

MISSOURI
Alumnus

JANUARY 1957

It's actually easy to save—when you buy Series E Savings Bonds through the Payroll Savings Plan. Once you've signed up at your pay office, your saving is done *for you*. The Bonds you receive pay good interest—3% a year, compounded half-yearly when held to maturity. And the longer you hold them, the better your return. Even after maturity, they go on earning 10 years more. So hold on to your Bonds! Join Payroll Savings today—or buy Bonds where you bank.

Safe as America—U.S. Savings Bonds

The U.S. Government does not pay for this advertisement. It is donated by this publication in cooperation with the Advertising Council and the Magazine Publishers of America.

“Don't worry, I'm not going to sing”

THE OLD LADY had lost her voice. That rich, vibrant contralto which had rung through opera's golden age was long gone. And she made no bones about it.

Standing at the network microphones, she'd loudly promise her audience: “Don't worry, I'm not going to sing.”

Yet, every Christmas Eve, she did sing. And millions of homes hushed to listen. For *Stille Nacht, Heilige Nacht* does not demand a big voice. Rather, a big heart.

And Ernestine Schumann-Heink had always had that. From the beginning, when she threw away her budding career for love, only to wind up deserted with her four children. Through World War I, when she sang to sell Liberty Bonds while she had sons fighting—on both sides. Right up to the end of her turbulent life, she stayed warm, generous and brave.

Naturally, her adopted country loved her. Because Americans admire heart, and as the little stories in every daily paper show, they have plenty of it. That's one of the vital reasons why America is strong and why her Savings Bonds are a tremendous guarantee of security.

The heart and strength of 165 million Americans stand behind these Bonds.

There could be no better guarantee. So, for yourself, and for your country, invest in U.S. Savings Bonds regularly. And hold on to them.

THE MISSOURI ALUMNUS

is published monthly except August and September by the University of Missouri Alumni Association, 101 Read Hall, Columbia, Missouri and mailed to all active members in the Association. Entered as second class matter under the act of March 3, 1879. Active membership \$4.00 a year; life membership \$80. Member, American Alumni Council

Founded in 1840, the University of Missouri School of Medicine (the oldest medical school west of the Mississippi River) has given devoted and faithful service to the people of Missouri for more than a century. The faculty and staff, the graduates and alumni of the University of Missouri School of Medicine have become distinguished in many fields of medical science and medical practice.

Space will not permit the listing of all alumni deserving of recognition, but numbered among them are two of the world's leading neurosurgeons, the late Dr. Walter Dandy of Johns Hopkins University in Baltimore and Dr. Glen Spurling of Louisville, Kentucky; Dr. Howard A. Rusk of New York City, Professor of Physical Medicine and Rehabilitation at New York University-Bellevue Medical Center; the late Dr. Richard L. Sutton, Sr. of Kansas City, eminent dermatologist; the late Dr. Thomas G. Orr, Professor and Chairman of the Department of Surgery at the University of Kansas for many years; Dr. Frederick C. Robbins, Professor of Pediatrics at Western Reserve University in Cleveland, Ohio, and the only Nobel prize laureate to be numbered among the graduates of the University of Missouri; Dr. Elexious T. Bell, world renowned pathologist at the University of Minnesota; and many, many others. Dr. William Worrall Mayo, father of the Mayo brothers, Charles and Will, and founder of the Mayo Clinic, Rochester, Minnesota, received a degree of Doctor of Medicine from the University of Missouri in 1854, slightly more than one hundred years ago. The men associated with the Department of Anatomy at the University of Missouri in recent years read like "Who's Who in Anatomy" and include such famous names as Scammon, Jackson and Wells at the University of Minnesota; the late Dr. Edgar Allen of Yale University; Dr. Oscar V. Batson, Chairman of Anatomy at the University of Pennsylvania Graduate School of Medicine; and Dr. William U. Gardner, now Chairman of the Department of Anatomy at Yale.

With such a distinguished heritage of teaching and service to the people of Missouri, the creation and establishment of the new University of Missouri Medical Center at Columbia can only serve to inspire the faculty and staff of the newly recreated Four-Year Medical and Surgical School to even greater achievements in medicine and allied health fields. We should like to review here the functions of the modern medical school as we visualize them today.

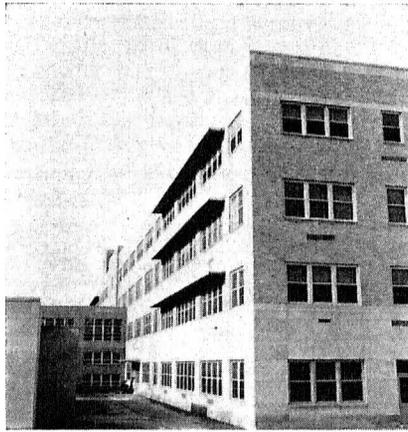

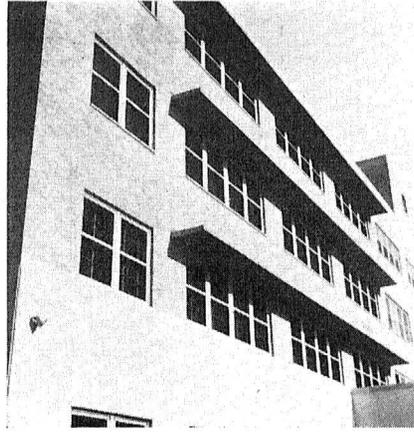

First and foremost is that of teaching—teaching not only of physicians but of nurses in all categories of nursing practices, dietitians, medical social workers, medical record librarians, physio-therapists, laboratory technicians, radiologic technicians, anesthetists, pub-

lic health workers and a host of other health personnel which enhance both the scope and the quality of the practice of the individual physician. Nor must it be lost sight of that teaching prevails at all levels of instruction—elementary, undergraduate, graduate and postgraduate. The University of Missouri School of Medicine has as its objective the training of general practitioners for the State of Missouri, especially for the rural areas.

Second among the functions of the modern medical school is that of service to the sick and the afflicted. In a sense, the care of patients transcends all other considerations; but it is listed secondly only to emphasize that the primary reason for the existence of the medical school and its affiliated hospitals is that of teaching rather than service to the sick. However, the faculty and staff of the University of Missouri Medical Center stands ready to assist practicing physicians and to serve the people of our great State to the limit of their time and facilities.

The third great responsibility of the modern medical school is that of research into the nature of disease. It can be stated without fear of contradiction that the progress in medical science in the past fifty years has exceeded that of the preceding five million years! It can be stated furthermore that the advances in medical science are probably greater than those of any other area of human endeavor. Since 1940 alone, the discoveries of medical science have virtually revolutionized medical care and medical practice. These discoveries and advances are reflected in greater longevity, increased social and economic usefulness of the individual patient, the ease of pain, the shortening of morbidity, the restoration of mental and spiritual well-being, the prevention of disease—to mention but a few. The faculty and staff of the University of Missouri Medical Center feel keenly their obligation to continue to delve into the unknown, to push back the frontiers of medicine, and to expand the horizons of our concepts of disease. Once these discoveries become apparent, an unparalleled opportunity presents itself to disseminate this knowledge so that all may benefit; this is one of the fascinating challenges of postgraduate medical education.

Finally, the physician is always a citizen in the highest tradition. Infrequently, the mass or group approach to particular problems of health and welfare is necessitated. On such occasions, the faculty and staff of the University of Missouri Medical Center welcome these opportunities for further service to the communities of Missouri.—*Roscoe L. Pullen, M.D., Dean, School of Medicine.*

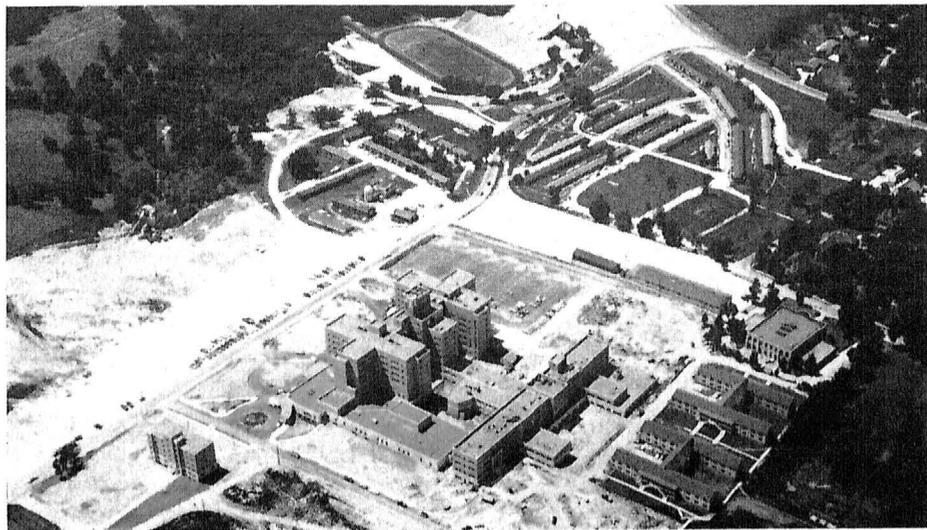

Missouri's

When the University of Missouri Medical Center was being built, persons in authority were predicting that it could very well be the finest of its kind. The optimistic outlook stemmed from the fact that the best features of existing medical schools were being incorporated into the Missouri project, and that some of these were being improved.

The visitor who makes a complete tour of this \$13,600,000 development (for which he must be sound of limb and long on stamina) is likely to agree that the early forecast of superiority has been justified. Missouri's Medical Center is magnificent.

From the standpoint of physical appearance alone, the mammoth structure (actually a series of impressive buildings) dominates the community and the country-side as well. Nearby Memorial Stadium is no match for it as an eye-catcher. The air traveler sees it when he is far from Columbia, and the motorist driving in from the south spots it first while he is miles away.

Making up the Medical Center is the 441-bed Teaching Hospital, which has eight floors; the four-story Medical Sciences Building, with which it is connected; and the five-story Nurses' Residence Hall, about half a block east of the other buildings and connected to the University Hospital by a tunnel at ground floor level.

Medical Center

The building frames are mostly reinforced concrete, with exterior walls of buff brick, trimmed in limestone. The hospital and the Medical Sciences Building are joined at their centers on the first and second floors by a corridor containing an auditorium, a library, general staff offices, and research laboratories. Both the Medical Sciences Building and the connecting corridor are designed to be built up to the seventh floor.

The *Alumnus* reader who has been away from the campus a long time may wonder about the exact location of the Medical Center. These guideposts may help: The Men's South Dormitory Group (Defoe Hall, etc.), which is just south of Rothwell Gymnasium and Brewer Field House, is a short distance east of the Medical Center. Crowder Hall is slightly west and north. The Stadium is perhaps a quarter-mile to the southwest, and Observatory Hill is in between. If you walk south on Ninth Street past Jesse Hall, across Conley Avenue and down Allen Place, you're in direct line with the entrance to the Medical Sciences Building (pictured on our cover). But you won't reach it from this route; your way is blocked by the concrete wall of old Rollins Field. One day this wall will be removed to make way for a thoroughfare between the Medical Center and the Jesse Hall area, a distance of about eight blocks.

Moving day to the new Center from the University's Hospitals on South Sixth Street came in mid-September. By then the essential floors of the Teaching Hospital were functioning efficiently.

Opening of the Medical Center was hailed by President Ellis as "one of the most significant additions to the University's programs in this century, and certainly one of the most important developments in higher education in the State of Missouri." He said the University looks forward to development of the Medical Center as a major move in supplying better medical care to the State of Missouri, "particularly the rural areas which are not now adequately served. This applies to physicians, nurses, and all kinds of medical personnel."

How widely is the Medical Center serving the State of Missouri this early in its existence? A six-months' report, ending December 31, and actually covering only three months in the new quarters, shows there were 1,061 patients received from 90 of Missouri's 114 counties for a total of 15,295 patient days. Patients admitted during December, the third full month of operation, represented 62 counties. In the first six months, Boone County, as was to be expected, ranked first in the matter of patient days and the value of medical care received. However, in second place was Pemiscot County, roughly 300 miles from

MISSOURI'S MEDICAL CENTER

Columbia; and in third place was Laclede County.

The four-year School of Medicine will produce 75 graduates each year under the training of a skilled faculty whose numbers have been greatly increased with the development of the Center. Dr. Roscoe L. Pullen, who as dean has "nursed" the new school from its formative days, virtually combed the country to bring in additional highly competent personnel recognized in their fields. Building the teaching and research staff was but one of the early tasks of Dean Pullen whose myriad duties as medical director hold him to a rigorous schedule.

A word description of the Medical Center, floor by floor, may seem more exhausting than a personal tour of the plant, but it might provide the reader some indication of the extensive facilities. It is impractical to reproduce floor plans because they would have to be sharply reduced for these pages. (The Teaching Hospital, for example, covers an area about 350 feet by 450 feet.)

The hospital's main entrance, which faces south toward Stadium Road, is protected by a concrete slab roof more than 100 feet long and curved to follow the contour of the loop of the entrance drive. The lobby is about 40 by 50 feet. On the first floor are most of the administrative offices, as well as the pharmacy, a 70-foot-long record room, the blood bank, the emergency rooms and the large outpatient facility as well as a beautiful nondenominational chapel which was a gift to the Board of Curators from Mr. and Mrs. John Epple of Columbia. The outpatient department extends the full depth of the hospital building on the east side. All clinical facilities for the outpatient department are located on one floor. The waiting room is over 60 feet long and has one desk for information and another for appointments. Each of the six outpatient divisions has its own smaller waiting room with a clerk's desk and surrounding examination and treatment rooms.

