Good Home Study Lighting Saves Students' Eyes

Have you ever tried reading for an hour at your child's study desk? Many parents who wouldn't dream of neglecting their youngster's diet or health unwittingly fail to provide adequate home study lighting.

A simple, planned study center that provides the best possible lighting for the eyes' needs will help improve grades and form good study habits.

How to Brighten Study Hours

1. Use a flat-topped desk or table with a dull light-finished top. Dark woods may be covered with pastel blotters.

2. Place desk or table against a wall, away from family activity. A tackboard fastened on the wall over the desk may provide better light reflection.

3. Study chair should be high enough to place the eye position about 14 inches above the desk top.

4. Choose the proper lamp for the seeing job. Wall pin-up lamps are popular with students of all ages, and provide even light over the entire desk. Use 100-watt bulbs and diffusing bowls. Avoid shades that are too dark or too bright. Overall room lighting should be used to avoid bright light and shadows in the study area.

FREE BOOKLET "See Your Home in a New Light"

Just send a penny postal card to

KANSAS CITY POWER & LIGHT COMPANY

P.O. Box 679, Kansas City 10, Missouri

Does your present job hold the proper future for you?

1. Do you want independence as well as security? You're in business for yourself in life insurance . . . with an able general agent and a strong company guiding you to success.

2. Do you like to help other people? New England Mutual men have a strong urge to combine service to others with their chosen career. This business provides that kind of satisfaction as few others do.

3. How much income can you earn? There's no top limit—or speed limit—on the earnings of New England Mutual sales representatives. After your financed learning period, your own efforts and ambition set the pace. Many young graduates of our training program make over \$5000 in their first year. Many of our "older hands" earn well into five figures.

4. How can you tell whether you'll succeed in life insurance? New England Mutual gives you special aptitude tests and tells you frankly whether or not it thinks you will make good.

5. Is New England Mutual a good company to represent? Its liberal, flexible policies cover every sales need and are nationally advertised—and its men are stimulating and congenial to work with. The company has been established on both coasts for over a century, and its resources have doubled in the past 10 years.

6. How quickly could you get going? First, send in the coupon for more complete answers to your questions. Then, if you and New England Mutual like each other, you can start selling under expert supervision even while you are training.

These two booklets will give you a good idea whether you'll find what you want in life in life insurance work.

MISSOURI alumni now achieving successful careers as our agents:

Frank M. See, CLU, '11, Gen. Agt., St. Louis
 John T. Ready, '14, Kansas City
 Robert L. Casebolt, '23, Kansas City
 Paul J. Harris, '23, Jefferson City
 Theodore F. Kittredge, '40, Little Rock
 Gordon E. Crosby, Jr., '41, Gen. Agt., Seattle
 Ernest A. Hill, '48, Kansas City

New England Mutual would like to add several qualified University of Missouri men to its sales organization which is located in the principal cities from coast to coast. If you are interested, send in the coupon today.

A DESCRIPTION OF CAREER OPPORTUNITIES AT GENERAL ELECTRIC

Information you may want to pass on to someone planning his future

This new booklet contains brief introductory descriptions of such General Electric training programs as:

1. The Test Engineering Program, offering engineering graduates opportunities for careers not only in engineering but in all phases of the Company's business.
2. The Business Training Course, open to business administration, liberal arts, and other graduates . . . for careers in accounting, finance, administration.
3. The Manufacturing Training Program, open to graduates with a technical education or

a general education with technical emphasis . . . for developing manufacturing leaders.

4. The Chemical and Metallurgical Program, offering rotating assignments and studies for chemists, chemical engineers, and metallurgical engineers.
5. The Physics Program, the gateway by which physics majors begin careers with General Electric.
6. The Sales Training courses, equipping young men to serve G-E customers through expert technical assistance.

A card to us will bring you a copy of the booklet. Or let us send it for you to someone who will want to know the variety of futures that are possible at General Electric. Write to Dept. 221A-6, General Electric Co., Schenectady, N. Y.

You can put your confidence in—

Briefs

by
Bus

Hundreds of High School students will have the opportunity to be on the campus this spring for music contests, athletic events, and other occasions.

Tell the students in your locale to let this office know if there is anything we can do to make their visit more enjoyable.

The athletic program here at the University is one of which you readers can be proud. The over-all policy and

the personal integrity of the individuals who compose the coaching staffs certainly do the University and you, as Alumni, justice. You should be proud of this phase of our educational program, because of its high standards of operation. Yet, does it receive the support so necessary to continue this high-level program? Sometimes I am concerned over what seems to be a lack of the same support that less worthy programs attract at other schools. For example, I, for one, would certainly have little respect for my Alma Mater if the home towns of the participating athletes were ever withheld from print, especially in football programs. This actually happened in a State University which is a member of the Big-7 Conference. By such act it seems to me that that University openly condones the practice of "buying" talent from every part of the country, thus reducing the opportunity for its own state's students to acquire some of the benefits of athletic competition.

Many people believe that we are operating on the same scale as others, but masking that activity with idealistic speeches. Let me assure you that such is not the case. Your University is proud of its athletic ideals and you can be proud of the program too. Give it your support! Tell your friends and, yes, the high school athlete that here is a program established for the best interests of the participant and a campus where he lives just as other students do—where he is one of the "gang." Here he is a student, preparing himself for the battle of life, not a pawn, purchased by the highest bidder to be shuffled through a secluded "beneath the table" program. **A SCHOOL THAT CHEATS A RULE TO GET AN ATHLETE WILL CHEAT THE ATHLETE.**

JANE FROMAN

*The life of the courageous singer
is depicted in a film to be released
by 20 Century-Fox Corporation
at Eastertime*

An authentic technicolor screen version of the Jane Froman story is a natural, filled, as it is, with every ingredient for greatness. It is the stranger-than-fiction saga of the University of Missouri co-ed who skyrocketed to stellar fame as a popular singer; who, after a tragic plane accident in 1943, won a gallant fight for life and the recovery of the use of her legs through 25 operations and \$350,000 worth of hospital and doctor bills, and who, last March, ended her battle for health—no more pills, no more hospitals, no more doctors—and proceeded with a life of courage and a career of service.

Jane Froman was born in St. Louis, Missouri. At the age of eight she made her musical debut singing at a church party. Her mother, who was an organist, became director of the

music department at Christian College in Columbia, Missouri. After high school, Jane attended Christian College and two years later enrolled in the School of Journalism at the University of Missouri. Her rich soprano voice did not pass unnoticed, however, and she sang the lead in various college productions and local musical events. One revue, "Bag Daddies," was seen by a booker for Skouras Theatres and Jane was offered a Christmas week appearance at the Grand Central Theatre in St. Louis, for \$100. Billed as the "Blues Singing Coed from Missouri University," she shared a dressing room with a child dancer named Betty Grable.

Jane enrolled in the Cincinnati Conservatory of Music. While there, she was paid \$10 to entertain at Mrs. Robert Taft's tea, where she met

Powell Crosley. He heard her sing and offered her a job on his station. She remained there (Station WLW) for two years, and at one period sang on 22 programs weekly, singing at all hours of the day and night.

Paul Whiteman arranged an audition for Jane at NBC in Chicago. On the way to the audition, she broke her ankle, but sang anyway, after which she passed out. Nevertheless, she landed the job and Whiteman put her on the NBC network.

Soon she received her first theatre offer. Then came the Chesterfield radio program, the "Ziegfeld Follies of 1933" and in 1934 she was rated number one girl singer on the air by every poll. That year she sold Linit, Pontiacs, Palmolive, Bromo Seltzer, Coca Cola, Buicks and Gulf Oil. The same year she was asked to read a part in the movie script by Oscar Serlin of Paramount. She was unsuccessful because of a bad stutter.

With Warner Brothers she was signed for "Stars Over Broadway." In 1940 she made her first club appearance in Evanston, Illinois, and also appeared in New York and in Chicago.

Jane was asked by Franklin D. Roosevelt to do the first camp show with Ed Wynn—the first USO show before Pearl Harbor at Fort Belvoir. In 1942 she was asked to entertain with USO troupes overseas. Her acceptance was the first to be received.

The Clipper took off from LaGuardia Field on the morning of February 21st. Jane was assigned a seat in the largest compartment with Tamara Swan. They were told to occupy these seats on every take-off and landing. For the Lisbon landing, Jane and Tamara inadvertently changed seats. The Clipper crashed on Washington's birthday, February 22, 1943—killing Tamara and all the others in the compartment. There were fifteen survivors.

Jane and John Burn, co-pilot, who had been in the cockpit, were thrown

Susan Hayward portrays the part of Jane Froman in the hospital scene from "With a Song in My Heart." A portable piano is moved to the hospital room where Jane is convalescing from an operation, so that she may rehearse the "Artists and Models" number.

"I feel," said Jane Froman, "as though I've lived three lives — one before my accident, another since, and the third watching the other two lives brought to life again so entertainingly, tunefully and truthfully."

near each other in the Tagus River. In the darkness Burn held her up in the water until help came, thus saving her life. Jane had a compound fracture of the right leg just above the ankle, left leg nearly severed below the knee, two broken ribs, and her right arm fractured in several places. John had two fractured vertebrae and a fractured skull.

Then began a gallant fight for life and for the recovery of the use of her legs. Through the dreary months of operations to avoid amputation there was always the dread that she might always walk with crutches.

She made her first public appearance a few years later in Boston in order to pay for further operations. At this time, Jane weighed 85 pounds and wore a 35-pound cast. On a theatre day, she would be carried to and from her home, and on and off stage 22 times, 44 times on matinee days.

