

MISSOURI ALUMNUS

May 1959

HELP US KEEP THE THINGS WORTH KEEPING

Each of us wants peace for his own precious reasons. But peace costs money. Money for strength to keep the peace. Money for science and education to make peace lasting. And money saved by individuals to keep our economy strong. Each Bond you buy helps provide this money—helps strengthen America's Peace Power. Are you buying enough?

			
HOW YOU CAN REACH YOUR SAVING GOAL WITH SERIES E SAVINGS BONDS <i>(in just 8 years, 11 months)</i>			
If you want about	\$2,500	\$5,000	\$10,000
each week, save	\$4.75	\$9.50	\$18.75

About the Cover: A view of the central section of one of the three new nine-story dormitories for women students at Kentucky and Maryland. This is the only one that is occupied; work continues on the other two, as well as on a cafeteria-lounge. This limited view is a forerunner of an *Alumnus* picture story, planned for the fall months, of the impressive housing project which won national architectural honors.

THE MISSOURI ALUMNUS

is published monthly except July, August and January by the University of Missouri Alumni Association, 101 Read Hall, Columbia, Missouri and mailed to all active members in the Association. Entered as second class matter under the act of March 3, 1879. Active membership \$4.00 a year; life membership \$80. Member, American Alumni Council.

Conformity and Anti-Intellectualism

By Roderick E. McGrew
Associate Professor of History

In recent years American educators have again taken stock, and their inventories have proved to be frighteningly low. The educational revolution accomplished in the wake of Dewey's progressivism and in the image of Columbia Teachers College destroyed much of value and added little which was positive. It is now only an academic point whether Dewey would have agreed with what was done in his name, for the results are too much with us. It is a matter of record that American students are ill prepared academically and that in the name of "educating the whole child" we have debased our intellectual coinage. Recent Soviet scientific advances have focussed public attention on these continuing conditions, and now that Sputnik's first shock is past, we are aware of the educational shoddy which has passed for quality goods.

Professional educators must bear the greatest responsibility for the direction our schools have taken. Well organized pressure groups in state legislatures have dictated the curricula and training programs for primary and secondary schools, while the colleges of education have deeply influenced the patterns and attitudes which modern American schools reflect. As a group possessing power and influence, the educators must also accept the responsibility which goes with power. But there is another point to be considered, and as an historian, I find it rather striking. Our educational system is not something which developed apart from society, but on the contrary it reflects tendencies which are fundamental to our social life. Put in these terms, education's present problems only open a larger issue and a more serious one which rests at the roots of our society. That problem appears in the current revulsion against intellectual values and the spirit of conformity which produced it.

Intellectuals are very self-conscious these days, and indeed the intellectual is self-conscious by definition. For this reason I want to make it clear that anti-intellectualism does not mean just society's reaction to the intellectual. Rather it means a cast of mind, or mode of thought, which rejects intellectual values, and is,

therefore, more significant than any attack on any particular individual. The attacks come as the outward manifestation of a non-intellectual state of mind or as the result of activating its peculiar values. Furthermore I want to avoid giving any sociological or professional significance to "anti-intellectualism." People who hold an anti-intellectual approach populate our university faculties as well as the great market place. In this sense the cultural stream is polluted at its very source. Universities themselves must struggle to maintain intellectual values, and not the least of their problems are the faculty members who have abdicated their cultural obligations. Students can scarcely be expected to respond to teachers who have sold their birthright. Certainly the University of Missouri faces these problems. Missouri students differ little from students across the country, and the Missouri faculty, like faculties everywhere else, has been recruited from the four corners of the nation and from abroad. Students have raised the problem of anti-intellectualism here, and there seems to be some sentiment that Missouri is peculiar in the spiritual apathy and cultural slackness which appear. This is not necessarily true. Rather than being a special case, the University of Missouri presents in microcosm tendencies which are all too obvious in our national life, and the explanation for local conditions lies in the broader national picture.

Anti-intellectualism has a long tradition which reaches deep into the past and extends far beyond our boundaries. But anti-intellectualism as we know it is specifically the product of our immediate past and reflects a value system which is peculiarly our own. Intellectualism finds its essence in the individual who seeks his own truth, who defines his own taste, and who develops his own values. Ready-made truths are no more palatable to him than packaged dinners, and he much prefers his own decisions, whether idealogical or gustatory. At best our society calls such a man a dreamer—"egghead" is the most recent affectation—, and at worst slanders him as a

subversive. Society has always demanded conformity, but our society demands enthusiastic conformity.

There are several reasons for this peculiar emphasis, and they are bred into the very bones of our social organism. Industrial development since the Civil War has been prodigious, and ours has become pre-eminent an industrial society. Mass production has provided all manner of material conveniences which are available to most of the people and which have produced a continuing rise in our material standard of living. But we have paid a heavy price. Individual taste has had to compromise with production costs, and more and more the items which we buy are differentiated only by price and label. The highways are crowded with an unvarying stream of sameness, and our cities are ringed about with unrelieved structural boredom. The \$50,000 split level in its landscaped setting is the same from coast to coast and border to border, while the humble \$15,000 "ranch house" proliferates row upon row, city after city, with nothing to distinguish it but pathetically drastic adventures in pastel coloration. We have become the victims of our own technology, and the mass patterns which mass production forces upon us blunt our sensibilities.

This necessary loss of choice would in itself be bad enough, but in recent years we have convinced ourselves that it is both necessary and good. Expansion in material opportunity and constriction in choice have been paralleled by positive emphasis on the desirability of conformity and security. Nowhere is this more striking than among college students who see their education in terms of the degree and who weigh job opportunities on the scales of security. To stand against the group in job choice, dress, mode of living or taste creates furious tensions and invites social reprisals. Recent studies have shown conclusively that sameness, conformity, acceptance, have become positive social virtues, and that it is the group, however it may be motivated, which establishes standards. Religious life has shown this drastically, and in many suburban communities sectarianism has been overcome at the cost of making the church only a community center.

These developing economic, social and aesthetic patterns have been reinforced in our schools, colleges and universities. In education, equality of opportunity has come to mean equality in achievement, and the right to go to school has become the right to graduate. More than this, the very curricula have been subjected to the equalitarian test: courses slanted to the majority, standards debased, and the ideal of education for all become the reality of education for none. The students sauntering through their education glance contemptuously at books and mentors, and well they may, for mediocrity has become the accepted achievement norm, and educators are almost indecently happy when that line is occasionally passed. Science, mathematics and foreign language have been shamefully neglected and the number of college students who lack even the rudiments of English grammar, spelling and composition is shocking. And the after-effects of this

pedagogical shabbiness are equally striking. The percentage of Americans who read books after leaving college is abysmally low, and the general cultural level of the nation is depressed all out of proportion to the literacy ratios. The mass media—radio, television, newspapers—play to this depressed level, and by doing so, perpetuate it.

The "crisis in education," as the Sunday supplements call it, is both a cause and an effect. In the sense that education has failed and is failing to provide the necessary intellectual challenge, stimulus or even tools, it sends out products who are capable only of acceptance and who are not able to conquer the fear of the unknown. Furthermore, by emphasizing the norm, education strengthens the sense of necessary conformity and positively advances mass cultural patterns. The seriousness of this problem is underscored by conformity's penetration into the very nerve centers of our society. Major scientific research organizations insist on "teamplay" and avoid the erratic genius like the plague. Businesses look for the man who will "fit in" and place conformity rather than capacity at the top of their rating scales, and even universities have shown a marked tendency to value comfortable competence above unpredictable creativity. Journalism School's Second Dean

By Barbara Holliday, B.J. '39

"He loved to be on the desk—even more than being Dean," Mrs. Frank L. Martin says of the man who was second dean of the School of Journalism.

Frank Martin was associated with the School from its second year until his death on July 18, 1941. He became dean in 1935.

Mrs. Martin, petite and lovely still, recalls that first winter in Columbia just fifty years ago this spring.

"Our baby (Martha Ann) was just eight months old and we moved into a cottage that Silas Bent had occupied. The house was heated with huge old coal stoves and the streets were paved with cobblestones. What a winter that was!"

Frank Martin, born in Benedict, Nebraska, July 7, 1881, was a graduate of the University of Nebraska and joined the staff of the Kansas City Star when he was 21.

Whatever it took in those "pre-journalism" days to make a newspaper man, he had. He was soon promoted to telegraph editor and then assistant city editor.

In 1907 a typhoid epidemic broke out in Columbia and Frank Martin was sent down to cover the story. It marked his first meeting with Walter Williams, whom he interviewed in the hospital. The dream of a school of journalism was nearing realization after a long hard fought struggle but it was not yet a reality.

Two years later in the city room at the Star, Frank Martin looked up one morning to see President A.

Ross Hill of the University of Missouri and Walter Williams walking through the door.

They wanted him at the new School of Journalism. Martin hesitated. But Williams was persuasive and Hill, whom he had known at the University of Nebraska, insistent. Martin finally agreed to come for a year on a tentative basis.

"Well," said Williams to Hill, "if you'll vouch for Mr. Martin, I'll vouch for his wife. I've known her family for years!"

Those who knew Dean Martin well knew him to be a man of great loyalties, keen humor and dry wit. Those first years at the new school required these qualities and more.

Martin took over the *Missourian* and from the first ran it as a city newspaper, not as a school publication. He had not been here long when the paper published a story over President Hill's protest.

Martin was called to account. "Remember our compact?" he asked. "I told you if you didn't like the way I did things, just say so. I'll go back to Kansas City." President Hill threw up his hands in protest and nothing more was said.

Martin stayed and a precedent was established.

In 1915, Frank Martin was given a sabbatical and went to the Orient to "trouble-shoot" the *Tokyo Advertiser*. The paper was in difficulties and Martin spent a year breathing new life into it. As a result, the *Advertiser*, one of the great English language papers in the Orient, employed one or more students from the school each year until it was forced to cease publication during World War II.

During the early years field trips that lasted a week or more were organized by "Hon" (Hawn) Martin, as he was affectionately known by alumni and students alike. These trips were made to acquaint the students with the working press in Missouri and Missouri editors.

A number of valuable bulletins were written and edited by Martin as a service of the School to newspaper men out in the state.

On the occasions when Dean Walter Williams was away, Frank Martin served in many capacities and wherever he was needed.

There was the day a student interviewed a professor on an assigned story and, at the close of the interview, was forbidden to print it.

"I'm sorry," said the student, "but I'll have to turn it in. That isn't for me to decide."

The story was published and an irate professor called the School of Journalism.

Maurice Votaw, now a professor at the school and the student in question, recalls that "Hon" Martin crisply told the professor to "come right on over and we'll settle this between us!" No more was heard from the subdued caller.

Frank Rucker, one of the men whom Martin trained and now a faculty member, remembered the day Columbia was shocked by an ax murder.

"I can still see him," Professor Rucker explains. "He came into the news room, called to three of us—and by the time we walked over to him, he had decided just how he wanted the story handled, what each of us was to do, and how we were to do it."

"He was distinctly a newspaper man," Rucker said. "He instilled discipline, efficiency and human interest into the news room. Students respected and loved him for the special interest he took in them and for the rigid training he gave them."

"From the time I was graduated from the Missouri School of Journalism and as long as Frank Martin lived, I knew I had a true and helpful friend."

The early clan which bound the students of the School together seemed to be accentuated when they met overseas. In 1920 the Martins were taking a party of ten on a tour of the Orient for the American Express. At each stop along the way, there were "men from Missouri" to greet the Martins, men like Glenn Babb, later foreign news editor of the Associated Press, Henry Kinyon and others.

