\* Any student participating in a faculty-mentored research project will be required to register for 1 credit hour of OC\_THR 5340 during the second year summer semester.

### Admission Criteria

The occupational therapy program is in the process of transitioning to the entry-level doctoral degree. **New admissions to the master's degree program are no longer being accepted.**

For more information, contact:

Bethany Kendrick, Student Support Specialist II  
 801B Clark Hall; Columbia, MO 65211  
 573-884-6365

## Occupational Therapy (OTD)

Department of Occupational Therapy  
 School of Health Professions  
 801B Clark Hall, Columbia, MO 65211  
 (573) 882-3988; FAX (573) 884-2610  
<https://healthprofessions.missouri.edu/occupational-therapy/>

#### Entry-Level Doctoral Degree

The Department of Occupational Therapy is in the process of transitioning to a 3.5-year entry-level occupational therapy doctoral (OTD) degree, with first cohort selected during the 2020 application cycle, beginning coursework in Summer 2021, and graduating in August

2024. The application cycle for this cohort will be open July 2020 – January 2021. **Admissions decisions are made on a rolling basis and the program may be full prior to the application deadline.**

## Accreditation and Certification

### Entry-Level Doctoral Degree

The Department of Occupational Therapy entry-level occupational therapy doctoral degree program has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE’s telephone number c/o AOTA is (301) 652-AOTA and its Web address is [www.acoteonline.org](http://www.acoteonline.org) (<http://www.acoteonline.org>). The program must have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT), located at One Bank Street, Suite 300, Gaithersburg, MD 20878. NBCOT’s telephone number is (301) 990-7979 and its Web address is [www.nbcot.org](http://www.nbcot.org) (<http://www.nbcot.org>). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Students must complete 24 weeks of Level II fieldwork as well as an individual 14-week capstone experience within 24 months following the completion of the didactic portion of the program. The doctoral capstone experience must be started after completion of all coursework and Level II fieldwork as well as completion of preparatory activities defined in 2018 ACOTE OTD Standard D.1.3.

## Admission Criteria

Application window for entry-level occupational therapy doctoral (OTD) degree program beginning coursework in Summer 2021 opens July 2020, with an application deadline of January 15, 2021. Applications are reviewed on a rolling basis and admission offers may be made at any point during or after the application window. The Department of Occupational Therapy admits a cohort of 44 students each year.

- Minimum TOEFL or IELTS scores: (must have been completed in the last two years)

## Minimum English Proficiency Requirements

Internet-based test (iBT) Area	iBT Score	Paper-based test (PBT) Area	PBT Score
Total Score: 100, Reading: 20, Listening: 21, Speaking: 26, Writing: 17		Total Score: 600, Reading: 55, Listening: 55, Speaking: N/A, Writing: 55	

## IELTS Academic

Item	Score
Total Score	7
Reading	6.5

Listening	6.5
Speaking	8
Writing	6

- Minimum GPA: Cumulative 3.0 or higher (4.0=A). This includes ALL undergraduate completed coursework. Official transcripts from each institution must be sent to OTCAS.
- Completion of all prerequisites at a grade of B- or better
- 20 hours of observation with a licensed Occupational Therapist in at least 2 different practice settings. Observation forms uploaded to OTCAS.
- 3 letters of recommendation, uploaded to OTCAS
- Personal statement and essay, uploaded to OTCAS
- Resume, including minimum of 20 hours of volunteer experience, uploaded to OTCAS

## Prerequisite Courses

The following prerequisite courses must be completed with a B- or better prior to starting MUOT’s program. Prerequisites are subject to minor changes with each application cycle.

- General Biology – 3 credit hour course with a lab or 4 credit hours combined lecture/lab minimum
- Human Anatomy\* – 3 credit hour course with a lab or 4 credit hours combined lecture/lab minimum
- Human Physiology\* – 3 credit hour course with a lab or 4 credit hours combined lecture/lab minimum
- Human Movement Science\* – 3 credit hour combined lecture and lab minimum. Strong preference for Kinesiology or Biomechanics. Physics is a third option if the first two are not available.
- Sociology – 3 credit hour course minimum
- Abnormal Psychology – 3 credit hour course minimum
- Human Development – Must address development across the lifespan. 3 credit hour course minimum
- Introduction to Statistics – 3 credit hour course minimum. Any introductory statistics course in any discipline is acceptable.
- Medical Terminology – 1 credit hour minimum. Can take for credit or noncredit. Will accept a passing grade if taken as a pass/fail course.

\*Courses must have been completed within 4 years of application. Human Anatomy and Human Physiology can be substituted with Human Anatomy & Physiology I and Human Anatomy & Physiology II (both with lab)

Advanced placement, dual credit, and transfer credits for prerequisite coursework are acceptable if they were recognized by your undergraduate institution and appear on official transcripts at the time of application. Transfer credits may not be applied toward the OTD degree. The Department of Occupational Therapy does not allow credit for experiential learning or work experience to count toward any of the OTD degree requirements.

## Required Application Materials

- Go to <https://healthprofessions.missouri.edu/occupational-therapy/about/admissions/> for departmental application forms (available July - Jan. 15)

- All applications will be submitted through the Occupational Therapy Centralized Application System (OTCAS (<https://otcas.liasoncas.com/applicant-ux/#/login>))
- Observation Forms and supplemental fee

For more information, contact:

Bethany Kendrick, Student Support Specialist II  
801B Clark Hall; Columbia, MO 65211  
573-884-6365

**Post-Professional Occupational Therapy Doctorate (PPOTD)**

A Post-Professional Occupational Therapy Doctorate (PPOTD) program, for individuals with a previous bachelor's or master's degree in occupational therapy and already licensed to practice as an occupational therapist, is in the process of development. The PPOTD program is designed to provide occupational therapists with the opportunity to advance their formal education. Students earning the OTD degree on a post-professional basis will have the ability to customize their educational plans to meet their unique academic and professional goals, which may include, but are not limited to, advanced clinical practice, leadership and management, research, and occupational therapy education. They will have the opportunity to select unique combinations of elective coursework and doctoral capstone experiences. Furthermore, because all post-professional coursework will be offered online, nearly all postprofessional students are expected to complete their OTD degrees on a part-time enrollment basis while maintaining employment as OT practitioners. Students applying to the post-professional OTD program must previously have completed an entry-level OT degree at the bachelor's or master's level and be licensed to practice as an OT in their state of residence.

**Admissions Criteria**

- Proof of state OT licensure (any state)
- Official transcripts for all previous coursework
- Professional statement/goals
- One professional reference

Additional information regarding application and admission will be made available in Fall 2020, with admitted students beginning coursework in Fall 2021.

**Financial Aid**

Check the School of Health Professions website at <https://healthprofessions.missouri.edu/student-services/scholarships/> for scholarship information.

**Curriculum**

**Degree Requirements**

**Entry-Level OTD**

This includes students with no previous OT degree to practice as licensed occupational therapists. Students must complete a baccalaureate degree in any field, including several specific prerequisite courses, prior to beginning the entry-level OTD program. Students will complete 116 credit hours over 3.5 years in a full-time on-site cohort model curriculum.

Students will also be required to pass a national certification exam administered by the National Board of Certification in Occupational Therapy (NBCOT) in order to gain entry into the profession and obtain licensure. Students will have the ability to customize their educational

plans through unique combinations of elective coursework, fieldwork, and doctoral capstone experiences.

OC_THR 6191	Community Engagement in HP	
OC_THR 6192	Research in OT	
OC_THR 6193	Complex Adaptive Leadership	

Coursework is subject to minor changes as the program makes occasional curricular revisions to meet accreditation requirements and to reflect contemporary occupational therapy practice.

**Early-Entry Options for the Entry-Level OTD**

The University of Missouri OTD program offers two early-entry options for students who are interested in OT and want to begin OT coursework prior to the completion of a bachelor’s degree. While a bachelor’s degree is not required to complete the OTD, we strongly encourage applicants who want to pursue early-entry to also obtain a bachelor’s degree if at all possible.

**3+3 BHS / OTD Option for MU Health Sciences Students**

MU Health Sciences students have the option to apply for early consideration for admission to the MU OT program. Selected students will complete a 3+3 option, with 3 years of undergraduate coursework + 3 years of professional OT coursework to earn both a Bachelor in Health Science (BHS) and an Occupational Therapy Doctorate (OTD) degree.

- Students considering this option will apply during the Summer/Fall after their sophomore year (after 60 credit hours completed); selected students begin coursework the summer after completion of their junior year
- Students must have evidence of a minimum of three semesters of college coursework after high school graduation.
- First year of OTD professional coursework also counts toward the BHS degree. Students must have at least 90 credits, all OT prerequisites, and all BHS degree requirements except the capstone requirement completed before beginning the OTD program. Students will then graduate with their BHS in May after successfully completing the 1st year of OTD coursework. The first year of OTD coursework includes a fieldwork experience and a practicum experience which combined will meet the capstone requirement for the BHS degree.
- Students applying for the 3+3 option will be considered in the same pool as all other applicants. There are no reserved spots for 3+3 applicants, nor is there a limit on the number of 3+3 applicants we will accept.
- The more prerequisites you have completed at the time of application, the more strongly your application will be considered. (Same is true for all applicants.)
- Professional tuition begins at the start of OTD coursework; students enrolled in professional coursework are no longer eligible for Pell Grants. See <https://cashiers.missouri.edu/cost/> for current professional tuition rates for the occupational therapy program.

MU Health Sciences students applying for the 3+3 option must work very closely with their undergraduate School of Health Professions advisors before, during, and after application to ensure that they have completed all Health Science degree program requirements AND all OT prerequisites before beginning the OTD program.

**Sample Pre-OT Plan with Electives:** <https://healthprofessions.missouri.edu/wp-content/uploads/sites/7/2020/04/Sample-Pre-OT-Academic-Plan-with-Electives.pdf> (<https://healthprofessions.missouri.edu/wp-content/uploads/sites/7/2020/04/Sample-Pre-OT-Academic-Plan-with-Electives.pdf>)

**Sample Pre-OT Plan without Electives:** <https://healthprofessions.missouri.edu/wp-content/uploads/sites/7/2020/04/Sample-Pre-OT-Academic-Plan-without-Electives.pdf> (<https://healthprofessions.missouri.edu/wp-content/uploads/sites/7/2020/04/Sample-Pre-OT-Academic-Plan-without-Electives.pdf>)

[healthprofessions.missouri.edu/wp-content/uploads/sites/7/2020/04/Sample-Pre-OT-Academic-Plan-without-Electives.pdf](https://healthprofessions.missouri.edu/wp-content/uploads/sites/7/2020/04/Sample-Pre-OT-Academic-Plan-without-Electives.pdf))

Please note that the Health and Wellness emphasis is not required for application to the OTD program, but that particular emphasis area may offer the most flexibility in completing both the OT prerequisites and the BHS degree requirements in 3 years.

**These academic plans are intended to be a guide for students preparing to apply to the 3+3 entry-level OTD program, but they do not replace advising.** Students must seek advising from a School of Health Professions advisor before and after application to ensure that they are on track to complete all requirements for their declared emphasis area for the Health Science degree.

**Students must have approval from their School of Health Professions advisor in order to apply for the 3+3 option.** Additional information regarding documentation of this approval will be available during each application cycle.

The first opportunity to apply for the 3+3 option will be during the application cycle running July 2020 - January 2021, with accepted students for the 3+3 program beginning professional coursework in Summer 2021, graduating with a BHS in Spring 2022, and graduating with an OTD in Summer 2024. **Admissions decisions are made on a rolling basis and the program may be full prior to the application deadline.**

**Early-Entry Option for Students Outside the University of Missouri**

There will be an early-entry option available to prospective students from outside the University of Missouri who are interested in the OTD program. Students must complete a minimum of 90 credits of undergraduate coursework, all of the prerequisite course requirements and all other admission requirements before starting the OTD program. Completion of their undergraduate degree will be contingent on their undergraduate institution allowing the courses in the first year of the OTD program to count toward completion of their undergraduate degree.

**Post-Professional OTD with Master's in OT**

This includes students entering with a master's degree in Occupational Therapy, and licensed to practice as occupational therapists. Students entering at this level will complete 36 credits which will be offered entirely online. Students will have the ability to customize their educational plans to meet their unique academic and professional goals. Since they are already practicing occupational therapists, they will not be required to complete fieldwork experiences. However, they will have the opportunity to select unique combinations of elective coursework and doctoral capstone experiences. Furthermore, because all post-professional coursework will be offered online, students may choose to complete their degree on a part-time enrollment basis.

**Post-Professional OTD with Master's in OT Required Coursework**

OC_THR 6010	Occupation Based Practice	3
OC_THR 6020	Population Health	3
OC_THR 6030	Professional Leadership & Development	3

Elective #1		3

Elective #2	3
Elective #3	3

Coursework is subject to minor changes as the program makes occasional curricular revisions to meet accreditation requirements and to reflect contemporary occupational therapy practice.

**Post-Professional OTD with Bachelor's in OT**

This includes students entering with a bachelor's degree in Occupational Therapy, and licensed to practice as occupational therapists. Students entering at this level will complete 15 hours of foundational coursework, followed by 36 credits of PPOTD coursework, for a total of 51 credits, which will be offered entirely online. Students will have the ability to customize their educational plans to meet their unique academic and professional goals. Since they are already practicing occupational therapists, they will not be required to complete fieldwork experiences. However, they will have the opportunity to select unique combinations of elective coursework and doctoral capstone experiences. Furthermore, because all post-professional coursework will be offered online, students may choose to complete their degree on a part-time enrollment basis.

## Physical Therapy

K. Gibson, Chair  
 Department of Physical Therapy  
 School of Health Professions  
 801 Clark Hall  
 (573) 882-7103  
 Fax: (573) 884-8369  
<https://healthprofessions.missouri.edu/physical-therapy/>

Physical therapists (PTs) are health care professionals who diagnose and treat individuals of all ages, from newborns to the very oldest, who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives.

PTs examine each individual and develop a plan using treatment techniques to promote the ability to move, reduce pain, restore function,

and prevent disability. In addition, PTs work with individuals to prevent the loss of mobility before it occurs by developing fitness- and wellness-oriented programs for healthier and more active lifestyles.

The University of Missouri offers a Doctor of Physical Therapy degree.

## Admissions

### Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

### Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

## Faculty

- Emeritus Professor** M. Brown\*, M. A. Minor\*
- Teaching Professor** T. Briedwell\*, K. Gibson\*
- Clinical Professor** C. C. Abbott\*
- Associate Professor** E. A. Dannecker\*\*, T. M. Guess\*\*, S. P. Sayers\*\*
- Associate Teaching Professor** D.E. Martin\*, E. Probst\*, K. Stephens\*
- Associate Clinical Professor** M. S. Hargrove\*
- Assistant Professor** J. Craggs\*
- Assistant Teaching Professor** R. Bliss\*, C. Blow\*, J. Bridges\*, A. Campbell\*, J. Hall\*, B. Willis\*

\* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.  
 \*\* Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

## Physical Therapy (DPT)

Physical Therapy Doctoral Degree Program (<https://healthprofessions.missouri.edu/physical-therapy-program/>)  
 School of Health Professions  
 801 Clark Hall  
 573-882-7103  
 573-884-8369 (fax)  
 MUSHPPT@missouri.edu

Students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

## Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

## Financial Aid from the Program

The Department of Physical Therapy recognizes the financial commitment of attending PT school and how financial decisions can influence your future. MU is an exceptional value and it's understandable that financing your PT education can be daunting. The Financial Aid Office (<https://financialaid.missouri.edu/>) offers support in the area of student finances including financial aid, financial literacy as well as individual financial counseling.

It is important for students to review their finances and consider the resources available to pay for their DPT degree. Mizzou DPT students finance their education through savings, scholarships, and student loans. Financial aid resources are allocated on the basis of academic merit and financial need.

Students may apply for scholarships at the end of their first and second year in the professional phase of the program. For PT scholarship information, download PT Scholarships: Application instructions (<https://healthprofessions.missouri.edu/physical-therapy-program/wp-content/uploads/sites/3/2016/06/Department-of-Physical-Therapy-Scholarships.docx>).

## Curriculum

### Degree Requirements

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program. Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.

### Plan of Study

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years (including summer sessions), beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Graduates are eligible for licensure anywhere in the United States.

## Application and Admission Information

All applicants will apply to the Graduate School online admission process. Graduate School applications must be submitted and complete by September 30th.

The departmental application will be completed during the on-line admission process.

Students who are admitted without a degree will receive a bachelor's degree upon completion of the first year of the program.

## Admission Criteria

- Minimum TOEFL scores:

Internet-based test (iBT) Area	iBT Score	Paper-based test (PBT) Area	PBT Score
Reading	17	Reading	52
Listening	17	Listening	52
Speaking	17	Speaking	N/A
Writing	17	Writing	17
TOTAL	80	TOTAL	550

- Minimum IELTS scores:

Item	Score
Reading	6
Listening	6
Speaking	6
Writing	6
Total Score	6.5

- Minimum GPA: 3.0

## Required Application Materials

*To Graduate School:*

- All required Graduate School documents/application fee
- Departmental application/application fee
- 2 letters of recommendation as specified by the application instructions
- Activities and Awards Questionnaire as specified by the application instructions
- Distinct Experiences and Attributes Essay (see application instructions)
- Unofficial transcripts (year of application, summer grades must be recorded on transcript)
- GRE scores must be sent to MU, Institution Code R6875

## Admission Contact Information

Beverly Denbigh  
 School of Health Professions  
 801 Clark Hall  
 573-882-7103 or 7250  
 573-884-8369 (Fax)

## Prerequisites for the Doctoral Degree

**Note:** The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor's degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

Regular admission applicants must have at least a 3.0 GPA in the core required courses (<https://healthprofessions.missouri.edu/physical-therapy-program/wp-content/uploads/sites/3/2018/03/2018professional-numbers.pdf>) and the cumulative GPA in the last 60+ credit hours.

Students who enter without a bachelor's degree must have satisfied general education and graduation requirements, including two Writing Intensive courses. These applicants must have at least a 3.5 cumulative GPA at the time of application.

On-campus interviews are required for admission to the professional program.

Applicants are notified of the selection committee's decision by December.

All students are strongly encouraged to contact the School of Health Professions Office of Student Services for advisement and planning well in advance of application.

Admission to the program is selective.

## College of Veterinary Medicine

---

The college was established in 1946. It offers a four-year professional program leading to the Doctor of Veterinary Medicine (DVM) degree. Applicants (<http://cvm.missouri.edu/prospective-students/>) generally have a B.S. or B.A. degree but can be admitted after completing prerequisite course requirements

The Pre-Veterinary Medical Scholars and AgScholars programs (<http://cvm.missouri.edu/prospective-students/early-acceptance-programs/>) provide early assurance of admission to the MU College of Veterinary Medicine upon satisfactory completion of undergraduate and program requirements. Students work with advisers in the college, and they observe veterinarians at work as part of the program. Students with a minimum ACT score of 30 or an equivalent SAT score are eligible to apply for the Pre-Vet Scholars Program. The required minimum ACT score for the AgScholars Program is 27 and applicants must have demonstrated experience in livestock production and health. Once at Mizzou, scholars must meet program minimum standards, including maintaining a 3.5 cumulative GPA. For more information, call the College of Veterinary Medicine at 573-884-3341.

In addition to the professional program, the college's Department of Veterinary Pathobiology offers a bachelor of science degree in microbiology (<http://vpbio.missouri.edu/undergraduate-studies/>). This program provides students with a thorough and challenging curriculum designed to prepare graduates for a multitude of careers, including entry-level positions in research, clinical and pharmaceutical laboratories, graduate studies in microbiology and other scientific fields, and admission to schools of health professions.

Online biomedical science courses (<http://biomedonline.missouri.edu/online-programs-for-graduate-veterinary-technicians-in-veterinary-biomedical-technology/>) available to undergraduate and graduate students through the College of Veterinary Medicine are listed in this catalog. These can be used to fulfill the requirements of a Certificate in Biomedical Science, for a licensed veterinary technician to complete a baccalaureate degree or to earn a master's degree in biomedical sciences.

The college also provides diagnostic and patient care services for animals. The CVM has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The college also offers post-graduate training to interns, residents in various specialties (<http://www.vms.missouri.edu>) and graduate students (<http://cvmresearch.missouri.edu/>).

For more information about the College of Veterinary Medicine, call (573) 882-3768, or visit <http://cvm.missouri.edu> (<http://cvm.missouri.edu/>)

### Faculty

Department of Biomedical Sciences: <http://biomed.missouri.edu/faculty-and-staff/>

Department of Veterinary Medicine and Surgery: <http://www.vms.missouri.edu/faculty.html>

Department of Veterinary Pathobiology: <http://vpbio.missouri.edu/faculty.html>

### Academic Policies

Below is a listing of policies that apply only to students admitted to the College of Veterinary Medicine. The full CVM student handbook can

be found at: <http://www.cvm.missouri.edu/current-students/student-handbook/> (<http://cvm.missouri.edu/current-students/student-handbook/>)

CVM students must also abide by the University's Academic Polices that apply to all students.

The policies and procedures of the MU College of Veterinary Medicine are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the College. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes only, and are subject to change without notice. They are not to be regarded as offers to contract.

## DVM in Veterinary Medicine

---

### Overview

The DVM degree is achieved after a four-year course of study. Applicants generally have a B.S. or B.A. degree but can be admitted after completing prerequisite course requirements. <http://cvm.missouri.edu/prospective-students/>

At the University of Missouri, the first two years are largely spent in classrooms and laboratories with the second two years devoted primarily to clinical study in the Veterinary Health Center.

The curriculum at the MU College of Veterinary Medicine is designed to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs and with the background necessary for careers in regulatory medicine.

In the first two years, all students follow the same schedule, and courses must be successfully completed in sequence. In the final two years of the professional program, the student must successfully complete the required and elective clinical rotations to fulfill graduation requirements.

To receive the DVM degree, students must pass all courses. In addition to passing examinations, attendance and participation in all lectures, laboratories and clinical exercises is required. The doctor or veterinary medicine degree is awarded after successful completion of the professional program.

## Curriculum

### Objectives and Summary of the Professional Curriculum

The primary objective of the CVM curriculum is to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs, or for careers in regulatory medicine. The overall objective of the first two years of the curriculum is to provide students with a solid foundation in basic biomedical sciences. The courses in the preclinical professional curriculum include anatomy, physiology, cell and molecular biology, pathology, pharmacology, microbiology, virology, and toxicology. The fundamentals of the clinical disciplines are also taught during this time and include anesthesiology, clinical pathology, radiology, public health, medicine and surgery.

The organizational scheme of the professional curriculum differs from that of other schools in that the first two academic years are divided into eight-week instructional periods and our academic year runs from August through June. The students have a summer break between the first and second years and second and third years of instruction that is approximately seven weeks in duration. The overall objective of the clinical curriculum is to solidify basic knowledge and practice clinical skills in the Veterinary Health Center, VMDL, and external preceptorships. This portion of the curriculum is organized into 12 clinical blocks that begin in October of the third year of professional instruction. These clinical blocks are six to eight weeks in duration and may be divided into 1, 2, or 3 clinical courses. The required clinical rotations are listed below and organized by duration:

### Required Clinical Rotations

**Full Block Rotations:** Food Animal Medicine and Surgery; Equine Medicine and Surgery; Small Animal Community Practice and Shelter Medicine; Diagnostic Pathology and Special Species Medicine.

**Third Block Rotations:** Theriogenology; Ophthalmology; Small Animal Internal Medicine; Small Animal Emergency and Critical Care; Oncology; Soft Tissue Surgery; Orthopedic Surgery; Neurology and Neurosurgery

**Half Block Rotations:** Clinical Radiology; Clinical Anesthesia

Note that students are required to complete four credit hours (four weeks) of external evaluated preceptorships as part of the required curriculum. Students also select 10 credit hours of elective rotations (cardiology, nutrition, production medicine, special imaging, etc.). In addition to required and elective blocks, students are allotted two blocks as 'free time.' Most students utilize their free time to study for licensing examinations, complete preceptorships at practices, or interview with prospective employers. A total of 154.5 semester credit hours are required for graduation. Most students accumulate a higher number of credit hours as a result of enrollments in extra didactic or clinical elective courses.

#### VM-1 Required Courses (Instructional Periods 1-4)

Instructional Periods 1 and 2; August - December		
V_BSCI 5500	Veterinary Anatomy with Laboratory	4
V_BSCI 5502	Veterinary Microscopic Anatomy with Laboratory	3
V_BSCI 5504	Veterinary Physiology	5
V_BSCI 5506	Veterinary Molecular and Cellular Biology	4

V_BSCI 5100	Veterinary Neuroscience	2
<b>Instructional Period 3; January - February</b>		
V_BSCI 5011	Veterinary Anatomy	3
V_BSCI 5020	Developmental Anatomy	0.5
V_BSCI 5503	Veterinary Microscopic Anatomy	2
V_BSCI 5051	Veterinary Gastrointestinal	2
V_M_S 6005	Clinical Skills	0.5
V_M_S 6140	Nutrition with Laboratory	1.5
<b>Instructional Period 4; March - April</b>		
V_BSCI 5012	Veterinary Anatomy with Laboratory	3
V_BSCI 5021	Developmental Anatomy	0.5
V_BSCI 5052	Veterinary Endocrinology and Reproductive Physiology	2
V_PBIO 5511	Veterinary Immunology	1.5
V_PBIO 5555	Epidemiology and Biostatistics with Laboratory	2
V_M_S 6006	Clinical Skills	0.5
<b>VM-2 Required Courses (Instructional Periods 5-9)</b>		
<b>Instructional Period 5; May - June</b>		
V_PBIO 5512	Veterinary Immunology	1.5
V_PBIO 5552	Veterinary Bacteriology with Laboratory	3
V_PBIO 5575	Veterinary Pathology with Laboratory	3
V_PBIO 5579	Veterinary Genomics	1
<b>Instructional Period 6; August - October</b>		
V_PBIO 5553	Veterinary Bacteriology II	2.5
V_PBIO 5554	Veterinary Virology	2.5
V_PBIO 5557	Veterinary Parasitology with Laboratory	3
V_PBIO 5576	Veterinary Systemic and Special Pathology with Laboratories	3
<b>Instructional Period 7; October - December</b>		
V_BSCI 5507	Veterinary Pharmacology with Laboratory	3
V_PBIO 5558	Veterinary Public Health	2
V_PBIO 5577	Veterinary Systemic and Special Pathology II with	3
V_PBIO 5601	Animals in Emergencies & Basic Emergency Response Training for Vet Students	1
V_M_S 6130	Fundamentals of Veterinary Business Management	1
<b>Instructional Period 8; January - February</b>		
V_BSCI 5508	Veterinary Pharmacology	2
V_PBIO 5578	Veterinary Clinical Pathology with Laboratory	3
V_PBIO 6010	Laboratory Animal Medicine	1.5
V_M_S 6020	Veterinary Radiology with Laboratory	2
<b>Instructional Period 9; March - April</b>		
V_BSCI 5509	Veterinary Toxicology	3
V_M_S 6030	Veterinary Anesthesiology with Laboratory	2
V_M_S 6040	Companion Animal Medicine with Laboratory	4
V_M_S 6060	Small Animal Surgery with Laboratory	2
<b>VM-3 Courses (Instructional Periods 10-11)</b>		
<b>Instructional Period 10; May - June Required Courses</b>		
V_M_S 6050	Small Animal Medicine	2.5
V_M_S 6071	Small Animal Surgery	2
V_M_S 6073	Fundamental Surgery Laboratory	1

V_M_S 6081	Food Animal Medicine and Surgery	2.5
V_M_S 6151	Equine Medicine and Surgery	2
<b>Instructional Period 10; May - June Electives</b>		
V_M_S 6072	Optional Surgery and Anesthesia Laboratory	1
<b>Instructional Period 11; August - October</b>		
V_M_S 6082	Food Animal Medicine and Surgery	2
V_M_S 6090	Small Animal Emergency and Critical Care with Laboratory	1
V_M_S 6110	Theriogenology	3
V_M_S 6120	Veterinary Ophthalmology	1
V_M_S 6152	Equine Medicine and Surgery	1.5
<b>Instructional Period 11; August - October Elective Courses</b>		
V_PBIO 5991	Introduction to Avian Medicine	1
V_M_S 6986	Advanced Clinical Neurology and Neurosurgery	1
V_M_S 6987	Problem-Based Learning Clinic Preparation	1
V_M_S 6988	Small Animal Clinical Nutrition	1
V_M_S 6989	Advanced Oncology of Animals	1
V_M_S 6990	Zoological Medicine	2
V_M_S 6991	Advanced Equine Lameness with Laboratory	1
V_M_S 6993	Advanced Veterinary Anesthesia	1
V_M_S 6994	Advanced Techniques in Small Animal Surgery with Laboratory	1
V_M_S 6995	Clinical Cardiology	1
V_M_S 6996	Advanced Dermatology	1
V_M_S 6997	Food Animal Diagnostic Exercises	1
V_M_S 6998	Small Animal Behavioral Medicine	1
V_M_S 6999	Food Animal Surgery Laboratory	1
<b>VM-3 and VM-4 Required Clinical Rotations (October - Graduation)</b>		
V_M_S 6010	Evaluated Veterinary Preceptorship	2-12
V_M_S 6400	Food Animal Medicine and Surgery I	6
V_M_S 6411	Small Animal Internal Medicine	2
V_M_S 6412	Small Animal Community Practice	6
V_M_S 6420	Equine Medicine and Surgery I	6
V_M_S 6432	Small Animal Soft Tissue Surgery	2
V_M_S 6434	Small Animal Orthopedic Surgery	2
V_M_S 6436	Veterinary Neurology/Neurosurgery	2
V_M_S 6441	Clinical Radiology I	3
V_M_S 6442	Clinical Anesthesiology I	3
V_M_S 6450	Theriogenology I	2
V_M_S 6460	Clinical Ophthalmology I	2
V_M_S 6490	Small Animal Specialty Medicine I	2
V_M_S 6820	Small Animal Emergency and Critical Care	2
V_PBIO 6647	Diagnostic Pathology and Special Species Medicine	8
<b>Elective Clinical Rotations</b>		
V_M_S 6700	Food Animal Medicine and Surgery II Elective	2-6
V_M_S 6710	Small Animal Medicine II Elective	2-6
V_M_S 6711	Small Animal Internal Medicine Elective Clinical or Research Rotation	2

V_M_S 6712	Private Practice Small Animal Internal Medicine Elective	2
V_M_S 6720	Equine Medicine and Surgery II Elective	2-6
V_M_S 6732	Small Animal Soft Tissue Surgery II Elective	2
V_M_S 6734	Small Animal Orthopedic Surgery II Elective	2
V_M_S 6736	Veterinary Neurology/ Neurosurgery- Elective	2
V_M_S 6741	Clinical Radiology II Elective	2-6
V_M_S 6742	Clinical Anesthesiology II Elective	2-6
V_M_S 6743	Radiology - Special Imaging Elective	2-3
V_M_S 6750	Theriogenology II Elective	2-6
V_M_S 6751	External Food Animal Service and Theriogenology Teaching Program	2-6
V_M_S 6760	Small Animal Nutrition	2
V_M_S 6800	Clinical Ophthalmology II Elective	2-6
V_M_S 6810	Cardiology II Elective	2
V_M_S 6821	Small Animal Emergency Critical Care Elective	2
V_M_S 6830	Food Animal Production Medicine	6
V_M_S 6850	Clinical Oncology	2-6
V_PBIO 6676	Laboratory Animal Medicine and Management Elective	4-6
V_PBIO 6678	Epidemiology and Community Health	2-6
V_PBIO 6679	Diagnostic Pathology and Special Species Medicine	2-6
V_PBIO 6684	Research Techniques in Veterinary Pathobiology	2-6

## Preceptorships

Missouri students are encouraged to use free blocks for preceptorships to increase exposure to veterinary practice and to meet the requirements of the Missouri Veterinary Medical Practice Act. The University of Missouri College of Veterinary Medicine does not have the authority to approve the use of student free block time or the veterinarians with whom they gain experience.

Available preceptorships may be found by contacting the Office for Student Affairs.

Preceptorship requirements and forms required by the Missouri State Veterinary Medical Board can be found at their website: <http://pr.mo.gov/veterinarian.asp>

The level of supervision required by preceptors is detailed at: <http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf>

The Missouri State Veterinary Medical Board preceptorship form may be found at: <http://pr.mo.gov/veterinarian-application-forms.asp>

## Licensing Examination

### Professional Licensing Information

In addition successfully completing a professional veterinary education, most states require state and national licensing examinations to meet requirements to practice. Please visit the International Council for Veterinary Assessment (ICVA) and the American Association of Veterinary State Boards (AAVSB (<http://www.aavsb.org/>)) websites for further information.

# Program Updates Since Publication in May

---

This page is used to display programs that have been approved or deleted/inactivated after publication of the University Catalog. This includes degrees, emphasis areas, certificates and minors.

**New Programs:**

As of this time, there are no newly approved programs since the initial publication of the 2020-21 catalog.

**Discontinued Programs:**

As of this time, there are no newly deleted or inactivated programs since the initial publication of the 2020-21 catalog.

**Programs with Title changes (new title shown below):**

As of this time, there are no newly changed program titles since the initial publication of the 2020-21 catalog.

## About MU

---

### Our mission

As the only state-supported member of the Association of American Universities, Mizzou provides Missourians the benefits of a world-class education. MU's unique physical infrastructure and scholarly environment stimulate teaching, research, service and economic development on behalf of all citizens. Students work side by side with some of the world's best faculty to advance arts, humanities, sciences and professions. Scholarship and teaching are driven by a sense of public service and an obligation to produce and disseminate knowledge that improves the quality of life in the state, the nation and the world.

### Mizzou, Missouri's Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students take advantage of various experiences in classrooms, residence hall learning communities, collaborative research opportunities and creative projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across a broad range of disciplines.

We improve the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our intellectual resources to improve the civic, economic and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

### Accreditation

---

The University of Missouri is accredited by the Higher Learning Commission. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

# Important Facts

---

## History

Founded in 1839, the University of Missouri was established in Columbia as the first public university west of the Mississippi River and the first in Thomas Jefferson's Louisiana Purchase territory. In 1870, the University of Missouri was approved as a land-grant university under the Morrill Act of 1862. The original mission of land-grant institutions was to make higher education accessible to more people. Gradually, that mission has expanded to include research, service and outreach enabling the state's citizens to benefit directly from the knowledge gained through university research. As Missouri's flagship university, MU continues its historic mission through its emphasis on excellence in teaching, research, service and economic development.

## Students

- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The university has more than 30,000 undergraduate students who choose courses from a broad range of academic disciplines.
- The university also has more than 5,000 graduate and professional students enrolled in more than 150 different degree programs. The professional schools include more than 1,400 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, in which students with shared academic interests live in the same residence hall and attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

## The Campus

- The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief, including the six Ionic Columns adorning Francis Quadrangle, the Memorial Union Tower honoring fallen soldiers and the MU Student Center completed in 2010.
- The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features more than 42,000 plants and invites a stroll

through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia among the top cities in the nation for its excellent quality of life.

## Alumni

With more than 340,000 living alumni, Mizzou's influence spans the globe. Notable graduates include Grammy Award-winning musician Sheryl Crow, Academy Award-winning actor Chris Cooper, Emmy Award-winning actor Jon Hamm, Peabody Award-winning journalist Jim Lehrer and Cy Young Award-winning pitcher Max Scherzer. Mizzou alumni succeed after graduation: 92.7 percent of MU graduates find successful career outcomes including employment, continued education and military service.

Hannah Clampitt, Chair, Staff Advisory Council  
Julia Wopata, President, Missouri Students Association  
Alek Willsey, President, Graduate Professional Council  
Andrea Allison-Putman, President, Mizzou Alumni Association

## Notifications

---

All statements in this catalog are announcements of present policies only, and are subject to change without notice. They are not to be regarded as offers to contract. If you have questions or note errors or omissions, please contact the Office of the University Registrar (<http://registrar.missouri.edu>). Below is additional information for items on which the University is required to make available.

## Accommodations for Students with Disabilities

The University of Missouri complies with the American with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or e-mail [disabilityservices@missouri.edu](mailto:disabilityservices@missouri.edu) as soon as possible so that appropriate arrangements can be made. For more information please visit the website at <http://disabilityservices.missouri.edu>. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

## Complaint Resolution

The University of Missouri desires to resolve student grievances, complaints and concerns in an efficient, fair and amicable manner. For details on procedures to file a complaint, please refer to the section on Complaint Resolution at <http://financialaid.missouri.edu/consumer-information-disclosures/index.php> (<http://financialaid.missouri.edu/consumer-information-disclosures/>).

## Equity in Athletics Disclosure Act

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

## Family Education Rights and Privacy Act (FERPA)

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student's name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to <http://registrar.missouri.edu/policies/ferpa.php>. (<http://registrar.missouri.edu/policies-procedures/ferpa.php>)

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See <http://registrar.missouri.edu/registration-adddrop/additional-authorized-access.php> (<http://registrar.missouri.edu/parents/>) for more information.

The University does not release grades to parents unless the student specifically authorizes it in writing in the Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. "Parent" means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

## Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

## Oak Ridge Associated Universities (ORAU) Consortium

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities

for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the *ORISE Catalog of Education and Training Programs*, which is available at <https://www.orau.org/index.html> (<https://www.orau.org/>), or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert V. Duncan

Vice Chancellor for Research

ORAU Councilor for University of Missouri

Monnie E. Champion

ORAU Corporate Secretary (865-576-3306); or

Visit the ORAU Home Page (<http://www.orau.org>)

## State of Missouri Registration for Professional Engineers

The Revised Statutes of Missouri (Section 327.221) require that "all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET)." All MU undergraduate engineering bachelor's-level programs are so accredited. Applicants who receive advanced degrees in MU's engineering programs but who do not have a bachelor's degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor's degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

## Veteran Access, Choice and Accountability Act of 2014, Section 702

The University is compliant with the requirements of PL 113-146 the Veteran Access, Choice and Accountability Act of 2014, Section 702. Section 702 targets educational assistance through ensuring in-state

tuition/in-district rates to uniformed services veterans and their qualified dependents covered under this Section.

These new requirements will ensure that our Nation's recently discharged Veterans, and their eligible family members, will not have to bear the cost of out-of-state charges while using their well-deserved education benefits.

The following individuals shall be charged the in-state/in-district rate, or otherwise considered a resident, for tuition purposes:

- A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge from a period of active duty service of 90 days or more.
- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor's discharge from a period of active duty service of 90 days or more.
- A spouse or child using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the Service member's death in the line of duty following a period of active duty service of 90 days or more.
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or death described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

## Veterans Benefits and Transition Act of 2018, Section 103

In compliance with Section 103 of the Veterans Benefits and Transition Act of 2018, the University of Missouri will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries or other institutional facilities. Further, the University of Missouri will not require that a Chapter 31 or Chapter 33 recipient borrow additional funds to cover the individual's inability to meet his or her financial obligations due to the delayed disbursement of a payment by the U.S. Department of Veterans Affairs.

## A Statement of Values

---

The University of Missouri, as the state's major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

## Respect

Respect for one's self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

## Responsibility

A sense of responsibility requires careful reflection on one's moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

## Discovery

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries — what we know is not all that is.

## Excellence

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other's successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

## Undergraduate Academic Assessment Goals

---

All undergraduate students are required to participate in the University's processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students' undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University's learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student's chosen major fields of study. Toward that end, in addition to having every bachelor's degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

**Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.**

MU graduates will be able to:

- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory research.
- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

**Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.**

MU graduates will be able to:

- Communicate information to a variety of audiences and purposes.
- Revise and edit their presentations to improve clarity and accuracy.
- Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

**Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.**

MU graduates will be able to:

- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- Work collaboratively with others where appropriate.

**Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.**

MU graduates will be able to:

- Engage in life-long learning.
- Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
- In addition, some students will be required to take standardized tests in their major field and/or for general education.

## University General Education Assessment

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

## Major Field Assessment

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:

- Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- Faculty-developed exit examinations
- Exit interviews University

## University Organization

---

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two, 16-week semesters (fall and spring) and one, 8-week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

## Academic Programs and Degree Structure

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.

# Academic Policies

---

The academic rules and regulations of the University of Missouri are published online in the *Collected Rules and Regulations of the University of Missouri* and the MU Faculty Council Academic Regulations (<https://missouri.app.box.com/v/facultyhandbook/>). The following are selected policies and procedures. Many are summarized as a guide for students.

Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

If a policy is only applicable to certain students and not all students, this is indicated with one of the following codes. Else the policy is applicable to all University of Missouri students.

(G) policy applicable to Graduate students only

(L) policy applicable to Law students only

(U) policy applicable to Undergraduate students only

(V) policy applicable to Veterinary Medicine students only

Withdrawing from a Course (p. 881)

## Absences

---

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean's excuse or official absence. (See Satisfactory Academic Progress Policy for Financial Aid Eligibility (<http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php>)).

However, a student who is also a member of a national guard, Federal Emergency Management Agency or military reserve unit and is called to active duty while the University is in session, will be permitted to make up work missed as a result of such absences for up to two weeks of absences, provided that to do so does not require the instructor to engage in individualized tutorial work with the student. Recognizing that some students have contractual obligations to the University, while others are participating in intercollegiate events at the behest of their departments, faculty are encouraged to make accommodations for absences incurred because of these responsibilities. In enforcing their absence policy, it is recommended that faculty give due consideration to the important role that extracurricular activities play in the development of students, as well as to the benefits they provide to both our university and community.

Students must notify instructors of any scheduled absences within the first two weeks of the semester. In the case of later qualifying events, the instructor must be informed two weeks prior to those events. Instructors are encouraged to advise students of their absence policy at the beginning of the semester.

## Academic Dishonesty

---

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student's grade on that work and in that course and reports all incidents to the provost for disciplinary action.

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the course instructor. Refer to the *Collected Rules and Regulations*, Section 200.010, Standard of Conduct ([http://www.umsystem.edu/ums/rules/collected\\_rules/programs/ch200/200.010\\_standard\\_of\\_conduct/](http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_conduct/)), and Section 200.020, Rules of Procedures in Student Conduct Matters ([http://www.umsystem.edu/ums/rules/collected\\_rules/programs/ch200/200.020\\_rules\\_of\\_procedures\\_in\\_student\\_conduct\\_matters/](http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.020_rules_of_procedures_in_student_conduct_matters/)) for more specific details. (The *Collected Rules* are available on the University

of Missouri System web site.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Vice Provost for investigation.

## Academic Progress (G)

---

### Measuring Graduate Student Progress

#### Annual Requirement: Review of Graduate Student Progress

The Graduate School requires that all graduate students' academic progress is reviewed at least annually. Typically, graduate students file an annual report on their academic performance, degree program milestones, and related academic/scholarly/research/creative achievements. Faculty mentors (advisors) are required to review their advisees' annual reports to assess if their advisees are making satisfactory progress toward degree completion. In some cases, the director of graduate studies and/or department chair also review the students' annual reports and faculty member responses.

Each division/area/department degree program must inform all students of the annual progress reporting requirement. This includes printed, published, or electronic materials provided to graduate students (e.g., handbooks, orientation materials, guidelines, web site.)

At a minimum, students are required to report on academic progress, completion of required forms, award and honors, conferences, presentations, publications, service activities, creative activities, employment, funding activity, and job placement. Academic program faculty or administrators may require additional indicators of performance or achievement to accommodate the unique needs of their programs.

Additional information on measuring graduate student progress is at <http://gradschool.missouri.edu/policies/satisfactory-progress.php>.

### Extension and Appeals of Satisfactory Progress Infractions

The definition of "satisfactory progress" and procedures for its verification may vary among departments/programs. If a department/program has instituted timelines that differ from those applying generally to graduate students (see below), these timelines should be made available to students from their entrance into the graduate degree program. If a student is authorized to diverge from progress timelines established by either the department/program or the Graduate School, this should be documented in written form and endorsed by the student's advisor and director of graduate studies.

### Progress Toward Degree

Full-time students (those taking 9 hours or more per semester) should follow the time frames associated with degree programs discussed in the catalog. They must submit required forms on time and maintain a grade point average of 3.0 or better. Furthermore, they must successfully undergo their departments' annual review processes.

Part-time students should file a timeline for successful degree completion with their department/program. This timeline should be endorsed by the director of graduate studies and a prospective advisor by the end of the first calendar year of admission into the department/program. When these timelines conflict with time to degree guidelines established by the Graduate Faculty Senate and enforced by the Graduate School, they

must request an extension, supported by their advisor and director of graduate studies to the dean of the Graduate School.

## Distinction Between Requests for Extension and Appeals

A "Request for an Extension" and an "Appeal" are distinct processes for dealing with problems related to "satisfactory progress." A "Request for Extension" is the appropriate course of action when a student has failed to meet satisfactory progress provisions of the Graduate School. The "Appeal Process" should be followed when a department/program has dismissed a student after the required probationary period.

## Probation and Termination Dismissal

In addition to dismissal for failure to meet the usual examination and grade requirements, departments and graduate degree-granting area programs have the right to place on probation and, after at least 30 days of probation, to dismiss from their program any graduate student who is deemed to be making insufficient academic progress or whose work is not of the quality required. The faculty advisor or academic program chair must inform the Graduate School as soon as the student is notified and the probationary period begins. The dismissal may occur at any time during a student's work toward a graduate degree.

For additional information on satisfactory progress, probation, termination, extension and appeals go to the Extension and Appeals of Satisfactory Progress Infractions section of the catalog; additional information can also be found at <http://gradschool.missouri.edu/academics/progress/probation-termination.php>.

## Academic Progress (L)

### Annual Review of Students' Progress (Applicable to LLM Students)

The progress of each graduate student will be evaluated annually by the Director of the LL.M. Program.

For students who first enrolled in the LL.M. Program after January 1, 2001, the following are the standards of "satisfactory progress" in the LL.M. Program, subject to individual exceptions for good cause as approved by the Director of the LL.M. Program. Normally, students should complete all degree requirements within three (3) years of enrollment. By the end of the first year of enrollment, students must have completed at least eight (8) credits that satisfy requirements for the LL.M. degree. By the end of the second year of enrollment, students must have completed at least sixteen (16) credits that satisfy requirements for the LL.M. degree. By the end of the third year of enrollment, students must have completed at least twenty-four (24) credits that satisfy requirements for the LL.M. degree. Time spent in the armed services will not count toward the period for completing the degree requirements.

For students who first enrolled in the LL.M. Program before January 1, 2001, to achieve 'satisfactory progress,' students must complete an average of at least four (4) credits for every academic year since their initial enrollment in the LL.M. Program.

The Graduate School will be informed of all students who are not making satisfactory progress. When there is a question as to whether satisfactory progress is being made, the Director of the LL.M. Program will write to the student and recommend a face-to-face meeting with the student. If there is disagreement, the Director of the LL.M. Program will ask the student to

submit a separate letter to him or her. Copies of both letters will be made available to the student, maintained in a departmental file, and forwarded to the Graduate School.

If difficulties persist and the Director of the LL.M. Program determines that probation is appropriate, the Director will notify the student in writing of the probationary period, which may be from 30 days to a full semester. The probation letter will state explicitly that the student is on departmental probation and state precisely what must be accomplished and by what date in order to enable the student to return to good standing in the Program and be removed from probation. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the probation letter or determine that probation is not appropriate.

If the student does not comply with the conditions of probation, a letter signed by Director of the LL.M. Program will be sent to the student (with a copy to the Graduate School) with notification of dismissal from the LL.M. Program. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the notification of dismissal or determine that dismissal is not appropriate (with a copy to the Graduate School). The Graduate School sends the official notice of dismissal from the Program.

A student may appeal a dismissal decision to the Graduate Faculty Senate only after completing the Program's appeal process. The full text of the Dismissal Policy and Appeals Process for Graduate Students (<http://gradschool.missouri.edu/academics/progress/requests-for-extensions-appeals.php>) can be found in the Graduate School Catalog on its web site.

## Academic Renewal (U)

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

### Eligibility

To be eligible for academic renewal consideration, students must meet these requirements:

- Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
- Students must not have graduated from the University of Missouri-Columbia.
- Students must either:
  - be admitted as degree-seeking and have earned a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months; OR
  - have attended as a non-degree-seeking student and have earned thereby a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months and subsequently have been admitted as degree-seeking by the University.

### Conditions

Academic renewal is based on the following conditions:

- All courses and credits taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine individual courses from multiple terms to comprise the semester(s) dropped. All courses and grades for the chosen terms will remain on the student's academic record.
- Renewal may be applied only to academic terms completed prior to the student's extended absence.
- Students may be granted only one academic renewal.
- Students who choose academic renewal must meet the degree requirements of the University of Missouri undergraduate catalog at the time of their readmission.
- Degree requirements met during the dropped terms must be repeated.
- To be eligible for a degree, students must complete a minimum of 24 credits at the University of Missouri after the granting of academic renewal.

