Frame

Moffett

Hogan

Phillips

Carpenter

Clough

Eight join Emeritus ranks

Eight veteran faculty and staff members at the University of Missouri, whose combined tenure on the staff here totals 298 years of service, received Emeritus titles and diplomas at Commencement exercises June 9.

Four of the eight had already retired at least to limited service, and several may continue some part-time teaching or research after the close of the current academic year.

Those receiving diplomas and their new titles include: Dr. William A. Albrecht, Professor Emeritus of Soils; Dr. William W. Carpenter, Professor Emeritus of Education; Robert S. Clough, Extension Emeritus Professor; Benjamin H. Frame, Professor Emeritus of Agricultural Economics; Percy A. Hogan, Librarian Emeritus of the Law Library; Miss Mary Rose McKee, Professor Emeritus of Physical Education; Dr. Harold Y. Moffett, Professor Emeritus of English; and

Dr. Claude A. Phillips, Professor Emeritus of Education.

Dr. Albrecht and Mr. Hogan are the real veterans of the group, each having served the University for 43 years. Dr. Carpenter, the last to join the staff, has taught here for 31 years.

Dr. Albrecht joined the faculty in 1916 as an instructor in soils. Born and reared on a farm in Central Illinois, he holds four degrees, A.B., B.S., M.S., and Ph.D. from the University of Illinois. He was promoted to assistant professor in 1919; to associate professor the following year, and became a full professor in 1930.

He is recognized throughout the world as an authority on soils and soil fertility. He has studied soils and lectured on the subject in Great Britain, on the European Continent, and in Australia, as well as through most of the United States. He has attended all of the meetings of the International Soils Congress, including those held in Russia, Great Britain, Holland and this country.

Dr. Albrecht is the author of many scientific and popular articles on soils and soil fertility. He is a member of numerous national and international scientific societies.

Dr. William Weston Carpenter is known as an authority on school administration and finance. He has had almost 40 years of colorful teaching and research, including the teaching of science in high schools of Arizona, and three years as dean of the Phoenix (Ariz.) Junior College, which he helped establish. Later he went to George Peabody College for Teachers at Nashville, Tenn., where he trained teachers of physical science. He came to the University as professor of education in 1928 to teach school administration.

Dr. Carpenter was born and reared in Lawrence, Kan., and received his A.B. and Master of Arts degrees from the University of Kansas, the latter in 1917. He served as a second lieutenant of infantry in the U. S. Army in World War I, and has long been an active member of the American Legion.

After separation from active service he attended the University of Arizona and then went to Columbia University, where he received a Ph.D. degree in 1926.

Following the close of World War II, the United States government "borrowed" Dr. Carpenter to serve as Educational Reorganization Adviser to the military government in Japan and help establish a democratic system of education there.

Dr. Carpenter is a past chairman of the research commission of the American Association of Junior Colleges, and a past national secretary of Phi Delta Kappa, national education fraternity.

He is author or co-author of almost a score of published works, including "The Teacher and the School," (with John Ruff); "Community School Administration," (with Loran G. Townsend); "The Organization and Administration of the Junior College," and "Schoolhouse Planning and Construction."

Robert S. Clough first entered agricultural extension work in 1917, and, except for a two-year period

in the 1930s, he has continued in that work ever since. In 1937 he resigned from the Extension Service of the University to become general manager of the Midwest Wool Marketing Association in Kansas City, and he later served as agricultural commentator for a radio station before returning to the Extension Service in 1939 as State 4-H Club agent.

A native of Wyaconda, Mo., Clough attended Northeast Missouri State Teachers College in Kirksville and one semester at the University of Wisconsin. He then attended the University of Missouri, receiving a B.S. in Agr. degree in 1917. He began his career as an extension worker in Kentucky, but returned to Missouri in 1920 to accept an appointment as county agent of Johnson County.

He subsequently served as county agent of Pettis County, and then of Jackson County, where he remained from 1928 until joining the staff of the Wool Marketing Association in 1937. When he returned to the Extension Service in 1939, he was assigned to the position of State 4-H Club Agent. He remained in this capacity until August 1, 1958, relinquishing his 4-H duties to serve as technical adviser for a group of visitors from India under the International Cooperation Administration program.

During 1956-57 Clough served as a member of the National Association of Land Grant Colleges and Universities sub-committee on 4-H Club work, of which he was chairman in 1957, and he was presented the U. S. Department of Agriculture's Superior Service Award by Secretary of Agriculture Benson.

Benjamin H. Frame had the unusual experience of being an instructor in the University before he received his bachelor's degree.

A native of Springfield, Mo., he attended Southwest Missouri State College there before coming to the University as a student in 1916. His education was interrupted by World War I, as he enlisted in the U. S. Army in 1917.

Prof. Frame was appointed instructor in farm management in 1920, while still needing two hours credit for his baccalaureate degree. Within the year, however, he received the B.S. in Agr. degree. He also earned a Master of Arts degree here in 1925, and has done advanced graduate work at the University of Chicago and at Iowa State College. He advanced to assistant professor of agricultural economics in 1927; was named associate professor in 1940, and full professor in 1950.

