

MISSOURI ALUMNUS

February 1965

Thin Film, Big future

This little wafer of glass is one of the most significant telephone advances since the invention of the transistor.

Reason? It's a complete electrical circuit, ready to be slipped into a piece of communications equipment.

In the years to come, as it finds its way into new Bell System "hardware," it will save money and help hold down the cost of your telephone service.

We deposit thin films of metal *only four millionths of an inch thick* on a glass surface like that shown in the picture above.

Because thin-film circuits are photo-etched on the glass, they can be made economically.

And because a number of components and connections can be consolidated into one unit, thin-film circuitry is extremely reliable and precise.

Thin-film technology has benefited from many important contributions by Bell Telephone Laboratories. It is now being applied to a number of Bell System products manufactured by Western Electric. Among these are a new Electronic Central Office, a new high-speed data transmission system, and a new switchboard.

Thin as the film is, its future is big in our plans to keep improving your telephone service while helping to hold down its cost.

ABOUT THE COVER

There's an axiom around the *Alumnus* office that when in doubt about a cover picture, use a view of Jesse Hall, the Columns, or Memorial Tower; also, when such a picture is wanted, go to Andy Tau, University Photographer, because he periodically photographs these campus landmarks, and others, and most often with new and effective treatment. Hence, this non-winter view of Memorial Tower, with its adjoining Student Union wings, by Tau.

THE MISSOURI ALUMNUS

is published monthly except July, August and January by the University of Missouri Alumni Association, 308 Jesse Hall, Columbia, Missouri and mailed to all active members in the Association. Entered as second class matter under the act of March 3, 1879. Active membership \$4.00 a year; life membership \$80. Member, American Alumni Council.

1. *Still Life With Flowers*, by the Dutch painter Jan van Huysum (1682-1749).
Gift of Mr. and Mrs. Ivan B. Hart.

Alumni and the Art Museum

By SAUL S. WEINBERG
Director
Museum of Art and Archaeology

The growth of university museums has always been, as indeed it must be, a prime area for alumni support. Although our own Museum of Art and Archaeology is of comparatively recent foundation, it has enjoyed alumni support almost from the beginning, for the Chorn Memorial Fund was established in 1960 by Mary Chorn Hazard, '21, and Leland Hazard, '18, of Pittsburgh. Many of the Museum's finest acquisitions during the past five years have come through this fund, and in 1964 it has made possible the first purchase of a painting by the Museum. This is an oil painting (Fig. 2) of six saints, originally part of a somewhat larger canvas, by the Neapolitan artist Francesco Solimena (1657-1747). The brilliance and freshness of the colors on this excellently preserved picture make it an extremely attractive feature of the painting gallery as well as an important example of a period not previously represented.

Among alumni who have shown great interest in the Museum in the past few years and who have contributed to it annually are Mr. and Mrs. Hal G. Negbaur, of New York. This year their gift is an unusually fine Roman glass chalice from Egypt (Fig. 4). But even more, the interest in the Museum that they have aroused among New York alumni is of great importance for our future. From Mr. and Mrs. George Schriever, also New York alumni, has come the gift of an Expressionist landscape painting (Fig. 5) by the Missouri-born artist Arthur Schwieder, a most welcome addition to our collection of contemporary art, which grows steadily.

A visit to the campus by Irene S. Taylor of Washington, D. C., B.J. '24, was the occasion of a gift by her of a Russian icon in the form of a triptych. This was the second icon to be added to our collections, though subsequently we have acquired another Russian icon as well as a Greek icon, affording a good nucleus for a group on Byzantine art and its continuation in the Orthodox Church down to present times.

To the reports on the Museum in the *Alumnus* we owe the finest gift of the year and one of the most valuable single objects yet given to the Museum. Mr. David Shefrin of New York, B.J. '47, A.M. '49, after reading the Museum reports, suggested to his father-in-law, Mr. Ivan B. Hart, that he give to Missouri one piece of his very fine collection of Dutch paintings. Thus we received as a gift from Mr. and Mrs. Hart the exceptionally fresh and beautiful *Still Life with Flowers* (Fig. 1) by Jan van Huysum (1682-

1749), a very important addition to our collections of paintings.

This year for the first time we can say with a feeling of great satisfaction that our major gifts have come from or through the good offices of our alumni; this is as it should be, and we hope that it is indicative of a growing awareness both of the Museum's needs and of its importance to the University. We are equally pleased that the many friends not connected with the University who in past years have so generously supported the Museum have continued to do so this year. In this connection we must note with deep regret the passing of Julius Carlebach of New York, the person who has been chiefly responsible for channeling numerous gifts to the Museum since it was founded. We share this loss with other university museums throughout the country, for his interest brought benefit to many of them.

It is pleasant to acknowledge the gift of another etching by Albert Marquet, given by Dr. Warner Muensterberger; this is a companion piece to the *View of the Seine* announced last year. Again this year a painting by Evelyn Metzger, a floral still life, comes as an anonymous gift. These, together with the painting by Arthur Schwieder, help to strengthen our contemporary collections.

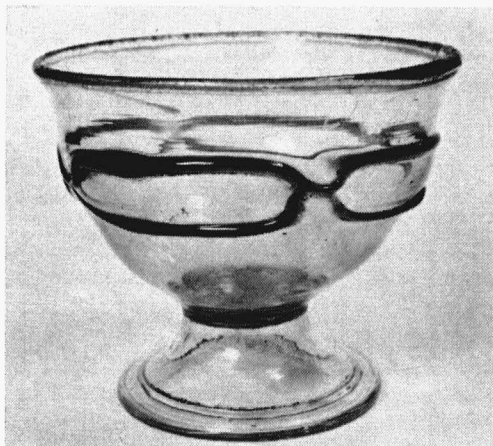

Several gifts, besides that of Mr. and Mrs. Negbaur, constitute important additions in the ancient field. Another gift from Mr. William Weinberg of Wilmette, Illinois, brings an exceptionally fine Graeco-Roman carnelian gem with an intaglio of a portrait head (Fig. 3), probably copied from a sculpture of the fourth century B.C. The rarest of the ancient objects added this year through gifts are a large glazed terracotta boss and an even bigger glazed "nail" which were part of the architectural decoration in the ziggurat complex at Tchoga Zambil (Iran) in the thirteenth century B.C.; each is inscribed with the name of the king who built the ziggurat. The upper part of a female figurine of clay, of the sixteenth century B.C. and also from Iran, comes as an anonymous gift. A red sandstone figure of Shiva holding a cobra, an Indian sculpture dating from the 11th-12th century, is the gift of Mr. Peter Marks of New York. With three other gifts of small objects, the total of gifts is seventeen pieces from twelve individuals. But these include much the most important acquisitions of the year, in value far exceeding that of the some two hundred other objects acquired; the sum total of accessions is the greatest in any year since the Museum was founded.

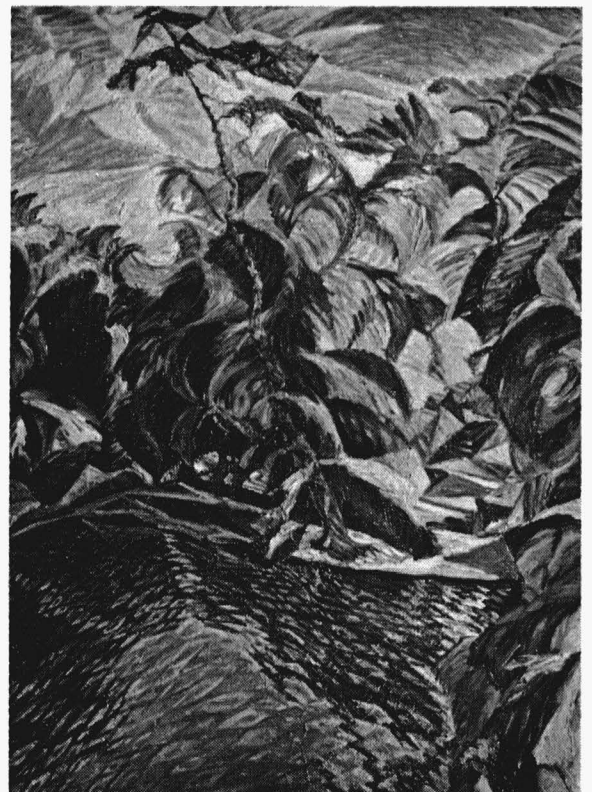

2. *Painting by Francesco Solimena, Neapolitan (1657-1747), depicting SS. John the Baptist, Francis, Jerome, Roch, Stephen, and another martyred saint. Chorn Memorial Fund purchase. Right, below (Fig. 5): Expressionist landscape painting by Arthur Schiwieder. Gift of Mr. and Mrs. George Schriever.*

3. *A Graeco-Roman carnelian gem, with portrait head in intaglio; an impression from the gem is shown above. Gift of Mr. and Mrs. William Weinberg.*

4. *Roman glass chalice from Egypt, 2nd-3rd century A.D. Gift of Mr. and Mrs. Hal K. Negbaur.*

Museum

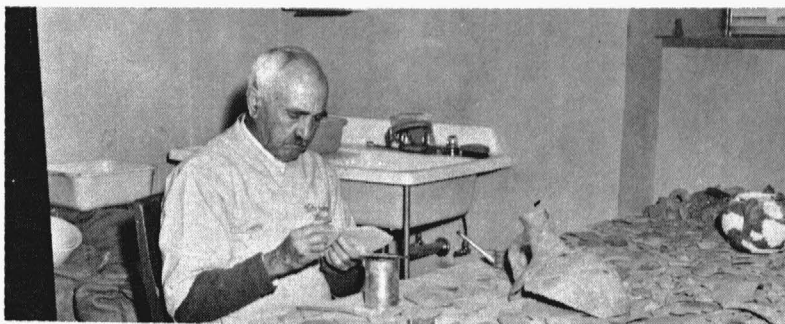

To summarize briefly these other acquisitions, we should mention first the large number of drawings, prints, engravings, etchings and woodcuts added during the year, a total of 38 in all, as part of a program to build up the graphic arts collections begun by Mr. Fred J. Cummings, Curator and Acting Director through August, and continued by his successor as Curator, Mr. Stephen E. Ostrow. Largely 16th, 17th and 18th century in date and representative of many schools, these examples were chosen both to enrich the collections and to broaden their usefulness as adjuncts to the teaching program of the Department of Art History and Archaeology.

The acquisitions in the ancient field comprise a wide variety of objects—vases from Italy, Greece and the Near East; some seventy Greek and Roman coins, several sealstones and lead seals; glass vessels, a marble vase, a wide variety of clay lamps dating from the 5th century B.C. to the 5th century A.D.; small figures of terracotta, marble and bronze, stone and bronze tools and weapons; and some very fine pieces of jewelry, gold, silver and bronze. Many of the individual pieces are of exceptional quality and deserve more mention than is possible here. Together they so enhance the importance of our collections of ancient art as to make this section of the Museum one of high rank among university museums.

