

MISSOURI ALUMNUS

February 1959

HELP US KEEP THE THINGS WORTH KEEPING

Each of us wants peace for his own precious reasons. But peace costs money. Money for strength to keep the peace. Money for science and education to make peace lasting. And money saved by individuals to keep our economy strong. Each Bond you buy helps provide this money—helps strengthen America's Peace Power. Are you buying enough?

If you want about	\$2,500	\$5,000	\$10,000
each week, save	\$4.75	\$9.50	\$18.75

HELP STRENGTHEN AMERICA'S PEACE POWER BUY U.S. SAVINGS BONDS

University of Missouri Alumni Association

About the cover: Whenever snow comes to the campus, as it did in abundance last month, it embellishes many a familiar scene. It also sends amateur and professional cameramen scurrying about for new angles. This view, by the University Photo Service, shows the South Ninth Street underpass from the west side approach, with a bit of the General Library in the distance. Edward Bishop was the photographer.

THE MISSOURI ALUMNUS

is published monthly except July, August and January by the University of Missouri Alumni Association, 101 Read Hall, Columbia, Missouri and mailed to all active members in the Association. Entered as second class matter under the act of March 3, 1879. Active membership \$4.00 a year; life membership \$80. Member, American Alumni Council.

Drop curtain similar to that of the old Haden Opera House, as re-created by production crew students. It was used at the 50th anniversary program of the campus chapter of Delta Sigma Rho.

The night that gave us the Columns

The "Forty-Ninth Annual Open Session" of the Athenaeum Literary Society scheduled for Old Academic Hall on the night of January 9, 1892 never came off there. That was the night that fire destroyed the University's main building, leaving only the Columns. Two weeks later the program was transferred to the old Haden Opera House, at Ninth and Broadway, and presented as originally planned. Now, sixty-seven years later, the program has made its way back to the main University building, on the stage of modern Jesse Hall Auditorium, in a reconstructed version by students and faculty with a scarcity of original material to guide them.

The repeat performance served to highlight the golden anniversary of the University chapter of Delta Sigma Rho, national honorary fraternity in forensics. The Athenaeum Society, student speech forensics group, cooperated in the costumed production, which also called for the services of University band members and students in dramatic art.

To help re-create the atmosphere of the Opera House, a large drop curtain was designed and created to hang before the Jesse Auditorium stage. It was painted by Lewis W. Stoerker, assistant professor of

speech and dramatic art, and his student crew at the University scene shop. It showed a castle scene flanked by cameo-shaped sketches of Romeo and Juliet; the replica was based on newspaper accounts.

The Athenaeum and Delta Sigma Rho members taking part in the re-enactment were garbed in Prince Albert period costumes. Some wore sideburns and beards. Their oratory was accompanied by grandiose gestures in vogue at the time. Makeup, staging and costuming were done by the Missouri Workshop. Dr. Frances L. McCurdy, assistant professor of speech and dramatic art assisted with rehearsals, and Carol Henderson handled costuming and makeup.

Costumed members of a small University band, under the direction of Charles L. Emmons, assistant professor of music, performed numbers antedating 1892. Included were "March from Aida" by Verdi; "Bronze Horse Overture" and "Selections from Fra Diavolo" by Auber, and "Washington Post March" by Sousa. The stylized music of the period gave the audience some hearty chuckles.

The declamations and orations had a jocular tone, but the audience gave close attention to the debate on the topic, "Immigration Should Be Prohibited,"

as many of the pros and cons could be translated to today's arguments over integration.

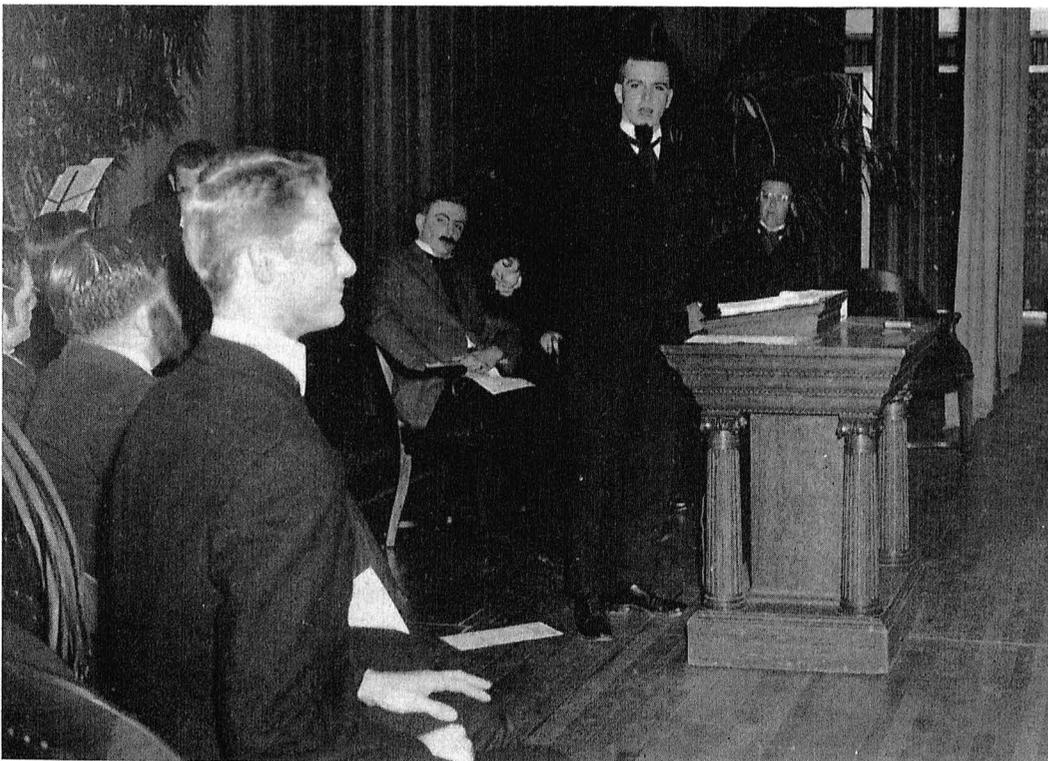

When the curtain was raised the audience saw eight Delta Sigma Rho and Athenaeon Society members in makeup and costume seated in chairs across the stage. Behind them were seated the director and ten members of the University band, also in 1892 attire. As the band played, the audience of some 300 persons stood and sang "The Star-Spangled Banner," then Jack L. Pooker gave the invocation. After Carl D. Gum, in his role as the incoming president of the society gave his inaugural address, William A. Heyde III declaimed "Curfew Bells." In the debate on ending immigration, Larry H. Heflin took the affirmative, and Graham T. Helmendach took the negative. John L. Port, Jr. gave the declamation, "Signing of the Magna Charta;" Joseph O'Rourke, instructor in speech, delivered an oration, "Ireland and the Irish;" and Charles R. Row finished the speaking with a "paper" entitled, "Athenaeon Joker." Musical numbers were interspersed through the program.

Adding a further touch of authenticity to the occasion were hand-lettered programs distributed to the audience. Old style type faces and designs were reproduced by Jan Mackie, graduate student in speech. The program bill is not a facsimile, since the original was destroyed in the Academic Hall fire. A special edition of the Columbia Herald describing the holocaust noted that the newspaper's back shop had printed the society's program and the copies had just been delivered to the Athenaeon Society by the Herald

office but they were never distributed. The paper published a copy of the program several days later in its regular weekly edition to show the people what they had missed and what they were to see on January 23, 1892, in the Opera House.

Preceding the re-enactment in Jesse Auditorium, more than sixty persons, past and present members of the two forensics groups, attended a banquet at the Student Union. Loren Reid, professor of speech and a past adviser of the Delta Sigma Rho chapter, served as toastmaster. W. Francis English, dean of the College of Arts and Science and a former Missouri high school debate coach, welcomed the guests. Robert C. Smith, Jr., a Columbia attorney and Delta Sigma Rho, '43, spoke on "Contributions of Debate Training for the Professional Man." W. F. Woodruff, a Kansas City attorney and the first member of the local DSR chapter ('09), spoke of his experience as a debater on trips to Austin, Texas in 1907 and to Boulder, Colorado in 1908. The final speaker at the banquet was Herold T. Ross, professor of speech at DePauw University and current national president of Delta Sigma Rho.

In 1892, fourteen years before Delta Sigma Rho was founded, Missouri's Athenaeon Literary Society could already reflect on a half century of successful student speech activity. And in those years Library Societies occupied a dominant role in campus life. A society's annual open session, for which students, faculty, and townspeople gathered to applaud the declamations, orations, and debates, was the big event

Sideburns, beards and Prince Alberts were prominent on the Jesse Auditorium stage when students and staff members re-enacted the 1892 Open Session program of the Athenaeon Literary Society.

of one actually performed 67 years ago. It is the work
of Jan Mackie, graduate student in speech.*

of the year. And in 1892 the interest in a society's open session was roughly equivalent to interest today in Jayhawk-Tiger football rivalry (Missouri had played its first football game with Kansas only a few months earlier in the fall of 1891). University bands were a customary adjunct to society open sessions, cheerleaders were not unusual, and the Athenaeon Society with its "Rickety Ruff! Rickety Ruff! Who's the stuff! Who's the stuff! Athenaeon!" certainly was not the only society with its own yell.

It was shortly after 7 p. m. on January 9, 1892 that members of the M. U. band filed into the chapel of Academic Hall, took their places in the orchestra pit, and began to tune their instruments in preparation for the evening's activities. Some few students were already in the hall, others were entering the building, and still others along with members of the faculty and citizens of Columbia were hurrying through

the snow toward the building. Suddenly the lights of the chapel's main chandelier flickered. Then with a great crash the lighting fixture tore itself from the ceiling and plunged into the seats below. Fire, attributed to defective wiring, could be seen in the ceiling. Academic Hall was destroyed.

In order to re-create the annual session program, University staff members spent months in research, digging into old newspaper files, old Savitars, and searching for speech material appropriate for 1892 delivery. The two declamations on the program were shaped from books of the period. Much of the writing for other features was by Dr. Robert P. Friedman, assistant professor of speech and director of forensics, and Thomas L. Fernandez, instructor in speech. Assistance in the re-creation of the debate and orations came from Dr. Lewis Atherton and Dr. Charles F. Mullett, professors of history.

around the university

Missouri's high school seniors will have their "Day" on the campus March 21. Every division of the University at Columbia will hold open house that day for high school seniors, selected juniors, their parents and school authorities. The visitors will have "the run of the campus," to see what the inside of a university is like. The deans, faculty, and students of the University will serve as hosts; guides will be provided to see that visitors may investigate those departments in which they are most interested. Several special day events held in past years are being combined into this one to conserve time and expenses for the high school students. These include Science Recognition Day and College Career Day. "We will not try to convince any student that he should attend any particular college or university," President Ellis said. "We intend only to provide an educational experience for graduating seniors and give them pertinent information on the many phases of college operations. We hope we can make it easier for the student to make the transition from high school to college by some knowledge, however brief, of what to expect. Students who have already selected a college to attend will still find this a profitable experience."

The College of Education of the University has announced that a Counseling and Guidance Training Institute at the graduate level will be conducted at the University during the 1959 Summer Session, June 15 to August 7. The institute will be supported by funds from the National Defense Education Act. Dr. John L. Ferguson, associate professor of education and counselor trainer, will be the director. Registration will be limited to about fifty or sixty students regularly admitted to the Graduate School for study in counseling and guidance, and employed in a public or private non-profit secondary school. Counselors in public secondary schools will be eligible to receive a stipend at the rate of \$75 a week plus \$15 a week for each dependent.

Dr. Newell S. Gingrich, professor of physics at the University, has been named to receive a National Science Foundation Fellowship for a year of study at the Massachusetts Institute of Technology. Dr. Gingrich will study theory of the solid state and X-ray and neutron diffraction. He will be on leave for the academic year beginning next September. The fellowships granted by the National Science Foundation are designed to improve teaching in science, mathematics and engineering in American colleges. They carry stipends about equal to the regular stipends of the recipients, and the funds may be used for study or research here or abroad.

C. Thorpe Ray, M.D., professor and chairman of the Department of Medicine at the University School of Medicine, has recently had two honors conferred on him in his field. At the 13th annual meeting of the Southern Society for Clinical Research, held in New Orleans, Dr. Ray was elected president of the society. He had been the organization's secretary for the past three years. At the annual meeting of the New York Academy of Sciences, Dr. Ray was made a Fellow of the Academy. Dr. Ray joined the University School of Medicine faculty last summer, coming here from the Tulane University School of Medicine, where he served continuously for thirteen years.

For the first time, scholarships have become available specifically for entering students in the School of Law at the University. As a result of alumni efforts, several scholarships ranging from \$100 to \$300 per year are to be awarded on the basis of need and scholastic record. Four \$300 scholarships for entering Law students were established by allocations from the Alumni Achievement Fund. Application forms may be secured from the Dean's Office.

Dr. Loren Reid, professor of speech, has been elected editor of a volume of studies titled "Representative American Speeches." The volume is being prepared by alumni of the State University of Iowa speech department and will be dedicated to Prof. A. Craig Baird, under whom the authors did the major part of their work toward their Ph.D. degrees. Dr. Reid is one of the contributors, with a study on Mark Twain. Dr. Baird, of the Iowa faculty, has been visiting professor of speech here on three recent occasions.

A new textbook written by Dr. James E. Randall, associate professor of physiology and biophysics at the University of Missouri Medical Center, has been published by the Yearbook Publishers, Inc., Chicago, Ill. Titled "Elements of Biophysics," the textbook is an account of the most modern application of physics, mathematics, and atomic and nuclear energy to medical and related sciences. It represents a compilation of the lectures which Dr. Randall delivers to first-year medical students and graduate students at the University School of Medicine. Dr. Randall said that with the increasing interrelationship of medicine and physics the science of biophysics, which deals with biological structures and processes in terms of physics, is becoming an essential in medical curricula. Dr. Randall said he plans to have the publishers turn over to the University General Fund all royalties on textbooks which are used at the University of Missouri, with the fund from the royalties to be used to provide awards for medical students making the best course grades in biophysics.

