PRESENTED BY THE
JUNIOR CLASS OF
KANSAS CITY-WESTERN DENTAL COLLEGE

FOREWORD

As a record in permanent form to which we may, in future years, return and live again among our friends and follies, our aims and achievements during our school life; So have we created this 1933 Bushwhacker.

DEDICATION

We wish to dedicate this book to the faculty who have so unselfishly made possible our advancement toward the goal of our chosen profession.

CONTENTS

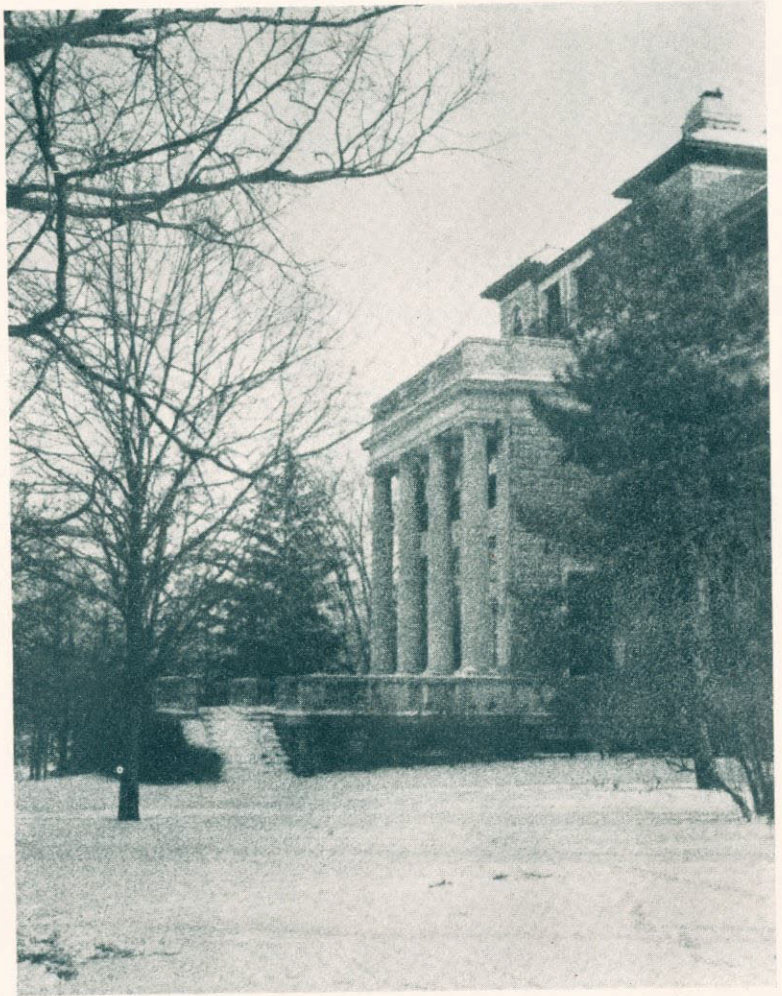

1. ADMINISTRATION
2. CLASSES
3. ORGANIZATIONS
4. ACTIVITIES

IN MEMORIAM

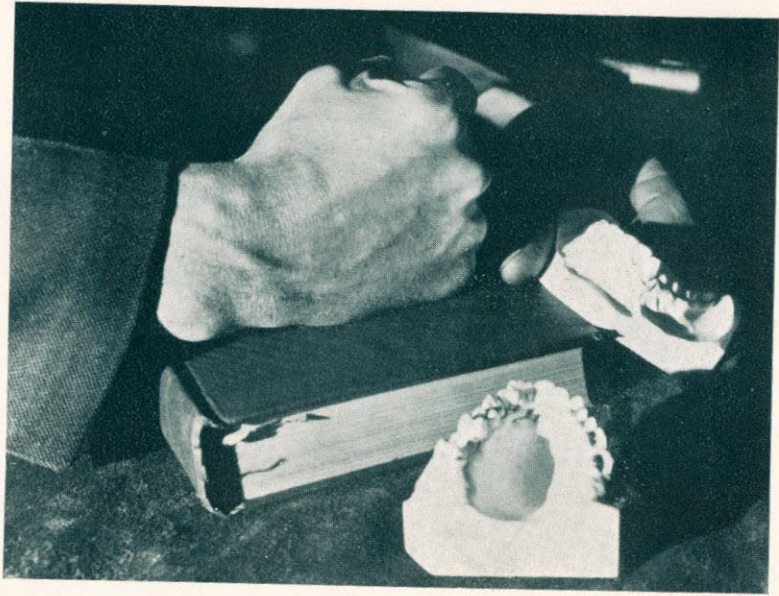

Dr. Perry F. Gilbreath, a man among men whose professional career has been devoted without personal ambition or selfish advancement, to the good of the dental profession.

*The Administration Building of the Kansas City University with which
our school is associated*

MY FRIEND

DR. RINEHART

The greatest force that drives human beings is personal influence. By personal influence I mean that outward reflection of the soul of a man. It is human force that turns for good or for evil. It is always present wherever and whenever we meet mankind.

Many years ago I met a man (thirty-three years ago to be exact), a young man like myself, except a little older in years. He was just human, boyish and gay, but more than these, he was influential. He had that something that shone as the morning sun sending forth rays of hope, love, charity and good will. His was a refreshing atmosphere that attracted those who stopped long enough to look

within and beyond. He became my friend early in my school experience and then my roommate for some time, and then through the years that passed we advised and counseled together.

Perry Gilbreath was a friend indeed, a personal friend, one of whom it can be truly said was never other than a friend. He knew how to disagree and how to admonish, and still be a friend. As a professional man he was true and unfaltering, and constant in the work of the dental society. I was glad to be his personal friend because he had hundreds of personal friends. A glorious career, an enviable record, and a successful life was his.