After more agonizing time spent in the hospital, Jane began to concentrate on club work, because it was the most lucrative and her debts were tremendous. She devised a mobile, electrically powered piano which could be driven by her accompanist. Jane could sit on the piano and ride slowly around the floor.

After VE Day Jane decided she was well enough to go overseas again and in May of 1945 she sailed for France. She toured for 3½ months, covering over 30,000 miles and doing 95 shows. She sang in France, Germany, Austria, Czechoslovakia, Luxembourg and England. She finally had to end the tour because she dislocated a bone in her spine.

In December, 1945, Jane went into the hospital again. The Newspapermen's Annual Page One Ball named Jane the most courageous entertainer of the year. She went to the ball from the hospital, sang one song with Duke Ellington, received the award and returned to the hospital. She remained in the hospital for eight months.

An early marriage (to Don Ross) didn't work out for Jane, and during her illness, she received a divorce and married John Burn, the pilot who had kept her afloat after the Clipper crash, on March 12, 1948.

The summer of 1949 Jane was seriously ill again. Doctors described it as "battle fatigue" and suggested she go to the Menninger Clinic to continue recovery. Dr. Menninger helped her entire outlook on life and greatly improved her stutter. Jane returned home for good in March of 1950.

In the past year Jane has made numerous guest appearances on TV shows, including Milton Berle, Firestone Hour, Paul Whiteman show, This is Show Business, and the Ezio Pinza show. She has also made personal appearances at the Flamingo in Las Vegas and the Mocambo on Hollywood's Sunset Strip.

Late in 1950 Jane agreed that Lamar Trotti of 20th Century-Fox should translate her story to the screen. Susan Hayward was chosen to portray the part of Miss Froman and Jane began the task of recording 26 songs for the film. She also acted as technical adviser on the filming of her own story.

Since the making of the picture on the coast, Jane has spent most of her time in New York where she has bought and is now furnishing a house in the nineties. It is a five-story house, without an elevator, and Jane plans to have fun "running up and down those stairs." John Burn, now Captain John Burn, is a pilot for Pan American.

In November, 1948, Jane Froman returned to Columbia, Missouri, to reign as Cominghome Queen at the University of Missouri's Homecoming activities.

In the spring of 1951 she returned to Columbia to sing at the one hundredth anniversary of the founding of Christian College.

Another alma mater, the Cincinnati Conservatory of Music, awarded Miss Froman an honorary Doctor's Degree of Music. Her degree from the Conservatory was the first ever given a singer of popular music. Recently she received the Jewish War Veteran Annual Award for having done the most for wounded veterans.

The National Society for Crippled Children has recently given her its top award for "the inspiration she has been to others overcoming handicaps."

on campus

PRESIDENT GRATIFIED WITH SENATE ACTION

The following statement was released on February 28 by Dr. Frederick A. Middlebush, president of the University of Missouri:

"Speaking as president of the University of Missouri, I am extremely gratified with the action of the Missouri Senate in approving the \$6,000,000 appropriation to start the 4-year medical school and health center at Columbia. The recognition by the Legislature of the urgent importance of beginning this program without delay is encouraging to me personally; and, I am sure, to the members of the Board of Curators.

"This action of the Missouri General Assembly when approved by the Governor will make it possible for the University to achieve a goal it has sought since 1920.

"I am convinced that through the expansion of the four-year medical school and state health center at Columbia, the University can render a service now being rendered, for example, in agriculture through the College of Agriculture and Extension Service.

"Careful study of the experience in other states and of our own problem has convinced me and the members of the Board of Curators that we can make a good start on this program with the \$6,000,000 now approved by both houses of the General Assembly. It is true that we would prefer to have the full \$13,000,000 originally requested or the \$9,000,000 recommended by the special House committee. But we know that with the facilities already available we can provide the hospital and laboratory facilities for a first-class medical school of limited size, and graduate doctors to practice in the rural and other areas of our State. Once we have made the initial step now being opened up to us we recognize that there are several possibilities through which we may hope to secure additional funds as the needs present themselves and as the soundness of the program gains acceptance. Federal and state grants, private gifts, local support, and supplementary appropriations by the Missouri Legislature constitute such sources of future aid.

"The vital consideration is that we make a start on this program NOW. There has been impressive evidence presented to this session of the General Assembly to demonstrate the urgent need in this State for more doctors in rural areas and other services than can flow from a state-supported four-year medical school program. We welcome the opportunity to work cooperatively with all agencies . . . for the future progress of our great State."

1885

CHARLES GRIFFITH ROSS

1950

"First Appointee to a Professorship in the School of Journalism, University of Missouri; Distinguished Washington Correspondent, Editor of the Editorial Page and Contributing Editor of the St. Louis Post-Dispatch; Wise, Able Press Secretary to President Truman. Presented by his Post-Dispatch Friends, 1951."

ROSS PORTRAIT TO JOURNALISM SCHOOL

"Charlie Ross has come home," commented Dr. Frank L. Mott on February 12 when an oil painting of Charles G. Ross was presented to the School of Journalism of the University of Missouri.

The presentation was a tribute of friends associated with the St. Louis Post-Dispatch, the newspaper Mr. Ross served as Washington correspondent for many years. Joseph Pulitzer, editor of the Post-Dispatch, presented the portrait in behalf of the donors.

President Frederick A. Middlebush accepted in behalf of the University, Dean Earl F. English for the School of Journalism, and Arnold Bierman of

Clayton, Missouri, president of the Journalism Students' Association, for the student body. Dr. Mott, retired dean of the School of Journalism, spoke on the life of Mr. Ross.

The portrait, 24 by 30 inches, in a gilt frame, was made after a photograph showing Mr. Ross at the age of 55, by an artist of the firm of Harris and Ewing in Washington, D. C. The subject is shown in a dark blue suit, with a lighter blue tie with maroon stripes, and seated in a red leather chair. A bronze inscription tag on the frame bears the legend quoted with the picture on this page.

Mr. Ross was an instructor in journalism at the University of Missouri in 1908 when the world's first journalism school was founded. He became

a full professor in 1916. He resigned in 1918 to join the Post-Dispatch staff as Washington correspondent.

In 1933 Mr. Ross received a Missouri Honor Medal for Distinguished Service in Journalism from the school he had served ten years.

He was appointed President Truman's press secretary May 15, 1945, serving in that position until his death on December 5, 1950.

LAW SCHOOL GETS RARE BOOKS AFTER 30 YEARS

The School of Law at the University of Missouri has finally acquired a rare set of books, but it took 30 years to get the order filled.

The volumes are "Statutes of the Realm," which record the acts of the British Parliament over a period of five centuries—from 1215 to 1714. The eleven folio volumes, 13 by 20 inches in size, were printed in London between 1810 and 1824.

They include acts that were repealed during the five-century period, a feature that is lacking in another set of British law books, "Statutes at Large," published in 1764 and long owned by the School of Law.

Dean Glenn A. McCleary says the statutes repealed before that date are important both for historical research and because the Missouri Territorial Legislature, by an act of 1816 which is still in force, adopted as the law of Missouri the English statutes in force in 1606. He believes the rare volumes will be of great value as a basic tool in research.

It was in 1921 that Percy A. Hogan, law school librarian, sent out a standing order for the "Statutes of the Realm." A Canadian firm, one of the rare book dealers specializing in legal materials that he contacted, finally located the set only recently.

Evidently his order was kept in the firm's "live file" throughout the long search. The company's letter notifying him of the find began simply, "Thirty years ago you asked us for Statutes of the Realm," and went on to say that the books were available at last.

SCHOLARSHIP TO KELLY OUTSTANDING STUDENT

In February Richard Kelly, senior student in the University of Missouri's School of Journalism and a native of Fair Oaks, California, was presented a check for \$500 from the Delta Upsilon Educational Foundation as the outstanding student in an area including thirteen states and one province of Canada. The DU Foundation offers scholarships in six regions "To male undergraduates in colleges or universities in the United States and Canada who have leadership potentiality and have demonstrated some actual constructive achievement on their campus." They do not specify that the student be a member of the fraternity.

Kelly, a former editor of the Missouri Student, won recognition for the exceptional contribution he has made to the progress of student welfare through his editorials in the Missouri Student. He is a member of Savitar Board, and of Mystical Seven.

IN PITTSBURGH

There are a number of University of Missouri graduates and former students living in the Pittsburgh, Pennsylvania, area. Inquiries are often made about the possibilities of re-activating the Alumni Association for Pittsburgh and the surrounding district. Anyone who is interested in that project may call or write Mrs. Janice Kirk Milton, class of 1948. Her home telephone number is Valley 0706 and her business number is EXpress 1-2345—extension 4267. Mrs. Milton's home address is 962 Fifth Avenue, East McKeesport.

IN LOS ANGELES

Many graduates and former students of the University of Missouri enjoy the meetings of the Missouri "Show Me" Club of Los Angeles, California. In January 263 Missourians and their friends attended the dinner meeting. The Club meets on the third Friday evening of each month in the South Seas Room of Clifton's Cafeteria, 648 South Broadway.

IN WASHINGTON

John L. Graves, Jefferson City, was elected president of the University of Missouri alumni in Washington for the next year at the annual election luncheon.

He succeeds John T. Barker, former Missouri attorney general.

Others elected included Mrs. Margaret Ashburn, Kansas City, secretary and William L. Browne, Mexico, Mo., re-elected treasurer.

DR. WATKINS RECEIVES CITATION FROM N.A.R.S.T.

Dr. Ralph K. Watkins, professor of education at the University of Missouri, received recognition as one of the charter members of the National Association for Research in Science Teaching at the 25th annual meeting in Chicago in February. Dr. Watkins, who was president of the NARST in 1934, was also one of the speakers of the evening and took part in a panel discussion.

