Welcome

For many young people this is an important time—when you decide whether to attend college and, if so, which one to attend. This publication contains information about UMC to help you make that decision.

The primary purpose of higher education is to provide an environment that will enable you to grow intellectually and socially and develop the capacity for self-fulfillment.

You will find that this kind of environment is present at Mizzou. You also will find it to be a quality institution, diverse enough to provide almost any academic field of study you desire.

Since it is the largest campus in Missouri and a primary research institution serving the state, many of our faculty members have national reputations for excellence. This fact has a positive impact on the students and the educational programs. The outstanding alumni honored each year for their professional achievements attest to the quality of the education they received at Mizzou.

We hope to see you at UMC. If we can assist in any way, please contact our admissions office and we will be glad to help.

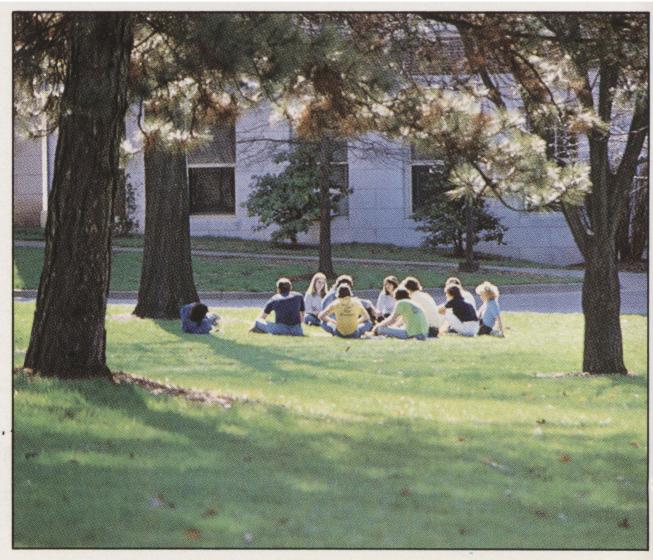

Sincerely,

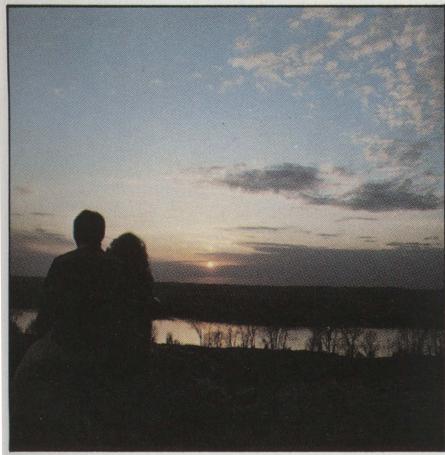

Barbara S. Uehling
Chancellor

Chancellor Uehling welcomes Neil Croak to a breakfast for student leaders at the Chancellor's Residence.

Mizzou

The formal name is University of Missouri-Columbia, but some call it Mizzou. They are referring to the UM system's oldest and largest campus, where the University originated more than 140 years ago in the heart of Show-Me land, halfway between St. Louis and Kansas City.

Other UM campuses are at Kansas City, Rolla and St. Louis. These are the only state institutions which offer professional and doctoral degrees. Many of these degrees are available only at Columbia.

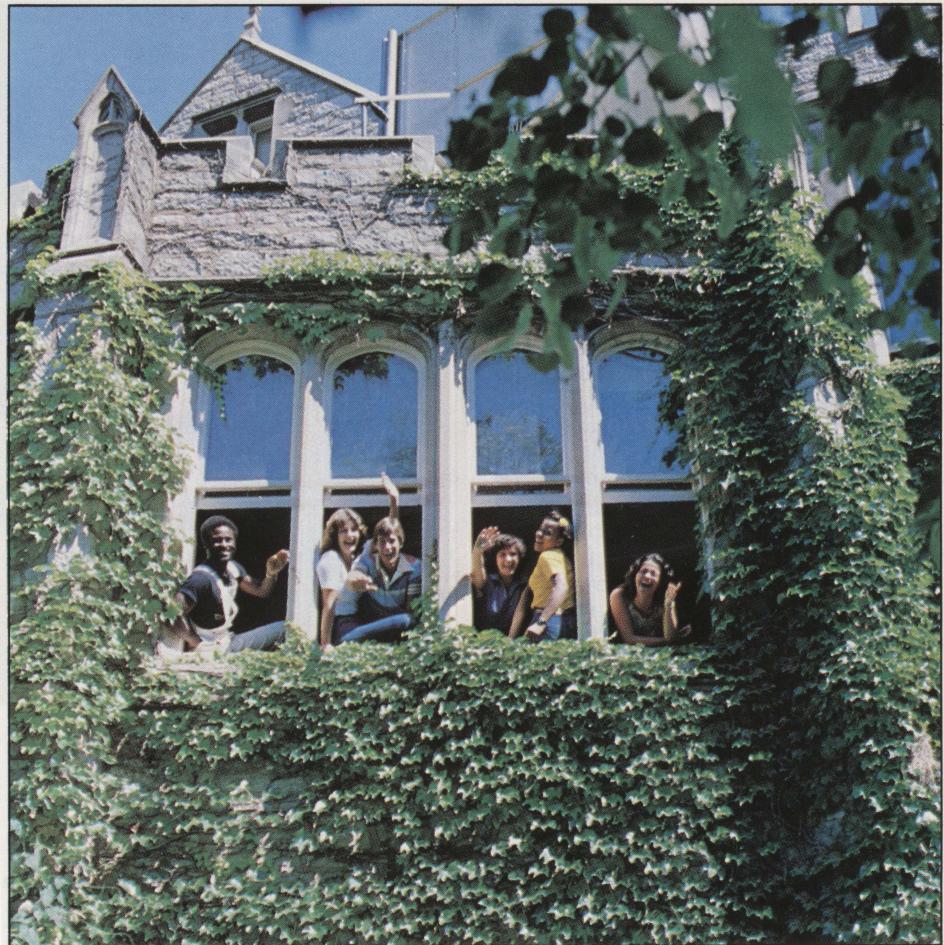

Academics

If a student took an average course load at UMC—15 hours per semester—it would take more than 200 years to cover all of the courses offered at our 18 colleges and schools. UMC is a mid-size, but diverse, university with talented faculty in academic areas ranging from the arts to agriculture, from physics to public administration, and from journalism to vet medicine.

Mizzou is many things to many people. It's a place where famous professors teach and conduct research; it's football on a Saturday afternoon; it's buildings, books and people; it's teaching and learning; it's preserving what is known and finding answers to what is unknown.

Activities

There are many activities available on and off campus. Columbia is a fun place in a country setting—a city of 62,000 plus—

geared for college students. After all, Stephens College and Columbia College are here, too.

Following the Tigers in Big Eight competition tops the entertainment list for many students or townspeople, especially in the fall and winter semesters.

There are plenty of movie theaters, parks and lakes, and restaurants with various cuisines, making Columbia an exciting place to live.

The people at UMC live in a diverse world—24,500 students, 1,500 faculty and 4,500 staff members working together in a university community.

Students

Mizzou ranks first in the Big Eight in the number of students who are National Merit/Achievement Scholars and among the top 10 public institutions nationally.

Because of the attraction of UMC graduate programs and professional schools, Mizzou attracts students from all 50 states. Most out-of-state students—some 3,500—come from neighboring Illinois and Kansas. New York is a distant third.

In addition, there are about 1,200 international students from 85 countries who also contribute to a vibrant student life.