Exotic blossoms in the University's horticulture greenhouses include the lady's slipper held by Professor James E. Smith, Jr., the large popular showy orchids, and the small Hawaiian-type orchids.

Orchids go to college

By Vivian Hansbrough

Professor James E. Smith has pets, and none of his pupils object. In fact, his students do most of the caring for his 350 pet orchids, growing in the horticulture greenhouse. Prospective florists learn the habits and vagaries of the delicately beautiful tropical plants in the greenhouse, where the temperature is kept from 62° to 65°, and where overhead pipes intermittently spray moisture into the air to maintain high humidity.

"This pot of small plants is called a community pot," Professor Smith explains. "It was potted in 1954, but the seeds came from a cross made by a student in 1949. So actually these little plants are 10

years old. When the growth becomes crowded, we separate the plants and put them in individual pots." He moves on to the next pot, and puts a hand behind a bulging bud.

On another table are several ambitious plants whose roots hang outside. "Just like my children, always running around barefoot," says Mr. Smith. Orchids like to hang their roots out in the open air, but they should be confined within pots for easier watering. When roots overhang, it is time to repot.

Each plant has two main sections, the back bulb and the lead. Carefully breaking the sections apart, Mr. Smith demonstrates repotting. The standard or-

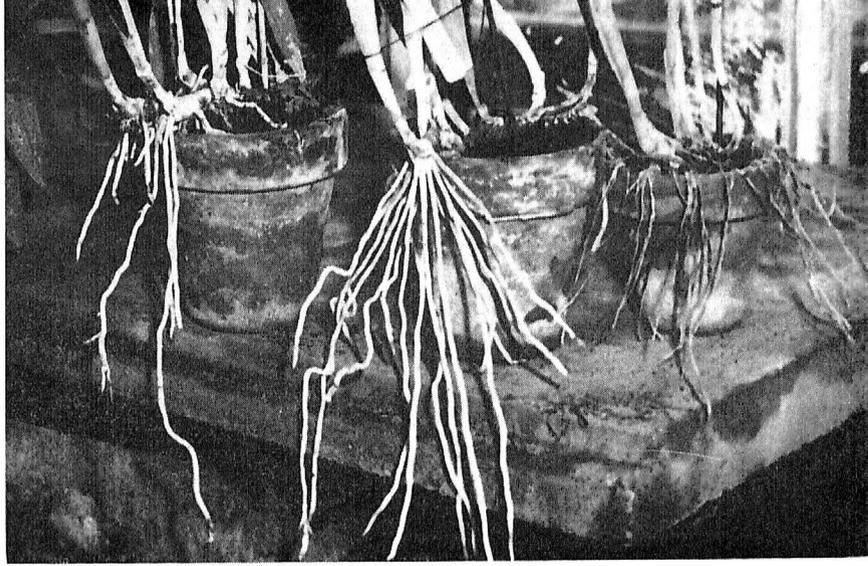

Prof. Smith repots an orchid in the standard orchid pot with five holes for ventilation and drainage. He pulls the plant back against one side of the pot, and surrounds its roots with swamp fern root.

The "community pot" on left contains several young orchid plants, which will be separated and placed in individual pots like the one at right. Notice the bud, which is almost ready to open.

chid pot has five holes in the bottom for ventilation and drainage. Roots of a swamp fern (*Osmunda*) make the best potting material, because they are loose enough to allow room for air and water, they take in water from the air, and they are resistant to decay. However, these fern roots are so tough that they are difficult to cut apart with shears. Pulling the lead plant back against the edge of the pot, Professor Smith fits fern root around the leggy roots of the orchid, and adds a generous drink of water. The blooming process will go on, with no setback because of the repotting.

Once a part of a plant blooms, it will not bloom again, but it will project two swellings, or shoot buds,

Orchids like to hang their roots out in the open air, much the same as children enjoy going barefoot. When the roots overhang, it is time to repot the plants.

near the base. One of these swellings develops into a new lead, which will bloom the next year. Sometimes both swellings develop into leads, and thus give double production.

Most people think of orchids as only one type—the variety most in demand in flower shops—but there are thousands of types and hundreds of combinations of types. "Here is a slipper orchid," Smith says, and points out the slipper shape of a green and brown speckled blossom. Big two-toned orchids fit for a Cinderella ball are on the same shelf with miniature blossoms of "Hawaiian" orchids.

Does the greenhouse sell orchids? "No," Professor

continued on page 16

M. U. as center for nuclear research

The University's budget request of \$1,500,000 for a research reactor is the initial step toward acquiring a \$3,000,000 teaching and research facility that would put the University and the State among the important contributors to the nation's nuclear progress.

Gov. James T. Blair has included the request of \$1,500,000 in state funds for the reactor in his recommendations to the General Assembly. In addition the University would expect to raise \$1,000,000 for construction costs through gifts and grants; an estimated \$160,000 worth of uranium for fuel and about \$300,000 worth of heavy water for the moderator would be leased to the school by the Atomic Energy Commission, without cost.

President Elmer Ellis says the reactor would place the University among the leading educational institutions in its capacity to serve education, science, agriculture, medicine, and industry. The proposed reactor would be comparable in power and usefulness to that of any other university. Because of the University's central location in the state the institution would become a center of nuclear research for this entire area, especially since provisions would be made for its use by other educational and research institutions and by the state's industries.

According to President Ellis, "New vistas of a nuclear age have touched every field of science, from agriculture to medicine, from geology to zoology, and from engineering to veterinary science, in addition to the important discoveries made and being made in chemistry and physics. All those fields are a part of the University of Missouri's educational responsibilities, both in research and teaching, and to fulfill our responsibilities to our youth and to all our citizens, we have to move forward with the nuclear age, lest we fall hopelessly behind."

In reference to the construction of the reactor being contingent on the University obtaining another \$1,000,000 in matching funds, Dr. Ellis explained: "We have reason to believe we would have no difficulty in getting the necessary amount in gifts and grants, from Federal agencies and other sources, once the General Assembly approves the project. Great emphasis is now being placed on nuclear research because of its inestimable significance to the ultimate benefit of mankind."

The broadest use of the reactor would be for the production of artificially radioactive materials, and particularly "short-lived" materials, which have become one of science's most versatile tools for both basic and applied research. Radioactive isotopes have an infinitely varied use that ranges from curing human ailments to revealing the flaws in a piece of machinery or to improving the growing, and fertilizing of food crops.

They already are being extensively used at the University in a number of fields of research and teaching. A recent survey showed that 25 different

divisions feel the need of research involving a reactor or its products; that at present 16 staff members are using radiation in their work; and that others would use it if it were available. Readily accessible radioisotopes would make it possible greatly to expand the present program.

Such expansion would be especially significant in the field of the short-lived radioisotopes, which are those in which the radiation intensity decays very rapidly. Short-lived materials have a very wide range of use in research and also are safer to use than those with a longer half-life (the time in which half the atoms have disintegrated), for their radioactivity dissipates in periods from fractions of a second to a few hours.

Despite the importance of the short-lived materials, they are not available to University researchers because they must be obtained elsewhere, and by the time they get to the University they have lost too much of their radiation to be of use. The longer-lived radioisotopes, which the University is now using, can be "imported" and are brought in from Oak Ridge and other laboratories. A reactor at the University would make artificial radioisotopes in all the ranges of half-life available to University researchers.

Among the fields of research and teaching that would be expanded or opened to the University with acquisition of a reactor are: radiobiology; malignant diseases; tracer studies in drugs and for industrial applications; radioactive isotopes in soils; radioactive damage to construction and industrial materials; radiation physics; radiation chemistry; radiation safety; genetic effects of radiation; metabolism in plants and animals; food preservation; radioactive fallout and related problems; problems of nuclear waste disposal; sewage treatment; nuclear reactor theory and operation; nuclear power plants and their auxiliary equipment; the use of thermal neutrons to determine the properties of matter and for other research.

Ellis Fischel Cancer Hospital, which is in Columbia, also would find the reactor a valuable asset, as members of the staff have expressed a desire to have reactor facilities available in their studies and treatment of cancerous growths.

"Few educational institutions are so advantageously located for the greatest use of a reactor as is the University of Missouri," Dr. Ellis said. "This is the only university within a 500-mile radius which covers such a complete field of knowledge, teaching and research on one campus in a rural area suitable for the location of a research reactor. We have a modern Medical Center with a Medical School and hospital serving the entire state; an outstanding agricultural college and other schools and colleges concerned with all aspects of science; the cancer hospital that also serves the entire state; and proximity to other institutions that might make use of nuclear materials. The many

Col. Frank H. Skelly

Skelly honored on retirement

Col. Frank H. Skelly, retiring professor and chairman of the department of military science and tactics at the University, was honored with special ceremonies in Jesse Auditorium on January 14. Col. Skelly retired from the Regular Army on January 31. He was honored at Fort Leonard Wood on January 17 with a parade of troops. Col. and Mrs. Skelly were dinner guests of the officers of his instructor staff at the Tiger Hotel on January 16.

Col. Skelly, who joined the University faculty in 1954, is a veteran of seven World War II campaigns in Europe, including the Anzio beachhead. He is a former member of the faculty of the Army Command and General Staff College at Fort Leavenworth, Kan. He has also served as executive, and later commander, of the First Infantry Division Artillery. His military honors include the Legion of Merit, Bronze Star Medal and the Italian Military Valor Cross.

Col. Skelly was born in Mexico, Mo., grew up in St. Louis, and attended the University, where he received a B.S. in Engineering in 1926. As a student he was Cadet Colonel, member of Scabbard and Blade, Tau Beta Pi, and QEBH. Mrs. Skelly is the former Helen E. Bishop, B.S. in Ed. '27. Their son, First Lieut. James G. Skelly, B.S. in B.A. '56, recently completed two years of active duty in Airborne Artillery. Col. Skelly's father is Col. James W. Skelly, B.S. in C.E. '96, C.E. '98, Webster Groves, Mo., a past Grand Master of Free Masons in Missouri

The Skellys will remain in Columbia, where they make their home at 310 Russell Boulevard.

During Col. Skelly's tenure as PMST, many former Army ROTC Cadets went on from the Missouri campus to distinguish themselves as graduates of Army Officer Basic Courses. In fact, 100 of these young alumni finished in the top of their classes at these Army schools. The classes averaged around 85 members, but some went as high as 136, and in that particular group a Missouri ROTC graduate ranked No. 1. A study of the 100 distinguished graduates shows that 38 were in the top 3 of their Army School classes—eleven were No. 1, fourteen were No. 2, and thirteen were No. 3. In addition to the 100 in the top 10, Missouri had two graduates who finished 11th and 12th in their classes. Most Missouri Army ROTC graduates go on to Field Artillery schools.

Burch, Thomasson feted

J. W. Burch retires next year as director of Missouri Agricultural Extension Service, and R. R. Thomasson retired in July as assistant director to part-time duties. In honor of their long service an appreciation dinner was held during the annual meeting of the Extension Service on the campus. The dinner, attended by about 600 persons, was held in the Memorial Student Union on December 9. In addition to the main ballroom, two other rooms were filled with guests who viewed the program on closed circuit TV.

Speakers included John Sam Williamson, state agricultural commissioner representing Governor Blair; Irvin F. Coyle, assistant to the University president, representing President Ellis; Gordon Nance, professor of agricultural economics, whose tribute to Burch and Thomasson was flavored with his well known brand of wit; Virginia Norris, home agent of Shelby County; and C. A. Vines, assistant director of the Arkansas Extension Service. Vines said that the bal-

J. W. Burch and R. R. Thomasson

anced farming program which Burch initiated and developed has been copied widely and praised it for combining in one package all the programs in extension work. Another speaker, "Timothy Hays," joined the proceedings to make a few irreverent remarks.

An extension worker for 37 years, Burch has been county agent, animal husbandry specialist, assistant director, and director for the past 23 years. Thomasson, with 39 years in extension work, has been county agent, assistant county agent leader, state agent, and assistant director for 28 years.

The affair was the largest dinner meeting ever served at the Student Union and the theme of the entire evening was one of gaiety, and the program was ably guided by County Agent George Schmitt of Gallatin. As Burch said in a brief talk at the close of festivities, "I feared it would be something like attending my own funeral, but it was just an old-fashioned Irish wake."

Oldest alumni officer?

Frank B. Scheetz, 91,
is club bouncer in Washington.

The Alumni Chapter of Washington, D. C. has a sergeant-at-arms, and he is 91 years old. He is Frank B. Scheetz, former student, who retired from government service in 1935 after 49 years of engineering experience. His title in the alumni organization is honorary in nature, but if there were any need for a sergeant-at-arms, or bouncer, there is no doubt that Mr. Scheetz could restore order merely because of the esteem in which he is held by fellow Washingtonians.

The University continues as one of the interests to which Mr. Scheetz has devoted himself in retirement. A few months ago he arranged for the compilation of data on the early background of John Hiram Lathrop, the Hamilton College professor who served as the first and fifth president of the University. For the task of assembling the material on Lathrop, Mr. Scheetz called on a colleague in the Cosmos Club, Dr. Nelson C. Dale, professor emeritus; Dr. Edgar B. Graves, history department head; and Walter Pilkington, librarian, all of Hamilton College. Then Mr. Scheetz made a mimeographed letter of the information, forwarded copies to the Alumni Office for its files, and made other copies available to alumni in Washington.

Mr. Scheetz, who was born in 1867 on a farm in Marion County, near Monroe City, was a student at the University in the engineering department in 1885-87. His first work was in railway engineering at a point in the Indian Territory where Oklahoma City now stands.

When he retired from the Interstate Commerce Commission he had completed 21½ years as a Senior and Principal Structural Engineer of the Bureau of Valuation. Previously he spent five years on surveys and construction of new lines of railroads, three years on special surveys of old lines; sixteen years in the bridges and building department of the Missouri

Mr. and Mrs. Frank B. Scheetz

Pacific Railway, and three and one-half years as contracting engineer for the Kansas City Bridge Company. Upon his retirement, a colleague said in tribute: "No man on the Bureau's staff was better loved or commanded more respect among employees with whom he came in contact."

