

Winter Wheat Planning Budget

his budget presents information useful to farmers planning the production, financing and marketing of winter wheat for grain. Table 1 presents estimates for the 2021 crop year for winter wheat production in northern, central and southwest Missouri. Assumptions were based on price conditions as of October 2020. Detailed prices and practices are summarized in Tables 2 and 3. The production practices used to develop these cost estimates are common in Missouri. Farmers are encouraged to modify this budget based on their circumstances.

Table 2 shows input assumptions used to estimate the winter wheat budget. Price estimates reflect harvest time prices. Costs or returns from storage or other marketing methods are not included. No income from government programs are added. Farm business overhead includes liability insurance, utilities, accounting, etc. Real estate charge is an estimated rental rate for above average land.