The emergency department has two operating

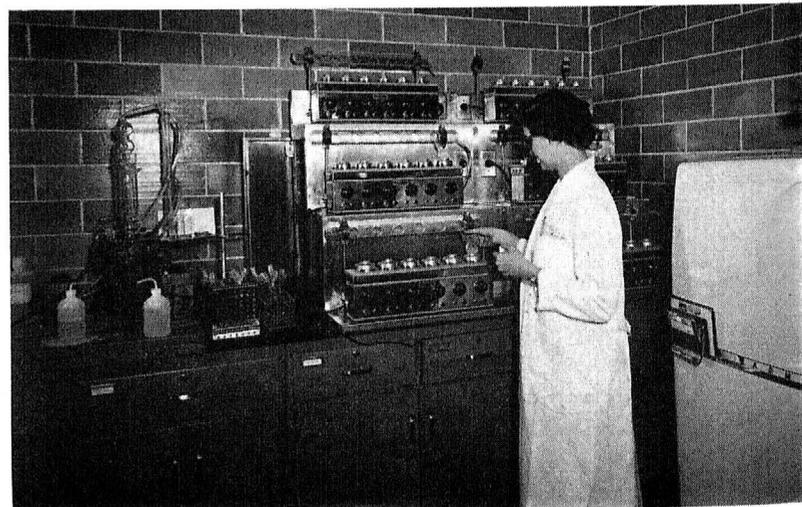

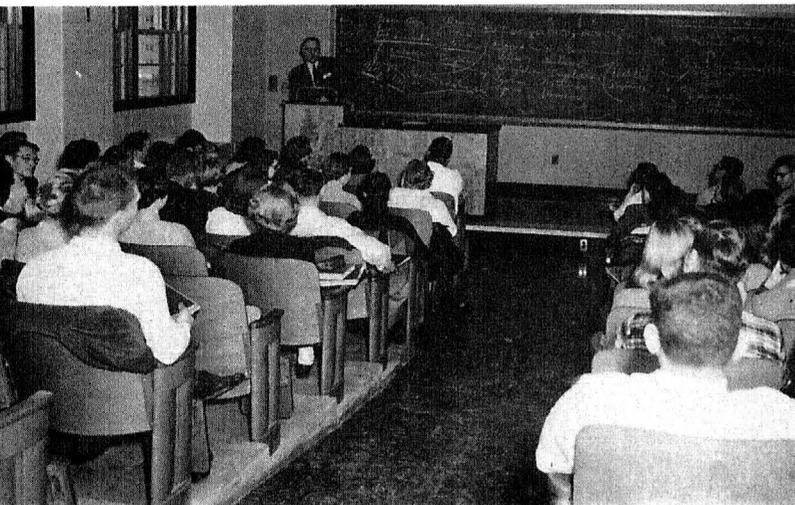

rooms, a dental room, several treatment rooms, a nurses' station, waiting space, and intern's bedroom.

The main patient entrance (which is pictured on page two) is at the southeast corner of the building. The inpatients are separated from the outpatients at the information desk and go to their adjacent waiting rooms. Interview rooms are available to both departments and all patients may have blood tests, specimen tests, and chest X-rays made in one department of the admitting laboratory.

The second floor houses the laboratories of the heart station, laboratories for pulmonary-cardiac function tests, routine laboratories, a large central supply room, X-ray, therapy department, and an extensive radiology department. It also includes a large filing room for the storage of X-ray film, and various offices and laboratories.

One of the most extensive surgical suites in the midwest is housed on the third floor where there are eight operating rooms, one of which is equipped for the later installation of closed circuit color television. Another operating room is equipped for isotopes, and two more for biplane radiology. There are two cystoscopic rooms. A huge recovery room has outlets from the central suction system, the central oxygen system, and ten beds separated by curtains. The third floor also has a neuro-psychiatric ward, extensive physical therapy facilities, a surgeons' lounge, and various other rooms and offices.

The fourth, fifth and sixth floors are for patients of medicine, surgery, gynecology and related medical and surgical fields, respectively. The typical floor has 113 beds arranged in four nurses' stations of about 28 beds each. There are 16 private rooms, 31 double, a three-bed room, and eight four-bed rooms. There is a toilet for every room as well as a lavatory and a built-in wardrobe for each patient. Also on the typical floor are four patients' bathrooms, four toilet rooms, two treatment rooms, a student conference room, the supervisor's office, an intern's office, a student labora-

tory, a small waiting room, an intern's bedroom, a classroom, offices and office laboratories for the medical faculty. On each of these floors is a charting room, one located behind each of the nurses' stations, for the use of the students.

The seventh and top floor of the hospital consists mainly of the obstetrics and pediatrics departments, containing bedrooms, a delivery suite, nurseries, waiting room, offices, classroom, and laboratory.

The ground floor has a cafeteria, kitchen, bake shop, and snack bar.

Six high-rise automatic elevators, two of them service elevators, are located in the lobby. They serve all seven floors and the ground floor. Another service elevator is in the west wing. The central passenger elevators have a system of electronic control.

All corridors of the building are protected from the abrasions of carts by colored structural glazed tile wainscoting. Corners are protected by steel corner guards. The heavy traffic areas have terrazzo floors, and all corridors have acoustical ceilings. The lavatories have wainscots of ceramic tile.

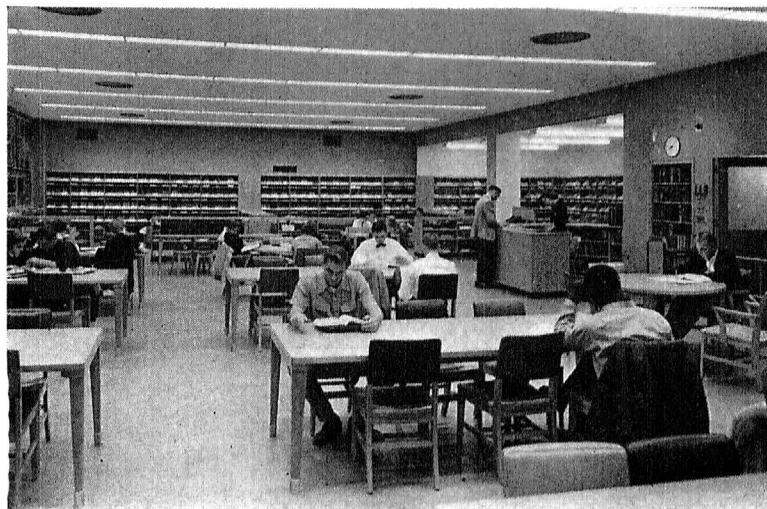

Oxygen and suction, piped from central systems, are available in all patient rooms, operating rooms, recovery rooms, and at other necessary places.

The architects specified a pneumatic tube system for the big unit as a means of speeding communication and to eliminate a special messenger service. About one-fourth of the building is air-conditioned.

The auditorium joining the hospital to the Medical Sciences Building contains 342 seats. It is equipped for movie and color television projection. The adjacent library will house 100,000 volumes in two tiers of stacks; the reading room seats 150.

The first floor of the Medical Sciences Building is on a level with the first floor of the hospital although the entrance to the former building is on the second floor, due to a rise in the grade. On the first floor are

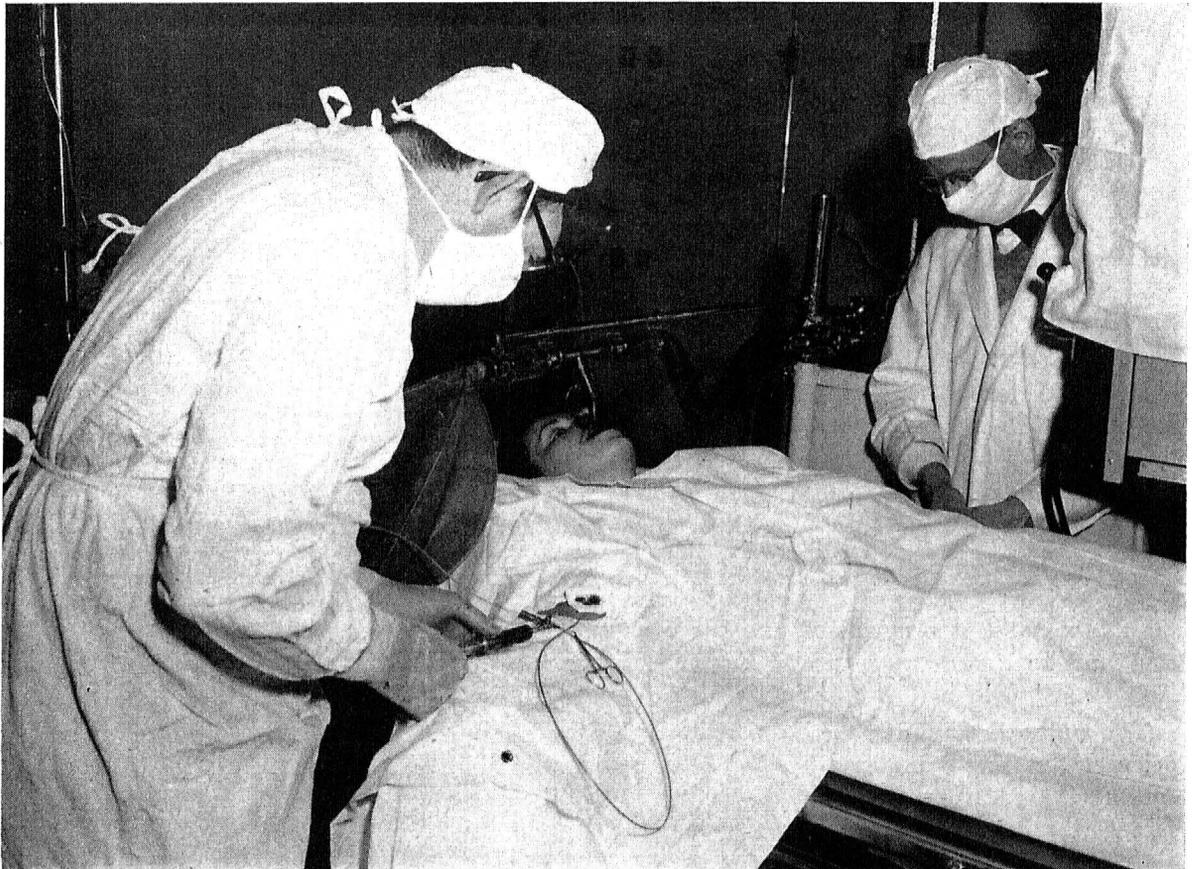

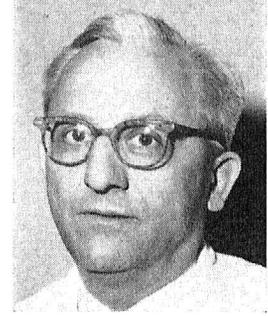

(Continued on page 22)

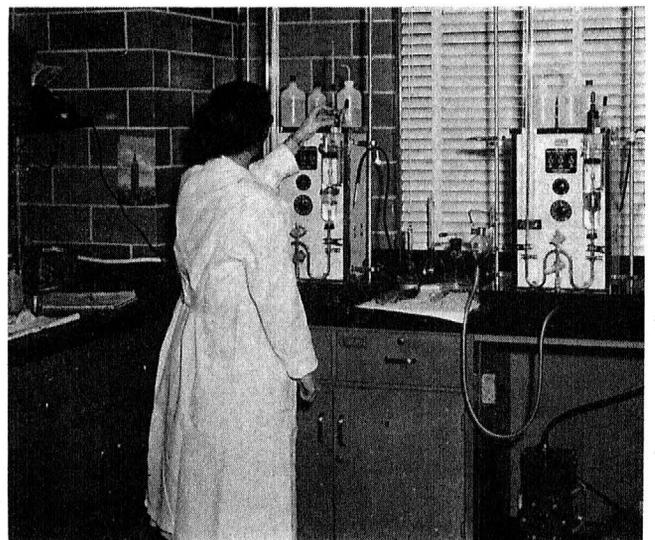

The length of hospital corridors is indicated in the view above. In the pictures from left: One of the comfortable and well-lighted lecture rooms, here being used in physiology; technician at a Kjeldahl apparatus used in analysis for nitrogen, in Central Pathology Laboratory; the Library reading room, which seats 150. About 780 journals are received, and there is stack space for 100,000 volumes.

MISSOURI'S MEDICAL CENTER

MISS RUBY POTTER, R.N.
Director, Nursing

Above, student nurses observe as instructor demonstrates bedside nursing techniques. The lounge of the Nurses Residence Hall, at left, is a popular spot when the students have time to relax a bit.