Each year about 6,500 or 25 percent of the student body are new students, freshmen or transfers. Of the total enrollment, five percent are in professional schools studying such subjects as law, medicine and veterinary medicine, and 20 percent are enrolled in graduate school.

One half of new freshman students are in the top 20 percent of their high school class, and 90 percent are from the top half.

251179

Divisions

The following are brief descriptions of undergraduate programs available in UMC's colleges and schools. For more information, write the Director of Admissions, 130 Jesse Hall.

Agriculture

Students trained in agriculture are needed to solve problems in energy production (photosynthesis), pest management, crops and livestock production, food processing and marketing, human nutrition, nitrogen fixation, environmental quality control, agricultural credit, farm management, rural community relationships, and conservation of natural resources (soils, forests, water and wildlife).

The College of Agriculture is one of the largest in the country—about 2,300 students—and grants degrees in some two dozen fields. There are 10 research and demonstration centers in all parts of the state, as well as in the Columbia area, where 255 scientists work with more than 165 projects.

Sanborn Field on the Columbia campus will be 100 years old in

1988. It provides the most complete, long-time studies on soybeans and corn in the world, and provides soil differences for study that exist at no other location. Plot 23 in Sanborn Field was the source of the organism that provides Aureomycin. The field is a National Historic Monument.

Arts & Science

The College of Arts and Science is the largest academic unit of the entire University of Missouri system with more than 6,000 students, 25 departments and many varied degree programs, and 420 full-time faculty members.

The bachelor's degree is offered with majors in the fields of biological, mathematical and physical sciences, in the humanities and in fine arts. In addition, special interdisciplinary majors and minors are available. As an example of the depth of a particular program, the Department of Computer Science offers courses in a variety of programming languages, programming techniques and data structures, operating systems and supervisory programs, compiler-writing, computer organization and theory of computing.

In the College of General Studies, you can tailor a program of study to meet your own needs

and interests and earn a bachelor's degree.

Students who plan to enter business, journalism, law, medicine, and nursing most frequently enroll in Arts and Science for their preprofessional training.

Business & Public Administration

The College includes the School of Accountancy, the Department of Public Administration and the School of Business—which is made up of the Departments of Finance, Management, and Marketing.

The School of Accountancy was the first established at a major public university, and is recognized as one of the best in the Midwest.

Overall, the college offers 18 programs at the baccalaureate level—for example, you might specialize in finance and banking or in public service or real estate. Students are not admitted to the college until their junior year and ordinarily enroll in Arts and Science their freshman and sophomore years.

Education

The College of Education offers programs to prepare you for a wide range of careers in education and other human services professions. Studies for the Bachelor of Science in Education can lead to teaching careers at the pre-school

level through college teaching. Special training for the teaching of the handicapped is available. Or you can seek a career in an education related, human service position in business, industry or governmental agencies by pursuing a Bachelor of Educational Studies degree.

Faculty of the College are nationally known for their contributions to specialized fields of education such as evaluation, administration, rehabilitation and agency counseling, career development, special education, vocational education, early childhood and elementary education.

The College has a commendable placement record: 95 percent of those who register with the Office of Educational Placement find positions.

Engineering

Engineers must keep up with rapid technological changes. To do that, their education has to be broad enough to allow for continued development throughout their careers.

At Mizzou, engineering offers a liberalized, four-year, 126-hour curriculum in agricultural, chemical, civil, electrical, industrial and mechanical engineering. Graduate programs are available in these basic areas plus nuclear engineering. Students may choose from a number of specializations in each department. UMC was the first institution west of the Mississippi to offer engineering training. Currently, 37 National Merit/Achievement Scholars are enrolled in engineering.

The College maintains cooperative work-study programs with engineering-based businesses, industries and governmental agencies. These programs allow students who have completed one year of engineering studies to put their educational experience to practical use.

More than 180 companies visited campus last year to interview engineering students. The average starting salary was \$23,150.

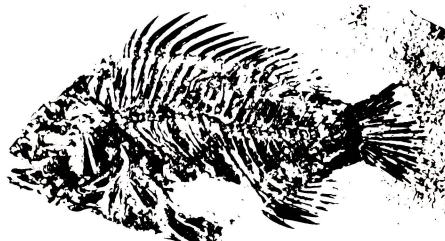

Forestry, Fisheries & Wildlife

The School of Forestry, Fisheries & Wildlife offers undergraduate education in five areas—forest management, recreational forestry, wood products, forest science, and fisheries and wildlife.

In recent years, the number of women in FFW has risen substantially. About one fifth of the student body is now women and the proportion continues to increase.

Field trips are an important part of education in forestry, fisheries and wildlife. A summer camp experience is required of most foresters.

Faculty within the School are widely recognized for their productivity in teaching, research and graduate education.

Graduate School

Students from the various colleges and schools wishing to pursue advanced degrees are enrolled in the Graduate School. For information about admission, contact the Director of Admissions, 130 Jesse Hall, or the Graduate School, 203 Jesse Hall.

Health Related Professions

This new School offers undergraduate students programs in dietetics, medical technology, occupational therapy, physical therapy, radiologic technology, respiratory therapy and health services management. A cooperative program with the College of Home Economics provides specialization in medical dietetics and food systems management.

Home Economics

The College of Home Economics, one of the first accredited by the American Home Economics Association, ranks as one of the largest in the country and boasts faculty members who are nationally recognized for their professional contributions.

Professional programs are offered in a number of highly specialized fields. Cooperative agreements with the School of Health Related Professions, the School of Journalism, and the College of Education provide expanded opportunities in dietetics, home economics journalism, and early childhood education.

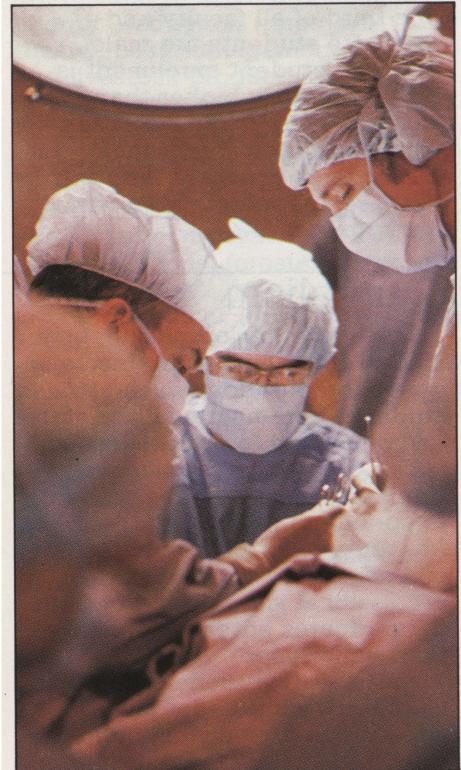

While women outnumber men, one third of all faculty and graduate students are male. Minority student enrollment is proportionately higher than the campus average. Personalized advising and individual concern for all students contributes to the success of students from varied backgrounds.

Journalism

The School of Journalism, beginning in 1908, has maintained a national reputation which attracts students from nearly all the states and a score of foreign countries.

The course of study leading to the B.J. degree requires students to spend approximately three-fourths of their time in liberal arts and sciences and one-fourth in professional journalism work. Undergraduates enter the School in their junior year.

Journalism students do their laboratory work under faculty supervision on a community daily, the *Columbia Missourian*; and in the newsrooms of the University's public radio station, KBIA, and KOMU-TV, an NBC affiliate serving central Missouri.