Dr. Gilbreath entered practice in 1900 and since 1910 he was also a teacher of dentistry. He was beloved and revered because of his sincerity and profound loyalty. When he was forced to give up the arduous strain of practice because of ill health he spent his more favorable days in his Alma Mater, imparting his knowledge and experience to those who were soon to enter into his chosen work. He was loyal to the end.

My message to our beloved student body for the year 1932-1933 is contained in this admirable record of My Friend.

R. J. RINEHART.

THE REGISTRAR

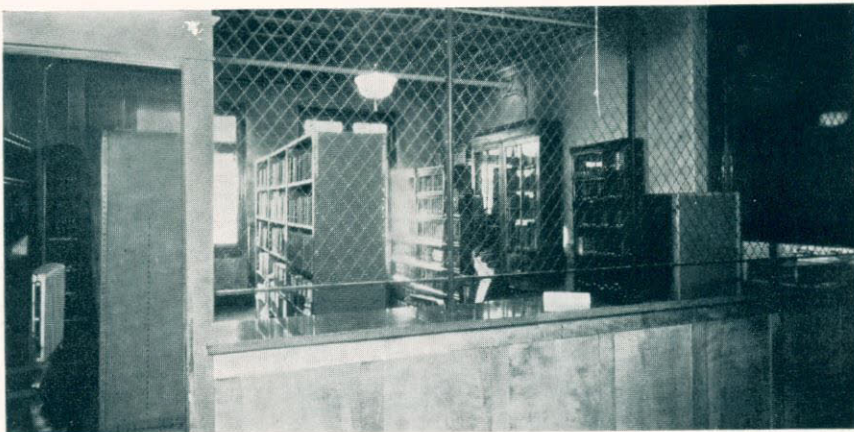

The Registrar is the one person who knows a great deal about each student as he has both our scholastic and life history at his command. His office is an important part of the administration.

INTERIOR VIEWS

The anatomy laboratory, where we labored diligently, learning the many nerves, vessels, etc., under the able instruction of Dr. Hill and his assistants.

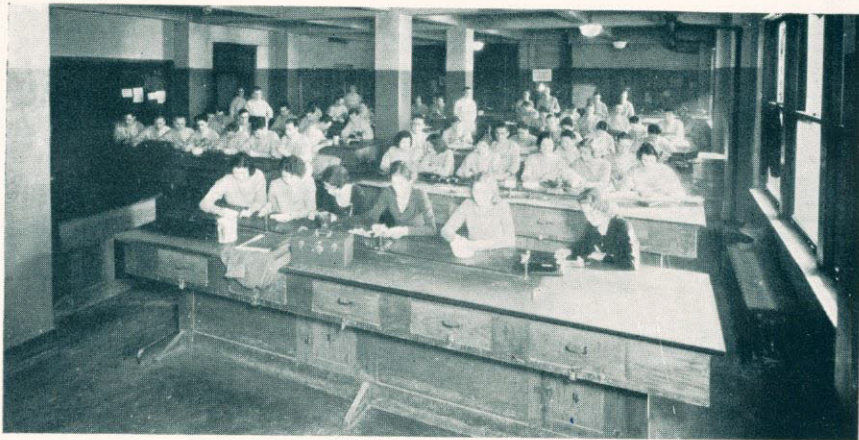

The Chemistry and Metallurgy Laboratory

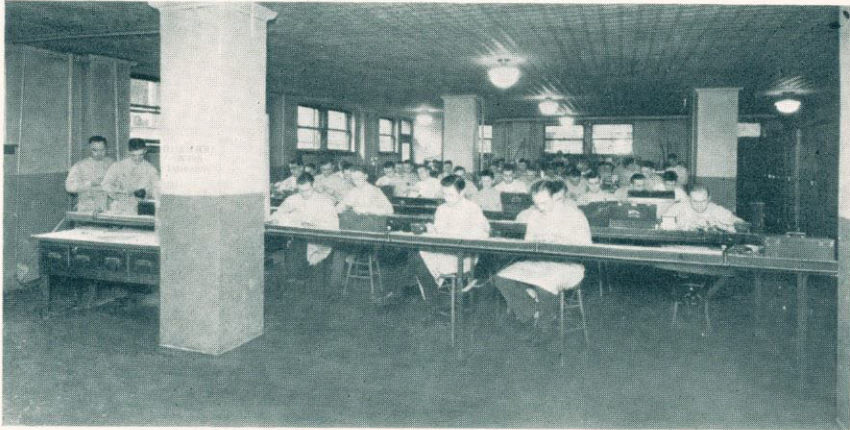

Many peculiar formulae not found in books have had their origin here, but like other scientific experiments they usually ended with a "Bang," and Dr. Huntington consulted before the next experiment.

STEPS LEADING TO A SENIOR

The Freshman Laboratory, where we received our first instructions from Dr. Dillon.

Sophomore Laboratory. More instructions from Dr. Porter.

Senior Laboratory adjacent to the clinic. Doing practical work according to the technic methods received from our able instructors.

A PAGE BY THE EDITOR

THINK THIS OVER

We may have less to live on—but have just as much as ever to live for!

We may own less—but no man is rich because he owns something. Only those men are truly rich who have become something!

Our cash income may be less—but the happiness that comes from sharing and serving is just as deeply satisfying as it ever was!

We may find it necessary to change habits and methods—but we are glad that character is still more important than possessions, and right motives still have more effect on our progress than selfish desires!

We may have need for more courage and more faith—but the loyalty of our associates and kindness of our friends warms the heart more than it ever did!

We may be tempted to be discouraged or tired—but little by little we are learning that a sportsman finds fun in the playing of the game—not merely in the winning.

We may be disappointed at times by the results which we accomplish—but we are encouraged by the certainty that now and always good workmanship brings better results than poor workmanship!

We may become impatient for financial rewards—but we have only to turn our thoughts away from our seeming needs to see the bounteous blessings which fill our lives!

We may even admit thoughts of fear and worry—but these flee from us when we remember that the real values of life are unshaken!