MISSOURI'S MEDICAL CENTER

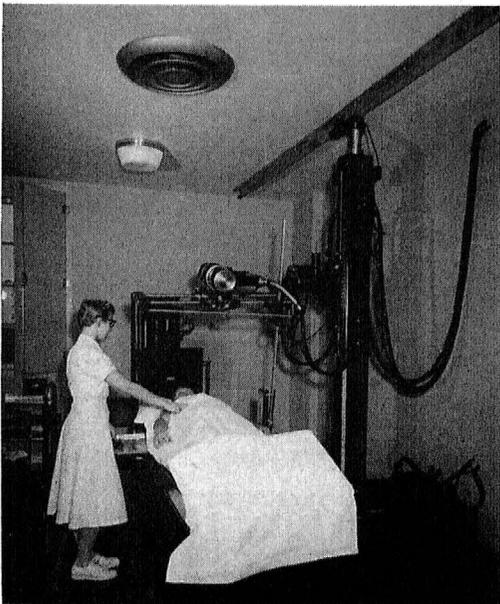

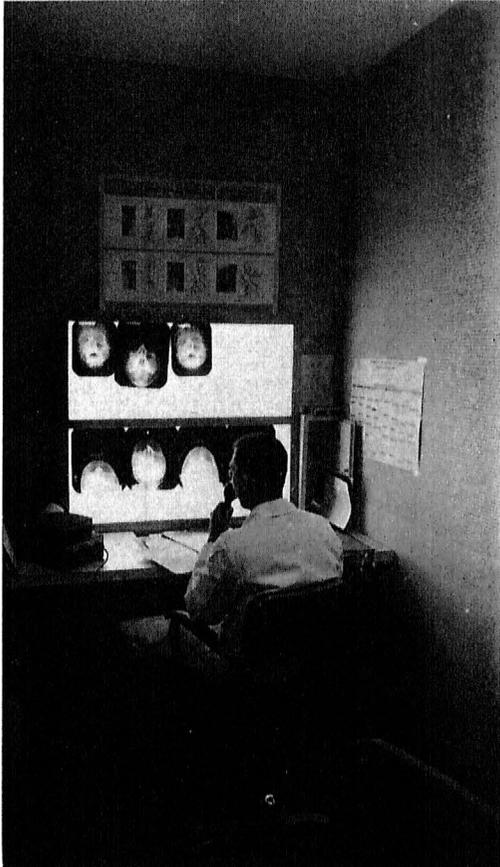

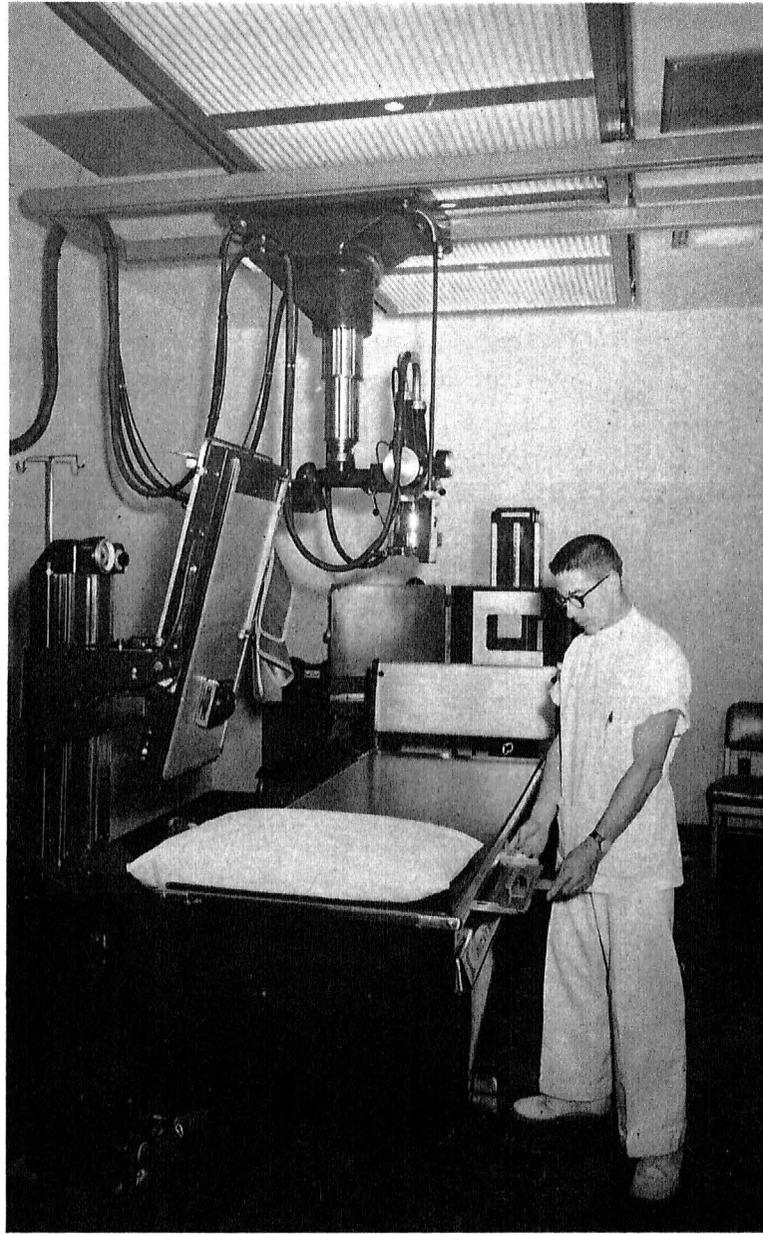

DR. M. D. OVERHOLSER
Chairman, Anatomy

First year medical students studying tissue are shown in this microscopic-anatomy laboratory. At left, a recording spectrophotometer used in identification of certain compounds. It is also used in research and toxicology.

DR. GWILYM S. LODWICK
Chairman, Radiology

Three radiographic rooms are equipped with combination radiographic-fluoroscopic machines identical to the one shown above. Instructor in radiology, top left, dictates his interpretation of a roentgen examination for transcription to the referring physician. At left, registered technician positions patient for special body-sectioning technique of X-ray examination.

MISSOURI'S MEDICAL CENTER

DR. HUGH E. STEPHENSON, JR.
Chairman, Surgery

The Medical Center has a total of thirteen operating rooms. Eight are in the surgical suite on the third floor of the Teaching Hospital. One of these is equipped for the future installation of closed circuit color television. Two operating rooms are in the emergency department, and others are in the outpatient department where minor surgery is performed.

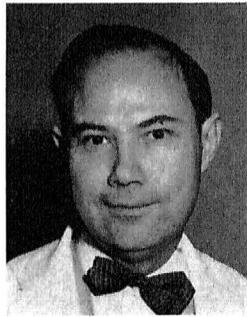

DR. FRANK B. ENGLE, JR.
Chairman, Microbiology
Assistant Dean

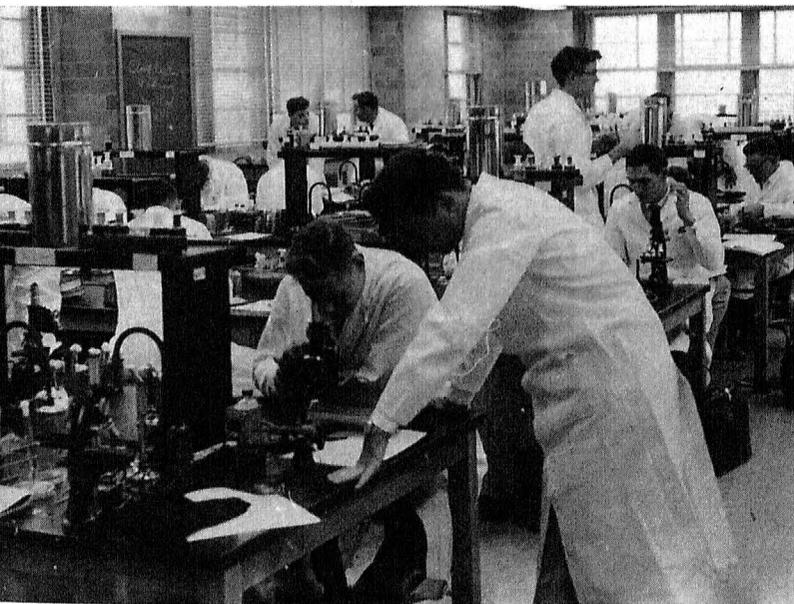

DR. JOSEPH E. FLYNN
Chairman, Pathology

DR. ROBERT L. JACKSON
Chairman, Pediatrics

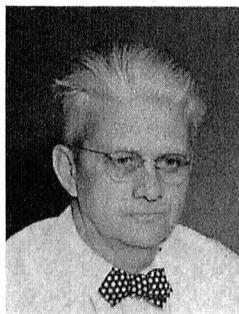

DR. THOMAS D. LUCKEY
Chairman, Biochemistry

Microbiology-pathology laboratory.

DR. JACOB S. RODEN
Chairman, Obstetrics
and Gynecology

DR. BERTIS A. WESTFALL
Chairman, Physiology
and Pharmacology

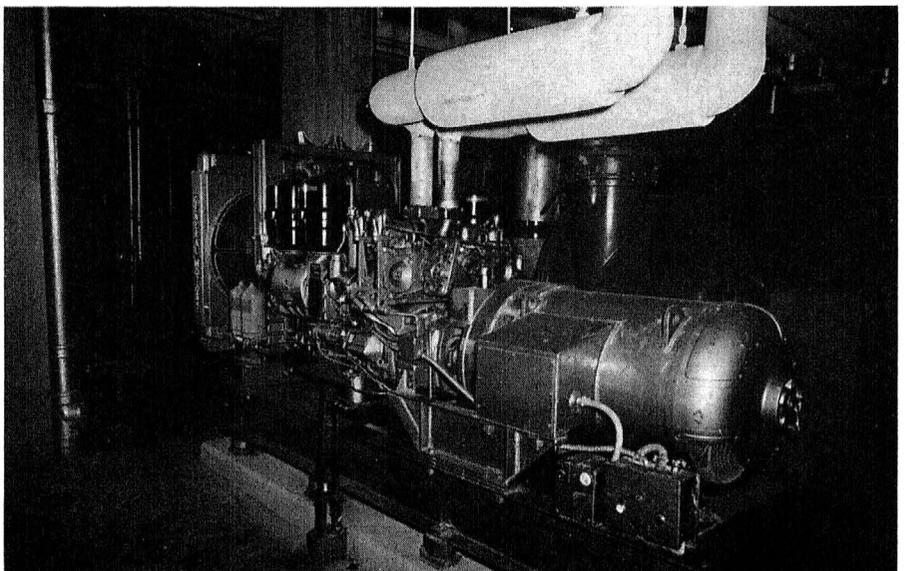

Food is prepared for all floors of the hospital in the large modernly-equipped kitchen.

A cafeteria on the ground floor is operated for the convenience of staff members, employees, and students.

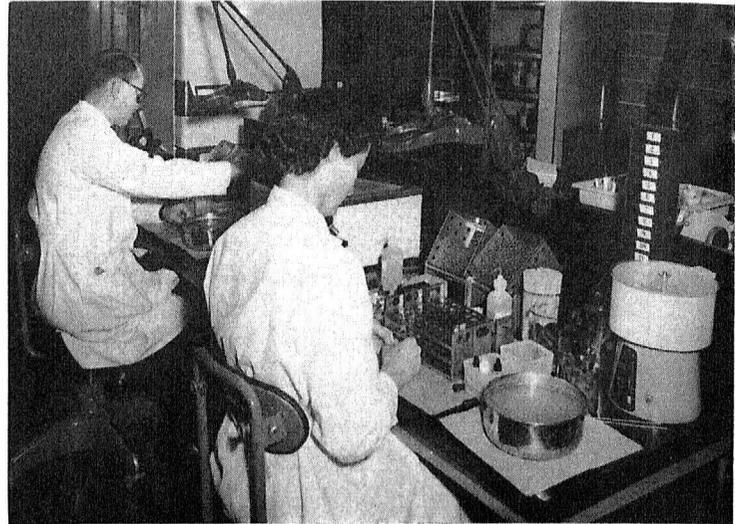

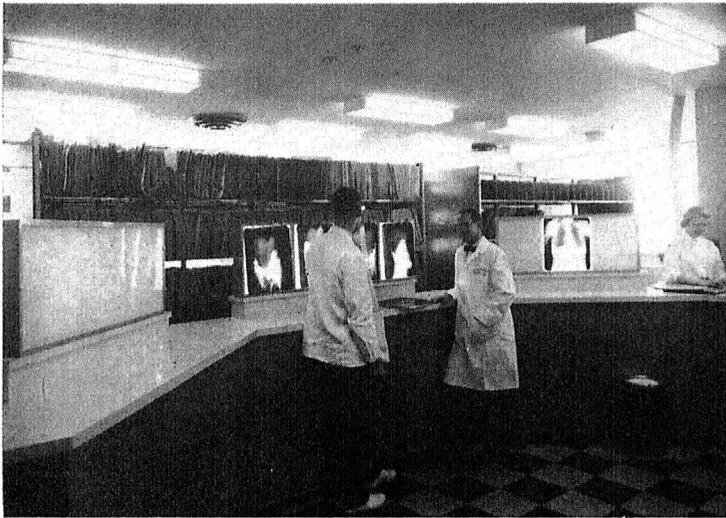

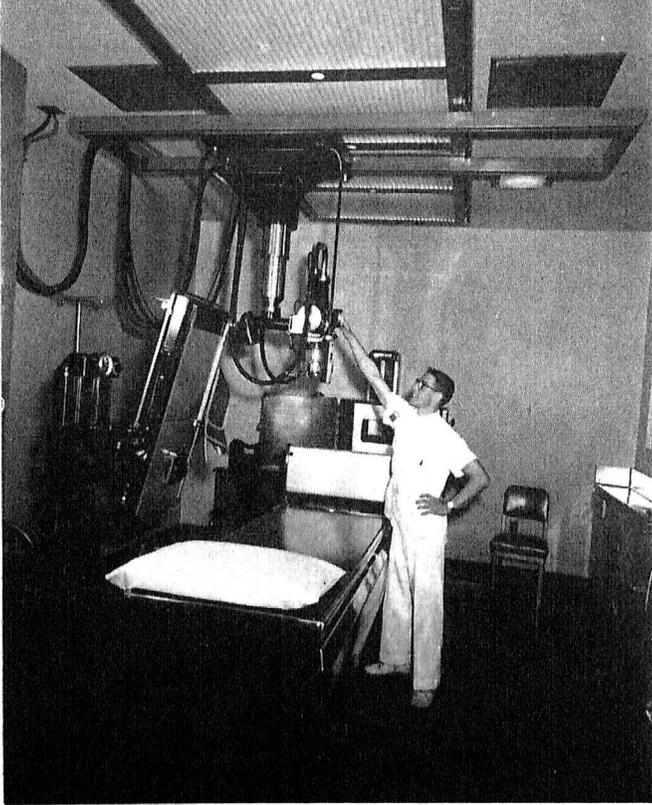

Extensive mechanical equipment on the ground floor includes this emergency generator, which would come on automatically to maintain essential functions of hospital if regular power sources failed.