"I was afraid it would be hard to leave my friends at home and make new ones, but the more involved I became in campus activities, the easier it got to meet people. Probably my favorite thing has been participating in student government here. There is so much to do — with more freedom than ever before — it's not difficult to find something you like." Kimberly Held, Arts & Science

Law

The School of Law offers a three-year professional curriculum leading to a Juris Doctor degree. Usually, applicants must have a baccalaureate degree before being admitted. Admission is based on previous academic work, LSAT test scores, and other evidence of probable success in mastering law school work. Members of racial and ethnic minorities are encouraged to apply.

Library & Informational Science

Currently, Mizzou's School of Library & Informational Science is the only program accredited by the American Library Association in Missouri and one of only two in the Big Eight.

The undergraduate program leads to a bachelor's degree in the College of Arts and Science. Graduate-level work is pursued in the School of Library & Informational Science.

In addition to job opportunities in libraries, the rapidly growing information industry seeks graduates who can specialize in data processing, automated files or bibliographic networks.

Medicine

The Doctor of Medicine (M.D.) is a four-year program beyond the baccalaureate. Students normally spend at least three years in post-doctoral specialty training.

Nursing

A new Nursing School Building, which opened in 1979, and the increasing demand for professional nurses are two factors making nursing at Mizzou challenging and exciting.

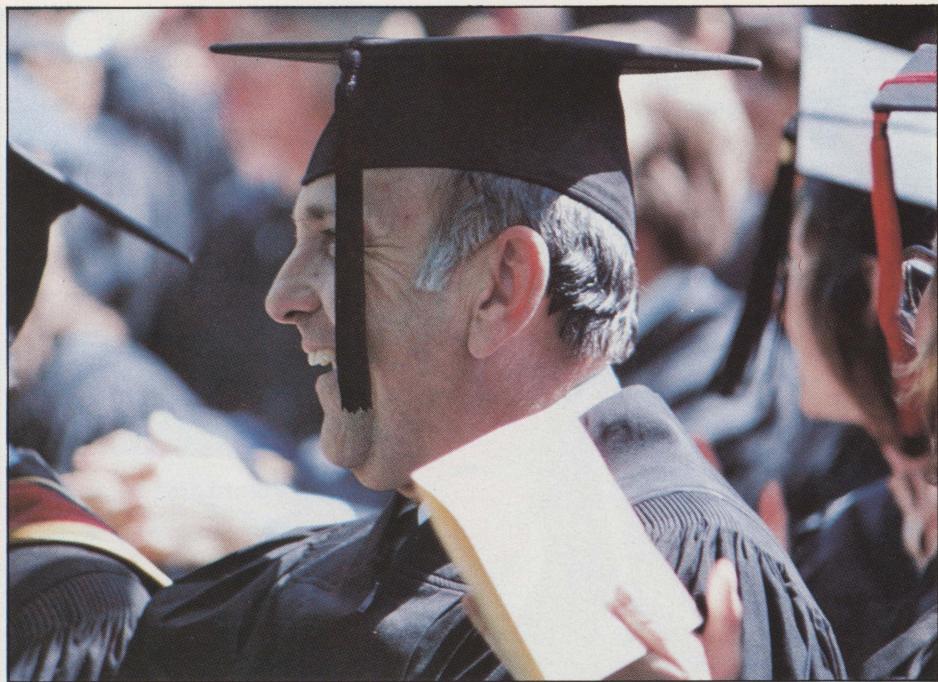

The undergraduate program offers preparation for general professional nursing and leads to the Bachelor of Science in Nursing. Admission to the program is at the sophomore level.

Public & Community Services

If you are interested in a career in one of the social, human serving professions, the College of Public and Community Services is for you.

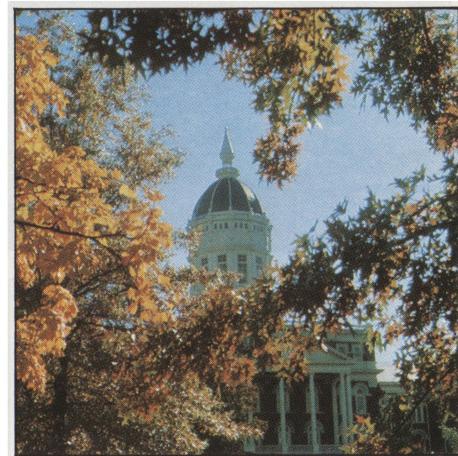

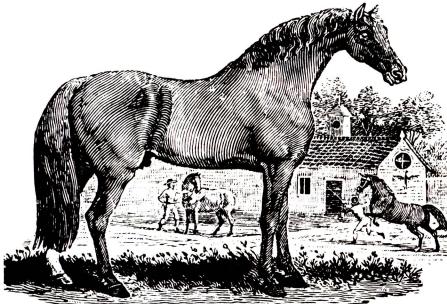

The college has three academic units: the Department of Recreation and Park Administration, the Department of Community Development, and the School of Social Work.

Job opportunities in social work, community development and leisure studies are growing at a rapid pace.

Social Work

Social work is a dynamic and growing profession that enables you to serve people in such diverse ways as a career in child welfare, corrections, or health services and aging. The School of Social Work has been in the forefront of the development of professional social work education in Missouri and is fully accredited by the Council on Social Work Education. Studying social work at Mizzou at the undergraduate level gives you a base of studies preparing you for a general practice in many fields of service. At the graduate level, specialization in family services, child welfare, aging, physical and mental health are available.

Veterinary Medicine

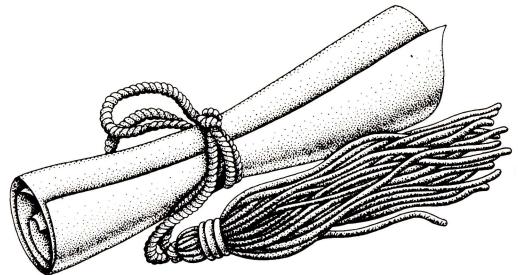

If you want to attend the School of Veterinary Medicine at UMC, you must complete at least 64 semester hours of college work by the end of the winter semester (spring quarter) of the year in which you want to be admitted. However, most of the students admitted have completed more than 100 semester hours. Only 72 students are admitted each year. The basic doctorate degree (D.V.M.) requires four years for completion.

ROTC

The Army, Navy and Air Force ROTC programs offer college men and women the opportunity to become commissioned officers in the military service of their choice. Upon completing ROTC course requirements and receiving a bachelor's or advanced degree the student is commissioned. Active duty commissioned officers earn approximately \$15,000 a year, and are assigned leadership positions, which provide valuable managerial experience.

There is no obligation connected with taking ROTC during the freshman and sophomore years. Obligations begin only at the start of a student's last two years of

college, during which the ROTC student is paid \$2,500. There are many three-, two- and one-year scholarships available to students taking ROTC. These scholarships pay tuition, fees, books and \$100 a month.