• It may seem that for us victory is long delayed—but intelligence reminds us that victory does not merely happen—it is made up of many little victories and each time we win a victory over laziness, selfishness, fear or discouragement we are adding to the score that will show in the final tally!

We may feel that conditions beyond our control have robbed us of what we thought we had—but we are rich in knowing that nothing can rob us of what we are!

This so-called "depression" is not a disaster—it is a challenge!

A challenge to the manhood that is in us.

A challenge to our courage and gameness.

A challenge to our ability and adaptability.

A challenge to our patience and persistence.

A challenge to our faith in right thinking and right acting.

And we are rich in the quietness and assurance which comes to every man in proportion to his sincere effort to measure up to his highest concept of what is right and good.

Let us go forward!

Our Dean at his desk

Dr. Rinehart is never too busy to give an audience to a student, regardless how trivial the subject matter may be. It is this kind and understanding manner that makes the entire student body regard him as their friend and adviser, not only of difficulties concerning school work, but personal difficulties as well.

APPRECIATION

Dr. L. G. Taylor, M.D.

Dr. E. L. Stewart, M.D.

Thirty-one years ago Dr. Taylor began his long period as an instructor in our school. As years passed he became more and more revered by the student body as one of the best liked professors on the faculty. In fact, we doubt if any instructor in any school is held in such universal esteem as our eminent physiologist, Dr. Taylor.

Teaching, as he is, an interesting subject and being an interesting lecturer, has much to do with his popularity. Not only is he efficient as a pedagogue, but he is in possession of a wonderful personality and his lectures show his refinement and culture.

Dr. Taylor, we doff our hats to you, the finest gentleman we have ever known.

Next to Dr. Taylor in length of service in our school but as a Bacteriology teacher second to none, is Dr. E. L. Stewart. He began his teaching here one year later than Dr. Taylor, and like him he has become liked by all.

He came here from the Rockefeller foundation of Medical Research, where he was in the Bacteriology department.

Dr. Stewart is head of our Histology and Bacteriology departments, and is a very interesting lecturer on these subjects. This is due to the fact that he will often digress from the useful but sometimes dry facts of his courses and thrill us with tales of pioneer bacteriologists of another age. Dr. Stewart is also a poet of no mean ability and nearly every one of our school annuals is brightened by one of his rhythmic efforts. His best, I think, is *Dragons*, which appeared in our last *Bushwhacker*.

A toast to you, Dr. Stewart: A good health to this microbe hunter with the fire and soul of a poet; may he be always successful in his quests, and may he keep his heart's eternal youth until it beats its own requiem in its last faint throb—immutable, imperishable and unconquerable.

TO THE SENIOR CLASS OF 1934

The long anticipated time has arrived when we Seniors are to leave our school which has been the scene of all our many trials and triumphs for the last five years.

Many times we have wished we were through dental college and had a practice established. Now that the time has actually arrived, we pause, and in looking back over the last five years we lose our impatience in the pleasant memory of friendships; in the joy of our loyal efforts to keep Kansas City-Western Dental College a foremost institution. It is hard for us to leave.

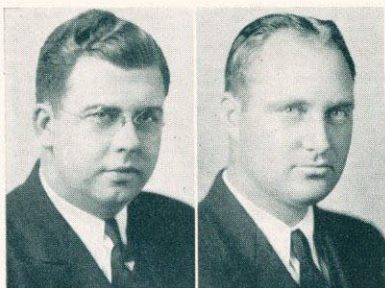

We remember our first plunge into dental college life, and the awe with which we regarded the omnipotent senior. We smile sadly as we think of our passionate longing to become seniors. Now that we have attained that state of bliss, we find its joy followed by a stronger desire to get out into the world, to touch shoulders with society, to feel the strength that comes with self-reliance and self-confidence.

Although we lay down our dental college work, we are confident in the knowledge that the Class of '34 will pick it up and carry on with the same seriousness of purpose which has characterized our efforts.

There is a great deal to accomplish, Juniors, and scarcely sufficient time to do it. There are numbered among you future exodontists, prosthetists, oral surgeons, etc.—men whose names will be outstanding in the field of dentistry. Create higher standards in scholarship, set new records in infirmary work, take the lead in all the school activities, keep before you the records made by former classes, and cling steadfastly to your own code of conduct, so that in June, 1934, you can say to yourselves, "Something attempted, something done."

WE JUST CAN'T IMAGINE

McComb in a hurry.
Sandford not talking about communism.
Purcell without his shadow, Barclay.
Fries being out in dentures.
Blair discarding his beech nut.
Grabske when he didn't have something to sell.
Schuman when he was without a call patient.
Weinshelbaum doing an alveolectomy.
Back not narrating some yarn about Texas.
Nelson not telling Anderson about the bridge he almost had.
West not trying to imitate Eddie Cantor's whistle.
Allquist without some important appointment.
Irwin not talking with Coolidge about target practice.
Gibson when he wasn't calling for Wright.
Buchman recommending an amalgam instead of a foil.
Barclay not in trouble about something.
Ford not telling us how it was done at good old Pitt.
Stotts when he wasn't worrying about his casting room.
Eiffort not complaining about how the Sophomores muss up the ceramics
laboratory.
Hawk when he wasn't telling someone how it should be done.

JUNIOR CLASS HISTORY

The Junior Class is perhaps one of the most unique in the history of our school, in as much as our education was started on the wave of prosperity, continuing through the lean years of the depression, and terminating, we hope, in an era of economic recovery.

In spite of the adverse conditions the Junior Class has many things of which to be proud, among which are:

The class enrollment.

The high standard of scholarship and workmanship.

The excellent spirit of cooperation.

The outstanding class spirit and comradeship.

The prevailing spirit of optimism.

We can look back over our preceding years and note with pleasure that we have been gradually accumulating a wealth of knowledge which will not be affected by any stock market crash.