The waiting room of the outpatient department is spacious and comfortably furnished. Thus far patients have come to the Medical Center from 90 of the state's 114 counties, some from distances exceeding 300 miles. The department has separate bays for six divisions—medicine, surgery, obstetrics-gynecology, psychiatry, eye-ear-nose-throat, and pediatrics. Patients are accepted for both the inpatient and outpatient departments by referral from practicing physicians in Missouri. All categories of patients—indigent, part-pay, and full-pay—may be admitted. All patients must be teaching patients.

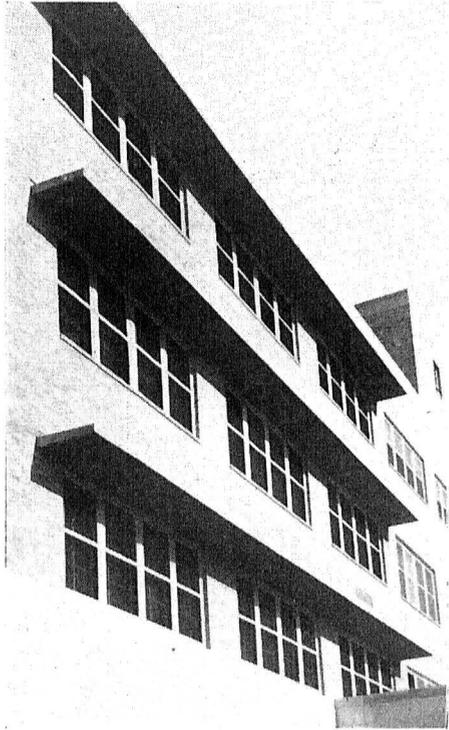

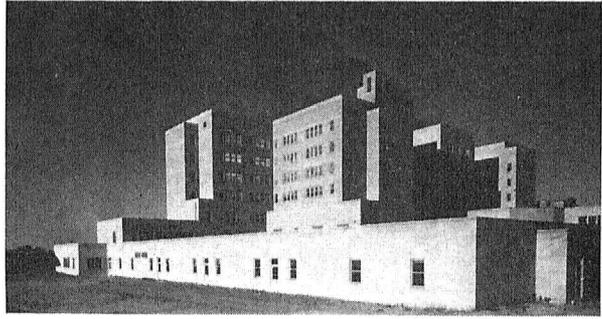

On the opposite page: The octagonal consultation area is designed for ready access to X-ray films and illuminators. Typing and grouping blood specimens from donors before transfusion. The Chapel, on the first floor of the Medical Center, presented by Mr. and Mrs. John Epple. On this page, top left: Technician demonstrates the ceiling-mounted telescoping X-ray tube support in radiographic room. The Auditorium has a seating capacity of 342 persons. The main lobby is spacious and attractive.

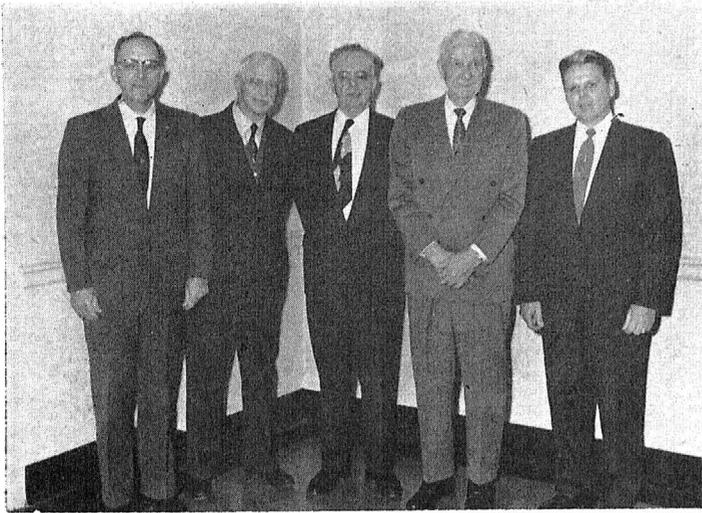

MISSOURI'S MEDICAL CENTER

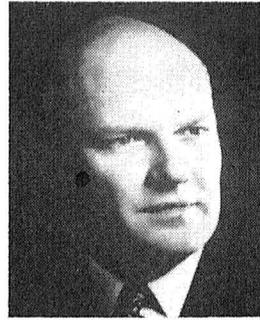

. . . and there is no end to the day

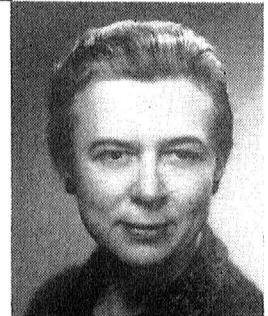

W. F. English, Arts dean; W. C. Curtis, President Ellis, and F. F. Stephens, former deans; Edward M. Palmquist, associate dean.

Blevins Davis

O. Hobart Mowrer

Elizabeth Rozier

ARTS AND SCIENCE WEEK

A relatively new campus event is the annual observance of Arts and Science Week, which each year has gained in programming significance. The 1956 activities, held in December, presented an impressive array of educators in lecturing roles. Demonstrations and exhibits featured the importance of the sciences, the fine arts, and the humanities. The observance also saw the inaugural of a feature to be continued each year—the presentation of the Alumni Association's Citation of Merit to distinguished graduates of the College of Arts and Science.

The three 1956 recipients, honored at the Arts and Science Banquet, were Mrs. Elizabeth McReynolds Rozier, Jefferson City; Blevins Davis, Independence; and O. Hobart Mowrer, University of Illinois.

Mrs. Rozier, '29, was cited for distinguished public leadership in her own community and in the state. She was secretary and chief clerk of the Missouri State Eleemosynary Board from 1937 to 1941. She served on the Missouri Library Commission from 1945 until she voluntarily retired in 1956. Mrs. Rozier was president of the Commission from 1945 to 1949. Many advances in public library service were achieved while she was connected with the Commission. Mrs. Rozier has also been a prominent member of the Jefferson City Public Library Board and is active in other civic affairs. She is a native of Carthage, Mo. Her father, Allen McReynolds, A. B. '01, LL. D. '54, was a leading member of the Board of Curators.

Mr. Davis, '25, well known American stage producer, spends much time abroad in the interest of cultural relations between the United States and other countries. For ten years he has been president of the Governing Board of the Ballet Theatre, the most

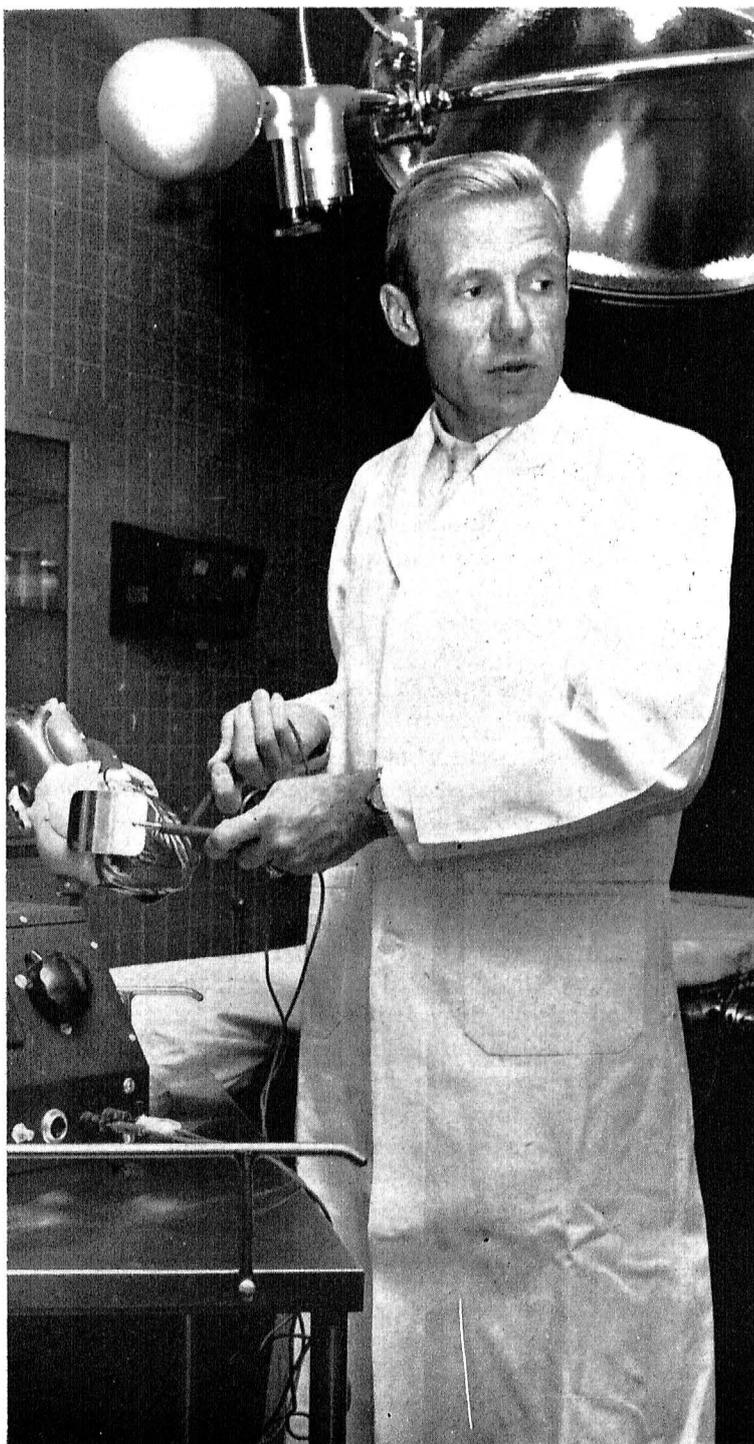

famous ballet company in this country, which has made three extensive tours of Europe, the Middle East, Latin and South America. Mr. Davis produced the first all-American presentation of "Hamlet" at Elsinor Castle, Denmark. He co-produced "Porgy and Bess," which won acclaim in all the great opera houses of Europe, England, South America, and behind the Iron Curtain in satellite countries, in Moscow and Leningrad.

Dr. Mowrer, '31, is widely recognized by psychologists for his creative leadership in research and administration. After serving at Northwestern, Yale, Princeton, and Harvard, he went to the University of Illinois in 1948 as Research Professor. For a number of years he has produced sound, significant, and influential research in the subjects of personality dynamics, learning theory, and clinical psychology. He has written all or parts of eight books, including his well-known text on Psychotherapy. Dr. Mowrer has been equally active in the administrative and professional affairs of the American Psychological Association, which he served as president in 1953-54.

Arts and Science Week speakers included Dr. Norbert Wiener, master mathematician and professor at M.I.T.; Dr. William V. Houston, president, Rice Institute; Dr. Fred M. Bullard, professor of geology, University of Texas; Dr. Lily Ross Taylor, former dean of Bryn Mawr; Dr. Walter Starkie, eminent British Hispanist; Dr. Paul R. Burkholder, director of research, Brooklyn Botanical Gardens; and Dr. H. W. Mossman, professor of anatomy, University of Wisconsin. Dr. Burkholder is a former member of the M. U. faculty. Dr. Wiener was born in Columbia when his father was a member of the faculty.

MORE THAN A SURGEON

National award to
Dr. Hugh Stephenson
for his contributions
to medical research
and education.

Through his selection as one of the Ten Outstanding Young Men of America for 1956, Dr. Hugh E. Stephenson, Jr. brings further honors to the University of Missouri and the School of Medicine. The U. S. Junior Chamber of Commerce, which has sponsored the selections since 1938, honored Dr. Stephenson and nine other Outstanding Young Men on January 19 at a banquet held in Dallas. (Dr. Stephenson was also honored at a banquet in Columbia on January 24). The ten men were selected by a judging panel of nationally prominent persons for outstanding contributions to their professions and the general welfare of the people.

Dr. Stephenson, an M. U. alumnus, is chairman of the Department of Surgery in the School of Medicine and chief surgeon of the University Hospitals. He is the youngest person in the United States currently to hold such a position.

Dr. Stephenson was selected for making outstanding contributions to the medical profession and for his part in the development of the new four-year medical school.

Through intensive research in the past six years he has contributed greatly to the present-day knowledge regarding the cause and management of sudden, unexpected cardiac arrest.

He designed and developed the first Mobile Cardiac Resuscitation Unit which makes it possible to have at hand all necessary resuscitative material to avoid irreversible brain damages that occur after a four-minute delay in heart stoppage. Dr. Stephenson helped establish the first course in Cardiac Resuscitation given in September, 1951. He designed a cardiac defibrillator for shocking the heart, one of the current means of starting heart action after arrest. Royalties go to the University. He has completed a 400-page book on

Cardiac Arrest to be published by C. V. Mosby Co., St. Louis. He has given more than 100 lectures and talks on the subject to medical groups, including an appearance on "The March of Medicine" television program.

