Minimum of 40 credit hours (philosophy of science, statistics and measurement, qualitative and quantitative methods courses, research practicum experiences as well as dissertation research)
- **Collateral area** - Minimum of 6 - 12 credit hours (coursework taken outside the School of Nursing that helps to support the dissertation research topic).

Sample Plan of Study

Sample plans of study for both the BS-PhD and the MS-PhD can be found on the School of Nursing PhD Curriculum webpage (<http://nursing.missouri.edu/academics/phd/curriculum.php>). Ultimately, the doctoral program committee, in collaboration with the student, determines the student's plan of study and total credit hours necessary to adequately prepare the student to successfully complete their dissertation research.

Qualifying Process

To be officially admitted to the PhD program, the student must pass a qualifying examination or process. Students admitted with a master's degree have completed the qualifying process.

Students admitted with a bachelor's degree are admitted to the PhD program on a provisional basis. Following successful completion of a qualifying process, bachelor's prepared students will be granted admission to the PhD program. To fully qualify for the PhD program, BSN-to-PhD students must earn at least a grade of B in the following:

- NURSE 7100 Theoretical Basis for Advanced Nursing
- NURSE 7150 Research Basis for Advanced Nursing
- A three-hour graduate-level statistics course
- Nine credits in nursing applied sciences

The student initiates the qualifying process by enrolling in three credits of N8900 Research Practicum with a member of their BSN-PhD program committee. The student is officially admitted to the PhD program following approval of the written report and oral presentation for N8900 by the BSN-PhD Program Committee.

Comprehensive Examination Process

Through the PhD Comprehensive Examination process, the student demonstrates his/her ability to address the theoretical, methodological and substantive issues of his/her field of study. The examination tests the breadth and depth of knowledge and the ability to integrate ideas across substantive areas. The student must be enrolled to take this examination and it may be administered only when MU is officially in session. The student is not allowed to sit for the doctoral comprehensive examination until the last semester of course work or when course work is substantially completed, all incomplete grades are satisfied, and the PhD Competencies are met.

The Comprehensive Exam, which is prepared by the student's PhD program committee, has a written component followed by an oral section. The written component of the examination is completed at home or another site of the student's selection during five consecutive days. The

oral defense is a two-hour examination by the PhD program committee. The two sections of the examination must be completed within one month. The student is expected to complete the Comprehensive Examination within five (5) years of enrollment in the PhD program and it must be completed at least seven (7) months before the final defense of the doctoral dissertation. Additional details of the process can be found on the School of Nursing PhD Comprehensive Exam webpage (<http://nursing.missouri.edu/academics/phd/comprehensive-exam.php>).

Dissertation Requirements

The culmination of the PhD degree is the completion of a written doctoral dissertation. The dissertation must:

- Be written on a subject approved by the candidate's doctoral dissertation committee
- Embody the results of original and significant investigation
- Be the candidate's own work.

Within the MU Sinclair School of Nursing, the PhD Dissertation process consists of:

- Development of a dissertation proposal
- Approval of the proposal by the doctoral dissertation committee
- Approval of the research project by the Health Sciences Institutional Review Board
- Ethical conduct of the research project
- Writing the doctoral dissertation
- Public defense of the doctoral dissertation
- Approval of the dissertation by the candidate's doctoral dissertation committee
- Submission of the written doctoral dissertation in an approved format.

Students have five (5) years from completion of the PhD Comprehensive Exam to complete the doctoral dissertation. Additional details of the process can be found on the School of Nursing PhD Dissertation webpage (<http://nursing.missouri.edu/academics/phd/dissertation.php>).

Admissions

January 1 is the application deadline for the School of Nursing PhD program.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Sinclair School of Nursing PhD program (<http://nursing.missouri.edu/apply/phd>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

*** Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: <http://online.missouri.edu/about/stateauthorization.aspx>.**

Graduate

Graduate Certificate in Adult Health Clinical Nurse Specialist

The Post-Master's Certificate Program at the MU Sinclair School of Nursing enables nurses with a master's degree to expand their knowledge and scope of practice in one or more specialty areas. Adult Health CNSs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for adults and older adults across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

Graduate Certificate in Family Mental Health Nurse Practitioner

Advanced practice nurses are traditionally prepared at the graduate level in a specific clinical area. The specialty area may be identified in terms of population (e.g. pediatrics or adults), and/or type of problem (e.g. mental health). The advanced practice nurse is directly accountable

for clinical judgments which includes independent and interdependent decision making. Holders of this certificate provide primary mental health care at an advanced level to individuals of all ages and families. Includes differential diagnosis and management of psychiatric & mental health disorders, medication management, and psychotherapeutic interventions. Certificate is available via online learning.

Graduate Minor in Nursing Education

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

For admission requirements, refer to the Graduate School's website for the minimum qualifications for the degree program (<http://gradschool.missouri.edu/academics/programs>) and the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

Graduate Certificate in Pediatric Clinical Nurse Specialist

The Post-Master's Certificate Program at the MU Sinclair School of Nursing enables nurses with a master's degree to expand their knowledge and scope of practice in one or more specialty areas. Pediatric CNSs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for children, adolescents and their families across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

Harry S Truman School of Public Affairs

Public Affairs Graduate Programs

Harry S Truman School of Public Affairs

101 Middlebush Hall, Columbia, Missouri 65211

573-884-1656

Email truman@missouri.edu

<http://truman.missouri.edu>

Dean: Bart Wechsler

Established by the University of Missouri Board of Curators in May 2001, the Harry S Truman School of Public Affairs is dedicated to the advancement of study and practice of governance in the state, nation and world. The School offers graduate degrees and certificates in the theory and practice of public and nonprofit management, public policy, and organizational change.

In keeping with Truman's legacy, TSPA has numerous international linkages. Truman School students and alumni have served as Peace Corps volunteers, United Nations interns, in the US State Department, other national consulates or embassies in Washington, and international non-government organizations (NGOs) such as the Red Cross/Red Crescent. Truman School faculty members participate in international projects in Europe, Asia, Africa, and South America. Scholars from Europe, Asia, and other parts of the world regularly visit the Truman School, helping to inform curriculum and classroom discussions.

Undergraduate

The School of Public Affairs currently offers academic pursuits solely at the graduate level.

Graduate

The Harry S Truman School of Public Affairs offers master's and doctoral degrees in the theory and practice of public and nonprofit management, public policy, and organizational change. MPA students are prepared for careers in a new public service that spans government, nonprofit, and private sectors. PhD students are trained for careers in academic and research institutions.

Graduate Degrees

Master of Public Affairs (p. 622) (MPA)

Doctor of Philosophy in Public Affairs (p. 623) (PhD)

Cooperative Dual Degrees

Master of Public Affairs and Juris Doctorate

Master of Public Affairs and Master of Public Health

Graduate Certificates:

Grantsmanship Graduate Certificate (p. 624)

Nonprofit Management Graduate Certificate (p. 624)

Organizational Change Graduate Certificate (p. 624)

Public Management Graduate Certificate (p. 625)

Science and Public Policy Graduate Certificate (p. 625)

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Graduate

MPA in Public Affairs

MU Truman School of Public Affairs students study with outstanding faculty, who are talented teachers as well as active, nationally recognized scholars. Policy forums, round-tables with policy makers, lectures by distinguished visiting scholars, and research symposia also enrich student learning. Small classes taught both on campus and in Jefferson City, the state's capital, make for a lively learning environment. The Truman School MPA program provides a balance of public service values, interpersonal and analytic skills, and a thorough knowledge of administrative and policy processes.

Financial Aid from the Program

To be considered for funding from the Truman School (including a Graduate Research Assistantship and scholarships), please arrange to have all of your application materials submitted by the January 15 deadline. Contact the Truman School at (573) 884-1656 or visit <http://truman.missouri.edu/degrees-programs/funding> for more details.

Application and Admission Information

Admission to the Master of Public Affairs Program
Ms. Nicole Harris, Assistant Program Director for Student Services
101 Middlebush Hall, Columbia, Missouri 65211
573-884-1656
Truman@missouri.edu

Admission Criteria

Fall deadline: Priority admission and funding consideration are given to applications received by January 15. Applications submitted after January 15 will be considered, with preference going to those received by May 1. Prospective students applying after May 1 will be considered for fall admission on a case by case basis.

Spring deadline: Priority admission consideration is given to applications received by November 15.

Assistantship/Fellowship deadline: January 15

- Minimum GPA: 3.0 in last 60 hours
- Minimum TOEFL scores:
 - iBT: 80
 - CBT: 213
 - PBT: 550
- Minimum preferred GRE scores:
 - Prior to August 2012: 1000 (combined)
 - After August 2012: 300 (combined)

Admission to the MPA program is competitive and open to students holding baccalaureate degrees from accredited institutions and meeting admissions standards of the Truman School of Public Affairs and the Graduate School.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Truman School MPA Program:

- 3 letters of recommendation (at least two academic)
- GRE score report (GRE alternatives accepted: LSAT and GMAT scores will be considered)
- Resume
- Statement of interest
- Unofficial transcripts

Degree Requirements

Consisting of 45 hours of graduate work, the MPA program includes a core (27 hours), an area of specialization (15 hours) and an internship (3 hours). The areas of specialization are Nonprofit and Public Management, and Public Policy.

Students with significant public service experience may have some courses waived, making the MPA program 33 hours for them. The MPA's Mid-Career option is available to students with 3-5 years of public service experience.

Internship

During the summer after their first year in the program, students without significant public sector work experience are required to complete a public service internship. Interns apply what they have learned during the first year in the program, plus they gain practical experience that enables deeper learning during second-year classes.

PhD in Public Affairs

PhD Contact: Dr. Colleen Hefflin
(573) 882-4398
hefflincm@missouri.edu

About the PhD Program in Public Affairs

The Harry S Truman School of Public Affairs at the University of Missouri offers an interdisciplinary PhD in Public Affairs that prepares graduates for careers in universities, colleges and applied research settings in the public, private and nonprofit sectors. Students complete core sequences in public policy and management as well as research methods, and specializations tailored to students' research interests.

PhD Acceptance

The Harry S Truman School of Public Affairs PhD is an academic and research-oriented degree in public affairs. Applicants without previous coursework in public affairs (public management and policy) are required to complete up to 18 hours of foundation coursework.

Acceptance Criteria

In making its decision, the PhD committee considers:

- The applicant's record of academic achievement (Applicants typically have undergraduate GPAs higher than 3.0, and graduate GPAs higher than 3.5.)
- The quality of the written statement explaining why the applicant wants to pursue the degree

- The quality of the applicant's writing sample
- Evaluations contained in letters of recommendation
- Acceptable performance on the Graduate Record Examination (GRE). Applicants typically have combined scores of 310 or higher.
- Results of a personal interview with the applicant in person or by telephone
- Other factors bearing upon the candidate's potential for success

Application Procedure

1. Applications for the PhD program are accepted for fall entrance only. For a prospective student's application to be complete, the Truman School must receive all required materials by January 15.
2. Applicants are required to upload application materials to the MU Graduate School Application for Admission.
3. Official transcripts must be mailed to the Graduate School and GRE/TOEFL scores directed to institution code 6875.

Required application materials

A student's application is complete when all of the following materials have been received. The Truman School's downloadable checklist contains more information on the following required application materials:

- University of Missouri Graduate School application (application fee required)
- Statement of interest
- Curriculum vitae/Resume
- Writing sample
- Personal data sheet
- Three letters of recommendation
- Official undergraduate and graduate transcripts (must be mailed directly to the Graduate School)
- Official Graduate Record Examination (GRE) score report (must be sent by ETS)
- Official TOEFL score report (must be sent by ETS; required of applicants whose native language is not English)

Entrance Exams

- The Graduate Record Examination (GRE) is required of all applicants.
- Applicants whose native language is not English must achieve a score of 625 (107 iBT) in the Test of English as a Foreign Language (TOEFL).
- Use the following codes to submit test scores to the Truman School:
 - University of Missouri-Columbia Institution Code: 6875
 - Truman School Department Code: 4801

Cost of Attendance and Financial Aid

Prospective students should visit the University of Missouri Graduate School financial information and support web page for current information about tuition and fees. The University's Office of Student Financial Aid provides information about other types of aid students can obtain, including federally financed student loans. **Financial aid applications are due by January 15.**

Additional Minors and Certificates - Public Affairs

Graduate

- Certificate in Grantsmanship (p. 624)
- Certificate in Nonprofit Management (p. 624)
- Certificate in Organizational Change (p. 624)
- Certificate in Public Management (p. 625)
- Certificate in Science and Public Policy (p. 625)

Graduate Certificate in Grantsmanship

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656

<http://truman.missouri.edu/degrees-programs/certificates>

The Truman School offers one of the few completely online grant writing certificate programs in the country, making it easy to fit classes into a busy schedule. Students will learn to write grant proposals and manage grant funded programs effectively. Learn winning grant writing techniques and proper grant management with this four-course graduate certificate in grantsmanship. Our program is well suited for a variety of audiences, including community-based professionals in nonprofit organizations, state and local government and educators in K-12 settings. Graduate and post-doctoral students and young faculty members who are seeking to become more competitive in research careers dependent on external funding will find this certificate to be useful.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

Required Courses

PUB_AF 8830	Grant Writing I	3
PUB_AF 8831	Grant Writing II	3
PUB_AF 8832	Sponsor Relationships	3
PUB_AF 8833	Grant Award Management	3

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/grantsmanship-graduate-certificate/grants-ge/Gedt.html>

Graduate Certificate in Nonprofit Management

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656

<http://truman.missouri.edu/degrees-programs/certificates>

The graduate certificate in nonprofit management provides students with the managerial, fiduciary, and analytical tools necessary for leadership of nonprofit entities. The goal is to develop and hone skills that can be used

to achieve organizational missions uniquely aimed at serving the interests of the community.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate.

Careers

As one of the fastest growing sectors in today's economy, nonprofit organizations have undergone a professionalization in management, with board members changing their orientation from one of personal networks to a bottom-line, information-based outlook. Successful nonprofit organizations today thrive on their ability to compete effectively in the marketplace, read community needs and priorities, and deliver appropriate services within budget.

Plan of Study for the Nonprofit Management Certificate

Students must complete 12 credit hours to receive the certificate.

Required Courses

PUB_AF 8710	The Nonprofit and Voluntary Sector	3
PUB_AF 8720	Budgeting and Financial Management in the Public and Nonprofit Sector	3

Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/nonprofit-management-graduate-certificate/nonprofit-mgmt-ge/Gedt.html>

Graduate Certificate in Organizational Change

Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656

<http://truman.missouri.edu/degrees-programs/certificates>

The graduate certificate in organizational change is a multidisciplinary and multisector approach to the theory and practice of transforming organizations and communities in a technologically advanced and global economy. Students will have an opportunity to develop knowledge and competencies appropriate to the advanced study and diagnosis of evolving and emerging organizations and communities in the public, private, and nonprofit arena. They will find a curriculum supportive of careers in academics, management, and consulting.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

Required Courses

PUB_AF 8610	Group Dynamics and Conflict Resolution	3
PUB_AF 8620	Organizational Analysis and Change	3
PUB_AF 8630	Organizational Change in a Community and Global Context	3

Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/organizational-change-graduate-certificate/org-change-ge/Gedt.html>

Graduate Certificate in Public Management

Harry S Truman School of Public Affairs
 101 Middlebush Hall
 573-884-1656
<http://truman.missouri.edu/degrees-programs/certificates>

The graduate certificate in public management encompasses administrative skills for ethical, effective leadership and management roles in the public service. Students completing this graduate certificate will be well positioned to begin or advance a public service career with many expecting to pursue management careers in state and local governments.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

Required Public Management Certificate Courses

The first two courses are required along with one of the remaining two:

PUB_AF 8720	Budgeting and Financial Management in the Public and Nonprofit Sector	3
PUB_AF 8520	Human Resources Management and Development in Public and Nonprofit Sector	3
PUB_AF 8530	Strategic Management of Public Service Organizations: People, Information and Money	3
PUB_AF 8540	Local Government Management	3

Elective Course

The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/public-management-graduate-certificate/pub-mgmt-ge/Gedt.html>

<http://gradschool.missouri.edu/academics/programs/public-management-graduate-certificate/pub-mgmt-ge/Gedt.html>

Graduate Certificate in Science and Public Policy

Harry S Truman School of Public Affairs
 101 Middlebush Hall
 573-884-1656
<http://truman.missouri.edu/degrees-programs/certificates>

The public policy specialization offers students a strong foundation in the skills necessary to work effectively in the policy environment. Students in the public policy specialization learn theories of the policy process, quantitative and qualitative research methods to analyze policy, and program evaluation. Students also have the opportunity to gain expertise in specific policy areas including education policy, environmental policy, health policy, social policy, and regional development policy.

Eligibility

Students do not need to be enrolled in a graduate degree program at MU to participate in the program. Some prerequisite courses may be necessary for students without prior coursework in statistical or economics analysis.

Plan of Study

Students must complete 12 credit hours to receive the certificate.

Required Courses

PUB_AF 8170	Public Policy Processes and Strategies	3
PUB_AF 8430	Public Policy Analysis	3

Elective Course

The third and fourth courses are electives chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/science-and-public-policy-graduate-certificate/sci-pub-pol-ge/Gedt.html>

Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.

Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

- anatomy (gross or microscopic)
- physiology/pharmacology (molecular, cellular and integrative)
- biochemistry/molecular biology
- endocrinology
- toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogen toxicities and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Biomedical Sciences Area Program Degrees

- MS in Biomedical Sciences with emphasis in Biomedical Sciences (p. 628)
- PhD in Biomedical Sciences (p. 631)

Biomedical MS Degrees with Veterinary Medicine Emphasis Areas

- MS in Biomedical Sciences with emphasis in Comparative Medicine (post DVM degree only) (p. 629)
- MS in Biomedical Sciences with emphasis in Pathobiology (p. 630)
- MS in Biomedical Sciences with emphasis in Veterinary Medicine and Surgery (p. 630)

An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:

- The **Biomedical Sciences Area Program** offers a master's program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.
- The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Additional Program Options

Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 659).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student's graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master's degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation.

Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

<http://www.dbms.missouri.edu/>

About the Program

The MS program in Basic Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate's MS program committee.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

- Fall deadline: January 15
- Spring deadline: September 15
- Summer deadline: Not Applicable
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	600

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	100 3.5
On or After August 1, 2011	300 3.5

- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master's program.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Biomedical Sciences MS Program:

- Program-specific application
- Letter of intent
- GRE scores
- Copy of transcripts
- 3 letters of recommendation

MS Degree Requirements

To attain the master's degree, 30 hours of graduate credit must be completed; 15 hours or more shall be 8000 level (exclusive of research, problems and independent study courses); and 6 to 9 hours of 8090 Research. A grade of 3.0 or better is required in all core courses and serves as the qualifying examination for the degree. In addition to the departmental core courses, students may take courses specifically planned to meet the needs and strengths of the individual.

Evaluation

The master's candidate is evaluated semiannually for satisfactory rate of progress as defined by timely completion of course courses and progress on research activities as stipulated by the master's program committee. The master's candidate must carry out original research culminating in a written thesis, present the thesis work at a departmental seminar and defend the thesis in an oral examination by the master's program committee.

Length of Study

The time limit for the master's degree is five years after initiating the program.

MS in Biomedical Sciences with Emphasis in Comparative Medicine (post DVM)

Admission Contact Information

Director of Graduate Studies Craig Franklin, DVM, PhD
Discovery Ridge Bldg Rm N128
4011 Discovery Drive
Columbia, MO 65201
573-882-6623
<http://cmp.missouri.edu/>

About This Degree

The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Alternatively, trainees with experience in laboratory animal medicine, comparative pathology or related disciplines may begin research training at the time of admission. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, molecular biology, mouse biology, genetics, microbiota, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease

Research (LIDR), Mutant Mouse, Rat and Swine Resource and Research Centers and IDEXX-Bioresearch, an internationally known research animal diagnostic laboratory.

Programmatic Strengths

- The opportunity for comparative studies in a joint veterinary and human medical environment
- The multidisciplinary nature of the faculty participating in the training program
- The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
- Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
- A long history of successful training in comparative medicine

Class Size & Resources

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

Admission Criteria

- Fall deadline: N/A
- DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
- Meet standards for admission to the Graduate School

Required Application Material

To the Graduate School:

- All required Graduate School documents

To the CMP Postdoctoral MS Program:

- For combined residency/degree positions, the CMP uses the Veterinary Internship & Residency Matching Program – see virmp.org (<http://virmp.org>) for details.

Degree Requirements

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/or disease pathogenesis. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined

with the student's advisory committee. Trainees also participate in teaching and instructional programs offered to veterinary students and research personnel.

Written Scholarly Work

The MS degree requires the completion of a significant first author manuscript suitable for publication in a refereed journal, or an approved equivalent scholarly effort.

Residency

For trainees enrolled in the combined graduate/residency program, residency rotations are performed during the first year of training and research training occurs in years two and three.

Residency rotations include:

- clinical medicine and animal resource management in the Office of Animal Resources (OAR)
- colony management, diagnostic, comparative and research pathology in the Mutant Mouse Regional Resource Center (MMRRC) and Rat Resource and Research Center (RRRC)

Moving to a PhD Program

Trainees desiring to change to a PhD program have the opportunity to do so in a variety of programs including the **Pathobiology Area Program**.

MS in Biomedical Science with Emphasis in Pathobiology

Contact: Anne Chegwidena
 College of Veterinary Medicine
 201 Connaway Hall
 Columbia, MO 65211
 573-884-2444
chegwidena@missouri.edu
http://vpbio.missouri.edu/training_programs.html

Director of Graduate Studies: Catherine Vogelweid

About the Program

The College of Veterinary Medicine offers a Master of Science degree in biomedical sciences with a specialization in veterinary pathobiology and/or laboratory animal medicine, which is administered through the Department of Veterinary Pathobiology. The degree requires 30 credit hours of work including courses, seminars, research, and problems courses. The program includes research in a particular field and defense of a thesis which embodies the results of this work. Certain areas of emphasis require submission of a formal master's thesis while others require preparation of a publishable manuscript.

PhD in Pathobiology

For admission information about the doctorate of philosophy (PhD) in Pathobiology, refer to **Pathobiology Area Program** in this catalog.

Admission Criteria

Fall deadline: n/a

- Minimum TOEFL score (when appropriate):

Internet-based test (iBT)	Paper-based test (PBT)
61	500

- GRE scores required
- Undergraduate GPA of last 60 credits of undergraduate work: 3.0
- Designated faculty mentor
- Professional students with a DVM degree may be eligible to waive the GRE

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Veterinary Pathobiology Program:

- 3 letters of recommendation (can be submitted through the Graduate School's online application as well)
- GRE scores
- Mentor letter of support

MS in Biomedical Science with Emphasis in Veterinary Medicine and Surgery

Contact: Connie Sievert
 College of Veterinary Medicine
 Department of Veterinary Medicine and Surgery
 A-384 Clydesdale Hall
 573-882-1807
<http://www.cvm.missouri.edu/VMS/index.htm>

Director of Graduate Studies: Leah Cohn

About the Program

The College of Veterinary Medicine, through the Department of Veterinary Medicine and Surgery, offers graduate work leading to the master of science degree in veterinary biomedical sciences with an emphasis in veterinary medicine and surgery. In addition, faculty within the department offer supervision for doctoral and postdoctoral study and research. Many but not all graduate students in this area of study combine their graduate degree training with clinical residency programs leading to board certification in some specialty field within veterinary medicine.

Types of Study

The program provides advanced training in anesthesiology, comparative cardiology, equine, food animal and companion animal medicine and surgery, neurology, oncology, comparative ophthalmology, radiation oncology, radiology, nutrition, and theriogenology among other areas.

Resources and Facilities

Graduate students have ready access to clinical patients, medical records and facilities of the Veterinary Medical Teaching Hospital to aid them in clinical research. The college has its own library. More detailed information regarding the emphasis area of veterinary medicine and surgery can be found at the website <http://www.cvm.missouri.edu/VMS/index.htm>

Admission Criteria

Fall deadline: n/a

- Completion of a bachelor's or professional degree
- Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery
- Identification of funding (with advice of mentor) for the period of research and study
- Minimum TOEFL score (when appropriate):

Internet-based test (iBT)	Paper-based test (PBT)
65	520

- Minimum GRE score: none

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Veterinary Medicine and Surgery Emphasis Program:

- GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Requirements

Advisers and the Advisory Committee

Formulating a plan of study is the joint responsibility of the student, the adviser and the student's advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major adviser and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

Publications

A thesis reporting the results of original research is required of all candidates. A scientific paper based on the thesis research must be submitted to a refereed journal.

PhD in Biomedical Sciences

Director of Graduate Studies Dr. Douglas Bowles
 Biomedical Sciences Area Program
 W111 Veterinary Medicine Building
 1600 Rollins Road
 Columbia, MO 65211
 573-882-7305
<http://www.dbms.missouri.edu/>

About the Doctoral Degree Program

The Biomedical Sciences Area PhD is a multidisciplinary program that integrates molecular, cellular and systemic biology within the context of biomedical research. The program provides the student with the background to investigate questions relevant to the Medical sciences at the integrative, molecular or cellular level and to relate the findings to mammalian physiology. Training in both fundamental and state-of-the-art research methodologies help students develop the skills necessary for competitive biomedical research. The program is administered through the Department of Biomedical Sciences (College of Veterinary Medicine) that has research faculty representing a diversity of medical-related basic science disciplines, including anatomy, biochemistry, histology, pathology, molecular biology, physiology, pharmacology and toxicology. The program offers a rich environment for graduate study and a unique opportunity for training scientists in comprehensive interdisciplinary research.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

- Fall deadline: December 15
- Spring deadline: September 15
- Summer deadline: Not Applicable
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	600

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1000	3.5
On or After August 1, 2011	300	3.5

- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM.

Degree Requirements

To attain the PhD degree, 72 hours of graduate credit must be completed:

15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses)

The core curriculum includes:

- physiology (10 credit hours)
- biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
- multidisciplinary approaches to biomedical research (2 credit hours)
- departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:

- molecular biology
- cellular biology
- integrative biology

Rate and Quality of PhD Progress

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/her advisor and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student's doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.

Clinical and Translational Science

Contact information

Institute for Clinical and Translational Science

From Particles to Populations

The University of Missouri Institute for Clinical and Translational Science transforms discoveries made in laboratories across MU into community-based products, services and practices for the state and nation. The institute (ICATS) is the focal point of MU's efforts to develop clinical and translational science programs that improve health through better research, education and public service.

Few universities share MU's potential for saving lives through research. With more than 1,000 biomedical scientists and engineers — all on one campus — MU focuses its research on the deadliest diseases, such as cancer and cardiovascular disease, and the most vulnerable patients, including children and the elderly

Faculty

Professor

Associate Professor

- * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Clinical and Translational Science program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Associate Professor C. Conklin*, D. Crouch*, S. I. Strong*

Adjunct Assistant Professor J. Levin*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- LLM in Dispute Resolution (p. 634)

About the Dispute Resolution Program

Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse

student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements

Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

- Applicants may be admitted without a JD degree if they have a bachelor's degree and **substantial** experience in dispute resolution.
- Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
- Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

LLM in Dispute Resolution

Program of Study

The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required courses in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

Required Courses

LAW 6905	LLM Arbitration Seminar	3
LAW 6930	LL.M. Major Research Project	3
LAW 6935	Dispute System Design	3
LAW 6945	Non-Binding Methods of Dispute Resolution	3

Possible Electives

LAW 5450	Conflict and Conflict Management	12
LAW 5485	Cross-Cultural Dispute Resolution	
LAW 5537	Emotional Intelligence in Law	
LAW 6920	LL.M. Externship	
LAW 6925	LL.M. Independent Study	
LAW 5770	Mediation Clinic	
LAW 5840	Public Policy Dispute Resolution	
LAW 6950	Practicum on Dispute Resolution Training and Education	
PUB_AF 8610	Group Dynamics and Conflict Resolution	
PUB_AF 8620	Organizational Analysis and Change	
PUB_AF 8630	Organizational Change in a Community and Global Context	
PUB_AF 8160	Organizational Dynamics and Leadership	

THEATR 4240 Theory and Practice of Theatre of the Oppressed

Tailoring the Program

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:

- Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- Governmental Processes
- Healthcare
- International Law
- Normative Theory and Diversity
- Tax
- Trial Practice

While MU does not offer undergraduate degrees specifically in the genetics area program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- PhD in Genetics Area Program (p. 636)

About the Program

We believe that an understanding of genetics is essential in solving global problems such as famine, environmental degradation and disease.

The Genetics Area Program (GAP) is an interdisciplinary PhD program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

Genetics graduate students play a major role in the research programs of our life sciences departments. Students spend approximately twelve weeks in three different laboratories during their first year. This promotes diversity in techniques learned, and it encourages students to meet and work with faculty members in the associated departments. This scientific interaction helps our students choose a lab in which to complete the degree.

As part of the degree, students will spend a semester teaching or assisting with a course in the Genetics curriculum that is relevant to their career goals.

A genetics seminar series is organized and conducted by the graduate students to promote research interest and encourage scientific communication. Speakers include prominent researchers from universities throughout the country, as well as MU faculty. An annual retreat brings faculty and students together to share research results and techniques.

Genetics graduates leave MU with a strong scientific background, excellent laboratory skills and interpersonal communication abilities.

Graduate

PhD in Genetics Area Program

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Application Deadline

Fall deadline: January 15

Admission Criteria

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
93	580

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1100	4.5
On or after August 1, 2011	302	4.5

- Minimum GPA: 3.0 in last 60 hours
- Bachelor's degree
- One or more courses in each of the following: organic chemistry, biochemistry, mathematics (calculus and statistics), physics, introductory genetics
- Research experience highly desirable

- Broad background in biology

Note: Deficiencies in the subjects listed can be remedied after admission.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Genetics Area Program:

Genetics Area Program application (download form from website)

- GRE scores
- TOEFL scores (international applicants)
- 3 letters of recommendation (use provided form)
- Personal statement

Degree Completion Requirements

The minimum requirements for the PhD degree are:

- advanced courses in genetics, biochemistry and molecular biology
- regular participation in the genetics area seminar program
- successful completion of a comprehensive examination
- at least one semester of teaching in a genetics course
- 3 seminar presentations
- research, dissertation and oral defense

These are *beyond* the Graduate School's requirements. Others are determined in consultation between the student and faculty advisor.

Department of Health Management and Informatics

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri's communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for health- and education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Ethics (100% online format)

Residential Master of Health Administration students may also pursue a dual MBA, MS in Industrial Engineering, or JD degree, or may complete an additional Master's degree, such as the MPA or MPH, concurrently with the MHA degree.

Graduate

- MHA in Health Administration (p. 639)

About the Master of Health Administration

The graduate program in Health Services Management prepares professionals to meet critical and complex challenges in leadership and improvement in organizations and systems throughout the health industry. The program provides recognized national and global leadership in health management education.

The program is competency-based and distinctively equips graduates for success through (a) providing solid grounding in professional and operational knowledge and skills, (b) integrating health informatics throughout the health services management curriculum, and (c) incorporating overarching complex systems context and analytical approaches.

The residential and executive master's degrees launch and advance patient-centered, improvement-oriented, financially-responsible, and ethically-grounded careers in evidence-based health services management.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program

seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placement organizations include health systems, hospitals, academic medical centers, physician group practices, surgery centers, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master's degree format is a traditional on-campus residential program, the executive master's degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Established in 1965, the program is a member of the Association of University Programs in Health Administration (AUPHA) and has been accredited since 1968 by the Commission on Accreditation of Healthcare Management Education (CAHME), formerly Accrediting Commission on Education for Health Services Administration (ACEHSA).

Both executive and residential students may pursue the MHA degree jointly with the MS in Health Informatics degree. Residential students may also pursue a dual MBA, MS in Industrial Engineering, or JD degree, or complete an additional Master's degree, such as a MPA or MPH, concurrently with the MHA program.

Graduate

MHA in Health Administration

About the MHA

The HMI Department's MHA degree is designed for students from a range of educational backgrounds and provides the knowledge and skills necessary to function effectively as a healthcare executive. The curriculum includes such competency areas as health systems operations, organization theory, information management, financial management, strategic planning and marketing, human resource management, health economics, managerial epidemiology, leadership, and ethics. By combining basic and advanced course work with an internship and executive management study (an applied management study that replaces a thesis), the student may develop expertise in a focused area. Professional elective course selection is a mutual decision between the student and adviser, and in all cases, the intent is to tailor the degree program to the student's interests. The goal of the graduate program in health services management is to prepare professionals for leadership roles in health administration. Students develop an excellent applied knowledge in such areas as clinical decision support systems, risk assessment and management, clinical outcomes assessment, managing interdisciplinary teams and integrated health systems.

Degree Requirements

The residential MHA degree requires a total of 54 credit hours, which includes 36 hours of core coursework, three credit hours earned for a required 12-week summer internship, a three-credit hour capstone group management project, and 12 credit hours of professional electives. Students must maintain a minimum 3.0 cumulative MU graduate grade point average.

The professional elective requirement, which comprises four courses, allows MHA students the opportunity to concentrate in a particular area of study if they choose. They may take courses in health informatics or health ethics within the HMI Department, pursue graduate certificates in areas such as health informatics, public health, geriatric care management, or Lean Six Sigma methodology, or complement their MHA coursework with classes in business administration, public administration, architectural studies, industrial engineering and public health, to name a few.

MHA students are required to complete a 12-week administrative internship at an approved integrated managed care system, group practice, hospital or other healthcare organization under the guidance of a qualified preceptor (often an HMI alumnus/a). The internship is designed to incorporate the academic training students receive in their first year of the master's degree with practical applications within the host site. The students receive hands-on exposure to health care management in a real-world environment and experience first-hand the dynamics of a career in health care. The intern should have the opportunity to observe their mentor and other professionals in the work environment, as well as opportunities to discuss their experiences.

Specific general skills to be developed include:

- Leadership
- Strategic decision making
- Project management
- Teamwork

HMI's executive-in-residence works with each student individually to place him or her at an internship site. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

Required Courses

HMI 7410	Design of Health and Human Service Systems	3
HMI 7430	Introduction to Health Informatics	3
HMI 8460	Administration of Health Care Organizations	3
HMI 8461	Managing Human Resources in Health Care Organizations	3
HMI 8470	Strategic Planning and Marketing for Health Care Organizations	3
HMI 8472	Financial Management for Health Care Organizations	3
HMI 8524	Health Economics	3
HMI 8544	Managerial Epidemiology	1-3
HMI 8689	Field Experience in Health Management and Informatics	1-99
HMI 8571	Decision Support in Health Care Systems	3
HMI 8573	Decision Making for Health Care Organizations	3
HMI 8574	Health Care Law	3
HMI 8575	Health Policy and Politics	3

Students must also complete 12 credit hours of professional electives

Students must satisfy pre-requisites in microeconomics, managerial accounting, and managerial finance

Sample Plan of Study

First Year			
Fall	CR Spring	CR Summer	CR
Microeconomics pre-requisite, if necessary	Managerial Finance pre-requisite, if necessary	HMI 8689	3
Managerial Accounting pre-requisite, if necessary	HMI 8461	3	
HMI 7410	3 HMI 8524	3	
HMI 8460	3 Professional Elective	3	
HMI 8544	3 Professional Elective	3	
	9	12	3
Second Year			
Fall	CR Spring	CR	
HMI 8470	3 HMI 8450	3	
HMI 8472	3 HMI 8571	3	
HMI 8573	3 HMI 8574	3	
Professional Elective	3 HMI 8575	3	
HMI 7430	3 Professional Elective	3	
	15	15	

Total Credits: 54

Thesis/Non-Thesis Requirement

- improvement of patient experience of wait times in the Orthopaedic Clinic at the Missouri Orthopaedic Institute
- surgical site infection reduction informed by NSQIP resources for UMHC
- system-wide urinary catheter reduction for UMHC
- improving screening and follow-up for students with substance use and/or mood disorders at MU Student Health

Financial Aid

Students admitted to the MHA program are automatically considered for merit-based scholarships. A list of scholarships available through the Department as well as external scholarships and other sources of aid is available at: http://hmi.missouri.edu/prospective/financial_aid.html. All admitted students who are not Missouri residents are considered for out-of-state fee waivers, which include a \$1,000 scholarship and waive nonresident fees. A limited number of Graduate Research Assistantship (GRA) positions, which include a full tuition waiver, are available within the HMI Department. All incoming and current students receive consideration for GRAs, and the Department awards positions based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. Applicants admitted on probation are not eligible for GRAs, fee waivers, or scholarships until they attain a 3.0 GPA.

Executive MHA Degree

In addition to the traditional, residential MHA, the degree is offered in an alternative format to healthcare professionals who have significant clinical or administrative experience in health care. HMI accepts an executive MHA cohort to begin January of each year. The Executive MHA combines monthly on-campus weekend sessions, independent study, and online interaction in an innovative two-year course of study, and requires 42 credit hours of health services management coursework. Students are required to complete a substantial independent research

project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MHA, please visit <http://www.hmi.missouri.edu>, or call the Student Recruitment Specialist at (573) 884-0698.

Admissions

Deadline for Fall entrance: Rolling, recommended by March 31st

A minimum of a baccalaureate degree from an accredited institution

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	603

- Minimum Academic IELTS scores:

Item	Score
OVERALL	7.5

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	50th percentile
On or After August 1, 2011	50th percentile

- In lieu of GRE, minimum GMAT score: 50th percentile. HMI also accepts LSAT and MCAT scores.
- Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

The Health Services Management Program recruits and accepts qualified applicants regardless of race, sex, age, physical ability, or national origin.

Department of Health Management and Informatics

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri's communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for health- and education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics and Bioinformatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)

- Graduate Certificate in Health Ethics (100% online format)

About the Master of Science in Health Informatics and Bioinformatics

The Master of Science in Health Informatics and Bioinformatics program prepares professionals to meet critical and complex challenges in applying information technology within the health industry. It provides recognized national and global leadership in health informatics education.

The residential master's degree prepares students for careers in developing and evaluating clinical information systems, data and knowledge management, decision support, and doctoral study in health informatics. The executive master's degree advances the careers of physicians, managers, nurses, information system designers, consultants, entrepreneurs, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation

placements include doctoral programs, health systems, hospitals, academic medical centers, physician group practices, outpatient facilities, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master's degree format is a traditional on-campus residential program, the executive master's degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Graduate

MS in Health Informatics and Bioinformatics

Degree Requirements

The residential MS in Health Informatics (MSHI) curriculum requires 36 credit hours of course work, which includes foundational coursework in health information technology as well as health services management.[#] Prior coursework in computer science is not required. Residential MSHI students have the option to complete a 12-week internship during the summer following their first year, although it is not required for the degree.^{*} HMI's executive-in-residence will work with HI students who wish to complete an internship to find an appropriate placement. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html. The MSHI curriculum integrates learning across computer science, health informatics, and health services management, and also develops students' research interests. Those with excellent academic records are encouraged to pursue a PhD degree in informatics. Students must maintain a minimum 3.0 cumulative MU graduate grade point average. Individuals with three or more years of professional experience are encouraged to apply for admission to the Executive MSHI cohort (please see information below).

Required Courses

HMI 7410	Design of Health and Human Service Systems	3
HMI 7430	Introduction to Health Informatics	3
HMI 7440	Health Information Technology	3
HMI 8435	Information Security, Evaluation and Policy	3
HMI 8437	Data Warehousing and Data/Text Mining for Health Care	3
HMI 8441	Controlled Terminology Theory and Application	3
HMI 8443	Enterprise Information Architecture	3
HMI 8544	Managerial Epidemiology	1-3
HMI 8571	Decision Support in Health Care Systems	3
HMI 8610	Consumer Health Informatics	3
HMI 8870	Knowledge Representation in Biology and Medicine	3
HMI 8090	Thesis Research in Health Management and Informatics	3

- # Credit hours taken for pre-requisite courses as part of the MSHI program do not count toward the credit hours required for the degree.
- * If a student chooses to complete an internship, s/he must register for HMI 8689 Field Experience in Health Management and Informatics and must abide by all internship program requirements.

Sample Plan of Study

Thesis/Non-Thesis Requirement

Residential MSHI students have the option to complete a formal Master's thesis, which must be submitted to the Graduate School. Students who choose not to complete a thesis must complete a substantial independent research project. All MSHI students must present their thesis or independent research during their oral comprehensive examination in their final semester.

Financial Aid

Students admitted to the MSHI program are automatically considered for merit-based scholarships. A list of scholarships available through the Department as well as external scholarships and other sources of aid is available at: http://hmi.missouri.edu/prospective/financial_aid.html. All admitted students who are not Missouri residents are considered for out-of-state fee waivers, which include a \$1,000 scholarship and waive nonresident fees. A limited number of Graduate Research Assistantship (GRA) positions, which include a full tuition waiver, are available within the HMI Department. All incoming and current students receive consideration for GRAs, and the Department awards positions based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. Applicants admitted on probation are not eligible for GRAs, fee waivers, or scholarships until they attain a 3.0 GPA.

Executive MSHI Program

In addition to the traditional, residential MSHI, the degree is offered in an alternative format for professionals who have significant experience in health informatics. HMI accepts an executive MSHI cohort to begin January of each year. The executive MSHI combines three on-campus weekend sessions per semester with independent study and online interaction in an innovative two-year course of study, and requires 33 credit hours of health informatics coursework. Students are required to complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MSHI degree, please visit

<http://hmi.missouri.edu/> or call the Student Recruitment Specialist at (573) 884-0698.

The University of Missouri also offers a PhD in Informatics with Health Informatics as an emphasis area. Thus, official transcripts of students

who complete this doctoral program will reflect both the degree (Informatics) and the emphasis area (Health Informatics).

The doctoral program in informatics draws on the considerable resources and strengths of our department along with other academic programs at the University of Missouri. The benefit to students: a rigorous yet flexible program of study. For example, courses may include statistics, computer science, health systems, clinical informatics, consumer health informatics, public health informatics, program evaluation, information architecture, decision support and knowledge systems, and biomedical data/text mining. The integrated doctoral program assures broad exposure to the field and fosters new insights and innovative research concepts.

Careers

The US government predicts that employer demand will remain high for individuals with skills in health and clinical informatics. Mizzou students acquire the skills necessary to establish careers at the forefront of health informatics. This program is ideal for students who aspire to become researchers and thought leaders. Specific career paths may include health research; collegiate informatics teaching faculty; health informatics managers. Job sectors span government, medicine, health professions, and private, nonprofit and public research institutions.

About MUII

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is an interdisciplinary research and education program supported by 38 core faculty members from 14 departments and six colleges/schools, such as the College of Engineering; School of Medicine; School of Nursing; College of Arts and Sciences; College of Agriculture, Food & Natural Resources; and College of Education. The Institute, under the Governance of the Graduate School, offers a doctoral degree program with concentrations in bioinformatics and health informatics. Each concentration stresses the skill sets and research appropriate for the subfield within the broad area of informatics. Students are accepted into the program with diverse backgrounds and varying degrees of experience.

About the Graduate Certificate in Health Informatics

The Graduate Certificate in Health Informatics offered by the Department of Health Management and Informatics provides learners with the skills necessary to participate in the selection, use, and evaluation of information technology applications throughout the health services industry. The certificate program is designed for students, physicians, nurses, managers, information system designers, consultants, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

Students may pursue the HI Certificate in either the residential or executive format. Students who wish to pursue the HI Certificate only must apply to the HMI Department and the Graduate School for admission to the Graduate Certificate program. Students enrolled in the MHA degree program may earn an HI Certificate in addition to their Master's degree. The HI Certificate requires the completion of the following four courses (a total of 12 credit hours):

HMI 7430	Introduction to Health Informatics	3
HMI 8435	Information Security, Evaluation and Policy	3
HMI 8443	Enterprise Information Architecture	3
HMI 8571	Decision Support in Health Care Systems	3

About the Informatics Institute (MUII)

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is comprised of over 40 faculty from 15 different departments and 8 schools/colleges, including the Colleges of Agriculture, Food, and Natural Resources; Arts & sciences; Education; Engineering; Veterinary Medicine; and the Schools of Health Professionals; Medicine; and Nursing. The Institute offers emphasis areas in bioinformatics and health informatics, along with a concentration area in geoinformatics. Each emphasis area and concentration area stress skill sets and research appropriate to the subfield within the broad area of informatics. A core curriculum provides all students with a foundation of knowledge and tools in biology, computer sciences, health systems, and statistics, after which they complete further coursework in their chosen area. The integrated program assures broad exposure to the field and fosters new insights and innovative research concepts.

Undergraduate

While MU does not offer undergraduate degrees specifically in informatics, the University does offer baccalaureate opportunities in a number of related areas. Many successful informatics students have received bachelor's degrees in Geography, Computer Science, Statistics, Business, Biology, and Biochemistry before starting their doctorate.

In addition, MUII offers several service courses designed for upper-level undergraduates and master's students to expose students to the fundamentals of bioinformatics.

Graduate

- PhD in Informatics (p. 646)
 - with emphasis in Bioinformatics (p. 647)
 - with emphasis in Health Informatics (p. 647)

Emphasis Areas & Concentration Areas

MUII offers a doctoral degree (PhD) in two emphasis areas: bioinformatics and health informatics. In addition, students may also opt for a doctoral degree with a concentration area in geoinformatics.

Students with areas of interests outside of informatics may also wish to pursue a collaborative degree program between MUII and other degree programs. The purpose of the collaborative degree program is to allow students the opportunity to obtain advanced degrees in fields that complement the study of informatics and expand the student's knowledge and applicability.

MUII students may also select the collaborative degree between the Master of Public Health program and MUII PhD in Informatics program. Students must be accepted by both MUII and the MPH program to be eligible. Upon completion of the PhD requirements for the Informatics Institute and degree requirements for the MPH in Health Promotion and Policy with Focus on Informatics, students will receive both the PhD in Informatics and MPH degrees. For a full list of courses for the MPH in Health Promotion and

Policy with Focus on Informatics, please visit the MPH program website (<http://publichealth.missouri.edu/>).

Resources and Facilities

The Institute is located in multiple locations on MU campus with well-equipped laboratories containing state-of-the-art instrumentation and computing facilities for informatics research. Major instrumentation includes a Dell EM64T cluster system with 512 processors, an SGI Altix BX2 SMP server with 64 Itanium2 processors, IBM iDataPlex high-performance computing system, and a number of DELL servers with multiple quad-core processors for computational researches.

In 2014, the Institute added a farm of Intel NUC machines to provide Big Data learning sandpits for students and research groups to have hands-on experience in Big Data Ecosystem (Hadoop, Hive, HBase, and Pig) for their data analytics research in genomics, healthcare, and geospatial applications. In addition, the institute is partnering with IBM for student access to the new BlueMix cloud space with application software packages, such as SPSS, DB2, etc.

Faculty Areas of Research Interest

Faculty research covers a wide range of interests including structural bioinformatics, systems biology, cancer informatics, chemical informatics, epigenomics, phenomics, text mining & understanding, electronic health records, evidence-based medicine, personalized medicine, human-computer interactions in health care, consumer informatics, patient safety, public health informatics, geospatial informatics, information retrievals, biomedical data mining & knowledge discovery, and machine learning. For a list of faculty members and their research areas, please visit our web page (<http://muii.missouri.edu/people.php>).

Internal Funding

Fellowships and research/teaching assistantships are available for highly qualified applicants. Application information is available on the Institute's website (<http://muii.missouri.edu/financial.php>).

 FAX: 573-884-8709
 Informatics Institute (MUII) website: <http://muii.missouri.edu/>

Admission Criteria

Fall deadline: The deadline for Fall admission is March 1. However, to be considered for departmental and Graduate School fellowships and assistantships, applications should be submitted by January 15th.

- Preferred GPA: 3.3 out of 4.0
- Preferred GRE scores^{*}:

When did you take the GRE?	Verbal + Quantitative	Analytical
----------------------------	-----------------------	------------

Prior to August 1, 2011	1200	3.5-4.0
On or After August 1, 2011	309	3.5-4.0

* or a preferred GMAT score of 570

- Preferred TOEFL scores^{**}:

Internet-based test (iBT)	Paper-based test (PBT)
90	577

** or a preferred IELTS score: 6.0

- Sufficient background and training to pursue advanced degree in informatics

All Required Documents

Students are required to send ALL required application materials through the Office of Graduate Studies on-line application system. To begin your application, please see the ApplyYourself website (<http://gradschool.missouri.edu/admissions/apply>).

1. Curriculum Vitae
2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
3. GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
4. TOEFL/ELTS scores for international applicants, if required.
5. Three letters of recommendation from faculty or supervisors who can evaluate the applicant's credentials and potential to become successful in the area of informatics.
6. Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents

Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements

The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site (<http://muii.missouri.edu/2012program.php>) for complete details:

- Students must take required and area courses
- Students must pass a qualifying examination
- Students must present at least one institutional seminar annually
- Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame
- Students must pass a comprehensive examination at least 7 months before their scheduled defense
- Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics.

- To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.

PhD in Informatics with Emphasis in Bioinformatics

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Informatics program (<http://gradschool.missouri.edu/academics/programs/informatics-institute/doctorate.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

PhD in Informatics with Emphasis in Health Informatics

Qualifying Process

Students are required to take their qualifying exam by the end of the third semester into the program. Students must submit a Qualifying Exam Request Form (<http://muui.missouri.edu/qualexam.php>) to the MUUI office, complete with a one-page research statement, a draft of a D-2 Program of Study form (<http://muui.missouri.edu/planStudy.php>), and advisor consent.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Informatics program (<http://gradschool.missouri.edu/academics/programs/informatics-institute/doctorate.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

Medical Pharmacology and Physiology

Pharmacology and Physiology
School of Medicine
MA415 Medical Sciences Building
573-882-4957
<http://medicine.missouri.edu/mpp/>

The joining of these two disciplines provides a powerful way to address modern questions of biology.

The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Faculty

Professor F. Booth**, D. Bowles**, G. Davis**, M. Davis, K. Dellsperger**, N. Dietz, W. Durante**, W. Fay**, K. Gruber*, C. Hardin, E. Hasser**, M. Hill**, L. Holland**, V. Huxley**, T. Hwang**, J. Ibdah, K. Kattesh, R. Korthuis**, M. H. Laughlin*, K. McDonald**, G. Meininger**, M. Milanick**, L. Pulakat, S. Segal**, S. Shukla**, J. Sowers**, R. Terjung**

Associate Professor D. Bowles**, V. Demarco*, P. Fadel**, K. Gillis**, S. Halenda*, M. James-Kracke*, J. Lever**, R. Lim**, L. Martinez-Lemus**, A. Parrish**, P. Wilden**

Assistant Professor C. Baines, T. Domeier*, M. Krenz**, L. Polo-Parada**, J. Smith, G. Sowa**, M. Thakkar**

Professor Emeritus E. Blaine*, E. L. Foraker*, L. Forte*, R. Freeman*, T. Hurley*, A. Jones*, H. D. Kim*, M. Rovetto**, R. Russell*, J. Turner, R. Walkenbach*, W. Wosilait*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in medical pharmacology and physiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Monica Elliott
School of Medicine
MA415 Medical Sciences Building
573-882-4957
<http://medicine.missouri.edu/mpp/>

- MS in Medical Pharmacology and Physiology (p. 649)
- PhD in Medical Pharmacology and Physiology (p. 649)

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are

designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Pharmacology

Pharmacology is a basic medical science that deals with actions of drugs, hormones and neurotransmitters on living processes. Knowledge based on the results of pharmacological research leads to increased effectiveness and safety in the treatment of diseases in man and animals. Pharmacology is different from pharmacy, which is a profession concerned with the preparation and dispensing of drugs.

Physiology

The discipline of Physiology focuses on understanding the integrative function of living organisms from the molecular to the organismal level. As such, physiological research addresses how genes, organelles, cells, tissues and organs are integrated to accomplish the complex functions of living organisms. From a medical prospective, understanding normal function is a prerequisite to understanding disease.

Areas of Study

Regardless of their final degree objectives, students admitted into the departmental graduate programs will participate in a core curriculum during the first year and choose a specific tract leading to either a degree in Pharmacology or in Physiology following successful completion of the first year. The department also offers specially designed curriculum for individuals interested in a combined MD/graduate degree or who have previous relevant medical education.

Departmental Research

The departmental faculty has expertise in a variety of mammalian systems, with emphases in cardiovascular and endocrine physiology and molecular and cellular pharmacology. Individual labs utilize a number of different experimental models ranging from the whole animal studies to cellular, subcellular, biochemical and modern molecular approaches. Human research is also emphasized.

Research problems under current investigation include microvascular control of blood flow; modulation of vascular function by the extracellular matrix; role of the microcirculation in inflammation and diabetes; mechanisms involved in angiogenesis membrane regulation and ion transport; barriers separating circulating blood and tissue; energetics and metabolism of vascular smooth and cardiac muscle; electrophysiology of isolated cardiac vascular smooth muscle and endothelial cells; exercise physiology and regulation of contractile protein functions; and hormonal induction of genetic transcription, intracellular signaling mechanisms and genetic regulation of cell proliferation, cell cycle, cell differentiation and apoptosis; and the pathogenetic mechanisms of alcohol on liver cells.

Partnerships

Cooperative interactions exist with other clinical and basic science departments in the School of Medicine as well as with the Truman Veterans Hospital, the Dalton Cardiovascular Research Center, the College of Veterinary Medicine, Nutrition and Exercise Department and various campus-wide programs in Molecular Biology and Food for the 21st Century. The cooperative research atmosphere encourages staff

and students to work across departmental lines and provides a unique opportunity for interdisciplinary training of the students.

Teaching Experience

In addition to course work and research training, all graduate students are required to participate as teaching assistants in laboratory or lecture instruction offered by the department. Such experience enhances the students' presentation and teaching skills, contributes to their professional maturity, and reinforces a sense of collegiality between students and faculty.

Financial Aid from the Program

Financial support in this program for qualified graduate students is available from several sources. Students also may be eligible for institutional teaching and research assistantships. In addition, there are a number of fellowship awards from the Graduate School and the campus-wide Life Science Program available on a competitive basis through nominations by the Department.

Deadlines for these fellowships are January to mid-February each year. Applicants do not directly apply for these fellowships. Rather the department applies on behalf of successful applicants for admission. Therefore a prospective candidate should submit an application for admission to the department in the preceding fall. Finally, some of our students are supported by research grants of individual faculty members or by predoctoral fellowships from extramural sources.

Graduate

MS in Medical Pharmacology and Physiology

Admission Contact Information

Monica Elliott
 MA415 Medical Sciences Bldg, DCO63.00
 Columbia, MO 65211
 573-882-4957

Application Deadlines

Fall deadline: January 7
 Spring deadline: September 15

Admission Criteria

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500

- Minimum IELTS overall academic score: 5.5
- Minimum GPA: 3.0 in the last 60 hours
- Bachelor's degree in chemistry, biology, pharmacy or related areas from an accredited college
- Background in biology and chemistry and an understanding of mathematics and physics
- Course work in biochemistry and physiology is highly recommended.
- Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master's degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Medical Pharmacology & Physiology Program:

- Departmental application
- Personal statement
- Transcripts
- 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student's academic capability.
- Official GRE & TOEFL scores

Degree Requirements

To satisfy requirements for the MS degree, a student must complete the professional plan of study with an average grade of B or better and pass an oral examination over an acceptable master's thesis. Candidates also must comply with other regulations governing master's degrees.

Length of Study

MS degree students should normally complete their studies and thesis project within 2-3 years of admission to the degree program.

PhD in Medical Pharmacology and Physiology

Admission Contact Information

- Background in biology and chemistry and an understanding of mathematics and physics
- Course work in biochemistry and physiology is highly recommended.
- Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master's degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the Medical Pharmacology & Physiology Program:

- Departmental application
- Personal statement
- Transcripts
- 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student's academic capability.
- Official GRE & TOEFL scores

Plan of Study

The PhD plan of study includes at least two years of basic and advanced courses in physiology and/or pharmacology, as well as courses in cell and molecular biology. The students also will be trained in conducting physiological and pharmacological research in the laboratory of individual faculty members during the first year.

Qualifying Examination Policy

The department does not require a formal qualifying examination. Successful completion of the core curriculum and satisfactory performance in conducting scientific research and teaching will qualify students for continuation in the PhD program.

Choosing a Track and Mentor

The student will choose a dissertation mentor at or before the end of the first year and decide whether they wish to pursue the doctoral program in Pharmacology or Physiology.

Comprehensive Examination

All PhD program students must pass a comprehensive examination before the end of the first semester of the third year of enrollment. The usual format of the comprehensive exam includes the writing and oral defense of a research proposal outside of the student's dissertation research area.

Dissertation

Each student must then carry out a dissertation research project, original in nature, which is expected to contribute significant new knowledge

to the area of study. To facilitate this process, each student submits a dissertation research proposal within six months of passing the comprehensive examination.

Oral Defense

Finally, all PhD candidates must pass an oral defense of the dissertation and comply with all university and departmental regulations governing the PhD degree.

Length of Study

The doctoral program normally requires four to five years beyond the baccalaureate degree.

Microbiology

School of Medicine
M616 Medical Sciences Building
573-882-8152
<http://medicine.missouri.edu/mmi/>

The Department of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program, leading to the Doctor of Philosophy (Ph.D.) degree. This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbiology, pathogenesis, immunology and host-parasite interactions. MMI offers:

- PhD in Microbiology (Medicine)
- Cooperative Degrees: MD and PhD in Microbiology (Medicine)

Note: The Molecular Pathogenesis and Therapeutics Graduate Program is not accepting students into the master's program.

Faculty

Molecular Microbiology and Immunology

Professor D. Burke**, D. Duan**, M. McIntosh**, M. L. Misfeldt**, D. J. Pintel**, H. Zaghouani**

Jointly appointed to Molecular Microbiology and Immunology

Professor H. Braley-Mullen**, J. D. Wall**

Associate Professor U. Atasoy**

Assistant Professor B. Hahm**, S. C. McKarns**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in molecular microbiology and immunology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and

Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MS in Microbiology (p. 652)
- PhD in Microbiology (p. 652)

School of Medicine
M616 Medical Sciences Building
573-882-8152
<http://medicine.missouri.edu/mmi/>

The Molecular Pathogenesis and Therapeutics Graduate Program is built around scholarly activities with three important missions: cutting-edge research programs to address relevant biomedical problems in microbiology, pathogenesis, and immunology, a graduate training program to educate strong, independent research scientists, and a commitment to provide knowledge-based service to the state, national and international communities that will improve global understanding of the microbial world, infectious diseases and host immunity to infection. Graduate (and postgraduate) education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.

Faculty Research

The program is equipped to support a wide range of research activities at the cutting edge of our diverse science. Faculty research activities focus on key problems in pathogenic microbiology, immunology, molecular biology, genetics, therapeutics, and virology.

Research Facilities and Resources

The research environment at MU with Colleges of Medicine, Veterinary Medicine, Agriculture, Engineering, and Arts and Sciences on one comprehensive campus fosters the development of interdisciplinary scientific interactions that enhance both research and training opportunities for faculty and students alike. The Bond Life Sciences Center represents such an interdisciplinary research enterprise and houses investigators from multiple colleges and departments, including MMI and VPB. Critical to the Molecular Pathogenesis and Therapeutics Graduate Program interests in infectious diseases, pathogenesis, therapeutics, and immunity research, the recent construction of an NIH-funded Laboratory for Infectious Disease Research provides modern BSL3/ABSL3 containment research space and animal holding facilities for the investigation of highly infectious organisms and human select agents. This resource, and the Molecular Pathogenesis and Therapeutics Graduate Program's partnership with the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Disease Research, centered at Washington University in St. Louis, position MU in the national network of infectious disease research and training efforts. Please visit the MMI Web site (<http://medicine.missouri.edu/mmi/>) for additional information on MMI's access to state of the art facilities.

Career Opportunities

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.

Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their studies.

Required Courses for MPT Graduate Students in Program

- **Fall semester, 1st year (all required):**
 - MICROB 7101 Structure and Synthesis of Macro Molecules(2 credit hrs.)
 - MICROB 7303 Fundamental Virology(2 credit hrs.)
 - MICROB 7304 Immunology(2 credit hrs.)
 - MICROB 7404 Bacterial Pathogenesis(2 credit hrs.)
 - MICROB 8050 Graduate Student Survival Skills(1 credit hr.)
- **Three of the following courses** (only one of these may be an approved elective):
 - MICROB 9407 Advanced Immunology(4 credit hrs.; offered Spring semesters of even years only)
 - MICROB 9432 Molecular Biology II(4 credit hrs.; offered every Spring semester).
 - MICROB 9449 Infection and Immunity(4 credit hrs.; offered every Fall semester).
- Approved 8/9000 current literature-based elective (3-4 credit hrs.) 8000/9000-level electives: The DGS and the Curriculum Committee to must approve these courses. They should also be approved by the student's doctoral committee (examples of courses still needing approval are given below):
 - V_PBIO 8436 Pathogenic Mechanisms in Veterinary Pathobiology(3 hours)
 - BIO_SC 8350 Advanced Cell Biology(3 hours)
 - BIO_SC 8320 Developmental Genetics(3 hours)
 - BIO_SC 8440 Integrative Neuroscience I(3 hours)
 - BIO_SC 8442 Integrative Neuroscience II(3 hours)
 - MPP 9426 Transmembrane Signaling(4 hours)
 - MPP 9435 Skeletal Muscle(3 hours)
- **V_PBIO 8641 Introduction to Research Ethics** (1 credit hr.; every Spring semester)
- **MICROB 9087 Seminar in Microbiology** (required to take this 4 times: 2nd-5th years) (1 credit hr.; every Spring semester)
- **MICROB 9403 Advanced Medical Microbiology** (credit for teaching) (2 credit hrs.; every semester)

Other duties

- Act as a teaching assistant (TA) in MICROB 2800 or MICROB 3200 for two semesters (to be completed during the first two years, but not during the Fall semester of the first year).
- Attend Program seminars (any invited speakers and student seminars) on Wednesdays at 1:15 pm usually in Monsanto Auditorium in the Bond LSC; attendance will be taken; enroll in **MICROB 9087 Seminar in Microbiology** for 1 credit hr. in the Spring semesters of years 2-5. **You will need to give a seminar during those years as well,**

and your grade will be determined by attendance and your presentation.

Credit Hour Requirements:

The Graduate School requires 72 hours of advanced study to be completed for the Ph.D. degree. A minimum of 15 hours of 8000-level course work, not including MICROB 9085 Problems in Microbiology and MICROB 9090 Research in Microbiology, at most, four hours of MICROB 9087 Seminar in Microbiology can count toward this requirement.

Full-Time Student Enrollment:

Graduate student full-time enrollment statuses pre-comprehensive exam:
9 credit hours for fall and spring, 4 credit hours for summer.

Graduate student full-time enrollment statuses post-comprehensive exam:
2 credit hours for fall and spring, 1 credit hour for summer.

Graduate

MS in Microbiology

Thesis/Non-Thesis Requirements

Minimum requirements by the Graduate School (<http://gradschool.missouri.edu/academics/graduation-requirements/masters-grad-requirements.php>).

Students must make the degree change with the Graduate School and follow the minimum requirements set by the Graduate School. The Molecular Pathogenesis and Therapeutics Graduate Program requires all Masters students to provide a written thesis as well as present it orally in a public seminar.

Admissions

The Department does not accept students into the program.

PhD in Microbiology (MED)

Admission Contact Information

Jana Clark
Department of Molecular Microbiology and Immunology
M616 Medical Science Building
Columbia, MO 65212
573-882-3938
mimi@missouri.edu

The Departments of Microbiology and Immunology in the Medical School and Veterinary Pathobiology in the Veterinary School have combined, **Molecular Pathogenesis and Therapeutics Graduate Program**, to offer a graduate program designed to prepare students for an advanced professional career in microbiology and immunology. Emphasis is placed on developing outstanding students for productive supervisory roles in universities and colleges, industry, government and research institutes. Enrollment is limited to those students who show evidence of potential for research.

Application Deadline

Fall deadline: January 15

Admission Criteria

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
92	580

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1100	
On or After August 1, 2011	300	

- Minimum GPA: 3.0
- Bachelor's degree from an accredited college or university
- Courses in the following: biology; advanced courses in biochemistry and/or molecular biology are highly desirable; chemistry (quantitative or organic); physics; mathematics

The PhD degree is offered only to students who demonstrate a high level of specialized knowledge and clear evidence of research potential.

Required Application Materials

To the Graduate School:

- All required Graduate School (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad) documents
- TOEFL score (if international applicant)

To the MMI Program:

- Departmental application (https://mmi.missouri.edu/apps/grad_app)
- 3 letters of recommendation from individuals competent to comment on the applicant's potential for graduate work
- GRE scores
- Personal statement
- Copy of TOEFL scores (if international applicant)

Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their graduate studies.

Degree Completion Requirements

To be accepted for candidacy into the PhD program in microbiology & immunology, all applicants must perform satisfactorily in a core curriculum that includes advanced-level courses in the sub disciplines of immunology, molecular biology and microbial pathogenesis. Under the guidance of a doctoral program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Interdisciplinary courses in biochemistry, molecular and cellular biology and genetics provide breadth and balance in the program and enhance the student's research abilities. In addition, the PhD program consists of the following:

- Practical experience in teaching
- Successful completion of a comprehensive examination that tests the student's ability to develop an original scientific hypothesis and devise a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a scholarly dissertation on an approved research problem that results in the contribution of significant new knowledge. The final examination primarily covers this dissertation research.

University of Missouri Graduate School Application:

"You can apply to the University of Missouri Graduate School (<http://gradschool.missouri.edu>) or directly to the MPT Program Application (<http://medicine.missouri.edu/mmi/graduate-application.html>) and your application will receive equal attention. However, if you apply through the MPT Program Application and are accepted by the MPT Admissions Committee you will ultimately have to complete the Graduate School application before you can be formally admitted to the program. Applicants will not be registered with University of Missouri Graduate School (<http://gradschool.missouri.edu>) until they have completed the graduate school application and paid the graduate school application fee."

Applicants who are in the United States and reviewed favorably by the Graduate Admissions Committee will be invited to visit the University of Missouri for an interview for which the program defrays expenses. This visit provides an excellent opportunity for the prospective student to meet the faculty members, talk and interact with our current students, view the University of Missouri-Columbia and the Molecular Pathogenesis and Therapeutics Graduate Program, and experience Columbia, Missouri.

All application materials are filed alphabetically under the family name as indicated by the applicant on the International Student Application form. It is important that all supporting documents use the same name and spelling as the International Student Application so they can be quickly matched up to complete the application file.

You may either print the completed online application form or the PDF version of the form off and mail to:

Jana Clark, Business Support Staff II

<http://neuroscience.missouri.edu/>

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Students interested in the program are encouraged to contact members of the faculty directly by phone or e-mail, or visit the Interdisciplinary Neuroscience Program website.

Career Opportunities

MU's Interdisciplinary Neuroscience Program offers talented graduate students a chance to train for a career in one of the most exciting fields of modern science. Most of our students pursue research and teaching careers in basic neuroscience departments at prestigious research universities. Others opt for challenging and rewarding positions in applied fields, such as drug research or neurodiagnostic technology. Whatever their ultimate goals, the graduate neuroscientists who are trained at MU gain a solid understanding of the nervous system and of the experimental methods by which this knowledge is acquired.

Plan of Study

Typical undergraduate majors that constitute preparation for graduate work in neuroscience include, but are not limited to, biochemistry, engineering, biology, computer science, chemistry, physics, neurobiology, physics and psychology.

After completing comprehensive course work in molecular, cellular, systems and behavioral neuroscience, graduate students join a research laboratory and work with other lab personnel to master the relevant technical skills and theoretical concepts in their chosen field. Students in the Interdisciplinary Neuroscience Program have the opportunity to present their findings at lab meetings, seminars, journal club sessions, and both national and international professional scientific conferences.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Graduate

MS in Neuroscience

Admission Criteria

Fall deadline: January 15

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	600

- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1200	
On or After August 1, 2011	308	

- Bachelor's degree or its equivalent

Neuroscience comprises a united field that integrates across many disciplines, and students from a variety of academic backgrounds are encouraged to apply to the Interdisciplinary Neuroscience Program (INP). U.S. residents and international applicants are strongly encouraged to apply.

Required Application Materials

To the Graduate School:

- All required Graduate School documents

To the INP Program:

- Departmental application
- 3 letters of recommendation
- GRE scores
- TOEFL (if applicable)

Graduate Certificate in Neuroscience

The purpose of this certificate is to provide formal recognition to post baccalaureate students who are taking neuroscience courses and conducting research in neuroscience laboratories. This stand-alone certificate would allow post-baccalaureate students to have a specific, formal indication of their advanced studies and would be very beneficial to students who are considering applying to graduate degree programs or health sciences programs, such as medical or dental school.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/neuroscience-graduate-certificate/neurosci-ge/Gedt.html>

About the Program

The Nutrition Area Program provides graduate training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition.

Faculty

Professor C. D. Hardin**, J.A. Kanaley**, E.J. Parks**

Associate Professor S. Ball**, S. Gable**, P. S. Hinton**, C. A. Peterson**, J. Thyfault**

Assistant Professor P. M. Landhuis*, H. Leidy**, V. Vieira-Potter*, J. Padilla*

Teaching Associate Professor D.E. Brigham*

Teaching Assistant Professor M. Raedeke*

Joint Faculty M. J. Petris**, L. Pulakat**, R.S. Rector**

Adjunct Faculty F. W. Booth*, K. L. Fritsche**, L. Hillman*, Jamal A. Ibdah**, D. Lubahn**

Adjunct Instructor A. Cohen, L. Hudson*, J. B. Mann, T. Roberts, J. Schnell, R. Sharp, D. Showers, D. Smith

Extension Faculty J. Britt-Rankin*, C. Gabel,

Professor Emeritus R. P. Dowdy*, M. McDonald, B. L. O'Dell, T. R. Thomas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in the nutrition area program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- PhD in Nutrition Area Program (p. 656)

Graduate

PhD in Nutrition Area Program

About the Program

The Nutrition Area Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in nutritional sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and the MU Nutritional Center for Health (MUNCH).

Nutrition is, by definition, an applied and multi-disciplinary science that integrates other disciplines such as biochemistry, physiology, biology, psychology, sociology, and economics. A primary research focus in the department of Nutrition and Exercise Physiology is the role of diet in the prevention and treatment of chronic diseases that are prevalent in the United States today: obesity, the metabolic syndrome, diabetes, immune disorders, neurodegenerative diseases, and osteoporosis. Specific dietary components being studied for their role in human health include protein, calcium, vitamin D, copper, iron, omega-3 fatty acids, and nutraceuticals. Another important research area is the determinants of eating behavior, including neuro-psychological, sociologic, and economic factors. Investigative approaches include epidemiology, clinical trials, human studies, experimental and transgenic animal models, and cultured cell models.

Degree Requirements

Required Courses

NUTR_S 7340	Human Nutrition II Lecture	3
NUTR_S 8310	Nutritional Biochemistry of Lipids	3
NUTR_S 8340	Nutrition in Human Health	3
NUTR_S 9087	Doctorate Seminar in Nutritional Sciences	4
NUTR_S 9090	Doctorate Research in Nutritional Sciences	12
AN_SCI 9442	Vitamins and Minerals	4
BIOCHM 7270	Biochemistry	3
BIOCHM 7272	Biochemistry	3
Statistics	Work out specific courses with advisor	6

A total of 72 hours beyond the bachelor's degree, including but not limited to courses from the emphasis areas are required; courses from the Masters degree may be counted at the discretion of the student's committee. At least 15 of the 72 hours must be at the 8000/9000 level (exclusive of research, problems and independent study experiences). Graduate students may elect to take suggested courses from the following emphasis areas: Human/Clinical Nutrition, Public Health Nutrition, Behavioral Science, Food Science and Biochemistry/Cell Physiology. A list of possible courses that fall within these areas can be found on the department website: http://ns.missouri.edu/graduate_phd.html.

Sample Plan of Study

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encourage to work out their plan of study with their advisor.

Qualifying Process

Nutritional Sciences Program Applicants must pass a Qualifying Exam before a student is officially admitted to the doctoral program. The Qualifying Exam should be completed by the end of the second semester (D1 form should be filed with the Graduate School). The Qualifying Exam consists of a knowledge-based written exam and an oral exam.

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed work. The comprehensive examination is the most advanced posed by MU. It consists of written and oral sections. A doctoral student must successfully complete the comprehensive examination within a period of five years beginning with the first semester of enrollment as a PhD student and at least seven months before the final defense of the dissertation. The two sections of the examination must be completed within one month. A report of this decision (pdf) (<http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf>), carrying the signatures of all members of the committee, must be sent to the Graduate School and the student no later than two weeks after the comprehensive examination is completed.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation and must be the candidate's own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (<http://gradschool.missouri.edu/academics/programs/exercise-physiology>) and the [minimum requirements of the Graduate School](#). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied. Specific information can be found on the departmnet website: http://ns.missouri.edu/grad_admission.html

Nutritional Area Program PhD Applicants are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course. They must have an average of B or better in science courses (chemistry, biology, physics, biochemistry, mathematics, etc.) taken at an accredited institution and must provide GRE scores. TOEFL scores are required for all international applicants.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

Minimum TOEFL Scores

Internet-based test (iBT)	Paper-based test (PBT)
100	600

Minimum GRE Scores

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1, 2011	500	500	3.5
On or After August 1, 2011	150	150	3.5

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

Pathobiology Area Program

College of Veterinary Medicine
201 Connaway Hall
Columbia, MO 65211
573-884-2444

About the Pathobiology Area Program

The Pathobiology Area Program is university-wide and staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 630), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Faculty

Professor C. R. Brown**, C. Caldwell*, S. Casteel*, J. Cook**, G. Davis*, K. C. Dellsperger**, W. Fales*, C. Franklin**, C. Henry*, T. Hoffman**, G. C. Johnson*, M. Katz**, C. Lorson**, D. Lubahn**, C. Moore, D. O'Brien*, D. Pintel*, B. Ray*, R. M. Roberts*, H. Schatten, D. Shaw, G. P. Smith*, R. W. Stich*, C. V. Ward**, H. Zaghouni

McKee Endowed Professor G. Stewart

Associate Professor Y. Agca**, B. T. Beerntsen**, A. Bermudez, D. Beversdorf*, J. N. Bryan**, E. Bryda*, M. Calcutt**, L. Cohn*, D. D. Cornelison, J. Dodam*, T. Evans**, D. Fox*, S. A Grant**, G. S. Johnson*, M. Lewis*, S. Liu*, M. Lorson, J. Middleton*, W. J. Mitchell Jr., C. Phillips**, C. Reddy*, S. G. Sarafianos, C. Wiedmeyer**

Assistant Professor K. Aldridge**, D. Anderson*, U. Atasoy*, C. P. Baines*, G. Blomquist*, M. Daniels*, V. Glinskii*, Z. Gu*, C. Holliday*, K. Kuroki**, S. Schommer*, K. Taylor, G. Zhang*

Associate Clinical Professor L. Berent*, D. Kim, T. Reilly**, C. Vogelweid*, M. Whitney

Associate Research Professor A. Ray

Professor Emeritus C. A. Carson

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathobiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Director of Graduate Studies:

- PhD in Pathobiology Area Program (p. 659)

About the Program

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 630), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. In this program, various stipends are available, including teaching and research assistantships and postdoctoral fellowships. Check the program Web site or ask the program contact for details.

Career Preparation

Graduate training relates to the major departmental thrust — application of advanced biotechnology to solving today's most perplexing agricultural, biomedical and companion animal questions. The faculty in the Pathobiology Area Program consists of scientists engaged in a wide variety of research programs supported by grants and contracts from government, foundations and private industry.

The Pathobiology Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. Furthermore, it increases availability of advisers, committee members, facilities and equipment for doctoral candidates.

A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology.

Facilities and Resources

Facilities are available that are suitable for advanced research in pathology, microbiology and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. BSL-3 biocontainment facilities are available.

Areas of Study

Toxicology, environmental toxicology, comparative medicine, epidemiology and pathogenesis of avian and mammalian diseases (companion animal, food-producing animal and spontaneous disease of laboratory animals), molecular biology, ultrastructure, parasitology, DNA and RNA analysis, biomechanics, physiology, pathophysiology, oncology, bioinformatics, diagnostic anatomic pathology, veterinary neuropathology, pathology of infectious disease, quantitative pathology, molecular genetics, domestic animal genomics, bacteriology/mycology, virology, cell biology, genomics, and antimicrobial resistance.

Columbia, MO 65211
573-884-2444
chegwidde@missouri.edu

Admission Criteria

Fall deadline: n/a
GRE scores: GRE scores required
Minimum TOEFL scores (international applicants only):

Internet-based test (iBT)	Paper-based test (PBT)
61	500

Minimum undergraduate GPA for last 60 credits: 3.0
Designated faculty mentor
Professional students with a DVM degree may be eligible to waive the GRE.

Required Application Materials

To the Graduate School:
All required Graduate School documents

To the Pathobiology Area Program:
3 letters of recommendation (can be submitted through the Graduate School's online application as well)
GRE scores (required)
Mentor letter of support

Plan of Study

Most of the student's program and examining committees shall be from the Area Program faculty. Under the guidance of a program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Courses may be chosen from one or more departments, as decided by the student in conjunction with the student's mentor/committee, but shall constitute a definite plan of education for research or scholarly investigation in some particular aspect of microbiology, pathology, or comparative medicine. The final examination covers mainly the dissertation.

Degree Requirements

Research is the foundation of graduate and postdoctoral study and students within the Pathobiology Area Program can expect to spend 75 percent of their time engaged in research activities. The PhD degree requires 72 credit hours of work including a minimum of 15 credits of upper-level graduate course work exclusive of research credits. The student must pass a written and/or oral comprehensive examination in the area of study and write, present and defend a dissertation that embodies the results of original and significant investigation by

the candidate. Up to 30 hours of post-baccalaureate credit from an accredited institution may be transferred toward the doctoral degree.

Interdisciplinary Area of Pathobiology

The Department of Veterinary Pathobiology in the College of Veterinary Medicine, along with the Department of Pathology and Anatomical Sciences in the School of Medicine and faculty from many other departments throughout the University, offer a PhD degree through the Pathobiology Area Program.

Prospective students must have a solid background in the life sciences, with advanced level experience in microbiology, immunology, genomics, molecular biology, cell biology, pathology, and/or biology.

Research experience at the undergraduate and/or master's level is also desirable.

The Pathobiology Area Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology. Facilities are available that are suitable for advanced research in pathology, microbiology, and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. Various stipends are available, including teaching and research assistantships and postdoctoral fellowships.

Faculty members of the Program guide the selection of coursework and the development of a dissertation project. A list of doctoral faculty eligible to supervise PhD students is available here (<http://www.cvm.missouri.edu/AreaPatho>).

Application Deadline

Fall entrance: Inquire with Director of Graduate Studies

Admission Criteria

- Admission to candidacy in the master's program is limited to those who hold at least a baccalaureate degree from an accredited college or university.
- Preference will be given to students with a college GPA of 3.5 or higher
- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011		N/A
On or After August 1, 2011	325	N/A

Required Application Materials to the Graduate School:

- All required Graduate School documents

Degree Completion Requirements

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives. Required courses and those of special interest should complement the student's academic background and career objectives.

Public Health

Two Different Public Health Degree Options

The University of Missouri offers two different degree programs in the area of public health: the Master of Public Health, and a Master of Science in Public Health.

- The Graduate School confers the **Master of Public Health (MPH)** degree. The MPH Program has two emphasis areas Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, and Veterinary Medicine; and a graduate certificate. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is a course of study appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, and communication.
- **A Master of Science in Public Health (post-doctorate)** is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

- MPH in Public Health (p. 662)
 - emphasis in Health Promotion and Policy (p. 663)
 - emphasis in Veterinary Public Health (p. 663)
- Graduate Certificate in Public Health (p. 664)

The Graduate School confers a Master of Public Health (MPH) degree. The MPH Program has two emphasis areas Health Promotion and Policy or Veterinary Public Health; three dual degrees with Public Affairs, Journalism, and Veterinary Medicine; and Graduate Certificate. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. Appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, communication, and related fields.

Master of Science (MS) in Public Health (post-doctorate)

School of Medicine
M224 Medical Sciences Building, DCO32.00

<http://publichealth.missouri.edu/>

The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce.

The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri's strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

Degrees

The MPH is available in two emphasis areas:

- Health Promotion and Policy
- Veterinary Public Health

Three dual degrees are also offered:

- MPH/Doctor of Veterinary Medicine (http://publichealth.missouri.edu/programs_mphdvm.php)
- MPH/Master of Public Affairs (http://publichealth.missouri.edu/programs_mphmpa.php)
- MPH/Master of Arts, Journalism (http://publichealth.missouri.edu/programs_mphma.php)

Thesis Option

The Masters Thesis Research (P_HLTH 8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a public health theory. A formal written report using guidelines established by the MU Graduate School is required. Masters Thesis Research enables the student to use the research process in a systematic inquiry of elements and relationships within public health theory. MU Graduate School Guidelines for the Thesis Process is available at <http://gradschool.missouri.edu/academics/thesis-dissertation/process/index.php>.

The Master's Thesis Project provides students with the opportunity to:

- generate a research question within a theory,
- formulate and implement a research design, and
- make recommendations for replication, revisions, or future investigations.

Application Deadlines

- Fall semester: July 1st
- Spring semester: December 1st
- Summer semester: May 1st

Admission Criteria

- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

- Minimum Academic IELTS overall score: 6.0
- Minimum GRE score: not set
- Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

Required Application Materials

Graduate Certificate in Public Health

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission

Students wishing to pursue a Graduate Certificate in Public Health should complete the MU Graduate School's online application (standardized test scores are not required). Certificate candidates must provide the MPH Program's Personal Data Sheet and official transcripts to the MPH Program.

About the Certificate

This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

- Principles of Public Health
- An approved Health Statistics course
- Human Health and the Environment, Social and Behavioral Sciences in Public Health or Epidemiology
- One approved elective

Applying to the Graduate Certificate Program

Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here (<http://publichealth.missouri.edu/apply.php>).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/public-health-graduate-certificate/pub-health-ge/Gedt.html>

MS in Public Health: Family and Community Medicine

Admission Contact Information

Ashley Granger
One Hospital Dr,
M224 Medical Sciences Building, DCO32.00
573-884-7060

The Department of Family and Community Medicine has responsibilities for teaching, research and service activities covering the spectrum from primary medical care to community medicine. This graduate degree program is designed to prepare primary care physicians to work in an academic setting as faculty members with responsibilities for patient care, teaching, research, and scholarly endeavors. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

Application Deadline

Deadline for Fall entrance: Call for deadline dates

Admission Criteria

- Board-certified/board-eligible primary care physicians

Required Application Materials

To the Graduate School:

All required Graduate School documents

To the Program (call for application):

- 3 letters of recommendation
- Departmental application
- Personal statement
- CV or résumé
- Verification from medical school and residency program
- Official transcripts

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Plan of Study

The graduate program leading to the master of science includes a combination of course work, research and field experience. Courses cover areas such as research methods, epidemiology, biostatistics and learning theory.

The program requirements include 30 hours of graduate course work and the completion of scholarly project.

Social Work/Public Health

The dual degree program in Social Work and Public Health is a combination of the MSW in Social Work and the MPH in Public Health.

Students can earn a Master of Social Work (<http://ssw.missouri.edu/msw.html>) (MSW) and a Master of Public Health (<http://publichealth.missouri.edu>) (MPH) with an emphasis in Health Promotion and Policy (http://publichealth.missouri.edu/programs_health_promo_pol.php). Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care managers, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS), full-time MSW students (both clinical or PP&A concentration) will be admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits and reduces the length of study by one academic year. If completed separately, students would be required to complete 105 credit hours (60 credit hours for RS MSW; 45 credit hours for MPH) Students completing both degrees will be required to complete 78-81 credit hours, with 51-54 of those being discipline specific (18 MPH and 33 [PP&A]- 36 [Clinical] MSW) and 27 credits shared between the two programs. Students will complete the both degree programs in 7 semesters, including one summer session. Please see our sample plans of study (http://ssw.missouri.edu/msw_studyplans.html#dual).

Students will apply separately to each program and be admitted to both programs before they are accepted as a dual degree student. Students may apply at any point before beginning graduate school or during the first year of either program. MPH students applying for the MSW program (<http://ssw.missouri.edu/mswapp.html>) must submit their MSW application no later than April 15th (http://ssw.missouri.edu/msw_deadlines.html#dual) of their first year of study but early application submission is encouraged. MSW students applying for the MPH program must submit their MPH application (http://publichealth.missouri.edu/apply_mph.php) by December 1st of their first year. Once accepted into both programs, the student must complete the Intent to Complete MSW/MPH Dual Degree form (http://ssw.missouri.edu/docs/msw_dualDegree.pdf).

The advisor for the MSW/MPH Dual Degree program participants will be a faculty member with a joint appointment in both the MSW and MPH Programs. If a faculty member with a joint appointment is not available for advising, the student will be appointed a separate advisor for both degree programs. In cases where student difficulties are experienced that require advisory services other than that available from the advisor, the School of Social Work's formal student advisory process will be followed.

Up to eight hours of transfer credit (http://ssw.missouri.edu/msw_coursecredit.html#dual) may be applied as follows: to one of the two degree programs, or divided between the two degree programs per the advisor(s) and program directors' decision. The eight hours of transfer credit will not be applied separately to each degree program.

Credit requirements, shared hours, and curriculum focus conform to the requirements of the MU Graduate School, the national accrediting body for graduate education in public health (CEPH), and the national accrediting body for graduate education in social work (CSWE). The capstone and internship will satisfy the requirements of both programs

and will focus on the intersection of subject matter between social work and public health.

Faculty

Faculty for the Social Work/Public Health dual degree are housed in other departments.

Undergraduate

While MU does not offer undergraduate degrees specifically in social work/public health, the University does offer a dual graduate degree in the subject, as well as baccalaureate, master's and doctoral degree opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

- MSW/MPH in Social Work/Public Health with emphasis for Public Health in Health Promotion and Policy (<http://catalog.missouri.edu/undergraduategraduate/interdisciplinaryacademicprograms/socwkphlth/%20/undergraduategraduate/interdisciplinaryacademicprograms/socwkphlth/mswmp-h-sw-ph>)

The MSW/MPH in Social Work and Public Health will provide the student with solid preparation in each discipline, as well as a deeper understanding of the ways in which the two disciplines overlap through shared coursework. Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care manager, health coach, patient advocate, counselor, or team leader.

Students will apply for admission separately to each program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSW in Social Work program (<http://gradschool.missouri.edu/academics/programs/social-work/masters.php>), the requirements of the MPH in Public Health program (<http://publichealth.missouri.edu/apply.php>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

Additional Minors and Certificates - Interdisciplinary Academic Programs

Undergraduate

- Certificate in Society and Ecosystems (p. 677)

Undergraduate

Certificate in Digital Global Studies

This certificate is designed to prepare students in any discipline for our new global reality and equip them with the knowledge and skills needed to be successful in today's highly competitive global job market. All current MU undergraduate students in any discipline are eligible to participate.

The structure of the certificate includes two required core courses, two elective courses, and an experiential learning component. Below are the details on the required courses (more cross-listed options will be added).

A list of approved options for the electives is available online at: <http://cdig.missouri.edu/globalconnect/electives.html>.

The experiential learning component varies depending on the student's field of study and interest, but an emphasis on global relations, cultural awareness, or media technology is required. This component could be study abroad, service learning, internship, etc. with an MU Center or an outside local, national or international organization.