In the past quarter century Mr. Scheetz has made the Cosmos Club of Washington "his second career," according to the Bulletin of that organization which devoted more than a page to his activities in its December, 1956 issue on the occasion of his 89th birthday. The article reviewed his service on the house and building committees, the board of management and as executive. "He has spent many days, weeks, and months on problems connected with the club's management and operation—all as a labor of love," said the tribute.

Mr. Scheetz is a member of the American Society of Civil Engineers, the American Railway Engineering Association, the Washington Academy of Sciences, an emeritus member of the Federal Club of Washington, D. C., and a past president of the Washington Society of Civil Engineers.

Mrs. Scheetz was Victoria M. Barker, a native of Carthage, Missouri, where she was born 85 years ago. She and Mr. Scheetz have been married 61 years and live at 3930 Connecticut Avenue, Washington 8, D. C.

Estep named to agency

Preston Estep, LL.B. '39, St. Louis, has been selected by Governor James T. Blair as a member of the Bi-state Development Agency. Estep is president of the Transit Casualty Company and is chairman of the University of Missouri Board of Visitors. The agency, which has five members from Missouri and five from Illinois, attempts to work out problems which affect both states. Estep is a member of the board of directors of the Bank of St. Louis, General Bancshares, General American Life Insurance Company, and R. E. Funsten Company. He is a former counsel for the Missouri state insurance department. With his wife and five children Estep lives at 4 Upper Ladue Road, St. Louis.

Ten social work students at the University are studying under a graduate training grant of \$27,922 from the National Institute of Mental Health, Public Health Service, Department of Health, Education and Welfare. Dr. Arthur J. Robins, associate professor of social work is responsible for the over-all program. DeVere R. Whitesell, assistant professor of social work, will receive a teaching grant of \$6,595, plus expenses of \$527, for classroom teaching and supervision of student field work. The remainder of the grant is for graduate traineeships. The two years of graduate study for each social work student must include field work training, the first year in local agencies, and the second year, a "block" of six months working with patients in a psychiatric institution off-campus.

Frances E. Haines, M.D., honored in Illinois

Frances E. Haines, M.D., recipient of the Award of Merit from the Illinois Society of Anesthesiologists, is nearing a half century of service in the medical profession, and in that period she has been identified with a number of pioneering advances. Dr. Haines, a graduate of the University, is a practicing physician in Chicago, where she has offices at 55 East Washington Street.

The Award of Merit, presented last May, cited Dr. Haines as "founder and past-president of the pioneer Chicago Society of Anesthetists, past-president of the Midwestern Association of Anesthetists, devoted and exemplary physician and instructor." Her productive professional career includes eight years of teaching as a member of the faculty of Rush Medical College.

Dr. Haines, a native of Neligh, Neb., received an A.B. degree and a certificate from the first two years of medicine at the University in 1909, and remained to receive her A.M. degree in the following year. In 1913 she received her M.D. degree from the University of Nebraska College of Medicine.

Until 1926 Dr. Haines, by then a leader in the field of anesthesiology, changed over to the specialty of eye-ear-nose-throat practice, in which she is still busily engaged, but she continued practicing anesthesia for a number of years after making the change.

Dr. Haines aided in the development of ethylene-oxygen gas anesthesia, and was the first person to administer ethylene-oxygen gas only, without ether, to a patient for an abdominal operation. She is credited with being the first in Illinois to advocate and use routinely the taking of blood pressure every five to ten minutes during the anesthesia and operation, a

common practice today. Although medical women were not commissioned in the U. S. Army until April, 1943, Dr. Haines was made Contact Suregon, U. S.

Dr. Frances E. Haines

Army, during World War I and was placed in charge of anesthesia in each of the American Hospitals in which she served in this country and France, becoming the first woman physician ever sent overseas by the United States Army.

National award to Talbert

Thomas J. Talbert, professor emeritus of horticulture, was awarded the Wilder Medal for exceptional service to the American fruit industry by the American Pomological Society at a banquet in Columbia last month. The presentation was made by Stanley Johnston, president of the Pomological Society and research professor of horticulture at Michigan State University.

Prof. Talbert, who was chairman of the department of horticulture at the University for 28 years before becoming emeritus professor in 1950, was cited by the Pomological Society for "outstanding service to the American fruit industry, especially for his part in obtaining reasonable spray residue tolerances." Prof. Talbert has continued to serve with the department of horticulture here as consultant, teacher and researcher since his semi-retirement.

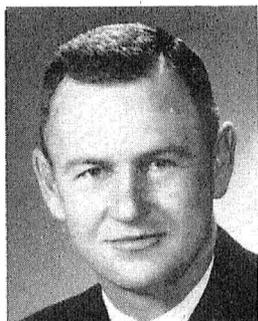

The Wilder Award was established by the Pomological Society in 1873 in honor of Marshall P. Wilder, first president of the organization.

Prof. Talbert was born in Exeter, in Barry County, Missouri, March 15, 1880. He graduated from the University of Missouri in 1913 with a B.S. in Agr. degree, and received a master's degree here in 1917. He did further advanced graduate work here, at the University of California, and at Kansas State College.

Prof. Talbert has done much research on fruit sprays and spray residues, and his leadership in securing investigations of sprays and spraying materials by the U. S. Public Health Service is considered an outstanding achievement for the industry.

He is the author of numerous bulletins and circulars distributed by the College of Agriculture, and has written a number of books, including two college textbooks, "General Horticulture," and "Fruit Crops."

Prof. Talbert has been a member of the Missouri State Horticultural Society for more than 30 years, serving as its secretary once, and was president of the American Pomological Society from 1941 to 1945. He was national secretary-treasurer of Gamma Sigma Delta, honor society in agriculture, for several years, and is a Fellow of the American Society for the Advancement of Science.

Henry Andrae

Doyle Patterson

New curators are alums

Two University graduates have been appointed to the Board of Curators by Governor Blair. They are Henry Andrae, '37, of Jefferson City, and Doyle Patterson, '39, of Kansas City.

Andrae received A.B. and LL.B. degrees from the University and has practiced law in Jefferson City since 1937. He is partner in the firm of Hendren and Andrae, is past president of the Cole County Bar Association, and is chairman of the committee which publishes the Missouri Bar Journal. He served three terms in the Missouri General Assembly. Andrae is immediate past president of the Cole County chapter of the University Alumni Association and is now president of the M. U. Law School Alumni Association. In 1947 he received the Outstanding Citizen Award of the Jefferson City Junior Chamber of Commerce. He is a member of Phi Delta Phi. Mrs. Andrae is the former Helen Walton, A.B. '38; they have four daughters.

Patterson is president of the Farm Belt Fertilizer & Chemical Company of Kansas City. He is a director of the Vendo Company, the Unitog Company, and Research Hospital.

After receiving his A.B. degree from Missouri, Patterson was graduated from the Harvard Business School. He is a member of Phi Beta Kappa. As a student at Missouri, he was active in the Student Government Association, being a member of the student cabinet and the student assembly. He was also on the staff of the Savitar.

Mr. and Mrs. Patterson have three daughters and live at 6440 Summit Street.

NUCLEAR REACTOR CENTER

from page 8

agricultural, chemical, petroleum, food, and other industries of Missouri would have at a convenient location a research tool for their industrial problems."

In working with radioisotopes and other aspects of nuclear application University staff members would gain experience in dealing with nuclear research at the same time that they improved their value for training students in a new and expanding field.

It is expected that the proposed research facility would serve to attract outstanding men in all fields of science to the University staff, and to bring here promising students planning to enter careers requir-

ing a knowledge of nucleonics who otherwise would go elsewhere.

The planning of the reactor and the research in connection with the plans have been carried on by a University Reactor Committee of which Dean Huber O. Croft of the College of Engineering is chairman. Other members are Dean Henry E. Bent of the Graduate School; Dean John H. Longwell of the College of Agriculture; Dean W. Francis English of the College of Arts and Science; Dr. Newell S. Gingrich, professor of physics; and Dr. Gwilym S. Lodwick, professor of radiology and chairman of the department.

The reactor as proposed for the University would be an "atomic pile" with an approximate initial capacity of 1,000 kilowatts, and flexible enough in design to permit an increase in power and the flow of neutrons without reconstructing the shield. It would be housed in a building about 70 feet in diameter, 50 feet high, of steel and special concrete, and all plans and specifications would be approved by the Atomic Energy Commission to assure absolute safety.

The reactor cost has been placed at \$1,300,000, with the building to cost \$700,000. Another \$500,000 would be needed for furnishings and equipment. The University would be at no expense for the site, as the College of Agriculture has a restricted site of 250 acres on Highway 63, about three miles south of the campus, which would be a safe and convenient location. Adequate power for the reactor would be available from nearby high-tension power lines.

It is anticipated that a major part of the operation and maintenance costs of the facility would be obtained from grants and research projects. When other than state agencies were using the reactor facilities, appropriate charges would be made to cover the pro-rated share of the costs. In planning the use of the reactor priorities would be assigned as follows: First, any department of the University; second, any other qualified educational institution within the state; third, any industry within the state; fourth, any other educational institution; and fifth, any industry within the United States.

The University recently acquired two training reactors as gifts from the Atomic Energy Commission. The most important of the two is a 10-kilowatt pool reactor for use in the nuclear engineering education program of the School of Mines and Metallurgy at Rolla. The other is a natural uranium sub-critical assembly for laboratory use by the College of Engineering at Columbia. The sub-critical assembly is a form of reactor that is not capable of producing power, of setting up self-sustained nuclear reaction, or of producing dangerous radiation.

Frank H. King, BJ '17, who recently retired as general executive for the Associated Press in the southwest, was honored at a testimonial dinner in Corpus Christi as "The epitome of the type of newspapermen who have made the Associated Press great." King, who lives in Dallas, is president of the Journalism Alumni Association.

Phillee's busy schedule

Bennett Phillee, who attended the University from 1926 to 1929, is general manager of Ziv radio and television productions, with headquarters in Cincinnati and offices in New York, Hollywood, Dallas and Chicago. He has been with the firm since 1947, when it was producing half-hour serials for radio; top shows at the time were "Cisco Kid" and "Boston Blackie," both later adapted for television. Today the company produces about thirty syndicated radio and television shows.

Phillee went to work for the old Kansas City Journal Post after leaving the campus, then joined the merchandising department of the Chicago Daily News. He went to an advertising agency in New York as copywriter and account executive, served four years in the Air Force during World War II and received his commission as a lieutenant colonel, and joined another agency in Cincinnati before transferring to Ziv.

Although his company films the more popular type of television shows ("which we think the public wants—the higher type of programming, though laudable, is hard to sponsor"), Phillee sees a trend in the progress of educational television.

"One of television's most significant promises is the TV classroom," he believes. "I daresay that in 15 years, more than 70 per cent of all classrooms will utilize television circuits."

Phillee has a house in Cincinnati, an apartment in Chicago, and also frequently commutes between company maintained apartments in New York and Hollywood. He estimates that he spends about 42

weeks out of the year flying 120,000 miles to board conferences. Last summer he had his first long vacation in thirty years when he visited his parents, Mr. and Mrs. Fred McQueary, 1215 South Delaware, Springfield, Mo.

4th World Press Congress

About 125 delegates from more than 25 countries are expected to attend the Press Congress of the World, to be held March 2-4 at the University as a highlight of the 50th Anniversary observance of the School of Journalism. Approximately 100 world leaders in the field of communications have already accepted invitations to the Congress. The agenda includes the responsibility of the press, access to the sources of news, and the flow of news between countries.

This will be the fourth such Press Congress. The first was held in 1917, under the leadership of the late Dean Walter Williams. The delegates will arrive in the United States late this month. Each will be the personal guest of an American publisher or broadcaster and spend a week in the host's locality before the congress. After the meeting in Columbia, delegates will go to Chicago as guests of Chicago publishers and the Chicago Press Club. Later they will take a two-week tour of the United States as guests of the State Department.

Byron Price, former assistant secretary general of the United Nations has been named director general of the Press Congress, and James Kearney, Jr., former editor of the Trenton (N. J.) Times, will be secretary general. The School of Journalism's Dean Earl F. English announced the appointments last month.

Peggy Phillips lends a hand

The talents of Mrs. Peggy Phillips in organizing, promoting and publicizing events are being utilized in connection with the 50th Anniversary Celebration of the University School of Journalism. Mrs. Phillips is on leave from Stephens College as news bureau director to serve on the Journalism Year staff as associate director. Mrs. Phillips is a former student in the University.

She is president of the Missouri Women's Press Club and is also active in the American College Public Relations Association, the Advertising Federation of America, Theta Sigma Phi, the National Federation of Press Women, and the Missouri Writers' Guild.

One of the 50th Anniversary big events to which Mrs. Phillips has given special effort is the "Women in Journalism" program here February 12-14. In December she was in New York City in connection with Golden Anniversary activities. There she was guest of honor at a Christmas party given by the New York chapter of Theta Sigma Phi at the apartment of Fannie Hurst, was among honor guests at an Overseas Press Club meeting, and luncheon guest of Inez Robb.

Mrs. Phillips and her husband, J. Webster Phillips, live at 805 Lathrop Road in Columbia.

Mrs. Peggy Phillips

Ellis on journalism

Speaks to National Press

Club as plaque is presented.

President Elmer Ellis was the principal speaker when the University of Missouri School of Journalism presented a bronze plaque to the National Press Club in Washington on January 26. The plaque was inscribed with the "Journalist's Creed" by Walter Williams. The occasion was the school's 50th anniversary, as well as the 50th anniversary of the press club and of Sigma Delta Chi, professional fraternity in journalism.

"The profession of journalism, like most other professions and notably those in the scientific fields, gets more complicated year by year," President Ellis told the dinner meeting.

"The task of explaining to the public the scientific developments that are taking place, together with their social and economic implications, is becoming difficult indeed. This increases the need for a broad and thorough basic education for journalists and for others engaged in the spread of information through mass media. Furthermore, the education of the journalist must continue as long as he is a journalist. To this constant improvement of the profession the University of Missouri pledges to devote a proper portion of its interest and its resources."

President Ellis said the School of Journalism seeks to do for journalism what schools of law, medicine, agriculture, engineering, and normal schools have done for those vocations. Previously professional training was obtainable only in the lawyer's office, the doctor's office, and so on.