In Canton, the party was greeted by the usual contingent and the English language newspaper came out with a banner head: "PROF. FRANK MARTIN OF UNIVERSITY OF MISSOURI SCHOOL OF JOURNALISM IN CANTON." Down in an obscure corner was another story. "Warren G. Harding Receives Nomination For Presidency."

Henry Kinyon, recalling those year, says, "Anybody who ever knew Frank Martin could never forget him—and nobody would ever want to. That dry, sardonic humor of his and his explosive laugh, added to his genuine friendliness and all-around newspaper ability, made him a much-beloved teacher, dean and friend. From the very first year of our trail-blazing

School of Journalism he helped in a remarkable degree to provide that authentic journalistic atmosphere which has characterized our School."

In 1931 the Martins sailed on Christmas Day for Peiping and Frank Martin spent another year teaching at Yenching University and helping to organize a school of journalism.

It was to be his last trip abroad. Walter Williams had been elected president of the University. And the man who was his right hand found the calls on his time even heavier under the title of "Acting Dean."

Concern for his students occasionally found the Dean in an unusual role.

Mary Paxton Keeley, first woman graduate in journalism, remembers the day she was taking her oral examination for her Master's degree.

Her young son, Paxton, had accompanied her to the campus and she explained to him that he must wait for her outside the building.

"Half way through the examination," she says, "Pax started bawling like a young calf for his mother. Frank Martin went downstairs and spoke to him. I never knew what he said, but we heard no more out of Pax!"

First and last, Frank Martin spent 32 years training newsmen and could personally point to more than 1500 top-flight men in the profession who carried the unmistakable stamp of a Missouri-trained man. He served as chairman of the Press Congress of the World in Mexico City and was a member of the British Institute of Journalists, an honor rarely

The liberal arts in challenging times

By W. Francis English

Dean, College of Arts and Science

Historically and functionally the College of Arts and Science is the core of the University. The liberal arts were the curriculum of all universities until only a few decades ago and they remain the foundation on which professional education rests. The College of Arts and Science at the University of Missouri, through its instructional and research programs, is the pivotal point for many aspects of the University.

Last year 337 undergraduate degrees and 122 graduate degrees, 33 of the latter being Ph.D.'s, were earned in the liberal arts.

Out of the 10,000 students in the University about 3,000 are enrolled in the College of Arts and Science, but more teaching than this must be done because most professional schools enroll their students in Arts and Science courses. It is not unusual for a student in agriculture to take nearly half, for a journalism student to take three-fourths, or for a student in education to take over 80 per cent of his program in Arts and Science. Thus the College of Arts and Science must do over half of the teaching in the University. About the only students who do not come to the

College for instruction are those who do all of their undergraduate work elsewhere, and go directly to the professional schools of law and medicine.

In spite of this very heavy load, there is a permanent staff of only about 155. They are largely the instructors on tenure, assistants, associate, and full professors. In addition, there are about 250 temporary and part-time staff members. These are laboratory assistants and part-time instructors working toward higher degrees. In spite of this rather small staff, the College has relatively small classes. It is true that there are large lectures in some beginning science courses and in beginning courses in history, economics, political science, and geography. But the large groups are broken into small sections twice a week for discussions or for laboratory work. As a result, classes on the average are surprisingly small: over 80 percent are under 30 in size. Thus, an intimate relation is secured between instructor and student.

The College of Arts and Science has vitality, optimism and great strength. It is also filled with problems. Fortunately, it has a superior faculty, as

we have always had, and has gained in strength in recent years. Serious losses have been sustained in this period, because some of the best have been snatched away by richer universities, business, and government, but the overall strength has been on the increase. Recently a number of young scholars have joined our faculty who are very outstanding. Not only does the increasing financial resources make this possible, but the reputation that the University has earned by 70 years of constructive work, has attracted these bright, enthusiastic, and idealistic people.

There are in the College departments with a number of staff members of national and international reputations. These men and women are known because they are publishing the results of their research. They are being consulted by government and industry. Often they are officers or members of national professional committees in their national professional organizations. They are real leaders of American scholarship.

Men and women like this bring the University resources as well as a reputation. They attract research projects and funds. For instance, five young men out of the department of physics have financial support amounting to \$82,000 from private or governmental research agencies. The department of psychology has eight staff members supported by funds amounting to over \$130,000. Zoology has seven staff members supported by over \$120,000 of special research funds. Under the National Defense Education Act, Zoology has been awarded a program that will bring a top faculty member and eight outstanding graduate students. This award was one of the largest made to a mid-west university. Members in departments such as history, sociology, and geology have had substantial outside support. Both American Archaeology and Classical Arts and Archaeology have had heavy foundation support. These grants indicate that men and women on the College staff are first rate research scholars and are a great strength to our State's culture.

Our scholars are publishing books and articles that grow out of their research. In one department (History) five full length books, each an authoritative piece of work, have been published in the last four years. One book was selected as the best work in the field and the author was given the Welch prize for the best book written in the field of medical history. One of our women chemists has been chosen as the outstanding woman chemist of the nation during the current year. Our specialized curricula are all accredited by national groups that approve professional work. Seven members of the faculty have had Guggenheim Fellowships, twelve have been, or are now, Fulbright Fellows and four have had Ford scholarships. In addition we have faculty members who are recent recipients of fellowships from the So-

cial Science Research Council, the National Research Council, the Winner-Gren Foundation, and the American Council of Learned Societies.

Thus the faculty is helping write the scholarly record of this modern age. It is the work of a genuine university. It is what distinguishes a university from a college.

These faculty people are not just cubicle and laboratory men and women; they are also our great teachers. Many of them have been at the forefront of our effort to improve college teaching. The University of Missouri has been a center of a program that has been under way for over a decade in a notable experiment in the improvement of instruction. The Carnegie Corporation gave a grant of \$50,000, after the University had demonstrated its ability and desire to get a program under way. It has continued to have high priority as the University has moved ahead. As a result, the University has a reputation among its sister schools of being a place where good teaching is emphasized, practiced, and rewarded.

The University of Missouri has been very much concerned about the education of the gifted student for many years. In 1932 five members of the faculty were given the power and obligation of advising our most gifted. The faculty gave the teachers freedom to design programs that would meet a student's needs and that would challenge his best efforts. Many able students were excused from freshman subjects because they had broad and sound educational programs in high school. They were exposed at once to advanced courses. The experience with this program was most gratifying. Students succeeded with advanced courses and developed quickly into mature and thoughtful persons. Grades did not suffer.

Right after World War II, the academically gifted were put into special sections as well as into advanced courses. The sectioning of the gifted proved to be a successful experiment, particularly in English and mathematics. It worked well in political science, history, and other subjects also.

In recent years about 250 freshman students have been chosen out of over 2000 on the basis of high school rank, their performance on the Ohio Psychological Test, and on the University's testing program. These students are enrolled in fast sections in English, mathematics, history, the sciences, and the humanities. Of course they get special advisement and counseling. They are encouraged to enter the Distinction Program as juniors and seniors. If they complete the Distinction Program in departmental majors they are graduated "With Distinction."

At the time of the spectacular success of the Russians in the fall of 1957, the Arts and Science Committee on Curriculum was studying the requirements for graduation with particular reference to the

breadth and depth of training that students were getting in foreign languages, the sciences and mathematics, the humanities, and the social sciences. It was the conclusion of the Committee that a broader and deeper education was needed in each of these areas. As a result, the faculty accepted new requirements for all entering freshmen that will go into effect in the fall of 1959. Each student will have to meet requirements that are about 30% higher than formerly in languages, humanities, and social sciences. In the field of science the requirement is doubled for some, and the mathematics requirement will be increased by one semester's work for all. The requirements in social science and humanities will stipulate one course in each field some time in the junior or senior years and of senior college level. The major and minor requirements will still be high and very substantial.

Students should have no difficulty meeting these requirements in a four-year program. They are not unreasonable. They will give graduates the kind of intellectual experience that will fit them for the world in which they must live. The scientist will have to consider the great social revolution that is upon us. He will have to reach a higher competence in languages, and he will have to become better acquainted with the literature, art, and philosophy of the ages that have passed. In like manner, the students of history and literature will have to have acquaintance with mathematics and science. This is not a plan to de-emphasize specialized knowledge; every student will have to meet the usual requirements in his major field.

The faculty also accepted the proposition that more attention should be paid to what a student has learned in high school. If a student comes well prepared in science, mathematics, or foreign languages, his college requirements will be reduced accordingly. If he is very well trained in high school, he may have already met his requirements. What has gone before in his education will be considered and his college education will be designed accordingly.

Furthermore, college credit can now be obtained by examination. Ninety-seven freshman students made from three to eight hours of credit in English, American government, college algebra, and trigonometry during the fall semester of 1958, by passing examinations in these subjects. They were superior, *very superior*, students, and they had had good high school instruction. As the special programs for the gifted are developed in our high schools, the number passing college level examinations should increase. These are the people who will finish college in fewer than eight semesters. It is the hope that they are the ones who will enter graduate schools and will be our scholars and teachers of tomorrow. Some are headed for our professional schools. The professions need the same broadly educated men and women that our scholarly endeavors need. In teacher education we need to reach for the same idealism and strength that we are envisioning for other professions. If the great fundamentals of our culture are to become the warp

and woof of each new generation, teacher education must be of as much concern as the education of the professor, the judge, or the journalist.

It is a spectacular and dangerous age that we are in, and it is a challenging experience to be close to and a part of higher education at this time in man's history. Modern man seems to realize that he is in a close race with his destiny and he still has the faith to reach for the stars, although there are terrible dangers all around him. In a fearfully short time he has built his schools, colleges, and universities as instruments of construction and as an inspiration to his mind and spirit. They are truly the great institutions that make social and individual progress a reality.

A university is facing a herculean task today: modern America expects much of it; sometimes we think it expects the impossible. But in this brief space between a rich, confusing past, we look forward to a future that we know will bring ever-increasing burdens. We face it somewhat calmly, but we do not think for one moment it will be easy.

Modern life requires of us a high degree of specialization in our vocations. The growth of our professional schools is our adjustment to this demand. But a university has been anchored from its beginning on a broader and deeper base than our professions. It must try to deepen man's insights, give him perspective and understanding, teach him the fundamental basis of his culture, open to him the mysteries of science; in short, to make of him a cultured, creative, understanding humanist. These vital educational ingredients are found in the liberal arts. Business recognizes this, the leaders of our professional schools insist upon them, and intelligent Americans believe in them.

With all of this substantial strength, one must assure you we have not arrived, we simply seem to be headed in what we feel is the right direction. It is a satisfaction to be moving, but we are not fooling ourselves into thinking we are about to arrive. We know we must have many more material resources: money, buildings, equipment, libraries, if we are to attain greatness. More important is the need for the bright and challenging personalities and minds in both students and teachers. Funds for distinguished professorships, for small research grants, for the purchase of art objects, for a thousand small and large things that will add to our greatness are badly needed. New programs need to be launched and some good ones need to be expanded. When one says, "We need them" one means that Missouri needs to make this investment. It is not waste, it is the finest type of saving, and the best conservation practice that a people can practice. It pays off in wealth, health, satisfaction, and progress. It is truly one of our most sensible investments because it enriches our finest resource, our people and our culture.

The foregoing article is based on a speech by Dean English before the North Kansas City Community Teachers Association meeting in Kansas City last month.