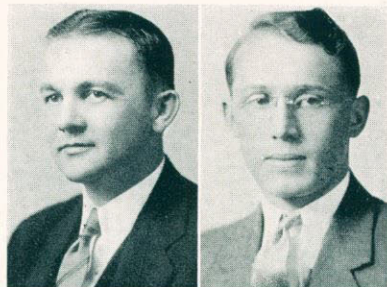

Like classes which have gone before us we have our illusions, but as Mark Twain has said, "Don't part with your illusions; when they are gone you may still exist, but you have ceased to live."

WHO CAN TELL US

- Why Albie is such a brute for punishment?
How Watkins gets his gowns so dirty, he only wears them two weeks?
Where "Blimp" McKee gets his cigars, we never see him with a long one?
Why Nash has such taking ways?
Whether Ben's last name is really Olsen or Johnson?
Where Lenkerd gets shoes large enough to fit his feet?
If there are many in Arkansas like Anderson?
Why Pearce always sits on the floor at the end of each class?
Why Guilliams, who is a barber, always needs a shave?
Where Spece spends his evenings?
Why Kendall can't keep his hard secret?
Why Simms and Williams honey around the Hygienests so much?
How Franz would look with a mustache?
Why Scherzinger is such an ardent football fan?
Where Carr gets so many vitamins?
Why Rookstool laughs up and down?
Where Red Stewart got that silly laugh?
How Jones can sleep through so many lectures without falling off the seat?
How Linscheid can think up so many dumb questions to ask?
Why McCollum doesn't marry the girl?
Why Mesigh can't forget the Navy?
Why J. P. Carroll thinks he is a basketball player?
Whether Hodge wrote the song "Was My Face Red"?
Why Hamilton always picks on poor "Bubbles"?
Where Elsel gets his drag in set up class?
Why Baker talks so much?
Where Tyree was when the "movie stars came to town"?
Why Mathews always has a patient on Tuesdays, Wednesdays and Thursday mornings?
Why Ratcliff and Somers are such play boys during classes?

SOPHOMORE CLASS HISTORY

The Sophomore Class this year is, of course, about the same in quantity and quality as last year. The advancement of the profession in teaching and technic methods is directly reflected in this class. It seems that the members of this class are getting their first real taste of dentistry. To some men it tastes good, and to others not so good; but both types of tastes are gradually being turned to a pleasant channel and started on the road to contentment.

The Sophomore Class has the noonday sun of a dental education hanging overhead, and each man is the master of the fate that will manifest itself on the evening of graduation.

The Sophomores are now on their third step in attaining their goal; the degree of Doctor of Dental Surgery. They realize that success can come only by hard work and determination. Looking forward it seems we have learned little, but looking backward we have learned much.

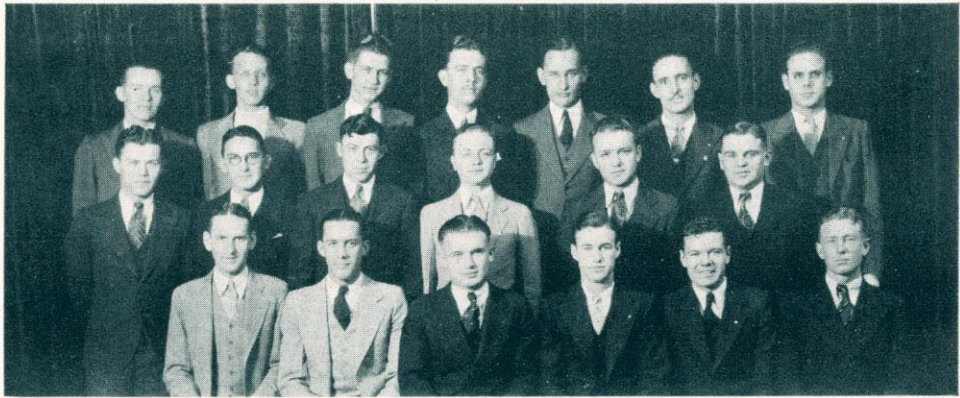

In all due respect, the Sophomore Class salutes the school, the dean, faculty, and all fellow students.

FRESHMAN CLASS HISTORY

As Freshmen we are starting this year to learn the fundamentals which will equip us to proceed onward toward the degree which we are seeking.

Many of us are having our first experience with the technic of carving bone teeth, making metal dies, etc., but under the able guidance of Drs. Dillon and Conover, some of the fog of mysticism is beginning to rise and we are little by little becoming enlightened about the things which make up the mechanics of dentistry. The theory which at first was difficult is also becoming more and more interesting and most of us find that we are not disappointed in choosing dentistry as our life's work.

Our class is no different from other classes and we have our fun and our disappointments, but we do not let either interfere with our main objective as we know that we are just starting our climb and only those of us who have perseverance and work diligently will reach the top.

J. R. TRIGG

STUDENTS OF WILLIAM JEWELL COLLEGE
PREPARING FOR DENTISTRY

Sharp, Arnold, Carlson, Browning, Savage, Gilbert
Lewis, Harding, Divine, Tate, Corey, Clark, Schweers
Jacobs, Clond, Halquist, Boon, Maienschein, Oglivie

The Predental Class this year seems to be one industrious bunch of fellows. They are either too busy trying to learn the fundamentals of dentistry, or they are very bashful, as they do not try to muscle in on any arguments which are always taking place in the various laboratories. Give them time, though, and they will no doubt outshine all of us.

These boys of William Jewell College will next year be in the scientific search for the knowledge pertaining to dentistry, and we all wish them the greatest success in their study of this all important branch of the healing art.

K. R.

DENTAL HYGIENISTS

Morrow, West, Berkowitz, Siebenthaler

"To cure is a voice of the past; to prevent is the divine whisper of today."

The dental profession is most vitally interested in the conservation of health through prevention, which includes diet, dental prophylaxis and all other phases of hygiene. It was for this type of service the course in Oral Hygiene was created.

A strong set of teeth and a healthy mouth is most always significant of health, which is the foundation for better teeth. It is an eternal cycle—rarely broken.

The professional service of the dental hygienists is of greatest importance and is becoming universally recognized as one of the major activities in the maintenance of health throughout the world.