Dr. Stephenson's research has been largely supported by a \$30,000 grant from the John and Mary R. Markle Foundation and Public Health Service grants.

A factor in Dr. Stephenson's selection for the Jaycee award was his aid, over a six-year period, in development of the four-year School of Medicine. He visited some 58 medical schools in this country and in Europe to study their programs and contributions in their relationship to establishment of a new medical school. He visited more than 160 medical centers. While chief resident of New York City's Bellevue Hospital, he appeared twice before the Missouri Legislature to give his views on the proposed school. He was the first full-time appointee to the clinical faculty and worked with the dean and other officials for three more years until the four-year program was instituted.

Dr. Stephenson was born in Columbia in 1922 and was valedictorian of his 1939 senior class at Hickman High School. He received a B.S. degree in Medicine from the University in 1943, and his M.D. from Washington University in St. Louis. He formerly was chief surgical resident, Bellevue Hospital, and was on the faculty of New York University Post Graduate Medical School. He served his surgical residency with Barnes Hospital and his surgical internship with the University of Chicago Clinics. He was a captain in the United States Army Medical Corps. Dr. Stephenson is a member of the American College of Surgeons and the American Medical Association, and secretary-treasurer of the Boone County Medical Society. He is alumni adviser of the Christian Medical Society and of Beta Theta Pi fraternity, and secretary-treasurer of Phi Beta Pi medical fraternity foundation (Tau chapter). He has served in various capacities with medical and civic organizations.

Dallas alumni hear Dr. Ellis

PRESIDENT ELLIS of the University was the guest speaker at the Dallas Missouri Alumni Association dinner meeting held at the Dallas Country Club on December 4. Dr. Ellis discussed the University's building program and answered numerous questions concerning favorite professors and schools.

Jay Minton was re-elected president for 1957. Other officers elected were Ruth Pines, Don Sauerman, Don Fitch, and Don Anderson, vice-presidents; James R. Crawford, secretary; and Maurine Block, treasurer.

The active Dallas club honored Dr. Hugh E. Stephenson, Jr., of the School of Medicine, with a luncheon on January 18. Dr. Stephenson was in Dallas to receive a National Junior C. of C. award as one of the Ten Outstanding Young Men of America.

Editors honor Earl English

DR. EARL ENGLISH, dean of the School of Journalism at the University, was recently awarded distinguished service membership by the board of directors of the American Society of Newspaper Editors. His selection was announced by Jenkin Lloyd Jones, editor of the Tulsa Tribune and ASNE president. Dr. English was cited for his contributions in formulating standards of accreditation for the nation's schools of journalism.

Honored at the same time with Dr. English was Kent Cooper, retired Associated Press executive.

The resolution regarding Dean English reads in part: "In recognition of contributions to American journalism as a reporter, a copy editor, journalism dean, chairman of the guidance committee of the Columbia Missourian, and as an exponent of vigorous upright journalism who has impressed upon hundreds of working newspapermen the highest ideals of the profession, and as a frequent and willing collaborator with the working press of this country in many common causes, Earl English is hereby declared a distinguished service member of the American Society of Newspaper Editors."

Reid heads speech group

DR. LOREN REID was installed as the forty-second president of the Speech Association of America at the annual meeting of the organization in December.

Dr. Reid is the third member of the Department of Speech and Dramatic Art at the University to serve this national organization as president. Dr. Bower Aly was president in 1944 and Dr. Wilbur E. Gilman, now chairman of the department of speech at Queens College, was president in 1951.

MISSOURI'S MEDICAL CENTER

from page seven

a large biochemistry department, student lounge, animal quarters, shops, some mechanical equipment, the incinerator, loading area, other offices and laboratories.

On the second floor of the Medical Sciences Building are the administrative offices of the medical school, classrooms and offices for the School of Nursing, a large centrally-located lecture room, and the pathology and microbiology departments.

Twin laboratories are located on the third floor, the micro-anatomy laboratory on one end, and the gross anatomy laboratory on the other. In between are departmental offices, a lecture room, research and special laboratories.

The fourth and top floor is shared by the departments of physiology and pharmacology, with a common laboratory at one end of the floor.

The Nurses' Residence Hall houses 104 students. Facilities include a recreation room on the ground floor, lounge and office on the first floor, and bedrooms on the other floors. A tunnel connects the ground floor of the nurses home and the Hospital.

Engineers' New York reunion

PROFESSOR RALPH SCORAH reports a fine and happy occasion when the College of Engineering held a Centennial Reunion in New York City. Forty persons attended the affair at the Hotel Governor Clinton. Lee Schneitter, '20, served ably as toastmaster and kept things moving at a brisk pace. Highlight of the evening was the talk by Dean Huber O. Croft who reviewed "behind the scenes" planning for a greater future for the College of Engineering. A question and answer period followed. It was decided that the New York reunion should be scheduled every two years and that a Reunion News Letter be sent to the alumni on the off-years. The first News Letter will appear in November and the next reunion is planned for November, 1958. Thanks were extended to John Begley, '49, who handled hotel arrangements for the dinner.

Ellis and Mullet are honored

THE DEPARTMENT OF HISTORY at the University sponsored a breakfast in honor of President Ellis and Professor Charles Mullett at the Sheraton-Jefferson Hotel in St. Louis on December 30. The breakfast was held in connection with the national convention of the American Historical Association. More than sixty faculty, former faculty, and former graduate students of the department attended.

President Ellis taught in the Department of History for many years and is still a Professor of History. Professor Mullett, who has been at Missouri for thirty-one years, was chairman of the program committee that planned the program of the American Historical Association convention. The breakfast also honored him for the publication of his book, *The Plague in England* (University of Kentucky Press) and his recent election to the Board of Editors of the *Journal of Modern History*.

At the breakfast Professor David H. Pinkney, chairman of the Department of History, spoke informally about President Ellis and Professor Mullett and introduced members of the faculty. He also presented five former members of the summer session faculty: Professor Ralph Bieber of Washington University, Professor Bert Lowenberg of Sarah Lawrence College, Professor James L. Godfrey of the University of North Carolina, Professor Leo Loubere of the University of Tennessee, and Professor Donald H. Nicholson of Southwest Missouri State College.

Faculty, former faculty, and staff members at the breakfast included: President and Mrs. Elmer Ellis, Dean Thomas Brady, Dean and Mrs. Frank F. Stephens, Professor James L. Godfrey, Professor Leo A. Loubere, Professor Donald H. Nicholson, Professor and Mrs. Ralph Bieber, Professor Bert Lowenberg, Professor and Mrs. Lewis Atherton, Professor R. E. McGrew, Professor and Mrs. Charles Mullett, Professor David Pinkney, Professor Neal Primm, Professor Walter V. Scholes, Professor Irvin G. Wyllie, Mr. and Mrs. Paul F. Green, Miss Polly Huling, Miss Violet

Richardson, Jack Batterson, Charles Daniel, George Glass, Darrell Stump, Walter Houf.

Former students present included: Lawrence E. Breeze, Homer Clevenger, P. E. Coletta, Kenneth S. Cooper, Sam Davis, Mr. and Mrs. T. Woodrow Davis, Harold H. Dugger, Gilbert C. Fite, Louis G. Geiger, Homer L. Knight, Enno E. Kraehe, Laura E. Wadsworth.

David March, Merrill J. Mattes, Mr. and Mrs. Joseph H. Preston, Clarence N. Roberts, Lawrence Silverman, Homer E. Socolofsky, Lloyd E. Worner, Mr. and Mrs. John E. Westover, Leslie Anders, Perry McCandless, Everett Slavens, William Settle, Jr.

Gordon Parks, Richard Maltais, Edith Howard, Marjory Dysart, Homer E. Huitt, John Galloway, Mrs. J. C. Parrish, Norma Peterson.

Returns for Callaway fete

DR. W. FRANCIS ENGLISH, dean of the College of Arts and Science, was the guest of honor at the fifty-second annual Kingdom of Callaway Supper held at Fulton, Mo. on January 29. Each year a former Callawegian who has gone away from home and made good is invited to return as "guest of honor" at the Kingdom Supper. Dr. English, who was born in a log cabin near New Bloomfield, formerly was superintendent of the Fulton public schools.

Before leaving the Fulton position to join the University faculty in 1943 as assistant professor of history, Dr. English had served as principal of high schools in Carrollton and Fayette. He received his Ph. D. in 1943 and his A.M. in 1931, both from M. U., after graduation from Northeast Missouri State Teachers College in Kirksville. At the University, he became professor of history and assistant dean of the College of Arts and Science in 1948, acting dean in 1954, and dean in May, 1955.

Dean English has been prominent in the activities of the Mississippi Valley and Southern historical associations. He is the author of many articles and bulletins on history and social studies. He formerly was director of the Western Historical Manuscripts Collection at the University and president of the National Council for the Social Studies.

A night for MSM

THE ANNUAL DINNER DANCE of the St. Louis Alumni Association February 2 honors the School of Mines and Metallurgy. On the speaking program are University President Elmer Ellis; Enoch Needles, former president of the American Society of Civil Engineers; Dr. Curtis L. Wilson, dean of the School; and Missouri's new head football coach, Frank Broyles.

The Tiara Room of the Park Plaza Hotel is the setting for the big event, with music by Hal Havird and his orchestra. Paul T. Dowling is banquet chairman and Marshall Harris is handling reservations, which are limited to 250.

The name is Broyles

MISSOURI'S NEW HEAD FOOTBALL COACH, Frank Broyles, has been described in the southern press as "the Vice President in charge of touchdown production at the gridiron department of the Georgia School of Technology," and this bright, affable young southern gentleman seems to fit that description very well. It's easy to understand why Athletic Director Don Faurot, the University Athletic Committee, President Ellis, and the Board of Curators were all impressed by him and by his record.

Physically, he is tall and trim with a full head of auburn hair, and though he seems older he looks no more than his thirty-two years. He is married and has four boys—a real switch for the Missouri football coach. He is an alumnus of Georgia Tech, where he starred in three sports: football, basketball, and baseball. He has ten years of coaching experience at major institutions with three at Baylor, one at Florida, and six as Bobby Dodd's number one assistant at bowl-conscious Georgia Tech. Speaking of bowls, his short career includes four as a player and seven as a coach.

Broyles' football philosophy is a simple, solid thing. It is based on the premise that the game must be pleasant and enjoyable for the players, and that success comes through instilling desire rather than through driving players. As backfield coach at Tech he was given most of the responsibility for the team's offense, and he believes in the same delegation of authority now that he is a head coach; in his words, "Most of the coaching on the field will be done by the assistants."

Some of his specific convictions about the playing of the game include: *emphasis on speed*—"Football, to me, is a game of reactions, and ability can come in any size as long as the man has speed." To illustrate this, he mentioned a three-year regular at Georgia Tech who stood 5'5" and weighed only 145 lbs.; *little or no scrimmage*—"If you're going to be fast, you've got to be well. . . maximum performance on Saturday depends on freshness." *Stress on fundamentals*—"A Chevrolet and a Cadillac are both good cars; the thing that makes the difference is the parts, and the parts of a football team are the fundamental skills of the individual players;" *emphasis on defense*—"Games are won or lost by the defense; a good, natural defensive player can be taught to play offense;" *recruiting*—"Don's system is the only way to have athletics . . . a state institution should serve its surrounding area and the same thing applies to the football material . . . this was the system we operated under at Georgia Tech, and it was one of the reasons I sought the job at Missouri."

On the field you can expect Broyles' team to rely heavily on the running game, for though he believes in balance between running and passing he hastens

to point out that not one of the top ten teams in the country last year was in even the top twenty in passing. One of the outstanding features in this running game will be the famed "belly series," which differs from the straight split T series in that the primary fake is made not to the halfback but to the fullback as the quarterback puts the ball in his belly and moves with him; finally, either leaving the ball there for a power play or pulling it out for a pitchout to the wide-sweeping halfback.

As this was written, Broyles was still looking for at least two assistant coaches to fill the vacancies left on his staff by the recent resignations of John "Hi" Simmons, who has decided to give all his time and attention to baseball, and Merle Schlosser who took a job as head coach at Western Michigan College. Broyles was moving slowly on this, waiting first to see who was interested enough to contact him. Since he believes in platoon practice in which offense and defense are handled separately, his primary concern now is finding a defensive coach. He intends to deploy the present staff members after he has selected the new assistants, but he has announced his intention of leaving the freshman team in the hands of Coaches Cooper and Kadlec, both of whom, in his mind, are highly capable.

As the new football coach at Missouri, Broyles asked that his greetings be sent to the alumni of the University. "I am delighted to be at the University of Missouri, a fine institution with an outstanding national reputation. I believe that we can give you an acceptable team, but you'll have to be a little patient with us and give us all the help you can; and if hard work can bring success, we'll be successful."

Coach Frank Broyles with his wife, Barbara, and sons Tommy, Jack, Hank, and Dan.

—Ken Patterson photo, Atlanta Journal and Constitution.

Tigers beat Cyclones twice

IN RECENT WEEKS, the traveling schedule of the Missouri basketball team has been almost as varied as its caliber of play.

The old year at home was closed out with a 72-52 win over Arkansas. Then the young men went west and picked up three wins in four chances against Pacific Coast Conference competition. A loss to conference leader UCLA was offset by wins from Oregon State, Oregon, and Southern California.

Thus the Tigers opened Big Seven Tournament play with a 5-2 record, but they looked court-weary as they dropped the opener to Colorado 64-55. This was the first time in years that the Tigers had lost in the first round of the tournament, but the worst was yet to come. In the first round of consolation play Nebraska beat us 70-65, and for the first time in the history of the tournament we finished last, with an overtime loss to Kansas State 79-75.