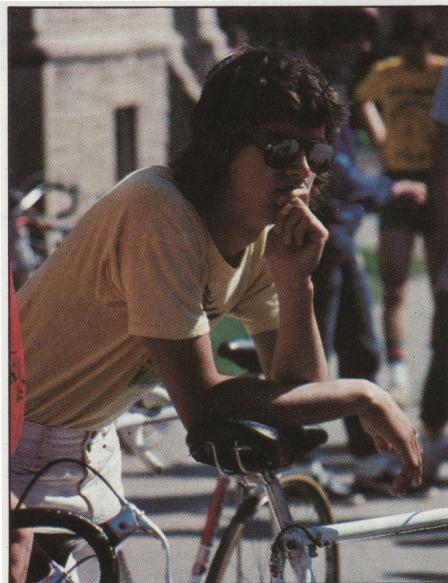

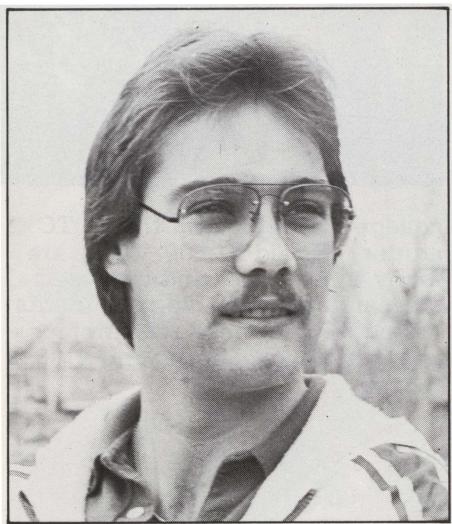

Degrees

College of Agriculture

Agricultural Economics (BSAg, MS, PhD)
 Agricultural Education (BSAg)
 Agricultural Journalism (BSAg)
 Agricultural Mechanization (BSAg, MS)

Activities

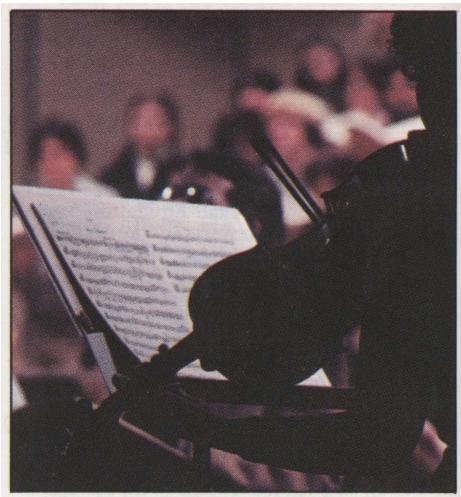

Many campus activities at Mizzou are initiated or coordinated through the Office for Student Development in Read Hall.

Through student government, clubs and organizations students have input into University decision making and help themselves and others meet educational, cultural, recreational and developmental needs. Opportunities for involvement are: the Missouri Students Association; the Association of Women Students, Residence Halls Association, Legion of Black Collegians, the Council of Handicapped Students and other groups; Panhellenic and Interfraternity Council; minority and international student programs; and travel and recreation programs. For further information, ask for the brochure on student activities and government at Read Hall.

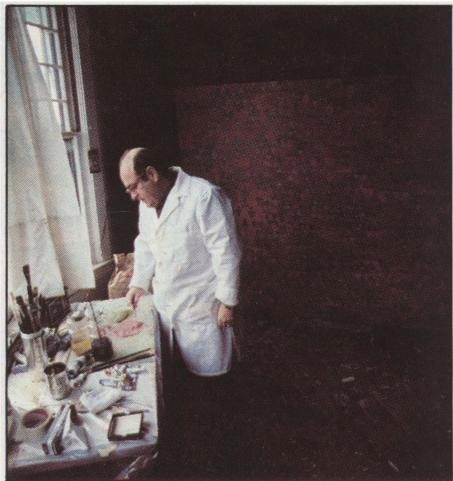

Music

Not everyone can participate in Marching Mizzou, but there are many other musical groups and organizations at UMC, including the University Philharmonic Orchestra, the University Singers, the Symphonic Band, the Collegium Musicum, the Vocal Jazz Ensemble and other small ensembles and chamber music groups. Resident faculty ensembles include the Esterhazy Quartet (string quartet in-residence), the Missouri Arts Quintet (woodwind quintet in-residence), and the Faculty Brass Quartet.

You will also find a variety of concerts at Mizzou presented by world-renowned concert artists, and folk, blues, and jazz groups. Resident ensembles, bands, orchestras and singers perform throughout the year. Most performances are offered to students free or at a reduced rate.

Theatre

All students are eligible to participate in the dramatic presentations of the University Theatre. During the school year several major productions ranging from contemporary plays to the classics are presented on the University Theatre's main stage and in the Studio Theatre in Gentry Hall. There is also a Dinner Theatre program produced entirely by students. The Summer Repertory Theatre presents a paid company of student actors and technicians in three plays in nightly rotation during July. In addition, touring companies come to UMC during the year to present one-night performances of current plays.

Recreation

Intramural team play and a variety of recreational activities are available for UMC students. In addition, sports club organizations offer participation in gymnastics, rugby, soccer, swimming, lacrosse, fencing, field hockey or scuba diving.

Recreational facilities at Mizzou include Brewer Fieldhouse, Rothwell and McKee gymnasiums, intramural fields, an 18-hole golf course, lighted tennis courts, indoor and outdoor swimming pools, handball courts, indoor track and field areas, basketball and volleyball courts, weights room and a wrestling room.

Intercollegiate athletics

The Mizzou Tigers have a long tradition as a competitive member of the tough Big Eight Conference in men's intercollegiate sports, and the women's teams are building a similar reputation.

"As a black student considering the University, I experienced skepticism after hearing horror stories about discrimination. After a year here, I can truthfully say I'm glad I came." Lisa D. White, Arts & Science

Excellent facilities are provided for these activities at Faurot and Simmons Fields and the Hearnes Center. Team sports include football, basketball, baseball, softball, golf, tennis, track and field, cross-country, gymnastics, swimming and wrestling.

Religious life

Although the University, as a state institution, is prohibited from sponsoring religious activities, the importance of religion in the life and education of students is recognized. The Association of Campus Religious Advisers, an interfaith organization of campus religious workers, acts as the liaison body between UMC and the various campus ministries.

Services

There are many kinds of services available to Mizzou students which enhance the campus environment. Most are available through various offices administered by the vice chancellor for student services.

Student health

UMC offers a two-part health program consisting of the Student Health Service and a supplementary sickness and accident insurance policy. Medical care for ordinary illnesses and accidents is provided during daytime hours (except Saturday afternoon and Sunday) at the Student Health Center. There are charges for some services. When services are not provided, students may go to one of several local hospitals for treatment.

A supplemental sickness and accident insurance plan, sponsored by the University, may be obtained at a reasonable cost. This policy covers most of the student's needs for hospitalization and surgery, as well as outpatient laboratory, X-rays or medication expenses.

Counseling

UMC Counseling Services, 100 Noyes Hall, offers students help in planning for the future through individual and group counseling, testing, workshops, and career planning and placement. The Career Planning and Placement Center helps students choose major fields of study and career patterns following graduation.

Learning Center

The Learning Center at 304 Watson Place provides free individual and group instruction to undergraduate students needing

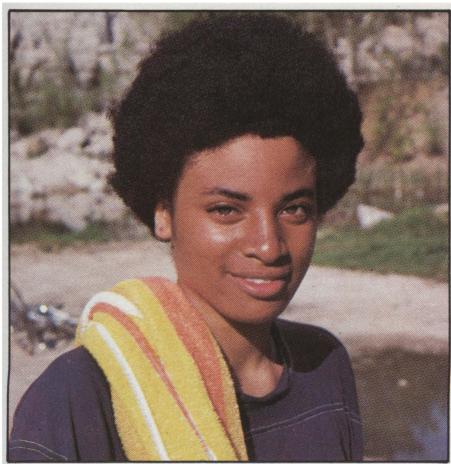

help in math, writing, reading, study skills and general tutoring. Each semester the Learning Center offers preparation sessions for the graduate record exam and the law school aptitude test.