Scholarship emphasis shown in fund allocations

Emphasis on teaching and scholarship is reflected in the allocation of unrestricted funds in the 1957-58 Alumni Achievement Giving program, as shown by the Third Annual Report and Honor Roll.

A Faculty Distinguished Achievement Award was created by the Plans and Projects Committee, made up of alumni and faculty members. The Alumni Association will present a cash stipend of \$1,000 to a faculty member to be chosen for the award.

The Samuel Brody Memorial Lectureship Fund was allocated \$2,650 by the committee. This amount is to be added to other funds to create a \$5,000 permanent endowment to bring national leaders to the campus as guest lecturers.

For the first time four Freshman Law School Scholarships of \$300 each were created. In addition to this \$1,200, a total of \$5,100 was allocated to continue the thirty Sophomore Scholarships for especially chosen freshmen who held Board of Curators Scholarships. The sophomore awards are now in their third year. For the second time, the committee also allocated \$250 for the outstanding scholar-athlete award.

Other allocations included \$1,000 to purchase two View-Graphs for installation in Mumford and Schweitzer Halls for use by various departments of the University; \$700 for research funds for the College of Engineering; a continuing grant of \$2,500 for the University of Missouri Press; and \$1,993.16 in research funds to be administered by the Dean's Office of the College of Arts and Science.

The unrestricted funds thus allocated amounted to \$16,893.16. A similar amount, \$16,189.15, was des-

ignated by the donors for specific purposes. Accordingly, the University Comptroller allocated the earmarked funds to the appropriate University departments. Thus, the amount of receipts in Achievement Giving for both designated and unrestricted use was \$33,752.31.

The third annual report covers an eighteen-month period, from July 1, 1957 through December 31, 1958. During this time, 4,323 contributions accounted for a total of \$418,746.72 made available to the University of Missouri. Only individual or achievement gifts are included.

The annual Alumni Achievement Giving Program is now in its fourth year, and the next report will cover the twelve months of 1959 since the program now operates on a calendar year basis.

Members of the Achievement Giving Committee, whose terms expire July 1, are: Cullen Coil, chairman, Jefferson City; Bradford Brett, Mexico; Charles Daniels, Kansas City; Don Harris, Kansas City; Roy P. Hart, Webster Groves; Dr. Frank Mays, Washington; Charles J. McMullin, St. Louis; Harold Niedorp, St. Joseph; Allen Oliver, Cape Girardeau; and John Stall, St. Louis.

The growing importance of alumni giving in support of higher education is shown in results of the 1957-58 Survey of Annual Giving and Alumni Support, released by the American Alumni Council. The report shows that 478 American universities and colleges received a record high of \$129,442,980. Of this amount, \$35,882,517 came through annual alumni funds.

Dr. Gwilym S. Lodwick acting dean of medical school

President Ellis announced on March 24 the resignation of Roscoe L. Pullen, M.D. as dean of the University of Missouri School of Medicine and as director of the University Medical Center. He said that Dr. Pullen, who resigned these positions because his administrative duties had become "excessively burdensome," will continue on the faculty as professor of medicine on returning from a leave of absence.

"It is with deep regret that I announce the resignation of Dr. Roscoe L. Pullen as dean of the School of Medicine," President Ellis said. "The University and the State of Missouri are both deeply indebted to him for his brilliant and successful leadership in building the University of Missouri Medical Center and in the recruitment of the excellent staff for its operation. I can say with pride that no university medical center in the country, whether supplied with smaller or with greater funds for the purpose, has secured such an outstanding plant as our center now possesses. This arduous work of planning is primarily the work of Dr. Pullen."

President Ellis designated an administrative com-

mittee of the School consisting of five department chairmen, with Gwilym S. Lodwick, M.D. professor of radiology, as chairman of the committee. As chairman, Prof. Lodwick carries the title of Acting Dean and exercises the authority of the Dean and Director until a new dean is selected, possibly by July 1. The other committee members are Prof. Frank B. Engley, Jr., Ph.D., microbiology; Prof. Robert Jackson, M.D., pediatrics; Prof. C. Thorpe Ray, M.D., medicine; and Prof. Hugh E. Stephenson, Jr., M.D. surgery.

Dr. Pullen had been dean of the School and professor of medicine since 1953 and director of the Medical Center since its establishment in 1956. Before coming to Missouri he was dean of the University of Texas Postgraduate School of Medicine in Houston, and professor of clinical medicine at Baylor University College of Medicine, also in Houston. Earlier, at the School of Medicine at Tulane University, he served as professor of graduate medicine, director of the Division of Graduate Medicine, and as vice-dean. In 1955 he was chosen Northwestern University "Man of the Year in Medicine."

Anderson

Prominent alumni honored on campus

When spring comes to the campus several of the University divisions observe special days or weeks and confer honors upon persons distinguished in their various fields. Such occasions have been held recently by the College of Engineering, the School of Law, and the School of Business and Public Administration.

During Engineers Week, the College of Engineering and the Engineering Foundation presented the Missouri Honor Award for Distinguished Service in Engineering to four alumni. Dean Huber O. Croft presented the medals to:

Dr. John F. Calvert, head of the Department of Electrical Engineering at the University of Pittsburgh. He was born in Columbia and earned degrees here in 1922 and 1924, later receiving an M.S. in Electrical Engineering and a Ph.D. in mathematics from Pittsburgh. After ten years with Western Electric he taught two years at Iowa State College and headed the Department of Electrical Engineering at Northwestern University from 1938 to 1954, when he went to Pitts-

burgh. Dr. Calvert was speaker at the Convocation, where the medals were presented.

Elmer Lee Anderson, Springfield, Mo., engineer consultant and retired chief engineer of the St. Louis-San Francisco Railway. He joined the railway soon after receiving a B.S. in Engineering degree in 1912 and was continuously employed by the line until his retirement in 1958. At that time he was chief engineer and assistant to the vice-president in charge of operations.

Herbert M. Bosch, professor of public health engineering at the University of Minnesota. A native of Jefferson City, he received a B.S. in Chemical Engineering degree here in 1929 and the degree of Master of Public Health from Johns Hopkins University in 1940. Formerly public health engineer of the Missouri State Board of Health, he held high positions with the Minnesota Department of Health for nine years. He was the first director of environmental sanitation activities of the World Health Organization of the United Nations in 1950-51.

Freeman

Finch

Oliver

Hyde

Alexander

Messing

Mason Vaughn, professor and head of the Department of Agricultural Engineering at Allahabad Agricultural Institute in India. He is now on leave in the United States. After receiving a B.S. in Agriculture degree in 1919, he earned a B.S. in Agricultural Engineering degree in 1921 and the Ag.E. in 1928. Following graduation in 1921 he joined the staff of Allahabad Agricultural Institute. In recent years he has set up and managed a factory established as an endowment investment for the Institute to make implements for the needs of India's small farms. He is a native of Bonne Terre, Mo.

The Citation of Merit was presented to two alumni by the B. & P. A. School and the University Alumni Association during Business Week activities. Willis W. Alexander, Jr. of Trenton, Mo., and Roswell Messing, Jr. of St. Louis were the recipients.

Alexander is vice-president of the Trenton Trust Company and the Missouri Bankers Association. He has taught general economics at Trenton Junior College since 1952. Alexander holds a B.S. in B.A. de-

gree from the University, granted in 1940, and an M.B.A. from Wharton School, University of Pennsylvania.

Messing is president of the World Color Printing Company of St. Louis and the Spartan Printing and Publishing Company, Sparta, Ill. He is also president of the Commercial Color Press, Prairie Bindery, Publishers Press, Wellbert Realty, and World Litho-print. Messing began his association with the World Company as a salesman after his graduation in 1938 with a B.S. in B.A. degree.

At the annual Law Day festivities, the Missouri Honor Awards for Distinguished Service in Law were presented to Missouri's former governor, Phil M. Donnelly of Lebanon, and Judge Paul Van Osdol, a Commissioner of the Missouri Supreme Court from 1943 until his retirement in April. Judge Van Osdol earned his LL.B. degree here in 1912.

Former Governor Donnelly, a native of Lebanon, is a graduate of St. Louis University. After one term in the Missouri House of Representatives he was

elected to the State Senate and served five terms. He was elected governor in 1944 and again for a second four-year term in 1952. He was made an honorary member of the Order of the Coif here in 1953.

Judge Van Osdol was born in Linn County and after graduation from the University he entered the practice of law in Brookfield. He served as Judge of the Twelfth Judicial Court of Missouri from 1928 to 1940. He served as a member of the Missouri Public Service Commission for two years before he was appointed Supreme Court Commissioner.

James A. Finch, Jr., Cape Girardeau, president of the University of Missouri Board of Curators, was initiated into honorary membership of Phi Delta Phi, professional law fraternity. He is president of the Law School Foundation. He has been a Curator since 1951 and president of the Board since 1954, has played a major role in the University's building program. He holds A.B. and LL.B. degrees from the University, earned in 1930 and 1932. A former prosecuting attorney of Cape Girardeau County and an Assistant Attorney General of Missouri, he is a member of the law firm of Finch, Finch & Knehans in Cape Girardeau. As a student he was elected to Phi Beta Kappa and Order of the Coif.

In another Law Day initiation, Allen L. Oliver of Cape Girardeau became an honorary member of the Order of the Coif, high ranking scholastic honor society in law. He has served as a member and as chairman of the University Board of Visitors and as a trustee of the Law School Foundation. He received his A.B. degree in 1908 and his LL.B. degree in 1909, and has been a member of the law firm of Oliver & Oliver in Cape Girardeau since 1910. He is vice-president and treasurer of the Oliver Land and Development Company, and is a past president of the Missouri Bar Association, the Missouri State Chamber of Commerce, and the Southeast Missouri Council of Boy Scouts. He is a Fellow of the American College of Trial Lawyers, a Fellow of the American Bar Foundation, and was recipient in 1955 of the American Bar Foundation's Certificate of Appreciation.

Flavius B. Freeman of Springfield became a member of Phi Alpha Delta, national professional legal fraternity, during Law Day ceremonies. He received his LL.B. degree from the University in 1935 and has since been in the private practice of law in Springfield. He has been a member of the Law School Foundation since 1952 and was president of the Foundation in 1957. He was also president of the University Alumni Association in 1958. Mr. Freeman is a member of the county, state and national bar associations, chairman of the National Jurisprudence Committee, and a member of the International Association of Insurance Counsel. He is a trustee of Drury College and a director of the Springfield Baptist Hospital, of which he was president for five years.

Judge Laurance M. Hyde, Commissioner of the Missouri Supreme Court, received the Citation of Merit from the University Alumni Association at the annual Law Banquet on April 25. He has been on

the bench since 1942 and has written more than eight hundred opinions covering a variety of subjects in all branches of the law. He was appointed a Supreme Court Commissioner in 1931 and was twice reappointed. Judge Hyde has held numerous state and national positions in the Missouri Bar and American Bar Association. He is now president of the Institute of Judicial Administration, a national research organization. He was a trustee of the Law School Foundation from 1931 to 1952, and a director of the University of Missouri Alumni Association for nine years. He was president of the Alumni Association in 1942-44. Judge Hyde, a native of Princeton, Mo. received his A.B. degree from the University in 1914, his LL.B. degree in 1916, and was awarded the LL.D. degree by the University in 1948.