For additional information about the certificate, contact:

Professor Monika Fischer, Certificate Director
 458 Strickland Hall
 Columbia, MO 65211

Minor in Entrepreneurship

- CAFNR Track (p. 667)
- BUSI Track (p. 668)
- HES Track (p. 668)
- JOURN Track (p. 669)
- JOURN Strategic Communication Track (p. 669)

The undergraduate minor in entrepreneurship is built upon three pillars: development of creativity, opportunity for innovative action, and management of entrepreneurial enterprises. It is available to students in the College of Agriculture, Food and Natural Resources (CAFNR); the College of Business (BUSI); and the College of Human Environmental Sciences (HES); School of Journalism (JOURN).

Students who wish to complete the minor are encouraged to declare their intention as soon as possible. This allows the required courses to be effectively integrated into their course schedules along with other courses required for their intended major. An advisory committee will be appointed to make administrative decisions related to the minor (course additions/deletions). The members will be recommended by deans of the participating schools and colleges. Primary responsibility for student advising falls within the home college of the student OR in the unit where students claim the minor (e.g. Arts and Sciences students).

The minor consists of **16 credit hours**. Students must complete coursework in management, creativity, and innovation, as well as in a workshop series that represents a common learning experience for all MU entrepreneurship minors. Three hours of coursework is required in each area, and a one hour experiential seminar course. Students must select the final three hours to complete the minor from approved courses in one of the pillars. Each of the academic units that offer the minor recommend a set of courses, which are referred to as tracks. Details on those tracks are below.

CAFNR Track

CAFNR Track

Course 1: Management of Entrepreneurial Organizations & Enterprises

AG_EC 3283	Fundamentals of Entrepreneurship	3
MANGMT 4700	Principles of Entrepreneurship	3

Course 2: Development of Creativity

Classes in the following areas are accepted: art, music, theater, textile and apparel management, architectural studies, human and family development, and engineering.

ARCHST 1600	Fundamentals of Environmental Design	3
ART_GNRL 1010	Introduction to Art	3
ENGLSH 1510	Creative Writing: Introduction to Fiction	3
H_D_FS 3510	Curriculum and Activities for the Early Childhood Setting	3
IMSE 4550	Computer Aided Design and Manufacturing	4
MUSIC_NM 1211	Fundamentals of Music I	2
T_A_M 3210	Computer Aided Design	3
THEATR 2200	Introduction to Performance Studies	3

Course 3: Organizational & Business Fundamentals

Students must take one course to develop a background in one of the general functions of a new business.

AG_EC 2223	Agricultural Sales	3
AG_EC 3282	Agribusiness Finance	3
AG_EC 3286	Economics of Managerial Decision Making	3
AG_EC 3224	New Products Marketing	3
ACCTCY 2010	Introduction to Accounting	3
FINANC 2000	Survey of Business Finance	3
MANGMT 3000	Principles of Management	3

Course 4: Entrepreneurial Individualized Perspective

Students select a course that offers an opportunity to develop experience in innovation or additional courses in management or creativity. May be a lab course, service learning, or group activity.

Course 5: Practicum Capstone

AG_EC 3383	Rural Entrepreneurship II	3
AG_EC 4983	Strategic Entrepreneurship in Agri-Food	3

PLUS 1: Experiential Seminar

MANGMT 4185	Problems in Management	1
-------------	------------------------	---

This seminar gives students exposure to a variety of experiences including lectures, networking with entrepreneurs, and participant observation.

Students take an internship that offers an opportunity to develop experience in innovation or students take an additional course 3 (management) or course 2 (creativity).

Recommended Classes:

JOURN 4734	Journalism and Chaos: How to Understand and Cover 21st Century Business Models	3
------------	--	---

Course 5: Practicum Capstone

JOURN 4734	Journalism and Chaos: How to Understand and Cover 21st Century Business Models	3
------------	--	---

Experimental learning courses, where the student and the supervisor create an opportunity for innovative output.

Recommended Classes:

JOURN 4970	Strategic Campaigns	3
------------	---------------------	---

MANGMT 4720	Experiential Entrepreneurship (pending approval)	3
-------------	--	---

PLUS 1: Experimental Seminar

In their last year of study, students take a (1 hour) experiential seminar that involves interacting with the on-campus offices that work with start-ups, innovators and entrepreneurs.

Recommended Courses:

MANGMT 4185	Problems in Management	1
-------------	------------------------	---

Certificate in Environmental Studies

Special Degree Programs
114 Switzler Hall
(573)882-6060

Many environmental careers require the kind of discipline-specific education available in traditional majors, but with an added base of knowledge about environmental issues and the skills to address them. The Certificate in Environment Studies provides that base.

The Certificate is available to all majors. However, because of the variety of majors and the goal of the certificate program to compliment a specific course of study, students must select courses in consultation with the Environmental Studies advisor.

Certificate Requirements

- 6 hours of Natural or Social Dimension courses
- 3 hours of AG_EC 2070 or NAT_R 2160
- 6 hours of upper level environmental-focused courses

Sample Certificate for a Sciences Major

SOCIOL 1120	Population and Ecology	3
GEOG 2660	Environmental Geography	3
ENV_ST 2070	Introduction to Ecological Economics	3
Social Dimensions Course		3
Social Dimensions Course		3

Sample Certificate for a Social/Behavioral Sciences or Humanities Major

BIO_SC 1060	Basic Environmental Studies	3
ATM_SC 1050	Introductory Meteorology	3
ENV_ST 2110	Environmental Sustainability	3
Natural Dimensions Course		3
Natural Dimensions Course		3

Natural and Social Dimensions Courses are offered in other departments throughout the university. Check the Environmental Studies website or visit with the advisor to get an up-to-date list of courses that fit these categories.

Social Dimensions Course (3000 level)	3
Elective (3000 level)	3
Elective	3
Total	120

Certificate in General Honors

Students who complete 20 or more honors credit hours and have a 3.3 MU GPA may graduate with general honors. The General Honors Certificate is noted on a student's final transcript. Up to six hours of departmental honors courses, six hours of transfer honors courses, and six hours of Learning by Contract courses may be used toward the 20 hours. In order to receive honors credit for an honors designated course, you must earn a "C" or better.

Upon completion of the 20 hours of honors course work, students must apply for their honors certificate. Graduating students must apply for their honors certificate by mid-semester to graduate with general honors and to have the notation on their transcript.

For additional information on the certificate, contact:

MU Honors College
211 Lowry Hall
Columbia, MO 65211

Graduate

Graduate Minor in Ancient Studies

Interdisciplinary Minor within the College of Arts and Science
<http://ancientstudies.missouri.edu/index.shtml>

About the Minor

The Ancient Studies program, created in 1968, is shared among the faculty from six departments at the University of Missouri. This minor provides an opportunity for students to diversify their curriculum and to perceive their field in a broader context than is possible within a departmental program. Students in this program select about one quarter of the total courses from among a variety of courses designated by the participating departments.

A student pursuing a graduate degree in Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies may elect an Ancient Studies minor at either the M.A. or Ph.D. level. The Department of Classical Studies offers graduate work leading to the master of arts degree in classical languages with emphasis on Latin, Greek or both classical languages. The PhD degree in classical studies requires work in both Greek and Latin.

Professor R. L. Lyman, A. Melnyk, J. M. Foley, M. J. O'Brien, D. M. Pearsall, C. Saylor, K. W. Slane, T. Tarkow, I. Worthington**Curators' Professor** M. Smith**Associate Professor** S. Langdon, L. Okamura, D. Schenker, D. Hooley, R. Marks, J. McGlew, A. Mori, M. Rautman, D. Trout, B. Wallach**Assistant Professor** N. DesRosiers, R. Foley, R. Gregory, D. Kelley**Assistant Teaching Professor** M. Barnes**Professor Emeritus** W. R. Biers, W. Bondeson, J. H. Kultge

Admissions

Ancient Studies Program Requirements

1. Admission into one of the following graduate departments: Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies.
2. Fulfillment of all the requirements of the major department. The master's degree may be completed within approximately two years; the doctorate normally requires three years of course work beyond the master's level.
3. The minor consists of additional courses to be selected from Ancient Studies courses outside the student's major department; it usually constitutes about one-quarter of the graduate course work. For recognition of the minor, students should apply formally to the current chair of the Ancient Studies Committee.
 - a. For the M.A. degree, a minimum of 9 hours from at least two departments.
 - b. For the Ph.D. degree, a minimum of 24 hours (including the work for the M.A.) from at least two departments outside the student's home department. These must include at least one course on the 7000-level in each of the two departments.

To the University

General admission and degree requirements for the Graduate School are determined by the Graduate Faculty Senate. However, admission to the Graduate School does not in itself entitle a student to candidacy for an advanced degree. A student must also be accepted for advisement by the faculty of a department or area. Departments and areas establish admission standards that, in many cases, exceed the minimum requirements of the Graduate School. Admission to the Graduate School is based on three considerations:

- an official transcript showing that the applicant has earned a baccalaureate, DVM, MD or JD degree equivalent to that granted by MU,
- a grade point average of B or better in the last 60 hours of undergraduate courses and

- Official GRE results

To the Ancient Studies Program

Candidates must have earned a bachelor's degree in an appropriate field; preference is usually given to students who intend to continue their work for a PhD. An application, including a completed MU Graduate School application form, transcript and GRE scores, should be made directly to the department in which the student wishes to study. It must be accompanied by three letters of recommendation concerning the student's academic ability, a copy of a recent term paper, and a short statement from the applicant that sets out professional goals and reasons for pursuing the Ancient Studies minor. Inquiries may be addressed to the directors of graduate studies at the appropriate department.

Financial Support

The Ancient Studies Committee is able to award one fellowship (renewable for four further years) to a doctoral student entering from a University other than MU. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition to a stipend, University fellowships include exemption from resident and non-resident educational fees. Some individual departments also offer fellowships, scholarships and other financial assistance for graduate students, including teaching and research assistantships. For information concerning financial aid, write directly to the directors of graduate studies in the department to which you are applying. Financial aid deadlines are frequently earlier than the deadline for applications for admission.

In addition to the materials for admission to the Ancient Studies program, applicants for financial support must submit a separate letter to the department applying for fellowship or assistantship support.

Graduate Certificate in Autism and Neurodevelopmental Disorders - Interdisciplinary

Note: This program is no longer accepting applicants

The certificate is designed to allow students from multiple disciplines to gain knowledge of the specialized needs of persons with autism and other developmental disorders. Professionals currently working with children with ASD and other Neurodevelopmental Disorders will enhance their skills, and those who wish to work with this population will enhance their future employability. Additionally, students might use the Certificate to learn about the field, perhaps leading to further graduate study and an advanced academic degree.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/autism--neurodevelopmental-disorders-graduate-certificate/autism-ge/Gedt.html>

Graduate Certificate in Center for the Digital Globe

The Center for the Digital Globe graduate certificate is a 12 credit hour graduate certificate program established by the College of Business,

School of Journalism, School of Law and the Department of Textile and Apparel Management in the College of Human Environmental Sciences. The Center for the Digital Globe offers two graduate certificate options. The requirements for each are outlined below.

Stand-Alone Certificate (For non-degree graduate students and students completing professional degrees) OR Graduate-Degree-Dependent Certificate (For students completing a graduate degree)

I. CDiG STAND-ALONE CERTIFICATE

(For non-degree graduate students and students completing professional degrees)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to non-degree graduate students and professional students of the University of Missouri. The prerequisite for the stand-alone certificate is a baccalaureate degree. The certificate program supplements the students' studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the stand-alone certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc. To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further

study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Stand-Alone Certificate:

Eligibility:

Prerequisite for the stand-alone certificate is a baccalaureate degree. Professional students who are pursuing the stand-alone certificate must dually enroll in the Graduate School, be admitted to the CDiG Graduate Certificate Program and receive graduate credit for their 12 semester hours of stand-alone certificate courses. Others seeking this certificate who are not professional students and have not been admitted to Graduate School must also apply and be admitted to the CDiG Graduate Certificate Program. Apply online at the following web site: <https://app.applyyourself.com/?id=umc-grad>

SPECIAL NOTE FOR LAW STUDENTS: No more than six non-Law credits may count toward the JD degree.

Credits required for the Stand-Alone Certificate:

At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8052). The course of work for graduate certificate students is more specifically described as:

1. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.
2. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center's faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe's graduate courses web page <http://cdig.missouri.edu/coursesgrad.html> for a list of approved courses that meet this requirement.
3. JOURN 8052 Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

4. Grades - Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Stand-Alone Certificate Requirements Summary and Final Application for Certificate

To be eligible for the stand-alone certificate in the Center for the Digital Globe, students are required to take four courses for graduate credit: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8052 Case Studies in the Digital Globe. The two electives should be determined in consultation with the student's CDiG affiliated advisor. To receive the certificate upon completion of the program, students must also print and fill out the *Application for a Graduate Certificate Form* located on the Graduate School web site: <http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf> The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and the graduate dean. For students completing a professional degree, a copy of the student's approved degree program must be attached to the certificate application form when submitting it for the CDiG executive director's approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

II. CDiG GRADUATE DEGREE DEPENDENT CERTIFICATE (for students completing a graduate degree)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to graduate students of the University of Missouri. The certificate program supplements the students' graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the graduate degree dependent certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Graduate Degree Dependent Certificate

Graduate degree seeking students who want to pursue a Center for the Digital Globe Certificate must complete a *Change of Program Form* and be formally admitted to the certificate program. Print the *Change of Program Form* located on the Graduate School web site: <http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf>. See your graduate faculty advisor to process the form.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree.

Eligibility: Students who have completed their baccalaureate studies and are enrolled in a master's, doctoral or professional program and working toward a graduate degree at the University of Missouri.

Credits: At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8052). The course of work for certificate students is more specifically described as:

1. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.
2. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center's faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe's graduate courses page <http://cdig.missouri.edu/coursesgrad.html> for a list of approved courses to meet this requirement.

3. JOURN 8052 Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.
4. Grades: Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Graduate Degree Dependent Certificate Summary and Final Application for Certificate

To be eligible for the graduate degree dependent certificate in the Center for the Digital Globe, students are required to take four courses: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8052 Case Studies in the Digital Globe. The two electives should be determined in consultation with the student’s graduate advisor. **SPECIAL NOTE:** No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree. To receive the certificate upon completion of their program, students must print and fill out the *Application for a Graduate Certificate Form* located on the Graduate School web site: <http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf> The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and graduate dean. A copy of the student’s approved graduate degree program must be attached to the certificate application form when submitting it for the CDiG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

FOR ADDITIONAL INFORMATION:

Graduate Minor in College Teaching

Approximately 75 percent of faculty positions in the United States are at institutions where the importance of teaching and professional service is equal to or greater than the emphasis on research. The Minor in College Teaching, available to all MU graduate degree-seeking students,

demonstrates your preparation as an effective teacher to potential employers.

The Minor in College Teaching (MICT) requires 9 credit hours. This includes a 3-hour core course, a teaching practicum, plus 3-6 elective hours. It is highly recommended that students enroll in ED_LPA 9456, but it is not a requirement.

Core Required Courses - students must complete one of the following:

ED_LPA 9448	College Teaching	3
AG_ED_LD 8350	College Teaching of Agriculture, Food and Natural Resources	3
BIO_SC 8724	College Science Teaching	3
LTC 8724	College Science Teaching	3

Teaching Practicum

Students must complete a teaching practicum and portfolio, but do not have to officially register for a course in order to complete the requirement. Students opting to enroll in a course can choose from the options below.

Teaching Practicum - options for enrollment

AG_ED_LD 8995	College Teaching Practicum	3
ED_LPA 9481	Internship in Educational Leadership and Policy Analysis	1-99
H_D_FS 9100	Teaching Practicum	2-6
NURSE 8950	Teaching Nursing Practicum	4
PHIL 8210	Teaching of Philosophy I	1
SPC_ED 9940	Internship: College Teaching in Special Education	3
PSYCH 9910	Teaching of Psychology Practicum	1-99

Elective Courses

Teaching with Technology Elective Courses		3-6
ED_LPA 7822	College Teaching with Technology I	1
ED_LPA 7823	College Teaching with Technology II	1
Disciplinary Teaching Elective Courses		
AG_ED_LD 8330	Advanced Methods of Teaching	3
AG_ED_LD 8350	College Teaching of Agriculture, Food and Natural Resources	3
AN_SCI 8725	Science Outreach: Public Understanding of Science	1-2
BIO_SC 8725	Science Outreach: Public Understanding of Science	1-2
LTC_V 7810	Technology and Industry Education Methods	3
LTC_V 7830	Curriculum Content in Marketing Education	3
LTC_V 7840	Methods of Teaching Marketing Education	3
LTC 8712	Inquiry and the Science Curriculum	3
LTC 8900	Seminar in Curriculum and Instruction	1-3
CLASS 7700	Advanced Study in the Teaching of the Classics	3
ESC_PS 7100	Theories and Applications of Educational Psychology	3
ESC_PS 7115	Human Learning	3
ESC_PS 8320	Advanced Human Learning	3
ESC_PS 8350	Cognition, Learning and Instruction	3
ED_LPA 9440	Race, Gender, and Ethnicity in Higher Education	3
ED_LPA 9441	The Adult Learner	3

ED_LPA 9442	Curriculum Philosophy and Development in Higher Education	3
ED_LPA 9447	College Student Culture and Environment	3
ED_LPA 9449	History of Higher Education in the United States	3
ED_LPA 9455	The Community College	3
ED_LPA 9456	The Professoriate	3
ED_LPA 9459	Comparative and International Education	3
ENGLISH 7650	Principles of Teaching English as a Second Language	3
IS_LT 9471	Instructional Systems Design	3
NURSE 8850	Teaching Nursing	3
PHIL 8210	Teaching of Philosophy I	1
PHIL 8220	Teaching of Philosophy II	1
PHYSICS 8040	Study of Techniques of Teaching College Physics	1-3
PHYSICS 8350	Science Outreach: Public Understanding of Science	1-2
PSYCH 9150	Human Learning and Memory	3
FRENCH 7120 or SPAN 7120	Foreign Language Teaching Methodology	3
SPC_ED 7375	Cross Categorical Special Education	3

Graduate Certificate in Community Processes

The Graduate Certificate in Community Processes offers graduate students and professionals a unique opportunity to develop expertise in how spatial and relational communities function in today's society: their processes for forming, for maintaining the community and for achieving community objectives. A vital part of the certificate is acquiring applied skills in community facilitation processes or community analytical processes.

For more information please contact:

Dr. Judith Stallmann
 231 Gentry Hall
 phone: 573-882-6455
 email: stallmannj@missouri.edu

Graduate Certificate in Conservation Biology

A certificate in Conservation Biology from the University of Missouri shows that you have interdisciplinary coursework and experience not already met by any single degree program at MU. As Conservation

Biology is an interdisciplinary science the curriculum for our certificate provides coursework and experience beyond what is offered in a single degree program. The interdisciplinary nature of the curriculum is designed to help you reach a higher level of competence in conservation biology.

To accomplish this goal, the program has 2 required components:

1. Interdisciplinary coursework that includes at least one course each from the categories of Natural Sciences, Techniques and Policy/Social Sciences with at least 3 credits are from outside your degree program. A list of approved courses (http://www.conservbio.missouri.edu/forms&papers/Courses%20Fall%2009_updated.pdf) is available on the Conservation Biology website.
 - Ph.D. students: 15 credit hours of coursework at the 7000, 8000 or 9000 level, 12 of which may overlap with the degree course of study
 - M.S./M.A. students: 12 credit hours of coursework at the 7000, 8000 or 9000 level, all of which may overlap with the degree course of study
 - Coursework must include one course each from the following areas: Science, Techniques and Policy (See approved course list)
1. Practical experience through an internship that falls outside your discipline
 - 160 hours of an internship exploring an area complementary to the student's conservation career goals
 - Designed and completed under the guidance of a mentor other than your major advisor
 - Results in a tangible product (e.g. paper, publication, presentation)

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/conservation-biology-graduate-certificate/conserv-bio-ge/Gedt.html>

Graduate Certificate in European Union Studies - Interdisciplinary

The Graduate Certificate in European Union Studies requires students to take 12 hours of coursework.

Required Courses

PUB_AF 8850	Policies and Institutions of the European Union	3
-------------	---	---

Specialization Courses

The rest of the hours should come from courses that have a strong EU focus	9
--	---

For more information contact Fritz Cropp at the Transatlantic Center (<http://eu.missouri.edu>).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/european-union-graduate-certificate/eu-ge/Gedt.html>

Graduate Minor in Gerontology Studies

The graduate minor in gerontology consists of nine to 15 hours of aging-related course work approved as a graduate minor by the student's department/discipline. The MU Interdisciplinary Center on Aging will collaborate and provide assistance to both the student and his or her adviser. Twenty-three courses in more than 10 disciplines can be supplemented by independent and topics courses. Mentoring from experienced researchers on interdisciplinary research teams contributes to the learning curve of students specializing in aging studies. More than 40 teams are located throughout the university. Students are encouraged to contact the Interdisciplinary Center on Aging for help connecting with these productive groups of scholars.

For additional information, contact:

MU Interdisciplinary Center on Aging
 M245A Medical Sciences Building
 Columbia, MO 65212
 phone: 573-884-3337
 email: aging@missouri.edu
 website: <http://medicine.missouri.edu/aging/home.html>

Graduate Certificate in Global Public Health

The Graduate Certificate in Global Public Health includes 15 credit hours of course work and a required international public health experience and may be taken independently or combined with an MPH. Course credits earned for the Graduate Certificate may also be credited toward the MPH degree. It is recommended that Graduate Certificate students start with Interdisciplinary Perspectives in Global Health, which is offered every semester in varying formats.

Required Courses:

P_HLTH 7150	Principles of Public Health	3
STAT 7020	Statistical Methods in the Health Sciences	3
or STAT 7410	Biostatistics	
P_HLTH 8420	Principles of Epidemiology	3
P_HLTH 8953	Developing and Evaluating Global Public Health Programs	3
Elective		3

For more information:
mumphprogram@missouri.edu
 573-884-6844

Graduate Certificate in Health Ethics

The certificate program is ideal for working professionals such as physicians, nurses, healthcare administrators, those serving on hospital ethics committees or considering such health ethics issues in their daily employment, and students in the health professions. The certificate program will help the learner develop an understanding of

the ethical issues related to health and healthcare and will foster skill in analyzing and resolving ethical problems and conflicts in the healthcare environment.

Graduate Minor in International Development

The requirements for acceptance and completion of work for the minor are as follows:

1. The student must be enrolled as a master's or PhD candidate in good standing at MU.
2. A formal request to be included in the minor must be made in advance of taking courses, to the director, Associate Professor Corinne Valdivia, 214D Mumford Hall. This request should be approved by the student's adviser. A copy will be sent to the Graduate School.
3. Once the student is admitted to the minor, s/he should seek advisement from the director and his/her adviser concerning which courses to take. The plan of study must be submitted to the Graduate School no later than the semester before graduation.
4. The student must satisfactorily complete a total of twelve credit hours in courses dealing with Third World Development. At least six of the twelve hours must be taken in at least two departments outside the student's home department.
5. Foreign language courses are not required, but students who are not fluent in a second language are strongly encouraged to take intensive language courses to develop competency. Credit for language courses does not count toward the twelve hours of credit required for the minor.
6. When the required twelve hours of credit are completed from approved courses, the student's adviser should inform the director, who will in turn inform the policy committee which governs the operation of the minor. This should be done in advance of the student's orals to give members of the policy committee an opportunity to sit in on the examining committee if they so desire.
7. The certificate is only awarded after all departmental and Graduate School requirements for the advanced degree have been satisfied. An overall grade point average of 3.0 is required for the twelve hours within the minor.

Graduate Certificate in Life Science Innovation and Entrepreneurship

Overview

A certificate in Life Science Innovation and Entrepreneurship at the University of Missouri will broaden the training of graduate and professional students from the fields of business, engineering and medicine, among others. A collaborative program among MU's Trulaske College of Business, College of Engineering and School of Medicine, the program will prepare participants for a wider range of employment opportunities and provide core skills for entrepreneurial endeavors.

Interdisciplinary Curriculum

Through an interdisciplinary approach, the program will allow MU graduate and professional students to receive training to translate life science discoveries into products and services that will improve health. The program will require completion of three three-hour core curriculum courses designed to cover the life cycle of a translational science/business venture, as well as elective courses for a total of 12 hours of course credit. The three-course sequence will be augmented by elective courses that round out the educational needs of particular students.

Program Objectives

- Know and understand the life sciences industry well enough to be familiar with terms, trends, issues, and industry culture in order to be able to recognize needs that may be commercially viable.
- Know and understand the three disciplines represented by the courses such that they are able to assess the commercial viability of a life sciences technological innovation.
- Know how to commercialize new life science discoveries into products and services to improve health in humans and/or animals.

Course Content

School of Medicine

- Nature of discovery
- Protecting intellectual property
- Reimbursement models in health care
- Life science methods and research tools
- Research with industry partners

College of Engineering

- Identification of clinical needs
- Concept screening and selection
- Regulatory pathways and the FDA
- Patents and intellectual property basics
- Design and prototypes

Trulaske College of Business

- Commercialization process
- Market assessment and competitive landscape
- Technology transfer, licensing, and startups
- Sources of capital
- Business plan and market strategy

Admission Requirements

The only prerequisite for the first course in the sequence will be good standing in a graduate/professional program or the consent of the instructor on a case-by-case basis.

Graduate Certificate in Society and Ecosystems - Interdisciplinary

Contact

Sandy Rikoon, Ph.D.
 Coordinator Society and Ecosystems Program
 200 A Gentry Hall
 University of Missouri-Columbia
 Columbia, MO 65211
 Telephone: 573-882-0861
 Email: rikoonj@missouri.edu

Goals

Understanding the complex and dynamic interactions between human activities and natural ecosystems is essential for achieving sustainable

development. Developing this understanding in the next generation of scientists, educators and resource management professionals is the primary goal of the University of Missouri's interdisciplinary graduate certificate program in Society and Ecosystems.

The Society and Ecosystems Program (SEP) is a unique interdisciplinary program that prepares students for careers with private and public organizations through advanced graduate level training and research. The certificate program is designed for students with undergraduate-graduate training in agriculture, biology, business administration, economics, engineering, fisheries and wildlife, forestry, geography, geology, rural sociology and related disciplines. Students who are in a graduate or professional program in their area of specialization take two integrated courses and complete a thesis or dissertation that applies more than one discipline. The program is designed to enhance the student's familiarity with disciplinary and interdisciplinary concepts and principles from the social and natural sciences and humanities.

The goal of the program is to develop critical thinking and analytical skills related to:

- sustainable natural resource and environmental management and planning,
- dynamic interactions between social, economic and ecological systems,
- quantitative-qualitative analysis of individual and social behavior,
- cultural interpretations of natural resource and environmental issues, and
- application of knowledge gained in the above areas to the evaluation of public policy.

Admission

Admission to the SEP is open to students who have been admitted to a graduate or professional program in the University of Missouri-Columbia, have undergraduate-graduate training in natural and social sciences, and have interest in interdisciplinary studies. Persons interested in the SEP should contact the Coordinator.

Curriculum

Students must be enrolled in a regular academic department and working toward completion of a graduate degree in a natural resource-related discipline. All students are required to take the following core courses:

a) six credits from a department/unit other than the one in which the student is enrolled, b) a three-credit interdisciplinary course on the human dimensions of ecosystem management, and c) three credits of a research seminar in Society and Ecosystems.

The interdisciplinary course examines the sociocultural, economic, ethical and biophysical aspects of ecosystem management with emphasis on the human dimension. It is normally taken during the student's first year.

The primary objective of this course is to develop a student's appreciation of a) major issues in the society-ecosystems nexus, b) roles of various disciplines in understanding and resolving socioeconomic-ecological issues, and c) systems analysis. A course requirement is for students to work in multidisciplinary teams to evaluate human effects on and responses to global warming, loss of biodiversity, water pollution, and other contemporary natural-environmental resource issues.

The research seminar exposes students to interdisciplinary research on the interactions between social, economic and ecological systems. Emphasis is placed on the impacts of economic activity, population

growth, technology and public policy on the functioning and resilience of ecological systems, and how ecological systems support socioeconomic development at the local, regional and global scales. Speakers for the research seminar include faculty, students, visiting scholars, and private and public officials. Students are expected to present their thesis or dissertation research at the research seminar. Thesis and dissertation research must be conducted on a topic related to the interactions between society and ecosystems. Students completing the SEP receive a certificate in Society and Ecosystems. Recognition of the certificate appears on the student's transcript.

Advisory Committee

The student's plan of study and research topic are selected in collaboration with an advisory committee established in accordance with the requirements of the student's department/unit and the Graduate School. The advisory committee includes at least one faculty member affiliated with the SEP. Graduate school permission is required in cases where it is highly desirable for the three faculty members comprising a masters student's advisory committee to be from different departments/units.

Honors College

The Honors College is a community of motivated and high-achieving students from all the undergraduate colleges at the University of Missouri. It offers an innovative and dynamic curriculum that encourages in-depth study in traditional fields of learning as well as other kinds of intellectual inquiry, including interdisciplinarity and experiential learning. The College also fosters scholarly engagement through research opportunities, study abroad, service learning, internships, and other experiences that expand learning beyond the classroom, and it provides personalized advising through a team of professionally trained advisors.

The Honors College gives honors students maximum flexibility in order to serve their individual interests. Honors courses, taught by many of the university's best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large, research university.

Opportunities in the Honors College are described below.

Honors Curriculum

Honors courses fall into 3 categories:

1. Courses offered through individual departments. These include special topics courses (e.g. "Social Neuroscience") and honors sections of regularly offered courses (e.g. "Introduction to Biology").
2. Courses offered through the Honors College.
3. Research and other independent-study types of courses, offered both through departments and the Honors College.

Honors courses offered through the Honors College include the following:

- **Humanities Series.** This series of four, historically-organized courses provides an interdisciplinary approach to art, art history, literature, music, philosophy, and religion.
- **Human Sciences Series.** This series of four, thematically-based courses provides an interdisciplinary approach to the behavioral and social sciences, including cultural geography, economics, family studies, history, psychology, and sociology.
- **Science series.** This series of two, thematically-based courses provides an interdisciplinary, hands-on laboratory approach to science for non-science majors. It is designed to introduce students to the methods, range, and big ideas of scientific knowledge.
- **Honors Discussion Groups and Seminars.** These are small and informal courses typically focused on a special topic (e.g. "Sherlock Holmes" and "Big Ideas in Science")
- **Career Explorations Courses.** These lower-level courses are designed to introduce students to different career choices in fields like Journalism, Medicine and Health, and Law.
- **Honors Tutorials.** These upper-level courses are informal discussion groups of 2-5 students and a faculty member. Tutorials focus on

special topics that change from semester to semester, depending on which faculty members are offering them. Past examples include "The Financial Crisis of 2008" and "The Vikings." They are based on the Oxford-style of learning, with heavy emphasis on conversation and in-depth investigation.

- **Honors Independent Study Courses.** These courses provide honors students with an opportunity to study topics (typically of the student's choosing) with a faculty member.
- **Honors Colloquia.** These courses focus on interdisciplinary topics and typically adopt a more flexible and experimental approach to teaching (e.g. "Sports Psychology").
- **Honors Preceptorships.** These courses provide honors students with an opportunity to conduct specialized research with a faculty member.
- **Honors by Contract.** This arrangement allows honors students to take a non-honors course for honors credit by completing additional or alternative work. To do an Honors by Contract, students must enter into a contractual agreement with a professor, approved by the director and associate directors of the Honors College. Contractual forms are available online.

More information on honors courses can be found on the website (honors.missouri.edu).

Special Programs and Services

Advising. The Honors College offers one-on-one academic advising for all honors students. Through its MedOpp office, it also offers specialized advising for students planning a career in medicine, dentistry, optometry, or podiatry. MedOpp advising provides students with a comprehensive program that includes a variety of services to guide students through the academic and application process necessary to become a health professional.

Honors Housing. The Honors Learning Community fosters a living and learning space that fosters intellectual and social stimulation and encourages residents to succeed academically and socially during their time at the University of Missouri.

Service Learning. The Honors MU Community Engagement Project is a service-learning outreach program designed to assist members of the community and offer honors students problem-solving and leadership experiences. Service projects include mentoring at-risk adolescents, working with low-income pre-school children, and investigating and providing service for local public health agencies. Students perform community service, participate in a seminar, and complete research projects.

Honors College Admissions

Incoming Freshmen

Incoming freshmen may apply for automatic admission to the Honors College upon submission of an application, if they satisfy any one of the following three criteria:

- An ACT score of 31 (SAT 1360) AND either a top 15% class rank OR a high school Core or Enhanced Core GPA of 3.58
- An ACT score of 30 (SAT 1330) AND either a top 10% class rank OR a high school Core or Enhanced Core GPA of 3.74
- An ACT score of 29 (SAT 1290) AND either a top 5% class rank OR a high school Core or Enhanced Core GPA of 3.91

Incoming freshmen who do not meet both of the admission criteria are required to submit an essay as part of their application.

Essays are evaluated on an individual basis. Specific information on the requirements for the essay can be found on the website (honors.missouri.edu).

Transfer Students

Transfer Students are eligible for admission to the Honors College if they have completed at least 30 credit hours of college credit at an accredited institution and have achieved a GPA of 3.7 or above. If you meet these criteria, please fill out the online application (http://honors.missouri.edu/future_students/application.php). The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended.

Current MU Students

Current students are eligible for admission to the Honors College if they are an MU student who has completed at least 12 credit hours and achieved a cumulative MU GPA of 3.7 or higher. Students who meet these criteria, must fill out the online application (http://honors.missouri.edu/future_students/application.php).

Program Requirements

Maintaining Honors Eligibility

GPA Requirement

To retain membership in the Honors College, students must maintain an MU cumulative GPA of 3.5 or above. Students with an MU cumulative GPA below 3.5 will receive a warning letter the first semester in which this occurs. Students with an MU cumulative GPA below 3.5 for a second consecutive semester will no longer be members of the Honors College. Students wishing to reapply to the Honors College must meet the eligibility requirements for current MU students (see above).

Participation Requirement

Students who join the Honors College as first-year students will be required to complete two honors courses per year for their first two years at MU. All honors courses will count toward this requirement, including honors-designated courses, and Honors Learning-by-Contract. MU students who join the Honors College in their sophomore year and transfer students who are admitted with sophomore standing will be required to complete two courses in their first year of Honors College membership. MU students who join the Honors College after their second year and transfer students who are admitted with junior or senior standing will be exempted from the participation requirement.

Honors Certificate Requirements

Students who complete 20 or more hours of courses for honors credit and maintain a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate. In addition to General Honors and Departmental Honors course credits, the 20 hours may include up to 6 hours of honors transfer credit, 8 hours of Learning-by-Contract credit, and 8 hours of approved graduate credit (form required) (http://honors.missouri.edu/students/graduate_credit_form.pdf). Students must achieve a minimum letter grade for each course: a C or better for regular honors classes or a B or better for Learning-by-Contract courses. Students must apply for the Honors Certificate by completing the application (http://honors.missouri.edu/students/certificate_application.php). In order to participate in the Honors Convocation, students must apply no later than the end of the third week of classes in their final semester. For more information, see

the Application for Graduation with the Honors Certificate (http://honors.missouri.edu/students/certificate_application.php).

University Honors Designation

Students who complete the Honors Certificate and a qualified departmental honors program will be eligible for this designation, which will be noted on their permanent transcript. See your department or the Honors College for information about departmental honor programs.

Faculty

There are faculty from all disciplines who teach Honors College courses.

School of Law

203 Hulston Hall
Columbia, MO 65211-4190
phone: 573-882-6042
fax: 573-882-4984
web: <http://law.missouri.edu>

Welcome to the University of Missouri School of Law's online catalog for the 2014-2015 academic year.

Information in this searchable, interactive catalog is current as of May 2014. The next catalog will be made available in May 2015. In the interim, changes to the law school curriculum will be made on our website (<http://law.missouri.edu>).

Use the search box above or click on the left hand menus to navigate through the catalog. There is also a PDF version available through the "Print Options" link above.

Broken links inside the law school's online catalog may be reported by contacting umclawweb@missouri.edu. (umclawweb@missouri.edu)

The University of Missouri School of Law offers a collegial environment, reinforced by a small student body and a low faculty-student ratio. The intimacy of this setting, coupled with reasonable cost, consistently high bar passage rates, a network of alumni around the globe and access to top scholars in the legal world, make the School of Law one of the best values in the nation.

Administration

- Gary Myers, Dean and Earl F. Nelson Professor of Law
- Christina Wells, Associate Dean for Academic Affairs
- Rigel C. Oliveri, Associate Dean for Faculty Research and Development
- Elisabeth E. Key, Assistant Dean for Career Development and Student Services
- Robert G. Bailey, Assistant Dean
- Randy J. Diamond, Director of Library and Technology Resources and Professor of Legal Research
- Rafael Gely, Director of the Center for the Study of Dispute Resolution and James E. Campbell Missouri Endowed Professor of Law
- Alisha L. Rychnovsky, Manager of Business and Fiscal Operations
- Mark Langworthy, Senior Director of Development
- Casey Baker, Director of External Relations
- Michelle L. Heck, Director of Admissions and Financial Aid

Mission Statement

The MU School of Law aspires to be the school of choice for outstanding students, both from Missouri and other states. As a national leader in the field of dispute resolution, we seek to complement a strong traditional curriculum with an orientation toward lawyering as a problem-solving endeavor. We strive to foster a diverse faculty of nationally recognized scholars who are committed to effective teaching, and to attract a student body with diverse experiences and views. We also strive to offer an intellectually rigorous and collegial environment for the study of law. Furthermore, we seek to graduate well-rounded lawyers who are

sensitive to ethical issues, prepared to serve clients, and ready to be leaders in promoting justice.

Academics

Known worldwide for its Center for the Study of Dispute Resolution, the School of Law's curriculum combines both traditional law school classes with an appreciation of the many dispute resolution techniques in which lawyers engage and includes a certificate program in the rapidly developing area of dispute resolution.

Mizzou Law students are required to complete 89 hours of law school classes in order to graduate. Following the prescribed first year, students are required to take Constitutional Law, Evidence, Criminal Procedure and Professional Responsibility. Several clinical and externship programs are available to upper level students, along with skills training in trial practice, negotiation, interviewing and counseling. The curriculum couples courses traditionally tested on the bar examination so that the law school can continue its long tradition of success on bar examinations nationwide, with cross disciplinary dual degree and certificate programs in several other areas. As a result, the law school's curriculum is appealing not only to those who want to engage in the traditional practice of law, but also to those who want to use their law degree as a stepping stone into other disciplines.

Faculty

Full Time Faculty D. E. Abrams, R. G. Bailey, R. de R. Barondes, M. Berry, F. O. Bowman III, M. M. Beck, M. A. Cecil, C. N. Conklin, D. D. Crouch, M. R. Daily, K. D. Dean, B. M. Desnoyer, R. L. The catalog also has a cumulative listing of all faculty at the University of Missouri (p. 1420) that includes information on the faculty member's highest degree attained.

Detailed faculty profiles for the School of Law faculty is also available at <http://law.missouri.edu/faculty/directory/>.

Academic Policies

Below is a listing of policies that only apply to students in the School of Law. Be sure to also check the listing of the University's Academic Policies (p. 700) for policies that apply to all students.

The policies and procedures of the MU School of Law are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the Associate Dean for Academic Affairs. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes only, and are subject to change without notice. They are not to be regarded as offers to contract.

Attendance (p. 704)

Course-Load Rules (p. 706)

Credit for Non-Law Courses (p. 706)

Disability Accommodations (p. 707)

Dismissal and Probation (p. 708)

Examinations (p. 712)

Grades & Ranks (p. 716)

Grievances (p. 719)

Residency (p. 724)

Student Conduct (p. 725)

Student Employment (p. 725)

Transfer Credit (p. 729)

Juris Doctor (JD)

The Juris Doctor (J.D.), or "law degree," is a three year post-baccalaureate program. Students must complete 89 credit hours of law courses roughly one-half of which are required courses.

Upon favorable recommendation of the Faculty of Law, the degree of Juris Doctor will be conferred upon a student who:

1. Has pursued in residence the full-time study of law for at least three academic years (or the equivalent), two of which must have been completed in this School. A full-time student is one who is registered for credit in 12 or more hours in a semester or six or more hours in a summer session. A student registered for less than 12 hours in a semester or less than six in two summer sessions, will receive proportional residence credit. The maximum number of residency credits obtainable in any one summer session shall be seven, provided that for purposes of accelerated graduation (in less than three academic years) no more than twelve residency credits may be obtained in summer sessions.
2. Has received a passing grade in all required courses, except required courses which have been waived.
3. Has received passing grades in law courses aggregating at least 89 credits and has a numerical grade point average of at least 77.5; and
4. Has received an undergraduate degree before or concurrently with his or her graduation from law school.

[Note: The summer school residency provisions allow a student to combine two six-hour summer sessions or a seven-hour summer session with a five-hour summer session and obtain the equivalent of a full semester's residency credit.]

Curriculum

Required Courses

First Year

LAW 5010	Civil Procedure I	3
LAW 5015	Civil Procedure II	2
LAW 5020	Contracts I	3
LAW 5025	Contracts II	3
LAW 5035	Criminal Law	4
LAW 5050	Property	5
LAW 5070	Torts	5
LAW 5080	Legal Research and Writing	2
LAW 5085	Advocacy and Research	2
LAW 5090	Legal Reasoning ((if assigned))	1
LAW 5095	Lawyering: Problem Solving and Dispute Resolution	2

Second Year

LAW 5220	Constitutional Law	4
LAW 5260	Evidence	4

Second or Third Year

LAW 5240	Criminal Procedure	3
LAW 5280	Professional Responsibility	3

Completion of a Writing Requirement for students who first matriculated in or after Fall 2006

1. Every J.D. student must complete a rigorous upper-level writing experience in either the second or third year of study.
2. A "rigorous writing experience" means an experience that culminates in an individually authored paper of at least 20 pages (double-spaced), based on independent research, through a process that includes preparation of a substantial draft, review and feedback by a faculty member, and revision of the draft.
3. Any of the following activities may satisfy the upper-level writing requirement, provided that the activity meets the definition of a "rigorous writing experience" in the individual case:
 - a. completion of any course designated as a writing course,
 - b. completion of a writing section attached to a traditional course,
 - c. completion of an independent research project under L5875 Research, or
 - d. membership on one of the journals of the University of Missouri School of Law.
4. A "designated writing course" is one in which all students complete a rigorous writing experience as defined in section (2) above and in which, in lieu of a final examination, a substantial portion of the final grade for the course is based on that writing.
5. In every case, the supervising full-time faculty member must certify that the writing requirement has been satisfied before a notation will be made in the student's record.
6. As stated in the Student Handbook, "[g]rading is done anonymously in all classes where it is possible." With the exception of Independent Research, if grading is to be done other than anonymously, the syllabus shall so state.

Professional Perspectives Requirement

1. As lawyers, each of you will be required to complete a required number of Continuing Legal Education requirements each year.
2. As law students at MU, you have a similar requirement.
3. You **MUST** complete a certain number of Professional Perspective hours each year to be eligible to graduate from this law school.
4. Professional Perspective's hours are designed to further your legal knowledge by presenting you with information about current legal events; from current practitioners, including judges; and about other legal or legally-related matters. These hours are also designed to present you with needed information about career planning, the job market, and placement;
 - a. As a result, matters counting for Professional Perspectives credit are broken into two categories:
 - b. Professional Perspectives are those programs that give students a new or different prospective on the law or its practice;
 - c. Career Component credits are those programs that give students information about career planning and placement;
 - d. Any program approved for credit will designate the category applicable to that program;
5. Matters qualifying for Professional Perspectives credit will appear on the School of Law Calendar. It is your responsibility to select the events you wish to attend, within the guidelines set out below;

6. Many programs sponsored by the School of Law automatically qualify for Professional Perspectives credit. When listed on the law school calendar, qualifying programs are so designated.
7. Programs sponsored by student or other groups may qualify for Professional Perspectives credit, but ONLY if an application for credit is filed, in advance, of the event, with the Associate Dean. Application forms are available in the Dean's Office.
8. In every event for which Professional Perspectives credit is offered MUST be overseen by a responsible person who agrees to maintain an attendance record for that event.
9. Because Professional Perspectives credit is required, it is an event for which attendance counts. As a result, please note that it is an offense under the Honor Code to misrepresent one's own or another attendance or absence from such an event. This would include signing in for an event and then leaving before the conclusion of that event.
10. The Professional Perspectives requirement for each class of students is as follows:
 - a. For First Year Law Students:
 - i 1 Professional Perspectives program in the fall semester;
 - ii 1 Career Component program in the fall semester;
 - iii 1 Professional Perspectives program in the winter semester;
 - iv 1 Career Component program in the winter semester;
 - b. For Second and Third Year Law Students:
 - i 2 Programs each semester;
 - ii At least two of the programs during the year MUST be for general Professional Perspectives credit;
 - iii At least one program during the year MUST be for the Career Component credit.

The above checklist (http://catalog.missouri.edu/schooloflaw/jurisdoctor/Degree_Requirements_Checklist.pdf) is also available in PDF.

Certificates & Emphasis

JD Certificates

- Graduate Certificate in Dispute Resolution (p. 684)
- Graduate Certificate in Electronic, Commercial and Intellectual Property Law (p. 685)
- Graduate Certificate in Taxation (p. 685)

JD Emphasis Areas

- Emphasis in Criminal Justice (p. 684)
- Emphasis in Tax Law (p. 684)

Experiential Opportunities

The School of Law recognizes the importance of providing students with opportunities to apply the knowledge they receive in the classroom in "real-life" situations. Over their course of study, students have the opportunity to enroll in clinical programs or practicums in criminal prosecution, family violence, mediation, the state legislature, landlord/tenant law and the wrongly convicted. Additional details are available from the School of Law at <http://law.missouri.edu/skills/>.

In addition to these clinical opportunities, students can participate in our extensive externship program. In this program, students work under the supervision of a lawyer or judge in a public law office, government agency or not for profit organization or for an attorney in private practice engaged in pro bono work. Additional details are available from the School of Law at <http://www.law.missouri.edu/academics/externships.html>.

Juris Doctor with Emphasis in Criminal Justice

Criminal Justice Concentration

The Criminal Justice Concentration is designed for two groups of students: those who are considering beginning their legal careers as prosecutors or criminal defense counsel and those who may not have an express interest in criminal practice, but who are nonetheless seeking a course of study structured to provide training in the range of skills necessary to the practice of law in most substantive areas – particularly including legal analysis, factual investigation, counseling, negotiation and the persuasive arts employed in written and oral advocacy.

Additional details and a list of courses satisfying the Criminal Justice Concentration requirements are available from the School of Law here (<http://www.law.missouri.edu/academics/certificates/criminal.html>).

Juris Doctor with Emphasis in Tax Law

Tax Law Concentration

The Tax Law concentration is designed to provide each student in the concentration basic education in both general skills and subject-matter specific knowledge and provide each student with an opportunity to bring the entire skill set to bear in a capstone experience designed to teach integrated legal problem-solving. Completion of a concentration should improve the overall preparedness of graduates by conferring entry-level competence to begin practicing law with appropriate supervision in the concentration's subject matter area or practice setting.

Additional details and a list of courses satisfying the Tax Law Concentration requirements are available from the School of Law here (<http://www.law.missouri.edu/academics/certificates/tax.html>).

Graduate Certificate in Dispute Resolution

MU Certificate in Dispute Resolution

Clients and society today need and expect much more than traditional advocacy from their lawyers. Modern lawyers need to be able to address legal problems in ways that accommodate a variety of needs, goals and values, in addition to vindicating legal rights. As a result, today's lawyer must have the knowledge, skills and perspectives not only to advocate in the courtroom, but to participate in such processes as client counseling, negotiation, mediation, arbitration and creative problem-solving.

The MU Certificate in Dispute Resolution is designed to foster such learning in students by providing the opportunity to work with some of the nation's leading dispute resolution scholars and practitioners. The MU School of Law has been ranked No. 1 in dispute resolution by U.S. News

and World Report since 1999, and has more full-time faculty specializing in dispute resolution than any other law school.

This certificate program will give students an advantage in addressing the complex challenges of today's legal environment.

Requirements

To receive a Certificate in Dispute Resolution from the MU School of Law, a J.D. student must take at least 10-11 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution. Students must take at least 2-3 additional elective hours from among the courses approved for the Certificate program.

Additional details and a list of courses satisfying the certificate requirements are available from the School of Law at <http://www.law.missouri.edu/academics/certificates/resolution.html>.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at <http://gradschool.missouri.edu/academics/programs/dispute-resolution-graduate-certificate/dispute-resolution-ge/Gedt.html>

Graduate Certificate in Electronic, Commercial and Intellectual Property Law

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at <https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/>.

Graduate Certificate in Taxation

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at <https://nextcatalog.missouri.edu/schooloflaw/additionalacademicprograms/>.

Master of Laws (LLM)

The Master of Laws degree is offered through a joint effort of the Graduate School and the School of Law. For detailed information on this program, consult the Dispute Resolution (p. 634) page.

Additional Academic Programs - Law

Students in the School of Law have a wide variety of additional academic options before them, including a number of other degree and certificate programs available at the University of Missouri that can make a good accompaniment to the J.D. Below is a description of some of those options.

Certificates

- Center for the Digital Globe (p. 687)
- European Union (p. 687)

Dual/Concurrent Degrees

- Business Administration (Masters) (p. 687)
- Economics (Masters) (p. 687)
- Educational Leadership & Policy Analysis (Masters) (p. 687)
- Health Administration (Masters) (p. 687)
- Human Development & Family Studies (Masters) (p. 687)
- Journalism (Masters) (p. 687)
- Journalism (Doctorate) (p. 688)
- Library & Information Science (Masters) (p. 688)
- Public Affairs (Masters) (p. 688)

Certificates:

Center for the Digital Globe (Certificate)

The Center for the Digital Globe (<http://cdig.missouri.edu>) (CDiG), established by the College of Business, School of Journalism, School of Law, and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers an interdepartmental certificate to graduate students of the University of Missouri-Columbia. The certificate program supplements the students' graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization.

European Union (Certificate)

Designed to complement existing degrees, the Graduate Certificate Program (p. 675) consists of 12 credit hours of study to be completed in a variety of settings over four semesters. A portion of the coursework takes place via the electronic classroom, allowing students to pursue their Certificate while maintaining work responsibilities or completing other degree programs. Students typically begin their studies during the winter semester, though the program is flexible to accommodate different scheduling needs.

Dual/Concurrent Degrees:

Business Administration (Masters)

Students completing the Law and Business course of study will be eligible to receive the JD degree from the School of Law and the MBA degree from the School of Business. This course of study may be completed in four years. Normally, students require three years to

complete the requirements for the JD degree and two years to complete the requirements for the MBA degree.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/mba-business.shtml>.

Economics (Masters)

The Department of Economics and the School of Law offer an integrated program in which students may obtain both an MA degree in economics and a JD degree from the School of Law. Although an MA degree in economics normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/ma-economics.shtml>.

Educational Leadership & Policy Analysis (Masters)

With and Emphasis in Higher Education

The College of Education's Department of Educational Leadership & Policy Analysis and the School of Law offer an integrated program in which students may obtain both an MA degree in higher education with a concentration in general higher education administration and a JD degree from the School of Law. Although an MA degree in higher and continuing education normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/ma-educational.shtml>.

Health Administration (Masters)

Students completing this course of study will be eligible to receive the JD degree from the School of Law and the MHA degree from the Health Management and Informatics graduate program. This course of study may be completed in four years and an additional summer session. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MHA degree.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/mha-health-admin.shtml>.

Human Development & Family Studies (Masters)

The Department of Human Development and Family Studies and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MS or MA degree in Human Development and Family Studies. Although a Master's degree normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/mams-human-dev.shtml>.

Journalism (Masters)

The School of Journalism and the School of Law offer an integrated program in which students may obtain both an MA degree in journalism and a J.D. degree in law. This program is especially suitable for students interested in enhancing their competencies, qualifications, and career options through the successful completion of two complementary

professional programs. Although an MA degree in journalism normally requires two years of study, and a J.D. requires three, many students will be able to complete the full program in four years.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/ma-journalism.shtml>.

Journalism (Doctorate)

The University of Missouri-Columbia School of Journalism and School of Law offer an integrated program for students seeking both a Ph.D. degree in journalism and a J.D. degree in law. Students should consider this program if they are interested in teaching or in senior-level practice or policy work in either of these fields, nationally or internationally. Although a Ph.D. degree in journalism normally requires three years of study, and a J.D. requires three, students may be able to complete the full program in as few as five years.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/phd-journalism.shtml>.

Library & Information Science (Masters)

The School of Information Science and Learning Technologies (SISLT) and the School of Law offer an integrated program in which students may obtain both an MA degree in library and information science from SISLT and a JD degree from the School of Law. Although an MA degree in Information Science and Learning Technology with an emphasis in Library and Science normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/mls-library.shtml>.

Public Affairs (Masters)

Students completing the required course of study will be eligible to receive the JD degree from the School of Law and the MPA degree from the Harry S Truman School of Public Affairs. The course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MPA degree. Additional details are available from the School of Law at <http://law.missouri.edu/academics/dualdegree/mpa-public-admin.shtml>.

School of Medicine

Established in 1841, the school offers an innovative problem-based curriculum that provides medical students with early exposure to clinical training. In addition to undergraduate medical education, the school offers a master's degree in health administration and boasts well-established, residency and continuing education programs. It is recognized nationally for its primary care and rural training programs. The Health Sciences Center provides health care for patients from every Missouri county.

For more information about the School of Medicine, call (573) 882-9219.
<http://medicine.missouri.edu>

College of Veterinary Medicine

The college was established in 1946. It offers a four-year professional program leading to the Doctor of Veterinary Medicine (DVM) degree. Applicants (<http://cvm.missouri.edu/prospective.htm>) generally have a B.S. or B.A. degree but can be admitted with 2-3 years of undergraduate experience.

The Pre-Veterinary Medical Scholars and AgScholars programs (<http://cvm.missouri.edu/pre-vet-scholars.htm>) provide early assurance of admission to the MU College of Veterinary Medicine upon satisfactory completion of undergraduate and program requirements. Students work with advisers in the college, and they observe veterinarians at work as part of the program. Students with a minimum ACT score of 30 or an equivalent SAT score are eligible to apply for the Pre-Vet Scholars Program. The required minimum ACT score for the AgScholars Program is 27 and applicants must have demonstrated experience in livestock production and health. Once at Mizzou, scholars must meet program minimum standards, including maintaining a 3.3 cumulative GPA. For more information, call the College of Veterinary Medicine at 573-884-6435.

In addition to the professional program, on-line biomedical science courses (<http://biomedonline.missouri.edu/online-programs-for-graduate-veterinary-technicians-in-veterinary-biomedical-technology>) available to undergraduate and graduate students are listed in this catalog. These can be used to fulfill the requirements of a Certificate in Biomedical Science, for a licensed veterinary technician to complete a baccalaureate degree or to earn a Master's degree in Biomedical Sciences.

The college also provides diagnostic and patient care services for animals. The CVM has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The college also offers post-graduate training to interns, residents in various specialties (<http://cvm.missouri.edu/residencies.htm>) and graduate students (<http://cvm.missouri.edu/research-gradstudies.htm>).

For more information about the College of Veterinary Medicine, call (573) 882-9594. <http://cvm.missouri.edu>

DVM in Veterinary Medicine

The DVM degree is achieved after a four-year course of study. Applicants generally have a B.S. or B.A. degree but can be admitted with 2-3 years of undergraduate experience. <http://cvm.missouri.edu/prospective.htm>

At the University of Missouri, the first two years are largely spent in classrooms and laboratories with the second two years devoted primarily to clinical study in the MU Veterinary Medical Teaching Hospital.

The curriculum at the MU College of Veterinary Medicine is designed to provide students with the knowledge and technical skills necessary to be competent entry-level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs and with the background necessary for careers in regulatory medicine.

In the first two years, all students follow the same schedule, and courses must be successfully completed in sequence. In the final two years of the professional program, the student must successfully complete the required and elective clinical rotations to fulfill graduation requirements.

To receive the DVM degree, students must pass all courses. In addition to passing examinations, attendance and participation in all lectures, laboratories and clinical exercises is required. The doctor or veterinary medicine degree is awarded after successful completion of the professional program.

Curriculum

Objectives and Summary of the Professional Curriculum

The primary objective of the CVM curriculum is to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs, or for careers in regulatory medicine. The overall objective of the first two years of the curriculum is to provide students with a solid foundation in basic biomedical sciences. The courses in the preclinical professional curriculum include anatomy, physiology, cell and molecular biology, pathology, pharmacology, microbiology, virology, and toxicology. The fundamentals of the clinical disciplines are also taught during this time and include anesthesiology, clinical pathology, radiology, public health, medicine and surgery.

The organizational scheme of the professional curriculum differs from that of other schools in that the first two academic years are divided into eight-week instructional periods and our academic year runs from August through June. The students have a summer break between the first and second years and second and third years of instruction that is approximately seven weeks in duration. The overall objective of the clinical curriculum is to solidify basic knowledge and practice clinical skills in the VMTH, VMDL, and external preceptorships. This portion of the curriculum is organized into 12 clinical blocks that begin in October of the third year of professional instruction. These clinical blocks are six to eight weeks in duration and may be divided into 1, 2, or 3 clinical courses. The required clinical rotations are listed below and organized by duration:

Required Clinical Rotations

Full Block Rotations: Food Animal Medicine and Surgery; Equine Medicine and Surgery; Small Animal Community Practice and Shelter Medicine; Diagnostic Pathology and Special Species Medicine.

Third Block Rotations: Theriogenology; Ophthalmology; Small Animal Internal Medicine; Small Animal Emergency and Critical Care; Oncology; Soft Tissue Surgery; Orthopedic Surgery; Neurology and Neurosurgery

Half Block Rotations: Clinical Radiology; Clinical Anesthesia

Note that students are required to complete four credit hours (four weeks) of external evaluated preceptorships as part of the required curriculum. Students also select 10 credit hours of elective rotations (cardiology, nutrition, production medicine, special imaging, etc.). In addition to required and elective blocks, students are allotted two blocks as "free time." Most students utilize their free time to study for licensing examinations, complete preceptorships at practices, or interview with prospective employers. A total of 166 semester credit hours are required for graduation. Most students accumulate a higher number of credit hours as a result of enrollments in extra didactic or clinical elective courses.

VM-1 Required Courses (Instructional Periods 1-4)

Instructional Periods 1 and 2; August - December		
V_BSCI 5500	Veterinary Anatomy with Laboratory	4
V_BSCI 5502	Veterinary Microscopic Anatomy with Laboratory	3
V_BSCI 5504	Veterinary Physiology	5
V_BSCI 5506	Veterinary Molecular and Cellular Biology	4
V_BSCI 5100	Veterinary Neuroscience	2
Instructional Period 3; January - February		
V_BSCI 5011	Veterinary Anatomy	3
V_BSCI 5020	Developmental Anatomy	0.5
V_BSCI 5503	Veterinary Microscopic Anatomy	2
V_BSCI 5051	Veterinary Gastrointestinal	2
V_M_S 6005	Clinical Skills	0.5
V_M_S 6140	Nutrition with Laboratory	1.5
Instructional Period 4; March - April		
V_BSCI 5012	Veterinary Anatomy with Laboratory	3
V_BSCI 5021	Developmental Anatomy	0.5
V_BSCI 5052	Veterinary Endocrinology and Reproductive Physiology	2
V_PBio 5511	Veterinary Immunology	1.5
V_PBio 5555	Epidemiology and Biostatistics with Laboratory	2
V_M_S 6006	Clinical Skills	0.5
VM-2 Required Courses (Instructional Periods 5-9)		
Instructional Period 5; May - June		
V_PBio 5512	Veterinary Immunology	1.5
V_PBio 5552	Veterinary Bacteriology with Laboratory	3
V_PBio 5575	Veterinary Pathology with Laboratory	3
V_PBio 5579	Veterinary Genomics	1
Instructional Period 6; August - October		
V_PBio 5553	Veterinary Bacteriology II	2.5
V_PBio 5554	Veterinary Virology	2.5
V_PBio 5557	Veterinary Parasitology with Laboratory	3
V_PBio 5576	Veterinary Systemic and Special Pathology with Laboratories	3
Instructional Period 7; October - December

Preceptorships

Missouri students are encouraged to use free blocks as preceptorships to increase exposure to veterinary practice and to meet the requirements of the Missouri Veterinary Medical Practice Act. The University of Missouri College of Veterinary Medicine does not have the authority to approve the use of student free block time or the veterinarians with whom they gain experience.

Available Preceptorships may be found at: <https://cvmsecure.missouri.edu/vdb/preceptorships.php>

Preceptorship requirements and forms required by the Missouri State Veterinary Medical Board can be found at their website: <http://pr.mo.gov/veterinarian.asp>

The level of supervision required by preceptors is detailed at: <http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf>

The Missouri State Veterinary Medical Board preceptorship form may be found at: <http://pr.mo.gov/veterinarian-application-forms.asp>

Licensing Examination

Professional Licensing Information

In addition successfully completing a professional veterinary education, most states require state and national licensing examinations to meet requirements to practice. Please visit the National Board of Veterinary Medical Examiners (NBVME (<http://www.nbvme.org>)) and the American Association of Veterinary State Boards (AAVSB (<http://catalog.missouri.edu/collegeofveterinarymedicine/dvm/www.aavsb.org>)) websites for further information.

About MU

Our mission

Our distinct mission, as Missouri's only state-supported member of the Association of American Universities, is to provide all Missourians the benefits of a world-class education enriched by service and global interaction. We are stewards and builders of a priceless state resource, a unique physical infrastructure and scholarly environment in which our tightly interlocked missions of teaching, research, service and economic development work together on behalf of all citizens. Students work side by side with some of the world's best faculty to advance the arts and humanities, the sciences and the professions. Scholarship and teaching are driven by a sense of public service — the obligation to produce and disseminate knowledge that will improve the quality of life in the state, the nation and the world.

We are MU — Missouri's Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students experience an interwoven web of learning experiences — in classrooms, in residence hall learning communities, and in collaborative research and creative, artistic and service projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across the broadest range of disciplines offered on a Missouri campus.

We ensure improving the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our unique intellectual resources to improve the civic, economic, health and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

Important Facts

History

The University of Missouri was established in Columbia in 1839 as the first public university west of the Mississippi River, and the first public university in Thomas Jefferson's Louisiana Purchase territory. In 1870 the University of Missouri was approved as a land-grant university under the Morrill Act of 1862. The original mission of land-grant institutions was to make higher education accessible to more people. Gradually that mission has expanded to include research, service and outreach; enabling the

state's citizens to benefit directly from the knowledge gained through university research. As Missouri's flagship university, MU continues its historic mission through its emphasis on excellence in teaching, research, service and economic development.

Students

- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The university has more than 27,000 undergraduate students who choose courses from a broad range of academic disciplines.
- The university also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,200 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, where students with shared academic interests live in the same residence hall and often attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus

- The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief. From the six Ionic Columns that adorn Francis Quadrangle to the Memorial Union Tower that honors fallen soldiers to the MU Student Center completed in 2010, every piece of campus represents equally the heart and soul of what it means to be a Tiger.
- The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features over 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia, among the top cities in the nation for its excellent quality of life.

Alumni

There are more than 260,000 living alumni worldwide. Many continue to support the University through membership in the Mizzou Alumni Association.

University of Missouri Board of Curators

Ann K. Covington, Columbia
Pamela Quigg Henrickson, Jefferson City
Don M. Downing, Webster Groves, Vice Chairman
Wayne Goode, St. Louis, Board Chairman

Tom Hiles, Vice Chancellor of University Advancement

Rhonda Gibler, Vice Chancellor for Finance and Chief Financial Officer

Gary Ward, Interim Vice Chancellor for Operations and Chief Operating Officer

Cathy Scroggs, Vice Chancellor for Student Affairs

Leona Rubin, Associate Vice Chancellor for Graduate Studies

Karen Touzeau, Associate Vice Chancellor of Human Resource Services

Todd McCubbin, Associate Vice Chancellor of Alumni Relations and Executive Director, Mizzou Alumni Association

Ann Celeste McGruder, Assistant to the Chancellor

Mary Jo Banken, Interim Assistant to the Chancellor for University Affairs

Patricia Okker, Interim Deputy Provost

Jim Spain, Vice Provost for Undergraduate Studies

Michael D. Quart, Vice Provost and Director of Cooperative Extension

Ann Korschgen, Vice Provost of Enrollment Management

Handy Williamson, Vice Provost of International Programs

Michael F. Alden, Director of Intercollegiate Athletics

Thomas L. Payne, Vice Chancellor for Agriculture and Dean, College of Agriculture, Food and Natural Resources

Michael J. O'Brien, Dean, College of Arts and Science

Joan Gabel, Dean, Trulaske College of Business

Daniel Clay, Dean, College of Education

James E. Thompson, Dean, College of Engineering

Kristofer Hagglund, Dean, School of Health Professions

Steve Jorgensen, Dean, College of Human Environmental Sciences

R. Dean Mills, Dean, School of Journalism

Gary Myers, Dean, School of Law

Les Hall, Interim Dean, School of Medicine

Judith Fitzgerald Miller, Dean, Sinclair School of Nursing

Barton Wechsler, Dean, Harry S Truman School of Public Affairs

Neil Olson, Dean, College of Veterinary Medicine

James Cogswell, Director, University Libraries

Craig Roberts, Chair, Faculty Council

Becky Stafford, Chair, Staff Advisory Council

Mason Schara, President, Missouri Students Association

Hallie Thompson, President, Graduate Professional Council

Dudley McCarter, President, Mizzou Alumni Association

Notifications

All statements in this catalog are announcements of present policies only, and are subject to change without notice. They are not to be regarded as offers to contract. If you have questions or note errors or omissions, please contact the Office of the University Registrar (<http://registrar.missouri.edu>).

Below is additional information for items on which the University is required to make available.

Accommodations for Students with Disabilities

The University of Missouri complies with the American with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or e-mail disabilityservices@missouri.edu as soon as possible so that appropriate arrangements can be made. For more information please visit the website at <http://disabilityservices.missouri.edu>. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

Accreditation

The University of Missouri is accredited by the Higher Learning Commission of the North Central Association of College and Schools. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

Complaint Resolution

The University of Missouri desires to resolve student grievances, complaints and concerns in an efficient, fair and amicable manner. For details on procedures to file a complaint, please refer to the section on Complaint Resolution at <http://financialaid.missouri.edu/consumer-information-disclosures/index.php>.

Equity in Athletics Disclosure Act

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

Family Education Rights and Privacy Act (FERPA)

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student's name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to <http://registrar.missouri.edu/policies/ferpa.php>.

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See <http://registrar.missouri.edu/registration-adddrop/additional-authorized-access.php> for more information. The University does not release grades to parents unless the student specifically authorizes it in writing in the

Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. "Parent" means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

Oak Ridge Associated Universities (ORAU) Consortium

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the *ORISE Catalog of Education and Training Programs*, which is available at <http://www.oraugov/orise/educ.htm>, or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert V. Duncan
Vice Chancellor for Research
ORAU Councilor for University of Missouri
Monnie E. Champion

ORAU Corporate Secretary (865-576-3306); or
Visit the ORAU Home Page (<http://www.oraugov>)

State of Missouri Registration for Professional Engineers

The Revised Statutes of Missouri (Section 327.221) require that "all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET)." All MU undergraduate engineering bachelor's-level programs are so accredited. Applicants who receive advanced degrees in MU's engineering programs but who do not have a bachelor's degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor's degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

A Statement of Values

The University of Missouri, as the state's major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

Respect

Respect for one's self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

Responsibility

A sense of responsibility requires careful reflection on one's moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

Discovery

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries — what we know is not all that is.

Excellence

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other's successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

Undergraduate Academic Assessment Goals

All undergraduate students are required to participate in the University's processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to

help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students' undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University's learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student's chosen major fields of study. Toward that end, in addition to having every bachelor's degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.

MU graduates will be able to:

- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory research.
- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.

MU graduates will be able to:

- Communicate information to a variety of audiences and purposes.
- Revise and edit their presentations to improve clarity and accuracy.
- Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.

MU graduates will be able to:

- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- Work collaboratively with others where appropriate.

Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.

MU graduates will be able to:

- Engage in life-long learning.
- Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
- In addition, some students will be required to take standardized tests in their major field and/or for general education.

University General Education Assessment

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

Major Field Assessment

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:

- Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- Faculty-developed exit examinations
- Exit interviews University

University Organization

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two 16 week semesters (fall and spring) and one 8 week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

Academic Programs and Degree Structure

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.

Academic Policies

The academic rules and regulations of the University of Missouri are published online in the *Collected Rules and Regulations of the University of Missouri* and the *MU Faculty Council Academic Regulations* (<http://faculty council.missouri.edu/handbook/intro.html>). The following are selected policies and procedures. Many are summarized as a guide for students. Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

If a policy is only applicable to certain students and not all students, this is indicated with one of the following codes. Else the policy is applicable to all University of Missouri students.

- (G) policy applicable to Graduate students only
- (L) policy applicable to Law students only
- (U) policy applicable to Undergraduate students only
- (V) policy applicable to Veterinary Medicine students only

Absences

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean's excuse or official absence. ((<http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php>) See *Satisfactory Academic Progress Policy for Financial Aid Eligibility*).

However, a student, who is also a member of a national guard, Federal Emergency Management Agency or military reserve unit and is called to active duty while the University is in session, will be permitted to make up work missed as a result of such absences for up to two weeks of absences, provided that to do so does not require the instructor to engage in individualized tutorial work with the student. Recognizing that some students have contractual obligations to the University, while others are participating in intercollegiate events at the behest of their departments, faculty are encouraged to make accommodations for absences incurred because of these responsibilities. In enforcing their absence policy, it is recommended that faculty give due consideration to the important role that extracurricular activities play in the development of students, as well as to the benefits they provide to both our university and community.

Students must notify instructors of any scheduled absences within the first two weeks of the semester. In the case of later qualifying events, the instructor must be informed two weeks prior to those events. Instructors are encouraged to advise students of their absence policy at the beginning of the semester.

Academic Dishonesty

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student's grade on that work and in that course and reports all incidents to the provost for disciplinary action.

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the course instructor. Refer to the *Collected Rules and Regulations*, Section 200.010, Standard of Conduct (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_conduct), and Section 200.020, Rules of Procedures in Student Conduct Matters (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.020_rules_of_procedures_in_student_conduct_matters) for more specific details. (The *Collected Rules* are available on the University

of Missouri System web site.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Vice Provost for investigation.

Academic Progress (G)

Measuring Graduate Student Progress

Annual Requirement: Review of Graduate Student Progress

Since 2006, the Graduate School has required that all graduate students file an annual report on their academic performance, degree program milestones, and related academic/scholarly/research/creative achievements. Faculty mentors (advisers) are required to review their advisees' annual reports to assess if their advisees are making satisfactory progress toward degree completion. In some cases, the director of graduate studies and/or department chair also reviews the students' annual reports and faculty member responses.

Each division/area/department degree program must inform all students of the annual progress reporting requirement. This includes printed, published or electronic materials provided to graduate students (e.g., handbooks, orientation materials, guidelines, web site.)

Graduate Student Progress System (gsps.missouri.edu)

The Graduate Student Progress System (GSPS) is a web-based reporting system where students document their progress toward degree completion. All graduate students (i.e., in all disciplines) are required to submit an annual progress report by starting/updating a GSPS record. Faculty members use the GSPS to review students' annual reports, assess their progress and provide feedback to the students.

At a minimum, students are required to report on academic progress, completion of required forms, award and honors, conferences, presentations, publications, service activities, creative activities, employment, funding activity, and job placement. Academic program faculty or administrators may require additional indicators of performance or achievement to accommodate the unique needs of their programs. Additional information on measuring graduate student progress is at <http://gradschool.missouri.edu/policies/satisfactory-progress.php>.

Probation and Termination Dismissal

In addition to dismissal for failure to meet the usual examination and grade requirements, departments and graduate degree-granting area programs have the right to place on probation and, after at least 30 days of probation, to dismiss from their program any graduate student who is deemed to be making insufficient academic progress or whose work is not of the quality required. The faculty adviser or academic program chair must inform the Graduate School as soon as the student is notified and the probationary period begins. The dismissal may occur at any time during a student's work toward a graduate degree.

For additional information on satisfactory progress, probation, termination, extension and appeals go to the Extension and Appeals of Satisfactory Progress Infractions section of this policy manual (click here to go to that section), or go to the web page version of the catalog, found at <http://gradschool.missouri.edu/academics/progress/probation-termination.php>.

Extension and Appeals of Satisfactory Progress Infractions

The progress of each graduate student is evaluated annually by the student's adviser and/or director of graduate studies (DGS). The definition of "satisfactory progress" and procedures for its verification may vary among departments/programs. If a department/program has instituted timelines that differ from those applying generally to graduate students (see below), these timelines should be made available to students from their entrance into the graduate degree program. If a student is authorized to diverge from progress timelines established by either the department/program or the Graduate School, this fact should be documented in written form and endorsed by the student's adviser and DGS.

Progress Toward Degree

Full-time students (those taking 9 hours or more per semester) should follow the time frames associated with degree programs discussed in the Graduate Policy Manual under Master's Degrees and Doctoral Degrees. They must submit required forms on time and maintain a grade point average of 3.0 or better. Furthermore, they must successfully undergo their departments' annual review processes.

Part-time students should file a timeline for successful degree completion with their departments and the Graduate School. This timeline should be endorsed by the director of graduate studies and a prospective adviser by the end of the first calendar year of admission into the department/program. When these timelines conflict with time to degree guidelines laid out in the Graduate Policy Manual's sections on master's and doctoral degrees, they must receive the endorsement of the dean of the Graduate School.

Distinction Between Requests for Extension and Appeals

A "Request for an Extension" and an "Appeal" are distinct processes for dealing with problems related to "satisfactory progress." A "Request for Extension" is the appropriate course of action when a student has failed to meet satisfactory progress provisions of the Graduate School. The "Appeal Process" should be followed when a department/program has dismissed a student after the required probationary period.

Academic Progress (L)

Annual Review of Students' Progress (Applicable to LLM Students)

The progress of each graduate student will be evaluated annually by the Director of the LL.M. Program.

For students who first enrolled in the LL.M. Program after January 1, 2001, the following are the standards of "satisfactory progress" in the LL.M. Program, subject to individual exceptions for good cause as approved by the Director of the LL.M. Program. Normally, students should complete all degree requirements within three (3) years of enrollment. By the end of the first year of enrollment, students must have completed at least eight (8) credits that satisfy requirements for the LL.M. degree. By the end of the second year of enrollment, students must have completed at least sixteen (16) credits that satisfy requirements for the LL.M. degree. By the end of the third year of enrollment, students must have completed at least twenty-four (24) credits that satisfy requirements

for the LL.M. degree. Time spent in the armed services will not count toward the period for completing the degree requirements.

For students who first enrolled in the LL.M. Program before January 1, 2001, to achieve "satisfactory progress," students must complete an average of at least four (4) credits for every academic year since their initial enrollment in the LL.M. Program.

The Graduate School will be informed of all students who are not making satisfactory progress. When there is a question as to whether satisfactory progress is being made, the Director of the LL.M. Program will write to the student and recommend a face-to-face meeting with the student. If there is disagreement, the Director of the LL.M. Program will ask the student to submit a separate letter to him or her. Copies of both letters will be made available to the student, maintained in a departmental file, and forwarded to the Graduate School.

If difficulties persist and the Director of the LL.M. Program determines that probation is appropriate, the Director will notify the student in writing of the probationary period, which may be from 30 days to a full semester. The probation letter will state explicitly that the student is on departmental probation and state precisely what must be accomplished and by what date in order to enable the student to return to good standing in the Program and be removed from probation. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the probation letter or determine that probation is not appropriate.

If the student does not comply with the conditions of probation, a letter signed by Director of the LL.M. Program will be sent to the student (with a copy to the Graduate School) with notification of dismissal from the LL.M. Program. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the notification of dismissal or determine that dismissal is not appropriate (with a copy to the Graduate School). The Graduate School sends the official notice of dismissal from the Program.

A student may appeal a dismissal decision to the Graduate Faculty Senate only after completing the Program's appeal process. The full text of the Dismissal Policy and Appeals Process for Graduate Students (<http://gradschool.missouri.edu/academics/progress/requests-for-extensions-appeals.php>) can be found in the Graduate School Catalog on its web site.

Academic Renewal (U)

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

Eligibility

To be eligible for academic renewal consideration, students must meet these requirements:

- Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
- Students must not have graduated from the University of Missouri-Columbia.
- Students must either:

- be admitted as degree-seeking and have earned a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months; OR
- have attended as a non-degree-seeking student and have earned thereby a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months and subsequently have been admitted as degree-seeking by the University.

Conditions

Academic renewal is based on the following conditions:

- All courses and credits taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine individual courses from multiple terms to comprise the semester(s) dropped. All courses and grades for the chosen terms will remain on the student's academic record.
- Renewal may be applied only to academic terms completed prior to the student's extended absence.
- Students may be granted only one academic renewal.
- Students who choose academic renewal must meet the degree requirements of the University of Missouri undergraduate catalog at the time of their readmission.
- Degree requirements met during the dropped terms must be repeated.
- To be eligible for a degree, students must complete a minimum of 24 credits at the University of Missouri after the granting of academic renewal.

Procedures

- Students should discuss their desire to pursue academic renewal with an academic advisor in the college they wish to enter.
- Students should submit an application for academic renewal (<http://registrar.missouri.edu/forms/academic-renewal-petition.pdf>) to the Office of the University Registrar.
- For each term approved for academic renewal, a note will appear on the transcript.

Questions may be directed to the Office of the University Registrar, 125 Jesse Hall, (573) 882-7881.

Academic Standing

Academic performance is represented by academic standing, according to the *Faculty Handbook* (<http://facultycouncil.missouri.edu/handbook>), of which there are three levels: regular, academic probation, and ineligible to enroll. For the purposes of this policy, "term" may refer to a semester or summer term.

Regular Academic Standing

Students whose term and cumulative GPAs are 2.0 or higher are in regular academic standing.

Probation

Students in regular standing whose term GPA subsequently falls below 2.0, but is 1.0 or above are placed on probation. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in the *Faculty Handbook*, Article II, Admissions, Advanced Standing, and Classification will enter on scholastic probation and will have one semester in which to remove probation.

Ineligible to enroll

Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

In the application of the foregoing rules, the dean or faculty committee of the division concerned will determine how an incomplete grade in a course will be considered in determining a student's academic standing. A student who has been ineligible to enroll for a period of one year may be readmitted only upon the approval of the dean of the school or college in which the student desires to enroll. If a readmitted student again becomes ineligible to enroll, his or her ineligibility is normally considered permanent. These regulations are the prescribed minimal standards but do not limit the authority of the faculty of any school or college to adopt and enforce additional regulations affecting students enrolled therein.

Advanced Standing - Credit by Exam (U)

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A student who has received credit for any portion of a lower level course will not receive advanced standing credit for that same course. More information can be found at <http://admissions.missouri.edu/apply/ap-ib-and-college-credits/index.php>. The programs described below are used to award credit.

Advanced Placement Program

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

College Level Examination Program

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students' programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

Credit by Examination for Mathematics Courses

It is possible to receive credit in the following math courses by passing the appropriate examination:

MATH 1100	College Algebra	3
MATH 1140	Trigonometry	2
MATH 1160	Precalculus Mathematics	5
MATH 1360	Geometric Concepts	3

MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
Total Credits		23

To inquire about these examinations, contact either the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

Departmental Examinations

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services. (Also see the College of Arts and Science information on departmental exams (p. 120).)

International Baccalaureate

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

Additional College Course Work

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

Freshman Placement Tests

Placement in English is based on ACT score in English. Math placement is based on ALEKS Exam score or prior course credit. (See mathplacement.missouri.edu for more details)

Subject Examinations

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

Application for Degree

Students should contact their academic unit *at least* a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does *not* automatically anticipate or calculate who will be degree candidates each term.

Attendance (L)

Policies & Rules — Attendance

Law Schools approved by the American Bar Association must require regular and punctual class attendance. The rules below implement this

requirement at MU, and were adopted by the faculty on November 19, 1992:

1. Class Attendance
 - a. Attendance is expected, in accordance with the ABA policy statement.
 - b. Administration of the attendance policy lies with the individual instructor for each course.
 - c. The individual instructor determines the number and nature of absences from each course for an excess of which sanctions may be imposed, as well as the sanctions which will be imposed, up to and including dismissal from the course.
 - d. If the instructor intends to attach a formal sanction (grade reduction or dismissal from the course) to inadequate attendance, he/she must announce to the class in writing at the beginning of the course what the rules governing attendance in that course will be, with appropriate provision for notice to late enrollers.
 - e. A student who is in danger of accumulating excessive absences must be given notice by the instructor in advance of the absence which will give rise to a significant sanction (major grade reduction or dismissal from the class).
2. Appeals
 - A student who is dropped from a course for excessive absences may meet with the Dean and request reversal of the decision. Such a student may seek the assistance of the Grievance Committee of the Student Bar Association in support of the request. A final decision on the appeal rests in the discretion of the Dean.

Auditing a Course (Hearer)

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

- Hearers receive no credit toward a degree and an H grade appears on the transcript.
- Students pay standard fees for the course(s).
- Students' academic advising unit must approve and change their grading option in myZou for the change to become official. Students may not change their registration status (hearer vs. credit) after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. See the University Registrar's website at <http://registrar.missouri.edu/dates-deadlines.php> for deadlines for each semester.
- Students who fail to meet class requirements may be dropped from the course by their academic advising unit upon request of their instructor and with the dean's stamp.
- Normally, a hearer will attend the course on a regular basis; either the department or an individual instructor will stipulate the requirements for enrollment in a course as a hearer.

Catalog Editions (Which catalog applies to whom?)

These policies concern the application of the University of Missouri's graduation, divisional and departmental degree requirements. MU

students' academic requirements for graduation are typically met as follows:

University general education and other University-wide policies:

- Students must complete the graduation requirements in effect for the term that they first enroll at MU or they may choose those in effect for the term that their degree is awarded with the agreement of their academic unit.
- This policy applies to newly admitted freshmen as well as transfer students.
- Students who have a lapse in enrollment must meet the degree requirements in effect at the time the students are readmitted to MU.

Divisional, departmental and other degree requirements:

- Students must meet the specified divisional, departmental and major requirements for the degree(s) that were in effect when they were admitted as degree seeking to the program or may choose those in effect for the term in which they will graduate, with the agreement of their division or department.
- Students who have a lapse in enrollment must meet the standards of the degree requirements in effect when they return to MU.

After consulting with an advisor, students may appeal. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled. Some academic units may have unique "grandfathering" policies that apply to changes in their programs and that supersede this policy. Students should consult with an advisor in all cases.

Class Cancellation Guidelines

Refer to the the MU Faculty Council on University Policy regarding class cancellation guidelines (<http://facultycouncil.missouri.edu/handbook/class-cancellation.html>).

Completion of a Course

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the "+" or "-" sign if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

- The faculty of the division concerned will determine how the grade of I in a course and a grade in a repeated course will be considered in determining a student's academic standing. However, for financial aid purposes the grade of I is not considered a completed course and a repeated course will be counted as additional credits attempted.
- The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student's eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students' satisfactory progress toward their educational objectives and eligibility to receive federal, state and institutional student financial aid.

Computer Policies (L)

Acceptable Use Policy

- Priority use of lab computing equipment is for academic rather than recreational purposes. If you are asked to relinquish use for this reason, your compliance is expected and appreciated.

- Computing at MU is a community enterprise serving academic, administrative and research needs. Please conserve resources by carefully managing your e-mail, data, web files, and printing.
- Users will respect copyright, slander, libel, anti-discrimination and other appropriate laws as well as the security and proper functioning of the campus network.
- MU is committed to privacy and will not routinely inspect the contents of your computer files.
- MU provides uncensored access to materials on the campus network or the Internet unless those materials violate federal or state laws.

For more detailed information on current acceptable use guidelines, or to report a potential violation, view MU's Acceptable Use Policy (http://www.umsystem.edu/ums/rules/collected_rules/facilities/ch110/110.005_acceptable_use_policy).

Law School Computer Lab Polices

- **Limited Access to the Law School Computer Lab** - In order to use the computer lab you must be a current MU law student. Access to the computer lab is a privilege and is not transferable to non-law students. You may not let your family use the lab for any purpose.
- **Computer Availability and Priority of Use** - Computers in back of the lab are available during regular library service hours on a first-come, first-served basis. Computer training classes held in the front room of the lab take priority over individual use. An ADA workstation is available in Room 119 of the lab. Students who require access to this equipment in order to be able to access library resources have priority. All decisions as to the use of the computers are at the discretion of the Library Director, the Associate Director, or the Automation Librarian.
- **Copyright and Licensing Restrictions** - The user is responsible for observing all copyright laws. The software and documentation made available in the lab is for use only in the lab and is not to be duplicated for use elsewhere. Duplicating a copyrighted program or documentation is illegal and is an Honor Code violation. Any use of computer-assisted legal research databases (Westlaw and Lexis) is for academic purposes only. Terms of use are governed by individual subscriber agreements for each system.
- **Assumption of the Risk** - The MU Law Library and MU School of Law make no guarantee with respect to any equipment, programs, or other materials in the computer lab. The entire risk as to the quality and performance of the computer equipment, programs, and documentation is with the user. The lab is not responsible for loss of data due to faulty programs or equipment.
- **Data Storage** - Users may not store their files on the hard drives of the individual workstations or on the law school's network. Users may not save their personal settings on individual workstations.
- **Reporting Equipment Problems** - Report any PC or printer problem, such as paper jams, toner replacement, backed-up print jobs, etc. to the User Support Analyst, student lab assistant, or reference office. Do not attempt to fix any lab equipment on your own. Lab supplies (paper reams, toner etc.) are to be handled by staff only.
- **Food, Drink and Tobacco are not allowed in the lab.**
- **Lab Phones and Help Desk** - Lab phones are for staff use only. Public telephones are available in the student area of the subplaza.

Failure to observe lab policies and directions from library staff regarding proper lab use may result in restriction or revocation of computer access, or in termination, academic probation, or prosecution under federal or state law.

Course Changes (V)

Any changes in course enrollments and/or number and dates of course offerings shall be initiated by the course coordinator and the appropriate chairman in consultation with the Associate Dean for Academic Affairs. (CVM Executive Committee, 1986)

Course Repeat Policy

The course repeat policy will not be applied automatically to a student's GPA. After completing the second attempt of a course, a student must submit a request for GPA adjustment form to the University Registrar's Office 125 Jesse Hall.

When the grade received in an initial attempt, for an undergraduate course at University of Missouri-Columbia, or any University of Missouri System Campus, is a "C-", "D+", "D", "D-", "F" or "WF", the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri-Columbia (unless the repeat grade is an I or W). All grades received in second and subsequent attempts will be included in GPA calculations. No more than 15 semester hours will be dropped from the calculation of the student's GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. This policy is effective with course work where the initial enrollment and completion of the course was fall semester 2000 and thereafter.

Any course being repeated may not be taken on an S/U basis. This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated, all applicable tuition and required fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credit from that course.

Students are strongly encouraged to visit with an advisor to determine whether re-enrollment is advisable (certain department or divisional policies may be important in this connection). Further, students should be aware that repeating a course may have an impact on financial aid, insurance, entrance to professional schools, participation in athletics, immigration status, and other non-academic matters.

The academic status of a student in a given semester will not change as a result of repeating a course.

The policy is applicable to undergraduate students only.

Clarifying comments

Students should not re-enroll in a course for which they have been assigned a grade of "I".

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply. If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attribute toward any graduation requirement.

Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students may replace the grade earned from the course at the University of Missouri-Columbia or any other University of Missouri campus with a grade earned in an equivalent course at University of Missouri-Columbia campus. Courses for which a W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

Course-Load Rules (L)

The maximum number of hours permitted for a semester is seventeen (17), and seven (7) for a summer session, unless the Associate Dean for good cause approves a heavier load. The minimum number of hours permitted for a semester in order to be considered a full-time student is twelve (12). There is no minimum for the summer session.