To render this service scientifically, the dental hygienist must be well versed in many of the medical sciences. She must understand the instrumentation and technic of removing stains and accretions from the exposed surfaces of the teeth and beneath the free margin of the gums.

As an educator or as a skilled technician, the dental hygienist renders a service indispensable in the dental office or in public health work.

DR. R. J. RINEHART *President*

DR. E. M. HALL *Vice-President*

DR. R. W. EDWARDS *Secretary-Treasurer*

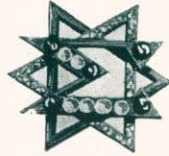

Each year at graduation time, twelve per cent of the outgoing class is eligible to receive membership to Omicron Kappa Upsilon, national dental honorary fraternity.

The eligibility of receiving this award concerns all phases of the educational program as presented by the university. This includes the individual's character, quality of practice in the infirmary, satisfactory completion of all requirements, together with a scholastic record of maintaining a general average of at least 90 per cent through the entire course of study. Among others who are eligible to this honor are faculty members who have been teaching two years or more and members of the alumni who have rendered outstanding and recognized services to humanity and to the profession.

HISTORY OF NU CHAPTER

Nu chapter of Delta Sigma Delta was installed March 15, 1898.

Delta Sigma Delta was the first dental fraternity to have a chapter in the Kansas City school. It was about this time that the Western Dental College was founded and soon after the founding of the new school another chapter of Delta Sigma Delta was installed there. Upon the merging of the two schools the two chapters merged to form what is now Nu Chapter.

ALPHA IOTA CHAPTER

Alpha Iota Chapter of the Kansas City Western College was installed the afternoon of April 10, 1932, at the Hotel President. Drs. Grasby and Rosen of St. Louis being the installing officers.

The Alpha Omega fraternity is realizing national strength with increasing rapidity. Last September the Alpha Zeta Gamma amalgamated in Alpha Omega.

At present there are 34 active undergraduate and 19 alumni chapters distributed throughout the United States and Canada.

M. D. PEARCE	<i>Senior Master</i>
R. L. CLARK	<i>Junior Master</i>
RUSSELL COOLEGGE	<i>Secretary-Treasurer</i>

The Trowel Fraternity is the result of a merger with the Cabeltow Fraternity, which was instituted at the Kansas City Dental College, April 16th, 1916, after a series of negotiations and investigations extending over a period of some three years.

The purpose of the Cabletow Fraternity was to promote the benefits to be gained by having a dental organization composed entirely of Master Masons.

The Fraternity gained strength and prospered until the World War started; then feeling that it was its patriotic duty, the fraternity voted to discontinue all work, and a number of the members enlisted in the war.

On January 1st, 1920, only two of the original members remained. These two, with the aid of the alumni, revived the organization under whose leadership the membership was greatly increased. Chapters in other schools were installed.

In 1925 the Cabletow saw the necessity and advantage in having a national organization, so negotiations were started and completed early in 1925, and for four years were very successful. However, in 1928-'29 there were very few Masons enrolled in school so the chapter again became dormant.

Effort was made to revive the organization in 1931, the result being a very live, active and sincere chapter that has the appearance of being larger than ever before.

ACTIVITIES

GLEE CLUB

GLEE CLUB

Carson, Ramage, Alquist, Sims, Hadley, Blair
McNally, Graham, Anderson, Berkowitz, Thornburgh

In past years the Glee Club has shared its position in school activities with the Basketball Team, Band and Orchestra, but existing conditions made it impossible for these to carry on, leaving the Glee Club the only outside activity.

The Glee Club this year passed its seventh year under the direction of Dr. Davidson. He has willingly given his time and ability to our club and to him we give full credit for our outstanding success.

This has been the most successful year ever experienced by the Glee Club. The public has been kind, demanding our programs in far more places than we were able to accept, and each week we were forced to decline invitations

from various organizations in the city. In accepting engagements we limited our services to audiences of more than four hundred and appearances were made in the colleges surrounding Kansas City as well as in the larger high schools within the city. From each we received a very generous acceptance.

Broadcasting was accepted only from the larger stations.

Our greatest achievement for the year is a large silver trophy awarded by the Missouri Federation of Music for first place in a state wide contest for male choruses. This is an award seldom obtained and words cannot express our joy in receiving this recognition.

We are deeply indebted to Miss Wanda Corti for her splendid accompaniment and to the Wurlitzer Music Co. for furnishing us a studio in which to rehearse.

While several valuable members will be lost by graduation we have an abundance of able voices to carry on and uphold the honor and reputation of the Glee Club.

L. E. ANDERSON
Soloist

TRIO

The Quartette and Trio have both been a valuable aid to the Glee Club and have more than received their share of applause at all of the engagements. They will be remembered for their splendid performances before the Optimist Club.

Thornburgh, Simms
Patzman

Leslie Anderson, with his lyric tenor voice, has done much to maintain the high quality of the work done by the Glee Club. His singing of "Ah Moon of My Delight" and "Racquel" will always be remembered.

Ray Alquist has made the Glee Club a strong president. His executive ability has helped it over many difficulties and has made this organization the best of its kind thus far.

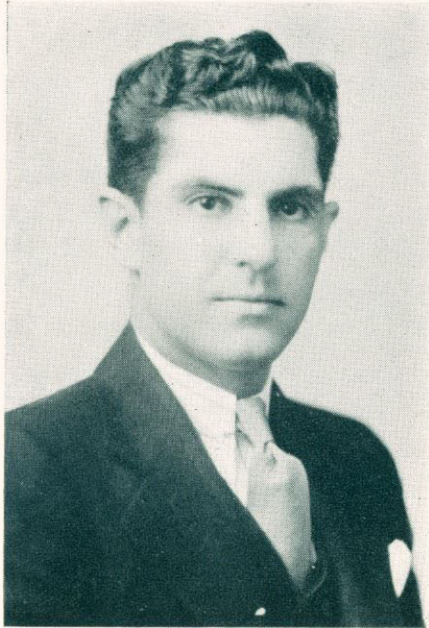

We are looking forward to even greater accomplishments next year.