"With the increase of demands upon the time and thought of professional men, it has become impossible for the student to find adequate training at the hands of older men actively engaged in the practice of their profession," he said. "The result has been that professional or vocational schools have taken the place of the individual training of the past.

"Professional training for journalism at the University of Missouri, as elsewhere, is not entirely like training in law and medicine, where the schools are virtually separate and the students take no work outside the professional school. Journalism training is more like business or engineering where a great deal of the training is more general and is implemented through liberal arts courses. Consequently the strength of any program of education in journalism rests not alone on the School of Journalism but upon the entire university and particularly upon the college of liberal arts.

"Schools of Liberal Arts, Agriculture, Law, Medicine, Engineering, Mining, of Education, Business, Veterinary Medicine, Social Work, Forestry, and of Journalism—all go to make up the complex higher education panorama which is the modern University

of Missouri. Without all of it, the School of Journalism would be of lesser stature."

President Ellis praised the contributions of Walter Williams, founder of the School of Journalism in 1908, as a member of the Board of Curators, as dean and professor in the School of Journalism, and as president of the University.

"Other names could be mentioned too, because many other people have contributed to the achievements of the University of Missouri School of Journalism," he said. "I wish to mention especially Frank Martin of the original faculty and the second dean; Frank Luther Mott, the noted historian of American journalism and Dean Emeritus; and the present dean and Distinguished Professor, Earl English. These are the best known of the large number of teachers who have made Missouri outstanding in the professional training of journalists."

The plaque was presented by Dean English and will be placed prominently in the National Press Club. It was accepted by the club president, William H. Lawrence of the New York Times. Lyle C. Wilson, B.J. '24, vice-president of United Press International, spoke at the ceremony. Raymond P. Brandt, B.J. '18, chief of the Washington bureau of the St. Louis Post-Dispatch, was master of ceremonies.

\$32,000 for chair of banking

The Missouri Bankers Association has contributed \$32,000 to the University of Missouri to establish a chair of banking in the B. & P. A. School.

The chair is a memorial to the late Robert E. Lee Hill, executive manager of the association from 1943 to 1957, and for many years secretary of the University Alumni Association.

The fund will be administered by the Board of Curators and will be used to supplement the salary of a full professor. Dr. William B. Bradshaw, dean of the School, hopes a professor will be selected and a curriculum established by the time the school's new building is ready for use next September.

Presentation of the fund for the new distinguished professorship was made at a dinner meeting during the association's annual bank management conference on the campus last month. Willis Alexander, Jr., Trenton, chairman of the fund raising committee and vice-president of the Missouri Bankers Association, presented the check to President Elmer Ellis of the University. Others on the committee were Hartley Banks, Columbia; John Harris, Fulton; and Robert E. Allen, Perry.

Department of Geology staff members and students heard a lecture by Dr. Frank B. Conselman, consulting geologist of Abilene, Texas, on "The Future of American Petroleum Geology" on January 23. Dr. Conselman received his Ph.D. degree from the University in 1934. His lecture was sponsored by the American Association of Petroleum Geologists.

Rex M. Whitton cited for highway progress

Rex M. Whitton, chief engineer of the Missouri State Highway Department, was honored in January for "outstanding contribution to highway progress." He received the George S. Bartlett Award at the fifty-seventh annual convention of the American Road Builders Association in Dallas. The presentation was made by B. D. Tallamy, Administrator of Roads, Washington.

Mr. Whitton has been with the highway department for more than 38 years and has been chief engineer for the Missouri Department since 1951. He was named a member of the executive committee of the American Association of State Highway Officials in 1954 and was reappointed in 1957 after serving as president in 1956. He is also a past chairman of the executive committee of the Highway Research Board.

Mr. Whitton received a B.S. in Eng. from the University in 1920, and his family is well represented in M. U. alumni ranks. Mrs. Whitton, the former Callie Maud Lowe, was in the College of Arts and Science, her last year being 1924. Their son, Rex M. Whitton, Jr., received a B.S. in C.E. in 1953 and his wife, the former Doris Jeanne Butler, was in the B. & P. A. School the same year.

An editorial in the Columbia Missourian on the honor received by Mr. Whitton said in part:

"Most Missourians will not need a bill of particulars to know why Whitton received the special award. His name has long been prominent throughout the state when any mention is made of highway improvement.

"He is, in a large sense, the builder of Interstate Route 70 here at Columbia and has played a major role in the improvements of state and federal highways throughout the state—widening, leveling and straightening them. The signs of his handiwork are widespread.

"Whitton has often been a step or two ahead of his fellow highway builders throughout the nation

and, in fact, sometimes a little to the front of most Missourians. His foresight has at times brought him under fire from some special interest groups.

"He is the man who masterminded the proposed 20-year improvement program now before the Missouri legislature which calls for total expenditures of

Rex M. Whitton

more than 4 billion 600 million dollars, financed primarily through a gasoline tax.

"Gov. James T. Blair once in a television interview noted that Whitton is 'one of the outstanding highway engineers in the country today.'

"The award made to Whitton adds to his own personal achievement but, more than that, it is a recognition of the progress made with Missouri highways, made possible to a large degree because of Whitton."

Board of directors of the Alumni Club of South Texas: Dr. William M. Hager, Gerald Mathews, Don Morgan, Rudolph Pazdernik, Jim Seaton, Jim Barnes, Dr. Sam Carpenter, Walter Benedict, Bill Hanes.

Ellison heads national society

Samuel P. Ellison, Jr., professor of geology at the University of Texas, will become president of the 1400-member Society of Economic Paleontologists and Mineralogists in March.

Ellison was born in 1914 in Kansas City, Missouri. After graduation from the University of Kansas City, he came to the University of Missouri for graduate study, receiving an A.M. degree in 1938 and a Ph.D. degree in geology in 1940.

Dr. Ellison's experience includes five years at the University's School of Mines and Metallurgy at Rolla as an instructor and assistant professor of geology. For four years (1944-48) he was with the Stanolind Oil and Gas Company (Pan American Petroleum Corporation). In 1948 he joined the geology faculty at the University of Texas where he is now chairman of the department.

Ellison's publications include papers on petroleum geology, micropaleontology, paleoecology, educational techniques, and stratigraphy. He is a fellow in the Geology Society of America and the American Association for the Advancement of Science, and a member of the American Association of Petroleum Geologists, Society of Petroleum Engineers, and Sigma Xi.

He has returned to the M. U. campus on several occasions and has given lectures to geology students and staff members here.

Dr. Samuel P. Ellison, Jr.

Social work program expands

The University of Missouri School of Social Work has further expanded its program in the corrections field by the appointment of a new staff member especially responsible for the teaching and placement of students in field work to give them practical experience, according to Arthur W. Nebel, director of the school. The new staff member is Dale G. Hardman, formerly with the Utah State Division of Vocational Rehabilitation and also the Utah State Industrial School at Ogden, who has been appointed assistant professor of social work.

A grant of \$10,831 for training in vocational rehabilitation has been given to the University by the Department of Health, Education, and Welfare.

Nebel will administer the gift, which includes a teaching grant of \$6,695, plus expenses of \$560. This will go to Paul Mengel, assistant professor of social work, for classroom teaching and supervision of student field work. The rest of the grant is for two graduate traineeships.

ORCHIDS GO TO COLLEGE

from page 7

Smith replies, "except to florists occasionally. We are not competing with commercial business. If we have several blooms which a florist wants, we sell them to him and use the money for greenhouse supplies. We're not trying to make money. We're here to train future florists and nurserymen."

Growing orchids is a glamorous but minor portion of the work carried on by students in floriculture.

One boy completed a poinsettia project before Christmas. Two girls who are interested in design are growing carnations, using procedures followed by commercial florists. Two students work with roses; one has a year-around chrysanthemum project; one is experimenting with soilless gardening, using gravel and a nutrient.

Dr. Marlin Rogers is directing research in the flowering habits of snapdragons under different light treatments. The floriculture department is doing research on the keeping qualities of flowers, and is cooperating with the agricultural economics department in a study of standard grading of flowers. Other departments have projects on insect control and disease control which are closely connected with floriculture.

During the past 10 years, more than 100 students majoring in floriculture have been graduated from the University, and an equal number took courses to supplement their studies in other departments. More than half of the graduates are employed in the florist industry. Four of the graduates are girls who are continuing in floricultural pursuits.

At the present time, 15 students are training to be designers and flower shop managers, and 12 are studying landscaping and greenhouse management. In addition to prescribed courses in floriculture, they round out their programs with courses in business, journalism, art, and certain basic courses in arts and science.

Classroom lectures and discussion help to crystallize ideas for novice florists, who learn to practice in the greenhouse what their professors preach about plant culture.

Emphasis shifts in new Ag curriculum

Freshmen entering the College of Agriculture at the University next fall will be enrolling in a completely-revised curriculum designed to keep a step ahead of the times.

The new agricultural curriculum puts greater stress on theory and basic subjects and less emphasis on "how-to-do-it" applications to agriculture, according to S. B. Shirky, acting dean of the College of Agriculture.

It also allows the student greater freedom in the selection of courses he wants to take and thus allows him to have a "tailor-made" curriculum of his own.

Announcement of the revised College of Agriculture curriculum was made by Shirky at the annual meeting of the Advisory Council of the University's Division of Agricultural Sciences in session here January 20.

Council members—friends and alumni of the College of Agriculture—had earlier advocated a change in the agricultural curriculum. They submitted their suggested changes during a series of College of Agriculture seminars they were invited to take part in last fall.

Members of the Advisory Council, many of them in businesses that employ graduates of agricultural colleges, had pointed out that young men entering the business world at the present time need, more than ever, a well-rounded education. And, since a large majority of College of Agriculture graduates are now going into business instead of returning to farming, it seemed highly desirable to make the curriculum change.

The new curriculum for students enrolling in general agriculture is divided into two sections, Shirky told the Advisory Council. The first section covers the first two years of study and all required basic courses are included in this part of the curriculum.

Sixty semester hours of credit are included in the study program for the first two years plus basic military and physical education requirements.

The second group includes 68 semester hours of work. It is here that future agricultural students are offered considerable freedom in selecting their course of study. The final two years' work will be outlined in conferences between the student and his adviser, a faculty member in the College of Agriculture.

Once the final two years' program is outlined and approved by a student's adviser and the Dean's office, a copy will be furnished the student, his parents, and his adviser.

Greater emphasis on high-quality work is another change in the agricultural curriculum. All courses taken by the student during his final two years must be completed with a satisfactory grade before he can graduate, Shirky said.

A satisfactory grade is one at, or above, the medium

grade level. Courses failed or completed with a D—an unsatisfactory grade—must be repeated until the prescribed standard is reached.

Under the new curriculum, no minimum number of hours of agricultural credit is required as compared to the 60 hours of such work now needed to graduate. The amount of agricultural course work completed by the student depends upon what line of work he is preparing for after graduation and the schedule he and his adviser work out for him to follow.

Total hours required for a bachelor of science degree in agriculture under the new curriculum will be 128 hours plus required physical education and basic military course work the first two years.

Courses added to the list of required work in the first two years of college include public speaking, accounting, psychology, and a choice of one of three sociology courses, one of two philosophy courses, and one of two writing courses.

Required courses held over from the current general agricultural curriculum include introduction to agriculture, composition and rhetoric, chemistry, economics, mathematics, physical education, basic military, and choices between botany or zoology and American government or American history. Ten hours of elective work round out the first two years' work in the new curriculum.

Shirky said the first two years' work could be completed at colleges or universities other than the University of Missouri. However, the final 68 hours of work—the last two years—must be completed in residence to earn a degree.

The agricultural education, agricultural journalism, and home economics curricula are also being altered to include the "new look."

Details of the new general agricultural curriculum, plus all other courses of study offered, are included in the College of Agriculture announcement for the 1959-60 school year, Shirky said. This announcement is now being printed and orders for it are being taken at the Dean's Office, 125 Mumford Hall, Columbia, Mo.

John Herlinger, Warrenton, is the new president of the Advisory Council for the University's Division of Agricultural Sciences. He was elected at the meeting here last month. Joe Motter, Edina, was named vice-president and C. W. Sheppard, Warrensburg, was chosen secretary. Added to the council's board of directors to replace those whose terms had expired were Garland Russell, St. Louis, and Henry Meyer, Owensville. Others on the board include V. Flint McRoberts, Monticello; C. R. Talbert, Kennett; Don K. Spalding, St. Joseph; A. G. Anderson, Springfield; Ed Woods, Salem; and Thomas Staley, Kansas City. Herlinger, Anderson, Sheppard, Spalding, Talbert, Russell, and McRoberts hold University degrees.

Missouri's vaulter Joe Webb

Track team wins opener

This year's edition of the Tiger track team got the season started on the right spiked foot with a 53-51 win over Western Michigan, the defending Central Collegiate champion, at Kalamazoo on February 5.

It, as all dual meet wins, was a team victory; but outstanding among the Missouri performers was pole vaulter Joe Webb, who emerged from the shadow of last year's star teammate, Bob Davis, as a champion in his own right with a University of Missouri indoor record vault of 14 feet 3 inches. Sophomore Calvin Groff, the latest in a long line of great Missouri hurdlers, stamped himself as a man to watch for field house records in both the high and low hurdles.

The most surprising feature of the meet was Missouri's meet-deciding dominance of the sprint and hurdle races despite the absence of team captain Henry Wiebe, who normally dominates these events. Henry was temporarily sidelined with a leg cramp that also kept the defending champion Missouri shuttle hurdle relay team out of the Michigan State Relays.

Webb and Groff also led Missouri's individual entries with third and fourth places respectively at these same Michigan State Relays on February 7. Other Missouri place winners in this outstanding national meet included high jumper Jim Green, who tied for third, and shot putter Danny LaRose, who finished fifth.

The balance of the Indoor schedule will have the traditionally tough Indiana team in Columbia on

February 14, and the Big Eight's perennial champion Kansas Jayhawk team here on February 20.

This fine dual meet schedule should have the Tigers ready for their best effort in recent years in the Big Eight Conference Championships in Kansas City February 27 and 28.