Credit for Non-Law Courses (L)

Law students are permitted to take up to a total of three (3) hours of courses for Law School credit in other schools of the University during law school. Please note that because you are listed at "primary degree program-Law" with the University, you will be charged the per credit hour rate for ANY non-law courses (NOT the undergraduate or graduate per credit hour rate). This does not apply to students officially enrolled in a dual degree program.

1. These credits are taken on an S/U basis and are subject to the following regulations:
 - a. The course must be at the graduate level (numbered 7000-9999).
 - b. The course must be related to the student's study and future practice of law.
 - c. The semester hours of the non-law course will be counted in the student's total number for the semester, and the student may not (without permission) take any more than a combined total of 16 hours in a regular semester, or 7 in a Summer Session.
 - d. Students wishing to take a non-law course for law credit MUST request approval of the course in writing prior to enrolling in the course. The request should be given to the

Associate Dean and include the following (using a form available in Room 203):

- i Course name, number and instructor;
 - ii Statement of purpose for taking the course as related to (b) above.
- e. Requests for the approval of below 7000-Level non-law courses within the guidelines given above must be referred to the Standards Committee. The Associate Dean may approve 7000-9999 level courses.
- f. Any petition for law school credit for non-law courses beyond a cumulative maximum total of three (3) hours, shall be initially presented to the Associate Dean for Academic Affairs. If the student's request is declined, the student may then petition the Standards and Readmissions Committee. If the Committee declines the student's request, the student can petition the faculty.

Deficient Academic Performance (V)

Mid-course/rotation grade warnings must be issued to students if they are not achieving at least a "C" grade average. The notice should be copied to the Associate Dean for Academic Affairs.

A student who receives a grade of "F" in any required or elective course of the professional curriculum will be dismissed.

No more than 9 total semester credit hours of "D" grades may be accumulated prior to graduation. Greater than 9 semester credit hours of "D" grades will result in dismissal from the CVM. If readmitted, any subsequent "D" grades will again result in dismissal from the CVM.

NOTE: These regulations were adopted by faculty action August 4, 1983. They are subject to change by faculty action. *Revised in 1988, 2002, 2009, 2011 and 2012.*

Degrees, Diplomas and Certificates

The process for awarding Degrees, Diplomas and Certificates at the University of Missouri is governed by the Faculty Council. For a full listing of this process please see *Article IX of the Faculty Handbook* (<http://facultycouncil.missouri.edu/handbook/article-9.html>).

Disability Accommodations (L)

It is the policy and practice of the University of Missouri School of Law to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. No individual shall be discriminated against by the University of Missouri School of Law because of a disability, nor shall any qualified individual with a disability be denied access to or participation in Law School services, programs, or activities because of the disability. The School of Law is committed to providing reasonable accommodations for individuals with disabilities, though the School is not required to make accommodations that are unduly burdensome or that fundamentally alter the nature of the program.

Students who have been accepted for admission are advised in their acceptance letter to contact the Associate Dean as soon as possible

regarding disabilities that might require accommodation. Continuing students who believe they have acquired or developed a disability should also contact the Associate Dean as soon as possible. Early identification of disabilities is necessary to allow adequate time to evaluate documentation and to coordinate accommodations required. The accommodation process takes some time, so the Law School may be unable to grant last-minute requests for accommodation.

Accommodation Process

To accommodate students with disabilities, the School of Law and the Office of Disability Services have arranged the following accommodation process:

1. A student who believes he/she has a disability that requires any accommodation should notify the Associate Dean.
2. The Associate Dean will then refer that student to the Office of Disability Services, located at S5Memorial Union.
3. The Director of the Office of Disability Services will meet with the student, request medical records and other information from the student, and make a recommendation to the Associate Dean about what, if any, accommodations seem appropriate. Please note that the Office of Disability Services must first receive all necessary medical documentation from the student.
4. The Associate Dean and the Director of Disability Services will then decide what accommodations to provide, if any, in light of the student's medical information and the student's course schedule, exams, and/or graded exercises.
5. In the event the Director of Disability Services and the Associate Dean disagree about what accommodations are appropriate, the Associate Dean's determination will govern.
6. The Associate Dean will then provide the student with a letter identifying the accommodations the Law School will provide. At that time, the Associate Dean will ask the student to indicate his/her acceptance of the accommodations in writing.
7. The Law School and the Office of Disability Services will work in conjunction to coordinate the accommodations. Any problems that arise should be brought to the attention of the Associate Dean and/or the Office of Disability Services.

Academic Dismissal and Readmission

If a student who is academically dismissed raises a previously undisclosed disability as a basis for academic difficulty, the burden will be on the student to explain why the disability was not previously brought to the attention of the administration, to explain why accommodations were not requested or why those provided were not adequate, and to demonstrate that the disability was the cause of the dismissal.

Readmission requests should be directed to the Associate Dean. The Associate Dean will forward the request to the Law School's Standards & Readmissions Committee which acts on the requests. For further information on the readmission process, please see the Student Handbook.

Bar Examination

Law students with disabilities who believe they will require accommodations in taking the bar examination should inquire early in their legal education as to what will be necessary to obtain accommodations. Information on how to contact bar examiners in all states is available from the Office of Career Services. Many state boards of bar examiners will request that the law school provide information on

accommodations provided during law school upon a written release from the student.

Career Services

The Office of Career Services provides assistance to all students and does not discriminate on the basis of disability. Students who believe that an employer working through Career Services has discriminated on the basis of disability should bring their concerns to the attention of the Director of Career Services.

Grievances

If a student who requests accommodations from the School of Law believes that he/she has been discriminated against on the basis of his/her disability, the student should bring this matter to the attention of the Associate Dean. The Associate Dean and the Office of Disability Services will attempt to resolve the matter and will communicate their decision to the student. If the student is dissatisfied with the decision, the student may file a grievance with the ADA Coordinator. Grievances filed with the ADA Coordinator must be in writing and must be filed within two weeks of the date the Associate Dean communicated the decision to the student.

Confidentiality

Information related to a student's disability is treated as confidential information under applicable federal, state, and university laws.

Dismissal

A dean may at any time, and following such procedures as are reasonable, dismiss a student from a class or from a school or college for failure to perform academic duties.

In addition, the director of the Student Health Center (<http://studenthealth.missouri.edu>) has the authority to exclude a student from classes and other University exercises and activities because of exposure to a communicable or contagious disease, or to require a student to withdraw from the University at any time if the student has a medical condition constituting a hazard to themselves, other students or the campus community.

Adapted from the Faculty Handbook. (<http://facultycouncil.missouri.edu/handbook/article-3.html>)

Dismissal and Probation (L)

A. Rules for Dismissal and Probation

1. For purposes of this section (Policies & Rules – Dismissal and Probation)
 - a. "First year" consists of that series of semesters or summer sessions, or both, at the end of which a student first receives grades in courses aggregating to not less than 24 hours.
 - b. "Semester" means either the fall or spring semester. The summer session is considered to be part of the next succeeding semester for the purpose of computing semester grade point averages.
2. A student is dismissed:
 - a. at the end of the student's
 - i first semester if the student's cumulative grade point average is equal to or less than 76.399 ; or

- ii second semester if the student's grade point average for that semester is equal to or less than 76.399
 - iii first year if the student's cumulative grade point average is equal to or less than 76.399; or
 - b. at the end of any semester after the student's first year if the student's grade point average for that semester is equal to or less than 76.399 ; or
 - c. at the end of any semester during which the student has been on probation if the student's grade point average for that semester is equal to or less than 77.499; or
 - d. at the end of any semester during which the student has been on probation if the student's grade point average for that semester is
 - i not sufficient to raise his or her cumulative grade point average to an average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied; or
 - ii is less than the semester or cumulative grade point average which was imposed upon the student as a condition of probation or readmission;
 - e. at the end of any semester prior to the completion of the student's first year if
 - i the student has received grades in at least two sessions and
 - ii has received grades in at least 12 hours of coursework; and
 - iii has a cumulative grade point average of equal to or less than 76.399 ;
 - f. at the end of that semester where the student has a cumulative grade point average equal to or less than 77.499 after completing 89 or more hours of course work.
1. A student is placed or continued on probation:
 - a. at the end of the student's first year if the student's cumulative grade point average is greater than 76.399 but equal to or less than 77.399 ; or
 - b. at the end of any semester after the student's first year, if the student's grade point average for that semester is greater than 76.399 but equal to or less than 77.399 ; or
 - c. a student who is on probation will be continued on probation if the student's cumulative grade point average is equal to or less than 77.499 , but the semester grade point average is sufficient to raise his or her cumulative grade point average to a cumulative grade point average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied.
2. Any first year student who does not achieve a grade point average greater than 77.499 in the fall semester will be required to take the course in Legal Reasoning during the second semester. Students who are required to take the course in Legal Reasoning under this provision will drop one of their courses. The course to be dropped will be decided in consultation with the Associate Dean for Academic Affairs.
3. A student ceases to be on probation at the end of a semester when the student's cumulative grade point average and grade point average for that semester are both greater than 77.499

4. After the first semester of the first year, a student is in "good standing" at the School of Law if the student's cumulative GPA is greater than 76.399. Thereafter, a student is in good standing when both the student's current semester and overall GPA are greater than 77.499.

B. Rights of Students Petitioning for Readmission

Students who petition the Law School for readmission following academic dismissal have the following rights:

1. Fair notice of the time and place of the meeting.
2. To submit any supporting written material to the Faculty Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee's recommendation or decision, or the Faculty's decision.

C. Readmission Procedures

1. Readmission Procedures for students dismissed at the end of the first semester under Rule 2.a.1

a. A student dismissed at the end of the student's first semester whose grade point average for the first semester is equal to or less than 75.299 will not be permitted to attend law school for the succeeding spring semester. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student's dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Faculty Readmissions Committee may require readmitted students or students on probation to drop one or more of their courses.

b. A student dismissed at the end of the student's first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring semester. Such student may not attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show that the applicant's poor academic performance was the result of facts other than intellectual inability to perform satisfactory law school work and that these factors will not continue to impair the applicant's performance in the future. If the Faculty Readmissions Committee denies readmission for the spring semester, or if the student requests readmission as of the next fall semester, the student shall be readmitted for the following fall semester subject to the same conditions described in paragraph C.1.a above, or under such conditions as the Readmissions Committee may determine. If the student is readmitted for the spring semester, the student will be subject to the dismissal rules under paragraph A.2.a.2 and A.2.a.3 above, but shall not be subject to dismissal under paragraph A.2.c or A.2.d above.

2. Readmission Procedures for students dismissed at any time after the first semester

a. A student who has been dismissed may not attend classes unless the student has filed a written petition within the time limits indicated in the letter of dismissal issued by the School of Law.

b. To qualify for readmission, an applicant for readmission must show: (1) that the applicant's poor academic performance was the result of facts other than intellectual inability to perform satisfactory law school work; (2) that these factors will not continue to impair the applicant's performance in the future; and (3) that there is reasonable probability that the applicant's grade point average can be raised to the graduation level by the time 89 credits have been accumulated.

c. A petition for readmission by a student who has been dismissed shall be heard by the Faculty Readmissions Committee. A quorum of the Faculty Readmissions Committee, for purposes of deciding petitions for readmission, shall consist of one less than all voting members. If the Committee's decision is favorable for readmission, or is unanimous against readmission, that decision shall be final and the student shall have no right of appeal to the faculty at large. If the Committee's decision is unfavorable against readmission, but not unanimous, the petition shall be referred to the faculty at large for decision.

d. A student who petitions for readmission has the right to appear personally before the Faculty Readmissions Committee and, if allowed under these rules, the Faculty at large. The student may be summoned to appear before either group by making a personal appearance or by supplying answers to written questions. (See above for a full statement of rights of petitioners.)

e. A student who has been dismissed for scholastic reasons and whose readmission is approved will be on probation and subject to such conditions as may be imposed. The conditions below will apply unless varied by the Faculty or Faculty Readmissions Committee.

f. It is the policy of the Faculty Readmissions Committee to make decisions on readmission prior to the end of the summer term for those students who are dismissed at the end of the spring semester and who may be enrolled in the summer term. Therefore, the readmission decision will not be delayed until summer grades are received.

D. Standard Conditions for Law Students Readmitted after Scholastic Dismissal, and for Law Students on Probation

Students who are readmitted or are on probation are subject to the following conditions as well as any specific conditions stated in the readmission action:

a. they will continue on academic probation until achieving academic good standing, which requires a cumulative grade point average greater than 77.499.

b. students placed on probation at the end of the Fall semester of their first year, will be required to take the course in Legal Reasoning (5090) (<http://www.law.missouri.edu/academics/curriculum.html#5090>) during the second semester. At its discretion, the Faculty Readmissions Committee may require such students to drop one or more of their courses.

c. until such time as they achieve a cumulative grade point average greater than 77.499, they must maintain a semester grade point average as set out in the readmission action. If no semester grade point average was specified, the student must maintain a semester grade point average sufficient to raise the student's grade point average to a cumulative grade point average greater than 77.499 by the time the other requirements for graduation are completed.

d. their schedule of courses must be approved by the Associate Dean for Academic Affairs, and the dropping of any course during the semester must also be approved by the Associate Dean for Academic Affairs. In general, students will be required to take required courses before electives and take graded courses rather than pass-fail courses.

e. during any session in which they are enrolled, they will not engage in any employment for compensation or spend a substantial amount of time on extra-curricular activities without the prior written approval of the Associate Dean for Academic Affairs. "Substantial amount of time on extra-curricular activities" is interpreted by the Standards and Readmissions committee to include participation in any internal or external competition sponsored by the Board of Advocates as well as any position of leadership on any student board or organization.

f. Unless exempted by the Faculty Readmissions Committee, they are not allowed to take the following courses:

- * Externship
- * Independent Research
- * Courses taught outside Law School for Law School credit (e.g. graduate courses)
- * Courses taught by adjuncts
- * Seminars, except students classified as third-year students
- * Participate in any Study-Aboard Programs
- * Clinics or Clinic related courses including (Criminal Clinic, Clinical Skills, Family Violence Clinic, Innocence Project Legislative Practicum, Landlord/Tenant Practicum)

Drug and Alcohol Policy

Drug Free Schools & Community Act

Pursuant to the Drug-Free Schools and Communities Act Amendments of 1989, the University of Missouri is required to establish a drug and alcohol prevention program for its students and employees. Following is a description of the University of Missouri-Columbia's program. A biennial review of this program will be done to determine its effectiveness, to implement changes to the program if they are needed and to ensure that the University's disciplinary sanctions are consistently enforced.

A reference listing of MU resources for alcohol and other drug educational preventions efforts, counseling, and referral are listed below. Please feel free to contact any of the offices listed for more information.

Standards of conduct

University of Missouri-Columbia regulations prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs by University students and their guests and for employees on University-

owned or controlled property and at University-sponsored or supervised activities.

University Discipline

Violation of these University regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

Legal sanctions

Local, state and federal laws also prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to \$20,000 to imprisonment for terms up to and including life.

Health risks

Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Wellness Resource Center in G202 MU student Center or at www.wellness.missouri.edu.

Alcohol and Other Depressants (barbiturates, sedatives, and tranquilizers)

Addiction; accidents as a result of impaired ability and judgment; overdose when used with other depressants; damage to a developing fetus; heart and liver damage.

Marijuana

Impair short-term memory, thinking, and physical coordinations. Can cause panic reaction and increase the risk of lung cancer and emphysema. Can interfere with judgment, attention span concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence and compromise the immune system.

Cocaine

Addiction, cardiovascular system damage including heart attack, brain damage, seizures, lung damage, severe depression, paranoia, psychosis. Similar risks are associated with other stimulants, such as speed and uppers.

Nicotine

Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces and increase in heart and respiration rates, blood pressure, adrenaline production and metabolism. People can rapidly become physically and psychologically dependent on tobacco. Compromises the immune system.

Inhalants

Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. Use of these drugs slows down many body functions. High doses can cause severe breathing failure and sudden death. Chronic abuse of some of these chemicals can lead to irreversible liver damage and other health problems.

Resources

A variety of resources exist for alcohol and other drug prevention education, counseling and referral. For detailed information concerning these resources available from the University and community agencies, students may contact the Wellness resource Center (<http://wellness.missouri.edu>), G202 MU Student Center, 882-4634 and/

or the Counseling Center (<http://counseling.missouri.edu/student-services>), 220 Parker Hall, 882-6601 and employees may contact the Employee Assistance Program (<http://counseling.missouri.edu/employee-assistance-program>), 205 Parker Hall, 882-6701. Such referrals will respect individual confidentiality.

Wellness Resource Center -- Campus Alcohol and Drug Abuse Office

Alcohol and other drug abuse prevention programs, speakers, peer educators, and referral services and research. Provides leadership in the planning and coordination of Alcohol Responsibility Month, Wellness Month, Safe Springs Break and etc. Provides educational brochures and other printed materials and houses a large resource library of books, brochures, videos and other materials on a variety of wellness issues including alcohol and other drugs of wellness. Provides BASICS (Brief Alcohol Screening Intervention for College Students) workshops and individual assessments for students caught in violation of alcohol or drug policies or individual sessions for students who would like their alcohol or drug use evaluated.

Counseling Center (<http://counseling.missouri.edu>)

Individual counseling, group counseling and alcohol or drug evaluations.

Student Health Center (<http://studenthealth.missouri.edu>)

Offers medical services and individual consultation, presentations to campus groups, printed materials, peer educators on sexual health related issues and stop smoking, individual and group consultation.

University Police crime prevention unit (<http://www.mupolice.com/cp>)

Provides presentations on the legal aspects of alcohol and other drugs as well as other related issues. 5 General Services Bldg.

Total Person Program (<http://www.mutigers.com/sports/acad/miss-acad-body.html>)

Services for intercollegiate athletes include counseling, drug and alcohol abuse education and other wellness related issues.

GAMMA (Greeks Advocating the Mature Management of Alcohol)

Greek student organization that provides alcohol awareness programs for fraternity and sorority members.

Dual Enrollment

Dual Enrollment for Senior Undergraduates

Beginning Fall 2012, qualified undergraduate students will be eligible to enroll in up to 12 hours of graduate credit during the last 30 hours of their undergraduate program. The eligibility requirements are listed below.

Eligibility Requirement

With the approval of the undergraduate advisor, the undergraduate divisional dean, the Director of Graduate Studies, and the Graduate Dean, eligible seniors may dually enroll as an undergraduate for up to 12 semester hours of graduate credit. To qualify, seniors must:

1. Rank in the upper half of their class.
2. Have a B average in the most recent 45 semester hours of credit.
3. Be within 30 hours of completing graduation requirements for the first bachelor's degree.

Note: Graduate degree programs may establish their own policies with regard to enrollment in and the applicability of senior dual enrollment credits.

Dual enrollment forms (<http://gradschool.missouri.edu/forms-downloads/repository/dual-enrollment.pdf>) (PDF) must be completed and approved by the Graduate School prior to registering for the graduate level courses.

This program also is available to seniors in other Missouri colleges. Additional information may be obtained from the Graduate School.

Undergraduate/Law Enrollment (90-Credit Program)

With prior written approval, select undergraduate MU Arts and Science students may have up to 30 credits in courses from the School of Law, which are acceptable to the faculty of the College of Arts and Science, applied toward a Bachelor of Arts degree. This combined curriculum enables students to obtain both the Bachelor of Arts (BA) and the Juris Doctor (JD) degrees in six years.

Other university divisions, and some colleges and universities other than MU, accept the Juris Doctorate in lieu of the fourth year of college and award a baccalaureate degree upon graduation from MU's Law School. Students interested in this program should check with the dean of their college early in their undergraduate careers to ensure compliance with all requirements.

The undergraduate degree is a requirement for the Juris Doctor degree. Students entering law school under this combined degree program must make arrangements with their undergraduate schools to complete all requirements for their undergraduate degree.

Students with Bright Flight or MU awarded scholarships, such as Curators, Excellence, and Diversity, may use these awards in the law school. Check with the Office of Financial Aid.

Please note: While not a problem in the state of Missouri, prior to participating in the 90-credit program, students should determine whether participation would adversely affect admission to the bar in the jurisdiction in which they expect to practice. Some states will not admit to their bar persons with fewer than 14 semesters of university work or who did not have their bachelor's degree before entering law school.

Enrollment Requirements (G)

Enrollment Requirements for Master's and Educational Specialist Degree Candidates

After completing courses, students expecting to take examinations, present a thesis, manuscript, project, or portfolio must be enrolled when that activity occurs. If a master's and educational specialist candidate only needs to take exams or defend a thesis or project, the candidate can enroll for "Graduate Examination" hours in myZou. Registration in the "Graduate Examination" does not count toward enrollment certification. Students enrolled in the "Graduate Examination" would not be considered full-time or part-time. If students need to use the library or computers on campus, they should enroll in at least one hour of regular credit hour instead of "Graduate Examination".

Enrollment Requirements for Doctoral Candidates

Candidacy for a doctoral degree is established by passing the comprehensive examination. Status as a continuous enrollment doctoral student begins the term after the term in which the comprehensive exam was successfully completed. The continuous enrollment requirement is met by enrolling in 2 hours each spring and fall semester and 1 hour each summer semester.

Important Note on Graduate Examination Registration and Financial Aid

Students with financial aid should check with the Student Financial Aid office before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student's financial aid status.

Important Note for International Students regarding Graduate Examination Registration and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student's visa status.

Examinations (U)

Evening examinations

If a conflict arises between a group evening examination and a regularly scheduled class, the regularly scheduled class has priority. The instructor giving the group evening examination is responsible for scheduling a makeup examination at a mutually convenient time for both the student and the instructor.

Classes, Exams and Finals

For the schedule of evening exams and finals week schedule, refer to the Class, Exams and Finals (<http://registrar.missouri.edu/classes-exams>) on the University Registrar's website.

Credits by Examination

<http://admissions.missouri.edu/apply/ap-ib-and-college-credits/credit-by-examination.php>

Examinations (L)

Policies Related to Final Examinations

1. The examination schedule is specified by the Associate Dean of Academic Affairs.
2. All students should arrive and be settled in the examination room 15 minutes prior to the scheduled beginning of the examination.
3. Arrivals after the examination begins should report immediately to Room 203, Hulston Hall.
4. The "Instructions" page of any examination is reserved for all special instructions for the examination. This includes:

- a. the length of the examination
 - b. any special instructions for collaboration or material to be used during the examination
 - c. any special instructions for turning in the examination or parts thereof
 - d. any other general instructions not a substantive part of the exam itself
5. Each student will have a different number on each examination. A three-part, perforated slip printed with a number on each of the three parts will be distributed to each student at the time of the examination. The student will complete each portion of the exam number slip and tear off the bottom part for his/her records. (If more than one bluebook is used for any one examination, the student will carefully number the extra book(s) with the assigned number.) At the end of the examination, students will turn in their bluebooks with the remaining two portions attached. The proctor collecting the examinations will remove the identifying second part to be retained in the office and the professor will receive the bluebook bearing only the examination number.
 6. It is important for students to retain their portion of the number slip in order to review an examination or check grades when posted.
 7. There must be an accounting for all copies of an examination. As a result, the person administering the exam will:
 - a. notify students to complete the exam slip on the front of the bluebook
 - b. check the exam slips against the class roster at the conclusion of the exam (any portion of the exam slip that contains the student's name is removed by the law school staff before the exam is given to a faculty member)
 - c. collect all copies of the examination itself - all copies of the exam must be turned in with the exam answer
 8. Examinations are scheduled in rooms that accommodate the taking of that examination. A list of the examination rooms is posted in various places in the law school prior to the last day of classes. This list specifies the place at which examinations will be picked up and which examination rooms are typing rooms.
 9. Examinations are distributed in the rooms scheduled and in no other rooms.
 10. Students may work on their examinations in assigned rooms only and in designated computer rooms. It is the responsibility of the student to return the completed examination to the place where it is to be picked up, at or before the time scheduled for the end of the examination.
 11. A student who chooses to leave a designated examination room is responsible for returning their examination to the designated place at or prior to the end of the examination period.
 12. Earplugs are permitted in any exam room.
 13. The items below are NOT permitted in any examination room, unless SPECIFICALLY authorized by the "Instructions" at the beginning of the written examination, or specifically permitted pursuant to the law school policy relative to exams on computer. These items should not be brought into the exam room. If they are, they MUST be turned into the proctor PRIOR TO THE START OF THE EXAMINATION. The proctor will keep these items until the examination has concluded :

- a. cellular or other telephones
 - b. Personal Digital Assistants (PDA) or any device having the characteristics of a PDA
 - c. laser pointers
 - d. any device that allows for the recording of data, or the playing of recorded data, including, but not limited to iPods, MP3 players, CD players, DVD players, cassette players or recorders
 - e. The devices above should not be brought into the examination room. The person administering the exam in each room will, however, have a box to collect any such device while the exam is being taken.
14. Smoking is NEVER permitted in any examination room.
15. Examinations are distributed by the proctor unless the professor elects to do so. Upon receipt of an examination, each student places their initials beside their names on the class roll. The proctor writes the time the examination begins and ends on the blackboard.
16. Students in the authorized examination rooms are given a ten-minute warning prior to the end of the examination period. The warning is given by the proctor unless the instructor elects to do so. Once the ten-minute warning is given, no student may leave the examination room. Students shall remain quietly seated.
17. The examination ends at the earliest of the following:
- a. the time written on the blackboard by the proctor or at the conclusion of the time designated on the examination. In some rooms, a law school staff member may say "Stop," but the failure to so indicate does not allow a student to continue to write after the time limit has expired. No writing whatsoever is permitted after the exam ends.
 - b. the time a student submits a written examination to the proctor collecting exams and leaves the immediate line of sight of that proctor. Whether such a student has left the immediate line of sight of the proctor is a question left to the discretion of the proctor, it being recognized that as more students turn in exams, the sight line of the proctor will be decreased.
 - c. The time a student taking an exam on computer submits their exam and exits from the exam writing software.
18. When the examination period ends, students who have not earlier completed the examination go to the place announced for examination pickup and hand to the proctor the examination, bluebooks and/or answer sheet and all scratch paper, used and unused. The material is checked at that time to be sure exam numbers are on each examination, bluebook and/or answer sheet and then placed in receptacles provided for that purpose. Students should not walk away until the proctor has confirmed they have all materials.
19. At the conclusion of each examination, each student again places their initials by their name on the class roll. The proctor checks to be sure all examinations and materials that should be returned are returned.

Externships (V)

Students from other colleges of veterinary medicine desiring an externship or participation in one or more instructional periods of the segmented curriculum must be accepted by the section/department

involved. The University of Missouri will not provide insurance coverage for any externship.

Students from colleges with animal health technician training programs desiring an internship in the Veterinary Medical Teaching Hospital will be considered upon proper application through the director of that program. They must be enrolled in and paying fees at their college, be evaluated by their director in consultation with the involved departmental unit during the externship period while allowing full utilization of their expertise in the Teaching Hospital operation. http://www.vms.missouri.edu/vet_tech_int_prog.html (CVM Executive Committee, 1986)

Final Examination Week (V)

The College of Veterinary Medicine, University of Missouri-Columbia, does not schedule "final examination week" for those courses included in the professional veterinary curriculum. Instead, classes will be scheduled through the last day of any regular session (term). Final grades will be submitted to the Dean's Office so they can be filed with the Office of Academic Affairs as specified in the faculty handbook, i.e., "within 2 days, except Sunday, after the end of the examination period". The "end of the examination period" will be interpreted as the time and date when the "semester (or session) closes". (General Faculty meeting minutes, 10-9-73). Changes in examinations can be scheduled as outlined in the Student Handbook.

Full-time/Part-time Status

Undergraduate students who register for fewer than 12 hours and graduate students who register for fewer than nine hours during the fall or spring semesters will be considered as enrolled part time. Undergraduate students may not enroll in a program part time without the express permission of the academic advising unit of the school or college in which the student is, or plans to be, enrolled.

- A full-time undergraduate student is enrolled in at least 12 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A three-quarters-time undergraduate student is enrolled in at least nine semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A half-time undergraduate student is enrolled in at least six semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.

Full-time enrollment for graduate and professional students:

- Graduate student — nine hours
- Law student — 12 hours
- Medical student — 14 hours
- Veterinary medicine student — 12 hours

Grades

GPA of Record

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of *S*, *U*, *H*, *W*, *NR*, or *I* are not included in determining the grade point average.

The undergraduate CUM GPA is the University of Missouri GPA, which will include all grades, credits, and honor points attempted at any University of Missouri campus, including all grades and credits. In computing the undergraduate GPA the grade points assigned to students' transfer work are the grade points that would have been assigned if the courses had been taken on the University of Missouri System campus, including any adjustments made under policies related to course repeats and/or Academic Renewal/Forgiveness.

GPA Calculator Web Site

To calculate a grade point average, go to the GPA Calculator Web Site at <http://registrar.missouri.edu/grades-transcripts-records/gpa-calculator.php>

Plus-Minus Grading System

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For undergraduates, all teachers are expected to use the grading scale approved by the faculty. This precludes any department or unit from opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/-, B+/-, C+/-, D+/-, and S. Grades calculated in the grade point average are A+ (4.00), A (4.00), A- (3.7), B+ (3.3), B (3.00), B- (2.7), C+ (2.3), C (2.00), C- (1.7), D+ (1.3), D (1.00), D- (0.7), and F (0). The grades of S, U, NR, and W are not incorporated in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and currently tied to a specific letter grade would be interpreted to mean a specific letter grade range. Hence, if a student must achieve a C in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the "C range," which would include the grade of C-.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required "C average or better" on all courses is a "2.00 average or better."

The grade of S (on S/U basis) is defined as equivalent to the letter grade of C- or higher.

Satisfactory/Unsatisfactory Grading System

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or add/drop form. Students may change to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of A-/-, B-/-, C-/-, D-/- or F

for each student is reported to the Office of the University Registrar. The Office of the University Registrar staff members ascertain which students are enrolled on the S/U system and assign a grade of U to those reported for grades of D-/- or F, and a grade of S for those reported A-/-, B-/- or C-/. Grades of S and U are not included in the computing of grade point averages.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

- Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
- Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
- First-semester freshmen and students on scholastic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
- A+/-, B+/-, and C+/- grades are recorded on the transcript as an S. S grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of S.
- D+/- and F grades are recorded on the transcript as a U. U grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of U.
- Courses completed with a grade of S may be accepted in an area of concentration only with the prior approval of the area advisor.

Courses completed with a grade of S may constitute no more than 20 percent of the total credits for the baccalaureate degree.

- Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
- Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

Selecting Grading Options (S/U vs. A through F)

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students' academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar's website at <http://registrar.missouri.edu/dates-deadlines.php> for deadlines for each term.

How Dropping/Withdrawing from a Class Affects the GPA

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was

passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

Grades for Students Who Officially Withdraw from the University

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (*W* or *F*) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of *F* is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean's signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. **NOTE:** Refund dates are different from withdrawal dates. (See Withdrawal from the University section on the University Registrar's website: <http://registrar.missouri.edu/policies/withdrawal-university.php>.)

Grade Appeal

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student's work.
- If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student's work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

Incomplete Grades (Grade of I)

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason

incomplete, the instructor will postpone the grades, reporting *I* grades to the University Registrar.

An *I* grade may be assigned only when:

1. The completed portion of the student's work in the course is of passing quality AND
2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of *I* grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:

- The name of the student
- The course number, title and credits
- Semester and year of enrollment
- A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the *I* grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an *I* grade must complete the course requirements either:

1. within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the *I* and record a grade of *F* in classes graded A-F or a grade of *U* in classes graded S/U. Any student planning to graduate with an unresolved *I* grade should be aware that translation to an *F* could drop the GPA below the requirements for graduation. As with any academic deficiency, the low GPA would delay the student's graduation until all requirements for graduation are met.

Note:

- A grade of *I* is not figured into the grade point average.
- Students should not re-enroll in a course for which they have been assigned a grade of *I*.
- For further information, see the Faculty Handbook, Academic Regulations (<http://facultycouncil.missouri.edu/handbook/intro.html>).
- Exceptions to unresolved incomplete grades changing to an *F* are as follows:
 - Courses taken for graduate level credit
 - Courses taken prior to Fall 2003
 - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Grades of *I* and the reason for the delay of grade may also be entered directly into myZou.

Questions may be directed to the Office of the University Registrar, (573) 882-4249.

Unassigned or Erroneous Grades

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar on a form provided for that purpose.

Note: Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the University Registrar will record a *NR* (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months *NR* will change to an *F*.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the Faculty Handbook, Academic Regulations (<http://facultycouncil.missouri.edu/handbook/intro.html>). Questions may be directed to the Office of the University Registrar, (573) 882-4249.

Grades & Credits (G)

Grading Scale

Graduate students' grades in all courses counting toward an advanced degree may be reported as: A +/-, B +/-, and C +/- . Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member's evaluation of student performance and/or policies of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C and C- as passing grades; however, grades in the C range may not be acceptable for specific program-matic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student's grade point average.

S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as "graded on S/U basis only" in the online Schedule of Courses available through myZou.

Incompletes

An incomplete grade (I) may be recorded when the student's work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an "I" grade will require an accompanying letter of justification from the instructor. Although grades of "I" do not automatically convert to an "F" if not completed, academic programs or the instructor may establish conditions or regulations pertaining to "I" grades that are more stringent.

Unreported Grades: NR

When grades are not reported by the instructor, these "Blank Grades" will be recorded as "NR" (Not Recorded). The NR designation will remain on the student's transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student's record indefinitely and will not revert to an "F".

Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member's academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit. 8090/9090 research (8990/9990 Research for Engineering students) is reserved for master's and doctoral degree students working on a thesis or dissertation.

Grade Point Average

A graduate student's grade point average is based on the student's entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a semester/term or cumulative GPA falls below 2.0. Note: Summer session is not counted as a semester.

GPA and Graduation

To graduate, a student must have an overall GPA of 3.0 in all graduate courses taken at MU and not just those courses listed on a plan of study.

For more information on grading, credit and related policies go to <http://gradschool.missouri.edu/academics/progress/grading-credit.php>.

Grades & Ranks (L)

Class Rankings

At the end of each semester, students are included in the first year, second year or third year class lists and are given a class rank based on their position in their class list. Classes are ranked by expected date of graduation.

When calculating the class rankings for the first year and second year classes, summer grades are included in the rankings for the following Fall semester.

The graduating class ranking is determined as of the end of the summer semester and includes all students graduating within the academic year (preceding fall and spring semesters and current summer session).

Rules for Determining Class Levels

In order to register for courses students are assigned a class level. Those class levels are determined as follows:

1. **First Year Students:** A first year student is one who has received less than 24 hours of law school grades;
2. **Second Year Students:** A student who has between 25 and 56 (inclusive) of law school grades;
3. **Third Year Students:** A third year student is one who has received more than 56 hours of law school grades;
4. **Law School Grades:** As used herein, "law school grades" means grades counting towards credit at the School of Law. Failing grades do not count as "law school grades;"
5. **Effect of Summer School.** The determination of class level is made ONLY at the conclusion of the fall and spring semesters. A student's class level will NOT, therefore change at the end of summer school;
6. **Exceptional Circumstances:** In cases of students in unusual situations, including, for example part-time or unusually heavy or light-load semesters, a determination will be made on the basis of dividing the student's law school career into relatively equal periods for the first, second and third years.

Computation of Grade Point Average (GPA)

Grade point averages are based only on law school courses taken at this school and only upon "graded courses." For the purpose of computing grade point averages a "graded course" is one which is graded on the 65-100 scale.

A grade point average is obtained as follows:

1. The "grade points" for a graded course are obtained by multiplying the numerical grade for the course by the credit hours for the course.
2. The "grade point average" is obtained by dividing the total grade points for all graded courses by the total number of hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the grade for the previous taking of the course will thereafter be used in the computation of the student's cumulative grade point average. The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year, and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student's first, second and third years.

Course Repeat Policy

The School of Law's Standards and Readmissions committee has adopted the following course repeat policy:

1. Students who petition the Standards Committee for readmission may be required to repeat any or all courses previously completed;
2. Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
3. Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances;
4. Students who fail a non-required course are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances.
5. Students who fail a required course are required to repeat that course, unless, in exceptional circumstances, repeating the course is waived.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

Dean's List

A student qualifies for inclusion on the Dean's List with a semester average greater than 85.999.

Good Standing

After the first semester of the first year, a student is in "good standing" at the School of Law if the student's cumulative GPA is greater than 76.399. Thereafter, a student is in "good standing" at the School of law when both the student's current semester and overall GPA are greater than 77.499.

Grades and Grading

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters "S" (Satisfactory) and "U" (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and carry course credit. The grades of U and of 65 through 69 are failing grades and carry no course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean's Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

Explanation of the Grading Scale (<http://law.missouri.edu/students/pdf/gradingscale.pdf>) (PDF)

Grades from myZou

Students may obtain their grades from MyZou. In addition to the student's PawPrint, when checking grades for only one course, students must know the course number.

Student Honors

J.D. Degree Cum Laude

Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7% of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.

Any student with a graduating grade point average within the top 12% of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

Order of the Coif

The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship and whose achievements as students make them worthy of this distinction. Selections are made after sixth semester grades and rankings have been determined. To be eligible for membership in the Order of Coif students must complete 75% of their law studies in graded courses. Starting in 2014, transfer students will be considered as having completed their first year of law studies in graded courses for purposes of calculating the 75% of coursework in graded courses requirement.

Order of the Barristers

The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

Graduate Academic Minors (G)

Nondesignated minors

Nondesignated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student's plan of study; however, they are not listed on a student's transcript.

Obtaining approval for a minor

Both designated and non-designated minors must be approved by the student's major adviser, the student's academic program director of graduate studies, and the Graduate School.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor.

Graduate Assistants and Fellows (G)

Graduate Assistantships

Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

Fellowships

Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

Assistantship and Fellowship Policies

The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School's website (<http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php>).

Graduate Certificates

A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of graduate courses. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student's official University of Missouri Transcript.

To accommodate a variety of learners' needs, MU offers two types of graduate certificate programs:

- Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program. Prospective students have an option to apply to the Graduate School as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.
- Degree-dependent graduate certificates are designed for degree-seeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

Federal Disclosure Requirements for Stand Alone Graduate Certificates "Final regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). those regulations also provide that institutions must disclose to prospective students certain information about the institution's Ge programs.

Finally, the new regulations require institutions to notify the Department if they wish to add an additional GE Program to its list of Title IV eligible

programs. All of these requirements are effective July 1, 2011. The Secretary published additional regulations related to the program eligibility metrics that will be calculated for gainful employment programs in the Federal Register on June 13, 2011.”

Source: Federal Student Aid, see <http://www.ifap.ed.gov/GainfulEmploymentInfo/index.html>

At the University of Missouri, the Graduate School's Stand Alone certificates are subject to federal Gainful Employment disclosure requirements. A disclosure form for each Stand Alone certificate may be found in the last section of this catalog and on our web site.

Certificate Admission Information

Stand-Alone Certificate Applicants. All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School's online application for admission and meet the Graduate School's minimum admission requirements for all programs.

Degree-Dependent Certificate Applicants

New applicants applying for a degree program should complete the Graduate School's online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Adviser Form (pdf) should be completed to add a graduate certificate.

Financial Aid

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc. from the Graduate School or University of Missouri.

Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as “certificate-seeking” graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is

submitted. Please refer to the certificate program's site for certificate policy updates.

Credit Hours Necessary for Certificate Completion

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program's site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

Grievances (L)

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at their web page <http://www.aals.org/>.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312) 988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date in which the complaint is being filed; the name and address of the complainant; and a description of the complaint. The description of the complaint shall include a description of the accreditation standard which the law school's action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

Students who have a grievance not implicating the ABA accreditation standards may file it with the Student Bar Association which has a Grievance Committee that meets periodically with the Dean or Associate Dean.

Hold

There are several types of holds, which are restrictions that may block registration. Students are notified on myZou if they have a hold. They should go to the office indicated on the individual hold to resolve the hold.

Honors Recognition (V)

Each student graduating from the College of Veterinary Medicine and whose cumulative grade point average (G.P.A.) in the professional curriculum is within the range listed below will be designated, as indicated on the diploma, to graduate with honors:

G.P.A. 3.9--4.0 summa cum laude

G.P.A. 3.8- 3.89 magna cum laude

G.P.A. 3.7-3.79 cum laude

(General Faculty meeting minutes, 10-10-74)

Late Registration

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (<http://myzou.missouri.edu>).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

Leave of Absence (G)

Key Terms

Leave of Absence

The student anticipates a need to discontinue enrollment for one or more semesters.

Active Duty Leave or Withdrawal

Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

Contact Adviser and Director of Graduate Studies

Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate adviser and the academic program's director of graduate studies to inform them of their intent, the reason requesting leave and the expected duration.

Letters to the Graduate School Office

After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the vice provost/dean of the Graduate School. The DGS letter will verify that the academic program has been informed and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date.

Resolving Financial Support Responsibilities

It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their adviser or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return.

Notification for Re-Entry

Before the completion of the Leave of Absence, the student must notify the academic program's director of graduate studies and the Graduate School so that the re-entry process can be initiated.

Contact with the University During Leave

Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

Extension of Degree Time, Continuous Enrollment

Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence.

International Students

International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student adviser to determine the appropriate steps to safeguard their immigration status.

Military - Active Duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: **NOTE: Students must choose either option 1 or 2**

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law's existence and proof of its applicability to him/her. **Please note:** Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:

State of Iowa "Code Section 261.9(1)"g" (<http://www.iowacollegeaid.gov/PostsecondaryRegistration/iowacodechapter261b.html#ComplianceRequirements><http://www.iowacollegeaid.gov/PostsecondaryRegistration/iowacodechapter261b.html>)

Option 1 - Withdrawal from all courses for semester

They may choose to withdraw from all classes. In such cases, a student may request either:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition

and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.

2. Or the student may request that all courses for that semester be expunged from the student's academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an "Incomplete" grade.
- **I to F policy:** Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as "I" until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.
- **NR to F Policy:** Military duty will be exempted from the one -year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR grades for students called to active military duty will remain listed as "NR" indefinitely, if so desired by the student.

Upon completion of all course work for the semester, the student may choose either to:

1. Have the grade earned for the course and have the "Incomplete" expunged from his or her official record
OR
2. Have the "Incomplete" grade remain as the final grade with reason for the "Incomplete" noted on his or her official record

NOTE: No refunds will be given for option 2.

Residential life: Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

Financial Aid: The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

Scholarships: Scholarships may or may not be applicable upon the student's return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue an academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

Contact:

Office of the University Registrar
125 Jesse Hall
The University of Missouri - Columbia
Columbia, MO 65211
Office: (573) 882-7881
Fax: (573) 884-4530

The Office of the University Registrar will require the following information:

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530.

Re-admission of previously enrolled students

Undergraduate students who are returning to MU after an absence of at least one semester must complete a request for re-admission for undergraduate studies (<http://admissions.missouri.edu/apply/re-admission>) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887.

Degree-seeking **graduate** students who are returning to MU after an absence of at least two semesters must complete a graduate school re-activation form (PDF) (<http://gradschool.missouri.edu/forms-downloads/repository/reenroll.pdf>) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-5454.

View Missouri Revised Statutes Chapter 41 (41.948) (<http://www.moga.mo.gov/statutes/C000-099/0410000948.HTM>). This policy is implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.

Name Changes

Current students and alumni of the University of Missouri may change their names in the student records system for the University of Missouri during or after attendance according to the following:

1. For a student to change his/her name, legal documentation is required of the student's new name and verification that he/she was previously known as the name in the MU records system.

For Undergraduate students, a name change may be processed either in person, at the Office of Admissions, 230 Jesse Hall, or through the mail provided the necessary documentation is submitted. The mailing address is: Office of Admissions, 230 Jesse Hall, University of Missouri, Columbia, MO 65211.

For Graduate and Professional students, a name change may be processed either in person, at the Graduate School, 210 Jesse Hall, or through the mail provided the necessary documentation is submitted. The mailing address is: Graduate School, 210 Jesse Hall, University of Missouri, Columbia, MO 65211.

2. The student must submit a **minimum of two of the documents** listed below, one from list a. Proof of use of former name and one from list b. Proof of legal change to new name. **At least one of the documents must have date of birth, a photograph, and a signature:**
 - a. Proof of use of former name
 - i Former government issued government ID card such as a driver's license, military ID, passport
 - ii A federally recognized Indian tribe's enrollment card or a US Bureau of Indian Affairs identification card containing the signature and photograph of the individual
 - iii School yearbook with photo
 - iv Previously-issued Social Security Card
 - b. Proof of legal change to new name
 - i Current, government-issued ID card such as a driver's license, military ID, passport
 - ii Current, valid Social Security Card with new name
 - iii A federally recognized Indian tribe's enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
 - iv A certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full
3. Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

Non-Degree Graduate Study (G)

The Non-Degree Graduate Student Program allows post-baccalaureate students to complete graduate courses without being formally accepted into a degree-granting program. Many students use this enrollment option to explore a discipline, take courses for career advancement, prepare for application to a graduate degree program, or as personal enrichment. This program is administered by the Graduate School.

Once enrolled, the non-degree graduate student may take undergraduate- or graduate-level courses but hours earned are not credit

toward a graduate degree. However, if the student is later admitted to a degree-granting program, up to 12 hours of earned graduate credit may be applied toward a graduate degree program, at the discretion of faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note: To manage course enrollment, some academic programs may limit available courses to non-degree graduate students. Contact the academic program in which you wish to take courses for more information.

Eligibility

Applicants who hold a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to MU as non-degree graduate students.

International Student Eligibility

International students residing in the United States who do not satisfy the above requirement and are seeking admission as post-baccalaureate graduate students must provide evidence of proficiency in English. Either a minimum score on the TOEFL or IELTS or a minimum of 24 semester credit hours in which the student maintains a 2.0 GPA (A=4.0) in a degree program in which English was the primary language is required. The minimum required TOEFL score for entrance to the Graduate School is 500 paper-based, 61 internet-based. The Graduate School also accepts a 5.5 Academic IELTS score for admission to the Graduate school. Please consult your academic program of interest to determine if it requires higher TOEFL or IELTS scores for admission.

The University of Missouri will not issue I-20s to international students so that they may enter the United States to become non-degree graduate students.

Tuition and Fees

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

Financial Aid

Non-degree graduate students are not eligible to receive federal financial aid or veteran's benefits or to hold campus-sponsored assistantships.

How to Apply for On-Campus Non-Degree Study

- Complete and submit the Graduate School Application (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=umc-grad). The Graduate School encourages applicants to use the online application. The submission of a hard-copy application (PDF) (<http://gradschool.missouri.edu/forms-downloads/repository/gradapp.pdf>) will slow the application review process.
- Submit the application fee, (<http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants/application-fee.php>) which is \$55 (US) for domestic applicants and \$75 (US) for nonresident international applicants. You can pay the fee online through the Graduate School's online application.
- Official transcripts or mark sheets must be sent directly from each university or college you have attended to the Graduate Admission

Office, 210 Jesse Hall, Columbia, MO 65211. Transcripts/mark sheets for all baccalaureate degrees or their equivalents and any additional degrees must be sent. At this time, the Graduate School only accepts hard copies of transcripts. All transcripts/mark sheets become the property of MU.

- Standardized test scores, such as the GRE, are not required for non-degree graduate applicants. See below for the transfer and use policies for non-degree courses taken at MU.

How to Apply for Online Non-Degree Study

If you are planning to take course work online or at a distance, please contact Mizzou Online (<http://online.missouri.edu>) about course offerings and registration. The application process is different for online-only students.

Maintaining Good Standing

Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student's cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the dean of the Graduate School. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student's term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Switching Student Status from “Non-Degree” to “Degree-Seeking”

Non-degree graduate students who want to earn a graduate degree (master's, doctoral or educational specialist) must:

- Submit official scores, if required by the degree program of interest (<http://gradschool.missouri.edu/academics/programs>), from an appropriate graduate admission examination (GRE, GMAT, MAT). The scores must be sent directly from the examination service to Graduate School Admissions, 210 Jesse Hall, Columbia, MO 65211.
- Meet Graduate School minimum admission requirements (<http://gradschool.missouri.edu/admissions/eligibility-process>).
- Apply directly to the degree program of interest using a Change of Degree form (PDF) (<http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf>).

Posthumous Degree Awarding (G)

Honoring Deceased Graduate Students

The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

Student Completed All Degree Requirements

If the student has completed all degree requirements, the college or school's representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the vice provost for advanced

studies and dean of the Graduate School to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.*

Student Did Not Yet Complete Degree Requirements

If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean's certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.*

- * In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

Refund of Fees Policy

Exceptions to published tuition and required fees assessment policy and charges

1. The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.
2. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.
3. Only tuition required related to a student's assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.
4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.

Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
 - a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student's enrollment, thus changing the assessment. This provision specifically

excludes conditions or chronic illnesses that remain static and are known to the student at the time of enrollment.

- b. Written documentation of substantiated circumstances involving deadlines where a student has in good faith relied on information provided by a named University official, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about its terms.
 - c. In individual cases and when it is in the best interest of the student and the institution, the University registrar or his/her designated assistant registrar may grant an exception that is not deemed to be served appropriately by the exception criteria stated elsewhere in this document.
3. Decisions will address only whether an adjustment of charges will be made. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school. Record changes, such as requests to withdraw, drop, add or enroll for courses in a term that has ended must be submitted on a separate form to the Revision of Records Committee, c/o the Office of the University Registrar, 130 Jesse Hall.
 4. Generally, grounds for consideration of an appeal will be restricted to those circumstances personally experienced by the enrolled student with whom the University has a direct relationship.
 5. Decisions will be rendered by the designated official of the Office of the University Registrar and will be based solely upon any and all pertinent written documentation.
 6. Notification of the status of the tuition appeal will be made in writing within 10 calendar days of receipt of the written appeal.

Appeal of the decision rendered by the Office of the University Registrar

1. Upon written request a student may appeal the decision rendered by the Office of the University Registrar.
2. A written appeal must be submitted to the Office of the University Registrar.
3. The written appeal must request a review of the original decision and may contain additional written documentation to support the appeal.
4. The appeal will be reviewed by the same designated official. If the appeal information is sufficient to overturn the original decision, the designated Office of the University Registrar official can direct staff to issue a tuition refund or adjustment in accordance with appropriate fiscal procedures.

If denied within 10 calendar days of receipt, the information must be forwarded to the University Registrar. If the appeal is denied a second time by the University Registrar, it may be forwarded to the vice provost for enrollment management for further consideration, upon the student's request.

The decision rendered by the vice provost for enrollment management is the final University determination on the matter.

Refund of tuition and fees in the event of a student death

1. When a student dies prior to completing the current academic semester, a full refund of or credit for tuition and required fees will be made after the deduction of the following:

- a. Any required adjustments to scholarships, grants or loans determined by federal formula applied by the Office of Student Financial Aid.
 - b. Any other debts owed to the University that occurred prior to the death of the student.
2. Any refund will be made payable to the student.
 3. If, after all adjustments are made, there still remains a debt to the University, generally the University would not attempt to recover the debt from the estate of the deceased student.

Students called to active military duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

Students called to jury duty

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

Residency (L)

The School of Law residence rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student's course load -- the number of hours a student enrolls for in a given semester -- and residency rules -- are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Students who plan to attend summer school for two years and graduate a semester earlier, should visit with the Associate Dean for Academic Affairs concerning their summer course loads.

For residency purposes a minimum load of twelve hours is required for a semester. For purposes of accelerated graduation, minimum residency hours for a summer session are five if combined with another summer session of no less than seven hours. Two summer sessions of six hours each serve the same purpose. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation but may be combined with an appropriate number of hours in a regular semester in order to fulfill a twelve hour semester residency requirement.

Students completing more than twelve hours in a semester may not use surplus hours over twelve toward residency in any other session; hence the three surplus hours from a fifteen hour semester cannot be added to a subsequent nine hour semester to give residency for two semesters. On the other hand, a nine hour semester can be combined with a three hour summer session to give residence for one semester.

In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

Revision of Records

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their adviser before appealing to the committee to verify that changes are warranted and will benefit the student.

Instructions for completing petition to the committee

Students must:

- Obtain forms from the appropriate school or college advising office and discuss their case with their adviser.
- Complete the forms, being as thorough and specific as possible. You must sign and date the petition(s).
- Leave the petition with the class instructor, who will forward it to the department chairperson. The chairperson will return it to the dean's office, which will send it to the Office of the University Registrar. Signatures of the instructor, department chairperson and dean *must* be obtained before the committee will consider the petition.
- Provide specific dates if requesting to backdate a withdrawal from the University. A separate form is required for each class.
- Supply documentation or evidence to support the petition. For example, if a student has a medical justification, please supply the medical certification form. Obtain forms from the academic units.

General guidelines

- The committee cannot change a grade given by an instructor. If a student disagrees with a grade, they must contact their instructor and then follow the appropriate appeals process. An instructor cannot change a letter grade to "W" unless a withdrawal has been approved.
- If the committee approves a requested change and additional charges apply, payment must be made before the transcript changes.
- The committee reviews all complete petitions, and its decisions are based on the information presented. Decisions are communicated in writing to the student. If the petition is approved, a transcript reflecting any changes will be included.
- The committee cannot grant refund appeals. Students must complete a refund appeal form (PDF) (<http://registrar.missouri.edu/forms/fee-adjustment-appeal-form.pdf>).

The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to Victor Price at PriceV@missouri.edu.

Student Conduct (L)

The academic life of students at the MU School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at <http://www.law.missouri.edu/students/policies/conduct.html>.

Incidents involving bias or harassment can be reported through the MU Equity Office. Information is available at <http://equity.missouri.edu/bias-reporting/>.

Student Employment (L)

In December 1998 the American Bar Association Section of Legal Education Accreditation Committee requested the Law School establish a faculty approved policy on student employment in accordance with Standard 304(c) of the ABA Standards for the Accreditation of Law Schools. At its meeting on February 16, 1999, the Faculty of Law adopted the following policy which mirrors the ABA requirement:

"The Law School shall not award full-time residence credit to a student who does not devote substantially all of the student's working hours to the study of law or engages in employment for more than 20 hours per week, whether outside or inside the Law School."

Further, the faculty acknowledged ABA Interpretation 304-7 which requires that:

"a law school shall demonstrate that it has adopted and enforces policies ensuring that individuals enrolled as full-time students devote substantially all working hours to the study of law including the implementation of policies relating to...limitation on employment..."

This memo serves as notice to the entire Law School community of the policy, with the expectation that it will be followed. The enforcement of this policy will be undertaken as follows:

For all law students who are employed by the School of Law in any capacity, including research assistant or other part-time student employment, the School of Law cannot process for payment time sheets which indicate more than 20 hours per week of work. Law School faculty and staff are not authorized to permit or require law student employees to work more than 20 hours per week.

The 20-hour rule does not apply to the period of time between semesters, or the summer (unless the student is enrolled full-time in law school,) or spring and fall breaks.

Student Files (V)

The following policy relates to compliance with the Family Educational Rights and Privacy Act Amendment to the Elementary and Secondary Education Act of 1974:

(1) Each student requesting permission to examine his/her file will be referred to the Associate Dean for Academic Affairs or his or her designate.

(2) Each student must provide proof of:

a. Current student status at the University of Missouri (or, if during an academic recess, attendance during the past academic session).

b. Identity. They must provide some identification which allows visual comparison of person's appearance with a photograph on an item such as a driver's license or student identification card.

(3) If the above conditions are met and permission is granted, a student will be allowed to examine their entire student record. This must be

affected only in an office occupied by one of the assistants in the Dean's Office.

(4) Copies of any item in the student's folder except for transcripts or letters of recommendation and/or evaluation will be provided at cost. In such cases the sum of 25 cents per page must be collected before any copies are provided.

(5) A student must not, under any circumstances, be left alone with the folder.

(6) A record will be placed in the student's folder stating the date and time that such examination occurred. It should be initialed and dated by the Associate Dean for Academic Affairs or his or her designate. (CVM Executive Committee, 1986)

Student Level (U)

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

Class	Credits
Freshman	0 to 29 credits
Sophomore	30 to 59 credits
Junior	60 to 89 credits
Senior	90 or more credits

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen, non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated Colleges and Universities as well as those from other colleges and universities.

Testing Out of Courses (V)

For professional courses cross-listed as undergraduate or graduate courses, students may opt out of the course during the professional curriculum if the following conditions are met. The student took the course within three years, received an A or B in a course, and received instructor permission to waive the course.

Veterinary students are charged a flat rate per academic semester and testing out of a course will not result in a prorated tuition rate.

Theses and Dissertations: Submission Deadline, Review and Public Disclosure (G)

Formatting the Thesis

A thesis, when required for a master's program, must be written on a subject approved by the candidate's advisory committee. The thesis must be the student's own work and must demonstrate a capacity for research and independent thought. Refer to the Master's Degree section for details.

Thesis formatting guidelines may be found at <http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/>. Students must follow the style manual recommended by their academic program.

All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

Formatting the Dissertation

A dissertation is required for all doctoral programs and must be written on a subject approved by the candidate's advisory committee. The dissertation must include the results of original and significant investigation, and it must be the candidate's own work. Refer to the Doctoral Degree section for details.

Dissertation formatting guidelines may be found at <http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/>. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

About Third-Party Copyright

If your work contains material that has been copyrighted by another party, you may need to seek permission to use the material in your thesis or dissertation. Examples of materials for which you would need to seek copyright permission include but are not limited to: third-party software, images, graphics, large portions of text and maps. If copyright permission is needed, you must submit written approval for the use of the copyrighted material along with your thesis or dissertation.

Substituting for Copyrighted Materials in Theses and Dissertations

The Graduate School encourages students to seek permission to use copyrighted material in their theses and dissertations. Your work is published after it is submitted in approved form to the Graduate School, and it will be available to audiences who wish to know more about the subject you investigate. The more full and complete the thesis or dissertation, the better the experience for your reader and therefore the better the response to the fruits of your hard work. However, if you are unable or unwilling to obtain copyright permission for some of the materials in your research, you may substitute for the copyrighted material as described below.

Acceptable substitutions include:

- Redrawing or tracing of maps, images, graphics, etc
- References to URLs, printed documents, or physical locations where the copyrighted material can be found

A student whose thesis or dissertation has had copyrighted material removed prior to submission must have his or her adviser sign a document reading:

[Student's name] has removed copyrighted material from the copy of the thesis or dissertation submitted to the Graduate School for electronic publication. I certify that:

- I approve the thesis or dissertation in this form;
- The student has presented accurate information as to where the removed, copyrighted material can be found

Adviser's name (signature line) Date (date line)

Submission Deadline for a Thesis or Dissertation Following Committee Approval

Each semester the Graduate School establishes semester deadlines for the Report of the Examining Committee (master's & EdS students), Report Dissertation Defense (doctoral students), and submission of theses, dissertations and supplemental materials. Those deadlines may be found on the Graduate School's page.

<http://gradschool.missouri.edu/about/news-events/events/index.php>

After successful defense of the thesis or dissertation, students must comply with their academic program's and/or the International Center's enrollment requirements.

Generally, based upon input from the thesis/dissertation committee, a student will make corrections to a thesis/dissertation. The student will prepare the final document and supplemental materials in the required format (<http://gradschool.missouri.edu/policies/thesis-dissertation>) and submit everything to the Graduate School by the semester deadline. In the event the student misses the current semester deadline, the student is required to submit the final dissertation or thesis by the end of the following semester after a successful defense. If an extension is needed, the student's advisor and program's DGS must submit a request for an extension letter to the Graduate School Dean.

Submission Requirements and Forms

A thesis or dissertation must be presented before the deadline to the MU Graduate School on a high-quality CD. The thesis or dissertation must be contained in a Portable Document Format (PDF) file (<http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/technology-ch7.php>), with the appropriate margins and formatting. For the 2009-2010 academic year, the CD must be readable on a standard PC running Windows XP. Additional electronic files must be included (<http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/supplements-cd-ch4.php>) on the CD as PDF documents with the appropriate file name. If all files will not fit on one CD, a DVD or multiple CDs may be used, as long as no single file is split between CDs.

Paper Documents that Accompany the Electronic Submission

Several paper documents must be submitted with the CD, including the original signed Approval of the Committee page, paper copies of the Short Academic Abstract and Title Page, fees forms, release forms, and copyright agreement forms. See <http://gradschool.missouri.edu/academics/thesis-dissertation/diss-thesis-guideline/supplemental-paper-materials/index.php> for more information.

Review of Theses and Dissertations by the Graduate School

Before a manuscript can be accepted for publication in scholarly journals, it is examined by editorial board members, for conformance to specific format style guidelines in addition to validity of content. In much the same manner, MU Graduate School staff, acting as an editorial board, reviews every submitted thesis and dissertation for conformance to University guidelines. Failure to meet the appropriate standards will result in the rejection of your work.

Copies of Theses and Dissertations

The MU library catalogs all thesis and dissertations in the Merlin system. To locate a thesis or dissertation go to the Merlin search engine. Theses and Dissertations submitted Fall 2004 and later are available electronically from the MU Graduate School's searchable Thesis and Dissertation Archive.

Specific Questions about MU Theses or Dissertations?

Specific questions should be directed to the academic advising staff of the MU Graduate School, 210 Jesse Hall, (573) 882-9575 or (573) 882-3885 or 1-800-877-6312.

Thesis and Dissertation Research Must be Open to Public Disclosure

Students are prohibited from using research (data, results, methods or other content) in their theses or dissertations that could restrict subsequent publication or public disclosure of these documents.

Examples of restricted information include classified or proprietary materials. It is important to note that these restrictions do not apply to non-thesis or non-dissertation research that is approved by the student's adviser and allowed by University of Missouri policies. Questions regarding the applicability of this policy to thesis or dissertation content should be referred to the MU Graduate School.

Transfer Admission from Other AVMA Accredited Schools (V)

Transfer students entering in the professional curriculum from other AVMA accredited veterinary schools: applications will be referred to the Committee on Admissions and Scholarship for recommendation to the Dean. Each case shall be handled on an individual basis. (CVM Executive Committee, 1986)

Transfer Credit and Degree Applicability

- Transfer from a Regionally Accredited Missouri College (p. 728)
- Transfer from a Community College (p. 728)
- Transfer Within the UM Systems (p. 728)
- Military Transfer Credits (p. 729)
- Transfer Students and University General Education Requirements (p. 729)

Credits and Transfers

After students are admitted to the University of Missouri (MU), an admissions evaluator will evaluate whether any college credit earned elsewhere is transferable to MU. Coursework being transferred from schools outside of Missouri may need faculty review, which can delay the evaluation process.

- Advanced Placement (<http://admissions.missouri.edu/apply/ap-ib-and-college-credits/advanced-placement-program.php>) credit is only awarded based on official score reports sent to MU directly from the College Board, and not based on scores reported on transcripts.

- Dual credit (<http://admissions.missouri.edu/apply/ap-ib-and-college-credits/dual-credit.php>) must be evaluated by Admissions prior to being awarded.
- All courses transferring from community colleges will transfer as lower-division credit.
- For details on course equivalencies for most school in Missouri and for select out-of-state institutions, check MU's transfer course equivalencies which can be accessed from the myZou log-in page (<http://myzou.missouri.edu>) and then clicking on Transfer Course Equivalency. Students interested in seeing how transfer courses might apply toward MU degree requirements can go online to [transfer.org](https://www.transfer.org) (<https://www.transfer.org/uselect/login.htm>) to enter course data, review equivalencies, and produce an unofficial degree audit.
- The Mizzou Connection Program (<http://admissions.missouri.edu/apply/transfer/mizzou-connection>) is available for students wishing to transfer from Moberly Area Community College of MU.
- Advanced standing credit in a foreign language awarded by previous institutions will not transfer to MU. It can be requested after you have successfully completed a course at MU at or above that level.
- Military veterans may be awarded some credit if they meet certain criteria (<http://admissions.missouri.edu/documents/military-credit.pdf>).

Generally, coursework completed at a regionally accredited institution and oriented toward a baccalaureate degree will be accepted if each grade is C or better. Generally, the following types of credit are exceptions that are excluded from transferable courses: Technical, vocation or remedial courses; Courses not intended for a baccalaureate degree and/or terminal vocational degree or certificate program; Courses from non-regionally accredited institutions, though there is an appeal process.

Questions should be directed to the MU Office of Admissions (<http://admissions.missouri.edu>).

Transfer from a Regionally Accredited Missouri College

Students may transfer more than 64 credit hours of lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's policy.

Transfer from a Community College

Community college courses can only have transferable equivalents at the 1000 or 2000 level. At no time can a community college course be the equivalent of a University of Missouri-Columbia course of 3000 or greater.

If a 2000 level course title from a community college is similar to a 3000 level title on this campus, that course can be an elective in that department at the 2000 level. Individual schools and colleges can waive the requirement for a student to take a course with similar or same title on this campus, however there will be no direct transfer equivalency.

If a college or department wants to accept a course from a community college as an equivalency to a course numbered 3000 or greater, they need to give that course a new number of less than 3000.

Courses from a community college can account for six of the last 36 credits, but only for students who have general education or other 1000-2000 level courses remaining for their degree. (The University is not

prohibited from accepting community college credit for juniors and seniors if it is at the 1000-2000 level.)

Students may transfer more than 64 credit hours for lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's Handbook.

For additional information, contact the college or school from which the degree is sought or see Credits and Transfers (<http://admissions.missouri.edu/apply/transfer/credits-and-transfers.php>) information from the MU Office of Admissions (<http://admissions.missouri.edu>).

Articulation Agreements

Contact departmental advisors for information on articulation programs and agreements.

Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student's lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University.

Students transferring to MU from a regionally-accredited Missouri college or university with an AA degree and a certified 2.0 GPA will be accepted with junior standing. They will also have completed lower-division, general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally-approved, general-education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU, but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in this catalog on the degree specific pages. Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

Associate of Science Degree

An Associate of Science degree (AS) is a specialized degree intended for transfer into a specific, preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional, general-education courses.

Students without Associate Degrees

Students transferring without associate degrees must meet regular MU transfer admission standards.

Transfer within the UM System

Students may transfer among campuses within the University of Missouri System. University of Missouri Policy states that "Any course that leads to an undergraduate degree on any campus of the University of Missouri

shall be accepted in transfer toward the same degree on each campus of the University offering said degree." Students transferring within the UM system are still required to satisfy the course and residency requirements of the campus from which they wish to graduate. Grades, including D and F grades, and grade points earned will also transfer and be included in the cumulative UM grade-point-average.

For more information contact the following offices:

University of Missouri - Columbia, Office of Admissions, 800-225-6075, mu4u@missouri.edu (%20mu4u@missouri.edu)

University of Missouri - Kansas City, Registration & Records Office, 816-235-1125, registrar@umkc.edu (%20registrar@umkc.edu)

Missouri University of Science and Technology, Registrar's Office, 573-341-4181, registrar@mst.edu

University of Missouri - St. Louis, Office of the Registrar, 314-516-5545, registration@umsl.edu

Military Transfer Credits

Military veterans, with at least two years of honorable service are allowed to transfer military course credit. The transcript coursework must have been accredited by the American Council of Education (ACE). Veterans are advised to contact University Admissions regarding specific transfer credit policies. An exception to current transfer credit policies is that military veterans be allowed a maximum of 9 hours credit as general electives. This policy began with military veterans enrolled for the Fall 2010 semester.

Transfer Students and University General Education Requirements

All University, general-education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University, general-education requirement. However, the reverse is not true. Departments or academic units may not have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet University, general-education requirements and prepare for many of the more specific foundation courses required by their field of study.

Transfer Credit (L)

Credit Earned at Other Law Schools

A student may earn credits at another law school to be applied toward the JD graduation requirements of MU School of Law, on the following conditions:

1. No more than 31 semester credits may be so applied. Grades in courses taken at other law schools are reflected in the transcript. However, those grades do not calculate in the student's grade point average.
2. The law school at which the credits are earned must be, at the time of the student's work there, approved by the American Bar Association.

3. The Associate Dean for Academic Affairs must approve, in advance of the student's work, the particular law school and the course of study the student will pursue there.

Credit Toward LL.M. Requirements for Non-Law Courses/Transfer Credit

With approval of the Director of the LL.M. Program, students may apply to the LL.M. graduation requirements up to six (6) graduate credits of university or college courses from outside the MU School of Law. This limit includes independent study courses supervised by faculty in units other than the School of Law. Credit toward the LL.M. degree for a non-law school course will be granted only under the following conditions:

- The course must be a graduate-level course and clearly marked as such on the transfer transcript complete with credit hours and a grade. If taken at the University of Missouri-Columbia, it must be numbered 5000 or above.
- The transfer coursework is from a regionally accredited institution in the U.S. or an overseas institution that is recognized by its country's Ministry of Education as a graduate degree-granting institution.
- The course must involve at least 14 class-hours per credit (based on 50-minute class-hours).
- The course must be related to the student's program of study. Students must submit a copy of the course syllabus if possible.
- The semester hours of the non-law school course will be counted in the student's total number for the semester.
- The grade must be B or higher.
- The transfer coursework is not online, extension or correspondence credit.

Normally, the Director of the LL.M. Program must approve the course in advance of the student's work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment in the LL.M. Program if the credits were for work closely related to the student's work in the LL.M. Program and were taken for graduate credit. Credits will not be applied from the student's J.D. degree program or equivalent. A written request must be submitted to the Director of the LL.M. Program and include the following:

- (a) Institution, course name, number, and instructor;
- (b) Description how the course relates to the student's program of study.

MU Course Work Required

MU requires that 30 of a student's last 36 credits must be MU course work. Mizzou Online-Self Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online. (NOTE: This policy has replaced the requirement for courses to be taken "in residence.")

Visiting Graduate Student Program (G)

Effective Fall 2011, the UM Visiting Graduate Student Program replaces the UM Traveling Scholars Program. The UM Visiting Graduate Student Program offers eligible graduate students a streamlined process for applying and registering for graduate courses on other UM campuses. To participate in the UM System Visiting Graduate Student Program,

a graduate student must be a degree-seeking graduate student and in good-standing on the **home** campus and **host** campus.

To apply for this program, a “UM System Visiting Graduate Student Application (<http://gradschool.missouri.edu/forms-downloads/repository/um-system-visiting-graduate-student-application.pdf>)” should be completed and submitted to the **home** campus Graduate office for certification, at least two weeks before the beginning of the semester. The graduate student’s **home** campus Graduate office will review the form; if approved, the **home** campus Graduate office will transmit the approved form to the **host** campus Graduate office. The **host** campus will notify the student when they are eligible to register for courses.

All course fees are paid to the **host** campus. Graduate students should contact their **home** campus Financial Aid office for more information on financial aid.

International (non-U.S. citizen) students should consult the International student office on their **home** campus to determine eligibility for this program.

Important Points:

- No application fee is required for this program.
- The **home** campus determines maximum enrollment requirements and the transferability of courses taken at other UM campuses. At MU, all courses taken in UM Visiting Graduate Student Program will be considered “transfer courses” and are subject to MU’s graduate course transfer policies.
- Visiting UM Graduate Students are subject all **host** campus registration requirements and restrictions.
- To officially transfer courses from the host campus to the **home** campus, students must order an official transcript from the **host** campus and comply with the home campus’s transfer policies and processes.

Withdrawing from a Course

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as “withdrawing” from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic advising unit, the student takes the form for processing to the Office of the University Registrar, 125 Jesse Hall. See Academic Policies: Grades (p. 713) for more information on withdrawing from a course

NOTE: Students may not withdraw from all courses or their last course via myZou after the tenth day prior to the start of the semester or term. This must be done in the academic advising unit.

Withdraw from the University

From the Term

A student who wishes to withdraw from the Term (University) must process the appropriate Term Withdraw Form (<http://registrar.missouri.edu/policies/withdrawal-university.php>) (PDF). Dropping all classes is considered a withdrawal from the Term (University) and must be initiated in the student’s academic school or college and completed prior to the last day the class meets, by the last day to withdraw from the term or prior to completing the final in a self-paced course.

Withdrawal forms will normally be dated according to the date the request was first received with the following exception: When health or other critical circumstances constitute the reason for withdrawal, the dean may designate an earlier date to which academic rules will apply.

Withdraw from the University (L)

Formal withdrawal from MU is arranged through the Graduate School using a Notice of Withdrawal form that is signed by the Director of the LL.M. Program and the Dean of the Graduate School. If the student is making a C or better at withdrawal time, a grade of W is recorded. If the student is doing failing work at withdrawal time, a grade of F is recorded. Students are responsible for notifying their instructors of their intention to withdraw and for determining if their work qualifies for a W grade. Students who leave MU without filing a statement of formal withdrawal are given a grade of F in all courses. If the reason is so urgent that an official withdrawal cannot be obtained, the student should notify the LL.M. Program as soon as possible and officially request to be withdrawn.

Withdraw from the University (V)

An individual will be withdrawn from the university if they drop prior to the 2nd block of classes held during that semester. If the withdrawal occurs during the first three weeks of the first block of the semester, all courses are “dropped” and will be removed from the transcript. No grades will be assigned. If the withdraw occurs during the first block but after the first 3 weeks the student will be withdrawn from the courses and grades of W or F will appear on the transcript. A notice of withdrawal form may be used for this purpose and individual classes do not have to be detailed on an Add/Drop form.

If the student completes the first block of courses and then subsequently is either dismissed or chooses to not continue in the remaining enrollment blocks the student will not be withdrawn from the university but instead will be either dropped or withdrawn from individual courses depending on when during the block the student chooses to drop.

Example 1:

Student A completes Block 1 and is dismissed from the university. The courses from Block 1 will remain on the transcript with grades but the student will be dropped from all subsequent terms since the student never attended those courses. The courses for the remaining blocks will be removed from her record, i.e. dropped.

Example 2:

Student B completes Block 1 and in the 4th week of Block 2 becomes ill and needs to withdraw. The courses from Block 1 will be posted with the grades she earned. The courses from Block 2 will also remain on the transcript with grades of either W or F.

Example 3:

Student C does not enroll in any courses for Block 1. During the first week of the 2nd block the student decides to withdraw. The student would be withdrawn from the university and because the withdraw occurred within the first 3 weeks of the first block in which she was enrolled the courses would be dropped and therefore be removed from the transcript.

Course Numbering System

Course	Number	Description
Basic skills courses	0000-0999	Courses that do not count toward degree requirements- primarily used for skill development.
Freshmen-level courses	1000-1999	Entry-level courses that have only skill development courses for course prerequisites. (Test scores, etc. are acceptable prerequisites.) Considered lower-division. Community college courses will be considered equivalent to this level.
Sophomore-level courses	2000-2999	Intended primarily for second-year or sophomore students who have the essential prerequisites or background. Considered lower-division. Community College courses will be considered equivalent to this level as well.
Junior/Senior-level courses (Upper Division)	3000-3999	Upper-division courses that may NOT be listed as cross level with 5000-8999. Intended primarily for third and fourth-year (juniors and seniors) students who have the essential prerequisites or background. Often restricted to students admitted to junior-level entry degree programs.
Junior/Senior-level courses (Upper Division)	4000-4999	Upper-division courses that may be listed as cross level with 5000-7999. Intended primarily for juniors and seniors. Note special sub-ranges for capstone, research and departmental honors courses.

Undergraduate Research courses	4950-4959	Upper-division, undergraduate research courses
Capstone courses	4970-4990	
Capstone/Honor courses	4991	Courses that are both capstone and departmental honors courses
Capstone/Reading courses	4992	
Capstone/Internship courses	4993	
Capstone/Research courses	4994	
Extended Research & Departmental Honors course	4995	Multiple term duration courses based on research
Departmental Honors courses	4996-4999	Used only for departmental honors courses. Include Dept. Honors in title or course description. No "H" is listed after the catalog number.
Professional-level courses	5000-6999	Professional-level courses for Law, Vet. Med and Medicine. Generally, not for undergraduate credit. May be listed as cross-level with 4000- 4999 courses.
Beginning Graduate courses	7000-7999	Graduate-level courses for beginning and mid-level graduate students primarily. Generally not for undergraduate credit, but may be listed as cross-level with 4000-4999 courses.
Mid-level Graduate courses	8000-8999	Graduate-level courses intended primarily for mid-and upper-level graduate students. Not for undergraduate credit. May not be listed as cross-level with 4000-4999 courses.
Upper-level Graduate courses	9000-9999	Graduate-level courses intended primarily for upper-level graduate students. Not for undergraduate credit. May not be listed as cross-level with 4000-4999 courses.

"H" after a number indicates that it is an Honors course, approved by the Honors College for use toward Honors Certificate or University Honors. Not applicable to courses only designated for departmental honors.

Undergraduate Topics Courses

Final two digits represent the distribution category within the University requirements.

Distribution Category	Description
01	General
02	Biological/physical/mathematical sciences
03	Behavioral sciences
04	Social sciences
05	Humanities

Guidelines for Cross-Listed and Cross-Level Courses *

* Approved by Faculty Council February 13, 2003

Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content, with matching course descriptions.

Cross-Listed Courses *must*:

- Be at the same level
- Cover the same content

Cross-Listed Courses *may*:

- Meet different general education requirements (i.e. social science for one and humanities for another)
- Not have the exact same number, but it is preferred that they do
- Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There are limits on enrollment and space may not be available in the non-fee course or section.
- Exceptions: Fine art and music "skills" classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Cross-Level Courses:

- Only 4000 and 7000-level courses may be cross-level listed.
- The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.

Courses that are not cross-level may not meet in the same room at the same time or near each other at the same time so that they attempt to "get around" this rule.

Curriculum Designator Abbreviations

The abbreviations listed below are used in course descriptions. They may be called Curriculum Designators.

Designator	Subject Area	Academic Unit

Glossary

Below are definitions of academic terms used throughout the University catalog. Additional terms used at MU can be found in the Mizzou Glossary. (<http://glossary.missouri.edu>)

Academic Action: Students who do not meet requirements for University academic standing requirements are subject to academic action, such as being placed on probation or being declared ineligible to enroll, which is often called dismissal. NOTE: Academic units may have more restrictive standards. (Also refer to Academic Standing and Satisfactory Progress for additional policy information.)

Academic Plan: A primary field of specialized study also referred to as a degree program or major.

Academic Program: The academic organization to which a student applies, is admitted, and ultimately graduates. These will, in most cases, correspond to schools and colleges.

Academic Progress for Financial Aid: Federal regulations require the University of Missouri to establish, publish, and apply standards of satisfactory academic progress (SAP) for financial aid eligibility. For detailed criteria, please visit Student Financial Aid's website (<http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php>).

Academic Standing: For further information see, Academic Policies: Academic Standing (p. 703).

Academic Sub-plan: An emphasis area or concentration within a specific academic plan.

Academic Unit: Colleges and schools are approved to offer degree programs or oversee degree or non-degree programs approved by the state Coordinating Board of Higher Education. Because the organization of these units varies across the campus, these entities are referred to as academic units, or AUs for short.

Applied Course: A course that is focused on the personal practice of the subject matter. Applied courses are typically found in music, art, and courses preparing for certain vocations.

Audit: A method of taking a course in which a student receives no grade or credit. Sometimes referred to as Hearer. See Academic Policies: Auditing a Course (Hearer (p. 704)).

Basic Skills Courses: Basic skills courses are considered remedial or preparatory for college level course work that follows. Credit hours for basic skills courses do apply toward minimums required for financial aid and grades earned in these courses show on the transcript and are averaged into the cumulative grade point average. However, credit hours earned in basic skills courses do NOT apply to the minimum number of hours required for a degree.

Capstone Experience: An academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field.

Certificate: A program of study that requires completion of a minimum of 12 credits. It can be part of a degree program, may be completed in addition to a degree program, or may stand-alone. Officially approved Certificates are listed on transcripts.

Commencement: A ceremony in which students are recognized for degree completion. In May and December, each MU school and college holds commencement ceremonies for graduates, during which students walk across the stage and are recognized individually. Ceremonies are not held for summer session graduates; however, these students are invited to participate in May or December commencements.

Consent Required: Courses that require the permission of the instructor, department or division. Also referred to as permission required.

Corequisite: A course or requirement that must be met prior to or concurrent with enrolling in a course. Exceptions may be made with permissions.

Core Requirements: The basic, required courses or standards that students must meet for a given major, degree, minor, emphasis or concentration.

Course Components: A portion or part, (i.e. subset) of a course.

- **Lecture/Standard (LST):** Faculty delivered instruction to multiple students often in, but not always, a classroom setting. A lecture or standard class is the primary portion of the course that is often delivered face to face, but does not have to be. It may be presented on-line or via other delivery methods. While it is usually presented in a small or large group setting led by a faculty member the course might also be very interactive and include group activities. It may be offered in a traditional lecture format, a seminar format, sections with group interaction, etc.
- **Discussion (DIS):** A small group that meets to discuss topics introduced in a related lecture to supplement the instruction and allow for discussion.
- **Lab (LAB):** A class or the "practice" portion of a course in which experimentation, class projects or other exercises or skills conjunction with material presented, are performed.
- **Individual Study (IST):** One-on-one instruction allowing for greater individualized learning and self direction. Individual study may be directed studies that are based upon an agreed upon topic between instructor and student. Titles may include but are not limited to research, problems and readings.
- **Lesson (LES):** Typically a musical or other performance art instruction delivered one-on-one or in a small group.
- **Studio (STU):** Hands-on, interactive, project-oriented instruction that is delivered one-on-one or in a small group. May apply to art, architectural studies, textile and apparel management, broadcast media, film creation, and communication instruction.
- **Exam-only (EXM):** Graduate student enrollment required to complete the final, comprehensive examination.
- **Internship/Externship (IXT):** Provides opportunity for students to gain experience in their field outside the classroom. Instruction is hands-on, experimental learning that may require additional research and written assignments. Titles may include, but are not limited to, preceptorships, clinical, practicums.
- **Field Study (FLD):** Off-campus, hands-on instruction directed by a faculty member with one or more students. Typically part of science and social science, as well as some humanities instruction.

Credit by Exam: Credit earned by passing advanced-standing examinations in a subject-matter field. Examinations can include: departmental exams, CLEP subject-matter exams and International Baccalaureate and Advance Placement exams given by the College

Entrance Examination Board of Princeton, N.J. See Academic Policies: Advanced Standing - Credit By Exam. (p. 703)

Credit: One credit represents approximately three hours of a student's time each week for one semester. This may mean one hour in lecture or standard classroom instruction, in addition to two hours spent in preparation. According to State of Missouri policy, a credit hour is a permanently transcribed instructional activity in which one semester credit hour shall consist of a minimum of 750 minutes (for example, 15 weeks x 50 minutes per week) of classroom experiences, such as lecture, discussion, or similar instructional approaches, or a minimum of 1,500 minutes of such experiences as laboratory, studio or equivalent experiences. Both of the above are exclusive of registration and final examination time. Greater amounts of supervised practicum or internship instruction are normally required to be the equivalent of one credit. (Also referred to as Units.)

Cross-level Course: A cross-level course is a course offered at both the undergraduate and the graduate level. Undergraduate students enroll in a course numbered in the 4000 range and graduate students enroll in a course numbered in the 7000 range. Lectures and discussions may be held jointly, but different graduate level work will be required of students in the 7000-level courses. (They are also referred to as combined sections.)

Cross-listed Course: A course that is considered the same as, and often may meet with a section of, another course with a different curricular abbreviation and possibly a different course number. (They are also referred to as combined sections.)

Curriculum: An organized program of study arranged to provide integrated cultural or professional education.

Curriculum Designator (Subject Area): A specific area of instruction within an academic organization. These are the subject matter headings that appear in the Course Catalog and the Schedule of Classes.

Dean's Signature: The dean's signature is the mark of approval for certain academic actions, such as approvals to withdraw at certain points in the term. Usually a "dean's signature" refers to a stamped signature from the academic advising office within the academic unit. A dean's signature may also be the signature of the dean or associate dean of the college or school. When instructions indicate that a student should obtain a dean's signature for approval of a process, students should first inquire in the academic advising office for their degree program.

Degree: A formal award or title conferred upon an individual for the completion of a program or courses of study.

Degree Audit Report: MU uses a degree audit system called DARS for short, which tracks degree programs. Many academic units and departments use these reports to assist in advising students. Students may look at their own DARS reports using myZou.

Degree Program: A primary field of specialized study also referred to as a major or academic plan.

Discipline: A branch of learning or field of study (e.g., mathematics, history or psychology).

Dual Degree (undergraduate): A student may be granted two baccalaureate degrees if all requirements for both degrees have been met and the student has completed at least 12 semester hours of course work beyond that required for the first degree. See Faculty Handbook (<http://facultycouncil.missouri.edu/handbook/article-9.html>)

Emphasis Area: A sub-area of specialized study within a major that has been formally approved. Emphasis areas are printed on students' transcripts.

General Education (University): The MU Faculty has developed a comprehensive program of University general education course work that equips students with the skills, knowledge and foundations in the disciplines required of all informed citizens. All MU students must satisfy University general education requirements as a part of their undergraduate degrees. See General Education Requirements. (p. 18)

GPA of Record: The GPA stands for grade point average. A GPA of record is the official GPA. See Academic Policies: Grades. (p. 713)

Graded Course: A course in which credit is awarded if successfully completed. A course in which a student has enrolled as a "Hearer/Auditor" is not regarded as a graded course for that student.

Grading Basis: The grading system used to assign a grade. See Academic Policies: Grades (p. 713).

Graduation: Graduation is the completion of all degree requirements, as recorded on the official transcript, and the conferring of a diploma.

Honors Course-Departmental: See Academics at MU: Course Numbering section (p. 731). Catalog number is not followed by an "H".

Honors Course-General: A course limited to honors-eligible students. Course has been approved by Honors college for use towards Honors Certificate or University Honors. Catalog number is followed by an "H".

Honors Eligibility: See Undergraduate/Graduate: Honors College (p. 679) for more information.

Instructional Mode: The dominant delivery method of instruction of the class content.

- **Traditional (TR):** No online technology used -- content is delivered in writing or orally. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.
- **Web Facilitated (WF):** Includes face-to-face instruction. Includes those courses in which zero to 29 percent of the content is delivered online. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.
- **Blended class instruction (BL):** Defined as having between 30 percent and 80 percent of the course content delivered online. It is sometimes called hybrid.
- **On-line (OL):** A course where most or all (80% or greater) of the content is delivered online. Typically these sections have no face-to-face meeting, but there may be some or face-to-face exams, etc.
- **E-Learning (EL):** A course where 100% of the content is delivered online. (May have proctored exams)

Interdisciplinary: A course of study that combines two or more academic disciplines.

Location: An indication of where a student is taking a course for billing and informational purposes.

Lower Division: Undergraduate courses numbered less than 3000.

Major: A primary field of specialized study also referred to as a degree program or academic plan..

Minor: A secondary field of specialized study that does not lead to a degree. A minor will be noted on the transcript by not on the diploma.

Mizzou Online: Mizzou Online partners with academic units to develop, market, and deliver programs and courses designed for distance students.

Mizzou Online-Self Paced: Students may enroll in self-paced, online courses year-round, (minimum six weeks, maximum nine months) and complete coursework at their own pace. Students with 60 or more approved credit hours may complete a bachelor of general studies degree online.

Mizzou Online-Semester Based: Semester-based courses have specific start and end dates and follow the University semester calendar. Students participate with other students and instructors in the courses and have assignment due dates and deadlines. Enrollment periods are the same as campus sections.

myZou: MU's online student information system.

Option: A track or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

Prerequisite: A course or requirement that must be met prior to enrolling in a course. Exceptions may be made with permissions.

Readmission: See Admissions Office (<http://admissions.missouri.edu/apply/re-admission>) for information on the readmission process and standards.

Recommended course: A course that is beneficial or preferred for the student to have taken before enrolling in a subsequent course. It is a strong suggestion, but not a requirement.