It is self-evident that the Museum has been greatly strengthened by these new acquisitions and new activities. Its use by the students of the University as well as those of Columbia's colleges and public schools has increased proportionally. Almost every one of the several hundred students in art history courses has written a paper on some object or group

of objects in the Museum; seniors in Honors and graduate students are writing theses on parts of the collections. For the first time, the Museum has been asked to lend objects to other museums and we have done so on three occasions; other requests are already coming in, and as the reputation of our collections becomes more widely known we can expect many more. With the help of Annette Alsop Case, one of Columbia's fine graphic artists, we have been able to make prints from the 54 Japanese wood blocks, many of them double-faced, which were given to the Museum during the last several years by Dr. and Mrs. Martin J. Gerson of New York. There is thus available another important body of material for study and exhibition, again emphasizing the two sides of the Museum which we have constantly in mind—to make it serve both the interests of the University and of the community at large.

It is perhaps too obvious even to mention that these manifold activities and rapidly growing collections have made our Museum quarters in the Library inadequate. But both the use and the growth are accelerating at least in proportion to the increase in enrollment on the Columbia campus, if not more, and there is every reason to believe that this will continue to be the case. Here is the best proof, if any were needed, of the necessity of having such a facility on the campus. However, the Museum will not be able to continue its functions without more adequate quarters, and it is hoped that the alumni of the University of Missouri will follow the example of those of our sister institutions in Illinois and Nebraska, to say nothing of others farther afield, by providing a building for the Museum of Art and Archaeology. They will in this way be taking up the role played by the alumni of almost every great university, public or private, across our land.

Mr. Paul Perrot, Director of the Corning Museum of Glass, two Roman glass factory sites were investigated. They yielded large quantities of glass, which are now being mended and analyzed at the Corning Museum, and equally large amounts of pottery, which are being mended in our Museum workroom and we are planning a report on these excavations to readers of the *Alumnus* as soon as the results of the first campaign are more completely known. Further campaigns during the next two summers are being planned.

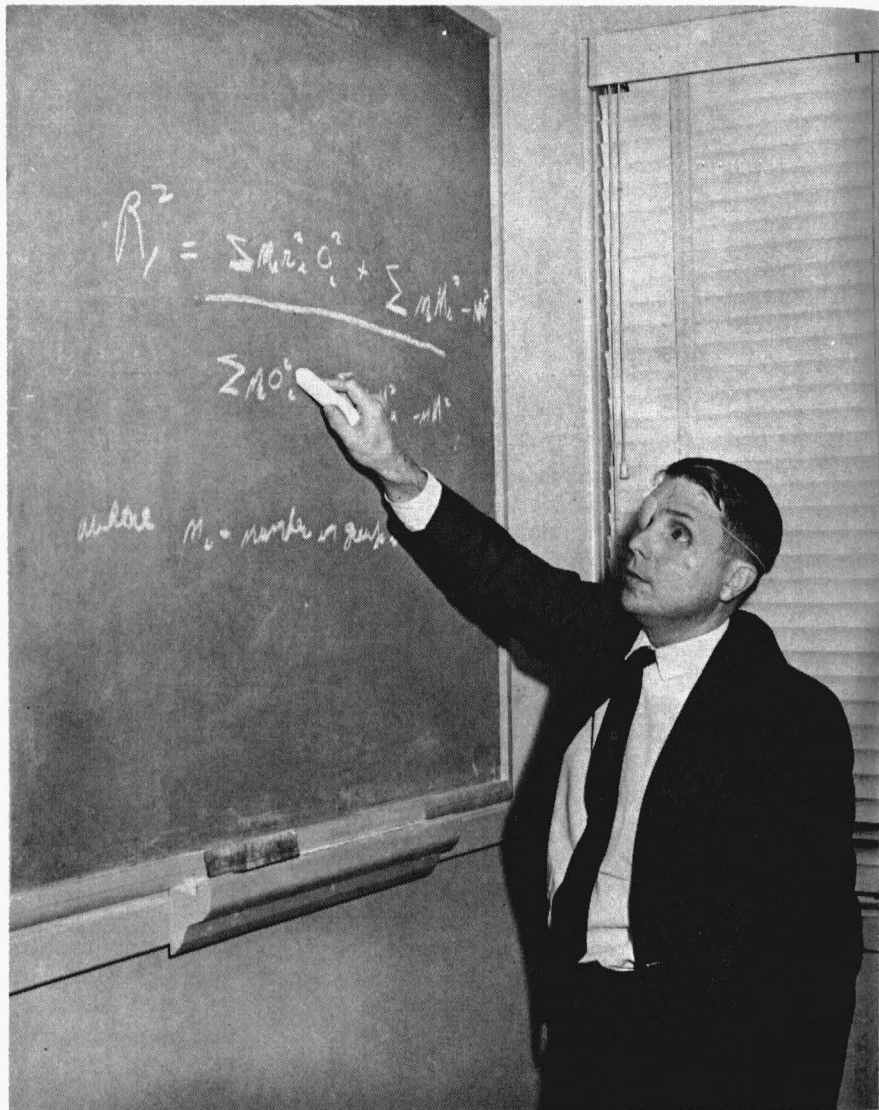

Mr. George Kachros, dean of restorers in Greece and longtime head guard of the Museum at Old Corinth, now retired for several years, is at present visiting in Columbia and has volunteered to help with the job of mending the pottery from Israel. His work has attracted much attention from many of our students and it is hoped that a few at least will be able to learn some of the rudiments of his technique during his stay.

Museum Starts a New Project

The Museum embarked this year on a new project which we hope will be continued in the years to come and which should increase the collections as well as the Museum's potential as a teaching institution. In cooperation with the Corning Museum of Glass,

the Museum sponsored the first excavations in Israel devoted to the study of Roman glass factories. During a six-week campaign, for which the field director was our Curator of Ancient Art, Dr. Gladys Davidson Weinberg, and the Administrative Director was

SUCCESS WITHOUT SIGHT

Dr. Robert A. Bottenberg is a national authority on statistical and mathematical methodology.

Two graduates who triumphed over blindness continue to lead useful and busy lives in their careers. This is not surprising, for their success could have been predicted when they were students here. One left the campus ten years before the other enrolled and therefore is well established in his field, a highly technical one; the younger alumnus has embarked on a career of teaching normal children at the elementary level and appears to be well adjusted to his work.

The two men are Dr. Robert A. Bottenberg, who is a research psychologist with the Aerospace Medical Division's 6570th Personnel Research Laboratory, Lackland AFB, Texas; and Richard Adams, who teaches the third grade at Central School in Desloge (Missouri) R-II School District.

Dr. Bottenberg, 40, who is chief of the mathematical statistical branch of the laboratory, has been nominated by Governor John B. Connally, Jr. of Texas for a presidential award as "Outstanding Man

of the Year" among handicapped men. Dr. Bottenberg lost his sight at the age of 21 when he was struck in the face by a shell fragment during a World War II assault operation. He also suffered the loss of smell and taste. Shortly after the injury he was sent to a hospital in Minelo, California.

He recalls, "The hospital's program was overwhelming because it afforded an opportunity for us to make adjustment almost immediately upon entering that environment." The hospital's program included classes in braille, handicraft skills, exercise and travel. "As soon as medical conditions allowed, you were expected to go to the cafeteria and the hospital's recreation facilities on your own."

Before enlisting in the Army, Dr. Bottenberg had attended Kansas City Junior College. When he was released from the Army in 1946, he decided to resume his education. Entering the University of Missouri, he earned his bachelor's degree in 1948 and master's degree in 1950. He went to Stanford University to

Richard Adams, now a teacher of third grade, directs a recreational game for his pupils at school in Desloge, Missouri. He was graduated from M.U. last June.

get his Ph.D. in 1957 and to complete a major portion of the requirements for another master's degree.

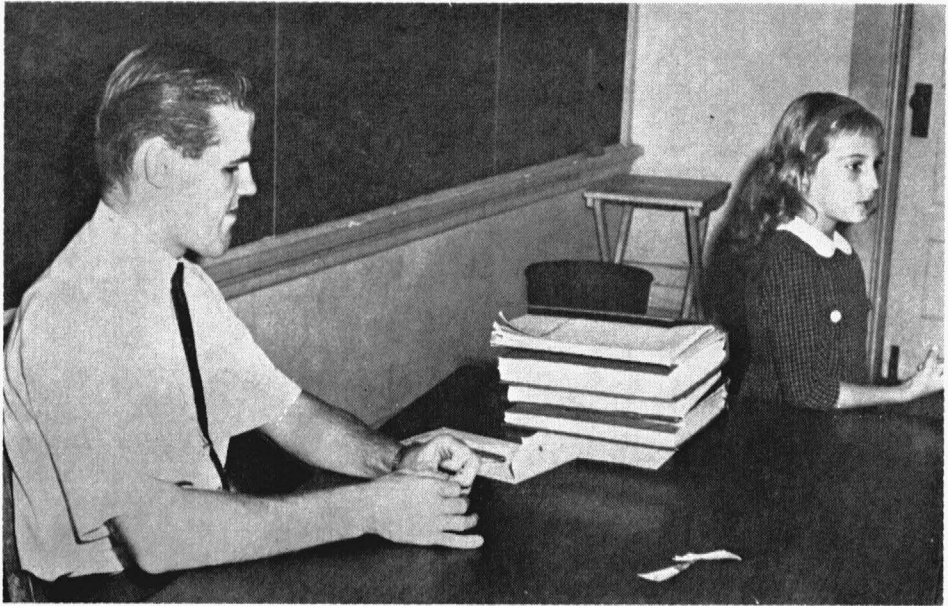

Dr. Bottenberg's work experience includes teaching at M.U. in 1949-50. Then, while at Stanford, he worked with the Office of Naval Research. In 1953, he joined the Aerospace Medical Division's 6570th Personnel Research Laboratory. He is recognized nationally for his knowledge of statistical and mathematical methodology. Dr. Bottenberg is called upon for consultation and guidance on scientific problems of operational aspects by Federal agencies, educational institutions and research foundations. He is active in several professional societies.

For two years Dr. Bottenberg was president of the Blinded Veterans' Association. He has served as a volunteer on the Advisory Committee for Blinded Veterans' research project which is conducted by the American Foundation for the Blind. He is currently working to help blinded veterans to find jobs.