This had been a real tough stretch of 7 games in 11 days, and the Tigers had come through a little the worse for wear. The conference opener on Saturday January 5th brought the team face to face with the awesome Wilt Chamberlain and the high-flying Kansas Jayhawks on their home floor. The Tigers managed to score the season's second high total against Kansas

and they held Wilt to 23 points, far below his number one national average; but Wilt's underrated teammates came through with a 92-79 win.

The Tigers went from the frying pan to the corn popper as they came home against the seventh ranked Iowa State Cyclones two nights later. The Cyclones, on the strength of their 57-58 opening round scare of Kansas were heavy favorites, but a rested and confident Tiger team completely dominated play in a stunning 77-59 upset.

On January 14th at Manhattan, the Kansas State Wildcats matched their tournament win with a 59-55 verdict. However, the evening did provide a measure of satisfaction for the Tigers, as well as an indication of the strength and balance in Big Seven basketball, as the outclassed Cyclones of just a week before won a home court thriller from the team then at the top of all the national polls, the University of Kansas.

As a warmup for final exams, the Tigers went to Ames to prove their earlier win over Iowa State was no fluke. This time Missouri won 69-66 in an overtime after the regulation game ended 61-all. Before this second upset by Missouri, the Cyclones had climbed to number three ranking nationally. Ross and Smith had 21 points each and Siebert had 16 to lead the Missouri scoring.

CLASS NOTES

04 MILTON ANDREW ROMJUE, LLB '04, of Macon, Mo., is retired from law practice and is supervising and operating his cattle and stock farm near Macon.

06 Mr. and Mrs. BOYLE G. CLARK, LLB '06, of Columbia, celebrated their golden wedding anniversary on November 14 with a dinner at the Daniel Boone Hotel in Columbia. Both Mr. and Mrs. Clark are native Boone Countians, and he recently was honored by the Boone County Bar on the 50-year anniversary of beginning his practice. Mrs. Clark was MYRTLE DUNCAN, who also attended the University. They have one daughter, Helen, of the home at 245 S. Greenwood in Columbia.

07 One of the alumni office visitors during Homecoming was J. ALBERT REEVES, EE, of West Terre Haute, Ind. Mr. Reeves, after 45 years experience in the engineering field, is retired to his farm near Terre Haute. Here he keeps busy with vegetables, fruit, chickens, and other interests of a small farm; and as a pastime he has been doing research and scientific writing. His years of experience as an engineer include work with Westinghouse, Du Pont, Associated Gas and Electric of New York, Alabama Power Company in Birmingham, and the Hercules Powder Mills. Mr. and Mrs. Reeves have four children, all of whom are married. Three of the children live in California, and a daughter, Mrs. Helen Vance, lives in Joplin, Mo. Mr. Reeves' address is R.R. 2, West Terre Haute.

10 GEORGE ALLEN RIDGEWAY, BS CE, retired in October, 1955, after 33 years in construction work with the Missouri State Highway Department. Mr. and Mrs. Ridgeway built a home on Mexico Gravel Road, Route 6, Columbia, and are now operating their 260-acre farm near Columbia. Mr. Ridgeway is a registered professional engineer and surveyor, and is continuing with that type of work also. He remains a loyal sports fan of the University.

JULIA SPALDING, BS Ed., AM '15, retired, lives at 11 York Ave. in Towanda, Pa.

LEWIS P. SCOTT, BS CE, who retired in 1955 as Michigan District Engineer for the U. S. Bureau of Public Roads after 32 years with that agency, is now associated with the R. S. Scott Engineering Company of Alpena, Mich. He is specializing in highway location and design, as the Lansing representative for the company. "L.P." is already looking forward to attending the 50th anniversary of the Class of '10, and hopes many of the classmates are making similar plans. His home is at 526 Forest Ave., East Lansing.

FRANK SETTLE, AB, practicing attorney, has his offices at 416 Philtower, Tulsa, Okla. Mr. Settle completed his law degree at Yale University in 1913. He practiced at Platte City, Mo., in his home county, until 1919, during which time he was prosecuting attorney of Platte County, and was a member of the Missouri Legislature. In 1919 he went to Tulsa, where he has remained in the general practice of Law. His home address in Tulsa is 1821 East 32nd Place.

11 WALTER N. GEERY, BS Eng., is retired, and lives at 542 Tulane St., Salinas, Calif. Since the death of Mrs. Geery four years ago, his brother, Charley H. Geery and his wife have been living with him in Salinas. Charley Geery formerly operated a jewelry store in Columbia, and lived in Kansas City prior to moving to California. Walter Geery has two sons; William lives in Salt Lake City, and David lives in Glendale, Calif.

LEONARD D. HAIGH, Ph.D., associate professor of agricultural chemistry at the University, is now on limited service and lives at 1617 Anthony in Columbia, Mo.

Mrs. Frank A. Muth, who was ALLIE FRANK, lives at 4122 Sheridan Road in Chicago, Ill. She is the mother of FRANK A. MUTH, Jr., BJ '49, AB '50, of Cleveland, Ohio.

21 WILLIAM F. BROOKS, Arts, formerly of Sedalia, Mo., who for several years has been associated with the public relations firm of Milburn McCarty Associates, New York City, has been made vice-president. Mr. Brooks began his career in the news department of the Sedalia Capital, worked on the Kansas City Star, with Associated Press, and in the late 40s was with the National Broadcasting Company, New York City.

22 OLGA M. TETLEY, BS Ed., teaches in the primary grades of the schools of Colorado Springs, Colo. Miss Tetley lives at 330 N. Farragut Ave., Colorado Springs.

CARL B. SCHUTZ, AB, surgeon, lives at 330 W. 47th St., Kansas City, Mo. His three children, two daughters and a son, are all married, and Dr. Schutz has seven grandchildren.

EDA B. STAUTERMAN, BS Ed., AM '25, has retired from teaching high school English in the Elmira Free Academy, Elmira, New York, and is now living at 401 S. Williams St., Moberly, Mo. Miss Stauterman began her teaching career in the schools of Randolph and Boone counties, and returned last spring to her home town after being in Elmira since 1927. She welcomes visits with old friends and classmates.

23 Mrs. Richard B. Russell, who was FLORENCE HEIN, BJ, is a teacher of the deaf and lives at 219 Woodbourne Drive, St. Louis 5, Mo.

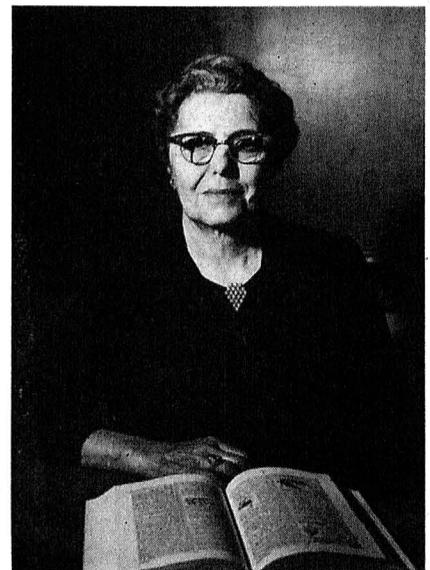

CARL R. ("Diz") LANDRUM, president of the First National Bank of Hobbs, New Mex., and of the First State Bank of Tishomingo, Okla., received LL.B. and LL.M. degrees but neither from Missouri. However, he has maintained his loyalty for M.U. as an alma mater. His son, Marquis, 17, is on varsity baseball and basketball at Hobbs High School, and the daughter, Brenda, 14, is a freshman cheer leader at that school. Mr. Landrum's business address is First National Bank in Hobbs, and his home at 1006 N. Linam.

Mrs. William J. Poad, who was MARY GERALDINE HOLMES, AB, lives at 3629 Peoria Ave., Peoria, Illinois. Mr. Poad is a civil engineer with the Illinois State Division of Highways in Peoria. They have two children: Lt. William J. Poad of the U.S.A.F., a graduate of Bradley University, who is making the service his career and is stationed presently at Holloman in New Mexico, and a daughter, Jeri, who is a freshman at Bradley University in Peoria.

24 MARY ANNA LAWRENCE, AM, is teaching home economics at Granger High in Memphis, Mo., her home town. Miss Lawrence lives at 202 N. Adams in Memphis.

H. L. SWINDLER, oil producer and geologist, lives in Muskogee, Okla., at 2404 Boston. The Swindlers have two sons and four grandchildren.

Mrs. Wilson M. Riley, formerly GLADYS MCKINLEY, BJ, is a Christian Science Practitioner and lives at 6117 Mission Drive in Kansas City, Mo.

CLASS NOTES

In December, NATHAN E. JACOBS, BJ, and Mrs. Jacobs were guests of Vice-president and Mrs. Richard M. Nixon at a luncheon in Washington for Prime Minister Nehru. Jacobs is president of Bozell & Jacobs, Inc. and lives at 323 Hawthorne, Glencoe, Ill.

26 G. ED. MACKEY, former resident of Kansas City, returned in November to the executive offices of Armour & Co., packers, as general manager. He was transferred in 1950 from the Kansas City office to Chicago, where he was vice-president in charge of plants. The Mackeys have three children, Ed, Jr., 17; Barbara, 15, and John, 11.

27 JOE N. MILLIGAN, BS ME, is owner of the Milligan Sheet Metal and Heating Company in Joplin, Mo. His address is 822 Joplin St.

LAWRENCE C. MITCHELL, BFA, AM '29, is a professor of painting at Ohio University in Athens. He was Director of the School of Painting and Fine Arts from 1936 until 1956, when he retired from the directorship. His mailing address is School of Painting and Allied Arts, Ohio University, Athens. (We have another Lawrence C. Mitchell, AB '28, of Earlville, N. Y., to whom we erroneously

gave the BFA, AM degrees in an item last month.)

Mrs. LOUISE BEARD Moore, BJ, is assistant professor of journalism and supervisor of student publications at the University of Oklahoma. Her son, Ray Beard Moore, 1956 graduate of the University of Oklahoma, was married last fall and is associated with Arthur Anderson & Co., accounting firm, in Dallas, Texas.

FRANK L. LeMERT, BS CE., hydraulic engineer, with the U. S. Geological Survey, is completing his 25th year in the Harrisburg, Pa., office of the Surface Water Branch of the Water Resources Division. His address is Box 1082, Harrisburg.

28 M. REED KNIGHT, AB, is an air line pilot for Delta Air Lines, and lives at 2324 Barcelona Drive, Ft. Lauderdale, Fla. Mrs. Knight was formerly RUTH VINCENT. Their daughter, Elaine, a graduate of Christian College and of Florida State, is now Mrs. Marvin F. Hanigan of Charleston, S. C. Their son, Reed, Jr., is in his second year at Vanderbilt.

Lt. Col. WILLIAM A. DRAKE, BS BA, recently returned from U. S. Army duty in the Canal Zone, and is now chief of the pictorial branch of Public Information Division in the office of the Chief of

Information of the U. S. Army, Washington, D. C.

FREDERICK R. LEONARD, AM, is district superintendent of Willits Union Elementary and Willits Union High School—two districts with a common administration—at Willits, Calif. This school system has seven elementary schools, two junior high schools and two senior high schools. Mr. Leonard, who lives at 121 West Commercial St., recently was listed in Who's Who in the West and in Who's Who in American Education.

29 F. GANO CHANGE, AB, BS Che., managing trustee of the Chance Foundation in Centralia, Mo., recently presented a check for \$20,000 to the school board of Centralia for furthering the construction of a new high school building. This gift will make possible some of the details of construction that were omitted when the contract was let, such as better paving of parkways, canopy for bus loading zone, public address system, and additional paint.

30 Master's degrees at the University seem to be a habit of the Cornwell family of Kirksville, Mo. CLIFTON CORNWELL, AM '30, former faculty member of State College at Kirksville where he and his sons

received their bachelor degrees, in 1945 became Director of Information at the Kirksville College of Osteopathy and Surgery. CLIFTON, Jr., AM '42, former instructor in speech, is now with the A. S. Aloe company of St. Louis and located in Kirksville. CHARLES, AM '39, another son, a political science major, gave up teaching to become a machinist in St. Louis. The Cornwells have two daughters; Mildred Ann, who is the wife of Don Hinton of Nappanee, Ind., and Marilyn, who is a senior at N. E. State College in Kirksville. Mr. Cornwell, Sr., who lives at 711 S. Franklin in Kirksville, has many interesting avocations also—trout fishing, writing nonsense (with sense) and verse, and is a correspondent for wire services and some papers and radio stations.

MARIE CIVILL (Mrs. William D., BJ.) COMMINS' latest book, "Be a Saint in Spite of Yourself," published by Bruce Co., is a good seller in the field of religion and will need extra editions. Mrs. Commins lives at 1928 Varnum N.E., Washington, D. C. where she was a teacher in public high schools until she decided to free lance as a writer, her first love. Now, 110 articles and two books later, she has picked up a grandson, William III.

NORMAN H. FALKENHAINER, BS Ed., is division manager of The Baldwin Piano Company, St. Louis. He is also director of the Moolah Temple Shrine Band and is president of the Shrine Bandmasters Association of North America. His son, Bob, is a junior at the University where he is a music major and drummer of the Kollege Kats, local musical group. His daughter is Mrs. RICHARD B. ZEPPENFELD, AB '55, of Richmond Heights, Mo. The Zeppenfelds have a son, Richard Kurt, born recently. The Falkenhainer home is at 16 Westwood Forest, Kirkwood 22.