## Procedures

- Students should discuss their desire to pursue academic renewal with an academic advisor in the college they wish to enter.
- Students should submit an application for academic renewal (<http://registrar.missouri.edu/policies-procedures/academic-renewal.php>) to the Office of the University Registrar.
- For each term approved for academic renewal, a note will appear on the transcript.

Questions may be directed to the Office of the University Registrar, 125 Jesse Hall, (573) 882-7881.

## Academic Standing

Academic performance is represented by academic standing, according to the Faculty Handbook (<https://missouri.app.box.com/v/facultyhandbook/>), of which there are three levels: regular, academic probation, and ineligible to enroll. For the purposes of this policy, "term" may refer to a semester or summer term.

### Regular Academic Standing

Students whose term and cumulative GPAs are 2.0 or higher are in regular academic standing.

### Probation

Students in regular standing whose term GPA subsequently falls below 2.0, but is 1.0 or above are placed on probation. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in the *Faculty Handbook*, Article II, Admissions, Advanced Standing, and Classification will enter on scholastic probation and will have one semester in which to remove probation.

### Ineligible to enroll

Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

In the application of the foregoing rules, the dean or faculty committee of the division concerned will determine how an incomplete grade in a course will be considered in determining a student's academic standing. A student who has been ineligible to enroll for a period of one year may be readmitted only upon the approval of the dean of the school or college in which the student desires to enroll. If a readmitted student again becomes ineligible to enroll, his or her ineligibility is normally considered permanent. These regulations are the prescribed minimal standards but do not limit the authority of the faculty of any school or college to adopt and enforce additional regulations affecting students enrolled therein.

## Advanced Standing - Credit by Exam (U)

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A student who has received credit for any portion of a lower level course will not receive advanced standing credit for that same course. More information can be found at <https://admissions.missouri.edu/apply-freshmen/college-credits/> The programs described below are used to award credit.

### Advanced Placement Program

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

### College Level Examination Program

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students' programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

You are eligible to earn CLEP credit if you have fewer than 90 hours of college credit. Credit can be applied only to a course in your program of study. In most cases, your scaled score must be higher than 50 to earn credit. Exceptions are noted below.

Credit is accepted by most individual schools and colleges but might not be considered by your specific degree program.

Visit the CLEP website (<https://clep.collegeboard.org/about/score/>) to learn how to send your scores to Mizzou.

### Credit by Examination for Mathematics Courses

It is possible to receive credit in the following math courses by passing the appropriate examination:

MATH 1100	College Algebra	3
MATH 1140	Trigonometry	2
MATH 1160	Precalculus Mathematics	5
MATH 1360	Geometric Concepts	3
MATH 1500	Analytic Geometry and Calculus I	5

MATH 1700	Calculus II	5
Total Credits		23

To inquire about these examinations, contact either the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

## Departmental Examinations

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services. (Also see the College of Arts and Science information on departmental exams (p. 138).)

## International Baccalaureate

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

## Additional College Course Work

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

## Freshman Placement Tests

Placement in English is based on ACT score in English. Math placement is based on ALEKS Exam score or prior course credit. (See [mathplacement.missouri.edu](http://mathplacement.missouri.edu) (<http://mathplacement.missouri.edu>) for more details)

## Subject Examinations

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

## Application for Degree

Students should contact their academic unit *at least* a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does *not* automatically anticipate or calculate who will be degree candidates each term.

## Attendance (L)

### Policies & Rules — Attendance

Law schools approved by the American Bar Association must adopt, publish and adhere to a written policy requiring regular class attendance.

The rules below implement this requirement at MU, and were adopted by the faculty on January 23, 2015:

1. Class Attendance
  - a. Attendance is expected, in accordance with the ABA Standard 308.
  - b. Administration of the attendance policy lies with the individual instructor for each course.
  - c. The individual instructor determines the number and nature of absences from each course for an excess of which sanctions may be imposed, as well as the sanctions which will be imposed, up to and including dismissal from the course.
  - d. If the instructor intends to attach a formal sanction (grade reduction or dismissal from the course) to inadequate attendance, he/she must announce to the class in writing at the beginning of the course what the rules governing attendance in that course will be, with appropriate provision for notice to students who enroll in course late.
  - e. A student who is in danger of accumulating excessive absences must be given notice by the instructor in advance of the absence which will give rise to a significant sanction (major grade reduction or dismissal from the class).
2. Appeals
  - a. A student who is dropped from a course for excessive absences may meet with the Associate Dean for Academic Affairs and request reversal of the decision. A student may seek the assistance of the Student Bar Association in support of the request.
  - b. A final decision on the appeal rests in the discretion of the Dean.

## Auditing a Course (Hearer)

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

- Hearers receive no credit toward a degree and an H grade appears on the transcript. The credit received when auditing a course does not count toward your verification of full, half or less than half time enrollment status. This credit is not reported to the National Student Clearinghouse for enrollment verifications.
- Students pay standard fees (<http://cashiers.missouri.edu/>) for the course(s).
- Students may *not* change their registration status (hearer vs. credit) after two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session.
- Check the academic calendar (<http://registrar.missouri.edu/academic-calendar/>) for deadlines.
- Students who want to change their grading basis must go to the academic advising office *before* two weeks following the first day of classes in regular session or equivalent thereof in a shorter session.
- Students who fail to meet class requirements may be dropped from the course by their academic advising unit upon request of their instructor and with the dean's stamp.
- Normally, a hearer will attend the course on a regular basis; either the department or an individual instructor will stipulate the requirements for enrollment in a course as a hearer.

## Catalog Editions (Which catalog applies to whom?)

---

These policies concern the application of the University of Missouri's graduation, divisional and departmental degree requirements. The catalog (this publication) is a compilation of information about degrees, requirements, courses, and policies.

Courses and policies listed in this catalog are subject to change through normal approval channels within the University. New courses, changes in existing coursework and new policies are initiated by the appropriate institutional departments, committees or administrators. Policy revisions are implemented in the next academic year following notification thereof. The University of Missouri ("MU") publishes a new edition of the catalog each June, and its contents apply to the subsequent Summer, Fall, and Spring terms. Occasionally a policy or requirement must be changed and implemented in the same academic year (e.g., in the case of changes to state regulations). All changes must be approved by the college or school's associate or assistant dean that oversees academic curriculum and policies.

MU students' academic requirements for graduation are typically met as follows:

Students must complete the graduation requirements in effect for the term that they first enroll at MU.

- Transfer students from community colleges and other universities are permitted to complete degree requirements in effect at the time of their enrollment as freshmen at a community college or university, so long as their enrollment was continuous from year to year (summer semesters excluded).
- Students who started at MU but change degree programs, must meet the requirements in effect for the term that they first enroll at MU.
- If students discontinue their studies for more than a year, the catalog edition is the one applicable during the term they restart their studies at MU, unless the stoppage is due to military obligations, in which case this provision only applies if students re-enroll more than a year after the military assignment ends.
- Any undergraduate student who re-enrolls at MU within one year of being released from military assignment shall be allowed to continue under the same catalog year. Any undergraduate student who had been admitted to a degree program prior to mobilization and who re-enrolls within one year of being released from military assignment shall not be subject to any additional degree requirements enacted in the interim.
- Students entering MU in a summer term follow requirements for the subsequent fall term.
- In some cases, due to changes in state, federal or accreditation requirements there may necessitate modifications that supersede these policies. All policy changes must be approved by the college or school's associate dean. Advisors will provide counsel to students in these situations. Students should consult with an advisor in all cases.

After consulting with an advisor, students may appeal to change catalog years or alter degree requirements. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled for college and program requirements, or the Vice Provost for Undergraduate Studies for general education and University graduation requirements.

## Mechanism for Requesting Exceptions to Catalog Edition or Year Policy

Student seeking an exception to the Catalog Edition policies:

- Option 1 – After consulting with their academic adviser students may, for good cause, petition to be subject to the requirements of a different edition of the catalog. The petition must be approved by the Dean of the Academic Unit offering the degree, and by the Vice Provost for Undergraduate Studies. If your petition is approved, the new applicable edition of the catalog will be recorded in myZou, via a change to the pertinent Requirement Term value. Students may not petition to change the applicable catalog year for only a portion of your degree requirements (e.g., major requirements, but not General Education requirements)
- Option 2 - After consulting with their academic adviser students may, for good cause, may petition for a substitution, change, or waiver of certain requirements. The petition must be approved by the Dean of the Academic Unit offering the degree (or their designee). If the petition is about a University-wide requirement, the petition must be additionally approved by the Vice Provost for Undergraduate Studies.

Academic departments' request changes to the Catalog Edition policies:

From time to time, requirements change due to changes in state, federal or accreditation requirements, which necessitate modifications that supersede these policies. Typically, those changes are included in the next edition of the catalog and apply to future students. Exceptionally, for good cause shown, changes must be applied retroactively to prior editions of the catalog. The cause may be external (e.g., changes to licensure requirements) or internal (e.g., a required course can no longer be offered due to compelling circumstances). Requests for such changes are initiated by the Dean of the Academic Unit offering the degree and require the approval of the Vice Provost for Undergraduate Studies. Such changes do not apply to students who have already completed the old requirement and the old and new requirement are fully interchangeable in all regards.

## Class Cancellation Guidelines

---

Refer to the the MU Faculty Council on University Policy regarding class cancellation guidelines (<https://missouri.app.box.com/v/facultyhandbook/>).

## Completion of a Course

---

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the "+" or "-" sign if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

- The faculty of the division concerned will determine how the grade of I in a course and a grade in a repeated course will be considered in determining a student's academic standing. However, for financial aid purposes the grade of I is not considered a completed course and a repeated course will be counted as additional credits attempted.
- The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student's eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students' satisfactory progress toward

their educational objectives and eligibility to receive federal, state and institutional student financial aid.

## Computer Policies (L)

---

### Acceptable Use Policy

- Priority use of lab computing equipment is for academic rather than recreational purposes. If you are asked to relinquish use for this reason, your compliance is expected and appreciated.
- Computing at MU is a community enterprise serving academic, administrative and research needs. Please conserve resources by carefully managing your e-mail, data, web files, and printing.
- Users will respect copyright, slander, libel, anti-discrimination and other appropriate laws as well as the security and proper functioning of the campus network.
- MU is committed to privacy and will not routinely inspect the contents of your computer files.
- MU provides uncensored access to materials on the campus network or the Internet unless those materials violate federal or state laws.

For more detailed information on current acceptable use guidelines, or to report a potential violation, view MU's Acceptable Use Policy ([http://www.umsystem.edu/ums/rules/collected\\_rules/facilities/ch110/110.005\\_acceptable\\_use\\_policy/](http://www.umsystem.edu/ums/rules/collected_rules/facilities/ch110/110.005_acceptable_use_policy/)).

### Law School Computer Lab Polices

- **Limited Access to the Law School Computer Lab** - In order to use the computer lab you must be a current MU law student. Access to the computer lab is a privilege and is not transferable to non-law students. You may not let your family use the lab for any purpose.
- **Computer Availability and Priority of Use** - Computers in back of the lab are available during regular library service hours on a first-come, first-served basis. Computer training classes held in the front room of the lab take priority over individual use. An ADA workstation is available in Room 119 of the lab. Students who require access to this equipment in order to be able to access library resources have priority. All decisions as to the use of the computers are at the discretion of the Library Director, the Associate Director, or the Automation Librarian.
- **Copyright and Licensing Restrictions** - The user is responsible for observing all copyright laws. The software and documentation made available in the lab is for use only in the lab and is not to be duplicated for use elsewhere. Duplicating a copyrighted program or documentation is illegal and is an Honor Code violation. Any use of computer-assisted legal research databases (Westlaw and Lexis) is for academic purposes only. Terms of use are governed by individual subscriber agreements for each system.
- **Assumption of the Risk** - The MU Law Library and MU School of Law make no guarantee with respect to any equipment, programs, or other materials in the computer lab. The entire risk as to the quality and performance of the computer equipment, programs, and documentation is with the user. The lab is not responsible for loss of data due to faulty programs or equipment.
- **Data Storage** - Users may not store their files on the hard drives of the individual workstations or on the law school's network. Users may not save their personal settings on individual workstations.
- **Reporting Equipment Problems** - Report any PC or printer problem, such as paper jams, toner replacement, backed-up print

jobs, etc. to the User Support Analyst, student lab assistant, or reference office. Do not attempt to fix any lab equipment on your own. Lab supplies (paper reams, toner etc.) are to be handled by staff only.

- **Food, Drink and Tobacco are not allowed in the lab.**
- **Lab Phones and Help Desk** - Lab phones are for staff use only. Public telephones are available in the student area of the subplaza.

Failure to observe lab policies and directions from library staff regarding proper lab use may result in restriction or revocation of computer access, or in termination, academic probation, or prosecution under federal or state law.

## Course Changes (V)

---

Any changes in course enrollments and/or number and dates of course offerings shall be initiated by the course coordinator and the appropriate chairman in consultation with the Associate Dean for Academic Affairs. (CVM Executive Committee, 1986)

## Course Repeat Policy

---

The course repeat policy will not be applied automatically to a student's GPA. After completing the second attempt of a course, a student must submit a request for GPA adjustment form (<http://registrar.missouri.edu/policies-procedures/course-repeat.php>) to the University Registrar's Office 125 Jesse Hall.

When the grade received in an initial attempt, for an undergraduate course at University of Missouri-Columbia, or any University of Missouri System Campus, is a "C-", "D+", "D", "D-", "F" or "WF", the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri-Columbia (unless the repeat grade is an I or W). All grades received in second and subsequent attempts will be included in GPA calculations. No more than 15 semester hours will be dropped from the calculation of the student's GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. This policy is effective with course work where the initial enrollment and completion of the course was fall semester 2000 and thereafter.

Any course being repeated may not be taken on an S/U basis. This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated, all applicable tuition and required fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credit from that course.

Students are strongly encouraged to visit with an advisor to determine whether re-enrollment is advisable (certain department or divisional policies may be important in this connection). Further, students should be aware that repeating a course may have an impact on financial aid, insurance, entrance to professional schools, participation in athletics, immigration status, and other non-academic matters.

The academic status of a student in a given semester will not change as a result of repeating a course.

The policy is applicable to undergraduate students only.

## Clarifying comments

Students should not re-enroll in a course for which they have been assigned a grade of "I".

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply. If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attribute toward any graduation requirement.

Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students may replace the grade earned from the course at the University of Missouri-Columbia or any other University of Missouri campus with a grade earned in an equivalent course at University of Missouri-Columbia campus. Courses for which a W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

## Course-Load Rules (L)

**Fall or Spring Semester:** A student is permitted to take a total of 17 credits without the approval of the Associate Dean for Academic Affairs. With good cause and with written permission from the Associate Dean for Academic Affairs, pursuant to ABA Standard 311, a student is permitted to take a maximum of 18 credits.

**NOTE:** Credit hours earned taking courses during the Winter Intersession will be counted as a part of the Spring semester. For example, if a student takes a 3-credit course during Winter Intersession and then wants to take 15 credits in the Spring semester, the student will need to seek the written permission of the Associate Dean for Academic Affairs because the total is 18 credits.

**Summer Session:** A student is permitted to take six credit hours without the approval of the Associate Dean of Academic Affairs. With good cause and with written permission from the Associate Dean for Academic Affairs, pursuant to ABA Standard 311, a student is permitted to take a maximum of nine credits.

**Full-Time Status:** A student must be enrolled in a minimum of 12 credit hours during a semester in order to be considered a full-time student

unless the student is in the final semester of law school when they are permitted to take 9 credits provided that the student will satisfy the 89 credits for graduation upon completion of that semester. There is no minimum number of credits to be full-time for the summer session.

## Credit for Non-Law Courses (L)

Law students are permitted to take up to a total of six hours of courses for Law School credit in other schools of the University during law school. Please note that because you are listed as 'primary degree program-Law' with the University. You will be charged the same per credit hour law school course rate for ANY non-law courses taken (NOT the undergraduate or graduate per credit hour rate). This does not apply to students officially enrolled in a dual degree program.

- Grades for non-law school courses are a Satisfactory/Unsatisfactory (S/U) basis. In addition, non-law courses are subject to the following regulations:
  - The course must be at the graduate level (numbered 7000-9999).
  - The course must be related to the student's study and future practice of law.
  - The semester hours of the non-law course will be counted in the student's total number for the semester, and the student may not (without permission) take any more than a combined total of seventeen credit hours in a regular semester, or seven in a Summer Session.
  - Students wishing to take a non-law course for law school credit MUST request approval in writing from the Associate Dean for Academic Affairs and complete the Petition to Enroll in Non-Law Courses Form (<https://law.missouri.edu/registrar/forms/>) which will include the following information:
    - A Statement of purpose for taking the course as related to (b) above.
    - a Syllabus; and,
    - all other relevant information
  - Requests for the approval of non-law courses below the 7000-Level within the guidelines given above must be referred to the Standards and Readmissions Committee. The Associate Dean for Academic Affairs may approve 7000-9999 level courses without consultation with the Standards and Readmissions Committee.
  - For purposes of calculating a student's cumulative GPA, non-law course are treated as S/U courses.
- Any petition for law school credit for non-law courses beyond the cumulative maximum total of six hours, shall be initially presented to the Associate Dean for Academic Affairs. If the student's request is denied, the student may then petition the Standards and Readmissions Committee. If the Committee denies the student's request, the student can petition the entire faculty whose decision will be final.

## Deficient Academic Performance (V)

**Mid-course/rotation grade warnings must be issued to students if they are not achieving at least a 'C' grade average. The notice should be copied to the Associate Dean for Academic Affairs.**

A student who receives a grade of "F" in any required or elective course of the professional curriculum will be dismissed.

No more than 9 total semester credit hours of "D" grades may be accumulated prior to graduation. Greater than 9 semester credit hours of "D" grades will result in dismissal from the CVM.

**NOTE:** These regulations were adopted by faculty action August 4, 1983. They are subject to change by faculty action. *Revised in 1988, 2002, 2009, 2011 and 2012.*

## Degrees, Diplomas and Certificates

The process for awarding Degrees, Diplomas and Certificates at the University of Missouri is governed by the Faculty Council. For a full listing of this process please see Article IX of the Faculty Handbook (<https://missouri.app.box.com/v/facultyhandbook/>).

## Disability Accommodations (L)

It is the policy and practice of the University of Missouri School of Law to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. No individual shall be discriminated against by the University of Missouri School of Law because of a disability, nor shall any qualified individual with a disability be denied access to or participation in Law School services, programs, or activities because of a disability. The School of Law is committed to providing reasonable accommodations for individuals with disabilities, though the School is not required to make accommodations that are unduly burdensome or that fundamentally alter the nature of the program.

Students who have been accepted for admission are advised to contact the Associate Dean for Academic Affairs as soon as possible regarding disabilities that might require accommodation. Continuing students who believe they have acquired or developed a disability should also contact the Associate Dean for Academic Affairs as soon as possible. Early identification of disabilities is necessary to allow adequate time for an evaluation, to review supporting documentation and to coordinate required accommodations. The accommodation process takes some time, so the Law School may be unable to grant last-minute requests for accommodation.

### Accommodation Process

To accommodate students with disabilities, the School of Law worked with the University's Disability Center to arrange the following accommodation process:

1. A student who believes he/she has a disability that requires any accommodation should notify the Associate Dean for Academic Affairs.
2. The Associate Dean for Academic Affairs will then refer that student to the Disability Center (<http://disabilitycenter.missouri.edu/>), located at S5 Memorial Union.
3. The Director of the Disability Center or a representative will meet with the student, request medical records and other information from the student. Please note that the Disability Center must first receive all necessary medical documentation from the student.
4. The Disability Center will then decide what accommodations are necessary and appropriate to provide, if any, in light of the student's

medical information and the student's course schedule, exams, and/or graded exercises.

5. The student will then forward the Disability Center's accommodation recommendations to the Associate Dean for Academic Affairs and to the Law School Registrar.
6. The Associate Dean for Academic Affairs and the Registrar will work with the student to provide the accommodations that the Disability Center recommends.
7. Any problems that arise should be brought to the attention of the Associate Dean for Academic Affairs and/or the Disability Center.

## Academic Dismissal and Readmission

If a student who is academically dismissed raises a previously undisclosed disability as a basis for academic difficulty, the burden will be on the student to explain why the disability was not previously brought to the attention of the administration, to explain why accommodations were not requested or why those provided were not adequate, and to demonstrate that the disability was the cause of the dismissal.

Readmission requests should be directed to the Associate Dean for Academic Affairs who will forward the request to the Law School's Standards and Readmissions Committee, which acts on the requests. For further information on the readmission process, please refer to the Policies and Honor Code section on School of Law website under Dismissal and Probation (<http://catalog.missouri.edu/academicpolicies/dissmissalandprobation/>).

## Bar Examination

Law students with disabilities who believe they will require accommodations in taking the bar examination should inquire early in their legal education as to what will be necessary to obtain accommodations. Information on how to contact bar examiners in all states is available from the National Conference of Bar Examiners (<http://www.ncbex.org/jurisdiction-information/>). Many state boards of bar examiners will request that the law school provide information on accommodations provided during law school upon a written release from the student.

## Career Services

The Career Development and Student Services Office provides assistance to all students and does not discriminate on the basis of disability. Students who believe that an employer working through Career Development and Student Services has discriminated on the basis of disability should bring their concerns to the attention of the Assistant Dean for Career Development and Student Services.

## Grievances

If a student who requests accommodations from the School of Law believes that he/she has been discriminated against on the basis of his/her disability, the student should bring this matter to the attention of the Associate Dean for Academic Affairs, who will work with the Disability Center to attempt to resolve the matter. The Associate Dean for Academic Affairs will communicate the decision to the student. If the student is dissatisfied with the decision, the student may file a grievance with the ADA Coordinator (<http://ada.missouri.edu/complaints.php>). Grievances filed with the ADA Coordinator must be in writing and must be filed within two weeks of the date the Associate Dean for Academic Affairs communicated the decision to the student.

## Confidentiality

Information related to a student's disability is treated as confidential information under applicable federal, state and university laws.

## Dismissal

A dean may at any time, and following such procedures as are reasonable, dismiss a student from a class or from a school or college for failure to perform academic duties.

In addition, the director of the Student Health Center (<https://studenthealth.missouri.edu/>) has the authority to exclude a student from classes and other University exercises and activities because of exposure to a communicable or contagious disease, or to require a student to withdraw from the University at any time if the student has a medical condition constituting a hazard to themselves, other students or the campus community.

Adapted from the Faculty Handbook. (<https://missouri.app.box.com/v/facultyhandbook/>)

## Dismissal and Probation (L)

### A. Rules for Dismissal and Probation

1. For purposes of this section (Policies & Rules – Dismissal and Probation)
  - a. 'First year' consists of that series of semesters or summer sessions, or both, at the end of which a student first receives grades in courses aggregating to not fewer than 30 hours.
  - b. 'Semester' means either the fall or spring semester. The summer session is considered to be part of the next succeeding semester for the purpose of computing semester grade point averages.
2. A student is dismissed:
  - a. at the end of the student's
    - i. first semester if the student's cumulative grade point average is equal to or less than 76.399; or
    - ii. second semester if the student's semester grade point average is equal to or less than 76.399
    - iii. first year if the student's cumulative grade point average is equal to or less than 76.399; or
  - b. at the end of any semester after the student's first year if the student's semester grade point average is equal to or less than 76.399; or
  - c. at the end of any semester during which the student has been on probation if the student's semester grade point average is equal to or less than 77.499; or
  - d. at the end of any semester during which the student has been on probation if the student's semester grade point average is
    - i. not sufficient to raise his or her cumulative grade point average to an average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied; or
    - ii. is less than the semester or cumulative grade point average which was imposed upon the student as a condition of probation or readmission;
  - e. at the end of any semester prior to the completion of the student's first year if

- i. the student has received grades in at least two sessions; and
- ii. has received grades in at least 12 hours of coursework; and
- iii. has a cumulative grade point average of equal to or less than 76.399;

- f. at the end of that semester where the student has a cumulative grade point average equal to or less than 77.499 after completing 89 or more hours of course work.
3. A student is placed or continued on probation:
    - a. at the end of the student's first year if the student's cumulative grade point average is greater than 76.399 but equal to or less than 77.499; or
    - b. at the end of any semester after the student's first year, if the student's semester grade point average is greater than 76.399 but equal to or less than 77.499; or
    - c. a student who is on probation will remain on probation if the student's cumulative grade point average is equal to or less than 77.499, but the semester grade point average is sufficient to raise his or her cumulative grade point average to a cumulative grade point average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied.
  4. Any first-year student who does not achieve a grade point average greater than 77.499 in the fall semester will be required to take the Foundations of Legal Studies II course during the second semester. Students who are required to take Foundations of Legal Studies II under this provision will drop one of their courses. The course to be dropped will be decided in consultation with the Associate Dean for Academic Affairs.
  5. A student ceases to be on probation at the end of a semester when the student's cumulative grade point average and semester grade point average are both greater than 77.499.
  6. After the first semester of the first year, a student is in 'good standing' at the School of Law if the student's cumulative grade point average is greater than 76.399. Thereafter, a student is in good standing when both the student's current semester and overall grade point average are greater than 77.499.

### B. Rights of Students Petitioning for Readmission

Students who petition the Law School for readmission following academic dismissal have the following rights:

1. To be given fair notice of the time and place of the meeting.
2. To submit any supporting written material to the Standards and Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee's recommendation or decision, or the Faculty's decision.

### C. Readmission Procedures

1. Readmission Procedures for students dismissed at the end of the first semester under Rule A.2.a.i

- a. A student dismissed at the end of the student's first semester whose grade point average for the first semester is equal to or

less than 75.299 will not be permitted to attend law school for the succeeding spring semester. The student will be required to meet with the Standards and Readmissions Committee to evaluate his or her past academic performance. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student's dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Standards and Readmissions Committee may require readmitted students or students on probation to drop one or more of their courses.

b. A student dismissed at the end of the student's first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring semester. Such student may not attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show that the applicant's poor academic performance was the result of factors other than intellectual inability to perform satisfactory law school work and that these factors will not continue to impair the applicant's performance in the future. If the Standards and Readmissions Committee denies readmission for the spring semester, or if the student requests readmission as of the next fall semester, the student shall be readmitted for the following fall semester subject to the same conditions described in paragraph C.1.a above, or under such conditions as the Standards and Readmissions Committee may determine. If the student is readmitted for the spring semester, the student will be subject to the dismissal rules under paragraph A.2.a.ii and A.2.a.iii above, but shall not be subject to dismissal under paragraph A.2.c or A.2.d above.

## 2. Readmission Procedures for students dismissed at any time after the first semester

a. A student who has been dismissed may not attend classes unless the student has filed a written petition within the time limits indicated in the letter of dismissal issued by the School of Law.

b. To qualify for readmission, an applicant for readmission must show: (1) that the applicant's poor academic performance was the result of factors other than intellectual inability to perform satisfactory law school work; (2) that these factors will not continue to impair the applicant's performance in the future; and (3) that there is a reasonable probability that the applicant's grade point average can be raised to the graduation level by the time 89 credits have been accumulated.

c. A petition for readmission by a student who has been dismissed shall be heard by the Standards and Readmissions Committee. A quorum of the Standards and Readmissions Committee, for purposes of deciding petitions for readmission, shall consist of one less than all voting members. If the Standards and Readmissions Committee's decision is favorable for readmission, or is unanimous against readmission, that decision shall be final and the student shall have no right of appeal to the Faculty at large. If the Standards and Readmissions Committee's decision is unfavorable against

readmission, but not unanimous, the petition shall be referred to the Faculty at large for decision.

d. A student who petitions for readmission has the right to appear personally before the Standards and Readmissions Committee and, if allowed under these rules, the Faculty at large. The student may be summoned to appear before either group by making a personal appearance or by supplying answers to written questions. (See above for a full statement of rights of petitioners.)

e. A student who has been dismissed for scholastic reasons and whose readmission is approved will be on probation and subject to such conditions as may be imposed. The conditions below will apply unless varied by the Standards and Readmissions Committee or the Faculty.

f. It is the policy of the Standards and Readmissions Committee to make decisions on readmission prior to the end of the summer term for those students who are dismissed at the end of the spring semester and who may be enrolled in the summer term. Therefore, the readmission decision will not be delayed until summer grades are received.

## D. Standard Conditions for Law Students Readmitted after Scholastic Dismissal, and for Law Students on Probation

Students who are readmitted or are on probation are subject to the following conditions as well as any specific conditions stated in the readmission action.

1. They will continue on academic probation until achieving academic good standing, which requires a cumulative grade point average greater than 77.499.
2. Students placed on probation at the end of the fall semester of their first year will be required to take the Foundations of Legal Studies II course during the second semester. At its discretion, the Standards and Readmissions Committee may require such students to drop one or more of their courses.
3. Until such time as they achieve a cumulative grade point average greater than 77.499, they must maintain a semester grade point average as set out in the readmission action. If no semester grade point average was specified, the student must maintain a semester grade point average sufficient to raise the student's grade point average to a cumulative grade point average greater than 77.499 by the time the other requirements for graduation are completed.
4. Their schedule of courses must be approved by the Associate Dean for Academic Affairs, and the dropping of any course during the semester must also be approved by the Associate Dean for Academic Affairs. In general, students will be required to take required courses before electives and take graded courses rather than S/U or pass-fail courses.
5. During any session in which they are enrolled, they will not engage in any employment for compensation or spend a substantial amount of time on extra-curricular activities without the prior written approval of the Associate Dean for Academic Affairs. 'Substantial amount of time on extra-curricular activities' is interpreted by the Standards and Readmissions Committee to include participation in any internal or external competition sponsored by the Board of Advocates as well as any position of leadership on any student board or organization.

6. Unless exempted by the Standards and Readmissions Committee, they are not allowed to take the following courses:

- \* Externship
- \* Independent Research
- \* Courses taught outside Law School for Law School credit (e.g. graduate courses)
- \* Courses taught by adjuncts
- \* Seminars, except students classified as third-year students
- \* Participation in any Study-Abroad Programs
- \* Clinics or clinic-related courses including: Criminal Prosecution Clinic, Clinical Skills, Entrepreneurship Clinic, Family Violence Clinic, Innocence Project, Legislative Practicum, Landlord/Tenant Practicum, Mediation Clinic, Veterans Clinic

**PLEASE NOTE that the Committee cannot exempt students from prohibitions regarding courses that are imposed by external sources such as Supreme Court rule or ABA accreditation requirements.**

## Drug and Alcohol Policy

### Drug Free Schools & Community Act

Pursuant to the Drug-Free Schools and Communities Act Amendments of 1989, the University of Missouri is required to establish a drug and alcohol prevention program for its students and employees. Following is a description of the University of Missouri-Columbia's program. A biennial review of this program will be done to determine its effectiveness, to implement changes to the program if they are needed and to ensure that the University's disciplinary sanctions are consistently enforced.

A reference listing of MU resources for alcohol and other drug educational preventions efforts, counseling, and referral are listed below. Please feel free to contact any of the offices listed for more information.

### Standards of conduct

University of Missouri-Columbia regulations prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs by University students and their guests and for employees on University-owned or controlled property and at University-sponsored or supervised activities.

### University Discipline

Violation of these University regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

### Legal sanctions

Local, state and federal laws also prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to \$20,000 to imprisonment for terms up to and including life.

### Health risks

Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Wellness Resource Center in G202 MU student

Center or at [www.wellness.missouri.edu](http://www.wellness.missouri.edu). (<https://wellbeing.missouri.edu/education-outreach/>)

### Alcohol and Other Depressants (barbiturates, sedatives, and tranquilizers)

Addiction; accidents as a result of impaired ability and judgment; overdose when used with other depressants; damage to a developing fetus; heart and liver damage.

### Marijuana

Impair short-term memory, thinking, and physical coordinations. Can cause panic reaction and increase the risk of lung cancer and emphysema. Can interfere with judgment, attention span concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence and compromise the immune system.

### Cocaine

Addiction, cardiovascular system damage including heart attack, brain damage, seizures, lung damage, severe depression, paranoia, psychosis. Similar risks are associated with other stimulants, such as speed and uppers.

### Nicotine

Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces and increase in heart and respiration rates, blood pressure, adrenaline production and metabolism. People can rapidly become physically and psychologically dependent on tobacco. Compromises the immune system.

### Inhalants

Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. Use of these drugs slows down many body functions. High doses can cause severe breathing failure and sudden death. Chronic abuse of some of these chemicals can lead to irreversible liver damage and other health problems.

### Resources

#### Wellness Resource Center - (Campus Alcohol and Drug Abuse Prevention Office)

Alcohol and other drug abuse prevention programs, speakers, peer educators, and referral services and research. Provides educational brochures and other printed materials and houses a large resource library of books, brochures, videos and other materials on a variety of wellness issues including alcohol and other drugs of wellness. Provides BASICS (Brief Alcohol Screening Intervention for College Students) workshops and individual assessments for students caught in violation of alcohol or drug policies or individual sessions for students who would like their alcohol or drug use evaluated.

- **MUSWA (MU Student Wellness Advocates): ADAPT** (Alcohol and Drug Abuse Prevention Team)/**PAWS** (Peers Advocating Wellness solutions) and **PASS** (Peers Advocating Smoke-free Solutions)
- **Sober In College (SIC):** SIC is for students in recovery and students who want to live a sober lifestyle. Sponsors 12 step meetings.
- **GAMMA (Greeks Advocating the Mature Management of Alcohol)** is composed of Greek students who are interested in issues related to responsible alcohol use.

- **Active Minds:** Students working to de-stigmatize mental health issues and increase help seeking skills.

Counseling Center (<http://counseling.missouri.edu/>)  
573-882-6601

This center provides individual counseling, and group counseling.

Student Health Center (<https://studenthealth.missouri.edu/>)  
573-882-7481

This center offers medical services and individual consultation.

University Police crime prevention unit (<http://www.mupolice.com/cp/>)  
573-884-7809

This unit provides alcohol- and drug-awareness presentations as well as printed and video resources.

---

## Dual Enrollment

---

### Dual Enrollment for Senior Undergraduates

Beginning Fall 2012, qualified undergraduate students will be eligible to enroll in up to 12 hours of graduate credit during the last 30 hours of their undergraduate program. The eligibility requirements are listed below.

#### Eligibility Requirement

With the approval of the undergraduate advisor, the undergraduate divisional dean, the Director of Graduate Studies, and the Graduate Dean, eligible seniors may dually enroll as an undergraduate for up to 12 semester hours of graduate credit. To qualify, seniors must:

1. Rank in the upper half of their class.
2. Have a B average in the most recent 45 semester hours of credit.
3. Be within 30 hours of completing graduation requirements for the first bachelor's degree.

**Note:** Graduate degree programs may establish their own policies with regard to enrollment in and the applicability of senior dual enrollment credits.

Dual enrollment forms (<http://gradschool.missouri.edu/forms-downloads/repository/dual-enrollment.pdf>) (PDF) must be completed and approved by the Graduate School prior to registering for the graduate level courses.

This program also is available to seniors in other Missouri colleges. Additional information may be obtained from the Graduate School.

### Undergraduate/Law Enrollment (90-Credit Program)

With prior written approval, select undergraduate MU Arts and Science students may have up to 30 credits in courses from the School of Law, which are acceptable to the faculty of the College of Arts and Science, applied toward a Bachelor of Arts degree. This combined curriculum enables students to obtain both the Bachelor of Arts (BA) and the Juris Doctor (JD) degrees in six years.

Other university divisions, and some colleges and universities other than MU, accept the Juris Doctorate in lieu of the fourth year of college and award a baccalaureate degree upon graduation from MU's Law School. Students interested in this program should check with the dean of their college early in their undergraduate careers to ensure compliance with all requirements.

The undergraduate degree is a requirement for the Juris Doctor degree. Students entering law school under this combined degree program must make arrangements with their undergraduate schools to complete all requirements for their undergraduate degree.

Students with Bright Flight or MU awarded scholarships, such as Curators, Excellence, and Diversity, may use these awards in the law school. Check with the Office of Financial Aid.

*Please note: While not a problem in the state of Missouri, prior to participating in the 90-credit program, students should determine whether participation would adversely affect admission to the bar in the jurisdiction in which they expect to practice. Some states will not admit to their bar persons with fewer than 14 semesters of university work or who did not have their bachelor's degree before entering law school.*

---

## Enrollment Requirements (G)

---

### Enrollment Requirements for Master's and Educational Specialist Degree Candidates

After completing courses, students expecting to take examinations, present a thesis, manuscript, project, portfolio, or other capstone project must be enrolled when that activity occurs. If a master's or educational specialist candidate only needs to take exams or defend a thesis or project, the candidate can enroll for "Graduate Examination" hours in myZou. Registration in the "Graduate Examination" does not count toward enrollment certification. Students enrolled in the "Graduate Examination" would not be considered full-time or part-time. If students need to use the library or computers on campus, they should enroll in at least one hour of regular credit hour instead of "Graduate Examination."

### Enrollment Requirements for Doctoral Candidates

Candidacy for a doctoral degree is established by passing the comprehensive examination. Status as a continuous enrollment doctoral student begins the term following the one in which the comprehensive exam was successfully completed (e.g., if they defend at the beginning of the Fall semester, they begin continuous enrollment for the Spring semester). The continuous enrollment requirement is met by enrolling in 2 hours each spring and fall semester and 1 hour each summer semester.

### Important Note on Graduate Examination Registration and Financial Aid

Students with financial aid should check with the Student Financial Aid office before registering for the Graduate Examination option. Failure to do so could result in serious consequences for the student's financial aid status.

### Important Note for International Students regarding Graduate Examination Registration and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could result in serious consequences for the student's visa status.

## Examinations (U)

---

### Evening examinations

If a conflict arises between a group evening examination and a regularly scheduled class, the regularly scheduled class has priority. The instructor giving the group evening examination is responsible for scheduling a makeup examination at a mutually convenient time for both the student and the instructor.

### Classes, Exams and Finals

For the schedule of evening exams and finals week schedule, refer to the Class, Exams and Finals (<http://registrar.missouri.edu/academic-calendar/>) on the University Registrar's website.

### Credits by Examination

<https://admissions.missouri.edu/apply-freshmen/college-credits/>

## Examinations (L)

---

### Policies Related to Final Examinations

1. The examination schedule is specified by the Associate Dean for Academic Affairs.
2. All students should arrive and be settled in the examination room 15 minutes prior to the scheduled beginning of the examination.
3. Arrivals after the examination begins should report immediately to Room 203 Hulston Hall.
4. The Cover Page for examinations should include the following information:
  - a. Start of the Exam: Do not start reading (other than the cover page) or writing on scrap paper until the proctor starts the exam.
  - b. Exam Number: Write your exam number on the Cover Page (not your Student Id or your pawprint)
  - c. Length of Exam
  - d. Exam Mode
  - e. Materials
  - f. Number of Pages
  - g. Special Instructions
5. The 'Instructions' page of any examination is reserved for all additional special instructions for the examination, and may include:
  - a. the length of the examination;
  - b. any special instructions for collaboration or material to be used during the examination;
  - c. any special instructions for turning in the examination or parts thereof; and
  - d. any other general instructions not a substantive part of the exam itself
6. Each student will have a different number on each examination, unless emergency circumstances require an alternative process. A three-part, perforated slip printed with a number on each of the three parts **MUST** be picked up from Room 203 Hulston Hall prior to the examination. The student will complete each portion of the exam number slip and tear off the bottom part for his/her records. (If a student elects to write their examination and more than one bluebook is used or a computer failure requires the use of a bluebook to complete the examination, the student will carefully number the bluebooks with the assigned number.) At the end of the examination, students will turn in either their exams or their bluebooks with the remaining two portions attached, and all other exam materials distributed including scrap paper. The proctor collecting the examinations will remove the identifying second part to be retained in the office and the professor will receive the bluebook bearing only the examination number.
7. It is important for students to retain their portion of the number slip in order to review an examination.
8. There must be an accounting of all copies of an examination. As a result, the person administering the exam will:
  - a. notify students to complete the exam slip on the front of the exam or the bluebook;
  - b. check the exam slips against the class roster at the conclusion of the exam (any portion of the exam slip that contains the student's name is removed by the law school staff before the exam is given to a faculty member); and
  - c. collect all copies of the examination and other exam materials distributed -- all copies of the exam must be turned in with the exam answer.
9. Examinations are scheduled in rooms that accommodate the taking of that examination. A list of the examination rooms is on the law school website and posted in various places in the law school prior to the last day of classes.
10. Examinations are distributed in the rooms scheduled and in no other rooms unless the exams are take-home exams, or a professor has made special arrangements for the administration of the exam.
11. Students may work on their examinations in assigned rooms only and in other designated areas in the law school. It is the responsibility of the student to return the completed examination to the place where it is to be picked up, at or before the time scheduled for the end of the examination.
12. A student who chooses to leave a designated examination room is responsible for returning their examination to the designated place at or prior to the end of the examination period.
13. Earplugs are permitted in any exam room.
14. The items below are NOT permitted in any examination room, unless SPECIFICALLY authorized by the instructions at the beginning of the written examination, or specifically permitted pursuant to the law school policy relative to exams on computer. The devices below should not be brought into the examination room. If they are, they **MUST** be turned in to the proctor **PRIOR TO THE START OF THE EXAMINATION**. The proctor will collect and keep any such device while the exam is being taken. The following items are prohibited:
  - a. Noise cancelling headphones;
  - b. Cellular phones or other communication devices;
  - c. Personal Digital Assistants (PDA) or any device having the characteristics of a PDA;
  - d. I-pads or other similar devices;
  - e. Laser Pointers;
  - f. Any device that allows for the recording of data, or the playing of recorded data, including, but not limited to iPods, MP3 players, CD players, DVD players, cassette players or recorders;
  - g. Smart watches and other similar devices;
  - h. Digital recording pens and other devices
15. Smoking is **NEVER** permitted in any examination room or on university property.

16. Examinations are distributed by the proctor unless the professor elects to do so. Upon receipt of an examination, each student places his or her initials beside his or her name on the class roll. The proctor writes the time the examination begins and ends on the board in the room.
17. Students in the authorized examination rooms are given a 10-minute warning prior to the end of the examination period. The warning is given by the proctor unless the instructor elects to do so. Once the 10-minute warning is given, no student may leave the examination room. Students shall remain seated quietly.
18. The examination ends at the earliest of the following:
  - a. The time written on the board by the proctor or at the conclusion of the time designated on the examination. In some rooms, a law school staff member may say 'Stop,' but the failure to so indicate does not allow a student to continue to write after the time limit has expired. No writing whatsoever is permitted after the exam ends.
  - b. The time a student submits a written examination to the proctor collecting exams and leaves the immediate line of sight of that proctor. Whether such a student has left the immediate line of sight of the proctor is a question left to the discretion of the proctor, it being recognized that as more students turn in exams, the sight line of the proctor will be decreased.
  - c. The time a student taking an exam on computer submits an exam and exits from the exam-writing software.
19. When the examination period ends, students who have not completed the examination early shall go to the place announced for examination pickup and hand to the proctor the examination, bluebooks and/or answer sheet and all scratch paper, used and unused. The material is checked at that time to be sure exam numbers are on each examination, bluebook and/or answer sheet and then placed in receptacles provided for that purpose. Students should not walk away until the proctor has confirmed they have all materials.
20. At the conclusion of each examination, each student again places his or her initials by his or her name on the class roll. The proctor checks to be sure all examinations and materials that should be returned are returned.

## Externships (V)

Students from other colleges of veterinary medicine desiring an externship or participation in one or more instructional periods of the segmented curriculum must be accepted by the section/department involved. Our visiting students page ([http://vms.missouri.edu/veterinary\\_student\\_extrnships.html](http://vms.missouri.edu/veterinary_student_extrnships.html)) provides more information about available programs. The University of Missouri will not provide insurance coverage for any externship.

Students from colleges with animal health technician training programs desiring an internship in the Veterinary Health Center will be considered upon proper application through the director of that program. They must be enrolled in and paying fees at their college, be evaluated by their director in consultation with the involved departmental unit during the externship period while allowing full utilization of their expertise in the hospitals' operations. [http://www.vms.missouri.edu/vet\\_tech\\_int\\_prog.html](http://www.vms.missouri.edu/vet_tech_int_prog.html) (CVM Executive Committee, 1986)

## Final Examination Week (V)

The University of Missouri College of Veterinary Medicine does not schedule "final examination week" for those courses included in the professional veterinary curriculum. Instead, classes will be scheduled through the last day of any regular session (term). Final grades will be submitted to the Dean's Office so they can be filed with the Office of Academic Affairs as specified in the faculty handbook, i.e., "within 2 days, except Sunday, after the end of the examination period". The "end of the examination period" will be interpreted as the time and date when the "semester (or session) closes". (General Faculty meeting minutes, 10-9-73). Changes in examinations can be scheduled as outlined in the Student Handbook.

## Full-time/Part-time Status

Undergraduate students who register for fewer than 12 hours and graduate students who register for fewer than nine hours during the fall or spring semesters are considered to be enrolled part time.

### Undergraduate Students

Enrollment Status	Fall/Spring	Summer
Full-time	12 Credit Hours	6 Credit Hours
Three-quarter	9 Credit Hours	4 Credit Hours
Half-time	6 Credit Hours	3 Credit Hours
Less than half-time	< 6 Credit Hours	< 3 Credit Hours

### Graduate Students

Enrollment Status	Fall/Spring	Summer
Full-time	9 Credit Hours	4.5 Credit Hours
Three-quarter	6 Credit Hours	3 Credit Hours
Half-time	4.5 Credit Hours	2.25 Credit Hours
Less than half-time	< 4.5 Credit Hours	< 2.25 Credit Hours

### Professional Students

#### Enrollment Status

Law student — 12 Credit hours

Medical student — 10 Credit hours

Occupational Therapy/Physical Therapy student — 9 Credit hours

Veterinary Medicine student — 12 Credit hours

*Policy Source:* Faculty Council, Article VII (<https://missouri.app.box.com/v/facultyhandbook/>)

## Grades

---

### GPA of Record

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of *S*, *U*, *H*, *W*, *NR*, or *I* are not included in determining the grade point average.

The undergraduate CUM GPA is the University of Missouri GPA, which will include all grades, credits, and honor points attempted at any University of Missouri campus, including all grades and credits. In computing the undergraduate GPA the grade points assigned to students' transfer work are the grade points that would have been assigned if the courses had been taken on the University of Missouri System campus, including any adjustments made under policies related to course repeats and/or Academic Renewal/Forgiveness.

### GPA Calculator Web Site

To calculate a grade point average, go to the GPA Calculator Web Site at <http://registrar.missouri.edu/grades-calculators/gpa-calculator.php>

### Plus-Minus Grading System

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For undergraduates, all teachers are expected to use the grading scale approved by the faculty. This precludes any department or unit from opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: *A+/-*, *B+/-*, *C+/-*, *D+/-*, and *S*. Grades calculated in the grade point average are *A+* (4.00), *A* (4.00), *A-* (3.7), *B+* (3.3), *B* (3.00), *B-* (2.7), *C+* (2.3), *C* (2.00), *C-* (1.7), *D+* (1.3), *D* (1.00), *D-* (0.7), and *F* (0). The grades of *S*, *U*, *NR*, and *W* are not incorporated in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and currently tied to a specific letter grade would be interpreted to mean a specific letter grade range. Hence, if a student must achieve a *C* in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the "C range," which would include the grade of *C-*.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required "C average or better" on all courses is a "2.00 average or better."

The grade of *S* (on S/U basis) is defined as equivalent to the letter grade of *C-* or higher.

## Satisfactory/Unsatisfactory Grading System

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or add/drop form. Students may change to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of *A-/+*, *B-/+*, *C-/+*, *D-/+* or *F* for each student is reported to the Office of the University Registrar. The Office of the University Registrar staff members ascertain which students are enrolled on the S/U system and assign a grade of *U* to those reported for grades of *D-/+* or *F*, and a grade of *S* for those reported *A-/+*, *B-/+* or *C-/+*. Grades of *S* and *U* are not included in the computing of grade point averages.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

- Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
- Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
- First-semester freshmen and students on scholastic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
- *A+/-*, *B+/-*, and *C+/-* grades are recorded on the transcript as an *S*. *S* grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of *S*.
- *D+/-* and *F* grades are recorded on the transcript as a *U*. *U* grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of *U*.
- Courses completed with a grade of *S* may be accepted in an area of concentration only with the prior approval of the area advisor.

Courses completed with a grade of *S* may constitute no more than 20 percent of the total credits for the baccalaureate degree.

- Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
- Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

## Selecting Grading Options (S/U vs. A through F)

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students' academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar's

website at <http://registrar.missouri.edu/academic-calendar/> for deadlines for each term.

## How Dropping/Withdrawing from a Class Affects the GPA

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

## Grades for Students Who Officially Withdraw from the University

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (*W* or *F*) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of *F* is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean's signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. **NOTE:** Refund dates are different from withdrawal dates. (See Withdrawal from the University section on the University Registrar's website: <http://registrar.missouri.edu/policies-procedures/withdrawal-university.php>.)

## Grade Appeal

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student's work.
- If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student's work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

## Incomplete Grades (Grade of I)

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting *I* grades to the University Registrar.