Registration: The act of enrolling in classes for a given semester or term. At the University of Missouri, registration refers to the process in which students select course work for a term and, reserve spaces (enroll) in the courses in the University's computer system. This may be done through myZou.

Repeat for Credit: Courses that may be taken more than once for credit (e.g., music performance courses.)

Satisfactory Progress towards degree: The time progression in meeting the requirements of the student's established educational objective, typically, the completion of a degree program. Satisfactory progress is based on two concepts:

- Minimum number of credits completed expressed as a percentage of total credits attempted
- Maximum time to complete the degree as expressed by a total number of credits attempted

The term may also refer to financial aid requirements. See *Financial Aid* (<http://financialaid.missouri.edu>).

Second Undergraduate Degree: Some academic units will admit students who have already earned one undergraduate degree to pursue a different degree program. Ordinarily students who enroll for a second degree are expected to meet requirements in place at the time of beginning work of the second degree instead of requirements in place at the beginning of work on the first degree.

Sequence of Courses: Two or three closely related courses that must be taken in specified order.

Session: A class scheduling/enrollment control time period within an academic term.

Student Center (myZou): The page in myZou where a student can view a synopsis of all their information. (i.e. schedule, service indicators, enrollment dates, financial information.)

Student Level: Students are assigned to a particular class level based upon the number of credits they have completed. (i.e. freshmen, sophomore, junior and senior.) See Academic Policies: Student Level (p. 726).

Track: An option or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

Upper Division: Undergraduate courses numbered 3000-4000.

Variable Credit (Units): For some courses, the student may choose the number of credits.

Waive: To waive a requirement is to set it aside without credit. In other words, if a requirement is waived for a student that student does not have to meet the requirement, but no credit hours are earned. For example, an international student pursuing a BA degree in the College or Arts and Science has the foreign language requirement waived but will not receive academic credit for his/her native language.

Course Offerings

- **A**
 - Accountancy (ACCTCY) (p. 740)
 - Aerospace Studies (AERO) (p. 745)
 - Agricultural Economics (AG_EC) (p. 746)
 - Agricultural Ed Leadership (AG_ED_LD) (p. 751)
 - Agricultural Systems Management (AG_S_M) (p. 755)
 - Agriculture, Food and Natural Resources (AFNR) (p. 758)
 - Anesthesiology (ANESTH) (p. 759)
 - Animal Science (AN_SCI) (p. 760)
 - Anthropology (ANTHRO) (p. 766)
 - Arabic (ARABIC) (p. 778)
 - Architectural Studies (ARCHST) (p. 778)
 - Art History And Archaeology (AR_H_A) (p. 785)
 - Art-Ceramics (ART_CERM) (p. 793)
 - Art-Drawing (ART_DRAW) (p. 794)
 - Art-Fibers (ART_FIBR) (p. 795)
 - Art-General (ART_GNRL) (p. 795)
 - Art-Graphic Design (ART_GRDN) (p. 798)
 - Art-Painting (ART_PNT) (p. 800)
 - Art-Photography (ART_PHOT) (p. 800)
 - Art-Printmaking (ART_PRNT) (p. 801)
 - Art-Sculpture (ART_SCUL) (p. 801)
 - Astronomy (ASTRON) (p. 802)
 - Athletic Training (ATHTRN) (p. 803)
 - Atmospheric Science (ATM_SC) (p. 805)
- **B**
 - Biochemistry (BIOCHM) (p. 808)
 - Biological Engineering (BIOL_EN) (p. 812)
 - Biological Sciences (BIO_SC) (p. 818)
 - Biomedical Sciences (BIOMED) (p. 827)
 - Black Studies (BL_STU) (p. 831)
 - Business Administration (BUS_AD) (p. 838)
- **C**
 - Cardiopulmonary Diagnostic Sciences (CPD) (p. 839)
 - Chemical Engineering (CH_ENG) (p. 840)
 - Chemistry (CHEM) (p. 844)
 - Child Health (CH_HTH) (p. 850)
 - Chinese (CHINSE) (p. 852)
 - Civil Engineering (CV_ENG) (p. 853)
 - Classical Humanities (CL_HUM) (p. 866)
 - Classics (CLASS) (p. 871)
 - Clinical Laboratory Sciences (CL_L_S) (p. 872)
 - Communication (COMMUN) (p. 874)
 - Communication Science And Disorders (C_S_D) (p. 880)
 - Computer Science (CMP_SC) (p. 884)
 -
- **D**
 - Dermatology (DERM) (p. 893)
 - Diagnostic Medical Ultrasound (DMU) (p. 894)
- **E**
 - Economics (ECONOM) (p. 897)
 - Education Honors (EDUC_H) (p. 905)
 - Educational Leadership and Policy Analysis (ED_LPA) (p. 905)
 - Educational, School and Counseling Psychology (ESC_PS) (p. 911)
 - Electrical And Computer Engineering (ECE) (p. 922)
 - Emergency Medicine (EMR_ME) (p. 934)
 - Engineering (ENGINR) (p. 935)
 - English (ENGLSH) (p. 936)
 - English Language Support Program (ELSP) (p. 954)
 - Environmental Science (ENV_SC) (p. 954)
 - Environmental Studies (ENV_ST) (p. 957)
- **F**
 - Family And Community Medicine (F_C_MD) (p. 957)
 - Film Studies (FILM_S) (p. 960)
 - Finance (FINANC) (p. 964)
 - Fisheries And Wildlife (F_W) (p. 968)
 - Food Science (F_S) (p. 973)
 - Forestry (FOREST) (p. 978)
 - French (FRENCH) (p. 982)
- **G**
 - General Human Environmental Sciences (GN_HES) (p. 988)
 - General Studies (G_STDY) (p. 988)
 - Geography (GEOG) (p. 988)
 - Geology (GEOL) (p. 995)
 - German (GERMAN) (p. 1002)
 - Graduate School (GRAD) (p. 1007)
 - Greek (GREEK) (p. 1008)
- **H**
 - Health Management and Informatics (HMI) (p. 1011)
 - Health Professions (HTH_PR) (p. 1013)
 - Health Sciences (HLTH_SCI) (p. 1014)
 - Hebrew (HEBREW) (p. 1016)
 - History (HIST) (p. 1016)
 - Honors-General (GN_HON) (p. 1033)
 - Hospitality Management (HSP_MGMT) (p. 1036)
 - Human Development And Family Studies (H_D_FS) (p. 1039)
- **I**
 - Industrial And Manufacturing Systems (IMSE) (p. 1051)
 - Information Science And Learning Technologies (IS_LT) (p. 1056)
 - Information Technology (INFOTC) (p. 1061)
 - Integrative Neuroscience (NEUROSCI) (p. 1063)
 - Interdisciplinary Studies (INTDSC) (p. 1063)
 - Internal Medicine (IN_MED) (p. 1064)

- International Studies (INTL_S) (p. 1067)
- Italian (ITAL) (p. 1067)
- **J**
- Japanese (JAPNSE) (p. 1069)
- Journalism (JOURN) (p. 1070)
- **K**
- Korean (KOREAN) (p. 1092)
- **L**
- Laboratory Animal Medicine (LAB_AN) (p. 1093)
- Latin (LATIN) (p. 1094)
- Law (LAW) (p. 1097)
- Learning, Teaching, Curriculum (LTC) (p. 1114)
- Learning, Teaching, Curriculum - Vocational (LTC_V) (p. 1134)
- Linguistics (LINGST) (p. 1137)
- **M**
- Management (MANGMT) (p. 1142)
- Marketing (MRKTNG) (p. 1150)
- Mathematics (MATH) (p. 1155)
- Mechanical And Aerospace Engineering (MAE) (p. 1166)
- Medical Pharmacology and Physiology (MPP) (p. 1176)
- Medicine-Interdisciplinary (MED_ID) (p. 1180)
- Microbiology (MICROB) (p. 1184)
- Military Science (MIL_SC) (p. 1186)
- MU Informatics Institute (INFOINST) (p. 1187)
- Music-Applied Music (MUS_APMS) (p. 1189)
- Music-Courses for Non-Majors (MUSIC_NM) (p. 1189)
- Music-Ensemble Courses (MUS_ENS) (p. 1191)
- Music-General (MUS_GENL) (p. 1192)
- Music-Instrumental And Vocal Repertory (MUS_I_VR) (p. 1194)
- Music-Instrumental And Vocal Techniques (MUS_I_VT) (p. 1195)
- Music-Music History And Literature (MUS_H_LI) (p. 1198)
- Music-Music Theory (MUS_THRY) (p. 1201)
- **N**
- Natural Resources (NAT_R) (p. 1205)
- Naval Science (NAVY) (p. 1207)
- Neurology (NEUROL) (p. 1208)
- Nuclear Engineering (NU_ENG) (p. 1209)
- Nuclear Medicine (NUCMED) (p. 1214)
- Nursing (NURSE) (p. 1216)
- Nutrition (NUTRIT) (p. 1224)
- Nutritional Sciences (NUTR_S) (p. 1225)
- **O**
- Obstetrics And Gynecology (OB_GYN) (p. 1230)
- Occupational Therapy (OC_THR) (p. 1232)
- Ophthalmology (OPHTH) (p. 1237)
- **P**
- Parks, Recreation, and Tourism (P_R_TR) (p. 1237)
- Pathology Anatomical Science (PTH_AS) (p. 1243)
- Peace Studies (PEA_ST) (p. 1248)
- Personal and Financial Planning (FINPLN) (p. 1254)
- Philosophy (PHIL) (p. 1258)
- Physical Medicine And Rehabilitation (PM_REH) (p. 1266)
- Physical Therapy (PH_THR) (p. 1266)
- Physics (PHYSCS) (p. 1270)
- Plant Science (PLNT_S) (p. 1278)
- Political Science (POL_SC) (p. 1285)
- Portuguese (PORT) (p. 1293)
- Psychiatry (PSCHTY) (p. 1294)
- Psychology (PSYCH) (p. 1294)
- Public Affairs (PUB_AF) (p. 1306)
- Public Health (P_HLTH) (p. 1311)
- **R**
- Radiologic Sciences (RA_SCI) (p. 1313)
- Radiology (RADIOL) (p. 1315)
- Religious Studies (REL_ST) (p. 1315)
- Respiratory Therapy (RS_THR) (p. 1324)
- Romance Languages (RM_LAN) (p. 1326)
- Rural Sociology (RU_SOC) (p. 1327)
- Russian (RUSS) (p. 1331)
- **S**
- Science and Agricultural Journalism (SCI_AG_J) (p. 1336)
- Social Work (SOC_WK) (p. 1338)
- Sociology (SOCIOL) (p. 1347)
- Soil Science (SOIL) (p. 1356)
- South Asia Studies (S_A_ST) (p. 1359)
- Spanish (SPAN) (p. 1362)
- Special Education (SPC_ED) (p. 1369)
- Statistics (STAT) (p. 1374)
- Student Success Center (SSC) (p. 1380)
- Surgery (SURGRY) (p. 1381)
- **T**
- Textile And Apparel Management (T_A_M) (p. 1384)
- Theatre (THEATR) (p. 1389)
- **V**
- Veterinary Biomedical Science (V_BSCI) (p. 1395)
- Veterinary Medicine - Interdisciplinary (VMED_I) (p. 1397)
- Veterinary Medicine And Surgery (V_M_S) (p. 1397)
- Veterinary Pathobiology (V_PBIO) (p. 1405)
- **W**
- Women's and Gender Studies (WGST) (p. 1409)

Accountancy (ACCTCY)

ACCTCY 2010: Introduction to Accounting

Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and

using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or ACCTCY 2037).

Credit Hours: 3

ACCTCY 2026: Accounting I

An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2026 and ACCTCY 2036. Course only offered through the Mizzou Online (self paced). Prerequisites: Sophomore Standing

Credit Hours: 3

ACCTCY 2027: Accounting II

This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2027 and ACCTCY 2037. Course only offered through Mizzou Online (self paced).

Credit Hours: 3

Prerequisites: ACCTCY 2026

ACCTCY 2036: Accounting I

First half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Emphasizes the use of accounting information about a retail company (sole proprietorship) by internal and external users, followed by an introduction to other forms of business and, then, planning for corporate operations.

Credit Hours: 3

Prerequisites: sophomore standing

ACCTCY 2037: Accounting II

Second half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. This half emphasizes the use of accounting information about a manufacturing company (corporation) by internal and external users.

Credit Hours: 3

Prerequisites: ACCTCY 2036 or ACCTCY 2136H

ACCTCY 2136H: Honors Accounting I

First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

Credit Hours: 3

Prerequisites: sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

ACCTCY 2137H: Honors Accounting II

Continuation of Accountancy 2136H.

Credit Hours: 3

Prerequisites: C or better ACCTCY 2136H. Honors eligibility required

ACCTCY 2258: Computer-Based Data Systems

Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed.

Credit Hours: 3

Prerequisites: ACCTCY 2036 or ACCTCY 2136H

ACCTCY 3326: Financial Accounting Theory and Practice I

Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H

ACCTCY 3328: Accounting Information Systems

Introduction to accounting information systems (AIS). General AIS concepts. Transaction processing systems and accounting cycles. Alternative platforms for computerized transaction processing. Database management and data modeling. Control concepts and design.

Credit Hours: 3

Prerequisites: ACCTCY 2258

ACCTCY 3346: Financial Accounting Theory and Practice II

Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity.

Credit Hours: 3

Prerequisites: ACCTCY 3326

ACCTCY 3347: Cost and Managerial Accounting

Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H and ACCTCY 2258

ACCTCY 4000: Accountancy Professional Speakers and Symposia

(cross-leveled with ACCTCY 7000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations.

Credit Hours: 0

Prerequisites: ACCTCY 2036, ACCTCY 2037, and ACCTCY 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course

ACCTCY 4301: Topics in Accounting

Independent investigations, reports on approved topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

ACCTCY 4353: Introduction to Taxation

Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H. Restricted to TCoB professional program students only

ACCTCY 4356: Financial Accounting Concepts

Current issues in the financial reporting of business corporations to external parties.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H. Not open to accountancy majors

ACCTCY 4365: Governmental Accounting and Budgeting

Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3

Prerequisites: ACCTCY 3326

ACCTCY 4373: Taxation of Business Entities

The course focuses on federal tax laws related to various business entities which include (C Corporations, Partnerships and S Corporations) and their owners. We will follow the life cycle of these business entities and discuss the tax issues involved with the formation, operation, distribution to owners, liquidations, and sales of interest to other owners of each type of business entity. Graded on A-F only. Prerequisites: ACCTCY 4353 or ACCTCY 7353

Credit Hours: 3

ACCTCY 4384: Auditing Theory and Practice I

Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3

Prerequisites: ACCTCY 3328 and ACCTCY 3346

ACCTCY 4940: Professional Accounting Internship

Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: Completion of first 105 hours of 150-hour accountancy curriculum (or equivalent) and consent of Internship Coordinator

ACCTCY 7000: Accountancy Professional Speakers and Symposia

(cross-leveled with ACCTCY 4000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. Graded on S/U basis only.

Credit Hours: 0

Prerequisites: ACCTCY 2036, ACCTCY 2037, and ACCTCY 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course

ACCTCY 7310: Accounting for Managers

Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures.

Credit Hours: 3

Prerequisites: MBA or MSPA candidate, or departmental consent

ACCTCY 7353: Introduction to Taxation

Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H

ACCTCY 7356: Financial Accounting Concepts

Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors.

Credit Hours: 3

Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 7310

ACCTCY 7365: Governmental Accounting and Budgeting

Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3

Prerequisites: ACCTCY 3326

ACCTCY 7384: Auditing Theory and Practice I

Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3

Prerequisites: ACCTCY 3328 and ACCTCY 3346

ACCTCY 7940: Professional Accounting Internship

Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator

ACCTCY 8358: Systems Analysis and Design

Modern information systems analysis and design, focusing on business process modeling.

Credit Hours: 3

Prerequisites: ACCTCY 2258

Recommended: CMP_SC 1001 or CMP_SC 1050

ACCTCY 8363: Multi-Jurisdictional Tax

This course takes a practical approach to exploring multistate and international tax concepts by focusing on tax issues that can arise as a company expands from a single business location into a multinational corporation. Part 1 of this course focuses on the economic, political, and constitutional constraints imposed on state and local taxation, including the due process clause, the commerce clause and state uniformity and equality clauses. Part 2 of the course includes a survey of state and local tax laws, with a particular emphasis on the imposition of sales and use taxes and the allocation and apportionment of state income taxes. Part 3 of the course surveys principals of international taxation, including U.S. taxation of the foreign investments or activities of U.S. taxpayers (outbound) and U.S. taxation of the U.S. activity or investments of foreign taxpayers (inbound). Prerequisites: ACCTCY 4353

Credit Hours: 3

ACCTCY 8373: Taxation of Corporations and Shareholders

Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8383: Taxation of Flow-Through Entities

This course covers formations, operations, distributions, and liquidations of partnerships and S-Corporations. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8393: Taxation of Trust, Gifts and Estates

This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4353 or ACCTCY 7353

ACCTCY 8401: Topics in Accounting

Independent investigations, reports on approved topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

ACCTCY 8404: Internal Auditing

This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls,

enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only.

Credit Hours: 3

Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8408: Advanced Accounting Information Systems

Emerging concepts and technologies in accounting information systems, with an emphasis on E-Business.

Credit Hours: 3

Prerequisites: ACCTCY 3328

ACCTCY 8414: Information Systems Assurance and Control

A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls.

Credit Hours: 3

Prerequisites: ACCTCY 3328, and ACCTCY 4384 OR ACCTCY 7384

ACCTCY 8419: International Accounting

Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards.

Credit Hours: 3

Prerequisites: ACCTCY 3346 and ACCTCY 3347

ACCTCY 8423: Tax Research and Planning

Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.

Credit Hours: 3

Prerequisites: ACCTCY 8373 (or concurrent enrollment in ACCTCY 8373)

ACCTCY 8424: Fraud Examination

A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant's responsibility for fraud detection and prevention are emphasized. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8425: Accounting for Governments and Other NonProfit Entities

Role of accounting information in planning, managing, and controlling nonbusiness organizations; reporting to external parties; concepts of governmental auditing.

Credit Hours: 3

Prerequisites: ACCTCY 4365 or ACCTCY 7365 or instructor's consent

ACCTCY 8428: Data Warehousing and Data Mining

Enterprise-wide view of data and transaction processing. Concepts and techniques of data warehousing and data mining of business-critical data.

Credit Hours: 3

Prerequisites: ACCTCY 3328 or departmental consent

ACCTCY 8434: Applications of Auditing Concepts

Application of auditing concepts and techniques in various phases of audit engagements.

Credit Hours: 3

Prerequisites: ACCTCY 4384

ACCTCY 8436: Financial Accounting Theory and Practice III

Continuation of Accountancy 3346. Addresses a series of special financial accounting topics including income taxes, pensions, leases, business combinations, consolidated statements, and foreign currency translation.

Credit Hours: 3

Prerequisites: ACCTCY 3346

ACCTCY 8437: Strategic Cost Analysis

Analysis to support organizational strategy including cost management, performance evaluation, and control of responsibility centers.

Credit Hours: 3

Prerequisites: ACCTCY 3347, MATH 1320 and STAT 3500, or the equivalent

ACCTCY 8438: Forensic Accounting

Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ACCTCY 3328, ACCTCY 4384 or ACCTCY 7384

ACCTCY 8444: Advanced Audit

The Advanced Auditing course helps students develop a better understanding of the audit environment and gives them the opportunity to gain hands-on experience planning for an audit engagement, performing test work, and completing an audit engagement. The course also addresses additional topics not covered in detail in the Audit Theory and Practice I course, including inventory observation, legal liability issues faced by auditors today, the regulatory environment, professional responsibilities of auditors, preparing appropriate documentation for audit engagements, providing required communications to clients, and performing Single Audits. The course is designed to encourage open discussions of cases and current issues and provide learning opportunities for the students. The class meetings and assignments are designed to improve the student' critical thinking skills, communication skills, and team-building skills.

Credit Hours: 3

Prerequisites: ACCTCY 4384 or ACCTCY 7384

ACCTCY 8446: Application of Financial Accounting

Pronouncements

Development, content and application of authoritative pronouncements in financial accounting. Problems and case studies.

Credit Hours: 3

Prerequisites: ACCTCY 8436

ACCTCY 8448: Emerging Issues in Accounting Information Systems

Current developments in the implementation of accounting information systems. Topics may vary.

Credit Hours: 3

Prerequisites: ACCTCY 8408

ACCTCY 8450: Accounting and Strategic Business Analysis

Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis.

Credit Hours: 3

Prerequisites: ACCTCY 3346 or equivalent

ACCTCY 8453: Taxes and Business Strategies

This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs.

Credit Hours: 3

ACCTCY 8456: Corporate Governance

Corporate governance has taken on new prominence in light of the accounting scandals of the early 2000's (e.g., Enron) and the new regulatory regime of Sarbanes-Oxley. As a result, corporations, investors, auditors, and others are paying more attention to corporate governance. This course will familiarize students with corporate governance mechanisms and how they interact with financial reporting. This course should appeal to students pursuing careers in auditing, finance, management, as well as anyone seeking a deeper understanding of relations between financial reporting and corporate governance.

Credit Hours: 3

Prerequisites: ACCTCY 8436

ACCTCY 9090: Research in Accounting

Each student is under direction and guidance of an accountancy professor in writing a dissertation. Periodic seminars discuss research projects. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: doctoral candidacy and instructor's consent

ACCTCY 9401: Doctoral Research Problems in Accounting

Independent investigations, reports on approved topics. Restricted to Doctoral level students only

Credit Hour: 1-3

Prerequisites: instructor's consent and director's consent

ACCTCY 9444: Seminar in Auditing Research

The economic role of auditing; the audit process; audit reports and the consequences of auditing on financial statements; new audit directions and perspectives.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9455: Seminar in Governmental and Nonprofit Accounting

Critical review of the governmental and nonprofit accounting research literature, with emphasis on auditing issues and research methods.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent. ACCTCY 4384 or ACCTCY 7384 and ACCTCY 4365 or ACCTCY 7365

ACCTCY 9457: Quantitative Methods in Accounting

Application of mathematics and statistics to managerial and financial accounting problems.

Credit Hours: 3

Prerequisites: ACCTCY 3347, MATH 1300 and MATH 1320 and STAT 3500, or instructor's consent

ACCTCY 9460: Research Methods in Accounting

Application of research methods to the investigation of current accounting issues. A research paper is required.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9466: Seminar in Financial Accounting Research

Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9467: Seminar in Behavioral Accounting Research

Critical review of the Behavioral accounting research literature with emphasis on issues and research methods.

Credit Hours: 3

Prerequisites: doctoral candidacy and instructor's consent

ACCTCY 9468: Seminar in Information Systems Research

Overview of research related to advanced systems and how accounting information is processed, with emphasis on current issues and research methods.

Credit Hours: 3

Prerequisites: doctoral candidacy or instructor's consent

Aerospace Studies (AERO)

AERO 1100: The Foundations of the United States Air Force

Introduces the Air Force and Air Force ROTC. Topics include professional appearance, military customs and courtesies, core values,

equal opportunity and treatment, officer opportunities, group leadership problems. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 1200: The Foundations of the United States Air Force

Continues the introduction to the Air Force and Air Force ROTC. Topics include Air Force origins, organizations, major commands, installations, sister services (Army and Navy), group leadership problems. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 2100: The Evolution of USAF Air and Space Power

A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Explores Air Force heritage, Air Force leaders and Air Power doctrine. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 2200: The Evolution of USAF Air and Space Power

Continues the examination of air and space power from the Vietnam era through the present. Topics include the Vietnam War, the Persian Gulf War, and overseas contingency operations. Applies communicative skills. Leadership lab.

Credit Hours: 2

AERO 3100: Air Force Leadership Studies

An integrated leadership and management survey course emphasizing development of the individual as an Air Force leader. Special topics include situational leadership, principle centered leadership, corrective supervision and counseling. Leadership lab.

Credit Hours: 3

AERO 3200: Air Force Leadership Studies

Air Force leadership principles are examined from the foundation developed in AERO 3100. Ethical decision making, personal core values, and character development are discussed. Military evaluation systems are outlined. Leadership lab.

Credit Hours: 3

AERO 4100: National Security Affairs/Preparation for Active Duty

Examines the national security process, regional studies, Air Force and joint doctrine. Special topics include the military as a profession and civilian control of the military. Continued emphasis on communicative skills. Leadership lab.

Credit Hours: 3

AERO 4200: National Security Affairs/Preparation for Active Duty

Examines civilian control of the military, officership, the military justice system, and current issues affecting military professionalism. Continued refinement of communicative skills. Leadership laboratory.

Credit Hours: 3

Agricultural Economics (AG_EC)

AG_EC 1010: Introduction to Agribusiness Management

Management concepts and techniques. Coordination of business activity, motivation, and decision-making approaches used by industry leaders in global food chain. Unique aspects of managing enterprises in the agriculture-food sector.

Credit Hour: 1

AG_EC 1011: Survey of Global Agribusiness

Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.

Credit Hour: 1

AG_EC 1041: Applied Microeconomics

Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG_EC 1041 may not have credit for ECONOM 1014.

Credit Hours: 3

AG_EC 1042: Applied Macroeconomics

Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete AG_EC 1042 may not have credit for ECONOM 1015.

Credit Hours: 3

AG_EC 2070: Environmental Economics and Policy

(same as ENV_ST 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.

Credit Hours: 3

Prerequisites: ENGLISH 1000 and sophomore standing

AG_EC 2123: Quantitative Applications in Agricultural Economics

Familiarize students with the use of calculus and other quantitative tools in developing and analyzing fundamental economic concepts.

Credit Hours: 3

Prerequisites: AG_EC 1041 and MATH 1400

AG_EC 2156: Introduction to Environmental Law

Environmental issues from a legal perspective, using current controversies from both the USA and other countries. Major environmental laws dealing with water, air, noise, endangered species, waste disposal, and land use.

Credit Hours: 3

AG_EC 2183: The Agricultural Marketing System

Analysis of marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives.

Credit Hours: 3

Prerequisites: AG_EC 1041, AG_EC 1042 and ENGLISH 1000

AG_EC 2223: Agricultural Sales

Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service.

Credit Hours: 3

Prerequisites: AG_EC 1041

AG_EC 2225: Statistical Analysis

Elementary statistical inference. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: AG_EC 1041 and MATH 1100

AG_EC 2940: Practicum in Agricultural Economics

Off-campus integrated working and learning experience for departmental majors and minors. Application of economic concepts in business or government. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: 6 credit hours Agricultural Economics, 3 credits communications, and 30 total University credits

AG_EC 3150: International Agribusiness

This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across borders. The course examines how culture, institutions and public policy affect business operations and business strategies.

Credit Hours: 3

Prerequisites: AG_EC 2183 or instructor's consent

AG_EC 3224: New Products Marketing

Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.

Credit Hours: 3

Prerequisites: ENGLISH 1000 and either AG_EC 1041 or ECONOM 1014

AG_EC 3230: Agricultural and Rural Economic Policy

Study and analysis of past and present government policies affecting agriculture and rural economy.

Credit Hours: 3

Prerequisites: AG_EC 1041 and AG_EC 1042 or equivalent

AG_EC 3241: Ethical Issues in Agriculture

The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of

agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit.

Credit Hours: 3

Prerequisites: ENGLISH 1000, AG_EC 1041 or equivalent, and junior standing

AG_EC 3251: Agricultural Prices

Variations in prices of agricultural products; underlying factors.

Credit Hours: 3

Prerequisites: AG_EC 1041, AG_EC 1042, AG_EC 2123 and AG_EC 2225 or STAT 2500

AG_EC 3256: Agribusiness and Biotechnology Law

Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives.

Credit Hours: 3

Prerequisites: 3 hours of Agricultural Economics or Economics

AG_EC 3257: Rural and Agricultural Law

Everyday practical legal problems facing rural residents, farmers, agribusiness, and local government. Laws include statutes, common law (cases), customs, and administrative regulations. Topics include corporate/contract farming, right-to-farm, leases, fence laws, estate planning and water rights.

Credit Hours: 3

Prerequisites: 3 hours of Agricultural Economics or Economics

AG_EC 3260: General Farm Management

Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions.

Credit Hours: 3

Prerequisites: AG_EC 1041

AG_EC 3270: Conservation and Use of Protected Areas

Evaluation of socioeconomic, cultural and ecological values influencing the development and management of protected areas including parks, forests, wildlife refuges, wilderness and wild/scenic rivers.

Credit Hours: 3

Prerequisites: AG_EC 1041 or equivalent, or AG_EC 2070 and introductory natural resources courses, or instructor's consent

AG_EC 3271: International Agricultural Development

Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries.

Credit Hours: 3

Prerequisites: AG_EC 1041 and AG_EC 1042 and junior standing

AG_EC 3272: International Food Trade and Policy

Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment.

Credit Hours: 3

Prerequisites: AG_EC 1041 and AG_EC 1042

AG_EC 3282: Agribusiness Finance

Application of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy.

Credit Hours: 3

Prerequisites: AG_EC 1041 and ACCTCY 2037

AG_EC 3283: Fundamentals of Entrepreneurship

Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities.

Credit Hours: 3

Prerequisites: AG_EC 1041 and ACCTCY 2036 or equivalent

AG_EC 3285: Problems in Agricultural Economics

Supervised study in a specialized phase of agricultural economics. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: AG_EC 1041 and AG_EC 1042; instructor's consent

AG_EC 3286: Economics of Managerial Decision Making

Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agrifood system and for natural resource and environmental management.

Credit Hours: 3

Prerequisites: AG_EC 1041, AG_EC 2123 and AG_EC 2183

AG_EC 3294: Agricultural Marketing and Procurement

Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making.

Credit Hours: 3

Prerequisites: AG_EC 2183 and AG_EC 2225

AG_EC 3295: Real Money: Speculative Trading for Beginners

Familiarize students with the learning components of commodity future/option trading. Students learn through involvement by investing in a commodity pool and trading futures/options. Students apply both fundamental and technical analysis. Students taking this course are required to invest from \$100 to \$300 in \$100 increments.

Credit Hours: 3

Prerequisites: AG_EC 2183, AG_EC 3294 or instructor's consent

AG_EC 3321: Economic History of Agriculture

Emphasizes Europe and U.S. historical interpretation; usefulness in evaluating present and probable future developments in agriculture.

Credit Hours: 3

Prerequisites: AG_EC 1041

AG_EC 3383: Rural Entrepreneurship II

Rural Entrepreneurship II is designed for students that realize they may need to create their own career or opportunity if they want to return to their rural community and for students who would like to better understand how to create that option in their career choice set.

Credit Hours: 3

Prerequisites: AG_EC 1041, AG_EC 3283 and ACCTCY 2036

AG_EC 4110: In-Service Course in Agricultural Economics

A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.

Credit Hour: 2-10

Prerequisites: 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor's consent

AG_EC 4230: Understanding the Agricultural Policy Process

The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment.

Credit Hours: 3

Prerequisites: AG_EC 3230 and instructor's consent

AG_EC 4295: Agricultural Risk Management

This class will examine the range of risks business face and explore ways of characterizing and evaluating those risks.

Credit Hours: 3

Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor's consent

AG_EC 4301: Topics in Agricultural Economics

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

AG_EC 4301H: Topics in Agricultural Economics

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

Prerequisites: honors eligibility required

AG_EC 4310: Local Economic Analysis

Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses.

Credit Hour: 1

Prerequisites: junior standing

AG_EC 4340: Rural Real Estate Appraisal

Principles, techniques, practices of rural real estate appraisal. Field trips.

Credit Hours: 3

Prerequisites: AG_EC 3260

AG_EC 4356: Environmental Law and Policy

Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3

Prerequisites: senior or graduate standing. For non-law students

Recommended: AG_EC 2156, AG_EC 3256 or AG_EC 3257

AG_EC 4940: Internship Experiences in Agricultural Economics

Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: 2.5 GPA; 75 hours of course work and instructor's consent

AG_EC 4962: Planning the Farm Business

Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3

Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent

AG_EC 4971: Agribusiness Management Strategy

Analysis of industry forces in agriculture and food sector. Assessing risks and firms' capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3

Prerequisites: AG_EC 2183, AG_EC 3282, AG_EC 3286, and ENGLISH 1000

AG_EC 4972: Agri-Food Business and Cooperative Management

Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3

Prerequisites: AG_EC 2183, AG_EC 3256, AG_EC 3286 and AG_EC 4971

AG_EC 4983: Strategic Entrepreneurship in Agri-Food

Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets.

Credit Hours: 3

Prerequisites: AG_EC 3257, AG_EC 3282, AG_EC 3283, and AG_EC 3383; senior standing

AG_EC 4990: Agricultural Economics Capstone Seminar

Apply key concepts of agricultural economics in traditional and non-traditional settings.

Credit Hours: 3

Prerequisites: AG_EC 3230, AG_EC 3251, and senior standing

AG_EC 4995: Economics of Agricultural Production and Distribution

Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3

Prerequisites: ECONOM 3251, STAT 1400 or equivalent

AG_EC 7110: In-Service Course in Agricultural Economics

A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each.

Credit Hour: 2-10

Prerequisites: graduate standing and 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor's consent

AG_EC 7295: Agricultural Risk Management

This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks.

Credit Hours: 3

Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor's consent

AG_EC 7301: Topics in Agricultural Economics

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

Credit Hour: 1-6

AG_EC 7310: Local Economics Analysis

Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. On-line course.

Credit Hour: 1

AG_EC 7340: Rural Real Estate Appraisal

Principles, techniques, practices of rural real estate appraisal. Field trips.

Credit Hours: 3

Prerequisites: AG_EC 3260

AG_EC 7356: Environmental Law and Policy

Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

Credit Hours: 3

Prerequisites: For non-law students. Recommended AG_EC 2156, AG_EC 3256 or AG_EC 3257

AG_EC 7940: Internship Experiences in Agricultural Economics

Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: 2.5 GPA; 75 hours of course work and instructor's consent

AG_EC 7962: Planning the Farm Business

Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

Credit Hours: 3

Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent

AG_EC 7971: Agribusiness Management Strategy

Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

Credit Hours: 3

Prerequisites: AG_EC 2183, AG_EC 3282, AG_EC 3286, ENGLISH 1000

AG_EC 7972: Agri-Food Business and Cooperative Management

Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

Credit Hours: 3

Prerequisites: AG_EC 2183, AG_EC 3256 and AG_EC 3286

AG_EC 7995: Economics of Agricultural Production and Distribution

Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

Credit Hours: 3

Prerequisites: ECONOM 3251, STAT 1400 or equivalent

AG_EC 8001: Advanced Topics in Economics

Analyzes economic logic problems. Current agricultural economic problems.

Credit Hours: 3

AG_EC 8010: Research Methodology

Students explore the roles of theory and methods in economics research, develop a program of research, and critique published research. Students also study the scientific methods and the research process, including problem definition, research design, data collection and analysis, and generalization.

Credit Hours: 3

AG_EC 8024: Advanced Production Economics

Production function analyses and advanced theory of the firm as applied to agricultural production problems. Concepts of input demand, production supply, quality, time and technology, dynamic analysis and production under uncertainty.

Credit Hours: 3

Prerequisites: MATH 1500, AG_EC 4995; ECONOM 8451; STAT 4510 or ECONOM 8472

AG_EC 8050: Economics of Institutions and Organizations

This course expands upon the fundamental principles of neo-classical economics by relaxing traditional behavioral and informational assumptions and by introducing the importance of transaction costs and institutions for economic analysis.

Credit Hours: 3

AG_EC 8060: Mathematical Modeling for Social Scientist

Introduction to mathematical programming, emphasizing problem formulation and solution interpretation. Computer applications are stressed.

Credit Hours: 3

Prerequisites: STAT 4510

AG_EC 8085: Masters Problems in Agricultural Economics

Supervised study, research in specialized phases of agricultural economics.

Credit Hour: 1-99

AG_EC 8087: Seminar in Agricultural Economics

Lectures, reports on economic problems in agriculture.

Credit Hour: 1

AG_EC 8090: Masters Thesis Research in Agricultural Economics

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-6

AG_EC 8210: Theory of Markets

Development of theories of monopolistic, monopolistic competition; application to agricultural markets. Market structure influence on price, nonprice competition in buying, selling of farm products and inputs.

Credit Hours: 3

Prerequisites: ECONOM 7351

AG_EC 8350: Regional Development Issues and Analysis

(same as PUB_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development.

Credit Hours: 3

Prerequisites: ECONOM 7351 or PUB_AF 8190 or equivalent

AG_EC 8410: Natural Resource and Environmental Economics

Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution.

Credit Hours: 3

Prerequisites: ECONOM 7351

AG_EC 8430: International Agricultural Development Policy

An analytical review of economic policies directed toward stimulating agricultural development in the world's low income countries.

Credit Hours: 3

Prerequisites: ECONOM 7351 and ECONOM 7353

AG_EC 8448: Society and Ecosystems Research Seminar

(same as RU_SOC 8448 and NAT_R 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.

Credit Hours: 3

AG_EC 8450: Masters Non Thesis Research

Independent investigation of advanced nature. Report required.

Credit Hour: 1-6

AG_EC 8520: Economics of Transaction and Contracting

This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions.

Credit Hours: 3

AG_EC 8610: Economic and Sociological Approaches to Collective Action

(same as RU_SOC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.

Credit Hours: 3

Prerequisites: AG_EC 7972

AG_EC 8860: International Comparative Rural Policy

(same as PUB_AF 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their

implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

AG_EC 9001: Advanced Topics in Economics II

Analyzes economic logic problems. Current agricultural economic problems.

Credit Hours: 3

AG_EC 9040: Advanced Microeconomics Theory and Applications I

First semester course that rigorously examines the microeconomic theory of producer and consumer behavior, combined with applications of the theoretical concepts to empirical economic research on agricultural, business, development, and environmental issues. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 7351 or instructors consent

AG_EC 9042: Advanced Microeconomics Theory and Applications II

Second semester advanced micro theory covering choice under uncertainty, industry structure, game theory, information econ, and political economy of regulation. Includes applications of micro models to issues in agricultural, natural resource, and development sectors.

Credit Hours: 3

Prerequisites: AG_EC 9040

AG_EC 9085: Doctoral Problems in Agricultural Economics

Supervised study, research in specialized phases of agricultural economics.

Credit Hour: 1-99

Prerequisites: instructor's consent

AG_EC 9090: Doctoral Dissertation Research in Agricultural Economics

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

AG_EC 9220: Advanced Price Analysis

Applies economic theory and quantitative methods to analyze agricultural price issues. Examines problem formulation, estimation, and model evaluation applied to demand and supply situations.

Credit Hours: 3

Prerequisites: ECONOM 8451 or ECONOM 8472; STAT 4510

AG_EC 9230: Welfare and Consumption Economics

Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers' choice; measurement of consumption; living standards; household decisions and markets relation.

Credit Hours: 3

Prerequisites: ECONOM 8451 or instructor's consent

AG_EC 9265: Food, Agricultural and Rural Policy

Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions.

Credit Hours: 3

Prerequisites: ECONOM 7351 and AG_EC 9230

AG_EC 9320: Regional Economic Theory and Methods

Theory of spatial economics: Central place theory, spatial labor markets, location theory, social accounting matrices, input-output, computable general equilibrium, geographic information systems and regional econometric models.

Credit Hours: 3

Prerequisites: ECONOM 7351, ECONOM 7353, and matrix algebra

AG_EC 9475: Econometrics I

Emphasis is given to special estimation problems which occur in integrating the theory with various types of economic data.

Credit Hours: 3

AG_EC 9476: Econometrics II

(same as ECONOM 9476).

Credit Hours: 3

AG_EC 9510: Economics of Agribusiness Firm

This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions.

Credit Hours: 3

Prerequisites: AG_EC 8050

AG_EC 9520: Economics of Agribusiness Markets

Relationships of neoclassical and new institutional economics to designing organizational strategy and structure. Internal coordination and structure, organizational boundaries, and competitiveness and sustainability of food system organizations.

Credit Hours: 3

Prerequisites: AG_EC 8050

Agricultural Ed & Leadership (AG_ED_LD)

AG_ED_LD 1000: Orientation to Agricultural Education and Leadership

Overview of the discipline of agricultural education including: career opportunities, certification requirements, professional development, and current issues.

Credit Hour: 1

AG_ED_LD 2220: Verbal Communication in Agriculture, Food and Natural Resources

Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills.

Credit Hours: 3

Prerequisites: Restricted to College of Agriculture, Food and Natural Resources students only during Early Registration

AG_ED_LD 2250: Introduction to Leadership

Overview of basic leadership principles and theories, including, but not limited to: personal leadership development, characteristics of effective leaders, leadership styles, ethics as a leader and leadership obstacles.

Credit Hours: 3

AG_ED_LD 2260: Team and Organizational Leadership

Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

Credit Hours: 3

AG_ED_LD 2270: Leadership Development in Youth Organizations

This course focuses on how to develop leadership in youth through participation in a youth organization. In particular, this course explores youth development, how to develop leadership through youth organizations and their activities, and organizational structures.

Credit Hours: 3

AG_ED_LD 2271: Early Field Experience

This field experience is designed for students to explore the role of being a school-based agricultural educator. In particular, students will experience the total agricultural education program with a focus on youth organizations.

Credit Hour: 1

Prerequisites: AG_ED_LD 2270 or concurrent enrollment

AG_ED_LD 3085: Problems in Agricultural Education and Leadership

Supervised and independent study of problems and issues in Agricultural Education and Leadership at the undergraduate level.

Credit Hour: 1-99

Prerequisites: instructor's consent

AG_ED_LD 3320: Metal Fabrication and Laboratory Management

Application of metal fabrication skills, including cutting, bending, and welding, using a variety of processes. Operations of hand tools and power equipment used in project construction. Also includes laboratory management, instructional strategies, and assessment techniques related to secondary agriculture programs.

Credit Hours: 3

Prerequisites: junior standing

AG_ED_LD 4001: Topics in Agricultural Education and Leadership

Courses on specialized topics offered on a trial basis until the course has been assigned a course number.

Credit Hour: 1-3

AG_ED_LD 4087: Internship Seminar in Agricultural Education and Leadership

Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experiential learning and leadership development activities, managing the complete program, and professional development.

Credit Hours: 3

Corequisites: AG_ED_LD 4995

AG_ED_LD 4310: Intracurricular Program Management in Agricultural Education

This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan, supervise, and evaluate the intracurricular components within Agricultural Education programs..

Credit Hours: 3

Prerequisites: junior standing

AG_ED_LD 4320: Methods of Teaching I

Investigations into the teaching and learning process which including lesson planning, direct instruction methods, and assessment.

Credit Hours: 3

Prerequisites: junior standing; acceptance into Phase II of Teacher Development Program or instructor's consent

AG_ED_LD 4321: Integrated Field Experience II

A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Graded on S/U basis only.

Credit Hour: 1

Corequisites: AG_ED_LD 4320

AG_ED_LD 4330: Methods of Teaching II

Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design.

Credit Hours: 3

Prerequisites: AG_ED_LD 4320; acceptance into Phase II of Teacher Development Program or instructor's consent

AG_ED_LD 4331: Field Experience II

A field-based experience that provides students with comprehensive experience directed toward learning, teaching, and assessment in secondary agriculture programs. Graded on S/U basis only.

Credit Hour: 1

Corequisites: AG_ED_LD 4330

AG_ED_LD 4340: Designing and Delivering Nonformal Educational Programs

Course designed to overview learning theory and practice applicable to teaching adults and youth in nonformal education contexts including: planning programs, methods of instructional delivery, marketing, and evaluation of educational outcomes.

Credit Hours: 4

Prerequisites: AG_ED_LD 2220 or equivalent; junior or senior standing

AG_ED_LD 4993: Internship in Agricultural Education and Leadership

Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator.

Credit Hour: 1-4

Prerequisites: departmental consent

AG_ED_LD 4995: Student Teaching Internship in Agriculture

A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context.

Credit Hour: 1-12

Prerequisites: departmental consent

AG_ED_LD 7087: Internship Seminar in Agricultural Education and Leadership

Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development.

Credit Hours: 3

Corequisites: AG_ED_LD 4995

AG_ED_LD 7310: Intracurricular Program Management in Agricultural Education

This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan supervise and evaluate the intracurricular components within Agricultural Education Programs.

Credit Hours: 3

AG_ED_LD 7320: Methods of Teaching I

Investigations into the teaching and learning process which includes lesson planning, direct instruction methods, and assessment.

Credit Hours: 3

Prerequisites: acceptance into the Teacher Certification option

AG_ED_LD 7330: Methods of Teaching II

Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design.

Credit Hours: 3

Prerequisites: acceptance into Teacher Certification option and AG_ED_LD 4320 or AG_ED_LD 7320

AG_ED_LD 7340: Designing and Delivering Nonformal Educational Programs

Course designed to overview learning theory and practice applicable to teaching adults and youth in nonformal education contexts including: planning programs, methods of instructional delivery, marketing, and evaluation of educational outcomes.

Credit Hours: 4

Prerequisites: AG_ED_LD 2220 or equivalent

AG_ED_LD 7350: Inservice Course in Agricultural Education and Leadership

Professional development course which focuses on enhancing the technical, administrative, or management skills of agricultural educators.

Credit Hour: 1-99

AG_ED_LD 8080: Creative Component in Agricultural Education and Leadership

Independent original work that culminates in a scholarly project, document or presentation. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

AG_ED_LD 8085: Problems in Agricultural Education and Leadership

Credit Hour: 1-99

Prerequisites: instructor's consent

AG_ED_LD 8087: Seminar in Agricultural Education and Leadership

Seminar in Agricultural Education and Leadership.

Credit Hour: 1-99

AG_ED_LD 8090: Thesis Research in Agricultural Education and Leadership

Independent research activities by a master's student that culminates in a thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

AG_ED_LD 8210: History and Leadership of the Land Grant University

Historical overview of the evolution and development of land-grant colleges. Students examine early public mandates and evaluate education, research, public service developments and new initiatives needed for Land Grant universities to effectively serve society.

Credit Hours: 2

AG_ED_LD 8250: Leadership Theory and Application

Survey of concepts, theories and practices of leadership, personal development and group dynamics. Exploration of leadership traits and models with a focus upon how they apply to Agricultural Education.

Credit Hours: 3

AG_ED_LD 8330: Advanced Methods of Teaching

Explores the principles and psychological aspects of teaching and learning; teaching strategies, methods, and techniques; evaluating student learning; motivating students; and personal teacher behaviors that influence learning.

Credit Hours: 3

AG_ED_LD 8340: Student and Teacher Development in Agricultural Education and Leadership

Examines planning and supervising career exploration, experiential learning, and leadership development activities of secondary agriculture students. The professional development of the secondary agriculture teacher is also examined.

Credit Hours: 3

Prerequisites: AG_ED_LD 4310 or equivalent

AG_ED_LD 8350: College Teaching of Agriculture, Food and Natural Resources

A course designed to assist current or future college faculty who wish to improve their teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education.

Credit Hours: 3

AG_ED_LD 8351: Induction Year Teaching I

Continuing education course for the professional development of first-year teachers of agriculture. The course focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

Credit Hour: 1-2

AG_ED_LD 8352: Induction Year Teaching II

Continuing education course for the professional development of second-year teachers of agriculture. The course is a continuation of AG_ED_LD 8351 and focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

Credit Hour: 1-2

Prerequisites: AG_ED_LD 8351

AG_ED_LD 8410: Philosophical Foundations of Agricultural Education and Leadership

Overview of the history and philosophical development of agricultural education and leadership as a discipline. Philosophers, policy makers, movements, trends, and legislation that has influenced agricultural education. Current issues and future trends impacting the field. Graded on A-F basis only.

Credit Hour: 1-3

AG_ED_LD 8430: Evaluation of Educational Programs

(same as RU_SOC 8430). Examines program evaluation concepts, principles, and models; and identifies major steps in planning, conducting, and reporting results of evaluation objects.

Credit Hours: 3

AG_ED_LD 8510: Research Methods and Design

(same as RU_SOC 8510). A foundations course on quantitative research methodology and design principles for investigating problems in social and behavioral sciences. A focus is on the language of research, purposes, validity threats, and data collection methods. Graded on A-F basis only.

Credit Hours: 3

AG_ED_LD 8520: Preparing Manuscripts for Publication

An introduction to planning, preparing, and submitting research based articles for publication in professional journals and research proceedings.

Credit Hour: 1

AG_ED_LD 8530: Grant Proposal Writing

Preparation of proposals designed to solicit grant funding to support teaching, research or outreach programs. Emphasis on proposal development, identifying funding sources, and proposal review processes.

Credit Hours: 2

AG_ED_LD 8540: Methods of Qualitative Research

(same as RU_SOC 8540). Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.

Credit Hours: 3

AG_ED_LD 8995: College Teaching Practicum

Learning experience that combines the study, observation, and practice of teaching university-level courses in food, agriculture and/or natural resources under the supervision of teaching mentors. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: instructor's consent and AG_ED_LD 8330 or AG_ED_LD 8350

AG_ED_LD 9090: Doctoral Research in Agricultural Education and Leadership

Independent research activities by a doctoral student that culminates in a dissertation or other scholarly work. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

AG_ED_LD 9410: Foundations and Practices of Teacher Education

Foundations and practices of teacher preparation programs including student selection and advisement, licensure requirements, accreditation, curriculum, clinical and field experiences, supervision, evaluation and research.

Credit Hours: 3

Prerequisites: Doctoral student or instructor's consent

AG_ED_LD 9510: Data Collection, Analysis and Interpretation

(same as RU_SOC 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AG_ED_LD 8510 or RU_SOC 8510 or instructor's consent

Agricultural Systems Management (AG_S_M)

AG_S_M 1002: Topics in Agricultural Systems Management-Biological/Physical/Math

Current and new technical developments in agricultural systems management.

Credit Hours: 3

Prerequisites: 6 hours in AG_S_M or instructor's consent

AG_S_M 1020: Introduction to Agricultural Systems Management

Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of the technical areas within Agricultural Systems Management.

Credit Hours: 3

AG_S_M 1040: Physical Principles for Agricultural Applications

Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships.

Credit Hours: 3

Prerequisites: MATH 1120

AG_S_M 1120: Agricultural/Industrial Materials and Processes

Structure and properties of manufacturing materials; conditioning and machining materials; assembling processes; finishing processes; automation of manufacturing systems.

Credit Hours: 3

AG_S_M 2002: Topics in Agricultural Systems Management-Biological/Physical/Math

Current and new technical developments in agricultural systems management.

Credit Hours: 3

Prerequisites: 6 hours in AG_S_M or instructor's consent

AG_S_M 2020: Environmental Ethics in Agriculture

Influence of agricultural technology and production practices on environmental quality. Stewardship concepts. Long-term vs. short-

term consequences. Development of a scientifically sound ethic toward agricultural production.

Credit Hours: 3

Prerequisites: ENGLSH 1000 and sophomore standing

AG_S_M 2220: Agricultural/Industrial Structures

A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.

Credit Hours: 3

Prerequisites: MATH 1100

Recommended: AG_S_M 1040, or instructor's consent

AG_S_M 2320: Internal Combustion Power

Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing.

Credit Hours: 3

Prerequisites: AG_S_M 1040

AG_S_M 2340: Pesticide Application Equipment

Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license.

Credit Hours: 3

Prerequisites: MATH 1100 or instructor's consent

AG_S_M 2345: Chemical Application Systems

Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures.

Credit Hour: 2-3

Prerequisites: MATH 1100 or equivalent

AG_S_M 2360: Fluid Power

Basic power hydraulic theory. Hydraulic systems, components and circuits. Math reasoning proficiency course.

Credit Hours: 3

Prerequisites: MATH 1100 and sophomore standing

AG_S_M 3350: Problems in Agricultural Systems Management

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

AG_S_M 4020: Agricultural Safety and Health

Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impact of accidents, standards and liabilities. Role of man in the man-machine system.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

AG_S_M 4120: Advanced Agricultural/Industrial Materials and Processes

(cross-leveled with AG_S_M 7120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.

Credit Hour: 2-3

Prerequisites: instructor's consent

AG_S_M 4140: Electricity: Wiring and Equipment

Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3

Prerequisites: MATH 1100 and junior standing or instructor's consent

AG_S_M 4145: Sensors and Control Systems for Agri-Industries

This course helps one understand sensors including performance, data acquisition systems and selection. In addition, introduction to programmable logic controllers, ladder-rung diagram programming, fluid flow rate, and associated analysis is discussed.

Credit Hours: 2

Prerequisites: AG_S_M 1040 and AG_S_M 4140; junior standing required

AG_S_M 4150: Biorenewable Systems Technology

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation and logistics, and marketing.

Credit Hours: 3

Prerequisites: MATH 1100, CHEM 1100 and AG_EC 1041 or equivalent

AG_S_M 4220: Material Handling and Conditioning

Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material.

Credit Hours: 3

Prerequisites: MATH 1100, AG_S_M 1040 and junior standing

AG_S_M 4225: Preservation of Grain Quality

Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

Credit Hours: 2

Prerequisites: MATH 1100 or equivalent

AG_S_M 4320: Agricultural Equipment and Machinery

Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3

Prerequisites: AG_S_M 1040 and junior standing

AG_S_M 4350: Problems in Agricultural Systems Management

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

AG_S_M 4360: Precision Agriculture Science and Technology

(same as PLNT_S 4360 and SOIL 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

AG_S_M 4365: Machinery Management Using Precision Agriculture Technology

Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized.

Credit Hours: 3

Prerequisites: Junior standing required; Prefer AG_S_M 4360

AG_S_M 4370: In-Service Course Agriculture System Management-Farm Power and Machinery

A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8

Prerequisites: 10 credits from Agricultural System Management courses; a B.S. degree in Agriculture or instructor's consent

AG_S_M 4390: Optimization and Management of Food and Agricultural Systems

(same as F_S 4390 and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 4420: Surface Water Management

Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3

Prerequisites: MATH 1100 and junior standing

AG_S_M 4440: Water Quality and Pollution Control

Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

Credit Hours: 3

Prerequisites: MATH 1100 and junior standing

AG_S_M 4460: Irrigation and Drainage

Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

Credit Hours: 3

Prerequisites: AG_S_M 4420 or instructor's consent

AG_S_M 4940: Agricultural Systems Management Internship

Problem course following prior approved internship work experience. Problem selected by internship company representative, faculty problem advisor and student. Supervised by faculty problem advisor and presented in technical report form.

Credit Hour: 2-5

AG_S_M 4970: Agricultural Systems Management - Capstone

Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.

Credit Hours: 3

Prerequisites: Senior Standing

AG_S_M 7001: Topics in Agricultural Systems Management

Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise.

Credit Hours: 3

AG_S_M 7020: Agricultural Safety and Health

Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system.

Credit Hours: 3

AG_S_M 7085: Problems in Agricultural Systems Management

Supervised individual study at the graduate level.

Credit Hour: 1-99

AG_S_M 7120: Advanced Agricultural/Industrial Materials and Processes

(cross-leveled with AG_S_M 4120). Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects.

Credit Hour: 2-3

Prerequisites: instructor's consent

AG_S_M 7140: Electricity: Wiring and Equipment

Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3

AG_S_M 7220: Material Handling and Conditioning

Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials.

Credit Hours: 3

Prerequisites: MATH 1100 and AG_S_M 1040

AG_S_M 7320: Agricultural Equipment and Machinery

Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3

Prerequisites: AG_S_M 1040

AG_S_M 7340: Agricultural Mechanization Systems

Review of current literature. Case study of mechanization systems. Computer analysis of management alternatives.

Credit Hours: 3

AG_S_M 7360: Precision Agriculture Science and Technology

(same as PLNT_S 7360 and SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

AG_S_M 7365: Machinery Management Using Precision Agriculture Technology

This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipments geographic location and can be recorded simultaneously with the volume of product applied and weather information (wind, temperature, humidity, etc.). GPS guidance is one of the main technologies to be studied throughout this course. The management of this equipment and the GPS technologies used to control and record this information is the focus of the course.

Credit Hours: 3

Recommended: AG_S_M 7360

AG_S_M 7370: In-Service Course Agriculture Systems Management-Farm Power and Machinery

A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8

Prerequisites: 10 credits from Agricultural Systems Management courses; a B.S. degree in Agriculture or instructor's consent

AG_S_M 7390: Optimization and Management of Food and Agriculture Systems

(same as F_S 7390 and HSP_MGMT 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3

Prerequisites: instructor's consent

AG_S_M 7420: Surface Water Management

Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 7440: Water Quality and Pollution Control

Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

Credit Hours: 3

Prerequisites: MATH 1100

AG_S_M 7460: Irrigation and Drainage

Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

Credit Hours: 3

Prerequisites: AG_S_M 4420 or instructor's consent

AG_S_M 8085: Problems in Agricultural Systems Management

Supervised individual study at the graduate level.

Credit Hours: 3

AG_S_M 8090: Thesis Research in Agricultural Systems Management

Independent investigation to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

AG_S_M 8142: Agricultural Energy Efficiency

The study of the efficient use of energy concerning the planning, economics, and finance of efficient technology for livestock, crops, farm buildings including alternative energy resources, and associated environmental systems.

Credit Hours: 3

Prerequisites: AG_S_M 4140 or consent of instructor

AG_S_M 8340: Agricultural Mechanization Systems

Review of current literature. Case study of mechanization systems. Computer analysis of management alternatives.

Credit Hours: 3

AG_S_M 9090: Thesis Research in Agricultural Systems Management

Independent investigation to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Agriculture, Food and Natural Resources (AFNR)

AFNR 1101: Special Topics in Agriculture

Selected topics not offered in other courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

AFNR 1111: Computing and Information Systems I

Provide students with a basic understanding of microcomputer usage, electronic communications, and use of the internet. Topics include operating systems, word processing, database management systems, spreadsheets, electronic mail, online library searches, and the World Wide Web.

Credit Hours: 3

AFNR 1115: Foundations for College Success

An investigation of principles and practices associated with academic success and the interpersonal challenges encountered in collegiate life. Learning preferences, time investment, study skills, degree requirements, and personal development opportunities available in the College and across campus are explored. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: freshman standing

AFNR 1120: Computing and Information Technology

Provides students with a basic understanding of computer usage, electronic communications and use of the internet. Topics include understanding of operating systems, word processing, and presentation media.

Credit Hours: 2

Prerequisites: Restricted to freshmen and sophomores

AFNR 2115: College to Career: Strategies for Success

Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

Credit Hour: 1

AFNR 2120: Working with Data Using Excel

Provide students with a basic understanding of computer usage and spreadsheet applications.

Credit Hour: 1

AFNR 2150: Agricultural Travel Course

General travel course designed to broaden the perspective of agricultural students. Cost of course is borne by the student. Prerequisites: one course in each of the following areas: agricultural economics, animal science, plant science, and instructor's consent.

Credit Hour: 1-99

AFNR 2190: International Agriculture and Natural Resources

This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-15

Prerequisites: instructor's and student's advisor consent

AFNR 2191: International Agriculture and Natural Resources - Humanities

This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-6

Prerequisites: student's advisor or consent of instructor

AFNR 2192: International Agriculture/Natural Resources-Social Science

This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. May be repeated for credit. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-6

Prerequisites: student's advisor and instructor's consent

AFNR 2215: Introduction to the Theory and Practice of Sustainable Agriculture

This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.

Credit Hours: 3

AFNR 3115: Lifelong Career Management and Success Strategies

Systematic approach to understanding the importance of effective leadership in the professional world, obtaining transferable skills necessary in the work force, and understanding important aspects that allow one's career to grow over the course of one's professional life. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: junior standing or higher

AFNR 3215: Community Food Systems

Essential concepts in research, implementation and understanding of community food systems and macro-level global trends in food production and distribution will be discussed. Students will examine the social, economic and health implications of conventional and alternative food systems.

Credit Hours: 3

Prerequisites: AFNR 2215

AFNR 3315: Advanced Practices in Sustainable Agriculture

Course furthers students' understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life.

Credit Hours: 3

Prerequisites: AFNR 2215 and Junior standing

Recommended: SOIL 2100, PLNT_S 2110 or AN_SCI 1065 or AN_SCI 2175

AFNR 4001: Topics in Agriculture-General

Topics in Agriculture-General

Credit Hour: 1-99

AFNR 4972: Capstone Project in Agriculture, Food and Natural Resources

A culminating learning experience focused on student's area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: junior standing and instructor's consent

AFNR 4993: Internship in Agriculture, Food and Natural Resources

Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: junior standing and instructor's consent

AFNR 7190: International Agriculture/Natural Resources

This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of the course may be offered on A-F or S/U basis only.

Credit Hour: 1-9

Prerequisites: advisor and instructor's consent

Anesthesiology (ANESTH)

ANESTH 6203: ABS Anesthesiology Research

ABS Anesthesiology Research

Credit Hour: 5-10

ANESTH 6205: ABS Anesthesiology Research and Review

ABS Anesthesiology Research and Review

Credit Hour: 5-10

ANESTH 6400: Anesthesiology

Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g. the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system).

2. Learn how to think and react quickly and correctly in times of stress.

3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g. insertion of endotracheal tubes, intravenous catheters).

5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career.

Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected.

Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesia as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient's anesthetic, and a 50 question written examination at the end of the rotation.

Credit Hours: 5

Animal Science (AN_SCI)

AN_SCI 1001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4

Prerequisites: departmental consent

AN_SCI 1011: Animal Science

Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3

AN_SCI 1011H: Animal Science - Honors

Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3

Prerequisites: Honors eligibility required

AN_SCI 1012: Introduction to Captive Wild Animal Management

(same as F_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1013: Biotechnology in Animal Agriculture

Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1065: Animal Science Laboratory Practicum

An introductory course in skill related to the care and management of livestock and poultry plus a section dealing with meats and a section dealing with research methods. Students will be expected to participate in hands-on learning development of fundamental skills and animal husbandry. This class will include one 3 hour lab and 1 hour DIS per week.

Credit Hours: 2

AN_SCI 2001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4

Prerequisites: departmental consent

AN_SCI 2085: Problems in Animal Science

Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor.

Credit Hour: 1-5

Prerequisites: instructor's consent

AN_SCI 2095: Equine Behavior and Training

Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training. Prerequisites: AN_SCI 1065 and instructor's consent

Credit Hours: 3

AN_SCI 2110: Global Animal Agriculture

Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors.

Credit Hours: 2

Prerequisites: sophomore standing

AN_SCI 2111: Sophomore Seminar: Societal Issues Facing Animal Agriculture

Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGLSH 1000

AN_SCI 2114: Live Animal and Meat Evaluation

(same as F_S 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.

Credit Hours: 3

AN_SCI 2115: Livestock Judging

Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures.

Credit Hours: 3

Prerequisites: AN_SCI 1065

AN_SCI 2131: Dairy Products Evaluation

(same as F_S 2131.) Sensory Evaluation and judging of dairy products.

Credit Hours: 2

AN_SCI 2135: Horse Selection and Evaluation

Techniques of selecting and evaluating horses based on conformation and performance characteristics. Effects of conformation on soundness. Includes learning to organize observations on the relative merits of a group of horses into an oral presentation.

Credit Hours: 2

Prerequisites: AN_SCI 1065

AN_SCI 2140: Companion Animals

(same as BIOMED 2140). Focus on companion dog, cat, and horse owners concerns re: health zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

Credit Hours: 3

Prerequisites: sophomore standing

AN_SCI 2165: Introduction to Ruminant Livestock Production

This is an introductory theory course which provides fundamental understanding of ruminant livestock - beef cattle and dairy cattle, production, management and associate industries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 1065

AN_SCI 2175: Introduction to Monogastric Production

Introductory course which provides fundamental understanding of hogs, horses and poultry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 1065

AN_SCI 2195: Equine Facility Management and Marketing

Focuses on learning equine facility management through student care and management of the University's equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 2135 and instructor's consent. Cannot be taken at the same time as AN_SCI 2095

AN_SCI 3001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4

Prerequisites: department consent

AN_SCI 3085: Problems in Animal Science

Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

AN_SCI 3190: Study Abroad: International Meat, Dairy and Enology

(same as F_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 3212: Principles of Animal Nutrition

The purpose of this course is to teach students the essential nutrients for animal life and to understand the basic principles of nutrition. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: 1 course in biochemistry or at least 4 hours of chemistry and MATH 1100 or equivalent

AN_SCI 3213: Genetics of Agricultural Plants and Animals

(same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture.

Credit Hours: 3

Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100

AN_SCI 3214: Principles of Meat Science

(same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

Credit Hours: 3

Prerequisites: one course in Biology

AN_SCI 3231: Principles of Dairy Foods Science

(same as F_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

Credit Hours: 3

Prerequisites: One course in Chemistry or Biological Sciences

AN_SCI 3232: Animal Feeds and Feeding

Description of feed ingredients, formulation of diets, and animal feeding management.

Credit Hours: 3

Prerequisites: AN_SCI 3212 and MATH 1100 or equivalent

AN_SCI 3254: Physiology of Domestic Animals

Basic concepts of physiology and anatomy as related to domestic animals.

Credit Hours: 3

Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320

AN_SCI 3254H: Physiology of Domestic Animals - Honors

Basic concepts of physiology and anatomy as related to domestic animals.

Credit Hours: 3

Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; Honors eligibility required

AN_SCI 3255: Physiology of Domestic Animals Laboratory

This laboratory course covers the basic concepts of physiology as related to domestic animals.

Credit Hours: 2

Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; AN_SCI 3254 or equivalent

AN_SCI 3275: Meat Animal Evaluation

Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary.

Credit Hours: 2

Prerequisites: AN_SCI 2114 and AN_SCI 2115

AN_SCI 4001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4

Prerequisites: instructor's consent

AN_SCI 4312: Monogastric Nutrition

(same as NUTR_S 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 4314: Physiology of Reproduction

Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3

Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor's consent

AN_SCI 4314H: Physiology of Reproduction - Honors

Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3

Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor's consent. Honors eligibility required

AN_SCI 4323: Applied Livestock Genetics

Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Math Reasoning Proficiency Course.

Credit Hours: 2

Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100

AN_SCI 4324: Genomics of Plants and Animals

Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

Credit Hours: 2

Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent

AN_SCI 4332: Ruminant Nutrition

Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 4344: Processing Muscle Foods

(same as F_S 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience

problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

Credit Hours: 3

Prerequisites: One Chemistry course

AN_SCI 4354: Physiology and Biochemistry of Muscle as Food

(same as F_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor's consent

AN_SCI 4384: Reproductive Management

Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

Credit Hours: 3

Prerequisites: senior standing and AN_SCI 4314 and instructor's consent

AN_SCI 4387: Equine Breeding Management

Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas.

Credit Hours: 5

Prerequisites: AN_SCI 2175 and AN_SCI 4314; instructor's consent

AN_SCI 4437: Environmental Physiology

Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 4910: Senior Seminar in Captive Wild Animal Management

(same as F_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded A-F only.

Credit Hour: 1

Prerequisites: AN_SCI 1012 or F_W 1012 or instructor's consent; junior or senior standing

AN_SCI 4940: Internship in Animal Science & Technology

Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Graded on an S/U basis only.

Credit Hour: 1-12

Prerequisites: instructor's consent

AN_SCI 4950: Undergraduate Research in Animal Science

Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.

Credit Hour: 1-3

Prerequisites: At least sophomore standing or instructor's consent

AN_SCI 4973: Molecular and Cellular Techniques in Animal Science

A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper.

Credit Hours: 4

Prerequisites: an introductory course in biology and a course in organic chemistry, at least junior standing and instructor's consent

AN_SCI 4975: Beef Production and Management

Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor's consent

AN_SCI 4976: Dairy Production

Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212, and AN_SCI 3232 or instructor's consent

AN_SCI 4977: Horse Production

Systems of horse production: breeding, feeding and management of horses.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 4978: Swine Production

Systems of pork production: breeding, feeding, management of commercial and purebred swine.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 4979: Poultry Production

Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7001: Topics in Animal Science

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

Credit Hour: 1-4

Prerequisites: instructor's consent

AN_SCI 7312: Monogastric Nutrition

(same as NUTRIT 7020 and NUTR_S 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 7314: Physiology of Reproduction

Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

Credit Hours: 3

Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor's consent

AN_SCI 7323: Applied Livestock Genetics

Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems.

Credit Hours: 2

Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100

AN_SCI 7324: Genomics of Plants and Animals

Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

Credit Hours: 3

Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent; and instructor's consent

AN_SCI 7332: Ruminant Nutrition

Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

Credit Hours: 3

Prerequisites: AN_SCI 3212

AN_SCI 7344: Processing Muscle Foods

(same as F_S 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

Credit Hours: 3

Prerequisites: one Chemistry course

AN_SCI 7354: Physiology and Biochemistry of Muscle as Food

(same as F_S 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor's consent

AN_SCI 7384: Reproductive Management

Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

Credit Hours: 3

Prerequisites: AN_SCI 4314 and instructor's consent

AN_SCI 7437: Environmental Physiology

Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 7975: Beef Production and Management

Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor's consent

AN_SCI 7976: Dairy Production

Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212 and AN_SCI 3232 or instructor's consent

AN_SCI 7977: Horse Production

Systems of horse production: breeding, feeding and management of horses.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7978: Swine Production

Systems of pork production: breeding, feeding, management of commercial and purebred swine.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 7979: Poultry Production

Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

Credit Hours: 3

Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor's consent

AN_SCI 8085: Problems in Animal Science

Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. May be graded on S/U or A-F basis only.

Credit Hour: 1-6

Prerequisites: instructor's consent

AN_SCI 8087: Seminar in Animal Science

Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management.

Credit Hour: 1

AN_SCI 8090: Thesis Research in Animal Science

Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development livestock production and management. Graded on a S/U basis only.

Credit Hour: 1-99

AN_SCI 8413: Reproductive Biology Seminar

Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology.

Credit Hour: 1

AN_SCI 8414: Meat Quality

(same as F_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3214 or equivalent

AN_SCI 8415: Survey of Epigenetics

This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The courses designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 8420: Endocrinology

Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion.

Credit Hours: 3

Prerequisites: AN_SCI 7314 or equivalent

AN_SCI 8424: Meat Investigations

(same as F_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field of meat science. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: F_S 3214 /AN_SCI 3214 or equivalent; instructor's consent

AN_SCI 8431: Nutritional Biochemistry of Lipids

(Same as NUTR_S 8310 and NUTRIT 8310). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8438: Nutrient Regulation of Gene Expression

(same as NUTRIT 8438, NUTR_S 8438 and BIOCHM 8438). This second semester of the graduate nutritional sciences core curriculum will cover nutritional biochemistry of minerals and on research literature, with an emphasis on in-depth coverage of several minerals that illustrate emerging themes in mineral nutritional biochemistry and nutrient regulation of gene expression. The course will be taught in tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 1st semester Graduate Nutrition core curriculum

AN_SCI 8441: Livestock Production and Management Research Methods

Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research.

Credit Hours: 3

Prerequisites: STAT 4530/STAT 7530 or equivalent or instructor's consent

AN_SCI 8443: Functional Genomics of Mammalian Genomes: Focus on Microarray

The curriculum covers methods for functional genomics. It explores experimental designs, data filtering, ANOVA analysis, power calculations, clustering and classification systems, and functional annotation of genes through lectures, and bioinformatics and regular laboratories. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 4974 and BIO_SC 4374 or equivalent courses, Anova analysis course (STAT 7530) or equivalent experience in using Anova analysis

AN_SCI 8447: Recent Advances in Environmental and Endocrine Physiology

Seminar. Presentation, discussion, and critical evaluation of current status of selected topics in environmental and endocrine physiology.

Credit Hour: 1

Prerequisites: AN_SCI 3254 or equivalent

AN_SCI 8450: Research in Animal Science

Research in Animal Science

Credit Hour: 1-99

AN_SCI 8472: Amino Acid Metabolism

An in-depth study of amino acid metabolism and their relationship to animal nutrition.

Credit Hours: 2

Prerequisites: BIOCHM 4270 and BIOCHM 4272

AN_SCI 8633: Molecular and Network Evolution

(same as BIO_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

Credit Hours: 3

Prerequisites: Instructor's consent required

AN_SCI 8725: Science Outreach: Public Understanding of Science

(same as BIO_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

Credit Hour: 1-2

AN_SCI 9001: Topics in Animal Science

Credit Hour: 1-99

Prerequisites: instructor's consent

AN_SCI 9090: Dissertation Research in Animal Science

Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.

Credit Hour: 1-99

AN_SCI 9423: Genetics of Populations

Introduction to quantitative genetics with application to animal and plant breeding.

Credit Hours: 4

Prerequisites: STAT 4530 or STAT 7530

AN_SCI 9432: Ruminant Nutrition

(same as NUTRIT 8320). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.

Credit Hours: 3

Prerequisites: AN_SCI 4332/AN_SCI 7332 or equivalent and BIOCHM 4270

AN_SCI 9433: Gamete and Embryo Development

A classical and molecular approach to spermatogenesis, oogenesis, fertilization and preimplantation development in the domestic species.

Credit Hours: 3

Prerequisites: AN_SCI 4314/AN_SCI 7314 or BIO_SC 4984 or equivalent

AN_SCI 9434: Gonadal Function

(same as BIOMED 9434).

Credit Hours: 3

Prerequisites: AN_SCI 4314, biochemistry or cell biology and AN_SCI 8420

AN_SCI 9441: Bioenergetics

(same as NUTRIT 8400). Energetic interactions of animals and their physical and nutritional environments.

Credit Hours: 3

Prerequisites: instructor's consent

AN_SCI 9442: Vitamins and Minerals

Designed to provide students with an understanding of the chemical, metabolic, and functional role of vitamins and minerals in nutrition. While the primary focus will be on animals, comparative aspects to human nutrition will be discussed.

Credit Hours: 4

Prerequisites: AN_SCI 3212, BIOCHM 4270 or equivalent

AN_SCI 9452: Mycotoxins

Designed to provide students with an understanding of the occurrence of mycotoxins, mechanisms of toxicity, analytical methodology, and approaches for ameliorating the toxic effects of mycotoxin in animals.

Credit Hours: 3

Prerequisites: instructor's consent and courses in Nutrition and Biochemistry

Anthropology (ANTHRO)

ANTHRO 1000: General Anthropology

General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

Credit Hours: 3

ANTHRO 1000H: General Anthropology - Honors

General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 1001: Topics in Anthropology - General

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1002: Topics in Anthropology - Biological/Physical/Mathematics

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 1003: Topics in Anthropology - Behavioral

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1004: Topics in Anthropology - Social Science

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1005: Topics in Anthropology - Humanities

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1060: Human Language

(same as LINGST 1060, C_S_D 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

ANTHRO 1150: Introduction to Folklore Genres

(same as ENGLSH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 1200: Significant Discoveries of Archaeology

Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.

Credit Hours: 3

ANTHRO 1300: Multiculturalism: An Introduction

Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and

American examples; and emphasizes complexity of cultures, practicality of issues, and change.

Credit Hours: 3

ANTHRO 1350: Deviance: A Cross-Cultural Perspective

Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.

Credit Hours: 3

ANTHRO 1500: Monkeys, Apes and Humans

For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

Credit Hours: 3

ANTHRO 2001: Topics in Anthropology-General

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2002: Topics in Anthropology-Biological/Physical/Mathematics

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2003: Topics in Anthropology - Behavioral

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2004: Topics in Anthropology - Social Science

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2005: Topics in Anthropology - Humanities

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 2020: Fundamentals of Archaeology with Laboratory

Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 4

Recommended: sophomore standing

ANTHRO 2021: Fundamentals of Archaeology

Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 3

Recommended: sophomore standing

ANTHRO 2022: Fundamentals of Archaeology Lab

Involves hands-on experience with archaeological materials. No credit given to students who have taken ANTHRO 2020.

Credit Hour: 1

Prerequisites: must have completed ANTHRO 2021

ANTHRO 2030: Cultural Anthropology

Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2040: Anthropological Linguistics

(same as LINGST 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2050: Introduction to Biological Anthropology with Laboratory

A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. No credit for both ANTHRO 2050 and ANTHRO 2051. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: MATH 1100

Recommended: sophomore standing

ANTHRO 2051: Introduction to Biological Anthropology

A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. No credit for both ANTHRO 2050 and ANTHRO 2051.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2052: Biological Anthropology Laboratory

Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.

Credit Hours: 2

Prerequisites: ANTHRO 2051 (or equivalent) and MATH 1100

ANTHRO 2100: Indigenous Religions

(same as REL_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

ANTHRO 2100H: Indigenous Religions - Honors

(same as REL_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 2150: Introduction to Folklore Field Research

(same as ENGLSH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.

Credit Hours: 3

Prerequisites: ENGLSH 1000

ANTHRO 2215: World Archaeology

Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2300: Anthropology of War

Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2340: Hunters and Gatherers

Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2500: Primate Anatomy and Evolution

This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2520: Forensic Anthropology

This course will introduce students to how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, skeletal pathology, body decomposition, and archaeological recovery of evidence to medicolegal investigations.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2570: Parents and Offspring

A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2580: Evolution of Human Sexuality

Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory.

Credit Hours: 3

Recommended: Sophomore standing

ANTHRO 2800: Introduction to Field Methods in Archaeology

Techniques of field research and laboratory analysis through field experience.

Credit Hour: 1-6

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 2825: Analyzing Artifacts

A brief introduction to the main methods used to analyze artifacts.

Credit Hours: 3

ANTHRO 2950: Research Skills in Anthropology

Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours.

Credit Hour: 1-3

Prerequisites: instructor's consent

ANTHRO 3001: Topics in Anthropology - General

Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3002: Topics in Anthropology-Biological/Physical/Mathematics

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3003: Topics in Anthropology - Behavioral Science

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3004: Topics in Anthropology - Social Science

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3005: Topics in Anthropology - Humanities

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3150: American Folklore

(same as ENGLSH 3700). Regional and ethnic American folklore, with emphasis on analysis of folklore in context. Book reports and two analytical papers based on student field research required.

Credit Hours: 3

ANTHRO 3380: Native American Religions

(same as REL_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

ANTHRO 3380H: Native American Religions - Honors

(same as REL_ST 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

Prerequisites: Honors eligibility required

ANTHRO 3470: Culture as Communication

(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

Credit Hours: 3

Prerequisites: sophomore standing

ANTHRO 3540: Human Biology and Life History

A general survey of human biology, focusing on the development of the individual from infancy to adult and the biology of human populations.

Credit Hours: 3

Prerequisites: one course in Anthropology or Biological Sciences

ANTHRO 3560: Plagues and Peoples

Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

ANTHRO 3600: North American Indian Culture

Comparative study of American Indians north of Mexico, emphasizes eastern United States.

Credit Hours: 3

ANTHRO 3610: Peoples of Canada

This course provides an anthropological approach to the culture and peoples of Canada. The course will include in depth studies of several First Nations People, Quebec, various recent immigrant populations, and the modern popular culture of Canada.

Credit Hours: 3

ANTHRO 3650: Aztec, Maya, and Inca Civilization

Origin of native Americans and development of American civilizations emphasizing Aztecs, Mayas, and Incas; rise of these civilizations known from archaeology, early European and early native American accounts, and the condition of the descendants today.

Credit Hours: 3

Prerequisites: sophomore standing

ANTHRO 3660: Peoples of the Andes

Archaeological and linguistic prehistory set the stage for the clash of Iberian and indigenous peoples whose descendants make up the Andean countries. Ethnographic studies provides a basis for their understanding.

Credit Hours: 3

Prerequisites: sophomore standing

ANTHRO 3680: Plants and People in Native America

Explores the present and past interactions between people and the plant world, covering use of plants as foods, medicines, and in rituals, and reviewing the origin of major food plants.

Credit Hours: 3

Prerequisites: sophomore standing

ANTHRO 3700: Cultures of Europe

Examines ethnic, linguistic, and folk cultural backgrounds of contemporary Europe and the articulation of local sociocultural units with national society and culture.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

ANTHRO 3780: Cultures of Southeast Asia

Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

Credit Hours: 3

ANTHRO 4001: Topics in Anthropology-General

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4002: Topics in Anthropology - Biological/Physical/Mathematics

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4003: Topics in Anthropology - Behavioral Science

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4004: Topics in Anthropology - Social Science

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4005: Topics in Anthropology - Humanities

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 4150: Special Themes in Folklore

(same as ENGLSH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

Credit Hours: 3

ANTHRO 4160: Themes in African Diaspora Folklore

(same as ENGLSH 4710 and BL_STU 4710). Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group.

ANTHRO 4150 and ANTHRO 4160 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

Prerequisites: junior standing

ANTHRO 4200: Environment and Archaeology

Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 4240: History of Archaeology

Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 4280: Archaeology of Religion

(same as REL_ST 4280). Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 4300: Comparative Social Organization

Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally.

Credit Hours: 3

Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4320: Ecological and Environmental Anthropology

Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4340: Cultural Evolution and Change

Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

Credit Hours: 3

Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4350: Psychological Anthropology

Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

Credit Hours: 3

ANTHRO 4360: Medical Anthropology

Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4370: Anthropology of Gender

(same as WGST 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 4380: Anthropological Theories of Religion

(same as REL_ST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

Prerequisites: ANTHRO 2030, ANTHRO 2100 or REL_ST 2100, or instructor's consent

ANTHRO 4400: Language and Culture

(same as LINGST 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

Credit Hours: 3

Prerequisites: ANTHRO 2040 or LINGST 2040 or instructor's consent

ANTHRO 4412: Gender, Language, and Communication

(same as COMMUN 4412 and LINGST 4412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

Prerequisites: junior standing or departmental consent

ANTHRO 4420: Historical Linguistics

(same as LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4500: Human Origins

History and theory in the study of human paleontology.

Credit Hours: 5

Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor's consent

ANTHRO 4540: Human Biological Variation

Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3

Prerequisites: ANTHRO 2050 or ANTHRO 2051 or BIO_SC 1010 and MATH 1100 or MATH 1120

ANTHRO 4580: Evolutionary Medicine

Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

Credit Hours: 3

Prerequisites: lower level course in Biology or Biological Anthropology, junior or senior standing or instructor's consent

ANTHRO 4600: Ethnographic Studies of Selected Cultures

Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

ANTHRO 4620: North American Archaeology

Ancient peoples and development of American Indian culture.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or instructor's consent

ANTHRO 4640: Prehistory of the Greater Southwest

The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4650: Prehistory of Mesoamerica

Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 4670: Archaeology of South America

Development of culture in South America from the Pleistocene to European contact.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021, or junior or senior standing

ANTHRO 4680: Cultures and Peoples of the Amazon

Ethnographic survey of indigenous Amazonian cultures.

Credit Hours: 3

Prerequisites: Junior standing required

ANTHRO 4700: Old World Prehistory

Beginnings of culture in the Old World through the early Iron Age.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021, or instructor's consent

ANTHRO 4720: Mesolithic, Neolithic, and Bronze Age Archaeology

Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4740: Celtic and Iron Age Archaeology

Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4770: Asiatic Prehistory

Prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4790: Culture and Society in South Asia

(same as S_A_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

Credit Hours: 3

Prerequisites: junior standing

ANTHRO 4800: Field Methods in Archaeology

Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

Credit Hour: 1-8

Prerequisites: ANTHRO 2800 or equivalent

ANTHRO 4810: Paleoethnobotany

Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.

Credit Hours: 3

Prerequisites: junior or senior standing or instructor's consent

ANTHRO 4820: Zooarchaeology

Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor's consent

ANTHRO 4826: Stone Artifact Analysis

Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor's consent

ANTHRO 4828: Archaeological Analysis of Ceramics

To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 4830: Ethnographic Methods

Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

Credit Hours: 3

Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4850: Practical Phonetics for Fieldwork

(same as LINGST 4850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

ANTHRO 4860: Techniques in Linguistic Analysis

(same as LINGST 4860). Problems in analyzing data from various languages.

Credit Hours: 3

Prerequisites: introductory course in Linguistics or instructor's consent

ANTHRO 4870: Field Methods in Linguistics

(same as LINGST 4870 and ENGLSH 4670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.

Credit Hours: 4

Prerequisites: 9 hours of Linguistics or instructor's consent

ANTHRO 4880: Demographic Anthropology

The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 and junior or senior standing or instructor's consent

ANTHRO 4885: Anthropological Genetics

Population genetics theory and methods applied to human and primate evolution and variation.

Credit Hours: 3

Prerequisites: ANTHRO 2050 or ANTHRO 2051 and ANTHRO 2052, or BIO_SC 1500, or instructor's consent

ANTHRO 4890: Human Skeletal Identification and Analysis

Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

Credit Hours: 5

Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor's consent

ANTHRO 4894: Skeletal Biology

This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.

Credit Hours: 3

Prerequisites: ANTHRO 4890 or equivalent background in osteology and/ or anatomy

ANTHRO 4940: Internship in Anthropology

Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: junior standing, Anthropology major, coordinator's consent, 2.5 GPA

ANTHRO 4950H: Honors Research in Anthropology

Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. May be repeated for up to 6 credit hours.

Credit Hours: 3

Prerequisites: Anthropology majors only with junior or senior standing; Honors level GPA, instructor's consent

ANTHRO 4950: Undergraduate Research in Anthropology

Advanced research approved by and under the direction of a departmental faculty member.

Credit Hour: 2-8

Prerequisites: junior or senior standing and instructor's consent

ANTHRO 4960: Undergraduate Readings in Anthropology

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: two courses in Anthropology and instructor's consent

ANTHRO 4990: Capstone Seminar in Anthropology

Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

Credit Hours: 3

Prerequisites: Anthropology major and senior standing, or instructor's consent

ANTHRO 7001: Topics in Anthropology-General

Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.

Credit Hours: 3

ANTHRO 7150: Special Themes in Folklore

(same as ENGLSH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Instructor's consent for repetition.

Credit Hours: 3

ANTHRO 7160: Themes in African Diaspora Folklore

(same as ENGLSH 7710 and BL_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLSH 7700 and ENGLSH 7710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

ANTHRO 7200: Environment and Archaeology

Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3

ANTHRO 7240: History of Archaeology

Growth of archaeology worldwide since AD 1700. Emphasis include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

Credit Hours: 3

ANTHRO 7280: Archaeology of Religion

(Same as REL_ST 7280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 7300: Comparative Social Organization

Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.

Credit Hours: 3

ANTHRO 7320: Ecological and Environmental Anthropology

Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

Credit Hours: 3

ANTHRO 7340: Cultural Evolution and Change

Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

Credit Hours: 3

ANTHRO 7350: Psychological Anthropology

Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

Credit Hours: 3

ANTHRO 7360: Medical Anthropology

Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

Credit Hours: 3

ANTHRO 7370: Anthropology of Gender

(Same as WGST 7370) The Anthropology of Gender Introduces the student to the variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 7380: Anthropological Theory of Religions

(same as REL_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

ANTHRO 7400: Language and Culture

(same as LINGST 7400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

Credit Hours: 3

ANTHRO 7412: Gender, Language, and Communication

(same as COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

ANTHRO 7420: Historical Linguistics

(same as LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3

ANTHRO 7500: Human Origins

History and theory in the study of human paleontology.

Credit Hours: 5

ANTHRO 7540: Human Biological Variation

Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3

ANTHRO 7580: Evolutionary Medicine

Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

Credit Hours: 3

ANTHRO 7600: Ethnographic Studies of Selected Cultures

Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

Credit Hours: 3

ANTHRO 7620: North American Archaeology

Ancient peoples and development of American Indian culture.

Credit Hours: 3

ANTHRO 7640: Prehistory of the Greater Southwest

The course will introduce students to the archaeology of aboriginal peoples of the American southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021

ANTHRO 7650: Prehistory of Mesoamerica

Covers the archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 7670: Archaeology of South America

Development of culture in South America from the Pleistocene to European contact.

Credit Hours: 3

Prerequisites: ANTHRO 2020 or ANTHRO 2021 or graduate standing

ANTHRO 7680: Cultures and Peoples of the Amazon

Ethnographic survey of indigenous Amazonian cultures

Credit Hours: 3

ANTHRO 7700: Old World Prehistory

Beginnings of culture in the old world through the early Iron Age.

Credit Hours: 3

ANTHRO 7720: Mesolithic, Neolithic, and Bronze Age Archaeology

Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods.