Hot stove league

Hi Simmons' baseball team has begun its spring training season; but the blowers and lights of Brewer Field House are not a very satisfactory substitute for Florida sunshine. About the only real similarity is that these days the field house is just as crowded as midafternoon on Miami Beach. Varsity and freshman basketball workouts, indoor track and individual workouts by football players trying to get down to assigned weights for spring football—these activities just don't leave much time or space for baseball in the field house. Hi's charges squeeze in their workouts after dinner with infield practice on the basketball court, lots of running on the track and batting practice in the fish net batting cages which are dropped down from the field house rafters.

Five boys who could have formed a formidable nucleus for this year's team are actually making the trip to the sunny south with major league teams that have lured them away from the balance of their collegiate eligibility with bonus contracts. Sonny Siebert and Bo Toft, last year's starters at first base and right field, are in spring training with the Cleveland Indians and Boston Red Sox respectively. Hank Kuhlmann, last year's catcher, who completed his football eligibility before succumbing to the bonus offer of the St. Louis Cardinals, joins former Tiger teammates Charlie James and Mike Shannon who signed with the Cardinals last year. Kuhlmann and James are among seven rookies invited to train with the Cardinals' major league squad at St. Petersburg, and both are given an excellent chance of making the parent club in the near future.

All of this is small consolation to Missouri's coach, Hi Simmons, who must look closely at the talent at hand and face the tremendous rebuilding job rather than dream of what might have been. The only real bright spot for Hi is the return of all but Ernie Nevers from last year's pitching staff which led the Tigers to second place in the NCAA World Series, and the addition of a couple of good freshmen prospects along with the return to academic eligibility of Red Miller, who starred during the 1957 season.

Other than the returning pitchers he also has two infielders, captain-elect Ralph Hochgrebe at short-stop and Gary Starr at second base, and two outfielders, Bob Haas and Bob Meyers. All this means that he must try to find enough batting punch to compensate for the loss of .300 plus hitters like Kuhlmann, Toft, Siebert, and team captain Ray Uriarte, who has graduated. This is a monumental task but no bigger one than Hi accomplished last year when he brought a bunch of comparative unknowns to the NCAA finals.

Tigers finally rebound

At the expense of his old coach and teacher, Sparky Stalcup's Tiger basketball team finally broke the slump that had plagued them for two months. Going into the February 10th game with Oklahoma State, Missouri had suffered an all-time high of 11 consecutive defeats. These included the Texas Tech and Texas Western games reported in the December issue of the *Alumnus*, three tough ones in the conference holiday tournament and one to each of the other conference opponents in the first half of conference play.

Sparky, who had played for Cowboy Coach Henry "Iron Duke" Iba thirty years before at Maryville, caught his old coach at a tough time. Though Iba's team was having a bad year for him with 8 wins and 9 losses, they were as usual among the top teams in the nation defensively; and they had beaten arch-rival Oklahoma by 19 points, Texas by 20 and Nebraska by 15 while losing to Iowa State by only one in the four games since the semester break.

In winning its fourth game of the season, Missouri broke on top, then hit one of the bedeviling cold spells that had haunted them during their losing streak; but they managed to eke out a one-point lead by the half. Led by veteran Al Abram and sophomore Charlie Henke, they moved into a commanding lead early in the second half and finally mastered their heretofore weak control game to hang on for a convincing 51-44 win. The starting lineup of sophomores Henke, Sarver and Scott with veterans Abram and Kirksey played most of the time in the drouth-breaker and gave promise of being the right combination for the final seven games of the season.

The only Missouri casualty in the game was Coach Stalcup's dignity. In their enthusiastic haste to salute him for a job well done, the kids on the squad ripped his trousers as they hoisted him to their shoulders after the game. "The pants to a new suit," according to Spark, "but well worth it."

Now that the long losing string is over it's interesting to view it in retrospect. It's difficult, if not impossible to assess the factors involved in such a slump. Some point to the low scoring potential of the team which has only Abram at 14 and sophomore Joe Scott at 10 with scoring averages in the double figures. Others cite the forced reliance on sophomores and use the breakdown of Stalcup's normally tenacious defense as primary evidence of this inexperience. A case can be made for the loss to the major league baseball draft of Sonny Siebert and his 20 point a game average. There has even been blame fixed on excessive fouling and rough play as the chief reason.

Whatever the reasons may have been, there's little doubt that the long losing streak had a disastrous momentum to it which was psychological rather than physical. Now that it has been jarred, it will be interesting to observe the Tigers from here out; perhaps the second time around they will sneak up on two or three of those conference opponents who have already beaten them.

Devine tops young coaches

A mid-January wire service story carried the results of a study made by Don Barton, University of South Carolina sports publicist, on the records of the major college coaches who finished their own college playing or got into coaching after World War II.

It came as no surprise to those of us who've had a chance to see him at work that the number one name on the list was Daniel Joseph Devine. Dan's four-year record at Arizona State and at Missouri is 37 wins 7 losses and two ties, a winning percentage of over 80%.

Ranked behind Devine were such well known names as: Terry Brennan, ex-Notre Dame mentor whose 31-18-0 record caused such a furor when he was fired; Warren Giese of South Carolina—19-11-0; Darrell Royal of Texas 30-20-1, the biggest of those 30 was Texas' 1958 upset of Oklahoma; and Paul Dietzel of L.S.U.—22-17-2, who was named coach of the year last year.

It's nice to see figures substantiating what his followers have long believed: that Dan Devine is the best young football coach in America.

Sportscaster Lee Fisher

Young man goes west

Lee Fisher, BJ '57, who has been closely associated with Missouri sports for the past two years, has given up his position as Sports Director of KOMU-TV in favor of one as Director of Public Relations for the Denver Bears baseball club.

Lee, who also served as assistant to Missouri Sports Publicity Director Bill Callahan, during his student days, will be missed in Columbia and in central Missouri. His interest in and enthusiasm for Missouri athletics were a valuable asset for University of Missouri teams. But this is an opportunity he couldn't afford to pass up. Denver, one of the soundest of all minor league franchises, is a member of the class AAA American Association, and is one of the minor league teams most often mentioned as a future major league prospect.

JEAN MADDEN

Book edited by Williams recalled

By Clyde C. Hammers

One of Walter Williams' noteworthy efforts as an editor was his work on a book—"The State of Missouri"—published in 1904 by the Missouri Commission to the Louisiana Purchase Exposition. Its purpose, Williams wrote, was to acquaint "the world with the possibilities of Missouri to the end these possibilities may be realized in the fullest measure."

The Missouri Legislature appropriated one million dollars for a state exhibit at the Exposition, or World's Fair, at St. Louis. The book was financed by that appropriation and was a part of the exhibit.

Oddly, the volume is called an autobiography, "the story of Missouri told by Missouri," to quote from the foreword by Williams. He wrote the first chapter, which bears the book name, "The State of Missouri." Then follows 21 chapters by Missourians, who, for the most part, were M. U. professors and authorities in their respective fields.

With such a notable group of contributors, Williams's job of editing may have been difficult. "Every care has been taken to secure accuracy of statement," he writes. "Much of value has of necessity been omitted." And he quotes the adage that it's no imputation on a huntsman "if he hath not caught all."

Introducing his subject, Williams pictures three gates which opened to the Missouri territory in the beginning: The lower water gate through which the Spanish came for gold; the French came by the upper water gate for adventure and inspired by missionary zeal; the mountain gate from the east opened for the Virginians and their children from Kentucky, seeking homes and freedom. . . . "The Spanish are remembered by an occasional name of town or river and the French in the same wise. . . . The colonists from east of the Appalachians were the real founders of the early State."

Williams presents the character of Missouri's people and the diversity of her resources and products. . . . "A State is the product of its people. In field and mine and forest are found the tools." With admirable economy of words he sets forth in a few pages the resources of Missouri in agriculture, livestock, mining, horticulture, etc. His collaborators continue with these topics in greater detail.

Isidor Loeb, professor of political science and public law, tells how the commonwealth is governed. The livestock industry is discussed by F. B. Mumford, professor of animal husbandry. The chapter on mining is by G. E. Ladd, director of M.U.'s School of Mines and Metallurgy.

Another University instructor, John S. Ankeney, presents the church life of Missouri, with illustrations ranging from the cathedrals of the cities to a Sunday school room in Pierce City. H. J. Waters, dean of the College of Agriculture, is the author of the chapter on farming.

C. F. Marbut, professor of geology, writes on the state's soil and rock formations and reminds us that

half of Missouri's soil is native, the other half borrowed. "The southern half of the state," Marbut says "is covered with a residuary soil, or a soil that has resulted from the decomposition of the native rocks, while the northern part of the state is covered with a transported soil . . . of glacial origin."

The story of the state's counties, in which each county is described at length around an individual map, is the most ambitious undertaking in the book. Roy A. Hockensmith is the author.

Jonas Viles, instructor in history, contributes the historical portion under the heading "The Story of the State." He begins with Missouri as a colony under French and Spanish rule and continues through its various territorial governments to its admission to the Union in 1820. The founding of St. Louis in 1764 was the embryo of a great commonwealth.

Viles carries the story through the travail of the Civil War, the state's emergence from radical government that followed the war, and the phenomenal industrial growth up to 1904. Written more than a half century ago, his closing words are prophetic: "And yet the sentiment of every Missourian and every student of her history is, that the real development of the state has hardly begun."

The noted historian adhered to a central theme and his essay is not cluttered with dates and the names of heroes; but this feature is taken care of in a unique way by H. E. Robinson, president of the State Historical Society of Missouri. Robinson's "Missouri Chronology" appears on the wide margins of the pages alongside the text in such thumbnail notes as . . . "1541 The first white men (under DeSoto) set feet on the soil of Missouri. . . . 1673 Marquette and Joliet discover the Missouri river. . . . 1705 French ascend the Missouri river to the mouth of the Kansas river."

Walter Williams also takes a dip into history. "The State has given great men to the nation, the chief product of any State," he writes. "Four hundred Missourians were asked to name the leaders of the State's thought, the men who had done the most for Missouri and through Missouri for the world. The majority named Thomas Hart Benton, Frank P. Blair, John S. Phelps, B. Gratz Brown, Richard P. Bland, Hamilton G. Gamble, James S. Green and Edward Bates, statesmen; James S. Rollins, the father of the State University; Sterling Price and A. W. Doniphan, soldiers; James B. Eads, engineer; E. M. Marvin, peacher; Eugene Field, poet; and George Bingham, artist."

This volume of nearly 600 pages is Missouri throughout, published by the press of E. W. Stephens, Columbia, the engraving by Michaelis Engraving Co., St. Joseph. Every page is illustrated, depicting life as it was in Missouri in the early years of the century. Williams dedicated it "To those who are Missourians and to those who should be." He was 40 years old and within four years of his call to Missouri University.

class notes

88 WILLIAM R. GENTRY, AB, LB '91, LLB '96, of Gentry, Bryant and Sheppard law firm in St. Louis, Mo., retired on December 31 after 62 years of active practice. Born in Columbia, Mo., Mr. Gentry was a well-known figure in the trial courts of St. Louis and has been honored by the Lawyers' Association of St. Louis. He has also been active in the Masonic Lodge and with the Presbyterian Church. His home is 483 Edgewood Drive, Clayton. Two sons live in the St. Louis area; WILLIAM R. GENTRY, Jr., LLB '22, and Thomas F. Gentry, who is principal of Henry Clay School in North St. Louis.

04 WILLIAM S. HOGSETT, AB, still spends a part of each day at the office of his law firm; Hogsett, Houts, James, Randall & Hogsett, at 1122 Rialto Building, Kansas City, Mo., but is less active now, after 52 years in the practice of his profession. He continues to maintain close contact with alumni of the University, for his firm is composed of Missouri students and graduates. His home is 2 E. 54th St. Terrace, Kansas City.

OMER DENNY, BS ME, retired engineer of Berkeley, Calif., lives at 1110 Cragmont Avenue there.

ERWIN M. TOMLINSON, BS EE, is retired and lives in Buhl, Idaho, 228 12th Avenue North.

07 WALTER E. BAILEY, AB, LLB '09, Judge of Division No. 1 of the Jasper County Circuit, retired on January 1 after 26 years of service. Judge Bailey's service also includes service on the Springfield, Mo., Court of Appeals. Born in Carthage, Mo., he began his law practice there and was elected to the Missouri Legislature in 1916. His legislative career included many house and conference committees, including the chairmanship of the house committee on roads and highways. He was recognized for his years of service, including six years on the school board of Carthage, when the Jasper County Bar Association held a testimonial dinner in his honor in December. Mr. and Mrs. Bailey live at 1002 Garrison in Carthage. Their children are Mrs. Helen Marie Kirchner of Corpus Christi, Texas, and W. E. Bailey, Jr., Coffeyville, Kan.

11 Mrs. NELLIE REEDER Marks, who lives in Yankton, S. Dak., at 1003 Douglas, has not returned to the campus since 1911 and would appreciate the many changes in 48 years. She is a widow, an ex-teacher, presently gives a few music lessons, and works with the Methodist Church there. Among her recollections of the campus

are the Holman family with whom she lived as a student. Joe Holman was in medical school at that time, but our records give no current information.

ARTHUR M. IDLER, LLB, is retired after many years with St. Louis Union Trust Company and is representative for Georgeson & Co., New York. Mr. and Mrs. Idler, formerly Josephine Verdin, live at 707 Glenvista, Glendale 19, Mo. Mr. Idler keeps current on University news by attending the Missouri Table on Monday at Stix, Baer and Fuller.

12 PAUL VAN OSDOL, LLB, retires on April 13 as a Missouri Supreme Court Commissioner after 16 years. The Van Osdol home in Jefferson City is 318 Washington Street.

Mrs. LELA DOUGHTY Nichols, BS Ed., is retired and lives at 1074 So. Sycamore Ave., Los Angeles 19, Calif.

14 H. L. SHRADER, BS Agr., is Extension Poultryman with the Federal Extension Service in Washington, D. C. His work of coordinating this subject-matter field throughout the United States recently took him to Honolulu where he appeared as principal speaker on the Poultry Science Day program at the University of Hawaii. While in Honolulu he had an opportunity to reminisce with H. L. CHUNG, BS Agr. '16. Both of them

attended classes together under H. L. KEMPSTER, professor emeritus, and the three "H.L.s" have always kept track of each other through their professor.