Dr. Watkins has three degrees from the University of Missouri; B.S. in 1916, A.M. '18 and Ph.D. '23. Mrs. Watkins is the former Clara Lois Lhamon of Columbia.

Once again, enrollment of freshmen students shows an increase over that of a year ago. The present freshman class of 1,540 is an increase of 300 over that of last year.

Scientists who study our fishes have heretofore recognized only 17 members of the sucker family among Missouri's fishes.

Rare volumes on early legislation of the British Parliament, recently acquired by the University of Missouri School of Law, are examined by Dean Glenn A. McCleary, standing, and Percy A. Hogan, law librarian. The books, printed in London early in the nineteenth century, are "Statutes of the Realm," covering the years 1215 to 1714.

LAW SCHOOL DAY UNIVERSITY OF MISSOURI April 25-26, 1952

The Law School Day program celebrating the 80th anniversary of the founding of the University of Missouri School of Law will be held Saturday, April 26, 1952. The usual spring events including the Law School Foundation dinner in honor of student members of the Missouri Law Review, the honorary initiations of Phi Delta Phi, Phi Alpha Delta, and Delta Theta Phi law fraternities, and the reunion of former members of these fraternities, have all been arranged as part of the Law School Day program. Reunions of the classes of 1932, 1937, 1942, and 1947 have been arranged. Hotel reservations should be made either with the hotel or through the secretary of the Law School not later than April 18.

Present officers of the Law School Alumni Association, elected April 28, 1951, are:

President, Waldo C. Mayfield, St. Louis; First Vice President, Clarence Woolsey, Springfield; Second Vice President, Frank Edwards, Mexico; Third Vice President, Ronald Reed, St. Joseph; Secretary, Jack Robertson, Kansas City; Treasurer, Wm. W. Beckett, Columbia, and Representative on General University Alumni Council, R. B. Oliver, III, Kansas City.

The opening event will be the annual dinner given by the Trustees of the Law School Foundation honoring the student members of the Missouri Law Review. The dinner will be given at the Daniel Boone Hotel on Friday evening, April 25. Preceding the dinner a reception will be held for the Trustees of the Foundation and those participating in the program. The Honorable Richmond C. Coburn of St. Louis, President of the Missouri Bar, will be the principal speaker at this dinner. Guests of the Foundation will include the administrative officers of the University, members of the Board of Curators, members of the Law School Faculty, and their wives. The Trustees of the Foundation have again invited as their guests the first year students in the Law School. Presiding at the banquet will be Mr. Louis V. Stigall of St. Joseph, President of the Law School Foundation.

On Friday night, April 25, for all alumni who may have returned to Columbia early there will be an alumni dinner at 7:00 o'clock at the Tiger Hotel. There will be no program and the occasion will be merely a reunion affair. Judge Waldo C. Mayfield, President of the Law School Alumni Association, will be in charge. The classes of 1932, 1937, 1942, and 1947 will hold their annual reunions at that time.

At 10:00 a.m., on Saturday, April 26, Judge Mayfield will preside at a meeting of alumni in the Law School Library. Election of officers of the Law

Alumni Association will be held. Following this meeting Phi Delta Phi, legal fraternity, will confer honorary membership on the Honorable Powell McHaney of St. Louis, President of the Board of Curators of the University of Missouri. Coffee will be served during the morning to all visitors in the Discussion Room of Tate Hall.

At noon Mr. and Mrs. Boyle B. Clark will give a luncheon at their residence, 245 Greenwood Avenue, in honor of the members of the graduating class and all members of the bench and bar who have returned to Columbia for Law School Day. Alumni, former students and friends of the school are invited.

At 2:00 p.m., the Junior Finals of the Case Club Competitions will be heard in the Law School Library by a special court assembled to hear these arguments, consisting of Judge Frank Hollingsworth of the Missouri Supreme Court; Judge Sam Wilcox, Sixth Judicial Circuit; and Judge Elmo Hunter, Sixteenth Judicial Circuit. The students making the arguments are: Derieth from Rochester, Crow and Gibson from Springfield and Murdock, Milan.

Also at 2:00 p.m., the Trustees of the Law School Foundation will hold their annual meeting. At 4:00 p.m., the annual initiation and meeting of the Order of the Coif will be held, at which time honorary membership will be conferred upon Richmond C. Coburn, President of the Missouri Bar.

The afternoon program will be followed by reunions of Delta Theta Phi, Phi Alpha Delta, and Phi Delta Phi.

The day's program will conclude with the annual banquet at 7:00 p.m., at Rothwell Gymnasium, at which Governor Forrest Smith and members of the Missouri Supreme Court and Federal Judges in Missouri will be guests of honor. Robert G. Storey of Dallas, Texas, who has been nominated by the State Delegates to the American Bar Association as the next President of that Association, will be the principal speaker. Mr. Storey was executive trial counsel to Mr. Justice Jackson at the Nuremberg trials of major war criminals following World War II.

POLMANTIER CHAIRMAN OF GUIDANCE GROUP

Dr. Paul C. Polmantier, professor of education at the University of Missouri and Director of University Testing and Counseling Services, has been appointed chairman of the Development and Activities Committee of the Personnel and Guidance Association. The annual meeting of the association will be held in Los Angeles March 31 through April 3.

Trout season in Missouri opened on March 1.

First Issue of Showme, campus humor magazine is issued: 1920.

A course in news broadcasting is begun in Journalism school: 1936.

Dr. Edgar Allen succeeds Dr. Noyes as medical dean: 1930.

Professor George Venable was in charge of the University Band: 1927.

Freshman caps are sold by the student council this year: 1923.

KFRU celebrated its first birthday: 1926.

Rita Hayworth chooses M. U. King of Hearts: 1942.

Missouri rescinds the "two sports" rule: 1934.

The tomahawk peace-pipe trophy is instituted between Missouri and Oklahoma: 1940.

The University budget is cut 20%: 1932.

"A New Mizzou, Planned by You" campaign to get suggestions from the students for changes in the University gets under way: 1944.

Margaret Davidson was Scoop queen: 1929.

Farmers' Fair is rained out on two successive days—first time in 17 years: 1922.

Move to re-organize student government: 1945.

The University Missourian Association was dissolved to be replaced by the Missourian Publishing Association composed of Alumni and former students of the school: 1921.

The legislature passes a bill cutting student fees from some \$120 a year to \$30: 1937.

Don Faurot unveiled the Split-T for the first time: 1941.

University announces that women employees who marry will be discharged: 1933.

Student activity fee is abolished; fraternities contribute \$10 each to support Missouri Student: 1938.

Missouri track team ended up last in conference for first time in history: 1931.

Worst flu epidemic since WW I strikes Cloumbia: 1943.

Charles E. Schooley was the Engineers St. Pat: 1928.

New University power-plant begins operation: 1923.

CAMP GORDON JOURNAL ENCIRCLES THE GLOBE

The Military Police Journal, a monthly magazine published in Augusta, Georgia, goes to policemen of the Armed Services and civilians interested in police and crime prevention work, throughout the world.

Started last August, the first issue was a one-page double-faced mimeographed sheet, issued to the then 34 members of the newly-formed Military Police Association at Camp Gordon. Colonel Ralph E. Pearson, who received his A.M. degree in Journalism at the University of Missouri in 1950, is editor of the publication, and Captain Norman L. Engard, also a journalist from the University of Missouri, is manager of circulation.

The result of a dream of many years, the Journal is justifying its being by its rapidly increasing circulation. By mid-November, with 1200 members, it was decided to start printing a magazine. By February 7,500 copies of the magazine were needed, and for the March issue 12,000 were ordered.

The March issue includes in its 20 pages an article on Air Transport Training by Captain Engard, who taught that subject in The Provost Marshal General's School. There is a congratulatory message from General J. Lawton Collins, chief of staff

of the U. S. Army, and an article about MP's in Europe by Brig. General W. H. Maglin, provost marshal there.

The Military Police Association is a professional association and is not a part of the military setup, although most of the members are at present on active duty.

On February 1 Colonel Ralph E. Pearson was made Chief of Civilian Components Department, a new department of the Provost Marshal General's School. He is responsible for the instructional material furnished by TPMGS to members of the Organized Reserve, National Guard and ROTC units of the MP Corps. This department also publishes the ORC Training Bulletin.

M. U. REPRESENTATIVE

Dr. W. Francis English, assistant dean of the College of Arts and Science, will represent the University of Missouri at ceremonies inaugurating Dr. Clyde Henry Canfield as the fifth president of Tarkio College in Tarkio, Mo., on March 27.

Inauguration ceremonies will be held in David Rankin Hall on the Tarkio campus beginning at 10:30 a.m.

Violent exercise after 40 is especially harmful if you do it with a knife and fork.

A six-man committee of SGA council members is appointed by the president, Tom Campbell, to investigate the problem of racial discrimination among students, the University administration, and civic and business leaders.

On Saturday, February 23, all women students were allowed to stay out until 1 a.m., provided their dates were willing to pay a two-cent fine for each late minute. The funds went to the World Student Service Fund.

Art Nunley, Lambda Chi, was crowned Jack of Hearts, at the annual AWS Heartbeat dance held in Rothwell gymnasium.

The 1952 AWS Careers Conference featured twenty speakers from various fields for women, who lead discussions concerning their occupations.

M Men have begun a drive to bar the wearing of high school athletic award letters by students on campus.

The Red Cross collected 348 pints of blood during its last drive. The next drive is scheduled for April 3 and 4.