Women Studies

The Women Studies Office provides resources and information for all interested students. The planning body for the service is the Women Studies Committee, composed of interested faculty, students and administrators. Students may design a specialization in Women Studies through the College of General Studies and in some academic disciplines. The office is located in 207 Jesse Hall.

Speech & Hearing Clinic

Health Related Professions conducts a clinic in which students may be examined and advised regarding the correction of minor as well as major speech or hearing defects. The clinic is located in Parker Hall.

Honors College

A variety of special courses and a special honors degree program are offered through what is called the Honors College. Entering freshmen are eligible for most honors courses at Mizzou if they rank in the upper 15 percent of their high school classes and score in the upper 15 percent on the Freshman Placement Tests (FPT).

Honors courses may consist of small interdisciplinary seminars or opportunities for independent study and participation in a professor's research. The Honors College also coordinates a number of special departmental honors degree programs within the College of Arts and Science. Completion of such a program earns the student a notation of "B.A. with Honors" on both transcript and diploma.

For more information contact the Honors College, 612 Kuhlman Court.

Studies abroad

Several academic areas at Mizzou frequently offer special programs that include studies or tours in foreign countries and are available to undergraduate and graduate students.

Such programs include the following: A year in Japan (general liberal arts curriculum); summer school in Mexico (graduate and undergraduate credit available); semester at the University of Reading in England (graduate and undergraduate credit from the College of Education); a semester in London or a semester in the Middle East (graduate program of the School of Journalism) and

study tours offered in agriculture, music, Asian studies and home economics (optional credit available). UMC students attend programs in Germany, France, Russia, Italy and elsewhere.

For additional information contact the Study Abroad Adviser, 114 Read Hall.

Summer Welcome

New students are encouraged to attend the "Summer Welcome" registration and orientation program conducted in June and July.

The two-day session enables an entering student to get acquainted, to take the required Freshman Placement Tests (FPT), and to complete, with an adviser's assistance, all necessary registration procedures for the fall semester.

Students with disabilities

UMC is committed to providing equal educational opportunities to all academically qualified students. Many classrooms, major administrative offices and student services have been modified to allow physically handicapped students to participate in university life.

The Access Office for Students with Disabilities functions as a central point for the coordination of special services on campus. For detailed information on campus accessibility and special services, write to the Coordinator, Access Office, 126 Gentry Hall.

Among the special services provided is the Library Center for the Handicapped which houses equipment such as recorders and electronic visual aids. Other services available through the Center are textbook recording, bibliographic searching and retrieval, reference help, and general assistance in using the Library for course-related study and research.

Correspondence COURSES

UMC offers you a chance to take courses by correspondence. These can help you get a head start on college, graduate early, resolve scheduling problems or study during regular class breaks. Check with advisers in your division

when planning your schedule in order to make sure correspondence courses will fit into your requirements for graduation. To get information on how to enroll, courses offered and costs, contact the Center for Independent Study through Correspondence, 514 South Fifth Street, Columbia, MO 65211 314-882-2491.

Credit by exam

Students who have fewer than 90 semester hours of college credit may receive advanced credit by examination. The policy may vary among the individual schools or colleges at Mizzou, so before taking any tests students should check at the appropriate dean's office.

Generally, however, there are four different exams available. These are UMC's *Freshman Placement Tests (FPT)* and *Departmental Examinations (DE)* and two national exams, the *Advanced Placement Program (APP)* and the *College-Level Examination Program (CLEP)*, both administered by the College Entrance Examination Board. (CLEP general exams are limited to students who have fewer than 30 semester hours of college credit.)

APP exams are accepted by UMC in 12 areas. The English exam is not accepted because a similar test is required through FPT (see below). Those students who receive a score of three or higher (out of a possible five) are eligible for up to five semester hours of college credit for each APP examination completed.

FPT exams are required of all entering students who have completed fewer than seven semester hours of college credit. Advanced placement tests in both English and mathematics are used to determine placement in advanced courses. The mathematics test may earn a student advanced credit (3 hours) as well.

DE exams are comparable to final examinations given in the various campus courses. Arrangements for taking these exams should be made through UMC Counseling Services, 4 Parker Hall. The exams have objective or essay formats and are prepared and graded by faculty of the appropriate departments with assistance from Counseling Services.

For more detailed information, request the brochure, *Credit by Exam*, from the Admissions Office, 130 Jesse Hall.

Expenses

A Missouri resident can expect to spend a total of approximately \$3,800 for the 1981-82 nine-month academic year at UMC. An out-of-state student can expect costs of about \$5,560.

These estimates are based on the following figures:

Fees \$918

The \$435 incidental fee and the \$24 student activity fee make up the total semester fee of \$459 which must be paid in full at registration for classes. Athletic event tickets are a separate, optional expense.

Room & Board \$1525

This is the cost of a double-occupancy room in a residence hall and 20 meals per week (no Sunday evening meal)—including a \$10 social fee. Residence hall costs may be paid by the year, semester or four payments each semester. Financial aid recipients are expected to pay by the semester.

Books & Supplies \$280

Estimated cost of necessary books and supplies.