Mrs. William H. MaClay, formerly ELEANOR A. ASDALE, AB, is living in Dallas, Texas, at 3633 Overbrook Drive.

15 L. S. KLEINSCHMIDT, BS Agr., public health advisor for the U. S. Public Health Service, Region V, is stationed in Chicago and his work covers five states, Illinois, Indiana, Michigan, Ohio and Wisconsin. A former resident of Columbia, Mr. Kleinschmidt became chief of Rural Health Program for the F.S.A. Region III, Indianapolis, in 1938. In 1946 he went to Chicago as Rural Health Advisor to the American Medical Association. Mr. and Mrs. Kleinschmidt live at 7611 N. Sheridan Road, Chicago 26, Ill.

W. S. MORGENTHALER retired in 1955 after teaching high school mechanical drawing in Des Moines for 33 years. He is now teaching his eighth year at Grand View College in Des Moines, where he is a professor of engineering graphics. Mr. Morgenthaler also has been golf coach in high school and at the College for most of the last 25 years. Another interest is the Des Moines chapter of S.P.E.B.S.Q.S.A. The Morgenthals live at 3800 Washington Ave., Des Moines 10.

Letters

To the Editor:

Our past year has been a wonderful one, with many new experiences—mainly George's adaptation to an entirely new position after retirement from government service for 25 years, as material analyst for the new docks and wharves being built for the State of Alabama; and then the most inspiring association with 16 young Korean Air Force Officers, who are or have been in residence at Keesler A.F. Base for advanced training.

I did so enjoy the November *Alumnus* because of the account of the life of Professor Wrench, and the picture of the couple standing in the very place where George and I fought often until Professor Hamilton stopped me in Class (French) just to the right of that window and said, before all the class, "Miss Sherman, if you were as interested in your A.B. as you are in an MRS., your grades would surely improve." The pictures of the stairway to the four floors, that I crawled up backward, dragging my crutches for weeks, brought memories...

Mrs. George C. Gundlach
Pass Christian, Miss.

To the Editor:

The Campus Album in the November issue brought to mind a time in winter when I too, took a closer look at my Alma Mater.

It was Christmas vacation, 1956, and I had stayed in Columbia to get two more hours at intersession in Journalism school, in order that I might graduate the following June.

With the campus practically deserted, I walked the streets; streets that were usually full of hurrying students; and missed them. At night, in the softening light of the sunset, I could see the gleam of the golden ball atop Jesse's dome.

As shadows dropped into half foggy night, the tree limbs on the west library lawn made silhouettes against the blueness of the sky. The smoke from the University's power plant folded and fumed out into the sky, but then silently turned peaceful and sailed away.

Nowhere can one sense the greatness of the dreaming of mankind more than among the buildings of his mother school, and the freedom of the spirit seems to be what education is preaching: freedom of spirit, and peace.

Dave Miller
Box 251
Blaine, Washington

class notes

Mrs. Harry C. McKing, who was VIOLET WEBB of Norborne, Mo., lives at Huntington Park, California; 6713 Cedar St.

16 GEORGE H. ELLIOTT, president of George H. Elliott & Company, brokerage firm dealing in hides and skins, has received a government appointment as a member of the National Defense Executive Reserve. This appointment is under the Director of the Leather, Shoes and Allied Products Division, U. S. Department of Commerce. During World War II Mr. Elliott served as a government consultant. He began working in hide plants during University summer vacations, and 40 years ago established the firm at 130 N. Wells St., Chicago, which now bears his name. It has branch offices in several large cities and is national in scope. Mr. Elliott raises purebred polled Herefords as a hobby and has many prize winners in national competition.

DEAN KIRK, AB, is a partner in the company, Dean Kirk & Son, 3627 E. Florence, Bell, Calif. Mr. Kirk lives in Laguna Beach at 297 Crescent Bay Drive.

22 JAMES C. RICE, BS Ed., head of the University of Mississippi medical school pharmacology department for 17 years, retired on December 31. Dr. Rice, born in St. Louis, began his career as an educator as a high school teacher in Missouri and Oklahoma. He joined the faculty of Kansas City Junior College where he remained until going to New Orleans where he was an assistant professor at Louisiana State University School of Medicine. Dr. Rice went to University in 1912 and has seen that school progress extensively in these 17 years. Dr. and Mrs. Rice built a home seven years ago on the Bon Secours River near Foley, Alabama and moved there early in January.

NAT T. BUCKLEY, BS, is a minister of The Methodist Church, Minnesota Conference. His home is 100 Seventh Ave. South, St. James, Minn.

Mrs. Stanley G. Wight, formerly CATHERINE WARE, AB, BJ '23, retired newspaper woman of San Francisco way, does free lance work and continues her activities with Theta Sigma Phi, honorary fraternity for women in journalism. She was general chairman for their ninth annual Authors' Party in November, where authors meet the public, and proceeds from the occasion go to their scholarship fund at the Stanford University J-School. One author present was DOROTHY KAUCHER, AB, BS Ed.

'15, a former instructor at Missouri, whose new book is "What You Need in Art. Yes?" Mrs. Wight works at the Morrison Center for Rehabilitation in San Francisco, where she is adviser on the paper put out by the patients, "The Rehab Recorder." She has also been working on the fifty-year program for the Journalism School. The Wight home is 180 Mallorca Way, San Francisco 23.

23 HOMER E. BROWN, BS Eng., is with the Airports Division of CAA in Denver, Colo. Mrs. Brown, formerly HELEN HODGEN, AB, operates the Aurora Blue Print Company there, which they own. The Browns live at 2450 Olive St., Denver 17. They have two sons; Robert, a graduate of Colorado University who is with Ebasco, American Foreign Power Company in

Push-button housekeeping?

Plenty of electricity can make your home of the future a house of marvels. From a central control panel, you may be able to wash your dishes, raise and lower windows, control the lighting in every room—even make your beds!

Think for a moment about the wonderful electrical devices we have for the home today that were almost unheard of ten years ago! Television, air conditioning, fully-automatic clothes washers and dryers—all are comparatively new appliances that are helping us LIVE BETTER . . . ELECTRICALLY.

The push-button home of tomorrow promises an even greater opportunity to LIVE BETTER . . . ELECTRICALLY. Kansas City Power & Light Company is planning and building ahead now . . . to provide you and your family with an abundance of low-cost electric power for all your needs of the future . . . whatever they may be.

KANSAS CITY POWER & LIGHT COMPANY

Mexico City, and John, now a senior in Washington University Medical School in St. Louis. Both boys are married and there are three grandchildren.

Mrs. V. P. Klopper, formerly LILLIAN KIESS, BS Ed., lives at 6519 Nottingham Ave., St. Louis 9, Mo. Her husband, Dr. Klopper, passed away several years ago.

Mrs. E. S. Haynes, formerly NOLA LEE ANDERSON, BS Ed., AM '26, Ph.D. '29, is an associate professor of mathematics at the University, and lives at 1408 Rosemary Lane. The late Dr. E. S. Haynes was chairman of the astronomy department here before his retirement in 1950. There are two sons, Charles of Joplin and Stuart of Salt Lake City. Both sons and their wives are graduates of the University. Charles' daughter, Mary Stuart Haynes, is presently a sophomore and is living with her grandmother on Rosemary Lane.

24 H. WENDELL SPENCER, BJ, is state editor for the Grand Rapids Press in Michigan. Mr. and Mrs. Spencer live at 1944 Oakwood Ave., N.E., in that city. Their daughter, Anne Gibson Spencer, was married last August to James F. Todd of Ada, Mich.

MARIE FRAUENS, BJ, after six years of active service in the WAVES, is a staff officer in the Office of the Director of Guided Missiles, Department of Defense, Washington, D. C. She received her appointment last summer, the first woman missile officer, after completing a 40-week, one night a week course at the Naval Ordnance Laboratory in White Oak, Md. Cmdr. Frauens, although qualified for assignment as a missile officer aboard a destroyer, sees no possibility of the Navy sending women other than nurses to sea. She is a civilian technical writer in the Office of the Director of Guided Missiles. Her hobby is house restoration and for the past seven years has been restoring her 15-room home at 923 East Capitol, Washington 3, D. C.

25 MAURICE M. BURLEY, BS CE, has been promoted to Planning Coordinator in the engineering and construction department of Union Electric Company, St. Louis. Mr. Burley, who is responsible for the activities of the firm's economic planning division, was born in Lebanon, Mo. Before joining Union Electric in 1937 he worked for the Missouri Highway Department, the Missouri Public Service Commission, and on special construction work for J. E. Baker and Company in New York. He began his work with Union in the valuation department, and later worked as a statistical engineer and as an electrical engineer. Mr. and Mrs. Burley live at 2 Hill Drive, Glendale, St.

Louis County. They are active in the Webster Groves Christian Church and in community organizations.

JACK C. COFFEY, BJ, not only heads the company which bears his name at 710 Seventeenth St., North Chicago, Ill., and which specializes in the manufacture of audio-visual equipment for schools and colleges, he also keeps his fingers in printers' ink. Mr. Coffey publishes the half-century-old Patterson's *American Education*; also their *Schools Classified* and *Source Guide*. These Patterson publications are a "who's who" of school executives, a directory of private, technical and trade schools, universities and colleges, and a guide for educational materials and equipment. The publishing firm is Educational Directories, Inc., which Mr. Coffey heads and which is located at the same North Chicago address.

27 TOM MAHONEY, BJ, is author of a new book on the pharmaceutical industry, "The Merchants of Life." This publication, off the press of Harper's, includes the story of how the late Dr. Benjamin M. Duggar, a former University professor of botany, isolated Aureomycin, one of the most important antibiotics, from a Sanborn Field soil sample sent him at Lederle Laboratories by Dr. Wm. A. Albrecht, Chairman of the University's Department of Soils. Also recounted is how Dr. EUGENE PAYNE, AB '23, AM '24, with Parke, Davis & Co. of Detroit, defeated a typhus epidemic in Bolivia with a new drug, saving the life of one man whose death certificate had been made out. Mr. Mahoney has written three other books in recent years; *The Great Merchants*, *Gems and Jewelry Today*, and *Public*

Maurice M. Burley, '25

Relations for Retailers. He is a writer for the advertising agency, Dudley-Anderson-Yutzy, 551 Fifth Avenue, New York 17, N. Y.

WILLIAM O. DOUGLAS, division sales manager for Southwestern Bell Telephone Company, lives at 7229 Pasadena, St. Louis 21, Mo.

Mrs. Stanley Sargent, who was FLOR-ENCE BISHOP, AB, BS BA, is living in Seattle, Wash., at 7538 19th St., N. W.

28 RICHARD E. NELSON Jr., BS Agr., former director of operations in Standard Oil Company's Supply and Transportation Department, Chicago, is president of a new subsidiary of that company which opened January 2 at 630 Fifth Ave., New York City. The new company, Amoco Trading Corporation, will buy, sell, trade and transport crude oil and petroleum products on an international scale, with offices abroad to be opened later. Mr. Nelson has had 30 years of oil experience, ranging from geological scout in the field to executive posts in management. Mrs. Nelson is the former MARY E. KOONTZ, BS Ed.

GREGORY C. STOCKARD, AB, LLB '30, attorney of Jefferson City, Mo., lives on Green Berry Road there. Mrs. Stockard is the former EMMA K. STRATHER.

ERNEST M. ANDERSON, Ph.D., is professor of education at Kansas State Teachers College in Pittsburg, Kan. His home there is 208 E. Carlton.

O. R. CATRON, BS Ed., AM '31, is Appeals Referee for the Missouri Division of Employment Security. His home is 206 Hart St., Jefferson City, Mo.

30 MAHLON Z. EUBANK, BS BA, is with the Social Security department of the Commerce and Industry Association of New York. His home is 50 Clover St., Larchmont, N. Y.

BEN WEINBACH, BJ, is advertising manager for Actna Finance Company in St. Louis. His home is 8720 W. Kingsbury, University City 24, Mo.

G. WESTON BOHN, AB, AM '33, Ph.D. '40, former Columbia resident, is working with the division of agricultural sciences of the University of California and with the U. S. Department of Agriculture at an experiment station near La Jolla, Calif. Dr. Bohn, collaborating with Dr. Thomas W. Whitaker, is doing research with varieties of cantaloupe and other melons at a "melon clinic" which is working to improve the melon crops of California and of the world. He joined the clinic in 1946. Mrs. Bohn is associated

class notes

with the nearby 22nd agricultural district of Southern California. Their son, Bob, attends San Diego State College, and John attends San Diego high school. The Bohms live in La Jolla, address Box 150.

31 JOHN E. (Jack) BRASE, BS BA, is an agent for State Farm Insurance Company in Festus, Mo. Mr. Brase lives at 513 Edgewood Lane there.

H. O. ZIEBOLD, BS CE, is general superintendent of the Mississippi River Fuel Corporation in St. Louis. The Ziebold home is 442 Holmes Place, Webster Groves 19, Mo.

CHARLES H. BUTLER, Ph.D., is professor and chairman of the mathematics department at Western Michigan University, Kalamazoo. Born in Sullivan, Ill., Dr. Butler was principal of University High and an instructor in education at the University of Missouri from 1924 to 1936.

MARY W. FISHER, AM, retired teacher of Marshall, Mo., celebrated her 90th birthday on the last day of December, 1958. Miss Fisher taught 53 years, three in rural schools and 50 in the public schools of Marshall. She does her own housework, tends her own flowers and keeps contact with educational groups at her home, 1065 So. Redman Ave., Marshall.

G. THOMAS McELWRATH, BPA, is vice president of New York Life Insurance Company and lives on Half Mile Road, Darien, Conn.

SEYMOUR MARGULES, BJ, is an assistant vice president for Western Union. His home is 47 Appletree Lane, Roslyn Heights, N. Y.

VERA W. PEALER, BA, is an administrative clerk with Remington Rand company and lives in Arcadia, Calif., at 612 W. Camino Real.