A graduate of the University ROTC program praises the University unit and says the field artillery courses he just completed at Ft. Sill, Oklahoma, were "really a review of the courses taken at the University."

Student Government Elections are in full swing with the All Campus Ticket competing with the Missouri Student Ticket (ACT vs. MUST).

A new publication will appear on campus April 2, the SDX, published by Sigma Delta Chi, professional journalism honorary. Co-editors, Charlie Russell and Leon Larson say the magazine, which will sell for twenty cents, will not be completely "literary."

The 98th squadron of the Arnold Air Society, national organization for selected advanced Air Force ROTC cadets, has been formed at the University.

Lucille Heil has been installed as president of the University Home Economics Club.

The subject discussed when the Australian debate team met the University debaters was "Resolved: That this house prefers Groucho (Marx) to Karl (Marx)."

Mail sacks ready for Europe, Austria, Italy, Japan, Korea, Alaska, Puerto Rico, the Canal Zone, Hawaii and most of the states of the Union contain The Military Police Journal, published at Camp Gordon. Left to right are: Col. Francis E. Howard, commanding officer of the Provost Marshal General Center and first president of MPA; Col. Ralph E. Pearson, A.M. '50, editor of the Journal; Major John F. Jubeck, assistant secretary treasurer, and Captain Norman L. Engard, '48-'50, circulation manager.

The new Agricultural Laboratory Building has been designed for utmost efficiency and economy of operation. It is the first phase of a projected new Agriculture Building which will eventually extend across the whole south end of the East or White Campus.

On February 22 staff members of the College of Agriculture entertained the public at an Open House in the new Agricultural Laboratory Building on the East Campus at Hitt and Rollins.

Sponsored by Gamma Sigma Delta, the occasion was an opportunity to tour the \$800,000 building which contains laboratories for student use in the departments of Entomology, Forestry, Horticulture, Meat Processing, Vegetable and Fruit Preserving, and Soils, and for the use of the Agricultural Experiment Station.

The special effort made to design the building and the laboratories was evident. The equipment was chosen for functional use and efficiency throughout, and all materials were selected for durability and ease of cleaning. All the labs have north-lighted overhead monitor windows, supplemented by fluorescent lights, and all rooms have mechanical ventilation.

Individual attention and supervision is assured by arranging the capacity of any student unit in the new laboratory to accommodate not more than 32 students. The laboratory interior walls, floors, and tables are designed for maximum resistance to deterioration from chemicals, and all laboratories are located on the ground floor to eliminate stairs.

Forestry

Students in the Department of Forestry have contact with their new laboratory throughout their four years. Freshmen are introduced in a course in forest cartography, in which they learn the fundamentals of using lettering and drafting instruments in the preparation of forest structures and maps—a job they are likely to encounter at any time in their careers.

As sophomores, the students become acquainted with the endless quantities of fruits, foliage, bark and twigs which are the basis for the work in dendrology. Since the Columbia area is short on coniferous tree species, in contrast

AGRICULTURAL LABORATORY SHOWS RESEARCH PROGRESS

The Soils Laboratory shows an example of the removable drawer at each laboratory space, which, at the end of a class period, can be placed in a locker cabinet. This laboratory alone can thus accommodate 550 students weekly.

The equipment throughout the building was chosen for functional use and efficiency, and all materials were selected for durability and ease of cleaning. Here forestry students use stereoscopes, contour finder, sketchmaster and rectoplanagraph to interpret forest conditions from aerial photographs.

In the research laboratory of the Agricultural Chemistry Department, Henry Fukui, graduate student, showed visitors how to operate a micro analytical balance which can weigh to 1/1,000,000 of a gram.

Dr. Merle E. Muhrer (lower photograph) is using a Cary Recording spectrophotometer for measuring ultra violet and visible absorption and reflectance spectra of colored substance.

Agricultural Chemistry

The Department of Agricultural Chemistry analyzes each year over 1000 samples of fertilizers, which are collected as part of the fertilizer control project. Approximately 3000 samples of limestone are analyzed, in order to maintain the quality of the agricultural limestone used in Missouri.

The research program of this department is largely limited to fundamental problems of nutrition, which require laboratory equipment. A vitamin assay laboratory, chemical laboratories, and animal rooms are available for these studies. There is a room for special analytical laboratory work, a sample grinding room, rooms for spectroscopy and radioisotope work and for an electron microscope. The latter laboratory is available to any member of the University staff who may need the special services it provides.

The Spectrographic Laboratory is primarily concerned with the analysis of soils, plants, and other agricultural products for their trace element content. The trace elements are the tiny amounts of copper, cobalt, manganese, molybdenum, zinc, iodine, and others which must be present in soils in order to obtain good nutrition of the plants and animals grown on them. The emission spectrograph and accessory equipment in this laboratory provides the best method of measuring the very small amounts of the trace elements normally found in soils and living things. A sample to be analyzed is heated to a very high temperature in a carbon arc, so that the various metal atoms in the sample produce characteristic colors or wave lengths of light. The light is dispersed into a spectrum and then photographed on the emission spectrograph. These photographs are then examined to see how much of the trace elements were present in the sample. The laboratory is also equipped to perform other specialized types of analysis.

to the abundance of field material of hardwoods, familiarity with the conifers must be gained in the laboratory. Juniors study wood anatomy under the microscope and learn to make macroscopic identification of the commercially important woods. The vast quantities of wood samples and herbarium materials that are needed in the dendrology and wood technology courses are efficiently classified and organized in the extensive storage facilities that are available in the laboratory.

The intricate techniques of identifying the type of forest cover, determining areas of different classes of forest land, measuring tree diameters and heights, and measuring distances on aerial photographs are made easier by the excellent lighting of the laboratory. Seniors learn these short-cuts in modern forestry in their course in forest photogrammetry.

Soils

The New Laboratory for Soils provides the most modern equipment and facilities for study of the soil. Adequate storage space is provided for the bulky samples of various types of soil from the State of Missouri. Although most students of agriculture have lived on

the soil all their life, few of them have looked into the soil to find out what it is and how it nourishes plants. In the Soils laboratory students take the soil apart and learn the properties and the functions of each component as a foundation to a better understanding of the basic resource of all agriculture.

Edward Martin, instructor in agricultural chemistry, runs a filtration test in preparation for the determination of phosphoric acid in commercial fertilizers. This is done in connection with the fertilizer control program.

A dream of many years is nearing fulfillment in the development of the Entomological Museum, housed in the new Building. The Swallowtail, largest butterfly in the world (left) and the Hercules moth, whose wingspread of nearly 12 inches makes it also the largest in the world, were G.I. donations from the Southwest Pacific. Some exhibits in the Museum date back to 1895 when the collection was started.

Entomology

One of the best experiment station working collections in the country is housed in the new Entomological Museum of the Building. Fireproof, well-lighted and well-organized, it contains specimens ranging from tiny, full-winged insects which can be seen only with powerful microscopes to the largest in the world. It includes three private collections, along with collections to which the department has added since it was founded in 1895. Some insects have been preserved since that time.

The department's insect collection numbers 600 cases or approximately 200,000 specimens, including three private collections.

The department maintains 15 colonies of bees for classroom and experimental work and has a greenhouse for insect study and experimentation. Many of the general entomology classes and all the laboratory classes are conducted in the new building.

Horticulture

Although much research work of the Horticulture department must be done in the five greenhouses and on the farms, in the new building are held all the laboratory classes. These include General Floriculture, Fruit Production, Beginning Landscape Gardening, Plant Chemistry and the small fruit courses. Some plant propagation work is done here also. Again the lighting, the equipment and the convenience of the building have solved many problems of the department.

Food Processing

The food laboratories consist of more than 6,000 square feet of processing, refrigerated, and research laboratory

space and are the most modern in the country. There are complete facilities for processing meats, fruits, and vegetables with large cold storage and freezing rooms.

There are 1,500 square feet of air conditioned meat processing space (50 degrees F.) and 1,500 square feet of cooler and freezer space. With its sparkling stainless steel equipment and spacious facilities for expediting all phases of meat processing between slaughtering and retail packaging and distribution, the new building fulfills a need which has been apparent for many years.

Professor D. E. Brady, who is in charge of the Meat Research program, inspects freshly cured hams in the electrically-controlled smokehouse of the laboratories.

ENSMINGER ALUMS ARE A SEXTET

Between the years of 1926 to 1940, Mr. and Mrs. Jacob Ensminger of Grandview, Cass County, Missouri, sent six of their seven children to Columbia to attend the University of Missouri. Not all of them received degrees but some have earned two, so the balance remains the same—six Missouri degrees in the family, and two Ph.D.s from other Universities.

Harry Edward Ensminger, who now lives at Grandview, Missouri, attended one semester in the fall of 1926.

Garnett Ensminger attended from 1935 to 1940. He is now with the Carnation Milk Corporation in Los Angeles, California. His home address is 600 Birmingham Road, Burbank, California.

Marion Eugene Ensminger, B.S. in Agriculture, '31, A.M. '32, received his Ph.D. degree from the University of Minnesota and is now head of the Animal Husbandry Department of Washington State College in Pullman, Washington. Dr. and Mrs. Ensminger have one son.

Leonard E. Ensminger, B.S., in Agr. '35, is with the Agronomy Department of Alabama Polytechnic Institute in Auburn, Alabama. Mr. and Mrs. Leonard Ensminger also have one son.

Douglas Ensminger, B.S. in Rural Sociology, '34, A.M. '35, received his Ph.D. degree at Cornell University. Formerly doing Educational Research for the Extension Service of the U.S. D.A., he will spend the next two years in India and Pakistan with the Ford Foundation. Mrs. Ensminger, who was formerly Mary Morgan, '35, of Columbia, and the five young Ensmingers; Mary Ellen, Margaret Ann, Bill, Jean Ruth and Ricky, will go to India in May to make their home during this time.