31 Mrs. Sarah M. O'Brien, who was SARAH McCLENDON, BJ, operates her own news bureau, serving several small and medium-sized newspapers in Texas. Her unique method of conducting interviews, that of introducing herself each week as a representative for a different one of her client newspapers, affords variety from the monotonous manner of self-introduction each time. At a recent press conference with President Eisenhower, the chief executive interrupted her interview to ask if she were fired each week and hired by another paper. Her home address is 207 N. Park Drive, Arlington, Va.

Mrs. T. A. Hester, formerly LILLIAN ELEANOR ELLIS, journalism student, who is also known by her pen name as Ellen Orr, writes a column for the Delta Farm Press and for The Progressive Farmer; has had short stories published in New Voices, in American Writing Today and in Delta Decameron, and last year assisted the Delta Branch of American Pen Women in bringing out an an-

CLIFTON CORNWELL, '30

thology, Cotton Bolls. Her writings, which are done in her spare time, are chiefly humor columns. "I keep house in a converted cotton cabin and spend time dreaming over an ideal farm house drawn by architects that have probably never lived in the country," she says. "We accumulate old bricks from torn down tenant houses (they went to town or up North to industry . . . the place is mechanized) and new cypress logs cut from trees on our own Honey Bayou. The man who dresses the lumber is at retiring age and only works when he 'druthers! . . . he hardly ever druthers . . . so we're patiently waiting for him to make planks from logs." Actually, their home is at Last Jump-off Plantation, Shelby, Miss. Mr. Hester is an engineer with the Soil Conservation Service of the U. S. Department of Agriculture, and is a graduate of Mississippi State College. Their two sons, Tom and John William, are both in college now.

32 W. R. (Dick) SWARTZ, BS Ed., and Mrs. Swartz, formerly LOU ELLA WILSON, BS '30, are living seven miles south of La Belle, Mo., where he has been farming since 1950. Mrs. Swartz is teaching fifth grade in La Belle. Their daughter, Alice, after two years at Carthage College in Illinois, is a junior in the College of Education at Missouri. Richard, their son, is a high school junior and plays basket ball.

Mrs. Sophie Kaufman, formerly SOPHIE PEARLMUTTER, AM, is a buyer of lingerie and accessories, and lives at 7888 Wayne, University City 14, Mo. Her son, Robert, a pre-medical sophomore, is attending Washington University on a national honor scholarship.

33 SAMUEL C. BRIGHTMAN, BJ, has been appointed Deputy chairman for Public Affairs of the Democratic National Committee, of

which he has been publicity director since 1952. In his new position Brightman will direct the Public Affairs Division and edit the Democratic Digest. He was formerly with the Louisville Courier-Journal, St. Louis Star-Times, and the Cincinnati Post. With his wife and three children he lives at 6308 Crathie Lane, Bethesda, Md.

34 KERMIT IRWIN, BS Agr., recently was transferred to the state Soil Conservation Service office in Columbia, Mo., to take charge of the watershed planning unit. Mr. Irwin has been work unit conservationist at Warrensburg, and previously has been stationed at Salisbury, Albany, Blue Springs and Gallatin. Mr. Irwin and his three daughters are living at 104 St. Christopher St. in Columbia. The daughters are Susan, a high school sophomore, and Sally and Nancy, both in junior high.

35 Major THOMAS E. HOLT, AM, is on the staff of the Air Force ROTC at State College, Miss. Born in Nashville, Tenn., Major Holt has been a teacher in high schools of Missouri, Illinois and Texas, and has been in service with the Air Transport Command in India, China and Washington. He has just completed an assignment with the Iceland Defense Force, Iceland. The HOLTs have one daughter, Muriel Ann, now a junior in high school.

Dr. J. WILL FLEMING, Jr. AB, BS Med.'37, practicing physician of Moberly, Mo., is welcomed as a new Life Member of the Alumni Association. A graduate of Rush Medical School, he is one of a line of doctors, community leaders, and University supporters. An uncle, Dr. THOMAS S. FLEMING, was graduated in 1911. A cousin, HOWARD A. STAMPER, received an AB degree in 1935. His father, J. W. Fleming, is a former student. Dr. Fleming's professional and civic activities include the American College of Physicians, of Cardiology, the A.M.A., Missouri State Medical Society, Missouri Heart Society and the Missouri Division of American Cancer Society. He is the third generation of his family to have served as local Rotary Club president. Dr. and Mrs. Fleming have four children: Howard Thomas, 16, Louise, 14, Charles Jacob, 10, and David Avery, 8. Their home in Moberly is at 1 Windsor Place.

Lt. Col. EDWARD H. WILKIE, Jr., BS BA, with U. S. Army, and Mrs. Wilkie arrived in "Old Heidelberg" last July, and are hoping to be there another summer to greet tourists and friends from home who pass that way. Another M.U. man, Major CYRIL M. COGGINS, '29, and family live in the same apartment building with the Wilkies. Add another neighbor, Lt. Col. CHARLES W. CALVERT, BS Agr. '37, and the evening sessions grow late. . . . Col. Wilkie's overseas address is G2 Division, HQ USAREUR, APO 403, New York, N. Y.

CLASS NOTES

CLIFTON A. WALTER, BJ, with the advertising and sales promotion divisions of General Electric Company in Schenectady, N. Y., is editor of "Load" magazine, mailed bi-monthly to electric power utility sales engineers. Mr. and Mrs. Walter are parents of a daughter, Edith, age 15, and a son, David, age 8. Their home is at 1 River Road, Schenectady.

36 VELMA E. ZIMMERMAN, BS Ed, is a teacher of grade 3 in the elementary school at Crystal City, Mo. The November issue of The Instructor contains a contribution by Miss Zimmerman, which is her fourth contribution to that magazine. She writes for several other publications as well. Miss Zimmerman lives at 1106 Taylor Ave., Crystal City.

JEWETT M. FULKERSON, BS Agr., one of America's leading livestock auctioneers, owns and operates an 880-acre registered Hereford farm near Liberty, Mo. A field representative for the American Hereford Journal for 10 years after graduation, Mr. Fulkerson next worked with The Stockman and Polled Hereford World magazines at Memphis, Tenn. He entered the auctioneering field in 1949 and has sold Hereford cattle in 40 states and Canada. Mrs. Fulkerson is the former CAROLYN JENKINS. They have three daughters.

38 RUSSELL J. HART, formerly deputy scout executive of the St. Louis Council of Boy Scouts, was named Scout Executive of the Denver Area Council recently, and moved to Denver on November 1 to take his new office. Mr. and Mrs. Hart have two sons, John Allan and Dennis James.

PHILIP A. GRIMES, AB, LLB '40, is a lawyer in Columbia, Mo., with offices in the Exchange National Bank Building.

39 A. LEWIS HULL, LLB, is a partner in the law firm of Redmon, Smith & Hull in Decatur, Ill., with offices in the National Bank Building. Mr. and Mrs. Hull have two children, Stephen L., 11, and Luann, 6.

EDWARD W. JAMES, BJ, who is Lt. Col. James of the U.S.A.F. ROTC Det. No. 670, located at Oklahoma A & M in Stillwater, has recently returned from a two year tour of duty in the Arctic, where he was base inspector. At present he is assistant professor of Air Science at Stillwater, but maintains a permanent home at 1886 Chatsworth Blvd., San Diego 7, Calif.

HORACE L. JACKSON, AM, is superintendent of schools at Morehouse, Mo. His son, CHARLES WM. JACKSON, BS Agr. '52, is in sales work and lives in University City, Mo.

JOHN L. HUGHES, BS Agr., M.Ed. '52, is teaching vocational agriculture in the Community Unit high school at Chaplin, Ill. Mrs. Hughes is the former WANDA I. CRANE, AB, of Columbia, Mo. The Hughes have three children—a son, 9, and two daughters, 5 and 2. Their address is P.O. Box 161, Chaplin.

40 Col. WILLIAM W. HARVEY, Jr., BS BA, with the U. S. Army, is stationed at Kansas State College, PMST, and lives at 115 N. 18th St., Manhattan.

W. T. LYNDE, BJ, is senior representative for the oil industry information committee of the American Petroleum Institute in Dallas, Texas. The offices are at 426 Oil and Gas Building, Dallas.

41 Mrs. Lester E. Ellis, who was MARGARET ENGLESING, BJ, lives in West Covina, Calif., where Mr. Ellis is display and advertising manager for a new J. C. Penny store. Mrs. Ellis is "manager" for three small boys; Gary Michael, 4, Tommy, 2, and Bobby, 1. Their home is at 2315 E. Rio Verde Drive.

EDITH DENNIS Eisenstein, BS Ed., is living at 128 Thompson, Moberly, Mo.

Mr. and Mrs. Cochran, with Mr. Cochran's parents, are farming 750 acres as a joint enterprise. Mrs. Cochran, a graduate of Northeast Missouri State College, is teaching first grade at Bradley Hall in the Moberly school system.

TALK ABOUT SPEED . . .

NO JET WILL EVER TRAVEL THIS FAST!

Far faster than the fastest plane . . . with the speed of light! That's how fast you get electric service when you need it — 186,000 miles a second — at the flick of a switch!

Electricity, unlike almost anything else you use, must be made and delivered the instant you want it. It cannot be manufactured ahead of time and stored in a tank or a pipe or a box. That's why giant electric generators and other costly facilities must be constantly ready to meet your requirements and those of all our other customers every day . . . morning, noon and night.

It also takes investments of large sums of money by thousands of security holders to provide these facilities . . . plus the constant attention and work of skilled and experienced employees to operate the equipment.

So, next time you use electricity, remember you are getting made-to-order service, actually so fast it's delivered . . . at the flick of a switch!

KANSAS CITY POWER & LIGHT COMPANY

CLASS NOTES

Mr. and Mrs. Hugh Sidey of New York City announced the birth of a daughter last September. Mrs. Sidey is the former ALICE ANN TROWBRIDGE, BS Ed., of Columbia, Mo. Mr. Sidey is a member of the Life Magazine staff. Their home address is 154 Martling Ave., Building 3, Apt. F-6, Tarrytown, N. Y.

THOMAS T. RAILLEY, AB '07, general solicitor of the Missouri Pacific Railroad, on December 3 of a heart attack at his home, 69 Willmore Road, in St. Louis. He was born in Harrisonville, Mo., and soon after graduation from the University began a theatrical career by writing the words and music for several Cecil B. DeMille stage productions. In 1915 he joined the Missouri Pacific Law Department and was general solicitor at the time of his death. Mrs. Emma Meyer Railley of the home survives.

GEORGE F. HECHLER, BS ME '08, ME'10, professor emeritus of engineering research at the Pennsylvania State University, on December 1 at his home in State College, Penn. Born in Dalton, Mo., Mr. Hechler taught at Rensselaer Polytechnic Institute, served as mechanical engineer with the U. S. Naval Engineering Experiment Station at Annapolis, and was general manager for three years of Vibration Specialty Co., Philadelphia. He joined the Penn State research staff in 1922, and was director of engineering research from 1935 until his retire-

In Memoriam

ODON GUITAR, CC, '90, on December 1 in Columbia, Mo. Mr. Guitar had lived most of his life in Columbia, where he had been in the real estate business. Survivors include his wife, Mrs. Florence Estill Guitar, of the home at 10 Ingleside Drive; three sons, Wallace Estill of Old

ment in 1949. He was active in many professional organizations, a member of engineering honor societies, and was a fellow of the American Association for the Advancement of Science. Mrs. Hechler died in June, 1956. Three daughters survive: Mrs. Robert Thompson, Calcutta, India; Mrs. Ralph T. Irwin, Yuma, Ariz., and Mrs. William H. Hough, Mountain Lakes, N. J.

CARL L. RISTINE, LLB '10, soldier, lawyer and athlete, on November 27 in Liberty, Mo. Born in Clay Center, Kan., Col. Ristine grew up in Joplin, where he played football and basketball, and came to the University where he captained the undefeated Tiger team of 1909 coached by Bill Roper. He was also outstanding in basketball, tennis, and with the cadet corps. He went to Lexington, Mo., in 1910 as a young lawyer and as football coach at Wentworth, remaining there until 1934. Then he went to Washington, D. C. as special assistant to the Attorney General and returned to the private practice of law there. In 1941 he was recalled to active duty in the Army and was assigned to the Inspector General's office. He was awarded the Distinguished Service Cross and the Distinguished Service Medal for his activities in the two World Wars. In 1949 he retired from the Army and moved to Cocoon Grove, Miami, Fla. Mrs. Ristine passed away there in 1953. A daughter, Martha Ristine Roberts, died in 1952, leaving one son, Hugh Rowland Roberts of Rochester, N. Y.

A recent letter from Venlo J. Wolfsohn, of 7127 Braeburn Place, Bethesda 14, Md., tells of the death of his father, LEO WOLFSOHN, BJ '13, on May 24, 1956. Among his survivors is a brother, JOEL DAVID WOLFSOHN, BJ '22, of Washington, D. C.

NELSON HILL, AB '15, publisher of the Richmond (Mo.) News since 1919, on December 10 in Excelsior Springs, Mo. His 38-year career is a story of devotion to publishing a newspaper, and to the promotion of community interests and progress. He had planned to retire next October, on his 65th birthday. His wife remains as sole owner of the newspaper, and his son, HOWARD HILL, AB '47, succeeds his father as publisher. Other survivors are two daughters, Mrs. Conrad Knickerbocker of Richmond, Miss Martha Hill, a senior at Radcliffe College, Cambridge, Mass.; and a granddaughter, Laura Knickerbocker.