Dr. Bottenberg doesn't limit his volunteer activities

to helping blind veterans. He also has a deep and personal interest in young people who are blind and facing physiological and psychological problems in everyday living. Every year he counsels several young people, especially those who cannot make up their minds about pursuing a profession or a career requiring a college education. These young adults could find no greater example of inspiration than Dr. Bottenberg, whose busy life includes working for the U. S. Air Force, teaching a Sunday School class, helping other sightless people, and raising a family. Mrs. Bottenberg is the former Dorothy Gene Laffoon, A.B. '45. He knew her before losing his sight. They have three daughters.

Rich Adams is the subject of a feature story by Jean Blakeley which appeared in the Daily St. Francois County Journal of Flat River, Missouri. Her eight-year-old daughter, Sharon, is one of Rich's pupils; speaking as a parent, Mrs. Blakeley says: "The discipline in his room is remarkable and his

Teacher Rich Adams at his desk in the Desloge R-II Central School instructs one of his pupils, Sharon Blakeley. He has memorized pupils' names.

SUCCESS

students certainly put their hearts into their work."

When Rich came to the University he was seeking an Arts and Science degree. Later on he decided to take up teaching. While enrolled here he taught at the University Hospital School in special education.

Rich started teaching at Desloge last August 27 a few months after his graduation. Many University students and graduates will remember him on the campus where he was well known as the leading winner on the M.U. wrestling team.

All of his textbooks are in braille, and they correspond to the students' books. In addition he enjoys other braille publications such as the Bible, Reader's Digest, and the Weekly Reader which his pupils receive. To prepare for his classes he has had the services of a reader working with him about two hours each evening. But he depends on his memory for a lot of the homework. The school also has embossed maps and a globe to help him in geography.

In her article about Rich, Mrs. Blakeley writes: "Adams feels he has the respect of his pupils. When he walks into the classroom and asks for silence, all of the children are eager to go to work. Desloge has an ungraded primary school system and Rich believes that this is a very good program. For those that learn fast he is able to give them advance work and for those that are slower, he is able to spend more time with them.

"His students are impressed by his magic wrist watch which is in braille. He has all of the students' names in braille. To select a volunteer for a job, Rich is not able to see the raised hands, so he has a student put his finger on the braille list and the youngster whose name is chosen gets the job.

"Most of his writing is done by typewriter, which

he learned to use in the fifth grade. Many blind persons can write beautiful longhand, but it is a slow process. Rich now carries a slate and stylus in his pocket for use at school.

"Rich feels that he has been accepted in Desloge and is proud to be a resident of that community. He stressed that he wants independence and that the community has cooperated with him in striving for that goal."

Recently Rich married his longtime friend, Miss Diane Stone, who is also blind. He has known her since the seventh grade. She has been employed as a medical typist in Cook County Hospital. Rich says she has a brilliant mind and memory. "She will be a great asset to me," he added. "She'll be teaching the teacher."

Rich's parents are Mr. and Mrs. Richard Guy Adams of Hannibal. He has a younger brother, in the Navy, and a married sister who teaches in Indiana. Before entering the University, Rich attended the Missouri School for the Blind, St. Louis.

Neither Dr. Bottenberg or Rich Adams makes much concession to the handicap of blindness. According to Dr. Bottenberg, "Anyone who has a bit of training can go on through life without blindness bothering him too much . . . it's not that much of a problem."

The things that bother Dr. Bottenberg, he said, are "wishing or wanting things" available only to sighted people, such as "freedom of movement and doing things like driving a car, which sighted persons take for granted."

Dr. Bottenberg moves around with a cane and is not interested in having a seeing-eye dog. He mows his own lawn by using a method of stakes and rope

Members of the family of Dr. Robert A. Bottenberg listen to guitar music played by 12-year-old daughter Ann. At left is the oldest daughter, Julia, 15, sitting beside her mother, Mrs. Gene Laffoon Bottenberger. In the foreground is Janet, 11. The Bottenberger home is in San Antonio.

as guides, and performs handyman tasks around the house. He also rides a bicycle and swims. When he rides his bike on a public street, he follows the sound pattern from a lead bike ridden by one of his three daughters. The lead bike has playing cards placed between the spokes of the rear wheel.

Dr. Bottenberg frequently talks about America's beautiful scenery. "It amazes me how some people are unimpressed with the nature of our country. I enjoy it thoroughly." He recalls that during his 19 sighted years he acquired an appreciation for our scenery, including mountains, forests and oceans. "I remember these things and know what colors are what."

His parents are Mr. and Mrs. J. H. Bottenberg, who live in Kansas City.

Richard Adams, 23, blind from birth, lives a very normal life. He enjoys swimming, skating, bowling, miniature golf, and wrestling. Having a special fondness for animals, he said if he had had his sight he probably would have been a veterinarian.

Rich acquired his like for wrestling when in junior high school. As a member of the Tiger wrestling team he was an outstanding performer at 147 pounds and won more matches than any of his teammates. He feels that wrestling is a great sport and it is one activity where it doesn't matter if one is fat, skinny, strong or small.

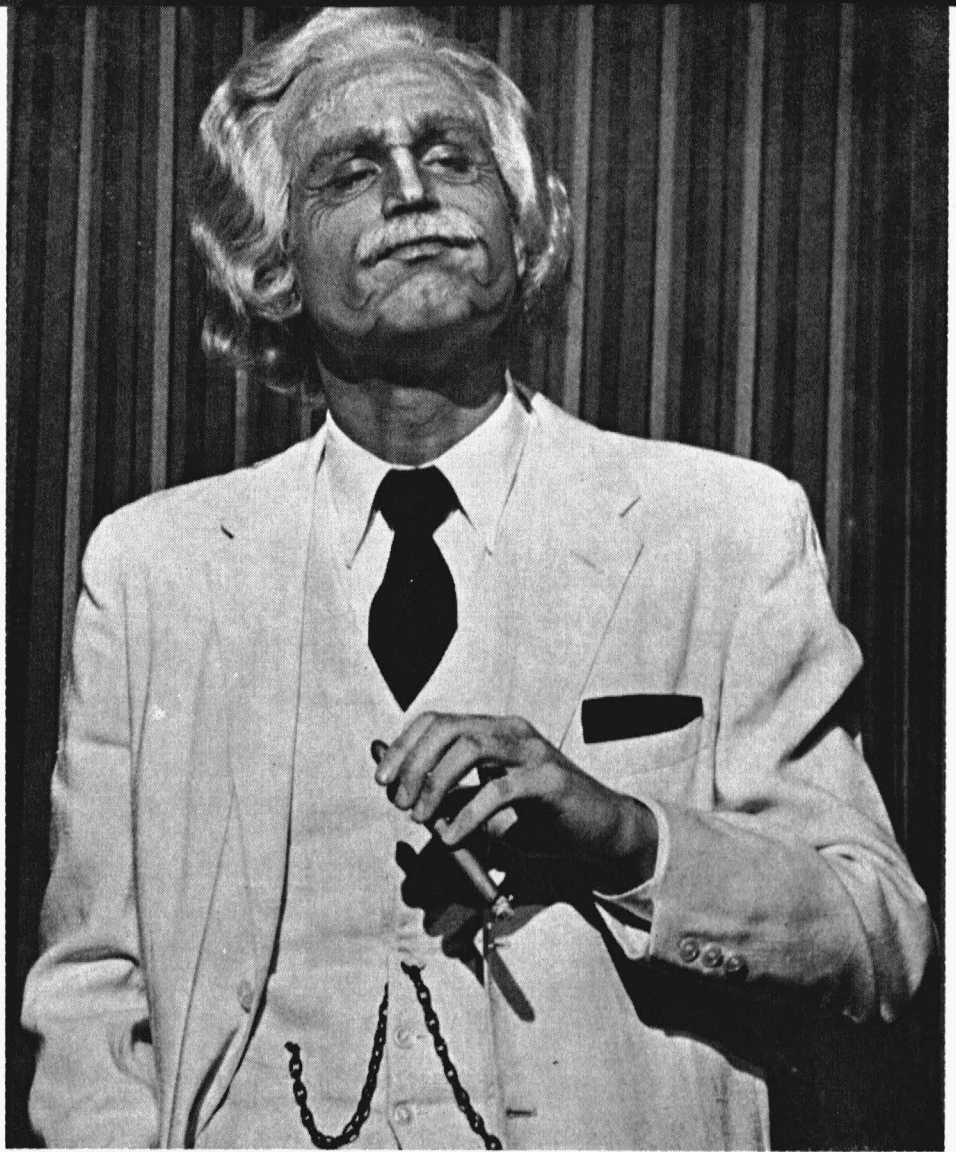

The young teacher always appears well dressed and avoids colors that clash. He explained that he has his trousers, shirts, and other articles marked with a certain system to correspond with each other. By feeling the marking, he knows what goes together best and then second best. When shopping for clothing, he takes someone along who has good taste, then has the clothing marked with his own system.

Although he has a white cane with a red tip, he doesn't use it for himself, but so others will know that he is blind. "Some blind people depend on a cane and not their ears and they really don't know what is going on," he said. "My cane is only a legal and social asset."

Once while at the University, Rich was intentionally weaving from side to side on the sidewalk to get the feel of the walk. When two women gasped that "he must be drunk," Rich decided to carry the cane to counteract such impressions.

Rich depends on his ears in getting about. He said he can "hear" ascending flights of stairs, posts, fences and any object in his way. He never counts steps, but hears his way. In finding his way home, when he "hears" the mail box about ten or fifteen feet away, he knows it is time to turn north. This information will be of interest to many of his classmates who often marveled at the sureness with which Rich made his way about the campus.

Ted H. Funk photos

Samuel Clemens as he appeared in his later life, portrayed by Charles Closser, Jr.

SKETCHES FROM MARK TWAIN

Selections from the works of Mark Twain, presented by readers using only minimal scenery and costumes, won enthusiastic approval of audiences in the University Theatre in December. As the cast members relied on expression and body movement to bring the various Twain characters to life, the sparse settings seemed not to matter, so effective were the performances. The sketches, titled "Mark Twain: Missourian," were presented on two nights by the interpretation area of the department of speech and dramatic art of the University. The program was open to the public without charge and was part of the annual observance of Arts and Science Week.

Scenes were drawn from the author's "Autobiography," "Life on the Mississippi," "The Gilded Age," "Innocents Abroad," "The American Claimant," "The Adventures of Tom Sawyer," "The Adventures of Huckleberry Finn," "The Diaries of Adam and Eve," and "Roughing It."

With the exception of "Life on the Mississippi," the script, compiled by Dr. Frances McCurdy, asso-

ciate professor of speech, followed the chronological development of Twain as a writer. While the richness of Twain's diversity was represented, the emphasis was on the happier moments. Twain's delight in the Mississippi River, his recollections of the "flush times" in the West, his nostalgia for what he remembered as idyllic days in Hannibal, Missouri, his exuberant Americanism, his humor that could degenerate into burlesque, and his tenderness were represented in the sketches that formed the scenes presented.