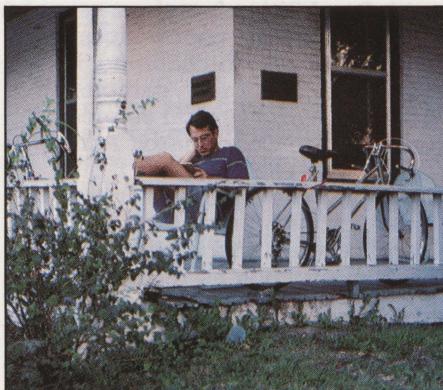

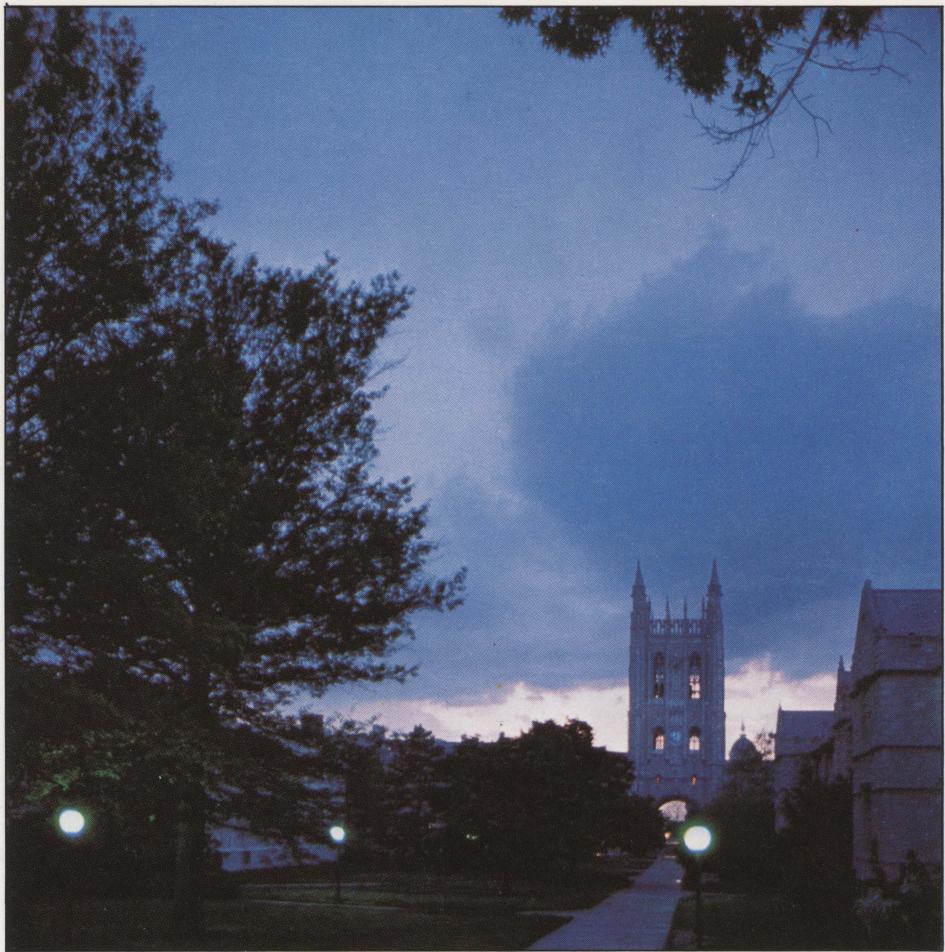

Personal Expenses \$1077

This estimated average provides for personal items, entertainment, laundry, cleaning, student health insurance and transportation, etc.

Non-Resident Tuition \$1740

Non-resident students are required to pay an additional out-of-state tuition. Non-resident students are eligible for all federal assistance.

Although the fees for 1982-83 are not available as this brochure goes to press, a substantial increase is expected. Contact the Cashier's Office at 123 Jesse Hall for fees information.

Campus Visits

Mizzou encourages prospective students and their families to visit Columbia and see the UMC campus firsthand. Contact the Office of High School and College Relations, 219 Jesse Hall, 882-2456, to arrange a campus tour.

"This is a college town, complete with people and ideas from all corners of the world. Not that any of this falls into your lap — you have to seek out the kind of education you want." Elizabeth Barnhill, Journalism

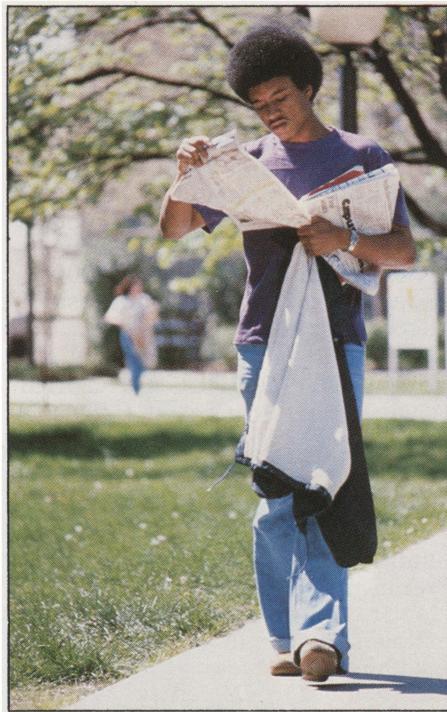

Housing

Although UMC recommends that unmarried freshmen live in University-supervised housing, students may live in any available housing they choose. Information about student housing and an application for University-owned residence halls are sent to those who apply for admission. Beginning February 15, this material will be mailed to those who have applied for the fall semester (October 1 for the winter semester, April 1 for the summer session).

Head residents and resident assistants supervise all programs in the residence halls and strive to create an atmosphere which is conducive to the intellectual, social, cultural and personal growth of the residents.

Students enter into contracts with UMC for room and board in University residence halls for the entire academic year. The current rate for one-half of a double room and board is \$1,515 per academic year.

Mark Twain Residence Hall

Mark Twain Residence Hall, 515 South Fifth St., is a private residence hall divided to house both men and women. The owners operate this facility according to the UMC rules and regulations about conduct and supervision in residence halls. However, contracts are entered into between students and the hall owners; the University does not take part in these contracts. Room and board charges for the academic year are \$2,442. Address inquiries to Mark Twain Residence Hall.

Fraternities & SORORITIES

Fraternities and sororities are private, self-governed groups that have University-approved resident directors. Room and board charges for an academic year range from approximately \$1,500 to \$1,880. These charges do not include pledge fees, initiation fees or building fees (if any). Inquiries concerning fraternities should be addressed to the I.F.C. Rush Chairman, 217 Read Hall. For additional information concerning sororities, write to the Panhellenic Council, 217 Read Hall.

Cooperatives

Women who live in cooperative houses have an opportunity to reduce room and board expenses by sharing some of the work in the house. The cost of room and board in women's cooperatives is approximately \$1,200 per academic year.

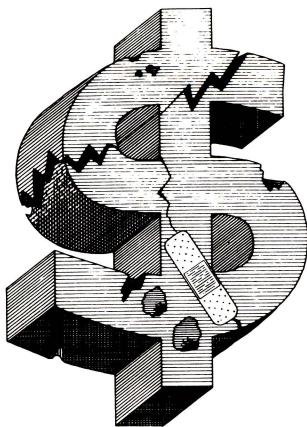

The two women's cooperative houses at Mizzou are Templecrone and Campbell-Harrison. Inquiries about Templecrone should be addressed to 1404 University Ave., Columbia, MO. 65201.

Campbell-Harrison accommodates approximately 30 women students enrolled in home economics. Applications may be made directly to the President, Campbell-Harrison House, 1415 University Ave., Columbia, MO 65201.

There are no cooperatives for men.

Family housing

UMC has 360 unfurnished apartments for students with families. There are 112 one-bedroom apartments and 56 two-bedroom apartments, renting for \$105 and \$120 per month respectively, located in an area known as University Village; and 52 one-bedroom apartments, and 140 two-bedroom apartments, renting for \$105 and \$120 respectively, located in two areas named University Terrace and University Heights. Application blanks may be obtained from the Housing Office, 123 Jesse Hall.

Financial aid

Students seeking financial aid at Mizzou must complete either the Family Financial Statement (FFS) of American College Testing or the Financial Aid Form (FAF) of the College Scholarship Service. From the information on these forms we determine how much financial help you need (calculated financial need).

Either form may be obtained from your high school's counseling office and should be filed by April 15. Late applications are considered according to the date received and the availability of funds.

For additional information, contact the Office of Student Financial Aid, 11 Jesse Hall.

There are four programs which can help supply financial aid: grants, loans, employment or scholarships.

Grants Pell Grant (formerly BEOG)

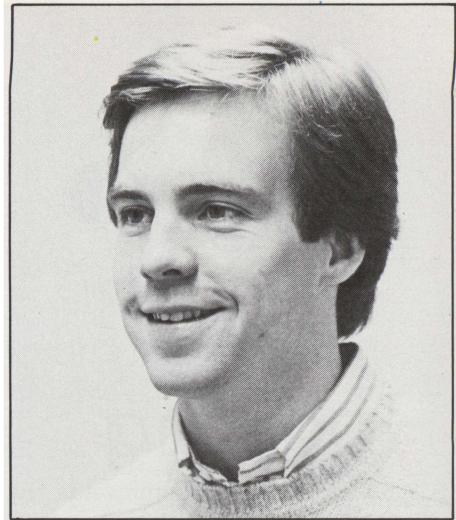

These grants are cash gifts which do not have to be repaid and are available to all undergraduate U.S. citizens who qualify. Qualification is based on calculated financial need. Students whose families have a \$25,000 adjusted gross income (or less) are likely to qualify.