*Dr. Scott M.
Smith*

Citation to anesthesiologist

Scott M. Smith, M.D., native Missourian and holder of two degrees from the University, and who has won prominence in the field of anesthesiology, was honored at the Medical alumni luncheon of the Missouri State Medical Association in Kansas City on April 7. Dr. Smith was presented the Citation of Merit by the University Alumni Association.

He is engaged in private group practice of anesthesiology at Salt Lake City where, since 1943, he has been a member of the clinical staff of the University of Utah College of Medicine. Dr. Smith was president of the American Society of Anesthesiologists, and in 1957 became secretary of the American Academy of Anesthesiology. He was elected president of the American Board of Anesthesiology in 1958, and has been a member of the board since 1950. Dr. Smith is a member of the American Medical Association, and from 1949 to 1957 was representative to Scientific Exhibits on Anesthesiology; in 1957 he was chairman of the Section on Anesthesiology.

Since 1946 Dr. Smith has been associate clinical professor in the Department of Anesthesiology at the University of Utah College of Medicine, and he was head of the department from 1946 to 1954.

A native of Houston, Mo., he received an A.B. degree and a B.S. in Medicine degree from the University in 1937. He received his M.D. degree from the University of Louisville in 1939.

Dr. Smith and their two daughters live at 1601 Yalecrest Avenue, Salt Lake City.

around the university

The University's 117th annual Commencement is set for Tuesday, June 9 in Memorial Stadium. The scheduled time is 7 p.m. Honorary degrees will be awarded by the University to four alumni: Dr. Elexious Thompson Bell, professor emeritus of pathology at the University of Minnesota; Russell L. Dearmont, president of the Missouri Pacific Railroad; Sidney Maestre, chairman of the board of the Mercantile Trust Company of St. Louis; and Dr. Fern Rusk Shapley, assistant chief curator of the National Gallery of Art in Washington.

Reunion activities are planned for June 8 and 9 for the classes of '09 and '34 and those of immediately preceding years.

Richard A. Watson, now research associate with the Cleveland Metropolitan Services Commission, Cleveland, Ohio, has been appointed associate director of the University of Missouri Bureau of Government Research. Dr. Watson also will be an assistant professor of political science.

His appointment is effective Sept. 1.

In his present position Dr. Watson has been directing and participating in studies of general governmental organization, law enforcement, and fire protection in the entire metropolitan area of Cleveland.

The Bureau of Government Research at the University includes in its present activities the preparation of brief research reports on current problems of general interest to municipal, county or state governments; the conduct of basic research into fundamental government problems; the handling of individual questions relating to governmental problems posed by groups or by public officials; assistance of a consultant or advisory nature to Missouri governmental units; and provision of facilities for training students for careers in government service.

Dr. George Y. Harvey, lecturer in political science, is director of the Bureau.

Dr. Watson received an A.B. degree in political science from Bucknell in 1948. In 1951 Dr. Watson received an LL.B. degree from the University of Michigan, and in January, 1959 that university conferred on him a Ph.D. degree in political science. From 1951 to 1954 Dr. Watson engaged in the general practice of law in Denver, Colo. He then joined the staff of the University of Michigan in 1954, as a teaching fellow in political science, and remained at the university until taking his present position in 1957.

Psychiatric aspects of nursing are being integrated throughout the curriculum at the University School of Nursing through a recent \$15,000 grant from the Public Health Service, National Institutes of Health, Bethesda, Md. This is a continuation of the under-

graduate program begun last year under a similar grant. Miss Ruby Potter, director of the School of Nursing, said the full amount will be used for teaching personnel, secretarial help and teaching materials. Two faculty members provided by the current grant, Miss Marie J. Sprick and Miss Anna Shannon, will assist students in developing an increased understanding of psychological principles as related to illness.

The University will increase rates for room and board in its student residence halls next fall to meet the increased operating costs. Harold Condra, director of housing, said room and board for a student living in a double room will be \$640 for the full academic year beginning at the opening of school in September. This is an increase of \$30 for the year, or approximately \$3.50 a month over the present rate of \$610 a year. The charge includes 20 meals a week served in the residence hall cafeterias. The cafeterias serve only two meals on Sundays. All residence halls and cafeterias now under construction on the campus are expected to be ready for occupancy next September.

President Elmer Ellis has announced appointment of Dr. C. Brice Ratchford of North Carolina to be Director of the University's Agricultural Extension Service and Extension Professor of Agricultural Economics.

Dr. Ratchford is currently assistant director of the North Carolina Agricultural Extension Service. He will assume his duties here July 1, succeeding James W. Burch, who is retiring as extension director here after almost 25 years of service in that capacity.

While Mr. Burch has reached the University's retirement age for administrators, he will remain on the University staff on a part-time basis as extension professor of animal husbandry, according to Dr. John H. Longwell, Director of the Division of Agricultural Sciences.

Dr. Ratchford is a native of Gaston County, North Carolina, and was educated in his native state. He holds B.S. and M.S. degrees in agricultural economics from North Carolina State College, and received his Ph.D. degree from Duke University in 1951. He has been assistant director at North Carolina since 1954, and prior to that time was in charge of extension farm management and marketing at North Carolina State College.

As director here, the 39-year-old Dr. Ratchford will direct an agricultural extension program covering all of Missouri's 114 counties with 375 county agents and home demonstration agents and a headquarters staff based here of 85 supervisors and specialists. The Agricultural Extension Service is a part of the University's Division of Agricultural Sciences.

Among the faculty

Dr. Edward M. Palmquist has returned to his post as associate dean of the College of Arts and Science after eighteen months in the Philippines where he developed and modernized the teaching and research programs in botany. He is professor of botany.

Joseph L. French, assistant professor of education, has been elected chairman of the Section on the Gifted in the National Vocational Guidance Association. Dr. French was also appointed to a three-year term on the Committee of Research and Awards.

David H. Pinkney, professor of history and chairman of the Department of History, has been re-elected to a three-year term as secretary-treasurer of the Society for French Historical Studies. The society, which is composed of historians of France from all parts of the United States and Canada, held its annual conference in April at Western Reserve University and the Case Institute of Technology in Cleveland. Professor Pinkney has been secretary-treasurer of the organization since it was founded in 1956.

Dr. William F. Fratcher, professor of law, is the author of an article, "History of the Judge Advocate General's Corps, United States Army," which appears in the April issue of the *Military Law Review*. He is a reserve colonel in the Corps. The article mentions three graduates of the University School of Law who have served as general officers in the Corps: Maj. Gen. Enoch H. Crowder, '86, who was Judge Advocate General of the Army from 1911 to 1923; Brig. Gen. Lawrence H. Hedrick, '05, Chief Judge Advocate of the Army Air Force during World War II; and Brig. Gen. Nathaniel B. Rieger, '29, Chief Judge Advocate of U.S. Army forces in Europe at the time of his recent retirement.

Robert P. Friedman, assistant professor of speech and director of forensics, was named Missouri's "outstanding young teacher of speech" by the Central States Speech Association at its annual conference held in Detroit. Dr. Friedman was a graduate assistant in journalism at the University in 1949, and instructor in speech from 1950 to 1954. He has two degrees from M.U., an A.M. in '50 and a Ph.D. in '54. After teaching at Dartmouth and Purdue, he returned here in 1958.

Dr. William E. Gwatkin, Jr., professor of classical languages and archeology, who lectured at the University of Kentucky in February on "Three Roman Battles in Greece," was invited to repeat the lecture before the Classics Section of the Kentucky Education Association at Louisville on April 16. He also presided and presented a paper at the University of Kentucky Foreign Language Conference at Lexington April 24.

Dr. C. S. Draper

Heads Inventors Council

Dr. C. S. Draper, Arts '19, has been appointed chairman of the National Inventors Council, succeeding the late Dr. Charles F. Kettering who held the post for eighteen years. Dr. Draper is head of the Department of Aeronautics and Astronautics, Massachusetts Institute of Technology. He is world famous as a pioneer inventor of inertial guidance systems for aircraft, missiles, and submarines.

The National Inventors Council serves as liaison between the Armed Forces and the nation's civilian inventors. It is composed of distinguished scientists, engineers, research administrators, and the chiefs of research of the Army, Navy, and Air Force. The council advises civilian inventors of technical problems standing in the way of national defense developments, evaluates proposed solutions from the inventors, and turns promising ones over to the military agencies. The NIC, whose members serve without pay, has headquarters with the U. S. Department of Commerce.

Dr. Draper is a foremost authority on missile guidance systems and has received world-wide recognition for his pioneering work in the field of inertial navigation. He was born in 1901 at Windsor, Mo. where he attended primary and high school before coming to the University in 1917. After two years he transferred to Stanford University, graduating in 1922 with a bachelor of arts degree. He entered M.I.T. that year and has been associated with it ever since. He has obtained three degrees from the Institute.

Dr. Draper has served at M.I.T. in the fields of aeronautical power plants, flight testing, vibration measurements, aeronautical instruments, and control engineering, with special attention to applications of gyroscopic principles for military and commercial equipment. He is a member of several advisory groups to the military services. Scores of honors have come to him; in recent years they include: Navy Distinguished Public Service Award, 1956; Airpower Trophy of the Air Force Association, Thurlow Award of the Institute of Navigation, and the Holley Medal of the American Society of Mechanical Engineers, 1957; the Blandy Medal of the American Ordnance Association, 1958; and American Honorary Fellow for 1959 of the Institute of the Aeronautical Science. He spoke recently at a University of Kansas City conference on increasing the effectiveness of scientists and engineers.

St. Louis group honors Cullen Coil

Cullen Coil, St. Louis lawyer who is now a Commissioner of the Missouri Supreme Court, last month received the annual Award of Honor of the Lawyers Association of St. Louis, becoming the fourteenth recipient of the award since it was established in 1946.

The award is given each year to a member of the Bar of St. Louis "whose attainments as a lawyer and whose record of honorable service to the profession and whose career as a citizen merit such recognition."

Coil was appointed court commissioner in 1951 and was re-appointed in 1955 and last year to four-year terms. He was graduated from the University of Missouri School of Law in 1932 and began the practice of law that year in St. Louis, continuing until his appointment to the court in 1951, except for three years spent with the Air Force during the war. He attained the rank of major.

He was a member of the Board of Governors of the Missouri Bar in 1950-51 and is now chairman of the Missouri Bar's Continuing Legal Education Committee.

Coil has long been active in University alumni affairs, and has served two terms as national president of the Alumni Association. He now heads the Alumni Achievement Giving Committee. He recently completed a year's service on the Citizens' Curriculum Advisory Committee of the Jefferson City public school system.

Cullen Coil

Talbot receives citation

Murrell Williams Talbot, who received a B.S. in Forestry in 1913, returned to the campus in March to receive the Citation of Merit, awarded by the University Alumni Association, at the Forestry Banquet.

Mr. Talbot, who has an international reputation for his work in forest and range management, was with the U. S. Department of Agriculture, chiefly in

M. W. Talbot

the Forest Service, from 1913 to 1955, devoting his professional life to range research. Upon retirement from the USDA in 1955 he became a consultant in forest range management to the government of Spain for several months. In 1957 and 1958 he was a consultant in watershed management for the Charles Lathrop Park Forestry Foundation to evaluate the effect of fires on watershed values in the Salt River-Verde River Basin in Arizona.