Charles Closser, Jr., graduate student in speech, in the role of Mark Twain, introduced the sketches and then, while seated before his desk at the side of the stage, provided the narration for transition of the scenes. His comments gave a continuity to the succession of scenes and added interest. Preceding each sketch, the title and an illustration from the story were projected on a scrim curtain which was raised to disclose the scene.

All members of the cast were drawn from the be-

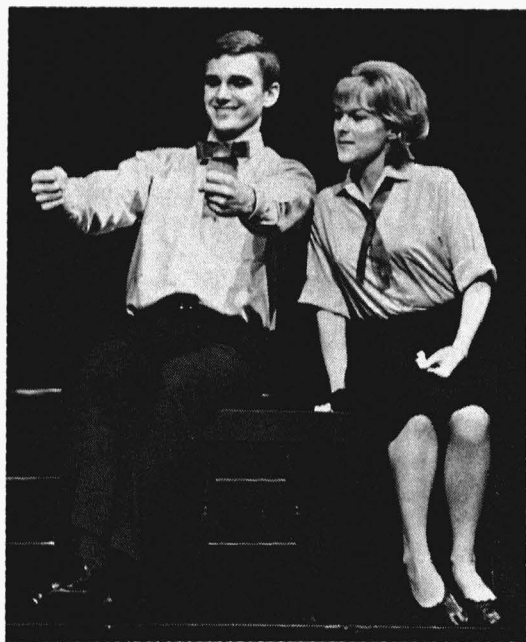

Charles McNames (left) as Capt. Bixby and David Nuell as young Mark Twain in a scene from "Life on the Mississippi," one of several sketches presented in University Theatre.

ginning and advanced classes in oral interpretation.

The readers had able assistance. Music and dance were used to aid in the interpretation of the scenes. David O'Hagan, instructor in the department of music, provided piano accompaniment for the sketches. Miss Vicki Heckemeyer, junior in the College of Education, was the choreographer.

Dr. McCurdy said that since the emphasis in Arts and Science Week in 1964 was on the arts, the choice of sketches from the works of Mark Twain was designed to show the artistry of one of the greatest American writers who was a Missourian.

Participants in the program included Charles Closser, the Rev. Marlowe Anderson, Wendy Sarno, C. Alice Donaldson and Judith Wilson, Columbia; Calvin Stoney, Fulton; David Nuell, Kansas City; Charles McNames, Colorado Springs, Colo.; Su James, Dayton, Ohio; Robert Everding, St. Louis; Terry Lay, Webster Groves; Thomas Pallen, Affton; Anne Donaway, Cabool; Vicky Heckemeyer and Joy Raidt, Sikeston; and Pamela Overturff, Springfield.

Robert Everding as Tom Sawyer has an interested onlooker in Wendy Sarno as Becky Thatcher.

James A. Finch, Jr.

To Missouri Supreme Court

The newest judge of the Missouri Supreme Court is James A. Finch, Jr., of Cape Girardeau, a prominent University alumnus and attorney. At the time of his appointment in December by John M. Dalton, Missouri's retiring governor, Mr. Finch was president of the University's Board of Curators. He took the oath of office in ceremonies at Jefferson City last month as friends, relatives and many public officials looked on.

Judge Finch was a member of the Board of Curators for fourteen years, serving as president from 1954. During his tenure the University made great strides, and his work as Curator has been widely praised.

In 1959 he was named to head the late Gov. James T. Blair's Council on Public Higher Education. Last fall he received from Phi Delta Kappa, honorary professional education fraternity, the layman's award for outstanding contributions to education in Missouri. The new judge holds two degrees from the University—A.B. '30 and LL.B. '32. While attending the School of Law he was elected student president.

At the swearing-in ceremonies, Judge Finch heard himself praised by friends and long-time associates. Governor Dalton said he and Finch had been friends for many years. He added that he had tried cases in the courts both with Finch and against Finch, "and, frankly, I prefer the former."

University President Elmer Ellis said Finch's work, foresightedness and leadership were important in the growth and the improvement of the University System.

Rush Limbaugh, another Cape Girardeau attorney, said the local bar association was proud "to bring to the Supreme Court the best that we have."

Neill heads Curators

Robert J. Neill, Jr., St. Louis, is the new president of the University of Missouri Board of Curators, succeeding James A. Finch, Jr., in that position. Finch resigned as president upon his appointment to the Missouri Supreme Court.

Mr. Neill, a lawyer, has been a member of the board since his appointment by former Governor James T. Blair in 1957. He had been vice-president of the board. Oliver Ferguson, of Fredericktown, was elected to succeed Mr. Neill in that post.

Book on teaching by TV

Proceedings of the National Conference of the National Association of Educational Broadcasters, held on the campus last March, have been published under the title, *Improvement of Teaching by Television*, by the University of Missouri Press.

The book is edited by Dr. Barton L. Griffith, associate professor of speech and dramatic art, who is director of Instructional Television at the University; and Donald W. MacLennan, instructor in speech and dramatic art, who is ITV production manager. The conference was attended by 200 participants from 30 states and four foreign countries. Dr. Griffith was general program chairman.

The book contains 38 manuscripts delivered at the conference. Included are papers by Dr. Joseph M. Wood, assistant professor of botany; Dr. Fred McKinney, professor of psychology; and Mr. MacLennan.

C. Edmund Marshall

Marshall associate dean

Dr. C. Edmund Marshall, professor of soils, has been appointed associate dean of the Graduate School by the Board of Curators. He will continue his research and teaching in the departments of soils and agricultural chemistry.

Dr. Marshall was born in England and before coming to this country was assistant lecturer in agricultural chemistry at the University of Leeds, England. He joined the staff of the University of Missouri in 1936.

In 1960-61 Dr. Marshall was granted a leave of absence while on a National Science Foundation Senior Research Fellowship at Imperial College, London.

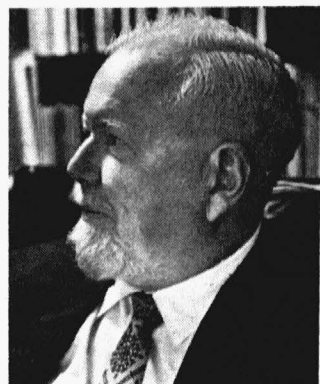

He was the first president of the Council of the Graduate School, which was established in 1951, and in 1954 was the chairman of a committee to study the research activity of the University and make recommendations to the Council. He received the first National Hoblitzelle Award in Agricultural Science in 1951. He was president of the Soil Science Society in 1946. Dr. Marshall has published three books and more than eighty scientific papers.

Irene B. Taeuber

William D. Gwinn

Woodburn O. Ross

Honors for Scholars

Three University graduates who have distinguished themselves by their scholarly attainments were honored during Arts and Science Week. Each received the Citation of Merit, presented by the College of Arts and Science and the University Alumni Association. Dean W. Francis English made the presentations at the Arts and Science Week Banquet in Memorial Student Union on December 8, 1964.

The awards went to: Irene B. Taeuber, Senior Demographer, Office of Population Research, Princeton University; Woodburn Overstreet Ross, Dean, Monteith College, Wayne State University; William Dulaney Gwinn, Professor of Chemistry, University of California, Berkeley.

At the University of Missouri, Dr. Taeuber received her A.B. with distinction in sociology in 1927. She was elected to Phi Beta Kappa as a member of the Junior Five. Her scholarly eminence in her own field, that of world population problems, has been recognized in her election to the presidency of the Population Association of America in 1953-54, as vice-president of the International Union for Scientific Study of Population in 1962, and in the conferring of the honorary Doctor of Laws degree by Taeuber). She has also served as consultant to of Population Research at Princeton since the organization was founded in 1936. Some of her major publications include: *The Future Population of Europe and the Soviet Union* (1943); *The Population of Tanganyika* (United Nations, 1948); *Public Health and Demography in the Far East* (Rockefeller Foundation, 1948); *The Changing Population of the United States* (1958, joint author with Conrad Taeuber).

Dr. Taeuber has also served as consultant to various agencies and organizations concerned with population problems both in the United States and abroad.

Professor Ross received the A.B. degree in 1925 and the A.M. in 1927 from the University. He was an instructor in English here from 1926 to 1928. His Ph.D. was awarded by Yale University in 1935. At Wayne State University he has taught and distinguished himself in scholarly activity since 1936; pre-

viously he had taught at Dartmouth College and the University of North Dakota. In 1958 Wayne State University requested Professor Ross to direct his energies and talents to the problem of creating an Honors College. This resulted in the establishment in 1960 of Monteith College, a distinctive educational program for superior students. He was named dean of the new college in 1963. He continues active membership in Phi Beta Kappa and educational groups.

Dr. Ross' earliest research and publication was in the area of his specialization—Middle English language and literature. His edition of *Middle English Sermons* was published by Oxford University Press in 1940, an edition which has become part of the Early English Text Society Series. His research interests then gravitated toward narrative fiction. This new direction was to produce a number of essays on American and English novelists and short story writers. Dr. Ross gave the principal address at the Arts and Science Week Banquet.

Dr. Gwinn came to the University in 1934 to follow an A.B. curriculum with a group major in chemistry, physics and mathematics. He won the Pi Mu Epsilon examination prizes in both analytic geometry and calculus, and was selected as one of the Senior Five of Phi Beta Kappa. He completed his A.B. work in three years (1937) and took his A.M. degree in chemistry in 1939, completing his Ph.D. in physical chemistry at the University of California in 1942.

Dr. Gwinn's research manifests a rare combination of theoretical and experimental abilities of the highest order. He has developed a research laboratory for study of molecular structure, principally by means of microwave spectroscopy, which is one of the most outstanding in the world. His scientific papers deal with such subjects as statistical thermodynamics of internal rotation in molecules, determination of the complete structure of many molecules; and the precise measurement of the potential energy barriers to internal rotation in molecules.

He has been a Guggenheim Fellow abroad, an Alfred E. Sloan Fellow, a Research Professor of the Miller Institute of the University of California, and associate editor, *Journal of Chemical Physics*.

Dr. Jane E. Dunaway

Dr. Dunaway author of book

Dr. Jane E. Dunaway, (M.D. '05) after fifty-five years of medical practice, including thirty years of psychiatric work, tells of some of her most moving and interesting cases in *Letters From Doctor Jane*. Each letter discusses a different patient, probing into the cause of his mental illness, its treatment and the patient's response. Avoiding technical language, Dr. Dunaway re-creates true stories of human beings with major problems.

"The purpose of these stories," Dr. Dunaway writes, "is to try, just try, to lead a few people to understand what a very thin line there is between the emotionally disturbed who seek help and the remainder of us average, erratic, eccentric, bigoted, biased, superstitious persons who are too arrogant to recognize the fact. The people with whom I've been dealing are just people, usually original, individualistic, never boring, sometimes charming or entertaining and always interesting."