Credit Hours: 3

ANTHRO 7740: Celtic and Iron Age Archaeology

Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures.

Credit Hours: 3

ANTHRO 7770: Asiatic Prehistory

Survey of the prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania.

Credit Hours: 3

ANTHRO 7790: Cultures and Society in South Asia

(same as S_A_ST 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora.

Credit Hours: 3

ANTHRO 7800: Field Methods in Archaeology

Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

Credit Hour: 1-8

ANTHRO 7810: Paleoethnobotany

Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized.

Credit Hours: 3

ANTHRO 7820: Zooarchaeology

Survey of specialized techniques for archaeological/faunal analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication.

Credit Hours: 3

ANTHRO 7826: Stone Artifact Analysis

Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

Credit Hours: 3

ANTHRO 7828: Archaeological Analysis of Ceramics

To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

Credit Hours: 3

Prerequisites: ANTHRO 2020 and/or ANTHRO 2022

ANTHRO 7830: Ethnographic Methods

Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

Credit Hours: 3

ANTHRO 7850: Practical Phonetics for Fieldwork

(same as LINGST 7850). Self-paced course using computer and tape recorded lessons from world's languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions.

Credit Hours: 3

ANTHRO 7860: Techniques in Linguistic Analysis

(same as LINGST 7860). Problems in analyzing data from various languages.

Credit Hours: 3

ANTHRO 7870: Field Methods in Linguistics

(same as LINGST 7870 and ENGLSH 7670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language.

Credit Hours: 4

Prerequisites: 6 hours of Linguistics and instructor's consent

ANTHRO 7880: Demographic Anthropology

The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.

Credit Hours: 3

ANTHRO 7885: Anthropological Genetics

Population genetic theory and methods applied to human and primate evolution and variation.

Credit Hours: 3

Prerequisites: ANTHRO 2050 and ANTHRO 2052 or BIO_SC 1500

ANTHRO 7890: Human Skeletal Identification and Analysis

Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

Credit Hours: 5

ANTHRO 7894: Skeletal Biology

This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored.

Credit Hours: 3

ANTHRO 7940: Internship in Anthropology

Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: coordinator's consent

ANTHRO 7950: Introduction to Post-Graduate Anthropology

How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graded on S/U basis only.

Credit Hour: 1

ANTHRO 7960: Graduate Readings in Anthropology

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 7990: Non Thesis Research in Anthropology

Original research not leading to the preparation of a thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 8001: Topics in Anthropology-General

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and is announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 8010: History of Anthropology I

Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.

Credit Hours: 3

ANTHRO 8020: History of Anthropology II

Development of anthropological theories, methods, perspectives, major figures and contributions in archaeology and biological anthropology.

Credit Hours: 3

ANTHRO 8090: Masters Thesis Research in Anthropology

Advanced work leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: consent of major advisor

ANTHRO 8157: Seminar in Folklore

(same as ENGLSH 8700 and REL_ST 8700). Roots of folklore scholarship and methodology; their evolution in modern approaches to the study of oral, traditional, verbal genres; and their performance in natural folk groups. May repeat to twelve hours with departments consent.

Credit Hours: 3

ANTHRO 8187: Seminar in Ecological Adaptation

Relationships and interactions between humans and their environments, with emphasis on the physical and cultural adaptations to environment. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8257: Seminar in Ethnohistory

Introduction to the uses of historical documents and historical methods in anthropological research. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8287: Seminar in Theory and Methods in Archaeology

Application of theory and conceptual frameworks to archaeological studies drawn from both Old and New Worlds. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8357: Seminar in Psychological Anthropology

Focuses on developments in psychological anthropology, cross-cultural psychology. Special attention on cognition, perception, socialization, personality assessment, psycho-cultural change, psycho-linguistics, psychometrics, within cross-cultural contexts. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8387: Seminar in Health Anthropology

We survey the field of health behaviors from an anthropological perspective. We ask, what are health behaviors? and what models have social scientists proposed to account for such actions? May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8487: Seminar in Anthropological Linguistics

(same as LINGST 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.

Credit Hours: 3

Prerequisites: instructor's consent

ANTHRO 8587: Seminar in Physical Anthropology

Readings and discussion concerning current problems in human and nonhuman primate evolution, with emphasis on taxonomy, morphology, and behavior. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8687: Seminar in Cultural Dynamics

Focuses on geographical, topical, and/or theoretical developments within cultural anthropology. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8787: Seminar in Old World Archaeology

Intensive studies in application of anthropological concepts to problems in Old World archaeology and prehistory. May be repeated to 9 hours maximum.

Credit Hours: 3

ANTHRO 8857: Scientific Writing in Anthropology

Students will be taught to construct research papers that reflect logic, organization, and clarity. Topics covered include outline preparation, syntax, punctuation, sentence construction, and correct reference citation.

Credit Hours: 3

ANTHRO 8887: Seminar in Anthropological Methods

Focuses on specific methods/techniques for collecting and analyzing data in archaeological, biological, linguistic, and/or cultural anthropology. May be repeated to 6 hours maximum.

Credit Hours: 3

ANTHRO 8888: Analyzing Anthropological Data I

Provides students with the conceptual and analytic tools necessary to conduct and evaluate the analysis of anthropological data. Examples gleaned from archaeology, bioanthropology, ethnography, and linguistics will provide a broad perspective of the application and utility of the various methods discussed.

Credit Hours: 3

ANTHRO 8889: Analyzing Anthropological Data II

This course introduces a variety of conceptual tools and advanced quantitative methods that anthropologists use to analyze their data. It includes an introduction of common software packages used to manipulate and analyze anthropological data.

Credit Hours: 3

Prerequisites: ANTHRO 8888 or grad-level intro stats or instructor's consent

ANTHRO 8960: Graduate Readings in Anthropology

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

ANTHRO 8987: Seminar in Formal Anthropological Research Design

Methods of fitting statistical and formal research designs to quantitative and qualitative data discussed and illustrated, with research by participants. May be repeated to 9 hours maximum.

Credit Hours: 3

Prerequisites: introductory course in statistics

ANTHRO 8990: Non Thesis Research in Anthropology

Original research not leading to the preparation of a dissertation.

Credit Hour: 1-99

Prerequisites: consent of major advisor

ANTHRO 9090: Doctoral Dissertation Research in Anthropology

Advanced work leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: consent of major advisor

Arabic (ARABIC)

ARABIC 1100: Elementary Arabic I

For beginners with no prior knowledge of Arabic. An elementary level course designed to facilitate student's acquisition of basic proficiency in communication within culturally significant contexts. Students learn Modern Standard Arabic language skills in an environment integrating interactive video and classroom instruction.

Credit Hours: 6

ARABIC 1200: Elementary Arabic II

This course builds upon the foundation established in ARABIC 1100. Greater emphasis is placed on oral and written expression. Cultural issues are explored in an environment integrating interactive video and classroom instruction.

Credit Hours: 6

ARABIC 2005: Undergraduate Topics in Arabic - Humanities

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3

Prerequisites: sophomore standing or instructor's consent

ARABIC 2130: Intermediate Arabic

Builds on students' knowledge of Elementary Arabic by investing in four language skills of listening, speaking, reading, and writing. Course is culturally oriented and considers various social, political, and religious forces to play in Arab world. Offers a unique blend of modern standards and colloquial Arabic. Enables students to develop listening comprehension, initiate and sustain conversations on daily-life topics, read texts on familiar topics, and write informal essays on topics, and write informal essays on topics connected to daily life.

Credit Hours: 3

Prerequisites: ARABIC 1200 or equivalent

Architectural Studies (ARCHST)

ARCHST 1005: Topics in Architectural Studies - Humanities

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 1100: Visual Design

Design study on introduction to basic design and visual composition and their application to creation of two- and three-dimensional abstract and / or functional design. Studio exercises expressed through drawings and abstract models, using various media.

Credit Hours: 3

ARCHST 1200: Architectural Drafting and Working Drawings

Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

Credit Hours: 3

ARCHST 1600: Fundamentals of Environmental Design

Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

Credit Hours: 3

Prerequisites: ENGLSH 1100

ARCHST 2005: Topics in Architectural Studies - Humanities

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 2085: Problems in Architectural Studies

Supervised independent work.

Credit Hours: 3

Prerequisites: instructor's consent

ARCHST 2100: Understanding Architecture and the American City

Analysis of the American city and its architecture.

Credit Hours: 3

ARCHST 2210: Understanding Visualization for Animated Films

Provides a critical overview of design and visualization techniques in animated film making. Emphasizes the role of built environment and spatial design features.

Credit Hours: 3

ARCHST 2220: Introduction to CAD

Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design.

Credit Hours: 3

Prerequisites: ARCHST 1200

ARCHST 2230: Design Communication I

Beginning studio course in techniques and conventions of graphic communication as an aid in the design process for interior designers.

Credit Hours: 3

Prerequisites: ARCHST 1100, ARCHST 1200, and ART_DRAW 1050

ARCHST 2310: Building Systems

Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating.

Credit Hours: 3

Prerequisites: ARCHST 1200, MATH 1100 or MATH 1120

ARCHST 2315: Introduction to Building Systems Laboratory

Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.

Credit Hour: 1

ARCHST 2316: Advanced Building Systems Lab

Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: ARCHST 2315

ARCHST 2811: Studio I

Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment.

Credit Hours: 4

Prerequisites: ARCHST 1100, ARCHST 1200, ART_DRAW 1050 and admission to Studio Sequence in Architectural Studies

ARCHST 3100: Color and Light

The theory, application, and specification of color and light for interior and architectural design. Includes assigned lab exercises for color and light portfolio.

Credit Hours: 3

Prerequisites: 3.0 credit visual literacy coursework Architectural Studies, Art, Art History or equivalent

ARCHST 3182: Studio II

Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context.

Credit Hours: 4

Prerequisites: ARCHST 2811

ARCHST 3230: Advanced Design Communication Using BIM

Advanced course in techniques and conventions of computer aided design (CAD) and Building Information Modeling (BIM) for contemporary design process.

Credit Hours: 3

Prerequisites: ARCHST 2230

ARCHST 3371: Design Resource Management

Field experience (5 hours per week) in organization and management of resources used by interior designers, including references, product information, and samples of materials and finishes.

Credit Hour: 1

Prerequisites: restricted to Architectural Studies students only

ARCHST 3600: Environmental Analysis

Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.

Credit Hours: 3

Prerequisites: ARCHST 1600

ARCHST 3860: Human Factors Programming

Design Programming for Human Factors using a Case Study.

Credit Hours: 3

Prerequisites: ARCHST 1600

ARCHST 4001: Topics in Architectural Studies

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 4085: Problems in Architectural Studies

Supervised independent work.

Credit Hour: 1-99

Prerequisites: 3000-level course in field of problem and junior or senior standing and instructor's consent

ARCHST 4230: Computer Graphic Application for Design I

Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.

Credit Hours: 3

Prerequisites: junior standing

ARCHST 4320: Materials, Methods and Products

Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

Credit Hours: 3

Prerequisites or Corequisites: ARCHST 2310 or instructor's consent

ARCHST 4323: Sustainable Technologies and Systems

An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors.

Credit Hours: 3

Prerequisites: junior standing required

ARCHST 4333: Compliance and Specifications

Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

Credit Hours: 3

Prerequisites: ARCHST 2220, ARCHST 4320, ARCHST 4813 or ARCHST 4823

ARCHST 4355: Recent Trends in Digital Media I

Recent Trends in Digital Media I

Credit Hour: 1-99

ARCHST 4411: Study Abroad in Architectural History

Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.

Credit Hour: 1-3

Prerequisites: instructor's consent

ARCHST 4420: History of the Designed Environment after 1750

An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or AR_H_A 1120

ARCHST 4430: Guiding Design with Historic Preservation

Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.

Credit Hours: 3

Prerequisites or Corequisites: American History or Government, or Art History, or instructor's consent

ARCHST 4435: History of the Designed Environment to 1750

An in-depth study of the designed environment including interiors, architecture, art, and the decorative arts within the major historical periods and cultural context from prehistory to the Industrial Revolution.

Credit Hours: 3

Prerequisites: ARCHST 4430 or AR_H_A 1110 or AR_H_A 1120

ARCHST 4440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution

Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or AR_H_A 1120, or ARCHST 4430

ARCHST 4550: Visual Presentation for Design

Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout, storytelling, critiques, and hands on exercise.

Credit Hours: 3

ARCHST 4555: Recent Trends

Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

Credit Hour: 1-99

ARCHST 4620: Environment and Behavior

Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.

Credit Hours: 3

Prerequisites: junior standing

ARCHST 4630: Shaping Human Settlements

Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.

Credit Hours: 3

Prerequisites: junior standing

ARCHST 4660: Housing Concepts and Issues

Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.

Credit Hours: 3

Prerequisites: junior standing

ARCHST 4700: Place-Making in Community Design

Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.

Credit Hours: 3

Prerequisites: junior standing

ARCHST 4710: Design Business Practices

Analysis of the basic professional, human, and business skills necessary for the successful design practice. Pre- or Co-requisites of Studio IV and anticipated graduation during final academic year.

Credit Hours: 3

ARCHST 4813: Interiors Studio III

Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors.

Credit Hours: 4

Prerequisites: instructor's consent required

Corequisites: ARCHST 3182 and ARCHST 3230

ARCHST 4814: Interiors Studio IV

Continuation of ARCHST 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces--both vertically and horizontally.

Credit Hours: 4

Prerequisites: ARCHST 4813

ARCHST 4815: Construction Documents and Building Information Modeling Studio

Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling.

Credit Hours: 4

Prerequisites or Corequisites: ARCHST 4814 or ARCHST 4824

ARCHST 4823: Architectural Studio III

Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specifics to architecture.

Credit Hours: 4

Prerequisites: ARCHST 3182; ARCHST 3230

ARCHST 4824: Architectural Studio IV

Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.

Credit Hours: 4

Prerequisites: ARCHST 4823

ARCHST 4860: Programming for Thesis Design Studio

Develop written comprehensive program for thesis design studio project. Supervised by student-selected committee -- one departmental thesis advisor and at least one additional faculty member.

Credit Hour: 0-1

Prerequisites: ARCHST 3860 and ARCHST 4814 or ARCHST 4824

ARCHST 4940: Internship in Environmental Design

Field experience in design under professional and educational supervision. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 4960: Readings in Architectural Studio

Readings in recent research materials.

Credit Hour: 1-99

ARCHST 4961: Design Research and Service Design

(cross-leveled with ARCHST 7961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and Communication of research findings to informed design concepts.

Credit Hours: 3

Prerequisites: senior standing and instructor's consent

ARCHST 4962: Information Visualization and Visual Analytics

(cross-leveled with ARCHST 7962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3

Prerequisites: senior standing and instructor's consent

ARCHST 4963: Human Factors Research for Design

(cross-leveled with ARCHST 7963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use

research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3

Prerequisites: ARCHST 3860 or instructor's consent

ARCHST 4964: Design Thinking and Creative Process

(cross-leveled with ARCHST 7964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition computations, and design protocol studies.

Credit Hours: 3

Prerequisites: ARCHST 4813 or ARCHST 4823 or instructor's consent

ARCHST 4990: Thesis Design Studio

Capstone experience on a single comprehensive project. Objective is to enable synthesis of previous course work by addressing a design problem defined in ARCHST 4860.

Credit Hours: 4

Prerequisites: ARCHST 4860, ARCHST 4814 or ARCHST 4824

ARCHST 7001: Topics in Environmental Design

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 7085: Problems in Environmental Design

Supervised independent work.

Credit Hour: 1-99

Prerequisites: 3000-level course in field of problem and instructor's consent

ARCHST 7100: Allied Architecture and Urban Design

Overview of the built environment in relation to architecture and allied design. Emphasis on architecture, interior, landscape and urban design studies.

Credit Hours: 3

ARCHST 7230: Computer Graphic Application for Design I

Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.

Credit Hours: 3

ARCHST 7232: Graduate Design Communication I

Studio course in techniques and conventions of graphic communication as an aid in the design process of built forms.

Credit Hours: 3

ARCHST 7310: Graduate Building Systems

Integrated building systems; structure construction, technology, comfort; including voice-communications, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems, project estimating and management.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120

ARCHST 7315: Graduate Systems Laboratory

Experimental learning setting involving building construction systems, renovation, materials and finishes testing and experimentation. Focus on hands-on opportunities investigating building technology properties in detail. Laboratory 3 hrs/week.

Credit Hour: 1-9

ARCHST 7320: Materials, Methods and Products

Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120

ARCHST 7323: Sustainable Technologies and Systems

An in-depth study of ecologically-sensitive and energy-efficient strategies used in buildings and interiors.

Credit Hours: 3

ARCHST 7325: Energy-Efficient Building Design

This course is a broad study of energy use and energy-efficient strategies for buildings. The course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies. Recommended for graduate students with undergraduate degrees and experience in engineering, architecture, and/or building science.

Credit Hours: 3

ARCHST 7333: Compliance and Specifications

Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

Credit Hours: 3

Prerequisites: T_A_M 2100 and MATH 1100 or MATH 1120

ARCHST 7355: Recent Trends in Digital Media I

Recent Trends in Digital Media I

Credit Hour: 2-4

ARCHST 7410: History of the Designed Environment to 1750

An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution.

Credit Hours: 3

Prerequisites: AR_H_A 1110 and AR_H_A 1120

ARCHST 7411: Study Abroad in Architectural History

Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 7420: History of the Designed Environment after 1750

An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or AR_H_A 1120

ARCHST 7430: Guiding Design with Historic Preservation

Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.

Credit Hours: 3

Prerequisites: American History or Government or Art History or instructor's consent

ARCHST 7440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution

Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.

Credit Hours: 3

ARCHST 7550: Visual Presentation for Design

Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout storytelling, critiques and hands on exercises.

Credit Hours: 3

ARCHST 7555: Recent Trends in Environmental Design

Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

Credit Hour: 1-99

ARCHST 7620: Environment and Behavior

Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.

Credit Hours: 3

ARCHST 7630: Shaping Human Settlements

Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.

Credit Hours: 3

ARCHST 7640: Physical Function and Older Adults

(same as F_C_MD 7750, HMI 7750, H_D_FS 7750, NURSE 7750, P_HLTH 7750, and SOC_WK 7752). This course takes an interdisciplinary approach to understanding and improving the physical function and independence of older adults and explores approaches to

alleviate disabling conditions that interfere with physical function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

ARCHST 7650: Psychosocial Function and Older Adults

(same as F_C_MD 7751, HMI 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

ARCHST 7660: Housing Concepts and Issues

Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections.

Credit Hour: 1-12

ARCHST 7700: Place-Making in Community Design

Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.

Credit Hours: 3

ARCHST 7710: Design Business Practices

Analysis of the basic professional, human, and business skills necessary for the successful design practice. Prerequisites or Corequisites of Studio IV and anticipated graduation during final academic year.

Credit Hours: 3

ARCHST 7815: Studio V

A continuation of previous studio with emphasis on digital media.

Credit Hours: 4

ARCHST 7840: Graduate Design Studio

Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

Credit Hours: 3

Prerequisites: instructor's consent

ARCHST 7940: Internship in Environmental Design

Field experience in design under professional and educational supervision. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 7960: Readings in Environmental Design

Readings in recent research materials.

Credit Hour: 1-99

ARCHST 7961: Design Research and Service Design

(cross-leveled with ARCHST 4961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and communication of research findings to inform design concepts.

Credit Hours: 3

ARCHST 7962: Information Visualization and Visual Analytics

(cross-leveled with ARCHST 4962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3

ARCHST 7963: Human Factors Research for Design

(cross-leveled with ARCHST 4963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3

ARCHST 7964: Design Thinking and Creative Process

(cross-leveled with ARCHST 4964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition and computations, and design protocol studies.

Credit Hours: 3

ARCHST 8001: Topics in Environmental Design

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 8050: Research Methods in Environmental Design

A comparative study of quantitative and qualitative methods in environmental design with emphasis on research results and analyses. Lectures and seminar discussions.

Credit Hours: 3

Prerequisites: 12 hours advanced design

ARCHST 8085: Problems in Environmental Design

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

ARCHST 8090: Master's Research in Environmental Design

Independent research leading to a creative project. Graded on S/U basis only.

Credit Hour: 1-99

ARCHST 8230: Computer Graphic Application for Design II

Creative computer graphic modeling, rendering and animation projects related to the academic background and interests of individual students. May be repeated to 6 hours maximum.

Credit Hours: 3

ARCHST 8233: Graduate Design Communication II

Advanced studio in techniques and conventions of graphic communication as aides in the design process.

Credit Hours: 3

Prerequisites: ARCHST 7232 or advisor's consent

ARCHST 8600: Graduate Environmental Analysis

Analysis of design principles and organizational factors operating in a building by means of dissection. Volumetric disposition, circulation pattern, axes, structural system, materials, purpose, and symbolism.

Credit Hours: 3

ARCHST 8630: Philosophy of Environmental Design Research

Formal environmental design theory concerning historical precedents, current aesthetic trends, and design processes. Assignments investigate philosophical influences, architectonic vocabularies, and communication of idea and artifact. May be repeated up to 12 credit hours.

Credit Hours: 3

ARCHST 8650: Theories in Architectural and Interior Design

Architectural and interior design theory is explored as a field of inquiry. Students become familiar with a theoretical framework that is sensitive to the play between the principles of a building (what it is as a design) and the circumstances of a building (what it becomes to be).

Credit Hours: 3

ARCHST 8820: Graduate Digital Design Studio

Graduate level design experience emphasizing project complexity, design skill refinement, and use of digital media for design representation.

Credit Hour: 1-99

ARCHST 8830: Digital Design Studio II

Advanced graduate level design experience emphasizing design, documentation, and representation using digital media. Optional development of graduate thesis project may be scheduled in this studio.

Credit Hours: 4

ARCHST 8840: Graduate Design Studio

Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

Credit Hour: 1-99

Prerequisites: instructor's consent

ARCHST 8850: Seminar in Environmental Design

Reports, discussion of recent work in area of concentration.

Credit Hour: 1-4

ARCHST 8887: Environment and Behavior II

Synthesis of environment and behavior themes in design research and application to professional practice. Research on socio-behavioral

phenomena, user groups, places. Emphasis on integrated interactive character of elements.

Credit Hours: 3

ARCHST 8950: Qualitative Research Methods

Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Course may be repeated for credit.

Credit Hours: 3

ARCHST 8960: Readings in Environmental Design

Readings in recent research materials.

Credit Hour: 1-99

Prerequisites: ARCHST 4960 or ARCHST 7960

ARCHST 8990: Thesis Project Proposal

The formal opportunity to express the intent and scope of the thesis project.

Credit Hour: 1

Prerequisites: instructor's consent

ARCHST 9001: Topics in Environmental Design

Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 9085: Problems in Environmental Design

Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

ARCHST 9090: Doctoral Research in Environmental Design

Independent research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

ARCHST 9555: Recent Trends in Environmental Design

For students seeking additional knowledge and understanding in specific subject matter areas.

Credit Hour: 1-99

ARCHST 9990: Dissertation Proposal

A formal dissertation proposal is written and presented to the dissertation committee for approval.

Credit Hour: 1

Prerequisites: instructor's consent

ARCHST 9995: Pilot Project for Dissertation

Working with advisor, student proposes, conducts, and reports the findings from a pilot study germane to the dissertation topic in preparation for the dissertation research.

Credit Hour: 1-99

Prerequisites: instructor's consent

Art History And Archaeology (AR_H_A)

AR_H_A 1005: Undergraduate Topics in Art History and Archaeology- Humanities

Special studies in Art History and Archaeology.

Credit Hour: 1

AR_H_A 1010: Introduction to Museum of Art and Archaeology, UMC

This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of the Museum, to its operation and to its collection. Guest lecturers from the from the Museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.

Credit Hour: 1

AR_H_A 1020: Giotto and the Arena Chapel

This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.

Credit Hour: 1

AR_H_A 1030: Early Works of Michelangelo

This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.

Credit Hour: 1

AR_H_A 1040: Rembrandt

This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special attention is give to the appreciation of his art by his contemporaries.

Credit Hour: 1

AR_H_A 1105: Undergraduate Topics in Art History and Archaeology

Special studies in Art History and Archaeology.

Credit Hours: 3

AR_H_A 1110: Ancient and Medieval Art

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

Credit Hours: 3

AR_H_A 1110H: Ancient & Medieval Art - Honors

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

Credit Hours: 3

Prerequisites: Honors eligibility required

AR_H_A 1120: Renaissance through Modern Art

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

Credit Hours: 3

AR_H_A 1120H: Renaissance through Modern Art - Honors

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

Credit Hours: 3

Prerequisites: Honors eligibility required

AR_H_A 1230: Introduction to Asian Arts

(same as HIST 1820, REL_ST 1820, S_A_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

Credit Hours: 3

AR_H_A 2005: Topics Art History and Archaeology - Humanities

Study of special topics in Art History and Archaeology.

Credit Hour: 1-3

AR_H_A 2150: The Art of the Book

Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.

Credit Hours: 3

AR_H_A 2230: Introduction to the Arts of Islam

Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.

Credit Hours: 3

AR_H_A 2410: Ancient Technology

Engineering, architecture, and military technology in the ancient world.

Credit Hours: 3

AR_H_A 2720: African-American Visual Culture

(Same as BL_STU 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.

Credit Hours: 3

AR_H_A 2830: American Art and Architecture

Architecture, sculpture, painting of America from 17th century to present day.

Credit Hours: 3

AR_H_A 2850: Introduction to Visual Culture

Introduction to the problems of understanding, analyzing, and writing about visual culture.

Credit Hours: 3

AR_H_A 2860: The Lives of Objects

Introduction to the problems of understanding, analyzing and writing about art history and material culture.

Credit Hours: 3

AR_H_A 2940: Archaeological Methods

Methods of excavating various types of sites; recording, preserving their materials.

Credit Hour: 2-6

Prerequisites: instructor's consent

AR_H_A 2960: Special Readings in Art History and Archeology

Independent readings and research selected in consultation with supervisory faculty.

Credit Hour: 1-3

Prerequisites: instructor's consent

AR_H_A 3005: Topics in Art History and Archaeology- Humanities

Selected studies in various facets of art history and archaeology.

Credit Hour: 1-3

Prerequisites: AR_H_A 1110, AR_H_A 1120, AR_H_A 2830 as appropriate

AR_H_A 3005H: Topics in Art History and Archaeology- Humanities - Honors

Selected studies in various facets of art history and archaeology.

Credit Hour: 1-3

Prerequisites: AR_H_A 1110, AR_H_A 1120, AR_H_A 2830 as appropriate. Honors Eligibility Required

AR_H_A 3010: Study Abroad in Art History and Archaeology

Instruction in art history, architecture, or archaeology takes place in a foreign country or countries. Trips are led and taught by University of Missouri faculty.

Credit Hour: 3-6

Prerequisites: sophomore standing or higher and departmental consent

AR_H_A 3120: Art and Gender in Antiquity

Comparative survey of art and archaeology in Egypt, Greece, and Rome to understand how societies constructed gender through material resources and how cultural perceptions of gender affected individual lives and behaviors. Emphasis on research methods and evaluation of sources.

Credit Hours: 3

AR_H_A 3210: Near Eastern and Egyptian Art and Archaeology

General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3310: Greek Art and Archaeology

General survey of material culture in Greece from earliest times to the Hellenistic period.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3410: Roman Art and Archaeology

General survey of material culture in the Roman world from earliest times through the 3rd century.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3510: Byzantine and Islamic Art and Archaeology

General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3520: Early Medieval Art and Archaeology

An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3530: Late Medieval Art

General survey of the art and architecture of Europe from Charlemagne through the 14th century.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or equivalent

AR_H_A 3620: Italian Renaissance Art

General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century.

Credit Hours: 3

Prerequisites: AR_H_A 1110 or AR_H_A 1120 or equivalent

AR_H_A 3630: Northern Renaissance Art

General survey of the art and architecture of Northern Europe from the 14th through the 16th century.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3640: Baroque Art

General survey of 17th century European architecture, painting and sculpture.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3720: Cities in the Western Imagination

Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.

Credit Hours: 3

AR_H_A 3730: Eighteenth Century European Art

General survey of 18th-century European painting, sculpture and architecture.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3740: Nineteenth Century European Art

General survey of 19th-century European painting, sculpture and architecture.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3750: Modern Art in Europe and America

General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3760: Contemporary Art

General survey of painting, sculpture, and architecture from the Second World War to the present.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or equivalent

AR_H_A 3775: The Ancient World on Film

(same as CL_HUM 3775 and FILM_S 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

Credit Hours: 3

Prerequisites: Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies. Instructor's consent required

AR_H_A 3780: Architecture in Film

(same as FILM_S 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

Credit Hours: 3

AR_H_A 3785: Arts and Artists on Film

(same as FILM_S 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

Credit Hours: 3

AR_H_A 3830: American Art and Culture, 1500-1820

General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3840: American Art and Culture, 1820-1913

General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 3850: American Art and Culture, 1913-Present

General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present.

Credit Hours: 3

Prerequisites: AR_H_A 1120 or AR_H_A 2830 or equivalent

AR_H_A 4005: Topics in Art History and Archaeology-Humanities

Special studies in art history/archaeology; covers subjects not included in regularly offered courses.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 4120: Women, Art and Society

(same as WGST 4120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4320: Archaeology of the Aegean Bronze Age

Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4340: Greek Architecture

Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4350: Greek Pottery

Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4360: Greek Sculpture

Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4420: Minor Arts of Antiquity

Discussion of selected minor arts and crafts of the Greco-Roman world.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4440: Roman Architecture

The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4460: Roman Sculpture

The origins and development of sculpture in the Roman Republic and the Roman Empire.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4490: Late Antique Art and Archaeology

Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4510: Byzantine Art and Archaeology

Historical investigation of Byzantine material culture in the eastern Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4520: Art of the Dark Ages

Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4530: Romanesque Art and Architecture

Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 800 to ca. 1150.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4540: Gothic Art and Architecture

Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 1150 to ca. 1400.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4620: Michelangelo and the High Renaissance

Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4630: The Renaissance Artist

Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4640: Renaissance and Baroque Architecture

Problems in European architectural history from the 15th through the 18th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4650: Venetian Painting

Survey of Venetian Painting from the 14th through the 18th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4660: Renaissance Figural Arts of Northern Europe

Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the fourteenth through the sixteenth century in northern Europe.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4670: Baroque Figural Arts

Painting and sculpture of Italy in the 17th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4710: The Arts of the Rococo

This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were deflected through the periods' art an architecture. Students will pursue a research topic on rococo art for their semester project.

Credit Hours: 3

Prerequisites: AR_H_A 3730; instructor's consent

AR_H_A 4720: Revolution and Romanticism: Art C. 1800

This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.

Credit Hours: 3

Prerequisites: AR_H_A 3730 or AR_H_A 3740; instructor's consent.

May be repeated for credit

AR_H_A 4730: Realism Through Post-Impressionism

Styles and issues in nineteenth-century art.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4740: Modern Architecture

Problems in the history of architecture from the late 18th century to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4750: Contemporary World Architecture

This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AR_H_A 1120; instructor's consent

AR_H_A 4760: Modern Sculpture

Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4780: Advanced Course in Contemporary Art

Topics in European and American painting and sculpture after 1950.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4820: American Material Culture

An exploration of American material culture from a multidisciplinary perspective.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4840: American Architecture

An exploration of architecture and urbanism from the colonial period to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4960: Special Readings in Art History and Archaeology

Independent readings and research selected in consultation with supervisory faculty.

Credit Hour: 1-3

Prerequisites: instructor's consent

AR_H_A 4970: Capstone: Art History and Archaeology

Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.

Credit Hour: 1

Prerequisites: instructor's consent

AR_H_A 4980: Internship

A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4996: Honors Proseminar I

Research methods, bibliography, use and criticism of source material.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 4999: Honors Reading and Research I

Individual research projects in preparation of senior thesis.

Credit Hours: 3

Prerequisites: AR_H_A 4996 and instructor's consent

AR_H_A 7005: Topics in Art History and Archaeology

Special studies in art history or archaeology; covers subjects not included in regularly offered courses.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 7120: Women, Art and Society

(same as WGST 7120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7130: Museum Studies

Functions and history of museums and interrelations among departments, including those of director, curator, registrar, education, conservation, and marketing. Topics include acquisitions policies; public outreach; role of architecture; and philosophical and legal issues pertaining to administration of museums.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7170: Historic Preservation

(same as HIST 7450). Survey of the historic preservation movement and techniques by faculty and guest speakers active in the field.

Credit Hour: 3-9

Prerequisites: instructor's consent

AR_H_A 7320: Archaeology of the Aegean Bronze Age

Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7340: Greek Architecture

Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7350: Greek Pottery

Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7360: Greek Sculpture

Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7420: Minor Arts of Antiquity

Discussion of selected minor arts and crafts of the Greco-Roman world.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7440: Roman Architecture

The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7460: Roman Sculpture

The origins and development of sculpture in the Roman Republic and the Roman Empire.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7490: Late Antique Art and Archaeology

Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7510: Byzantine Art and Archaeology

Historical investigation of Byzantine material culture in the eastern Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7520: Art of the Dark Ages

Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7530: Romanesque Art and Architecture

Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 800 to ca. 1150.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7540: Gothic Art and Architecture

Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 1150 to ca. 1400.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7620: Michelangelo and the High Renaissance

Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7630: The Renaissance Artist

Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7640: Renaissance and Baroque Architecture

Problems in European architectural history from the 15th through the 18th century.

Credit Hours: 3

Prerequisites: departmental consent

AR_H_A 7650: Venetian Painting

Survey of Venetian painting from the 14th through the 18th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7660: Renaissance Figural Arts of Northern Europe

Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the fourteenth through the sixteenth century in northern Europe.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7670: Baroque Figural Arts

Painting and sculpture of Italy in the 17th century.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7710: The Arts of the Rococo

This course explores European art from 1710 to 1770, beginning with an exploration of the rococo as an ornamental language and then moving to case studies of artists, media, and objects in order to assess how social identities were expressed through design.

Credit Hours: 3

Prerequisites: AR_H_A 8110 and instructor's consent

AR_H_A 7720: Revolution and Romanticism: Art Circa 1800

This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.

Credit Hours: 3

Prerequisites: AR_H_A 8110 and instructor's consent

AR_H_A 7730: Realism Through Post-Impressionism

Styles and issues in nineteenth-century art.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7740: Modern Architecture

Problems in the history of architecture from the late 18th century to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7750: Contemporary World Architecture

This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective, topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films and field trips. Graded A-F only.

Credit Hours: 3

Prerequisites: AR_H_A 1120 and instructor's consent

AR_H_A 7760: Modern Sculpture

Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

Credit Hours: 3

Prerequisites: departmental consent

AR_H_A 7780: Advanced Course in Contemporary Art

Topics in European and American painting and sculpture after 1950.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7820: American Material Culture

An exploration of American material culture from a multidisciplinary perspective.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7840: American Architecture

An exploration of architecture from the colonial period to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 7940: Archaeological Methods

Methods of excavating various types of sites; recording, preserving their materials.

Credit Hour: 2-6

Prerequisites: instructor's consent

AR_H_A 7960: Special Readings in Art History or Archaeology

Independent readings and research selected in consultation with supervisory faculty.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 7980: Internship in Art History and Archaeology

A one semester or full summer intensive internship with specific projects and responsibilities to be arranged by the student and the program director.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8070: Master's Tutorial

Consultation with faculty advisory and preparation of a scholarly essay based on a graduate research paper. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: AR_H_A 8110, and other graduate courses in Art History & Archaeology

AR_H_A 8080: Readings for MA Thesis in Art History and Archaeology

Reading, critical evaluation of literature of special fields of art history and/or archaeology.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8090: Master's Thesis Research and Thesis

Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8110: Introduction to Graduate Study

Research methods, bibliography, use and criticism of source material. Required of graduate students in Art History and Archaeology who have not had AR_H_A 4996.

Credit Hours: 3

Prerequisites: departmental consent

AR_H_A 8120: Theories and Methodologies in Art History and Archaeology

Literature of art and archaeology in terms of works of leading European and American art historians, archaeologists.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8130: Museum Studies Seminar

Appropriate means for care and display of artifacts. Topics include: accessioning, cataloging, retrieval of information, and laws and ethics of collecting; the museum environment and its monitoring; condition reports, shipping and storage, and conservation. Field trips.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8140: Art Theory and Criticism

Theoretical and critical literature of art from earliest times to the present.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8170: Historic Preservation Seminar

Research techniques to solve research problems and conduct field recording in historic preservation, material culture, historic architecture, and cultural heritage studies.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8320: Seminar in Greek Art and Archaeology

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8420: Seminar in Roman Art and Archaeology

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8440: Ancient/Medieval Topography

(same as CLASS 8440). Descriptive and historical analysis of a selected city or site. Subject varies.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8490: Seminar in Late Antique Art and Archaeology

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hours: 3

Prerequisites: AR_H_A 7490 or equivalent

AR_H_A 8520: Seminar in Medieval Art and Archaeology

Specific subjects of study will be assigned to students for presentation in relation to broader questions of the cultural/ historical phenomena of the time, from ca 700 to ca 1400.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8620: Seminar in Renaissance Art

Special subjects of study assigned for Northern or Southern Renaissance for individual research, discussion of reports by seminar members.

Credit Hours: 3

Prerequisites: instructor's consent

AR_H_A 8710: Seminar in 18th Century Art

Special subjects of study in 18th century art assigned for individual research; reports to be presented and discussed by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8720: Seminar in 19th Century Art

Special subjects of study in 19th century art assigned for individual research; reports to be presented and discussed by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8740: Seminar in Modern Architecture

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8750: Seminar in Modern and Contemporary Art

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 8800: Seminar in American Art

Special subjects of study assigned for individual research; discussion of reports by seminar members.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 9080: Readings for PhD Dissertation in Art History and Archaeology

Reading, critical evaluation of literature of special fields of art history and/ or archaeology.

Credit Hour: 1-99

Prerequisites: instructor's consent

AR_H_A 9090: Doctoral Dissertation Research in Art History and Archaeology

Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Art-Ceramics (ART_CERM)

ART_CERM 2100: Beginning Ceramics

Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee.

Credit Hours: 3

Prerequisites: instructor's consent

ART_CERM 3100: Intermediate Ceramics

Continuation of ART_CERM 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee.

Credit Hours: 3

Prerequisites: instructor's consent

ART_CERM 4100: Advanced Ceramics

Continuation of ART_CERM 3100. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required. May be repeated to 15 hours maximum.

Credit Hours: 3

Prerequisites: instructor's consent

ART_CERM 4110: Ceramics Sculpture

Sculptural forms constructed of slabs, coils and wheel-thrown elements. Payment of expendable materials expense is required. May be repeated to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_CERM 4100

ART_CERM 4185: Problems in Ceramics

Credit Hour: 1-3

Prerequisites: departmental consent

ART_CERM 7100: Graduate Ceramics

Advanced study of ceramic technology and design concepts with emphasis on directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3

Prerequisites: ART_CERM 4100

ART_CERM 7110: Graduate Ceramic Sculpture

Directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3

Prerequisites: ART_CERM 4100

ART_CERM 7185: Problems in Ceramics

Graduate level work in ceramics.

Credit Hour: 1-3

Prerequisites: ART_CERM 7100 and ART_CERM 7110 and departmental consent

ART_CERM 8100: Graduate Ceramics II

Continuation of ART_CERM 7100. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_CERM 7100 or equivalent

Art-Drawing (ART_DRAW)

ART_DRAW 1050: Drawing I

An introduction to visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3

ART_DRAW 2200: Drawing II

An introduction to drawing systems, problem solving and study of the proportions of the human form. Development of skills and concepts in drawing based on historical and contemporary models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 2210: Beginning Color Drawing

Theory and practice in the use of pastel working from stilllife, landscape, and portrait. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_DRAW 3200: Drawing III

Development of drawing techniques with an emphasis on materials and methods. Emphasis in conceptual and formal skills based on

contemporary and historical models. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and ART_DRAW 2200

ART_DRAW 3210: Intermediate Color Drawing

Continuation of ART_DRAW 2210 with emphasis on design and organization. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and ART_DRAW 2210

ART_DRAW 3220: Anatomical Drawing

Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and either ART_DRAW 2200 or instructor's consent

ART_DRAW 3230: Beginning Illustration

An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A-F basis only. Expendable materials fee.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and ART_DRAW 2200

ART_DRAW 4200: Drawing IV

This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expendable Materials Fee Required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3200

ART_DRAW 4210: Advanced Color Drawing

Continuation of ART_DRAW 3210 with emphasis on the expressive properties of color in figural compositions. Repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050, ART_DRAW 2210 and ART_DRAW 3210

ART_DRAW 4220: Advanced Anatomical Drawing

Continuation of ART_DRAW 3220 with and emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050 and ART_DRAW 3220

Recommended: ART_DRAW 2200 and ART_DRAW 3200 before taking this class

ART_DRAW 4230: Advanced Illustration

Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050, ART_DRAW 2200 and ART_DRAW 3230

ART_DRAW 4285: Problems in Drawing

Credit Hour: 1-3

Prerequisites: departmental consent

ART_DRAW 7200: Graduate Drawing: Studio Practice and Critique

Drawing with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: graduate Art major

ART_DRAW 7210: Graduate Color Drawing

Continuation of ART_DRAW 4210 with emphasis on individual creative expression. Repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 4210 and instructor's consent

ART_DRAW 7285: Problems in Drawing

Credit Hour: 1-3

Prerequisites: ART_DRAW 7200 and departmental consent

ART_DRAW 8200: Graduate Drawing: Advanced Studio Practice and Critique

Continuation of ART_DRAW 7200. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_DRAW 7200 or equivalent

ART_DRAW 8210: Graduate Color Drawing II

Continuation of ART_DRAW 7210. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_DRAW 7210 or equivalent

ART_DRAW 8270: Graduate Drawing - Theory and Context

Contextualizing artwork in culture, history, and theory, May be repeated to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate Art Majors

ART_DRAW 8285: Problems in Drawing II

Advanced independent studio practice including critical evaluation of student's creative work. Individual study in drawing is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: for students with strong preparation in Art; departmental consent; ART_DRAW 7285

Art-Fibers (ART_FIBR)

ART_FIBR 2300: Beginning Fibers

Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_FIBR 1030

ART_FIBR 3300: Intermediate Fibers

Continuation of ART_FIBR 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface design and a means of developing visual statements. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_FIBR 2300

ART_FIBR 4300: Advanced Fibers

Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_FIBR 3300 or approved equivalents

ART_FIBR 4385: Problems in Fibers

Credit Hour: 1-3

Prerequisites: departmental consent

ART_FIBR 7300: Graduate Fibers

Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student's ideas and goals. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_FIBR 4300

ART_FIBR 7385: Problems in Fibers

Graduate level work in fibers.

Credit Hour: 1-3

Prerequisites: ART_FIBR 7300 and departmental consent

ART_FIBR 8300: Graduate Fibers II

Continuation of ART_FIBR 7300. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_FIBR 7300 or equivalent

Art-General (ART_GNRL)

ART_GNRL 1010: Introduction to Art

Basic practice in drawing, painting, design. Exploratory course for beginners. Non-majors only.

Credit Hours: 3

ART_GNRL 1020: Appreciation of Art

Illustrated discussion with examples from varied historic and contemporary art fields on nature of art, functions, methods of creative expression. One section is writing intensive each semester and the other is NON writing intensive each semester.

Credit Hours: 3

Prerequisites: ENGLISH 1000 may be required on some sections

ART_GNRL 1030: Basic 2-D Design

Basic study of line, shape and texture; their use and control according to the basic variables and the principles of design. Two dimensional exercises employing a variety of tools and materials.

Credit Hours: 3

ART_GNRL 1040: Basic 3-D Design

A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.

Credit Hours: 3

ART_GNRL 2000: Color Theory

An investigation of various color systems and their application to art.

Credit Hours: 3

Prerequisites: ART_GNRL 1030 or its equivalent, and sophomore standing

ART_GNRL 2001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 2001H: Topics in Art - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent. Honors eligibility required

ART_GNRL 2005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent

ART_GNRL 2005H: Topics in Art - Humanities - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent. Honors eligibility required

ART_GNRL 2020: International Summer Study Abroad

A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.

Credit Hours: 4

ART_GNRL 2030: Context and Culture

The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GNRL 2030H: Context and Culture - Honors

The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.

Credit Hours: 3

Prerequisites: instructor's consent. Honors eligibility required

ART_GNRL 3001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: junior standing and instructor's consent

ART_GNRL 3001H: Topics in Art - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent. Honors eligibility required

ART_GNRL 3005H: Topics in Art - Humanities Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent. Honors eligibility required

ART_GNRL 3005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent

ART_GNRL 3020: International Summer Study Abroad

A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit.

Credit Hours: 4

Prerequisites: instructor's consent

ART_GNRL 3030: Undergraduate Internship in Art

Special learning situations not covered by coursework. Credit standards pre-arranged with dept. Limit on total hours of problems courses applies.

Credit Hour: 1-3

Prerequisites: junior standing and departmental consent. Open only to Art and Art Education majors

ART_GNRL 4001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: consent of instructor

ART_GNRL 4001H: Topics in Art - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent, honors eligibility required

ART_GNRL 4005H: Topics in Art - Humanities Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent. Honors eligibility required

ART_GNRL 4005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

Credit Hour: 1-3

Prerequisites: Instructor's consent

ART_GNRL 4030: Video Art and the Moving Image

Video as a fine art form intersection sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works

in Final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.

Credit Hours: 3

ART_GNRL 4040: 2-D Portfolio Development

This course will provide an intensive experience in the development of a portfolio of personal work outside the traditional media boundaries. Students will explore media relevant to their particular needs and begin to explore the connections between their work and contemporary art and culture through readings, discussions and critiques. Expendable Materials Fee Required. May be repeated t 6 credits. Prerequisites: 3000-level or above course in one of the following media areas: Drawing, Painting or Printmaking. Junior Standing and instructor's consent required.

Credit Hours: 3

ART_GNRL 4975: Senior Seminar in Art

A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students' visual research.

Credit Hours: 3

Prerequisites: senior standing and ENGLISH 1000

ART_GNRL 4976: Design - Senior Seminar

Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. All students will participate in a final, formal portfolio review with outside evaluators.

Credit Hours: 3

Prerequisites: senior standing and ENGLISH 1000

ART_GNRL 7000: Graduate Art - Studio Practice and Critique

Art studio practice emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

Credit Hours: 3

ART_GNRL 7001: Topics in Art

Special studies in studio art at the graduate level; covers subjects not included in regularly offered courses. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GNRL 7005: Topics in Art - Humanities

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topics.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 7020: International Summer Study Abroad

A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated for credit.

Credit Hours: 4

ART_GNRL 7030: Video Art and the Moving Image

Video as a fine art form intersecting sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.

Credit Hours: 3

ART_GNRL 7085: Problems in Art

Individual study in a subject area to be proposed by the student and approved by the instructor. The student will meet periodically on a regular basis with the instructor to review progress on the work assigned. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: for students with strong preparation in Art; departmental consent

ART_GNRL 8000: Graduate Art - Advanced Studio Practice and Critique

Continuation of ART_GNRL 7000. Art studio practice with emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

Credit Hours: 3

ART_GNRL 8001: Topics in Art

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 8005: Topics in Art - Humanities

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

Credit Hour: 1-3

Prerequisites: instructor's consent

ART_GNRL 8020: International Summer Study Abroad

A four week study abroad in studio art with required participation in scheduled excursion to art-related sites. Students create original art for review at schedule critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit. Graded on A-F basis only.

Credit Hours: 4

ART_GNRL 8070: Graduate Art - Theory and Context

Contextualizing artwork in culture, history, and theory. May be repeated up to 18 hours for credit. Graded on A-F basis only

Credit Hours: 3

Prerequisites: Graduate Art standing

ART_GNRL 8090: MFA Thesis Exhibition Documentation

Preparation of materials deemed necessary to document in a permanent form the thesis exhibition. Credit will be granted upon the satisfactory completion of the document, which will be retained by the Department of Art. Required of all MFA candidates. Graded on S/U basis only.

Credit Hour: 1

ART_GNRL 9010: Graduate Studio Seminar

Practical and philosophical concerns of the visual artist. Mandated for all MFA candidates.

Credit Hour: 1

Art-Graphic Design (ART_GRDN)

ART_GRDN 1400: Beginning Digital Imaging

Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: basic understanding of the Macintosh computer

ART_GRDN 2400: Advanced Digital Imaging

Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: ART_GRDN 1400, and a basic understanding of the Macintosh computer

ART_GRDN 2410: Graphic Design I

Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GNRL 1030, ART_GNRL 1040 and ART_DRAW 1050

ART_GRDN 2420: Graphic Design II

Introduction to the discipline, function and tradition of typography. Topics include evolution and anatomy of typography, communication, legibility/readability, language sequence and information hierarchy. Course concludes with portfolio review for admission into Graphic Design III. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GRDN 2410

ART_GRDN 2430: Introduction to Calligraphy

Technical and historical instruction on five calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters and creative expression in projects.

Credit Hours: 3

Prerequisites: ART_GNRL 1030 and ART_DRAW 1050 or instructor's consent

ART_GRDN 3410: Graphic Design III

Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required.

Credit Hours: 3

Prerequisites: ART_GRDN 2420 and successful completion of the graphic design portfolio review

ART_GRDN 3420: Graphic Design IV

Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GRDN 3410

ART_GRDN 3430: Advanced Calligraphy

Technical and historical instruction to calligraphic alphabets including Uncial, Fraktur, Copperplate and Neuland. Application of hand lettering in two and three-dimensional design projects. Emphasis placed on both mastery of letters and creative exploration in projects.

Credit Hours: 3

Prerequisites: ART_GRDN 2430

ART_GRDN 3440: Packaging Design

This course will look at the discipline of packaging design from a three dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required.

Credit Hours: 3

Prerequisites: Successful completion of the graphic design portfolio review and/or instructor's consent

ART_GRDN 3441: The History of Graphic Design

Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today's visual communication.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GRDN 3442: Design for Corporate Identity and Branding

Planning, strategy and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required.

Credit Hours: 3

Prerequisites: successful completion of the graphic design portfolio review and/or instructor's consent

ART_GRDN 3443: Letterpress

This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours.

Credit Hours: 3

Prerequisites: Instructor's consent

ART_GRDN 4410: Graphic Design V

Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required.

Credit Hours: 3

Prerequisites: ART_GRDN 3420

ART_GRDN 4485: Problems in Graphic Design

Credit Hour: 1-3

Prerequisites: ART_GRDN 4410, and departmental consent

ART_GRDN 4996: Imprint - Design Practicum

Class operates as professional design studio doing work for university, local and regional clients. Focus on client/designer relationships, contracts and teamwork. Students passing with grade in A range will graduate with departmental honors. May be repeated for credit.

Credit Hours: 3

Prerequisites: Admission based on GPA (3.3 in art courses) and portfolio review; junior standing

ART_GRDN 7400: Graduate Graphic Design

Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student's individual investigations. Repeatable to 15 hours maximum.

Credit Hours: 3

Prerequisites: instructor's consent

ART_GRDN 7485: Problems in Graphic Design

Graduate level work in graphic design.

Credit Hour: 1-3

Prerequisites: ART_GRDN 4410 and departmental consent

ART_GRDN 8400: Graduate Graphic Design II

Continuation of ART_GRDN 7400. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_GRDN 7400 or equivalent

Art-Painting (ART_PNT)

ART_PNT 2500: Beginning Painting

Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

Credit Hours: 3

ART_PNT 2510: Beginning Watercolor Painting

Theory, practice of painting in water color from still life, landscape, figure. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_DRAW 1050

ART_PNT 3500: Intermediate Painting

Continuation of ART_PNT 2500 with the addition of portrait painting. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2500

ART_PNT 3510: Intermediate Watercolor Painting

Continuation of ART_PNT 2510. Theory and practice of painting in watercolor. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 2510

ART_PNT 4500: Advanced Painting

Advanced problems in oil and acrylic painting. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 3500

ART_PNT 4510: Advanced Watercolor Painting

(cross-leveled with ART_PNT 7510). Advanced problems in watercolor. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 3510

ART_PNT 4585: Problems in Painting

Credit Hour: 1-3

Prerequisites: ART_PNT 4500 and departmental consent

ART_PNT 7500: Graduate Painting: Studio Practice and Critique

Advanced study. Emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: graduate Art major

ART_PNT 7510: Graduate Watercolor Painting

(cross-leveled with ART_PNT 4510). Advanced study in watercolor. Emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PNT 4510

ART_PNT 7585: Problems in Painting

Credit Hour: 1-3

Prerequisites: ART_PNT 7500 and departmental consent

ART_PNT 8500: Graduate Painting: Advanced Studio Practice and Critique

Continuation of ART_PNT 7500. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PNT 7500 or equivalent

ART_PNT 8510: Graduate Watercolor Painting

Continuation of ART_PNT 7510. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PNT 7510 or equivalent

ART_PNT 8570: Graduate Painting - Theory and Context

Contextualizing artwork in culture, history, and theory. Repeatable to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Graduate Art standing

ART_PNT 8585: Problems in Painting II

Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: For students with strong preparation in Art; departmental consent; ART_PNT 7585

Art-Photography (ART_PHOT)

ART_PHOT 2600: Beginning Photography

Basic photography as an art form; camera and darkroom techniques; surveys photographic history and aesthetics. Camera with adjustable aperture and shutter required. Payment of expendable materials expense is required.

Credit Hours: 3

Prerequisites: ART_GNRL 1030, ART_GNRL 1040, ART_DRAW 1050 and instructor's consent required

ART_PHOT 3600: Intermediate Photography

Continuation of ART_PHOT 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required.

Credit Hours: 3

Prerequisites: ART_PHOT 2600 or approved equivalent and consent required

ART_PHOT 4600: Advanced Photography

Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression through the medium of Photography. Payment of expendable materials fee is required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_PHOT 2600 and ART_PHOT 3600 or approved equivalents, and consent required

ART_PHOT 4685: Problems in Photography

Supervised research in creative photography.

Credit Hour: 1-3

Prerequisites: ART_PHOT 4410 and departmental consent

ART_PHOT 7600: Graduate Photography

Advanced technical study with emphasis on development of the individual student's creative ideas. Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_PHOT 3600 and consent required

ART_PHOT 7685: Problems in Photography

Supervised research in creative photography.

Credit Hour: 1-3

Prerequisites: ART_PHOT 4410

ART_PHOT 8600: Graduate Photography II

Continuation of ART_PHOT 7600. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PHOT 7600 or equivalent

Art-Printmaking (ART_PRNT)

ART_PRNT 2700: Beginning Printmaking

Introductory Relief, Intaglio and Lithography techniques in color and black and white including woodcut, linocut reduction, etching; aquatint, dry point, photo mechanics and pronto plate lithography. May be repeated to six hours maximum. Expendable materials fee required.

Credit Hours: 3

ART_PRNT 2730: Serigraphy

Introduces methods, materials, and techniques of printmaking with the silk screen. Payment of expendable materials expense is required. May repeat to 6 hours maximum.

Credit Hours: 3

Prerequisites: ART_GNRL 1030 and one semester of Drawing

ART_PRNT 3700: Intermediate Printmaking

Continuing work in litho, intaglio, relief or serigraphy. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PRNT 2700 and/or instructor's consent

ART_PRNT 4700: Advanced Printmaking

Advanced study in relief, intaglio, lithographic and/or serigraphy printmaking with emphasis on individual creative expression. May be repeatable to 15 hours. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PRNT 3700 and/or consent required

ART_PRNT 4785: Problems in Printmaking

Credit Hour: 1-3

Prerequisites: departmental consent

ART_PRNT 7700: Graduate Printmaking

Graduate level study in relief, intaglio or lithographic printmaking with emphasis on individual creative expression. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3

Prerequisites: ART_PRNT 4700

ART_PRNT 7785: Problems in Printmaking

Credit Hour: 1-3

Prerequisites: ART_PRNT 7700 and departmental consent

ART_PRNT 8700: Graduate Printmaking II

Continuation of ART_PRNT 7700. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_PRNT 7700 or equivalent

Art-Sculpture (ART_SCUL)

ART_SCUL 2800: Beginning Sculpture

Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required.

Credit Hours: 3

Prerequisites: ART_GNRL 1030 or ART_DRAW 2200

ART_SCUL 2810: Experimental Media I

Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester.

Credit Hours: 3

Prerequisites: ART_DRAW 2200 or instructor's consent

ART_SCUL 3800: Intermediate Sculpture

Continuation of ART_SCUL 2800. Introduction to carving techniques. Payment of expendable materials expense is required.

Credit Hours: 3

Prerequisites: ART_SCUL 2800

ART_SCUL 3810: Experimental Media II

Continuation of ART_SCUL 2810.

Credit Hours: 3

Prerequisites: ART_SCUL 2810

ART_SCUL 4800: Advanced Sculpture

This course will build skills acquired in ART_SCUL 3800. Includes welding, casting, carving and assemblage with emphasis on the development of a personal visual language. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_SCUL 3800

ART_SCUL 4810: Experimental Media III

Continuation of ART_SCUL 3810. May repeat to 15 hours maximum.

Credit Hours: 3

Prerequisites: ART_SCUL 3810

ART_SCUL 4885: Problems in Sculpture

Credit Hour: 1-3

Prerequisites: departmental consent

ART_SCUL 7800: Graduate Sculpture

Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3

ART_SCUL 7810: Experimental Media IV

Advanced study of compositional organization at the graduate level. May repeat to 9 hours maximum.

Credit Hours: 3

Prerequisites: ART_SCUL 4810

ART_SCUL 7885: Problems in Sculpture

Credit Hour: 1-3

Prerequisites: ART_SCUL 7800 and departmental consent

ART_SCUL 8800: Graduate Sculpture II

Continuation of ART_SCUL 7800. Repeatable to 15 hours.

Credit Hours: 3

Prerequisites: ART_SCUL 7800 or equivalent

Astronomy (ASTRON)

ASTRON 1010: Introduction to Astronomy

Survey of methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques.

Credit Hours: 4

Prerequisites: high school algebra and plane geometry, or MATH 1100 or MATH 1120, or equivalent

ASTRON 1020: Introduction to Laboratory Astronomy

Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques.

Credit Hours: 2

Prerequisites: high school algebra and geometry

ASTRON 3010: Introduction to Modern Astrophysics

(same as PHYSCS 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4020: Astrophysical Techniques

(same as PHYSCS 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4180: Solar System Science

(same as PHYSCS and GEOL 4180). Investigates physical states, interior structures and comparative geology of solar system bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3

Prerequisites: MATH 1700, PHYSCS 1220 or PHYSCS 2760 or instructor's consent

ASTRON 4250: Stellar Astrophysics

(same as PHYSCS 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.

Credit Hours: 3

Prerequisites: PHYSCS 3150 or concurrently or instructor's consent

ASTRON 4350: Galactic Astronomy

(same as PHYSCS 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology.

Credit Hours: 3

Prerequisites: PHYSCS 3010, PHYSCS 4140 or instructor's consent

ASTRON 4360: Extragalactic Astronomy

(same as PHYSCS 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3

Prerequisites: PHYSCS 2760

ASTRON 4460: Interstellar Medium

(same as PHYSICS 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760

ASTRON 4550: Cosmochemistry

(same as PHYSICS 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

Credit Hours: 3

Prerequisites: PHYSICS 2760 or PHYSICS 1220; instructor's consent

ASTRON 4950: Undergraduate Research in Astronomy

Special studies in astronomy; covers subjects not included in courses regularly offered.

Credit Hour: 1-99

Prerequisites: instructor's consent

ASTRON 4960: Senior Thesis in Astronomy

Special studies for senior undergraduate students in astronomy. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research.

Credit Hours: 3

Prerequisites: instructor's consent and 3 units of ASTRON 4950. Departmental consent required for repetition

ASTRON 7020: Astrophysical Techniques

(same as PHYSICS 7020; cross-leveled with ASTRON 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSICS 2760

ASTRON 7180: Solar System Science

(same as PHYSICS 7180 and GEOL 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760 or instructor's consent

ASTRON 7360: Extragalactic Astronomy

(same as PHYSICS 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3

Prerequisites: PHYSICS 2760

ASTRON 7550: Cosmochemistry

(same as PHYSICS 7550). Chemistry of cosmic dust and molecules.

Credit Hours: 3

Prerequisites: PHYSICS 2760 or PHYSICS 1220; instructor's consent

ASTRON 7750: Interstellar Medium

(same as PHYSICS 7750). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3

Prerequisites: PHYSICS 1220 or PHYSICS 2760

ASTRON 8301: Topics in Astronomy and Astrophysics

(same as PHYSICS 8301). Selected topics from solar system, stellar galactic and extragalactic astronomy and astrophysics. May be repeated to a maximum of 6 hours.

Credit Hours: 3

Prerequisites: instructor's consent

ASTRON 8310: College Science Teaching

(same as PHYSICS 8310, BIO_SC 8724 and LTC 8724). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

ASTRON 8550: Stellar Structure and Evolution

(same as PHYSICS 8550). Reviews of atomic and molecular spectra. Investigates quantum radiation law, emission and absorption processes, radiation transfer theory, continuous and discrete line spectra of stars, stellar composition.

Credit Hours: 3

Prerequisites: ASTRON 4250, PHYSICS 4800, or instructor's consent

Athletic Training (ATHTRN)

ATHTRN 1100: Athletic Training Skills I

Introduction to the development of psychomotor skills for athletic training. Taping and wrapping skills for the lower extremity; wound care, ice bag/massage; whirlpool and hydrocollator use are covered. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Restricted to Pre-Athletic Training Majors only; instructor's consent

ATHTRN 1200: Athletic Training Skills II

Continuation of development of psychomotor skills for athletic training; taping and wrapping of the upper extremities and trunk. Record keeping; basic first aid; and other athletic training administrative tasks are discussed. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Pre-Athletic Training Majors; instructor's consent

ATHTRN 2100: Principles and Fundamentals of Athletic Training

Introduces students to common principles associated with the athletic training profession which include important areas essential for the performance of athletic training duties. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Pre-athletic training majors; instructor's consent

ATHTRN 2150: Athletic Training Practicum I

Practical application under the direct supervision of a certified athletic trainer. Athletic training room etiquette; practice and game preparation; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: restricted to Athletic Training Majors; ATHTRN 1100, ATHTRN 1200, ATHTRN 2100

ATHTRN 2250: Athletic Training Practicum II

Practical application under the direct supervision of a certified athletic trainer. Continuation of athletic training room etiquette; practice and game prep; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training majors; ATHTRN 2150

ATHTRN 2500: Elementary Human Anatomy

Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement and homeostasis. An Introduction to key terminology and concepts is also presented. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training Majors only

ATHTRN 2600: Human Physiology

Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems as well as the study of special senses. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training Majors Only

ATHTRN 3150: Athletic Training Practicum 3

Two options are available for this clinical rotation. Option 1: Hands-on experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic Training Majors only; ATHTRN 2250

ATHTRN 3300: Lower Extremity, Trunk, Spine Assessment

Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the lower extremity, trunk and spine are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Athletic training majors; ATHTRN 2100, ATHTRN 2500, ATHTRN 2600

ATHTRN 3350: Lower extremity, Trunk, Spine Assessment Lab

Provides athletic training students with the practical experience associated with theoretical concepts in the lower extremity, trunk, and spine assessment course. Comprehensive orthopedic evaluations and interpretations are conducted for the lower extremity, trunk and spine. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: restricted to Athletic training majors; taken concurrently with ATHTRN 3300

ATHTRN 3400: Upper Extremity and Head Assessment

Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the upper extremity, and head are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350

ATHTRN 3450: Upper Extremity and Head Assessment Lab

Provides athletic training students with the practical experience associated with theoretical concepts in the upper extremity and head assessment course. Comprehensive orthopedic evaluations and interpretations are conducted for the upper extremity and head. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: restricted to Athletic training majors; Taken concurrently with ATHTRN 3400

ATHTRN 3500: Rehabilitation of Athletic Injuries

The Theory and Application behind rehabilitative tools utilized in the athletic setting (in-season and out-of-season). Emphasis is placed on developing and administering rehabilitative programs based on injury, the healing process, and return to function/play. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450

ATHTRN 3700: Therapeutic Modalities

Comprehensive study of the various therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Understanding the technology, theory and practical applications of appropriate modalities is emphasized. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: restricted to Athletic training majors; ATHTRN 3500

ATHTRN 4500: Nutrition for Athletic Performance and Rehabilitation

Nutritional study examining how nutrition impacts sports performance. Basic Nutritional biochemical and physiological principles provide the foundation for the understanding of the role of nutrition in performance. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: restricted to Athletic training majors; HLTH_SCI 4420

Atmospheric Science (ATM_SC)

ATM_SC 1050: Introductory Meteorology

(same as GEOG 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

Credit Hours: 3

ATM_SC 2100: Introduction to Atmospheric Science

Physical process of the atmospheric and climate system will be related to day-to-day weather changes. Students will be introduced to the laws of motion and thermodynamics that govern motions in geophysical fluid. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1160 or concurrent enrollment in MATH 1500

ATM_SC 2150: Natural Hazards

A survey of natural hazards, including severe thunderstorms, tornadoes, flooding, tropical storms, ocean movements, earthquakes, tsunamis, volcanoes, asteroids, solar weather, managing risk and human impacts. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ATM_SC 1050 or equivalent or instructor's consent

ATM_SC 2720: Weather Briefing

Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry.

Credit Hour: 1

Prerequisites: ATM_SC 1050

ATM_SC 2792: Weather Communication

Methods of surface and upper air weather observation. How such data are distributed to users in the meteorological community is also addressed. Prerequisites: ATM_SC 1050; sophomore standing or instructor's consent

Credit Hour: 1

ATM_SC 3000: Independent Study in Atmospheric Science

Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem.

Credit Hour: 1-3

Prerequisites: upper-level standing, ATM_SC 1050 or equivalent, and instructor's consent

ATM_SC 3600: Climates of the World

(same as GEOG 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity.

Credit Hours: 3

Prerequisites: ATM_SC 1050 or equivalent or graduate standing

ATM_SC 4001: Topics in Atmospheric Science

Development of theory and applications for selected topics in atmospheric science.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent

ATM_SC 4110: Broadcast Meteorology I

An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: ATM_SC 1110, ATM_SC 2720, or equivalents

Corequisites: ATM_SC 4710. Restricted to Atmospheric Science majors or instructor's consent

ATM_SC 4310: Atmospheric Thermodynamics

Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

Credit Hours: 4

Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 4320: Atmospheric Dynamics

Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

Credit Hours: 4

Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 4350: Mesoscale Meteorology and Dynamics

Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

Credit Hours: 3

Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 4400: Micrometeorology

Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.

Credit Hours: 3

Prerequisites: ATM_SC 4310 or PHYSICS 2760, MATH 2300

ATM_SC 4500: Advanced Meteorological Observation and Instrumentation

Automated weather observation and instrumentation used in networks of remote automated weather stations. Emphasis on electronic instrumentation, datalogger programming, data collection and data management, generating dynamic reports on the World Wide Web. May be repeated for credit.

Credit Hours: 3

Prerequisites: ATM_SC 1050

ATM_SC 4510: Remote Sensing for Meteorology and Natural Resources

Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features.

Credit Hours: 3

Prerequisites: ATM_SC 1110, MATH 1500, junior standing or instructor's consent

ATM_SC 4520: Environmental Biophysics

(same as GEOG 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas.

Credit Hours: 3

Prerequisites: College Physics and Calculus I

ATM_SC 4550: Atmospheric Physics

Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.

Credit Hours: 3

Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 4590: Radar Meteorology

Course concerns the theory and application of radar in meteorology. May be repeated for credit.

Credit Hours: 3

Prerequisites: ATM_SC 1110, MATH 1700, PHYSCS 2750

ATM_SC 4650: Long-Range Forecasting

Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

Credit Hours: 3

Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 4710: Synoptic Meteorology I

Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

Credit Hours: 4

Prerequisites or Corequisites: one physics course

Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

ATM_SC 4720: Synoptic Meteorology II

Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

Credit Hours: 4

Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 4730: Advanced Forecasting Laboratory

Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300

ATM_SC 4800: Numerical Methods in Atmospheric Science and Natural Resources

Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

Credit Hours: 3

Prerequisites: Math through Calculus III or senior standing

ATM_SC 4949: Internship in Meteorology

Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: junior standing, 12 hours Atmospheric Science

ATM_SC 4950: Undergraduate Research in Atmospheric Science

Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

Credit Hour: 1-4

Prerequisites: STAT 1400, MATH 1500, 10 hours of Atmospheric Science and instructor's consent

ATM_SC 4990: Daily Analysis and Forecast Interpretation

A Capstone experience. In depth daily analysis and interpretation by students of the current and forecast states of the atmosphere. Discussions of implications to specific weather sensitive activities.

Credit Hours: 3

Prerequisites: senior or graduate Atmospheric Science major

ATM_SC 7001: Topics in Atmospheric Science

Development of theory and applications for selected topics in atmospheric science.

Credit Hour: 1-99

Prerequisites: instructor's consent

ATM_SC 7085: Problems in Atmospheric Science

Independent study by graduate students in atmospheric science.

Credit Hour: 1-99

ATM_SC 7310: Atmospheric Thermodynamics

Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

Credit Hours: 4

Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 7320: Atmospheric Dynamics

Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

Credit Hours: 4

Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 7350: Mesoscale Meteorology and Dynamics

Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

Credit Hours: 3

Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 7400: Micrometeorology

Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.

Credit Hours: 3

Prerequisites: ATM_SC 4050 or ATM_SC 7050

ATM_SC 7510: Remote Sensing for Meteorology and Natural Resources

Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Graduate student credit is dependent upon completion of additional advanced research assignments. Graded on A-F basis only.

Credit Hours: 3

ATM_SC 7520: Environmental Biophysics

(same as GEOG 7520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water, and gas.

Credit Hours: 3

Prerequisites: college physics, calculus I

ATM_SC 7550: Atmospheric Physics

Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.

Credit Hours: 3

Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 7590: Radar Meteorology

Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. May be repeated for credit.

Credit Hours: 3

Prerequisites: MATH 1700, PHYSCS 2760

ATM_SC 7650: Long-Range Forecasting

Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

Credit Hours: 3

Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 7710: Synoptic Meteorology I

Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

Credit Hours: 4

Prerequisites or Corequisites: one physics course

Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

ATM_SC 7720: Synoptic Meteorology II

Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

Credit Hours: 4

Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 7800: Numerical Methods in Atmospheric Science and Natural Resources

Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

Credit Hours: 3

Prerequisites: Math through Calculus III

ATM_SC 8001: Topics in Atmospheric Science

Development of the theory with its application for selected topics in atmospheric science.

Credit Hours: 3

ATM_SC 8090: Masters Research in Atmospheric Science

Original investigation in atmospheric science in support of a master's thesis. Graded on S/U basis only.

Credit Hour: 1-99

ATM_SC 8400: Atmospheric General Circulation

Comprehensive review of dynamical theories of general circulation with intensive discussion of current problems.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 8450: Tropical Meteorology

Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms.

Credit Hours: 3

Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720 and MATH 2300; instructor's consent. Graded on A-F basis only

ATM_SC 8500: Radiation in the Atmosphere

Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes.

Credit Hours: 3

Prerequisites: one year College Physics and MATH 1700

ATM_SC 8550: Nowcasting

Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises.

Credit Hours: 3

Prerequisites: ATM_SC 8500, instructor's consent

ATM_SC 8600: Advanced Climate Dynamics

Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320 and ATM_SC 8400 or ATM_SC 3600

ATM_SC 9001: Topics in Atmospheric Science

Development of the theory with its application for selected topics in atmospheric science.

Credit Hour: 1-99

ATM_SC 9085: Problems in Atmospheric Science

Independent study by graduate students in atmospheric science.

Credit Hour: 1-99

ATM_SC 9087: Seminar in Atmospheric Science

Seminar in Atmospheric Science.

Credit Hour: 1-99

ATM_SC 9090: Doctoral Research in Atmospheric Science

Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.

Credit Hour: 1-99

ATM_SC 9300: Introduction to Chaos Theory

Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320, MATH 4100

ATM_SC 9350: Advanced Dynamic Meteorology

Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations.

Credit Hours: 3

Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 9700: Advanced Synoptic Meteorology

Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed.

Credit Hours: 3

Prerequisites: ATM_SC 4720 or ATM_SC 7720

ATM_SC 9712: Convection and Lightning

Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300; instructor's consent

ATM_SC 9800: Numerical Weather Prediction

Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes. Experience with a range of models (1-D cloud to operational PE models) stressed.

Credit Hours: 3

Prerequisites: instructor's consent

Biochemistry (BIOCHM)

BIOCHM 1090: Introduction to Biochemistry

Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Primarily for freshman and sophomore biochemistry majors.

Credit Hours: 3

Prerequisites: departmental consent

BIOCHM 1094: Introductory Biochemistry Laboratory

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.

Credit Hours: 2

Corequisites: concurrent enrollment in BIOCHM 1090 required. Departmental Consent Required

BIOCHM 2110: The Living World: Molecular Scale

Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.

Credit Hours: 3

Prerequisites: for non-Biochemistry majors only

BIOCHM 2112: Biotechnology in Society

Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

Credit Hours: 3

Prerequisites: for non-biochemistry majors only

BIOCHM 2480: Introduction to Macromolecular Structure and Function

The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: CHEM 2100

Corequisites: CHEM 2110

BIOCHM 2484: Macromolecular Techniques Laboratory

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: sophomore standing; restricted to Biochemistry majors only

BIOCHM 2484H: Macromolecular Techniques Laboratory - Honors

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing; Biochemistry majors only. Honors eligibility required

BIOCHM 3630: General Biochemistry

Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism.

Credit Hours: 3

Prerequisites: CHEM 2050

BIOCHM 4001: Topics in Biochemistry

Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

Credit Hour: 1-99

BIOCHM 4270: Biochemistry

First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

Credit Hours: 3

Prerequisites: CHEM 2110

BIOCHM 4272: Biochemistry

Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

Credit Hours: 3

Prerequisites: BIOCHM 4270

BIOCHM 4300: Physical Chemistry of Biological Systems

To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Biochemistry BIOCHM 4270 or concurrent enrollment

BIOCHM 4376: Computer Assisted Sequence Analysis and Molecular Modeling

Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules.

Credit Hours: 3

Prerequisites: CHEM 2110

BIOCHM 4385: Problems in Biochemistry

Credit Hour: 1-3

Prerequisites: departmental consent

BIOCHM 4460: Cancer Biology

(same as BIO_SC 4460). Cancer, cell biology, genetics, biochemistry.

Credit Hours: 3

Prerequisites: BIOCHM 4272, BIO_SC 2300 and BIO_SC 2200

BIOCHM 4510: Single Molecule Biophysics

(same as PHYSCS 4510; cross-leveled with BIOCHM 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOCHM 4940: Internship in Biochemistry

Field-based learning experience combining study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about biochemistry in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: junior standing; instructor's consent

BIOCHM 4950: Undergraduate Research in Biochemistry

Individually directed laboratory research for upperclass students under faculty supervision.

Credit Hour: 2-3

Prerequisites: departmental consent

BIOCHM 4970: Senior Seminar in Biochemistry

Problem-based course on fundamental concepts of biochemistry. Requires written and oral presentations. One of two capstone courses required for biochemistry majors. Corequisites: BIOCHM 4974

Credit Hour: 1

BIOCHM 4974: Biochemistry Laboratory

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.

Credit Hours: 5

Prerequisites: BIOCHM 4272 or concurrent enrollment in BIOCHM 4272

Corequisites: BIOCHM 4970

BIOCHM 4996H: Honors Research in Biochemistry

Laboratory research for upper level honors students in consultation with Biochemistry faculty.

Credit Hour: 2-3

Prerequisites: Honors eligibility required

BIOCHM 7085: Problems in Biochemistry

Problems in Biochemistry.

Credit Hour: 1-6

Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 7110: Maps in Medicine Summer Institute

Lab/lecture course in which high school teachers gain knowledge of two innovative, inquiry-based programs, Mapping Health and Mapping Cell Fate, that focus on influenza and developmental biology and Missouri science standards for biology and health. Graded on S/U basis only.

Credit Hours: 2

Prerequisites: departmental consent

BIOCHM 7270: Biochemistry

First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

Credit Hours: 3

Prerequisites: CHEM 2110

BIOCHM 7272: Biochemistry

Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

Credit Hours: 3

Prerequisites: BIOCHM 7270

BIOCHM 7274: Biochemistry Laboratory

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; radioisotope tracers in metabolism; isolation, purification and kinetics of enzymes.

Credit Hours: 5

Corequisites: concurrent enrollment in BIOCHM 7270

BIOCHM 7376: Computer Assisted Sequence Analysis and Molecular Modeling

This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures.

Credit Hours: 2

Prerequisites: CHEM 2110

BIOCHM 7510: Single Molecule Biophysics

(same as PHYSICS 7510; cross-leveled with BIOCHM 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3

Prerequisites: PHYSICS 2760

BIOCHM 7978: Cancer Biology

(same as BIO_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

Credit Hours: 3

Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976

BIOCHM 8060: Ethical Conduct of Research

(same as BIO_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

Credit Hour: 1

BIOCHM 8090: Research in Biochemistry

Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 8240: Introduction to Graduate Biochemistry I

Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination.

Credit Hours: 4

Prerequisites: Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor

BIOCHM 8260: Macromolecular Systems Integration

To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication; proteomics/cell signaling and metabolism. Course graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIOCHM 8240

BIOCHM 8360: Nutritional Biochemistry of Carbohydrates

(same as NUTRIT 8360 and NUTR_S 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 7272

BIOCHM 8362: Introduction to Plant Metabolism

(same as PLNT_S 8362 and BIO_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

Credit Hours: 2

BIOCHM 8365: Introduction to Molecular Cell Biology

(same as BIO_SC 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

Credit Hours: 2

BIOCHM 8390: Molecular Biology of Mineral Nutrition

(same as NUTRIT 8390 and NUTR_S 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 7272 and a 4000-level nutrition course

BIOCHM 8430: Physical Biochemistry

Physical concepts underlying a variety of physical chemical methods as they apply to biochemical research.

Credit Hours: 3

Prerequisites: BIOCHM 7272 and CHEM 3300

BIOCHM 8432: Enzymology and Metabolic Regulation

A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways.

Credit Hours: 3

Prerequisites: BIOCHM 7272

BIOCHM 8438: Nutrient Regulation of Gene Expression

(same as AN_SCI 8438, NUTRIT 8438, and NUTR_S 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format.

Credit Hours: 3

Prerequisites: BIOCHM 7272 and a 4000-level nutrition course

BIOCHM 8450: Rotation Research

Introductory laboratory research. Graded on A-F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

Credit Hour: 1-2

BIOCHM 9001: Topics in Biochemistry

Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

Credit Hour: 1-9

BIOCHM 9085: Problems in Biochemistry

Problems in Biochemistry

Credit Hour: 1-6

BIOCHM 9087: Seminar in Biochemistry

Review of current literature; individual presentation of research or classical science topics.

Credit Hour: 1

BIOCHM 9090: Research in Biochemistry

Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

BIOCHM 9430: Molecular Biology I

(same as MICROB 9430). Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replication, gene transfer and gene expression will be examined in depth from reports in the current literature.

Credit Hours: 4

BIOCHM 9432: Molecular Biology II

(same as MICROB and BIO_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

Credit Hours: 4

BIOCHM 9462: Hormone Action

A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes.

Credit Hours: 2

Prerequisites: BIOCHM 7272

BIOCHM 9466: Plant Biochemistry

Emphasizes biochemistry unique to plants; biochemical events plants share with other organisms discussed, compared. Photosynthesis, metabolism, composition, compartmentation, regulation of biochemical events included.

Credit Hours: 3

Prerequisites: BIOCHM 4270

BIOCHM 9468: Molecular Biology of Plant Growth and Development

(same as BIO_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

Credit Hours: 3

BIOCHM 9470: Analytical Biochemistry--Chromatography

Principles, experimental design, capabilities, limitations, and applications of the general field of chromatography of biologically important molecules. Eight (2-hour) lectures, eight (4-hour) labs. Four weeks.

Credit Hours: 2

BIOCHM 9472: Analytical Biochemistry--Mass Spectrometry

Instrumentation, fragmentation mechanisms, interpretation of spectra, combined gas chromatography--mass spectrometry. Eight (2-hour) lectures, eight (4-hour) labs.

Credit Hours: 2

Biological Engineering (BIOL_EN)

BIOL_EN 1000: Introduction to Biological Engineering

For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.

Credit Hour: 1-2

BIOL_EN 2000: Professional Development in Engineering

A review of professional opportunities, registration, ethics, and societies.

Credit Hour: 1-2

Prerequisites: sophomore standing

BIOL_EN 2080: Introduction to Programming for Engineers

This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1500

BIOL_EN 2180: Engineering Analysis of Bioprocesses

Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological, biomedical processes. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1700, CHEM 1320, PHYSICS 2750

Corequisites: BIOL_EN 2080

BIOL_EN 3001: Topics in Biological Engineering

Current and new technical developments in biological engineering.

Credit Hours: 3

Prerequisites: instructor's consent

BIOL_EN 3050: Environmental Control for Biological Systems

Systems for controlling the physical environments (heat, moisture, light, contaminating organism, chemicals) for plant and animal systems including livestock, aquacultures, crops and agricultural products.

Credit Hours: 3

Prerequisites: ENGINR 2300 and MATH 4100

BIOL_EN 3070: Biological Fluid Mechanics

Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSICS 2750 and MATH 1700

BIOL_EN 3075: Introduction to Materials Engineering

Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only. Prerequisites: MATH 2300, ENGINR 1200, ENGINR 2200;

Credit Hours: 3

Corequisites: One of the following BIOL_EN 3180, CH_ENG 3261, MAE 4231, MAE 4300, or instructor consent

BIOL_EN 3170: Biomaterials

Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.

Credit Hours: 3

Corequisites: BIOL_EN 2180, ENGINR 2200 or instructor's consent

BIOL_EN 3180: Heat and Mass Transfer in Biological Systems

Principles of heat and mass transfer and their application to biomedical, bioenvironmental, and bioprocessing areas.

Credit Hours: 3

Prerequisites: ENGINR 2300 or CH_ENG 3261, or concurrently

BIOL_EN 4001: Topics in Biological Engineering

Current and new technical developments in biological engineering.

Credit Hours: 3

Prerequisites: instructor's consent

BIOL_EN 4070: Bioelectricity

Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor's consent

BIOL_EN 4080: Engineering Computation

An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 4085: Problems in Biological Engineering

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

BIOL_EN 4150: Soil and Water Conservation Engineering

(same as CV_ENG 4710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 4160: Food Process Engineering

Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration.

Credit Hours: 3

Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 4170: Biomaterials Interfaces of Implantable Devices

Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

Credit Hours: 3

Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 4231: Transport Phenomena in Materials Processing

(same as MAE 4231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MAE 3200, MAE 3400, MAE 4300 (or equivalent courses) and MATH 4100

BIOL_EN 4250: Irrigation and Drainage Engineering

Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 4260: Food Process Engineering II

Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.

Credit Hours: 3

Prerequisites: BIOL_EN 4160 or instructor's consent

BIOL_EN 4270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as CH_ENG 4270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.

Credit Hours: 3

Prerequisites: experience with Excel or instructor's consent

BIOL_EN 4280: Survey of Bioengineering Techniques

Laboratory techniques to train students in Bioelectricity, Biomechantronics, Bioenvironment, Biomaterials, Biophotonics, Bioprocessing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: senior standing

BIOL_EN 4310: Feedback Control Systems

(same as ECE 4310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: MATH 4100 and junior/senior standing. May be repeated for credit

BIOL_EN 4315: Introduction to Bioprocess Engineering

(same as CH_ENG 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

BIOL_EN 4316: Biomass Refinery Operations

(same as CH_ENG 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

BIOL_EN 4350: Watershed Modeling Using GIS

(same as CV_ENG 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 4370: Orthopaedic Biomechanics

(same as V_M_S 4370) Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 1200, BIOL_EN 3170, instructor's consent required

BIOL_EN 4380: Applied Electronic Instrumentation

Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.

Credit Hours: 4

Prerequisites: PHYSCS 2760

BIOL_EN 4420: Introduction to Biomedical Imaging

(same as PHYSCS 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 4470: Biomolecular Engineering and Nanobiotechnology

Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: senior/graduate standing or instructor's consent

BIOL_EN 4480: Physics and Chemistry of Materials

(same as PHYSCS 4190 and CHEM 4490 and NU_ENG 4319). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760/CHEM 1320 or equivalent/prior approval by instructor

BIOL_EN 4550: Design of Livestock Waste Management Systems

Development and application of design criteria to the design of agricultural waste management facilities.

Credit Hours: 3

Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor's consent

BIOL_EN 4570: Fluorescent Imaging

Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging.

Credit Hours: 3

Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 4575: Computational Neuroscience

(same as BIO_SC and ECE 4580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 4580: Mechanical Systems Engineering

Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.

Credit Hours: 3

Prerequisites: Thermodynamics course, Fluid Mechanics course

Corequisites: ENGINR 2100 or BIOL_EN 4380 or instructor's consent

BIOL_EN 4670: Photonics and Nanotechnologies in Optical Biosensors

Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 4770: Biomedical Optics

Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 4870: Molecular and Cell Mechanics

Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 2200

BIOL_EN 4940: Engineering Internship

Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form.

Credit Hour: 2-5

Prerequisites: advisor's consent

BIOL_EN 4980: Biological Engineering Design

Capstone design course for the Biological Engineering major. Design of biological system devices or processes.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

BIOL_EN 4990: Undergraduate Research in Biological Engineering

Supervised independent study at the undergraduate level.

Credit Hour: 1-5

Prerequisites: instructor's consent

BIOL_EN 4995: Undergraduate Honors Research in Biological Engineering

Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.

Credit Hour: 1-5

Prerequisites: advisor's consent

BIOL_EN 7001: Topics in Biological Engineering

Study of advanced developments in biological engineering.

Credit Hour: 1-3

BIOL_EN 7070: Bioelectricity

Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: PHYSCS 2760 and BIOL_EN 3180 or instructor's consent

Credit Hours: 3

BIOL_EN 7080: Engineering Computation

An introduction to numerical methods relevant to biological engineering in the context of scientific computing.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 7150: Soil and Water Conservation Engineering

(same as CV_ENG 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200, or instructor's consent

BIOL_EN 7160: Food Process Engineering

Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychometrics, and dehydration.

Credit Hours: 3

Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 7170: Biomaterials Interfaces of Implantable Devices

Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

Credit Hours: 3

Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 7231: Transport Phenomena in Materials Processing

(same as MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MAE 3200, MAE 3400, MAE 4300 or equivalent; and MATH 4100

BIOL_EN 7250: Irrigation and Drainage Engineering

Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 7260: Food Process Engineering II

Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes.

Credit Hours: 3

Prerequisites: BIOL_EN 7160 or instructor's consent

BIOL_EN 7270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as CH_ENG 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.

Credit Hours: 3

Prerequisites: experience with Excel or instructor's consent

BIOL_EN 7310: Feedback Control Systems

(same as ECE 7310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded A-F only. May be repeated for credit.

Credit Hours: 4

Prerequisites: MATH 4100

BIOL_EN 7315: Introduction to Bioprocess Engineering

(same as CH_ENG 7315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent

BIOL_EN 7316: Biomass Refinery Operation

(same as CH_ENG 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

BIOL_EN 7350: Watershed Modeling Using GIS

(same as CV_ENG 7720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 7370: Orthopaedic Biomechanics

(same as V_M_S 7370) . Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ENGINR 1200 and BIOL_EN 3170, instructor's consent required

BIOL_EN 7380: Applied Electronic Instrumentation

(cross-leveled with BIOL_EN 4380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems.

Credit Hours: 4

Prerequisites: PHYSCS 2760

BIOL_EN 7420: Introduction to Biomedical Imaging

(same as PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 7470: Biomolecular Engineering and Nanobiotechnology

Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 7480: Physics and Chemistry of Materials

(same as PHYSCS 7190 and NU_ENG 7319 and CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 / CHEM 1320 or equivalent/prior approval by instructor

BIOL_EN 7550: Design of Livestock Waste Management Systems

Development and application of design criteria to the design of agricultural waste management facilities.