An *I* grade may be assigned only when:

1. The completed portion of the student's work in the course is of passing quality AND
2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of *I* grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:

- The name of the student
- The course number, title and credits
- Semester and year of enrollment
- A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the *I* grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an *I* grade must complete the course requirements either:

1. within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the *I* and record a grade of *F* in classes graded A-F or a grade of *U* in classes graded S/U. Any student planning to graduate with an unresolved *I* grade should be aware that translation to an *F* could drop the GPA below the requirements for graduation. As with any academic deficiency, the low GPA would delay the student's graduation until all requirements for graduation are met.

### Note:

- A grade of *I* is not figured into the grade point average.
- Students should not re-enroll in a course for which they have been assigned a grade of *I*.
- For further information, see the Faculty Handbook, Academic Regulations (<https://missouri.app.box.com/v/facultyhandbook/>).
- Exceptions to unresolved incomplete grades changing to an *F* are as follows:

- Courses taken for graduate level credit
  - Courses taken prior to Fall 2003
  - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Grades of *I* and the reason for the delay of grade may also be entered directly into myZou.

Questions may be directed to the Office of the University Registrar, (573) 882-4249.

## Unassigned or Erroneous Grades

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar on a form provided for that purpose.

**Note:** Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the University Registrar will record a *NR* (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months *NR* will change to an *F*.

For graduate and professional students, the *NR* grade will remain on the transcript until a letter grade is submitted. If a letter grade is not submitted, an *NR* can remain on the student's record indefinitely and will not convert to an *F*.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the Faculty Handbook, Academic Regulations (<https://missouri.app.box.com/v/facultyhandbook/>). Questions may be directed to the Office of the University Registrar, (573) 882-4249.

## Grades & Credits (G)

### Grading Scale

Graduate students' grades in all courses counting toward an advanced degree may be reported as: A +/-, B +/-, and C +/- . Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member's evaluation of student performance and/or policies of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C and C- as passing grades; however, grades in the C range may not be acceptable for specific program-matic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded to a graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student's grade point average.

### S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as "graded on S/U basis only" in the online Schedule of Courses available through myZou.

## Incompletes

An incomplete grade (*I*) may be recorded when the student's work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an "I" grade will require an accompanying letter of justification from the instructor. Although grades of "I" do not automatically convert to an "F" if not completed, academic programs or the instructor may establish conditions or regulations pertaining to "I" grades that are more stringent.

## Unreported Grades: NR

When grades are not reported by the instructor, these "Blank Grades" will be recorded as "NR" (Not Recorded). The NR designation will remain on the student's transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student's record indefinitely and will not revert to an "F".

## Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member's academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

## Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit. 8090/9090 research (8990/9990 Research for Engineering students) is reserved for master's and doctoral degree students working on a thesis or dissertation.

## Grade Point Average

A graduate student's grade point average is based on the student's entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

## GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed.

A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a semester/term or cumulative GPA falls below 2.0. Note: Summer session is not counted as a semester.

## GPA and Graduation

To graduate, a student must have an overall GPA of 3.0 in all graduate courses taken at MU and not just those courses listed on a plan of study.

For more information on grading, credit and related policies go to <http://gradschool.missouri.edu/academics/progress/grading-credit.php>.

## Grades & Ranks (L)

### Class Rankings

At the end of each semester, students are included in the first year, second year or third year class lists and are given a class rank based on their position in their class list. Classes are ranked by expected date of graduation.

When calculating the class rankings for the first year and second year classes, summer grades are included in the rankings for the following fall semester.

The graduating class ranking is determined as of the end of the summer semester and includes all students graduating within the academic year (preceding fall and spring semesters and current summer session).

### Rules for Determining Class Levels

In order to register for courses, students are assigned a class level. The class levels are determined as follows:

1. **First Year Students:** A student who has received 30 hours or fewer of law school grades;
2. **Second Year Students:** A student who has between 31 and 56 (inclusive) hours of law school grades;
3. **Third Year Students:** A student who has received more than 56 hours of law school grades;
4. **Law School Grades:** As used herein, 'law school grades' means grades counting towards credit at the School of Law. Failing grades do not count as 'law school grades;'
5. **Effect of Summer School.** The determination of class level is made ONLY at the conclusion of the fall and spring semesters. A student's class level will NOT therefore change at the end of summer school;
6. **Exceptional Circumstances:** In cases of students in unusual situations, including, for example, part-time or unusually heavy- or light-load semesters, a determination will be made on the basis of dividing the student's law school career into relatively equal periods for the first, second and third years.

### Computation of Grade Point Average (GPA)

Grade point averages are based only on law school courses taken at this school and only upon 'graded courses.' For the purpose of computing grade point averages, a 'graded course' is one which is graded on the 65-100 scale.

A grade point average is obtained as follows:

1. The 'grade points' for a graded course are obtained by multiplying the numerical grade for the course by the number of credit hours for the course.
2. The 'grade point average' is obtained by dividing the total grade points for all graded courses by the total number of credit hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the

grade for the previous taking of the course will thereafter be used in the computation of the student's cumulative grade point average. The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student's first, second and third years.

### Course Repeat Policy

The School of Law's Standards and Readmissions Committee ('the Committee') has adopted the following course repeat policy:

1. Students who petition the Committee for readmission may be required to repeat any or all courses previously completed;
2. Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
3. Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Committee for permission to repeat the course. The Committee may grant such petition based on exceptional circumstances;
4. Students who fail a required course are required to repeat that course unless, in exceptional circumstances, repeating the course is waived.
5. Students who fail a non-required course are eligible to petition the Committee for permission to repeat the course. The Committee may grant such petition based on exceptional circumstances.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

### Dean's List

Beginning with the Class of 2021 and going forward, the top 1/3 of the class will be eligible for inclusion on the Dean's List. For the Class of 2019 and the Class of 2020, a student qualifies for inclusion on the Dean's List with a semester average greater than 85.999.

### Good Standing

After the first semester of the first year, a student is in 'good standing' at the School of Law if the student's cumulative GPA is greater than 76.399.

Thereafter, a student is in 'good standing' at the School of Law when both the student's current semester and overall GPA are greater than 77.499.

### Grades and Grading

The grades (<https://law.missouri.edu/registrar/grades/>) recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters 'S' (Satisfactory) and 'U' (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and earn course credit. The grades of U and of 65 through 69 are failing grades and do not earn course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than

anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean's Office. Professors may not obtain the names of students prior to assigning grades. Upon written approval from the professor and only under exceptional circumstances may a grade be changed after the names are known.

Explanation of the Grading Scale (<https://law.missouri.edu/registrar/grades/>)

## Grades from myZou

Students may obtain their grades from MyZou. In addition to the student's PawPrint, when checking grades for only one course, students must know the course number.

## Student Honors

### J.D. Degree Cum Laude

Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7 percent of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.

Any student with a graduating grade point average within the top 12 percent of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

### Order of the Coif

The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship, and whose achievements as students make them worthy of this distinction. Selections are made after six semesters of grades and once rankings have been determined. To be eligible for membership in the Order of the Coif students must complete 75 percent of their law studies in graded courses. Starting in 2014, transfer students will be considered as having completed their first year of law studies in graded courses for purposes of calculating the 75 percent of coursework in graded courses requirement.

### Order of the Barristers

The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

## Graduate Academic Minors (G)

### Non-designated minors

Non-designated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student's plan of study; however, they are not listed on a student's transcript.

## Obtaining approval for a minor

Both designated and non-designated minors must be approved by the student's major advisor, the student's academic program director of graduate studies, and the Graduate School.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor. Designated minors are listed on a student's transcript.

## Graduate Assistants and Fellows (G)

### Graduate Assistantships

Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

### Fellowships

Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

### Assistantship and Fellowship Policies

The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School's website (<http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php>).

## Graduate Certificates

A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of graduate courses. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student's official University of Missouri Transcript.

To accommodate a variety of learners' needs, MU offers two types of graduate certificate programs:

- Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program. Prospective students have an option to apply for graduate study as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.
- Degree-dependent graduate certificates are designed for degree-seeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

## Certificate Admission Information

Stand-Alone Certificate Applicants. All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School's online application for admission and meet the Graduate Faculty Senate's minimum admission requirements for all programs.

## Degree-Dependent Certificate Applicants

New applicants applying for a degree program should complete the Graduate Studies' online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Advisor Form (pdf) should be completed to add a graduate certificate.

## Financial Aid

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc. from the Office of Graduate Studies or University of Missouri.

## Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as "certificate-seeking" graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is submitted. Please refer to the certificate program's site for certificate policy updates.

## Credit Hours Necessary for Certificate Completion

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program's site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

## Grievances (L)

---

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at <http://www.aals.org/>.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312)988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date on which the complaint is being filed; the name and address of the complainant; and a description of the complaint. The description of the complaint shall include a description of the accreditation standard which the law school's action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

The complainant shall have the right to appeal this initial decision by filing an appeal with the Faculty Policy Committee. The appeal shall be filed in writing within 14 calendar days from the date on which the initial decision was issued. The appeal shall include the date on which the appeal is filed; the name and address of the complainant; a copy of the original complaint; a copy of the initial decision; and an explanation of the basis of the appeal.

The Faculty Policy Committee will review the documents presented, and issue a decision in writing within 30 calendar days from receiving the appeal. The Faculty Policy Committee can sustain or reverse the initial decision. In cases where the initial decision is reversed, the Faculty Policy Committee will direct the Associate Dean for Academic Affairs on what corrective actions to take. The decision of the Faculty Policy Committee shall be considered final and subject to no further review.

All complaints submitted to the Associate Dean for Academic Affairs or to the Dean of the Law School shall be retained for a period of 7 years in the Associate Dean for Academic Affairs Office or electronically. The above serves to satisfy ABA Standard 510.

## Holds

---

There are several types of holds, which are restrictions that may block registration. Students are notified through myZou if they have a hold. They should go to the location indicated in myZou to resolve the hold.

*Policy Source: Academic Unit/Department*

In some situations, it is important that records or holds preventing certain actions be maintained in student records across the four campuses in the University of Missouri System. For instance, if a student is sanctioned with University Dismissal, University Suspension, University Expulsion or other sanctions / agreements that extend beyond a given campus, a mechanism to enforce such agreements or sanctions is applied. (Click here for the policy

([http://www.umsystem.edu/ums/rules/collected\\_rules/programs/ch200/200.025\\_equity\\_resolution\\_process\\_for\\_resolving\\_complaints\\_of\\_harassment](http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.025_equity_resolution_process_for_resolving_complaints_of_harassment))

## Honors Recognition (V)

---

Each student graduating from the College of Veterinary Medicine and whose cumulative grade point average (G.P.A.) in the professional curriculum is within the range listed below will be designated, as indicated on the diploma, to graduate with honors:

G.P.A. 3.9-4.0 summa cum laude

G.P.A. 3.8-3.89 magna cum laude

G.P.A. 3.7-3.79 cum laude

(General Faculty meeting minutes, 10-10-74)

## Late Registration

---

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (<http://myzou.missouri.edu/>).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

## Leave of Absence (G)

---

### Key Terms

#### Leave of Absence

The student anticipates a need to discontinue enrollment for one or more semesters.

#### Active Duty Leave or Withdrawal

Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

#### Contact Advisor and Director of Graduate Studies

Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate advisor and the academic program's director of graduate studies to inform them of their intent, the reason requesting leave and the expected duration.

#### Letters to the Graduate School

If leaves are requested for pregnancy, parenting, or other caregiving reasons or once a doctoral student has reached candidacy (post-comprehensive examination), the request must be approved by the Dean of the Graduate School. After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the Dean of the Graduate School. The director of

graduate studies' letter will verify that the academic program has been ~~submitted~~ and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date. All leaves for pregnancy, parenting, and other caregiving reasons will be granted according to the policy established by the Graduate Faculty Senate.

#### Resolving Financial Support Responsibilities

It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their advisor or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return.

#### Notification for Re-Entry

Before the completion of the Leave of Absence, the student must notify the academic program's director of graduate studies and the Graduate School so that the re-entry process can be initiated.

#### Contact with the University During Leave

Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

#### Extension of Degree Time, Continuous Enrollment

Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension. Extensions for parenting, pregnancy, and caregiving reasons will be granted at the time of the leave request.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence. Students who are on leave due to pregnancy, parenting, or other caregiving reasons will not be required to petition for an exception and will not be required to be continuously enrolled during the leave.

#### International Students

International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student advisor to determine the appropriate steps to safeguard their immigration status.

#### Military - Active Duty (Voluntary or Involuntary)

---

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily

or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: **NOTE: Students must choose either option 1 or 2**

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law's existence and proof of its applicability to him/her. **Please note:** Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:

State of Iowa "Code Section 261.9(1)'g' (<https://www.iowacollegeaid.gov/content/postsecondary-registration-iowa-code-chapter-261b-additional-requirements/#codes>)

## Option 1 - Withdrawal from all courses for semester

They may choose to withdraw from all classes. In such cases, a student may request either:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.
2. Or the student may request that all courses for that semester be expunged from the student's academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester

**NOTE:** Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

## Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an "Incomplete" grade.
- **I to F policy:** Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as "I" until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.
- **NR to F Policy:** Military duty will be exempted from the one -year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR

grades for students called to active military duty will remain listed as "NR" indefinitely, if so desired by the student.

Upon completion of all course work for the semester, the student may choose either to:

1. Have the grade earned for the course and have the "Incomplete" expunged from his or her official record  
OR
2. Have the "Incomplete" grade remain as the final grade with reason for the "Incomplete" noted on his or her official record

**NOTE:** No refunds will be given for option 2.

**Residential life:** Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

**Financial Aid:** The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

**Scholarships:** Scholarships may or may not be applicable upon the student's return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue an academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

### Contact:

Office of the University Registrar  
125 Jesse Hall  
The University of Missouri - Columbia  
Columbia, MO 65211  
Office: (573) 882-7881  
Fax: (573) 884-4530

**The Office of the University Registrar will require the following information:**

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530.

## Re-admission of previously enrolled students

**Undergraduate** students who are returning to MU after an absence of at least one semester must complete a request for re-admission

for undergraduate studies (<https://admissions.missouri.edu/apply-returning-student/>) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887.

Degree-seeking **graduate** students who are returning to MU after an absence of at least two semesters must complete a graduate studies re-activation form (PDF) (<http://gradstudies.missouri.edu/forms-downloads/>) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-5454.

View Missouri Revised Statutes Chapter 41 (41.948) (<https://revisor.mo.gov/main/OneSection.aspx?section=41.948>). This policy is implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.

---

## MU Course Work Required

---

MU requires that 30 of a student's last 36 credits must be MU course work. Mizzou Online-Self Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online. (NOTE: This policy has replaced the requirement for courses to be taken "in residence.") Courses from a community college can account for six of the last 36 credits.

---

## Name Changes

---

### Policy Related to Changing Preferred Names for Students at the University of Missouri

The student may use preferred first and middle names at Mizzou. Preferred first and middle names are used on class rosters, ID cards, transcripts and diplomas and other locations where the legal name is not required. The policy outlining the use of the name may be found at: The University of Missouri Office of the University Registrar Preferred Name Policy ([https://www.umsystem.edu/ums/rules/collected\\_rules/information/ch180/180.040\\_student\\_preferred\\_name\\_policy/](https://www.umsystem.edu/ums/rules/collected_rules/information/ch180/180.040_student_preferred_name_policy/))

The path to update a preferred name in myZou is:  
Student Center>Personal Information>Names>Add a New Name.

NOTE: The Human Resource computing system overrides ID card names. If students who are employed by MU wish to have a preferred name on ID cards, they need to contact their department MU HR officer. Students who have questions may contact the University Registrar.

### Policy Related to Changing Names for Students at the University of Missouri

The student must submit one of the legal documents listed below under 'Proof of legal change to new name.'

The document submitted must have date of birth, a photograph and a signature. If you have multiple documents that prove your legal name change, please bring copies of the documents along with the name change form (<http://registrar.missouri.edu/forms/name-change.pdf>) to the

Office of the University Registrar (<http://registrar.missouri.edu/contact/>). (<http://registrar.missouri.edu/contact/>)

Proof of legal change to new name:

1. current, government-issued ID card such as a driver's license, military ID, passport
2. current, valid Social Security card with new name
3. federally recognized Indian tribe's enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
4. certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full

NOTE: Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

---

## Non-Degree Graduate Study (G)

---

The Non-Degree Graduate Student Program (post-baccalaureate) allows students to prepare for admission to a graduate degree program either at MU or elsewhere, explore a new discipline, take courses for career advancement, or simply to seek personal enrichment experiences.

A non-degree graduate student may take undergraduate or graduate level courses, but hours earned are not credit toward a graduate degree. However, if a student is later admitted to a degree-granting program, up to 12 hours of earned graduate credit may be applied toward a graduate degree program, at the discretion of faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note: To manage course enrollment, some academic programs require registration permission for non-majors. Contact the academic program (<https://gradschool.missouri.edu/degree-programs/>) in which you wish to take courses for more information.

### Eligibility

To be admitted as a non-degree graduate student, applicants must have earned a minimum of a baccalaureate degree or equivalent from a regionally accredited institution. Applicants who completed their baccalaureate degree in a country where English is not the native language must provide evidence of English proficiency. Please consult the Graduate School's website (<https://gradschool.missouri.edu/admissions/eligibility-process/international-applicants/>) for acceptable examinations and minimum score requirement.

### Tuition and Fees

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

### Financial Aid

Non-degree graduate students are not eligible to receive veterans benefits or to hold campus-sponsored assistantships. Federal financial aid may be available to some non-degree students for preparatory coursework. Contact the Office of Student Financial Aid for more information.

## How to Apply for On-Campus Non-Degree Study

- Complete the Graduate School's online Application for Admission (<https://applygrad.missouri.edu/apply/>).
- While completing your application, you will be asked to upload unofficial copies of your transcript(s) with degree awarded.
- As part of the submission process, you will be asked to pay an application fee. Consult the Graduate School's website (<https://gradschool.missouri.edu/policy/application-fee/>) for more information on the application fee.
- Official transcripts should be submitted to the Graduate School before the end of the first semester of enrollment. Transcripts may be sent from your schools electronically via email to this address: [gradadmin@missouri.edu](mailto:gradadmin@missouri.edu).
- Hard-copy transcripts may be sent to: Graduate School Admissions, 210 Jesse Hall, Columbia, MO 65211.
- Supplemental application materials, such as standardized tests (e.g. GRE, GMAT), or recommendations, personal statements, writing samples, etc. are not required for non-degree graduate applicants.

## Maintaining Good Standing

Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student's cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the Dean of the Graduate School. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student's term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

## Switching Student Status from "Non-Degree" to "Degree-Seeking"

When transitioning from non-degree status to a degree program, non-degree graduate students should consult the academic program of interest (<https://gradschool.missouri.edu/degree-programs/>) to determine the required application process.

## Posthumous Degree Awarding (G)

### Honoring Deceased Graduate Students

The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

### Student Completed All Degree Requirements

If the student has completed all degree requirements, the college or school's representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the Associate Vice Chancellor for Graduate Studies to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma

may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.

## Student Did Not Yet Complete Degree Requirements

If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean's certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.

- \* In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

## Refund of Fees Policy

### Exceptions to published tuition and required fees assessment policy and charges

1. The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.
2. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.
3. Only tuition required related to a student's assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.
4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

### Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.

Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
  - a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student's enrollment, thus changing the assessment. This provision specifically excludes conditions or chronic illnesses that remain static and are known to the student at the time of enrollment.

- b. Written documentation of substantiated circumstances involving deadlines where a student has in good faith relied on information provided by a named University official, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about its terms.
  - c. In individual cases and when it is in the best interest of the student and the institution, the University registrar or his/her designated assistant registrar may grant an exception that is not deemed to be served appropriately by the exception criteria stated elsewhere in this document.
3. Decisions will address only whether an adjustment of charges will be made. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school. Record changes, such as requests to withdraw, drop, add or enroll for courses in a term that has ended must be submitted on a separate form to the Revision of Records Committee, c/o the Office of the University Registrar, 130 Jesse Hall.
  4. Generally, grounds for consideration of an appeal will be restricted to those circumstances personally experienced by the enrolled student with whom the University has a direct relationship.
  5. Decisions will be rendered by the designated official of the Office of the University Registrar and will be based solely upon any and all pertinent written documentation.
  6. Notification of the status of the tuition appeal will be made in writing within 10 calendar days of receipt of the written appeal.

## Appeal of the decision rendered by the Office of the University Registrar

1. Upon written request a student may appeal the decision rendered by the Office of the University Registrar.
2. A written appeal must be submitted to the Office of the University Registrar.
3. The written appeal must request a review of the original decision and may contain additional written documentation to support the appeal.
4. The appeal will be reviewed by the same designated official. If the appeal information is sufficient to overturn the original decision, the designated Office of the University Registrar official can direct staff to issue a tuition refund or adjustment in accordance with appropriate fiscal procedures.

If denied within 10 calendar days of receipt, the information must be forwarded to the University Registrar. If the appeal is denied a second time by the University Registrar, it may be forwarded to the vice provost for enrollment management for further consideration, upon the student's request.

The decision rendered by the vice provost for enrollment management is the final University determination on the matter.

## Refund of tuition and fees in the event of a student death

1. When a student dies prior to completing the current academic semester, a full refund of or credit for tuition and required fees will be made after the deduction of the following:
  - a. Any required adjustments to scholarships, grants or loans determined by federal formula applied by the Office of Student Financial Aid.
  - b. Any other debts owed to the University that occurred prior to the death of the student.
2. Any refund will be made payable to the student.
3. If, after all adjustments are made, there still remains a debt to the University, generally the University would not attempt to recover the debt from the estate of the deceased student.

## Students called to active military duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

## Students called to jury duty

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

## Residency (L)

---

The School of Law residency rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student's course load -- the number of hours a student enrolls in for a given semester -- and residency rules are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Most students attend law school for six semesters. However, some students plan to graduate after only five semesters by attending summer school. Students who plan to attend summer school for two years and graduate a semester early should visit with the Associate Dean for Academic Affairs concerning their summer course load requirements.

For residency purposes, a minimum load of twelve hours is required for a semester. Thus, each student generally needs at least 12 hours each semester to meet residency requirements. (NOTE: An average of 12 credits per semester is not sufficient to complete the 89 credit degree requirement.) For purposes of accelerated graduation, the law school's residency rules require students to take a minimum of five hours in one summer session and combine it with another summer session of no less

than seven hours. Two summer sessions of six hours each serve the same purpose. This approach gives students five semesters of at least 12 hours and two combined summers of 12 hours, which satisfies our residency requirements. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation.

A student may combine any summer hours with an appropriate number of hours in a regular semester in order to fulfill a 12-hour semester residency requirement if they should fall below 12 hours during a semester for some reason. Students completing more than 12 hours in a semester may not use surplus hours over 12 toward residency in any other session; hence the three surplus hours from a 15-hour semester cannot be added to a subsequent nine-hour semester to give residency for two semesters. On the other hand, a nine-hour semester can be combined with a three-hour summer session to give residence for one semester.

A student in their final semester only can take less than 12 hours provided that the number of credits being taken is sufficient to satisfy the remainder of the 89 credit degree requirement. In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

---

## Revision of Records

---

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their advisor before appealing to the committee to verify that changes are warranted and will benefit the student.

**For instructions for completing petition to the committee see** Revision of Records (<http://registrar.missouri.edu/policies-procedures/revision-records.php>).

The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to [revisionofrecords@missouri.edu](mailto:revisionofrecords@missouri.edu).

---

## Student Conduct (L)

---

The academic life of students at the School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at <https://law.missouri.edu/academics/policies-rules-student-conduct/>.

Students may have to appear before the Office of Student Accountability and Support (<https://accountability.missouri.edu/>) for conduct that violates university or other rules.

Incidents involving bias or harassment can be reported through the Office of Civil Rights and Title IX. Information is available at <http://missouri.edu/civil-rights-title-ix/>.

---

## Student Employment (L)

---

No student shall work more than 20 hours per week in a semester where the student is enrolled as a full-time first-year law student (hereinafter the '1L 20-hour rule').

The 1L 20-hour rule does not apply to the period between semesters, or the summer (unless the student is enrolled in summer school full-time) or to any break during the semester (e.g., spring or Thanksgiving breaks).

---

## Student Files (V)

---

The following policy relates to compliance with the Family Educational Rights and Privacy Act Amendment to the Elementary and Secondary Education Act of 1974:

- (1) Each student requesting permission to examine his/her file will be referred to the Associate Dean for Academic Affairs or his or her designate.
- (2) Each student must provide proof of:
  - a. Current student status at the University of Missouri (or, if during an academic recess, attendance during the past academic session).
  - b. Identity. They must provide some identification which allows visual comparison of person's appearance with a photograph on an item such as a driver's license or student identification card.
- (3) If the above conditions are met and permission is granted, a student will be allowed to examine their entire student record. This must be affected only in an office occupied by one of the assistants in the Dean's Office.
- (4) Copies of any item in the student's folder except for transcripts or letters of recommendation and/or evaluation will be provided at cost. In such cases the sum of 25 cents per page must be collected before any copies are provided.
- (5) A student must not, under any circumstances, be left alone with the folder.
- (6) A record will be placed in the student's folder stating the date and time that such examination occurred. It should be initialed and dated by the Associate Dean for Academic Affairs or his or her designate. (CVM Executive Committee, 1986)

---

## Student Level (U)

---

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

Class	Credits
Freshman	0 to 29 credits
Sophomore	30 to 59 credits
Junior	60 to 89 credits
Senior	90 or more credits

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen, non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated

Colleges and Universities as well as those from other colleges and universities.

## Testing Out of Courses (V)

For professional courses cross-listed as undergraduate or graduate courses, students may opt out of the course during the professional curriculum if the following conditions are met. The student took the course within three years, received an A or B in a course, and received instructor permission to waive the course.

Veterinary students are charged a flat rate per academic semester and testing out of a course will not result in a prorated tuition rate.

## Theses and Dissertations: Submission Deadline, Review and Public Disclosure (G)

### Formatting the Thesis

A thesis, when required for a master's program, must be written on a subject approved by the candidate's advisory committee. The thesis must be the student's own work and must demonstrate a capacity for research and independent thought. Refer to the Master's Degree section for details.

Formatting guidelines may be found here (<https://gradschool.missouri.edu/current-students/thesis-dissertation/thesis-dissertation-guidelines/electronic-dissertation-thesis-basics/>) and/or on the Graduate School's Canvas organization site. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

### Formatting the Dissertation

A dissertation is required for doctoral degrees and must be written on a subject approved by the candidate's advisory committee. The dissertation must include the results of original and significant investigation, and it must be the candidate's own work. Refer to the Doctoral Degree section for details.

Formatting guidelines may be found here (<https://gradschool.missouri.edu/current-students/thesis-dissertation/thesis-dissertation-guidelines/electronic-dissertation-thesis-basics/>) and/or on the Graduate School's Canvas organization site. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

### About Third-Party Copyright

If your work contains material that has been copyrighted by another party, you may need to seek permission to use the material in your thesis or dissertation. Examples of materials for which you would need to seek copyright permission include, but are not limited to: third-party software, images, graphics, large portions of text and maps. If copyright permission is needed, you must submit written approval for the use of the copyrighted material along with your thesis or dissertation.

## Substituting for Copyrighted Materials in Theses and Dissertations

The purpose of the thesis and dissertation is to advance knowledge in the student's discipline or field. The Graduate School encourages students to seek permission to use copyrighted material in their theses and dissertations. Your work is published after it is submitted in approved form to the Graduate School, and it will be available to audiences who wish to know more about the subject you investigate. The more full and complete the thesis or dissertation, the better the experience for your reader and, therefore, the better the response your scholarship and creative work. However, if you are unable or unwilling to obtain copyright permission for some of the materials in your research, you may substitute for the copyrighted material as described below.

*Acceptable substitutions include:*

- Redrawing or tracing of maps, images, graphics, etc.
- References to URLs, printed documents, or physical locations where the copyrighted material can be found

A student whose thesis or dissertation has had copyrighted material removed prior to submission must have their advisor sign a document reading:

[Student's name] has removed copyrighted material from the copy of the thesis or dissertation submitted to the Graduate School for electronic publication. I certify that:

- I approve the thesis or dissertation in this form;
- The student has presented accurate information as to where the removed, copyrighted material can be found.

Advisor's name (signature line) Date (date line)

## Submission Deadline for a Thesis or Dissertation Following Committee Approval

Each semester the Graduate School establishes semester deadlines for the Report of the Examining Committee (master's & EdS students), Report Dissertation Defense (doctoral students), and submission of theses, dissertations, and supplemental materials. Those deadlines may be found on the Graduate School's website (<https://gradschool.missouri.edu/current-students/graduation-commencement/graduation-checklist/>).

After successful defense of the thesis or dissertation, students must comply with their academic program's and/or the International Center's enrollment requirements.

Generally, based upon input from the thesis/dissertation committee, a student will make corrections to a thesis/dissertation. The student will prepare the final document and supplemental materials in the required format (<http://gradschool.missouri.edu/policies/thesis-dissertation/>) and submit everything to the Graduate School by the semester deadline. In the event the student misses the current semester deadline, the student is required to submit the final dissertation or thesis by the end of the following semester after a successful defense. If an extension is needed, the student's advisor and program's DGS must submit a request for an extension letter to the Graduate School. The student's degree will not be conferred until the final document is submitted and approved by the Graduate School. If it is submitted after a semester deadline, the degree

will not be conferred until the following semester, which can include summer.

## Submission Requirements and Forms

A thesis or dissertation must be presented before the deadline to the Graduate School. The preferred submission method is via Canvas, however submissions on high-quality CD are also acceptable. The thesis or dissertation must be contained in a Portable Document Format (PDF) file (<https://gradschool.missouri.edu/policy/technology-and-your-thesis-or-dissertation-supplemental-materials-submission/>), with the appropriate margins and formatting. Additional electronic files must be included (<https://gradschool.missouri.edu/policy/supplemental-electronic-thesis-and-dissertation-materials/>) on the CD as PDF documents with the appropriate file name. If all files will not fit on one CD, a DVD or multiple CDs may be used, as long as no single file is split between CDs.

## Additional Documents that Accompany the Electronic Submission

Several other documents must be submitted electronically or on CD, including the original signed Approval of the Committee page, electronic release form, processing fee, and more. Please review the required supplemental materials at this link (<https://gradschool.missouri.edu/current-students/thesis-dissertation/thesis-dissertation-guidelines/electronic-dissertation-thesis-basics/>).

## Review of Theses and Dissertations by the Graduate School

Before a manuscript can be accepted for publication in scholarly journals, it is examined by editorial board members, for conformance to specific format style guidelines, in addition to quality of content. In much the same manner, Graduate School staff, acting as an editorial board, reviews every submitted thesis and dissertation for conformance to University guidelines. Failure to meet the appropriate standards will result in the rejection of your work.

## Copies of Theses and Dissertations

The MU library catalogs all thesis and dissertations in the Merlin system. To locate a thesis or dissertation go to the MOSpace repository.

## Specific Questions about MU Theses or Dissertations?

Specific questions should be directed to the academic advising staff of the Graduate School, 210 Jesse Hall, 1-800-877-6312.

## Thesis and Dissertation Research Must be Open to Public Disclosure

Students are prohibited from using research (e.g., data, results, methods, other content) in their theses or dissertations that could restrict subsequent publication or public disclosure of these documents. Examples of restricted information include classified or proprietary materials. It is important to note that these restrictions do not apply to non-thesis or non-dissertation research that is approved by the student's advisor and allowed by University of Missouri policies.

Freedom to publish and disseminate results are major criteria for assessing the appropriateness of any research project, particularly those involving graduate students. Consistent with the mission of the University of Missouri, the integrity of a student's academic/research experience

shall be preserved, including the ability to complete and publish a thesis or dissertation and to freely publish, present, or otherwise disclose the results of research both within the academic community and to the public at large. The University precludes assigning to extramural sources the right to keep or make final decisions about what may or may not be published with respect to a student's dissertation or thesis project. Within this general understanding, the University also realizes that circumstances may arise where certain restrictions or limitations may be appropriate. Short, reasonable delays may be appropriate, for example, to allow the research sponsor to review publications for inadvertent disclosures of proprietary data or potentially patentable inventions. When at all possible, these potential delays should be discussed with the student as early in the research process as possible. In the case of a dissertation or thesis, the review MUST be completed prior to submitting the document to the Graduate School. Policies that govern graduate student thesis/dissertation publication allow for a short embargo of the dissertation/thesis but it is advisable to ensure the dissertation, in its entirety, contains no proprietary information prior to submission. Once submitted, the dissertation/thesis is linked to the degree and withdraw of the dissertation could require rescinding the associated degree.

## Transfer Admission from Other AVMA Accredited Schools (V)

Transfer students entering the professional curriculum from other AVMA-accredited veterinary schools: Applications will be referred to the Committee on Admissions and Scholarship for recommendation to the Dean. Each case shall be handled on an individual basis. (CVM Executive Committee, 1986)

## Transfer Credit (L)

### Credit Earned at Other Law Schools

Pursuant to ABA Standard 505, a student may earn credits at another law school to be applied toward the J.D. graduation requirements of the School of Law, on the following conditions:

1. No more than 30 semester credits may be so applied. Grades in courses taken at other law schools are reflected in the transcript. However, those grades do not calculate in the student's grade point average.
2. The law school at which the credits are earned must be, at the time of the student's work there, approved by the American Bar Association.
3. The Associate Dean for Academic Affairs must approve, in advance of the student's work, the particular law school and the course of study the student will pursue there. The student is required to submit a syllabus for the course(s) to be taken.

### Credit Toward LL.M. Requirements for Non-Law Courses/Transfer Credit

With approval of the Director of the LL.M. Program, students may apply to the LL.M. graduation requirements up to six (6) graduate credits of university or college courses from outside the School of Law. This limit includes Independent Study courses supervised by faculty in units other than the School of Law. Credit toward the LL.M. degree for a non-law school course will be granted only under the following conditions:

- The course must be a graduate-level course and clearly marked as such on the transfer transcript complete with credit hours and a

grade. If taken at the University of Missouri, it must be numbered 5000 or above.

- The transfer coursework is from a regionally-accredited institution in the U.S. or an overseas institution that is recognized by its country's Ministry of Education as a graduate degree-granting institution.
- The course must involve at least 14 class hours per credit (based on 50-minute class hours).
- The course must be related to the student's program of study. Students must submit a copy of the course syllabus if possible.
- The semester hours of the non-law-school course will be counted in the student's total number for the semester.
- The grade must be B or higher.
- The transfer coursework is not online, extension or correspondence credit.

Normally, the Director of the LL.M. Program must approve the course in advance of the student's work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment in the LL.M. Program if the credits were for work closely related to the student's work in the LL.M. Program and were taken for graduate credit. Credits will not be applied from the student's J.D. degree program or equivalent. A written request must be submitted to the Director of the LL.M. Program and include the following:

- (a) Institution, course name, number, and instructor; and
- (b) Description of how the course relates to the student's program of study.

## Transfer Credit and Degree Applicability

---

- Transfer from a Regionally Accredited Missouri College (p. 879)
- Transfer from a Community College (p. 879)
- Transfer Within the UM Systems (p. 880)
- Military Transfer Credits (p. 880)
- Transfer Students and University General Education Requirements (p. 880)

## Credits and Transfers

After students are admitted to the University of Missouri (MU), an admissions evaluator will evaluate whether any college credit earned elsewhere is transferable to MU. Coursework being transferred from schools outside of Missouri may need faculty review, which can delay the evaluation process.

- Advanced Placement (<https://admissions.missouri.edu/apply-transfers/credits-transfers/>) credit is only awarded based on official score reports sent to MU directly from the College Board, and not based on scores reported on transcripts.
- Dual credit (<https://admissions.missouri.edu/apply-transfers/credits-transfers/>) must be evaluated by Admissions prior to being awarded.
- Courses transferred from Missouri community colleges will generally count as lower-division credit, however students should check the Transfer Course Equivalency site for course specific information.
- For details on course equivalencies for most school in Missouri and for select out-of-state institutions, check MU's transfer course equivalencies which can be accessed from the myZou log-in page (<http://myzou.missouri.edu>) and then clicking on Transfer Course

Equivalency. Students interested in seeing how transfer courses might apply toward MU degree requirements can go online to transferology (<https://www.transferology.com/>) to enter course data, review equivalencies, and produce an unofficial degree audit.

- The MizzouMACC Program (<https://admissions.missouri.edu/mizzoumacc/.html>) is available for students wishing to transfer from Moberly Area Community College of MU.
- Advanced standing credit in a foreign language awarded by previous institutions will not transfer to MU. It can be requested after you have successfully completed a course at MU at or above that level.
- Military veterans may be awarded some credit if they meet certain criteria (<https://admissions.missouri.edu/military/military-veterans-service-credit/>).

Generally, coursework completed at a regionally accredited institution and oriented toward a baccalaureate degree will be accepted if each grade is C or better. Generally, the following types of credit are exceptions that are excluded from transferable courses: Technical, vocation or remedial courses; Courses not intended for a baccalaureate degree and/or terminal vocational degree or certificate program; Courses from non-regionally accredited institutions, though there is an appeal process.

Questions should be directed to the MU Office of Admissions (<http://admissions.missouri.edu/>).

## Transfer from a Regionally Accredited Missouri College

Students may transfer more than 64 credit hours of lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's policy.

## Transfer from a Community College

Community college courses generally have transferable equivalents at the 1000 or 2000 level. A community college course may be the equivalent of a University of Missouri course of 3000 or greater, if that course is determined by the MU department that it is equivalent.

Courses from a community college can account for six of the last 36 credits.

Students may transfer more than 64 credit hours for lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's Handbook.

For additional information, contact the college or school from which the degree is sought or see Credits and Transfers (<https://admissions.missouri.edu/apply-transfers/credits-transfers/>) information from the MU Office of Admissions (<http://admissions.missouri.edu/>).

## Articulation Agreements

Contact departmental advisors for information on articulation programs and agreements.

## Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student's lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University.

Students transferring to MU from a regionally-accredited Missouri college or university with an AA degree and a certified 2.0 GPA will be accepted with junior standing. They will also have completed lower-division, general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally-approved, general-education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU, but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in this catalog on the degree specific pages. Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

## Associate of Science Degree

An Associate of Science degree (AS) is a specialized degree intended for transfer into a specific, preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional, general-education courses.

## Students without Associate Degrees

Students transferring without associate degrees must meet regular MU transfer admission standards.

## Transfer within the UM System

Students may transfer among campuses within the University of Missouri System. University of Missouri Policy states that 'Any course that leads to an undergraduate degree on any campus of the University of Missouri shall be accepted in transfer toward the same degree on each campus of the University offering said degree.' Students transferring within the UM system are still required to satisfy the course and residency requirements of the campus from which they wish to graduate. Grades, including D and F grades, and grade points earned will also transfer and be included in the cumulative UM grade-point-average.

For more information contact the following offices:

University of Missouri - Columbia, Office of Admissions, 800-225-6075, mu4u@missouri.edu

University of Missouri - Kansas City, Registration & Records Office, 816-235-1125, registrar@umkc.edu

Missouri University of Science and Technology, Registrar's Office, 573-341-4181, registrar@mst.edu

University of Missouri - St. Louis, Office of the Registrar, 314-516-5545, registration@umsl.edu

## Military Transfer Credits

Military veterans, with at least two years of honorable service are allowed to transfer military course credit. The transcript coursework must have

been accredited by the American Council of Education (ACE). Veterans are advised to contact University Admissions regarding specific transfer credit policies. An exception to current transfer credit policies is that military veterans be allowed a maximum of 9 hours credit as general electives. This policy began with military veterans enrolled for the Fall 2010 semester.

## Transfer Students and University General Education Requirements

All University, general-education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University, general-education requirement. However, the reverse is not true. Departments or academic units may not have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet University, general-education requirements and prepare for many of the more specific foundation courses required by their field of study.

## Visiting Graduate Student Program (G)

Effective Fall 2011, the UM Visiting Graduate Student Program replaces the UM Traveling Scholars Program. The UM Visiting Graduate Student Program offers eligible graduate students a streamlined process for applying and registering for graduate courses on other UM campuses.

To participate in the UM System Visiting Graduate Student Program, a graduate student must be a degree-seeking graduate student and in good-standing on the **home** campus and **host** campus.

To apply for this program, a "UM System Visiting Graduate Student Application (<http://gradschool.missouri.edu/forms-downloads/repository/um-system-visiting-graduate-student-application.pdf>)" should be completed and submitted to the **home** campus Graduate office for certification, at least two weeks before the beginning of the semester. The graduate student's **home** campus Graduate office will review the form; if approved, the **home** campus Graduate office will transmit the approved form to the **host** campus Graduate office. The **host** campus will notify the student when they are eligible to register for courses.

All course fees are paid to the **host** campus. Graduate students should contact their **home** campus Financial Aid office for more information on financial aid.

International (non-U.S. citizen) students should consult the International student office on their **home** campus to determine eligibility for this program.

Important Points:

- No application fee is required for this program.
- The **home** campus determines maximum enrollment requirements and the transferability of courses taken at other UM campuses. At MU, all courses taken in UM Visiting Graduate Student Program will be considered "transfer courses" and are subject to MU's graduate course transfer policies.

- Visiting UM Graduate Students are subject all **host** campus registration requirements and restrictions.
- To officially transfer courses from the host campus to the **home** campus, students must order an official transcript from the **host** campus and comply with the home campus's transfer policies and processes.

## Withdraw from the University

### From the Term

A student who wishes to withdraw from the Term (University) must process the appropriate Term Withdraw Form (<http://registrar.missouri.edu/policies-procedures/withdrawal-university.php>) (PDF). Dropping all classes is considered a withdrawal from the Term (University) and must be initiated in the students academic school or college and completed by the end of the business day of the Monday of the last week of classes or prior to completing the final in a self-paced course. Finals are not included as part of the term for this purpose.

Withdrawal forms will normally be dated according to the date the request was first received with the following exception: When health or other critical circumstances constitute the reason for withdrawal, the dean may designate an earlier date to which academic rules will apply.

### Withdraw from the University (L)

Formal withdrawal from MU is arranged through the Graduate School using a Notice of Withdrawal form that is signed by the Director of the LL.M. Program and the Dean of the Graduate School. If the student is making a C or better at withdrawal time, a grade of W is recorded. If the student is doing failing work at withdrawal time, a grade of F is recorded. Students are responsible for notifying their instructors of their intention to withdraw and for determining if their work qualifies for a W grade. Students who leave MU without filing a statement of formal withdrawal are given a grade of F in all courses. If the reason is so urgent that an official withdrawal cannot be obtained, the student should notify the LL.M. Program as soon as possible and officially request to be withdrawn.

### Withdraw from the University (V)

Students who withdraw or seek a leave of absence from the College of Veterinary Medicine prior to successful completion of the first semester of the professional curriculum (Instructional Periods 1 through 2), and who seek readmission, must submit a letter of intent within 30 days of the withdrawal date to the Office of Academic Affairs. The student's application will be evaluated for readmissions by the Admissions and Scholarship Committee by March 1 with the pool of incoming candidates.

Readmission will be based on their scoring within the pool of the next cohort and remediation plan submitted prior to March 1. Students who request a leave of absence after the first semester will develop a return and remediation plan in consultation with the Associate Dean for Academic Affairs. Exceptions to this timeline will be evaluated on a case-by-case basis by the Committee.

### Withdrawing from a Course

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as "withdrawing" from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic

advising unit, the student takes the form for processing to the Office of the University Registrar, 125 Jesse Hall. The process must be completed by the end of the business day of the Monday of the last week of classes or prior to completing the final in a self-paced course. See Academic Policies: Grades (p. 865) for more information on withdrawing from a course

**NOTE: Students may not withdraw from all courses or their last course via myZou after the tenth day prior to the start of the semester or term. This must be done in the academic advising unit.**

# Course Numbering

Course	Number	Description
Basic skills courses	0000-0999	Courses that do not count toward degree requirements- primarily used for skill development. May NOT be cross listed or cross level.
Freshmen-level courses	1000-1999	Entry-level courses that have only skill development courses for course prerequisites. (Test scores, etc. are acceptable prerequisites.) Considered lower-division. Community College courses will be considered equivalent to this level. May NOT be listed as cross level with 5000-8999.
Sophomore-level courses	2000-2999	Intended primarily for second-year or sophomore students who have the essential prerequisites or background. Considered lower-division. Community College courses will be considered equivalent to this level as well. May NOT be listed as cross level with 5000-8999.
Junior/Senior-level courses (Upper Division)	3000-3999	Upper-division courses that may NOT be listed as cross level with 5000-8999. Intended primarily for third and fourth-year (juniors and seniors) students who have the essential prerequisites or background. Often restricted to students admitted to junior-level entry degree programs.

Junior/Senior-level courses (Upper Division)	4000-4999	Upper-division courses that may be listed as cross level with 5000-7999. Intended primarily for juniors and seniors. Note special sub-ranges for capstone, research and departmental honors courses.
Undergraduate Research courses	4950-4959	Upper-division, undergraduate research courses
Capstone courses	4970-4990	
Capstone/Honor courses	4991	Courses that are both capstone and departmental honors courses
Capstone/Reading courses	4992	
Capstone/Internship courses	4993	
Capstone/Research courses	4994	
Extended Research & Departmental Honors course	4995	Multiple term duration courses based on research
Departmental Honors courses	4996-4999	Used only for departmental honors courses. Include Dept. Honors in title or course description. No "H" is listed after the catalog number.
Professional-level courses	5000-6999	Professional-level courses for Law, Vet. Med, Medicine, and Occupational/Physical Therapy. Generally, not for undergraduate credit. May be listed as cross-level with 4000-4999 courses.
Beginning Graduate courses	7000-7999	Graduate-level courses for beginning and mid-level graduate students primarily. Generally not for undergraduate credit, but may be listed as cross-level with 4000-4999 courses.

Mid-level Graduate courses	8000-8999	Graduate-level courses intended primarily for mid-and upper-level graduate students. Not for undergraduate credit. May NOT be listed as cross-level with 4000-4999 courses.
Upper-level Graduate courses	9000-9999	Graduate-level courses intended primarily for upper-level graduate students. Not for undergraduate credit. May NOT be listed as cross-level with 4000-4999 courses.

"H" after a number indicates that it is an Honors course, approved by the Honors College for use toward Honors Certificate or University Honors. Not applicable to courses only designated for departmental honors.

'W' after a number indicates that it is a Writing Intensive course, approved by the Campus Writing Board for use toward fulfilling MU's writing requirement.

## Undergraduate Topics Courses

Final two digits represent the distribution category within the University requirements.

Distribution Category	Description
01	General
02	Biological Sciences
03	Behavioral Sciences
04	Social Sciences
05	Humanities
06	Mathematical Sciences
07	Physical Sciences

## Guidelines for Cross-Listed and Cross-Level Courses \*

\* Approved by Faculty Council February 13, 2003

Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content, with matching course descriptions.

### Cross-Listed Courses *must*:

- Be at the same level
- Cover the same content
- Not meet different general education requirements

### Cross-Listed Courses *may*:

- Not have the exact same number, but it is preferred that they do
- Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There

are limits on enrollment and space may not be available in the non-fee course or section.

- Exceptions: Fine art and music "skills" classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

### Cross-Level Courses:

- Only 4000 and 7000-level courses may be cross-level listed.
- The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.
- Exceptions: Fine art and music "skills" classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

**Courses that are not cross-level may not meet in the same room at the same time or near each other at the same time so that they attempt to "get around" this rule.**

### Restrictions by Course Level

#### Not allowed:

- 0000-0999 – May **not** be cross listed or cross leveled outside of the 0000-0999 range
- 1000-3999 – May **not** be cross listed or cross leveled with 5000-9999
- 4000-4999 - May **not** be listed as cross level with 8000-9999
- Linked cross-leveling may not result in a 1000-3999 level being linked with a 4000-4999, that is subsequently linked with 5000-7999, and a 7000-7999 that is cross-level with 8000-9999

#### Permissible:

- 1000-3999 May be cross-listed and/or cross-leveled with 1000-4999
- 4000-4999- May be listed as cross level with 5000-7999
- 5000-6999 – May be listed as cross level with 4000-4999 or with 7000-7999
- 7000-7999 – May be listed as cross level with 4000-6999 or with 8000-8999, but not both

# Curriculum Designator Abbreviations

The abbreviations listed below are used in course descriptions. They may be called Curriculum Designators.