Dr. Dunaway began her medical practice in horse-and-buggy days and continued well into the jet age. She was born in 1879, in Cedar County, Missouri, where she received her early education. For seventeen years she was in general town and country practice in Oklahoma, Colorado and Missouri. After spending five years in Puerto Rico, three of them as head of her own clinic, she returned to the States where she practiced at State Hospital No. 2, St. Joseph, Mo., and Warren (Pa.) State Hospital. Retiring in 1960, she now lives in Bloomington, Indiana.

The 100-page volume is published by Exposition Press, Inc., New York.

Book listings revised

The eighth edition of *100 Books on Advertising* has recently been published by the University's School of Journalism, which offers the booklet free of charge. Edited by Dean Earl F. English, the booklet was compiled and annotated by Robert W. Haverfield, associate professor of journalism. Listed are 65 books that have come on the market since the seventh edition of the booklet was published late in 1960. Since that time there have been 250 additions to the 2,250 volumes on advertising in the Frank Lee Martin Memorial Library at the journalism school, which has a total of 15,000 volumes and is one of the largest journalism libraries in the world.

Chapman book now available

Dean W. Francis English of the College of Arts and Science at the University of Missouri announces the University of Missouri Press now has available copies of a second printing of Number 6 in the College's Handbook Series, *Indians and Archaeology of Missouri* by Dr. Carl H. Chapman, professor of anthropology and Director of American Archaeology, and his wife, Eleanor F. Chapman.

The 161-page paperbound volume is priced at \$1.00 per copy, and may be ordered from the University of Missouri Press, Swallow Hall, Columbia, or through booksellers.

Indians and Archaeology of Missouri covers the cultural development of the Indians of Missouri over the past 12,000 years, and, in the words of the authors in the preface, undertakes "to place specific archeological knowledge in a form that is understandable, usable, and we hope interesting to the reader."

It is profusely illustrated with drawings by Mrs. Chapman of Indian artifacts, Indian types and costumes, scenes of Indian daily-life activities during the period covered, and outline maps. There are also numerous photographic reproductions of Indian archeological sites and excavation work.

Teller lectures published

The Reluctant Revolutionary, a book consisting of the three Paul Anthony Brick Lectures given by Dr. Edward Teller at the University in April, 1963, has been published by the University of Missouri Press.

Dr. Teller dedicated the 71 page book to former President Harry S. Truman, Senator Stuart Symington, and the late scientist, Arthur Holly Compton. The price of the book is \$2.50.

In the first lecture, "The Noble Lie," Dr. Teller attempts to find the proper place of science and the scientist in the world. In his second lecture, "Doomsday," he discusses the great change brought about by the use of nuclear weapons and the threat of future nuclear war and points to the contribution scientists must make in public discussion of this threat. In the last lecture, "The Miracle of Freedom," Dr. Teller says he speaks not as a scientist but "... only as one of 180 million American citizens."

"If freedom is to survive," he says, "it will be by a miracle—the miracle that millions of free and independent human beings can in fact perform. We should establish world order by the slow and safe process of evolution but we don't have the time. It must be done by a revolution. So I am a revolutionary, and a most reluctant one."

Dr. Teller played an important role in the planning and development of the atomic and hydrogen bombs from 1941 to 1951. Since 1953, he has been professor of physics at the University of California. He is co-author of *The Structure of Matter* (1948), *Our Nuclear Future* (1958), and *The Legacy of Hiroshima* (1962).

H. G. E. Fick

Fick heads Doane Service

The new president of Doane Agricultural Service, Inc., H. G. E. Fick, has been with Doane for more than 31 years. He started as farm manager and appraiser in Missouri and Arkansas, later becoming regional manager of the Ames, Iowa office. In 1958 Mr. Fick was appointed manager of Doane's Farm Management and Appraisal Division, and in 1962 he was elected senior vice-president of the company. Mr. Fick received a B.S. in Agriculture degree from the University in 1932.

As president he replaces a classmate, A. J. Berwick, who will continue to serve Doane in the Chicago area, doing public relations, consultation and appraisal work. D. Howard Doane, B.S. Agr. '09, continues as chairman of the board of directors.

Universities sign agreement

State universities in Kansas and Missouri have signed a reciprocal agreement to permit students from each state to attend, without paying out-of-state fees, selected courses in universities in the other state. The agreement becomes effective with the fall semester of 1965.

Under the agreement, Missouri resident students will be admitted, without payment of out-of-state fees, to the School of Architecture and Engineering at the University of Kansas for the program in architecture and the program in Space Science and Technology; to the School of Architecture and Engineering at Kansas State University for the program in architecture and architectural engineering; to Wichita State University for the program in aeronautical engineering; and to Kansas State University for the program in grain milling and technology.

In reciprocation, Kansas resident students will be similarly admitted to the School of Dentistry in the University of Missouri at Kansas City; to the School of Forestry and to the curriculum in forestry and wildlife on the Columbia campus of the University of Missouri; and to the University at Rolla for the curriculum in mining engineering.

"This is an agreement highly beneficial to the students and the educational institutions in both the states, as it provides for quality education at a minimum cost," President Elmer Ellis of the University

of Missouri said. "We have had a similar agreement with the University of Nebraska for several years but because of the rather widely separated locations of the two universities, not many students have been involved. The agreement with the Kansas institutions, however, will result in the participation of hundreds of students.

"Under such reciprocal programs, in the promotion of which the Mid-America State Universities Association is taking an increasing role, one of the participating universities can handle all the students in a particular professional field; the others thereby avoid the necessity of developing curricula in that field, often an expensive procedure. This interchange of students in particular fields increases the educational offerings of each state and leaves more funds for building the quality of education in the programs already offered. It is really a matter of investing funds more efficiently and wisely."

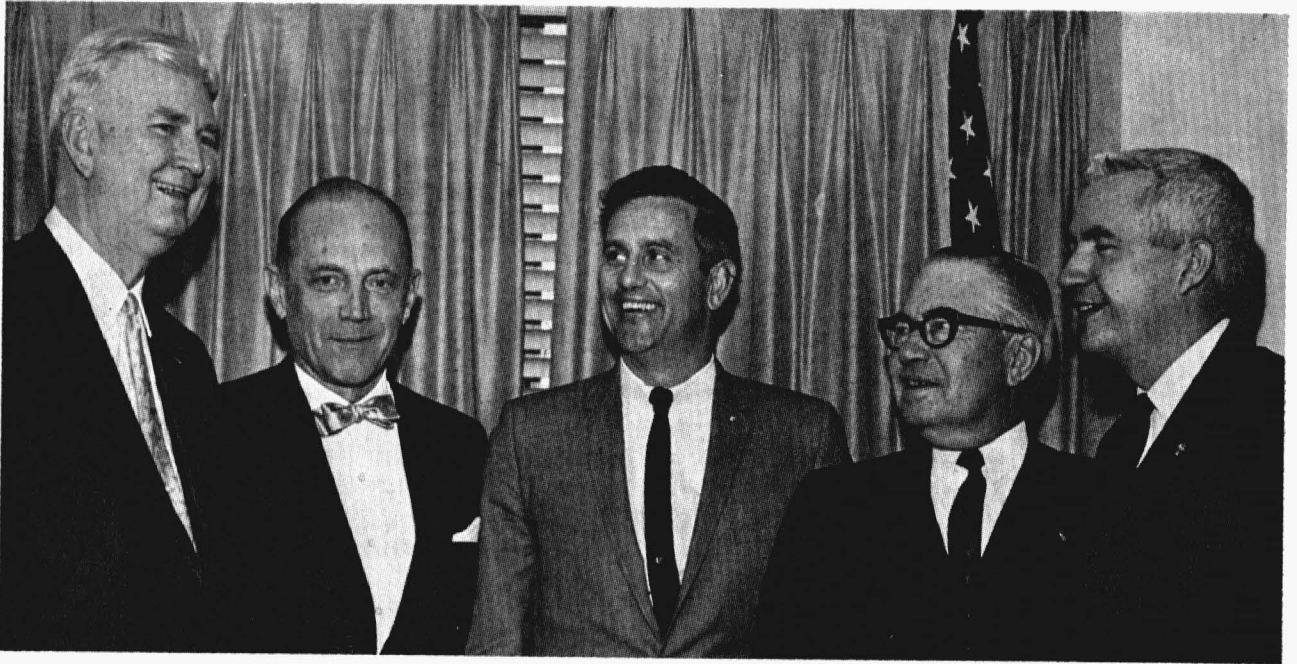

C. M. Brown receives award

Chester M. Brown, president of the Allied Chemical Corporation, was honor guest of the 1964 Christmas Jamboree of the Missouri Society of New York, which presented him its Silver Mule Award, citing him as an outstanding Missourian. Mr. Brown, Arts '29, is a native of Cape Girardeau. He has been with Allied Chemical since 1929. Mr. Brown is an officer or director of the leading trade associations in his field and of various other business and industry associations. Mr. and Mrs. Brown, who live at Hillside, N. J., have a daughter in high school and two sons in college.

Previous recipients of the Silver Mule Award include John M. Dalton, who has just completed his term as governor of Missouri; U. S. Senator Stuart Symington; Eugene J. McNeely, president of the American Telephone and Telegraph Company; Casey Stengel, manager of the New York Mets; and Fannie Hurst, author.

Chester M. Brown (right) and Mrs. Brown looking at the Silver Mule Award he received from the Missouri Society of New York. Looking on is fellow alumnus Hal K. Negbaur, native of Kansas City, who is president of the Missouri Society.

Dale Miller (left) B.J. '30, chairman of the Johnson-Humphrey Inaugural Committee, shown with other M. U. alumni at a luncheon in his honor given by the Washington chapter. With him, from left, are Dr.

Martin Mayes, B.J. '29, of the U. S. Office of Education and president of the Washington alumni chapter; Rep. Richard Ichord, B.S. in B.A. '49, LL.B. '52; Rep. Paul Jones, B.J. '23; Rep. William Hungate, A.B. '43.

Alumnus Dale Miller serves as architect of inaugural

The man back of the planning for the inauguration of President Johnson and Vice-President Humphrey is a well known graduate of the University, Dale Miller, a 55-year-old Texan who is a long-time friend of the Lyndon B. Johnson family.

Working under Miller for the big event on January 20 were 100 paid staff and about 1,000 volunteers. For nearly three months they wrestled with myriad details and daily new problems connected with what Miller calls the "unbelievably intricate apparatus" of an inauguration. And their work wasn't finished after the ceremonies, for all the things that were carried to Washington had to be carried out again.