FEATURES

THERE IS NO *better* ADVICE THAN THIS FOR *dental* GRADUATES

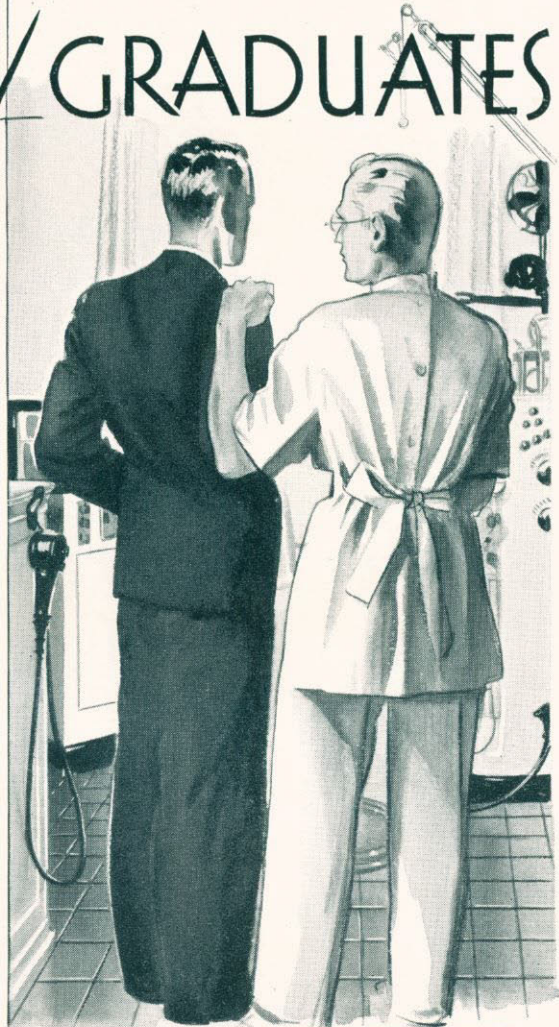

IT is generally agreed that only a small minority of the population avails itself of the services of the dental profession.

However, it is a well known fact that people are becoming more and more dental-minded now that they are beginning to appreciate the great value of modern dental service to their health and happiness.

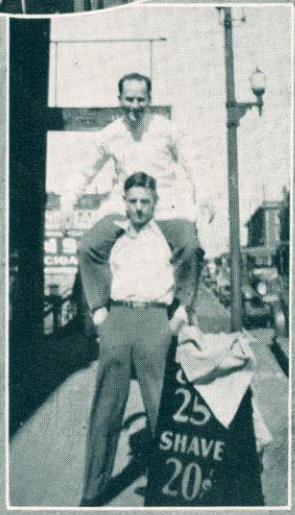

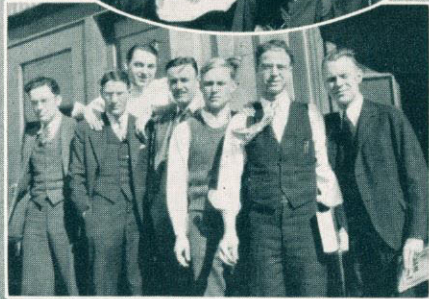

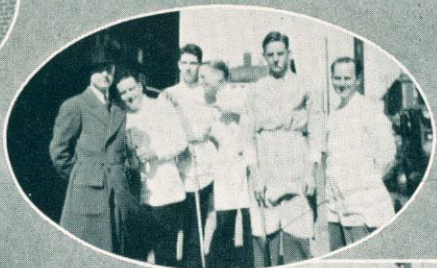

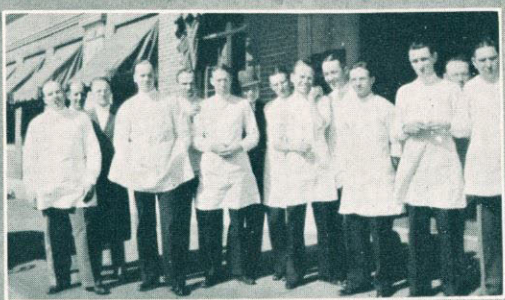

Consider, then, what a wonderful opportunity is offered to you dental graduates who are beginning practice just as this demand for dental service is gaining momentum!

By establishing yourselves in the right locations and equipping your offices with new Ritter equipment which will enable you to take full advantage of your skill and professional knowledge, you will be prepared to meet this growing demand for high grade dental service.

Let the Ritter Architectural Department help plan your office. Begin right... buy Ritter! Ritter Dental Manufacturing Company, Incorporated, Rochester, New York.

BUY RITTER

A WISE CHOICE

Select Your Dental Dealer

FIRST

Be sure his real interest is in your success, rather than in the sale of equipment.

Be sure he is familiar with business and dental conditions throughout his territory.

Be sure he is competent to help you locate to your best advantage, and to assist you in getting started properly.

Hettinger's have equipped a majority of the offices in their territories, and their experience, skill, and genuine desire to serve you are at your command.

EQUIPMENT

An Investment— not an Expense

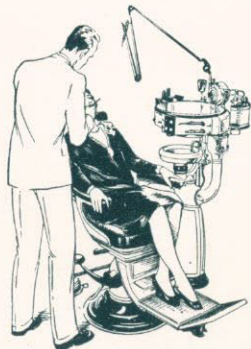

APPROACHING the purchase of equipment with the thought that it is merely a compulsory expense, to be minimized by buying as cheaply as possible, would be equivalent to bargaining for a low-priced college course with the sole idea of saving money.

Both the college course and the equipment are investments, both should have capital value, both will return dividends in proportion to their quality and completeness.

S. S. White Equipment is made and sold on this basis—on the premise that nothing can be too good as a dentist's investment. If he buy real estate, it should be good, if he buy bonds they should be sound, in any investment he should look for permanency of value and adequate return—his equipment certainly should be a high-grade investment.