Designator	Subject Area	Academic Unit
ACCTCY	Accountancy	BUS
AERO	Aerospace Studies	A&S
AAE	Agricultural Applied Economics	CAFNR
ABM	Agribusiness Management	CAFNR
AG_ED_LD	Agricultural Education and Leadership	CAFNR
AGSC_COM	Agricultural Science Communication	CAFNR
AG_S_M	Agricultural Systems Management	CAFNR
AFNR	Agriculture, Food and Natural Resources	CAFNR
AMS	Ancient Mediterranean Studies	A&S
ANESTH	Anesthesiology	MED
AN_SCI	Animal Science	CAFNR
ANTHRO	Anthropology	A&S
ARABIC	Arabic	A&S
ARCHST	Architectural Studies	HES
ARTCE_VS	Art Ceramics - Visual Studies	A&S
ARTDR_VS	Art Drawing - Visual Studies	A&S

# Course Offerings

---

## A

- Accountancy (ACCTCY) (p. 1644)
- Aerospace Studies (AERO) (p. 1649)
- Agribusiness Management (ABM) (p. 1649)
- Agricultural Applied Economics (AAE) (p. 1653)
- Agricultural Education and Leadership (AG\_ED\_LD) (p. 1656)
- Agricultural Science Communications (AGSC\_COM) (p. 1660)
- Agricultural Systems Management (AG\_S\_M) (p. 1660)
- Agriculture, Food and Natural Resources (AFNR) (p. 1664)
- Ancient Mediterranean Studies (AMS) (p. 1666)
- Anesthesiology (ANESTH) (p. 1675)
- Animal Science (AN\_SCI) (p. 1675)
- Anthropology (ANTHRO) (p. 1686)
- Arabic (ARABIC) (p. 1697)
- Architectural Studies (ARCHST) (p. 1697)
- Art Ceramics - Visual Studies (ARTCE\_VS) (p. 1704)
- Art Drawing - Visual Studies (ARTDR\_VS) (p. 1704)
- Art Fibers - Visual Studies (ARTFI\_VS) (p. 1706)
- Art General - Visual Studies (ARTGE\_VS) ([http://catalog.missouri.edu/courseofferings/artge\\_vs/](http://catalog.missouri.edu/courseofferings/artge_vs/))
- Art Graphic Design - Visual Studies (ARTGD\_VS) (p. 1706)
- Art History - Visual Studies (ARH\_VS) (p. 1708)
- Art Painting - Visual Studies (ARTPA\_VS) (p. 1714)
- Art Photo - Visual Studies (ARTPH\_VS) (p. 1715)
- Art Printmaking - Visual Studies (ARTPR\_VS) (p. 1716)
- Art Sculpture - Visual Studies (ARTSC\_VS) (p. 1716)
- Astronomy (ASTRON) (p. 1716)
- Athletic Training (ATHTRN) (p. 1719)
- Atmospheric Science (ATM\_SC) (p. 1721)

## B

- Biochemistry (BIOCHM) (p. 1725)
- Biological Engineering (BIOL\_EN) (p. 1729)
- Biological Sciences (BIO\_SC) (p. 1737)
- Biomedical Engineering (BME) (p. 1746)
- Biomedical Sciences (BIOMED) (p. 1747)
- Black Studies (BL\_STU) (p. 1750)
- Business Administration (BUS\_AD) (p. 1759)

## C

- Chemical Engineering (CH\_ENG) (p. 1760)
- Chemistry (CHEM) (p. 1765)
- Child Health (CH\_HTH) (p. 1770)
- Chinese (CHINSE) (p. 1773)
- Civil Engineering (CV\_ENG) (p. 1775)
- Clinical Diagnostic Sciences (CDS) (p. 1787)
- Clinical Laboratory Sciences (CL\_L\_S) (p. 1790)
- Communication (COMMUN) (p. 1793)

- Computer Science (CMP\_SC) (p. 1799)
- Constitutional Democracy (CNST\_DEM) (p. 1811)

## D

- Data Science (DATA\_SCI) (p. 1814)
- Dermatology (DERM) (p. 1818)
- Diagnostic Medical Ultrasound (DMU) (p. 1819)
- Digital Storytelling-Visual Studies (DST\_VS) (p. 1823)

## E

- Economics (ECONOM) (p. 1827)
- Education Honors (EDUC\_H) (p. 1834)
- Educational Leadership and Policy Analysis (ED\_LPA) (p. 1835)
- Educational, School and Counseling Psychology (ESC\_PS) (p. 1843)
- Electrical And Computer Engineering (ECE) (p. 1854)
- Emergency Medicine (EMR\_ME) (p. 1864)
- Engineering (ENGINR) (p. 1865)
- English (ENGLSH) (p. 1867)
- English Language Support Program (ELSP) (p. 1886)
- Environmental Science (ENV\_SC) (p. 1887)
- Environmental Studies (ENV\_ST) (p. 1890)

## F

- Family And Community Medicine (F\_C\_MD) (p. 1890)
- Film Studies - Visual Studies (FILMS\_VS) (p. 1894)
- Finance (FINANC) (p. 1900)
- Fisheries And Wildlife (F\_W) (p. 1905)
- Food Science (F\_S) (p. 1909)
- Forestry (FOREST) (p. 1915)
- French (FRENCH) (p. 1918)

## G

- General Human Environmental Sciences (GN\_HES) (p. 1923)
- General Studies (G\_STDY) (p. 1923)
- Geography (GEOG) (p. 1923)
- Geology (GEOL) (p. 1931)
- German (GERMAN) (p. 1937)
- Graduate School (GRAD) (p. 1944)
- Grammar (Intensive English Program) (IEPG) (p. 2009)
- Greek (GREEK) (p. 1945)

## H

- Health and Rehabilitation Science (HR\_SCI) (p. 1946)
- Health Management and Informatics (HMI) (p. 1947)
- Health Professions (HTH\_PR) (p. 1951)
- Health Psychology (HLTHPSYC) (p. 1952)
- Health Sciences (HLTH\_SCI) (p. 1952)
- Hebrew (HEBREW) (p. 1957)
- History (HIST) (p. 1957)
- Honors-General (GN\_HON) (p. 1976)

- Hospitality Management (HSP\_MGMT) (p. 1980)
- Human Development And Family Science (H\_D\_FS) (p. 1985)

## I

- Industrial And Manufacturing Systems (IMSE) (p. 1996)
- Information Science And Learning Technologies (IS\_LT) (p. 1996)
- Information Technology (INFOTC) (p. 2004)
- Integrative Neuroscience (NEUROSCI) (p. 2009)
- Interdisciplinary Studies (INTDSC) (p. 2011)
- Internal Medicine (IN\_MED) (p. 2011)
- International Studies (INTL\_S) (p. 2014)
- Italian (ITAL) (p. 2015)

## J

- Japanese (JAPNSE) (p. 2016)
- Journalism (JOURN) (p. 2017)

## K

- Korean (KOREAN) (p. 2047)

## L

- Laboratory Animal Medicine (LAB\_AN) (p. 2049)
- Latin (LATIN) (p. 2049)
- Law (LAW) (p. 2051)
- Learning, Teaching, Curriculum (LTC) (p. 2066)
- Learning, Teaching, Curriculum - Vocational (LTC\_V) (p. 2085)
- Linguistics (LINGST) (p. 2087)
- Listening and Speaking (Intensive English Program) (IEPL) (p. 2010)

## M

- Management (MANGMT) (p. 2091)
- Marketing (MRKTNG) (p. 2099)
- Mathematics (MATH) (p. 2104)
- Mechanical And Aerospace Engineering (MAE) (p. 2113)
- Medical Pharmacology and Physiology (MPP) (p. 2123)
- Medicine-Interdisciplinary (MED\_ID) (p. 2127)
- Medieval Renaissance Studies (MDVL\_REN) (p. 2132)
- Microbiology (MICROB) (p. 2133)
- Military Science (MIL\_SC) (p. 2135)
- MU Informatics Institute (INFOINST) (p. 2136)
- Music-Applied Music (MUS\_APMS) (p. 2138)
- Music-Courses for Non-Majors (MUSIC\_NM) (p. 2139)
- Music-Ensemble Courses (MUS\_ENS) (p. 2140)
- Music-General (MUS\_GENL) (p. 2141)

- Music-Music Education (MUS\_EDUC) (p. 2147)
- Music-Music History And Literature (MUS\_H\_LI) (p. 2149)
- Music-Music Theory (MUS\_THRY) (p. 2152)

## N

- Natural Resources (NAT\_R) (p. 2156)
- Naval Science (NAVY) (p. 2160)
- Neurology (NEUROL) (p. 2161)
- Nuclear Engineering (NU\_ENG) (p. 2161)
- Nuclear Medicine (NUCMED) (p. 2165)
- Nursing (NURSE) (p. 2167)
- Nutrition (NUTRIT) (p. 2177)
- Nutrition and Exercise Physiology (NEP) (p. 2177)

## O

- Obstetrics And Gynecology (OB\_GYN) (p. 2185)
- Occupational Therapy (OC\_THR) (p. 2187)
- Ophthalmology (OPHTH) (p. 2191)

## P

- Parks, Recreation, Sport Tourism (PRST) (p. 2191)
- Pathology Anatomical Science (PTH\_AS) (p. 2196)
- Peace Studies (PEA\_ST) (p. 2199)
- Personal Financial Planning (FINPLN) (p. 2209)
- Philosophy (PHIL) (p. 2213)
- Physical Medicine And Rehabilitation (PM\_REH) (p. 2220)
- Physical Therapy (PH\_THR) (p. 2221)
- Physics (PHYSCS) (p. 2224)
- Plant Science (PLNT\_S) (p. 2233)
- Political Science (POL\_SC) (p. 2241)
- Portuguese (PORT) (p. 2253)
- Psychiatry (PSCHTY) (p. 2254)
- Psychology (PSYCH) (p. 2255)
- Public Affairs (PUB\_AF) (p. 2269)
- Public Health (P\_HLTH) (p. 2274)

## R

- Radiologic Sciences (RA\_SCI) (p. 2279)
- Radiology (RADIOL) (p. 2282)
- Reading (Intensive English Program) (IEPR) (p. 2010)
- Religious Studies (REL\_ST) (p. 2283)
- Respiratory Therapy (RS\_THR) (p. 2291)
- Romance Languages (RM\_LAN) (p. 2294)
- Rural Sociology (RU\_SOC) (p. 2294)
- Russian (RUSS) (p. 2298)

## S

- Service Learning (SRV\_LRN) (p. 2303)
- Social Work (SOC\_WK) (p. 2304)
- Sociology (SOCIOL) (p. 2312)
- Soil Science (SOIL) (p. 2320)
- South Asia Studies (S\_A\_ST) (p. 2323)
- Spanish (SPAN) (p. 2324)
- Special Education (SPC\_ED) (p. 2330)
- Special Topics (Intensive English Program) (IEPS) (p. 2010)

- Speech, Language, and Hearing Sciences (SLHS) (p. 2337)
- Statistics (STAT) (p. 2337)
- Student Success Center (SSC) (p. 2337)
- Surgery (SURGRY) (p. 2337)

## T

- Textile And Apparel Management (T\_A\_M) (p. 2337)
- Theatre (THEATR) (p. 2337)

## V

- Veterinary Biomedical Science (V\_BSCI) (p. 2337)
- Veterinary Medicine And Surgery (V\_M\_S) (p. 2337)
- Veterinary Pathobiology (V\_PBIO) (p. 2345)

## W

- Women's and Gender Studies (WGST) (p. 2350)
- Writing (Intensive English Program) (IEPW) (<http://catalog.missouri.edu/courseofferings/iepw/>)

## Accountancy Courses

### ACCTCY 2010: Introduction to Accounting

Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or ACCTCY 2037).

**Credit Hours:** 3

**Prerequisites:** sophomore standing

### ACCTCY 2026: Accounting I

An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2026 and ACCTCY 2036.

**Credit Hours:** 3

**Prerequisites:** Sophomore Standing

### ACCTCY 2027: Accounting II

This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2027 and ACCTCY 2037. Course only offered through Mizzou Online (self paced).

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2026, ACCTCY 2036 or ACCTCY 2136H

### ACCTCY 2036: Accounting I

First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users. This course covers the fundamentals of financial accounting.

**Credit Hours:** 3

**Prerequisites:** Completion of 28 credit hours. May be restricted to lower-level business and lower-level accountancy students during early registration

### ACCTCY 2037: Accounting II

Second part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users. This course covers the fundamentals of managerial accounting.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2026, ACCTCY 2036 or ACCTCY 2136H

### ACCTCY 2136H: Honors Accounting I

First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

**Credit Hours:** 3

**Prerequisites:** sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

### ACCTCY 2137H: Honors Accounting II

Continuation of Accountancy 2136H.

**Credit Hours:** 3

**Prerequisites:** C or better ACCTCY 2136H. Honors eligibility required

### ACCTCY 2258: Computer-Based Data Systems

Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

### ACCTCY 3326: Financial Accounting Theory and Practice I

Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

### ACCTCY 3328: Accounting Information Systems

Introduction to accounting information systems (AIS). General AIS concepts. Transaction processing systems and accounting cycles. Alternative platforms for computerized transaction processing. Database management and data modeling. Control concepts and design.

**Credit Hours:** 3

**Prerequisites:** Restricted to Accountancy Majors

---

**ACCTCY 3346: Financial Accounting Theory and Practice II**

Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3326. Restricted to Accountancy Majors

---

**ACCTCY 3347: Cost and Managerial Accounting**

Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

---

**ACCTCY 4000: Accountancy Professional Speakers and Symposia**

(cross-leveled with ACCTCY 7000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. This will be a non-credit, non-billed, no hours course.

**Credit Hours:** 0

**Prerequisites:** Accountancy Majors

---

**ACCTCY 4301: Topics in Accounting**

Independent investigations, reports on approved topics.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ACCTCY 4353: Introduction to Taxation**

(cross-leveled with ACCTCY 7353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to accountancy majors only

---

**ACCTCY 4356: Financial Accounting Concepts**

(cross-leveled with ACCTCY 7356). Current issues in the financial reporting of business corporations to external parties.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310. Not open to accountancy majors

---

**ACCTCY 4365: Governmental Accounting and Budgeting**

(cross-leveled with ACCTCY 7365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting,

budgeting, auditing, and financial reporting in government and not-for-profit entities.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3326. Restricted to Accountancy Majors

---

**ACCTCY 4384: Auditing Theory and Practice I**

(cross-leveled with ACCTCY 7384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

---

**ACCTCY 4940: Professional Accounting Internship**

(cross-leveled with ACCTCY 7940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

**Credit Hour:** 3-6

**Prerequisites:** Accountancy Majors only and 105 credit hours completed and ACCTCY 3326 and ACCTCY 3328 and ACCTCY 3346 and ACCTCY 3347 and ACCTCY 4353, and GPA of 3.0 or higher

---

**ACCTCY 7000: Accountancy Professional Speakers and Symposia**

(cross-leveled with ACCTCY 4000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. This will be a non-credit, non-billed, no hours course. Graded on S/U basis only.

**Credit Hours:** 0

**Prerequisites:** Accountancy Majors

---

**ACCTCY 7310: Accounting for Managers**

Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures.

**Credit Hours:** 3

**Prerequisites:** MBA or MSPA candidate, or departmental consent

---

**ACCTCY 7353: Introduction to Taxation**

(cross-leveled with ACCTCY 4353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to accountancy majors only

---

---

**ACCTCY 7356: Financial Accounting Concepts**

(cross-leveled with ACCTCY 4356). Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310

---

**ACCTCY 7365: Governmental Accounting and Budgeting**

(cross-leveled with ACCTCY 4365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3326. Restricted to Accountancy Majors

---

**ACCTCY 7384: Auditing Theory and Practice I**

(cross-leveled with ACCTCY 4384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

---

**ACCTCY 7940: Professional Accounting Internship**

(cross-leveled with ACCTCY 4940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

**Credit Hour:** 3-6

**Prerequisites:** Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator

---

**ACCTCY 8363: Multi-Jurisdictional Tax**

This course takes a practical approach to exploring multistate and international tax concepts by focusing on tax issues that can arise as a company expands from a single business location into a multinational corporation. Part 1 of this course focuses on the economic, political, and constitutional constraints imposed on state and local taxation, including the due process clause, the commerce clause and state uniformity and equality clauses. Part 2 of the course includes a survey of state and local tax laws, with a particular emphasis on the imposition of sales and use taxes and the allocation and apportionment of state income taxes. Part 3 of the course surveys principals of international taxation, including U.S. taxation of the foreign investments or activities of U.S. taxpayers (outbound) and U.S. taxation of the U.S. activity or investments of foreign taxpayers (inbound).

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4353. Restricted to Accountancy Majors

---

**ACCTCY 8373: Taxation of Corporations and Shareholders**

Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

---

---

**ACCTCY 8393: Taxation of Trust, Gifts and Estates**

This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

---

**ACCTCY 8401: Topics in Accounting**

Independent investigations, reports on approved topics.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ACCTCY 8404: Internal Auditing**

This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls, enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

---

**ACCTCY 8414: Audit of Internal Controls**

A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3328, and ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

---

**ACCTCY 8419: International Accounting**

Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3346 and ACCTCY 3347. Restricted to Accountancy Majors

---

**ACCTCY 8423: Tax Research and Planning**

Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ACCTCY 8373

**Prerequisites:** Restricted to Accountancy Majors

---

---

**ACCTCY 8424: Fraud Examination**

A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant's responsibility for fraud detection and prevention are emphasized. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

---

**ACCTCY 8428: Data Visualization and Data Mining**

Enterprise-wide view of data and transaction processing. Concepts and techniques of data visualization and data mining of business-critical data. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Accountancy Majors or with Department consent

---

**ACCTCY 8433: Mergers and Acquisitions Taxation**

This course covers the basic taxation of mergers and acquisitions, both taxable and tax-free acquisitions; issues in merger and acquisition deal making, such as due diligence and understanding contract tax provisions; and an overview of securities regulations with respect to publicly traded companies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ACCTCY 8373

**Prerequisites:** ACCTCY 4353

---

**ACCTCY 8436: Advanced Accounting**

Continuation of ACCTCY 3346. Addresses a series of special financial accounting topics including income taxes, pensions, leases, business combinations, consolidated statements, and foreign currency translation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3346. Restricted to Accountancy Majors

---

**ACCTCY 8438: Forensic Accounting**

Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3328, ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

---

**ACCTCY 8444: Advanced Audit**

The Advanced Auditing course helps students develop a better understanding of the audit environment and gives them the opportunity to gain hands-on experience planning for an audit engagement, performing test work, and completing an audit engagement. The course also addresses additional topics not covered in detail in the Audit Theory and Practice I course, including inventory observation, legal liability issues faced by auditors today, the regulatory environment, professional responsibilities of auditors, preparing appropriate documentation for audit engagements, providing required communications to clients,

and performing Single Audits. The course is designed to encourage open discussions of cases and current issues and provide learning opportunities for the students. The class meetings and assignments are designed to improve the student's critical thinking skills, communication skills, and team-building skills. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

---

**ACCTCY 8448: Emerging Issues in Accounting Information Systems**

Current developments in the implementation and use of accounting information systems. Topics may vary. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Accountancy Majors

---

**ACCTCY 8450: Accounting and Strategic Business Analysis**

Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3346 or equivalent. Restricted to Accountancy Majors

---

**ACCTCY 8453: Taxes and Business Strategies**

This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Accountancy Majors

---

**ACCTCY 8456: Corporate Governance**

Corporate governance has taken on new prominence in light of the accounting scandals of the early 2000's (e.g., Enron) and the new regulatory regime of Sarbanes-Oxley. As a result, corporations, investors, auditors, and others are paying more attention to corporate governance. This course will familiarize students with corporate governance mechanisms and how they interact with financial reporting. This course should appeal to students pursuing careers in auditing, finance, management, as well as anyone seeking a deeper understanding of relations between financial reporting and corporate governance. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 8436. Restricted to Accountancy Majors

---

**ACCTCY 8463: Partnership Taxation**

Formations, operations, distributions, and liquidations of partnerships. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 4353 or 7353

---

---

**ACCTCY 9090: Research in Accounting**

Each student is under direction and guidance of an accountancy professor in writing a dissertation. Periodic seminars discuss research projects. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** doctoral candidacy and instructor's consent

---

**ACCTCY 9401: Doctoral Research Problems in Accounting**

Independent investigations, reports on approved topics. Restricted to Doctoral level students only

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent and director's consent

---

**ACCTCY 9444: Seminar in Auditing Research**

The economic role of auditing; the audit process; audit reports and the consequences of auditing on financial statements; new audit directions and perspectives.

**Credit Hours:** 3

**Prerequisites:** doctoral candidacy or instructor's consent

---

**ACCTCY 9457: Quantitative Methods in Accounting**

Application of mathematics and statistics to managerial and financial accounting problems.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 3347, MATH 1300 and STAT 3500, or instructor's consent

---

**ACCTCY 9460: Research Methods in Accounting**

Application of research methods to the investigation of current accounting issues. A research paper is required.

**Credit Hours:** 3

**Prerequisites:** doctoral candidacy or instructor's consent

---

**ACCTCY 9466: Seminar in Financial Accounting Research**

Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question.

**Credit Hours:** 3

**Prerequisites:** doctoral candidacy or instructor's consent

---

**ACCTCY 9467: Seminar in Behavioral Accounting Research**

Critical review of the Behavioral accounting research literature with emphasis on issues and research methods.

**Credit Hours:** 3

**Prerequisites:** doctoral candidacy and instructor's consent

---

## Aerospace Studies Courses

**AERO 1100: Heritage and Values of the United States Air Force**

A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.. Applies communicative skills. Leadership lab.

**Credit Hours:** 2

---

**AERO 1200: Heritage and Values of the United States Air Force**

Continues introducing students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Applies communicative skills. Leadership lab.

**Credit Hours:** 2

---

**AERO 2100: Team and Leadership Fundamentals**

A survey course that focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Applies communicative skills. Leadership lab.

**Credit Hours:** 2

---

**AERO 2200: Team and Leadership Fundamentals**

Continues laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Applies communicative skills. Leadership lab.

**Credit Hours:** 2

---

**AERO 3100: Leading People and Effective Communication**

Focuses on teaching cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Leadership lab.

**Credit Hours:** 3

---

**AERO 3200: Leading People and Effective Communication**

Continues teaching cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Leadership lab.

**Credit Hours:** 3

---

**AERO 4100: National Security Affairs/Preparation for Active Duty**

Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Leadership lab.

**Credit Hours:** 3

---

---

**AERO 4200: National Security Affairs/Preparation for Active Duty**

Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Leadership laboratory.

**Credit Hours:** 3

---

**Agribusiness Management Courses****ABM 1010: Introduction to Agribusiness Management**

Introduction to Agribusiness Management, will provide students the opportunity to learn about business, agriculture, food, and the environment. Students will develop an understanding of how agriculture contributes to the U.S. economy and international markets. Agriculture is one of the fastest growing sectors in the U.S. economy and provides many great career opportunities nationwide. Students will learn about careers in agribusiness and food industry sales, commodity and food product marketing, entrepreneurial endeavors, farm management and production, financial management and analysis, human and public relations, policy and law and supply chain management.

**Credit Hours:** 3

---

**ABM 1041: Applied Microeconomics**

Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG\_EC/ABM 1041 may not have credit for ECONOM 1014.

**Credit Hours:** 3

---

**ABM 1042: Applied Macroeconomics**

Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete ABM 1042 may not have credit for ECONOM 1015.

**Credit Hours:** 3

---

**ABM 1200: Applied Computer Applications**

This course is an applied problem based learning opportunity for students to gain Excel spreadsheet related skills critical to careers in agriculture, food and natural resources. Students will learn intermediate and advanced spreadsheet skills essential for problem solving and decision making in these biologically influenced fields.

**Credit Hours:** 3

---

**ABM 1230: Introduction to the Agricultural Policy Process**

This course is designed to help students recognize various aspects of agricultural policy and leadership. Students will learn about the food/agriculture/rural policy making process, the impact of those policies, and the role of leadership through discussions with recognized local, state, and national leaders in agriculture and policymaking. Graded on A-F basis only. Recommended Freshman preferred.

**Credit Hours:** 3

---

---

**ABM 1230H: Introduction to the Agricultural Policy Process - Honors**

This course is designed to help students recognize various aspects of agricultural policy and leadership. Students will learn about the food/agriculture/rural policy making process, the impact of those policies, and the role of leadership through discussions with recognized local, state, and national leaders in agriculture and policymaking. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required. Recommended Freshman preferred

---

**ABM 2050: For the Love of Food: Global Food System Debate**

This course is designed to develop students' understanding of the food system from farm to plate and the consumer's role in the global food system. Gaining a knowledge base on food system dynamics will allow students to better understand the societal and policy making processes behind food production. Each week we will discuss key topics and issues facing the food system today. This class will help students develop critical thinking skills to address challenges in the global food system.

**Credit Hours:** 3

---

**ABM 2070W: Environmental Economics and Policy - Writing Intensive**

(same as ENV\_ST 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

**Recommended:** ENGLISH 1000

---

**ABM 2183: The Agricultural Marketing System**

Analysis of marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014

**Recommended:** ABM 1042 or ECONOM 1015

---

**ABM 2223: Agricultural Sales**

Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ABM 1042 or ECONOM 1014 or ECONOM 1015 and sophomore standing

---

**ABM 2225: Statistical Analysis**

Elementary statistical inference. Math Reasoning Proficiency Course.

**Credit Hours:** 3

**Prerequisites:** MATH 1100

---

---

**ABM 2294: Market Watch - Understanding and Using Commodity Markets**

This course is an introduction to commodity merchandising with a focus on the underlying fundamental market factors that determine commodity prices. In addition to monitoring market news, weather and supply/demand, students learn about cash, futures and options markets. Various merchandising tools are examined and how they can be applied to develop effective commodity merchandising strategies.

**Credit Hours:** 3

**Recommended:** Excel

---

**ABM 2301: Topics in Agribusiness Management**

Initial offering of a course in a specific subject matter area related to Agribusiness Management. The course is offered when proposed by a faculty member in that area of expertise.

**Credit Hour:** 1-3

---

**ABM 3150: International Agribusiness**

This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across borders. The course examines how culture, institutions and public policy affect business operations and business strategies.

**Credit Hours:** 3

**Prerequisites:** ABM 2183

---

**ABM 3224: New Products Marketing**

Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014

---

**ABM 3224W: New Products Marketing - Writing Intensive**

Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014

---

**ABM 3230: Agricultural and Rural Economic Policy**

Study and analysis of past and present government policies affecting agriculture and rural economy.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014 and ABM 1042 or ECONOM 1015

---

**ABM 3241W: Ethical Issues in Agriculture - Writing Intensive**

The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014 and junior standing

---

**ABM 3256: Agribusiness and Biotechnology Law**

Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives.

**Credit Hours:** 3

---

**ABM 3260: General Farm Management**

Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014

---

**ABM 3271: International Agricultural Development**

Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014 and ABM 1042 or ECONOM 1015

**Recommended:** junior standing

---

**ABM 3272: International Food Trade and Policy**

Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014 and ABM 1042 or ECONOM 1015

---

**ABM 3282: Agribusiness Finance**

Application of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014 and ACCTCY 2036 or ACCTCY 2026

**Recommended:** ACCTCY 2037 or ACCTCY 2027

---

**ABM 3283: Fundamentals of Entrepreneurship**

Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014 and ACCTCY 2036 or ACCTCY 2026. Restricted to Agricultural Economics and Agribusiness Management majors during early registration

---

**ABM 3285: Problems in Agribusiness Management**

Supervised study in a specialized phase of agricultural economics. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ABM 3286: Economics of Managerial Decision Making**

Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agrifood system and for natural resource and environmental management.

**Credit Hours:** 3

**Prerequisites:** ABM 2123 and ABM 2183

---

**ABM 3294: Agricultural Marketing and Procurement**

Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making.

**Credit Hours:** 3

**Prerequisites:** ABM 2183

**Recommended:** ABM 2225 or STAT 2500

---

**ABM 3295: Real Money: Speculative Trading for Beginners**

Familiarize students with the learning components of commodity future trading. Students learn through involvement by investing in a commodity pool and trading futures. Students apply both fundamental and technical analysis. Students taking this course are required to invest from \$200 to \$600 in \$200 increments. Students cannot lose more money than invested.

**Credit Hours:** 3

**Recommended:** ABM 3294

---

**ABM 3370: Transportation in the Global Supply Chain**

This course provides an overview of the transportation sector, including history, providers, users, government regulation, and the central role of transportation in supply chain management. The course covers the importance of domestic and global transportation, the operational aspects of the various transportation modes (rail, water, motor, air, and pipeline), the role of transportation intermediaries, the demand and supply of transportation, and the managerial aspects of transport in both the commercial and urban environment.

**Credit Hours:** 3

---

**ABM 4223: Professional Solution Selling**

(cross-leveled with AAE 7223). This course will reinforce the sales education students gained in ABM 2223, Agricultural Sales. Class will focus on strategic and conceptual selling which are techniques geared toward complex B2B sales. In this course, we will discuss myriad career opportunities in the sales profession. Students will have the opportunity to interact with sales professionals.

**Credit Hours:** 3

**Prerequisites:** ABM 2223

---

**ABM 4230: Understanding the Agricultural Policy Process**

The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment.

**Credit Hours:** 3

**Prerequisites:** ABM 3230

---

**ABM 4240: Microeconomics Theory and Applications**

(cross-leveled with AAE 7240). This course extends the learning from principles of microeconomics for students of applied economics. The topics in this course prepare students for further study in finance, business management, policy analysis, economic development, and other applications of economic theory. The course stresses development of theoretical models of consumer choice, firm behavior, perfect and imperfect markets, and externalities, balanced by investigation of the assumptions behind these models. Applications of the models to management and policy issues will be assigned throughout the semester.

**Credit Hours:** 3

**Prerequisites:** MATH 1400 and ABM 1041 or ECONOM 1014

---

**ABM 4251: Agricultural Prices**

(cross-leveled with AAE 7251). Variations in prices of agricultural products; underlying factors.

**Credit Hours:** 3

**Prerequisites:** ABM 2123 and ABM 2225 or STAT 2500

---

**ABM 4295: Agricultural Risk Management**

(cross-leveled with AAE 7295). This class will examine the range of risks business face and explore ways of characterizing and evaluating those risks.

**Credit Hours:** 3

**Prerequisites:** ABM 2183 and ABM 2225 or STAT 2500

---

**ABM 4301: Topics in Agribusiness Management**

Current and new topics not currently offered in applied and/or theoretical areas in Agribusiness Management.

**Credit Hour:** 1-6

---

**ABM 4301H: Topics in Agribusiness Management - Honors**

Current and new topics not currently offered in applied and/or theoretical areas in Agribusiness Management. .

**Credit Hour:** 1-6

**Prerequisites:** honors eligibility required

---

**ABM 4940: Internship Opportunities**

Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required.

**Credit Hour:** 1-3

**Recommended:** 75 hours completed

---

**ABM 4962: Planning the Farm Business**

(cross-leveled with AAE 7962). Economic analysis and planning of the farm business and its organization. Applications of computerized

management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

**Credit Hours:** 3

**Prerequisites:** ABM 3260

---

**ABM 4971: Agribusiness Management Strategy**

(cross-leveled with AAE 7971). Analysis of industry forces in agriculture and food sector. Assessing risks and firms' capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

**Credit Hours:** 3

**Prerequisites:** ABM 3282 or FINANC 3000 and ABM 3286 or MANGMT 3000

---

**ABM 4971W: Agribusiness Management Strategy - Writing Intensive**

(cross-leveled with AAE 7971). Analysis of industry forces in agriculture and food sector. Assessing risks and firms' capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

**Credit Hours:** 3

**Prerequisites:** ABM 3282 or FINANC 3000 and ABM 3286 or MANGMT 3000

---

**ABM 4972: Agri-Food Business and Cooperative Management**

(cross-leveled with AAE 7972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

**Credit Hours:** 3

**Prerequisites:** ABM 4971 and ABM 3286 or MANGMT 3000

**Recommended:** ABM 3256

---

**ABM 4983W: Strategic Entrepreneurship in Agri-Food - Writing Intensive**

(cross-leveled with AAE 7983). Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets.

**Credit Hours:** 3

**Prerequisites:** ABM 3283 and ABM 3282 or FINANC 3000

**Recommended:** senior standing

---

**ABM 4990W: Economic Analysis of Policy and Regulation - Writing Intensive**

(cross-leveled with AAE 7990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

**Credit Hours:** 3

**Prerequisites:** ABM 4251

**Recommended:** ECONOM 4351

---

## Agricultural & Applied Economics Courses

**AAE 7223: Professional Solution Selling**

(cross-leveled with ABM 4223). This course will reinforce the sales education students gained in ABM 2223, Agricultural Sales. Class will focus on strategic and conceptual selling which are techniques geared toward complex B2B sales. In this course, we will discuss myriad career opportunities in the sales profession. Students will have the opportunity to interact with sales professionals.

**Credit Hours:** 3

**Prerequisites:** ABM 2223

---

**AAE 7240: Microeconomics Theory and Applications**

(cross-leveled with ABM 4240). This course extends the learning from principles of microeconomics for students of applied economics. The topics in this course prepare students for further study in finance, business management, policy analysis, economic development, and other applications of economic theory. The course stresses development of theoretical models of consumer choice, firm behavior, perfect and imperfect markets, and externalities, balanced by investigation of the assumptions behind these models. Applications of the models to management and policy issues will be assigned throughout the semester.

**Credit Hours:** 3

**Prerequisites:** ABM 1041 or ECONOM 1014

---

**AAE 7251: Agricultural Prices**

(cross-leveled with ABM 4251). Variations in prices of agricultural products; underlying factors.

**Credit Hours:** 3

**Prerequisites:** ABM 2123 and ABM 2225 or STAT 2500

---

**AAE 7295: Agricultural Risk Management**

(cross-leveled with ABM 4295). This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks.

**Credit Hours:** 3

**Prerequisites:** ABM 2183 and ABM 2225 or STAT 2500

---

**AAE 7301: Topics in Agricultural and Applied Economics**

Current and new topics not currently offered in applied and/or theoretical areas in Agricultural and Applied Economics.

**Credit Hour:** 1-6

---

**AAE 7400: Environmental Law, Policy, and Justice**

(same as ENV\_SC 7400; cross-leveled with ENV\_SC 4400). This course will examine the intersection of environmental law, policy, and justice. We will first cover the building blocks of U.S. environmental law, including common law and statutes such as the Clean Air Act and the Clean Water Act. We will then turn to international environmental policy issues such as climate change, marine pollution, and the hazardous waste trade. We will approach these laws and treaties through the lens of equity and environmental justice. The course will use a variety of teaching methods, including lecture and classroom discussion using cold calling and the Socratic Method. We will also have student presentations, guest

speakers, a moot court, a negotiation simulation, and a field trip in the Columbia, Missouri area. Graded on A-F basis only.

**Credit Hours:** 3

---

**AAE 7940: Internship Experiences in Agricultural and Applied Economics**

Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** 2.5 GPA; 75 hours of course work and instructor's consent

---

**AAE 7962: Planning the Farm Business**

(cross-leveled with ABM 4962). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.

**Credit Hours:** 3

**Prerequisites:** ABM 3260

---

**AAE 7971: Agribusiness Management Strategy**

(cross-leveled with ABM 4971). Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.

**Credit Hours:** 3

**Prerequisites:** ABM 3282 or FINANC 3000 and ABM 3286 or MANGMT 3000

---

**AAE 7972: Agri-Food Business and Cooperative Management**

(cross-leveled with ABM 4972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.

**Credit Hours:** 3

**Prerequisites:** ABM 4971 and ABM 3286 or MANGMT 3000

**Recommended:** ABM 3256

---

**AAE 7983: Strategic Entrepreneurship in Agri-Food**

(cross-leveled with ABM 4983). Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Graduate standing and one course at the level of intermediate microeconomics

---

**AAE 7990: Economic Analysis of Policy and Regulation**

(cross-leveled with ABM 4990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other

things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

**Credit Hours:** 3

**Prerequisites:** ABM 4251

**Recommended:** ECONOM 4351

---

**AAE 7995: Economics of Agricultural Production and Distribution**

(cross-leveled with ABM 4995). Applies economic principles to agricultural production including price theory, linear programming and uncertainty.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 and ABM 2225 or STAT 2500

---

**AAE 8001: Advanced Topics in Agricultural and Applied Economics**

Analyzes economic logic problems. Current agricultural and applied economic problems.

**Credit Hours:** 3

---

**AAE 8050: Economics of Institutions and Organizations**

This course expands upon the fundamental principles of neo-classical economics by relaxing traditional behavioral and informational assumptions and by introducing the importance of transaction costs and institutions for economic analysis.

**Credit Hours:** 3

---

**AAE 8060: Quantitative Tools for Decision Making and Performance Evaluation**

Firm decision making and evaluation are key concepts in business economics and management. This is an introductory course that focuses on quantitative methods for modeling the decision process and evaluating the performance of Decision-Making Units (DMUs).

**Credit Hours:** 3

**Prerequisites:** STAT 4510

---

**AAE 8085: Masters Problems in Agricultural and Applied Economics**

Supervised study, research in specialized phases of agricultural and applied economics.

**Credit Hour:** 1-99

---

**AAE 8090: Masters Thesis Research in Agricultural and Applied Economics**

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-6

---

**AAE 8265: Agricultural and Food Policy**

The course is designed to help students understand how agricultural and food policies are developed and how they can affect farmers, consumers, taxpayers and the environment. Topics include the policy process, farm subsidy programs, crop insurance, nutrition programs, trade agreements, food security, biofuel policies, promotion of organic and local foods and food safety. The primary focus will be U.S. policies, but policies in other countries will also be discussed. Students will develop analytical skills

that will prepare them for careers in government, business or academia. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351 or equivalent

**Recommended:** AAE 9220, AAE 9230

---

**AAE 8350: Regional Development Issues and Analysis**

(same as PUB\_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351 or PUB\_AF 8190 or equivalent

---

**AAE 8410: Natural Resource and Environmental Economics**

Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351

---

**AAE 8430: International Agricultural Development Policy**

An analytical review of economic policies directed toward stimulating agricultural development in the world's low income countries.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351 and ECONOM 7353

---

**AAE 8450: Masters Non Thesis Research**

Independent investigation of advanced nature. Report required.

**Credit Hour:** 1-6

---

**AAE 8510: Research Methods and Design**

(same as AG\_ED\_LD 8510, RU\_SOC 8510). This course will give students a foundational understanding of quantitative research methods and design in the social and behavioral sciences. The main objective is to help students identify and formulate their own research questions and develop and implement a process for answering them. Students will examine the nature of the research process, explore the connection between theory and empirical research, identify viable research topics, critique published research, learn how to structure good arguments, understand the structure of research papers and proposals, plan and manage research activities, and become familiar with research ethics. Graded on A-F basis only.

**Credit Hours:** 3

---

**AAE 8520: Economics of Transaction and Contracting**

This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions.

**Credit Hours:** 3

---

**AAE 8610: Economic and Sociological Approaches to Collective Action**

(same as RU\_SOC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.

**Credit Hours:** 3

**Prerequisites:** AAE 7972

---

**AAE 8860: International Comparative Rural Policy**

(same as PUB\_AF 8860, NAT\_R 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AAE 9001: Advanced Topics in Economics II**

Analyzes economic logic problems. Current agricultural economic problems.

**Credit Hours:** 3

---

**AAE 9040: Advanced Microeconomics Theory and Applications I**

First semester course that rigorously examines the microeconomic theory of producer and consumer behavior, combined with applications of the theoretical concepts to empirical economic research on agricultural, business, development, and environmental issues. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351 or instructors consent

---

**AAE 9042: Advanced Microeconomics Theory and Applications II**

Second semester advanced micro theory covering choice under uncertainty, industry structure, game theory, information econ, and political economy of regulation. Includes applications of micro models to issues in agricultural, natural resource, and development sectors.

**Credit Hours:** 3

**Prerequisites:** AAE 9040

---

**AAE 9085: Doctoral Problems in Agricultural and Applied Economics**

Supervised study, research in specialized phases of agricultural and applied economics.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AAE 9090: Doctoral Dissertation Research in Agricultural and Applied Economics**

Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

---

**AAE 9220: Price and Market Analysis**

Applies economic theory and quantitative methods to analyze agricultural prices and markets. Examines problem formulation, estimation, and model evaluation applied to the concepts of demand, supply, and prices.

**Credit Hours:** 3

**Prerequisites:** ECONOM 8451 or ECONOM 8472; STAT 4510

---

**AAE 9230: Welfare and Consumption Economics**

Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers' choice; measurement of consumption; living standards; household decisions and markets relation.

**Credit Hours:** 3

**Prerequisites:** ECONOM 8451 or instructor's consent

---

**AAE 9265: Food, Agricultural and Rural Policy**

Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351 and AAE 9230

---

**AAE 9510: Organizational Economics I**

This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions.

**Credit Hours:** 3

**Prerequisites:** AAE 8050

---

**AAE 9520: Organizational Economics II**

Relationships of neoclassical and new institutional economics to designing organizational strategy and structure. Internal coordination and structure, organizational boundaries, inter-firm rivalry and cooperation, and competitiveness of food system organizations.

**Credit Hours:** 3

**Prerequisites:** AAE 8050

---

## Agricultural Education and Leadership Courses

**AG\_ED\_LD 1000: Orientation to Agricultural Education and Leadership**

Overview of the discipline of agricultural education including: career opportunities, certification requirements, professional development, and current issues.

**Credit Hour:** 1

---

**AG\_ED\_LD 2250: Introduction to Leadership**

Any student can learn to be a leader. Students will analyze their strengths and then develop their personalized leadership brand. Students will develop leadership skills for leading in home, work, and organizational contexts and will apply those skills in planning and implementing a personal leadership project.

**Credit Hours:** 3

---

**AG\_ED\_LD 2260: Team and Organizational Leadership**

Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

**Credit Hours:** 3

---

**AG\_ED\_LD 2260W: Team and Organizational Leadership - Writing Intensive**

Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

**Credit Hours:** 3

---

**AG\_ED\_LD 2270: Leadership Development in Youth Organizations**

This course focuses on how to develop leadership in youth through participation in a youth organization. In particular, this course explores youth development, how to develop leadership through youth organizations and their activities, and organizational structures.

**Credit Hours:** 3

---

**AG\_ED\_LD 2271: Early Field Experience**

This field experience is designed for students to explore the role of being a school-based agricultural educator. In particular, students will experience the total agricultural education program with a focus on youth organizations.

**Credit Hour:** 1

**Prerequisites:** AG\_ED\_LD 2270 or concurrent enrollment

---

**AG\_ED\_LD 3010: Leadership in Today's World**

(same as RU\_SOC 3010). Critically examines the leaders and leadership surrounding the greatest challenges to society today and in the future, while developing awareness and understanding of global and local issues in agriculture, democracy, civil society, business, and the environment. Course also focuses on fostering civil discourse and enhancing engagement. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** RU\_SOC 1000, AG\_ED\_LD 2250, or AG\_ED\_LD 2260

---

**AG\_ED\_LD 3010H: Leadership in Today's World - Honors**

(same as RU\_SOC 3010H). Critically examines the leaders and leadership surrounding the greatest challenges to society today and in the future, while developing awareness and understanding of global and local issues in agriculture, democracy, civil society, business, and the environment. Course also focuses on fostering civil discourse and enhancing engagement. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** RU\_SOC 1000, AG\_ED\_LD 2250, or AG\_ED\_LD 2260

---

**AG\_ED\_LD 3085: Problems in Agricultural Education and Leadership**

Supervised and independent study of problems and issues in Agricultural Education and Leadership at the undergraduate level.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AG\_ED\_LD 3320: Metal Fabrication and Laboratory Management**

Application of metal fabrication skills, including cutting, bending, and welding, using a variety of processes. Operations of hand tools and power equipment used in project construction. Also includes laboratory management, instructional strategies, and assessment techniques related to secondary agriculture programs. Prerequisites: Agriculture Education Majors Only

**Credit Hours:** 3

---

**AG\_ED\_LD 3776: Litton Leadership Scholars**

The Litton Leadership Scholars class focuses on developing students as leaders. Through leadership coursework, field-based mentorship and self-reflection, students will practice and develop exemplary leadership skills. Students will have an opportunity to spend time with industry leaders, expand their personal growth boundaries and develop their unique leadership style. Students will engage in an interview process to be selected for the Litton Leadership Scholars program. Graded on A-F basis only.

**Credit Hour:** 1-2

---

**AG\_ED\_LD 4001: Topics in Agricultural Education and Leadership**

Courses on specialized topics offered on a trial basis until the course has been assigned a course number.

**Credit Hour:** 1-3

---

**AG\_ED\_LD 4087: Internship Seminar in Agricultural Education and Leadership**

Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experiential learning and leadership development activities, managing the complete program, and professional development.

**Credit Hours:** 3

**Corequisites:** AG\_ED\_LD 4995

---

**AG\_ED\_LD 4240: Leading Organizational and Community Change**

(cross-leveled with AG\_ED\_LD 7240). This course provides the diagnostic and strategic foundations for students to enact leadership in organizational and community contexts. Designed for undergraduate students and graduate-level professionals alike, this course increases a student's capacity to lead with or without authority, and with or without a formal organizational or political position. The course is based heavily on Heifetz's Adaptive Leadership theory, which challenges individuals to think beyond individual, role-based leadership skills and behaviors when enacting change in systems, such as organizations and communities.

**Credit Hours:** 3

**Recommended:** AG\_ED\_LD 2250 and AG\_ED\_LD 2260

---

**AG\_ED\_LD 4310: Intracurricular Program Management in Agricultural Education**

This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan, supervise, and evaluate the intracurricular components within Agricultural Education programs.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**AG\_ED\_LD 4320: Methods of Teaching I**

(cross-leveled with AG\_ED\_LD 7320). Investigations into the teaching and learning process which including lesson planning, direct instruction methods, and assessment. Enrollment limited to students accepted into Phase II of the Teacher Development Program.

**Credit Hours:** 3

**Prerequisites:** junior standing or instructor's consent

---

**AG\_ED\_LD 4321: Field Experience I**

A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Graded on S/U basis only.

**Credit Hour:** 1

**Corequisites:** AG\_ED\_LD 4320

---

**AG\_ED\_LD 4330: Methods of Teaching II**

(cross-leveled with AG\_ED\_LD 7330). Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, assessment, and curricular design. Enrollment limited to students accepted into Phase II of Teacher Development Program.

**Credit Hours:** 3

**Prerequisites:** AG\_ED\_LD 4320 or instructor's consent

---

**AG\_ED\_LD 4331: Field Experience II**

A field-based experience that provides students with comprehensive experience directed toward learning, teaching, and assessment in secondary agriculture programs. Graded on S/U basis only.

**Credit Hour:** 1

**Corequisites:** AG\_ED\_LD 4330

---

**AG\_ED\_LD 4340: Designing and Delivering Educational/Leadership Programs**

(cross-leveled with AG\_ED\_LD 7340). Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.

**Credit Hours:** 3

**Prerequisites:** junior standing or instructor's consent

---

---

**AG\_ED\_LD 4340H: Designing and Delivering Educational/Leadership Programs - Honors**

(cross-leveled with AG\_ED\_LD 7340). Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required; junior standing or instructor's consent

---

**AG\_ED\_LD 4993: Internship in Agricultural Education and Leadership**

Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator.

**Credit Hour:** 1-4

**Prerequisites:** departmental consent

---

**AG\_ED\_LD 4995: Student Teaching Internship in Agriculture**

A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context.

**Credit Hour:** 1-12

**Prerequisites:** departmental consent

---

**AG\_ED\_LD 7087: Internship Seminar in Agricultural Education and Leadership**

Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development.

**Credit Hours:** 3

**Corequisites:** AG\_ED\_LD 4995

---

**AG\_ED\_LD 7240: Leading Organizational and Community Change**

(cross-leveled with AG\_ED\_LD 4240). This course provides the diagnostic and strategic foundations for students to enact leadership in organizational and community contexts. Designed for undergraduate students and graduate-level professionals alike, this course increases a student's capacity to lead with or without authority, and with or without a formal organizational or political position. The course is based heavily on Heifetz's Adaptive Leadership theory, which challenges individuals to think beyond individual, role-based leadership skills and behaviors when enacting change in systems, such as organizations and communities.

**Credit Hours:** 3

---

**AG\_ED\_LD 7310: Intracurricular Program Management in Agricultural Education**

This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how

to plan supervise and evaluate the intracurricular components within Agricultural Education Programs.

**Credit Hours:** 3

---

**AG\_ED\_LD 7320: Methods of Teaching I**

(cross-leveled with AG\_ED\_LD 7320). Investigations into the teaching and learning process which includes lesson planning, direct instruction methods, and assessment.

**Credit Hours:** 3

**Prerequisites:** acceptance into the Teacher Certification option

---

**AG\_ED\_LD 7330: Methods of Teaching II**

(cross-leveled with AG\_ED\_LD 4330) Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, assessment, and curricular design.

**Credit Hours:** 3

**Prerequisites:** acceptance into Teacher Certification option and AG\_ED\_LD 4320 or AG\_ED\_LD 7320

---

**AG\_ED\_LD 7340: Designing and Delivering Educational/Leadership Programs**

(cross-leveled with AG\_ED\_LD 4340). Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.

**Credit Hours:** 3

**Prerequisites:** AG\_ED\_LD 2220 or equivalent

---

**AG\_ED\_LD 7350: Inservice Course in Agricultural Education and Leadership**

Professional development course which focuses on enhancing the technical, administrative, or management skills of agricultural educators.