Miller, prominent Washington lobbyist, was appointed to his job three days after the November election. The New York Times describes him in this way: "The inaugural chairman is a placid man, bright-eyed behind his spectacles. His wavy gray hair is parted just off center, which gives him the old-fashioned air of a barbershop quartet warbler without handlebar mustache. With his trimmed-down cowboy hat, plunked on his head, he looks more like a Texas businessman."

Miller received a B.J. degree from the University in 1930. Last month he was guest of honor at a luncheon given by the University Alumni Association of Washington, D. C.

From Columbia he went on to the University of Texas to earn a master's degree. A schoolmate at Austin was Mrs. Lyndon B. Johnson, then Claudia Alta Taylor. "She was my schoolmate, not classmate,"

Miller points out. "She was an attractive young freshman when the university was trying to evict me with a master's degree."

Miller was an editorial columnist for the Corpus Christi Caller and later worked for The Texas Weekly, a magazine of editorial comment on economic and political news. He took time out for a year to be press director of the Texas Centennial celebration of 1936, and then returned to the magazine. Twenty-four years ago the Dallas Chamber of Commerce sent Miller to Washington to represent its interests. He now also represents the Texas Gulf Sulphur Company, Intracoastal Canals Association and the Port of Corpus Christi.

Mrs. Miller is the former Virginia Treadwell of Dallas. She is an intimate friend of Mrs. Johnson and is known to everyone by her nickname, dating from childhood, of Scooter. The Millers' oldest child, Marta Ross Miller, 22, works in the White House office of Elizabeth Carpenter, Mrs. Johnson's press secretary and staff director. There are two other children, Dale Miller, Jr., 20, and Mead Miller, 17.

For the second straight year, the University of Missouri ranks 13th among 1,111 accredited universities and four-year colleges in the 50 states and Puerto Rico in the total enrollment of full-time resident students. Two years ago, before development of the four-campus University System, the University ranked 15th. Last semester the four campuses had a total of 27,418 students regularly enrolled.

Ned Monsees pleases fans

Missouri's basketball patrons have discovered a new hero this winter—husky, hard-trying Ned Monsees, a refugee from intramural ranks.

As Coach Bob Vanatta's surprising scrappers paused for their mid-season session with final exams, they had logged a 7-6 record for all games and were 2-1 in Big Eight action. Standing tall in the Black and Gold's hustling lineup was Monsees, a 6-4 and 220-pound senior who played his high school basketball at Smithton, Mo.

Through 13 games, his personal scoreboard showed Monsees averaging 16 points and 13 rebounds per game for the juiced-up Tigers. Beyond the bare statistics, though, this aggressive senior epitomized a thin squad's all-out effort and determination—most evident in upset wins over St. Louis U., Oklahoma State, Colorado and Kansas State.

Monsees jarred the fourth-ranked Billikens with a 24-point night and hawked 15 rebounds in one of the finest, all-around performances ever by a Mizzou cager. He had a career high of 32 points against Rice, set a school one-game record of 24 rebounds in a tournament loss to K-State, and collaborated with George Flamank in a 21-point burst to end the Cats' eight-year domination in an 80-68 televised victory.

Ned is a particular favorite with Mizzou's students. To them he's been "one of our boys" ever since Coach Vanatta drafted the rough-cut nugget from the intramural leagues two years ago to beef up his injury-riddled squad.

So last December, when Monsees won a spot on the pre-season tournament's first team in Kansas City, his was a personal triumph vicariously shared in by all students who ever participated in M.U.'s intramural basketball program.

As a part-time regular last season, the brawny recruit averaged just 5.1 points a game. Tripling that production this winter, Monsees is the league's most improved player, and a big reason why the inspired Bengals can't be counted out of the conference race.

To be a real factor, the Tigers—unbeaten on the Brewer court so far—must find the winning formula away from home.

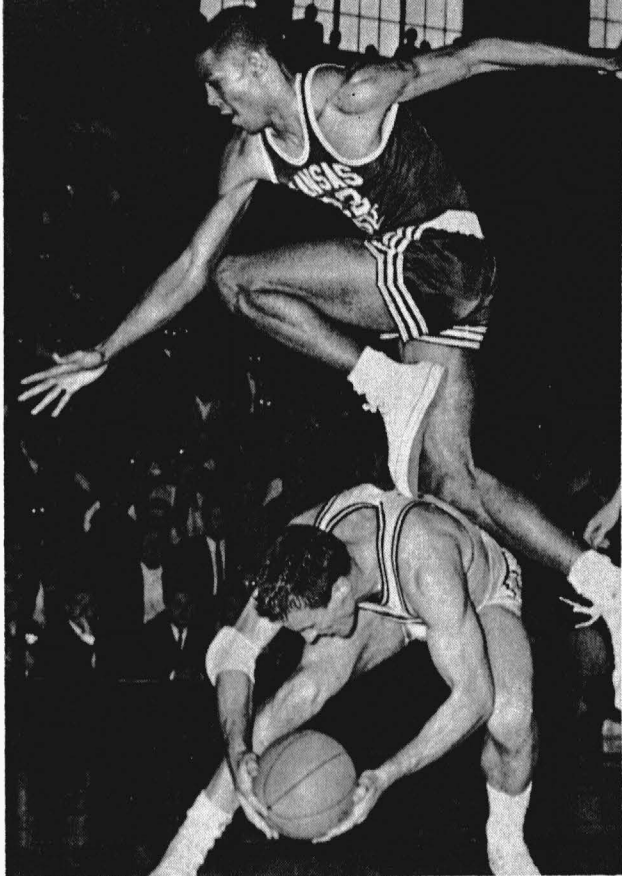

Three track champs back

Missouri goes into the 1965 indoor track campaign with three defending champions back from a year ago.

The carry-over standouts are: Robin Lingle, mile and 1000; Charlie Conrad, 880; and Gene Crews, shot put. Of this group, Conrad—who won the conference outdoor mile—must regain his eligibility for the second semester.

Coach Tom Botts also can count on a pair of talented seniors—halfmiler Bill Rawson and hurdler Cal Groff—for point-winning roles. Rawson will double in the 600-yard dash.

Sophomore help? Best of the rookies should be Steve Herndon, a high-jumper who spanned 6-10 in

Columbia Missourian photo

Rugged Ned Monsees holds on to the ball as Kansas State player negotiates nifty high hurdle maneuver.

mid-January, and a couple of football halfbacks—Charlie Brown and Earl Denny. Newcomers will add more depth to the middle distance races as well.

Brown is a sprinter-low hurdler—who tied the Brewer field house record for all comers with a :06.8 clocking over the lows as a freshman. Denny is a broad-jumper with 24-foot potential.

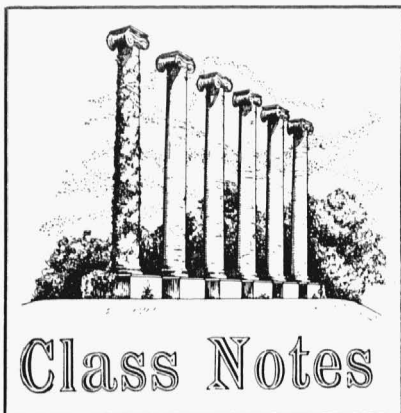

The Bengals won the indoor championship last year, and placed fourth outdoors. Key losses off that squad were: Bill Younger, pole vault; Bob Neuman, outdoor shot put king; Ricky Beldner, indoor 60-yard winner; and Ross Tunnell, high-jumper who was lost before Christmas with a knee injury.

Plaque for first cagers

A plaque commemorating Missouri's 1906-07 basketball squad, first in the school's annals, now is on display in the corridor of Brewer Field House.

Donated by Miss Ester Bernet of Webster Groves and the Bernet family, the bronzed plaque was officially unveiled by Prof. Arthur W. Nebel, chairman of the committee on Intercollegiate Athletics, on January 16. Miss Bernet's late brother, Fred, was a member of that pioneer Tiger team.

Present at the unveiling ceremonies were: Chancellor John W. Schwada; Don Faurot, director of athletics; Wilbur Stalcup, assistant director of athletics; Harry Ice, administrative assistant in public relations; and H. A. (Zeke) Henley of Columbia, a member of the original squad. One other surviving player, William Stava of San Francisco, could not be on hand.

ican Science." These included the electrification (thus increased production) of Carneys Point Powder Mill; replacing a platinum catalyst, for Old Hickory Powder Mill, when the world's supply of platinum was exhausted; and ten years of work converting railroads from steam to electric locomotives. Mr. Reeves, a member of the Indiana Academy of Science, has four children: Charles, Helen, James and Kathryn.

08 Dr. J. C. SNYDER, BS Ed., AB, writes that he has located two old friends (also former M.U. track men): HARRY C. KENDALL, BS EE '04, 3058 S. W. Fairview Blvd., Portland, Ore., and C. R. BENDER, AB, now living on R.F.D. 3, Hillsboro, Mo. Snyder and Kendall are among the five living members of Kirkwood (Mo.) High School's original 12 in the class of 1900. Dr. and Mrs. Snyder, who live at 4409 Lowell Ave., La Crescenta, Calif., have a son, two daughters, and six grandchildren. Son Conway is a nuclear physicist on the Mariner projects at Cal Tech's Jet Propulsion Laboratory. One daughter lives in Sewanee, Tenn., the other teaches at Calimesa, Calif.

10 Dr. HARLOW SHAPLEY, AB, AM '11, LL.D. '27, a native of Nashville, Mo., gave two lectures on "Man and the Galaxies" at the McDonnell Planetarium in St. Louis (Mo.) in November. Dr. Shapley, who lives on Sharon Cross Rd., Peterborough, N. H., is the retired director of the Harvard College Observatory.

12 A life-size portrait of Emeritus Professor LESLIE B. HOHMAN, AB, was recently presented to Duke Medical Center by the Duke University Department of Psychiatry. Active for the past four years as consultant to the psychiatry department at Duke, Dr. Hohman formally retired from its faculty in 1960. Nationally known as a leader in the field of cerebral palsy, he has served as president of the American Academy for Cerebral Palsy, the American Psychopathological Association, and the North Carolina Society for Crippled Children and Adults. He lives at 1520 Hermitage Ct., Durham, N. C.