Supplemental Educational Opportunity Grant (SEOG)

Federal grants from \$200 to \$2,000 annually are available to those undergraduate students in greatest financial need. This program is not limited to those in the top academic ranks, but applicants' past scholastic records and test scores must show them capable of maintaining satisfactory college work. Applicants must be U.S. citizens or permanent residents.

Missouri State Grant

These grants are provided by the State of Missouri for undergraduate students who are Missouri residents working toward their first baccalaureate degree, and who need financial help to attend college. The amount of the grant presently cannot exceed \$411, or one-half the amount of the student's calculated need, whichever is less.

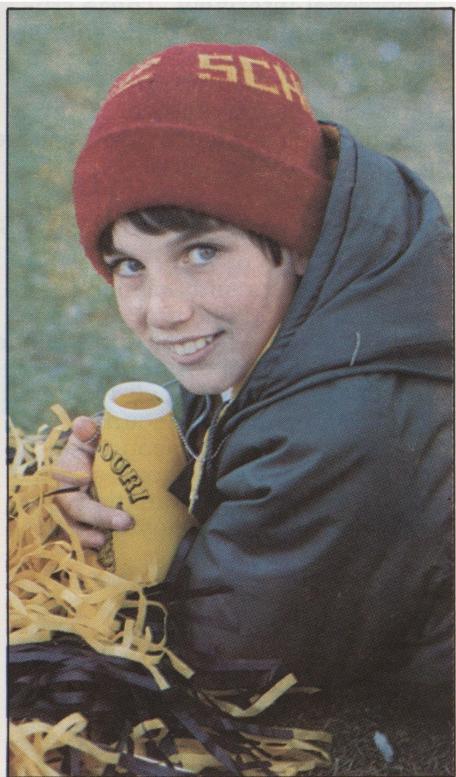

"I've enjoyed the many opportunities for campus involvement and, consequently, the opportunities for learning about myself, about relating to others, and about maturing. The only regret I have is leaving." Rick Kammerer, Business & Public Administration

Loans National Direct Student Loan (NDSL)

The usual maximum loan is \$1,500 per year for undergraduate study, \$3,000 for graduate and/or professional study. Repayment begins six months after leaving school with 4 percent interest starting then. There are cancellation provisions for teaching in schools in certain areas and/or under certain conditions of service in the Armed Forces of the United States. The total loan must be repaid within 10 years, with minimum monthly payments of \$30 per month. Applicants must be U.S. citizens or permanent residents of this country.

Guaranteed Student Loan (GSL)

A student may arrange a loan of reasonable size with a hometown bank, or other eligible lender; the note is endorsed by the federal government. The student does not provide collateral and the lender is assured that it will sustain no losses on student loans.

The federal government pays the interest as long as the borrower is enrolled for at least one half of a full course load and up to six months after leaving school. After that time, the borrower begins repayment with an interest rate of 9 percent. No cancellation feature is associated with this loan program. Applicants must be U.S. citizens or permanent residents of this country. Applications may be obtained from the Student Financial Aids Office, or from a local lender and submitted to UMC for certification.

Other loans

UMC student loan funds are gifts from alumni, business firms, foundations, trusts and other supporters. The loan fund is open to all UMC students.

Employment

Part-time jobs are available in downtown Columbia and throughout the community in restaurants, hotels, stores, warehouses, theaters and other business firms. Many householders employ students to do odd jobs and babysitting usually during the afternoons, evenings and on weekends. Job opportunities are listed on the employment bulletin board at the Student Financial Aids Job Location Office at 110 Noyes Hall.

Advanced students frequently may find work on various research projects in the division of their major. Interested students should make application at the office of the prospective employer.

Work-study jobs

This program provides that the federal government pay a part of the wages of students from low income families who need to work in order to earn money to attend college. The University pays the remaining amount for on-campus jobs. The Student Financial Aids Office assists in arranging off-campus jobs on community projects with eligible agencies which work for the good of the public.

Full-time summer jobs of 40 hours per week at the minimum hourly wage enable students to save money for the following school year. In addition, part-time work on campus can be arranged to fit into the regular class schedule. On the Columbia campus there are 1,200 to 1,500 part-time, work-study jobs regularly filled by students needing work to help with their college expenses. Jobs are available in libraries, laboratories, cafeterias, maintenance, offices, farms, etc., and are assigned by the Student Financial Aids Office in accordance with the interest and experience of the eligible applicant.

Scholarships

All questions regarding specific college, school or divisional scholarships should be directed to the appropriate dean's office.

Curators Freshman Scholars

One Curators Freshman Scholar is named at each Missouri high school for each 100 seniors or fractional part thereof. To qualify, a student must be a Missouri resident, rank in the upper 3 percent of the high school class at the end of six semesters and score at or above the 90th percentile on a nationally standardized college aptitude test. If a school does not have a student who meets these criteria, the high school counselor or principal designates a student from that school ranking in the top 3 percent of the class.

Each Curators Freshman Scholar receives a waiver of the incidental fees for the freshman year. Students may be eligible for a renewal of the award by maintaining a grade point average that places them in the upper 5 percent of their University class.

University Scholars

Undergraduate students who maintain a grade point average that places them in the upper 5 percent of their University class are named University Scholars. Missouri residents who are University Scholars receive a waiver of \$100 of the incidental fee. You do not need to apply for this award—the University will notify you. Transfer students who have questions about their eligibility should contact the Student Financial Aids Office.

G. Ellsworth Huggins Undergraduate Scholarship

High school students who rank in the top 10 percent of their graduating class, score at the 90th percentile or better on a national standardized aptitude test, participate in extracurricular activities and are recommended by their high school counselor or principal are eligible. The Huggins scholarship pays \$500 the first year, \$300 second year, \$200 third year and \$100 fourth year, provided the student maintains a 3.25 cumulative GPA. For more information, contact the Honors College, 612 Kuhlman Court.

National Merit & Achievement Scholars

National Merit and National Achievement Scholars are recommended to UMC by the National Merit Office, Chicago, Ill. Missouri residents who are either National Merit or National Achievement Scholars, who are not sponsored by an industrial organization, and who name Mizzou as their first choice receive a minimum stipend if they have no calculated need on either the FFS or FAF.

The Scholar who has a calculated need receives one-half of that need as either a National Merit or National Achievement Scholarship and one-half from other University-controlled funds, such as loans or employment.

National Merit and National Achievement Scholars should submit a FFS or FAF.

Science fair scholarships

Each year the University awards scholarships to a number of Missouri high school seniors who are high ranking participants in science fairs.

Selection is made by a committee on the basis of the student's academic record, college aptitude test scores, interest in science and a personal interview. These students may enroll at UMC with a full waiver of the incidental fees for one year.

Conditions for renewal of these scholarships are the same as those for University Scholars.

Special events scholarships

The College of Agriculture, the College of Arts and Science (Departments of Music and of Speech and Dramatic Art), and the College of Education (Department of Industrial Education) award several scholarships in the amount of incidental fees to Missouri residents who are state contest winners. For further information, contact the department involved.