Furthermore, the office and the operatory are the dentist's daytime home—they should be conveniently and adequately equipped for his comfort and efficiency and as an inspiration for his best effort. From the patient's point of view the dental office should be inviting and reassuring; it should proclaim up-to-date, competent, and reliable service.

S. S. White Equipment lends itself to the perfection of these ideals. Office planning service furnished by the S. S. White Company and by the dealers who sell S. S. White Equipment, and the liberal terms of purchase enable the dentist to make his investment in equipment highly satisfactory in every consideration.

CLASS ROOM GOSSIP

Professor Davidson—See here, Lenkard, how many more times will I have to warn you about sleeping in class?

Don Lenkard—I don't know, Doctor, how many more lectures are there?

Dale Rookstool—Did you hear about my patient dropping her dentures while she was playing tennis?

Sandford—No, did she lose the set?

Olness—Say, John, have you read the Microbe Hunter?

Scherzinger—Naw, I don't read those sportsman magazines.

Inman to Watkins—Is Albie getting very old?

Watkins—Just a little, his head is just beginning to push through.

Bell—Too bad the Orbicularis Oris isn't a muscle of mastication.

Burgess—Why so?

Bell—Because I said it was on my head and neck exam.

Pycopé

"AMONG US INTELLECTUALS"

Webster defines the word "dentifrice" as a cleanser of teeth. If the dentifrice you are prescribing is a safe and stimulating cleanser, you are ethically fulfilling your patients' dentifrice needs.

Pycopé Tooth Powder, composed of Sodium Chloride, Sodium Bicarbonate, and Sodium Perborate, plus flavoring oils, has been accepted by the American Dental Association as a dentifrice.

We extend our best wishes for a successful and prosperous dental practice to each member of the Class of 1933

START WITH THE RIGHT EQUIPMENT

It is good sound professional and business sense to start your dental career knowing that you have not wasted any of your time or money on equipment of doubtful practice-building value. The dental cabinet too, should have your most careful consideration, and for many good professional reasons, should be the best you can afford.

Of course—it should be an American Dental Cabinet, as 80% of all dental cabinets in use are American Dental Cabinets.

Can 48,000 dentists be wrong?

A CDX Dental X-Ray Unit—you will need one in your new office

Leaders in the dental profession have their own X-ray units. They find that making their own radiographs enables them to spend their time more profitably and speeds their work with greater efficiency and accuracy. The fact that many of these leaders have chosen the CDX Dental X-ray Unit evidences its superiority.

The CDX Dental X-ray Unit hangs suspended from the wall. It is 100% electrically safe. You and your patient can touch the CDX while in operation without any danger of shock. And owning a CDX is not an expense. Our liberal monthly payment plan will enable you to pay each monthly installment from the revenues derived and still have a profit. In starting out you cannot afford to be without this important tool of your profession. Write for full information.

HEARD AT THE ALUMNI MEETING

Dr. Campbell—What's the idea of the roped-off space?

Bright Senior—They are roping us in.

Dr. Campbell—They did that when they sent you the catalogue.

Dr. Rinehart to some Alumni—Do you boys want to see a snake 20 feet long?

An Alumnus—What have you got to drink?

Sodiphene
TRADE MARK REGISTERED

for all Hygienic
and Antiseptic Uses!

The Dental Profession have for more than a score of years given SODIPHENE the highest recognition and recommendation. In general practice and exodontia SODIPHENE serves as a safe and valuable antiseptic—soothing, healing as well as germicidal.

"CAL" AND "SLIM"

STERILIZERS

CAST IN BRONZE

"Full-Automatic" Regulation

Never such sterilizer value! The Castle boiler is now **CAST IN BRONZE**. All sheet metal, which is likely to warp and buckle from heat, is eliminated. No solder.

And, "Full-Automatic" Regulation which means two things: 1. Low water cut-off. 2. Automatic turning of the current up or down to maintain safe boiling temperature. Runs itself . . . no 3-heat switch to remember and fuss with.

CAST IN BRONZE "Full-Automatic" sterilizers available on new and attractive models. Buy Quality—Buy Castle—the 49 year favorite with men who know.

Wilmot Castle Co., Rochester, N. Y.

CASTLE

"If you have not seen the new Moyer Proportioner for saving mercury and alloy; also their new Wax Bur; you are not up to the times in the dental world. See your dealer immediately about these new products."

Watkins: Lenkard is an athletic opposite.

Vincent: What do you mean, an athletic opposite.

Watkins: Well, an athlete has big shoulders that taper down to almost nothing, but Lenkard has big feet that taper up to almost nothing.

It's easy enough to be happy when everything goes wrong,
But the man worth while, is the man that can smile
When his four upper incisors are gone.

**HOLDING THE MIRROR
UP TO NATURE**

Your patient would as soon have you use bright green rubber for the gum shade on his plate as to use a pink that was off color.