Aileen Ensminger, now Mrs. Milton Bennett of Grandview, Missouri, attended the University in 1938 and '39. Mr. and Mrs. Bennett have two sons, James and Richard.

Perhaps this will clarify questions often asked concerning the Ensminger and Entsminger families.

TEMPORARY DORMS 4 AND 8 CLOSED

The University of Missouri closed two temporary dormitories this semester. Dormitory Number 4, one of the two semi-permanent residence halls located just east of Crowder Hall, was closed on February 20. Women's Dormitory 6, located at the corner of College Avenue and Rollins Street, was closed on February 27. Students living in these buildings were offered residence in the permanent dormitories or in approved off-campus housing.

MISSOURI

ALUMNI

SPORTS

ROUNDBALL ROUNDUP

One of Missouri's greatest basketballers of all-time, if not the greatest, closed out his career on a record-shattering note earlier this month, as Coach Wilbur "Sparky" Stalcup's Tigers wrote a 14-10 won-and-lost record into the 1951-52 books.

Husky Bill Stauffer, one of five senior lettermen in the Tiger camp, fired his closing blast in the windup triumph over Nebraska—and capped a tremendous season with 368 total points. This figure gave "Big Stauff" a three-year aggregate of 807 points, bettering the career record of 802 tallies, recorded by Dan Pippin in four varsity seasons.

Stauffer wiped the record-books clean in his final campaign as wheel-horse of Mizzou's courtmen. His 368 points far surpassed the previous highs for a single-season. Bud Heineman had held the one-season peak of 283 points in modern times, while George Williams' 311-point total, made in 1921, was the all-time record.

Earlier this year, Stauffer knocked off a third individual mark by nailing 31 points against Nebraska at Lincoln. When the 6-ft. 4 inch standout came to the end of the collegiate trial against Nebraska in Columbia on March 3, appreciative Missouri fans tendered him an ear-splitting ovation. For Bill—a regular on the Mizzou cage squad since his sophomore year—there just weren't any more worlds to conquer.

Four other seniors—Don Dippold, Don Zimmerman, Dick Adams and Bob Murrey—finished their tours of duty in that game, too. All were key figures in the Missouri's climb to a third place finish in the Big Seven conference race.

Highlights in Mizzou's cage battles were their spirited upsurge into the finals of the pre-season tourney at Kansas City, and grudging losses to Kansas State, 52-55, and Kansas 59-60—two of the nation's top-rated basketball squads.

In conference play, the Stalcupmen could have used just a couple of "good bounces" in their first four league defeats. They dropped four games to

Iowa State, Oklahoma, Kansas and Kansas State by a total of eight points—yet still finished with a 6-6 conference mark.

Stalcup pressed four freshmen into his lineup over the season, and these yearlings—Win Wilfong, Art Helms, Bob Reiter and Medford Park—produced handsomely—portending well for the future. Wilfong and Helms tripped over a scholastic hurdle at the semester, but are expected to get their

classroom work in order and be eligible next season.

- Here are Missouri's game scores:
- Missouri 48, Central 35
 - Missouri 62, Mo. Valley 48
 - Missouri 43, New Mexico A&M 38
 - Missouri 43, Iowa 48
 - Missouri 76, Ft. Leonard Wood 47
 - Missouri 53, Tulsa 60
 - Missouri 43, Arkansas 49
 - Missouri 49, Iowa State 42
 - Missouri 61, Oklahoma 49
 - Missouri 65, Kansas 75
 - Missouri 55, Iowa State 57
 - Missouri 59, Kansas 60
 - Missouri 59, Drake 50
 - Missouri 44, Colorado 41
 - Missouri 45, Oklahoma 47
 - Missouri 63, Drake 62
 - Missouri 60, Nebraska 55
 - Missouri 52, K. State 55
 - Missouri 56, Oklahoma 50
 - Missouri 58, K. State 86
 - Missouri 72, Colorado 55
 - Missouri 54, Kansas 65
 - Missouri 53, Iowa State 49
 - Missouri 68, Nebraska 53

Five seniors who completed competition at the University of Missouri on March 3 when the Tigers played Nebraska were Bill Stauffer of Maryville, rear, Bob Murrey of Waynesville, Don Dippold of St. Louis Beaumont and Dick Adams of Maryville, from left, and Don Zimmerman of Hancock-LeMay, front.

Highest Honor

as

Olympic Coach

Brutus Hamilton, quiet, scholarly and efficient, when selected as head coach, said, "It is a great honor and I feel very, very humble. After all, I am a professional coach, and to be head coach of a team representing the entire United States is an honor to be cherished."

Brutus Hamilton, appointed head track and field coach of the American Olympic team which will compete in the 15th Olympiad in Helsinki this summer, is certainly no stranger to the international games. The Athletic Director and track coach of the University of California has been active in all but one of the once-every-four-year games since his Missouri undergraduate days in 1920.

The appointment of Mr. Hamilton by the Olympic Selection Committee on February 2, is a fitting reward for many years' service in athletics in general and track and field in particular.

Hamilton's Olympic debut was made in 1920 as a participant, when as a University of Missouri undergrad he placed second to Norway's Lovland in the decathlon competition at Antwerp (Belgium).

From the San Francisco Examiner comes a story of a coincidence in the life of Hamilton that possibly steered his course along the channel it has taken.

The Olympic pentathlon and decathlon tryouts for the 1920 team were being held on the same field in Brooklyn only three days apart. Brutus was a sophomore at Missouri and Simpson, his coach, played a hunch.

"Go back early, kid, and enter the pentathlon," he said. "The five events

will give you a workout for the decathlon."

The youthful and virtually unknown sophomore went back alone. He got lost en route from his New York hotel to the site of the meet, arrived late and upset. Unsung, uncheered, unsupervised, he pushed through the first four events without any idea of how he stood in relation to his rivals. But he felt that his marks were inadequate, his performance a flop, his future dark.

As he waited for the final event, 1,500 meter run, he bowed his head in disgust and disgrace—a dejected, orphan figure.

It was then he was nudged by a photographer.

"You Hamilton?" he was asked.

Brutus nodded yes. They snapped his picture.

"Heh, what do you want my picture for?" the puzzled athlete inquired.

And the reply, like an explosion, came:

"You'll have to break a leg in this race to lose out, m'boy. You're the first guy to make the 1920 Olympic team."

Brutus didn't break a leg, he did win the meet, he was the No. 1 man on the Olympic scroll of that year.

"I've seen the sun come through the dark clouds—but never like it did that day," he now recalls. "It was the greatest athletic thrill I've ever experienced."

* * *

During his stay at Missouri, Hamilton was also named to Walter Camp's second All-American football team as an end. He also played basketball as well as starring in track. After graduation in 1922, Brutus taught at Neodesha high school in Kansas and in 1923 played on the National AAU title winning Kansas City Athletic Club basketball team.

The year 1924 was Hamilton's first as a coach and the year of his second try for the world decathlon title in the Paris Olympics. The current Olympic coach was eighth in the eighth Olympiad competition. After returning from the 1924 Olympic Games, Hamilton taught history and served as assistant football coach at Westminster College, Missouri. Hamilton introduced track to the small Missouri school and his teams won five titles in his five seasons as track coach.

In 1930 he moved to the University of Kansas as track coach and continued his remarkable career. Two of his outstanding stars while Jayhawk coach were Glenn Cunningham and Jim Bausch.

Cunningham was the first American to finish in the Olympic's 1500 meter run in 1932 and then finished second to Jack Lovelock in 1936. Cunningham is still rated by many as America's top all-time distance runner. Bausch won the Olympic decathlon title in 1932. Bausch and Cunningham won

the James E. Sullivan Memorial Medal in 1932 and 1933, respectively, for being the most outstanding athletes of the year.

Hamilton moved to California in 1932 and since then has developed many outstanding track stars. In 1936 Californian Archie Williams copped the Olympic 400 meter title. That year Brutus coached the Olympic decathlon team and under his guidance Glen Morris, Robert Clark and Jack Parker swept win-place-and-show honors in the toughest event of them all. Clark, a California protege of Hamilton's was also sixth in the broadjump.

Although there were no Olympics in 1940 and 1944, such California stars as Grover Klemmer and Hal Davis were outstanding world's champions in their specialties. Hamilton also coached a California mile relay team of Fay Froom, John Reese, Clarence Barnes and Klemmer to a still existing world mark of 3:09.4.

During the war Hamilton served as a briefing officer with the Eighth Air Force in England.

Aside from his work on the track at California, Hamilton also filled the position of Dean of Men in the early 40s. In 1947 he took over the position of Director of Athletics at the University of California. He was a committee of one to select a new football coach for California and his choice of Pappy Waldorf has been one of the happiest ones in UC history.

In 1948, although not actually connected with the US team, Hamilton was an observer and an overseer for California's 20 Olympic team members. The Golden Bear delegation was the largest single University group in the Games.

Hamilton, who serves on the Track and Field rules committee, will celebrate his 52nd birthday on July 19, the official opening of the Helsinki games.

BANGERT OPENS FUND-RAISING TOUR

Wilfred M. "Bill" Bangert, former University track and National A.A.U. shot put champion, presented the first concert of a nationwide singing tour for Olympic funds at the Stephens Auditorium on Wednesday, March 12.