32 CHESTER G. FORNEY, BS Ed. '32, AM '33, and Mrs. Forney, who was GEORGIE ELLEN WALK, AM '33, are teaching in the public schools of Jefferson City, Mo. Their home is 1005 Moreau Drive there.

Mrs. James C. Powell, formerly HELEN DIVERS, BS Ed., is teaching in senior high school in Jefferson City. Her home address is Mokane, Mo.

JAMES E. SHEPHERD, AB, AM '33, is manager of the electronic tube division for Sperry Gyroscope Company of Great Neck, L. I., New York. Mrs. Shepherd is the former MAXINE P. ELLIOTT, BS Ed. '31. Their home is 195 Nassau Blvd., Garden City, New York.

I. G. Kepner, '32

I. G. KEPNER, BJ, is Pacific Coast Region Manager of Distributor and Apparatus Sales with headquarters in San Francisco for Linde Company, Division of Union Carbide Corporation. He served as Linde's Midwestern region manager since 1956, joining the company's St. Louis district office in 1935 as a warehouseman and apparatus correspondent. He served the Chicago District before the recent transfer to the Pacific Coast. Mr. and Mrs. Kepner and seven children live at 2810 Summit Drive in Burlingame, Calif.

WILLIAM B. PLUM, AM, Ph.D. '35, who has been associated with Navy projects for several years, has been named head of the applied science department of the U. S. Naval Civil Engineering Laboratory at Port Hueneme, Calif.

ALBERT E. WIMMELL, BJ, is recreational director for the City of Los Angeles. His home address is 2113 N. Parish Place, Burbank, Calif.

33 JIMMIE A. PROCTOR, BJ, BS BA, realtor of Columbia, Mo., has been installed as president of the Missouri Real Estate Association. Mr. Proctor, of Proctor Real Estate and Insurance Company, has served as director, vice president and president-elect of the association, and as Missouri Chairman of the National Institute of Real Estate brokers for the past three years. Mr. and Mrs. Proctor, who was MARTHA McDONALD, BS Ed. '35, AM '36, and their two children live at 214 Thilly, Columbia.

PAUL H. DARBY, BS BA, AM '36, public accountant of Boonville, Mo., has been named president of the Chamber

of Commerce of that city. Mr. Darby moved to Boonville 21 years ago from Springfield, Mo. Mr. and Mrs. Darby have one daughter, Paula.

VAN ALLEN BRADLEY, BJ, well-known commentator on the American scene for the Chicago Daily News and other dailies throughout the United States, established himself as an author with his book, "Music for the Millions: The Kimball Piano and Organ Story." Mr. Bradley formerly taught at the Medill School of Journalism, Northwestern University. In 1956 he received the Chicago Foundation for Literature Award. The Bradley home is 6836 Cherry Lane, Lincolnwood, Ill.

34 FRANK CRUM, who has been general manager of the Detroit General Office for New York Life Insurance Company, has gone to Honolulu to live. There he has charge of the Islands as General Manager for New York Life. A former officer of the Detroit Alumni Club, Mr. Crum continues his interest in University friends and hopes to meet those who are located in the Hawaiian Island area.

MELVILLE S. PRIEST, BS Eng., is head of the civil engineering division of Auburn Polytechnic Institute at Auburn, Ala. A native of Cassville, Dr. Priest completed his advanced degrees at the University of Michigan and served as an associate professor at Cornell University from 1941 to 1955. A leading authority on water hydraulics, Dr. Priest served as a United Nations consultant to the Egyptian government in 1956 and 1957.

36 HENRY BOUCHER, AM, is superintendent of schools at Kahoka, Mo., Mr. Boucher owns and operates Boucher's Home Supply Store in Memphis, Mo. and will maintain his residence there. He was superintendent of schools in Memphis prior to his four years of military service. He was commissioned in the Navy and holds the rank of Commander in the Naval Reserve.

J. D. ELGIN, BJ, is advertising manager for Socony Mobil company and lives at 42 Annandale Road, Chappaqua, New York.

WILLIAM E. QUIGLEY, AB, LLB, on Jan. 1, 1959, became comptroller of The Anaconda Company in New York City. In 1936 he became a timekeeper for the Company at its Butte, Montana, offices, and has moved up through various accounting positions. He is a member of the American Bar Association and the American Institute of Accountants, as well as many other professional organi-

zations. Mr. and Mrs. Quigley have two children, Patricia and Bill. Their home is 55 Keats Road, Short Hills, N. J.

37 S. EZRA McCULLOH, AM, of Columbus, Ohio, has completed a term as president of the Columbus area Council of Churches. He is now Lay Moderator of the Columbus Presbytery. The address there is Central Branch YMCA.

ROBERT F. KOLDE, BS EE, and Mrs. Kolde, who was MARGARET MILLER, BS Ed. '28, are living in Wichita, Kan., 2418 N. Belmont. They are owners and operators of Western Control Corporation there. Their son, James is an engineering student at Kansas State and the daughter, Jeanne, is a freshman at Wichita University.

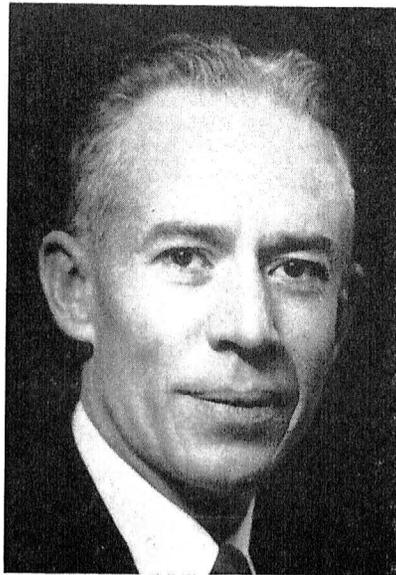

NOEL P. (Pat) RALSTON, BS, MS '39, is director of the Cooperative Extension Service and assistant dean of the College of Agriculture at Michigan State University. Dr. Ralston received his Ph.D. degree from Cornell. Before joining Michigan State he was a member of the dairy department of the University of California. Dr. and Mrs. Ralston and three children live in Okemos, Mich.

CLAYTON HILL is a consultant in marketing for General Electric Company and lives at 412 N. Ridge Street, Port Chester, N. Y.

ENGINEERS PHYSICISTS MATHEMATICIANS

Douglas diversification affords broadened opportunities, combined with stability and security.

Engineering at Douglas is divided into three basic areas ... missile and space systems, transport aircraft and combat aircraft. In these military and commercial categories, each advancing beyond present frontiers of achievement, engineers and scientists can progress to the limit of their capabilities.

In addition, supervisory and executive openings are filled from within the company. Many of the top executive officers at Douglas are engineers who have moved right up to assume wide responsibility.

We are interested in engineers with backgrounds in other fields as well as avionics, aircraft and missiles.

For further information write to Mr. C. C. LaVene, Douglas Aircraft Company, Inc., Santa Monica, California. Section KK.

the most respected name in aircraft,
missile and space technology

48

Miss Margaret Louise Watson and ROBERT NEIL CHASE, BS Ed., Kansas City, on Oct. 26 in Hannibal, Mo. Mrs. Chase is employed at City National Bank and Trust Company in Kansas City and Mr. Chase is with Bendix Aviation Corporation there. They are living at 5929 Catalina, Mission, Kan.

deaths

WILLIAM W. TREADWAY, '84, retired physician of Clarksville and the North Lincoln-Pike County area in Missouri, on December 1. Dr. Treadway began his practice in 1889 and received recognition from the Missouri Medical Association in 1949 for his 50 years of service. He and Mrs. Treadway, who died in 1940, made their home on a farm near Clarksville.

WILLIAM HARRIS BOSIER, '90, who was admitted to the Missouri Bar in 1900 and who later studied engineering and bridge construction, on Dec. 31 in Kansas City. Mr. Bosier was in charge of construction of the Chain of Rocks bridge across the Mississippi at St. Louis, the Hurricane Deck and the Niangua bridges on the Lake of the Ozarks.

Mrs. Felix F. Davis, formerly MARGARET ALICE DARNABY, '92, Boone County resident for 66 years, on Dec. 18, 1958, in Columbia, Mo. Survivors include one brother, Ernest Darnaby, Route 7, Columbia, and several cousins.

RENICK CALVIN SCHOOLEY, '94, practicing physician of Odessa, Mo., for 44 years, on Nov. 13, 1958. Dr. Schooley began his practice at Robbins and moved to Odessa in 1914, where he completed 62 years of practice. Four children survive: Mrs. W. T. Sparks and J. Calvin Schooley of Odessa, Mrs. Geo. Norvell of Lee's Summit, and Homer R. Schooley, Albany, Mo.

MAXWELL BLAKE, '98, retired U.S. foreign service diplomat, on Jan. 22 in Kansas City, Mo. Mr. Blake, at the time of his retirement in 1941, was minister plenipotentiary to Tangier, Morocco. He returned to Kansas City in 1946. Mr. Blake served 35 years in the foreign service, in posts in South America, the Madeira Islands, Australia and Turkey, as well as Tangier. One of his sons, John T. Blake, is serving with the American Friends of the Near East and lives

in Damascus, Syria. Another son, Elisha R. Blake, lives at 4707 Grand in Kansas City. His survivors also include two daughters, Mrs. Diana Hayward, Kentfield, Calif., and Mrs. Ruth Hopwood, Tangier, Morocco.

O. W. KILLAM, LLB '98, pioneer South Texas oilman and the oldest living football letterman of the University, on Jan. 1 in Laredo, Texas. Born at Winfield, Mo., Mr. Killam moved into Oklahoma when it was Indian Territory. He served in both the territorial senate and house, and later was a member of the statehood commission. Moving to Texas in 1920 he began his oil ventures in Mirando Valley and Jim Hogg County, later forming the Texpace Pipeline Company in Laredo. Mr. Killam gave large sums of money for philanthropic purposes, including scholarships recently established at the University for needy students. He is survived by two sons, Winfield Killam of Corpus Christi and Radcliffe Killam of Laredo.

CHARLES L. HENSON, LLB '01, senior member of the Public Service Commission of Missouri, suddenly on January 17 in Jefferson City, Mo. He was serving his seventeenth year on the commission at the time of his death, being appointed by Gov. Donnell in 1942. Born in Galena, Mo., Mr. Henson served as prosecuting attorney of Lawrence County, and had practiced law in Springfield, Mo. In 1937 he was appointed counsel for the State Insurance Department and represented this department in extended insurance litigation. Mrs. Henson and their son, Lt. Col. Henry B. Henson, are deceased. The daughter-in-law, Mrs. Isabel Henson, and two children, of Longneck, Long Island, N. Y., survive.

CHARLES R. RINGER, BS EE '03, former banker of Edina, Mo., on Dec. 18 in Los Angeles, Calif. Mr. Ringer moved to California when he retired from active banking business 32 years ago. He had retained his farm and investment interests in Knox County and returned each year to his home community. Mrs. Ringer, of 638 S. Mansfield Ave., Los Angeles 36, survives.

GEORGE S. STARRETT, LLB '09, retired probate judge and leader in fraternal and legal affairs of Columbia, Mo., on Dec. 28. Mr. Starrett was past grand sire of the world in the Independent Order of Odd Fellows, and had held high offices in the Masonic lodge, the Elks and in many political organizations. He retired from the practice of law about 16 years ago. Survivors include a half-brother, James Starrett, of Hiawatha, Kan., and several nieces and nephews.

RUSSELL G. BRIGGS, BS Agr. '11, AM '12, on Dec. 10 in Joplin, Mo. Mr. Briggs was an agricultural agent and teacher in Carthage for several years before going to Auburn, Ala., as a member of the Alabama State extension horticulture department. Returning to Joplin in 1925 he established the Briggs Seed Store there and continued as its owner and operator until his retirement in 1955. Surviving are Mrs. Briggs, of the home at 2902 Wisconsin Avenue in Joplin, and three daughters.

GEORGE M. CRAIG, AB '13, former banker and insurance representative, on Dec. 20 in Little Rock, Ark. Born in Knob Noster, Mo., he was employed at the People's Bank in Warrensburg, later moving to Little Rock for insurance work. He transferred to Chicago, and in 1957 upon retirement returned to Little Rock to make his home. Surviving are the two sisters with whom he lived. Mrs. Craig is deceased.

JOHN C. ALBUS, '13, retired salesman for the Gas Service Company of Independence, Mo., on Dec. 8 following a heart attack. Born in St. Joseph, Mo.: Mr. Albus had been in the employ of the utility company since 1921 and had officially retired in November after 35 years of service. Mrs. Albus, of the home at 2714 Windsor in Independence, survives; also a son, V. W. Albus, of Libertyville, Ill.

WALLACE CHILES, '14, general practitioner of Chesterfield, S. C., on Dec. 16 from injuries received when struck by a car. Dr. Chiles was a native of Jackson County, Mo. Mrs. Chiles survives; also three sisters and two brothers, all of the Independence-Buckner area in Missouri.

EDGAR D. BASKETT, AB '15, AM '16, Columbia physician, on Jan. 1 from injuries received in a car accident near Alexander City, Ala. Dr. and Mrs. Baskett had attended the wedding of their son, WILLIAM BASKETT, in Birmingham, and were on their way to Orlando, Fla. Mrs. Baskett, formerly JANET E. DAVISON, was seriously injured. Dr. Baskett, born in McFall, Mo., had been a member of the staff of Boone County Hospital in Columbia since 1925 when he started practice in Columbia. In 1952 he joined the staff of the Veterans Administration hospital at Poplar Bluff, Mo., but had returned to Columbia last April to live at 1316 Bass Avenue. Surviving also are another son, ROBERT BASKETT, of Washington, D. C., and a daughter, Mrs. ELEANOR MULDER, AB '51, of Lancaster, Mo. There are seven grandchildren.

FRED JOSEPH HORN, '15, farmer and dairyman of near Lee's Summit, Mo., recently following a heart attack. Mrs. Horn survives, also a son, Alfred Horn of Ft. Riley, Kan., a stepson and two stepdaughters.