**Credit Hour:** 1-99

---

**AG\_ED\_LD 8080: Creative Component in Agricultural Education and Leadership**

Independent original work that culminates in a scholarly project, document or presentation. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**AG\_ED\_LD 8085: Problems in Agricultural Education and Leadership**

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AG\_ED\_LD 8087: Seminar in Agricultural Education and Leadership**

Seminar in Agricultural Education and Leadership.

**Credit Hour:** 1-99

---

---

**AG\_ED\_LD 8090: Thesis Research in Agricultural Education and Leadership**

Independent research activities by a master's student that culminates in a thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AG\_ED\_LD 8210: History and Leadership of the Land Grant University**

Historical overview of the evolution and development of land-grant colleges. Students examine early public mandates and evaluate education, research, public service developments and new initiatives needed for Land Grant universities to effectively serve society.

**Credit Hours:** 2

---

**AG\_ED\_LD 8250: Leadership Theory and Application**

Survey of concepts, theories and practices of leadership, personal development and group dynamics. Exploration of leadership traits and models with a focus upon how they apply to Agricultural Education.

**Credit Hours:** 3

---

**AG\_ED\_LD 8330: Advanced Methods of Teaching**

Explores the principles and psychological aspects of teaching and learning; teaching strategies, methods, and techniques; evaluating student learning; motivating students; and personal teacher behaviors that influence learning.

**Credit Hours:** 3

---

**AG\_ED\_LD 8340: Student and Teacher Development in Agricultural Education and Leadership**

Examines planning and supervising career exploration, experiential learning, and leadership development activities of secondary agriculture students. The professional development of the secondary agriculture teacher is also examined.

**Credit Hours:** 3

**Prerequisites:** AG\_ED\_LD 4310 or equivalent

---

**AG\_ED\_LD 8350: College Teaching of Agriculture, Food and Natural Resources**

A course designed to assist current or future college faculty who wish to improve their teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education.

**Credit Hours:** 3

---

**AG\_ED\_LD 8351: Induction Year Teaching I**

Continuing education course for the professional development of first-year teachers of agriculture. The course focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

**Credit Hour:** 1-2

---

**AG\_ED\_LD 8352: Induction Year Teaching II**

Continuing education course for the professional development of second-year teachers of agriculture. The course is a continuation of AG\_ED\_LD 8351 and focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

**Credit Hour:** 1-2

**Prerequisites:** AG\_ED\_LD 8351

---

**AG\_ED\_LD 8410: Philosophical Foundations of Agricultural Education and Leadership**

Overview of the history and philosophical development of agricultural education and leadership as a discipline. Philosophers, policy makers, movements, trends, and legislation that has influenced agricultural education. Current issues and future trends impacting the field. Graded on A-F basis only.

**Credit Hour:** 1-3

---

**AG\_ED\_LD 8430: Evaluation of Educational Programs**

(same as RU\_SOC 8430). Examines program evaluation concepts, principles, and models; and identifies major steps in planning, conducting, and reporting results of evaluation objects.

**Credit Hours:** 3

---

**AG\_ED\_LD 8510: Research Methods and Design**

(same as RU\_SOC 8510, AAE 8510). This course will give students a foundational understanding of quantitative research methods and design in the social and behavioral sciences. The main objective is to help students identify and formulate their own research questions and develop and implement a process for answering them. Students will examine the nature of the research process, explore the connection between theory and empirical research, identify viable research topics, critique published research, learn how to structure good arguments, understand the structure of research papers and proposals, plan and manage research activities, and become familiar with research ethics. Graded on A-F basis only.

**Credit Hours:** 3

---

**AG\_ED\_LD 8530: Grant Proposal Writing**

Preparation of proposals designed to solicit grant funding to support teaching, research or outreach programs. Emphasis on proposal development, identifying funding sources, and proposal review processes.

**Credit Hours:** 2

---

**AG\_ED\_LD 8540: Methods of Qualitative Research**

(same as RU\_SOC 8540). Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.

**Credit Hours:** 3

---

**AG\_ED\_LD 8995: College Teaching Practicum**

Learning experience that combines the study, observation, and practice of teaching university-level courses in food, agriculture and/or natural resources under the supervision of teaching mentors. Graded on S/U basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent and AG\_ED\_LD 8330 or AG\_ED\_LD 8350

---

**AG\_ED\_LD 9090: Doctoral Research in Agricultural Education and Leadership**

Independent research activities by a doctoral student that culminates in a dissertation or other scholarly work. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AG\_ED\_LD 9410: Foundations and Practices of Teacher Education**

Foundations and practices of teacher preparation programs including student selection and advisement, licensure requirements, accreditation, curriculum, clinical and field experiences, supervision, evaluation and research.

**Credit Hours:** 3

**Prerequisites:** Doctoral student or instructor's consent

---

**AG\_ED\_LD 9510: Data Collection, Analysis and Interpretation**

(same as RU\_SOC 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AG\_ED\_LD 8510 or RU\_SOC 8510 or instructor's consent

---

## Agricultural Science Communications Courses

**AGSC\_COM 1160: Foundations of Agricultural Science Communications**

This course provides an introduction to the various segments of agricultural communications. Students develop verbal, written, and visual communication skills through hands-on learning methods and gain insight into how these techniques are utilized in the context of agriculture. Emphasis is placed on gaining a historical perspective of agricultural communications, where agricultural communications is today, and what it might look like in the future. Students will be exposed to basic communication theories and will focus on the different type of communications including interpersonal, mediated interpersonal, organizational, and mass media.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**AGSC\_COM 2150: Problems in Science and Agricultural Journalism**

For undergraduates majoring in science and agricultural journalism. May be repeated.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**AGSC\_COM 2210: Communicating Science to the Public**

Introduction to the history, theory and practice of communicating science to the general public. Emphasis on the interplay of science, human

values and politics; also, the art and craft of writing and talking to lay audiences. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

**Recommended:** Sophomore standing

---

**AGSC\_COM 2220: Verbal Communication in Agriculture, Food and Natural Resources**

Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills.

**Credit Hours:** 3

**Prerequisites:** Restricted to College of Agriculture, Food and Natural Resources students only during Early Registration

---

**AGSC\_COM 2220H: Verbal Communication in Agriculture, Food and Natural Resources - Honors**

Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills.

**Credit Hours:** 3

**Prerequisites:** Restricted to College of Agriculture, Food and Natural Resources students only during Early Registration. Honors eligibility required

---

**AGSC\_COM 2225: Science, Technology and Society**

Overview of the social influences that shape science including how scientific knowledge is contested and legitimated; how social forces (among them mass communication) influence the choice of innovations; and the role social systems and sectors play in the use and benefit of science. Communication intensive-discussion, presentation and essay based.

**Credit Hours:** 3

**Recommended:** RU\_SOC 1000 or SOCIOL 1000

---

**AGSC\_COM 2225W: Science, Technology and Society - Writing Intensive**

Overview of the social influences that shape science including how scientific knowledge is contested and legitimated; how social forces (among them mass communication) influence the choice of innovations; and the role social systems and sectors play in the use and benefit of science. Communication intensive-discussion, presentation and essay based.

**Credit Hours:** 3

**Recommended:** RU\_SOC 1000 or SOCIOL 1000

---

**AGSC\_COM 2940: Internships in Science and Agricultural Journalism**

May be repeated for credit.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

---

**AGSC\_COM 3201: Topics in Science and Agricultural Journalism**

Instruction in select subject matter areas in the field of communications.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**AGSC\_COM 3210: Fundamentals of Communications**

Learn to write about complex topics so that your audience understands and relates to the issues. Students are challenged to become critical thinkers by evaluating and revising business documents. Discuss the free flow of information to the public in a democratic society, media literacy and becoming a discerning consumer of information. Ethical issues related to communicating in the workplace. Through practical application, learn skills in writing effective business messages: positive, negative, and persuasive messages. Learn to apply basic rules of grammar to written communications. Identify the purpose and audience for a written document and organize the information needed to write it. Develop and demonstrate oral presentation skills.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and sophomore standing

---

**AGSC\_COM 3210W: Fundamentals of Communications - Writing Intensive**

Learn to write about complex topics so that your audience understands and relates to the issues. Students are challenged to become critical thinkers by evaluating and revising business documents. Discuss the free flow of information to the public in a democratic society, media literacy and becoming a discerning consumer of information. Ethical issues related to communicating in the workplace. Through practical application, learn skills in writing effective business messages: positive, negative, and persuasive messages. Learn to apply basic rules of grammar to written communications. Identify the purpose and audience for a written document and organize the information needed to write it. Develop and demonstrate oral presentation skills.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and sophomore standing

---

**AGSC\_COM 3240: Communicating on the Web**

Learn to make an effective, content-rich website using web authoring software. This course includes experiential learning through a project requiring students to develop a website for a client. Course topics include elements of design, website usability, and evaluation of website effectiveness. This is not a programming course.

**Credit Hours:** 3

---

**AGSC\_COM 3385: Problems in Science and Agricultural Journalism**

Opportunity to apply journalism skills to agricultural subjects; opportunity to integrate communication processes within single medium or across media. Section 1: Corner Post Staff, Section 2: Problems in Science and Agricultural Journalism. May be repeated for up to 9 credit hours.

**Credit Hour:** 1-4

**Prerequisites:** instructor's consent

---

**AGSC\_COM 4301: Topics in Science and Agricultural Journalism**

Instruction in select subject matter areas in the field of communications. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** JOURN 4450 and Junior standing

---

**AGSC\_COM 4301HW: Topics in Science and Agricultural Journalism - Honors/Writing Intensive**

Instruction in select subject matter areas in the field of communications.

Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** JOURN 4450 and Junior standing; Honors Eligibility required

---

**AGSC\_COM 4301W: Topics in Science and Agricultural Journalism - Writing Intensive**

Instruction in select subject matter areas in the field of communications.

Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** JOURN 4450 and Junior standing

---

**AGSC\_COM 4410: Readings in Science and Agricultural Journalism**

An examination of modern journalistic book-length storytelling about science, the food system, environment, natural resources and society. Students will learn about the authors and how they use theory and techniques of storytelling. Students will gain a deeper knowledge about how to pursue such information-gathering and writing, as well as develop their critical-thinking abilities and expertise in the subject matter covered by the books. They will read, analyze and write about the books and the ideas and times that shaped them. Each course will examine a particular subject grouping of books, for example several on farming, or on conservation, or on climate change.

**Credit Hour:** 1-3

**Prerequisites:** ENGLISH 1000

---

**AGSC\_COM 4414: Field Reporting on the Food System and Environment**

(Same as JOURN 4414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day field trip. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AGSC\_COM 4415: Current Issues in Science Journalism**

(Same as JOURN 4415) Focuses on covering the interplay of one or more current issues of concern to journalists, scientists and society. The focus for any given semester may be biotechnology, climate change, energy, food safety, global population growth, wildlife or another issue. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** JOURN 2100 or instructor's consent

---

**AGSC\_COM 4480: Will Write for Food (and Wine)**

(same as JOURN 4480) Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** JOURN 4450 or JOURN 4804. Restricted to Journalism and Science Agricultural Journalism students only

---

**AGSC\_COM 4480W: Will Write for Food (and Wine) - Writing Intensive**

(same as JOURN 4480) Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** JOURN 4450 or JOURN 4804. Restricted to Journalism and Science Agricultural Journalism students only

---

**AGSC\_COM 4482: Field Reporting: Wine Country Writing**

(same as JOURN 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** JOURN 2100

---

**AGSC\_COM 4482W: Field Reporting: Wine Country Writing - Writing Intensive**

(same as JOURN 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** JOURN 2100

---

**AGSC\_COM 4940: Internships in Science and Agricultural Journalism**

May be repeated for credit.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** 60 or more credit hours completed

---

**AGSC\_COM 4970: Agriculture and the Media Senior Seminar Capstone**

Provides background, knowledge of trends and experience with agricultural media.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**Recommended:** Science and Agricultural Journalism seniors take last Spring semester before graduation

---

**AGSC\_COM 7301: Topics in Science and Agricultural Journalism**

Selected current topics in science and agricultural journalism. Specific topics to be announced at time of registration. Course graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent

---

**AGSC\_COM 7414: Field Reporting on the Food System and Environment**

(same as JOURN 7414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day filed trip. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**Agricultural Systems Management Courses**

**AG\_S\_M 1020: Introduction to Agricultural Systems Management**

Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of six technical areas within Agricultural Systems Management. The six areas in addition to agricultural safety include applied physical principles, internal combustion engines, surface water management, ohms law and electrical circuits, machinery systems and management, and grain and material handling.

**Credit Hours:** 3

---

**AG\_S\_M 1040: Physical Principles for Agricultural Applications**

Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

---

**AG\_S\_M 2007: Topics in Agricultural Systems Management-Physical**

Current and new technical developments in agricultural systems management.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

**Recommended:** 6 hours in AG\_S\_M or instructor's consent

---

**AG\_S\_M 2199: Seminar in Professional Development**

ASM faculty meet with and discuss what it means to be a professional in the field of Agricultural Systems Technology. In general, the course includes aspects of what it means to be a professional, to develop a resume, tips for interviewing, finding a job, and building one's career. A second major aspect of the course is to explore the field of Agricultural Systems Technology to gain a better understanding of various potential career paths available to students in Agricultural Systems Technology. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** ASM Freshman, Sophomores, Transfer students or instructor consent

**Recommended:** AG\_S\_M 1020

---

---

**AG\_S\_M 2220: Agricultural/Industrial Structures**

A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 2320: Internal Combustion Power**

Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 2340: Pesticide Application Equipment**

Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license.

**Credit Hours:** 3

**Recommended:** AS\_S\_M 1040. AS\_S\_M 1040. MATH 1100 or higher

---

**AG\_S\_M 2345: Chemical Application Systems**

Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures.

**Credit Hour:** 2-3

**Prerequisites:** MATH 1100 or higher

---

**AG\_S\_M 2360: Fluid Power**

Basic power hydraulic theory and application. Hydraulic systems, components and circuits are demonstrated using hydraulic trainers. Items demonstrated include hydraulic motors, cylinders, couplers, hoses and connectors.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 3007: Topics in Agricultural Systems Management-Physical**

Current and new technical developments in agricultural systems management.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

**Recommended:** 6 hours in AG\_S\_M or instructor's consent

---

**AG\_S\_M 3350: Problems in Agricultural Systems Management**

Supervised independent study at the undergraduate level.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**AG\_S\_M 4020: Agricultural Safety and Health**

(cross-leveled with AG\_S\_M 7020). Protecting agricultural workers and the general public in our age of technological and scientific advancement has become one of the most challenging and rewarding career fields.

This online agricultural safety and health class will prepare you to respond to these needs, to analyze agricultural hazardous and rural public health situations, to develop and implement safety programs and apply governmental regulations associated with production agriculture. It covers safety training strategies, safety management systems, workplace safety behaviors, safety standards and compliance, risk assessment and risk management, safety performance measurement, safety leadership, and safety and health program design amongst agricultural populations. Additionally, students will develop an understanding of how to develop a safety risk management plan for a farm or other agricultural related business.

**Credit Hours:** 3

**Prerequisites:** junior or senior standing or instructor's consent

---

**AG\_S\_M 4025: Principles of Injury Prevention**

Basic foundations of injury causation and prevention in home, motor vehicle, public and work environments. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Junior or Senior standing or Instructor's consent required

**Recommended:** ENGLSH 1000, MATH 1100

---

**AG\_S\_M 4030: Legal Aspects of Occupational Safety and Health**

A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers' compensation, as well as common liability issues. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** junior or senior standing or instructor's consent

**Recommended:** ENGLSH 1000, MATH 1100

---

**AG\_S\_M 4035: Occupational Safety Management**

Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Junior or Senior standing or Instructor's consent

**Recommended:** ENGLSH 1000, MATH 1100

---

**AG\_S\_M 4040: Fire Protection and Prevention**

An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** junior or senior standing or instructor's consent

**Recommended:** ENGLSH 1000, MATH 1100

---

**AG\_S\_M 4045: Occupational Safety**

Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing

a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Junior or Senior standing or Instructor's consent

**Recommended:** ENGLISH 1000, MATH 1100

---

**AG\_S\_M 4140: Electricity: Wiring and Equipment**

(cross-leveled with AG\_S\_M 7140). Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Topics such as power factor, electric motors, relays, magnetic controllers, programmable logic controllers, solar power, wind power and Bbasic electrical theory are discussed.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 4150: Biorenewable Systems Technology**

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation and logistics, and marketing.

**Credit Hours:** 3

**Prerequisites:** MATH 1100, CHEM 1100 and AG\_EC 1041

---

**AG\_S\_M 4160: Internet of Things for Precision Agriculture Technology**

Introduction to basic concepts and applications of Internet of Things (IoT) technology in agriculture, and its impacts on farming and agricultural industry. Show-case of typical IoT systems used in farms, on farm equipment and in cloud. Hands on experience on essential IoT components, including hardware (wireless sensors, controllers, computers and network devices) and software.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or equivalent or higher, Junior or Senior Standing

**Recommended:** AG\_S\_M 4140, AG\_S\_M 1040, BIOL\_EN 4380

---

**AG\_S\_M 4220: Material Handling and Conditioning**

(cross-leveled with AG\_S\_M 7220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 4225: Preservation of Grain Quality**

Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

**Credit Hours:** 2

**Prerequisites:** MATH 1100. Recommended AG\_S\_M 1040 and AG\_S\_M 4220

---

**AG\_S\_M 4320: Agricultural Equipment and Machinery**

(cross-leveled with AG\_S\_M 7320). Operation of agricultural machinery. Selection and management of equipment.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 4330: Principles for Food Processing**

(same as F\_S 4330; cross-leveled with AG\_S\_M 7330, F\_S 7330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy and material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

**Credit Hours:** 3

**Prerequisites:** MATH 1100, AG\_S\_M 1040 or PHYSICS 1210

---

**AG\_S\_M 4350: Problems in Agricultural Systems Management**

Supervised independent study at the undergraduate level.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**AG\_S\_M 4360: Precision Agriculture Science and Technology**

(same as PLNT\_S 4360, SOIL 4360; cross-leveled with AG\_S\_M 7360, PLNT\_S 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

**Credit Hours:** 3

**Prerequisites:** PLNT\_S 2100 or SOIL 2100, or PLNT\_S 2110; MATH 1100; AG\_S\_M 1040

---

**AG\_S\_M 4365: Machinery Management Using Precision Agriculture Technology**

(cross-leveled with AG\_S\_M 7365). Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040, and AG\_S\_M 4360 or PLNT\_S 4360 or SOIL 4360

---

**AG\_S\_M 4366: Data Management and Analysis Using Precision Agriculture Technology**

(cross-leveled with AG\_S\_M 7366). Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040, AG\_S\_M 4360, STAT 1200

---

**AG\_S\_M 4368: Profit Strategies Using Precision Agriculture Technology**

(cross-leveled with AG\_S\_M 7368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm's financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040, AG\_S\_M 4360, STAT 1200

---

**AG\_S\_M 4390: Optimization and Management of Food and Agricultural Systems**

(same as F\_S 4390; cross-leveled with F\_S 7390, AG\_S\_M 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 4420: Surface Water Management**

(cross-leveled with AG\_S\_M 7420). Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 4460: Irrigation and Drainage**

(cross-leveled with AG\_S\_M 7460). Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 4940: Agricultural Systems Management Internship**

Combines study, observation, and employment with industry or government agency in an area of Agricultural Systems Management. A special problem / learning experience is selected by internship company representative, faculty problem advisor and student. Written and oral reports evaluated by faculty.

**Credit Hour:** 2-5

**Prerequisites:** Instructor's consent

---

**Recommended:** Sophomore standing and minor or major in Agricultural Systems Management

---

**AG\_S\_M 4970: Agricultural Systems Management - Capstone**

Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.

**Credit Hours:** 3

**Prerequisites:** Senior Standing

---

**AG\_S\_M 4970W: Agricultural Systems Management - Capstone - Writing Intensive**

Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher, AG\_S\_M 1040 and Senior Standing

---

**AG\_S\_M 7001: Topics in Agricultural Systems Management**

Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise.

**Credit Hours:** 3

---

**AG\_S\_M 7020: Agricultural Safety and Health**

(cross-leveled with AG\_S\_M 4020). Protecting agricultural workers and the general public in our age of technological and scientific advancement has become one of the most challenging and rewarding career fields. This online agricultural safety and health class will prepare you to respond to these needs, to analyze agricultural hazardous and rural public health situations, to develop and implement safety programs and apply governmental regulations associated with production agriculture. It covers safety training strategies, safety management systems, workplace safety behaviors, safety standards and compliance, risk assessment and risk management, safety performance measurement, safety leadership, and safety and health program design amongst agricultural populations. Additionally, students will develop an understanding of how to develop a safety risk management plan for a farm or other agricultural related business.

**Credit Hours:** 3

---

**AG\_S\_M 7085: Problems in Agricultural Systems Management**

Supervised individual study at the graduate level.

**Credit Hour:** 1-99

---

**AG\_S\_M 7140: Electricity: Wiring and Equipment**

(cross-leveled with AG\_S\_M 4140). Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Topics such as power factor, electric motors, relays, magnetic

controllers, programmable logic controllers, solar power, wind power and Basic electrical theory are discussed.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 7220: Material Handling and Conditioning**

(cross-leveled with AG\_S\_M 4220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 7320: Agricultural Equipment and Machinery**

(cross-leveled with AG\_S\_M 4320). Operation of agricultural machinery. Selection and management of equipment.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 7360: Precision Agriculture Science and Technology**

(same as PLNT\_S 7360 and SOIL 7360; cross-leveled with AG\_S\_M 4360, PLNT\_S 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

**Credit Hours:** 3

**Prerequisites:** PLNT\_S 2100 or SOIL 2100, or PLNT\_S 2110; MATH 1100; AG\_S\_M 1040

---

**AG\_S\_M 7365: Machinery Management Using Precision Agriculture Technology**

(cross-leveled with AG\_S\_M 4365). This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipments geographic location and can be recorded simultaneously with the volume of product applied and weather information (wind, temperature, humidity, etc.). GPS guidance is one of the main technologies to be studied throughout this course. The management of this equipment and the GPS technologies used to control and record this information is the focus of the course.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040, and AG\_S\_M 4360 or PLNT\_S 4360 or SOIL 4360

---

**AG\_S\_M 7366: Data Management and Analysis Using Precision Agriculture Technology**

(cross-leveled with AG\_S\_M 4366). Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may

include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040, AG\_S\_M 4360, STAT 1200

---

**AG\_S\_M 7368: Profit Strategies Using Precision Agriculture Technology**

(cross-leveled with AG\_S\_M 4368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm's financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040, AG\_S\_M 4360, STAT 1200

---

**AG\_S\_M 7370: In-Service Course Agriculture Systems Management-Farm Power and Machinery**

A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

**Credit Hour:** 1-8

**Prerequisites:** 10 credits from Agricultural Systems Management courses; a B.S. degree in Agriculture or instructor's consent

---

**AG\_S\_M 7390: Optimization and Management of Food and Agriculture Systems**

(same as F\_S 7390; cross-leveled with AG\_S\_M 4390, F\_S 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 7420: Surface Water Management**

(cross-leveled with AG\_S\_M 4420). Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 7440: Water Quality and Pollution Control**

(cross-leveled with AG\_S\_M 4440). Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

**Credit Hours:** 3

**Prerequisites:** MATH 1100

---

**AG\_S\_M 7460: Irrigation and Drainage**

(cross-leveled with AG\_S\_M 4460). Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**AG\_S\_M 8085: Problems in Agricultural Systems Management**

Supervised individual study at the graduate level.

**Credit Hours:** 3

---

**AG\_S\_M 8090: Thesis Research in Agricultural Systems Management**

Independent investigation to be presented as a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**AG\_S\_M 8340: Agricultural Mechanization Systems**

Review of current literature. Case study of mechanization systems. Computer analysis of management alternatives.

**Credit Hours:** 3

---

**AG\_S\_M 8360: Internet of Things for Precision Agriculture Technology**

Wireless sensor network and communication technologies of precision agriculture systems (tractors, sprayers, combines, trucks, and field equipment) establishing real time cloud synchronization of data. Evaluation of big data (spatial, economics, environmental, imagery) and how statistical tools can be used to analyze this information.

**Credit Hours:** 3

**Prerequisites:** AG\_S\_M 4360, AG\_S\_M 7360

---

**AG\_S\_M 9090: Thesis Research in Agricultural Systems Management**

Independent investigation to be presented as a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

## Agriculture, Food and Natural Resources Courses

**AFNR 1115: Foundations for College Success**

An investigation of principles and practices associated with academic success and the interpersonal challenges encountered in collegiate life. Learning preferences, time investment, study skills, degree requirements, and personal development opportunities available in the College and across campus are explored. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Instructor's consent

---

**AFNR 2115: College to Career: Strategies for Success**

Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

**Credit Hour:** 1

---

**AFNR 2190: International Agriculture and Natural Resources**

This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AFNR 2191: International Agriculture and Natural Resources - Humanities**

This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**AFNR 2191W: International Agriculture and Natural Resources - Humanities - Writing Intensive**

This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**AFNR 2192: International Agriculture/Natural Resources-Social Science**

This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. May be repeated for credit. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**AFNR 2215: Introduction to the Theory and Practice of Sustainable Agriculture**

This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.

**Credit Hours:** 3

---

**AFNR 3215: Community Food Systems**

This course focuses on essential concepts in the research, implementation and understanding of food systems, with topics ranging from micro-level local, community and regional food systems to macro-level global trends in food production and distribution. Students examine the social, economic and health implications of conventional and alternative food systems as well as specific U.S. policies and programs relevant to our present food systems. Particular focus is on the growing proliferation of alternative marketing schemes, food sovereignty issues, and the relationships between community food systems, and contemporary health and nutritional issues.

**Credit Hours:** 3

**Recommended:** AFNR 2215

---

**AFNR 3315: Advanced Practices in Sustainable Agriculture**

Course furthers students' understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life.

**Credit Hours:** 3

**Recommended:** AFNR 2215; SOIL 2100

---

**AFNR 4001: Topics in Agriculture-General**

Topics in Agriculture-General

**Credit Hour:** 1-99

---

**AFNR 4972: Capstone Project in Agriculture, Food and Natural Resources**

A culminating learning experience focused on student's area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** junior or senior standing

---

**AFNR 4993: Internship in Agriculture, Food and Natural Resources**

Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context.

The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit.

Some sections may be graded on either an A-F or S/U basis only.

---

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

**Recommended:** junior or senior standing

---

**AFNR 7190: International Agriculture/Natural Resources**

This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of the course may be offered on A-F or S/U basis only.

**Credit Hour:** 1-9

**Prerequisites:** advisor and instructor's consent

---

## Ancient Mediterranean Studies Courses

**AMS 1005: Undergraduate Topics in Ancient Mediterranean Studies - Humanities**

Special studies in Ancient Mediterranean Studies.

**Credit Hour:** 1

---

**AMS 1050: Greek and Latin in English**

A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

**Credit Hours:** 3

---

**AMS 1060: Classical Mythology**

Myths of Greece and Rome in literature and art.

**Credit Hours:** 3

---

**AMS 1060H: Classical Mythology - Honors**

Myths of Greece and Rome in literature and art.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**AMS 1060HW: Classical Mythology - Honors/Writing Intensive**

Myths of Greece and Rome in literature and art.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**AMS 1060W: Classical Mythology - Writing Intensive**

Myths of Greece and Rome in literature and art.

**Credit Hours:** 3

---

**AMS 1105: Undergraduate Topics in Ancient Mediterranean Studies - Humanities**

Special studies in Ancient Mediterranean Studies.

**Credit Hours:** 3

---

**AMS 1150: The Archaeology of Ancient Lives**

This course introduces the methods and goals of classical archaeology to explore how people lived in the Mediterranean region in the days of

the ancient Egyptians, Greeks, Romans, and their neighbors. Along the way we will study parts of our own contemporary human landscape in Columbia (and maybe learn to look at columns in some unexpected ways). Classes are a combination of lecture, group discussions, and activities. Graded on A-F basis only.

**Credit Hours:** 3

---

**AMS 2005: Topics in Ancient Mediterranean Studies - Humanities**  
Study of special topics in Ancient Mediterranean Studies.

**Credit Hour:** 1-3

---

**AMS 2005H: Topics in Classical Humanities - Honors**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** Honors eligibility required

---

**AMS 2050: Comparative History of Greece and Rome I**

This comparative survey explores the ancient Mediterranean world of Greece and Rome from the age of Homer to the eve of the crisis of the Roman Republic. Topics include the rise of the city-state in Greece and Italy, the formation of democratic and republican constitutions, Greek and Roman imperialism, the Persian and Hannibalic wars, women and the family, slavery and the economy, the formation and context of literary production, and architecture and the ancient city-cape.

**Credit Hours:** 3

---

**AMS 2060: Comparative History of Greece and Rome II**

This comparative survey explores the ancient Mediterranean world of Greece and Rome from the crisis of the Roman Republic (1c BCE) to the eve of the post-Roman Mediterranean (6c CE). Topics include the collapse of the Roman Republic and transition to the Augustan principate, the administrative and economic foundations of the Pax Romana (1-2c CE), the vitality of Greek culture and literature under Roman rule, the imperial army, the family and slavery, Judaism and Christianity, and the transformation of the Roman world into its medieval and Byzantine successors.

**Credit Hours:** 3

---

**AMS 2100: The Ancient Greeks**

This course offers a broad historical and cultural introduction to ancient Greek society. Emphasis is placed on acquainting students with the everyday lives of the men, women and children inhabiting this world and the social, political and technological realities that shaped their lives.

**Credit Hours:** 3

---

**AMS 2100H: Greek Culture - Honors**

Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**AMS 2200: The Ancient Romans**

This course offers a broad historical and cultural introduction to ancient Roman society. Emphasis is placed on acquainting students with the everyday lives of the men, women and children inhabiting this world and the social, political and technological realities that shaped their lives.

**Credit Hours:** 3

---

**AMS 2230: Introduction to the Arts of Islam**

Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.

**Credit Hours:** 3

---

**AMS 2230W: Introduction to the Arts of Islam - Writing Intensive**

Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.

**Credit Hours:** 3

---

**AMS 2300: Greek Classics in Translation**

Reading in translation and critical study of the most important literary works of the ancient Greek World.

**Credit Hours:** 3

---

**AMS 2300H: Greek Classics in Translation - Honors**

Reading in translation and critical study of the most important literary works of the ancient Greek world.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**AMS 2400: Roman Classics in Translation**

Reading in translation and critical study of the most important literary works of the ancient Roman world.

**Credit Hours:** 3

---

**AMS 2410: Ancient Technology**

Engineering, architecture, and military technology in the ancient world.

**Credit Hours:** 3

---

**AMS 2450: The World of Pompeii**

An exploration of various facets of ancient urban and rural life in the Roman world through the exceptionally well-preserved archaeological remains found in and around Pompeii.

**Credit Hours:** 3

---

**AMS 2450H: The World of Pompeii - Honors**

An exploration of various facets of ancient urban and rural life in the Roman world through the exceptionally well-preserved archaeological remains found in and around Pompeii.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

---

**AMS 2500: The Origins of Music in the Ancient World**

Explores the use of music in the earliest historical societies, from the earliest evidence up to the fall of the Roman empire. Topics will include the history of musical instruments, the earliest scores, the development of music theory, the origins of melody, rhythm, and harmony, and the relationship between music, politics, and religion. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** AMS 1060; AMS 2100; AMS 2200

---

**AMS 2600: Media and Communication in Ancient Greece and Rome**

An introduction to communications media in ancient Greece and Rome, from the invention of the alphabet to the fall of the Roman empire. Special attention will be paid to the material bases for communication, the social uses of information, and the relationship between communications technology and political power.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 2700: Black Dionysus: Greek Drama in Africa and the African Diaspora**

In this course, we will focus on one aspect of the reception of Classical literature: the reuse, rewriting, and re-performing of Greek tragedies in Africa and the African diaspora in the 20th and 21st centuries. What accounts for the popularity of the Greek plays and stories among those who have every reason to reject European cultural models? Why do these ancient Greek tragedies still matter, and not only to people of European descent? Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** AMS 1060 or AMS 2100

---

**AMS 2750: Achilles in Vietnam**

This class compares the depiction of warfare in Homer's Iliad with experiences of the U.S. combat soldier in Vietnam. By studying essential selections from Homer's epic alongside accounts of the Vietnam War from the soldiers who fought in it, students will gain an understanding of how the uniquely difficult circumstances of the Vietnam War were damaging to those who served in the front lines of this conflict. Students will also study the significance of race and class divisions in the conflict both at home and overseas and how the Vietnam War is portrayed in film, literature and television.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 2750H: Achilles in Vietnam - Honors**

This class compares the depiction of warfare in Homer's Iliad with experiences of the U.S. combat soldier in Vietnam. By studying essential selections from Homer's epic alongside accounts of the Vietnam War from the soldiers who fought in it, students will gain an understanding of how the uniquely difficult circumstances of the Vietnam War were damaging to those who served in the front lines of this conflict. Students will also study the significance of race and class divisions in the conflict both at home and overseas and how the Vietnam War is portrayed in film, literature and television.

**Credit Hours:** 3

**Prerequisites:** Honors Eligibility required

---

**Recommended:** AMS 1060

---

**AMS 2800: Sports and Spectacles in Greco-Roman Antiquity**

Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life.

**Credit Hours:** 3

**Prerequisites:** AMS 1060 or instructor's consent required

---

**AMS 2940: Service Learning in Classical Studies**

Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements.

**Credit Hour:** 1

**Prerequisites:** instructor's consent required

---

**AMS 2950: Archaeological Methods**

Methods of excavating various types of sites; recording, preserving their materials.

**Credit Hour:** 2-6

**Prerequisites:** instructor's consent

---

**AMS 3000: Foreigners and Dangerous Women in Greek and Latin Literature**

(same as PEA\_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

**Credit Hours:** 3

**Recommended:** CL\_HUM 1060

---

**AMS 3000H: Foreigners and Dangerous Women in Greek and Latin Literature - Honors**

(same as PEA\_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** CL\_HUM 1060

---

**AMS 3000W: Foreigners and Dangerous Women in Greek and Latin Literature - Writing Intensive**

(same as PEA\_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

**Credit Hours:** 3

**Recommended:** CL\_HUM 1060

---

**AMS 3005: Topics in Ancient Mediterranean Studies - Humanities**

Selected studies in various facets of Ancient Mediterranean Studies.

**Credit Hour:** 1-3

---

---

**AMS 3005H: Topics in Classical Humanities - Honors**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3005W: Topics in Classical Humanities - Writing Intensive**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

**Recommended:** AMS 1060

---

**AMS 3025: Ancient Western Philosophy**

(same as PHIL 3000). Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3050H: Philosophy Before Socrates - Honors**

A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3100: The Age of Pericles**

A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3100H: The Age of Pericles - Honors**

A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3120: Art and Gender in Antiquity**

Comparative survey of Egypt, Greece, and Rome, focusing on gender construction and cultural perception through material resources.

**Credit Hours:** 3

---

**AMS 3150: The Age of Augustus**

Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

---

**AMS 3150H: The Age of Augustus - Honors**

Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3210: Near Eastern and Egyptian Art and Archaeology**

General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3225: Roman Comedy, Wit and Humor**

Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid's *Metamorphoses*, Petronius' *Satyricon*, Martial, Juvenal and Macrobius.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3250: Greek and Roman Epic**

A study of the major representatives of the ancient epic genre. Readings will include Homer's *Iliad* and *Odyssey*, Apollonius' *Argonautica*, Vergil's *Aeneid*.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3250H: Greek and Roman Epic - Honors**

A study of the major representatives of the ancient epic genre. Readings will include Homer's *Iliad* and *Odyssey*, Apollonius' *Argonautica*, Vergil's *Aeneid*.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3300: Greek Drama**

Reading and interpretation of Greek tragedies and comedies in translation.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3310: Greek Art and Archaeology**

General survey of material culture in Greece from earliest times to the Hellenistic period.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3350: Advanced Mythology**

Interpretation of selected classical myths and their influence on later literature and art.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

---

**AMS 3350H: Advanced Mythology - Honors**

Interpretation of selected classical myths and their influence on later literature and art.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3400: Murder and Mayhem: Images of Justice in Classical Antiquity**

Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3400W: Murder and Mayhem: Images of Justice in Classical Antiquity - Writing Intensive**

Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3410: Roman Art and Archaeology**

General survey of material culture in the Roman world from earliest times through the 3rd century.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3450: Greek and Roman Characters and Ideals**

Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3450H: Greek and Roman Characters and Ideals - Honors**

Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3510: Byzantine and Islamic Art and Archaeology**

General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3510W: Byzantine and Islamic Art and Archaeology - Writing Intensive**

General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3520: Early Medieval Art and Archaeology**

An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3520W: Early Medieval Art and Archaeology - Writing Intensive**

An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.

**Credit Hours:** 3

**Recommended:** VS\_ARH 1110 or equivalent

---

**AMS 3550: War and Democracy in Late 5th c. BCE Athens**

(same as PEA\_ST 3550). Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3600: The Ancient Novel**

Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3600H: The Ancient Novel - Honors**

Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3650: Paganism and Christianity**

A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3650W: Paganism and Christianity - Writing Intensive**

A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3700: Women in the Ancient World**

Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3750: Classics in a Cross-Cultural Context**

The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

**Credit Hours:** 3

**Recommended:** AMS 1060

---

**AMS 3750H: Classics in a Cross-Cultural Context - Honors**

The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060

---

**AMS 3775: The Ancient World on Film**

(same as FILM\_S 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

**Credit Hours:** 3

**Recommended:** Prior 2000 level coursework in Classical Humanities, Art History and Archaeology, or Film Studies

---

**AMS 3775W: The Ancient World on Film - Writing Intensive**

(same as FILM\_S 3775). This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

**Credit Hours:** 3

**Recommended:** CL\_HUM 1060

---

**AMS 4005: Topics in Classical Humanities**

Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

**Recommended:** AMS 1060 and junior standing

---

**AMS 4100: Greece: From the Bronze Age to the Byzantine Empire**

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Graded on A/F basis only.

**Credit Hours:** 6

**Recommended:** CL\_HUM 1060

---

**AMS 4100H: Greece: From the Bronze Age to the Byzantine Empire - Honors**

Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Participants chosen by instructor. Graded on A/F basis only. Application required.

**Credit Hours:** 6

**Prerequisites:** Honors eligibility required

**Recommended:** CL\_HUM 1060

---

**AMS 4205: Topics in Classical Studies**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

**Credit Hour:** 1-99

**Recommended:** GREEK 2000 and LATIN 2000

---

**AMS 4300: Introduction to Text Criticism and Paleography**

(cross-leveled with AMS 7300). Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

**Credit Hours:** 3

**Recommended:** GREEK 2000 and LATIN 2000

---

**AMS 4320: Archaeology of the Aegean Bronze Age**

(cross-leveled with AMS 7320). Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4340: Greek Cities and Sanctuaries**

(cross-leveled with AMS 7340). Survey of the built environment in the Aegean and the Classical world from Neolithic through the Hellenistic period.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4350: Greek Pottery**

(cross-leveled with AMS 7350). Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4360: Greek Sculpture**

(cross-leveled with AMS 7360). Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

---

**AMS 4400: Ancient Pastoral**

(cross-leveled with AMS 7400). Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

**Credit Hours:** 3

**Recommended:** GREEK 4300 and LATIN 4300

---

**AMS 4420: Minor Arts of Antiquity**

(cross-leveled with AMS 7420). Discussion of selected minor arts and crafts of the Greco-Roman world.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4440: Roman Architecture**

(cross-leveled with AMS 7440). The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4460: Roman Sculpture**

(cross-leveled with AMS 7460). The origins and development of sculpture in the Roman Republic and the Roman Empire.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4490: Late Antique Art and Archaeology**

(cross-leveled with AMS 7490). Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4500: Greek and Roman Religion**

(same as REL\_ST 4500). Survey of religious development among the Greeks and Romans.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4500H: Greek and Roman Religion - Honors**

(same as REL\_ST 4500). Survey of religious development among the Greeks and Romans.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060 and junior standing

---

**AMS 4510: Byzantine Art and Archaeology**

(cross-leveled with AMS 7510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4520: Art and Archaeology of Early Medieval Europe**

(cross-leveled with AMS 7520). Exploration of the material culture of western Europe from the 5th century to c. 1000.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4550: Literature and Culture of the Hellenistic Age**

(cross-leveled with AMS 7550). A survey of the literature and culture of the Hellenistic Age.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4550H: Literature and Culture of the Hellenistic Age - Honors**

A survey of the literature and culture of the Hellenistic Age.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060 and junior standing

---

**AMS 4600: The Classical Tradition**

(cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4600H: The Classical Tradition - Honors**

(cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060 and junior standing

---

**AMS 4600HW: The Classical Tradition - Honors/Writing Intensive**

(cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4600W: The Classical Tradition - Writing Intensive**

(cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.

**Credit Hours:** 3

**Recommended:** AMS1060 and junior standing

---

**AMS 4650: The World of Late Antiquity**

(cross-leveled with AMS 7650). A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4650H: The World of Late Antiquity - Honors**

A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060 and junior standing

---

**AMS 4700: Advanced Study in the Teaching of the Classics**

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4770: Oral Tradition**

Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4770H: Oral Tradition - Honors**

Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** AMS 1060 and junior standing

---

**AMS 4800: Political Thought in Classical and Christian Antiquity**

(same as POL\_SC 4800, CNST\_DEM 4800; cross-leveled with AMS 7800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**AMS 4960: Special Readings in Ancient Mediterranean Studies**

Independent readings and research selected in consultation with supervisory faculty.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**AMS 4970: Capstone: Ancient Mediterranean Studies**

Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.

**Credit Hour:** 1

**Prerequisites:** instructor's consent

---

**AMS 4970H: Capstone in Ancient Mediterranean Studies - Honors**

Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors.

**Credit Hours:** 3

**Prerequisites:** instructor's consent. Honors eligibility required

---

**AMS 4995H: Honors Proseminar in Classical Studies**

Limited to Honors undergraduates. To be taken in senior year. Integrated exploration of classical civilization. May repeat to 6 hours maximum.

**Credit Hour:** 3-6

**Prerequisites:** Honors eligibility required

**Recommended:** Senior standing

---

**AMS 4996: Honors Proseminar I**

Research methods, bibliography, use and criticism of source material.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 4996H: Honors Proseminar I**

Research methods, bibliography, use and criticism of source material.

**Credit Hours:** 3

**Prerequisites:** instructor's consent; Honors eligibility required

---

**AMS 4999: Honors Reading and Research I**

Individual research projects in preparation of senior thesis.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7000: Introduction to Graduate Study in Classics**

Required of all first-year graduate students.

**Credit Hour:** 1

---

**AMS 7005: Topics in Ancient Mediterranean Studies**

Special studies in Ancient Mediterranean Studies; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 7100: History of the Greek and Latin Languages**

(same as LINGST 7130; cross-levelled with CLASS 4100, LINGST 4130). Evolution of classical languages and their relationship to each other.

**Credit Hours:** 3

---

**AMS 7205: Topics in Classical Studies**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

**Credit Hour:** 1-99

---

**AMS 7250: The Classical Avant-Garde**

This course offers in depth study of the uses made of classical culture by proponents of various avant-garde movements from the 1850s to the present. Combines interrogations of the history and practice of the avant-garde and the theory of classical reception with close reading of exemplary texts.

**Credit Hours:** 3

---

**AMS 7300: Introduction to Text Criticism and Paleography**

(cross-leveled with AMS 4300). Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library.

**Credit Hours:** 3

**Prerequisites:** 2 years of Classical Languages or equivalent

---

**AMS 7320: Archaeology of the Aegean Bronze Age**

(cross-leveled with AMS 4320). Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7340: Greek Cities and Sanctuaries**

(cross-leveled with AMS 4340). Survey of the built environment in the Aegean and the Classical world from Neolithic through the Hellenistic period.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7350: Greek Pottery**

(cross-leveled with AMS 4350). Examination of pottery and vase painting with an emphasis on production, iconography, and social context.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7360: Greek Sculpture**

(cross-leveled with AMS 4360). Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7420: Minor Arts of Antiquity**

(cross-leveled with AMS 4420). Discussion of selected minor arts and crafts of the Greco-Roman world.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7440: Roman Architecture**

(cross-leveled with AMS 4440). The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7460: Roman Sculpture**

(cross-leveled with AMS 4460). The origins and development of sculpture in the Roman Republic and the Roman Empire.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7490: Late Antique Art and Archaeology**

(cross-leveled with AMS 4490). Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7510: Byzantine Art and Archaeology**

(cross-leveled with AMS 4510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7520: Art and Archaeology of Early Medieval Europe**

(cross-leveled with AMS 4520). Exploration of the material culture of western Europe from the 5th century to c. 1000.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 7550: Literature and Culture of the Hellenistic Age**

(cross-leveled with AMS 4550). A survey of the literature and culture of the Hellenistic Age. Graded on A-F basis only.

**Credit Hours:** 3

---

**AMS 7600: The Classical Tradition**

(cross-leveled with AMS 4600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times. Graded on A-F basis only.

**Credit Hours:** 3

---

**AMS 7650: The World of Late Antiquity**

(cross-leveled with AMS 4650). A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.

**Credit Hours:** 3

---

**AMS 7700: Advanced Study in the Teaching of the Classics**

**Credit Hours:** 3

**Prerequisites:** classroom teaching experience or chairman's consent

---

**AMS 7800: Political Thought in Classical and Christian Antiquity**

(cross-leveled with POL\_SC 4800, AMS 4800, CNST\_DEM 4800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations. Graded on A-F basis only.

**Credit Hours:** 3

---

**AMS 7940: Archaeological Methods**

(cross-leveled with AMS 4940). Methods of excavating various types of sites; recording, preserving their materials.

**Credit Hour:** 2-6

**Prerequisites:** instructor's consent

---

**AMS 7960: Special Readings in Classical Studies**

Readings in authors and texts not covered in other courses.

**Credit Hour:** 1-3

**Prerequisites:** graduate standing and classics/classical humanities; departmental consent; Greek--two years classical Greek or equivalent; Latin--two years Classical Latin or equivalent

---

**AMS 8080: Readings for MA Thesis in Ancient Mediterranean Studies**

Reading, critical evaluation of literature of special fields of art history and/or archaeology.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 8085: Directed Readings in Ancient Mediterranean Studies**

For graduate students to undertake special projects for graduate credit under the supervision of faculty.

**Credit Hours:** 3

---

**AMS 8090: Master's Thesis Research and Thesis**

Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 8320: Seminar in Greek Art and Archaeology**

Special subjects of study assigned for individual research; discussion of reports by seminar members.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 8420: Seminar in Roman Art and Archaeology**

Special subjects of study assigned for individual research; discussion of reports by seminar members.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 8440: Ancient/Medieval Topography**

Descriptive and historical analysis of a selected city or site. Subject varies.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 8490: Seminar in Late Antique Art and Archaeology**

Special subjects of study assigned for individual research; discussion of reports by seminar members.

**Credit Hours:** 3

**Prerequisites:** AMS 7490 or equivalent

---

**AMS 9080: Readings for PhD Dissertation in Ancient Mediterranean Studies**

Reading, critical evaluation of literature of special fields of Ancient Mediterranean Studies.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 9090: Doctoral Dissertation Research in Ancient Mediterranean Studies**

Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AMS 9187: Seminar in Classical Mythology**

Intensive study of classical mythology in origin, development, meaning and influence.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AMS 9387: Seminar in Ancient Rhetoric and Oratory**

Seminar in Ancient Rhetoric and Oratory

**Credit Hours:** 3

---

**AMS 9487: Seminar in Ancient Literary Criticism**

Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject.

**Credit Hours:** 3

---

**AMS 9587: Greco-Roman Didactic**

Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age.

**Credit Hour:** 3-6

---

**AMS 9887: Seminar in the Age of the Antonines**

Seminar in the Age of the Antonines

**Credit Hour:** 3-6

---

**Anesthesiology Courses**

**ANESTH 6057: Springfield Anesthesiology 4Wk**

The fourth-year anesthesia medical student will work as part of a team providing hands-on clinical services in an inpatient, outpatient, and consultative setting. Students will participate in daily morning conferences and mini- didactic sessions.

**Credit Hours:** 5

**Prerequisites:** Successful completion of 5 of 7 core clerkships, including Surgery clerkship

---

**ANESTH 6203: ABS Anesthesiology Research**

ABS Anesthesiology Research

**Credit Hour:** 5-10

---

---

**ANESTH 6205: ABS Anesthesiology Research and Review**

ABS Anesthesiology Research and Review

**Credit Hour:** 5-10

---

**ANESTH 6400: Anesthesiology**

Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g. the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system). 2. Learn how to think and react quickly and correctly in times of stress. 3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g. insertion of endotracheal tubes, intravenous catheters). 5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career. Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected. Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesia as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient's anesthetic, and a 50 question written examination at the end of the rotation.

**Credit Hours:** 5

---

**ANESTH 6927: Anesthesiology Two-Week**

Through daily participation, students will gain insight into the specialty of anesthesiology and will develop an appreciation for the integration of basic science knowledge (especially anatomy, physiology, and pharmacology) in the clinical care of patients.