Mr. Bangert, who lost his sight last year due to retinal hemorrhages, offered to help raise the \$250,000 figure still needed to send the United States team to the Olympic Games at Helsinki, Finland, this summer. He is still 6 feet 5 inches tall and weighs 270 pounds. He is totally blind in his left eye but still has a faint hope of regaining some vision in the other eye. A well-known baritone singer, Bill's interest in music has been secondary only to athletics.

He held the national shotput title

in 1944 and the weight-throwing championship in 1944 and 1945. In February he competed in the national shotput event at the National tournament in Madison Square Garden and placed fourth in the event, despite his handicap.

In 1947 Mr. Bangert founded Bangert Road Builders, Inc., in St. Louis. His two brothers and a sister are partners in the business. He also owns a filling station and has an interest in an asphalt supply business. He is married and the father of a year-old daughter, Sharon. He attended the University of Missouri in 1943-1945.

TRACK

When the final results were in at the Big Seven's championship indoor track meet this month, Coach Tom Botts' Missouri squad found itself in an unfamiliar niche.

After winning six of ten possible titles over the last five years—and bagging two runnerup places—the Gold and Black trackmen slipped to sixth place with 21 points.

Actually, after Kansas' clear-cut victory—the Jayhawks gathered 44 3/4

points—the next five finishers were separated only by five points. Kansas State was second with 26 3/5, then it was Colorado with 25 3/4, Nebraska with 25 7/10, Oklahoma with 22 and Missouri with 21. Iowa State trailed the field with 14 1/5 points.

Had Missouri's perennial hard-lucker indoors—hurdler Harold Carter—escaped the Kansas City jinx, the Tigers conceivably would have placed at least two notches higher.

Coming fast in the finals of the low hurdles, Carter hit the fourth barrier, fell heavily, and failed to finish. As a sophomore, the Lee's Summit senior had cracked into the same obstacle, finishing out of the money. Last year, he took a fourth in his specialty, and later discovered that he'd competed in the indoor championships with a broken bone in his foot.

Point-getters for Missouri were: Bob Fox, second in the two-mile; Bob Gorden, second in the high-jump; Bill Fessler, fourth in the high hurdles; George Baker, fifth in the low hurdles; Clayton Hall, fourth in the 880; Frank Dickey, second in the pole vault; and a third place by the mile relay team.

MARK COX GETS PROMOTION

Mark Cox, former University of Missouri Sports Publicity Director, has recently been named Advertising and Public Relations Director of the Wilson Sporting Goods Company. He succeeds Joe Risolute, who assumes an executive position with Ivan Hill Inc., Chicago Advertising Agency.

Wilson executives referred to the combining of the Public Relations and Advertising Departments under Mr. Cox's direction as one of the most significant organizational changes in many years.

Only five years ago Mark Cox organized the Wilson Public Relations Department, which today is considered one of the finest in its field. During these years, he has been entrusted with important additional responsibilities including the Directorship of sales and promotion of the Professional Baseball Division, and the School, College and Professional Football Division.

A native of Wyoming, Illinois, Mark received a Bachelor of Journalism degree in 1937. He has an extensive newspaper and publicity background. Included are important writing assignments with prominent Minneapolis and Chicago papers.

He served as student publicity man his last two years at Missouri.

Working on several newspapers as a sportswriter in the intervening years, Mark returned to his alma mater in

1939 and took over the job of University Sports Publicity Director. He did an outstanding job for the Tigers from 1939 to 1941, a period often called the Golden Era of Missouri athletics. The School produced its first Big Six champion in Mark's initial year and played in the Orange Bowl on New Year's Day of 1940.

Mrs. Cox is the former Ethel Marie Beaird of Champaign, Illinois. Their three daughters are twelve, eight and seven years of age. The Cox home is in Park Ridge, Illinois—1615 South Fairview.

MARK COX

Weddings

1941

LENORE RAINEY and EDWIN JAMES FORSYTHE, A.B., A.M. '49, on February 22 in Columbia. Mr. Forsythe is a member of the faculty at Christian College. The couple will live at 1616 Bass Avenue.

1942

Miss Patricia Michele Evers and THOMAS VINCENT GLENDON, B.J., on December 1 in Brooklyn. Mrs. Glendon is "Teen Talk" columnist for "The New York World Telegram and The Sun." Mr. Glendon is in the advertising department of Remington-Rand, Inc. Mr. and Mrs. Glendon will live at 35 Pierrepont St., Brooklyn.

Miss Pauline Buckler and ORVILLE HANCOCK, B.S. in Ed., M.S. '49, on February 14 in Magnolia, Arkansas. He is news editor of the Banner News in Magnolia, where the couple will make their home.

1948

MARY JANE FOWLER and Dr. M. Hirsch in December in Cleveland, Ohio. The couple are making their home at 2715 E. 116th, Apt. 33, Cleveland, Ohio.

Miss Norma Oldridge and JOE ARTHUR BURNS, B.S. in Bus. Admin., on February 3 in Springfield, Illinois. Mr. Burns is employed with B. F. Goodrich Company in Springfield. Mr. and Mrs. Burns are living at 815½ S. Eleventh St., Springfield.

1949

PEGGY WHITE and JACK DONALD STEPPELMAN on February 14 in Jefferson City.

Miss Alberta Elizabeth Arrington of Wichita, Kansas, and JACK Y. FOSDICK on February 2 in Webb City. They will make their home in Wichita, where he is employed at Boeing Aircraft corporation.

Miss Gladys Meinstein of Jersey City, and LLOYD W. GOLDBERG on January 27. Mr. Goldberg is a Design Engineer. The couple are at home at 56 E. 6th St., Clifton, New Jersey.

1950

BERTEL MARGIT ROSENTOCK, Sioux City, Iowa, and HAROLD L. LEWIS, December 19, in Omaha, Nebraska.

BARBARA ROSS STEWART and WILLIAM PRESTON BEAVERS in Princeton, New Jersey. After a wedding trip to Jamaica the couple is living in Clayton, Missouri.

Miss Betty Lou Wise and JOHN FORD COOK on January 4 in Piedmont, California. Mr. and Mrs. Cook will make their home at 10 Pala Avenue, Piedmont.

CLAIRE MADELEINE SUDDERTH and KENNETH RAY STRANDBERG, B.S. in M.E., on January 26 in Little Falls, New Jersey. Mr. Strandberg is employed by the United States Metals Refining Company in Carteret, N. J. The couple are living in Metuchen, New Jersey.

Miss Mila Zenaty and JOHN PATRICK CONNELL, B.J., on February 14 in New York City. Mrs. Connell is instructor in modern dance at Stephens College. Mr. Connell is appearing on television shows in New York City.

MARY MARGARET KEALEY of Macon, and MAURICE W. MEDLEN, B.S. in B.A., of Annapolis, Maryland, on February 8 in Columbia. Mrs. Medlen is a senior at the University. Mr. Medlen is employed in St. Louis.

Reunion Day June 4

What would you like to know about the classmate whom you have not seen since your last year on the campus at the University of Missouri?

What's he doing now? Where has he lived all these years?

If you are planning to attend our reunion activities in June, these questions are among the many you will be asking others of the group.

If you can not attend, why not stop now and write us a letter? Ask yourself all those questions about yourself and send us the answers.

This will serve a threefold purpose. It will be a worthwhile contribution to the University records, some of which have been neglected since that graduation date. Second, we will be able to answer a few more questions asked by those who attend the Reunions. Third, it will give us news notes for THE MISSOURI ALUMNUS, that others of your class may read of you, and may enjoy knowing where you are.

Please let us hear from you.

110 JESSE HALL

Miss Damae Willis of Pattonsburg, and EMMETT T. FIELD, B.S. in Agr., of Savannah, Missouri, on February 3 in Bethany.

JULIA LEE BROWN and Lt. Gerald H. Maschan on February 14 in St. Louis, Missouri. The couple are living temporarily at Langley Field, Virginia, where Lt. Maschan is stationed.

NORMA JEANNE BRANHAM of Sturgeon and PAUL JUNIOR SIMS of Columbia on February 1 in Columbia, Missouri. Mr. and Mrs. Sims will live at 1408 Bass Avenue, while he completes his studies in mechanical engineering at the University.

MARTHA ANNE REID and DONALD E. KUENZI, A.B., B.S. in Med. '51, on August 20 in Carrollton, Missouri. Mrs. Kuenzi is teaching third grade at Bryant School in Kansas City, Kansas. Mr. Kuenzi is completing medical studies at the Kansas University Medical Center. They are living at 1500 W. 37th St., Kansas City, Missouri.

1951

JOANNE FLORENCE MAUK, '52, and GENE GIRARD KASSELBAUM, both of Ferguson, Missouri, on December 24. Mrs. Kasselbaum has resumed her studies at the University of Missouri School of Arts and Science and Mr. Kasselbaum returned to Ft. Riley, where he is serving in the armed forces.

Miss Mary Jeanne Payne and Lt. RAYMOND C. LEWIS, Jr. February 2 in St. Louis.

ELIZABETH BENNITT, '52, and ROBERT S. DENEBEIM, A.B., on February

5 in Columbia. The couple will make their home at 512 South Westland St., Tampa, Florida.

PEGGY DEVOE COOK of Mt. Vernon, and DON MEIKLEJOHN, B.J., of Kansas City, February 10 in Mt. Vernon, Missouri. Mr. and Mrs. Meiklejohn are living in Kansas City, where he is employed by the Kansas City Star.

HELEN ELIZABETH HAIGH of Jefferson City, and JOHN HUTT SHACKELFORD of Kansas City, on February 9 in Boonville, Missouri. The couple are making their home in Kansas City.