From 1931 to 1955 he was chief Division of Range Management Research, California Forest and Range Experiment Station, Berkeley. In this capacity he established two widely known experimental ranges,

the San Joaquin and the Harvey Valley. He was acting director of the station from 1941 to 1945 and associate director from 1946 to 1955. Mr. Talbot is the author of fifty published articles, bulletins, and leaflets which were the result of his career in research. He is a native of Appleton City, Mo. As a student at the University he was prominent in campus activities and was a member of the varsity track team from 1911 to 1913. His home address is 2590 Cedar Street, Berkeley 8, Calif.

Many students of two decades ago will remember the late Dr. Merl P. Moon, who for ten years was a member of the University faculty. News of his death last fall reached the *Alumnus* only recently. Dr. Moon was on the faculty from 1930 to 1940, and was associate professor of preventive medicine, medical bacteriology and immunology. At the time of his death he was professor of public health and hygiene at Still College of Osteopathy and Surgery, Des Moines, Iowa, where he had been on the faculty since 1947. Dr. Moon formerly was administrative assistant for the Kentucky Medical Association. He received his Ph.D. from Cornell in 1923 and took post-graduate work at Yale. He was on vacation at Thousand Island Park, N. Y. when he was stricken. He is survived by Mrs. Moon, who was a piano instructor at Drake University, and who now lives at Drake House, Garth Road, Scarsdale, N. Y. The *Alumnus* has received a letter from Dr. Norman B. Powell, A.B. '38, A.M. '39, of Moline, Ill., in which he lauds Dr. Moon as "one of Missouri University's unsung heroes, who gave so much of his time and energy for the betterment of others."

Mahoney's new book

THE MERCHANTS OF LIFE. By Tom Mahoney. Harper, New York, 1959. \$3.75.

By William K. Beatty

Tom Mahoney, a graduate of the University's School of Journalism in 1927, has gathered together a large amount of material that had previously been scattered through journal articles, books, and annual reports. "The Merchants of Life" is an exciting account of a major phenomenon of our times. Mahoney has captured the early marginal life of the industry and its recent explosive growth. It is a gripping, informative, and highly enjoyable book.

Mahoney has directly or indirectly told many stories involving persons at one time or another associated with the University. One of the most dramatic is the trip Dr. Eugene H. Payne, AB, 1923, AM, 1924, took to Bolivia in 1947. He had with him enough of a new drug, Chloromycetin (which Parke, Davis was trying out), to treat twenty-two patients. Five typhus victims were on the edge of death, and a death certificate, lacking only the date, had been made out for one of them. Forty minutes after an injection this last patient asked for a drink of water, and in a few days he had completely recovered. Dr. Paul R. Burkholder, associate professor of botany at the University from 1938 to 1940, had found the organism for this drug while working at Yale in 1947. Not only the men but even the earth connected with the University has a role in this fascinating book. A dozen samples of dirt from this area were sent in to the Lederle Laboratories by Professor William A. Albrecht, chairman of the University's Department of Soils. One of these, from Sanborn Field, contained a previously unknown species of Actinomycetes. Dr. Benjamin M. Duggar, professor of botany at the University from 1902 to 1907, isolated this, and it eventually became the well-known antibiotic with the Lederle trade-mark of Aureomycin.

Typical of the interesting facts Mahoney has gathered is the history of the word "tabloid." It was originally used by Burroughs, Wellcome & Company, to describe their compressed products, and was registered as a trade-mark by the firm in 1884. This is one of the few words in the Oxford English Dictionary that is described as the property of a company.

Several of the drug houses were started by physicians, and these men sometimes met considerable opposition from organized medicine. The tangled genealogies of our present firms are brought to light, and some of the familial relationships are rather surprising.

Emphasis, whether intended or not, is on the amazing sales of the various companies, and on their essentially altruistic nature. The industry will undoubtedly be happy to have this story presented to the public. Annual sales and stock growth are frequently cited. For those investors who decided against buying

drug house stocks twenty or thirty years ago these figures will not make happy reading.

Mahoney's lively style adds considerably to the reader's enjoyment. He occasionally goes off the deep end when, for example, he refers to the managers of Merck & Company "limbering it for the mid-century fray." The text is remarkably free from typographical errors. Probably the most amusing of these are Pfizer's suit against Bristol over tetracycline for "\$5 million and \$15 million tremble damages," and the statement that "Pfizer has supplied physicians with more drug samples, golf balls, and other promotional material than any other drug firm."

Dr. Beatty is Medical Librarian and Associate Professor of Medical Bibliography at the University.

To set up research bureau

Plans have been completed and a director appointed for a Bureau of Business and Economic Research to be established by the University.

The Bureau will be set up within the organization of the School of Business and Public Administration and the director will report to Dean William L. Bradshaw of the School. It is expected to be in operation by the opening of the fall semester next September, and space has been allotted for it in the new Business and Public Administration Building, which is scheduled to be completed by fall.

Dr. Robert Wacker Paterson, now director of the Bureau of Business and Economic Research at the University of South Carolina, has been appointed professor of business research and director of the Bureau at the University July 1.

The purpose of the Bureau, as summarized by Dean Bradshaw, will be "to initiate and undertake specific research projects in business and economic problems selected for their theoretical or practical significance; to encourage and facilitate research by individual faculty members by assisting them in developing their projects and furnishing technical assistance; to publish and distribute the results of studies that are of usefulness to the academic and business communities of Missouri; to cooperate with state and private agencies in the conduct of research programs that are of state-wide or industry-wide interest; and to assist in the training of graduate students."

Dean Bradshaw said the Bureau will be an integral part of the overall research and teaching program of the School of Business and Public Administration.

Dr. Paterson has been director of the Bureau of Business and Economic Research at the University of South Carolina since July 1, 1955, and prior to that was associate director for two years. He organized the first Bureau of Economic Research at the University of South Carolina, where he is editor of the monthly Business and Economic Review, which he established in January, 1954.

Dallas' King-size tribute

Frank H. King was honored at a testimonial dinner by the Dallas Alumni Club on March 31 on the occasion of his retirement as Associated Press General Executive and head of the Southwest Division. Eighty-three persons attended the meeting at the House of Steaks and enjoyed the special program featuring a "This Is Your Life" sketch whipped into shape by President Ruth Pines and emceed by Don Sauermann.

The presentation depicted a series of anecdotes in the life of Mr. King as recalled by his wife and a number of his associates. Several alumni, including Paul Carrington and Eric Schroeder, were among the performers. Some of Texas' most noted newspaper men were represented. Much was made of the fact that King came to Dallas in 1937 to become AP chief in Texas after long service as bureau chief in London where his latest big stories were the abdication of Edward for Wally, and the coronation of George VI. King arrived sporting a homburg, velvet lapels and an umbrella, but it took only a week for him to start wearing a ten gallon hat. There were also quite a few laughs at the expense of Mr. King's absent-mindedness. The delightful sketch was concluded by a serious tribute to the famous newsman, who is now in consulting work, and he was presented a desk set as a memento by the Dallas Alumni Club.

The University was represented by Dean Earl F. English of the School of Journalism and by G. H. Entsminger, director of alumni activities. They report a highly successful meeting which required extensive preparation by a host of Dallas alumni.

Browne heads capital alumni

William L. Browne, B.J. '33, is the new president of the Washington, D. C. chapter of the Alumni Association. He is director of public relations for the National Institute of Drycleaning, Silver Spring, Md., and lives at 4608 Langdrum Lane, Chevy Chase, Md. He succeeds Donald S. Dawson as club president.

Other new officers are Paul T. Truitt, first vice-president, and Nancy Nelson, second vice-president. Re-elected were Marguerette M. Hedge, secretary; John Reed Kline, treasurer; and Frank B. Scheetz, sergeant-at-arms.

The officers were chosen at the club's Congressional meeting in March. Guest speakers were Martha W. Griffiths, Detroit; Barratt O'Hara, Chicago; and Neal Smith, Iowa. Other congressional guests included Morgan Moulder of Camdenton, William J. Randall of Independence, and Clarence Cannon of Elsberry.

Pictured at right, standing, are Rep. Randall, Rep. O'Hara, Rep. Griffiths, Donald Dawson; and seated, Rep. Moulder and Rep. Smith. Mr. O'Hara delighted his audience with reminiscences of the days of Walter Williams and the founding at the University of the world's first School of Journalism.

District meet at Maryville

Maryville was the scene of a District I meeting for the first time in years on March 31, and the attendance was a highly satisfactory 102. This turnout was achieved in spite of threatening weather.

President Ellis was forced to cancel his scheduled appearance at the meeting. Speaking in his place was Dr. Jack Matthews, Dean of Students, who discussed University conditions. Basketball Coach Wilbur N. Stalcup spoke on Missouri's athletic program, Sparky was back in home territory, having starred in football and basketball at Maryville State College where he was basketball coach for eleven years. John Morris, national president of the Alumni Association, spoke briefly, James P. Dalton was toastmaster, and A. J. Dinsdale made introductions. The Alumni Office was represented by Jean Madden, assistant director.

Poplar Bluff host to alums

Nearly ninety persons attended the District 15 meeting of University alumni at Poplar Bluff on March 26. Approximately fifteen counties in the area were represented at the dinner meeting at the Dunn Hotel.

Principal speakers were President Elmer Ellis and Football Coach Dan Devine. G. H. Entsminger, director of alumni activities, spoke briefly.

Among the guests were James A. Finch, Jr., Cape Girardeau, president of the Board of Curators; O. B. Ferguson, Fredericktown, member of the Board of Curators; Wyman Dillman, Caruthersville, district director of the Alumni Association; and Ben Bidewell, Poplar Bluff, member of the Alumni Athletic Advisory Committee.

Robert M. Wolpers, editor-manager of the Daily American Republic, was chairman of the meeting and did a fine job making arrangements for the occasion.

Baseball's lost season

Ineligibility case knocks
winning Tigers out of race.

Sometimes the most startling developments in baseball occur away from the diamond rather than on it. The Tigers, apparently moving along toward a showdown for the Big Eight title, fouled out of contention—not on the field of play but in the treacherous area of paper work. The ineligibility of one team member on the players list had gone undetected until spotted in the Big Eight commissioner's office after mid-season. At the time, the Tigers stood 7 wins and 1 loss in the conference, with a perfect 6 and 0 record in non-conference games. When the ineligibility was discovered, Coach Hi Simmons forfeited all the games without waiting for conference action. Missouri's overall standing then became 0 wins and 14 losses and in the conference, 0 wins and 8 losses. The ineligible player was heavy hitting Gene Orf, who had 22 hours of approved grades the previous two semesters instead of the 24 required by conference rules.

Rain had dealt another blow to Tiger hopes as six Big Eight games were washed out. Meanwhile, Oklahoma State was breezing along and at one time had 9 victories and no defeats. But things were different as the windup May 22-23 series with Missouri approached. Oklahoma State's record was 15 and 3. Normally it would have been a title battle between two teams tied for the lead (without the forfeits the Tigers would have been 10 and 2); as it was, it still had a bearing on the championship. Depending largely on how the Missouri team fared at Stillwater, the title could go either to Oklahoma State, Nebraska or Iowa State. But the Cowboys were definitely in the driver's seat, and they clinched the title when the first game was rained out. Then they performed like champions, edging Missouri in a double-header the next day by scores of 1-0 and 2-1.

Before the Oklahoma State series, the Tigers were averaging 9 runs a game while limiting their opponents to an average of 2, having scored a total of 162 runs while allowing 35.