**Credit Hours:** 2

**Prerequisites:** successful completion of the first two years of medical school

---

## Animal Science Courses

**AN\_SCI 1001: Topics in Animal Science**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

**Credit Hour:** 1-4

---

**AN\_SCI 1002: Topics in Animal Science- Lab**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

**Credit Hour:** 1-4

---

**AN\_SCI 1010: Orientation to Animal Sciences**

This course is designed to introduce students to the field of animal sciences, opportunities within this field, and an array of campus resources. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Restricted to Animal Sciences majors or consent required

---

**AN\_SCI 1011: Introduction to Animal Sciences**

An introductory course for non animal sciences majors discussing the principles of animal sciences including the importance of animal agriculture, genetics, anatomy, physiology and nutrition.

**Credit Hours:** 4

---

**AN\_SCI 1011H: Animal Science - Honors**

Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**AN\_SCI 1012: Introduction to Captive Wild Animal Management**

(same as F\_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

**Credit Hours:** 3

---

**AN\_SCI 1013: Biotechnology in Animal Agriculture**

Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A-F basis only.

**Credit Hours:** 3

---

**AN\_SCI 1164: Biology of Animal Production I**

This is an introductory course; a companion to Biology of Animal Production II. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. This course is for non-Animal Sciences majors. No credit may be earned if taken after AN\_SCI 1165. Graded on A-F basis only.

**Credit Hours:** 3

---

**AN\_SCI 1165: Biology of Animal Production I with Laboratory**

This is an introductory course; a companion to Biology of Animal Production II. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. The laboratory section of the course will provide hands on experience with livestock. Only 1 credit may be earned if taken after AN\_SCI 1164. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** This course is restricted to Animal Sciences students or requires consent

---

**AN\_SCI 1165H: Biology of Animal Production I with Laboratory - Honors**

This is an introductory course; a companion to Biology of Animal Production II. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. The laboratory section of the course will provide hands on experience with livestock. Only 1 credit may be earned if taken after AN\_SCI 1164. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** This course is restricted to Animal Sciences students or requires consent. Honors eligibility required

---

**AN\_SCI 1174: Biology of Animal Production II**

This is an introductory course; a companion to Biology of Animal Production I. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. Graded on A-F basis only. This section is open to all majors. No credit may be earned if taken after AN\_SCI 1175.

**Credit Hours:** 3

---

**AN\_SCI 1175: Biology of Animal Production II with Lab**

This is an introductory course; a companion to Biology of Animal Production I. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. The laboratory section of the course will provide hands on experience with livestock. Only 1 credit may be earned if taken after AN\_SCI 1174. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** This course is restricted to Animal Sciences students or requires consent

---

**AN\_SCI 1175H: Biology of Animal Production II with Lab - Honors**

This is an introductory course; a companion to Biology of Animal Production I. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. The laboratory section of the course will provide hands on experience with livestock. Only 1 credit may be earned if taken after AN\_SCI 1174. Graded on A-F basis only. Honors eligibility required

**Credit Hours:** 4

**Prerequisites:** This course is restricted to Animal Sciences students or requires consent

---

**AN\_SCI 2001: Topics in Animal Science**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

**Credit Hour:** 1-4

---

**AN\_SCI 2002: Topics in Animal Science- Lab**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

**Credit Hour:** 1-4

---

**AN\_SCI 2010: Careers in Animal Sciences**

This course is designed to explore the breadth and depth of careers in animal sciences. Students will develop a professional resume, practice interviewing skills, and assess the value of a job offer. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Restricted to Animal Sciences majors or consent required

---

**AN\_SCI 2045: Equine Practicum**

Focus on learning hands-on equine skills through the care of horses at the university's equine facility. Experiential learning is emphasized. Skills include: how to identify the general health and well-being of horses, recognize early onset of illness or lameness, understand basic feeding, housing, and daily care, and demonstrate the ability to handle and feed horses in a safe manner. Monthly meetings, scheduled feed shifts, monthly journals, required skill assessments, and attendance at various educational activities are required. Feed shift scheduling is determined around individual availability and no equine or animal experience is required. To enroll, students should contact the instructor for an application. Graded on A-F basis only.

**Credit Hour:** 1-2

**Prerequisites:** Instructor consent required

---

**AN\_SCI 2085: Problems in Animal Science**

Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**AN\_SCI 2090: Foal Training Practicum**

This class focuses on practical skills associated with training and handling of foals (horses less than 6 months of age). During this class, students will gain experience in behavior modification strategies for horses. Students will work alongside the instructor to teach foals basics of haltering, leading, desensitization and ground manners. Training techniques will focus on safe and non-traumatic methods of teaching horses. No equine or training experience is necessary! Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** instructor's consent

**Recommended:** AN\_SCI 2045

---

**AN\_SCI 2095: Equine Behavior and Training**

Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training. Cannot be taken at the same time as AN\_SCI 2195. Enrollment is limited to students who have completed AN\_SCI 1065, AN\_SCI 1001, or AN\_SCI 1175.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**AN\_SCI 2110: Global Animal Agriculture**

Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors.

**Credit Hours:** 2

**Prerequisites:** sophomore standing

---

**AN\_SCI 2111: Sophomore Seminar: Societal Issues Facing Animal Agriculture**

Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**AN\_SCI 2111W: Sophomore Seminar: Societal Issues Facing Animal Agriculture - Writing Intensive**

Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**AN\_SCI 2112: Livestock and Literature**

The human fascination with animals is documented throughout history. The impact of domesticated animals, and the livestock industry, on the human condition has been the focus of numerous authors across diverse literary genres. The care we provide for animals reflects the value we place on life, and often how we view society. This course will explore these themes while using varied fictional and non-fictional texts written in the 20th century.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**AN\_SCI 2115: Livestock Judging**

Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required

---

**AN\_SCI 2116: Animal Welfare Evaluation**

Comparative evaluation of 4 animal welfare scenarios related to farm, zoo, lab, and exotic species. Welfare decisions are based on data and modern scientific literature. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**AN\_SCI 2131: Dairy Products Evaluation**

(same as F\_S 2131) Sensory Evaluation and judging of dairy products.

**Credit Hours:** 2

---

**AN\_SCI 2140: Companion Animals**

(same as BIOMED 2140). Companion animals form an important part of our society. They serve us, provide companionship and many become members of our families. This class focuses primarily on dogs, cats, and horses. Topics covered include: the pet industry, breeds, wellness, management, care, training, zoonotic diseases, evolution and domestication, toxicology, nutrition, reproduction, genetics, human animal interactions, companion animal enterprise, and biomedical research. Students may enroll in one of two sections: service learning section or traditional course section.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

**AN\_SCI 2146: Introduction to Animal Behavior**

Explore animal behavior in domestic, zoo, and wild animals through a scientific approach. This course will begin with traditional animal behavior theories and move into the application of animal behavior in modern situations. Students will finish this course with an understanding of the foundational concepts in animal behavior and be able to apply those concepts to the animals around them. Graded on A-F basis only.

**Credit Hours:** 3

---

**AN\_SCI 2187: Introduction To Foaling**

This class focuses on practical skills associated with parturition and neonatal care of horses. Topics include identifying signs of impending parturition, creating action plans for problems during foaling, monitoring of benchmarks during the pre- and post-natal period, and assisting with neonatal care of foals. Students will gain hands on experience in each of these areas while assisting with foaling of mares at the Division of Animal Sciences Equine Teaching Facility. Enrollment is limited to students who have completed AN\_SCI 2045. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Instructor's Consent

---

**AN\_SCI 2195: Equine Facility Management and Marketing**

Focuses on learning equine facility management through student care and management of the University's equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Cannot be taken at the same time as AN\_SCI 2095. Enrollment is limited to students with Sophomore standing or higher. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**AN\_SCI 2214: Animal Products and Biotechnology**

This course is designed to explore the variety of products that humans derive from animals for nutrition, fiber, and health and includes a laboratory session that promotes the working knowledge of methods for measuring animal product quality. Students will also assess factors related to consumer demand that influence the value of animal products. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Animal Sciences majors or instructor's consent

---

**AN\_SCI 2244: Introduction to Comparative Anatomy with Lab**

Introduction into the vertebrate body structure and function, with an emphasis in the direct comparison between humans and non-human animals including but not limited to cattle, horses, swine, poultry, and rodents. Course topics include: cells and tissues, skeletal system, muscles and muscle tissue. This course will also touch on the cardiovascular system, the senses, respiratory system and animals as models of human disorders and diseases. Internet access required: lectures and portions of material will be online. On-campus laboratory meetings will allow students to explore various systems and gain experiential learning opportunities through manipulation, dissection, evaluation and use of Anatomy In Clay models to deepen the understanding of the material. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Freshmen or Sophomore standing

---

**AN\_SCI 3001: Topics in Animal Science**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

**Credit Hour:** 1-4

---

**AN\_SCI 3002: Topics in Animal Science- Lab**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

**Credit Hour:** 1-4

---

**AN\_SCI 3010: Graduate Experience Program**

This course is designed to give undergraduates insight into the graduate student experience and to provide background knowledge in the various aspects of graduate level research as well as the application process for graduate school.

**Credit Hour:** 1

**Prerequisites:** Consent required

---

**AN\_SCI 3085: Problems in Animal Science**

Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**AN\_SCI 3085W: Problems in Animal Science - Writing Intensive**

Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**AN\_SCI 3190: Study Abroad: International Meat, Dairy and Enology**

(same as F\_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AN\_SCI 3213: Genetics of Agricultural Plants and Animals**

(same as PLNT\_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: MATH 1100 or higher and one of the following: BIO\_SC 1100 or BIO\_SC 1200 or BIO\_SC 1500 or FW 1100.

**Credit Hours:** 3

---

**AN\_SCI 3214: Principles of Meat Science**

(same as F\_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

**Credit Hours:** 3

**Recommended:** one course in Biology

---

**AN\_SCI 3231: Principles of Dairy Foods Science**

(same as F\_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

**Credit Hours:** 3

**Recommended:** One course in Chemistry or Biological Sciences

---

**AN\_SCI 3242: Principles and Applications of Animal Nutrition**

Fundamentals of animal nutrition, including digestion, absorption, metabolism, and function of nutrients; nutrient and energy requirements; feedstuffs used in livestock and companion animal nutrition; and integration of these principles with nutrition-based calculations to make nutritional management decisions. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** MATH 1100 or higher, CHEM 1320 or higher, Sophomore standing or higher

---

---

**AN\_SCI 3253: Physiology of Domestic Animals- All Majors**

Course covers basic concepts of physiology and anatomy in vertebrate animals.

**Credit Hours:** 4

**Prerequisites:** Sophomore standing or higher. 4 credit section is open to all majors

**Recommended:** BIO\_SC 1500 or F\_W 1100, CHEM 1320, and MATH 1100 are strongly recommended. Students would also benefit from prior completion of CHEM 1330, CHEM 2030 (or 2100), and/or BIO\_CHEM 3630

---

**AN\_SCI 3254: Physiology of Domestic Animals**

Course covers basic concepts of physiology and anatomy in vertebrate animals.

**Credit Hours:** 5

**Prerequisites:** Sophomore standing or higher. 5 credit section (with lab) is restricted to Animal Sciences Majors Only

**Recommended:** BIO\_SC 1500 or F\_W 1100, CHEM 1320, and MATH 1100 are strongly recommended. Students would also benefit from prior completion of CHEM 1330, CHEM 2030 (or 2100), and/or BIO\_CHEM 3630

---

**AN\_SCI 3254H: Physiology of Domestic Animals - Honors**

Course covers basic concepts of physiology and anatomy in vertebrate animals.

**Credit Hours:** 5

**Prerequisites:** BIO\_SC 1100 or BIO\_SC 1500 or F\_W 1100; CHEM 1320; Honors eligibility required. 5 credit section (with lab) is restricted to Animal Sciences majors

**Recommended:** CHEM 1330; CHEM 2030 or CHEM 2100

---

**AN\_SCI 3264: Physiology of Domestic Animals II**

Advanced study of selected topics and systems in domestic animal physiology. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3254 or BIO\_SCI 3700 or MPP 3202 or equivalent physiology course

**Recommended:** Foundational courses in biology and chemistry

---

**AN\_SCI 3275: Meat Animal Evaluation**

Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**AN\_SCI 4001: Topics in Animal Science**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

**Credit Hour:** 1-4

**Prerequisites:** instructor's consent

---

**AN\_SCI 4001W: Topics in Animal Science - Writing Intensive**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

**Credit Hour:** 1-4

**Prerequisites:** instructor's consent

---

**AN\_SCI 4010: Pasture-Based Dairy Management**

(cross-leveled with AN\_SCI 7010). The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Materials from this class are also cross-species related where information can be used on other ruminant type operations. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** restricted to Junior and Seniors

**Recommended:** Background in dairy production, nutrition and reproductive physiology for Animal Science students or plant physiology and forage production for Plant Science students

---

**AN\_SCI 4010W: Pasture-Based Dairy Management - Writing Intensive**

(cross-leveled with AN\_SCI 7010). The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Materials from this class are also cross-species related where information can be used on other ruminant type operations. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** restricted to Junior and Seniors

**Recommended:** Background in dairy production, nutrition and reproductive physiology for Animal Science students or plant physiology and forage production for Plant Science students

---

**AN\_SCI 4011: Pasture Based Dairy Management Lab**

(cross-leveled with AN\_SCI 7011). This course is a hands-on experience class taught over 4 days during spring break. The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Students will have the opportunity to interact with successful pasture-based dairy producers in Missouri and apply their experience from AN\_SCI 4010 on real farm situations. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites or Corequisites:** AN\_SCI 4010

---

**AN\_SCI 4012: Elements of Experimental Surgery**

(cross-leveled with AN\_SCI 7012). This course implements the basics of surgery techniques as well as the laws and regulations governing the privilege of using vertebrate animals in research. Consideration for

enrollment will be given first to graduate students. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Instructor's consent

---

**AN\_SCI 4312: Monogastric Nutrition**

(same as NEP 4020; cross-leveled with AN\_SCI 7312 and NUTRIT 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3242

---

**AN\_SCI 4314: Physiology of Reproduction**

(cross-leveled with AN\_SCI 7314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700

---

**AN\_SCI 4314H: Physiology of Reproduction - Honors**

Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700. Honors eligibility required

---

**AN\_SCI 4323: Applied Livestock Genetics**

(cross-leveled with AN\_SCI 7323). Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Math Reasoning Proficiency Course.

**Credit Hours:** 2

**Prerequisites or Corequisites:** AN\_SCI 3213 or PLNT\_S 3213 or BIO\_SCI 2200 or F\_W 2500

**Prerequisites:** MATH 1100 or higher

---

**AN\_SCI 4324: Genomics of Plants and Animals**

(cross-leveled with AN\_SCI 7324). Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

**Credit Hours:** 2

**Prerequisites or Corequisites:** AN\_SCI 3213 or PLNT\_S 3213 or equivalent

**Prerequisites:** BIO\_SC 1010 and BIO\_SC 1020 or BIO\_SC 1500 or F\_W 1100; MATH 1100

---

**AN\_SCI 4332: Ruminant Nutrition**

(cross-leveled with AN\_SCI 7332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242

---

**AN\_SCI 4354: Physiology and Biochemistry of Muscle as Food**

(same as F\_S 4354; cross-leveled with AN\_SCI 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 2001 or AN\_SCI 2214 or AN\_SCI 2114 or AN\_SCI 3214 or F\_S 3214 or AN\_SCI 3231 or F\_S 3231

**Recommended:** Any Biochemistry or Organic Chemistry course

---

**AN\_SCI 4384: Reproductive Management**

(cross-leveled with AN\_SCI 7384). Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies. Enrollment is restricted to students with senior standing that have completed or are currently enrolled in AN\_SCI 4314.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 4314

**Prerequisites:** Instructor's consent

---

**AN\_SCI 4385: Reproductive Management Laboratory**

(cross-leveled with AN\_SCI 7385). This laboratory is complementary to the reproductive management course (AN\_SCI 4384). The objective of this laboratory is to provide hands on experience with semen handling, artificial insemination, embryo manipulation, and pregnancy diagnosis.

**Credit Hour:** 1

**Prerequisites:** Instructor's consent

**Corequisites:** AN\_SCI 4384

---

**AN\_SCI 4386: Equine Reproduction**

Focuses on reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Graded on A-F basis only. Students will not receive credit if taken after AN\_SCI 4387.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 4314 and instructor's consent

---

**AN\_SCI 4387: Equine Breeding Management**

Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas. Students will receive 2 credits if taken after AN\_SCI 4386.

**Credit Hours:** 5

**Prerequisites:** AN\_SCI 4314 and instructor's consent

---

**AN\_SCI 4436: Animal Welfare**

This course is a comprehensive assessment of animal welfare. Topics will cover livestock, lab, zoo, and companion animal welfare by considering their physiology, behavior, and affective state. The course begins with a description of the scientific and theoretical framework underlying welfare and moves throughout the semester by applying the science to different species. Students will be responsible for producing

an educational deliverable item during the semester which will assist students by building on their understanding of animal welfare and will reflect the learning objectives of this course. Graded on A-F basis only. Prerequisites: Students must have taken and passed with grade of C or better in: AN\_SCI 1011 or AN\_SCI 1165 or AN\_SCI 1175 or AN\_SCI 1012 or F\_W 1012 and AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700 prior to the start of this course.

**Credit Hours:** 4

---

#### **AN\_SCI 4437: Stress Physiology**

This online course will provide a general understanding of internal and external stress conditions that animals face throughout life. Since stress physiology can be expanded into many far-reaching and different areas, we will focus on specific topics that have a historical background and, at the same time, are pertinent in today's world. We will examine basic concepts of how stressors are received by the body and how it responds in both healthy and pathological situations. You will be able to relate many of the situations discussed in class to life events. In the end, you will acquire a better understanding of external, environmental and internal stressors and why we need some of them for normal growth and development. Finally, you will learn to apply concepts gained in this class to actual research presented in the scientific literature, and apply this ability to real-world scenarios in the future.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254, MPP 3202, or BIO\_SC 3700

---

#### **AN\_SCI 4910: Senior Seminar in Captive Wild Animal Management**

(same as F\_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded A-F only.

**Credit Hour:** 1

**Prerequisites:** AN\_SCI 1012 or F\_W 1012 or instructor's consent; junior or senior standing

---

#### **AN\_SCI 4940: Internship in Animal Science & Technology**

Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Graded on an S/U basis only.

**Credit Hour:** 1-12

**Prerequisites:** instructor's consent

---

#### **AN\_SCI 4950: Undergraduate Research in Animal Science**

Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.

**Credit Hour:** 1-3

**Prerequisites:** At least sophomore standing or instructor's consent

---

#### **AN\_SCI 4973: Molecular and Cellular Techniques in Animal Science**

A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper.

**Credit Hours:** 4

**Prerequisites:** instructor's consent

---

**Recommended:** an introductory course in biology and a course in organic chemistry, at least junior standing

---

#### **AN\_SCI 4975: Beef Production and Management**

(cross-leveled with AN\_SCI 7975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1165 or AN\_SCI 1001 or AN\_SCI 1065 and AN\_SCI 2165; AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242; AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 3213

**Recommended:** AN\_SCI 4314

---

#### **AN\_SCI 4975W: Beef Production and Management - Writing Intensive**

(cross-leveled with AN\_SCI 7975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle. Recommended: AN\_SCI 4314

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1165 or AN\_SCI 1001 or AN\_SCI 1065 and AN\_SCI 2165; AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242; AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 3213

---

#### **AN\_SCI 4976: Dairy Production**

(cross-leveled with AN\_SCI 7976). Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1065 and AN\_SCI 2165, or AN\_SCI 1065 and AN\_SCI 1001, or AN\_SCI 1065 and AN\_SCI 1165, or AN\_SCI 1165, or AN\_SCI 1001; AN\_SCI 3212 and AN\_SCI 3232, or AN\_SCI 3001, or AN\_SCI 3242; or instructor's consent

---

#### **AN\_SCI 4976W: Dairy Production - Writing Intensive**

(cross-leveled with AN\_SCI 7976). Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1065 and AN\_SCI 2165, or AN\_SCI 1065 and AN\_SCI 1001, or AN\_SCI 1065 and AN\_SCI 1165, or AN\_SCI 1165; AN\_SCI 3212 and AN\_SCI 3232, or AN\_SCI 3001, or AN\_SCI 3242; or instructor's consent

---

#### **AN\_SCI 4977: Horse Production**

(cross-leveled with AN\_SCI 7977). Systems of horse production: breeding, feeding and management of horses.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1001 or AN\_SCI 1175 or AN\_SCI 1065 and AN\_SCI 2175; AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242; or instructor's consent

---

#### **AN\_SCI 4978: Swine Production**

(cross-leveled with AN\_SCI 7978). Systems of pork production: breeding, feeding, management of commercial and purebred swine.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3212 or AN\_SCI 3242 or AN\_SCI 3001 or instructor's consent

**Prerequisites:** AN\_SCI 1065 and AN\_SCI 2175, or AN\_SCI 1065 and AN\_SCI 1001, or AN\_SCI 1065 and AN\_SCI 1175, or AN\_SCI 1001, or AN\_SCI 1175, or instructor's consent

**Recommended:** AN\_SCI 4314 and AN\_SCI 3213

---

**AN\_SCI 4978W: Swine Production - Writing Intensive**

Systems of pork production: breeding, feeding, management of commercial and purebred swine.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3212 or AN\_SCI 3242 or AN\_SCI 3001 or instructor's consent

**Prerequisites:** AN\_SCI 1065 and AN\_SCI 2175, or AN\_SCI 1065 and AN\_SCI 1001, or AN\_SCI 1065 and AN\_SCI 1175, or AN\_SCI 1001, or AN\_SCI 1175, or instructor's consent

**Recommended:** AN\_SCI 4314 and AN\_SCI 3213

---

**AN\_SCI 4979: Poultry Production**

(cross-leveled with AN\_SCI 7979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1001 or AN\_SCI 1175 or AN\_SCI 1065 and AN\_SCI 2175; AN\_SCI 3001 or AN\_SCI 3232 or AN\_SCI 3242; or instructor's consent

---

**AN\_SCI 4979W: Poultry Production Writing Intensive**

(cross-leveled with AN\_SCI 7979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1001 or AN\_SCI 1175 or AN\_SCI 1065 and AN\_SCI 2175; AN\_SCI 3001 or AN\_SCI 3232 or AN\_SCI 3242; or instructor's consent

---

**AN\_SCI 7001: Topics in Animal Science**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

**Credit Hour:** 1-4

**Prerequisites:** instructor's consent

---

**AN\_SCI 7010: Pasture-Based Dairy Management**

(cross-leveled with AN\_SCI 4010). The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Materials from this class are also cross-species related where information can be used on other ruminant type operations. Graded on A-F basis only.

**Credit Hours:** 2

**Recommended:** Background in dairy production, nutrition and reproductive physiology for Animal Science students or plant physiology and forage production for Plant Science students

---

**AN\_SCI 7011: Pasture Based Dairy Management Lab**

(cross-leveled with AN\_SCI 4011). This course is a hands-on experience class taught over 4 days during spring break. The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Students will have the opportunity to interact with successful pasture-based dairy producers in Missouri and apply their experience from AN\_SCI 7010 on real farm situations. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites or Corequisites:** AN\_SCI 7010

---

**AN\_SCI 7012: Elements of Experimental Surgery**

(cross-leveled with AN\_SCI 4012). This course implements the basics of surgery techniques as well as the laws and regulations governing the privilege of using vertebrate animals in research. Consideration for enrollment will be given first to graduate students. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Instructor's consent

---

**AN\_SCI 7312: Monogastric Nutrition**

(same as NUTRIT 7020, NEP 7020; cross-leveled with NEP 4020, AN\_SCI 4312). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3242

---

**AN\_SCI 7314: Physiology of Reproduction**

(cross-leveled with AN\_SCI 4314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3254 or BIO\_SC 3700 or MPP 3202

---

**AN\_SCI 7323: Applied Livestock Genetics**

(cross-leveled with AN\_SCI 4323). Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems.

**Credit Hours:** 2

**Prerequisites or Corequisites:** AN\_SCI 3213 or PLNT\_S 3213 or BIO\_SC 2200 or F\_W 2500

**Prerequisites:** MATH 1100

---

**AN\_SCI 7324: Genomics of Plants and Animals**

(cross-leveled with AN\_SCI 4323). Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3213 or PLNT\_S 3213 or equivalent

**Prerequisites:** BIO\_SC 1010 and BIO\_SC 1020 or BIO\_SC 1500 or F\_W 1100; MATH 1100

---

**AN\_SCI 7332: Ruminant Nutrition**

(cross-leveled with AN\_SCI 4332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242

---

**AN\_SCI 7344: Processing Muscle Foods**

(same as F\_S 7344; cross-leveled with AN\_SCI 4344, F\_S 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

**Credit Hours:** 3

**Prerequisites:** one Chemistry course

---

**AN\_SCI 7354: Physiology and Biochemistry of Muscle as Food**

(same as F\_S 7354; cross-leveled with AN\_SCI 4354, F\_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 2001 or AN\_SCI 2214 or AN\_SCI 2114 or AN\_SCI 3214 or F\_S 3214 or AN\_SCI 3231 or F\_S 3231

**Recommended:** Any Biochemistry or Organic Chemistry course

---

**AN\_SCI 7384: Reproductive Management**

(cross-leveled with AN\_SCI 4384). Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 7314

**Prerequisites:** Instructor's consent

---

**AN\_SCI 7385: Reproductive Management Laboratory**

This laboratory course is to provide hands on experience with semen handling, artificial insemination, embryo manipulation and pregnancy diagnosis. Laboratory is complementary to the Reproductive Management course (AN\_SCI 7384).

**Credit Hour:** 1

**Corequisites:** AN\_SCI 7384

---

**AN\_SCI 7975: Beef Production and Management**

(cross-leveled with AN\_SCI 4975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1165 or AN\_SCI 1001 or AN\_SCI 1065 and AN\_SCI 2165; AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242; AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 3213

**Recommended:** AN\_SCI 4314

---

**AN\_SCI 7976: Dairy Production**

(cross-leveled with AN\_SCI 4976). Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1065 and AN\_SCI 2165, or AN\_SCI 1065 and AN\_SCI 1001, or AN\_SCI 1065 and AN\_SCI 1165, or AN\_SCI 1165; AN\_SCI 3212 and AN\_SCI 3232 or AN\_SCI 3001 or AN\_SCI 3242; or instructor's consent

---

**AN\_SCI 7977: Horse Production**

(cross-leveled with AN\_SCI 4977). Systems of horse production: breeding, feeding and management of horses.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1001 or AN\_SCI 1175 or AN\_SCI 1065 and AN\_SCI 2175; AN\_SCI 3001 or AN\_SCI 3212 or AN\_SCI 3242; or instructor's consent

---

**AN\_SCI 7978: Swine Production**

(same as AN\_SCI 4978; cross-leveled with AN\_SCI 4978). Systems of pork production: breeding, feeding, management of commercial and purebred swine.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN\_SCI 3212 or AN\_SCI 3242 or AN\_SCI 3001 or instructor's consent

**Prerequisites:** AN\_SCI 1065 and AN\_SCI 2175, or AN\_SCI 1065 and AN\_SCI 1001, or AN\_SCI 1065 and AN\_SCI 1175, or AN\_SCI 1001, or AN\_SCI 1175, or instructor's consent

**Recommended:** AN\_SCI 4314 and AN\_SCI 3213

---

**AN\_SCI 7979: Poultry Production**

(cross-leveled with AN\_SCI 4979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 1001 or AN\_SCI 1175 or AN\_SCI 1065 and AN\_SCI 2175; AN\_SCI 3001 or AN\_SCI 3232 or AN\_SCI 3242; or instructor's consent

---

**AN\_SCI 8001: Topics in Animal Science**

Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.

**Credit Hour:** 1-4

**Prerequisites:** Instructor's consent

---

**AN\_SCI 8085: Problems in Animal Science**

Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. May be graded on S/U or A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**AN\_SCI 8087: Seminar in Animal Science**

Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management.

**Credit Hour:** 1

---

**AN\_SCI 8090: Thesis Research in Animal Science**

Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development livestock production and management. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**AN\_SCI 8413: Reproductive Biology Seminar**

Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology.

**Credit Hour:** 1

---

**AN\_SCI 8414: Meat Quality**

(same as F\_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3214 or equivalent

---

**AN\_SCI 8415: Survey of Epigenetics**

This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The course is designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**AN\_SCI 8420: Endocrinology**

Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 7314 or equivalent

---

**AN\_SCI 8424: Meat Investigations**

(same as F\_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field of meat science. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** F\_S 3214 /AN\_SCI 3214 or equivalent; instructor's consent

---

**AN\_SCI 8430: Introduction to Bioinformatics Programming**

(same as PLNT\_S 8430). This course provides the basics of programming and database development to students in the life sciences

who have little prior programming experience. It covers Unix/Linux, Perl, MySQL, the relational database design process, and common data formats used in genome informatics. Students will learn how programming skills can enhance their ability to analyze large biological datasets, and will gain hands on experience with examples focused on genomics and bioinformatics. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Instructor's consent

**Recommended:** Undergraduate or graduate course in Genetics

---

**AN\_SCI 8431: Nutritional Biochemistry of Lipids**

(Same as NEP 8310 and NUTRIT 8310). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 4270 and BIOCHM 4272

---

**AN\_SCI 8434: Special Topics in Reproductive Biology**

The physiological, hormonal, cellular and molecular mechanisms regulating development and function of reproductive systems of mammals will be studied with an emphasis on domestic animals, rodents, and humans. Current theories will be evaluated and discussed using information from recent scientific publications. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** AN\_SCI 4314 or AN\_SCI 7314 or equivalent; AN\_SCI 8420; and courses in biochemistry and/or cell biology

---

**AN\_SCI 8441: Statistical Applications in Agriculture**

Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research.

**Credit Hours:** 3

**Prerequisites:** STAT 4530/STAT 7530 or equivalent or instructor's consent

---

**AN\_SCI 8442: Digestive Physiology and Metabolism**

The objective of this course is to provide graduate students in Animal Science and related areas with current knowledge in gastrointestinal physiology, including research methods used in nutrition and nutritional physiology. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** At least one (each) undergraduate or graduate-level nutrition, physiology (general), and biochemistry course; or instructor's consent

---

**AN\_SCI 8633: Molecular and Network Evolution**

(same as BIO\_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required

---

---

**AN\_SCI 8725: Science Outreach: Public Understanding of Science**  
(same as BIO\_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

**Credit Hour:** 1-2

---

**AN\_SCI 9001: Topics in Animal Science**

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**AN\_SCI 9090: Dissertation Research in Animal Science**

Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**AN\_SCI 9423: Genetics of Populations**

Theoretical and practical examination of the forces that affect genetic variation at a population level.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**AN\_SCI 9432: Ruminant Nutrition**

(same as NUTRIT 8320). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 4332/AN\_SCI 7332 or equivalent and BIOCHM 4270

---

**AN\_SCI 9433: Gamete and Embryo Development**

A classical and molecular approach to spermatogenesis, oogenesis, fertilization and preimplantation development in the domestic species.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 4314/AN\_SCI 7314 or BIO\_SC 4984 or equivalent

---

**AN\_SCI 9434: Gonadal Function**

(same as BIOMED 9434).

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 4314, biochemistry or cell biology and AN\_SCI 8420

---

**AN\_SCI 9435: Placentation**

Provide students with current and in-depth information about the mechanisms involved in placental development and how the placenta (and placental products) influence maternal physiology - both locally at the placenta-uterine interface and systemically. All course topics will be covered in a comparative cross-species approach whenever possible. Emphasis will be placed on the most recent literature regarding the interactions taking place between the placenta and maternal system and how these interactions lead to the eventual birth of live young.

**Credit Hours:** 3

**Recommended:** It is preferred that students take AN\_SCI 9433 prior to this class, but this is not an absolute requirement

---

---

**AN\_SCI 9442: Vitamins and Minerals**

Designed to provide students with an understanding of the chemical, metabolic, and functional role of vitamins and minerals in nutrition. While the primary focus will be on animals, comparative aspects to human nutrition will be discussed.

**Credit Hours:** 4

**Prerequisites:** AN\_SCI 3212, BIOCHM 4270 or equivalent

---

## Anthropology Courses

**ANTHRO 1000: Introduction to Anthropology: Human Biology, Prehistory, and Culture**

General survey course in fields of anthropological concern: archaeology, cultural anthropology, biological anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

**Credit Hours:** 3

---

**ANTHRO 1000H: Introduction to Anthropology: Human Biology, Prehistory, and Culture - Honors**

General survey course in fields of anthropological concern: archaeology, cultural anthropology, biological anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ANTHRO 1001: Topics in Anthropology - General**

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 1002: Topics in Anthropology - Biological Sciences**

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 1003: Topics in Anthropology - Behavioral**

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 1006: Topics in Anthropology - Mathematical Sciences**

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

---

**ANTHRO 1007: Topics in Anthropology - Physical Sciences**

Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 1060: Human Language**

(same as LINGST 1060, SLHS 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

**Credit Hours:** 3

---

**ANTHRO 1150: Introduction to Folklore Genres**

(same as ENGLSH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A-F basis only.

**Credit Hours:** 3

---

**ANTHRO 1200: Significant Discoveries of Archaeology**

Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.

**Credit Hours:** 3

---

**ANTHRO 1300: Multiculturalism: An Introduction**

Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.

**Credit Hours:** 3

---

**ANTHRO 1350: Deviance: A Cross-Cultural Perspective**

Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.

**Credit Hours:** 3

---

**ANTHRO 1500: Monkeys, Apes and Humans**

For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

**Credit Hours:** 3

---

**ANTHRO 1500W: Monkeys, Apes and Humans - Writing Intensive**

For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

**Credit Hours:** 3

---

**ANTHRO 2002: Topics in Anthropology-Biological Science**

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 2003: Topics in Anthropology - Behavioral**

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 2005: Topics in Anthropology - Humanities**

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 2006: Topics in Anthropology-Mathematical Science**

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 2007: Topics in Anthropology-Physical Science**

Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 2020: Fundamentals of Archaeology with Laboratory**

Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. No credit for both ANTHRO 2020 and ANTHRO 2021.

**Credit Hours:** 4

---

**ANTHRO 2021: Fundamentals of Archaeology**

Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. No credit for both ANTHRO 2020 and ANTHRO 2021.

**Credit Hours:** 3

---

---

**ANTHRO 2022: Fundamentals of Archaeology Lab**

Involves hands-on experience with archaeological materials. No credit given to students who have taken ANTHRO 2020.

**Credit Hour:** 1

**Prerequisites:** must have completed ANTHRO 2021

---

**ANTHRO 2030: Cultural Anthropology**

Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

**Credit Hours:** 3

---

**ANTHRO 2030W: Cultural Anthropology - Writing Intensive**

Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

**Credit Hours:** 3

---

**ANTHRO 2050: Introduction to Biological Anthropology with Laboratory**

A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. No credit for both ANTHRO 2050 and ANTHRO 2051. Math Reasoning Proficiency Course.

**Credit Hours:** 5

**Prerequisites:** MATH 1050, MATH 1100, or MATH 1160

---

**ANTHRO 2051: Introduction to Biological Anthropology**

A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. No credit for both ANTHRO 2050 and ANTHRO 2051.

**Credit Hours:** 3

---

**ANTHRO 2052: Biological Anthropology Laboratory**

Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.

**Credit Hours:** 2

**Prerequisites:** ANTHRO 2051 (or equivalent) and MATH 1050, MATH 1100, or MATH 1160

---

**ANTHRO 2100: Indigenous Religions**

(same as REL\_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

**Credit Hours:** 3

---

**ANTHRO 2100H: Indigenous Religions - Honors**

(same as REL\_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ANTHRO 2150: Introduction to Folklore Field Research**

(same as ENGLISH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ANTHRO 2215: World Archaeology**

Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world.

**Credit Hours:** 3

---

**ANTHRO 2300: Anthropology of War**

Anthropological approaches to tribal and modern war; theories of war's origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace.

**Credit Hours:** 3

---

**ANTHRO 2340: Hunters and Gatherers**

Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move.

**Credit Hours:** 3

---

**ANTHRO 2500: Primate Anatomy and Evolution**

This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

**ANTHRO 2530: Human Evolution through Film and Literature**

This course will use recent films and novels as starting points to introduce students to concepts in human biology, history and evolution. Topics will range broadly from genetics and mutation to primatology to paleoanthropology and the human fossil record.

**Credit Hour:** 1-3

---

**ANTHRO 2570: Parents and Offspring**

A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

---

**ANTHRO 2580: Evolution of Human Sexuality**

Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

**ANTHRO 2580W: Evolution of Human Sexuality - Writing Intensive**

Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

**ANTHRO 2800: Introduction to Field Methods in Archaeology**

Techniques of field research and laboratory analysis through field experience.

**Credit Hour:** 1-6

**Prerequisites:** ANTHRO 2020 or ANTHRO 2021 or instructor's consent

---

**ANTHRO 2825: Analyzing Artifacts**

A brief introduction to the main methods used to analyze artifacts.

**Credit Hours:** 3

---

**ANTHRO 2950: Research Skills in Anthropology**

Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ANTHRO 3001: Topics in Anthropology - General**

Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3002: Topics in Anthropology-Biological Sciences**

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3003: Topics in Anthropology - Behavioral Science**

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3004: Topics in Anthropology - Social Science**

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3005: Topics in Anthropology - Humanities**

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3006: Topics in Anthropology-Mathematical Sciences**

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3007: Topics in Anthropology-Physical Sciences**

Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

**Credit Hours:** 3

---

**ANTHRO 3150: American Folklore**

(same as ENGLISH 3700). Focus on regional and ethnic folklore; emphasis on analysis of folklore in context. Requirements include book reports and two analytical papers based on student field research. May be repeated for a maximum of six hours with department's consent.

**Credit Hours:** 3

---

**ANTHRO 3340H: The Evolution of Human Nature - Honors**

(same as GN\_HON 3241H, ANTHRO 3340). We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary 'self' or are we made up of many (and sometimes contradictory) selves? Is there a single 'human' nature or are there distinct 'male' and 'female' natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of 'human nature' is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with this capacity?). Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ANTHRO 3340HW: The Evolution of Human Nature - Honors/Writing Intensive**

(same as ANTHRO 3340, ANTHRO 3340H GN\_HON 3241H). We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary 'self' or are we made up of many (and sometimes contradictory) selves? Is there a single 'human' nature or are there distinct 'male' and 'female' natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of 'human nature' is fiercely contested and

debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with the capacity?). Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors Eligibility Required

---

**ANTHRO 3380: Native American Religions**

(same as REL\_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

**Credit Hours:** 3

---

**ANTHRO 3470: Culture as Communication**

(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**ANTHRO 3490: Indian Cinema**

(same as S\_A\_ST 3490, FILM\_S 3490, VS\_ARH 3790). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

**Credit Hours:** 3

**Recommended:** Sophomore standing or higher

---

**ANTHRO 3540: Human Biology and Life History**

A general survey of human biology, focusing on the development of the individual from infancy to adult and the biology of human populations.

**Credit Hours:** 3

---

**ANTHRO 3560: Plagues and Peoples**

Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

**ANTHRO 3560W: Plagues and Peoples - Writing Intensive**

Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

---

**ANTHRO 3600: North American Indian Culture**

Comparative study of American Indians north of Mexico, emphasizes eastern United States.

**Credit Hours:** 3

---

**ANTHRO 3780: Cultures of Southeast Asia**

Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

**Credit Hours:** 3

---

**ANTHRO 4001: Topics in Anthropology-General**

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 4002: Topics in Anthropology - Biological Science**

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 4005: Topics in Anthropology - Humanities**

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 4006: Topics in Anthropology - Mathematical Science**

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 4007: Topics in Anthropology - Physical Science**

Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

**Credit Hour:** 1-3

---

**ANTHRO 4150: Special Themes in Folklore**

(same as ENGLSH 4700; cross-leveled with ANTHRO 7150 and ENGLSH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

---

**Credit Hours:** 3

---

**ANTHRO 4170: Oral Tradition**

(same as ENGLISH 4770; cross-leveled with ANTHRO 7170, ENGLISH 7770). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and sophomore standing

---

**ANTHRO 4200: Environment and Archaeology**

(cross-leveled with ANTHRO 7200). Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

**Credit Hours:** 3

**Recommended:** ANTHRO 2020 or ANTHRO 2021

---

**ANTHRO 4240: History of Archaeology**

(cross-leveled with ANTHRO 7240). Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 or ANTHRO 2021 or instructor's consent

---

**ANTHRO 4280: Archaeology of Religion**

(same as REL\_ST 4280; cross-leveled with ANTHRO 7280 and REL\_ST 7280). Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas.

**Credit Hours:** 3

**Recommended:** ANTHRO 2020 or REL\_ST 2100

---

**ANTHRO 4300: Comparative Social Organization**

(cross-leveled with ANTHRO 7300). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2030

---

**ANTHRO 4320: Ecological and Environmental Anthropology**

(cross-leveled with ANTHRO 7320). Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use.

**Credit Hours:** 3

**Recommended:** junior or senior standing

---

**ANTHRO 4340: Cultural Evolution and Change**

(cross-leveled with ANTHRO 7340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2030 or instructor's consent

---

**ANTHRO 4350: Psychological Anthropology**

(cross-leveled with ANTHRO 4350). Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

**Credit Hours:** 3

---

**ANTHRO 4360: Medical Anthropology**

(cross-leveled with ANTHRO 7360). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

**Credit Hours:** 3

**Recommended:** junior or senior standing

---

**ANTHRO 4370: Anthropology of Gender**

(same as WGST 4370; cross-leveled with ANTHRO 7370 and WGST 7370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

**Credit Hours:** 3

---

**ANTHRO 4380: Anthropological Theories of Religion**

(same as REL\_ST 4380; cross-leveled with ANTHRO 7380 and REL\_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

**Credit Hours:** 3

---

**ANTHRO 4385: Anthropology of Shamanism**

(cross-leveled with ANTHRO 7385). Shamans are considered to be intermediates between this world and the spiritual world because they possess the power to communicate with spiritual beings and seek such beings to ask for their help with a variety of tasks such as healing, killing enemies, and weather control. Shamans are also the earliest ritual practitioners. Ancient cave paintings depict men dressed in animal skins, holding objects resembling the rattles used by modern shamans among northern hunting peoples. The cave art also has entopic imagery that is seen in the shaman's mind during his shamanic rituals. In this course we will look at shamanism through time and in many cultures. We will also discuss the early accounts of shamanism by priests, explorers and adventurers, and how anthropology has come to understand and study this phenomenon. Particular topics to be discussed include biological explanations for shamanic trances and visions, mental health concerning shamans, gender issues, and how shamans fit in with societal development and complexity. Graded on A-F basis only.

---

**Credit Hours:** 3

---

**ANTHRO 4412: Gender, Language, and Communication**

(same as COMMUN 4412 and LINGST 4412; cross-leveled with COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent

---

**ANTHRO 4420: Historical Linguistics**

(same as LINGST 4420, ENGLSH 4660; cross-leveled with ANTHRO 7420, LINGST 7420, ENGLSH 7660). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

**Credit Hours:** 3

**Recommended:** junior or senior standing

---

**ANTHRO 4500: Human Origins**

(cross-leveled with ANTHRO 7500). History and theory in the study of human paleontology.

**Credit Hours:** 5

**Prerequisites:** ANTHRO 2050 or ANTHRO 2052 or instructor's consent

---

**ANTHRO 4520: Functional Morphology of the Human Skeleton**

(cross-leveled with ANTHRO 7520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.

**Credit Hours:** 3

---

**ANTHRO 4540: Human Biological Variation**

(cross-leveled with ANTHRO 7540). Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2050 or ANTHRO 2051 or BIO\_SC 1010

---

**ANTHRO 4580: Evolutionary Medicine**

(cross-leveled with ANTHRO 7580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

**Credit Hours:** 3

**Recommended:** lower level course in Biology or Biological Anthropology, junior or senior standing

---

**ANTHRO 4600: Ethnographic Studies of Selected Cultures**

(cross-leveled with ANTHRO 7600). Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ANTHRO 4620: North American Archaeology**

(cross-leveled with ANTHRO 7620). Ancient peoples and development of American Indian culture.

**Credit Hours:** 3

**Recommended:** ANTHRO 2020 or ANTHRO 2021

---

**ANTHRO 4640: Prehistory of the Greater Southwest**

(cross-leveled with ANTHRO 7640). The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

**Credit Hours:** 3

**Recommended:** ANTHRO 2020 or ANTHRO 2021

---

**ANTHRO 4650: Prehistory of Mesoamerica**

(cross-leveled with ANTHRO 7650). Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

**Credit Hours:** 3

---

**ANTHRO 4680: Cultures and Peoples of the Amazon**

(cross-leveled with ANTHRO 7680). Ethnographic survey of indigenous Amazonian cultures.

**Credit Hours:** 3

**Recommended:** Junior standing required

---

**ANTHRO 4700: Old World Prehistory**

(cross-leveled with ANTHRO 7700). Beginnings of culture in the Old World through the early Iron Age.

**Credit Hours:** 3

**Recommended:** ANTHRO 2020 or ANTHRO 2021

---

**ANTHRO 4790: Culture and Society in South Asia**

(same as S\_A\_ST 4790; cross-leveled with ANTHRO 7790 and S\_A\_ST 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

**Credit Hours:** 3

**Recommended:** junior standing

---

---

**ANTHRO 4800: Field Methods in Archaeology**

(cross-leveled with ANTHRO 7800). Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

**Credit Hour:** 1-8

---

**ANTHRO 4820: Zooarchaeology**

(cross-leveled with ANTHRO 7820). Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 or ANTHRO 2022 or instructor's consent

---

**ANTHRO 4826: Stone Artifact Analysis**

(cross-leveled with ANTHRO 7826). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 or ANTHRO 2022 or instructor's consent

---

**ANTHRO 4828: Archaeological Analysis of Ceramics**

(cross-leveled with ANTHRO 7828). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 or ANTHRO 2022

---

**ANTHRO 4830: Ethnographic Methods**

(cross-leveled ANTHO 7830). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

**Credit Hours:** 3

**Recommended:** ANTHRO 2030

---

**ANTHRO 4840: The Comparative Method in Anthropology**

(cross-leveled with ANTHRO 7840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic variation. This class addresses many research opportunities that are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.

**Credit Hours:** 3

---

**ANTHRO 4870: Field Methods in Linguistics**

(same as LINGST 4870, ENGLSH 4670; cross-leveled with ANTHRO 7870, LINGST 7870, ENGLSH 7670). Intensive training in collection and

analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.

**Credit Hours:** 4

**Prerequisites:** Contact the Linguistics advisor to request permission

**Recommended:** 9 hours of Linguistics

---

**ANTHRO 4870W: Field Methods in Linguistics - Writing Intensive**

(same as LINGST 4870, ENGLSH 4670; cross-leveled with ANTHRO 7870, LINGST 7870, ENGLSH 7670). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.

**Credit Hours:** 4

**Prerequisites:** Contact the Linguistics advisor to request permission

**Recommended:** 9 hours of Linguistics

---

**ANTHRO 4880: Demographic Anthropology**

(cross-leveled with ANTHRO 7880). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Math Reasoning Proficiency Course.

**Credit Hours:** 3

**Prerequisites:** MATH 1100

**Recommended:** junior or senior standing

---

**ANTHRO 4885: Anthropological Genetics**

(cross-leveled with ANTHRO 7885). Population genetics theory and methods applied to human and primate evolution and variation.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2050, or ANTHRO 2051 and ANTHRO 2052, or BIO\_SC 1500, or instructor's consent

---

**ANTHRO 4890: Human Skeletal Identification and Analysis**

(cross-leveled with ANTHRO 7890). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

**Credit Hours:** 5

**Prerequisites:** ANTHRO 2050 or ANTHRO 2052 or instructor's consent

---

**ANTHRO 4950: Undergraduate Research in Anthropology**

Advanced research approved by and under the direction of a departmental faculty member. Enrollment limited to Juniors and Seniors.

**Credit Hour:** 2-8

**Prerequisites:** instructor's consent

---

**ANTHRO 4950H: Honors Research in Anthropology**

Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. May be repeated for up to 6 credit hours. Enrollment is limited to Anthropology Majors with Junior Standing or higher, honors eligibility and a 3.5 GPA in Anthropology.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ANTHRO 4950HW: Undergraduate Research in Anthropology - Honors/Writing Intensive**

Advanced research approved by and under the direction of a departmental faculty member. Enrollment limited to Juniors and Seniors with Honors Eligibility.

**Credit Hour:** 2-8

**Prerequisites:** instructor's consent

---

**ANTHRO 4960: Undergraduate Readings in Anthropology**

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ANTHRO 4990: Capstone Seminar in Anthropology**

Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

**Credit Hours:** 3

**Prerequisites:** Anthropology major and senior standing, or instructor's consent

---

**ANTHRO 4990W: Capstone Seminar in Anthropology - Writing Intensive**

Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

**Credit Hours:** 3

**Prerequisites:** Anthropology major and senior standing, or instructor's consent

---

**ANTHRO 7001: Topics in Anthropology-General**

Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.

