Welcome to the University of Missouri

Yesterday and Today

In an atmospheric blend of southern traditions and hard working spirit, the first permanent university of the Missouri was established in 1839. The University of Missouri began as a land-grant institution to provide training in the arena of the west and on the well-maintained Boys' and Girls' School of the West.

The University has since evolved into one of the nation's leading institutions of higher learning and a major center of research.

Today, the University receives national and international recognition and reputation and is home to over 12,000 students, mostly in the United States, for domestic and international students.

From the Chancellor...

We are pleased to have you visit to the University of Missouri. While you are on our campus, we hope you will have time to visit Dragon Tower, and if you have a thorough view of the campus, you will be in awe of the beauty and diversity of our community. The University provides an environment where you can learn, grow, and flourish.