Prof. Frame's specialty has been farm accounting and statistics, and for the last ten years he has devoted much of his time to teaching and research in the field of agricultural statistics. He is a member of a number of honorary and professional organizations, including Alpha Zeta, Alpha Pi Zeta, Sigma Xi, Gamma Sigma Delta, and the American Statistical Association.

Percy A. Hogan has been a librarian for 49 years, and 43 of those years have been at the University of Missouri School of Law. A native of Summerville,

Eight join Emeritus ranks from page 14

Mass., he attended Harvard University for two years before coming to the Middle West.

He served as assistant librarian of the Law School of the University of Chicago from 1909 until 1915, at which time he accepted a position as librarian at the School of Law here. Mr. Hogan relinquished some of his duties here in September, 1957, and has served on a limited basis since that time.

He was initiated an honorary member of Phi Delta Phi, professional legal fraternity, at special ceremonies on the annual Law Day program in 1955.

Mary Rose McKee came to the University in 1923 as assistant professor and head of the department of physical education for women. She was promoted to associate professor in 1925, and to full professorship in 1933. She continued to head the department until granted a leave of absence for this school year.

Miss McKee is a native of Wisconsin and a graduate of the University of Wisconsin with an A.B. degree. She has also done graduate work at Wellesley College, earning a title of "Graduate in Hygiene and Physical Education," which is considered equivalent to a master's degree, and further graduate work at Wisconsin and at Columbia University.

She taught physical education at Wisconsin University for ten years after her graduation there, and later spent three years as director of physical education for women at State College of Washington. She has also taught during summer sessions at Ohio State University and at the University of Michigan.

Dr. Harold Y. Moffett has spent almost his entire teaching career at the University, having joined the staff of the department of English here as assistant professor in 1924. In these 35 years he has led and inspired many young students into a better appreciation and creative use of the English language. He became an associate professor in 1926, and professor in 1938.

Born in Morning Sun, Iowa, in 1888, Prof. Moffett obtained his A.B. degree from Iowa Wesleyan College in 1913, and then attended the University of Chicago and the State University of Iowa. He received his Master's degree from State University of Iowa in 1920, and his Ph.D. degree in 1923.

While doing his graduate work, he served as assistant principal and head of the English department at Cedar Valley (Iowa) Junior College 1914-16; teacher of English in the high school and junior college of Mason City, Ia., 1916-19; and lecturer in English and education at the University of Wisconsin in the summer of 1923. He was also an associate in English at the University of Iowa in 1923-24 before his appointment to the staff here Sept. 1, 1924. He served here for many years on the University Committee on Accreditation of Missouri Schools and Colleges.

Hearing this dapper gentleman read poetry in his soft voice, few of his students would ever guess that

he owns a collection of fine guns which he has used extensively in big game hunting.

Dr. Claude A. Phillips is one of the grand old men of the campus and one of the Nation's most respected educators. Now 88 years old, he has been on limited service for a number of years, continuing to add his wealth of experience and scholarship to the modern concepts of education.

Many years ago, Dr. Phillips advocated that schools should abandon the nine-month limitation and provide eleven-month teaching facilities. This idea is just now gaining momentum among other modern educators.

Dr. Phillips also waged almost a one-man campaign to get salaries for elementary teachers equal to those of high school teachers.

Dr. Phillips was born in Chapel Hill, Mo., April 14, 1871. He attended Odessa (Mo.) College, where he received a Bachelor of Science degree, then the University of Chicago, Harvard University, and George Peabody College. He received his master's degree from the University of Chicago, and his Ph.D. degree from George Peabody College.

His professional career includes teaching in rural schools, teacher and principal in several Missouri cities, superintendent of schools in Lexington, Mo., professor of education in Central Missouri State College at Warrensburg, and finally dean and then acting president of Central Missouri State, before joining the University staff in 1924 as professor of education.

The University Elementary School under Dr. Phillips' direction gained wide recognition for its up-to-date programs and its teacher training programs.

He served on the Board of Curators of Lincoln University and aided in the reorganization of that institution.

Dr. Phillips retired from full-time service here in 1941 to direct a program of curriculum research at St. Joseph, Mo. but continued his teaching on a part-time basis in the University. After the program was completed in 1943, he remained on part-time status here and helped teach military personnel then stationed on the University campus.

He has remained on limited service since, teaching at least one graduate class in education each semester, and also serving in extension work.

Dr. Phillips has served as president of the Missouri State Teachers Association, which has honored him with its Distinguished Service Medal, and is a member of numerous honorary and professional organizations. He has been a prolific writer. His book of memoirs, "Fifty Years of Public School Teaching," published in 1948, is widely read and quoted. One of his books, "Elementary School Organization and Management," is still used by the U. S. Government in its foreign aid program.