**Credit Hour:** 1-3

---

**ANTHRO 7150: Special Themes in Folklore**

(same as ENGLISH 7700; cross-leveled with ANTHRO 4150 and ENGLISH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Instructor's consent for repetition.

**Credit Hours:** 3

---

**ANTHRO 7170: Oral Tradition**

(same as ENGLISH 7770; cross-leveled with ENGLISH 4770, ANTHRO 4170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.

**Credit Hours:** 3

---

**Prerequisites:** Instructor's consent

---

**ANTHRO 7200: Environment and Archaeology**

(cross-leveled with ANTHRO 4200). Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

**Credit Hours:** 3

---

**ANTHRO 7240: History of Archaeology**

(cross-leveled with ANTHRO 4240). Growth of archaeology worldwide since AD 1700. Emphasis include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

**Credit Hours:** 3

---

**ANTHRO 7280: Archaeology of Religion**

(Same as REL\_ST 7280; cross-leveled with ANTHRO 4280 and REL\_ST 4280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 and/or REL\_ST 2100

---

**ANTHRO 7300: Comparative Social Organization**

(cross-leveled with ANTHRO 4300). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.

**Credit Hours:** 3

---

**ANTHRO 7340: Cultural Evolution and Change**

(cross-leveled with ANTHRO 4340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

**Credit Hours:** 3

---

**ANTHRO 7350: Psychological Anthropology**

Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

**Credit Hours:** 3

---

**ANTHRO 7360: Medical Anthropology**

(cross-leveled with ANTHRO 4360). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.

**Credit Hours:** 3

---

**ANTHRO 7370: Anthropology of Gender**

(same as WGST 7370; cross-leveled with ANTHRO 4370 and WGST 4370) The Anthropology of Gender Introduces the student to the

variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

**Credit Hours:** 3

---

**ANTHRO 7380: Anthropological Theory of Religions**

(same as REL\_ST 7380; cross-leveled with ANTHRO 4380 and REL\_ST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

**Credit Hours:** 3

---

**ANTHRO 7385: Anthropology of Shamanism**

(cross-leveled with ANTHRO 4385). Shamans are considered to be intermediates between this world and the spiritual world because they possess the power to communicate with spiritual beings and seek such beings to ask for their help with a variety of tasks such as healing, killing enemies, and weather control. Shamans are also the earliest ritual practitioners. Ancient cave paintings depict men dressed in animal skins, holding objects resembling the rattles used by modern shamans among northern hunting peoples. The cave art also has entopic imagery that is seen in the shaman's mind during his shamanic rituals. In this course we will look at shamanism through time and in many cultures. We will also discuss the early accounts of shamanism by priests, explorers and adventurers, and how anthropology has come to understand and study this phenomenon. Particular topics to be discussed include biological explanations for shamanic trances and visions, mental health concerning shamans, gender issues, and how shamans fit in with societal development and complexity. Graded on A-F basis only.

**Credit Hours:** 3

---

**ANTHRO 7420: Historical Linguistics**

(same as LINGST 7420, ENGLSH 7660; cross-leveled with ANTHRO 4420, LINGST 4420, ENGLSH 4660). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

**Credit Hours:** 3

---

**ANTHRO 7500: Human Origins**

(cross-leveled with ANTHRO 4500). History and theory in the study of human paleontology.

**Credit Hours:** 5

---

**ANTHRO 7520: Functional Morphology of the Human Skeleton**

(cross-leveled with ANTHRO 4520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in

lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.

**Credit Hours:** 3

---

**ANTHRO 7540: Human Biological Variation**

(cross-leveled with ANTHRO 4540). Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

**Credit Hours:** 3

---

**ANTHRO 7580: Evolutionary Medicine**

(cross-leveled with ANTHRO 4580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

**Credit Hours:** 3

---

**ANTHRO 7600: Ethnographic Studies of Selected Cultures**

(cross-leveled with ANTHRO 4600). Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses.

**Credit Hours:** 3

---

**ANTHRO 7620: North American Archaeology**

(cross-leveled with ANTHRO 4620). Ancient peoples and development of American Indian culture.

**Credit Hours:** 3

---

**ANTHRO 7640: Prehistory of the Greater Southwest**

(cross-leveled with ANTHRO 4640). The course will introduce students to the archaeology of aboriginal peoples of the American southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 or ANTHRO 2021

---

**ANTHRO 7650: Prehistory of Mesoamerica**

(cross-leveled with ANTHRO 4650). Covers the archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

**Credit Hours:** 3

---

**ANTHRO 7680: Cultures and Peoples of the Amazon**

(cross-leveled with ANTHRO 4680). Ethnographic survey of indigenous Amazonian cultures

**Credit Hours:** 3

---

---

**ANTHRO 7700: Old World Prehistory**

(cross-leveled with ANTHRO 4700). Beginnings of culture in the old world through the early Iron Age.

**Credit Hours:** 3

---

**ANTHRO 7790: Cultures and Society in South Asia**

(same as S\_A\_ST 7790; cross-leveled with ANTHRO 4790 and S\_A\_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora.

**Credit Hours:** 3

---

**ANTHRO 7800: Field Methods in Archaeology**

Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

**Credit Hour:** 1-8

---

**ANTHRO 7820: Zooarchaeology**

(cross-leveled with ANTHRO 4820). Survey of specialized techniques for archaeological/faunal analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication.

**Credit Hours:** 3

---

**ANTHRO 7826: Stone Artifact Analysis**

(cross-leveled with ANTHRO 4826). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

**Credit Hours:** 3

---

**ANTHRO 7828: Archaeological Analysis of Ceramics**

(cross-leveled with ANTHRO 4828). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2020 and/or ANTHRO 2022

---

**ANTHRO 7830: Ethnographic Methods**

(cross-leveled with ANTHRO 4830). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

**Credit Hours:** 3

---

**ANTHRO 7840: The Comparative Method in Anthropology**

(cross-leveled with ANTHRO 4840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic

variation. This class addresses many research opportunities that are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.

**Credit Hours:** 3

---

**ANTHRO 7870: Field Methods in Linguistics**

(same as LINGST 7870 and ENGLSH 7670; cross-leveled with LINGST 4870 and ENGLSH 4670). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.

**Credit Hours:** 4

**Prerequisites:** instructor's consent

**Recommended:** 9 hours of linguistics

---

**ANTHRO 7880: Demographic Anthropology**

(cross-leveled with ANTHRO 4880). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.

**Credit Hours:** 3

---

**ANTHRO 7885: Anthropological Genetics**

(cross-leveled with ANTHRO 4885). Population genetic theory and methods applied to human and primate evolution and variation.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 2050 and ANTHRO 2052 or BIO\_SC 1500

---

**ANTHRO 7890: Human Skeletal Identification and Analysis**

(cross-leveled with ANTHRO 4890). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

**Credit Hours:** 5

---

**ANTHRO 7950: Introduction to Post-Graduate Anthropology**

How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graded on S/U basis only.

**Credit Hour:** 1

---

**ANTHRO 7960: Graduate Readings in Anthropology**

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ANTHRO 7990: Non Thesis Research in Anthropology**

Original research not leading to the preparation of a thesis or dissertation.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ANTHRO 8010: History of Anthropology I**

Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.

**Credit Hours:** 3

---

**ANTHRO 8090: Masters Thesis Research in Anthropology**

Advanced work leading to thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** consent of major advisor

---

**ANTHRO 8157: Seminar in Folklore**

(same as ENGLSH 8700 and REL\_ST 8700). Roots of folklore scholarship and methodology; their evolution in modern approaches to the study of oral, traditional, verbal genres; and their performance in natural folk groups. May repeat to twelve hours with departments consent.

**Credit Hours:** 3

---

**ANTHRO 8187: Seminar in Ecological Adaptation**

Relationships and interactions between humans and their environments, with emphasis on the physical and cultural adaptations to environment. May be repeated to 9 hours maximum.

**Credit Hours:** 3

---

**ANTHRO 8287: Seminar in Theory and Methods in Archaeology**

Application of theory and conceptual frameworks to archaeological studies drawn from both Old and New Worlds. May be repeated to 6 hours maximum.

**Credit Hours:** 3

---

**ANTHRO 8357: Seminar in Psychological Anthropology**

Focuses on developments in psychological anthropology, cross-cultural psychology. Special attention on cognition, perception, socialization, personality assessment, psycho-cultural change, psycho-linguistics, psychometrics, within cross-cultural contexts. May be repeated to 6 hours maximum.

**Credit Hours:** 3

---

**ANTHRO 8487: Seminar in Anthropological Linguistics**

(same as LINGST 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ANTHRO 8587: Seminar in Physical Anthropology**

Readings and discussion concerning current problems in human and nonhuman primate evolution, with emphasis on taxonomy, morphology, and behavior. May be repeated to 9 hours maximum.

**Credit Hours:** 3

---

**ANTHRO 8687: Seminar in Cultural Dynamics**

Focuses on geographical, topical, and/or theoretical developments within cultural anthropology. May be repeated to 6 hours maximum.

**Credit Hours:** 3

---

**ANTHRO 8888: Analyzing Anthropological Data I**

Provides students with the conceptual and analytic tools necessary to conduct and evaluate the analysis of anthropological data. Examples gleaned from archaeology, bioanthropology, ethnography, and linguistics will provide a broad perspective of the application and utility of the various methods discussed.

**Credit Hours:** 3

---

**ANTHRO 8889: Analyzing Anthropological Data II**

This course introduces a variety of conceptual tools and advanced quantitative methods that anthropologists use to analyze their data. It includes an introduction of common software packages used to manipulate and analyze anthropological data.

**Credit Hours:** 3

**Prerequisites:** ANTHRO 8888 or grad-level intro stats or instructor's consent

---

**ANTHRO 8960: Graduate Readings in Anthropology**

Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ANTHRO 8987: Grant Writing for Graduate Students**

Formal research project design with an emphasis on the development of a grant at the graduate level. May be repeated to 9 hours maximum.

**Credit Hours:** 3

**Prerequisites:** introductory course in statistics

---

**ANTHRO 8990: Non Thesis Research in Anthropology**

Original research not leading to the preparation of a dissertation.

**Credit Hour:** 1-99

**Prerequisites:** consent of major advisor

---

**ANTHRO 9090: Doctoral Dissertation Research in Anthropology**

Advanced work leading to dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** consent of major advisor

---

## Arabic Courses

**ARABIC 1100: Elementary Arabic I**

For beginners with no prior knowledge of Arabic. An elementary level course designed to facilitate student's acquisition of basic proficiency in communication within culturally significant contexts. Students learn Modern Standard Arabic language skills in an environment integrating interactive video and classroom instruction.

**Credit Hours:** 6

---

---

**ARABIC 1200: Elementary Arabic II**

This course builds upon the foundation established in ARABIC 1100. Greater emphasis is placed on oral and written expression. Cultural issues are explored in an environment integrating interactive video and classroom instruction.

**Credit Hours:** 6

**Prerequisites:** C- or higher in ARABIC 1100, or instructor's permission

---

**ARABIC 2005: Undergraduate Topics in Arabic - Humanities**

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing or instructor's consent

---

**ARABIC 2130: Intermediate Arabic**

Builds on students' knowledge of Elementary Arabic by investing in four language skills of listening, speaking, reading, and writing. Course is culturally oriented and considers various social, political, and religious forces to play in Arab world. Offers a unique blend of modern standards and colloquial Arabic. Enables students to develop listening comprehension, initiate and sustain conversations on daily-life topics, read texts on familiar topics, and write informal essays on topics, and write informal essays on topics connected to daily life.

**Credit Hours:** 3

**Prerequisites:** ARABIC 1200 or equivalent

---

**ARABIC 2260: Intermediate Arabic II**

This course enables students at the intermediate proficiency level to further strengthen the four language skills: listening, speaking, reading, and writing in Modern Standard Arabic and to understand key aspects of the Arab world and the Arab culture. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ARABIC 2130 or equivalent

---

**ARABIC 3160: Intermediate Arabic III**

This course enables students at the intermediate proficiency level to further strengthen the four language skills: Listening, speaking, reading, and writing in MODERN Standard Arabic and to understand key aspects of the Arab World. It expands communicative competence in Arabic and provides a good introduction to important aspects in Arabic Grammar. ORAL and written skills also be emphasized, besides expanding students vocabulary. It will also help students develop an understanding of the Arabic culture and its growing importance in the world, while providing contexts that reinforce the usefulness of the Arabic language in today's global economy. This course is conducted in Arabic.

**Credit Hours:** 3

**Prerequisites:** ARABIC 2260 or equivalent

---

## Architectural Studies Courses

**ARCHST 1005: Topics in Architectural Studies - Humanities**

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

---

**ARCHST 1100: Visual Design**

Design study as an introduction to basic design and visual composition with application to creating two- and three-dimensional abstract and /or functional design work. Studio exercises expressed through drawings and abstract models, using various media.

**Credit Hours:** 3

---

**ARCHST 1200: Architectural Drafting and Working Drawings**

Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

**Credit Hours:** 3

---

**ARCHST 1600: Fundamentals of Environmental Design**

Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ARCHST 1600W: Fundamentals of Environmental Design - Writing Intensive**

Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ARCHST 2005: Topics in Architectural Studies - Humanities**

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARCHST 2085: Problems in Architectural Studies**

Supervised independent work.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARCHST 2100: Understanding Architecture and the American City**

Multifaceted introduction to the architectural and social roots of urban form in the U. S.: historic precedents from around the world; growth, decline and revival of cities; rise of suburbia; tradition and transformation in campus communities; continuing housing challenges; sustainable design and the future of urbanism. Explores a diverse range of opportunities to improve communities available to professionals and general public.

**Credit Hours:** 3

---

---

**ARCHST 2210: Understanding Visualization for Animated Films**

Provides a critical overview of design and visualization techniques in animated film-making. Emphasizes the role of the built environment and spatial design features.

**Credit Hours:** 3

---

**ARCHST 2220: Introduction to CAD**

Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design.

**Credit Hours:** 3

**Recommended:** ARCHST 1200

---

**ARCHST 2230: Design Communication I**

A course introducing techniques and conventions of digitally-mediated graphic communication as aids in the design process.

**Credit Hours:** 3

**Prerequisites:** ARCHST 2220 and ARCHST 2811

---

**ARCHST 2310: Building Systems**

Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating.

**Credit Hours:** 3

---

**ARCHST 2315: Introduction to Building Systems Laboratory**

Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.

**Credit Hour:** 1

---

**ARCHST 2316: Advanced Building Systems Lab**

Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** ARCHST 2315

---

**ARCHST 2323: Sustainable Building Design Fundamentals**

Environmental concerns addressed by green building design practices for consumers and owners of homes and businesses. Overview of how green buildings improve prospects for ecology, economy, social equity, and human health. Hands-on lab experiments reference national performance standards for decision making in sustainable building projects. Emphasis on energy and water use, sustainable sites, environmentally friendly building products, indoor air quality, and design for sustainable behaviors. Graded on A-F basis only.

**Credit Hours:** 3

---

**ARCHST 2620: People, Places and Design**

Understanding human behavior and interaction with environments; the influence of architectural design on built places. Practical application for design.

**Credit Hours:** 3

---

**ARCHST 2811: Studio I**

Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment.

**Credit Hours:** 4

**Prerequisites:** instructor's consent

---

**ARCHST 3100: Color and Light**

The theory, application, and specification of color and light for interior and architectural design. Includes assigned lab exercises for color and light portfolio.

**Credit Hours:** 3

---

**ARCHST 3182: Studio II**

Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context.

**Credit Hours:** 4

**Prerequisites:** ARCHST 2310 and ARCHST 2811

---

**ARCHST 3230: Advanced Design Communication Using BIM**

Advanced course in techniques and conventions of computer aided design (CAD) and Building Information Modeling (BIM) for contemporary design process.

**Credit Hours:** 3

**Prerequisites:** ARCHST 2230

---

**ARCHST 3600: Environmental Analysis**

Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.

**Credit Hours:** 3

**Prerequisites:** ARCHST 2811

---

**ARCHST 3600W: Environmental Analysis - Writing Intensive**

Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000 and ARCHST 2811

---

**ARCHST 3860: Human Factors Programming**

Design Programming for Human Factors using a Case Study.

---

**Credit Hours:** 3

**Recommended:** ARCHST 1600

---

**ARCHST 3860W: Human Factors Programming - Writing Intensive**

Design Programming for Human Factors using a Case Study.

**Credit Hours:** 3

**Recommended:** ARCHST 1600

---

**ARCHST 4001: Topics in Architectural Studies**

Selected current topics in field of interest.

**Credit Hour:** 1-99

---

**ARCHST 4085: Problems in Architectural Studies**

Supervised independent work.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARCHST 4085W: Problems in Architectural Studies - Writing Intensive**

Supervised independent work.

**Credit Hour:** 1-12

**Prerequisites:** instructor's consent

---

**ARCHST 4320: Materials, Methods and Products**

Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

**Credit Hours:** 3

**Recommended:** ARCHST 2310

---

**ARCHST 4323: Sustainable Technologies and Systems**

An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors. Prerequisites: MATH 1100 or equivalent or MATH 1160 or higher level of math: MATH 1400 or MATH 1500.

**Credit Hours:** 3

---

**ARCHST 4325: Energy-Efficient Building Design**

Broad study of energy use and energy-efficient strategies for buildings. Course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies.

**Credit Hours:** 3

**Prerequisites:** MATH 1100

---

**ARCHST 4333: Compliance and Specifications**

Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

**Credit Hours:** 3

**Prerequisites:** ARCHST 2220 and ARCHST 2811

---

**ARCHST 4355: Recent Trends in Digital Media I**

Recent Trends in Digital Media I

**Credit Hour:** 1-99

---

**ARCHST 4411: Study Abroad in Architectural History**

Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARCHST 4430: Guiding Design with Historic Preservation**

(cross-leveled with ARCHST 7430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.

**Credit Hours:** 3

**Recommended:** American History or Government, or Art History

---

**ARCHST 4435: History of the Designed Environment to 1750**

An in-depth study of the designed environment including interiors, architecture, art, and the decorative arts within the major historical periods and cultural context from prehistory to the Industrial Revolution.

**Credit Hours:** 3

---

**ARCHST 4440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution**

(cross-leveled with ARCHST 7440). Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.

**Credit Hours:** 3

---

**ARCHST 4555: Recent Trends**

Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

**Credit Hour:** 1-99

---

**ARCHST 4630: Shaping Human Settlements**

Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.

**Credit Hours:** 3

---

**ARCHST 4700: Place-Making in Community Design**

Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.

**Credit Hours:** 3

---

**ARCHST 4710: Design Business Practices**

Analysis of basic professional, human, and business skills necessary for the successful design practice. Studio work in development of portfolio and self-marketing materials with refinement through critiques.

---

**Credit Hours:** 3

**Prerequisites or Corequisites:** ARCHST 4814 or ARCHST 4824

---

**ARCHST 4760: Healthcare Facilities Design**

(cross-leveled with ARCHST 7760). Health care facilities design and planning course provides an in-depth investigation of best practice examples. Design and research methods include evidence-based design, simulation, and space syntax analysis leading to high-performance healthcare design. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** senior standing

---

**ARCHST 4813: Interiors Studio III**

Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors.

**Credit Hours:** 4

**Prerequisites:** ARCHST 3182

---

**ARCHST 4814: Interiors Studio IV**

Continuation of ARCHST 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces--both vertically and horizontally.

**Credit Hours:** 4

**Prerequisites:** ARCHST 4813

---

**ARCHST 4815: Construction Documents and Building Information Modeling Studio**

Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling.

**Credit Hours:** 4

**Prerequisites or Corequisites:** ARCHST 3230, ARCHST 4814 or ARCHST 4824, ARCHST 4860, ARCHST 4990

---

**ARCHST 4823: Architectural Studio III**

Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specifics to architecture.

**Credit Hours:** 4

**Prerequisites:** ARCHST 3182

---

**ARCHST 4824: Architectural Studio IV**

Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.

**Credit Hours:** 4

**Prerequisites:** ARCHST 4823

---

**ARCHST 4860: Programming for Thesis Design Studio**

Develop written comprehensive program for thesis design studio project.

**Credit Hour:** 1

**Prerequisites or Corequisites:** ARCHST 4814 or ARCHST 4824

**Prerequisites:** ARCHST 2620

---

**ARCHST 4940: Internship in Environmental Design**

Field experience in design under professional and educational supervision. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARCHST 4960: Readings in Architectural Studio**

Readings in recent research materials.

**Credit Hour:** 1-99

---

**ARCHST 4961: Design Research and Service Design**

(cross-leveled with ARCHST 7961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and Communication of research findings to informed design concepts.

**Credit Hours:** 3

**Recommended:** senior standing

---

**ARCHST 4962: Information Visualization and Visual Analytics**

(cross-leveled with ARCHST 7962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

**Credit Hours:** 3

**Recommended:** senior standing

---

**ARCHST 4963: Human Factors Research for Design**

(cross-leveled with ARCHST 7963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

**Credit Hours:** 3

**Recommended:** ARCHST 3860

---

**ARCHST 4964: Design Thinking and Creative Process**

(cross-leveled with ARCHST 7964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition computations, and design protocol studies.

**Credit Hours:** 3

**Recommended:** ARCHST 4813 or ARCHST 4823

---

**ARCHST 4990: Thesis Design Studio**

Comprehensive studio project as a synthesis of previous work in addressing a design problem defined in ARCHST 4860.

**Credit Hours:** 4

**Prerequisites:** ARCHST 3230, ARCHST 4860, ARCHST 4814 or ARCHST 4824

---

**ARCHST 7001: Topics in Environmental Design**

Selected current topics in field of interest.

**Credit Hour:** 1-99

---

**ARCHST 7085: Problems in Environmental Design**

Supervised independent work.

**Credit Hour:** 1-99

**Prerequisites:** 3000-level course in field of problem and instructor's consent

---

**ARCHST 7230: Computer Graphic Application for Design I**

Applications of computer graphics for design and art; includes visualization, animation and creative development. May repeat up to 12 credit hours maximum.

**Credit Hours:** 3

---

**ARCHST 7232: Graduate Design Communication I**

Studio course in techniques and conventions of graphic communication as an aid in the design process of built forms.

**Credit Hours:** 3

---

**ARCHST 7310: Graduate Building Systems**

Integrated building systems; structure construction, technology, comfort; including voice-communications, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems, project estimating and management.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or MATH 1120

---

**ARCHST 7315: Graduate Systems Laboratory**

Experimental learning setting involving building construction systems, renovation, materials and finishes testing and experimentation. Focus on hands-on opportunities investigating building technology properties in detail. Laboratory 3 hrs/week.

**Credit Hour:** 1-9

---

**ARCHST 7320: Materials, Methods and Products**

Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or MATH 1120

---

**ARCHST 7323: Sustainable Technologies and Systems**

An in-depth study of ecologically-sensitive and energy-efficient strategies used in buildings and interiors.

**Credit Hours:** 3

---

**ARCHST 7325: Energy-Efficient Building Design**

This course is a broad study of energy use and energy-efficient strategies for buildings. The course will cover the fundamentals of climate-based

design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies. Recommended for graduate students with undergraduate degrees and experience in engineering, architecture, and/or building science.

**Credit Hours:** 3

---

**ARCHST 7333: Compliance and Specifications**

Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.

**Credit Hours:** 3

**Prerequisites:** T\_A\_M 2100 and MATH 1100 or MATH 1120

---

**ARCHST 7355: Recent Trends in Digital Media I**

Recent Trends in Digital Media I

**Credit Hour:** 2-4

---

**ARCHST 7430: Guiding Design with Historic Preservation**

(cross-leveled with ARCHST 4430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.

**Credit Hours:** 3

**Prerequisites:** American History or Government or Art History or instructor's consent

---

**ARCHST 7440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution**

(cross-leveled with ARCHST 4440). Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.

**Credit Hours:** 3

---

**ARCHST 7555: Recent Trends in Environmental Design**

Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

**Credit Hour:** 1-99

---

**ARCHST 7620: Environment and Behavior**

Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.

**Credit Hours:** 3

---

**ARCHST 7630: Shaping Human Settlements**

Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.

**Credit Hours:** 3

---

---

**ARCHST 7650: Psychosocial Function and Older Adults**

(same as F\_C\_MD 7751, HMI 7751, H\_D\_FS 7751, NURSE 7751, P\_HLTH 7751 and SOC\_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

**Credit Hours:** 3

---

**ARCHST 7700: Place-Making in Community Design**

Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.

**Credit Hours:** 3

---

**ARCHST 7840: Graduate Design Studio**

Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARCHST 7940: Internship in Environmental Design**

Field experience in design under professional and educational supervision. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARCHST 7960: Readings in Environmental Design**

Readings in recent research materials.

**Credit Hour:** 1-99

---

**ARCHST 7961: Design Research and Service Design**

(cross-leveled with ARCHST 4961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and communication of research findings to inform design concepts.

**Credit Hours:** 3

---

**ARCHST 7962: Information Visualization and Visual Analytics**

(cross-leveled with ARCHST 4962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

**Credit Hours:** 3

---

**ARCHST 7963: Human Factors Research for Design**

(cross-leveled with ARCHST 4963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

**Credit Hours:** 3

---

**ARCHST 7964: Design Thinking and Creative Process**

(cross-leveled with ARCHST 4964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition and computations, and design protocol studies.

**Credit Hours:** 3

---

**ARCHST 8001: Topics in Environmental Design**

Selected current topics in field of interest.

**Credit Hour:** 1-99

---

**ARCHST 8050: Research Methods in Environmental Design**

A comparative study of quantitative and qualitative methods in environmental design with emphasis on research results and analyses. Lectures and seminar discussions.

**Credit Hours:** 3

**Prerequisites:** 12 hours advanced design

---

**ARCHST 8085: Problems in Environmental Design**

**Credit Hour:** 1-99

**Prerequisites:** 4000-level course in field of problem and instructor's consent

---

**ARCHST 8090: Master's Research in Environmental Design**

Independent research leading to a creative project. Graded on S/U basis only.

**Credit Hour:** 1-99

---

**ARCHST 8230: Computer Graphic Application for Design II**

Creative computer graphic modeling, rendering and animation projects related to the academic background and interests of individual students. May be repeated to 6 hours maximum.

**Credit Hours:** 3

---

**ARCHST 8600: Graduate Environmental Analysis**

Analysis of design principles and organizational factors operating in a building by means of dissection. Volumetric disposition, circulation pattern, axes, structural system, materials, purpose, and symbolism.

**Credit Hours:** 3

---

**ARCHST 8630: Philosophy of Environmental Design Research**

Formal environmental design theory concerning historical precedents, current aesthetic trends, and design processes. Assignments investigate philosophical influences, architectonic vocabularies, and communication of idea and artifact. May be repeated up to 12 credit hours.

**Credit Hours:** 3

---

**ARCHST 8633: Theoretical Perspectives of Design Computing**

Key theoretical ideas underlying the relationship between design and computing. Main research topics relevant to current discourse in design computing.

**Credit Hours:** 3

---

---

**ARCHST 8820: Graduate Digital Design Studio**

Graduate level design experience emphasizing project complexity, design skill refinement, and use of digital media for design representation.

**Credit Hour:** 1-99

---

**ARCHST 8830: Digital Design Studio II**

Advanced graduate level design experience emphasizing design, documentation, and representation using digital media. Optional development of graduate thesis project may be scheduled in this studio.

**Credit Hours:** 4

---

**ARCHST 8840: Graduate Design Studio**

Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARCHST 8850: Seminar in Environmental Design**

Reports, discussion of recent work in area of concentration.

**Credit Hour:** 1-4

---

**ARCHST 8887: Environment and Behavior II**

Synthesis of environment and behavior themes in design research and application to professional practice. Research on socio-behavioral phenomena, user groups, places. Emphasis on integrated interactive character of elements.

**Credit Hours:** 3

---

**ARCHST 8950: Qualitative Research Methods**

Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Course may be repeated for credit.

**Credit Hours:** 3

---

**ARCHST 8960: Readings in Environmental Design**

Readings in recent research materials.

**Credit Hour:** 1-99

**Prerequisites:** ARCHST 4960 or ARCHST 7960

---

**ARCHST 8990: Thesis Project Proposal**

The formal opportunity to express the intent and scope of the thesis project.

**Credit Hour:** 1

**Prerequisites:** instructor's consent

---

**ARCHST 9085: Problems in Environmental Design**

**Credit Hour:** 1-99

**Prerequisites:** 4000-level course in field of problem and instructor's consent

---

**ARCHST 9090: Doctoral Research in Environmental Design**

Independent research leading to thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**ARCHST 9555: Recent Trends in Environmental Design**

For students seeking additional knowledge and understanding in specific subject matter areas.

**Credit Hour:** 1-99

---

**ARCHST 9990: Dissertation Proposal**

A formal dissertation proposal is written and presented to the dissertation committee for approval.

**Credit Hour:** 1-9

**Prerequisites:** instructor's consent

---

**ARCHST 9995: Pilot Project for Dissertation**

Working with advisor, student proposes, conducts, and reports the findings from a pilot study germane to the dissertation topic in preparation for the dissertation research.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

## Art Ceramics - Visual Studies Courses

**ARTCE\_VS 2100: Beginning Ceramics**

Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee.

**Credit Hours:** 3

---

**ARTCE\_VS 3100: Intermediate Ceramics**

Continuation of ARTCE\_VS 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARTCE\_VS 4100: Advanced Ceramics**

Individual directed exploration of ceramic form and concept. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required. May be repeated to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARTCE\_VS 4110: Ceramics Sculpture**

Individual directed exploration of sculptural forms in ceramics. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials expense is required. May be repeated to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** instructor's consent required

---

**ARTCE\_VS 4185: Problems in Ceramics**

Problems in Ceramics.

**Credit Hour:** 1-3

**Prerequisites:** Instructor consent required

---

**ARTCE\_VS 7100: Graduate Ceramics**

Advanced study of ceramic form, surface and concept with emphasis on directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required

---

**ARTCE\_VS 7110: Graduate Ceramic Sculpture**

Directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required

---

**ARTCE\_VS 7185: Problems in Ceramics**

Graduate level work in ceramics.

**Credit Hour:** 1-3

**Prerequisites:** ARTCE\_VS 7100 and ARTCE\_VS 7110 and instructor's consent required

---

**ARTCE\_VS 8100: Graduate Ceramics II**

Continuation of ARTCE\_VS 7100. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ARTCE\_VS 7100 or equivalent

---

## Art Drawing - Visual Studies Courses

**ARTDR\_VS 1050: Drawing: Materials and Methods**

This course focuses on the fundamentals of visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

**Credit Hours:** 3

---

**ARTDR\_VS 1050H: Drawing: Materials and Methods - Honors**

This course focuses on the fundamentals of visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ARTDR\_VS 2210: Beginning Color Drawing**

Beginning Color Drawing is a second level drawing course that places emphasis on practice and materials with a focus on forming a basic understanding of how color works in practical application. Students will craft projects meant to orient them to the material action of colored pencils, chalk pastels, oil pastels, and other media. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050

---

**ARTDR\_VS 3200: Portrait Drawing**

Development of drawing techniques with an emphasis on the portrait. May be repeated to 15 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050 and ARTDR\_VS 2210

---

**ARTDR\_VS 3210: Intermediate Color Drawing**

Continuation of ARTDR\_VS 2210 with emphasis on design and organization. May be repeated to 9 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050 and ARTDR\_VS 2210

---

**ARTDR\_VS 3220: Anatomical Drawing**

Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050 and ARTDR\_VS 2210

---

**ARTDR\_VS 3230: Beginning Illustration**

An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A-F basis only. Expendable materials fee.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050 and ARTDR\_VS 2210

---

**ARTDR\_VS 3240: The Graphic Novel**

This drawing course focuses on sequential narrative art and its relationship to the graphic novel. The term, 'graphic novel' represents a broad range of styles, formats and genres from simple comics to highly rendered illustrations. Lectures provide an introduction to some of the most highly respected works from the early twentieth century onward. Expendable materials fee required. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050 and ARTDR\_VS 2210

---

**ARTDR\_VS 4200: Drawing IV**

This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expendable Materials Fee Required.

**Credit Hours:** 3

---

**Prerequisites:** ARTDR\_VS 1050, ARTDR\_VS 2200 and ARTDR\_VS 3200

---

**ARTDR\_VS 4210: Advanced Color Drawing**

Continuation of ARTDR\_VS 3210 with emphasis on the expressive properties of color in figural compositions. Repeatable to 15 hours. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050, ARTDR\_VS 2210 and ARTDR\_VS 3210

---

**ARTDR\_VS 4220: Advanced Anatomical Drawing**

Continuation of ARTDR\_VS 3220 with and emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Expendable materials fee required.

**Credit Hours:** 3

**Recommended:** ARTDR\_VS 2210 and ARTDR\_VS 3200 before taking this class

---

**ARTDR\_VS 4230: Advanced Illustration**

Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 1050 and ARTDR\_VS 2210

**Recommended:** ARTDR\_VS 3230

---

**ARTDR\_VS 4285: Problems in Drawing**

Problems in Drawing.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent required

---

**ARTDR\_VS 7200: Graduate Drawing**

Drawing with emphasis on individual creative expression. May repeat to 18 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** graduate Art major

---

**ARTDR\_VS 7285: Problems in Drawing**

**Credit Hour:** 1-3

**Prerequisites:** ARTDR\_VS 7200 and departmental consent

---

**ARTDR\_VS 8200: Advanced Graduate Drawing**

Continuation of ARTDR\_VS. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ARTDR\_VS 7200 or equivalent

---

**ARTDR\_VS 8270: Graduate Drawing - Theory and Context**

Contextualizing artwork in culture, history, and theory, May be repeated to 18 hours for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Graduate Art Majors

---

## Art Fibers - Visual Studies Courses

**ARTFI\_VS 2300: Beginning Fibers**

Introduction to fibers emphasizing surface design (dyeing, textile printing), embroidery, papermaking and artists' books. Expendable materials fee required.

**Credit Hours:** 3

---

**ARTFI\_VS 3300: Intermediate Fibers**

Continuation of ARTFI\_VS 2300 with emphasis on weaving, papermaking, and artists' books. Rigorous critical dialogue communicates social and political discourse intertwined to the Fibers discipline. Analog and digital technologies, global textile production, gender and sexuality, craftivism, community and sustainable making are topics explored and techniques taught inform visual communication for all art media. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTFI\_VS 2300

---

**ARTFI\_VS 4300: Advanced Fibers**

Exploration of aesthetic concepts, development of creative research and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. May repeat to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** ARTFI\_VS 3300 or instructor approval

---

**ARTFI\_VS 4385: Problems in Fibers**

Supervised research in creative fibers. Expendable materials fee required.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent required

---

**ARTFI\_VS 7300: Graduate Fibers**

Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student's ideas and goals. Expendable materials fee required. May repeat to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** ARTFI\_VS 4300

---

**ARTFI\_VS 7385: Problems in Fibers**

Graduate level work in fibers.

**Credit Hour:** 1-3

**Prerequisites:** ARTFI\_VS 7300 and departmental consent

---

**ARTFI\_VS 8300: Graduate Fibers II**

Continuation of ART\_FIBR 7300. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ARTFI\_VS 7300 or equivalent

---

## Art General - Visual Studies Courses

### ARTGE\_VS 1020: Introduction to Visual Studies

Introduction to the many ways material culture and visual media fashion, construct, preserve, and challenge cultural beliefs and values.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000 may be required on some sections

---

### ARTGE\_VS 1020H: Introduction to Visual Studies - Honors

Introduction to the many ways material culture and visual media fashion, construct, preserve, and challenge cultural beliefs and values. Prerequisites: Honors eligibility required.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000 may be required on some sections

---

### ARTGE\_VS 1020HW: Introduction to Visual Studies - Honors/Writing Intensive

Introduction to the many ways material culture and visual media fashion, construct, preserve, and challenge cultural beliefs and values. Prerequisites: Honors eligibility required.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000 may be required on some sections

---

### ARTGE\_VS 1020W: Introduction to Visual Studies - Writing Intensive

Introduction to the many ways material culture and visual media fashion, construct, preserve, and challenge cultural beliefs and values.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000

---

### ARTGE\_VS 1030: 2-D Materials and Methods

(Art Foundations) Study of the basic principles and elements of two-dimensional composition in art. These principles of organization are the bases for expression and critical analysis of the visual arts. Students will create several studio projects exploring design variables, while employing a range of tools and materials from drawing to digital methods.

**Credit Hours:** 3

---

### ARTGE\_VS 1040: 3-D Materials and Methods

A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.

**Credit Hours:** 3

---

### ARTGE\_VS 1920: Introduction to Digital Media Production

(same as ENGLSH 1880, FILMS\_VS 1880, DST\_VS 1880, COMMUN 1880). Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

---

**Prerequisites:** BA/BFA art majors only through early registration

---

### ARTGE\_VS 2000: Color Theory

An investigation of various color systems and their application to art.

**Credit Hours:** 3

**Prerequisites:** ARTGE\_VS 1030

---

### ARTGE\_VS 2001: Topics in Art

Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### ARTGE\_VS 2005: Topics in Art - Humanities

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent

---

### ARTGE\_VS 2005H: Topics in Art - Humanities - Honors

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Enrollment limited to students with Honors Eligibility.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### ARTGE\_VS 2020: International Summer Study Abroad in Art

A three-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in The Netherlands. May be repeated once for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** consent of the instructor

---

### ARTGE\_VS 2030: Context and Culture

The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.

**Credit Hours:** 3

---

### ARTGE\_VS 2030H: Context and Culture - Honors

The purpose of this course is to give journalism students a framework for engaging with the visual arts, with a focus on the 20th century and today. Our goal is to conduct a foundation for thinking, talking and writing about the visual arts, especially works and movements that might be challenging for the novice to understand.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

---

**ARTGE\_VS 2040: Sophomore Seminar**

This course is a bridge between contemporary art practices and developing a strong independent studio practice. Students develop a foundational sense of being a visual artist from the perspective of studio practice, professional application and creating an artistic identity through contemporary theory and short critical writings. Students will learn how to document and create a digital platform for their work, as well as search for internships, residencies and other professional arts opportunities. Through lectures, demonstrations, student collaborations, and visits with the local arts community, students will create a sphere of professional influences. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ARTGE\_VS 1030, ARTGE\_VS 1040 and ARTDR\_VS 1050

---

**ARTGE\_VS 3001: Topics in Art**

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Enrollment limited to students with junior standing.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 3005: Topics in Art - Humanities**

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent

---

**ARTGE\_VS 3005H: Topics in Art - Humanities Honors**

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Enrollment limited to students with Honors Eligibility.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 3020: International Summer Study Abroad in Art**

A three-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in The Netherlands. May be repeated once for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** consent of the instructor

---

**ARTGE\_VS 3030: Undergraduate Internship in Art**

Special learning situations not covered by coursework. Credit standards pre-arranged with dept. Limit on total hours of problems courses applies. Enrollment limited to Art and Art Education majors with Junior Standing.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

**ARTGE\_VS 4001: Topics in Art**

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 4001H: Topics in Art - Honors**

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Enrollment limited to students with Honors Eligibility.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 4005H: Topics in Art - Humanities Honors**

Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Enrollment limited to students with Honors Eligibility.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 4030: Video Art and the Moving Image**

(same as FILMS\_VS; cross-leveled with ARTGE\_VS 7030). Video as a fine art form intersecting with sculpture, experimental filmmaking, DIY and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. May be repeated up to 9 hours maximum.

**Credit Hours:** 3

---

**ARTGE\_VS 4040: 2-D Portfolio Development**

This course will provide an intensive experience in the development of a portfolio of personal work outside the traditional media boundaries. Students will explore media relevant to their particular needs and begin to explore the connections between their work and contemporary art and culture through readings, discussions and critiques. Expendable Materials Fee Required. May be repeated t 6 credits. Enrollment limited to students with Junior Standing. Recommended: 3000-level or above course in one of the following media areas: Drawing, Painting or Printmaking.

**Credit Hours:** 3

**Prerequisites:** instructor's consent required

---

**ARTGE\_VS 4050: Performance Art**

(cross-leveled with ARTGN\_VS 7050). This studio art course will survey the practices in Performance Art and its intersections with visual and media-based art, experimental theater, music and dance. Modules will include performance and: the object, culture, the mediatized body and alternative spaces. Graded on A-F basis only. May be repeated up to 9 hours maximum.

**Credit Hours:** 3

---

**ARTGE\_VS 4975: Senior Seminar in Art**

A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students' visual research.

**Credit Hours:** 3

**Prerequisites:** senior standing and ENGLISH 1000

---

---

**ARTGE\_VS 4975W: Senior Seminar in Art - Writing Intensive**

A capstone course for the undergraduate art degree with emphasis on the production of a written statement relating to the students' visual research.

**Credit Hours:** 3

**Prerequisites:** senior standing and ENGLISH 1000

---

**ARTGE\_VS 4976: Design - Senior Seminar**

Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. Students connect with Graphic Design Alumni who are working in the field of design. All students will participate in a final, formal portfolio review.

**Credit Hours:** 3

**Prerequisites:** senior standing and ENGLISH 1000

---

**ARTGE\_VS 4976W: Design - Senior Seminar - Writing Intensive**

Capstone for undergraduate art students who are interested in graphic design. Emphasis placed on research and writing about the theory and practice of design. Students connect with Graphic Design Alumni who are working in the field of design. All students will participate in a final, formal portfolio review.

**Credit Hours:** 3

**Prerequisites:** senior standing and ENGLISH 1000

---

**ARTGE\_VS 7000: Graduate Art - Studio Practice and Critique**

Art studio practice emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

**Credit Hours:** 3

---

**ARTGE\_VS 7001: Topics in Art**

Special studies in studio art at the graduate level; covers subjects not included in regularly offered courses. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 7005: Topics in Art - Humanities**

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topics.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 7020: International Summer Study Abroad in Art**

A three-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at schedule critiques in The Netherlands. May be repeated once for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** consent of the instructor

---

**ARTGE\_VS 7030: Video Art and the Moving Image**

(cross-leveled with ARTGE\_VS 4030). Video as a fine art form intersecting with sculpture, experimental filmmaking, DIY and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. May be repeated up to 9 hours maximum.

**Credit Hours:** 3

---

**ARTGE\_VS 7050: Performance Art**

(cross-leveled with ARTGe\_VS 4050) This studio art course will survey the practices in Performance Art and its intersections with visual and media-based art, experimental theater, music and dance. Modules will include performance and: the object, culture, the mediatized body body, culture and alternative spaces. Graded on A-F basis only.

**Credit Hours:** 3

---

**ARTGE\_VS 7085: Problems in Art**

Individual study in a subject area to be proposed by the student and approved by the instructor. The student will meet periodically on a regular basis with the instructor to review progress on the work assigned. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** for students with strong preparation in Art; departmental consent

---

**ARTGE\_VS 8000: Graduate Art - Advanced Studio Practice and Critique**

Continuation of ARTGE\_VS 7000. Art studio practice with emphasis on individual creative expression. Course may be repeated for up to 15 credit hours. Expendable materials fee required. Graded on A-F basis only. Prerequisites: Graduate Art Major

**Credit Hours:** 3

---

**ARTGE\_VS 8001: Topics in Art**

Special studies in graduate level studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARTGE\_VS 8070: Graduate Art - Theory and Context**

Contextualizing artwork in culture, history, and theory. May be repeated up to 18 hours for credit. Graded on A-F basis only

**Credit Hours:** 3

**Prerequisites:** Graduate Art standing

---

**ARTGE\_VS 8090: MFA Thesis Exhibition Documentation**

Preparation of materials deemed necessary to document in a permanent form the thesis exhibition. Credit will be granted upon the satisfactory completion of the document, which will be retained by the Department of Art. Required of all MFA candidates. Graded on S/U basis only.

**Credit Hour:** 1

---

---

**ARTGE\_VS 9010: Graduate Studio Seminar**

Practical and philosophical concerns of the visual artist. Mandated for all MFA candidates.

**Credit Hours:** 2

---

**Art Graphic Design - Visual Studies Courses**

**ARTGD\_VS 1400: Beginning Digital Imaging**

Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

**Credit Hour:** 1

---

**ARTGD\_VS 2400: Advanced Digital Imaging**

Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** ARTGD\_VS 1400

---

**ARTGD\_VS 2410: Graphic Design I**

Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Course concludes with portfolio review for admission to ARTGD\_VS2420 and further Graphic Design Courses. Payment of expendable materials fee is required.

**Credit Hours:** 3

**Prerequisites:** ARTGE\_VS 1030, ARTDR\_VS 1050

**Recommended:** ARTGE\_VS 1040

---

**ARTGD\_VS 2420: Graphic Design II**

Introduction to the discipline, function and tradition of typography. Topics include communication, text intensive documents, legibility/readability, movement, language sequence and information hierarchy. Payment of expendable materials fee is required. Enrollment is limited to students who have completed ARTGD\_VS 2410 and successful completion of the graphic design portfolio review.

**Credit Hours:** 3

**Prerequisites:** consent of instructor

---

**ARTGD\_VS 2430: Calligraphy and Hand Lettering**

Technical and historical instruction on several calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters, development of personal style and creative expression in projects.

**Credit Hours:** 3

**Prerequisites:** ARTGE\_VS 1030, ARTDR\_VS 1050 or instructor's consent

---

**ARTGD\_VS 2440: Basic Design and Visual Communications**

This course is a hands-on course that utilizes lectures, readings, exercises and projects to help non-majors explore graphic design and improve their ability to communicate using design. Students will be introduced to topics including graphic design in society, visual hierarchy,

grid, typography, color theory, image usage, UI, UX, digital platforms and organizing principles of design. This course is intended for students who have an interest in design but do not plan on becoming practicing designers, there are no prerequisites.

**Credit Hours:** 3

---

**ARTGD\_VS 3410: Graphic Design III**

Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 2420

---

**ARTGD\_VS 3430: Advanced Calligraphy and Hand Lettering**

Continuation of ARTGD\_VS 2430. Students will expand their skills including study of more complex alphabets and further their personal style. Emphasis placed on both mastery of letters and creative exploration in projects. Repeatable to 6 credits.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 2430

---

**ARTGD\_VS 3440: Packaging Design**

This course will look at the discipline of packaging design from a three-dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required. Repeatable to 6 credits.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 3410

---

**ARTGD\_VS 3441: The History of Graphic Design**

Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today's visual communication.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARTGD\_VS 3442: Design for Corporate Identity and Branding**

Planning, strategy, and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required. Repeatable to 6 credits.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 3410

---

**ARTGD\_VS 3443: Letterpress**

This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing

processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**ARTGD\_VS 4400: Graphic Design IV**

Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 3410

---

**ARTGD\_VS 4410: Graphic Design V**

Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 3420

---

**ARTGD\_VS 4485: Problems in Graphic Design**

Problems in Graphic Design.

**Credit Hour:** 1-3

**Prerequisites:** nstructor's consent required

---

**ARTGD\_VS 7400: Graduate Graphic Design**

Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student's individual investigations. Repeatable to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARTGD\_VS 7485: Problems in Graphic Design**

Graduate level work in graphic design.

**Credit Hour:** 1-3

**Prerequisites:** ARTGD\_VS 4410 and departmental consent

---

**ARTGD\_VS 8400: Graduate Graphic Design II**

Continuation of ARTGD\_VS 7400. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ARTGD\_VS 7400 or equivalent

---

## Art History - Visual Studies Courses

**ARH\_VS 1005: Undergraduate Topics in Visual Studies - Art History - Humanities**

Special studies in Visual Studies - Art History.

**Credit Hour:** 1

---

**ARH\_VS 1010: Introduction to Museum of Art and Archaeology, UMC**

This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of the Museum, to its operation and to its collection. Guest lecturers from the from the Museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.

**Credit Hour:** 1

---

**ARH\_VS 1020: Giotto and the Arena Chapel**

This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.

**Credit Hour:** 1

---

**ARH\_VS 1020H: Giotto and the Arena Chapel - Honors**

This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.

**Credit Hour:** 1-11

**Prerequisites:** Honors eligibility required

---

**ARH\_VS 1030: Early Works of Michelangelo**

This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.

**Credit Hour:** 1

---

**ARH\_VS 1040: Rembrandt**

This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special attention is give to the appreciation of his art by his contemporaries.

**Credit Hour:** 1

---

**ARH\_VS 1105: Undergraduate Topics in Visual Studies - Art History - Humanities**

Special studies in Visual Studies - Art History.

**Credit Hours:** 3

---

**ARH\_VS 1110: Ancient and Medieval Art**

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

**Credit Hours:** 3

---

**ARH\_VS 1110H: Ancient and Medieval Art - Honors**

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

---

**ARH\_VS 1110W: Ancient and Medieval Art - Writing Intensive**

Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

**Credit Hours:** 3

---

**ARH\_VS 1120: Renaissance through Modern Art**

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

**Credit Hours:** 3

---

**ARH\_VS 1120H: Renaissance through Modern Art - Honors**

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ARH\_VS 1120W: Renaissance through Modern Art - Writing Intensive**

Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

**Credit Hours:** 3

---

**ARH\_VS 1130: Introduction to the History of Art**

Introduction to the history of art, including a survey of major historical eras and global contexts, discussion of prominent works of art and methods of analysis.