BARBARA JEAN BARTHELME, B.S. in Ed., and Cpl. George Howard Rumberger, Jr., on February 16 in St. Louis. They will live temporarily in Orlando, Florida, where Cpl. Rumberger is stationed with the Army.

PATRICIA ANN LEMMEN, and PAUL DAVID PARADISE, B.S. in Bus. Admin. '49, on December 29 in Canton, Missouri. Mr. Paradise is employed by the Martin Chevrolet company in Canton.

Miss Patricia Ann Premer and LLOYD MARSHALL LARKIN February 16 in St. Louis, Missouri. Mr. Larkin is a research analyst of the Division of Resources and Development of the State of Missouri. The couple will live in Jefferson City.

ROBERT E. GALLUP, C.E., is vice-president of the Ebbe Construction Company in Trenton, Missouri.

1949

BENJAMIN B. MORRIS is advertising and sales promotion manager for Disco Distributing Company in St. Louis, Missouri. Disco Distributing Company is the distributor in St. Louis, eastern Missouri and southwestern Illinois for Motorola radio and television products. His address is 437 East Bodley, Kirkwood 22, Missouri.

Lt. ARNOLD BENCH, who for the past year has been teaching mathematics and map reading at the Marine Corps Officers' Training School in Quantico, Virginia, recently was reassigned to the Marine Barracks, Washington, D. C. Mrs. Bench is the former ILA MAY KELLY, graduate in home economics.

WILLIAM R. SALLÉE is Farm Advisor for the University of California. His address is P.O. Box 502, Visalia, Calif.

A. L. OLIVER, Jr., is assistant advertising manager of the Shelby, Ohio, Daily Star.

VERNON R. RUCKER, formerly of Brunswick, Missouri, was graduated on January 31 from the American Institute for Foreign Trade at Thunderbird Field, Phoenix, Arizona. He received a degree of Bachelor of Foreign Trade. While at Thunderbird Mr. Rucker was associate editor of the student publication and was a member of the Propeller Club of the United States.

MYRON H. MARKS, B.J., is a clerk in the G-2 (Intelligence) Section of I Corps in Korea. Before arriving in Korea on January 9, 1952, Pfc. Marks attended a special military intelligence course at Fort Bragg, N. C.

STANLEY ALBERT, B.J., has joined the staff of the Exposition Press, New York book publishing firm, as assistant to the director of publicity. Before going to New York he served three years in the air force and worked for the Voice of America, adapting Russian and Greek fables to contemporary situations.

C. CHARLES PETERSON, B.&P.A., U. S. Naval Air Corps Ensign, recently was transferred to the VC-4 Naval Air Station at Atlantic City, New Jersey, from the Station at Key West, Florida. His duty involves night fighter training with the fleet.

Lt. and Mrs. RICHARD ERBSCHLOE announced the birth of a daughter, Debra Sue, on February 7. Lieutenant Erbschloe, who received a master's degree in 1951, is stationed at Scott Field, Illinois.

1950

RICHARD GRIGSBY SHEPARD, former student of the University of Missouri,

received his degree from Northwestern University School of Speech. Last summer he toured the Straw Hat circuit, playing Marchbanks in Olivia De Havilland's "Candida." At present he is with the Bahama Players in Nassau, the Bahamas. Mrs. Shepard is the former Jean McMillan of Chicago.

LES STROTHER, B.J., is civilian editorial specialist for Camp Polk in Louisiana. He was formerly employed by the El Dorado Daily News, the Southwest Citizen, and the Lake Charles American Press, all in Arkansas. He reported to Camp Polk last August.

URBAN A. SHAFER, formerly manager of Missouri Valley Farms at New Haven, Missouri, assumed duties on March first as associate County Agent of Cooper County, with offices in Boonville, Mo.

CHARLES B. STEERS, B.J., is the new editor and advertising manager of the Missouri Legionnaire, published in Jefferson City, Missouri. After receiving his degree, he became a reporter and feature writer for the Jefferson City Post Tribune.

BILL B. NICHOLS, B.E., is a development engineer with the general engineering laboratory of General Electric in Schenectady, New York. Mrs. Nichols is the former JEAN BRANNUM, B.J.'49. Their address is 528 Curry Road, Schenectady 6, New York.

DON E. LAMBERT, B.J., of Springfield, Missouri, and a former announcer for KFRU in Columbia, is associate editor of Future Magazine, a Junior Chamber of Commerce publication at Tulsa, Oklahoma. Mr. Lambert resigned as publicity director for Southwest Missouri State College to accept the new position.

Mr. and Mrs. JACK LESHER announce the birth of a daughter, Barbara, born January 11. Mr. and Mrs. (MARJORIE POPE) Leshner live at 7144 E. Tyler, Tulsa, where Mr. Leshner is employed by the Tulsa Appliance Company.

1951

Four members of the class of 1951 enrolled as junior year medical students at the State University of Iowa in Iowa City are FRANKLIN A. CROZIER, ROBERT TRIBBLE, ROBERT H. EASTERDAY and Miss LOIS SCHILLIE.

PAUL M. ROBINSON, of Boone County, Missouri, has resigned as KFRU staff announcer, music librarian and continuity writer to take a position with KGAR in Garden City, Kansas. He is employed there as commercial traffic manager and continuity director. Mrs. Robinson is the former Freda Baker.

JAMES L. WIKOFF, A.M., is working for Chase National Bank in New York City. A brother, Kent, is a student at the University of Missouri.

Deaths

1890

Mrs. Charles H. Stumberg, A.M. '91, formerly NANNIE COLEMAN of Columbia, Missouri, on February 6 at her home in Baton Rouge, Louisiana. In 1895 she was married to Mr. Stumberg, who was a professor of modern languages at Louisiana State University. Mr. and Mrs. Stumberg had six children, four of whom are survivors. Mrs. Stumberg was prominent in civic and social affairs of Baton Rouge. Her three sisters, Manie, Mattie and Gussie, live in Columbia, Missouri, at 203 Fourth Avenue.

1902

WILLIAM CLYDE JOHNSON on February 15 at his home in Columbia, Missouri, following an illness of several years. Mr. Johnson has taught school and served as county superintendent of schools in Audrain County. In 1927 he moved to Columbia from Vandalia, Mo. Mrs. Johnson, a son, W. DeLaporte Johnson, '31, and a daughter, Mrs. Mary Nan Ringo, '37, survive.

1912

GUS VAHLKAMP, secretary and general counsel of the Automobile Club of

Missouri and a nationally recognized authority on highway matters, died suddenly on February 3 as a result of a heart attack. Mr. Vahlkamp celebrated his 30th year with the Auto Club last October. He is survived by a son, John H. Vahlkamp, and a daughter, Mrs. John L. Stinson, Jr., both of St. Louis.

1913

Mrs. George F. Shulze, formerly MYRTLE POTTER, on December 28 in Maplewood, New Jersey. A native of Mound City, Missouri, Mrs. Shulze was a graduate of Kirksville State "Normal" School and taught a number of years in northwest Missouri. Mr. Shulze is an electrical engineering graduate of the University of Missouri, 1915. Survivors include Mr. Schulze of the home at 24 St. Lawrence Avenue, Maplewood, New Jersey, one son and one grandson.

1917

Mrs. Ira Drymon, formerly RUTH BARNES, on February 23 at her home in Lexington, Kentucky. Mr. Drymon is a 1918 graduate of the College of Agriculture. Survivors are Mr. Drymon, two daughters and a son.

1918

Miss ROBERTA LEE HOWELL, B.S. in Ed., B.J. '21, A.M. '26, on February 17 at her home in Columbia, Missouri. After teaching 41 years in the public schools of Columbia, Miss Howell resigned last May. She was born in Monroe County, near Paris, and had always been active in civic and professional groups.

1937

CHARLES EDWARD BARNHART, B.J., on February 23 in Peoria, Illinois, of head injuries suffered in an automobile accident. Mr. Barnhart, who worked in the continuity department of Station KFRU while a student at the University of Missouri, has been program director of station WMBD at Peoria the past three years. Before that time he had worked as actor, writer, and continuity director at radio station KMOX, KXOK, and WTMV in St. Louis. Mrs. Barnhart and three children survive.

LADIES DEPARTMENT

MRS. J. P. ROYALL, Principal—1890-1891

Almost twenty years ago the Legislature of Missouri opened the doors of our State University to young women. For some years the number who had the courage to accept the offer was small; but year by year the department has grown. Parents and daughters have wisely estimated the extraordinary advantages, both educational and financial, to be found in the University. Today the department outranks in numbers, perhaps any female college in the West. And, in point of higher educational advantages and the expense necessarily attendant thereupon, the State University, with her able Faculty and large resources, must certainly head the list of schools desirable for the daughters of Missouri. There is no longer a special "course for girls." Our young women have equal advantages with the young men. It is conceded, too, that their class record is quite equal if not superior to that of the young men. The old objections to co-education can no longer be urged. Every provision is made which health, comfort, convenience or propriety could demand. A lady principal is provided, whose chief duty it is to chaperone the young ladies connected with the University while at all times she cordially gives to them the counsel and sympathy of a friend.

The cheerful conformity of the young ladies to all the rules pertaining to their special department, together with their uniform kindness and consideration, has made our association a pleasure and not a burden. As a rule, they have been quiet and lady-like in their demeanor, bearing themselves with a modesty and dignity which should be an encouraging evidence to the State of the great benefit bestowed upon the country in the impetus thus given to the development of genuine womanhood.