The *Alumnus* has been keeping you up to date on the travels of HENRY KINYON, AB, BJ, in recent months. He returned in late November to his home at Candle Light Lodge, Columbia, Mo., following a trip around the world. After an extended visit in England with his daughter, Mrs. Robert Fisher (RUTH KINYON, BJ '38) and her husband, and a 16-day Mediterranean cruise in mid-August, Mr. Kinyon left London on Oct. 17 for Cairo, Colombo, Hong Kong, and Tokyo, with generous stop-overs at each place. He spent two weeks in Tokyo,

where in the 1920's he worked on the Japan Advertiser and started the *Trans-Pacific* magazine. While there, he visited with an old friend, Seihei Okuyama, who in the 20's was a clerk in the Advertiser office and is now president of Tokyo News Service, publishers of the daily Shipping and Trade News and several other papers and magazines. He also saw GLENN "Skip" TROELSTRUP, BJ '57, and took a trip to the capital of Missouri's Sister State in Japan—Nagano. He spent three days in Honolulu, where he visited LLOYD R. KILLAM, Arts, Educ., Grad. '12, and his wife, the former SADIE CRAIG, AB '10. Mr. Killam is now retired from YMCA work and owns a laundry business in Honolulu, where he lives at 802 Kapiolani Blvd. In Claremont, Calif., Mr. Kinyon saw former classmate RALPH PRYNE, BJ '13. Mr. Pryne, who

Mr. Kinyon (left); Mr. Okuyama

lives at 580 W. 10th St., was president of the Pryne Manufacturing Co. in Pomona, Calif., which merged some years ago with Emerson Electric to become the Emerson-Pryne Co. Although retired from the board of directors of the latter firm, he continues to serve the company in an advisory capacity.

13 JOSEPH J. GRAVELY, AB, AM '15, is senior partner in the law firm of Gravelly, Lieder & Woodruff, with offices at 705 Olive St., St. Louis, Mo.

14 ERNEST HERMAN WIEGAND, BS Agr., was one of three recipients of Distinguished Service Awards at the University of Oregon, in October. These awards, which OSU granted for the first time, acknowledged the recipients' contributions to their fellow men. Prof. Wiegand, a member of the OSU faculty for 33 years, was cited as the originator of one of the

88 Mrs. LEORA GRAVES Burroughs, PE.P., observed her 98th birthday anniversary on Nov. 30. Now living in a retirement home for teachers at 3400 S.W. 103rd Ave., Beaverton, Ore., Mrs. Burroughs keeps in contact with members of her family through active correspondence. A native of Woodlandville, Mo., she taught school in Boone County (Mo.) for several years after her graduation from M.U. During World War I, while her son, Dr. TRAVIS BURROUGHS, AB '16, was overseas with the Army, she was chairman of the Red Cross Auxiliary in Rocheport, Mo. Dr. Burroughs has retired from his duties with the U. S. Department of Health and lives at 1540 Jackson, Oakland, Calif. He has three children.

04 NORMAN C. BARRY, LL.B., a senior member of the Oklahoma Bar Association, is now retired and living at Gravette, Ark., where his address is General Delivery.

06 F. HINER DALE, LL.B., has been commissioned a "Kentucky Colonel" by the Governor of Kentucky. Judge Dale is an attorney with offices at 1906 Dale Bldg., Guyton, Okla.

07 The life work of JAMES A. REEVES, BS EE (a self-termed "hayseed farmer"), was largely in the scientific field before he retired and moved to a 90-acre farm on Rt. 2, West Terre Haute, Ind. He joined Westinghouse as an electrical engineer in 1907; eight years later he accepted a similar position with duPont in Wilmington, Del. A native of Joplin, Mo., Mr. Reeves returned to his home state in 1921 to accept a position with the Kansas City Power & Light Co., where he remained a year before going to the Harlem Valley Electrical Co. in Brewster, N. Y. Subsequent employment was with companies in Alabama, Illinois, and Wisconsin. He spent three years designing, building, and operating 22 duPont plants during World War I, and during World War II designed and built three war plants. Accomplishments in the scientific field earned Mr. Reeves a place in "Leaders in Amer-

first major courses in food technology in the world at the university, and as father of America's maraschino cherry industry. One of the nation's most far-seeing pioneers in food science and technology, he has been sought out by food industry leaders and students for counsel on processing of fruits, vegetables, nuts and sea foods. He also has been a leader in the development and promotion of food processes. Prof. Wiegand lives at 302 N. 29, Corvallis, Ore.

North China Daily News as Woman's Editor. She also contributed articles to several U. S. papers on special occasions. Just before her marriage, Mrs. Edes worked on the Manila (Philippines) Bulletin for two months. Also on the Bulletin at that time was ROY BENNETT, BJ '14, now living at 4170 Elmer Ave., North Hollywood, Calif. Late in the '50's Mrs. Edes contributed articles to the Daily Oklahoman, written from London. Now widowed, Mrs. Edes lives at 104 Riverview Gardens, London, S.W. 13, England.

Garland
Russell

16 JESSIE ALICE CLINE, BS Ed. '15, AB, AM '25, has moved back to her home in Columbia, Mo. after an 11-year stay in Chicago, where she owned the Blair House Restaurant. She has purchased Smiley's Cafeteria in Columbia. Miss Cline, a former professor of home economics at the University, has been a partner in the Myron Green Cafeteria in the Mission Shopping Center, Kansas City, since 1957. She says she plans to remain in Columbia indefinitely as she has no business interests now in Chicago.

23 E. LINDSEY BUSH, BS Agr., operates a Chevrolet agency in Melbourne, Iowa (Box 382). He and his wife have two grown daughters, Susanne and Mary.

JAMES S. PATTON, AB, BJ '24, is a feature writer for Arizona newspapers, and lives at 1655 W. Bentley St., Mesa, Ariz.

Mrs. E. W. J. Olson (INEZ HODGE), BS Ed., was selected as Teacher of the Year by the Los Angeles High School Alumni on Teachers' Remembrance Day last June. Mrs. Olson retired after 39 years of teaching, 36 at Los Angeles High School. The award is unique in that it is bestowed on retired teachers only. Mrs. Olson lives at 925 S. Dunsmuir Ave., Los Angeles.

17 The Alumni Office has acquired gift copies of the 1915, 1916, and 1917 Savitars from Mrs. J. C. Clasper (EVA ROBERTA KELLOGG), Arts, Educ., of 9351 Winchester Ave., Chicago, Ill. Mrs. Clasper was the only woman president of the Chicago chapter of the University Alumni Association when it was first organized many years ago. She served three terms. Her two uncles, Dr. Oliver D. Kellogg and Dr. E. W. Kellogg, were former members of the University engineering faculty.

24 JESSE "Jake" HUNTER, BS Agr., AM '25, Ph.D. '28, is vice-president of Allied Mills, Inc., of Chicago, Ill. As an undergraduate, he held memberships in Sigma Xi, Alpha Chi Sigma, Alpha Gamma Sigma and Gamma Sigma Delta. He and his wife, the former ELIZABETH LUCILE DUNCAN, AB '22, live at 220 Vine Ave., Highland, Ill.

21 E. H. NEWCOMB, BS Ed., AM '22, is founder and director of the Kansas City Town Hall Forum, 1016 Baltimore, Kansas City, Mo. Now in its 25th season, two program series are being offered this winter—the Concert Masterpiece Series featuring ballet, music, drama, concerts and opera; and the Travel and Adventure Series of fifteen travelogs in natural color motion pictures of many lands around the world.

25 JOHN SAM WILLIAMSON, BS Agr., a farm leader living on RFD 4, Columbia, Mo., has been named a director of Producers Live Stock Marketing Association. He served as commissioner of agriculture for Missouri from 1957-61 and was a member of the board of directors for the Missouri Farm Bureau Federation for 17 years, including a ten-year tenure as vice-president. Producers' headquarters are at National Stock Yards, Ill.

Dr. JOSEPH W. GALE, AB, 2 yr. Cert. Med., AM '22, reports an address change to 126 Marinette Trail, Madison, Wis. He and his wife, Marion, have two daughters, Christina, 22, and Margaret, 19.

22 The University and their college days provided the subject of conversation when Mrs. L. B. Edes (LOUISE WILSON), BJ, and HENRY KINYON, AB, BJ '12, met aboard ship this summer, while both were on a Mediterranean cruise. Mrs. Edes moved to England to make her home at the time of her marriage in 1929. In 1925, she worked for the late J. B. POWELL, BJ '10, LL.D. '45, on the China Press and China Weekly Review, then transferred to the

American Meat Institute in 1954, and also was a member of the Lamb Industry Committee and the U.S.D.A. Defense Meat Board. He served on the O.P.A. Advisory Committee during World War II. A member of several committees in St. Louis, Mo., he is also a trustee of McKendree College, Lebanon, Ill., and chairman of its finance committee. He and Mrs. Russell (EMILY JOSLYN, BS Ed. '26), have a son who is an officer of the Federal Reserve Bank in St. Louis.

26 RALPH B. COWAN, BJ, has been a Liberal member of the Canadian House of Commons since June, 1962. Before that he had been employed with the Toronto (Canada) Star for 36 years, most recently as assistant circulation manager. He lives at 55 Humberview Rd., Toronto 9, Ontario, Canada.

OSCAR W. MEIER, BS Ag.J., operates a farm in Montgomery County, Md., where he raises Angus cattle. He also serves as president of the Pan Con Development Co., Washington, D. C. He and his wife (MARJORIE LINAHAN, Journ., Arts '27), have two grown children, and live on Rt. 1, Clarksburg, Md.

HERBERT A. BIRMINGHAM, AB, is employed in the sales department of Viking Fire Protection Co., Kansas City, Mo., where he lives at 829 W. 53rd St.

27 VERNUS N. PYLE, BS Engr., a civil engineer in Belleville, Ill., has published a book of verse written by him and his late father, W. H. Pyle. The latter was a professor at the University from 1909-26. The book is titled "Rhymes of the Hinkson by William Henry Pyle and Other Poems by Vernus Noble Pyle." Pyle, who has worked for railroads and most recently for the Illinois Highway Department, is the author of three books, and a great many of his poems have been published in newspapers. A native of Columbia, Mo., Mr. Pyle lives at 101 Clearview Dr., Belleville.

R. W. PATTON, Engr., assistant chief in the division of surveys and plans, Missouri Highway Department, Jefferson City, has been named district 3 engineer at Hannibal, Mo. A native of Seneca, Mo.,

he has been with the department almost 34 years. He and his wife have moved to Hannibal, where they live at 4036 Sunset Dr.

LORIN W. HOYT, BS Agr., heads his own building firm, Hoyt Enterprises, Inc., at Midland, La. He is married to the former EVA LORRAINE PERSINGER, Arts; they have two grown daughters. The Hoyts' Midland address is P.O. Box 94.

R. L. ACUFF, Arts, Engr., assistant postmaster at Columbia, Mo., retired Dec. 30 after 38 years of service with the Post Office Department. A native of Salem, Mo., Mr. Acuff went to Columbia in 1925 and began working at the post office there in 1926. Before his appointment as assistant postmaster in 1954, he was the night foreman. He lives at 920 W. Broadway, Columbia.

28 FRANCIS L. ROACH, LL.B., has been re-elected president of the Kansas City Association for the Blind. Roach, a lawyer, who lives at 1024 Romany Rd., Kansas City, has served one 1-year term as president.