The fourth annual publications short course for newspaper and yearbook staff members and advisers will be held on the campus June 22-27. Guest instructors from Indiana and Illinois, faculty members from the M.U. School of Journalism, and members of the printing trades and yearbook industry will instruct and advise. Director of the short course is N. S. Patterson, instructor in journalism and director of the Missouri Inland Press Association. Co-directors are Dr. William H. Taft, associate professor in journalism, and Bryce W. Rucker, instructor in journalism. Sponsoring the course are the School of Journalism, the Division of Continuing Education, the College of Education, the Missouri Interscholastic Press, and the National School Yearbook Association.

Junior Wren and Harlan Abbey

Game reunites ex-classmates

Two members of the '52 class, Lowe "Junior" Wren and Harlan Abbey, recently met in Lockport, N. Y. under unusual circumstances. Wren, defensive half-back for the Cleveland Browns, was on tour with a team of basketball-playing football stars who live in the Cleveland area where Wren sells insurance. The football stars played in Lockport in a fund-raising cage game with a collection of players called the "Slow-Break League All Stars." In the latter group was Abbey, who is sports editor of the Lockport Union-Sun and Journal. The visitors won, 42-40, but Abbey won the scoring battle from Wren, 1-0. "We were both defensive backs on this night," Harlan concludes.

Hospital expands services

The University Hospital has expanded its on-campus program for giving medical students experience with emergency types of cases by opening the emergency area of the hospital. According to Dr. Gwilym S. Lodwick, acting dean of the University's School of Medicine and acting director of the Medical Center, the facilities for the expanded program were included in the overall planning of the hospital. However, until now it has not been possible to put them into operation. In the past, he explained, it has been found necessary to send medical school students to medical centers in the larger cities of the state for such training; but now the University can make use of the facilities it has and provide such training at the school.

With the opening of the emergency area for the first time, complete 24-hour emergency service will become available at the hospital. Persons in need of either minor or major emergency care, whether for an accident injury or a sudden illness, will be accepted at the emergency area for immediate treatment.

Dr. Lodwick said the provision of emergency service is another step in the University's program to put the full instructional facilities of the hospital into operation. He said this means, in addition to the instructional aspect, an expansion in the Medical Center's service to the public.

CONFORMITY, ANTI-INTELLECTUALISM

from page 3

tion itself shows this tendency, and to that extent, may be regarded as another evidence of the prevailing mode.

These attitudes have developed over a number of years, and they are developing still. These are the attitudes which produce that intellectual apathy and unconcern which in turn fertilize anti-intellectualism. The student body and faculty at Missouri reflect these tendencies, and to that extent participate in the cultural barbarism which is becoming a part of our heritage. It is significant that the two great powers in the modern age, the United States and the Soviet Union, while dissimilar in so many respects, show a consistent similarity in their fear of the unusual, the non-conformist, the intellectual. We have a proud tradition of freedom, but we are in real danger of freedom's becoming only a tradition. The rising conformist tide lacks drama, but its dangers are even more immediate than those embodied in the Commissars confronting us.

Dr. McGrew's article stems from his informal remarks as a panel member during a campus discussion program.

JOURNALISM'S SECOND DEAN

from page 5

conferred on a non-Britain. In 1935 he served as president of the American Association of Schools and Departments of Journalism.

His own son was to serve in Africa as an AP war correspondent. Frank L. Martin, Jr. is now publisher of the West Plains (Mo.) Daily Quill and a member of the executive committee of the Fiftieth Anniversary observance of the School of Journalism.

The Martins' daughter, Martha Ann, is the wife of Maj. Gen. Ralph P. Swofford, Jr., stationed at Bolling Air Force base in Washington.

The Swoffords have four children, Frank, Ralph III, Anne and Susan.

Frank L. Martin, Jr., has one son, Frank Lee Martin III.

Today, the Frank L. Martin Memorial Library stands as a tribute to the man who came for a year and stayed for a lifetime.

Harry E. Taylor, B.J. '15, editor and publisher of the Traer (Ia.) Star-Clipper, wrote:

"I have always marveled at Dean Martin, who for many years had the task of training a fresh crop of cub reporters every semester. In the later years the enrollment in his reporting classes was usually 100 or more.

"Each and every one of us who had any talent for newspaper work, or showed any willingness to learn, was given the solid foundation here for a successful start in journalism by Dean Martin.

"President Williams and Dean Martin set the sort of example that inspires and leads. They were practical men, and common sense has always been in style in their School."

class notes

05 RALPH S. HAMILTON, LLB, for the last 18 years circuit judge of the 18th Judicial District of the State of Oregon, is retiring. Judge Hamilton has been in ill health for some time. He was a member of the state legislature from 1925 to 1931 while practicing law in Portland. He served as acting governor in 1930. He has served as president of the Portland Chamber of Commerce, and of the Oregon State Chamber of Commerce. From East Palestine, Ohio, "Shang" was a member of the baseball team as a University student. He is listed in "Who's Who in America." Mrs. Hamilton is the former VIRGINIA YANCEY, AB '07. Their address: 425 Congress St., Bend, Ore.

Mrs. W. E. Ebert, who was HATTIE GREENSFELDER, LLB, lives in St. Louis 5, Mo., at 7111 Waterman Avenue.

09 RAY H. ALEXANDER, AB, retired attorney, now lives at 3417 North 26th Place, Phoenix, Ariz. After leaving Missouri in 1909 he located in Tempe, Arizona, where he became interested in U. S. Government Reclamation of lands and took his full rights in such lands. During the next ten years he did many things; taught three years, worked on a newspaper, sold real estate and insurance, and resumed the study of law at the University of Arizona and at Missouri. In 1920 he was admitted to the Arizona State Bar, practiced 25 years and retired in 1952. His land ventures turned out satisfactorily and he still has a small farm and a subdivision in Coolidge, Ariz. Mr. and Mrs. Alexander have been married thirty years. Their oldest son lives in California. Their daughter was killed in an automobile accident while a student at Arizona State College. The youngest son has three years of pre-engineering work and is employed with the Arizona Highway Department as a draftsman.

WALTER SMAUDER, BS EE, and Mrs. Smauder live at 4544 Fairway, Dallas 19, Texas.

10 GEORGE W. KIRK, AB, AM, BS Ed. '11, is owner of the Credit Bureau of Sikeston, Mo. Mr. and Mrs. Kirk live at 1014 N. Kings-highway in Sikeston.

JAMES S. SENEKER, AB, professor emeritus of Southern Methodist University in Dallas, is a life member of the University of Missouri Alumni Association. His home there is 3421 Haynie Ave., University Park, Dallas 5, Texas.

Mrs. H. A. Schroeder, who was AS-ENATH MARY JONES, BS Ed., will retire at the close of the school year after more than 30 years of teaching in the social science field. Mrs. Schroeder has

taught continually at the high school in Independence, Mo., since the death of Dr. Schroeder in 1932. Before her marriage she taught history and English in the high schools of Parma, Jackson, Lamar and Camden, Mo. Dr. Schroeder practiced at Braymer, Mo., and went to Independence in 1919, serving both as county and city physician. Mrs. Schroeder expects to resume activities in civic and professional organizations during her retirement. She has a daughter, Mrs. Chester Smith, who with Mr. Smith and their two daughters, live at the Schroeder family home, 217 N. Union, in Independence.

FRANCIS M. KINDER, LLB, magistrate, lives in Poplar Bluff, Mo., at 905 Cynthia Street.

11 PORTER E. MAGRUDER, AB, has retired from State Civil Service as manager of the Hollywood office of the Department of Employment. Mr. Magruder, who served his office for 21 years, was honored by some 200 friends at a going-away dinner at the Knickerbocker Hotel in Hollywood. During these 21 years he served two years as a director of the State Employer's Association and two terms as president of the Los Angeles chapter of the Missouri University Alumni Association. Mr. Magruder will spend his retirement as a real estate salesman in Indio, Calif. There he is connected with the Ray Schisler company. His address is P. O. Box 138, La Quinta, Calif.

12 F. E. LONGMIRE, BS Agr., retired in 1957 after 42 continuous years in Agricultural Extension work. He visited the campus in April. Mr. and Mrs. Longmire, formerly NELLIE DANIELS of Trenton, Mo., have one daughter and three grandchildren. The Longmire home is 710 West Vermont, Urbana, Ill.

Dr. JAMES R. McVAY, AB, Med. Cert., AM '13, is a physician of Kansas City and makes his home at 856 West 62nd St., Kansas City 13, Mo.

JOHN H. GREASON, BS CE, county surveyor of Butler County, Mo., lives at the Ozark Hotel in Poplar Bluff. His work is in the general practice of engineering.

14 ROE N. LOTZ, BS ME, ME '16, is retired after many years with Donner-Hanner Coke company of Buffalo, New York. Mr. and Mrs. Lotz, who was ELSIE CARTER, BS Ed. '15, live at 110 Parkwood Ave., Kenwood, N. Y. Their daughter, Sarah Lou, is Mrs. Robert Crosley of Sarasota, N. Y.

DAVID E. IMPEY, AB, LLB, a probate judge, lives at Houston, Mo. Two

of the Impey children, DAVID E., Jr., BS Agr. '49, and Mrs. Elmer A. (MARY LOUISE, BS Ed. '52) Brown of San Antonio, Texas, are Missouri graduates. Another daughter is Mrs. Alvin E. Beale of Sedalia, Mo.

JAMES COLE WILLIAMS, BS CE, retired construction engineer, lives at 6400 Williams Parkway, Dallas 5, Texas.

15 Dr. SARAH R. KELMAN, AB, Med., keeps busy with her hospital work at Hillside Hospital, Glen Oaks, Long Island, where she is visiting psychiatrist and a member of the Medical Board. Dr. Kelman's address is 1185 Park Avenue, New York 28, N. Y. She maintains contact with LIOTA WRAY Killian, BS Ed., AB '13, of 2022 Beverly Road, Brooklyn 26. Mr. Killian has been in poor health recently. Dr. Kelman is a life member of the University's Alumni Association.

S. M. RUDDER, CE, is engineer of planning for the State Highway Department in Jefferson City, Mo. Mr. and Mrs. Rudder, who was NADINE ROACH, live at 1120 Moreau Drive in Jefferson City.

DONALD C. FITCH, BS Agr., retired, lives at 3545 Hanover in Dallas, Texas.

AVON H. MURRAY, BS Agr., is a farmer and vocational agriculture teacher in Holt County, Mo. Mr. and Mrs. Murray live on R. F. D. 2, Oregon, Mo.

17 HUGH C. MOORE, prominent in banking circles of the Kansas City area for many years, is president of the recently incorporated Jackson County State Bank under construction at Meyer Boulevard and Prospect. This contemporarily-styled structure, representing an investment of \$250,000 in land and improvements, will be completed about June 1. Mr. Moore, who joined the staff of the Westport Bank in 1925 as a teller, has been president of that bank since 1954. His home is at 4533 West Sixty-fifth Street, Indian Fields, Kansas City, Mo.

ROSCOE B. ELLARD, AB, AM '30, editor, consultant and university professor, is with the Graduate School of Journalism at Columbia University, New York 27, N. Y. Mr. and Mrs. Ellard, who recently celebrated their 41st wedding anniversary, live in Westport, Conn. Their mailing address is Box 307, Sangatuck P. O.

Mrs. Alan Temple, who is the former ANALEE VERNON, BJ, lives at 11 Paddington Road, Scarsdale, N. Y. Mr. Temple is executive vice president of the National City Bank of New York. They have three children and seven grandchildren.