Uniform

It is desirable, for many reasons, that the dress of the young women be simple and inexpensive. Simplicity in dress, right in itself, is peculiarly becoming in a student, for it saves time, money and thought to be consecrated to higher uses. It is desirable also that young women identified with the University be distinguished from all others, and that distinction in the classroom between the rich and the poor be avoided. By the adoption of a uniform this can be readily and effectively

When Nannie Coleman Stumberg, of whose death you have read in this issue, attended the University of Missouri more than sixty years ago, the life of a co-ed was a bit different from that of today. This article, copied from the University of Missouri Annual Catalogue, tells the story of those "Gay Nineties." Mrs. Stumberg was the second woman to win the Stephens Medal for Oratory, the first being Ella Dimitt Hoffman early in the '70s.

ly accomplished. Therefore, to avoid extravagance on the part of some and embarrassment on the part of others, and to disarm criticism, all young ladies attending the University are required to adopt, as their daily attire (the weekly and special holidays excepted,) the following uniform: A walking suit of black woolen goods, with trimmings of the same color. During the first month of the first semester and the last month of the second semester, a white waist or basque may be substituted for the black waist or basque. The shape and material of the hat are determined by the taste of the wearer; the color and trimmings must be uniformly black.

The trimming must be characterized by simplicity, and all flowers, feathers and ornaments are excluded from the uniform hats.

Each young woman must be provided with a water-proof cloak, with an umbrella and with rubber overshoes. In winters of this climate, it is imperative that our lady students take every precaution toward the preservation of their health.

The above regulation dress is prescribed by the Faculty, and made a condition of admission or continuance in the institution, under the special authorization of the Board of Curators, and a penalty of ten demerits is entered for each day's violation of this rule; and it will be borne in mind that 100 demerits exclude the student from the institution, and 25 debar from all public appearance in the Literary Society exhibitions or contests.

Literary Society

The young women have one literary society, the Philaethean. The young ladies of the more advanced classes have a larger representation in the

Philaethean Society this year than ever before in its history; and the exercises of its last open session, especially the original exercises—the addresses, orations and essays were pronounced by competent judges as very creditable.

Through the late magnificent additions made to our University, the Philaethean Society was provided with a larger and more convenient hall. Their hall can be lighted by either gas or electricity, is carpeted and handsomely but expensively furnished, and is one of the most commendable for good taste in the State. These generous provisions have very naturally stimulated the girls to greater interest in society work, and their membership is steadily on the increase.

The young ladies are provided also with a neatly furnished study hall communicating with the lady principal's office, and also with convenient dressing room and cloak room. These rooms all lie together on the first floor of the east wing, and make a genteel and admirable suite for the convenience and comfort of the young ladies. They have free access to the Library, also, as Study hall.

A young Woman's Christian association has recently been established in the University. There are already thirty active members, and eight associate members. The girls are doing zealous and earnest work, which with divine blessing cannot fail to produce a rich harvest.

A total of 6,803 students registered in the Columbia divisions of the University of Missouri during the current semester. Of this number, 1606 are women.

M.U. NEGROES FIND EQUALITY GRANTED

At a recent meeting of the League of Human Rights in Columbia, a panel of negro students from the University of Missouri unanimously agreed that equal privileges have been extended to them at the University. Panel members include Grant Carter, who received his A.M. degree in February; Theodore Wroten, junior electrical engineering student from St. Louis; Charles Mitchell, freshman electrical engineering student from St. Louis, and William Purnell, graduate student in agricultural education from Charleston, Missouri.

TESTS WILL RECOGNIZE HIGH SCHOOL SENIORS

The University of Missouri will award a "certificate of recognition" to the senior adjudged the student of highest scholastic promise in each accredited Missouri high school participating in the Statewide Testing Program. A student who receives one of the certificates automatically becomes eligible to apply for one of the University's Board of Curators' Scholarships valued at \$100 for use in any division of the University within the year following his graduation from high school.

The student of highest scholastic promise will be chosen on the basis of scores made in the Statewide Testing Program and his scholastic rank. This program is offered free by the University to all accredited high schools in Missouri, both public and non-public, and the tests are furnished and the scoring done by Dr. W. R. Carter and his staff at the University. The Testing Program is at present using the Ohio Psychological Test.

To be eligible for a certificate of recognition, the student must rank in the upper twenty per cent of his class for the first seven semesters. He must also be a resident of Missouri, graduate of an accredited high school, and use the scholarship within a year after graduation.

MEDICAL FRESHMEN HONOR DR. GULICK

The Anatomical Review, traditional dance and entertainment program provided by the freshman class of the School of Medicine at the University of Missouri for the school's sophomore students, this year was dedicated to Dr. and Mrs. Addison Gulick.

According to Ben Koon, freshman class president, this is the first time that the Review has been dedicated to any one. The event was held at the Columbia Country Club on February 22.

Dr. Gulick, professor of physiological chemistry, is now in his fortieth year as a member of the School of Medicine faculty and reaches retirement age this spring. His first appointment was as instructor in 1912, and he was promoted to professor in 1921. He has served as chairman of the biochemistry department since 1930.

TRAILERS WILL GO

The University of Missouri has given official notice that Dairy Lawn and GI City trailer camps will be closed on June 10. The trailers are to be sold and removed, and the sites restored to their former condition.

An echo is the one thing that can cheat a woman out of the last word.

Hell Week That Was

(Re-written from the January 1937 Alumnus)

Nowadays the "rugged" type of Hell Week is more a weak memory than anything else. Present day Hell Weeks require a relatively small amount of nonsense, and one University fraternity has turned it into a week of charitable work for the pledges. The decline of the torturous period of fraternity life probably began here during the latter part of the '30's, when Dean of Men Albert K. Heckel waged a constant warfare against the practices then prevalent. Some of them deserved constant warfare.

Torquemada roasted recalcitrants over slow fires and boiled heretics in oil. Nero threw Christians to the lions and Puritans burned witches. But sometimes these were pale in comparison to Hell Week practices. In the old days the real "men" were those who could absorb the greatest punishment and live.

Take this hypothetical situation. Pledges locked in Room 13 on the third floor; ordered to strip to the birthday suit; properly painted and decorated; made to engage in a completely ridiculous circus parade; freely subjected to the wooden paddle; well coated with mustard and mercuriochrome; tied together in groups of three and four in the coal bin; served a meal of Spanish onion and epsom salts frappe. Generally this was all performed in the spirit of good fun, though the pledges may have offered a different opinion.

One house required pledges to dress up in shorts in mid-winter and trapeze out to the city cemetery to search for a certain tombstone inscription. The fact that it was near-zero weather, and the cemetery was some thirty acres containing hundreds of headstones was a rather interesting factor. The same house required a member to raid the University hog barn and drive a brace of good-sized mamma pigs down Conley and into the Davis Tea Room. By mysterious means known only to pledges, this was accomplished with suitable mayhem.

Another remarkable youngster was dumped out on a country road, ten miles out of town and told to return

to the house with a white Scotty dog and a message on old Man Smith's tombstone. This was unbelievably accomplished in the dead of a winter night.

One stunt (not at Missouri) was instrumental in bringing about the downfall of the old Hell Week. As a climax to the week of hazing and paddling, one exceptionally bright group chose to toss a pledge from a second story window with a rope around his neck. Someone neglected to measure the rope to the proper length and it proved fatally short. This and similar cases moved the National Pan-Hellenic Council towards action which eventually caused the rough-house tactics to disappear from Hell Week.

Milder forms of Hell Week were the painting of signs and pictures on rival fraternities or campus sidewalks, or raiding parties to other houses to capture chapter cups, pictures or furniture.

But even in the old days, Hell Week had its lighter side. One house pledged a boy from Panama who knew as much about American customs as he did about vegetation on Mars. Consequently at the end of rush week he proudly showed the brothers his collection of handsome pledge buttons. He thought that the buttons were souvenirs given to all visitors and he accepted one at every house. Then he selected the house with the most attractive pin. He thought nothing of it when he found himself the lone male at a sorority rush party—the result of a practical joke.

It is doubtful that anyone mourns the passing of the old Hell Week or carries a torch in the hope that it will return. It was brutal, childish and unnecessary. But now that it has passed, there's still an occasional grin or satisfied sigh in its recollection.

Editor's note:

The original article was written by James H. Padgitt, B.J. '37, A.M. '39. The latest information available at this time concerning Mr. Padgitt is that of 1940, when he was a press bureau correspondent with International News Service in Los Angeles, California. Can you bring us up to date?

Intersectional rivals on Missouri's 1952 football calendar include Maryland, California, Southern Methodist and Oklahoma A & M.

Bob Gorden, Tiger track captain, has twice won the Big Seven's outdoor high jump crown, tied for the title indoors in 1950—and holds Miz-zou's freshman and varsity records in his specialty.

Second in the nation in forward passing offense, the University of Missouri's 1951 team did not place any of its individual passers in the top-fifty bracket.

Junior Wren, Missouri halfback recently drafted by the Cleveland Browns, led the Tigers in three offensive departments during 1951—rushing, punting and kickoff returns.

Defense is on the lines!

"LONG DISTANCE, PLEASE!"

Seems that's what everyone is saying these days — in factories, offices, army camps and navy yards . . . on farms, in homes, in shipyards and arsenals.

For America is doing a big job in a hurry. To speed things up and get work done, the nation depends on Long Distance. So, it's "full speed ahead" for thousands of telephone men and women, too.

They're putting through four times as many Long Distance calls and twice

as many teletypewriter messages as in 1940. Millions of miles of Long Distance pathways have been added — in wires, in cables, and by radio-relay.

Even that is not enough. More of everything is being built as fast as we can get materials.

For America's defense is on the lines, and telephone people are getting the message through.

**YOUR LONG DISTANCE CALL
WILL GO THROUGH FASTER,
IF YOU CALL BY NUMBER.**