Credit Hours: 3

Prerequisites: CHEM 1310 and CV_ENG 3700, MAE 3400 or instructor's consent

BIOL_EN 7570: Fluorescent Imaging

Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 7575: Computational Neuroscience

(Same as BIO_SC 7580 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 7580: Mechanical Systems Engineering

Fundamentals and applications of prime movers and power transmissions for the design of engineering systems.

Credit Hours: 3

Prerequisites: Thermodynamics course, Fluid Mechanics course

Corequisites: ENGINR 2100 or BIOL_EN 7380 or instructor's consent

BIOL_EN 7670: Photonics and Nanotechnologies in Optical Biosensors

Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760

BIOL_EN 7770: Biomedical Optics

Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 8001: Advanced Topics in Biological Engineering

Study of advanced developments in biological engineering.

Credit Hour: 1-3

BIOL_EN 8085: Problems in Biological Engineering

Supervised individual study at the graduate level.

Credit Hour: 1-99

Prerequisites: departmental consent

BIOL_EN 8087: Seminar in Biological Engineering

Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.

Credit Hour: 1

BIOL_EN 8088: Advanced Seminar in Biological Engineering

Student presentation and discussion of topical research. May be repeated for credit.

Credit Hour: 1

Prerequisites: BIOL_EN 8087 and BIOL_EN 8402 or instructor's consent

BIOL_EN 8150: Natural Systems for Wastewater Treatment

Emphasis is on the design, management and biological performance of lagoons, overland flow systems and constructed wetland.

Credit Hours: 3

Prerequisites: CV_ENG 7230 and BIOL_EN 7150 or instructor's consent

BIOL_EN 8170: Sensors and Biosensors

The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors.

Credit Hours: 3

BIOL_EN 8180: Numerical Methods in Engineering Research

Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 8230: Advanced Ceramic Materials

(same as CH_ENG 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 8250: Water Management Theory

Advanced studies in erosion control, irrigation, and drainage. Water resources engineering.

Credit Hours: 3

Prerequisites: MATH 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course

BIOL_EN 8270: Principles and Applications of Fluorescence

Physical foundations of fluorescence, fluorophores, steady-state and lifetime measurements, and instrumentation. Applications in the life science from tissues staining to DNA probes. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 8280: Advanced Biological Transport Processes

Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required.

Credit Hours: 3

BIOL_EN 8360: Food Extrusion

Engineering principles and applications of single and twin screw food cooking extrusion systems. Modeling, control and optimization of extrusion systems. Dough rheology.

Credit Hours: 2

Prerequisites: BIOL_EN 7260

BIOL_EN 8370: Materials Characterization Techniques

Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses.

Credit Hours: 3

Prerequisites: at least one undergraduate course in material science, engineer, or design

BIOL_EN 8380: Modeling and Identification of Engineering Systems

Generalized description of engineering systems, bond graph modeling, system identification techniques, and neural network approaches.

Credit Hours: 3

Prerequisites: MATH 4100

BIOL_EN 8402: Research Methods

(same as F_S 8402). Review of literature; planning research projects; publication procedures.

Credit Hours: 2

BIOL_EN 8470: Ultrasensitive Biodetection

Multiplexing single-molecule, single-cell, nanobiotech analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graded A-F only.

Credit Hours: 3

Prerequisites: Instructor's consent required

BIOL_EN 8570: Microscopic Imaging

Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy.

Credit Hours: 3

Prerequisites: BIOL_EN 7570 or instructor's consent

BIOL_EN 8770: Photon Migration and Optical Imaging in Turbid Media

The essential concepts and techniques in optical imaging in turbid media will be covered including both forward problems and inverse reconstruction theories. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

BIOL_EN 8870: Molecular and Cell Mechanics

Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: ENGINR 2200

BIOL_EN 8990: Masters Thesis Research in Biological Engineering

Independent investigation to be presented as a thesis. Graded on S/U basis only.

Credit Hour: 1-99

BIOL_EN 9990: Doctoral Dissertation Research in Biological Engineering

Independent investigation to be presented as a thesis. Graded on S/U basis only.

Credit Hour: 1-99

Biological Sciences (BIO_SC)

BIO_SC 1001: Topics in Biological Science - General

Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

Credit Hour: 1-3

BIO_SC 1002: Topics in Biological Sciences- Biological/Physical/Mathematics

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

BIO_SC 1010: General Principles and Concepts of Biology

Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

Credit Hours: 3

Prerequisites: MATH 1100 or concurrent enrollment

BIO_SC 1020: General Biology Laboratory

Laboratory exercises dealing with representative organisms and methods of modern biological sciences. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

Credit Hours: 2

Prerequisites: BIO_SC 1010 or BIO_SC 1400 or BIO_SC 1010 concurrently

BIO_SC 1030: General Principles and Concepts of Biology with Laboratory

Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

Credit Hours: 5

Prerequisites: MATH 1100 or concurrent enrollment

BIO_SC 1060: Basic Environmental Studies

Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.

Credit Hours: 3

BIO_SC 1100: Introductory Zoology with Laboratory

(same as F_W 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

Credit Hours: 5

BIO_SC 1200: General Botany with Laboratory

Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.

Credit Hours: 5

BIO_SC 1400: Evolution for Everyone

This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO_SC 2060 or BIO_SC 4600.

Credit Hours: 3

BIO_SC 1500: Introduction to Biological Systems with Laboratory

Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

Credit Hour: 3-5

Prerequisites: MATH 1100 and high school chemistry

BIO_SC 1500H: Introduction to Biological Systems with Laboratory Honors

Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

Credit Hour: 3-5

Prerequisites: MATH 1100 and high school chemistry. Honors eligibility required

BIO_SC 2001: Topics in Biological Sciences - General

Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

Credit Hour: 1-3

BIO_SC 2002: Topics in Biological Sciences- Biological/Physical/Mathematics

Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: a course in general biology

BIO_SC 2002H: Topics in Biological Sciences- Biological/Physical/Mathematics - Honors

Selected topics not covered in regularly offered courses.

Credit Hour: 1-3

Prerequisites: a course in general biology; Honors eligibility required

BIO_SC 2010: Undergraduate Seminar in Biological Sciences

Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: sophomore standing

BIO_SC 2020: How the Brain Works

Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders..

Credit Hour: 1

Prerequisites: BIO_SC 1010

BIO_SC 2060: Community Biology

Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems.

Credit Hours: 3

Prerequisites: BIO_SC 1010 or equivalent. Not open to biology majors

BIO_SC 2100: Infectious Diseases

An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture.

Credit Hours: 3

Prerequisites: BIO_SC 1010. Not open to Biology Majors

BIO_SC 2150: Genetic Diseases

This course will discuss the biological basis for genetic diseases, including inherited diseases and non-inherited diseases such as cancer. The units will include an introduction providing necessary background

information, as section studying the technology used to study genetic diseases and several units discussing specific diseases and their impact on history and society. This course is intended for non-science majors. Cannot be used to satisfy degree requirements for biology major or biology minor.

Credit Hours: 3

Prerequisites: BIO_SC 1010

BIO_SC 2200: General Genetics

Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.

Credit Hours: 4

Prerequisites: BIO_SC 1500 and CHEM 1320 (or concurrent enrollment)

BIO_SC 2300: Introduction to Cell Biology

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

Credit Hours: 4

Prerequisites: BIO_SC 2200

BIO_SC 2300H: Introduction to Cell Biology- Honors

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

Credit Hours: 4

Prerequisites: BIO_SC 2200. Honors eligibility required

BIO_SC 2600: Ornithology

(same as F_W 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.

Credit Hours: 4

Prerequisites: 5 hours biology or instructor's consent

BIO_SC 2700: Ichthyology

(same as F_W 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Includes lab.

Credit Hours: 4

Prerequisites: 8 hours biology or equivalent

BIO_SC 2940: Internship in Biological Science

Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Graded on S/U basis only.

Credit Hour: 1-3

Prerequisites: junior standing, instructor's consent, 12 hours of biological science

BIO_SC 2960: Readings in Biological Science

Supervised reading in biological literature. May be repeated up to six hours total credit. Selected sections of this course may be graded either on A-F or S/U basis only. May not be used in partial fulfillment of Arts and Science foundation requirement.

Credit Hour: 1-3

Prerequisites: instructor's consent

BIO_SC 2965H: Honors Readings in Biological Literature

Selected readings in biological literature for Honors, in consultation with instructor. May not be used in partial fulfillment of Arts and Science foundation requirement.

Credit Hour: 1-3

Prerequisites: overall 3.3 GPA; instructor's consent. Honors eligibility required

BIO_SC 3002: Topics in Biological Sciences- Biological/Physical/Mathematics

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

BIO_SC 3002H: Topics in Biological Sciences- Biological/Physical/Mathematics - Honors

Selected topics not offered in regular curriculum.

Credit Hour: 1-3

Prerequisites: Honors eligibility required

BIO_SC 3010: Professional Skills

This course will focus on application and interview skills for students interested in medical school. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: junior standing; 3.4 GPA; instructor's consent. Restricted to biology majors

BIO_SC 3050: Genetics and Society

Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.

Credit Hours: 3

Prerequisites: a college science course or equivalent (advanced high school biology)

BIO_SC 3075: The Human Microbiome

This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and "poop transplants" to the role of microbes in asthma and obesity.

Credit Hours: 3

Prerequisites: BIO_SC 2200

BIO_SC 3210: Plant Systematics

Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.

Credit Hours: 4

Prerequisites: 8 hours of Biological Sciences

BIO_SC 3250: Parasitology

(same as BIOMED 3250). Parasitism is considered as a fundamental type of interspecies interaction. Principles of parasitism as they apply to animals are presented with emphasis on parasite morphology, biology and host parasite relationships. Includes lab.

Credit Hours: 4

Prerequisites: 8 hours of biology

BIO_SC 3260: Invertebrate Zoology

Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.

Credit Hours: 4

Prerequisites: BIO_SC 1100 or BIO_SC 1500

BIO_SC 3360: Herpetology

The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips.

Credit Hours: 4

Prerequisites: 8 hours Biological Sciences or equivalent

BIO_SC 3400: Evolution and Ecology

Introduction to principles of evolution and ecology. Topics include natural selection, adaptation, phylogenetic analysis, human evolution, population growth and regulation, population interactions, ecosystem ecology, and human impacts on ecological processes.

Credit Hours: 3

Prerequisites: BIO_SC 2200

BIO_SC 3510: Biology of Fungi

(same as PLNT_S 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab.

Credit Hours: 3

Prerequisites: BIO_SC 1100, BIO_SC 1200, or BIO_SC 1500

BIO_SC 3650: General Ecology

Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO_SC 3100: 2 hours credit.

Credit Hours: 5

Prerequisites: 10 hours in biology and junior standing

BIO_SC 3655: Tropical Ecology: Methods and Applications

Field study of tropical community; additional fee for transportation and accommodations required.

Credit Hours: 3

Prerequisites: BIO_SC 3100, BIO_SC 3650, BIO_SC 4600 or BIO_SC 4660

BIO_SC 3660: Mammalogy

(same as F_W 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Includes lab.

Credit Hours: 4

Prerequisites: 8 hours of biology or instructor's consent

BIO_SC 3700: Animal Physiology

Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab.

Credit Hours: 5

Prerequisites: BIO_SC 2300

BIO_SC 3710: Introductory Entomology

(same as PLNT_S 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management.

Credit Hours: 3

Prerequisites: BIO_SC 1200, or introductory Biological Sciences course

BIO_SC 3715: Insect Diversity

(same as PLNT_S 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

Credit Hours: 2

Prerequisites: PLNT_S 3710 or BIO_SC 3710

BIO_SC 3750: General Microbiology

Principles of microbiology. Includes lab.

Credit Hour: 3-4

Prerequisites: BIO_SC 2200 and BIO_SC 2300 completed with C range grades

BIO_SC 3780: Genetics Laboratory

Experimental genetic studies of *Drosophila*, corn and microorganisms.

Credit Hours: 2

Prerequisites: C range grade or better in BIO_SC 2200 or instructor's consent

BIO_SC 3790: Developmental Biology Laboratory

Laboratory studies of development in sea urchin, chicken and roundworm.

Credit Hours: 2

Prerequisites: BIO_SC 3800 or co-enrollment in BIO_SC 3800

BIO_SC 3800: Developmental Biology

Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIO_SC 2300, CHEM 2100

BIO_SC 4002: Topics in Biological Science - Biological/Physical/Mathematics

Selected topics not in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent and senior standing. May be repeated up to 2 times for credit

BIO_SC 4085: Problems in Biological Sciences

Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: junior standing and instructor's consent

BIO_SC 4100: Limnology

(same as F_W 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

Credit Hour: 3-4

Prerequisites: senior standing or BIO_SC 3650

BIO_SC 4300: Analysis of Biological Macromolecules

Theory/application of techniques used for characterization of proteins, nucleic acids; topics: sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry.

Credit Hours: 3

Prerequisites: BIO_SC 2300 or BIOCHM 4270; MATH 1500 and one year Physics

BIO_SC 4310: Physics in Cell and Developmental Biology

(same as PHYSCS 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3

Prerequisites: instructor's consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

BIO_SC 4320: Plant Physiology

(same as PLNT_S 4320). Modern physiology of higher plants using common cultivated plants as examples.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or BIO_SC 1500 and 5 hours Chemistry

BIO_SC 4328: Introductory Radiation Biology

(same as NU_ENG 4328, RADIOL 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

BIO_SC 4400: Plant Anatomy

(same as PLNT_S 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues, tissue systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab.

Credit Hours: 4

Prerequisites: BIO_SC 1200 or equivalent

BIO_SC 4500: Neurobiology

Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, neuroethology and developmental neurobiology.

Credit Hours: 3

Prerequisites: BIO_SC 2300 or BIO_SC 3700 or instructor's consent

BIO_SC 4560: Sensory Physiology and Behavior

Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 4500

BIO_SC 4580: Computational Neuroscience

(same as ECE 4580 and BIOL_EN 4575). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral science and an introduction to experimental methods for students from quantitative sciences.

Credit Hours: 4

Prerequisites: BIO_SC 1010 or BIO_SC 1500; MATH 1500

BIO_SC 4600: Evolution

Surveys various processes in organic evolution and underlying genetic mechanisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200

BIO_SC 4640: Behavioral Biology

Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. May be taken with Laboratory for 4 credits.

Credit Hour: 3-4

Prerequisites: BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

BIO_SC 4642: Animal Communication

Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication.

Credit Hours: 3

Prerequisites: BIO_SC 2300 and PHYSCS 1220 or equivalent

BIO_SC 4660: Plant Population Biology

Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure. Includes lab.

Credit Hours: 4

Prerequisites: 2 courses in Biological Sciences

BIO_SC 4670: Avian Ecology

Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

Credit Hours: 3

Prerequisites: BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600

BIO_SC 4950: Undergraduate Research in Biology

Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

Credit Hour: 1-3

Prerequisites: Overall GPA 2.75; 20 hours of Biological Sciences and/or Chemistry; instructor's consent

BIO_SC 4950H: Honors Research in Biology

Individually directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: overall GPA 3.3; instructor's consent; biology or microbiology major. Honors eligibility required

BIO_SC 4952: Undergraduate Research in Biology

Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

Credit Hour: 1-3

Prerequisites: BIO_SC 4950; overall GPA 2.75; instructor's consent

BIO_SC 4952H: Honors Research in Biology

Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: BIO_SC 4950H; overall GPA 3.3; instructor's consent. Honors eligibility required

BIO_SC 4960: Special Readings in Biological Sciences

Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3

Prerequisites: senior standing in Biological Sciences and instructor's consent

BIO_SC 4970: Neurobiology Laboratory

Laboratory experience with experimental neurobiology, with emphasis on neural networks, motor systems, and developmental neurobiology.

Credit Hours: 3

Prerequisites: BIO_SC 3700 or BIO_SC 4500 or instructor's consent

BIO_SC 4974: Molecular Biology Laboratory

Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

BIO_SC 4976: Molecular Biology

Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 4978: Cancer Biology

(same as BIOCHM 4978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIO_SC 2300

BIO_SC 4980: Cellular Interactions in Health and Disease

The cell as a functional unit.

Credit Hours: 3

Prerequisites: 10 hours Biological Sciences and 5 hours Physics and 5 hours Organic Chemistry

Recommended: some background in Biochemistry and/or Molecular Biology

BIO_SC 4982: Human Inherited Diseases

Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 4983: Molecular Ecology

Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics.

Credit Hours: 4

Prerequisites: BIO_SC 2200 or equivalent and BIO_SC 3650

BIO_SC 4984: Mammalian Reproductive Biology

Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology.

Credit Hours: 3

Prerequisites: junior standing and 15 hours of Biological Sciences

BIO_SC 4986: Neurology of Motor Systems

Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements.

Credit Hours: 3

Prerequisites: BIO_SC 3700 or instructor's consent

BIO_SC 4988: Nerve Cells and Behavior

The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed.

Credit Hours: 3

Prerequisites: BIO_SC 3700 or instructor's consent

BIO_SC 4990: Vertebrate Histology and Microscopic Anatomy

Microscopic anatomy of vertebrate tissues and organs. Includes lab.

Credit Hours: 5

Prerequisites: junior standing

Recommended: BIO_SC 2300 and BIO_SC 3700, or equivalent

BIO_SC 4994: Senior Seminar

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

Credit Hour: 1-3

Prerequisites: Biological Sciences major, senior standing

BIO_SC 4994H: Senior Seminar - Honors

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.

Credit Hour: 1-3

Prerequisites: Biological Sciences major, senior standing; Honors eligibility required

BIO_SC 7002: Topics in Biological Sciences

Advanced topics not in regularly offered courses. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 7100: Limnology

(same as F_W 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity.

Credit Hour: 3-4

Prerequisites: graduate standing or BIO_SC 3650

BIO_SC 7300: Analysis of Biological Macromolecules

Theory/application of techniques used for characterization of proteins and nucleic acids. Topics include sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2300; BIOCHM 4270; MATH 1500; 1 year of physics

BIO_SC 7310: Physics in Cell and Developmental Biology

(same as PHYSCS 7310 and MPP 7300). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions.

Credit Hours: 3

Prerequisites: instructor's consent or PHYSCS 1220 or PHYSCS 2760 and BIO_SC 2300

BIO_SC 7320: Plant Physiology

(same as PLNT_S 7320; cross-leveled with BIO_SC 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3

Prerequisites: BIO_SC 1200 or BIO_SC 1500 and 5 hours Chemistry

BIO_SC 7328: Introductory Radiation Biology

(same as NU_ENG 7328, RADIOL 7328 and V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3

Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

BIO_SC 7350: Summer Institute in Biotechnology

Development of experiments in molecular genetics for use in high school biology laboratories. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

BIO_SC 7374: Molecular Biology Laboratory

Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976

BIO_SC 7400: Plant Anatomy

(same as PLNT_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: BIO_SC 1200 or equivalent

BIO_SC 7490: Vertebrate Histology and Microscopic Anatomy

Microscopic anatomy of vertebrate tissues and organs. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: BIO_SC 2300 and BIO_SC 3700, or equivalent

BIO_SC 7500: Neurobiology

Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, neuroethology and developmental biology. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2300 or BIO_SC 3700

BIO_SC 7560: Sensory Physiology and Behavior

Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development.

Credit Hours: 3

Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 7580: Computational Neuroscience

(Same as BIOL_EN 7575 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences.

Credit Hours: 4

Prerequisites: BIO_SC 1010 or BIO_SC 1500, MATH 1500

BIO_SC 7640: Behavioral Biology

Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla.

Credit Hours: 3

Prerequisites: BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

BIO_SC 7660: Plant Population Biology

Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure.

Credit Hours: 4

Prerequisites: 2 courses in Biological Sciences

BIO_SC 7670: Avian Ecology

Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

Credit Hours: 3

Prerequisites: BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600

BIO_SC 7976: Molecular Biology

Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 2300

BIO_SC 7978: Cancer Biology

(same as BIOCHM 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

Credit Hours: 3

Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976 or equivalent

BIO_SC 7980: Cellular Interactions in Health and Disease

Advanced discussion of topics in cell biology and genetics as they relate to health and disease. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

BIO_SC 7982: Human Inherited Diseases

Advanced analysis of the molecular basis for genetic disorders in humans. Topics will include both Mendelian and complex traits with readings from the primary literature. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and instructor's consent

BIO_SC 7986: Neurology of Motor Systems

Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 3700

BIO_SC 7990: Non-thesis Research

Independent research not leading to a thesis.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8002: Topics in Biological Sciences- Biological/Physical/Mathematics

Advanced topics not in regularly offered courses.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8050: Professional Survival Skills

Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.

Credit Hours: 2

BIO_SC 8060: Ethical Conduct of Research

(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

Credit Hour: 1

BIO_SC 8080: Workshop in Area of Specialization

Intensive course in the theory and methodology of biological investigation. Conducted by visiting scientists. Offered in one or more specialized sections. May be repeated for credit.

Credit Hour: 1

Prerequisites: graduate standing or instructor's consent

BIO_SC 8085: Problems in Biological Sciences

Research not expected to terminate in thesis, or individual advanced study in special subjects.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8087: Seminar

Current topics in the biological sciences. Open to all graduate students. Graded S/U basis only.

Credit Hour: 1

BIO_SC 8090: Research in Biological Sciences

Research leading to thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 8187: Seminar in Areas of Specialization

Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only.

Credit Hour: 1

BIO_SC 8300: Advanced Plant Genetics

Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis.

Credit Hours: 3

Prerequisites: General Genetics and course in Cell Biology or Plant Physiology

BIO_SC 8310: Fungal Genetics and Biology

Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A-F only.

Credit Hours: 3

BIO_SC 8320: Developmental Genetics

An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent

BIO_SC 8330: Stem Cell Biology

A comparative approach to stem cell biology, with emphasis on embryonic, neural and bone marrow-derived stem cells in rodents and humans. Ethical considerations associated with the use of stem cells to study development and repair mechanisms will also be addressed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIO_SC 2300

BIO_SC 8340: Advanced Microscopy Techniques

Electron microscopy and modern light microscopy techniques including epifluorescence, confocal fluorescence microscopy, low light video microscopy, differential interference optics, and computerized image analysis.

Credit Hours: 3

Prerequisites: BIO_SC 4990 or BIO_SC 8350 and instructor's consent

BIO_SC 8350: Advanced Cell Biology

Structure and function of membranes; cell ultrastructure; organellar function; cellular movement; microtubules; microfilaments; mitosis and meiosis.

Credit Hours: 3

Prerequisites: BIO_SC 2300; instructor's consent

BIO_SC 8362: Introduction to Plant Metabolism

(same as PLNT_S 8362 and BIOCHM 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8365: Introduction to Molecular Cell Biology

(same as BIOCHM 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8370: Plant Developmental Biology

Critical discussions of recent publications in plant development, with particular focus on developmental genetics.

Credit Hours: 3

BIO_SC 8440: Integrative Neuroscience I

(same as NEUROSCI 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.

Credit Hours: 3

BIO_SC 8442: Integrative Neuroscience II

(same as NEUROSCI 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.

Credit Hours: 3

BIO_SC 8450: Developmental Neurobiology

Principles of neural development. Development of neuron and nerve patterns, axon growth, synapses, and development of behavior.

Credit Hours: 3

Prerequisites: BIO_SC 4500 or equivalent

BIO_SC 8460: Advanced Cancer Biology

A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.

Credit Hours: 3

BIO_SC 8505: Introduction to Plant Stress Biology

(same as PLNT_S 8505). This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8520: Sensory Ecology

A study of information exchange and acquisition in organisms, with an emphasis on communication, orientation, and predator detection. The course will also examine the effects of biotic and abiotic factors on sensory systems.

Credit Hours: 3

BIO_SC 8600: Design of Ecological Experiments

Principles of experimental design in the context of ecological, behavioral, and evolutionary research.

Credit Hours: 2

Prerequisites: STAT 1400

BIO_SC 8610: Current Concepts in Conservation Biology

Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.

Credit Hours: 2

BIO_SC 8620: Phylogenetic Methods and Applications

A review of principles for constructing and testing phylogenies followed by a survey of methods for inferring ancestral characteristics and adaptive features in living species.

Credit Hours: 4

BIO_SC 8633: Molecular and Network Evolution

(same as AN_SCI 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

Credit Hours: 3

Prerequisites: Instructor's consent required

BIO_SC 8650: Ecological and Evolutionary Genomics

(same as PLNT_S 8650). This course is designed to give a background in evolution and then explore an exciting new field: Ecological and evolutionary genomics. We will study genes that affect fitness and how whole genomes evolve. Graded on A-F basis only.

Credit Hours: 2

BIO_SC 8700: Ecological Genetics

Population genetics and evolutionary theory, with emphasis on studies of natural populations.

Credit Hours: 3

Prerequisites: BIO_SC 2200, BIO_SC 3100 or BIO_SC 3650, and STAT 1400 or equivalent

BIO_SC 8720: Speciation

Advanced discussion of species concepts and the processes of formation of species.

Credit Hours: 3

Prerequisites: BIO_SC 2200 and BIO_SC 4600

BIO_SC 8724: College Science Teaching

(same as LTC 8724 and PHYSCS 8310 and ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

BIO_SC 8725: Science Outreach: Public Understanding of Science

(same as AN_SCI 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

Credit Hour: 1-2

BIO_SC 8726: Integrating Science with Outreach

(same as LTC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.

Credit Hour: 1-6

BIO_SC 8730: Advanced Community Ecology

Detailed examination of new happenings in population and community ecology. Topics vary but will include species interactions, community structure, reproductive strategies.

Credit Hours: 3

Prerequisites: BIO_SC 3650 or instructor's consent

BIO_SC 8740: Plant/Animal Interactions

Discussion and lectures on herbivory, pollination biology, and dynamics of fruit and seed dispersal from ecological and evolutionary perspectives.

Credit Hours: 3

Prerequisites: BIO_SC 3650 or BIO_SC 4660 or equivalent

BIO_SC 8982: Advances in Human Genetic Disorders

Critical review of recent publications describing the molecular and cellular processes underlying genetic disorders in humans. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: BIO_SC 4982 or concurrent enrollment in BIO_SC 7982

BIO_SC 9090: Research in Biological Sciences

Research leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIO_SC 9432: Molecular Biology II

(same as MICROB 9432 and BIOCHM 9432. Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling processes utilizing the current literature will be examined.

Credit Hours: 4

Prerequisites: MICROB 9430

BIO_SC 9468: Molecular Biology of Plant Growth and Development

(same as BIOCHM 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

Credit Hours: 3

Prerequisites: BIO_SC 4976

Biomedical Sciences (BIOMED)

BIOMED 1010: Biomedical Career Explorations

An introduction to the variety of career possibilities within the growing field of biomedical sciences. Graded on S/U basis only.

Credit Hour: 1

BIOMED 2001: Topics in Veterinary Biomedical Science

May be repeated 2 times for credit. Graded on A-F basis only.

Prerequisites: instructor's consent

Credit Hour: 1-99

BIOMED 2085: Problems in Biomedical Research

Assignment of special Topics for Research training in biomedical research.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIOMED 2110: Biomedical Terminology

Life science etymology (Greek for "true meaning", means the study of word derivation) taught by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A-F basis only.

Credit Hours: 3

BIOMED 2111: Veterinary Medical Terminology

Veterinary Medical Terminology is an extension of Biomedical Sciences 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: BIOMED 2110 or instructor's consent

BIOMED 2120: Animal Handling and Physical Restraint

Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets. Graded on A-F basis only.

Credit Hours: 2

BIOMED 2140: Companion Animals

(same as AN_SCI 2140). Focus on companion dog, cat, horse owners concerns re: health, zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals.

Credit Hours: 3

BIOMED 2210: Microbiology for the Health Sciences

Introductory course for students in the applied health curricula. Presents biomolecules of life, enzyme interaction, physiology and structure of representative organisms. Emphasizes bacteria, viruses, fungi and protozoa of health significance. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: CHEM 1100 or equivalent and instructor's consent

BIOMED 2230: Animal Sanitation and Disease Prevention

Preventative measures for diseases and parasites of farm animals.

Credit Hours: 3

BIOMED 2235: Domestic Animal Behavior

An examination of the effects of domestication on the behavior of companion and food animal species. Comparisons to similar animals in feral or wild conditions will be made. The causes, development and potential treatments of abnormal behavior will also be examined. Graded on A-F basis only.

Credit Hours: 3

BIOMED 2420: Biology of Healthy Living

(same as PH_THR 2420 and NUTR_S 2420). Biology of inactivity as a casual factor in chronic disease.

Credit Hours: 2

BIOMED 2940: Internship in Biomedical Sciences

Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: sophomore standing and instructor's consent

BIOMED 3000: Specialty Careers for Veterinary Technicians

Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Course graded on A-F basis only.

Credit Hour: 1

Prerequisites: AAS degree in veterinary technology or instructors consent required

BIOMED 3001: Topics in Biomedical Sciences

Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 3085: Problems in Biomedical Science

Assignment of special topics for research training in biomedical research.

Credit Hour: 1-99

Prerequisites: DVM degree and instructor's consent

BIOMED 3100: Biomedical Pathophysiology

Pathophysiology is the study of changes in the body resulting from disease. This course requires knowledge of normal anatomy and physiology. A comparative approach is used involving both domestic animal and human examples. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3200: Comparative Hematology

Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3219: Elements of Comparative Anatomy

This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: five hours of biological science or zoology or equivalent or instructor's consent or an AAS degree in veterinary technology

BIOMED 3250: Parasitology

(same as BIO_SC 3250) Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special emphasis is given to parasites that can be transmitted from animals to man.

Credit Hours: 3

Prerequisites: 8 hours of biology or instructor's consent

BIOMED 3300: Animal Welfare and Ethics

An introductory examination of contemporary ethical issues related to biomedical science including animal welfare, agriculture, and cloning. Topics related to animal law issues will also be discussed.

Credit Hours: 3

Prerequisites: junior standing

BIOMED 3310: Equine Health Topics

An in-depth examination of equine disease and health topics that are pertinent to today's horse owner and veterinarian. The course will integrate horse management practices with disease recognition, control and prevention. Students will learn how to recognize problems and when to call a veterinarian. Emerging disease problems such as West Nile Virus will be examined as well as topics of continuing concern. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 4977 or equivalent or instructor's consent

BIOMED 3320: Comparative Microscopic Anatomy

The course will provide students with a background in the structure of body organs at the microscopic level. The material will emphasize structure-function relationship of cells and organs using material from diverse animal species, including human, that exemplify unique adaptations to environmental or physiological requirements.

Credit Hours: 3

Prerequisites: BIO_SC 1500 or equivalent

BIOMED 3326: Comparative Pharmacology

An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Treatment modalities in animals and humans are compared. Basics of drug actions and the medicolegal aspects of pharmacology are discussed.

Credit Hours: 3

Prerequisites: an AAS degree in veterinary technology or AN_SCI 3254 or BIO_SC 3700, or equivalent, or instructor's consent

BIOMED 4001: Topics in Biomedical Sciences

Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 4010: Life Sciences Research: Models and Methods

A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Biology or Cell Biology; junior standing required

BIOMED 4100: Veterinary Clinical Chemistry

(cross-leveled with V_PBio 7100). This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

Credit Hours: 3

Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited programs; Undergraduate physiology on mammals (AN_SCI 3254, BIO_SC 3700, or equivalent

Recommended: BIOMED 2110 and BIOMED 3200 or instructor's consent

BIOMED 4110: Veterinary Cytology

(cross-leveled with V_PBio 7110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association-accredited program, or instructor's consent

Credit Hours: 2

Recommended: BIOMED 3200 and BIOMED 2110

BIOMED 4120: Principles of Toxicology

(cross-leveled with V_PBio 7120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

Credit Hours: 3

Prerequisites: one year of college chemistry and biology, each or instructor's consent

BIOMED 4200: Veterinary Public Health and Community Practice

Veterinary Public Health is the field of veterinary medicine that deals with food production and safety, zoonosis (animal to human) disease control, prevent and control of environmental contamination, and the role of animals in society. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructors consent

BIOMED 4210: Animal Issues in Disasters

(cross-leveled with V_PBIO 7210). This course describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

Credit Hour: 1

Prerequisites: an AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

BIOMED 4300: Clinical Veterinary Neurology

Clinical veterinary neurology will review the neurologic examination, common neurologic diseases and techniques to properly care for the neurologic patient. The course organization is based primarily on neuroanatomic localization of disease. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: AAS in Veterinary Technology or BIOMED 3219 and 3100 or instructor's consent; junior or senior standing

BIOMED 4320: Fundamentals of Small Animal Emergency and Critical Care

(cross-leveled with V_BSCI 7320). This course will provide students with the knowledge and skills to assist in small animal medical emergency and critical care facilities.

Credit Hours: 3

Prerequisites: An AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

BIOMED 4333: Veterinary Cell Biology

(same as V_BSCI 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

Credit Hours: 4

Prerequisites: BIO_SC 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor's consent

BIOMED 4400: Veterinary Surgical Nursing

Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIOMED 2111, BIOMED 3219, and BIOMED 3100, or instructor's consent

BIOMED 4500: Equine Critical Care and Nursing

This course provides advanced information for veterinary technicians, veterinary assistants, and pre-veterinary students wishing to enhance

and focus their understanding of equine critical care and nursing concepts. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: AN_SCI 2095 and AN_SCI 3254 or BIO_SC 3700 or equivalents, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 4510: Equine Clinical Anatomy: Forelimbs

(cross-leveled with V_BSCI 7510). Basic foundation in selected aspects of equine clinical anatomy from veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structures of the horse's forelimbs.

Credit Hour: 1

Prerequisites: five hours of biologic science or zoology, or equivalent, or instructor's consent, or an AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited program

BIOMED 4520: Equine Clinical Practice

This course is an introduction to a common medical conditions of the horse. Emphasis will be placed on the presenting complaint and the veterinarians approach to diagnosis, treatment, and prognosis.

Credit Hour: 1

Prerequisites: BIOMED 2110, BIOMED 2111 and AN_SCI 4977 or their equivalents, or an associate's degree in veterinary technology, or instructor's consent

BIOMED 4993: Internship in Veterinary Medical Technical Specialties

Supervised work experience in the MU Veterinary Medical Teaching Hospital of affiliated veterinary medical specialty practices or in MU laboratory animal facilities to develop technical skills and knowledge relevant to becoming a specialist in veterinary medical technology. A written report and oral presentation are required. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: junior standing, an AAS degree from an AVMA accredited veterinary technical program or its equivalent, and instructor's consent

BIOMED 7010: Life Sciences Research: Models and Methods

(same as V_BSCI 7010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Biology or Cell Biology

BIOMED 9090: Research - Biomedical Sciences

Research hours for BMS doctoral students continuous enrollment. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BIOMED 9434: Gonadal Function

(same as AN_SCI 9434). Survey of current and in-depth mechanisms involved in ovarian, testicular, and epididymal function. Emphasis will be

given to comparative differences in gonadal functions among domestic animals.

Credit Hours: 3

Prerequisites: AN_SCI 4314 or equivalent, a course in endocrinology, and biochemistry or cell biology

Black Studies (BL_STU)

BL_STU 1100: Introduction to Swahili and African Culture

Introduction to Swahili and African Culture is a three credit hour course, which serves as a survey of an indigenous African language and the culture of East Africa. There are no prior requirements.

Credit Hours: 3

BL_STU 1250: World Theatre Workshop

(same as THEATR 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

Credit Hours: 2

BL_STU 1410: African American History

(same as HIST 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

Credit Hours: 3

BL_STU 1500: The Black Woman in America

(same as WGST 1500). Review and critiques of a variety of materials about Black women from slavery to present. The course allows students to generate their own view about psychological, social and philosophical impact of the Black women's struggle on all women.

Credit Hours: 3

Prerequisites: sophomore standing

BL_STU 1705: Introduction to Black Studies in Culture

Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

Credit Hours: 3

BL_STU 1720: African-American Theatre History

(same as THEATR 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

Credit Hours: 3

BL_STU 1790: History of Early Africa

(same as HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

Credit Hours: 3

BL_STU 1800: History of Modern Africa

(same as HIST 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 1810: History of South Africa

(same as HIST 1810). South African Society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 2000: Black Studies

An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African-American studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed.

Credit Hours: 3

BL_STU 2001: Undergraduate Topics in Black Studies-General

Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

BL_STU 2003: Undergraduate Topics in Black Studies-Behavioral Science

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

BL_STU 2005: Topics in Black Studies - Humanities

Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

Credit Hours: 3

BL_STU 2150: African-American Cinema

(same as THEATR 2150). Study of the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture.

Credit Hours: 3

BL_STU 2200: Social Inequalities

(Same as SOCIOL 2200.) Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 2210: The Black Americans

(same as SOCIOL 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent or instructor's consent

BL_STU 2310: Literature of the African Diaspora

(Same as RM_LAN 2310) A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas.

Credit Hours: 3

BL_STU 2400: Introduction to African Diaspora Literature

(same as ENGLSH 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

Credit Hours: 3

Prerequisites: ENGLSH 1000

BL_STU 2407: Introduction to African Diaspora Literature, 1603-17

(same as ENGLSH 2407). See BL_STU 2400 for course description.

Credit Hours: 3

BL_STU 2408: Introduction to African Diaspora Literature, 1789-1890

(same as ENGLSH 2408). See BL_STU 2400 for course description.

Credit Hours: 3

BL_STU 2409: Introduction to African Diaspora Literature, 1890-Present

(same as ENGLSH 2409). See BL_STU 2400 for course description.

Credit Hours: 3

BL_STU 2410: African American Women in History

(same as HIST 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.

Credit Hours: 3

BL_STU 2450: Themes in the Geography of Africa South of the Sahara

(same as GEOG 2450). Major concepts of African geography in current and historical perspective. Case studies of major African countries.

Credit Hours: 3

Prerequisites: sophomore standing or one introductory Geography course

BL_STU 2500: Special Problems in Black Studies

Research apprenticeship with faculty member, assisting a faculty member in the development and execution of a research project. May be repeated for a maximum of six hours.

Credit Hour: 1-99

Prerequisites: sophomore standing, instructor's consent

BL_STU 2501: Undergraduate Topics in Black Studies

Organized study of selected topics. Subjects and credit may vary from semester to semester. program consent for repetition.

Credit Hour: 1-3

Prerequisites: sophomore standing

BL_STU 2570: Black Religion

A history of religion approach to the study of black religion which takes into consideration the unique past experiences of the African American community as it underwent the terror of forced migration, slavery, segregation, and discrimination.

Credit Hours: 3

Prerequisites: sophomore standing

BL_STU 2601: Languages of Africa

(same as ENGLSH 2601 and LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.

Credit Hours: 3

BL_STU 2610: Islam and Black America

A historical survey of the origins, development and impact of the Black Islamic tradition.

Credit Hours: 3

BL_STU 2715: Studies in Black Culture

This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as well as other related disciplines. Program consent for repetition.

Credit Hours: 3

This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities, including literature, languages, and music. Course graded on A-F basis only.

Credit Hours: 3

BL_STU 3001: Undergraduate Topics in Black Studies - General

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3003: Undergraduate Topics in Black Studies - Behavioral Sciences

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3004: Undergraduate Topics in Black Studies - Social Science

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

Prerequisites: Junior standing and/or BL_STU 2000

BL_STU 3005: Undergraduate Topics in Black Studies - Humanities

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hours: 3

Prerequisites: Junior Standing and/or BL_STU 2000

BL_STU 3005H: Undergraduate Topics in Black Studies - Humanities - Honors

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hours: 3

Prerequisites: Junior Standing and/or BL_STU 2000. Honors eligibility required

BL_STU 3100: African American Psychology

(same as ESC_PS 3100 and PSYCH 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed.

Credit Hours: 3

Prerequisites: PSYCH 1000

BL_STU 3200: Black Freedom Movement, 1955-1973

(same as HIST 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

Credit Hours: 3

BL_STU 3230: Studies in Black Sexual Politics

Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. May be repeated for credit.

Credit Hours: 3

Prerequisites: sophomore standing required

BL_STU 3400: Survey of African American Literature, Beginnings to 1900

(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

Credit Hours: 3

Prerequisites: ENGLISH 1000

BL_STU 3410: Survey of African American Literature, 1900-Present

(same as ENGLISH 3410). A survey of major authors and movements in African American literature from 1900 to the present.

Credit Hours: 3

Prerequisites: ENGLISH 1000

BL_STU 3420: Periods and Genres in African Diaspora Literature

(same as ENGLISH 3420). Topic (e.g. Harlem Renaissance, African Diaspora Poetry) Announced at time of registration. No more than 6 hours may be taken in the Periods and Genres in African Diaspora Literature series.

Credit Hours: 3

Prerequisites: ENGLISH 1000

BL_STU 3427: Periods and Genres in African Diaspora Literature, 1603-1789

(same as ENGLISH 3427). See BL_STU 3420 for course description.

Credit Hours: 3

BL_STU 3428: Periods and Genres in African Diaspora Literature, 1789-1890

(same as ENGLISH 3428). See BL_STU 3420 for course description.

Credit Hours: 3

BL_STU 3429: Periods and Genres in African Diaspora Literature, 1890-Present

(same as ENGLSH 3429). See BL_STU 3420 for course description.

Credit Hours: 3

BL_STU 3590: Religious Biography: Black Religion

(same as HIST 3400). Studies black American religion through the biographies of representative and influential figures of the nineteenth and twentieth centuries, including Nat Turner, W.E.B Dubois, Marcus Garvey, M.L. King, and Malcolm X.

Credit Hours: 3

BL_STU 3624: Comparative Approaches to Black Studies in History

(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.

Credit Hours: 3

BL_STU 3625: Comparative Approaches to Black Studies in Culture

Comparative approach to the study of Black Diaspora cultures that focus on the theory, method, structure, and application of modes of cultural production within Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Course may be repeated for credit with consent of program.

Credit Hours: 3

BL_STU 3670: History of Black Nationalism in the United States

(same as HIST 3410). Examines the struggle of African Americans to construct autonomous institutions, to build all Black communities or to acquire an independent nation-state. We will study the ideology, structure, strategy and tactics.

Credit Hours: 3

Prerequisites: HIST 1410 or SOCIOL 2210

Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.

Credit Hours: 3

BL_STU 3705: Themes in Black Culture

Examines various themes, issues and perspective in literature, music, the arts, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.

Credit Hours: 3

BL_STU 3800: Women in African History

(same as HIST 3800). Focuses on the varied and changing roles of women in sub-Saharan Africa from pre-colonial times to the present.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 3850: Gender, Hip Hop, and the Politics of Representation

This class will examine gender in hip hop while exploring the intra- and interracial politics of representation among those of the hip hop generation.

Credit Hours: 3

BL_STU 3977: Black Studies Methodologies

Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BL_STU 2975

BL_STU 4000: Special Problems in Black Studies

Independent investigation leading to a paper or a project.

Credit Hour: 1-99

Prerequisites: junior standing, instructor's consent

BL_STU 4001: Undergraduate Topics in Black Studies-General

Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

Prerequisites: junior standing

BL_STU 4040: Houses Divided: Society and Politics in the Civil War Era

(Same as HIST 4040) Examines the sectional crisis, the Civil War and reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freedpeople.

Credit Hours: 3

BL_STU 4130: African-American Politics

(same as POL_SC 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

BL_STU 4181: Themes in Literature by Women

(same as WGST and ENGLSH 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent.

Credit Hours: 3

Prerequisites: junior standing

BL_STU 4210: African-American Religion

(same as REL_ST 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4220: Religion in Afro-American Literature

(same as REL_ST 4220). Examination of Afro-American fiction, poetry and drama which present significant racial attitudes toward the Christian religion.

Credit Hours: 3

Prerequisites: sophomore standing

BL_STU 4230: Women, Development, and Globalization

(same as SOCIOL 4230 and WGST 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

BL_STU 4270: African-Americans in the Twentieth Century

(same as HIST 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3

BL_STU 4300: The Black Family: Past, Present & Future

(same as H_D_FS 4300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3

Prerequisites: junior standing

BL_STU 4303: Race, Class, Gender and U.S. Social Policy

Examines the causes and effects of the vast social and economic inequalities that exist between blacks and whites in US society, including the role federal, state and local government plays in creating and addressing these inequalities.

Credit Hours: 3

BL_STU 4360: Working with Minority Youth

(same as SOC_WK 4360). Develops awareness and understanding of social/psychological/ cognitive realities influencing the behavior of black youth. Content draws upon theories, research, and practice skills relevant to understanding black youth. Minority groups included.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4380: Social Work Practice With Minorities: African-American Emphasis

(same as SOC_WK 4380). Provides students with an appreciation of the black experience in the United States on a knowledge and feeling level.

Credit Hours: 3

BL_STU 4400: Studies in African Diaspora Literature

(same as ENGLISH 4400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

Credit Hours: 3

Prerequisites: junior standing

BL_STU 4407: Studies in African Diaspora Literature, 1603 to 1789

(same as ENGLISH 4407). See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4408: Studies in African Diaspora Literature, 1789 to 1890

(same as ENGLISH 4408). See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4409: Studies in African Diaspora Literature, 1890 to Present

(same as ENGLISH 4409). See BL_STU 4400 for course description.

Credit Hours: 3

BL_STU 4410: Major Africana Diaspora Writers

(same as ENGLISH 4410). An intensive study of selected writers of African Diaspora literature focusing on texts original in English. No more than six hours may be taken in the Major African Diaspora Writers series.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4415: African Americans and American Justice

(same as HIST 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3

Prerequisites: senior standing required

BL_STU 4417: Major African Diaspora Writers, 1603 to 1789

(same as ENGLISH 4417). See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4418: Major African Diaspora Writers, 1789 to 1890

(same as ENGLISH 4418). See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4419: Major African Diaspora Writers, 1890-Present

(same as ENGLISH 4419). See BL_STU 4410 for course description.

Credit Hours: 3

BL_STU 4420: Africana Womanism

(same as ENGLSH 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4460: Economic Characteristics of the African American Experience

(same as HIST 4460). Examines how economic considerations have influenced African American history from the transAtlantic slave trade to the present.

Credit Hour: 1

Prerequisites: junior standing or instructor's consent

BL_STU 4480: Major African Diaspora Women Writers

(same as WGST 4480 and ENGLSH 4480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for Black Studies 4180 and 4480.

Credit Hours: 3

BL_STU 4487: Major African Diaspora Women Writers, 1603 to 1789

(same as WGST 4487 and ENGLSH 4487). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4488: Major African Diaspora Women Writers, 1789 to 1890

(same as WGST 4488 and ENGLSH 4488). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4489: Major African Diaspora Women Writers, 1890 to Present

(same as WGST 4489 and ENGLSH 4489). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4500: Special Problems in Black Studies

Independent project or paper, not leading to dissertation.

Credit Hour: 1-99

Prerequisites: program's approval

BL_STU 4530: Caribbean Women Writers

Examines representative works by female authors from the Caribbean; primarily the English speaking islands. The depiction of Caribbean women will be a major consideration, as well as the unique qualities of Caribbean literature.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

BL_STU 4640: African Politics

(same as POL_SC 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to

decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives.

Credit Hours: 3

Prerequisites: POL_SC 1100 and junior standing

BL_STU 4700: Race, Gender and Ethnicity in Higher Education

Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.

Credit Hours: 3

BL_STU 4710: Themes in African Diaspora Folklore

(same as ANTHRO 4160 and ENGLSH 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

Prerequisites: junior standing

BL_STU 4720: Third World Politics

(same as POL_SC 4720). Comparative, interdisciplinary analysis of the politics of selected states in Southeast Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent

BL_STU 4804: Historical Studies of Black Women

This course offers a comprehensive examination of the origins, developments, and productions of the specified time period with emphases on black women as creative artists, activists, performers, musicians, and writers.

Credit Hours: 3

BL_STU 4877: Black Studies Abroad

This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their "global competencies" and course of study across the three Black Studies tracks-History, Culture and Society-as well as support their study and/or career development. Graded A-F basis only.

Credit Hours: 3

BL_STU 4972: Undergrad. Seminar in Black Studies: History of Race in the U.S.

Readings on problems in American history with reports and discussion on selected topics. Departmental consent for repetition up to a maximum of 6 hours.

Credit Hours: 3

Prerequisites: junior standing, fifteen hours or instructor's consent

BL_STU 4977: Black Studies Capstone

This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BL_STU 2975 and BL_STU 3977; instructor's consent

BL_STU 7004: Topics in Black Studies

Organized study of selected topics in Black Studies. Subjects and earnable credit may vary from semester to semester. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

BL_STU 7230: Women, Development, and Globalization

(same as SOCIOL 7230; cross-leveled with BL_STU 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3

BL_STU 7270: African-Americans in the Twentieth Century

(same as HIST 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

Credit Hours: 3

BL_STU 7300: The Black Family: Past, Present & Future

(same as H_D_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3

BL_STU 7400: Studies in African Diaspora Literature

(same as ENGLSH 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

Credit Hours: 3

BL_STU 7407: Studies in African Diaspora Literature, 1603 to 1789

(same as ENGLSH 7407). See BL_STU 7400 for course description.

Credit Hours: 3

BL_STU 7408: Studies in African Diaspora Literature, 1789 to 1890

(same as ENGLSH 7408). See BL_STU 7400 for course description.

Credit Hours: 3

BL_STU 7409: Studies in African Diaspora Literature, 1890 to Present

(same as ENGLSH 7409). See BL_STU 7400 for course description.

Credit Hours: 3

BL_STU 7410: Major Africana Diaspora Writers

(same as ENGLSH 7410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major Anglophone African Diaspora Writers series.

Credit Hours: 3

Prerequisites: instructor's consent

BL_STU 7415: African Americans and American Justice

(same as HIST 7415) This course provides opportunities to examine the judicial system and discuss selected court cases in which black men, women, or children were plaintiffs or defendants in local and national courts. Moreover, the readings will subject conventional wisdom about black Americans and the legal system to scrutiny while allowing students to "witness" the mechanics of the courts and to assess long and short range social, economic, and political implications for Americans, black and white.

Credit Hours: 3

BL_STU 7417: Major African Diaspora Writers, 1603 to 1789

(same as ENGLSH 7417). See BL_STU 7410 for course description.

Credit Hours: 3

BL_STU 7418: Major Anglophone African Diaspora, 1789 to 1890

(same as ENGLSH 7418). See BL_STU 7410 for course description.

Credit Hours: 3

BL_STU 7419: Major African Diaspora Writers, 1890 to Present

(same as ENGLSH 7419). See BL_STU 7410 for course description.

Credit Hours: 3

BL_STU 7420: Africana Womanism

(same as ENGLSH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

Credit Hours: 3

BL_STU 7460: Economic Characteristics of the African American Experience

(same as HIST 4460). Examines how economic considerations have influenced African American history from the transatlantic slave trade to the present.

Credit Hour: 1

Prerequisites: junior standing or instructor's consent

BL_STU 7480: Major African Diaspora Women Writers

(same as WGST 7480 and ENGLSH 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for Black Studies 7180 and 7480.

Credit Hours: 3

BL_STU 7487: Major African Diaspora Women Writers, 1603 to 1789
(same as WGST 7487 and ENGLSH 7487). See BL_STU 7480 for course description.

Credit Hours: 3

BL_STU 7488: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.

Credit Hours: 3

BL_STU 7489: Major African Diaspora Women Writers, 1890 to Present
(same as WGST 7488 and ENGLSH 7488). See BL_STU 7480 for course description.

Credit Hours: 3

BL_STU 7710: Themes in African Diaspora Folklore
(same as ANTHRO 7160 and ENGLSH 7710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ENGLSH 7700 and ENGLSH 7710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

BL_STU 7810: African-American Religion
(same as REL_ST 7810). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

Credit Hours: 3

BL_STU 7877: Black Studies Abroad
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their "global competencies" and course of study across the three Black Studies tracks - History, Culture, and Society - as well support their study and/or career development. Graded on A-F basis only.

Credit Hours: 3

BL_STU 8000: Independent Readings in Black Studies
Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours.

Credit Hours: 3

Prerequisites: Department Consent Required

BL_STU 8277: Race, Ethnicity, and Transnational Inequalities
(same as SOCIOL 8277). This graduate seminar examines the global contest of our radicalized modern world system. How do people develop and give meaning to race/ethnicity in different regions? Focus on the construction of bodies Creole identities, gender, sexualities, citizenships and immigration. Graded on A-F basis only.

Credit Hours: 3

BL_STU 8400: Seminar in African Diaspora Literature
(same as ENGLSH 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

Credit Hours: 3

BL_STU 8410: Seminar in African Diaspora Theory and Literature Criticism
(same as ENGLSH 8410). Modern and contemporary African Diaspora criticism and theory including diverse approaches to literary and cultural studies. May be repeated to 12 hours with departmental consent.

Credit Hours: 3

BL_STU 8415: Readings in African-American History
(Same as HIST 8415). Readings on selected topics in African-American history from 1619 to the present, with emphasis on conflicting interpretations. May be repeated to a maximum of six hours.

Credit Hours: 3

BL_STU 8416: Seminar in African-American History
(same as HIST 8416). Directed research in selected topics in African-American history. May be repeated to a maximum of six hours.

Credit Hours: 3

BL_STU 8901: Graduate Topics in Black Studies
Graduate seminar arranged by topics or themes related to Black Studies. Graded on A-F basis only.

Credit Hours: 3

Business Administration (BUS_AD)

BUS_AD 3500: Professional Development in Business
Provides an introduction to professional competencies important for success as a business professional. Includes the assessment, communication and development of competencies valued by employers. Prerequisites: Upper level in the TCoB

Credit Hours: 3

BUS_AD 4500: Professional Development Program - Practicum
This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: BUS_AD 3500

BUS_AD 7050: MBA Communications Practice
Special laboratory instruction in oral and written communication skills with an emphasis on business communications.

Credit Hour: 1-3

BUS_AD 7330: Business Law/Regulation

Legal aspects of employment, administrative regulation, corporate and noncorporate ownership structures, and legal issues involving business transactions.

Credit Hour: 2-3

BUS_AD 7340: Business Ethics and Leadership

Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks.

Credit Hour: 1-3

BUS_AD 8001: Topics in Business Administration

Selected topics in administration offered on experimental basis.

Credit Hour: 1-99

Prerequisites: instructor's consent

BUS_AD 8010: MBA Seminar

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.

Credit Hour: 1-3

Prerequisites: MBA students only

BUS_AD 8020: MBA Seminar

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated.

Credit Hour: 1-3

Prerequisites: MBA students only

BUS_AD 8030: MBA Seminar

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Some sections may be graded A-F or S/U only. May be repeated.

Credit Hour: 1-3

Prerequisites: MBA students only

BUS_AD 8500: Business Problem Analysis: Field Project

Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience.

Credit Hour: 1-3

BUS_AD 8600: Business Consulting

Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.

Credit Hour: 2-3

BUS_AD 8730: International Study Abroad

Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Graded on a S/U basis only. May be repeated as venues change.

Credit Hour: 3-6

Prerequisites: consent required

Cardiopulmonary & Diagnostic Sciences (CPD)

CPD 2190: Medical Terminology

Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology.

Credit Hours: 3

Prerequisites: sophomore standing

CPD 3200: Essentials of Pathology

Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students.

Credit Hours: 2

Prerequisites: general biology and one course in either physiology or anatomy

CPD 3460: Cardiovascular and Pulmonary Diagnostic Applications I

(same as RA_SCI 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.

Credit Hours: 3

Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

CPD 4440: Organization and Administration

(same as RA_SCI 4440 and RS_THR 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

Credit Hours: 3

CPD 4460: Cardiovascular and Pulmonary Diagnostic Applications II

(same as RA_SCI 4460). Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.

Credit Hours: 3

CPD 4480: Clinical Ethics

(same as HLTH_SCI 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider

responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare. Prerequisites: Junior or Senior standing; Restricted to Health Science majors only

Credit Hours: 3

CPD 4500: Bioterrorism in Healthcare

This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations.

Credit Hour: 1

CPD 4840: Asthma Education

This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent

CPD 4955: Introduction to Research

(same as RS_THR 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

Credit Hours: 3

CPD 4985: Healthcare Organization and Leadership

(same as HLTH_SCI 4985). In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: HTH_PR 2100

CPD 7840: Asthma Education

This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: instructor's consent required

Chemical Engineering (CH_ENG)

CH_ENG 1000: Introduction to Chemical Engineering

Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

Credit Hours: 2

Prerequisites: MATH 1500, CHEM 1320, or concurrently

CH_ENG 1000H: Introduction to Chemical Engineering - Honors

Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

Credit Hours: 2

Prerequisites: MATH 1500, CHEM 1320, or concurrently. Honors eligibility required

CH_ENG 1320: Chemistry and Chemical Technology I

Covers fundamental principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. Graded on A/F basis only. May be repeated for credit.

Credit Hours: 3

Prerequisites: MATH 1500 or concurrent enrollment

CH_ENG 1330: Chemistry and Chemical Technology II

Covers fundamentals principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. May be repeated for credit. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: CH_ENG 1320 or CHEM 1320 and MATH 1500

Corequisites: MATH 1500

CH_ENG 2001: Advanced Experimental Course

Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

Prerequisites: sophomore standing

CH_ENG 2118: Introduction to Energy Technology and Sustainability

An introductory course on energy technology and those resources and practices that allow for sustainable commercialization. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: sophomore standing in engineering

CH_ENG 2225: Mass and Energy Balance

Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics.

Credit Hours: 3

Prerequisites: PHYSICS 2750, CHEM 2100, or concurrently

CH_ENG 2226: Engineering Process Computations and Laboratory

Engineering applications of ordinary and partial differential equations, spreadsheets, Matlab, discipline-specific software (Aspen), process simulation, data collection, data regression, and modeling of multiple experimental systems. Perquisites or

Credit Hours: 3

Corequisites: MATH 1700

CH_ENG 3234: Principles of Chemical Engineering I

Fluid flow, heat and mass transfer. A comprehensive treatment of the transport processes related to chemical engineering operations, with focus on both theory and applications.

Credit Hours: 4

Prerequisites: grade of C- or better in CH_ENG 2225

CH_ENG 3235: Principles of Chemical Engineering II

Separation processes in chemical engineering, including: Evaporation, absorption, distillation, extraction, leaching, membrane separation, and drying.

Credit Hours: 3

Prerequisites: CH_ENG 3234

CH_ENG 3243: Chemical Engineering Laboratory I

Laboratory study of some principal unit operations of chemical engineering.

Credit Hours: 3

Prerequisites or Corequisites: CH_ENG 2226 and CH_ENG 3235

CH_ENG 3261: Chemical Engineering Thermodynamics I

Study of thermodynamics, with particular reference to chemical engineering applications.

Credit Hours: 3

Prerequisites: grade of C or better in CH_ENG 2225

CH_ENG 3262: Chemical Engineering Thermodynamics II

Credit Hours: 3

Prerequisites: CH_ENG 3261

CH_ENG 3307: Chemical Process Safety and Professional Ethics

A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CH_ENG 3234, CH_ENG 3261 or instructor's consent

CH_ENG 4001: Topics in Chemical Engineering

Current and new technical developments in chemical engineering.

Credit Hours: 3

Prerequisites: instructor's consent

CH_ENG 4085: Problems in Chemical Engineering

Directed study of chemical engineering problems.

Credit Hour: 2-4

Prerequisites: instructor's consent

CH_ENG 4220: Hazardous Waste Management

(same as CV_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous waste, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

Prerequisites: junior standing

CH_ENG 4226: Engineering Research Calculations and Reporting

Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 4100

CH_ENG 4270: Design of Experiments and Statistical Quality Control for Process Engineers

(same as BIOL_EN 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

Credit Hours: 3

Prerequisites: experience with Excel or instructor's consent

CH_ENG 4306: Advanced Engineering Math

(same as NU_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3

Prerequisites: MATH 4100

CH_ENG 4311: Chemodynamics

Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4312: Air Pollution Control

Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

Credit Hours: 3

Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4315: Introduction to Bioprocess Engineering

(same as BIOL_EN 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

CH_ENG 4316: Biomass Refinery Operations

(same as BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

CH_ENG 4317: Chemical Processing in Semiconductor Device

This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

Credit Hours: 3

Prerequisites: MATH 4100 or MATH 7100

CH_ENG 4318: Energy Technology and Sustainability

An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. May be repeated for credit.

Credit Hours: 3

Prerequisites: at least one engineering thermodynamics course or a Physical Chemistry course or instructor's consent

CH_ENG 4319: Introduction to Polymer Materials

An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3

Prerequisites: CH_ENG 3262 and CHEM 2110

CH_ENG 4321: Introduction to Ceramics

Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry level engineering to be conversant with the terminology and concepts of ceramic science and engineering.

Credit Hours: 3

Prerequisites: Chemistry and Physics

CH_ENG 4335: Transport Phenomena

Integrated study of momentum, heat and mass transport.

Credit Hours: 3

Prerequisites: CH_ENG 3235, and MATH 4100 or MATH 7100

CH_ENG 4345: Special Reading in Chemical Engineering

Individually supervised special reading leading to an engineering report.

Credit Hour: 2-5

Prerequisites: senior standing

CH_ENG 4363: Chemical Reaction Engineering and Technology

Reactor design and optimization; rate equations; thermal effects in reactor.

Credit Hours: 3

Prerequisites: CH_ENG 2226, CH_ENG 3262, or instructor's consent

CH_ENG 4370: Process Control Methods and Laboratory

Stat-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection.

Credit Hours: 3

Prerequisites: CH_ENG 2226

CH_ENG 4385: Chemical Engineering Design I

The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered.

Credit Hours: 3

Prerequisites: CH_ENG 2226, CH_ENG 3235, CH_ENG 3262, PHYSICS 2760, CHEM 2110

CH_ENG 4464: Electrochemical Reaction Engineering Science

Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: A course in thermodynamics or physical chemistry; CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor's consent

CH_ENG 4980: Process Synthesis and Design

Continuation of CH_ENG 4385: application of chemical analysis and modeling to a capstone design project.

Credit Hours: 3

Prerequisites: CH_ENG 4385

CH_ENG 4990: Undergraduate Research in Chemical Engineering

Directed study of chemical engineering problems.

Credit Hour: 2-4

Prerequisites: instructor's consent

CH_ENG 4995: Undergraduate Research in Chemical Engineering - Honors

Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee.

Credit Hour: 3-6

Prerequisites: senior standing

CH_ENG 7001: Topics in Chemical Engineering

Current and new technical developments in chemical engineering.

Credit Hours: 3

Prerequisites: instructor's consent

CH_ENG 7220: Hazardous Waste Management

(same as CV_ENG 7220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CH_ENG 7226: Engineering Research Calculations and Reporting

Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

Credit Hours: 3**Prerequisites:** MATH 4100**CH_ENG 7270: Design of Experiments and Statistical Quality Control for Process Engineers**

(same as BIOL_EN 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

Credit Hours: 3**Prerequisites:** experience with Excel or instructor's consent**CH_ENG 7311: Chemodynamics**

Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

Credit Hours: 3**Prerequisites:** CH_ENG 3234 or instructor's consent**CH_ENG 7312: Air Pollution Control**

Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

Credit Hours: 3**Prerequisites:** CH_ENG 3234 or instructor's consent**CH_ENG 7315: Introduction to Bioprocess Engineering**

(same as BIOL_EN 7315). This General introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models.

Credit Hours: 3**Prerequisites:** BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor's consent**CH_ENG 7316: Biomass Refinery Operation**

(same as BIOL_EN 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

Credit Hours: 3**Prerequisites:** BIOL_EN 2180 or CH_ENG 2225 or instructor's consent**CH_ENG 7317: Chemical Processing in Semiconductor Device**

This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

Credit Hours: 3**Prerequisites:** MATH 4100 or MATH 7100**CH_ENG 7319: Introduction to Polymer Materials**

An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3**Prerequisites:** CH_ENG 3262 and CHEM 2110**CH_ENG 7321: Introduction to Ceramic Material**

Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry-level engineer to be conversant with the terminology and concepts of ceramics science and engineering.

Credit Hours: 3**Prerequisites:** Chemistry and Physics**CH_ENG 7335: Transport Phenomena**

Integrated study of momentum, heat and mass transport.

Credit Hours: 3**Prerequisites:** CH_ENG 3235, and MATH 4100 or MATH 7100**CH_ENG 7464: Electrochemical Reaction Engineering Science**

Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

Credit Hours: 3**Prerequisites:** A course in thermodynamics or physical chemistry; CH_ENG 3261 or MAE 2300 or CHEM 3310 or instructor's consent**CH_ENG 7980: Synthesis and Design of Chemical Process**

This is a heuristics-based design course intended to assist students in bringing together capabilities from previous course. An emphasis is placed on the creation process of design. Graded on A-F basis only.

Credit Hours: 3**CH_ENG 8001: Advanced Topics in Chemical Engineering****Credit Hours:** 3**Prerequisites:** instructor's consent**CH_ENG 8029: Advanced Plasma Processing**

Concepts and techniques in novel plasma processing: plasma characteristics, plasma sputtering, plasma enhanced chemical vapor deposition (PECVD), plasma etching, plasma treatment, plasma fabrication of nano-structured materials and diamondlike films, biomedical applications.

Credit Hours: 3**CH_ENG 8085: Problems in Chemical Engineering**

Supervised investigation in chemical engineering to be presented in the form of a report.

Credit Hour: 1-5**Prerequisites:** instructor's consent

CH_ENG 8087: Seminar in Chemical Engineering

Reviews investigations and projects of importance in chemical engineering.

Credit Hour: 1

CH_ENG 8230: Advanced Ceramic Materials

(same as BIOL_EN 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

Credit Hours: 3

CH_ENG 8320: Plasma Polymerization

Fundamental aspects of polymer formation in plasma state: gas ionization, reaction kinetics, plasma characteristics and operational parameters of plasma reactors. Properties of plasma - synthesized ultrathin films and their utilization also discussed.

Credit Hours: 3

Prerequisites: CH_ENG 4319 or instructor's consent

CH_ENG 8336: Advanced Heat and Momentum Transfer

Advanced study of these transport phenomena.

Credit Hours: 3

Prerequisites: CH_ENG 3235 or instructor's consent

CH_ENG 8337: Advanced Mass Transfer

Advanced study of mass transfer.

Credit Hours: 3

Prerequisites: CH_ENG 4336 or instructor's consent

CH_ENG 8338: Analysis of Equilibrium Stage Processes

Advanced study of stage processes.

Credit Hours: 3

Prerequisites: CH_ENG 2226, CH_ENG 3235 and CH_ENG 3262

CH_ENG 8429: Membranes and Membrane Processes

Thermodynamics and mass transfer of membrane separation processes; Concentration-Driven Processes; Pressure-Driven Processes; Electromembrane Processes; Biological Membrane Processes; Membrane Polymers; Preparation of Membranes; Membrane Separation Application (potable and ultrapure water, effluent treatment, gas separations, electrochemistry, dialysis therapeutic, and other applications).

Credit Hours: 3

CH_ENG 8451: Advanced Chemical Engineering Thermodynamics I

Advanced thermodynamics; particular reference to its application to chemical engineering.

Credit Hours: 3

Prerequisites: CH_ENG 3262 or instructor's consent

CH_ENG 8463: Chemical Reaction Engineering Science

Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts.

Credit Hours: 3

Prerequisites: CH_ENG 4363

CH_ENG 8471: Process Optimization Methods in Chemical Engineering

Steady-state and unsteady-state optimization techniques applied to chemical processes.

Credit Hours: 3

Prerequisites: CH_ENG 2226

CH_ENG 8990: Research-Masters Thesis in Chemical Engineering

Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: Masters candidate

CH_ENG 9990: Research-Doctoral Dissertation in Chemical Engineering

Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. candidate

Credit Hour: 1-99

Prerequisites: Ph.D

Chemistry (CHEM)

CHEM 1000: Introductory Chemistry

Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100.

Credit Hours: 2

Prerequisites or Corequisites: MATH 1100 or MATH 1120

CHEM 1100: Atoms and Molecules with Lab

One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3

CHEM 1100H: Atoms and Molecules with Laboratory - Honors

One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3

Prerequisites: Honors eligibility required

CHEM 1320: College Chemistry I

First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic

properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4

Prerequisites: MATH 1100 or MATH 1120 or equivalent

CHEM 1320H: College Chemistry I - Honors

First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4

Prerequisites: MATH 1100 or MATH 1120 or equivalent. Honors eligibility required

CHEM 1330: College Chemistry II

Continuation of CHEM 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4

Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H

CHEM 1330H: College Chemistry II- Honors

Continuation of CHEM 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4

Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H. Honors eligibility required

CHEM 1500H: Honors Intensive General Chemistry with Lab - Honors

A one-semester, intensive introduction to chemistry for honors-eligible students that takes the place of CHEM 1320, CHEM 1330. Four lectures and one 3-hour lab period per week. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: honors eligibility, college algebra and one year of high school chemistry or instructor's consent

CHEM 2030: Survey of Organic Chemistry

One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life.

Credit Hours: 3

Prerequisites: Grade of C or better in CHEM 1320 or CHEM 1320H or equivalent. Recommended CHEM 1330, or CHEM 1330 concurrently

CHEM 2100: Organic Chemistry I

First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after CHEM 2030 or equivalent.

Prerequisites: grade of C or better in CHEM 1320 or equivalent or CHEM 1330 concurrently,

Credit Hours: 3

Recommended: CHEM 1330

CHEM 2110: Organic Chemistry II

Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats.

Credit Hours: 3

Prerequisites: grade of C or better in CHEM 2100 or equivalent, or departmental consent

CHEM 2130: Organic Laboratory I

Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week.

Credit Hours: 2

Recommended: Concurrent enrollment in CHEM 2110 or CHEM 2030. No credit for students who have previous organic laboratory credit

CHEM 2140: Organic Laboratory II

Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week.

Credit Hours: 2

Prerequisites: grade of C or better in CHEM 2110 and CHEM 2130 or equivalent

CHEM 2160H: Honors Organic Chemistry I - Honors

First course of a two-semester sequence. Similar to CHEM 2100 but with increased depth and breadth; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week.

Credit Hours: 4

Prerequisites: honors eligibility, grade of B or better in CHEM 1320 or equivalent

CHEM 2170H: Honors Organic Chemistry II with Lab - Honors

Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2110, but with increased depth and breadth.

Credit Hours: 5

Prerequisites: honors eligibility, grade of B or better in CHEM 2160H or instructor's permission

CHEM 2190H: Honors Organic Chemistry Laboratory - Honors

Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques, including NMR, FTIR, MS and HPLC. 2 lab sessions, 1 discussion session per week.

Credit Hours: 2

Prerequisites: honors eligibility, grade of C or better in CHEM 2170H or equivalent

CHEM 2400: Fundamentals of Inorganic Chemistry with Lab

A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties.

Credit Hours: 3

Prerequisites: grade of C or better in CHEM 1330

CHEM 2950: Undergraduate Research in Chemistry

A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit.

Credit Hour: 1-3

Prerequisites: sophomore standing, 2.75 GPA and/or instructor's consent

CHEM 3200: Quantitative Methods of Analysis with Lab

Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods.

Credit Hours: 4

Prerequisites: CHEM 1330 or CHEM 1500H

CHEM 3300: Fundamentals of Physical Chemistry

Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430.

Credit Hours: 3

Prerequisites: MATH 1700, a course in organic chemistry; PHYSCS 1210 and PHYSCS 1220 or PHYSCS 2175, or PHYSCS 2176 concurrently

CHEM 3310: Physical Chemistry I

Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium.

Credit Hours: 3

Prerequisites: one semester organic chemistry and PHYSCS 2175, PHYSCS 2176 and MATH 2300, or MATH 2300 concurrently

CHEM 3330: Physical Chemistry II

Continuation of CHEM 3310. Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

Credit Hours: 3

CHEM 3340: Physical Chemistry Laboratory

Credit Hours: 3

Prerequisites: Grade of C or better in CHEM 3200; CHEM 3330 or CHEM 3330 concurrently

CHEM 3700: Undergraduate Seminar in Chemistry

Methods for locating and presenting chemical information, data analysis techniques, professional issues.

Credit Hours: 3

Prerequisites: CHEM 1330 or CHEM 1500H; CHEM 2100 or CHEM 2160H

CHEM 3800: Internship in Chemistry

Cannot be substituted for other chemistry courses required for B.S. or B.A. degree.

Credit Hour: 1-6

Prerequisites: departmental consent

CHEM 3940: Service-Learning in Chemistry

A service-learning community outreach program affording chemistry students with an opportunity to enhance their problem-solving skills. May be repeated once for credit. Satisfies no specific chemistry degree requirements, nor Arts and Science general education requirements. Graded on a S/U basis only.

Credit Hours: 2

Prerequisites: departmental consent

CHEM 4001: Topics in Chemistry - General

Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99

Prerequisites: departmental consent

CHEM 4003: Topics in Chemistry- Natural Science

Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

Credit Hour: 1-99

Prerequisites: departmental consent

CHEM 4010: Advanced Chemistry Laboratory

Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds.

Credit Hours: 3

Prerequisites: CHEM 2400, CHEM 2140, or CHEM 2190H, CHEM 3200, CHEM 3330 (or CHEM 3330 corequisite)

CHEM 4050: Problems in Chemistry

Individual study under the direction of a faculty member that supplements regular course work.

Credit Hour: 1-99

Prerequisites: instructor's consent

CHEM 4160: Intermediate Organic Chemistry

Stresses synthetic organic chemistry at an intermediate level.

Credit Hours: 3

Prerequisites: at least one year organic chemistry

CHEM 4170: Medicinal Chemistry

Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies.

Credit Hours: 3

Prerequisites: CHEM 2110, or CHEM 2170H, CHEM 3300 or CHEM 3310 or instructor's consent

CHEM 4200: Instrumental Methods of Analysis with Lab

Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.

Credit Hours: 3

Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 4280: Environmental Chemistry

Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment.

Credit Hours: 3

Prerequisites: 8 hours chemistry including organic and analytical

CHEM 4290: Environmental-Toxicological Chemistry

In-depth study of the chemical aspects of current issues dealing with environmental pollutants and toxic chemical substances.

Credit Hours: 3

Prerequisites: CHEM 4280 or equivalent

CHEM 4400: Inorganic Chemistry

Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

Credit Hours: 3

Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 4490: Physics and Chemistry of Materials

(same as NU_ENG 4319, PHYSCS 4190 and BIOL_EN 4480). Undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

CHEM 4600: Introduction to Radiochemistry with Lab

(same as NU_ENG 4391). Introduces application of radio-tracer techniques to chemical research.

Credit Hours: 3

Prerequisites: CHEM 1330 or CHEM 1500H; and one semester of physical chemistry, or instructor's consent

CHEM 4800: Chemistry Teaching Practicum

Provides practical experience teaching introductory chemistry in discussion and laboratory settings. For students pursuing dual degrees in chemistry and secondary education. For students pursuing simultaneous dual degrees in chemistry and secondary education. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: senior standing; departmental consent required

CHEM 4950: Senior Research

A laboratory research project with approved written goals and a final written report. It may be taken twice.

Credit Hours: 3

Prerequisites: a 2.75 GPA, departmental consent

CHEM 4990H: Senior Honors Research I

A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.

Credit Hours: 3

Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required

CHEM 4991H: Senior Honors Research II

A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.

Credit Hours: 3

Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

CHEM 7087: Seminar in Chemistry for Beginning Graduate Students

Seminar in Chemistry for Beginning Graduate Students

Credit Hour: 1

CHEM 7200: Instrumental Methods of Analysis with Lab

Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.

Credit Hours: 3

Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 7300: Intermediate Physical Chemistry

Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry.

Credit Hours: 3

Prerequisites: departmental consent

CHEM 7400: Inorganic Chemistry

Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

Credit Hours: 3

Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 7490: Physics and Chemistry of Materials

(same as NU_ENG 7319, PHYSCS 7190 and BIOL_EN 7480). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent

CHEM 8003: Topics in Chemistry - Natural Science

Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: instructor's consent

CHEM 8020: Introduction to X-ray Crystallography

Designed for students in chemistry and related fields. Aimed at offering a practical understanding of single-crystal x-ray structural studies. Includes hands-on laboratory work (data collection and analysis).

Credit Hours: 3

Prerequisites: instructor's consent

CHEM 8050: Non-Thesis Research in Chemistry

Does not lead to dissertation.

Credit Hour: 1-99

CHEM 8085: Topics in Chemistry

Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hour: 1-99

Prerequisites: instructor's consent

CHEM 8087: Seminar in Chemistry

Seminar in Chemistry

Credit Hour: 1

CHEM 8090: Thesis/Dissertation (pre-candidacy) Research in Chemistry

Research leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

CHEM 8120: Physical Organic Chemistry I

Bonding theory, physical methods, absorption spectroscopy, conformational analysis, mechanism of reactions.

Credit Hours: 3

CHEM 8130: Physical Organic Chemistry II

Case studies and methods for determining organic reaction mechanisms.

Credit Hours: 3

CHEM 8150: Organic Reaction Mechanisms

Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts.

Credit Hours: 3

Prerequisites: 1 year of Organic Chemistry and Physical Chemistry

CHEM 8160: Organic Spectroscopy

Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8170: Applications of the Reactions of Organic Chemistry

Credit Hours: 3

Prerequisites: CHEM 8150

CHEM 8210: Analytical Measurement

Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.

Credit Hours: 3

CHEM 8230: Separations and Chromatography

Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.

Credit Hours: 3

CHEM 8240: Mass Spectrometry

This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.

Credit Hours: 3

CHEM 8250: Analytical Spectroscopy

Selected topics dealing with recent advances in analytical chemistry.

Credit Hours: 3

CHEM 8260: Surface Analysis and Characterization

Covers various aspects of modern methods of surface analysis and characterization. Topics include instrumentation, theory, and data reduction methods. Major sections include electron spectroscopy, microscopy, and vibrational spectroscopy as applied to surfaces. Graded on A-F basis only.

Credit Hours: 3

CHEM 8265: Fluorescence Spectroscopy

Advanced analytical chemistry course that explores the fundamental principles and uses of modern fluorescence spectroscopy in biology, materials science, chemistry, physics and engineering. Special emphasis is placed on the methodologies used to obtain specific information about a particular chemical system. Graded on A-F basis only.

Credit Hours: 3

CHEM 8270: Advanced Analytical Chemistry

Continuation of CHEM 8250.

Credit Hours: 3

CHEM 8280: Bioanalytical Chemistry

This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding for how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.

Credit Hours: 3

CHEM 8285: Nanochemistry

Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.

Credit Hours: 3

CHEM 8300: Advanced Physical Chemistry

Advanced Physical Chemistry

Credit Hours: 3

CHEM 8310: Quantum Chemistry

Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation principle, WKB), and the structure of many-electron atoms.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8320: Chemical Kinetics

Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8330: Computational Chemistry

Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems.

Credit Hours: 3

Prerequisites: CHEM 3300 or equivalent or instructor's consent

CHEM 8340: Statistical Mechanics

Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases.

Credit Hours: 3

Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8350: Magnetic Resonance

Basic principles of nuclear magnetic resonance (NMR) and electron spin resonance (ESR), nuclear spin relaxation, current experimental techniques and the application to studies of structures, dynamics and chemical analysis.

Credit Hours: 3

Prerequisites: One year of organic chemistry, CHEM 3300 or equivalent

CHEM 8400: Inorganic Mechanisms

Experimental stoichiometry and rate law determination. Isotopic applications. Methods and results of fast reaction studies. Basic known inorganic mechanisms. Experimental methods of establishing mechanisms of reaction.

Credit Hours: 3

CHEM 8410: Chemistry of the Main Group Elements

Descriptive inorganic chemistry of the main group elements. Textbook material extensively supplemented with information from the current chemical literature.

Credit Hours: 3

CHEM 8420: Supramolecular Chemistry

The basics of supramolecular chemistry will be covered, including host-guest complexes, reorganization, complementarity, thermodynamic interactions, self assembly and biochemical, molecular device and crystal engineering applications. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BS in Chemistry, Biochemistry or Chemical Engineering

CHEM 8430: Coordination Chemistry and Reactivity

The chemistry of the transition elements (d-block) and their reactivity will be discussed, including bonding, coordination numbers, oxidation states, and reactivity (kinetics). Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CHEM 4400 or equivalent; graduate standing in chemistry or instructor's consent

CHEM 8440: Inorganic Structural Methods

Chemical bonding, application of group theory, spectroscopy; diffraction as applied to structure determination; structural implications of dipole moment and magnetic susceptibility measurements.

Credit Hours: 3

CHEM 8450: Organometallics

Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.

Credit Hours: 3

CHEM 8460: Solid State Chemistry

An introduction to the unique aspects of extended solids. Crystal symmetry, group theory and their applications to crystallography. Bonding and electronic structure theories of metals and semiconductors. Cooperative magnetism and superconductivity. Defects and ionic conductivity. Preparative methods in solid state chemistry.

Credit Hours: 3

CHEM 8470: Actinide Chemistry

The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.

Credit Hours: 3

CHEM 8480: Chemistry of Nanomaterials

This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photonic materials. The nanostructure of organic polymers, micelles, and the process of biomineralization to make organic-inorganic hybrid materials will also be discussed.

Credit Hours: 3

CHEM 8600: Radiochemistry and Detection with Lab

An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.

Credit Hours: 3

CHEM 8610: Advanced Radiochemistry

Reviews current advances in radiochemistry, hot atom chemistry, radiation chemistry, nuclear spectrometry.

Credit Hours: 3**Prerequisites:** CHEM 8600 or equivalent

CHEM 8620: Nuclear Chemistry

Designed for graduate students in chemistry and related fields. Studies nuclear reaction and nuclear properties.

Credit Hours: 3**Prerequisites:** CHEM 3300, MATH 2300 or instructor's consent

CHEM 8630: Radiopharmaceutical Chemistry

The radiotracer concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Graded on A-F basis only.

Credit Hours: 3**Prerequisites:** undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor's consent

CHEM 8640: Biological Radiochemistry

Covers the interaction of radiation on biological material. The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.

Credit Hours: 3

CHEM 9090: Post-candidacy Dissertation Research in Chemistry

Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Child Health (CH_HTH)

CH_HTH 6000: Child Health Clerkship

Child Health Clerkship

Credit Hour: 6-10

CH_HTH 6010: Rural Child Health Clerkship

Rural Child Health Clerkship

Credit Hours: 6

CH_HTH 6100: Remediation 6000 Child Health Clerkship

Child Health Clerkship remediation.

Credit Hours: 6**Prerequisites:** 6000 Child Health Clerkship, received unsatisfactory grade

CH_HTH 6221: Advanced Biomedical Science Medicine Problem Premature Infant

Advanced Biomedical Science Medicine Problem Premature Infant

Credit Hours: 5

CH_HTH 6223: ABS Child Health Research

ABS Child Health Research

Credit Hour: 5-10

CH_HTH 6225: ABS Child Health Research and Review

ABS Child Health Research and Review

Credit Hour: 5-10

CH_HTH 6425: Child Health Genetics

Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases.

CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available. Prerequisites: Child Health clerkship

Credit Hours: 5

CH_HTH 6426: Child Health Infectious Disease

Child Health Infectious Disease

Credit Hours: 5

CH_HTH 6427: Pediatric Hematology/Oncology

Pediatric Hematology/Oncology

Credit Hours: 5

CH_HTH 6428: Pediatric Diabetes and Endocrinology

Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence.

CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program. Thus, students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6429: Developmental Pediatrics

Developmental Pediatrics

Credit Hours: 5

CH_HTH 6430: Pediatric Cardiology

Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6431: Pediatric Pulmonology

Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6432: Pediatric Gastroenterology

Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management. 3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric subspecialist for four weeks will include inpatient and outpatient service activities.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6433: Child Health Sports Medicine

Child Health Sports Medicine

Credit Hours: 5

CH_HTH 6434: Child Adolescent Medicine

Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent "check-up", and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents. CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extern level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6435: Ped Renal and Rheumatology

4th year elective for renal/rheumatology rotation, four weeks.

Credit Hours: 5

Prerequisites: 3rd year Pediatrics/Child Health or Internal Medicine rotation

CH_HTH 6706: Internal Medicine Hematology and Medical Oncology Rural Elective

The student will work as part of a team providing hands-on clinical services in a rural outpatient setting. Students will participate in daily morning report and other didactic sessions provided by the rotation site. Students will learn using a variety of evidence-based resources, direct observations and demonstration.

Credit Hours: 5

Prerequisites: CH_HTH 6002; restricted to medical students only

CH_HTH 6725: Developmental Pediatrics - Rural

Rural developmental pediatrics general elective.

Credit Hours: 5

Prerequisites: CH_HTH 6000; Restricted to fourth year medical students

CH_HTH 6726: Child Health Rural Elective

Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well.

Credit Hours: 5

Prerequisites: CH_HTH 6000; restricted to medical students only

CH_HTH 6825: General Child Health - Inpatient

Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a

member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient's management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6826: General Child Health - Outpatient

Goals/Objectives: To provide additional experience in general pediatrics in outpatient care. CURRICULUM: The student will function as a member of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6827: Neonatology/Neonatal Intensive Care Unit

Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital)

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6828: Pediatric Intensive Care Unit

Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

Credit Hours: 5

Prerequisites: Child Health Clerkship

CH_HTH 6829: Pediatric Neurology

Pediatric Neurology

Credit Hours: 5

Chinese (CHINSE)

CHINSE 1100: Elementary Chinese I

For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

CHINSE 1200: Elementary Chinese II

Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

Prerequisites: C- or better in CHINSE 1100 or equivalent

CHINSE 2001: Undergraduate Topics in Chinese-General

Organized study of selected topics. Subjects and credits may vary from semester to semester.

Credit Hour: 1-3

CHINSE 2005: Undergraduate Topics in Chinese - Humanities

Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Chinese required. No language credit.

Credit Hour: 1-3

CHINSE 2100: Everyday Spoken Chinese Level I

Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on MU campus.

Credit Hours: 3

Prerequisites: CHINSE 1200. Restricted to students enrolled in MU China Study Abroad

CHINSE 2160: Intermediate Chinese I Conversation and Composition

Credit Hours: 3

Prerequisites: C- or better in CHINSE 1200 or equivalent

CHINSE 2310: Chinese Civilization I

Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

Credit Hours: 3

CHINSE 2330: Chinese Language and Culture

Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese.

Credit Hours: 3

Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINSE 3005: Topics in Chinese - Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

Prerequisites: sophomore standing and instructor's consent

CHINSE 3085: Problems in Chinese

Supervised study in Chinese language and/or culture.

Credit Hour: 1-3

Prerequisites: instructor's consent

CHINSE 3160: Intermediate Chinese II Conversation and Composition

Continuation of CHINSE 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns.

Credit Hours: 3

Prerequisites: C- or higher in CHINSE 2160, or instructor's consent

CHINSE 3170: Everyday Spoken Chinese Level II

For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus.

Credit Hours: 3

Prerequisites: CHINSE 3160 or consent of instructor. Restricted to students enrolled in the MU China Study Abroad

CHINSE 3180: Advanced Chinese I

Improves vocabulary, listening, spoken and written Chinese Skills. Discusses basic cultural ideas. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C- or higher in CHINSE 3160, or equivalent

CHINSE 3300: Chinese Traditions and Global Integration

Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3

Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINSE 3300H: Chinese Traditions and Global Integration - Honors

Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3

Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required

CHINSE 3310: Chinese Poetry

Helps students become familiar with and appreciate classical Chinese poems from the Tang and Song Dynasties, and the heydays of classical Chinese poetry. Poems and lectures in English.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

CHINSE 3320: Modern and Contemporary Chinese Fiction (in translation)

Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.

Credit Hours: 3

CHINSE 3400: Negotiating Chinese Culture

As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course address issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be applied to more fruitful and positive cross-cultural interactions in multiple contexts.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

CHINSE 3880: Contemporary Chinese Film

(same as FILM_S 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.