CARLYLE POE, '17, former banker and groceryman of Mountain Grove, Mo., on Nov. 26 following a year's illness. Mr. Poe was a banker in Cabool and in Mountain Grove, Mo. In 1940 he became associated with the Mtn. Grove Grocer Company and later with Richards Brothers Wholesale Grocery Company. Survivors include Mrs. Poe of the home in Mountain Grove; a son, Jerry B. Poe of Boston, Mass., and a daughter, Mary Frances, of Pittsburg, Kan.

DAVID L. SMART, '21, president of the American Steel Works of Kansas City, Mo., on Jan. 16, of a heart attack at his home, Windengale, Blue Ridge Road, Martin City, Mo. Mr. Smart was a co-founder of the steel sheet and plate fabricating firm in 1924, and in 1955 was made its president. Mrs. Smart survives, also two daughters and a son, all of the Kansas City area.

Mrs. George H. Lake, the former PEARL B. HERREN, BS Ed. '21, on Nov. 17 at Union Star, Mo.

B. L. ABERNETHY, BJ '22, on January 16 in Duncan, Okla. Mr. Abernethy had been owner and publisher of the Duncan Daily Banner since 1926. Mrs. Abernethy survives.

SARAH SLACK MOLONY, AB '22, on Dec. 11 in Quincy, Ill., where she had lived since 1941. A librarian, Miss Molony had served with the libraries of St. Joseph and Jefferson City in Missouri and at Quincy. A brother, Col. George H. Molony of Honolulu survives.

GUY U. YOUNG, BS Ed. '22, retired teacher, on December 31 in Jefferson City, Mo. Mr. Young had been ill for about five years.

TOM BURNETT, '23, formerly of Braymer, Mo., on Dec. 12 in Dallas, Texas. Mr. Burnett had been employed by the A. B. Dick Company in Kansas City and in Tulsa, Okla. In 1942 he joined the Linhart Oil News Company in Dallas, where he lived until his death. Mrs. Burnett survives, also a son, Lt. Robert Burnett of Cherry Point, N. C.

WILLIAM PAUL SHOOK, '24, formerly engaged in the lumber and manufacturing business in Chicago, on Jan. 21 in Macon, Mo. Mr. Shook, born in Sarcocie, Mo., had been hospitalized since 1935.

ONIE D. NEWLON, LLB '24, attorney of New London, Mo., and a member of the Tenth Judicial Circuit Bar Association of Missouri, on Oct. 17 at his home. Mr. Newlon was a former prosecuting attorney of Ralls County.

M. A. (Bill) SEATON, BS Agr. '24, agricultural extension specialist at Kansas State College since 1928, on Dec. 26 in Manhattan, Kan. Mr. Seaton served two years as an instructor at the University of Missouri and as an extension specialist at Purdue before going to Manhattan. He was born in Boonville, Mo. An outstanding poultryman, Prof. Seaton was honored in November by the Kansas Poultry Association when they established an M.A. Seaton loan fund for students majoring in poultry. Mrs. Seaton survives at 1525 Pipher Lane in Manhattan. Their two daughters, Mrs. Roy Wilbur and Mrs. Marvin Hunt, and the six grandchildren also live in Manhattan.

HARVEY TICE LAWRENCE, BS CE, BS Eng. '25, construction engineer of Oklahoma City, on Jan. 12 of injuries received in an auto accident. He had worked as an engineer on municipal improvements and with the Midwestern Acceptance Company of Oklahoma City. At the time of his death Mr. Lawrence had his own engineering firm there. Mrs. Lawrence, of 1802 N.W. 21st., Oklahoma City 6, Okla., survives.

THOMAS EVERET VAUGHAN, BS Ed. '25, former associate secretary of the Missouri State Teachers Association in Columbia, on Jan. 22 in Columbia. Mr. Vaughan was a former teacher and had recently completed a book, "A History of Education in Missouri." He is survived by eight sons and one daughter.

DON D. CARTER, '30, formerly of Sturgeon, Mo., on Dec. 13, in Thomaston, Ga. Mr. Carter was state secretary of the Georgia Kiwanis Club at the time of his death, and had been engaged in the private practice of law in Thomaston. He formerly lived in Atlanta, where he was an insurance adjuster. His wife, the former Lois Howison of Fulton, Mo., survives.

JOHN A. BADARACCO, '30, owner and operator of the Badaracco Appliance Company in Mexico, Mo., since 1935, on Jan. 1. Active in civic and community affairs, Mr. Badaracco was one of the local founders of the Audrain Broadcasting Corporation and was president of this organization at the time of his death. Survivors include his wife; two sons, James A., who was associated with his father in the appliance firm, and Lee, a student at K. State, and two daughters, Ann 14, and Lynn 10, and one grandson.

D. RALPH McCULLOUGH, AM '31, Ed.D. '49, well known Missouri educator,

on Dec. 31 in Flat River, Mo. Dr. McCullough served as superintendent of schools at Morley, Illmo, New Madrid, East Prairie and Flat River prior to his retirement in 1956.

JOSEPH P. SORAGHAN, BJ '31, director of publicity of the St. Louis Office of Civil Defense since 1955 and a journalist there for many years, on December 16 of a heart attack. Mrs. Soraghan, of the home at 6964 Arthur Ave., survives, also three sons and a daughter.

HAROLD A. GREEN, BJ '35, assistant manager of the Dixon, Ill., Publishing Company on Jan. 17 of injuries received in a traffic accident on January 9. Mr. Green had worked for the Daily Oklahoman in Oklahoma City and for the Compton Lithographing & Printing Company of St. Louis before going to the publishing company, which is an affiliate of the Dixon Evening Telegraph. Mrs. Green, the former ELLAGWEN SHAW, BJ '35, survives.

JOHN T. BARKER, Honorary Alumnus '36, in Kansas City on December 7 following a brief illness. Born at Carrollton, Mo., Mr. Barker began law practice in La Plata, Mo., and later practiced in Macon County. In 1912 he was elected attorney general for Missouri and in 1917 he resumed his law practice in Kansas City. An active Democrat and eminent attorney, he was familiar to friends of the University because of his efforts for the first million-dollar appropriation voted by the legislature. His daughter, Mrs. Norman H. Johnson, Mr. Johnson and two children survive at 824 West Fifty-fourth Street in Kansas City.

MARTHA MILLER, BS Ed. '36, former teacher of Mexico and Audrain County in Missouri, on Nov. 30 in Mexico, Mo. Miss Miller was widely known for her work with the Missouri Council of Churches. Her father, H. E. Miller, and a sister, Miss Laurene Miller, survive at the home, 615 S. Olive Street in Mexico; and a brother lives in Springfield, Mo.

Mrs. MARY AGNES ANDERSON, AM '38, former teacher in the Kansas City public schools, on Nov. 26 following a long illness. Reared in Sedalia, Mo., Mrs. Anderson received her BS at MSTC in Warrensburg, and did graduate work also at the universities of California and Kansas. She began teaching after the death of her husband in 1917. She leaves two sons; Dr. R. W. Anderson of the home at 21 West Fifty-eighth St., Kansas City, and H. D. Anderson, Detroit.

HOWARD K. SIMPSON, AB '40, formerly of Moberly, on Jan. 3, in St. Louis. Mr. Simpson had been employed as a real estate salesman and he and Mrs. Simpson and daughter, Kay, 13, lived in St. Louis at 6137 Laura Ave. Surviving also are two brothers and a sister.

FORREST E. WOLVERTON, M.Ed. '42, executive secretary of the 5,000-member St. Louis Suburban Teachers Association since Oct. 1956, on Dec. 31 in St. Louis, Mo. Mr. Wolverton was widely known in educational work of the State. After serving as a school superintendent he joined the State Department of Education as director of publications and mailing. He served as public school supervisor in Southeast Missouri from 1943 to 1947 and was later director of public information for the State Department in St. Louis. He was a past president and a past secretary-treasurer of the Missouri Writers Guild and a member of honorary fraternities in education. Mr. and Mrs. Wolverton, who survives, lived at 5021 Danbury Ave., Shrewsbury, Mo. Surviving also are two sons, Forrest E. Wolverton, Jr., Lafayette, Ind., and Pfc. Byron Wolverton, Colorado Springs, Colo.

IAN M. LAWRENCE, BS BA '46, in New York City on October 10, 1958, following a short illness. Mrs. Lawrence is the former MARGARET KOCH, AB, and their two children are Ian M. Jr., and Amy. Their home is in Lakewood, Ohio, where they have lived since January, 1957. Surviving also are his parents, JAMES C. LAWRENCE, AB '10, and MARY LOGAN Lawrence, BS Ed. '10, of Moylan, Penn.

Mrs. John H. Davis, formerly RACHAEL MARTIN, AB '48, BJ '49, of Columbia, Mo., on Jan. 3 in Birmingham, Ala. Mrs. Davis went to Birmingham in 1949 and taught music in the public schools there for six years. She played first chair bassoon in the Birmingham Symphony orchestra and was a member of many musical and civic organizations. Mr. Davis survives, also one daughter, Rachael Louise. Mrs. Davis' mother now lives in Kansas City. Her two sisters are Mrs. MARY JEAN SHILLING, M. Ed. '41, of Camas, Wash., and Mrs. MILDRED ROSE, AB '48, BJ '49, Berwyn, Ill.

ARTIE E. WEEKS, M.Ed. '53, superintendent of schools of Miami, Mo. Township, on Dec. 31 in Marshall, Mo. Born at Linn, Mo., Mr. Weeks was a graduate of Central Missouri State College in Warrensburg. He had spent his life in the field of education and had moved to Marshall five years ago. Mrs. Weeks, of 611 North Hamner, survives; also three children; Robert, a junior in the College of Engineering at the University; Helen Virginia, a student at Warrensburg, and Kathryn Carol of the home.

LEE FITZGERALD, '57, of Craig, Mo., on Dec. 14 was killed instantly in an auto crash near Oregon, Mo. He was a member of the Missouri National Guard and was farming with his father near Craig. His parents and two brothers survive.

1,600,000 Bell Telephone Share Owners

Most are small share owners. Women are the largest group.

More than 250,000 are Bell telephone employees.

The Bell System is an outstanding example of American democracy in business.

Millions of people use telephone service. 735,000 people work for the Bell companies. More than 1,600,000 people own A.T.&T. stock.

The owners of American Telephone and Telegraph Company stock are people in all walks of life.

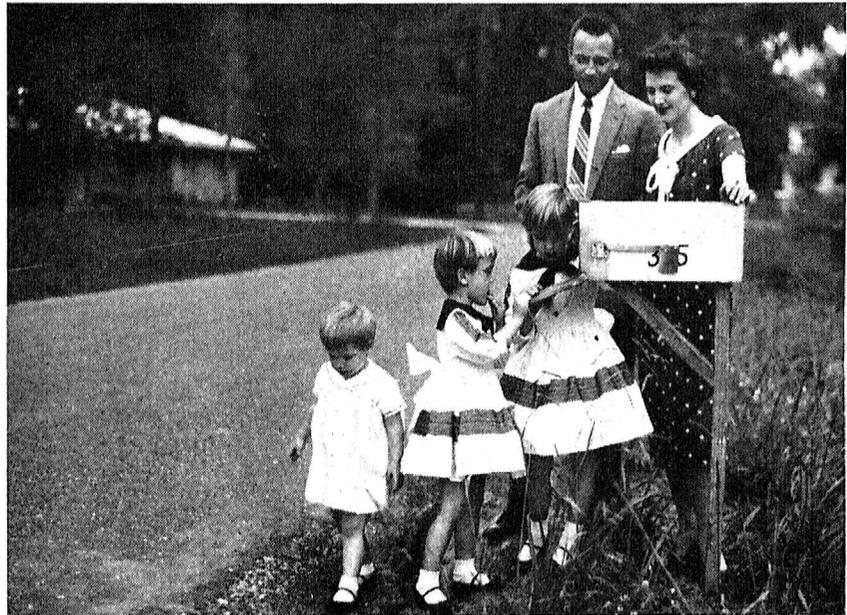

Most of them are small share owners. No one individual owns as much as 1/30th of one per cent of the stock. Many thousands own five and ten shares. About half own fifteen shares or less.

Women are the largest group and hold the most stock. Over 250,000 of the share owners are Bell telephone employees.

Some 85 per cent of all the shares are owned by individuals. In addition to these direct owners of A.T.&T. securities, many millions of other people have an important, beneficial interest through the holdings of their insurance companies, pension funds, investment companies, unions, savings banks, etc.

The total of direct and indirect owners represents the great majority of all the families in the country.

A.T.&T. share owners, and the owners of A.T.&T. bonds, are the financial foundation of our ability to serve. For without the money they have put in the business you

OWNERSHIP IS WIDESPREAD. A.T.&T. share owners live in cities, towns and on farms, in 22,000 communities throughout the country. About 450,000 of the shares are in two names, generally husband and wife. Many hundreds of hospitals, churches, libraries and charitable organizations are among the holders of A.T.&T. stock and bonds.

would not have the quality and quantity of telephone service you enjoy today. Nor would there be work and wages for 735,000 employees.

Obviously, investors will continue to supply capital in the amounts required for present and future needs only if they can expect the Bell System to earn a return on the money they invest that is reasonable in comparison with the earnings rates of other companies and industries.

So telephone progress, and the advantage to all that comes from push-

ing ahead, begins with good earnings and our faith that Americans want good and improving service at prices which allow a fair profit.

That is the way of life which in our country has stimulated invention, nourished enterprise, created jobs, raised living standards and built our national strength.

As long as we live by this principle—and earnings are sufficient to enable us to carry it out—the future of the telephone is almost limitless in possibilities for service to you.

BELL TELEPHONE SYSTEM

HELP US KEEP THE THINGS WORTH KEEPING

Nothing's so precious to a child as her mother's love. It surrounds her and helps her find her way in a big strange world.

And though she doesn't know it yet, peace is precious, too. It makes the lives of both mother and daughter more secure.

But like most precious things, peace is not free. Peace costs money. Money for strength to keep the peace. Money for science and education to help make peace lasting. And money saved by individuals to help keep our economy strong.

Your Savings Bonds, as a direct investment in your country, make you a Partner in strengthening America's Peace Power.

Think it over. Are you buying as many Bonds as you *might*?

HELP STRENGTHEN AMERICA'S PEACE POWER BUY U. S. SAVINGS BONDS