21 MERRITT S. GWINN, BS Eng., is a district engineer with the Missouri Highway Department, stationed in Sikeston, Mo. Mrs. Gwinn is the former ETHEL WHITE. Their home is at 515 N. Kingshighway in Sikeston.

Dr. PAUL R. WHITENER, AB, physician of the St. Charles Rock Road area in St. Louis County, lives at 11455 Terry Ave., Bridgeton, Mo.

MONROE E. EPSTEIN, BS Eng., with the Credit Bureau of Jefferson City, lives at 1014 Moreau Drive.

Mrs. Harold S. Taylor, who was MILDRED KLOGH, BJ, is woman's editor for the Sunday Sun, Teaneck, N. J. The Taylors live at 536 Palisade Avenue in Teaneck.

CHARLES SHUMARD, BS Eng., with R.C.A. since receiving his master's degree at Georgia School of Technology in 1923, is now a researcher in their satellite division at Princeton, N. J. Mrs. Shumard, formerly RUTH WOODWARD, BS Ed., teaches Romance Languages in the Pennington, N. J., high

school. Their daughter, a former student at the University, is the wife of Attorney Vincent Maestracola of Newark, where they live. Recently they visited in Columbia at the home of Mr. and Mrs. LAWRENCE L. ST. CLAIR, 500 Edgewood Ave. Mrs. St. Clair and Mrs. Shumard are sisters.

22 MARY E. KEITH, BS Ed., is on the library staff at Northwest Missouri State College. Miss Keith lives at 535 W. Third Street, Maryville, Mo.

DOROTHY V. NIGHTINGALE, AB, AM '23, associate professor of chemistry at the University, received the Garvan Award as the outstanding American woman chemist last year, and was recognized at the meeting of the American Chemical Society in Boston on April 6. Dr. Nightingale, a native of Ft. Collins, Colo., took her doctorate at the University of Chicago. She has been on the Missouri faculty since 1922. Her teaching is in upperclass and graduate courses in organic chemistry. Her home in Columbia is at 114 Edgewood Ave.

25 DON C. ANDERSON, BJ, assistant advertising director of the Dallas Morning News, lives at 5252 Ravine Drive, Dallas 20, Texas.

ARNOLD W. KLEMME, BS Agr., Ph.D. '51, on Technical Cooperation Mission to India representing the University of Missouri, writes us that he has met several alumni of the University there. He and Mrs. Klemme hope to get them together soon. The four members of the Klemme family are University graduates: Mrs. LOIS KLEMME, who completed her AB degree in 1957 before going to India to join her husband, their daughter, MARTHA KLEMME RASMUSSEN, BJ, of Madison, Wisconsin, and their son, Dr. WILLIAM M. KLEMME, AB '50, BS Med. '52, who is a Captain stationed in Hyattsville, Md., 2119 Chapman Road. Dr. and Mrs. Klemme, Sr., are living in Calcutta, India, c/o American Consulate General.

CLIFTON BLACKMON, AB, BJ '26, vice-president of the First National Bank in Dallas, Texas, lives at 4301 Bryn Mawr, Dallas 25.

Pictured above are twelve members of a group of emeritus professors who meet each month at a luncheon to keep their long-time acquaintances up to date. They have compiled a total of 525 years' work with the University of Missouri Division of Agricultural Sciences. Although their emeritus rank means they have retired from an official active status, the veteran educators continue their service to agriculture by going ahead with their former work or in new projects. They are known by thousands of former students

scattered over a wide area and by many Missouri farm people who have met the retired professors in one capacity or another during the past half century. Seated, from left: L. A. Weaver, H. H. Krusekopf, H. L. Kempster, T. J. Talbert, M. F. Miller, and Leonard Haseman; standing, from left: A. G. Hogan, A. J. Durant, A. A. Jeffrey, T. T. Martin, E. W. Cowan, and O. R. Johnson. A thirteenth member of the group, J. C. Wooley, was vacationing in California when the picture was taken.

class notes

27 MILLARD L. COPE, BJ, publisher of the Marshall, Texas, News Messenger, represented the University in March at the inauguration of Thomas Winston Cole, Sr., as president of Wiley College in Marshall. In 1955 Mr. Cope was named director of the Southern Newspaper Publishers Association and has served as vice-president of the Texas Daily Newspaper Association. In April Mr. Cope was elected one of three new members of the board of directors of the Associated Press.

Dr. LOUIS F. HOWE, BS Med., has offices at 8806 Harrison in Brentwood, Mo. Dr. and Mrs. Howe, who was IRENE BURRIS, BS Ed. '29, live at 9111 West Pine.

Mrs. H. E. Fussell, who was MAURINE OSBURN, BJ, is teaching in Dallas, Texas. The Fussell home is 3337 Hanover, Dallas 5.

Mrs. Paul Q. Ballew, formerly EMMA JEAN BROWN, AB, BS PA, AM '34, of Centralia, Mo., left in April for a European tour. She plans to join a college friend in Weisbaden, Germany and they intend to make an extensive tour of the entire continent.

28 DAN W. JOYNER, BJ, is advertising manager for Campbell-Taggart in Dallas, Texas. Mr. Joyner lives at 3615 Rosedale there.

FAY P. JACOBS, BJ, is advertising manager of the Daily American Republic in Poplar Bluff, Mo. His address there is 832 Cynthia St.

ROBERT T. HUBBLE, BS Agr., who for 21 years taught vocational agriculture and farmed as a sideline, has quit teaching and is continuing his own recommended practices on a 240-acre farm in DeKalb County near Union Star, Mo. In March, 1958, Mr. and Mrs. Hubble were presented an Outstanding Achievement Award in the balanced farming contest sponsored by the Kansas City Chamber of Commerce and the University of Missouri. Their farming operations include cattle, hogs and chickens, along with the other farm projects. They have been living on the present farm since 1945. Mr. Hubble quit teaching about 1950 and Mrs. Hubble resumed her profession as teacher for the fifth and sixth grades in the Clarksdale school district last year.

29 EDWARD W. CLINE, AB, BS, Med. '32, AM '32, is located at Poplar Bluff, Mo. Dr. and Mrs. Cline, who was DOROTHY MAY STAMMERJOHN, GN '37, BS Ed. '39, live at 954 Mary Street, Poplar Bluff. Their three children are Margaret Ann 15, Susan Elizabeth 12, and Dorothy Jean 6.

Gen. Nathaniel R. Rieger, '29

NATHANIEL B. RIEGER, LLB, the Army's senior Judge Advocate officer in Europe and the Near East for the past two years, retired in March. During the retirement ceremonies in Heidelberg, Brig. Gen. Rieger was awarded his second Legion of Merit on March 30. A native of Kirksville, he practiced law there with his father, JAMES E. RIEGER, LLB '97, before going into active duty with the Missouri National Guard in 1940. Gen. and Mrs. Rieger, who is a graduate of Stephens College, plan to return to Missouri to make their home. On their return trip they plan to tour Belgium, Holland and Denmark. General Rieger has held several top assignments, including duty as a commandant of the Army's Judge Advocate General's School at Charlottesville, Va.

Mr. and Mrs. W. G. Killingsworth live at 1110 S. Warren in Sedalia, Mo., where Mr. Killingsworth is a sales representative for Witte Hardware Company. Mrs. Killingsworth is a district supervisor for the Division of Welfare. She is the former ENA McMEHEN, BS PA.

Capt. FRANK L. ENDEBROCK, BS Eng., Civil Engineering Corps, U. S. Navy, relieved Capt. JULE C. TATE, BS Eng., Civil Eng. Corps, as the Eighth Naval District Public Works Officer and Officer in Charge of Construction, New Orleans, in April. Capt. Tate has gone to Washington, D. C. for an assignment there. They have worked together for the last two years as the top ranking Civil Engineer officers in the five state district.

PLANNING TO BUY A NEW HOME?

LOOK FOR THIS

Medallion

A Medallion Home sets a new standard for lighting, wiring and electrical appliances. As a Home Buyer, you will want to look for homes that display this new bronze plaque. It is your assurance that the house contains the basic conveniences you need to LIVE BETTER . . . ELECTRICALLY!

BRONZE MEDALLION HOMES PROVIDE THESE MODERN FEATURES:

ELECTRICAL APPLIANCES — You will find a modern built-in Electric Range in the Bronze Medallion Home, plus three additional major electric appliances . . . all conveniently placed to save you time and work . . . to make life more enjoyable.

LIGHT FOR LIVING — Lighting is planned with you in mind . . . with some fixtures built-in or recessed for greater convenience. And you will appreciate the modern way of lighting living areas to beautify your home.

FULL "HOUSEPOWER" — Every Bronze Medallion Home has an adequate wiring system planned for present and future needs. This means (1) a service entrance of at least 100 amperes, (2) plenty of circuits of proper size and (3) plenty of convenient outlets.

If you are planning to remodel your present home talk to your Architect or Building Contractor about bringing your house up to Bronze Medallion Home standards.

KANSAS CITY POWER & LIGHT COMPANY

class notes

lege in February. He is the son of KYLE R. PETERSON, BS Agr. '21 and Mrs. (HELEN M. CHRISTIAN) Peterson of Kahoka, Mo.

43 HAROLD A. HASWELL, AM, Ph.D. '31, has been named to one of the top educational posts with the U. S. Department of Health, Education and Welfare in Washington, D. C. In April Dr. Haswell became director of the Programs Branch of the U. S. Office of Education's Division of Higher Education. There he works with officials in the Office of Education, institutions and professional societies in evaluating and improving programs in higher education. For the past six years Dr. Haswell has served as coordinator of the Texas Baptist Christian Education Commission with headquarters in Dallas. There he worked with the schools in projecting a five-year growth program, which includes new institutions in Dallas, Houston, and San Antonio. He was formerly a teacher and public school administrator in Missouri, and was administrative dean and president of Ouachita Baptist College in Arkadelphia, Ark. Investigate the outstanding promotion opportunities at Douglas.

It stands to reason that the biggest field for advancement lies where the biggest programs involving advanced technology are under way.

At Douglas, massive missile, space and transport projects in both military and commercial areas have created a continuous demand for engineers and scientists with backgrounds outside as well as in the avionics, aircraft and missile fields.

As these projects grow in scope, the multiplying supervisory and executive openings are filled by Douglas engineers from within the company. This promotion policy has made Douglas a prime organization for the engineer who wishes to advance in his profession.

For further information, write to Mr. C. C. LaVene, Douglas Aircraft Company, Inc., Santa Monica, California. Section KK.

the most respected name in aircraft, missile and space technology

class notes

sued special certificates testifying to the event in Washington, D. C. Dr. Morrison completed his internship last June in Seattle, Washington. June 7—Tuesday, Annual Commencement

Summer Session

June 13—Monday, Registration and Orientation
June 14—Tuesday, Classwork begins
July 4—Monday, Independence Day Holiday
August 5—Friday, Summer Session closes, 5 p.m.

Summer Commencement

Note: The University offers its assistance and cooperation to the Churches of Columbia which elect to hold baccalaureate exercises for graduates in their student congregations.

ACTION SHOT OF DUKE ALL-AMERICAN HALFBACK
GEORGE CLARK ON ANOTHER FIELD

When a lawyer wants advice...

George Clark handles the life insurance program of J. V. Morgan (seated at desk, above), partner in a prominent law firm in High Point, North Carolina.

It's not surprising, therefore, that Mr. Morgan conferred with him on the effect that pending federal legislation would have on the integration of insurance with his personal estate. (This legislation would allow a self-employed individual a tax deduction on funds used to set up his personal retirement plan.)

