2019 MOBIUS Annual Conference
Session abstract

From WorldShare Management Services (WMS) to the Digital Collection Gateway to the new Library 100, OCLC products and services continue to expand and to provide opportunities for increasing access to library collections. Presenters will give overviews of: 1) Major OCLC products, such as WorldCat Management Services and the Digital Collections Gateway; 2) Products OCLC has created using WorldCat metadata, such as WorldCat Identities and The Library 100; and 3) Other good-to-know OCLC activities and services that support libraries. Rather than giving an in-depth description for any one service or product, this will be a quick overview and introduction to several, with pointers to additional information.
OCLC System Alert: Planned maintenance for multiple services – March 6, 2019

WorldCat

“WorldCat brings together valuable information about collection items, electronic resources and the libraries that make them available.”

- bibliographic catalog
- knowledge base
- registry of library profiles

“WorldCat is the world's largest network of library content and services. WorldCat libraries are dedicated to providing access to their resources on the Web, where most people start their search for information.”
Inside WorldCat

• Bibliographic records
  • 449,588,069 as of April 2019
  • WorldCat grew by 7.28% between April 2018-April 2019
  • Source of bibliographic records for items published since 2010
    • 62.25% - OCLC and member libraries
    • 21.80% - National libraries
    • 13.22% - Vendors/publishers
    • 2.73% - Library of Congress
  • 2,768,437,518 – Number of holdings
  • An ILL request is filled every 1.4 seconds

National libraries

National libraries all over the world share their collections through WorldCat. This allows libraries everywhere to connect people with information about many cultures and national identities.

WorldCat.org
WorldCat.org

• Provides web access to the bibliographic records in WorldCat
• Features
  • Multiple search options; facets for refining results
  • Search results organized by works, with a useful view of editions and formats
• Find nearest library with holdings *
• Find and request an item through one’s own library
• Find links to various services
• Users can set up accounts to access several functions

“On August 8 [2006], we launched the WorldCat.org Web site. It offers a search box that people can download and use to search the more than 70 million records and 1.1 billion location listings in WorldCat. For the first time, collections in OCLC member libraries are now visible on the Internet to people everywhere. This is one of the signal achievements in the history of the OCLC cooperative.” (2005-2006 OCLC Annual Report)

The firm: a novel

Author: John Grisham

Summary: "When Mitch McDeere signed on with Bendini, Lambert & Locke of Memphis, he thought that he and his beautiful wife, Abby, were on their way. The firm leased him a BMW, paid off his school loans, arranged a mortgage, and hired the McDeeres a decorator. Mitch should have remembered what his brother Ray--doing fifteen years in a Tennessee jail--already knew. You never get nothing for nothing. Now the FBI has the lowdown..."

**Crossroads**
by: Ronnen, Tal

"Reinventing plant-based eating is what Tal Ronnen is all about. At his Los Angeles restaurant, Crossroads, the menu is vegan, but there are no soybeans or bland seitan to be found. He and his executive chef, Scott Jones, turn seasonal vegetables, beans, nuts, and grains into sophisticated Mediterranean fare—think warm bowls of tomato-sauced pappardelle, plates of spicy carrot salad, and crunchy flatbreads piled high with roasted vegetables. In Crossroads, Ronnen teaches readers to make his recipes and proves that flavors we crave are easily replicated in dishes made without animal products. With accessible, unfussy recipes, Crossroads takes plant-based eating firmly out of the realm of hippie health food and into a cuisine that fits perfectly with today's modern palate. The recipes are photographed in sumptuous detail, and with more than 100 of them for weekday dinners, snacks and appetizers, special occasion meals, desserts, and more, this book is an indispensable resource for healthy, mindful eaters everywhere,"—Amazon.com.

Arborglyph Database

About this collection

Arborglyphs, rock art-like tree carvings, called arborglyphs, while varying in remote areas throughout states during the twentieth century. Some arborglyphs rooted for communication, usually to raise their mark on the world around them. Usually written in basque or spanish, these arborglyphs record features, names, thoughts, and drawings, and often represent the only historical data about arborglyphs. Arborglyphs served almost exclusively on trees. As the trees grew, they turned themselves and black stump formed visible designs. On average ages five to ten years, consequently, most of the oldest arborglyphs have already been lost. The threats of blow, fire, and vandalism accelerated the need for arborglyphs to be documented. The tree carving tradition began with the basque and continues today by writers from central and south america, most often from Peru and Chile. - Written by Judith Hent.
Digital Collection Gateway

- Originally developed to work with CONTENTdm and is designed to integrate digital collections metadata into WorldCat
- Works with any digital collections platform that is OAI-PMH compliant
- Relies on Dublin Core mappings which are then translated to MARC
- Unique mappings can be created for individual collections
- Individual records cannot be edited from the Gateway interface
- After initial harvesting, the process can be highly automated

ArchiveGrid

• Provides access to archival materials from over 1,000 institutions
• Primarily populated from WorldCat; records are selected using various filters
• For institutions who are not contributing MARC records, ArchiveGrid can harvest finding aids in various formats (EAD, PDF, or HTML)
• ArchiveGrid has a close connection to OCLC’s research activities; it is used to experiment with discovery system features as well as to support data analysis and text mining research

Cataloging and knowledgebase tools
Record Manager

- A cataloging utility similar to Connexion
- Will eventually replace Connexion at an unspecified date
- In addition to LC names and subjects, available subject vocabularies for searching and display include Canadiana, GND, Maori subject headings, MeSH, and NTA names
- Offers the ability to create local bibliographic data and edit this data in bulk

Record Manager
Collection Manager

- Allows libraries to maintain WorldCat holdings and provide access to electronic resources
- Collection Manager offers several workflows that can be implemented according to a library’s needs
  - Knowledgebase collections—manages electronic resource holdings and provides catalog records
  - Query collections—provides catalog records according to specific criteria
  - Cataloging partner collections—supplies catalog records based on information provided by vendors
  - DataSync—keeps WorldCat holdings up to date
  - WorldCat updates—provides updated catalog records based on changes to master records; criteria can be selected locally

WorldCat Search API
Search WorldCat and receive bibliographic records for cataloged items, information about libraries that own the items and links to online catalog records when available.

WorldCat Registry Search
Retrieve basic information about multiple or single libraries or consortia, based on institutional profiles in the WorldCat Registry.

WorldCat Registry Detail
Retrieve detailed information about a single library or consortium, based on its institutional profile in the WorldCat Registry.

xISBN
Retrieve a list of International Standard Book Numbers (ISBNs) for a book, allowing end users to review other editions of that item.

xISSN
Get information about serials, including predecessor and successor and alternate ISSN and titles.

OpenURL Gateway
Direct Web users to full text and other online resources at an appropriate library based on the user's IP address.
WorldCat search plug-ins

- Facebook
- Firefox

https://www.worldcat.org/toolbars/default.jsp
Create a WorldCat link

- Use the title, permalink/OCLC Number, ISBN, or ISSN for specific item
- Create or connect to lists for interesting content
- Connect to WorldCat Identities for authors and characters
- Embed a keyword search for topical search results pages

APIs

Many including:

- **Classify** - Classify books, videos, CDs and other materials based on identifier - either ISBN or OCLC Number.
- **QuestionPoint Knowledgebase** - Provides read-only access to Question and Answer (Q&A) pairs that QuestionPoint libraries saved for future re-use, for FAQ pages, for patron searches.
- **WMS: Acquisitions, Circulation, Identify Management**
- **WorldCat Metadata API** - read-write service for WorldCat that makes it possible to add or update master bibliographic records in WorldCat, maintain holdings information, and work with local bibliographic data.