WALTER C. MARTIN, '16, was killed instantly on November 27 when his shotgun accidentally discharged as he was hunting on his farm near Sparta, Mo. Mr. Martin had worked for a newspaper and advertising agency in New York City, and had published several short stories and magazine articles. He moved to Sparta about 10 years ago from Springfield, Mo., where he had lived for several years. Since that time he had been in "semi-retirement," publishing articles frequently. Survivors in addition to Mrs. Martin are two sons, Skelly, who is in service and stationed in Japan, Ralph,

who is enrolled at the University of Missouri; and two daughters, Mrs. Norman Miller of State College, Pa., and Mrs. Ray D. Shaw of China Lake, Calif.

SAM FRED DALTON, '18, was fatally injured in an automobile wreck on December 17 near Windsor, Mo. Mr. Dalton, born and reared in Columbia, owned and operated the Dalton Coal and Material company here. His immediate survivors are Mrs. Dalton, of the home at Dalclifton, RFD 1, Columbia; a daughter, Mrs. DONALD PATTERSON of Columbia, and six grandchildren. Mrs. Dalton and Mr. and Mrs. Patterson also received severe injuries in the accident, but are recuperating.

JAMES STEELE WILLIAMS, AB '21, AM '22, Ph.D.'24, with the U. S. Geological Survey in Washington, D. C. since 1930, on January 16 in Washington. Dr. Williams was a member of the geology staff at the University from 1920 until he went to Washington in 1930. Mr. Williams had been active in the University's Alumni group in Washington, and was a past president of the chapter. He is survived by Mrs. Williams, 3356 Runnymede Place, Washington, and a son, Dr. ROBERT E. WILLIAMS, who is now serving his internship at George Washington Hospital there.

S. F. (Ted) PACKWOOD, BS BA '22, former University quarterback, on December 31 at his home in St. Joseph, Mo.

W. TAYLOR HARNEY, '22, advertising manager of the Palace Clothing Company in Kansas City for more than 30 years, on December 2 in Oklahoma City. Mr. Harney suffered a heart attack on November 17 while attending the Missouri-Oklahoma football game at Norman. Born in Mt. Sterling, Ill., Mr. Harney majored in journalism at the University and was one of several students instrumental in founding Show-Me, student publication. Mrs. Cora Miley Harney, of the home at 5022 Sunset Drive in Kansas City, survives.

JOHN R. WESTBROOK, AM '23, a teacher in Fulton, Mo., for the past 36 years, on November 30 in Columbia. He was graduated from Westminster College in Fulton in 1919, and, after receiving his master's degree from the University, returned to become a member of the Westminster faculty. In 1935 he joined the faculty of Fulton High school, where he taught English and Latin and coached the debating squad until his illness last fall.

Mrs. ELIZABETH AGEE Arthur, BJ '23, AB '24, on December 10 in Kansas City, Mo. Mrs. Arthur, who was born at Huntsville and lived in Keytesville, Mo., was the wife of Henry Arthur, city auditor of Kansas City. They moved there in 1928, and Mrs. Arthur was active in many community organizations. Mr. Arthur and a daughter, Miss Deborah Arthur, of the home at 419 Brush Creek Boulevard in Kansas City, survive.

GUY FRANKLIN ALDRICH, AB '24, on December 29 in Midland, Texas. Mr.

Aldrich was a consulting geologist and independent oil operator. Survivors include his wife and two sons.

ORVILLE LEE DAVIS, AM '27, former publisher of the Chariton Courier in Keytesville, Mo., on January 10 in Kansas City. A graduate of Kirksville Teachers College, Mr. Davis taught 18 years in the schools of Trenton, Kirksville, Higginsville, and Keytesville, Mo., and in Lineville, Ia. In 1935 he was appointed postmaster at Keytesville, and retained that position after retiring from the Courier. He purchased this paper in 1928, selling it in 1953. He is survived by Mrs. Davis, of the home; two daughters, Mrs. C. C. Haag of Los Angeles, Mrs. William E. Guilford, 11314 West Fifty-fourth St., Shawnee, Kan., a son, Robert E. Davis, 11616 West Sixty-eighth St., Shawnee, and six grandchildren.

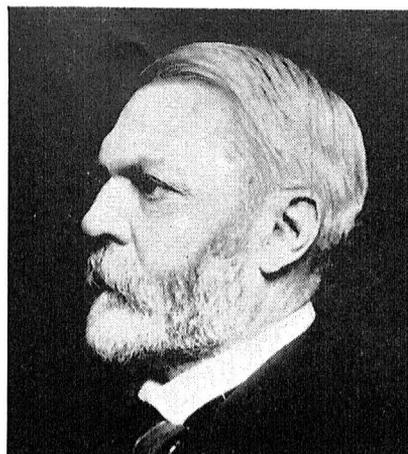

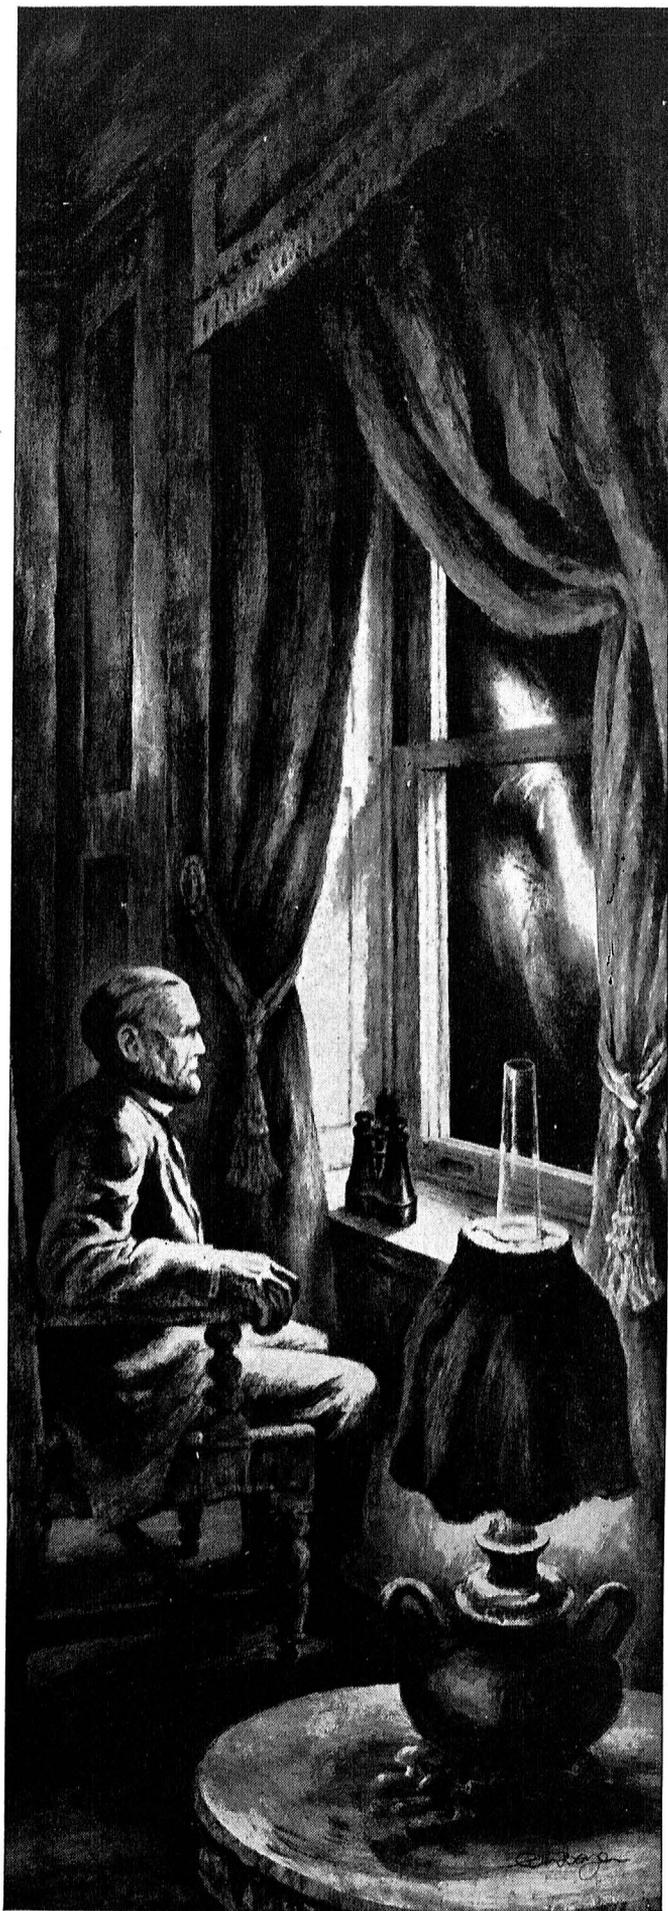

Dr. JAMES A. ATKINS, AB '28, AM, BS Med.'30, Columbia physician and instructor in pathology at the University's School of Medicine, on December 19 in Columbia. He was born in Rogersville, Mo., and received his M.D. degree at Harvard Medical School. In addition to his practice in Columbia, he had engaged in general practice at Lamar, Mo., and at one time was on the staff of the Veterans Hospital at Muskogee, Okla. Mrs. Atkins, of the home at 911 West Boulevard South in Columbia survives; also a son, James A. Atkins, Jr., of Emporia, Kan., and four daughters: Mrs. Guy Sharp of Oklahoma City, Mrs. John M. Corgan of Tulsa, Okla., and Misses Norma Nell and Ann Atkins of the home.

Mrs. Gordon F. King, former teacher in the public schools of Columbia, on December 20 in Columbia. Mrs. King, formerly FRANCES MARIE YAHNS, BS Ed.'30, retired from teaching in 1954 because of ill health. She is survived by Mr. King, a daughter, Sarah Sue, and a son, Don, all of the home at 807 West Ash.

JACOB WALTER MILLER, AM '35, veteran educator and former superintendent of schools of Henry County, in November at his home in Clinton, Mo. He was graduated from the Central Missouri State College in Warrensburg, and taught in the schools of Clinton, Creighton, Montrose and St. Louis in Missouri, and at Harrisonville and Fayetteville in Arkansas. Mrs. Miller and a son, Robert Miller of Boonville, Mo., survive.

JOHN STAGGS, BS BA '38, construction contractor of Newburg, Mo., on December 20 in a truck crash in Pontiac, Ill. Mr. Staggs was well known for his "black-top" contracting work in the Rolla area. He had formerly assisted his father in the operation of the Staggs Mercantile store in Newburg. Mrs. Staggs was formerly NANCY JANE HEWLETT, BS Ed. '41. She and to children, Priscilla and Tom, survive.

SHELDON S. KRASNOW, BS BA '48, of 405 Chester Avenue, Bakersfield, Calif., sometime during the past year. Further information is not available at this time.

The man who wouldn't give up

500 MASED ROCKETS shook the brand-new Brooklyn Bridge, screamed up into the May evening and showered the city with red and gold.

While behind a darkened window, a big, gaunt man sat and watched, too crippled and pain-wracked to attend the opening day festivities for the bridge.

This was a pity, for he had built it.

Which means that when money gave out, Chief Engineer Roebling pleaded for more. When disturbing changes of plan had to be made, Roebling fought them through. And when a hundred panicked men were trapped under the East River in a flooded caisson, Roebling saved them.

Spinning the giant steel spiderweb not only exacted 13 years of Roebling's life, from 1870 to 1883, but very early in the game it crippled him forever with the caisson disease.

But he never gave up, saw the job through to the end. His were the courage, skill and vision that make Americans a nation of great builders—a strong, growing nation. And a nation whose Savings Bonds rank with the world's finest investments.

For the constructive strength of 168 million Americans stands behind these Bonds. This is why, when you buy U.S. Savings Bonds, our Government can absolutely guarantee the safety of your principal—up to any amount—and the rate of interest you receive.

You cannot get a better guarantee than that. Why not invest in U.S. Savings Bonds regularly—where you bank or through the Payroll Savings Plan where you work? And hold the Savings Bonds you have.

Safe as America—U.S. Savings Bonds

The U.S. Government does not pay for this advertisement. It is donated by this publication in cooperation with the Advertising Council and the Magazine Publishers of America.

It's actually easy to save—when you buy Series E Savings Bonds through the Payroll Savings Plan. Once you've signed up at your pay office, your saving is done *for you*. The Bonds you receive pay good interest—3% a year, compounded half-yearly when held to maturity. And the longer you hold them, the better your return. Even after maturity, they go on earning 10 years more. So hold on to your Bonds! Join Payroll Savings today—or buy Bonds where you bank.

Why the killer came to Powder Springs

THE SKINNY little Texan who drifted into Butch Cassidy's layout at Powder Springs one day in '97 had dead-level eyes, a droopy mustache, and two six-guns tied down for the fast draw. Called himself Carter. Said he was a killer on the run.

That's why Cassidy and the outlaws in his notorious Wild Bunch told him all about the big future plans for their train robbers' syndicate. They took him in.

And he took them in. He was a range detective whose real name was a legend in the West—Charlie Siringo. And the information he got before he quietly slipped away stopped the Wild Bunch for a long, long time.

Of course, Siringo knew all along that if Cassidy or the others had discovered the truth, they'd have killed him sure. But it just never worried him any.

You couldn't scare Charlie Siringo. Coolest of cool customers and rawhide tough, he had the go-it-alone courage it takes to build a peaceable nation out of wild frontier. That brand of courage is part of America and her people—part of the country's strength. And it's a big reason why one of the finest investments you can lay hands on[®] is America's Savings Bonds. Because those Bonds are backed by the independence and courage of 165 million Americans. So buy U.S. Savings Bonds. Buy them confidently—regularly—and hold on to them!