R. E. "Rod" GILLETTE, BS Ed., AM '31, and his wife, weary of snow and ice and leading the life of nomads, moved to Florida in 1950. A year later he joined the sales staff of Trafford Realty Co., Cocoa, Fla., and continues to devote full time to this work. Mr. Gillette, who also holds a Ph.D. degree from New York University, had 15 years of organizational experience with the American National Red Cross, and four years with the Navy during World War II, before choosing real estate as his life's career. The Gillettes' address is RFD #3, Box 465, Merritt Island, Fla.

Mrs. Jack R. Kintzi (DORA ALICE DRYDEN), BS Ed., a retired teacher, made an interesting trip to the Orient last summer under the auspices of the People to People program. She also visited California's Sister State in Japan—Wakayama. Mrs. Kintzi, who lives at 1404 Yorba Linda, Kern City, Calif., has a daughter and a son, Mrs. Joan Kintzi Maraccini and John D. Kintzi.

29 L. V. TAYLOR, AB, AM, '31, director of Food Sciences for the Gordon Johnson Co., Kansas City, presented a poultry seminar lecture at the University in November. He spoke on the Poultry Equipment Business Around the World. Mr. Taylor lives at 9725 Cherokee Lane, Leawood, Kan.

30 BRUCE PALMER, Journ., news director for station KWTW, Oklahoma City, Okla., has been elected president of the Radio and Television News Directors Association, an organization of more than 800 radio and television news directors from the

U.S. and Canada. Palmer, KWTW news director since it began broadcasting in 1953, is a veteran of more than 34 years in the news business as a reporter, editor, newscaster, and public affairs analyst. Earlier in his career he was employed with the Daily Oklahoman and Oklahoma City Times, the Minnesota Associated Press, WKY radio and television, and served on the faculty of the University of Oklahoma School of Journalism. Immediately before joining KWTW, Palmer served two years as press attaché and information officer for the U.S. Information Service in Ceylon. He is past president of the Oklahoma Professional Chapter of Sigma Delta Chi, and has been vice-president for television of the Radio Television News Directors Association. The KWTW news department has been honored with awards from the Oklahoma chapter and the national organization of Sigma Delta Chi, and by United Press International of Oklahoma with five of eight awards in 1962, and six of nine awards in 1963. The KWTW Editorial, prepared and written by Palmer, won the 1963 RTNDA award for broadcast editorializing. He lives at 2316 Belleview Terr., Oklahoma City.

WHAT COSTS

**1/3 LESS TODAY
THAN 30 YEARS AGO?**

ELECTRICITY DOES! The average price a kilowatt hour is 1/3 less now than it was 30 years ago.

So, if your electric service bill is more today, it's simply because you are using more electricity . . . and the amount you pay is for a two-months' period of time! Divide your two-months' bill by 60. See how little it costs a day to provide comfort, convenience and better living for your entire family!

KANSAS CITY POWER & LIGHT COMPANY

REGINALD E. AUSMUS, Jr., AB, AM '60, teaches history at Black Foxe Military Institute. He and his wife, the former LILA MORRIS, Arts '52, live at 4555 Matilija, Sherman Oaks, Calif.

SUSANNE B. KIRK, Ph.D., is assistant professor of Spanish at Keuka College, Keuka Park, N. Y.

“I like my present job, but...”

If you've said this, or even thought it, you're like many men. Their first years have been marked with success and advancement, but now they feel as if they are on a "plateau" in their career progress. They find themselves vaguely dissatisfied — unchallenged — and see themselves not fulfilling as large a role as they KNOW they can fill.

Men like these frequently feel that they would do much better if they were working for themselves. But they are often unsure how to make the break into such work.

If you feel this way, consider a future working for yourself *and* Mass Mutual.

It is a career where you meet interesting people, earn a good income and reap financial benefit in direct proportion to effort expended. And above all, it offers a feeling of real accomplishment that comes with knowing that

you have contributed to the future happiness and well-being of many, many people.

To find out what the opportunities would be for YOU just write a personal letter about yourself to Charles H. Schaaff, President, Massachusetts Mutual, at Springfield, Mass. (Be sure to tell him in what area of the United States you would most like to live and work.) It could be the most important letter you ever wrote!

**MASSACHUSETTS MUTUAL
LIFE INSURANCE COMPANY**

SPRINGFIELD, MASSACHUSETTS • ORGANIZED 1851

HIGH STYLIST

Designing woman? Yes indeed, but in a most admirable sense. As a member of the General Motors design team, she is preparing sketches of a steering wheel for a future GM car. Like her male associates on GM's Styling Staff, she is fully qualified and competent to design consumer products in any field.

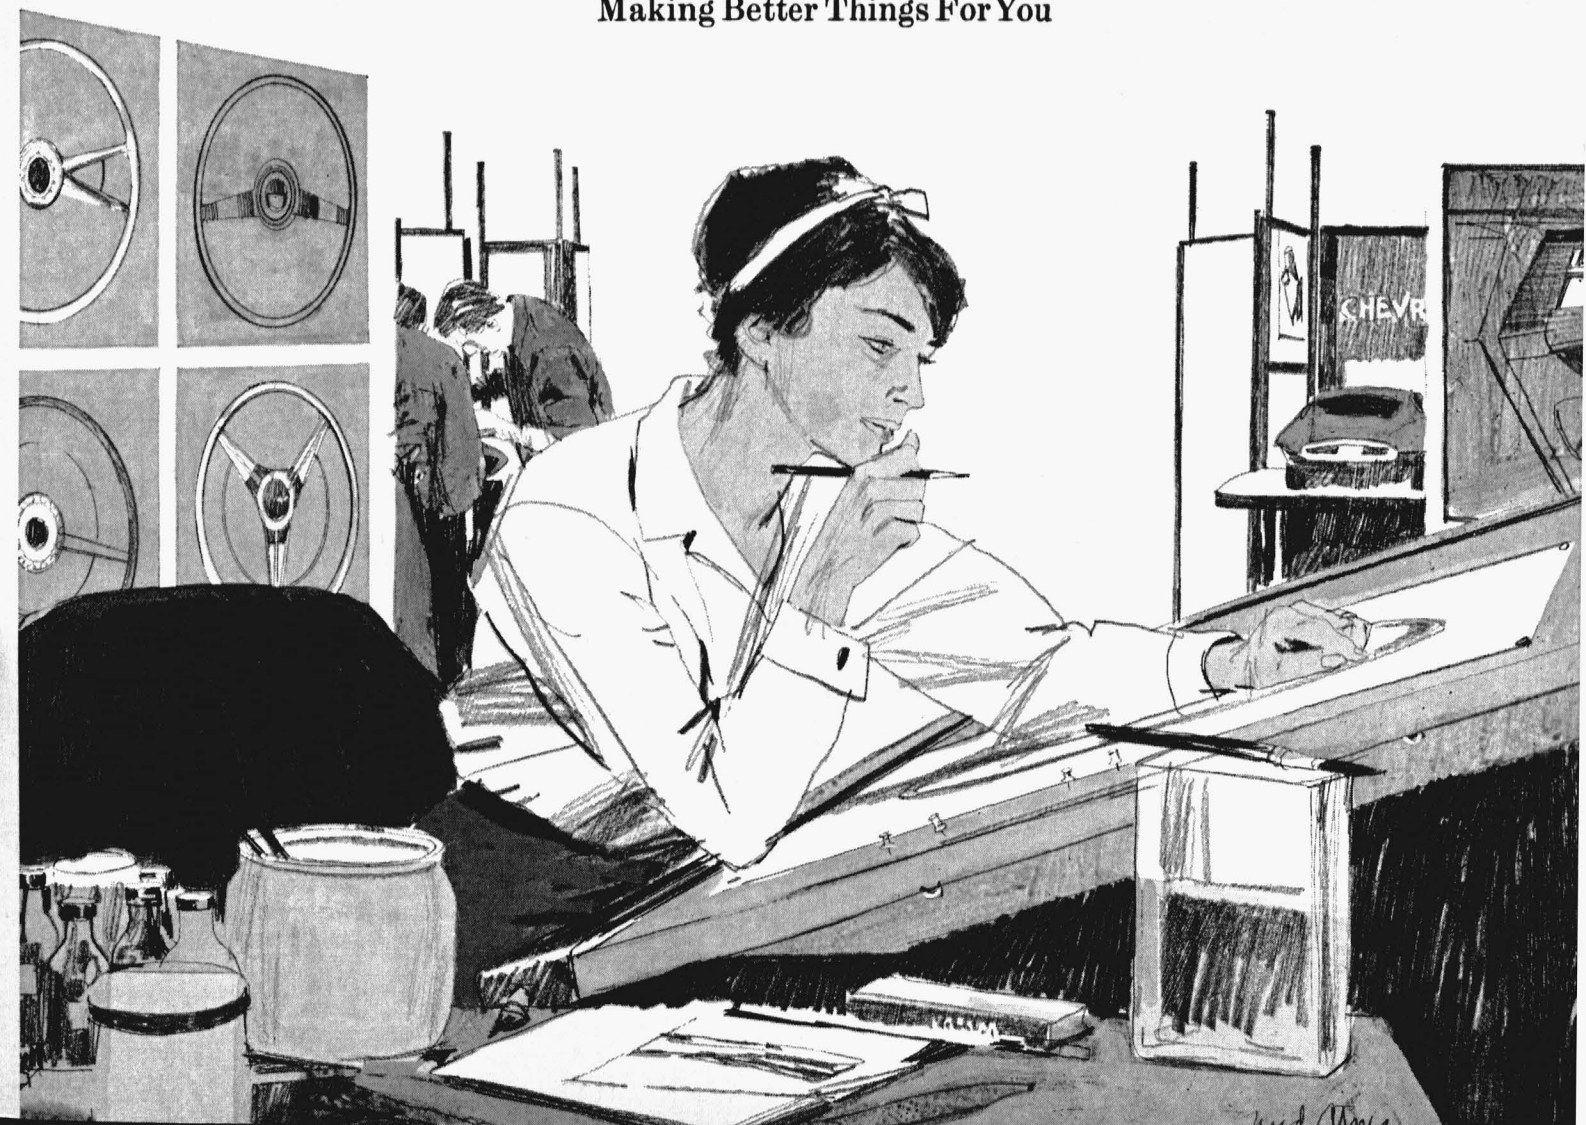

General Motors hired its first woman designer more than 20 years ago. Originally color and fabric consultants, the young ladies advanced rapidly to full membership in a group effort which now involves the skills of hundreds of people in GM Styling. In the past two decades, the feminine influence has changed many concepts of automotive design.

Women designers have contributed to the development of interior convenience features, safety items and such innovations as color coordination of interiors with exteriors and particular fabrics to suit women's tastes. Many a man, too, is grateful for these and other feminine contributions.

The role of women in designing beauty, utility and quality into GM products is more important than ever before.