The ability to provide well-informed service on a continuing basis is characteristic of the New England Life agent. And he is closely supported by his general agency and home office with in-

formative reports and expert assistance in various technical areas.

If a career like George Clark's appeals to you, investigate the opportunities with New England Life. You get a regular income from the start. You can work anywhere in the U.S.A. Your future is full of substantial rewards.

For more information, write to Vice President L. M. Huppeler, 501 Boylston Street, Boston 17, Massachusetts.

NEW ENGLAND

Mutual **LIFE** *Insurance Company*
BOSTON, MASSACHUSETTS

THE COMPANY THAT FOUNDED MUTUAL LIFE INSURANCE IN AMERICA — 1835

These University of Missouri men are New England Life representatives:

Paul J. Harris, '23, Jefferson City
Robert L. Casebolt, '24, Kansas City
Gordon E. Crosby, Jr., '41, Gen. Agt., Seattle, Wash.
Frank T. Kreutz, '47, Portland, Ore.

James O. Jones, '50, Dallas
Alfred A. Gelfond, '51, Newark
Robert E. Ball, '49, Duluth

Ask one of these competent men to tell you about the advantages of insuring in the New England Life.

class notes

CHARLES E. ALBERT, Jr., BS ME, has completed the cadet engineering training course at Bailey Meter Company in Cleveland, Ohio, and has been assigned to their Development Engineering Department. Prior to joining Bailey Meter, Mr. Albert had served for 29 months with the U. S. Navy. A native of Kansas City, Mr. Albert now lives at 2104 Alton Road, E. Cleveland 12, Ohio.

CARROLL H. WILKERSON, BA PA, is a research statistician at the Federal Reserve Bank in Kansas City. He lives at 3709 The Paseo, Kansas City, Mo.

CAREER BULLETIN FROM **BOEING**

BLAST-OFF of supersonic Boeing BOMARC, the nation's longest-range defense missile. Now in volume production for Air Force bases under construction. Other Boeing missile projects that offer engineers and scientists outstanding career opportunities include Minuteman, an advanced solid-propellant intercontinental ballistic missile system.

SPACE-AGE projects are expanding at Boeing. Above is human factors laboratory in which problems of providing environments and controls for space vehicle crews are investigated. Celestial mechanics, lunar orbital systems and interplanetary systems are other areas that offer long-range space-age career opportunities to qualified engineers and scientists.

BOEING 707, first American jetliner to enter commercial service, typifies years-ahead Boeing engineering concepts that are literally opening up new eras in both military and civil aviation. Opportunities that can help you get ahead faster are available *now* in Research, Design, Production, Service.

SAILBOATS on Lake Washington in Seattle, boating capital of the U.S. Boeing headquarters are located in evergreen Puget Sound area, world famous for fresh and salt water boating, fishing, hunting, camping, scenic forests, dramatic snow-capped mountains, mild year-round climate. Wonderful Western living for the whole family!

Write today, for your free copy of 24-page booklet, "Environment for Dynamic Career Growth." It pictures the career areas and advantages that could assure you a brighter future.

Mr. Stanley M. Little,
Boeing Airplane Company,
P. O. Box 3822 - UMI, Seattle 24, Washington.

Send me the Boeing career booklet by return mail.

59 Mr. and Mrs. CLARENCE E. JETT, BS BPA, and daughter left in February for Seattle, Washington, where he is employed with an aircraft company.

LAVETA PHILLIPS, AM, has been named assistant director of nutrition of

Letters

To the editor:

I enjoyed particularly your issue of December, 1958. I was so glad to see that the University had finally honored Dr. Isidor Loeb. His was one of the most incisive and clear-thinking minds that I have ever met. It was particularly pleasing to see Dr. Curtis and Dr. Stephens honored. I am deeply indebted to all three for the intellectual stimulus and inspiration they furnished me when I was in college.

Mary Paxton Keeley's review of *Gray Ghosts of the Confederacy* stirred pleasant memories not only of her as a student at the University, but also because my mother as a young girl with her family lived through those days on the border, and I was surrounded with the war talk that she remembers.

James R. Bryant
Judge, Illinois Appellate Court
30 North Michigan Avenue
Chicago 2, Ill.

To the editor:

I just finished reading the magazine for April on the college teacher. This is an excellent issue and goes a long way in explaining the problems of obtaining and keeping good faculty members. The material about our own faculty was excellent.

John A. Morris
Vice-President
Central Missouri Trust Co.
Jefferson City, Mo.

the National Livestock and Meat Board in Chicago. There she supervises dissemination of nutrition information and research results to professional workers and homemakers.

deaths

ERNEST ALBERT IRVINE, AB '03, educator and community leader of Vandalia, Mo., on April 1 following a month's illness. Mr. Irvine was a superintendent of schools for many years. From 1937 to 1945 he was a guide and lecturer at the Missouri capitol in Jefferson City. An authority on the works of Thomas Hart Benton, he conducted thousands of visitors through the capitol, explaining the works of art and other features. Mrs. Irvine, of the home in Vandalia, survives; as do a son, JOHN D. IRVINE, LLB '37, of St. Louis and a daughter, Mrs. Richard Hawkins of Webster Groves, Mo.

PAUL H. DITZEN, LLB '11, attorney of Kansas City, Kansas, since 1911, on May 3 following a brief illness. Born in Franklin County, Mo., Mr. Ditzen was active in church work and in the Masonic Lodge. Mrs. Georgia D. Ditzen, his wife, survives at 340 North Sixteenth St., Kansas City, Kan.; also a son, the Rev. Lowell R. Ditzen, pastor of the Reformed Church, Bronxville, N. Y.; two daughters, Mrs. Marion Bell at Merriam, Kan., and Mrs. Frances Clark, Leawood, and five grandchildren.

SELWYN D. COLLINS, AB '14, former resident of Harrisonville and Cass County, Mo., on March 24 in Washington, D. C. Dr. Collins had lived in Washington the last 40 years, where he was chief of the morbidity and health statistics branch of the Public Health Service at the time of his death. He worked with the Bureau of Labor Statistics prior to joining the Public Health Service. A son, Dr. Clark S. Collins of Boston, and two grandchildren survive.

J. FRED MERMOUD, '18, prominent farmer of Barry County, Mo., on March 14 in Monett of a heart attack. Mr. Mermoud was well known for activities in agricultural organizations and farm work, and in community affairs. Surviving are Mrs. Mermoud, a son, Jules F. Mermoud of Cocoa, Fla., and three daughters, Mrs. Larry J. Glasbys of Albuquerque, N. M., Mrs. Chandler Griffin of Kansas City, and Mrs. J. R. Callaway of San Antonio, Texas.

Mrs. C. Monte Craft, formerly PAULINE M. POLITTE, '19, teacher and civic leader of Southeast Missouri for many years, on March 25 following an illness of nine years. She had taught nearly 25 years and was active as a Democratic committeewoman for many years. Other activities included the Methodist Church, Red Cross and the Eastern Star lodge. Mr. and Mrs. Craft formerly owned and operated the Indian Foot Lake Resort, retiring in 1952 and moving to Crystal City because of her health. She is survived by Mr. Craft, a daughter, Mrs. Esther Evens of Roswell, N. Mex., and one grandson.

WALKER LABRUNERIE, Arts '24, on April 7 following surgery for a brain tumor. Mr. LaBrunerie was head of Fred LaBrunerie & Son Insurance in St. Joseph, Mo., secretary-treasurer of the First Federal Savings and Loan Association, and president of the Belt State Bank of Easton, Mo. Mrs. LaBrunerie is the former KATHERINE S. CONLEY, AB '23, of Columbia. Mrs. LaBrunerie lives at 3026 Douglas in St. Joseph.

Mrs. Fred L. Limerick, who was LAURA FRANCES ALLEN, BS Ed. '25, AM '29, of Columbia, on April 25. The former Miss Allen had taught in Columbia and Boone County for 47 years, the last 30 years on the faculty of Jefferson Junior High school. She is survived by her husband and by two sisters, Mrs. Frank Quantock and Mrs. Everett W. Meng, all of Columbia.

NAT N. ALLEN Jr., BS Agr. '29, faculty member of the University of Wisconsin, on March 7 in Madison. He received his Ph.D. degree from the Univer-

sity of Minnesota in 1935 and served as an assistant professor there until 1942. From 1942 to 1945 he served on the staff at the University of Vermont, and became a professor of dairy husbandry at Wisconsin in 1945. Mr. and Mrs. Allen lived on R. F. D. 2, Madison. Their six children are Mrs. Joseph Cattellino of Saxon, Wis., James Allen of Aberdeen, S. Dak.; Edward Allen of Minneapolis, and Virginia, Sarah and David of the home.

BONNIE L. WALLACE, AB '31, former teacher at Westwood View elementary school in Kansas City on May 2. Miss Wallace had taught at Westwood View 25 years before retiring in 1956 because of ill health. Surviving are a sister, Mrs. George T. Trail of Columbia, Mo., and a brother, John P. Wallace of Superior, Wis.

Dean E. P. PUCKETT, Grad. '31, LLD '52, the first and only dean that Central College in Fayette had had until his retirement in 1952, on April 6. Dean Puckett had been ill with leukemia. He was "a Southern gentleman of genuine understanding of student, faculty and administrative problems." Mrs. Puckett survives at their home, 303 Spring Street, Fayette, Mo. Their three daughters are Mrs. Anna Sue Ford of Florham Park, N. J., Mrs. Florence Jean Morton of Terre Haute, Ind., and Mrs. Helen Gertrude Thogmorton of Fayette. There are eight grandchildren.

EFTON J. THOMAS, BS Med. '34, recently in Miami Beach, Fla., where he had practiced since 1938. Among his professional affiliations was the Dade County Medical Association, Florida; the March issue of its publication contained a full page "In Memoriam" to Dr. Thomas. He was a native of Verona, Mo., and completed his medical education at Northwestern University in Chicago.

Mrs. Mose P. Rutter, formerly MARTHA LEE GILBREATH, BS Ed. '35, on April 25 following a long illness. Mrs. Rutter had lived in Columbia most of her life and was employed at Philips and Company as a secretary from 1945 to 1958. Mr. Rutter, of 1514 Rosemary, survives.

RAY. L. CHRISTIAN, BS Agr. '49, MS '50, formerly of Campbell, Mo., on May 10 following an illness of the past year. He had been living in Parkville, Mo., for the past six years, and had been a used car dealer there. His wife, Mrs. Johnnie Christian, survives at their home, R.F.D. 3, Box 389, Parkville. He also leaves his mother, of Kansas City, Kan., and a brother, Rex G. Christian, Liberty, Mo.

Write us about yourself

Your friends who read the MISSOURI ALUMNUS want to know about you. Use the form below to bring them up to date on personal news of yourself, your family, and other classmates.

HELP US KEEP THE THINGS WORTH KEEPING

Nothing's so precious to a child as her mother's love. It surrounds her and helps her find her way in a big strange world.

And though she doesn't know it yet, peace is precious, too. It makes the lives of both mother and daughter more secure.

But like most precious things, peace is not free. Peace costs money. Money for strength to keep the peace. Money for science and education to help make peace lasting. And money saved by individuals to help keep our economy strong.

Your Savings Bonds, as a direct investment in your country, make you a Partner in strengthening America's Peace Power.

Think it over. Are you buying as many Bonds as you *might*?

HELP STRENGTHEN AMERICA'S PEACE POWER BUY U. S. SAVINGS BONDS