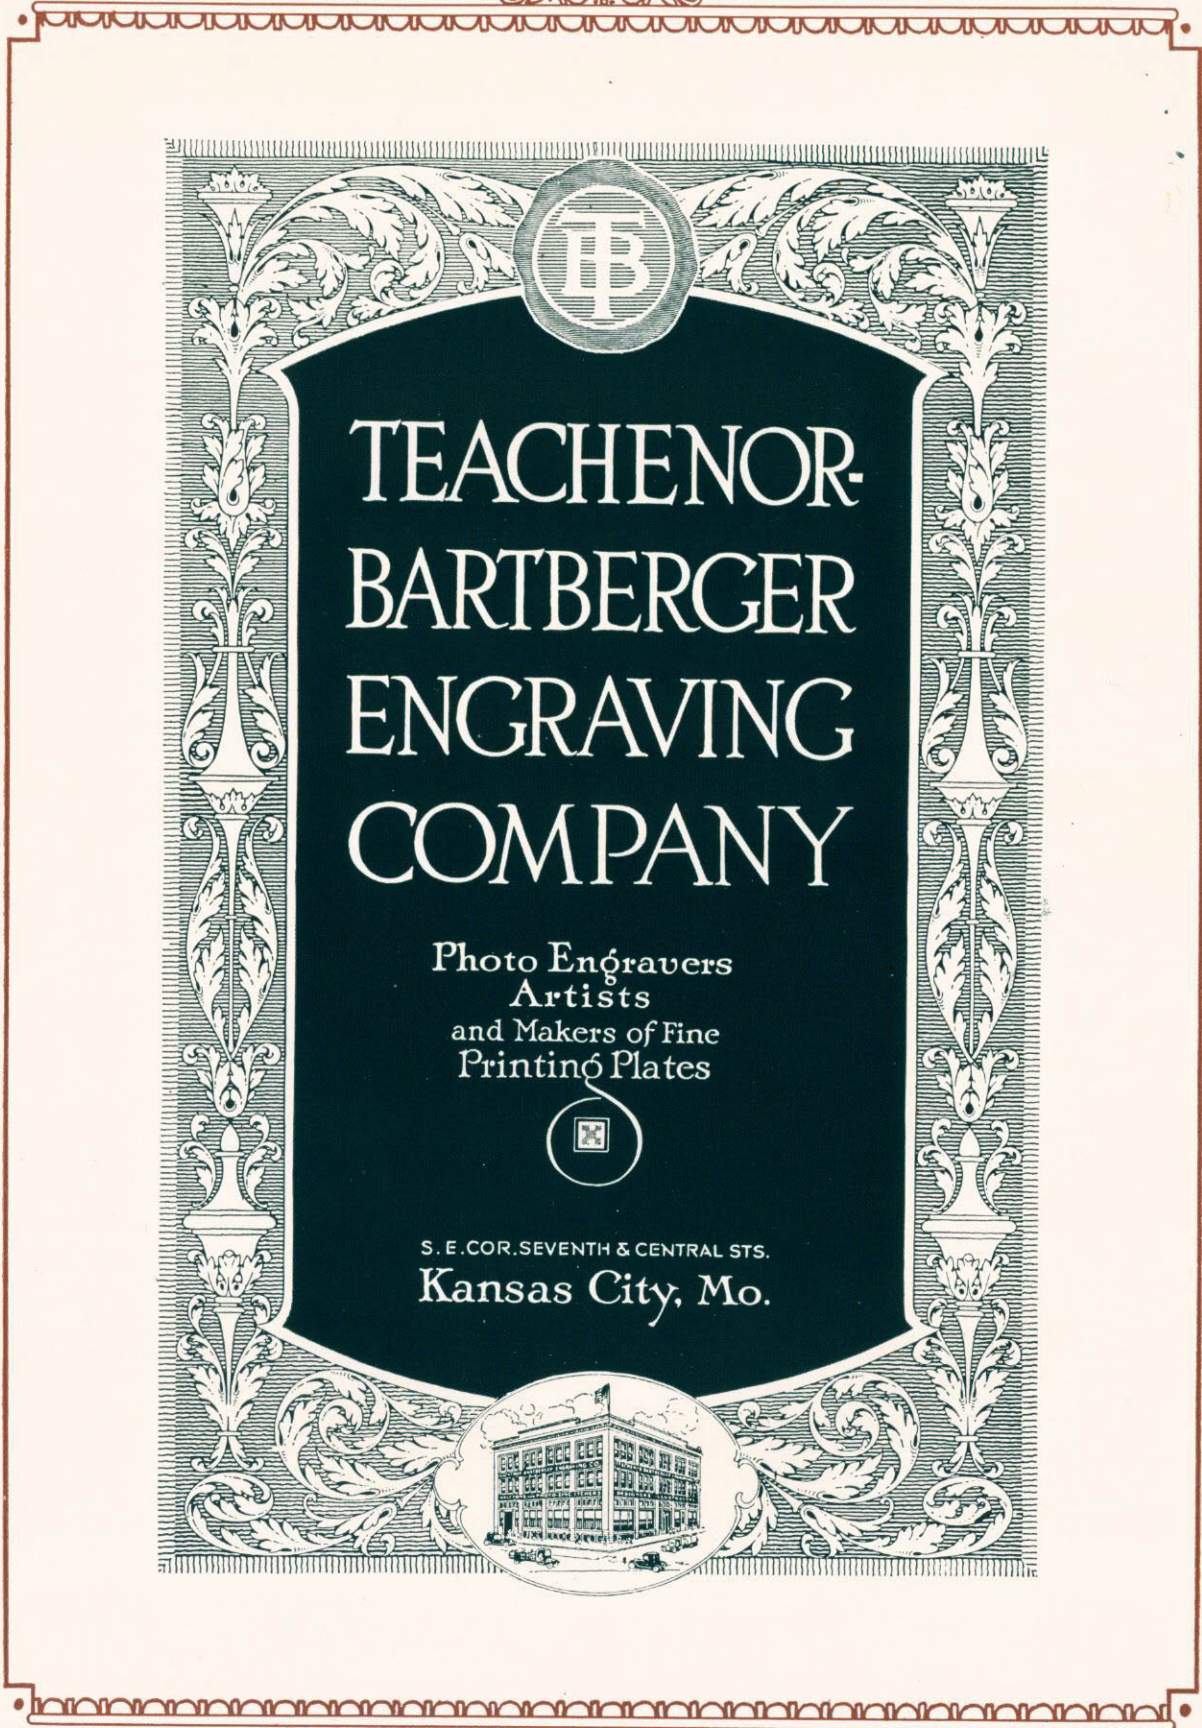

Your plates must be as near Nature as possible—which means you must use a superior rubber.

*Eugene Doherty's
New Improved Pink Rubbers*

in light and medium light shades, fully answer every possible requirement in the making of gum shades for plates. Not only do they make the most natural plates, but they are tough and durable to a remarkable degree.