Credit Hours: 3

Prerequisites: sophomore standing

Civil Engineering (CV_ENG)

CV_ENG 1000: Introduction to Civil Engineering

Introduces various aspects of Civil Engineering practice. May be repeated one time for credit.

Credit Hour: 1

CV_ENG 1001: Experimental Course

For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

CV_ENG 2001: Experimental Course

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

CV_ENG 2080: Introduction to Dynamics

Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.

Credit Hours: 3

Prerequisites: ENGINR 1200

CV_ENG 3001: Fundamental Topics in Civil Engineering

Special engineering topics for undergraduate students.

Credit Hour: 1-3

Prerequisites: instructor's consent

CV_ENG 3010: Decision Methods for Civil Engineering Design

Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGLISH 1000

Corequisites: ENGINR 1200

CV_ENG 3050: Introduction to Geographic Information Systems GIS

(same as GEOG 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.

Credit Hours: 3

Prerequisites: sophomore standing or instructor's consent

CV_ENG 3100: Fundamentals of Transportation Engineering

Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 1100

Corequisites: CV_ENG 3010

CV_ENG 3200: Fundamentals of Environmental Engineering

Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics.

Credit Hours: 4

Prerequisites: grade of C- or better in CHEM 1320 or equivalent

Corequisites: CV_ENG 3010

CV_ENG 3250: Pollutant Fate and Transport

(same as ENV_SC 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.

Credit Hours: 3

Prerequisites: ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and CHEM 1320; or instructor's permission

CV_ENG 3300: Structural Analysis I

Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 1200 and ENGINR 2200

CV_ENG 3312: Reinforced Concrete Design

Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisites: CV_ENG 3300;

Credit Hours: 3

Corequisites: CV_ENG 3600

CV_ENG 3313: Structural Steel Design

Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections.

Credit Hours: 3

Corequisites: CV_ENG 3300 and CV_ENG 3600

CV_ENG 3400: Fundamentals of Geotechnical Engineering

Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material.

Credit Hours: 4

Prerequisites: grade of C- or better in ENGINR 2200 and GEOL 1150

CV_ENG 3600: Civil Engineering Materials

Introduces composition, structure, properties, behavior, and selection of civil engineering materials. Prerequisites: grade of C- or better in ENGINR 2200 or instructor's consent;

Credit Hours: 4

Corequisites: CV_ENG 3010

CV_ENG 3700: Fluid Mechanics

Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow.

Credit Hours: 3

Prerequisites: grade of C- or better PHYSICS 2750

CV_ENG 3702: Hydrology

Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency; and open channel flow considerations from stream-flow. Fluid Mechanics lab with lab reports.

Credit Hours: 4

Prerequisites: grade of C- or better MATH 2300 and CV_ENG 3200 and CV_ENG 3700

CV_ENG 4001: Topics in Civil Engineering

Study of current and new technical developments in civil engineering.

Credit Hour: 1-3

Prerequisites: instructor's consent

CV_ENG 4006: Digital Computer Applications in Engineering

Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisites: MATH 2300

Credit Hours: 3

CV_ENG 4008: Risk and Reliability for Civil Engineers

This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 4080: Advanced Surveying

Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

Credit Hours: 3

Prerequisites: MATH 1500

CV_ENG 4085: Problems in Civil and Environmental Engineering

Directed investigation of civil engineering.

Credit Hour: 2-4

Prerequisites: instructor's consent

CV_ENG 4100: Traffic Engineering

Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4102: Infrastructure Management

Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4103: Planning and Geometric Design of Highways

Techniques of highway planning in rural and urban areas. Design of the visible elements of highways.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4104: Pavement Materials and Design

Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4106: Intelligent Transportation Systems

This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4108: Bicycle and Pedestrian Transportation

This course teaches how to integrate pedestrian and bicyclist accommodations into the planning and design of transportation facilities. Topics include bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4110: Transportation Simulation

Theory and application of simulation in transportation engineering.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 4120: Airport Engineering

Airport systems planning, design, and management.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3010

CV_ENG 4125: Transportation Legal Issues

This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 4130: Transportation Safety

This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 4145: Civil and Environmental Engineering Legal Issues

Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 4155: Transportation Geography

(same as GEOG 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 4175: The Geospatial Science in National Security

(Same as GEOG 4130). This course explores the critical contribution of the geospatial sciences in the collection processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3

Prerequisites: junior standing or above required; instructor's consent

CV_ENG 4185: Location Analysis/Site Selection

(same as GEOG 4740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. Maybe be repeated for credit.

Credit Hours: 3

CV_ENG 4190: Infrastructure Project Development

Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only. Prerequisites: junior standing

Credit Hours: 3

CV_ENG 4200: Remote Sensing of the Environment

Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4210: Solid Waste Management

Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4220: Hazardous Waste Management

(same as CH_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 4230: Introduction to Water Quality

Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4232: Water and Wastewater Treatment Facilities

Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3

Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 4240: Water Quality Analysis

Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 4230 or instructor's consent

CV_ENG 4250: Environmental Regulatory Compliance

(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

Credit Hours: 3

CV_ENG 4260: Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law.

Credit Hours: 3

CV_ENG 4270: Environmental Engineering Microbiology

Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

Prerequisites: senior standing or instructor's consent

CV_ENG 4285: Pollution Prevention: Applied Engineering for Sustainable Business Practices

Identify, analyze and solve energy, water and raw materials inefficiencies common to industrial processes and facilities. Graded on A-F only basis.

Credit Hours: 3

Prerequisites: PHYSCS 2760, MATH 2300, CHEM 1320, ENGINR 2300 or equivalent. Restricted to Juniors and Seniors

CV_ENG 4290: Wastewater Treatment and Process Design

Selection and use of wastewater and sludge treatment processes, disposal methods, sustainable wastewater treatment including anaerobic treatment of wastewater reuse.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3200. Instructor's consent required

CV_ENG 4300: Advanced Structural Steel Design

(cross-leveled with CV_ENG 7300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3313

CV_ENG 4302: Prestressed/Advanced Reinforced Concrete

Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.

Credit Hours: 3

Corequisites: CV_ENG 3312

CV_ENG 4310: Structural Design and Analysis

Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 4300

CV_ENG 4320: Energy Methods in Mechanics

Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.

Credit Hours: 3

Prerequisites: senior or graduate standing required

CV_ENG 4330: Structural System Design

Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 4350: Matrix Methods of Structural Analysis

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

Credit Hours: 3

Prerequisites: senior standing; grade of C- or better in CV_ENG 3300

CV_ENG 4360: Bridge Engineering

Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and Shear and Moment Envelopes. Design of Medium- and Short-Span Girder Bridges based on AASHTO LRFD specs.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 4404: Geotechnical Earthquake Engineering

This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400 or instructor's consent

CV_ENG 4406: Geotechnics of Landfill Design

This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 4410: Foundation Engineering

Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4412: Applied Geotechnical Engineering

Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 4500: Introduction to Construction Management

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

Credit Hours: 3

Prerequisites: junior standing

CV_ENG 4600: Advanced Mechanics of Materials

(same as MAE 4600; cross-leveled with CV_ENG 7600 and MAE 7600). Analysis of more complicated problems in stresses, strains.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 4610: Sensors and Experimental Stress Analysis

Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200 and PHYSCS 2760

CV_ENG 4660: Vibration Analysis

(same as MAE 4660). Vibration theory with application to mechanical systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 2080 and MATH 4100

CV_ENG 4692: Introduction to Structural Dynamics

Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 4700: Hydraulics of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3700

CV_ENG 4703: Applied Hydrology

Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702 or instructor's consent

CV_ENG 4710: Soil and Water Conservation Engineering

(same as BIOL_EN 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

CV_ENG 4720: Watershed Modeling Using GIS

(same as BIOL_EN 4350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

CV_ENG 4792: Analysis of Water-Resource Systems

Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 4980: Civil Engineering Systems Design

Design of civil engineering systems.

Credit Hours: 3

Prerequisites: senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman

CV_ENG 4990: Undergraduate Research in Civil and Environmental Engineering

Independent investigation or project in Civil Engineering. May be repeated to 6 hours.

Credit Hour: 1-4

Prerequisites: senior standing in Civil and Environmental Engineering and instructor's consent

CV_ENG 4995: Research in Civil & Environmental Engineering-Undergraduate Honors

Independent project, supervised by the honors advisor, to be presented as a formal written report.

Credit Hour: 1-3

Prerequisites: participation in the Civil and Environmental Engineering Departmental Honors Program

CV_ENG 7001: Topics in Civil Engineering

Study of current and new technical developments in civil engineering.

Credit Hour: 1-3

Prerequisites: instructor's consent

CV_ENG 7002: Analysis of Civil Engineering Decisions

Formulates and analyzes probabilistic models of civil engineering systems and their environment. Elementary theory of decision making under uncertainty. Application to selected civil engineering problems.

Credit Hours: 3

CV_ENG 7003: Optimization of Civil Engineering Systems

Automated design techniques such as linear, nonlinear, and dynamic programming; gradient and random searching. Civil engineering applications emphasized throughout.

Credit Hours: 3

CV_ENG 7004: Engineering Administration

Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.

Credit Hours: 3

Prerequisites: MATH 1300 or MATH 1500, or instructor's consent

CV_ENG 7006: Digital Computer Applications in Engineering

Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations.

Credit Hours: 3

Prerequisites: MATH 2300

CV_ENG 7007: Quality Management in Civil Engineering

Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7008: Risk and Reliability for Civil Engineers

This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 7080: Advanced Surveying

Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

Credit Hours: 3

Prerequisites: CV_ENG 2090 and MATH 1500

CV_ENG 7082: Property Boundary Location

Principles of real property ownership, deeds, property boundary surveying, legal principles of original and retracement surveys Missouri statutes and regulations affecting surveying, GLO corner restoration and re-establishment.

Credit Hours: 3

Prerequisites: ENGINR 1500 and CV_ENG 2090

CV_ENG 7100: Traffic Engineering

Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7102: Infrastructure Management

Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7103: Planning and Geometric Design of Highways

Techniques of highway planning in rural and urban areas. Design of the visible elements of highways.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7104: Pavement Materials and Design

Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 7106: Intelligent Transportation Systems

This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems

optimization, current implementations of ITS, and its practical issues and implications of ITS.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7108: Bicycle and Pedestrian Transportation

This course teaches how to integrate pedestrian and bicyclists accommodations into the planning and design of transportation facilities. Topics include, including pedestrian and bicyclist safety, accommodation at intersections, traffic calming techniques and facility design.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7109: Urban Development and Planning

Introduction to planning processes; procedures and forces that shape urbanization.

Credit Hours: 3

CV_ENG 7110: Transportation Simulation

Theory and application of simulation in transportation engineering.

Credit Hours: 3

Prerequisites: C- or better in CV_ENG 3100

CV_ENG 7120: Airport Engineering

Airport systems planning, design, and management.

Credit Hours: 3

Prerequisites: C- or better in CV_ENG 3010

CV_ENG 7125: Transportation Legal Issues

This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 7130: Transportation Safety

This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 7145: Civil and Environmental Engineering Legal Issues

Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3

Prerequisites: CV_ENG 3010

CV_ENG 7155: Transportation Geography

(same as GEOG 7850. Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 7165: Geographic Information Systems I

Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework.

Credit Hours: 3

Prerequisites: instructor's consent; GEOG 2840

CV_ENG 7175: The Geospatial Sciences in National Security

(Same as GEOG 7130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 7185: Location Analysis/Site Selection

(Same as GEOG 7740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

Credit Hours: 3

CV_ENG 7190: Infrastructure Project Development

Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7200: Remote Sensing of the Environment

Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3

CV_ENG 7210: Solid Waste Management

Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems.

Credit Hours: 3

CV_ENG 7220: Hazardous Waste Management

(same as CH_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 7230: Introduction to Water Quality

Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater..

Credit Hours: 3

CV_ENG 7232: Water and Wastewater Treatment Facilities

Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3

Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 7240: Water Quality Analysis

Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3

Prerequisites: C- or better in CV_ENG 4230 or instructor's consent

CV_ENG 7250: Environmental Regulatory Compliance

(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development or regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

Credit Hours: 3

CV_ENG 7260: Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graded on A-F basis.

Credit Hours: 3

CV_ENG 7270: Environmental Engineering Microbiology

Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

CV_ENG 7290: Wastewater Treatment and Process Design

Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7300: Advanced Structural Steel Design

(cross-leveled with CV_ENG 4300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3313

CV_ENG 7302: Prestressed/Advanced Reinforced Concrete

Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.

Credit Hours: 3

Corequisites: CV_ENG 3312

CV_ENG 7310: Structural Design and Analysis

Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 4300

CV_ENG 7320: Energy Methods in Mechanics

Design of building structures and bridges in steel and reinforced concrete using case studies.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 7330: Structural System Design

Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 7350: Matrix Methods of Structural Analysis

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3300

CV_ENG 7360: Bridge Engineering

Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and shear and Moment Envelopes. Design of medium-and Sort-Span Girder Bridges based on AASHTO LRFD Specs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3312 and CV_ENG 3313

CV_ENG 7404: Geotechnical Earthquake Engineering

This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include; basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3400 or instructor's consent

CV_ENG 7406: Geotechnics of Landfill Design

This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 7410: Foundation Engineering

Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3400

CV_ENG 7412: Applied Geotechnical Engineering

Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3400

CV_ENG 7500: Introduction to Construction Management

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

Credit Hours: 3

CV_ENG 7510: Construction Methods and Equipment

Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses.

Credit Hours: 3

Prerequisites: MATH 1300 or MATH 1500, or instructor's consent

CV_ENG 7600: Advanced Mechanics of Materials

(same as MAE 7600; cross-leveled with CV_ENG 4600 and MAE 4600). Analysis of more complicated problems in stresses, strains.

Credit Hours: 3

Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 7610: Sensors and Experimental Stress Analysis

Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits.

Credit Hours: 3

Prerequisites: Grade of C- or better in ENGINR 2200 and PHYSCS 2760

CV_ENG 7660: Vibration Analysis

(same as MAE 7660). Vibration theory with application to mechanical systems.

Credit Hours: 3

Prerequisites: grade of C- or better in MAE 2600 and MATH 4100

CV_ENG 7692: Introduction to Structural Dynamics

Theory of structural response to dynamics loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Grade of C- or better in CV_ENG 3300

CV_ENG 7700: Hydraulics of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

Credit Hours: 3

Prerequisites: graduate standing and Grade of C- or better in CV_ENG 3700

CV_ENG 7702: Pipeline Engineering

Theoretical and practical aspects of pipeline engineering including pipeline transport of natural gas and various solids such as coal, sand and solid wastes.

Credit Hours: 3

Prerequisites: CV_ENG 3700 and MAE 3400

CV_ENG 7703: Applied Hydrology

Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

Credit Hours: 3

Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702, or instructor's consent

CV_ENG 7710: Soil and Water Conservation Engineering

(same as BIOL_EN 7150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

Credit Hours: 3

Prerequisites: BIOL_EN 3200 or CV_ENG 3200 or instructor's consent

CV_ENG 7720: Watershed Modeling Using GIS

(same as BIOL_EN 7350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3

Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

CV_ENG 7792: Analysis of Water-Resource Systems

Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

Credit Hours: 3

Prerequisites: instructor's consent

CV_ENG 8001: Advanced Topics in Civil Engineering

New and current technical developments in civil engineering.

Credit Hour: 1-3

Prerequisites: CV_ENG 4006 or equivalent

CV_ENG 8002: Directed Reading In Civil Engineering

Faculty supervised readings course.

Credit Hour: 1-3

CV_ENG 8085: Problems in Civil Engineering

Supervised investigation in civil engineering to be presented in the form of a report.

Credit Hour: 1-6

CV_ENG 8087: Seminar in Civil Engineering

Review of research in progress. Research techniques.

Credit Hour: 1

CV_ENG 8100: Transportation Planning and Models

Regional and metropolitan transportation studies; land use, traffic generation, distribution and assignment models.

Credit Hours: 3

Prerequisites: CV_ENG 4002 or CV_ENG 4003

CV_ENG 8106: Advanced Intelligent Transportation Systems

This course is intended to be an introductory course in Intelligent Transportation Systems (ITS). This course includes the background of ITS, current implementations, sample deployments, and practical issues and implications.

Credit Hours: 3

CV_ENG 8110: Theory of Traffic Flow

Scientific approach to study of traffic phenomena with emphasis on applications. Deterministic and stochastic models of traffic flow; optimization of intersection controls; computer simulation of traffic problems.

Credit Hours: 3

Prerequisites: CV_ENG 4002 or instructor's consent

CV_ENG 8120: Traffic Control Engineering

Information retrieval and analysis of human and vehicular characteristics; roadway element; system control and optimization of highways, intersections; planning and design of new traffic facilities including ways, terminals.

Credit Hours: 3

Prerequisites: CV_ENG 3100 or equivalent

CV_ENG 8130: Land Use Planning

Case study of site planning using systems analysis; feasibility for development or redevelopment; restraints imposed by political, social and economic conditions on land use activity as related to urban and regional relationships.

Credit Hours: 3

Prerequisites: CV_ENG 4106

CV_ENG 8140: Highway Transportation

Economics of transportation on highways. Comparison of vehicle operation costs. Project studies of highway problems in general.

Credit Hours: 3

Prerequisites: CV_ENG 4103 or equivalent

CV_ENG 8150: Transportation Networks

This course presents techniques used in equilibrium analysis of transportation networks. The details of traffic assignment algorithms will be discussed along with theory and practical algorithms.

Credit Hours: 3

CV_ENG 8187: Seminar in Transportation Engineering

Review of research in progress in the area of transportation engineering.

Credit Hour: 1

CV_ENG 8200: Water Quality Modeling

Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.

Credit Hours: 3

Prerequisites: CV_ENG 7230

CV_ENG 8208: Finite Element Methods

(same as MAE 8280). The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics.

Credit Hours: 3

Prerequisites: MAE 4280

CV_ENG 8210: Groundwater Pollution Evaluation and Modeling

Fundamentals of groundwater hydraulics and groundwater contamination. Use and development of computer models to simulate flow and pollutant transport.

Credit Hours: 3

Prerequisites: CV_ENG 3700, MATH 4100, or instructor's consent

CV_ENG 8215: Environmental Transport Phenomena

Fundamental processes that control the transport of constituents substances in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.

Credit Hours: 3

CV_ENG 8220: Advanced Hazardous Waste Treatment Processes

Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, soil-vapor extraction, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes.

Credit Hours: 3

Prerequisites: CV_ENG 4220

CV_ENG 8225: Aquatic Chemistry

Principles of chemical thermodynamics and equilibrium applied to processes in natural water and water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 8230: Unit Process Laboratory

Studies chemical and physical relationships as applied to unit processes of water and wastewater.

Credit Hours: 3

CV_ENG 8240: Physiochemical Treatment Processes

Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.

Credit Hours: 3

CV_ENG 8250: Biochemical Treatment Processes

Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.

Credit Hours: 3

CV_ENG 8260: Environmental Biotechnology

Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation.

Credit Hours: 3

Prerequisites: CV_ENG 8250 or instructor's consent

CV_ENG 8270: Design of Water and Wastewater Treatment Facilities

Development of design criteria and their application to the design of water and wastewater treatment facilities.

Credit Hours: 3

CV_ENG 8280: Engineering Aspects of Water Quality

Theoretical aspects of biological, chemical, physical processes; applications in water, wastewater, industrial-waste treatment processes, natural water systems; chemical equilibria, flow models; reaction kinetics on process design, pollutants.

Credit Hours: 3

Prerequisites: CV_ENG 4230 or instructor's consent

CV_ENG 8287: Seminar in Environmental Engineering

Review of research in progress in the area of environmental engineering.

Credit Hour: 1

CV_ENG 8290: Environmental Practicum

Application of advanced analysis and design techniques to practical problems in environmental engineering. Collaborative group investigations that may include experimental and computer-aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

Credit Hour: 2-4

Prerequisites: graduate standing in Civil Engineering

CV_ENG 8303: Behavior of Reinforced Concrete Members

The design philosophy, constitutive laws, creep rate sensitivity and aging, shrinkage. Nonlinear response of reinforced concrete members. Deflection computation and control. Bond and anchorage.

Credit Hours: 3

Prerequisites: CV_ENG 3312

CV_ENG 8311: Nondestructive Evaluation Engineering

This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760, ENGINR 1200, MATH 4100

CV_ENG 8312: Advanced Structural Analysis

Current trends in structural analysis. Elastic analysis of curved beams, arches and suspensions. Finite element and nonlinear methods of analysis.

Credit Hours: 3

CV_ENG 8313: Random Vibration

Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems.

Credit Hours: 3

Prerequisites: CV_ENG 4606

CV_ENG 8314: Numerical Methods in Engineering

Classification and numerical solution of engineering problems--ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen- and characteristic-value problems. Prerequisites: MATH 4100

Credit Hours: 3

CV_ENG 8320: Continuum Mechanics

(same as MAE 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.

Credit Hours: 3

Prerequisites: CV_ENG 3700, MATH 7100, ENGINR 2200

CV_ENG 8322: Structural Analysis

Classical and modern methods for elastic analysis. Influence line, Miller-Breslau principle. Introduction to force and displacement methods using matrix analysis. Application to continuous beams, grids, plane and space frames and trusses.

Credit Hours: 3

CV_ENG 8330: Theory of Elasticity

(same as MAE 8330). Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods.

Credit Hours: 3

CV_ENG 8332: Design of Special Structures Systems

Reviews current trends in design of structural systems and components. Critical evaluation of recent code modifications. Application to design of light gauge metal structures, lateral bracing systems, curved beams and panel systems.

Credit Hours: 3

Prerequisites: CV_ENG 4310 or CV_ENG 4330

CV_ENG 8340: Theory of Plates and Shells

(same as MAE 8340). Rectangular and circular plates. Variational methods in the analysis of plates and shells. Plates of unusual shape. Shear deformation effects. Large deformation analysis. Analysis of cylindrical shells.

Credit Hours: 3

CV_ENG 8342: Space Mechanics

Rigid body dynamics analysis of satellites, space vehicles. Trajectories, time of flight optimization.

Credit Hours: 3

Prerequisites: MAE 3600 or equivalent, and MATH 4100

CV_ENG 8350: Theory of Elastic Stability

(Same as MAE 8350). Buckling of Columns, frames, arches and other structural systems. Kinematic approach to stability. Large deflections. Energy approach to buckling. Plate and shell buckling. Inelastic buckling of columns. Creep buckling.

Credit Hours: 3

CV_ENG 8360: Theory of Plasticity

(same as MAE 8360). Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members.

Credit Hours: 3

Prerequisites: CV_ENG 8330 or instructor's consent

CV_ENG 8372: Reinforced Concrete Theory and Design

Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence.

Credit Hours: 3

Prerequisites: CV_ENG 4350 or equivalent

CV_ENG 8380: Nonlinear Mechanical Analysis

Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design.

Credit Hours: 3

Prerequisites: MAE 3600 or equivalent and MATH 4100

CV_ENG 8382: Dynamical Theory

Engineering principles and application in mathematical expression of energy, force, inertia system.

Credit Hours: 3

Prerequisites: MAE 3600 or equivalent and MATH 4100

CV_ENG 8387: Seminar in Structural Engineering

Review of research in progress in the area of structural engineering.

Credit Hour: 1

CV_ENG 8390: Advanced Topics Structural Analysis

Computer implementation and application of finite element analysis. Material and geometric nonlinearities. Plastic analysis of structures. Code provisions for analysis of seismic and wind loadings.

Credit Hours: 3

Prerequisites: CV_ENG 4350

CV_ENG 8392: Dynamics of Structures

(same as MAE 8392). Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.

Credit Hours: 3

Prerequisites: MAE 2600 and MATH 4100 or MATH 7100

CV_ENG 8402: Advanced Shear Strength of Soils

Theoretical soil mechanics as applied to solution of specific engineering problems.

Credit Hours: 3

CV_ENG 8403: Consolidation and Settlement

Settlement of soil, Theory of Consolidation, consolidation testing, settlements of earth fills and embankments, stress distribution in soils, elastic settlement, bearing capacity of shallow foundations, shallow foundations design.

Credit Hours: 3

Prerequisites: CV_ENG 3400

CV_ENG 8404: Seepage in Soils

General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8406: Unsaturated Soil Mechanics

Fundamental principles governing the strength, deformation, and fluid flow behavior of multiphase porous media. Includes specific procedures for analyzing, measuring and modeling strength, hydraulic conductivity, and suction characteristics of unsaturated soil.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8407: Soil Behavior

Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8408: Soil Dynamics

Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CV_ENG 3400 and instructor's consent

CV_ENG 8410: Advanced Foundation Engineering

Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations - static capacity, lateral loads, bucklin, dynamic analysis load tests, pile groups, drilled piers.

Credit Hours: 3

Prerequisites: CV_ENG 4410

CV_ENG 8412: Stability and Performance of Earth Slopes

Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8413: Design and Analysis of Earth Retaining Structures

General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8420: Advanced Geotechnics

Advanced study of specific geotechnical engineering topics. Topics may include: Environmental Geotechnics, Landfill Design, Geosynthetics, Laboratory Testing, and Case History. May be repeated for credit when topics vary.

Credit Hours: 3

Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8487: Seminar in Geotechnical Engineering

Review of research in progress in the area of geotechnical engineering.

Credit Hour: 1

CV_ENG 8510: Construction Engineering

Selection and layout of construction plant. Design and construction of formwork, falsework, cofferdams, conveyors and other temporary structures used by contractors.

Credit Hours: 3

Prerequisites: CV_ENG 4510 or equivalent

CV_ENG 8520: Construction Productivity

Work improvement techniques in the construction industry reviewed and applied to local construction site. Construction safety influenced by supervisors and managers studied in detail. Declining productivity in the construction industry evaluated and solutions considered.

Credit Hours: 3

Prerequisites: CV_ENG 4500

CV_ENG 8530: Construction Project Management

Cost analysis, estimating techniques. Time, cost, and quality control of construction projects. Recording/analyzing construction effort. Applications of crew balance, process charts, time-lapse motion pictures, operations research, and preplanning techniques to construction operations. Construction safety.

Credit Hours: 3

CV_ENG 8540: Construction Administration

Organization, management, engineering, business, and legal problems in the construction industry. Purchasing, bonding, insurance, financing, labor relations, and contract administration.

Credit Hours: 3

Prerequisites: CV_ENG 4500

CV_ENG 8610: Materials and Measurement

About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel.

Credit Hours: 3

Prerequisites: CV_ENG 3600 or equivalent

CV_ENG 8620: Advanced Dynamics

(same as MAE 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

Credit Hours: 3

Prerequisites: CV_ENG 2080 and MATH 4100

CV_ENG 8630: Vibrations of Distributed Parameter Systems

(same as MAE 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.

Credit Hours: 3

Prerequisites: CV_ENG 4660

CV_ENG 8710: Advanced Hydraulic Engineering

Unsteady flow in pipes and open channels is studied using the method of characteristics and finite difference equations. Hydraulic transient in pipe networks due to valve adjustments, pump startup and pump power failure are analyzed. Control of transient using surge tanks and air chambers is included.

Credit Hours: 3

Prerequisites: CV_ENG 3720

CV_ENG 8720: Hydrotechnical Practicum

Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

Credit Hour: 2-4

Prerequisites: graduate standing in Civil Engineering

CV_ENG 8730: Fundamentals of Fluid Mechanics

Treatment of fundamental concepts and theories in fluid mechanics at a level suitable for beginning graduate students.

Credit Hours: 3

Prerequisites: CV_ENG 3700 or equivalent

CV_ENG 8740: Hydrodynamics

Special topics in potential theory and conformal mapping.

Credit Hours: 3

CV_ENG 8750: Wind Engineering

Study of wind effects on the safety of engineering structures, air pollution and building energy consumption, and the use of wind.

Credit Hours: 3

Prerequisites: CV_ENG 3700

CV_ENG 8990: Research-Masters Thesis in Civil & Environmental Engineering

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

CV_ENG 9001: Advanced Topics in Civil Engineering - PhD

New and current technical developments in civil engineering. For PhD students.

Credit Hour: 1-4

CV_ENG 9990: Research-Doctoral Dissertation Civil & Environmental Engineering

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

Classical Humanities (CL_HUM)

CL_HUM 1050: Greek and Latin in English

A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

Credit Hours: 3

CL_HUM 1060: Classical Mythology

Myths of Greece and Rome in literature and art.

Credit Hours: 3

CL_HUM 1060H: Classical Mythology - Honors

Myths of Greece and Rome in literature and art.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 2005: Topics in Classical Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

CL_HUM 2100: Greek Culture

Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

Credit Hours: 3

CL_HUM 2100H: Greek Culture - Honors

Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 2200: Roman Culture

Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, philosophy, and private life, and their influence on Western Civilization.

Credit Hours: 3

CL_HUM 2300: Greek Classics in Translation

Reading in translation and critical study of the most important literary works of the ancient Greek World.

Credit Hours: 3

CL_HUM 2300H: Greek Classics in Translation

Reading in translation and critical study of the most important literary works of the ancient Greek world.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 2400: Roman Classics in Translation

Reading in translation and critical study of the most important literary works of the ancient Roman world.

Credit Hours: 3

CL_HUM 2940: Service Learning in Classical Studies

Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements.

Credit Hour: 1

Prerequisites: instructor's consent required

CL_HUM 3000: Foreigners and Dangerous Women in Greek and Latin Literature

(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3

CL_HUM 3000H: Foreigners and Dangerous Women in Greek and Latin Literature - Honors

(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3

Prerequisites: Honors eligibility required

CL_HUM 3005: Topics in Classical Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: CL_HUM 1060, any CL_HUM 2000 course, or instructor's consent

CL_HUM 3005H: Topics in Classical Humanities - Honors

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: CL_HUM 1060, any CL_HUM 2000 course, or instructor's consent. Honors eligibility required

CL_HUM 3050: Philosophy Before Socrates

A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course or instructor's consent

CL_HUM 3050H: Philosophy Before Socrates - Honors

A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course or instructor's consent. Honors eligibility required

CL_HUM 3100: The Age of Pericles

A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor's consent

CL_HUM 3100H: The Age of Pericles - Honors

A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3150: The Age of Augustus

Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor's consent

CL_HUM 3150H: The Age of Augustus - Honors

Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3200: Power and Oratory in Ancient Greece

Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course

CL_HUM 3200H: Power and Oratory in Ancient Greece - Honors

Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any CL_HUM 2000 level course. Honors eligibility required

CL_HUM 3225: Roman Comedy, Wit and Humor

Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid's *Metamorphoses*, Petronius' *Satyricon*, Martial, Juvenal and Macrobius.

Credit Hours: 3

Prerequisites: CL_HUM 1060, any Classical Humanities 2000 level course or instructor's consent

CL_HUM 3250: Greek and Roman Epic

A study of the major representatives of the ancient epic genre. Readings will include Homer's *Iliad* and *Odyssey*, Apollonius' *Argonautica*, Vergil's *Aeneid*.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3250H: Greek and Roman Epic - Honors

A study of the major representatives of the ancient epic genre. Readings will include Homer's *Iliad* and *Odyssey*, Apollonius' *Argonautica*, Vergil's *Aeneid*.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3300: Greek Drama

Reading and interpretation of Greek tragedies and comedies in translation.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3300H: Greek Drama - Honors

Reading and interpretation of Greek tragedies and comedies in translation.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3350: Advanced Mythology

Interpretation of selected classical myths and their influence on later literature and art.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3350H: Advanced Mythology - Honors

Interpretation of selected classical myths and their influence on later literature and art.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3400: Murder and Mayhem: Images of Justice in Classical Antiquity

Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3400H: Murder & Mayhem: Images of Justice in Classical Antiquity - Honors

Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3450: Greek and Roman Characters and Ideals

Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3450H: Greek and Roman Characters and Ideals - Honors

Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3550: War and Democracy in Late 5th c. BCE Athens

(same as PEA_ST 3550). Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states.

Credit Hours: 3

Prerequisites: any 2000 level Classical Humanities course

CL_HUM 3600: The Ancient Novel

Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3600H: The Ancient Novel - Honors

Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3650: Paganism and Christianity

A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3650H: Paganism and Christianity - Honors

A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3700: Women in the Ancient World

Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3700H: Women in the Ancient World - Honors

Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3750: Classics in a Cross-Cultural Context

The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 3750H: Classics in a Cross-Cultural Context - Honors

The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 3775: The Ancient World on Film

(same as AR_H_A 3775 and FILM_S 3775). This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

Credit Hours: 3

Prerequisites: Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies. Instructor's consent required

CL_HUM 3800: Sports and Spectacles in Greco-Roman Antiquity

Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life.

Credit Hours: 3

Prerequisites: CL_HUM 1060 and CL_HUM 2100 or CL_HUM 2200. Instructor's consent required

CL_HUM 4005: Topics in Classical Humanities

Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: Any Classical Humanities 2000 level course or instructor's consent

CL_HUM 4100: Greece: From the Bronze Age to the Byzantine Empire

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Graded on A/F basis only.

Credit Hours: 6

Prerequisites: Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor's Consent, and Application through MU International Center required. Participants chosen by instructor

CL_HUM 4100H: Greece: From the Bronze Age to the Byzantine Empire - Honors

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Participants chosen by instructor. Graded on A/F basis only. Application required.

Credit Hours: 6

Prerequisites: Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor's Consent, and Application through MU International Center required. Honors eligibility required

CL_HUM 4500: Greek and Roman Religion

(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or AR_H_A 1110 or HIST 1520; sophomore standing

CL_HUM 4500H: Greek and Roman Religion - Honors

(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3

Prerequisites: CL_HUM 1060 or AR_H_A 1110 or HIST 1520; sophomore standing. Honors eligibility required

CL_HUM 4550: Literature and Culture of the Hellenistic Age

A survey of the literature and culture of the Hellenistic Age.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course, or instructor's consent

CL_HUM 4550H: Literature and Culture of the Hellenistic Age - Honors

A survey of the literature and culture of the Hellenistic Age.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required

CL_HUM 4600: The Classical Tradition

Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course or instructor's consent

CL_HUM 4600H: The Classical Tradition - Honors

Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level course or instructor's consent. Honors eligibility required

CL_HUM 4650: The World of Late Antiquity

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level or instructor's consent

CL_HUM 4650H: The World of Late Antiquity - Honors

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

Credit Hours: 3

Prerequisites: any Classical Humanities 2000 level or instructor's consent. Honors eligibility required

CL_HUM 4770: Oral Tradition

(same as ENGLISH 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

Credit Hours: 3

Prerequisites: junior standing and instructor's consent

CL_HUM 4770H: Oral Tradition - Honors

(same as ENGLISH 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

Credit Hours: 3

Prerequisites: junior standing and instructor's consent. Honors eligibility required

CL_HUM 4970: Capstone in Classical Humanities

Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year.

Credit Hours: 3

Prerequisites: instructor's consent

Recommended: for Classical Humanities double-majors

CL_HUM 4970H: Capstone in Classical Humanities- Honors

Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year.

Credit Hours: 3

Prerequisites: instructor's consent; Honors eligibility required

Recommended: for Classical Humanities double-majors

CL_HUM 7005: Topics in Classical Humanities

Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: any Classical Humanities 3000 level course or instructor's consent

CL_HUM 7550: Literature and Culture of the Hellenistic Age

A survey of the literature and culture of the Hellenistic Age. Graded on A-F basis only.

Credit Hours: 3

CL_HUM 7650: The World of Late Antiquity

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

Credit Hours: 3

Classics (CLASS)

CLASS 4100: History of the Greek and Latin Languages

(same as LINGST 4130). Evolution of classical languages and their relationship to each other.

Credit Hours: 3

CLASS 4205: Topics in Classical Studies

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

CLASS 4300: Introduction to Text Criticism and Paleography

Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

Credit Hours: 3

Prerequisites: 2 years of Greek or Latin or equivalent

CLASS 4400: Ancient Pastoral

Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

Credit Hours: 3

Prerequisites: 2 years each of Greek and Latin

CLASS 4700: Advanced Study in the Teaching of the Classics

Credit Hours: 3

Prerequisites: classroom teaching experience or chairman's consent

CLASS 4960: Special Readings in Classical Studies

Readings in authors and texts not covered in other courses.

Credit Hour: 1-3

Prerequisites: departmental consent

CLASS 4970: Capstone in Classical Languages

Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year.

Credit Hours: 3

Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing; departmental consent

Recommended: for double-majors

CLASS 4970H: Capstone in Classical Languages

Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors.

Credit Hours: 3

Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing; departmental consent. Honors eligibility required

CLASS 4995H: Honors Proseminar in Classical Studies

Limited to Honors undergraduates. To be taken in senior year. Integrated exploration of classical civilization. May repeat to 6 hours maximum.

Credit Hour: 3-6

Prerequisites: limited to Honors undergraduates, to be taken in senior year. Honors eligibility required

CLASS 7000: Introduction to Graduate Study in Classics

Required of all first-year graduate students.

Credit Hour: 1

CLASS 7100: History of the Greek and Latin Languages

(same as LINGST 7130). Evolution of classical languages and their relationship to each other.

Credit Hours: 3

CLASS 7205: Topics in Classical Studies

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

CLASS 7300: Introduction to Text Criticism and Paleography

Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

Credit Hours: 3

Prerequisites: 2 years of Classical Languages or equivalent

CLASS 7400: Ancient Pastoral

Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

Credit Hours: 3

Prerequisites: 2 years each of Greek and Latin

CLASS 7700: Advanced Study in the Teaching of the Classics

Credit Hours: 3

Prerequisites: classroom teaching experience or chairman's consent

CLASS 7960: Special Readings in Classical Studies

Readings in authors and texts not covered in other courses.

Credit Hour: 1-3

Prerequisites: graduate standing and classics/classical humanities; departmental consent; Greek--two years classical Greek or equivalent; Latin--two years Classical Latin or equivalent

CLASS 8085: Directed Readings in Classics

For graduate students to undertake special projects for graduate credit under the supervision of faculty.

Credit Hours: 3

CLASS 8090: Masters Research and Thesis in Classics

For graduate students studying for the MA and working on a thesis to receive credit for work directly related to the thesis. Graded S/U only.

Credit Hours: 3

CLASS 8440: Ancient/Medieval Topography

(same as AR_H_A 8440). Descriptive and historical analysis of selected city or site. Subject varies.

Credit Hour: 1-99

Prerequisites: instructor's consent

CLASS 9090: PhD Research and Thesis

Individual research in preparation for writing thesis and/or dissertation. Graded on a S/U basis only.

Credit Hour: 1-8

CLASS 9187: Seminar in Classical Mythology

Intensive study of classical mythology in origin, development, meaning and influence.

Credit Hours: 3

Prerequisites: instructor's consent

CLASS 9287: Seminar in the Hellenistic Age

Seminar in the Hellenistic Age

Credit Hour: 3-6

CLASS 9387: Seminar in Ancient Rhetoric and Oratory

Seminar in Ancient Rhetoric and Oratory

Credit Hours: 3

CLASS 9487: Seminar in Ancient Literary Criticism

Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject.

Credit Hours: 3

CLASS 9587: Greco-Roman Didactic

Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age.

Credit Hour: 3-6

CLASS 9687: Seminar in Greco-Roman Religion

Seminar in Greco-Roman Religion

Credit Hours: 3

CLASS 9787: Seminar in Greco-Roman Satire and Social Criticism

Seminar in Greco-Roman Satire and Social Criticism

Credit Hours: 3

CLASS 9887: Seminar in the Age of the Antonines

Seminar in the Age of the Antonines

Credit Hour: 3-6

Clinical Laboratory Sciences (CL_L_S)

CL_L_S 1000: Orientation to Clinical Laboratory Science

The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: HLTH_SCI 1000

CL_L_S 4412: Clinical Laboratory Science Theory, Application and Correlation

Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Course may be repeated for credit. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: departmental consent, accepted in into the Medical Technology Program

CL_L_S 4414: Chemistry I

Introduction to theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures.

Credit Hour: 1-4

Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A-F basis only

CL_L_S 4415: Chemistry II

Advanced theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures.

Credit Hours: 3

Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A-F basis only

CL_L_S 4416: Clinical Hematology I

Introduction to the theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4417: Clinical Hematology II

Advanced theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on the correlation of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4418: Clinical Microbiology I

Introduction to the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-4

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4419: Clinical Microbiology II

Advanced theory, practical application, technical performance and evaluation procedures for isolation, identification and susceptibility testing of infectious disease in humans; bacteriology, mycology, parasitology, virology and serology and correlation of data with diagnosis and treatment. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4420: Clinical Immunology

Theory, practical application, and evaluation of immunological components; principles and methods used to assess immunologically-related disorders, including hypersensitivity reactions, autoimmune, immunoproliferative and immunodeficiency disorders, tumors and transplantations. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4422: Immunohematology I

Introduction to the theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components.

Credit Hour: 1-4

Prerequisites: departmental approval, accepted into the Medical Terminology Program. May be repeated for credit. Graded on A/F basis only

CL_L_S 4423: Immunohematology II

Advanced theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4424: Phlebotomy

Theory, practical application, technical performance and evaluation of procedures used in collecting, handling and processing blood specimens. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4426: Body Fluid Analysis

Theory, practical application, technical performance and evaluation of procedures used in the analysis of urine and other body fluids, including cerebrospinal, synovial, serous, seminal, amniotic and feces. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: departmental consent, accepted into the Medical Technology Program

CL_L_S 4970: Clinical Laboratory Management I

Theory, practical application and evaluation of laboratory management principles and associated models in communication, educational methodology, healthcare systems and financial resources. Opportunities for building critical thinking, problem-solving, and management/professional leadership skills are provided. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: departmental approval, accepted into the Medical Technology Program

CL_L_S 4980: Clinical Lab Management II

Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CL_L_S 4970 or departmental consent; accepted into the Medical Technology Program

Communication (COMMUN)

COMMUN 1200: Public Speaking

Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3

COMMUN 1200H: Public Speaking - Honors

Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3

Prerequisites: Honors eligibility required

COMMUN 2100: Media Communication in Society

An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3

Prerequisites: freshman, sophomore or junior standing only

COMMUN 2100H: Media Communication in Society - Honors

An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3

Prerequisites: freshman, sophomore or junior standing only. Honors eligibility required

COMMUN 2200: Video Workshop: Mizzou Network

A hands-on workshop; students will participate in all phases of video production (camera operations, directing, graphics, video replay, and live audio production and digital editing) in a variety of live sports Projects.

There is no requirement of previous production experience or course work. Course may be repeated an additional two times for credit. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: restricted to Communication majors

COMMUN 2315: Basic Audio Production and Performance

Radio speaking in varied types of programs; console operations, tape editing, microphone techniques.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2701: Topics in Communication - General

Topics in Communication - General.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2703: Topics in Communication - Behavioral Science

Topics in Communication - Behavioral Science.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2705: Topics in Communication - Humanities/Fine Arts

Topics in Communication - Humanities/Fine Arts.

Credit Hours: 3

Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 3050: Survey of Communication Studies

A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

Credit Hours: 3

Prerequisites: May be restricted to Communications majors through early registration

COMMUN 3310: Message Design and Writing for the Media

Styles and functions of various script formats for radio, television productions.

Credit Hours: 3

Prerequisites: COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3315: Advanced Audio Production

The study and application of techniques applicable to radio, television, and multimedia production with an emphasis on digital audio workstation systems.

Credit Hours: 3

Prerequisites: COMMUN 2315. May be restricted to Communication majors only during early registration

COMMUN 3390: Digital Production I

Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3395: Digital Production II

Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure.

Credit Hours: 3

Prerequisites: COMMUN 3390 or instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 3422: Communication Research Methods

Focuses on writing and administering surveys, conducting field research, and designing experimental studies.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3441: Nonverbal Communication

Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3460: Organizational Advocacy

Theory and analysis of communication to promote organizational culture and image.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors during early registration

COMMUN 3470: Culture as Communication

(same as ANTHRO 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3490: Mass Media Theory

Survey of the theories of mass communication.

Credit Hours: 3

Prerequisites: COMMUN 2100 or senior standing. May be restricted to Communication majors only during early registration

COMMUN 3525: Conflict and Communication

Theory and analysis of communication in conflict situations across a variety of contexts.

Credit Hours: 3

Prerequisites: sophomore standing required. May be restricted to Communication majors only during early registration

COMMUN 3561: Relational Communication

Analysis of communication influences on relational identities and development.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3570: Performance of Literature

(same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: sophomore standing

COMMUN 3571: Group Decision Making Processes

(same as PEA_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3572: Argument and Advocacy

Critical analysis and production of argument emphasizing evidence, reasoning, and refutation.

Credit Hours: 3

Prerequisites: COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3575: Business and Professional Communication

Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3580: Crisis Communication

The theory and practice of corporate and political communication responses to crisis situations.

Credit Hours: 3

Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3636: Contemporary Issues in Mass Communication

Introduction to current issues and trends and relationship among the new technologies, policies, and potential impact on society.

Credit Hours: 3

Prerequisites: sophomore standing and COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3701: Topics in Communication-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hours: 3

Prerequisites: COMMUN 1200, COMMUN 2100, May be restricted to Communication majors only during early registration

COMMUN 3703: Topics in Communication-Behavioral Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent, May be restricted to Communication majors only during early registration

COMMUN 3705: Topics in Communication-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communications majors only during early registration

COMMUN 3705H: Topics in Communication-Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent, departmental consent for repetition. May be restricted to Communications majors only during early registration. Honors eligibility required

COMMUN 4395: Professional Seminar in Television Production
Application of principles to advanced television production, direction.

Credit Hours: 3

Prerequisites: COMMUN 3390 and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4412: Gender, Language, and Communication
(same as LINGST 4412 and ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4415: Language and Discourse
(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.

Credit Hours: 3

Prerequisites: junior standing and departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4440: Ethical Issues in Communication
(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4473: Political Communication

Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4474: Theory and Research in Persuasion

Studies the persuasive process, attitude formation, modification.

Credit Hours: 3

Prerequisites: junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 4476: Organizational Communication

Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.

Credit Hours: 3

Prerequisites: junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 4481: Principles of Rhetoric

Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.

Credit Hours: 3

Prerequisites: COMMUN 1200, junior standing and departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4520: Family Communication

(same as H_D_FS 4680). Analysis of the functions and processes of communication within families.

Credit Hours: 3

Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

COMMUN 4530: Health Communication

A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

Credit Hours: 3

COMMUN 4618: Television Program Analysis and Criticism

Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.

Credit Hours: 3

Prerequisites: junior standing. May be restricted to Communication Majors only during early registration

COMMUN 4628: Children, Adolescents and the Media

Focus on social scientific research concerning the mass media in the lives of children and adolescents. The course centers on media effects

literature and controversies relevant to child and adolescent media users. Course involves readings, lectures, discussions of theories, concepts, methods, and finding. We will also consider social implication and personal choices in media use. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: junior standing required

COMMUN 4638: New Technologies and Communication

Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

Credit Hours: 3

Prerequisites: junior standing or instructor's consent. May be restricted to Communication Majors only during early registration

COMMUN 4701: Topics in Communication-General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4703: Topics in Communication-Behavioral Science

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4705: Topics in Communication-Humanities

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4940: Internship

Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: Admission to department, junior standing, instructor's consent, 2.5 GPA

COMMUN 4950: Research Project

Student contributes to a research project with approved goals and a final written report. As part of the project, student will read articles in the communication research literature. Project can be independent or in conjunction with a faculty research project. Course may be repeated once for credit. Graded on A-F basis only

Credit Hour: 1-3

Prerequisites: COMMUN 3050; junior standing and instructor's consent. Approval by a faculty member who will serve as project supervisor

COMMUN 4960: Directed Reading

Independent reading, reports.

Credit Hour: 1-99

Prerequisites: junior standing or instructor's consent

COMMUN 4974: Senior Project

Integration and adaptation of communication theories to an applied communication problem. Required for all majors.

Credit Hours: 3

Prerequisites: admission to department, senior standing, and departmental consent

COMMUN 4975: Visual Literacy

Integration of theory and practice. The theoretical component of the class is grounded in the study of visual literacy and the practice component will focus on documentary filmmaking. May not be taken by graduate students. It is a capstone course for undergraduate students only.

Credit Hours: 3

Prerequisites: COMMUN 3390, senior standing; Admission to the department

COMMUN 4996H: Honors in Communication

Special work for Honors candidates in communication.

Credit Hour: 1-2

Prerequisites: instructor's consent. Honors eligibility required

COMMUN 4997: Honors in Communication

Special work for Honors candidates in communication.

Credit Hours: 2

COMMUN 4997H: Honors in Communication

Special work for Honors candidates in communication.

Credit Hour: 1-2

Prerequisites: instructor's consent. Honors eligibility required

COMMUN 7412: Gender, Language, and Communication

(same as LINGST 7412 and ANTHRO 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

COMMUN 7415: Language and Discourse

(same as LINGST 4415). Analysis of the rules of social interaction and the functions of language in discourse.

Credit Hours: 3

Prerequisites: departmental consent

COMMUN 7440: Ethical Issues in Communication

(same as PEA_ST 4440). Exploration and analysis of ethical dimensions intrinsic to human communication.

Credit Hours: 3

Prerequisites: graduate standing or departmental consent

COMMUN 7473: Political Communication

Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

Credit Hours: 3

Prerequisites: graduate standing or departmental consent

COMMUN 7474: Theory and Research in Persuasion

Studies the persuasive process, attitude formation, modification.

Credit Hours: 3

Prerequisites: COMMUN 3576 and departmental consent

COMMUN 7476: Organizational Communication

Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.

Credit Hours: 3

Prerequisites: COMMUN 3571 or departmental consent

COMMUN 7481: Principles of Rhetoric

Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication.

Credit Hours: 3

Prerequisites: COMMUN 1200, and departmental consent

COMMUN 7520: Family Communication

(same as H_D_FS 7680). Analysis of the functions and processes of communication within families.

Credit Hours: 3

COMMUN 7530: Health Communication

A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

Credit Hours: 3

COMMUN 7618: Television Program Analysis and Criticism

Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics.

Credit Hours: 3

Prerequisites: instructor's consent

COMMUN 7638: New Technologies and Communication

Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

Credit Hours: 3

COMMUN 8001: Topics in Communication-General

Study of selected topics in Communication. Topic and credit may vary semester to semester. Repeatable upon consent of department.

Credit Hours: 3

Prerequisites: instructor's consent

COMMUN 8085: Problems

Individual study not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

COMMUN 8090: Master's Thesis Research in Communication

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

COMMUN 8110: Introduction to Graduate Study in Communication

Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.

Credit Hours: 3

COMMUN 8120: Seminar in Quantitative Methods in Communication

Quantitative methods of speech research.

Credit Hours: 3

COMMUN 8130: Topics in Qualitative Research Methods

Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. May be repeated for credit.

Credit Hours: 3

COMMUN 8140: Content Analysis

Methods of Content Analysis; including consideration of reliability, validity Computer content analysis, codebooks.

Credit Hours: 3

COMMUN 8150: Seminar in Television Criticism

Examination and application of various critical methodologies to television texts.

Credit Hours: 3

COMMUN 8160: Rhetorical Criticism

Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.

Credit Hours: 3

COMMUN 8170: Seminar in Quantitative Methods in Communication II

The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: COMMUN 8120; instructor's consent required

COMMUN 8310: Seminar in Interpersonal Communication

Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.

Credit Hours: 3

COMMUN 8410: Seminar in Organizational Communication Theory

Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.

Credit Hours: 3

COMMUN 8420: Seminar in Small Group Communication

Identifies and analyzes theories and variables which explain, predict, and/or influence small group communication.

Credit Hours: 3

COMMUN 8510: Seminar in Mass Communication Theory

This course will offer graduate students a broad overview of extant theories employed in the study of mass communication and mass media effects. The class will focus on theories of society, theories of media, and the relationships between mass communication and culture. It will also focus on theories of media structures, media organizations, media content, audiences, and media effects.

Credit Hours: 3

COMMUN 8610: Survey of Political Communication

Survey of theory and research on political communication; emphasis on messages and audience responses to messages.

Credit Hours: 3

COMMUN 9050: Research

Completes comprehensive exams and writes a literature review.

Credit Hour: 1-9

COMMUN 9090: Doctoral Dissertation Research in Communication

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

COMMUN 9170: Research Practicum

Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. May be repeated once for credit.

Credit Hours: 3

Prerequisites: consent of mentor required; for advanced graduate students

COMMUN 9280: Seminar in Communication Theory

Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.

Credit Hours: 3

COMMUN 9310: Seminar in Family Communication

Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graded on A-F basis only.

Credit Hours: 3

COMMUN 9330: Topics in Interpersonal Communication

The course will review theory and research on topics related to the study of communication and interpersonal relationships. Subjects will rotate and include areas such as relational conflict, gender communication, nonverbal communication, intercultural communication, or interpersonal violence and communication.

Credit Hours: 3

Prerequisites: instructor's consent

COMMUN 9430: Topics in Organizational Communication

Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated for credit.

Credit Hours: 3

COMMUN 9520: Seminar in Mass Media Effects

Explores current research in the processes and effects of mass communication. Readings pertain to the current social and psychological effects of media on viewers.

Credit Hours: 3

COMMUN 9530: Topics in Mass Communication

Examination of theory and research in selected areas of media communication. Topics vary by semester. May be repeated for credit.

Credit Hours: 3

COMMUN 9620: Political Campaign Debates

Theory and research on political campaign debates applied to analyses of candidate debates. Focus on primary and general presidential debates.

Credit Hours: 3

COMMUN 9630: Political Advertising

Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

Credit Hours: 3

COMMUN 9720: Seminar in Theories of Rhetoric and Criticism

Directed research on selected topics in rhetorical theory and criticism.

Credit Hour: 1-6

Prerequisites: instructor's consent

Communication Science And Disorders (C_S_D)

C_S_D 1000: Introduction to Communication Science and Disorders

Nature of communication and its development; types of speech, language and hearing disorders; professional preparation, settings, and work of speech-language pathologists and audiologists. Course graded on S/U basis only.

Credit Hour: 1

C_S_D 1050: Signed English

Introduction to the English-based sign system, Signed English, a system that has been developed to bridge the gap between English and American Sign Language. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Communication, Science and Disorder majors only during Early Registration

C_S_D 1060: Human Language

(same as ANTHRO 1060, LINGST 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

C_S_D 1100: American Sign Language I

Introduction to American Sign Language (ASL). Development of basic expressive and receptive skills in ASL, the manual alphabet, numbers, and signed vocabulary. Includes an overview of ASL syntax and grammar. Course graded on A-F basis only.

Credit Hours: 5

C_S_D 1200: American Sign Language II

This course is designed to increase students' understanding of American Sign Language. Students will increase their sign vocabulary, expressive and receptive skills, an understanding of ASL syntax and grammar. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: Communication, C_S_D 1100 or equivalent

C_S_D 2120: Survey of Communication Disorders

Systematic survey of the disorders of speech, language and hearing.

Credit Hours: 3

C_S_D 2150: American Sign Language III

This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 1200 with minimum grade of C or instructor's consent

C_S_D 3010: American Phonetics

(same as LINGST 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

Credit Hours: 3

C_S_D 3020: Normal Language Development

(same as PSYCH 3810). Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.

Credit Hours: 3

Prerequisites: PSYCH 2410 or PSYCH 3140, or LINGST 4600

C_S_D 3210: Anatomy and Physiology of the Speech Mechanism

(same as LINGST 3210). Introduction to anatomical and functional aspects of the speech mechanism.

Credit Hours: 3

Prerequisites: Communication Science and Disorders majors only or instructor's consent

C_S_D 3220: Speech Acoustics

(same as LINGST 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.

Credit Hours: 2

Prerequisites: Must be taken concurrently with C_S_D 3210; Communication Science and Disorders majors only or instructor's consent

C_S_D 3230: Hearing Science

Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

Credit Hours: 3

C_S_D 4001: Topics in Communication Science and Disorders

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent.

Credit Hour: 1-99

Prerequisites: junior standing and instructor's consent

C_S_D 4020: Language Disorders in Children

Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.

Credit Hours: 3

Prerequisites: C_S_D 2120, C_S_D 3020, LINGST 4600. Communication Science and Disorder majors only

C_S_D 4030: Language Disorders of Adults

Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures.

Credit Hours: 2

Prerequisites: C_S_D 2120, C_S_D 3020, C_S_D 4430, and LINGST 4600 or instructor's consent

C_S_D 4050: Clinical Applications of Sign Language

This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor's consent required

C_S_D 4200: Professional Voice

Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science and Disorders students may not take for graduate credit.

Credit Hours: 2

C_S_D 4210: Fluency Disorders

Introduction to the nature, assessment, and treatment of fluency disorders. Emphasis on developmental stuttering.

Credit Hours: 2

Prerequisites: C_S_D 2120, C_S_D 3210

C_S_D 4220: Voice Disorders

Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches.

Credit Hour: 1

Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3210, C_S_D 4430

C_S_D 4320: Disorders of Phonology and Articulation

Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment.

Credit Hours: 3

Prerequisites: C_S_D 2120, C_S_D 3010, C_S_D 3020, C_S_D 3210. Communication Science and Disorders majors only

C_S_D 4330: Introduction to Audiology

Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation.

Credit Hours: 3

Prerequisites: C_S_D 3230; Communication Science and Disorders majors only or instructor's consent

C_S_D 4340: Aural Rehabilitation

Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related

to speech/language development, communication, education, and social factors.

Credit Hours: 3

Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 4430: Neurophysiology for Speech, Language, and Hearing

Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

Prerequisites: Communications Science and Disorders majors only or instructor's consent

C_S_D 4810: Psycholinguistics

(same as LINGST 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 4820: Speech Perception

(same as LINGST 4820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 4830: Individual Differences in Language Processing

Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2

Prerequisites: instructor's consent

C_S_D 4840: Language and Development in Infancy

Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3

Prerequisites: senior standing required. Instructor's consent required

C_S_D 4900: Clinical Observation in Communication Disorders

Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only.

Credit Hours: 2

Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4945: Clinical Apprenticeship in Communication Disorders

Supervised observation and clinical experience in speech-language pathology for undergraduates.

Credit Hour: 1-3

Prerequisites: senior standing and departmental consent. Communication Science and Disorders majors only

C_S_D 4950: Research Apprenticeship

Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 6 hrs. maximum.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 4960: Directed Reading in Communication Science and Disorders

Independent reading; reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 4990: Honors Thesis

Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA, leads to degree with departmental honors. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Senior standing; 3.3 GPA; 3.5 GPA in Communication Science and Disorders courses; instructor's consent. Restricted to Communication Science and Disorders students only

C_S_D 7001: Topics in Communication Science and Disorders

Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 7050: Clinical Applications of Sign Language

This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor's consent required

C_S_D 7085: Problems in Communication Science and Disorders

Individual study not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 7200: Professional Voice

Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science Disorder students may not take for graduate credit.

Credit Hours: 2

C_S_D 7340: Aural Rehabilitation

Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 3

Prerequisites: C_S_D 3230 and C_S_D 4330

C_S_D 7430: Neurophysiology for Speech, Language, and Hearing

Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

Prerequisites: Communication Science and Disorders majors or instructor's consent

C_S_D 7810: Psycholinguistics

(same as LINGST 7810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 7820: Speech Perception

(same as LINGST 7820). Selected topics in the perceptual processing of speech sounds and spoken language.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 7830: Individual Differences in Language Processing

Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.

Credit Hours: 2

Prerequisites: instructor's consent

C_S_D 7840: Language and Development in Infancy

Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3

C_S_D 8001: Topics in Communication Science and Disorders

Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99

Prerequisites: instructor's consent, instructor's

C_S_D 8020: Developmental Language Disorders

Nature, etiology, assessment and management of childhood language disorders.

Credit Hours: 3

Prerequisites: C_S_D 3020, C_S_D 4020 and LINGST 7600 or equivalent, or instructor's consent

C_S_D 8030: Acquired Language Disorders

Etiology, symptomatology, assessment and rehabilitation of acquired neurogenic communication disorders in aphasia, traumatic brain injury, dementia, and right-hemisphere syndrome.

Credit Hours: 3

Prerequisites: C_S_D 4030 and C_S_D 4430, or instructor's consent

C_S_D 8050: Research in Communication Science and Disorders

Independent research leading to a report but not to a thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 8085: Problems in Communication Science and Disorders

Individual study not leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 8087: Seminar: Contemporary Topics in Speech-Language Pathology

Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 8090: Research in Communication Science and Disorders

Research leading to thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent. Graded on a S/U basis only

C_S_D 8150: Advanced Speech Science

Advanced exploration of the physiology of speech production and the corresponding acoustic characteristics of speech. Includes experience with pertinent laboratory instrumentation.

Credit Hours: 2

Prerequisites: C_S_D 3210 and C_S_D 3220

C_S_D 8200: Motor Speech Disorders

Review of neuroanatomic mechanisms underlying speech production; etiology, symptomatology, epidemiology, and prognosis of motor speech disorders resulting from acquired neurological damage. Emphasis on clinical assessment and rehabilitation procedures.

Credit Hours: 3

Prerequisites: instructor's consent

C_S_D 8210: Disorders of Fluency

Identification and remediation of fluency disorders in children and adults.

Credit Hours: 3

Prerequisites: C_S_D 3210, C_S_D 4210, C_S_D 4430, or equivalent or instructor's consent

C_S_D 8220: Disorders of Voice

Diagnosis and management of communicative disorders resulting from pathologies or abnormalities of the craniofacial structures and from pathologies or misuse of the phonatory systems.

Credit Hours: 2

Prerequisites: C_S_D 3210, C_S_D 4320 and C_S_D 4210 or instructor's consent

C_S_D 8230: Dysphagia

Etiology, symptomatology, and epidemiology of acquired and developmental swallowing disorders (dysphagia). Emphasis on instrumental and non-instrumental methods for assessing and treating dysphagia.

Credit Hours: 3

Prerequisites: C_S_D 3210, C_S_D 4220, C_S_D 8200; or instructor's consent

C_S_D 8240: Orofacial Anomalies

Nature, causes, diagnosis, and treatment of disorders of communication associated with congenital orofacial anomalies. Emphasis on cleft palate.

Credit Hour: 1

Prerequisites: C_S_D 3210, C_S_D 4320

C_S_D 8250: Clinical Methods in Speech-Language Pathology

An introduction to clinical procedures and evidence-based intervention methods relating to speech and language disorders. Topics include session design, data collection, measurement of progress, reporting of clinical results, and various treatment options. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent

C_S_D 8260: Diagnosis in Speech-Language Pathology

General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders.

Credit Hours: 3

Prerequisites: departmental consent

C_S_D 8320: Speech Sound Disorders

Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: C_S_D 3010 or equivalent or permission of instructor; departmental consent

C_S_D 8420: Reading and Language Disabilities in School-Age Children

Theories, research, and practice in reading development and disorders. Assessment and remediation of reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury.

Credit Hours: 2

Prerequisites: C_S_D 4020 or C_S_D 8020

C_S_D 8430: Introduction to Augmentative and Alternative Communication

Students will learn the principles of AAC assessment, methods of intervention, and types of technology available for individuals unable to communicate fully through speech. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Motor Speech Disorders; Language Disorders in Children; Acquired Language Disorders; C_S_D 8020 and C_S_D 8030

C_S_D 8500: Issues in Professional Practice

Organizational, inter-professional, economic, legal, and ethical aspects of delivering speech, language, and hearing services. Graded on A/F basis only.

Credit Hours: 2

Prerequisites: departmental consent

C_S_D 8600: Clinical Language Analysis

This course provides a theoretical framework for understanding the morphology, semantics, syntax, and pragmatics of English as well as practice in the analysis of typical and atypical language samples. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent required

C_S_D 8935: Clinical Practice in Audiology

Supervised practice in hearing screening, hearing conservation, and aural re/habilitation. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1

C_S_D 8945: Clinical Practice in Speech-Language Pathology

Supervised clinical practice in speech pathology for graduate students. May be repeated for credit.

Credit Hour: 1-10

Prerequisites: C_S_D 4945 or equivalent

C_S_D 8960: Directed Reading in Communication Science and Disorders

Independent reading; reports.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 9050: Research in Communication Science and Disorders

Independent research leading to a report but not to a thesis or dissertation.

Credit Hour: 1-99

Prerequisites: instructor's consent

C_S_D 9087: Seminar: Contemporary Topics in Speech-Language Pathology

Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits.

Credit Hour: 1-3

Prerequisites: instructor's consent

C_S_D 9090: Research in Communication Science and Disorders

Research leading to thesis or dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

Computer Science (CMP_SC)

CMP_SC 1000: Introduction to Computer Science

This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives.

Credit Hour: 1

Prerequisites: Restricted to freshman/sophomore Computer Science/ Information Technology majors

CMP_SC 1001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 1050: Algorithm Design and Programming I

This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1160 or MATH 1500 (C- or better)

CMP_SC 2001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

Prerequisites: departmental consent

CMP_SC 2050: Algorithm Design and Programming II

A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis.

Credit Hours: 3

Prerequisites: CMP_SC 1050

CMP_SC 2111: Production Languages

The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit.

Credit Hour: 1-3

Prerequisites: CMP_SC 2050

CMP_SC 2270: Introduction to Digital Logic

Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, adder design, memory elements, and finite state machine design.

Credit Hours: 3

Prerequisites: CMP_SC 1050

CMP_SC 2830: Introduction to the Internet, WWW and Multimedia Systems

This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3001: Topics in Computer Science

Current and new technical developments in computer science. May be repeated for 6 hours credit.

Credit Hour: 1-99

Prerequisites: departmental consent. For juniors and seniors

CMP_SC 3050: Advanced Algorithm Design

This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3280: Computer Organization and Assembly Language

Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2270

CMP_SC 3330: Object Oriented Programming

This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3380: Database Applications and Information Systems

Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 3530: UNIX Operating System

Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation.

Credit Hours: 3

Prerequisites: Advanced C programming experience

CMP_SC 3940: Internship in Computer Science

Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on a S/U basis only.

Credit Hour: 1-3

Prerequisites: CMP_SC 2050

CMP_SC 4001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 4050: Design and Analysis of Algorithms I

This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 4060: String Algorithms

This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 4070: Numerical Methods for Science and Engineering

Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc.

Credit Hours: 3

Prerequisites: CMP_SC 2050, junior standing or instructor's consent. Graded on A/F basis only

CMP_SC 4085: Problems in Computer Science

Independent investigation or project in Computer Science. May be repeated to up 6 hours.

Credit Hour: 1-6

Prerequisites: senior standing in Computer Science

CMP_SC 4270: Computer Architecture I

Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

Credit Hours: 3

Prerequisites: CMP_SC 2270

CMP_SC 4280: Network Systems Architecture

(same as ECE 4280; cross-leveled with CMP_SC 7280), The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer. Prerequisites: ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

Credit Hours: 4

CMP_SC 4320: Software Engineering I

Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.

Credit Hours: 3

Prerequisites: CMP_SC 2050

Corequisites: CMP_SC 3380

CMP_SC 4330: Object Oriented Design I

Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language. Enrollment limited to undergraduate students only.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 4380: Database Management Systems I

Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

Credit Hours: 3

Prerequisites: CMP_SC 3380

CMP_SC 4410: Theory of Computation I

An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320

CMP_SC 4430: Compilers I

Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320

CMP_SC 4440: Malware Analysis and Defense

Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and teaches ethical issues surrounding computer security violations.

Credit Hours: 3

Prerequisites: CMP_SC 3280, ECE 3210 or equivalent

CMP_SC 4450: Principles of Programming Languages

An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 4520: Operating Systems I

Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 1700

CMP_SC 4610: Computer Graphics I

Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 1500 or MATH 1300 and MATH 1400

CMP_SC 4620: Physically Based Modeling and Animation

This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in

all areas as well as advanced undergraduate students. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4610, good knowledge of C or C++ programming, no physics background necessary

CMP_SC 4650: Digital Image Processing

(same as ECE 4850). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

Credit Hours: 3

Prerequisites: CMP_SC 2050, STAT 4710 or instructor's consent

CMP_SC 4670: Digital Image Compression

(same as ECE 4675) Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 4720: Introduction to Machine Learning and Pattern Recognition

(Same as ECE 4720) This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050 and STAT 4710 or instructor consent

CMP_SC 4730: Building Intelligent Robots

(same as ECE 4340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: junior standing and programming experience in one of the following programming languages: Basic, C, C++, or Java.

Credit Hours: 4

CMP_SC 4740: Interdisciplinary Introduction to NLP

(same as LINGST 4740; cross-leveled with CMP_SC 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.

Credit Hours: 3

Prerequisites: senior standing

CMP_SC 4750: Artificial Intelligence I

Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and junior standing

CMP_SC 4770: Introduction to Computational Intelligence

(same as ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

Credit Hours: 3

CMP_SC 4830: Science and Engineering of the World Wide Web

This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

Credit Hours: 3

Prerequisites: CMP_SC 2830

CMP_SC 4850: Computer Networks I

Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

Credit Hours: 3

Prerequisites: CMP_SC 2270 and MATH 2320

CMP_SC 4860: Network Security

Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4850

CMP_SC 4870: Wireless and Mobile Networks

Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4850

CMP_SC 4970: Senior Capstone Design I

Design projects emphasizing team work, communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

Credit Hours: 3

Prerequisites: CMP_SC 4320 and senior standing

CMP_SC 4980: Senior Capstone Design II

Course entails completion of CMP_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation.

Credit Hours: 2

Prerequisites: CMP_SC 4970

CMP_SC 4990: Undergraduate Research in Computer Science

Independent investigation or project in Computer Science.

Credit Hour: 0-6

Prerequisites: senior standing in Computer Science. May be repeated to 6 hours

CMP_SC 4995: Undergraduate Research in Computer Science - Honors

Independent investigation to be presented as an undergraduate honors thesis.

Credit Hour: 1-6

Prerequisites: honors student in Computer Science

CMP_SC 7001: Topics in Computer Science

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 7010: Computational Methods in Bioinformatics

(Same as INFOINST 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem, design of scoring functions and algorithms, confidence assessment of prediction results and software development.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and STAT 4710

CMP_SC 7050: Design and Analysis of Algorithms I

This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 7060: String Algorithms

This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 7070: Numerical Methods for Science and Engineering

Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050 or instructor's consent

CMP_SC 7087: Seminar in Computer Science

Reviews of recent investigations, projects of major importance.

Credit Hour: 1

CMP_SC 7270: Computer Architecture I

Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems.

Credit Hours: 3

Prerequisites: CMP_SC 3210 or CMP_SC 2270

CMP_SC 7280: Network Systems Architecture

(same as ECE 7280; Cross-leveled with CMP_SC 4280). The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer.

Credit Hours: 4

Prerequisites: ECE 3210 or CMP_SC 3280 and ECE 3220 or CMP_SC 2050

CMP_SC 7320: Software Engineering I

(cross-leveled with CMP_SC 4320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 2050

Corequisites: CMP_SC 3380

CMP_SC 7380: Database Management Systems I

Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 7410: Theory of Computation I

An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, contextfree grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320

CMP_SC 7430: Compilers I

Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for blockstructured languages, and run-time storage organization. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: MATH 2320

CMP_SC 7450: Principles of Programming Languages

An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 7520: Operating Systems I

Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and MATH 1700

CMP_SC 7610: Computer Graphics I

Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

Credit Hours: 3

Prerequisites: CMP_SC 3050 and either MATH 1500 or MATH 1300 and MATH 1400

CMP_SC 7620: Physically Based Modeling and Animation

(cross-leveled with CMP_SC 4620). Introduces fundamental algorithms and techniques including interpolation, quaternions, rigid body dynamics, kinematics, particle systems, free form and dynamic deformations, spring and damper systems and computational natural phenomena simulation.

Credit Hours: 3

Prerequisites: CMP_SC 4610 or CMP_SC 7610, C/C++ programming, linear algebra

CMP_SC 7650: Digital Image Processing

(same as ECE 7655). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

Credit Hours: 3

Prerequisites: CMP_SC 2050, STAT 7710 or instructor's consent

CMP_SC 7670: Digital Image Compression

Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

Credit Hours: 3

Prerequisites: CMP_SC 2050

CMP_SC 7720: Introduction to Machine Learning and Pattern Recognition

(same as ECE 7720). This course provides foundation knowledge and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 2050 and STAT 4710 or instructor's consent

CMP_SC 7730: Building Intelligent Robots

(same as ECE 7340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: programming experience in one of the following programming languages: Basic, C, C++, or Java.

Credit Hours: 4

CMP_SC 7740: Interdisciplinary Introduction to Natural Language Processing

(same as LINGST 7740; cross-leveled with CMP_SC 4740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of text.

Credit Hours: 3

CMP_SC 7750: Artificial Intelligence I

Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.

Credit Hours: 3

Prerequisites: CMP_SC 3050

CMP_SC 7770: Introduction to Computational Intelligence

(same as ECE 7870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

Credit Hours: 3

CMP_SC 7830: Science and Engineering of the World Wide Web

This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

Credit Hours: 3

Prerequisites: CMP_SC 3330 and CMP_SC 2830

CMP_SC 7850: Computer Networks I

(cross-leveled with CMP_SC 4850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

Credit Hours: 3

Prerequisites: CMP_SC 2270 and MATH 2320

CMP_SC 7860: Network Security

Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls.

Credit Hours: 3

Prerequisites: CMP_SC 7850 or CMP_SC 4850

CMP_SC 7870: Wireless and Mobile Networks

Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Prerequisites: CMP_SC 7850 or CMP_SC 4850

Credit Hours: 3

CMP_SC 8001: Advanced Topics in Computer Science

Topic may vary from semester to semester. May be repeated upon consent of department.

Credit Hours: 3

Prerequisites: varies by topic

CMP_SC 8050: Design and Analysis of Algorithms II

Techniques for the design and analysis of correct, efficient algorithms. Topics include graph, geometric, and algebraic/ numeric algorithms, NP-completeness, and parallel algorithms.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 8060: Survey of Advanced Algorithm Techniques

This class provides a survey of important algorithmic techniques, some of which are emerging right now, and show that they are much easier to understand than they first appear. The class will create a renewed appreciation for what makes Computer Science such a fun/interesting discipline.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 8085: Problems in Computer Science

Independent study project work with a professor in computer science.

Credit Hour: 1-4

Prerequisites: instructor consent

CMP_SC 8090: Computational Geometry

Studies fundamental geometric problems within the framework of analysis of algorithms: convex hull algorithms in the plane and in general dimension, Voronoi diagram construction and applications to the solution of proximity problems, intersection problems, and geometric searching problems.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and MATH 2300, or instructor's consent

CMP_SC 8110: Problem Solving in Bioinformatics

(Same as INFOINST 8010). The course covers a variety of bioinformatics research topics such as biological sequence comparison, protein structure prediction, protein and gene function prediction, and inference and modeling of biological networks. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

CMP_SC 8120: Structural Bioinformatics of Proteins, Complexes, System

(same as INFOINST 8210). Main course objective is to provide an introduction to the state-of-the-art methods in structural bioinformatics. The course will cover the methods that are applied to a wide range of biomolecular objects from protein domains and small proteins to large biological systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

Recommended: CMP_SC 4050 or CMP_SC 7050

CMP_SC 8130: Computational Genomics

(same as INFOINST 8310). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

CMP_SC 8150: Integrative Methods in Bioinformatics

(same as INFOINST 8150), Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010

CMP_SC 8160: Content Management in Biomedical Informatics

(same as INFOINST 8860). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7380, INFOINST 7010

CMP_SC 8180: Machine Learning Methods for Biomedical Informatics

(same as INFOINST 8880). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or CMP_SC 7005

CMP_SC 8190: Computational Systems Biology

(same as INFOINST 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: INFOINST 7010 or CMP_SC 7010; INFOINST 8010

CMP_SC 8270: Computer Architecture II

Study of array processors, multiprocessors, multicomputers, and networked computing systems. Topics include architectures, interconnection networks, communication mechanisms, distributed memories and security. Introduction to parallel algorithm design.

Credit Hours: 3

Prerequisites: CMP_SC 4210 or ECE 4270

CMP_SC 8320: Software Engineering II

Further discussion of software development methodology.

Credit Hours: 3

Prerequisites: CMP_SC 4320

CMP_SC 8330: Object Oriented Design II

Software system design using classes and their properties of abstraction, inheritance, dynamic binding, and polymorphism. Focus on object-oriented design of systems such as windows, graphics systems, and operating system.

Credit Hours: 3

Prerequisites: CMP_SC 4330

CMP_SC 8370: Data Mining and Knowledge Discovery

Course topics include an introduction to fundamental concepts, data mining techniques from machine learning and pattern recognition areas, association rules, web mining, spatial mining, temporal mining, multimedia/multimodal database mining, and database mining, and geospatial information mining.

Credit Hours: 3

Prerequisites: CMP_SC 7380

CMP_SC 8380: Database Management Systems II

Further study in the theory, design, organization and implementation of databases and database management systems. Topics include: high-dimensional database indexing, content-based retrieval from image and video databases, object-relational databases, object-oriented databases, and data mining.

Credit Hours: 3

Prerequisites: CMP_SC 7380

CMP_SC 8390: Information Indexing and Retrieval

Theory and techniques for the modeling, indexing, and retrieval of text-based and multimedia databases. Topics include introduction to different

information retrieval models, retrieval evaluation, query languages, query operations, and indexing/searching methods.

Credit Hours: 3

Prerequisites: CMP_SC 2050 and CMP_SC 2110

CMP_SC 8410: Theory of Computation II

An advanced study of computational and formal languages by means of automata and related grammars. Turing machines, decidability, computability, computational complexity, language translation, and recent trends in automata theory.

Credit Hours: 3

Prerequisites: CMP_SC 7410

CMP_SC 8430: Compilers II

Further study of the compilation process. Compiler generation tools, parsing methods, code generation, data-flow analysis, code optimization, error handling, discussion of programming language features and their relationship to the compilation process.

Credit Hours: 3

Prerequisites: CMP_SC 7430

CMP_SC 8440: Information Security: A Language-Based Approach

This course focuses on language-based techniques for information flow security. Students will gain a solid background in information security, be encouraged to do further research and be exposed to important/promising trends in state-of-the-art computer security. Prerequisites: CMP_SC 4450 or CMP_SC 7450

Credit Hours: 3

CMP_SC 8520: Operating Systems II

Discusses concurrent processes, distributed/network operating systems; models of processor scheduling, memory management and resource allocation, performance measurement, evaluation and simulation methodology; queuing models; security and reliability.

Credit Hours: 3

Prerequisites: CMP_SC 4520

CMP_SC 8610: Computer Graphics II

Further study of computer graphics, focused on 3-D graphics, transformations, geometric and surface modeling, color models, visible surface determination, lighting and shading, standard graphics software (Phigs/OpenGL). Selected current topics in graphics such as visualization, animation and realism.

Credit Hours: 3

Prerequisites: CMP_SC 7610

CMP_SC 8620: Physically Based Modeling and Animation II

This course introduces students to physical based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students.

Credit Hours: 3

Prerequisites: CMP_SC 4610 or CMP_SC 7610

CMP_SC 8630: Data Visualization

Data visualization broadly covers transforming multidimensional and timevarying datasets to dynamic visual representations and encodings that facilitate exploratory data mining, knowledge discovery, improved understanding, summarization, structural modeling, collaboration and decision making using interactive methods.

Credit Hours: 3

Prerequisites: CMP_SC 4610 or CMP_SC 7610 or instructor's consent

CMP_SC 8650: Advanced Image Processing

(same as ECE 8855). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.

Credit Hours: 3

Prerequisites: CMP_SC 4650 or CMP_SC 7650 or instructor's consent

CMP_SC 8660: Multimedia Security

This course offers a comprehensive coverage of the theoretical foundation of multimedia security technologies, including encryption, authentication, digital watermarking, key management, copy control, fingerprinting/tracing, digital media forensics, and biometrics, provides an in-depth study of the state-of-the-art digital rights management systems and the underlying security technologies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4670 or CMP_SC 4650; instructor's consent

CMP_SC 8670: Multimedia Communication

Topics covered may include multimedia networking and network technologies as pertaining to multimedia communications; multimedia applications such as video conferencing, video-on-demand broadcasting, and web-based distance learning; wireless video and future generation wireless video communication systems.

Credit Hours: 3

Prerequisites: CMP_SC 4670 and CMP_SC 4850 or instructor's consent

CMP_SC 8690: Computer Vision

(same as ECE 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 4655 or ECE 7655 or CMP_SC 4650 or CMP_SC 7650 or instructor's consent

CMP_SC 8725: Supervised Learning

(same as ECE 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

CMP_SC 8735: Unsupervised Learning

(same as ECE 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

CMP_SC 8750: Artificial Intelligence II

Further discussion of theories and techniques of artificial intelligence. Investigating state-of-the-art systems with capabilities to perceive, reason, learn and react intelligently to their environment.

Credit Hours: 3

Prerequisites: CMP_SC 4750 or CMP_SC 7750 or instructor's consent

CMP_SC 8760: Pattern Recognition

(same as ECE 8820). Decision functions, crisp and fuzzy clustering methods, statistical pattern recognition methods, Bayesian classifiers, error probabilities, estimation of density functions, perceptrons, least-mean-square algorithms, feature selection, dimensionality reduction and syntactic pattern recognition.

Credit Hours: 3

Prerequisites: CMP_SC 4050, STAT 4710

CMP_SC 8770: Neural Networks

(same as ECE 8890). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems.

Credit Hours: 3

Prerequisites: CMP_SC 4870 or CMP_SC 7870 or instructor's consent

CMP_SC 8790: Filtering, Tracking and Data Fusion

This course will cover theory and applications of rigorous and efficient techniques for determining the state of an observed system from a series of imperfect observations or measurements. Specific topics to be covered include semidefinite matrix theory, the Kalman filter, the Unscented Transform, Covariance Intersection and related techniques. Applications of these techniques include head and hand tracking in virtual reality systems, robotics, and distributed information fusion.

Credit Hours: 3

Prerequisites: CMP_SC 2050, MATH 2300 or Linear Algebra or Matrix Theory

CMP_SC 8850: Computer Networks II

In-depth analysis and evaluation of computer networking architectures, protocols and algorithms, network security, distributed database and computational networks, routing and congestion control, domains and internetworking.

Credit Hours: 3

Prerequisites: CMP_SC 7850

CMP_SC 8860: Parallel and Distributed Processing

This course covers basic issues of parallel and distributed processing, including parallel and distributed architectures and models, parallel programming, and parallel algorithms and applications.

Credit Hours: 3

Prerequisites: CMP_SC 4050

CMP_SC 8870: Modeling and Management of Uncertainty

(same as ECE 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 4870 or ECE 7870 or CMP_SC 4770 or CMP_SC 7770 or instructor's consent

CMP_SC 8880: Wireless Embedded Systems

This course introduces wireless embedded systems and focuses on the nature of computation and communication needed to design large-scale, distributed, and wirelessly connected embedded systems. We will study emerging technology and standards by reading papers and doing projects on real systems.

Credit Hours: 3

Prerequisites: CMP_SC 4050 and CMP_SC 4850 or instructor's consent

CMP_SC 8980: Research Masters Project in Computer Science

Investigation and research of a topic, not leading to a thesis. Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

CMP_SC 8990: Research-Masters Thesis Computer Science

Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: advisor's consent

CMP_SC 9001: Advanced Topics in Computer Science - PhD

New and current technical developments in computer science. For PhD students.

Credit Hour: 1-4

CMP_SC 9990: Research-Doctoral Dissertation Computer Science

Graded on S/U basis only.

Credit Hour: 1-99

Prerequisites: advisor's consent

Dermatology (DERM)

DERM 6233: ABS Dermatology Research

ABS Dermatology Research

Credit Hours: 5

DERM 6235: ABS Dermatology Research and Review

ABS Dermatology Research and Review

Credit Hour: 5-10

DERM 6450: Dermatology I

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Students are evaluated using a standard evaluation. The student's knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences.

Credit Hours: 5

Prerequisites: Internal Medicine Clerkship

DERM 6750: Dermatology I - Rural

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer.

Credit Hours: 5

DERM 6856: Dermatology II

This elective rotation is an expansion of the objective goals outlined for Dermatology I. The student is expected to expand the depth and breadth of his/her dermatology experiences and knowledge. Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer. As Dermatology II is an extension of the Dermatology I curriculum,

Dermatology II students are expected to master the above objectives. In addition, they are expected to expand their clinical skills related to the diagnosis and treatment of dermatologic diseases and they will have increased responsibilities for patient education. It is expected that they will further their surgical skills including biopsies, simple excisions, and basic cryotherapy. They will also become proficient in basic laboratory procedures including KOH and scabies prep.

Credit Hours: 5

Diagnostic Medical Ultrasound (DMU)

DMU 1000: Introduction to Diagnostic Medical Ultrasound

Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

Credit Hour: 1

DMU 4001: Topics in Diagnostic Medical Ultrasound

Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students; program director's consent

DMU 4085: Problems in Diagnostic Medical Ultrasound

Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students only; program director's consent

DMU 4200: Principles of Diagnostic Medical Ultrasound

Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care.

Credit Hours: 3

Prerequisites: departmental consent

DMU 4234: Clinical Pathophysiology

Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

Credit Hours: 3

DMU 4309: Normal Ultrasound Clinical

Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

Credit Hours: 5

Prerequisites: DMU 4312, DMU 4313 and DMU 4315; instructor's consent

DMU 4311: Pathological Images of Ultrasound

Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

Credit Hours: 3

Prerequisites: DMU 4200, DMU 4312 and DMU 4315; instructor's consent

DMU 4312: Sectional Anatomy

(same as RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

Credit Hours: 3

Prerequisites: instructor's consent

DMU 4313: Ultrasound Physics

Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

Credit Hours: 3

Prerequisites: MATH 1100, CHEM 1100 or CHEM 1320, PHYSCS 1210, and departmental consent

DMU 4314: Abdominal Ultrasound

(cross-leveled with DMU 7314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

Credit Hours: 5

Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4315: Ultrasound Instrumentation

Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

Credit Hours: 3

Prerequisites: DMU 4200; instructor's consent

DMU 4318: Gynecology Ultrasound

Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 4312, DMU 4309 and DMU 4311

DMU 4320: Obstetrics Ultrasound

Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4322: Superficial Organs Ultrasound

Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

Credit Hours: 3

Prerequisites: DMU 4312, DMU 4309 and DMU 4311; instructor's consent

DMU 4325: Ultrasound Clinical Pharmacology and Contrast Agents

Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in Diagnostic Medical Ultrasound and their pharmacodynamics.

Credit Hours: 3

DMU 4326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics

Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

Credit Hours: 3

Prerequisites: DMU 4313 and DMU 4315; instructor's consent

DMU 4330: Vascular Ultrasound Lab

Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

Credit Hours: 3

Prerequisites: DMU 4312, and DMU 4326; instructor's consent

DMU 4332: Vascular Ultrasound

Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

Credit Hours: 4

Prerequisites: DMU 4312, DMU 4311, DMU 4322, and DMU 4326 or instructor's consent

DMU 4338: Cardiac Ultrasound, Principles and Hemodynamics

Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: DMU 4313, DMU 4315, instructor's consent

DMU 4342: Adult Cardiac Ultrasound

(cross-leveled with DMU 7342). Provides principles of diagnostic adult cardiac ultrasound in relation to pathology, further presenting the practical aspects of scanning techniques, exam critique, patient care in relation to cardiac US exams. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: DMU 4313, DMU 4315 and DMU 4338; instructor's consent

DMU 4941: Ultrasound Clinical I

Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

Credit Hours: 7

Prerequisites: DMU 4312, DMU 4309 and DMU 4311 and instructor's consent

DMU 4943: Ultrasound Clinical III

Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

Credit Hours: 6

Prerequisites: DMU 4993 and instructor's consent

DMU 4944: Vascular Ultrasound Clinical IV

Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

Credit Hours: 7

Prerequisites: DMU 4326 and instructor's consent

DMU 4945: Cardiac Ultrasound Clinical V

Application of ultrasonography in real clinical settings for learning, practicing and decision making regarding, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

Credit Hours: 6

Prerequisites: DMU 4313, DMU 4315, DMU 4944. Instructor and Departmental permission required

DMU 4946: Cardiac Ultrasound Clinical VI

Further application of ultrasonography for continuation of learning, practicing and decision making, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

Credit Hours: 6

Prerequisites: DMU 4313, DMU 4315, DMU 4338 and DMU 4945. Instructor and Departmental permission required

DMU 4993: Ultrasound Clinical II

Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

Credit Hours: 8

Prerequisites: DMU 4941; instructor's consent

DMU 7200: Diagnostic Medical Ultrasound Principles and Patient Care

Introduction diagnostic medical ultrasound principles including history, development, ultrasound physics - equipment fundamentals. Provides introduction to concepts of sonographic techniques, positioning, image critique, aspects of patient care and professional organizations. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: DMU 1000; instructor's consent

DMU 7234: Clinical Pathophysiology

(same as PH_THR 7270). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

Credit Hours: 3

DMU 7309: Normal Ultrasound Clinical

Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

Credit Hours: 5

Prerequisites: DMU 7312, DMU 7313 and DMU 7315; instructor's consent

DMU 7311: Pathological Images Ultrasound

Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

Credit Hours: 3

Prerequisites: DMU 4200, DMU 7312 and DMU 7315; instructor's consent

DMU 7312: Sectional Anatomy

(same as RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

Credit Hours: 3

Prerequisites: instructor's consent

DMU 7313: Ultrasound Physics

Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

Credit Hours: 3

Prerequisites: MATH 1100, CHEM 1100 or CHEM 1320, PHYSCS 1210, and departmental consent

DMU 7314: Abdominal Ultrasound

(cross-leveled with DMU 4314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

Credit Hours: 5

Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor's consent

DMU 7315: Ultrasound Instrumentation

Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

Credit Hours: 3

Prerequisites: DMU 4200; instructor's consent

DMU 7318: Gynecology Ultrasound

Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 7312, DMU 7309 and DMU 7311

DMU 7320: Obstetrics Ultrasound

Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

Credit Hours: 3

Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor's consent

DMU 7322: Superficial Organs Ultrasound

Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

Credit Hours: 3

Prerequisites: DMU 7312, DMU 7309 and DMU 7311; instructor's consent

DMU 7325: Ultrasound Clinical Pharmacology and Contrast Agents

Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics.