ROTC scholarships

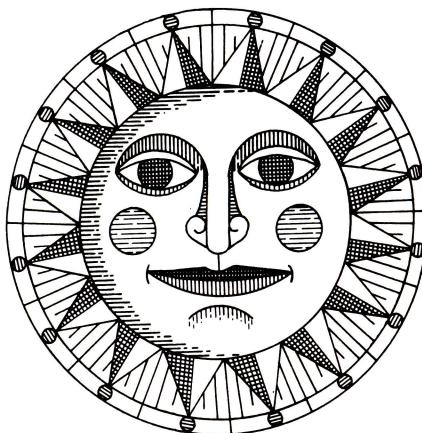

Two-, three- and four-year scholarships are granted to qualified students through national and local competition. The scholarship pays for all books, tuition and fees plus a subsistence allowance of \$100 per month for a maximum of ten months for each year it is in effect.

Upon graduation, the scholarship students will be commissioned second lieutenants or ensigns and will be expected to serve as officers on active duty for four years. For further information, students should contact the appropriate ROTC office on the UMC campus.

Chancellor's Leadership Class

Members of the Chancellor's Leadership Class are chosen on the basis of high school activities, especially ones to which students are selected by their peers, and receive a minimum \$350 scholarship for their freshman year only. Nomination forms are available through Missouri principal or counselor offices or are available from the Vice Chancellor for Student Services office, 211 Jesse Hall.

Calendar

Fall 1981

-
- | | |
|----------------|--|
| Aug. 24 | Registration & new student orientation |
| Aug. 25 | Registration |
| Aug. 26 | Classwork begins |
| Sept. 7 | Labor Day recess |

| Aug. 5 | Classwork ends |

"After one semester at UMC, I was convinced that this was the place for me. I was very impressed with the amount of attention given by my instructors."
Jerome Whitfield, Home Economics

Admission

All inquiries and applications for admission should be addressed to the Director of Admissions, 130 Jesse Hall.

There is no fee charged for application evaluation, but once students are accepted for admission, we require a \$20 non-refundable advance fee which is applied against the incidental fee.

For the fall semester, entering freshmen should apply beginning Oct. 1. Graduate and transfer students should apply before July 1.

All students enrolling at Mizzou for the first time are required to submit the medical history form, which in most instances does not require a physical examination.

Freshmen

Entering freshmen must submit an application for admission, a certified high school transcript and an official aptitude test score.

Acceptance for admission is determined on the basis of a combination of high school rank in class and the required aptitude test score.

Results from one of the following tests meet that requirement: School and College Ability Test (SCAT, Series III, Form X or Y, or Series II, Form IC or Form IIB), American College Test (ACT) or Scholastic Aptitude Test (SAT) of the College Entrance Examination Board.

In addition, most freshmen are required to take UMC's Freshman Placement Tests (FPT) prior to registration.

Students have the best success at the University of Missouri-Columbia if they have completed the following minimal units in high school: 3 or 4 units of English and/or language arts; 2 units of mathematics (not including general mathematics); 2 units of sciences (not including general science); 3 units of social sciences; and 1 unit of behavioral sciences (psychology and/or sociology).

International students

Mizzou welcomes applications from international students. More than 1,100 students from more than 85 countries are currently enrolled here. All prospective students who are not U.S. citizens should write to the Office of International Student Programs, 114 Read Hall. Appropriate forms explaining the procedures for applying for admission to UMC will be sent, along with information outlining degree programs, approximate costs, and international support programs and activities.

Transfer students

Students transferring to UMC from another institution must have an overall grade average of C or better. In addition, transfer students must have attained a C average during their most recent semester. UMC may not admit any student who is under suspension or dismissal, or whose previous record is unsatisfactory.

Evaluation of course work applicable toward a degree is made by the dean of the school or college in which the student enrolls.

Students transferring with an Associate degree that is not oriented toward a baccalaureate degree will have their transcripts evaluated on a course-by-course basis.

Students transferring from an accredited Missouri junior or community college with an Associate of Arts degree must have at least 60 hours of college-level work oriented toward the baccalaureate degree.

Generally, UMC will admit transferring students who have obtained the A.A. degree with a certified C average, and will consider such students as having junior standing and as having completed general education requirements. However, the professional Schools of Business and Public Administration, Health Related Professions, Journalism, Nursing and Library and Informational Sciences have additional requirements.

How to apply

Applications

Fill out this form completely and send it to the Director of Admissions, 130 Jesse Hall, University of Missouri-Columbia, Columbia, MO 65211. You will also need to have transcripts sent to the above address as explained in the section on transcripts.

Failure to complete this form fully will void your admission. Providing misinformation concerning previous enrollment in other colleges or universities will also void your admission.

Because of limited enrollment and/or higher minimum standards, general acceptance as a student at the University of Missouri-Columbia does not guarantee acceptance to specialized or professional programs.

Supplemental applications are required for admission to the School of Health Related Professions, the College of Veterinary Medicine, the School of Law and the School of Medicine. They can be obtained from the respective dean's office.

Some information requested on this form is required by Title VI of the Civil Rights Act of 1964, Title IX of the Higher Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973 and will be reported to federal compliance agencies concerned with equal educational opportunity. We ask for this information in order to keep the records required by the federal government, and to prevent discrimination on the basis of race, color, religion, handicap, national origin or sex.

Transcripts

No transcript can be accepted directly from you. You must have the school you attended send your official transcript to the Director of Admissions, 130 Jesse Hall, University of Missouri-Columbia, Columbia, MO 65211. All transcripts become the property of UMC. If, after one semester, you have not enrolled at UMC, your transcript will be destroyed.

Your admission cannot be decided upon until complete transcripts and your admission form are on file in the Admissions Office.

Freshmen applicants must submit an official high school transcript (with class rank) and required test scores.

Undergraduate transfer applicants must submit an official transcript from each college attended. Transfers entering the College of Arts & Science or the School of Journalism must also submit a high school transcript.

Graduate applicants must submit an official transcript showing baccalaureate degree and transcript(s) showing any additional graduate work. Additional information concerning graduate study may be obtained from the Graduate School, 205 Jesse Hall, University of Missouri-Columbia, Columbia, MO 65211.

Deadlines

If you are applying for the Fall Semester, you should have applications and transcripts on file in the Admissions Office not later than May 1 if you are a freshman and July 1 if you are a transfer or graduate student.

If you are applying for the Winter Semester the deadline is December 1 for all students.

The deadline for the Summer Session is May 1 for all students.

Out-of-state applicants

It is your duty to apply and register under the proper residence and to pay the proper tuition fees. A pamphlet giving detailed information on tuition and residence rules may be obtained from the Admissions Office, 130 Jesse Hall or the Cashier's Office, 123 Jesse Hall.

Financial aid

An application for admission to UMC does not serve as an application for financial aid. UMC ac-

cepts either the Family Financial Statement (FFS) of American College Testing or the Financial Aid Form (FAF) of the College Scholarship Service. Both forms are available in school counseling offices. They are released just preceding a new calendar year and should be filed by April 15. Late applications will be considered according to the date received and the availability of funds. Questions should be directed to the Office of Student Financial Aids, 11 Jesse Hall.

Housing

Student housing information and applications for University-owned residence halls are mailed automatically at intervals determined by the University's receipt of your application for admission.

Send your application to:

Director of Admissions
130 Jesse Hall
University of Missouri-Columbia
Columbia, MO 65211

City map

If you are visiting the University of Missouri-Columbia for the first time, this map and directions may help you locate the campus. For a detailed map of the campus, showing where parking is available, see page 12-13.

From the North: Take Highway 63 south to Interstate 70, east to Highway 63, south to Stadium Boulevard, west to College Ave., north to Rollins St., west to Hitt St., north to Visitor Parking Lot (corner of Hitt and Conley).
