## HONOR RANK LIST for 1947-48

This is the twenty-fifth honor rank list published in accordance with a vote of the Faculty of the College of Arts and Science.

The rating is determined by giving to each hour of E a value of 400, to each S a value of 300, to each M a value of 200, to each I a value of 100, and to each F a value of 0, and dividing the sum by the number of hours taken.

### *Graduation With Distinction*

Students may receive the degree of Bachelor of Arts with Distinction in the subject in which their major lies, under conditions that vary somewhat in different departments. In most departments the candidate must pass with a distinction a special Comprehensive Examination on the entire field of his specialization (major and minor) at the close of his senior year. The object of the examination is to test the candidate's grasp of the subject as a whole. Readings or other assignments are prescribed and the departments advise the candidates either individually or as a group. For work done in preparation for his examination outside his regular courses the candidate may be allowed not to exceed three hours of credit in each semester of his senior year. Those who enter for Distinction but fail to achieve it will be given such grade upon the number of hours for which they have enrolled in the special work as their showing in the special examination justifies.

In the department of mathematics the requirements for Graduation with Distinction do not include a Comprehensive Examination. The candidate has the privilege of enrolling in the departmental seminar and in the Mathematics Club, and must present two acceptable papers before the club in the course of his senior year.

Students wishing to work for Distinction in any subject should consult their adviser when they make out their major and minor schedule. They may apply for candidacy at the beginning of their junior year; and their candidacy must be approved by the department not later than the third week of their senior year.