Credit Hours: 3

DMU 7326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics

Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

Credit Hours: 3

Prerequisites: DMU 7313 and DMU 7315; instructor's consent

DMU 7330: Vascular Ultrasound Lab

Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

Credit Hours: 3

Prerequisites: DMU 7312, and DMU 7326; instructor's consent

DMU 7332: Vascular Ultrasound

Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

Credit Hours: 4

Prerequisites: DMU 7312, DMU 7311, DMU 7322, and DMU 7326 or instructor's consent

DMU 7338: Cardiac Ultrasound, Principles and Hemodynamics

Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: DMU 4313, DMU 4315, instructor's consent

DMU 7342: Adult Cardiac Ultrasound

(cross-leveled with DMU 4342). Study of adult cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

Credit Hours: 5

Prerequisites: DMU 7312, DMU 7313 and DMU 7315 and instructor's consent

DMU 7941: Ultrasound Clinical I

Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

Credit Hours: 7

Prerequisites: DMU 7312, DMU 7309 and DMU 7311 and instructor's consent

DMU 7943: Ultrasound Clinical III

Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

Credit Hours: 6

Prerequisites: DMU 7993 and instructor's consent

DMU 7944: Vascular Ultrasound Clinical IV

Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

Credit Hours: 7

Prerequisites: DMU 7326 and instructor's consent

DMU 7945: Cardiac Ultrasound Clinical V

Application of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

Credit Hours: 6

Prerequisites: DMU 7313 and DMU 7315 and instructor's consent

DMU 7946: Cardiac Ultrasound Clinical VI

Further enhancement of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

Credit Hours: 6

Prerequisites: DMU 7945

DMU 7993: Ultrasound Clinical II

Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

Credit Hours: 8

Prerequisites: DMU 7941; instructor's consent

DMU 8001: Topics in Diagnostic Medical Ultrasound

Organized study of selected topics. Topic may vary.

Credit Hour: 1-3

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8050: Research in Diagnostic Medical Ultrasound

Research not leading to a thesis or dissertation. Graded on an A-F basis only.

Credit Hour: 1-99

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8085: Problems in Diagnostic Medical Ultrasound

Independent study of a special project involving clinical applications or research. Topic may vary.

Credit Hour: 1-99

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8090: Research in Diagnostic Medical Ultrasound

Research leading to a thesis or dissertation. Graded on an S/U basis only.

Credit Hour: 1-99

Prerequisites: restricted to students enrolled in the Diagnostic Medical Ultrasound program only

DMU 8346: Pediatric Cardiac Ultrasound

Study of pediatric cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

Credit Hours: 4

Prerequisites: DMU 7342 and instructor's consent

DMU 8947: Applied Clinical Research & Practicum

Clinical research application of cardiovascular & general ultrasound in clinical environment: clinical research, practicum, decision making, patient handling, and image processing. Graded on A-F basis only.

Credit Hour: 5-8

Prerequisites: DMU 7944, DMU 7946, instructor's consent

Economics (ECONOM)

ECONOM 1014: Principles of Microeconomics

A basic examination of the economy at the individual consumer, firm and market level. Simple economic models used to analyze the workings of the economy. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, the importance of free trade, the markets response to economic shocks and the effect of government intervention. Not open to students who have completed ECONOM 1024, ECONOM 1051, or AG_EC 1041.

Credit Hours: 3

ECONOM 1015: Principles of Macroeconomics

Macroeconomics generally refers to a collection of questions about how scarcity affects a collection of people interacting with one another. In this course, our focus is on understanding how scarcity affects welfare of a nation. Topics include Gross Domestic Product, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Not open to students who have completed ECONOM 1051 or AG_EC 1042.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024

ECONOM 1024: Fundamentals of Microeconomics

This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in microeconomics. It uses college algebra and simple geometric concepts to describe the behavior of economic units, such as consumers, firms and resource owners, and to depict their interaction through production and exchange in perfect and imperfect markets. Not open to students who have completed ECONOM 1014, ECONOM 1051, or AG_EC 1041. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: MATH 1100 or MATH 1120 or equivalent with grade of C or better

ECONOM 1051H: General Economics - Honors

One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and ECONOM 1015. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: Honors eligibility required

ECONOM 1051: General Economics

One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Includes applications for Journalism students. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and, ECONOM 1015 or AG_EC 1041 and AG_EC 1042. Graded on A-F basis only.

Credit Hours: 5

Prerequisites: Open only to pre-Journalism and Journalism majors; departmental consent required

ECONOM 2004: Undergraduate Topics in Economics - Social Science

Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 3004: Topics in Economics - Social Science

Study in applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 3224: Introduction to International Economics

A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations,

trade and development, exchange rates, the International Monetary System, and economic integration.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051

ECONOM 3229: Money, Banking and Financial Markets

Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 3229H: Money, Banking and Financial Markets - Honors

Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Honors eligibility required.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 3251: Theory of the Firm

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed ECONOM 4351.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent. Not open to economics majors

ECONOM 3323: Capitalism, Democracy and Society

This is a one-credit seminar course for students interested in careers involving social science research and analysis; topics covered will be a selection of classic and contemporary debates in the social sciences.

Credit Hour: 1

Prerequisites: ECONOM 1014 and ECONOM 1015, or ECONOM 1051

ECONOM 4004: Topics in Economics- Social Science

Study in applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 4311: Labor Economics

Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4315: Public Economics

Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4320: History of Economic Thought

Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 4322: Economics of Regulation and Antitrust

Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4325: The International Monetary System

Study of macroeconomic and monetary relationships between the U.S. and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system.

Credit Hours: 3

Prerequisites: ECONOM 3229

ECONOM 4326: Economics of International Trade

The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4329: The Banking System and the Money Market

Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 4340: Introduction to Game Theory

An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4345: Economics of Education

Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051, and STAT 2500, or equivalent

ECONOM 4351: Intermediate Microeconomics

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4351H: Intermediate Microeconomics - Honors

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251. Honors eligibility required.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4353: Intermediate Macroeconomics

The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051, and MATH 1400, or equivalent

ECONOM 4355: Industrial Organization and Competitive Strategy

Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4357: Health Economics

Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional

training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351 and STAT 2500, or equivalent

ECONOM 4360: Economic Development

(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.

Credit Hours: 3

Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351

ECONOM 4361: Comparative Economic Systems

Study of capitalism, market socialism, and central planning.

Credit Hours: 3

Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351

ECONOM 4367: Law and Economics

This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

ECONOM 4370: Quantitative Economics

The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

Credit Hours: 3

Prerequisites: MATH 1500 or equivalent

ECONOM 4371: Introductory Econometrics

Study methods for quantitative analysis of economic data. Estimation techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

ECONOM 4384: Structural Change in Economic History

Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051

ECONOM 4385: Problems in Economics

Development of a carefully considered research project under close supervision of a faculty member. Credit arranged by instructor.

Credit Hour: 1-3

Prerequisites: ECONOM 4351, ECONOM 4371, and instructor's consent. Not open to non-majors

ECONOM 4940: Internship in Economics

Internship experience for Economics majors. 120 hours of supervised internship work with approval of Director of Undergraduate Studies and academic advisor. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: ECONOM 4351 and ECONOM 4371; Declared economics majors who have a minimum overall MU GPA of 2.75 and have junior or senior standing. Students must have completed at least 15 credit hours at MU

ECONOM 4965: Independent Study in Economics

Individual work, with conferences adjusted to needs of student.

Credit Hour: 1-3

Prerequisites: instructor's consent

ECONOM 4970: Senior Seminar in Economics

Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

Credit Hours: 3

ECONOM 4971: Supplemental Senior Seminar in Economics

Content description is the same as ECONOM 4970. Required for Economics honors students and double majors in Economics who take a capstone course in another major. No credit for students who have completed ECONOM 4970. Not open to non-majors. Graded on A-F basis only.

Credit Hour: 1

ECONOM 4995: Honors Proseminar

Seminar for graduating seniors. This capstone course integrates previous economics courses by applying economic theories to problems. Students acquire an understanding of what research in economics can produce and how to produce those results. Course requirements are to produce a list of distinctive activities that count as research and produce a research paper. Multiple writing assignments will emphasize synthesis of theoretical, empirical and institutional economics. No credit for students who have completed ECONOM 4970. Not open to non-majors. Capstone course required for Economics honors students.

Credit Hours: 3

ECONOM 7001: Topics in Economics - General

Study in applied or theoretical economics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: instructor's consent

ECONOM 7085: Problems in Economics

Individual study in Economics.

Credit Hour: 1-99

Prerequisites: instructor's consent

ECONOM 7311: Labor Economics

Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7315: Public Economics

Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 7320: History of Economic Thought

Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015 or ECONOM 1051H

ECONOM 7322: Economics of Regulation and Antitrust

Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7325: The International Monetary System

Study of macroeconomic and monetary relationships between the US and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system.

Credit Hours: 3

Prerequisites: ECONOM 3229

ECONOM 7326: Economics of International Trade

The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC's and the trade effects of economic growth.

Credit Hours: 3

Prerequisites: ECONOM 7351 or instructor's consent

ECONOM 7329: The Banking System and the Money Market

Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 7332: Microeconomics for Managers

Microeconomic concepts presented at the intermediate level, graphic treatment with limited calculus, managerial issues presented at the MBA level. (Not open to economics majors).

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024, MATH 1300; permission required for MBA program

ECONOM 7340: Introduction to Game Theory

An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351 or instructor's consent

ECONOM 7345: Economics of Education

Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051H and ECONOM 4371 or equivalent

ECONOM 7351: Intermediate Microeconomics

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed 3251.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1051H and MATH 1320 or equivalent

ECONOM 7353: Intermediate Macroeconomics

The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

Credit Hours: 3

Prerequisites: ECONOM 1015 or ECONOM 1051 and MATH 1400 or equivalent

ECONOM 7355: Industrial Organization and Competitive Strategy

Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7357: Health Economics

(same as PUB_AF 7357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine; and examination of recent proposals and initiatives for health care reform.

Credit Hours: 3

Prerequisites: STAT 2500 and ECONOM 4351

ECONOM 7360: Economic Development

(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed.

Credit Hours: 3

Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351.; graduate standing required

ECONOM 7361: Comparative Economic Systems

Study of capitalism, market socialism, and central planning.

Credit Hours: 3

Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351

ECONOM 7367: Law and Economics

(same as Public Affairs PUB_AF 7367). This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime and the judiciary.

Credit Hours: 3

Prerequisites: [ECONOM 4351 or ECONOM 3251, and STAT 2500, or equivalent

ECONOM 7370: Quantitative Economics

The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

Credit Hours: 3

Prerequisites: MATH 1500 or equivalent

ECONOM 7371: Introductory Econometrics

Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

Credit Hours: 3

Prerequisites: ECONOM 3251 or ECONOM 4351 and STAT 1320 and MATH 1320 or instructor's consent

ECONOM 7384: Structural Change in Economic History

Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory.

Credit Hours: 3

Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051H or instructor's consent

ECONOM 8001: Topics in Economics- General

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hours: 3

Prerequisites: instructor's consent

ECONOM 8085: Problems in Economics

Graduate students may select topics for study and investigation subject to approval by supervising faculty.

Credit Hour: 1-99

ECONOM 8090: Research in Economics

Thesis research for M.A. degree. Graded on a S/U basis only.

Credit Hour: 1-99

ECONOM 8340: Game Theory

Game theory is the study of strategic behavior by agents who perceive themselves as "large" relative to the market and who therefore consider the effect of their behavior on others. This course examines the rigorous theory of strategic interaction of rational agents. May be repeated for credit.

Credit Hours: 3

Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. . Graded on A-F basis only

ECONOM 8370: Mathematics for Economics

The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. May be repeated for credit.

Credit Hours: 3

Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8413: Research Workshop I

Required course for economics MA students. Combines instruction, student presentations, and seminar participation to introduce research methods and practice. A major research paper are required.

Credit Hours: 3

Prerequisites: ECONOM 8451, ECONOM 8453, and ECONOM 8472 or instructor's consent

ECONOM 8451: Microeconomic Theory

MA-level course in microeconomic theory. The course relies extensively on calculus to survey theories of: rational behavior in consumption,

production, and pricing decisions of households and firms; partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition; and general equilibrium and welfare.

Credit Hours: 3

ECONOM 8453: Macroeconomic Theory

Basic models in macroeconomics will be covered with emphasis on assumptions and on how hypotheses can be tested. Course is an introductory survey for students intending to develop ability for research in macroeconomics.

Credit Hours: 3

Prerequisites: ECONOM 4353 or equivalent; at least concurrent enrollment in ECONOM 8451. Instructor's consent required for non graduate level students

ECONOM 8470: Dynamic Optimization

Topics to be covered include calculus of variations, optimal control theory, dynamic programming in discrete time variables, and economic modeling. The Eulless Equation, the Transversally Condition and the Bellman Equation will also be covered.

Credit Hours: 3

Prerequisites: ECONOM 7370

ECONOM 8472: Econometric Methods I

Familiarizes students with fundamental techniques found and used in applied economic research. Topics include: ordinary least squares, generalized least square, instrumental variables, maximum likelihood estimation, and generalized methods of moments.

Credit Hours: 3

Prerequisites: STAT 7710 or instructor's consent

ECONOM 8473: Applied Econometrics

Continuation of ECONOM 8472 for MA students. Topics include: simultaneous equations, nonlinear least squares, qualitative choice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 8472 or instructor's consent

ECONOM 9001: Topics in Economics

Selected current topics in economics.

Credit Hours: 3

ECONOM 9085: Problems in Economics

Graduate students may select topics for study and investigation subject to approval by supervising faculty.

Credit Hour: 1-99

ECONOM 9090: Research in Economics

Thesis research for Ph.D. degree. Graded on a S/U basis only.

Credit Hour: 1-99

ECONOM 9411: Advanced Labor Economics I

Analysis of the determination of wages and employment and the relation of trade unionism to the economy.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9412: Advanced Labor Economics II

Applications of contemporary analytical techniques to labor market topics chosen by the instructor.

Credit Hours: 3

Prerequisites: ECONOM 9411 and ECONOM 9452 or instructor's consent

ECONOM 9413: Research Workshop II

Introduces doctoral students to practices of preparing scholarly economic research by moving through the process of selecting a topic, identifying relevant literature, and communicating results. Graded on A-F basis only.

Credit Hour: 1-2

Prerequisites: ECONOM 9452, ECONOM 9454 and ECONOM 9474; PhD standing

ECONOM 9415: Advanced Public Economics I

Tax incidence and optimal taxation in static economies and issues of taxation in dynamic economies.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9416: Advanced Public Economics II

Macroeconomic issues of government finance. Theoretical and empirical analysis of Ricardian equivalence.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9426: International Trade

Pure theory of international trade and commercial policy.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9427: Topics in International Trade

The course will cover recent research in International Trade and important issues related to the impact of trade on economic growth and development. Topics include the relationship between trade and growth, the impact of international trade on firms, households and economic growth. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9430: Advanced Money and Banking

The working and structure of institutional arrangements, welfare aspects of structural policies, operation of money and credit markets, and behavior of returns on assets.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9431: Central Banking Policies

Examines central banking procedures, policies and the role they play in maintaining economic stability. Special attention to connection of Federal Reserve System with money and capital markets.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9446: Advanced Empirical Methods

Empirical and modeling techniques for evaluation of microeconomic policy questions.

Credit Hours: 3

Prerequisites: ECONOM 8451, ECONOM 8472

Recommended: Concurrent enrollment in ECONOM 8473 or ECONOM 9473

ECONOM 9447: Topics in Microeconomic Policy Analysis

Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the economics of education, health economics, and other applied areas of microeconomics.

Credit Hours: 3

Prerequisites: ECONOM 8451, ECONOM 8472, ECONOM 9446

Recommended: Concurrent enrollment in ECONOM 8473 or ECONOM 9473

ECONOM 9451: Advanced Microeconomic Theory I

The theory of rational behavior and partial equilibrium in markets. Topics include consumer behavior, theory of the firm, decisions making under uncertainty, perfect competition, monopoly and monopsony, and imperfect competition. Graded on A/F basis only.

Credit Hours: 3

Prerequisites: ECONOM 9451 or instructor's consent; PhD standing

ECONOM 9452: Advanced Microeconomic Theory II

Survey of equilibrium theory and market failures in economics. Topics include the structure and modeling of games, and cooperative and non-cooperative equilibrium concepts.

Credit Hours: 3

Prerequisites: Economics [ECONOM] 9451 or instructor's consent

ECONOM 9453: Advanced Macroeconomic Theory I

Aggregate models of life-cycle microfoundations, of macroeconomics fluctuations and growth. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: departmental consent; PhD standing

ECONOM 9454: Advanced Macroeconomic Theory II

Analyzes topics in income analysis, including capital theory and economic dynamics.

Credit Hours: 3

Prerequisites: ECONOM 9453 or instructor's consent

ECONOM 9455: Monopoly and Competition

A survey of the theoretical and empirical literature on the organization of industries. Includes study of monopolized markets, competitive markets, and strategic interaction among firms in imperfectly competitive markets. Both the rationale and practice of anti-trust policy are studied.

Credit Hours: 3

Prerequisites: ECONOM 9452 and ECONOM 9471 or instructor's consent

ECONOM 9460: Development Economics

Theories of economic development critically examined. Sources and consequences of growth processes analyzed in context of economic theory and historical occurrence.

Credit Hours: 3

Prerequisites: ECONOM 8451 and ECONOM 8472

ECONOM 9471: Advanced Game Theory

Presents core concepts in game theory and illustrates their uses with a range of applications.

Credit Hours: 3

Prerequisites: ECONOM 9452 or instructor's consent

ECONOM 9473: Econometric Methods II

Introduces students to econometric concepts and techniques at a theoretical level, and provides a bridge to understanding the econometric literature. Topics include: probability theory, convergence, simultaneous equations, nonlinear models, and nonparametric estimation.

Credit Hours: 3

Prerequisites: departmental consent required

ECONOM 9474: Econometric Methods III

This course is designed to familiarize students with useful econometric tools not covered in Econometric Methods I and II. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECONOM 9473 or instructor's consent; PhD standing

ECONOM 9476: Advanced Topics in Econometrics I

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor.

Credit Hours: 3

Prerequisites: ECONOM 9474 or instructor's consent

ECONOM 9477: Advanced Topics in Econometrics II

Equips students with some essential tools for conducting publishable econometric research topics at the discretion of the instructor.

Credit Hours: 3

Prerequisites: ECONOM 9476 or instructor's consent

ECONOM 9480: Independent Readings for Ph.D. Comprehensive Examinations

Independent Readings for Ph.D. Comprehensive Exam. Graded on S/U basis only.

Credit Hour: 1-6

ECONOM 9484: Economic History

Techniques of the new economic history are explored in the context of European economic development.

Credit Hours: 3

Prerequisites: ECONOM 8451

Education Honors (EDUC_H)

EDUC_H 3050H: Special Readings in Education Honors

Directed study of literature and research reports in education.

Credit Hour: 1-4

Prerequisites: instructor's consent and Honors program director. Honors eligibility required

EDUC_H 3060H: Honors Seminar in Education Honors

Credit Hour: 1-2

Prerequisites: instructor's consent and Honors program director. Honors eligibility required

EDUC_H 3070H: Special Practicum in Education Honors

Directed practicum experience with students in educational settings.

Credit Hour: 1-4

Prerequisites: instructor's consent and Honors program director. Honors eligibility required

EDUC_H 3080H: Honors Research in Education Honors

Joint research in education with a member of the education faculty.

Credit Hour: 1-4

Prerequisites: instructor's consent and Honors program director. Honors eligibility required

EDUC_H 4996H: Undergraduate Reading Honors

This course is designed to introduce students to a variety of readings from a broad array of research, historical, contemporary and philosophical documents and writings. Selection of topics and additional readings are determined by the faculty instructor for the course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent; GPA of 3.5 or higher. Honors eligibility required

EDUC_H 4997H: Honors Undergraduate Seminar I

This class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The culminating assignment for the class is a proposal for a research poster or presentation to be presented at the undergraduate research fair held each year in May. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: instructor's consent; GPA of 3.5 or higher. Honors eligibility required

EDUC_H 4998H: Honors Undergraduate Seminar II

The class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The culminating assignment for the class is the production of a research poster or presentation at the undergraduate research fair held each year in May. Graded on A-F basis only.

Credit Hour: 1

Prerequisites: instructor's consent; GPA of 3.5 or higher. Honors eligibility required

EDUC_H 4999H: Honors Undergraduate Research Seminar

This class will be offered over 2 academic semesters and will consist of a 1-2 credit hour lab each semester with a College of Education faculty member working on an undergraduate research project. This course is designed as part of the Honors sequence. Graded on A-F only. Corequisites: EDUC_H 4997H and EDUC_H 4998H

Credit Hour: 1-2

Prerequisites: instructor's consent; GPA of 3.5 or higher. Honors eligibility required

Educational Leadership and Policy Analysis (ED_LPA)

ED_LPA 3100: Foundations of Education

Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development.

Credit Hour: 1-3

ED_LPA 4060: Inquiring into Schools, Community and Society II

Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts.

Credit Hours: 3

Prerequisites: LTC 2040 and LTC 4040

ED_LPA 7060: Inquiring into Schools, Community and Society II

Required 3 hours course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: LTC 2040 and LTC 7040

Credit Hours: 3

ED_LPA 7085: Problems in Educational Leadership and Policy Analysis

Problems in Educational Leadership and Policy Analysis

Credit Hour: 1-99

ED_LPA 7301: Topics in Educational Leadership and Policy Analysis

Group study of topics in educational leadership, policy analysis, and higher and continuing education.

Credit Hour: 1-99

ED_LPA 7458: Sociology of Education

(same as SOCIOL 4410 and SOCIOL 7410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent

ED_LPA 7822: College Teaching with Technology I

Examines the use of educational technologies, both class room based (e.g., student response systems) and online (e.g., course management's systems), to assist in the dissemination of course resources and the facilitation of student interaction.

Credit Hour: 1

ED_LPA 7823: College Teaching with Technology II

Integrates learning technologies into the traditional framework of a face-to-face course by creating a course website and developing technical proficiency with relevant educational technologies.

Credit Hour: 1

Prerequisites: College Teaching I or instructor's consent

ED_LPA 8409: Learning, Curriculum and Assessment for School Leaders

Addresses assessment, learning and curriculum and the integration of the instructional and assessment processes. Topics include authentic assessment, curriculum alignment, cognition and learning, instructional approaches, and application of student learning theory to the curriculum.

Credit Hours: 3

ED_LPA 8410: Learning Cultures

Integrates the themes of building a common purpose to enhance school culture, empowering teachers and students, and diversity. Topics include importance of shared mission and vision, the use of group processes and collaboration, the intricacies of school culture, and ethical and moral leadership.

Credit Hours: 3

ED_LPA 8411: Professional Development for Learning

Focuses on the professional development and reflection on practice. Topics include organizational actions and personal responsibility, life-long learning, and public education in a democratic society.

Credit Hours: 3

ED_LPA 8412: School Improvement

This course addresses the topics of organizational management and personal inquiry. It covers issues such as organizational effectiveness, organizing for an effective school environment, legal and fiscal decision-

making and responsibilities of school leaders, creating an environment where stakeholders acquire and utilized data to inform decisions and practice, and where action research methods are utilized to evaluate and inform practice.

Credit Hours: 3

ED_LPA 8413: Internship

The internship experience provides the opportunity for the student to assume a leadership role associated with instructional improvement. Graded on S/U basis only.

Credit Hour: 1-11

ED_LPA 8414: Current Issues in Site-Level Leadership

This course is designed to introduce students to the rigors of the principalship. Topics will include issues affecting beginning principals, school cultures, and the use of technology for communication and research.

Credit Hours: 3

ED_LPA 8415: Leadership for Collaborative Cultures

This course will instill an understanding of major components of purposeful, systemic change, interpersonal relationships, communication and organizational management. The development of an appreciation of diversity, equity, and democracy for all students will be an ongoing theme of the course.

Credit Hours: 3

ED_LPA 8416: Foundations of School Leadership

School leader knowledge of student learning theory and related instructional practices is the focus of this course. The problem-based learning format will include topics on school culture, leadership communication, technology, and conflict resolution. Issues concerning professional relationships are also addressed.

Credit Hours: 3

ED_LPA 8417: Site-Level Organization and Leadership

Student will study state and national regulations that affect Missouri school policies. The student will develop a database on various legal issues. A study of middle level education will conclude with on-site evaluation of a local middle school.

Credit Hours: 3

ED_LPA 8418: Supervision for Learning Environments

Students are prepared to articulate, recognize, and support classroom practices that reflect the most current principles of learning. Effective instructional strategies that link this knowledge to practice will be entered into a computer database.

Credit Hours: 3

ED_LPA 8419: Structures and Processes for Effective Schools

Emphasis is placed on the Missouri Comprehensive Guidance Program and positive strategies for working with challenging students. A continuation of the study of state and national legal and policy issues will focus on special programs and services.

Credit Hours: 3

ED_LPA 8420: Curriculum for Site-Level Leadership

Student and program assessment are the primary topics for this course on curricular leadership. Class participants are engaged in the development of authentic experiences using technology to develop and apply the testing and assessment knowledge appropriate to school leaders.

Credit Hours: 3

ED_LPA 8421: Action Research in School Leadership

Databases on legal and policy issues are completed and merged into a single database and placed on the specialist program web site. Site and classroom level action research is investigated, concluding with an assessment of local action research efforts in area schools.

Credit Hours: 3

ED_LPA 8422: Advanced Problems of Leadership Practice

This pre-internship course is a study of team building, program assessment, and site-based management. Addressing problems through a comprehensive school improvement approach with practicing principal will serve to prepare the students for internship experiences.

Credit Hours: 3

ED_LPA 8423: Advanced Leadership for Learning Environments

Students will demonstrate their understanding of instructional improvement for all teachers and students by designing and defending a comprehensive strategy for instructional changes in a simulated school. The ongoing study of learning principles and effective instructional practices will be concluded.

Credit Hours: 3

ED_LPA 8424: Education Politics and Policymaking

This course examines the politics and policymaking process of education in the United States, paying particular attention to the influence of various institutions and actors at local, state, and federal levels. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 8428: Curriculum Leadership

A study of research, theory, and skills necessary for curriculum leadership in educational organizations. Course includes generic curriculum management processes, design trends, controversial issues multi-media, innovative instructional techniques, and program evaluation.

Credit Hours: 3

ED_LPA 8430: School Law and Finance for Principal Leadership

Designed to engage learners in examination of the legal (judicial and legislative) system, school law, and finance policies that govern public schools and their fiscal resources in the United States and the State of Missouri. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9090: Research in Educational Leadership and Policy Analysis

Graded on a S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

ED_LPA 9095: Problems in Educational Leadership and Policy Analysis

Credit Hour: 1-99

Prerequisites: instructor's consent

ED_LPA 9400: Social Theory in Education

Students will examine the relationship of society and education through a variety of theoretical perspectives and empirical studies. These theories deal with the relation of education to society as a whole, and the relation between education and the state. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9401: Educational Leadership

Critical examination of key leadership theories and their application to various educational contexts. Includes consideration of research methods and designs appropriate for the study of leadership and the spectrum of lenses through which educational leadership is studied.

Credit Hours: 3

ED_LPA 9402: Educational Policy Analysis

Course centers on developing multiple understandings of the education policy making process. Theoretical constructs used to advance those understandings are eclectic in nature, drawing from the fields of political science, history, sociology and economics.

Credit Hours: 3

ED_LPA 9403: Organizational Analysis

Analysis of organizational characteristics and principles in educational organizations. Topics include: Organizational theories and models, organizational culture, communication, innovation, planning, leadership, power and influence, and external environment influences.

Credit Hours: 3

ED_LPA 9404: Inquiry into Educational Leadership and Policy Analysis

A critical overview of theory development, research paradigms, and research ethics in the department of Educational Leadership and Policy Analysis. Required for all ELPA Ph.D. students.

Credit Hours: 3

Recommended: for students who have completed at least 2 semesters of coursework

ED_LPA 9405: Seminar in Educational Leadership and Policy Analysis

Seminar in Educational Leadership and Policy Analysis

Credit Hour: 1-99

ED_LPA 9406: Seminar in Educational Administration

Seminar in Educational Administration

Credit Hour: 1-99

ED_LPA 9407: Seminar in Educational Policy

Seminar in Educational Policy

Credit Hour: 1-99

ED_LPA 9408: Seminar in Higher Education

Seminar in Higher Education

Credit Hour: 1-99

ED_LPA 9424: Superintendent: Instructional Leadership

Effective superintendents understand educational core knowledge of curriculum, instructional and assessment. They establish an exception for the use of best instructional practices for all students among both the educational and public communities. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9427: School Budget Development and Fiscal Management

This course includes an overview of school finance programs of the 50 states, including special funds for exceptional children and compensatory education. Various aspects of planning, accounting, auditing, and reporting related to budget development and fiscal management are covered.

Credit Hours: 3

ED_LPA 9429: Superintendent: Communication, Team Leadership

Effective superintendents negotiate political and cultural challenges to lead diverse, socially-just school systems. Reflective practices that enhance competence in public board member, and district personnel relationships are essential skills. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9430: Superintendent: Fiscal, Legal Leadership

Effective superintendents efficiently manage finances and ensure that rules, regulations, and policies adhere to statutory/case law. Fiscal and legal practices ensure equity of educational experiences for all students. Open to all graduate students. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9437: Topics in Educational Leadership and Policy Analysis

Topics in Educational Leadership and Policy Analysis

Credit Hour: 1-99

ED_LPA 9439: Applying Higher Education Research to Practice

This course introduces quantitative, qualitative, and mixed within a student affairs context. Students will become familiar with, and able to critique research. Course graded on A-F basis only.

Credit Hours: 3

ED_LPA 9440: Race, Gender, and Ethnicity in Higher Education

(same as WGST 9440). Historical and current issues of race, gender, and ethnicity in colleges and universities in the U.S. Issues include: students, faculty, and staff experiences of diversity, access and equity, and salience of diversity in a higher education setting.

Credit Hours: 3

ED_LPA 9441: The Adult Learner

The identification of learning, motivation and participation patterns among adults will be examined. Learning theories and adult development life-cycle and stage research data will be explored as well as their implications for practice.

Credit Hours: 3

ED_LPA 9442: Curriculum Philosophy and Development in Higher Education

A study of the philosophical foundations of postsecondary curricula, current trends and issues, and approaches to curriculum reforms and revisions.

Credit Hours: 3

ED_LPA 9444: Program Planning in Higher Education

Analysis of program planning and evaluation in higher education. Topics include: conceptualizations of program planning, situational analysis, needs assessment, priority setting, marketing and promotion, and program evaluation.

Credit Hours: 3

ED_LPA 9445: College Student Development

(same as ESC_PS 9445). Emphasis on college student development theory and its application in student affairs work.

Credit Hours: 3

ED_LPA 9446: Student Affairs Administration

(same as ESC_PS 9446). History, philosophy, theory, and issues pertinent to student affairs work.

Credit Hours: 3

ED_LPA 9447: College Student Culture and Environment

This course examines the characteristics and outcomes of American undergraduates, and the aspects of the college environment the differentially influence students. Topics include: theoretical models of students change, campus climate and cultures, learning communities, institutional differences, and conditions for success.

Credit Hours: 3

ED_LPA 9448: College Teaching

Designed to introduce students to theories and practices central to teaching in a higher education setting. Teaching related to institutional contexts and disciplines will be considered. Teaching and learning theories will be introduced.

Credit Hours: 3

ED_LPA 9449: History of Higher Education in the United States

A study of the transformation of the English college tradition to what higher education is currently in the United States. The emphasis is on how institutions of higher learning changed to meet the needs of the nation or failed to do so.

Credit Hours: 3

ED_LPA 9450: Administration and Governance of Higher Education

Principles of administration, academic culture and environment, and structures of governance of higher education will be explored.

Credit Hours: 3

ED_LPA 9451: Higher Education Finance

How students pay for college and how institutions finance their operations is explored through the lens of economics. Topics include: Theories of student access, tuition and financial aid policy, institutional costs and revenue patterns, and resource allocation models.

Credit Hours: 3

ED_LPA 9452: Overview of Higher Education

This course provides an overview of American Higher education. Emphasis is placed on how these institutions currently operate and what issues dominate current discussions of academe.

Credit Hours: 3

ED_LPA 9453: Continuing Education for the Professions

Comparative study of education for the professions. Examination of professions as occupations, approaches and goals of preparatory and continuing education, professionals as adult learners and influence of intra-profession issues and societal exchange on education.

Credit Hours: 3

ED_LPA 9454: Introduction to Post-Secondary Law

Examination of the legal structure within which higher education operates. Includes consideration of legal analysis of case law, institutional responsibilities under the law, and analysis of legal issues within postsecondary education.

Credit Hours: 3

ED_LPA 9455: The Community College

An overview of the community college. Topics include historical roots and development of the community college, organization and governance, finance, students, faculty, administrators, curriculum, social role, and recurring and emerging issues.

Credit Hours: 3

ED_LPA 9456: The Professoriate

Overview of faculty roles and work in U.S. colleges and universities. Explores institutional and disciplinary differences and seeks to prepare future faculty for academic life.

Credit Hours: 3

ED_LPA 9457: Higher Education Policy

An overview of current higher education policy issues facing governmental bodies and institutions. An emphasis is placed on investigating both the policy-making and policy-evaluation processes through multiple theoretical lenses. Specific topics explored include access, equity, and accountability within the higher education setting.

Credit Hours: 3

ED_LPA 9459: Comparative and International Education

Theories, methods and issues in the field of comparative and international education. Topics cover PK-16 education and include globalization, centralization and decentralization, equity and equity, teaching and student learning, and social context of education.

Credit Hours: 3

ED_LPA 9460: Philosophic Theory in Education

Examines major ideological movements in modern education; their social antecedents and philosophic underpinnings.

Credit Hours: 3

ED_LPA 9461: Ethics in Education

Explores the ethical dimensions of work within and related to educational settings focusing on dilemmas that occur in professional practice, theories that inform thinking about ethical issues, and frameworks that guide ethical decision making.

Credit Hours: 3

ED_LPA 9462: History of U.S. Education Policy

Provides overview of major US education issues (primary K-12), explores analytic tools for studying history of education and introduces multiple ways of constructing the history of a particular movement reform or era in education.

Credit Hours: 3

ED_LPA 9463: Politics of Education

Focuses on politics of education in the United States, attending to the influence of various institutions and actors at local, state, and federal levels. Students will examine current reforms in PK-12 education and their impact on the future of education.

Credit Hours: 3

ED_LPA 9464: Theory and Practice in Multicultural Education

Designed to give educational professionals a better understanding of the theoretical foundations of multicultural education as well as current practices in this field.

Credit Hours: 3

ED_LPA 9465: Policy Analysis Using Large Data Bases

Intends to develop students' capacity to process national level large databases and to conduct policy-related research.

Credit Hours: 3

Prerequisites: an understanding of inferential statistics and experience with SPSS and SAS program

ED_LPA 9469: Education Leadership Inquiry IV

Developing and writing research proposals and conducting pilot studies. Knowledge and skills in writing the research report and sharing research with others.

Credit Hour: 1

Prerequisites: ED_LPA 9471, ED_LPA 9472 and ED_LPA 9473. Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9470: Organizational Analysis for Educational Leadership

Schools of organizational theory, six frames to analyze organizations and their underlying concepts, organizational change and leadership for change, and rationale for reframing organizations.

Credit Hours: 4

Prerequisites: Open only to students in Ed.D. program in Educational Leadership

ED_LPA 9471: Educational Leadership Inquiry I

Introductory seminar on evaluating research using, APA Publication guidelines, writing scholarly publications, and using computer technology for literature searches.

Credit Hours: 2

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9472: Educational Leadership Inquiry II

MU Graduate School policies related to doctoral research, use of multiple search sources, human subjects review process, and research ethics.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. program in Educational Leadership

ED_LPA 9473: Educational Leadership Inquiry III

Knowledge and skills in applying planning procedures for development and implementation of future dissertation research.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9474: Professional Seminar I

Focuses on diversity and ethics in educational leadership and educational organizations. Students learn about professional development, professional practice, and professional service. May be repeated for credit.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9475: Professional Seminar II

Problem-based learning via the Internet to make decisions involving professional practice and problem solving. The UCEA Internet program, Information Environment for School Leader Preparation, is used. May be repeated for credit.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9476: Leadership Theory and Practice

An advanced study of leadership theories, concepts, and inquiry as applied to educational organizations. Explores power and authority in organizations, leader effectiveness, and organizational reform.

Credit Hours: 3

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9477: Leadership Theory and Practice Application

Focuses on building understanding of the conduct of leadership in organizations through application and extension of leadership theories in practice.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9478: Policy Analysis for Educational Leadership

Analysis and investigation of educational policy utilizing various knowledge bases; organizational politics and culture's impact on policy processes; interpretation and application of policy-making activities.

Credit Hours: 4

Prerequisites: Open only to students in Ed.D. Program in Ed. Leadership

ED_LPA 9479: Content and Context of Learning

Students develop the knowledge and skills for examining designing, and implementing organizational, classroom, and training conditions that support quality learning experiences for learners.

Credit Hours: 3

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9480: Team Building and Group Dynamics

Stages of group development, team building and maintenance, team/group structures, team performance, problem-based learning as team process, and empowerment through development of self-managed teams.

Credit Hour: 1

Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9481: Internship in Educational Leadership and Policy Analysis

Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-99

Prerequisites: departmental consent

ED_LPA 9482: Quantitative Tools for Applied Research in Educational Leadership

General introduction to quantitative methods of data analysis. Develop concepts of measurement, design, and analysis. The focus is on data driven decision making and using various quantitative methods to investigate problems of educational leadership practice. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Only students in the Statewide Cooperative Ed.D. program in Educational Leadership can enroll

ED_LPA 9483: Qualitative Tools for Applied Research in Educational Leadership

Students will learn about a number of qualitative research designs that leaders can use to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to students in the Statewide Cooperative Ed.D. Program in Educational Leadership

ED_LPA 9484: Program Evaluation and Planning for Educational Leaders

Participants develop thorough knowledge of theoretical underpinnings of selected approaches to program planning and evaluation and their necessary integration. Affords participants the opportunity to plan, conduct and deliver the results of a program evaluation to actual client. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Only students in the Statewide Cooperative Ed.D. Program in Educational Leadership can enroll

Educational, School and Counseling Psychology (ESC_PS)

ESC_PS 1901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 2000: Experiencing Cultural Diversity in the United States

The purpose of this course is to examine cultural diversity in U.S. Society, to increase self-awareness related to worldviews and beliefs about diversity issues, and to increase understanding of the intersections of multiple group identities. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 2010: Inquiry Into Learning I

This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase II of the certification program.

Credit Hours: 3

ESC_PS 2014H: Inquiry into Learning I - Field Experience

This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: departmental consent

ESC_PS 2014H: Inquiry into Learning I - Field Experience - Honors

This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only. Honors eligibility required

Credit Hour: 1

Prerequisites: departmental consent

ESC_PS 2100: Career Explorations

Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center. Some sections may be graded on either A-F basis or S/U basis only.

Credit Hour: 1-3

ESC_PS 2350: Transforming Stress: Heart Rate Variability

Biofeedback

This course will offer an in-depth opportunity to learn the philosophy and management of stress through a computer -based biofeedback system. Students will develop a personal practice, track their progress and learn skills in using this technology for a range of concerns.

Credit Hour: 1

ESC_PS 2400: Learning and Instruction

The nature of human learning processes with implications for instruction. Emphasis on bases of and readiness for learning, types of learning, memory forgetting and transfer, and related topics.

Credit Hours: 2

Prerequisites: PSYCH 1000

ESC_PS 2500: Child Development

The psychological, intellectual, social, and physical development of children.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 2700: Psychological Perspectives in Sport

Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.

Credit Hours: 3

ESC_PS 2901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 3085: Problems in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 3100: African-American Psychology

(same as BL_STU 3100 and PSYCH 3880). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 3200: Black Feminism

This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women's lives and Black women's collective actions against social structures will occur.

Credit Hours: 3

Prerequisites: PSYCH 1000 or instructor's consent

ESC_PS 3901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 4087: Seminar in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 4115: Human Learning

An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning.

Credit Hours: 3

Prerequisites: ESC_PS 4100

ESC_PS 4120: Foundations of Counseling Psychology

Survey of contemporary theories underlying individual feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.

Credit Hours: 3

Prerequisites: departmental consent

ESC_PS 4160: Developmental Aspects of Human Learning

Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play, aggression, culture, and media.

Credit Hours: 3

ESC_PS 4170: Introduction to Applied Statistics

Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Math Reasoning Proficiency Course.

Credit Hours: 3

Prerequisites: College Algebra or equivalent

ESC_PS 4185: Health Behavior: Drug and Sexuality Education

Psychological, social, and physical factors related to drug taking and sexuality behaviors.

Credit Hours: 3

Prerequisites: LTC 1310 or equivalent or instructor's consent

ESC_PS 4200: Positive Psychology

Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Some sections graded on either A-F or S/U basis only.

Credit Hours: 3

ESC_PS 4460: Exploring Mental Health Issues in Schools

This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools.

Credit Hours: 3

ESC_PS 4901: Topics in Educational School, and Counseling Psychology - General

Topics place holder for lower division courses.

Credit Hour: 1-3

ESC_PS 4960: Readings in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 7000: Foundation of Teacher Prep I

Designed for graduate students seeking teacher certification, this course addresses content and application in comprehensive classroom management, development, behavior management, and diversity. Field work is required and integrated with course content.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 7087: Seminar in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 7100: Theories and Applications of Educational Psychology

An introduction into the ideas and purpose of Educational Psychology in human development, learning, assessment/measurement and education.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 7115: Human Learning

An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 7120: Foundations of Counseling Psychology

Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.

Credit Hours: 3

Prerequisites: departmental consent

ESC_PS 7130: Parent Counseling and Consultation

For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed.

Credit Hours: 3

Prerequisites: ESC_PS 4120 or ESC_PS 7120

ESC_PS 7150: Interviewing and Counseling

Study of beginning interviewing and counseling skills applied to helping relationships in human services professions. Emphasis placed on learning helping skills in small group format. Lab required.

Credit Hours: 3

Prerequisites: PSYCH 1000 or PSYCH 1010

ESC_PS 7160: Developmental Aspects of Human Learning

Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play aggression, culture, and media. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 7170: Introduction to Applied Statistics

Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: College Algebra or equivalent

ESC_PS 7180: Foundations of Rehabilitation

The vocational and independent living rehabilitation system for disabled persons. Concept of disability, its social psychological implications, and techniques of preparing disabled persons for adult adjustment.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 7185: Health Behaviors: Drug and Sexuality Education

Psychological, social and physical factors related to drug taking and sexuality behaviors.

Credit Hours: 3

Prerequisites: LTC 1310 or equivalent or instructor's consent

ESC_PS 7190: Alcohol Abuse and Rehabilitation I

Covers historical perspective, definition and measurement of the problem, classifications and theories about the etiology of alcoholism.

Credit Hours: 3

Prerequisites: ESC_PS 4120 or ESC_PS 7120 or ESC_PS 4180 or ESC_PS 7180 or instructor's consent

ESC_PS 7195: Sport and Applied Coaching Psychology

Sport and Applied Coaching Psychology is a fusion of positive psychology and sport psychology. Positive psychology teaches coaches a healthy approach based in positive motivation and behavior modeling. Sport psychology helps coaches identify with the mental training of athletes and its role in delivering maximum performance. Course focus is on helping coaches maximize the potential of their athletes and teams, while also building upon their emotional and psychological wellbeing.

Credit Hours: 3

ESC_PS 7200: Positive Psychology

Positive psychology explores what is positive, creative, and fulfilling in human behavior. It is the scientific study of well-being and flourishing: what people do right. This course will examine cornerstones and key concepts such as emotions, engagement, relationships, strengths, virtues, meaning, and purpose. Proven as a very effective application in the realms of organizations, governments, businesses, education, counseling, etc., it is best originally understood by applying it to oneself.

Credit Hours: 3

ESC_PS 7220: Measurement of Cognitive Abilities

Analysis of the function of psychological testing and a critical examination of various achievement, aptitude, and intelligence assessment instruments.

Credit Hours: 3

ESC_PS 7460: Foundations of School Mental Health

Explores the history, foundations, and implementation of an expanded framework of school mental health focusing on collaborative and interdisciplinary approaches to supporting the wellness and school success of youth. Introduces professional working in or with schools to the school mental health framework emphasizing a behavioral health continuum of care, links between mental health and academic performance, a comprehensive system of learning supports, and data-based decision-making.

Credit Hours: 3

ESC_PS 8000: Advanced Child Development

Psychological development from birth to adolescence. Examines the influence of maturation and learning upon the acquisition of normal development tasks. Emphasizes the application of current research and theory with the school-age child.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 8010: Advanced Adolescent Development

Analysis of normal adolescent psychological development, including the cognitive, affective, academic, physiological, moral and social parameters. Applications with typical adolescent problems are emphasized.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or ESC_PS 7100

ESC_PS 8015: Child and Adolescent Development

A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral and social/cultural/racial domains. Examples of atypical development will be discussed. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or equivalent

ESC_PS 8020: Overview of Research Methods

Survey of research design and methods of data collection for masters, educational specialists, and doctoral students.

Credit Hours: 3

Prerequisites: ESC_PS 7170 or instructor's consent

ESC_PS 8030: Role and Function of the School Psychologist

Introduction to major helping relationship approached in School Psychology, applied to various professional settings. History, current issues, trends, professional organizations, legal/ethical standards, discussed.

Credit Hours: 3

Prerequisites: enrollment in Educational School, and Counseling Psychology Program

ESC_PS 8040: Counseling Methods and Practices

Introduction to counseling microskills and techniques, with attention to case conceptualization, therapeutic alliance, and counseling process. Laboratory experience in demonstrating skills and the ability to form an effective counseling relationship is required.

Credit Hours: 3

ESC_PS 8050: Marriage and Family Counseling

Appropriate for students who work with couples and families in a professional setting. Examines major family and marriage theories and research, counseling, skill development communication, and marital/family enrichment.

Credit Hours: 3

Prerequisites: ESC_PS 8040

ESC_PS 8060: Lifespan Development

A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral, social/cultural/racial, religious/spiritual and sexual domains. Examples of atypical development will be discussed.

Credit Hours: 3

Prerequisites: ESC_PS 4100 or equivalent. Consent of instructor required

ESC_PS 8070: Ethical and Legal Issues in Psychological Practice

Legal and ethical concepts and issues relevant to the practice of psychology and student personnel services.

Credit Hours: 3

Prerequisites: ESC_PS 4120 or ESC_PS 7120 or instructor's consent

ESC_PS 8082: Foundations of Educational and Psychological Measurement

Basic principles of educational and psychological measurement including test construction, validity, reliability, item analysis, and derived scores.

Credit Hours: 3

Prerequisites: ESC_PS 4170 or ESC_PS 7170 or instructor's consent

ESC_PS 8085: Problems in Educational, School, and Counseling Psychology

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 8087: Seminar in Educational, School, and Counseling Psychology

Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 8090: Master's Thesis in Educational, School, and Counseling Psychology

Independent research leading to Master's Thesis. Graded on S/U basis only. Prerequisites: advisor's consent

Credit Hour: 3-6

ESC_PS 8095: Research in Educational, School, and Counseling Psychology

Supervised research that is independent of master's thesis or doctoral dissertation. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: advisor's consent

ESC_PS 8100: Psychological Assessment of Children and Adolescents: Cognitive Assessment

Basic principles in intelligence theory and intermediate measurement concepts. Practice in administering, scoring, and interpretation of data from individually administered intelligence tests with school aged children and adolescents. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

ESC_PS 8110: Methods in Group Counseling

Study of group counseling methods and techniques. Participation in a group is required.

Credit Hours: 3

Prerequisites: ESC_PS 8040, demonstrated knowledge of ethical principles and departmental consent

ESC_PS 8120: Psychological Assessment of Children and Adolescents: Psychoeducational Assessment

Practice in administering, scoring, and interpretation of data from academic achievement, nonverbal intelligence, memory, adaptive

behavior, and perceptual/motor assessments with school-age youth and adolescents.

Credit Hours: 3

Prerequisites: ESC_PS 8100 and instructor's consent

ESC_PS 8125: Professional Iss. in Sch. Psych. I:Hist., Trends & Ethical Pract.

For first-year doctoral students in school psychology. History, current issues, trends, professional organizations, legal-ethical standards of doctoral level school psychology are discussed. The scientist-practitioner model and scientific reasoning process as they apply to both science and practice are reviewed.

Credit Hours: 3

Prerequisites: Must be admitted to school psychology program

ESC_PS 8130: Psychological Assessment of Adults

Students develop and practice skills in writing psychological reports with special emphasis on assessing psychological social-vocational functioning.

Credit Hours: 3

Prerequisites: ESC_PS 8100

ESC_PS 8135: Foundations of Career Psychology

Theoretical orientations to counseling for career development; nature and structure of work, education, and leisure; work and family issues; career concerns of special populations; use of career information in counseling.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 8140: Psychological Assessment in Childrent and Adolescents: Behavior and Social Emotional Assessment

This course introduces behavior theory, behavioral and social-emotional assessment techniques (including observations, interviewing, rating scales, and projective techniques) and their link to relevant interventions, with a primary focus on school-age youth and adolescents.

Credit Hours: 3

ESC_PS 8145: Psychological Interventions with Children and Adolescents: Behavioral Intervention

This course will emphasize behavioral theory, assessment, and intervention, including functional behavior assessment, positive behavior supports, and the conceptualization from an individual, systems, and public health perspective. Graded on A-F basis only

Credit Hours: 3

ESC_PS 8160: Psychological Interventions with Children and Adolescents: Educational Instruction

This course investigates models of school instruction in both general and special education, and how instruction can be adapted for learners who exhibit a range of academic and psychological problems and disabling conditions.

Credit Hours: 3

Prerequisites: ESC_PS 8100, ESC_PS 8120 and instructor's consent

ESC_PS 8165: Psychological Interventions with Children and Adolescents: Evidence- Based Therapies

An introduction to evidence-based child and adolescent psychotherapies, including individual and group interventions. Various aspects will be considered including assessment, diagnosis, and treatment planning. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8170: Career Resources in Business and Industry

Personnel practices, occupational requirements, and career opportunities and resources in business and industry. Applications are emphasized through on-site visits and use of business-industry-labor personnel. Graded on S/U basis only.

Credit Hour: 2-4

Prerequisites: ESC_PS 8135 or instructor's consent

ESC_PS 8180: Theory and Practice in Career Psychology

Methods and programs for facilitating the career development of individuals over the life span. Organization and development of activities and programs for all ages emphasized.

Credit Hours: 3

Prerequisites: ESC_PS 8135

ESC_PS 8185: Health Promotion

An overview of the important concepts of health promotion. Emphasis on specific health-related problems and issues, health behavior change, and the design, development implementation, and evaluation of comprehensive health promotion programs.

Credit Hours: 3

Prerequisites: LTC 1310 or equivalent or instructor's consent

ESC_PS 8195: Applied Positive Coaching

Explores concepts of sport, coaching and positive psychology, particularly the interventions and applications designed to further develop a coach's philosophy, communication skills, understanding of motivation, leadership skills, and the coach's and athlete's well-being. Prerequisites: ESC_PS 7195

Credit Hours: 3

ESC_PS 8200: Applied Positive Psychology

This course will require students to implement positive psychology concepts from the introductory course into their personal, professional, and/or social lives. We will also study specific ways in which these concepts and theories are being applied throughout various realms of well-being. Among the topics in this course are therapeutic lifestyles, goal-setting and attainment, self-care, meaning making, transformational leadership, influence and sustainable happiness theory. Prerequisites: ESC_PS 7200

Credit Hours: 3

ESC_PS 8210: Projective Assessment of Adults

Assessment of personality functioning using projective and inferential testing procedures. Rudimentary skills in using the Rorschach method.

Credit Hours: 3

Prerequisites: ESC_PS 8000 or ESC_PS 8100

ESC_PS 8220: Vocational Assessment of Individuals with Disabilities

This course is an overview of the philosophy of vocational assessment of individuals with disabilities. The course also emphasizes to positive integration of vocational assessment into the rehabilitation counseling process. Assessment practice included.

Credit Hours: 3

Prerequisites: ESC_PS 7180 and ESC_PS 8082

ESC_PS 8232: Foundations of Sport Performance

Focuses on principles and methods to become an effective sport performance coach. Examines the development of athletes and education of basic sports nutrition, strength, and conditioning.

Credit Hours: 3

ESC_PS 8240: Sport in America

Sociological perspectives of sport in America. Attention given to the influence of society on sport as in institution, and the role of sport as an agent of social change.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or PSYCH 1000

ESC_PS 8250: School Psychology Practicum: Introduction to School Services

This course is an intro practicum that exposes students to the organization and functions of schools. Students work with psychologists and other school personnel on academic and behavioral interventions to learn how schools serve children and their families. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: instructor's consent

ESC_PS 8255: Legal Aspects of Sport and Coaching

Emphasis is to provide insight about how the law is applied in sport settings, the types of litigation involved, and the standard of care required. Fundamental terminology and concepts, and contemporary issues in sport law will be addressed.

Credit Hours: 3

ESC_PS 8260: School Psychology Practicum: School-Based

Level II School Psychology Practicum provides students with experience in school-based psychological service delivery. Students gain experience with psychoeducational assessment and diagnosis, intervention planning and delivery, consultation, and serving on multidisciplinary teams. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: instructor's consent

ESC_PS 8265: Administration of Athletic Programs

Examines methods, principles, and roles of athletic administrators. Also, examines the job responsibilities and competencies required of sport leaders in athletic administration.

Credit Hours: 3

ESC_PS 8270: Coaching and Coordinated School Health

Students will explore the Coordinated School Health Model in order to align effective coaching practice with opportunities to promote overall student physical, mental, and social health in the wider school community.

Credit Hours: 3

ESC_PS 8280: Gender Issues in Sport

Through a study of theory and applied practice, students will explore personal biases, understand intersecting identities and explore privilege and oppression at the individual, interpersonal, structural, and cultural level when considering gender awareness in sport.

Credit Hours: 3

ESC_PS 8290: Multicultural Issues in Sport

The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of athletic coaches working with diverse student populations. Activities and assignments are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings.

Credit Hours: 3

ESC_PS 8300: Positive Leadership in Sport

A Positive Leadership philosophy requires Positive Leadership delivery. Course is designed to prepare leaders to bridge content knowledge to practical application. Students will use core competencies learned throughout their program to develop their leadership approach.

Credit Hours: 3

ESC_PS 8310: Colloquium in Educational Psychology

A course that covers current topics in learning, development, and schooling. Topics include cognitive, affective, academic, physical, moral ethnic/cultural domains. May be repeated for credit.

Credit Hour: 1

Prerequisites: Instructor's consent required

ESC_PS 8320: Advanced Human Learning

A study of behavioral and cognitive theories of learning with an emphasis on those greatest utility for educators. Experimental evidence forming the theoretical base for educational practice is examined.

Credit Hours: 3

Recommended: ESC_PS 2400 or ESC_PS 7100

ESC_PS 8350: Cognition, Learning and Instruction

Examines the topics of memory and cognition as they apply to the process of learning and instruction.

Credit Hours: 3

Prerequisites: ESC_PS 8320 or instructor's consent

ESC_PS 8360: Advanced Counseling Theories and Interventions

Contemporary theories and interventions of counseling. Advanced study of efficacious techniques. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8340 or ESC_PS 8342

ESC_PS 8400: Analysis of Research in Career Psychology

Examination of career development theories, the research supporting the theories, and the practical application of these ideas in career counseling and career programs.

Credit Hours: 3

Prerequisites: ESC_PS 8135

ESC_PS 8410: School Guidance Programs

Provides knowledge and skills in the development and management of school guidance programs including program planning, structuring, implementing, and evaluating.

Credit Hours: 3

Prerequisites: ESC_PS 7120

ESC_PS 8415: Program Evaluation for School Counselors

Program Evaluation is a graduate seminar intended to provide students with the skills needed to evaluate comprehensive guidance and counseling programs. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 7120

ESC_PS 8430: Mental, Emotional, and Behavioral Disorders in Youth

The course will include an overview of normal development and an investigation into specific deviations in intensity, frequency, and/or duration of normal development which impact the individual in his or her home, school, and community.

Credit Hours: 3

ESC_PS 8440: School Mental Health: Policy, Law and Ethics

This course is designed to familiarize school-based professionals with policies, laws and ethics associated with children and youth and schools.

Credit Hours: 3

ESC_PS 8445: Building Resiliency and Optimism in Youth

Examines risk and resiliency processes during childhood and adolescence. Focuses on defining resiliency; sources of risks and protective factors within families, schools, and communities; prevention programs targeting early, middle childhood and adolescence. Promotion of one's own resiliency and well-being discussed. Special topics include strengths-based models of resiliency, resiliency and family difficulties, violence and maltreatment, poverty, dropout, and school/community-based prevention and intervention.

Credit Hours: 3

ESC_PS 8450: Diversity Issues in School Mental Health

The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of school personnel working with diverse student populations.

Credit Hours: 3

ESC_PS 8460: Communication and Collaboration with Children and Families

This course will provide education professionals with the knowledge and basic skills to address common mental health issues through positive and solution focused communication and collaboration.

Credit Hours: 3

ESC_PS 8470: Preventions and Interventions in School Mental Health

This course explores the role that educators and school mental health professionals play in promoting, prevention and early intervention practices for mental, emotional, and behavioral disorders in youth and considers the basic steps for designing, implementing and evaluating evidence based interventions.

Credit Hours: 3

ESC_PS 8490: Mental Health in Schools Capstone Paper

Course focuses on writing a capstone integration paper that is intended to be a culminating experience. Allows students to reflect on the content of their course work, evaluate the knowledge and skills acquired, and apply what they have learned into their professional practice.

Prerequisites: instructor's consent

Credit Hour: 1

ESC_PS 8500: Rehabilitation Counseling

A study of the history and current status of rehabilitation counseling, and the role, theory, and practice of counseling in rehabilitation settings with persons with disabilities.

Credit Hours: 3

ESC_PS 8510: Medical and Psychological Aspects of Disability

Presentation of medical aspects of major disabilities and their effects upon social, vocational, personal, and economic adjustment. Study of basic restoration and accommodating services.

Credit Hours: 3

ESC_PS 8515: Sport Psychology

Current topics of research in sport psychology are examined. Topics include: sport personality, attention, activation and anxiety intervention, motivation, sport aggression, audience effects, team cohesion, leadership, and health psychology.

Credit Hours: 3

Prerequisites: PSYCH 1000

ESC_PS 8520: Job Acquisition for Individuals with Disabilities

Techniques of job development, placement, job analyses of the individual's skill and abilities and the employer's needs, and how to build professional relationships with employers.

Credit Hours: 3

Prerequisites: ESC_PS 7180

ESC_PS 8530: Developmental Psychopathology and Exceptionality

An investigation into the presentation, diagnosis, and treatment of psychopathologies in individuals, emphasizing causal pathways, risks/resiliency, prevalence, incidence, and continuity/discontinuity of the disorders from research in the field of developmental psychopathology. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8540: Theory and Practice in Feminist Therapy

Theory, research, practice standards and current debates within feminist therapy. Includes both examination of topical areas in a seminar format and live observation of feminist therapy.

Credit Hours: 3

Prerequisites: ESC_PS 8940 or instructor's consent

ESC_PS 8580: Social and Cultural Identity Development

Graduate-level course designed to introduce students to: (a) the dominant social and cultural identity theories and paradigms; (b) how these theories have been operationalized and measured.

Credit Hours: 3

ESC_PS 8585: Gender Issues in Counseling and Education

Topics include conceptions of gender roles, measurement of gender-related constructs, gender role socialization process, high incidence gender-related problems, and psychoeducational and counseling interventions.

Credit Hours: 3

Prerequisites: instructor's consent

ESC_PS 8590: Multicultural Counseling Competencies: Theory and Research

This course will introduce students to the current status of multicultural counseling theories and research issues and help students to increase their knowledge of cultural differences in counseling and psychology. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8630: Qualitative Methods in Educational Research I

An introductory course intended to provide a broad understanding of the foundations, purposes, and principles of qualitative research in education, as well as an introduction to a variety of qualitative research designs, data collection methods, and analysis strategies.

Credit Hours: 3

Prerequisites: ESC_PS 7170

ESC_PS 8640: Interviewing, Diagnosis, and Assessment

Introduction to clinical, psychometric assessment, and diagnosis. Data-gathering methods include interviews and tests/inventories of intellectual functioning, abilities, personality, and interests. Students utilize psychological reports to inform assessment, diagnosis and treatment.

Credit Hours: 3

Prerequisites or Corequisites: ESC_PS 8082

ESC_PS 8655: Item Response Theory

Introduces modern scaling with Item Response Theory, and includes how it can be used to statistically specify information about latent variables and the stimuli (e.g., tests) used to represent them.

Credit Hours: 3

Prerequisites: ESC_PS 9640 and ESC_PS 9650

ESC_PS 8690: Educational Planning and Evaluation

This course addresses major issues and models used in educational program planning and evaluation, including the appropriate use of various evaluation models and different types of data.

Credit Hours: 3

Prerequisites: departmental inquiry course, ESC_PS 8610 and/or ESC_PS 8630

ESC_PS 8700: Life/Career Coaching and Development

Designed to teach life and career coaching strategies with roots in career psychology and positive psychology. It provides the tools and knowledge on how to coach people to achieve their personal and professional goals.

Credit Hours: 3

Prerequisites: ESC_PS 7200

ESC_PS 8710: Meaning and Work

Covers a broad look at meaning and vocation using theoretical and empirical frameworks. Also explores the influence of culture, environment, relationships and personal values on meaning development while providing a framework for working from a coaching/counseling standpoint to help others identify or develop meaningful vocations.

Credit Hours: 3

Prerequisites: ESC_PS 7200

ESC_PS 8720: Community and Stewardship

Examines the concepts of community and stewardship, explores the literal roots of the word (common-unity) and our ability to respond (responsibility) to and build our communities. Also explores the connections between altruism, personal well-being, and social stewardship.

Credit Hours: 3

Prerequisites: ESC_PS 7200

ESC_PS 8730: Positive Organizational Psychology

Surveys the impact of positive organizational psychology research throughout professional organizations. Students will learn empirically defined elements of positive work environments and learn the building blocks associated with this field including: Appreciative Inquiry, the Abundance Approach, Strengths-Based Organizations, Positive Work Environments, and Employee Engagement and Satisfaction.

Credit Hours: 3

Prerequisites: ESC_PS 7200

ESC_PS 8830: Quantitative Analysis in Educational Research I

This is the first course in the sequence of statistical analysis methods. Topics covered in this course include statistical inference, simple regression, multiple regression, regression assumptions, regression with

categorical predictors, model selection methods polynomial regression, and model validation.

Credit Hours: 3

ESC_PS 8840: Quantitative Analysis in Educational Research II

This is the second course in the sequence of statistical analysis methods. Topics extend those covered in Quantitative Analysis I and include hypothesis testing, ANOVA, ANCOVA, repeated measures design, random-effects ANOVA, introduction to logistic regression, polytomous and ordinal regression and linear mixed models (if time permits).

Credit Hours: 3

Prerequisites: ESC_PS 7170 and ESC_PS 8830

ESC_PS 8870: Public Health Psychology

Study of applications of psychology to behavior, environment, and policy to promote health and prevent disease. The course gives particular attention to behavioral epidemiology and risk/resiliency factors associated with negative outcomes of childhood and adolescents.

Credit Hours: 3

ESC_PS 8900: Topics in Education, School and Counseling Psychology

Topics placeholder for upper division courses.

Credit Hour: 1-3

ESC_PS 8940: Counseling Psychology Practicum

Supervised practice of counseling in an approved counseling setting. May be repeated. Graded on S/U basis only.

Credit Hour: 3-9

Prerequisites: ESC_PS 8040, ESC_PS 8135, and ESC_PS 8640 and consent of counseling area faculty

ESC_PS 8941: Practicum and Theory in Group Counseling I

Supervised practice of group facilitation in an approved setting. Formal study of contemporary theories and advanced techniques is integrated with the practice of group facilitation. Graded on S/U basis only.

Credit Hours: 4

Prerequisites: ESC_PS 8110 and instructor's consent

ESC_PS 8942: Practicum and Theory in Group Counseling II

A continuation of Educational School, and Counseling Psychology 8200. Graded on S/U basis only.

Credit Hours: 4

Prerequisites: ESC_PS 8200 and instructor's consent

ESC_PS 8943: Practicum in Multicultural Counseling Interventions

Supervised practice of applied multicultural counseling interventions in a wide variety of approved community and university settings. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: ESC_PS 8340 and either ESC_PS 8570 or ESC_PS 8590

ESC_PS 8944: School Psychology Practicum

Supervised practice of psychological assessment, intervention and remediation strategies. May be repeated. Graded on A-F basis only.

Credit Hour: 1-6

Prerequisites: departmental consent

ESC_PS 8945: Practicum in Marriage and Family Counseling

Supervised practice in marriage and family counseling conducted in appropriate laboratories and agencies. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: ESC_PS 8340, ESC_PS 8342, ESC_PS 8160 or ESC_PS 8050 and departmental consent

ESC_PS 8946: Rehabilitation Counseling Internship

Field-based counseling internship in a community setting serving individuals with disabilities. 600 hour supervised experience designed to combine theoretical and applied program training aspects. Graded on S/U basis only.

Credit Hour: 3-9

Prerequisites: ESC_PS 8340, ESC_PS 8520, and ESC_PS 8220

ESC_PS 8947: Practicum in Student Development Programs

Supervised practice in student personnel services in an approved agency. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8080

ESC_PS 8948: Field Placement in Counseling/Supervision

Students will conduct counseling and/or supervision in approved community agencies under the supervision of licensed practitioners. Graded on S/U basis only.

Credit Hour: 1-12

Prerequisites: completion of 9 credit hours of ESC_PS 8340, and consent of the Counseling Area Faculty

ESC_PS 8950: Prevention Science Practicum: School and Family Centered Interventions

Prevention Science Practicum is an advanced graduate level practicum intended to provide students with the theoretical and practice skills needed to provide effective prevention services to children and families across multiple contexts. An emphasis is placed on school and family centered supports that prevent emotional and behavior problems in children. Graded on S/U basis only.

Credit Hour: 3-6

Prerequisites: instructor's consent required

ESC_PS 8960: Interdisciplinary Child and Family Practicum

This class includes a focus on child/family services with a systems/interdisciplinary approach. Students provide services via a mentorship model (strong supervision initially moving toward autonomy). Services include evaluations, therapy, consultation, psychiatric cross-training, and others. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: ESC_PS 8040 and instructor's consent

ESC_PS 8980: Field Experience in Counseling

Graded on S/U basis only.

Credit Hour: 3-9

Prerequisites: instructor's consent

ESC_PS 8990: Career Development Theory for Women

Consideration of the relevance of theories of career development for women, and their application to the counseling of women. Supervised clinical experience in the application of theories to counseling high school age women.

Credit Hours: 3

ESC_PS 9000: Multicultural Issues in Counseling

This course covers the research and theories of counseling racial/ethnic minorities and gays, lesbians, and bisexuals in the U.S. Examination of personal values and education about the interrelationship between race, class, gender, and sexuality are accomplished via structured activities.

Credit Hours: 3

Recommended: ESC_PS 8340

ESC_PS 9010: Building Cross-Cultural Competencies: Taiwan Up Close

The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. The first part of the course occurs at MU in preparation for part two, a 10-day professional cultural immersion in Taiwan.

Credit Hours: 3

Prerequisites: ESC_PS 9000 preferred; instructor's consent

ESC_PS 9020: Psychology of Crossing Cultural Borders

The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. Students acquire knowledge of psychological processes associated with crossing cultural borders, and translate that knowledge into practical applications. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9040: Cross-Cultural Issues in Counseling: International Focus

This course focuses on developing students' awareness, knowledge, and skills in cross-national counseling and research in equipping the next generation of counseling psychologists' competencies related to the globalization trend of counseling psychology. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 9000

ESC_PS 9050: Biofeedback in Psychological Practice

Use of biofeedback in achieving voluntary self-regulation and control of stress related behaviors.

Credit Hours: 3

Prerequisites: ESC_PS 8340 or ESC_PS 8342 and instructor's consent

ESC_PS 9087: Advisor's Seminar

Credit Hour: 1

Prerequisites: departmental consent

ESC_PS 9090: Doctoral Dissertation Educational School & Counseling Psychology

Independent research leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-12

Prerequisites: departmental consent

ESC_PS 9091: Internship in Counseling Psychology

Supervised experience in counseling psychology on half- or full-time basis in approved internship station. May be repeated. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: departmental consent

ESC_PS 9092: Internship in School Psychology

Supervised practice in school psychology in an educational setting. May be repeated. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: departmental consent

ESC_PS 9093: Doctoral Internship in School Psychology

Supervised practice in doctoral-level school psychology in an institutional or applied setting. May be repeated. Graded on S/U basis only.

Credit Hour: 1-6

Prerequisites: departmental consent

ESC_PS 9125: Professional Iss. in Sch. Psych. II: Rsrch. Design & Application

For first-year doctoral students in school psychology. Includes study of research design and methodological issues in the field of school psychology.

Credit Hours: 3

Prerequisites: Must be admitted to school psychology doctoral program

ESC_PS 9126: Prevention Science Research Design and Analysis

Prevention Science Research is a graduate seminar intended to provide students with the theoretical and empirical foundations of prevention science. In particular, students will learn how to conceptualize problems from a prevention science perspective and design and evaluate preventive interventions using advanced methodologies. Opportunities for community based participatory research including research design and analysis, papers and briefs, grantwriting, and community collaborations regarding prevention programming particularly pertaining to children's mental health.

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 9250: School Psychology Practicum: Community-Based

This course is an advanced practicum for students providing school psychology services in non-school settings. Students develop higher-level skills in the areas of case coordination, diagnostic decision-making, intervention, and systems change. May be repeated for credit.

Credit Hour: 1-6

Prerequisites: instructor's consent

ESC_PS 9260: Policy Practicum in Professional Psychology

Policy Practicum is an advanced practicum focused on macro level skills for shaping policy and systems-level intervention. Students work within agencies that establish policy for special education, mental health, and other education/psychology-related issues. May be repeated for credit.

Credit Hour: 1-3

Prerequisites: instructor's consent

ESC_PS 9300: Psychoanalytic Counseling

A study of the contribution of classical and contemporary psychoanalysis to counseling theory, research and practice. Examination of theoretical and clinical material in a seminar format.

Credit Hours: 3

Prerequisites: ESC_PS 8340, ESC_PS 8342 and instructor's consent

ESC_PS 9400: Theories and Practices in Supervision

Instruction and practice in the supervision of psychological services conducted in appropriate laboratories and agencies. Sections titled Counseling Psychology are graded on S/U basis only. Sections titled School Psychology are on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8940 or ESC_PS 8944 and instructor's consent

ESC_PS 9445: College Student Development

(same as ED_LPA 9445). Emphasis on college student development theory and its application in student affairs work.

Credit Hours: 3

ESC_PS 9446: Student Affairs Administration

(same as ED_LPA 9446). History, philosophy, theory, and issues pertinent to student affairs work.

Credit Hours: 3

ESC_PS 9450: Motivation

Investigates human motivation applied to performance in schools, athletics, and personal life. Topics include goals, attributions, self-efficacy, interest, cultural differences, and rewards. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ESC_PS 8320 or equivalent

ESC_PS 9460: Health Behavior Change Research

(Same as NURSE 9460). Doctoral seminar focusing on theories, measurement, and methods for conducting health behavior change research. Prerequisites: NURSE 9120,

Credit Hours: 3

Prerequisites or Corequisites: NURSE 9410, or faculty consent

ESC_PS 9530: Scientific Fdns of Counseling Psych I: Prof Iss &

For first-year doctoral students in counseling psychology. This course focuses on the history of counseling psychology, in and scientific reasoning processes as they apply to both science and practice.

Credit Hours: 3

ESC_PS 9540: Scientific Foundations of Counseling Psych II: Rsrch, Dsgn & Appl

For first-year doctoral students in applied psychology. Includes study of research design and methodological issues in the field of counseling psychology.

Credit Hours: 3

Prerequisites: ESC_PS 9530

ESC_PS 9550: Scientific Writing in Counseling Psychology

This course focuses on the technical skills needed for developing a scientific research proposal in counseling psychology.

Credit Hours: 3

Prerequisites: ESC_PS 9530 and ESC_PS 9540 and instructor's consent

ESC_PS 9560: Psychological Consultation: Schools

The individual psychological consultation process between the mental health professional and school personnel. Techniques, models, research roles, and responsibilities are discussed. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9570: Psychological Consultation: Organizations

This course provides an introduction to the theory and practical skills required to effectively consult at the organizational level in a variety of settings and contexts. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9610: Applied Sport Psychology

Building upon the knowledge base of sport psychology, this course integrates and synthesizes student's understandings of the wide array of concepts and theories of the field into meaningful applications and strategies aimed at enhancing the sport experience of others. A case study approach will be employed.

Credit Hours: 3

Prerequisites: ESC_PS 8515

ESC_PS 9620: Qualitative Methods in Educational Research II

The focus of each section of this course would be in-depth study of a specific method (e.g., case study, ethnographic, grounded theory) and various approaches (e.g., critical theory, dialogical). Students will be expected to undertake a substantive pilot study and prepare a qualitative text.

Credit Hours: 3

Prerequisites: ESC_PS 8630

ESC_PS 9640: Introduction to Theory of Educational Measurement

Classical and modern test theory, including IRT, generalizability theory and test bias. Also covered are advanced strategies for investigating reliability and validity.

Credit Hours: 3

Prerequisites: ESC_PS 7170 and ESC_PS 8082

ESC_PS 9650: Application of Multivariate Analysis in Educational Research

The focus of this course will be on applications of multivariate analysis in educational research.

Credit Hours: 3

Prerequisites: ESC_PS 8830 and ESC_PS 8840 or equivalent and instructor's consent

ESC_PS 9710: Structural Equation Modeling

Simultaneous analysis of relationships among variables. Topics included are path analysis, confirmatory factor analysis, hybrid models, and special types of structural models involving longitudinal data, multiple groups and analysis of means. May be repeated for credit.

Credit Hours: 3

Prerequisites: ESC_PS 7170, ESC_PS 8830, ESC_PS 8840, ESC_PS 9650; consent required

ESC_PS 9720: Hierarchical Linear Modeling

Hierarchical Linear Modeling (HLM), including multilevel and longitudinal approaches, in applied research settings for the social, educational psychological, and health-related sciences. May be repeated for credit.

Credit Hours: 3

Prerequisites: ESC_PS 7170, ESC_PS 8830, ESC_PS 8840, ESC_PS 9650; consent required

ESC_PS 9900: Topics in Educational Leadership and Policy Analysis

Topics placeholder for upper division courses.

Credit Hour: 1-3

Electrical And Computer Engineering (ECE)

ECE 1000: Introduction to Electrical and Computer Engineering

Introduction to the basic principles of electrical and computer engineering through hands-on activity. Course includes fundamentals of programming using Matlab, applied to electrical and computer engineering problems.

Credit Hours: 2

ECE 1001: Experimental Course

For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

ECE 1210: Introduction to Logic Systems

Introduces basic tools, methods and procedures to design combinational and sequential digital circuits and systems. Topics include number systems, Boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design. Graded on A-F basis only.

Credit Hours: 3

ECE 2001: Experimental Course

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

Credit Hour: 1-99

ECE 2100: Circuit Theory I

DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power. Graded on A-F basis only.

Credit Hours: 4

Corequisites: MATH 2300

ECE 2110: Experimental Electrical Engineering I

Application of standard electronic test equipment to basic experimental tasks of measurement and characterization of electronic phenomena and devices.

Credit Hours: 3

Prerequisites: ENGINR 2100 concurrently

ECE 3110: Electrical and Computer Engineering Projects

Open-ended design projects which encourage innovative solutions to design and measurement problems. Students teams complete several projects from different areas. Both oral and written presentations emphasized. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: STAT 4710 and ECE 3210 and ECE 3410. Restricted to Electrical and Computer Engineering students only or instructor's consent

ECE 3210: Microprocessor Engineering

Introduction to microprocessor architectures and programming; memory, memory management and cache organizations, bus configurations and timing implications; parallel I/O and serial communication interfaces.

Credit Hours: 4

Prerequisites: ECE 1210 and CMP_SC 1040 or CMP_SC 1050

ECE 3220: Software Design in C and C++

Software/Hardware development for embedded systems, including memory, I/O and interrupts; an overview of C and C++, class structures in object oriented programming; software development with UML and testing and debugging strategies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 3210 and C++ or Java

ECE 3230: Algorithms and Software Design

Covers basic algorithms including: arithmetic operations, sorting, string processing, parsing, hashing, and tree and graph manipulations. The C language and UNIX operating system are used as vehicles for illustration

and practice in use of the algorithms and in the application of software design techniques.

Credit Hours: 3

Prerequisites: ECE 1210

ECE 3410: Electronic Circuits and Signals I

Electron Devices, modeling and applications to basic electronic circuits, including RC amplifiers and power supplies.

Credit Hours: 4

Corequisites: ECE 3810

ECE 3470: Introduction to Power Engineering

Real and reactive power in single and three-phase ac circuits; magnetic circuits and transformers; energy conversion, DC machines, induction and synchronous machines; power transmission and distribution. Graded on A-F basis only. Corequisites ECE 3810.

Credit Hours: 3

ECE 3510: Electromagnetic Fields

Elements of vector analysis, transmission line theory, electrostatics, magnetostatics, time varying fields and plane waves. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2760, MATH 4100

ECE 3610: Semiconductors and Devices

Crystal structure; quantum aspects of energy, radiation and matter; quantum mechanics and energy bands in solids; electronic and optical properties of semiconductors; p-n junctions and diodes; bipolar and field-effect transistors.

Credit Hours: 3

Prerequisites: ECE 3510

ECE 3810: Circuit Theory II

Impulse and step responses, RLC circuits, classical differential equations solutions, complex plane stability, frequency and Bode Analysis, Resonance, Laplace transforms, two-port networks, mutual inductance and transformers. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: ECE 2100

Corequisites: MATH 4100

ECE 3830: Signals and Linear Systems

Transform Analysis of Signals and Linear Systems. Laplace transforms, z-transforms, Fourier series and transforms.

Credit Hours: 3

Prerequisites: ECE 3810

ECE 4001: Topics in Electrical and Computer Engineering

Current and new technical developments in electrical engineering.

Credit Hour: 3-4

Prerequisites: senior standing

ECE 4020: Energy Systems and Resources

(same as NU_ENG 4315). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

Credit Hours: 3

Prerequisites: ENGINR 2300

ECE 4030: Introduction to Nuclear Reactor Engineering

(same as NU_ENG 4346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.

Credit Hours: 3

Prerequisites: ENGINR 1200, ENGINR 2300

ECE 4040: Introduction to Nuclear Physics

Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: senior standing or graduate standing in engineering or equivalent mathematical preparation

ECE 4085: Problems in Electrical and Computer Engineering

Analytical or experimental problems pertaining to electric circuits, machines, fields or electronics.

Credit Hour: 1-3

Prerequisites: 12 hours Electrical and Computer Engineering credit or instructor's consent

ECE 4150: Solid State Area Laboratory

Laboratory experiments involved with solid state theory and integrated circuit fabrication and testing.

Credit Hour: 1

Prerequisites: ECE 4650 and ECE 4670

ECE 4170: Control Systems Laboratory

Experiments in computer process control and industrial automation; automated process modeling; control algorithm design; control simulation; direct digital real-time control; transducers; computer interfacing; industrial control mechanisms; Programmable Logic Controllers.

Credit Hour: 1

Prerequisites: ECE 4310, ECE 3210, ECE 3110

ECE 4220: Real Time Embedded Computing

Embedded systems development with real time constraints including RTOS, task management and synchronization, real time scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 3220

ECE 4250: VHDL and Programmable Logic Devices

Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design

examples include arithmetic units, programmable controllers, and microprocessors.

Credit Hours: 4

Prerequisites: ECE 3210

ECE 4270: Computer Organization

Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

Credit Hours: 4

Prerequisites: ECE 3210

ECE 4280: Network Systems Architecture

(same as CMP_SC 4280; cross-leveled with ECE 7280). The course covers network systems interconnects and switch fabrics, network considerations: and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: ECE 3210, ECE 3220

ECE 4310: Feedback Control Systems

(same as BIOL_EN 4310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: MATH 4100

ECE 4330: Introduction to Mechatronics and Robotic Vision

Covers 1) mechatronic systems; 2) the mathematical tools used to model industrial and mobile robots; and 3) vision sensors, their underlying models and algorithms that allow us to control and interact with robots.

Credit Hours: 4

Prerequisites: ECE 3220 or ECE 4220 or a C/C++ languages

ECE 4340: Building Intelligent Robots

(same as CMP_SC 4730). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: junior standing and programming experience in one of the following programming languages: Basic, C, C++, or Java.

Credit Hours: 4

ECE 4350: Programmable Logic Controllers

Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.

Credit Hours: 4

Prerequisites: junior standing or above

ECE 4370: Automatic Control System Design

Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems.

Credit Hours: 3

Prerequisites: ECE 4310

ECE 4390: Computer Process Control

Role of digital computer in process control; digital controller design; computer interfacing; transducers; programmable logic controllers; process modeling; introduction to robotics.

Credit Hours: 3

Prerequisites: ECE 4310 and ECE 3210

ECE 4410: Power Electronics I

Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.

Credit Hours: 4

Prerequisites: ECE 3410

ECE 4430: Electronic Circuits and Signals II

Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.

Credit Hours: 3

Prerequisites: ECE 3830 and ECE 3410

ECE 4450: Amplifier Analysis and Design

Design of electronic networks with application to instrumentation, control and communications systems. Practical specifications and problems in design. Lectures and projects. Prerequisites: ECE 4430

Credit Hours: 3

ECE 4460: Energy and Machines

Theory and applications of electric machines. Performance analysis of AC Synchronous, Induction and DC machines with emphasis on modern efficiency improvements. Fundamentals of electronic speed controls.

Credit Hours: 3

Prerequisites: ECE 3510

ECE 4465: Energy and Machines Lab

Electrical safety, magnetic and poly-phase circuits, synchronous and induction machines laboratory.

Credit Hour: 1

Prerequisites or Corequisites: ECE 4460

ECE 4470: Sustainable Electrical Energy Resources

Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.

Credit Hours: 3

Prerequisites: ECE 3470 or ENGINR 2100

ECE 4480: Test and Evaluation of Electrochemical Devices

(cross-leveled with ECE 7480). This combined undergraduate/graduate introductory course will introduce the student to the testing and evaluation of electrochemical cells and batteries. Included with an introduction to battery technology is material emphasizing test safety and operational hazards. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: at least 3 college credit hours of chemistry; senior standing in Electrical Engineering or major with equivalent mathematical preparation

ECE 4510: Pulsed Power Engineering

Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety.

Credit Hours: 3

Prerequisites: ECE 3510

ECE 4530: Photonics

Introduction to the physical principles and optical materials used in diagnostics, optical communications, semiconductor and solid state lasers, optical fiber transmissions, optical detectors, optical signal processing.

Credit Hours: 3

Prerequisites: ECE 3510

ECE 4550: Introduction to Plasmas

(same as NU_ENG 4375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

Credit Hours: 3

Prerequisites: ECE 3510

ECE 4570: Lasers and Their Applications

(same as NU_ENG 4382). An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from the application of Maxwell's equations, to develop the optical theory for lasers. The course includes approximately 10 classroom hours of laboratory work with lasers.

Credit Hours: 3

Prerequisites: PHYSCS 2760 and MATH 4110

ECE 4580: Computational Neuroscience

(same as BIO_SC 4580 and BIOL_EN 4575). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: MATH 1500 or equivalent

ECE 4610: Physical Electronics

Introduction to physical principles of semiconductors and semiconductor devices; gas, solid state, and semiconductor lasers; electro-optics; plasma physics and gaseous electronics; materials interaction with electric and magnetic fields.

Credit Hours: 3

Prerequisites: ECE 3510

ECE 4620: Introduction to BioMEMS

Study of BioMEMS devices and applications. Topics cover BioMEMS including overview of microfabrication techniques, common bioMEMS material, microfluidic principles, microfluidic devices, drug delivery, biomedical microdevices for neural implants, patch-clamping and single cell based analysis systems, microelectroporation, DNA microarrays, Polymerase Chain Reaction and biopolymers, chemical and gas sensors and biosensors. Graded on A-F basis only.

Credit Hours: 3

ECE 4630: Introduction to Optical Electronics

Principles, devices and materials used to generate, modulate, and detect optical radiation. Review of important properties of light and semiconductors. Light-emitting diodes and lasers. Electro-optic modulation. Thermal and quantum detection. Emphasis on semiconductor-based devices and application to fiber-optical communications.

Credit Hours: 3

Prerequisites: ECE 3610

ECE 4640: MEMS Laboratory

The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical Systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: PHYSCS 2760, CHEM 1320, or ECE 2100; instructor's consent

ECE 4650: Semiconductor Device Theory

Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.

Credit Hours: 3

Prerequisites: ECE 3610

ECE 4655: Digital image Processing

(same as CMP_SC 4650). This course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

Credit Hours: 3

Prerequisites: STAT 4710 and CMP_SC 2050 or instructor's consent

ECE 4670: Microelectronic Fabrication

Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.

Credit Hours: 4

Prerequisites: ECE 3610

ECE 4675: Digital Image Compression

(same as CMP_SC 4670) This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.) Graded on A-F basis only.

Credit Hours: 3

Prerequisites: STAT 4710 or instructor's consent

ECE 4690: Design and Simulation of VLSI Circuits

Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory.

Credit Hours: 4

Prerequisites: ECE 4670

ECE 4710: Communications Systems

Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.

Credit Hours: 3

Prerequisites: ECE 3830

ECE 4720: Introduction to Machine Learning and Pattern Recognition