**Credit Hours:** 3

**Recommended:** ARTGE\_VS 1020, or its equivalent

---

**ARH\_VS 1130W: Introduction to the History of Art - Writing Intensive**

Introduction to the history of art, including a survey of major historical eras and global contexts, discussion of prominent works of art and methods of analysis.

**Credit Hours:** 3

**Recommended:** ARTGE\_VS 1020, or its equivalent

---

**ARH\_VS 1230: Introduction to Asian Arts**

(same as HIST 1820, REL\_ST 1820, S\_A\_ST 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

**Credit Hours:** 3

---

**ARH\_VS 2005: Topics in Visual Studies - Art History - Humanities**

Study of special topics in Visual Studies - Art History.

**Credit Hour:** 1-3

---

**ARH\_VS 2005W: Topics in Visual Studies - Art History - Humanities - Writing Intensive**

Study of special topics in Visual Studies - Art History.

**Credit Hour:** 1-3

---

**ARH\_VS 2150: The Art of the Book**

Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.

**Credit Hours:** 3

---

**ARH\_VS 2150W: The Art of the Book - Writing Intensive**

Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.

**Credit Hours:** 3

---

**ARH\_VS 2720: African-American Visual Culture**

(same as BL\_STU 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.

**Credit Hours:** 3

---

**ARH\_VS 2720W: African-American Visual Culture - Writing Intensive**

(same as BL\_STU 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.

**Credit Hours:** 3

---

**ARH\_VS 2830: American Art and Architecture**

Architecture, sculpture, painting of America from 17th century to present day.

**Credit Hours:** 3

---

**ARH\_VS 2830W: American Art and Architecture - Writing Intensive**

Architecture, sculpture, painting of America from 17th century to present day.

**Credit Hours:** 3

---

**ARH\_VS 2850: Introduction to Visual Culture**

Introduction to the problems of understanding, analyzing, and writing about visual culture.

**Credit Hours:** 3

---

**ARH\_VS 2850H: Introduction to Visual Culture - Honors**

Introduction to the problems of understanding, analyzing, and writing about visual culture.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ARH\_VS 2850HW: Introduction to Visual Culture - Honors/Writing Intensive**

Introduction to the problems of understanding, analyzing, and writing about visual culture.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ARH\_VS 2850W: Introduction to Visual Culture - Writing Intensive**

Introduction to the problems of understanding, analyzing, and writing about visual culture.

**Credit Hours:** 3

---

**ARH\_VS 2860: The Lives of Objects**

Introduction to the problems of understanding, analyzing and writing about decorative arts, design history, and material culture.

**Credit Hours:** 3

---

**ARH\_VS 2860W: The Lives of Objects - Writing Intensive**

Introduction to the problems of understanding, analyzing and writing about decorative arts, design history, and material culture.

**Credit Hours:** 3

---

**ARH\_VS 2960: Special Readings in Visual Studies - Art History**

Independent readings and research selected in consultation with supervisory faculty.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARH\_VS 3005: Topics in Visual Studies - Art History**

Selected studies in various facets of a Visual Studies - Art History.

**Credit Hour:** 1-3

---

**ARH\_VS 3005H: Topics in Visual Studies - Art History- Humanities - Honors**

Selected studies in various facets of Visual Studies - Art History. Enrollment limited to students with Honor's eligibility.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARH\_VS 3530: Late Medieval Art**

General survey of European art and architecture from the 11th through the 14th centuries.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1110 or equivalent

---

**ARH\_VS 3530W: Late Medieval Art - Writing Intensive**

General survey of European art and architecture from the 11th through the 14th centuries.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1110 or equivalent

---

**ARH\_VS 3620: Italian Renaissance Art**

General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1110 or ARH\_VS 1120 or equivalent

---

**ARH\_VS 3630: Northern Renaissance Art**

General survey of northern European art and architecture from the late 14th through the late 16th century.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3630W: Northern Renaissance Art - Writing Intensive**

General survey of northern European art and architecture from the late 14th through the late 16th century.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3640: Baroque Art**

General survey of 17th century European architecture, painting and sculpture.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3720: Cities in the Western Imagination**

Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.

**Credit Hours:** 3

---

**ARH\_VS 3730: Eighteenth Century European Art**

General survey of 18th-century European painting, sculpture and architecture.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3730W: Eighteenth Century European Art - Writing Intensive**

General survey of 18th-century European painting, sculpture and architecture.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3740: Nineteenth-Century European Art**

General survey of 19th-century European painting, sculpture and architecture.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3740W: Nineteenth-Century European Art - Writing Intensive**

General survey of 19th-century European painting, sculpture and architecture.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3750: Modern Art in Europe and America**

General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3760: Contemporary Art**

General survey of painting, sculpture, and architecture from the Second World War to the present.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3780: Architecture in Film**

(same as FILMS\_VS 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

**Credit Hours:** 3

---

**ARH\_VS 3785: Arts and Artists on Film**

(same as FILMS\_VS 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

**Credit Hours:** 3

---

**ARH\_VS 3790: Indian Cinema**

1(same as ANTHRO 3490, S\_A\_ST 3490, FILMS\_VS 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

**Credit Hours:** 3

**Recommended:** Sophomore standing or higher

---

**ARH\_VS 3830: American Art and Culture, 1500-1820**

General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or equivalent

---

**ARH\_VS 3840: American Art and Culture, 1820-1913**

General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or ARH\_VS 2830 or equivalent

---

**ARH\_VS 3850: American Art and Culture, 1913-Present**

General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present.

**Credit Hours:** 3

**Recommended:** ARH\_VS 1120 or ARH\_VS 2830 or equivalent

---

**ARH\_VS 4005: Topics in Visual Studies - Art History-Humanities**

Special studies in art history/archaeology; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 4120: Gender and the Arts**

(same as WGST 4120; cross-leveled with WGST 7120, VS\_ARH 7120). Exploration of the relationship between the visual arts and constructions of gender and sexuality in selected eras.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4160: Global Encounters in Art History**

(cross-leveled with ARH\_VS 7160). This course explores art created as a result of contact between geographical regions across the globe. It contributes to the project of globalizing art history, namely reorienting art history's traditionally Euro-American focus to an approach that involves cultures from diverse regions of the world.

**Credit Hours:** 3

**Prerequisites:** ARH\_VS 1110, ARH\_VS 1120, ARH\_VS 1130 or consent of instructor

---

**ARH\_VS 4530: Romanesque Art and Architecture**

(cross-leveled with ARH\_VS 7530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4540: Gothic Art and Architecture**

(cross-leveled with ARH\_VS 7540). Exploration of topics in the art and architecture of the 12th through the 14th century.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4630: The Renaissance Artist**

(cross-leveled with VS\_ARH 7630). Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4640: Renaissance and Baroque Architecture**

(cross-leveled with ARH\_VS 7640). Problems in European architectural history from the 15th through the 18th century.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4650: Venetian Painting**

(cross-leveled with ARH\_VS 7650). Survey of Venetian Painting from the 14th through the 18th century.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

---

**ARH\_VS 4660: Art and Ideas in the Northern Renaissance**

(cross-leveled with ARH\_VS 7660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4710: The Arts of the Rococo**

(cross-leveled with ARH\_VS 7710). This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were deflected through the periods' art an architecture. Students will pursue a research topic on rococo art for their semester project.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4720: Revolution and Romanticism: Art C. 1800**

(cross-leveled with ARH\_VS 7720). This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4740: Modern Architecture**

(cross-leveled with ARH\_VS 7740). Problems in the history of architecture from the late 18th century to the present.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4750: Contemporary World Architecture**

(cross-leveled with ARH\_VS 7750). This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4760: Modern Sculpture**

(cross-leveled with ARH\_VS 7760). Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

---

**ARH\_VS 4780: Advanced Course in Contemporary Art**

(cross-leveled with ARH\_VS 7780). Topics in European and American painting and sculpture after 1950.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4820: American Material Culture**

(cross-leveled with ARH\_VS 7820). An exploration of American material culture from a multidisciplinary perspective.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4840: American Architecture**

(cross-leveled with ARH\_VS 7840). An exploration of architecture and urbanism from the colonial period to the present.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4960: Special Readings in Visual Studies - Art History**

Independent readings and research selected in consultation with supervisory faculty.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4970: Capstone: Visual Studies - Art History**

Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.

**Credit Hour:** 1

**Prerequisites:** instructor's consent

---

**ARH\_VS 4980: Internship**

A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4996: Honors Proseminar I**

Research methods, bibliography, use and criticism of source material.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 4999: Honors Reading and Research I**

Individual research projects in preparation of senior thesis.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

---

**ARH\_VS 7005: Topics in Visual Studies - Art History**

Special studies in Visual Studies - Art History; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 7120: Gender and the Arts**

(same as WGST 7120; cross-leveled with WGST 4120, ARH\_VS 4120). Exploration of the relationship between the visual arts and constructions of gender and sexuality in selected eras.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7130: Museum Studies**

Functions and history of museums and interrelations among departments, including those of director, curator, registrar, education, conservation, and marketing. Topics include acquisitions policies; public outreach; role of architecture; and philosophical and legal issues pertaining to administration of museums.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7160: Global Encounters in Art History**

(cross-leveled with ARH\_VS 4160). This course explores art created as a result of contact between geographical regions across the globe. It contributes to the project of globalizing art history, namely reorienting art history's traditionally Euro-American focus to an approach that involves cultures from diverse regions of the world.

**Credit Hours:** 3

---

**ARH\_VS 7170: Historic Preservation**

(same as HIST 7450; cross-leveled with HIST 4540). Survey of the historic preservation movement and techniques by faculty and guest speakers active in the field.

**Credit Hour:** 3-9

**Prerequisites:** instructor's consent

---

**ARH\_VS 7530: Romanesque Art and Architecture**

(cross-leveled with VS\_ARH 4530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7540: Gothic Art and Architecture**

(cross-leveled with VS\_ARH 4540). Exploration of topics in the art and architecture of the 12th through the 14th century.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7630: The Renaissance Artist**

(cross-leveled with VS\_ARH 4630). Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7640: Renaissance and Baroque Architecture**

(cross-leveled with VS\_ARH 4640). Problems in European architectural history from the 15th through the 18th century.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**ARH\_VS 7650: Venetian Painting**

(cross-leveled with VS\_ARH 4650). Survey of Venetian painting from the 14th through the 18th century.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7660: Art and Ideas in the Northern Renaissance**

(cross-leveled with VS\_ARH 4660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7670: Baroque Figural Arts**

(cross-leveled with VS\_ARH 4670). Painting and sculpture of Italy in the 17th century.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7710: The Arts of the Rococo**

(cross-leveled with VS\_ARH 4710). This course explores European art from 1710 to 1770, beginning with an exploration of the rococo as an ornamental language and then moving to case studies of artists, media, and objects in order to assess how social identities were expressed through design.

**Credit Hours:** 3

**Prerequisites:** VS\_ARH 8110 and instructor's consent

---

**ARH\_VS 7720: Revolution and Romanticism: Art Circa 1800**

(cross-leveled with VS\_ARH 4720). This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.

**Credit Hours:** 3

**Prerequisites:** VS\_ARH 8110 and instructor's consent

---

**ARH\_VS 7730: Realism Through Post-Impressionism**

(cross-leveled with VS\_ARH 4730). Styles and issues in nineteenth-century art.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7740: Modern Architecture**

(cross-leveled with VS\_ARH 4740). Problems in the history of architecture from the late 18th century to the present.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7750: Contemporary World Architecture**

(cross-leveled with VS\_ARH 4750). This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective, topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films and field trips. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** VS\_ARH 1120 and instructor's consent

---

**ARH\_VS 7760: Modern Sculpture**

(cross-leveled with VS\_ARH 4760). Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**ARH\_VS 7780: Advanced Course in Contemporary Art**

(cross-leveled with ARH\_VS 4780). Topics in European and American painting and sculpture after 1950.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7820: American Material Culture**

(cross-leveled with VS\_ARH 4820). An exploration of American material culture from a multidisciplinary perspective.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7840: American Architecture**

(cross-leveled with VS\_ARH 4840). An exploration of architecture from the colonial period to the present.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 7960: Special Readings in Art History or Archaeology**

Independent readings and research selected in consultation with supervisory faculty.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 7980: Internship in Art History and Archaeology**

A one semester or full summer intensive internship with specific projects and responsibilities to be arranged by the student and the program director.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 8070: Master's Tutorial**

Consultation with faculty advisory and preparation of a scholarly essay based on a graduate research paper. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** VS\_ARH 8110, and other graduate courses in Art History & Archaeology

---

**ARH\_VS 8080: Readings for MA Thesis in Art History and Archaeology**

Reading, critical evaluation of literature of special fields of art history and/or archaeology.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 8090: Master's Thesis Research and Thesis**

Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 8110: Introduction to Graduate Study**

Research methods, bibliography, use and criticism of source material. Required of graduate students in Art History and Archaeology who have not had VS\_ARH 4996.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**ARH\_VS 8120: Theories and Methodologies in Art History and Archaeology**

Literature of art and archaeology in terms of works of leading European and American art historians, archaeologists.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 8130: Museum Studies Seminar**

Appropriate means for care and display of artifacts. Topics include: accessioning, cataloging, retrieval of information, and laws and ethics of collecting; the museum environment and its monitoring; condition reports, shipping and storage, and conservation. Field trips.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 8170: Historic Preservation Seminar**

Research techniques to solve research problems and conduct field recording in historic preservation, material culture, historic architecture, and cultural heritage studies.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 8520: Seminar in Medieval Art and Archaeology**

Specific subjects of study will be assigned to students for presentation in relation to broader questions of the cultural/ historical phenomena of the time, from ca 700 to ca 1400.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

---

**ARH\_VS 8620: Seminar in Renaissance Art**

Special subjects of study assigned for Northern or Southern Renaissance for individual research, discussion of reports by seminar members.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ARH\_VS 8710: Seminar in 18th Century Art**

Special subjects of study in 18th century art assigned for individual research; reports to be presented and discussed by seminar members.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 8750: Seminar in Modern and Contemporary Art**

Special subjects of study assigned for individual research; discussion of reports by seminar members.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 8800: Seminar in American Art**

Special subjects of study assigned for individual research; discussion of reports by seminar members.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 9080: Readings for PhD Dissertation in Art History and Archaeology**

Reading, critical evaluation of literature of special fields of art history and/or archaeology.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ARH\_VS 9090: Doctoral Dissertation Research in Art History**

Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

## Art Painting - Visual Studies Courses

**ARTPA\_VS 2500: Beginning Painting**

Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

**Credit Hours:** 3

---

**ARTPA\_VS 2510: Beginning Watercolor Painting**

Theory, practice of painting in water color from still life, landscape, figure. Expendable materials fee required.

**Credit Hours:** 3

---

**ARTPA\_VS 3500: Intermediate Painting**

This is course provides a bridge between beginning and advanced painting. Student work will build on the structured assignments in the

beginning course (ARTPA\_VS 2500) to the more self-directed work expected in advanced art courses. Students will develop skills and critical thinking around how to make paintings that are visually dynamic yet also conceptually interesting and innovative. This course begins the process of creating a cohesive project in painting and a body of work as a professional artist. May be repeated to 9 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTPA\_VS 2500

---

**ARTPA\_VS 3510: Intermediate Watercolor Painting**

Continuation of ARTPA\_VS 2510. Theory and practice of painting in watercolor. May be repeated to 9 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTPA\_VS 2510

---

**ARTPA\_VS 4500: Advanced Painting: Portfolio**

This course will provide an intensive experience in the development of a portfolio of artwork in painting. Students will explore the connections between their work and contemporary art. May be repeated to 15 hours maximum. Cross-listed with other advanced art classes so students may be working in a range of media. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ARTPA\_VS 3500

---

**ARTPA\_VS 4510: Advanced Watercolor Painting**

(cross-leveled with ART\_PNT 7510). Advanced problems in watercolor. May repeat to 15 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ART\_PNT 3510

---

**ARTPA\_VS 4585: Problems in Painting**

Problems in Painting. Enrollment limited to students who have taken ARTPA\_VS 4500.

**Credit Hour:** 1-3

**Prerequisites:** Instructor consent

---

**ARTPA\_VS 7500: Graduate Painting**

Advanced study. Emphasis on individual creative expression. May repeat to 18 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** graduate Art major

---

**ARTPA\_VS 7585: Problems in Painting**

**Credit Hour:** 1-3

**Prerequisites:** ART\_PNT 7500 and departmental consent

---

**ARTPA\_VS 8500: Advanced Graduate Painting**

Continuation of ART\_PNT 7500. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ART\_PNT 7500 or equivalent

---

---

**ARTPA\_VS 8570: Graduate Painting - Theory and Context**

Contextualizing artwork in culture, history, and theory. Repeatable to 18 hours for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Graduate Art standing

---

**ARTPA\_VS 8585: Problems in Painting II**

Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** For students with strong preparation in Art; departmental consent; ART\_PNT 7585

---

## Art Photo - Visual Studies Courses

**ARTPH\_VS 2600: Beginning Photography**

Introduction to photography within an art context; digital workflow including use of camera, software, and digital output methods; and a survey of both contemporary and historical topics related to visual and conceptual concerns. Digital camera with RAW capability and manual aperture + shutter controls required. DSLR recommended. Payment of expendable materials fee required.

**Credit Hours:** 3

**Recommended:** ARTGE\_VS 1030, ARTGE\_VS 1040, ARTDR\_VS 1050

---

**ARTPH\_VS 3600: Intermediate Photography**

Exploration of black and white film photography centering on the 4x5 inch large format camera. All camera and darkroom equipment is provided by the program. Students will learn traditional analog developing and printing as well as methods for digitizing film and large format inkjet printing from scanned negatives. Additionally, students transition to more independently conceived artwork. Payment of expendable material fee is required.

**Credit Hours:** 3

**Prerequisites:** ARTPH\_VS 2600

---

**ARTPH\_VS 4600: Advanced Photography**

Advanced studio course in photography focuses on a process of production, critique, and revision. Students pursue a self-directed body of work made in direct relationship to photography's expanding definition; its past and present position within the the arts; and within the diverse landscape of imaging practices and visual culture. Payment of expendable material fee is required. May repeat up to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** ARTPH\_VS 2600 and ARTPH\_VS 3600

---

**ARTPH\_VS 4685: Problems in Photography**

Supervised research in creative photography.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent

---

**ARTPH\_VS 7600: Graduate Photography**

Advanced technical study with emphasis on development of the individual student's creative ideas. Payment of expendable materials expense is required. May repeat to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** ART\_PHOT 3600 and consent required

---

**ARTPH\_VS 7685: Problems in Photography**

Supervised research in creative photography.

**Credit Hour:** 1-3

**Prerequisites:** ART\_PHOT 4410

---

**ARTPH\_VS 8600: Graduate Photography II**

Continuation of ART\_PHOT 7600. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ART\_PHOT 7600 or equivalent

---

## Art Printmaking - Visual Studies Courses

**ARTPR\_VS 2700: Introduction to Etching and Relief Printmaking**

Introduction to etching and relief printing techniques to create original works of art. Processes include copper and laser etching, linocut, woodcut, drypoint, collography, mezzotint, and color printing. This course engages concepts of originality, reproduction, pop culture and the cultural record. Expendable materials fee required.

**Credit Hours:** 3

---

**ARTPR\_VS 2730: Introduction to Screen Printing**

Introduction to large format screen printing to create original works of art. Processes include CMYK reduction, photo-based screen printing, screen building and registration. Students will be exposed to an historical focus on the history of screen-printing as central to Pop Art and social critique. Expendable materials fee required.

**Credit Hours:** 3

---

**ARTPR\_VS 3700: Intermediate Printmaking**

Intermediate printmaking focuses on strengthening all printmaking processes (Etching, Relief, Screen Printing, Lithography, Photo mechanics, Collagraphy and Monotype) towards an emphasis in concept, critique and portfolio building. Expendable materials fee required

**Credit Hours:** 3

**Recommended:** ART\_PRNT 2700, ART\_PRNT 2730

---

**ARTPR\_VS 4700: Advanced Printmaking**

An advanced study of all printmaking processes with an emphasis in experimentation towards finalizing a fully realized fine art portfolio for a career in art. This class focuses on the refinement of all printmaking processes, critique and individual creative expression. May be repeatable to 15 hours. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** ART\_PRNT 2700 or ART\_PRNT 2730 and ART\_PRNT 3700

---

---

**ARTPR\_VS 4785: Problems in Printmaking**

An intense independent study of printmaking processes designed around the student's particular academic goals.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent required

---

**ARTPR\_VS 7700: Graduate Printmaking**

Graduate level study in all processes of printmaking with a focus on exploring thesis themes within the history and concept of print based art. May repeat to 15 hours maximum. Expendable materials fee required.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**ARTPR\_VS 7785: Problems in Printmaking**

An intense independent study designed around the graduate student's particular academic goals.

**Credit Hour:** 1-3

**Prerequisites:** ART\_PRNT 7700 and departmental consent

---

**ARTPR\_VS 8700: Graduate Printmaking II**

Continuation of ART\_PRNT 7700. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ART\_PRNT 7700 or equivalent

---

## Art Sculpture - Visual Studies Courses

**ARTSC\_VS 2800: Beginning Sculpture**

Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required.

**Credit Hours:** 3

---

**ARTSC\_VS 2810: Experimental Media I**

Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester.

**Credit Hours:** 3

**Prerequisites:** permission of instructor

---

**ARTSC\_VS 2820: Beginning Welding And Casting**

This course is intended to foster critical thinking, creative problem solving, and cultural/visual literacy through the introduction of sculptural welding and metal casting techniques. Projects will address the sculptural methods of manipulation, addition, and substitution as well as the principles of three-dimensional design. Students will become conversant with MIG and gas welding as well as centrifugal and ceramic shell casting. The relationship of form and content will be discussed during class critiques. Graded on A-F basis only.

**Credit Hours:** 3

---

**ARTSC\_VS 3800: Intermediate Sculpture**

Continuation of ART\_SCUL 2800. This course is designed to allow the student to pursue self-initiated imagery and ideas through the manipulation of mass and volume in time/space. A wide range of materials and techniques are available including the following: substitution casting (resin or bronze), subtraction (stone or wood),

manipulation (terra-cotta or plaster), addition (welding, mixed media or assemblage) and/or time (video or performance). The relationship of form and content will be discussed during class critiques.

**Credit Hours:** 3

**Prerequisites:** ART\_SCUL 2800 or ART\_SCUL 2820

---

**ARTSC\_VS 4800: Advanced Sculpture**

This course will build skills acquired in ART\_SCUL 3800. Includes welding, casting, carving and assemblage with emphasis on the development of a personal visual language. May repeat to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** ART\_SCUL 3800

---

**ARTSC\_VS 4810: Experimental Media III**

Continuation of ART\_SCUL 3810. May repeat to 15 hours maximum.

**Credit Hours:** 3

**Prerequisites:** ART\_SCUL 3810

---

**ARTSC\_VS 4885: Problems in Sculpture**

Problems in Sculpture.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

**ARTSC\_VS 7800: Graduate Sculpture**

Payment of expendable materials expense is required. May repeat to 15 hours maximum.

**Credit Hours:** 3

---

**ARTSC\_VS 7885: Problems in Sculpture**

Problems in Sculpture.

**Credit Hour:** 1-3

**Prerequisites:** ARTSC\_VS 7800 and instructor's consent required

---

**ARTSC\_VS 8800: Graduate Sculpture II**

Continuation of ARTSC\_VS 7800. Repeatable to 15 hours.

**Credit Hours:** 3

**Prerequisites:** ARTSC\_VS 7800 or instructor's consent required

---

## Astronomy Courses

**ASTRON 1010: Introduction to Astronomy**

Survey of methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques.

**Credit Hours:** 4

**Recommended:** MATH 1100 or MATH 1120 or equivalent

---

**ASTRON 1020: Introduction to Laboratory Astronomy**

Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques.

**Credit Hours:** 2

**Recommended:** MATH 1100 or MATH 1120

---

**ASTRON 1200: History of Astronomy**

Astronomy is the oldest and yet the newest science discipline that has far-reaching impact on our civilization. This course aims to provide a brief historical account of the major milestones in Astronomy that have led to our current understanding of the universe. Graded on A-F basis only.

**Credit Hours:** 3

---

**ASTRON 3010: Introduction to Modern Astrophysics**

(same as PHYSCS 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**ASTRON 4020: Astrophysical Techniques**

(same as PHYSCS 4020; cross-leveled with PHYSCS 7020. ASTRON 7020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**ASTRON 4180: Solar System Science**

(same as PHYSCS 4180, GEOL 4180; cross-leveled with GEOL 7180). Investigates physical states, interior structures and comparative geology of solar system bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

**Credit Hours:** 3

**Prerequisites:** ASTRON 3010

**Recommended:** MATH 1700

---

**ASTRON 4210: Contributions to Science from Under-represented Groups**

(same as PHYSCS 4210; cross-leveled with ASTRON 7210, PHYSCS 7210). STEM fields are amongst the areas of human endeavor that struggle with increasing their human diversity. Teaching of science rarely discusses the contributions or marginalizations of under-represented groups. Meanwhile, many women and indigenous cultures have contributed to progress in STEM but are often not recognized. In this course we will investigate these contributions, and the lack of recognition both historically and in the present day. The aim is to provide students with a better understanding of the advantages of and challenges in inclusive, diverse science. Initially the course will use astronomy as its frame of reference because the sky was one of the earliest laboratories and consequently it has a long history with many indigenous cultures developing their own cosmologies and ways of studying the sky. As we discuss the role of Indigenous peoples, people of color, and women, we will investigate the role of power structures as well as systemic biases in the marginalization of these groups. This class will be strongly

discussion oriented, with assessment based on the development throughout the semester, of a final project. As many students will be pursuing graduate school in STEM fields, the final project will be to develop a Broader Impact statement. Many federal funding agencies request or even require that research grants include a component aimed at 'broadening participation', i.e. making STEM more inclusive and diverse. Student will work on a multipart assignment that will culminate in a Broader Impact statement - that may well be directly applicable to an NSF GRFP (Graduate Research Fellowship Program) or NSF Post-Doctoral Fellowship. In addition to the Broader Impact statement - students will give presentations and learn how to be more inclusive in their presentation design, following the principles of Inclusive Design for Learning. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760 or PHYSCS 1200 or instructors consent

---

**ASTRON 4250: Stellar Astrophysics**

(same as PHYSCS 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.

**Credit Hours:** 3

**Prerequisites:** ASTRON 3010

---

**ASTRON 4350: Galactic Astronomy**

(same as PHYSCS 4350; cross-leveled with ASTRON 7350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**ASTRON 4360: Extragalactic Astronomy**

(same as PHYSCS 4360; cross-leveled with ASTRON 7360, PHYSCS 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**ASTRON 4460: Interstellar Medium**

(same as PHYSCS 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

**Credit Hours:** 3

**Prerequisites:** ASTRON 3010

---

**ASTRON 4550: Cosmochemistry**

(same as PHYSCS 4550; cross-leveled with ASTRON 7550, PHYSCS 7550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

**Credit Hours:** 3

**Prerequisites:** ASTRON 3010

---

**ASTRON 4950: Undergraduate Research in Astronomy**

Special studies in astronomy; covers subjects not included in courses regularly offered.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ASTRON 4960: Senior Thesis in Astronomy**

Special studies for senior undergraduate students in astronomy. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research. Departmental consent required for repetition. Enrollment limited to students who have completed 3 credit hours of ASTRON 4950 or PHYSICS 4950.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ASTRON 7020: Astrophysical Techniques**

(same as PHYSICS 7020; cross-leveled with PHYSICS 4020, ASTRON 4020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

**Credit Hours:** 3

---

**ASTRON 7180: Solar System Science**

(same as PHYSICS 7180, GEOL 7180; cross-leveled with ASTRON 4180, PHYSICS 4180, GEOL 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 1220 or PHYSICS 2760 or instructor's consent

---

**ASTRON 7210: Contributions to Science from Under-represented Groups**

(same as PHYSICS 7210; cross-leveled with PHYSICS 4210, ASTRON 4210). STEM fields are amongst the areas of human endeavor that struggle with increasing their human diversity. Teaching of science rarely discusses the contributions or marginalizations of under-represented groups. Meanwhile, many women and indigenous cultures have contributed to progress in STEM but are often not recognized. In this course we will investigate these contributions, and the lack of recognition both historically and in the present day. The aim is to provide students with a better understanding of the advantages of and challenges in inclusive, diverse science. Initially the course will use astronomy as its frame of reference because the sky was one of the earliest laboratories and consequently it has a long history with many indigenous cultures developing their own cosmologies and ways of studying the sky. As we discuss the role of Indigenous peoples, people of color, and women, we will investigate the role of power structures as well as systemic biases in the marginalization of these groups. This class will be strongly discussion oriented, with assessment based on the development throughout the semester, of a final project. As many students will be pursuing graduate school in STEM fields, the final project will be to develop a Broader Impact statement. Many federal funding agencies request or even require that research grants include a component aimed at 'broadening participation', i.e. making STEM more inclusive and

diverse. Student will work on a multipart assignment that will culminate in a Broader Impact statement that may well be directly applicable to an NSF GRFP (Graduate Research Fellowship Program) or NSF Post-Doctoral Fellowship. In addition to the Broader Impact statement - students will give presentations and learn how to be more inclusive in their presentation design, following the principles of Inclusive Design for Learning. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2760 or PHYSICS 1200 or instructors consent

---

**ASTRON 7350: Galactic Astronomy**

(cross-leveled with PHYSICS 4350, ASTRON 4350). The course aims to introduce students to the basic knowledge of our Galaxy: how it looks like, how it might be formed, and how we have gained knowledge about it through observations. The main topics include distance measurement of stars, evolution of stars, interstellar medium, star clusters, the structure of Galaxy. The course will also briefly touch on 'Near-field Cosmology' (sometimes referred to as 'Galactic Archeology'), i.e., what we can infer from our Galaxy the general picture of galaxy formation and evolution.

**Credit Hours:** 3

---

**ASTRON 7360: Extragalactic Astronomy**

(same as PHYSICS 7360; cross-leveled with ASTRON 4360, PHYSICS 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2760

---

**ASTRON 7550: Cosmochemistry**

(same as PHYSICS 7550; cross-leveled with ASTRON 4550, PHYSICS 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

**Credit Hours:** 3

**Prerequisites:** ASTRON 3010

---

**ASTRON 7750: Interstellar Medium**

(same as PHYSICS 7750; cross-leveled with ASTRON 4750, PHYSICS 4750). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 1220 or PHYSICS 2760

---

**ASTRON 8550: Stellar Structure and Evolution**

(same as PHYSICS 8550). Reviews of atomic and molecular spectra. Investigates quantum radiation law, emission and absorption processes, radiation transfer theory, continuous and discrete line spectra of stars, stellar composition.

**Credit Hours:** 3

**Prerequisites:** ASTRON 4250, PHYSICS 4800, or instructor's consent

---

## Athletic Training Courses

### **ATHTRN 1100: Athletic Training Skills I**

Introduction to athletic training skills. Clinical observation hours required. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to Pre-Athletic Training majors only

---

### **ATHTRN 1200: Athletic Training Skills II**

Continuation of athletic training skills. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Pre-Athletic Training majors; Completion of ATHTRN 1100 with minimum grade of B-

---

### **ATHTRN 2001: Topics in Athletic Training**

Organized study of selected topics in Athletic Training. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-15

**Prerequisites:** Instructor's consent

---

### **ATHTRN 2100: Principles and Fundamentals of Athletic Training**

Introduces students to the common principles and fundamentals associated with the profession of athletic training. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Pre-Athletic Training majors

---

### **ATHTRN 2150: Athletic Training Practicum I**

The first in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; ATHTRN 1100, ATHTRN 1200, and ATHTRN 2100

---

### **ATHTRN 2250: Athletic Training Practicum II**

The second in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 2150 with minimum grade of B-

---

### **ATHTRN 2500: Elementary Human Anatomy**

Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Pre-Athletic Training majors only

---

### **ATHTRN 2550: Examination of Cadaveric Human Anatomy**

Study of the human body utilizing cadaver specimens. Special emphasis will be placed upon the skeletal, muscular and nervous systems. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 2500 with a minimum grade of C

---

### **ATHTRN 2600: Human Physiology**

Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors only; Completion of ATHTRN 2500 with a minimum grade of C

---

### **ATHTRN 3100: Mental Health in Athletic Training**

Study of psychosocial strategies, mental health referral policies and clinical application to athletic training. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; PSYCH 1000

---

### **ATHTRN 3150: Athletic Training Practicum III**

The third in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors only; Completion of ATHTRN 2250 with a minimum grade of B-

---

### **ATHTRN 3200: Therapeutic Modalities**

Study of therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 2250 with a minimum grade of B-

---

### **ATHTRN 3250: Athletic Training Practicum IV**

The fourth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 3150 with a minimum grade of B-

---

### **ATHTRN 3300: Injury Assessment I**

A systematic approach to injury evaluation of the lower extremity and spine. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 2100 with a minimum grade of B- and ATHTRN 2500 and ATHTRN 2550 with a minimum grade of C

---

### **ATHTRN 3400: Injury Assessment II**

A systematic approach to injury evaluation of the upper extremity, spine and head. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 3300 with a minimum grade of B-

---

---

**ATHTRN 3500: Rehabilitation of Athletic Injuries**

Study of rehabilitation principles and techniques used to return active individuals to their sport/activity. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 3200 with a minimum grade of B-

---

**ATHTRN 3600: Administration of Athletic Training**

Examines the organizational and administrative aspects of Athletic Training. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors

---

**ATHTRN 3800: General Medical Conditions**

Examination of illness and disease found within the athletic population. Course graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors only, Completion of ATHTRN 3150 with a minimum grade of B-

---

**ATHTRN 4150: Athletic Training Practicum V**

The fifth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

---

**ATHTRN 4250: Athletic Training Practicum VI**

The sixth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 4150 with a minimum grade of B-

---

**ATHTRN 4500: Nutrition for Athletic Performance and Rehabilitation**

Nutritional study examining how nutrition impacts sports performance. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; PH\_THR 4420

---

**ATHTRN 4800: Medical Diagnostics and Procedures in Athletic Training**

Study of advanced medical and clinical athletic training skills. Emphasis is placed on diagnostic testing and procedural skills used in medical and athletic training facilities. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic training majors; Completion of ATHTRN 4150 with a minimum grade of B-

---

**ATHTRN 4970: Seminar in Athletic Training**

Capstone senior athletic training course. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

---

---

**ATHTRN 4970W: Seminar in Athletic Training - Writing Intensive**

Capstone senior athletic training course. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

---

**ATHTRN 7110: Examination of Cadaveric Human Anatomy**

Study of the human body utilizing cadaver specimens. This course will have didactic work as well as laboratory work in the School of Medicine Anatomy Lab. Special emphasis will be placed up on the skeletal, muscular and nervous systems. Graded on an A-F basis.

**Credit Hours:** 4

**Prerequisites:** Admission into the Graduate Athletic Training Program

---

**ATHTRN 7120: Introduction to Athletic Training Practice**

This course provides a foundation for understanding professional development as students evolve into athletic training practitioners. Students are provided an introduction to professional associations, legislative processes affecting athletic training practice, and requirements for initial and ongoing professional certification, and licensure. It will include an introduction to health care practice and how the profession of athletic training integrates into patient care. Included are basic psychomotor skills of athletic training required for prevention and management of injury. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Admission into the graduate athletic training program

---

**ATHTRN 7130: Scientific Foundations of Therapeutic Interventions**

This course will introduce students to theories of pain modulation, physiologic effects of physical trauma and the healing process, and the effect inflammation has on quality of life. Students will develop introductory rehabilitation practices with the goals of therapeutic intervention. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Admission to the Athletic Training Program

---

**ATHTRN 7210: Clinical Experience I**

The first in a sequence of clinical experiences under the direct supervision of a preceptor to further advance clinical skills and understand the practice of athletic training. This experience will occur at a traditional (college or secondary school) clinical site. Graded on S/U basis only.

**Credit Hours:** 4

**Prerequisites:** Meet all Athletic Training Program retention requirements as detailed in the Athletic Training Program Handbook

---

**ATHTRN 7220: Assessment and Management in Athletic Training I**

This course will focus on a systematic approach to injury evaluation, assessment, and diagnosis. Examination techniques for a variety of injuries and conditions will be explored using both patient based and clinician based measures. Additionally, evidence-based injury management strategies and therapeutic interventions will be discussed in relation to the treatment and rehabilitation of various conditions. This course will also focus on a patient-centered care approach to the

assessment and management of athletic injury. Graded on A-F basis only.

**Credit Hours:** 5

**Prerequisites:** Meet all Athletic Training Program retention requirements as detailed in the Athletic Training Program Handbook

---

#### **ATHTRN 7230: Emergency Management**

This course will prepare students in the acute evaluation, recognition, and management of emergent and life threatening injury and illness. An emphasis will be placed on preventing catastrophic injury and sudden death during activity. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Meet all Athletic Training Program retention requirements as detailed in the Athletic Training Program Handbook

---

#### **ATHTRN 7240: Evidence Based Practice In Health Care**

In this course, the student will learn the importance of integrating scientific evidence into clinical decision-making. This course applies evidence-based practice concepts, including literature appraisal, to clinical scenarios and patient populations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Meet all program retention requirements as detailed in the Athletic Training Program Handbook

---

#### **ATHTRN 7340: Health and Wellness Across the Lifespan**

This course will introduce students to the adaptations of the human body to mental and physical interventions to improve the well-being of the physically active across the lifespan. Graded on an A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Meet all program retention requirements as detailed in the Athletic Training Program Handbook

---

### **Atmospheric Science Courses**

#### **ATM\_SC 1050: Introductory Meteorology**

(same as GEOG 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

**Credit Hours:** 3

---

#### **ATM\_SC 1050H: Introductory Meteorology - Honors**

(same as GEOG 1050H). Physical processes of atmosphere in relation to day-to-day changes in weather.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

#### **ATM\_SC 2150: Natural Hazards**

A survey of natural hazards, including severe thunderstorms, tornadoes, flooding, tropical storms, ocean movements, earthquakes, tsunamis, volcanoes, asteroids, solar weather, managing risk and human impacts. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 1050 or equivalent, or instructor's consent

---

#### **ATM\_SC 2720: Weather Briefing**

Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry.

**Credit Hours:** 2

**Prerequisites:** ATM\_SC 1050

---

#### **ATM\_SC 2792: Weather Communication**

Methods of surface and upper air weather observation. How such data are distributed to users in the meteorological community is also addressed.

**Credit Hour:** 1

**Prerequisites:** ATM\_SC 1050; sophomore standing

---

#### **ATM\_SC 3000: Independent Study in Atmospheric Science**

Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem.

**Credit Hour:** 1-3

**Prerequisites:** ATM\_SC 1050

**Recommended:** Upper level standing

---

#### **ATM\_SC 3600: Climates of the World**

(same as GEOG 3600). A study of the world distribution of climates based on 'cause and effect' relationships. Special attention is given to the impacts of climate on humanity.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 1050 or graduate standing

---

#### **ATM\_SC 4001: Topics in Atmospheric Science**

Development of theory and applications for selected topics in atmospheric science.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor's consent

---

#### **ATM\_SC 4110: Broadcast Meteorology I**

An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** ATM\_SC 1050, ATM\_SC 2720, or equivalents

---

#### **ATM\_SC 4310: Atmospheric Thermodynamics**

(cross-leveled with ATM\_SC 7310). Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 1050, MATH 1700 (C or better), and one physics course

---

#### **ATM\_SC 4320: Atmospheric Dynamics**

(cross-leveled with ATM\_SC 7320). Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

**Credit Hours:** 4

---

**Prerequisites:** ATM\_SC 4310 or ATM\_SC 7310

---

**ATM\_SC 4350: Mesoscale Meteorology and Dynamics**

(cross-leveled with ATM\_SC 7350). Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4720 or ATM\_SC 7720 and MATH 2300

---

**ATM\_SC 4400: Micrometeorology**

(cross-leveled with ATM\_SC 7400). Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4310 or PHYSICS 2760, MATH 2300

---

**ATM\_SC 4510: Remote Sensing for Meteorology and Natural Resources**

(cross-leveled with ATM\_SC 7510). Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 1050, MATH 1500, junior standing or instructor's consent

---

**ATM\_SC 4520: Environmental Biophysics**

(same as GEOG 4520; cross-leveled with ATM\_SC 7520, GEOG 7520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas.

**Credit Hours:** 3

**Prerequisites:** College Physics and Calculus I

---

**ATM\_SC 4550: Physical Meteorology**

(cross-leveled with ATM\_SC 7550). Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.

**Credit Hours:** 3

**Prerequisites:** MATH 1500

**Recommended:** 1 year of college Physics, CHEM 1320

---

**ATM\_SC 4590: Radar Meteorology**

(cross-leveled with ATM\_SC 7590). Course concerns the theory and application of radar in meteorology. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 1110, MATH 1700, PHYSICS 2750

---

**ATM\_SC 4650: Long-Range Forecasting**

(cross-leveled with ATM\_SC 7650). Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4050 or ATM\_SC 7050 or ATM\_SC 3600

---

**ATM\_SC 4710: Synoptic Meteorology I**

(cross-leveled with ATM\_SC 7710). Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 1050, MATH 1700 (C or better)

**Recommended:** one physics course

---

**ATM\_SC 4720: Synoptic Meteorology II**

(cross-leveled with ATM\_SC 7720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 4710 or ATM\_SC 7710

---

**ATM\_SC 4720W: Synoptic Meteorology II - Writing Intensive**

(cross-leveled with ATM\_SC 7720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 4710 or ATM\_SC 7710

---

**ATM\_SC 4730: Advanced Forecasting Laboratory**

Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4720

---

**ATM\_SC 4800: Numerical Methods in Atmospheric Science and Natural Resources**

(cross-leveled with ATM\_SC 7800). Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

**Credit Hours:** 3

**Prerequisites:** senior standing

**Recommended:** Math through Calculus III

---

**ATM\_SC 4949: Internship in Meteorology**

Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** junior standing

**Recommended:** Math through Calculus III

---

**ATM\_SC 4950: Undergraduate Research in Atmospheric Science**

Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

**Credit Hour:** 1-4

**Prerequisites:** STAT 1400, MATH 1500

**Recommended:** 10 hours of Atmospheric Science courses

---

**ATM\_SC 7310: Atmospheric Thermodynamics**

(cross-leveled with ATM\_SC 4310). Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 1050, MATH 1700 (C or better), and one physics course

---

**ATM\_SC 7320: Atmospheric Dynamics**

(cross-leveled with ATM\_SC 4320). Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 4310 or ATM\_SC 7310

---

**ATM\_SC 7350: Mesoscale Meteorology and Dynamics**

(cross-leveled with ATM\_SC 4350). Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4720 or ATM\_SC 7720 and MATH 2300

---

**ATM\_SC 7400: Micrometeorology**

(cross-leveled with ATM\_SC 4400). Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4050 or ATM\_SC 7050

---

**ATM\_SC 7510: Remote Sensing for Meteorology and Natural Resources**

(cross-leveled with ATM\_SC 4510). Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Graduate student credit is dependent upon completion of additional advanced research assignments. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 1050, MATH 1500, junior standing or instructor's consent

---

**ATM\_SC 7520: Environmental Biophysics**

(same as GEOG 7520; cross-leveled with ATM\_SC 4520, GEOG 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water, and gas.

**Credit Hours:** 3

**Prerequisites:** college physics, calculus I

---

**ATM\_SC 7550: Physical Meteorology**

(cross-leveled with ATM\_SC 4550). Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.

**Credit Hours:** 3

**Prerequisites:** MATH 1500

**Recommended:** 1 year of college Physics, CHEM 1320

---

**ATM\_SC 7590: Radar Meteorology**

(cross-leveled with ATM\_SC 4590). Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSICS 2760

---

**ATM\_SC 7650: Long-Range Forecasting**

(cross-leveled with ATM\_SC 4650). Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4050 or ATM\_SC 7050 or ATM\_SC 3600

---

**ATM\_SC 7710: Synoptic Meteorology I**

(cross-leveled with ATM\_SC 4710). Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.

**Credit Hours:** 4

**Prerequisites or Corequisites:** one physics course

**Prerequisites:** ATM\_SC 1050, MATH 1700 (C or better)

---

**ATM\_SC 7720: Synoptic Meteorology II**

(cross-leveled with ATM\_SC 4720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.

**Credit Hours:** 4

**Prerequisites:** ATM\_SC 4710 or ATM\_SC 7710

---

**ATM\_SC 7800: Numerical Methods in Atmospheric Science and Natural Resources**

(cross-leveled with ATM\_SC 4800). Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.

**Credit Hours:** 3

**Prerequisites:** Math through Calculus III

---

**ATM\_SC 8001: Topics in Atmospheric Science**

Development of the theory with its application for selected topics in atmospheric science.

**Credit Hours:** 3

---

**ATM\_SC 8085: Problems in Atmospheric Science**

Independent study by graduate students in atmospheric science.

**Credit Hour:** 1-99

---

**ATM\_SC 8090: Masters Research in Atmospheric Science**

Original investigation in atmospheric science in support of a master's thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

---

**ATM\_SC 8200: Meteorological Statistics**

Applies theory of probability and frequency distribution to meteorological variables.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4050 or ATM\_SC 7050 or STAT 4710 or instructor's consent

---

**ATM\_SC 8400: Atmospheric General Circulation**

Comprehensive review of dynamical theories of general circulation with intensive discussion of current problems.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4320 or ATM\_SC 7320

---

**ATM\_SC 8450: Tropical Meteorology**

Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4710 or ATM\_SC 7710, ATM\_SC 4720 or ATM\_SC 7720 and MATH 2300; instructor's consent. Graded on A-F basis only

---

**ATM\_SC 8500: Radiation in the Atmosphere**

Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes.

**Credit Hours:** 3

**Prerequisites:** one year College Physics and MATH 1700

---

**ATM\_SC 8550: Nowcasting**

Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 8500, instructor's consent

---

**ATM\_SC 8600: Advanced Climate Dynamics**

Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4320 or ATM\_SC 7320 and ATM\_SC 8400 or ATM\_SC 3600

---

**ATM\_SC 9085: Problems in Atmospheric Science**

Independent study by graduate students in atmospheric science.

**Credit Hour:** 1-99

---

---

**ATM\_SC 9087: Seminar in Atmospheric Science**

Seminar in Atmospheric Science.

**Credit Hour:** 1-99

---

**ATM\_SC 9090: Doctoral Research in Atmospheric Science**

Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.

**Credit Hour:** 1-99

---

**ATM\_SC 9300: Introduction to Chaos Theory**

Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4320 or ATM\_SC 7320, MATH 4100

---

**ATM\_SC 9350: Advanced Dynamic Meteorology**

Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4320 or ATM\_SC 7320

---

**ATM\_SC 9590: Advanced Applications of Weather Radar**

This course will investigate quantitative uses of weather radar data that go beyond standard reflectivity and velocity image interpretation, particularly those that use new techniques such as dual-polarization. Students will develop methods to analyze and display meteorological radar data. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

**Recommended:** MATH 1700, PHYSCS 2760, INFOTC 1040 or equivalent, ATM\_SC 4590

---

**ATM\_SC 9700: Advanced Synoptic Meteorology**

Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4720 or ATM\_SC 7720

---

**ATM\_SC 9712: Convection and Lightning**

Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ATM\_SC 4710 or ATM\_SC 7710, ATM\_SC 4720 or ATM\_SC 7720, MATH 2300; instructor's consent

---

**ATM\_SC 9800: Numerical Weather Prediction**

Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes. Experience with a range of models (1-D cloud to operational PE models) stressed.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

## Biochemistry Courses

### **BIOCHM 1090: Introduction to Biochemistry**

Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CHEM 1320

**Prerequisites:** MATH 1100 or MATH 1160 or MATH 1500 and Freshman or Sophomore standing

---

### **BIOCHM 1094: Introductory Biochemistry Laboratory**

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** BIOCHM 1090; Biochemistry majors only

---

### **BIOCHM 2110: The Living World: Molecular Scale**

Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.

**Credit Hours:** 3

**Prerequisites:** for non-Biochemistry majors only

---

### **BIOCHM 2112: Biotechnology in Society**

Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

**Credit Hours:** 3

**Prerequisites:** for non-biochemistry majors only

---

### **BIOCHM 2112H: Biotechnology in Society - Honors**

Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

**Credit Hours:** 3

**Prerequisites:** for non-biochemistry majors only

---

### **BIOCHM 2480: Introduction to Macromolecular Structure and Function**

The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** C- or higher in BIOCHM 1090

**Corequisites:** CHEM 2100 or CHEM 2110

---

### **BIOCHM 2484: Macromolecular Techniques Laboratory**

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** sophomore standing; restricted to Biochemistry majors only

---

### **BIOCHM 2484H: Macromolecular Techniques Laboratory - Honors**

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing; Biochemistry majors only. Honors eligibility required

---

### **BIOCHM 2484HW: Macromolecular Techniques Laboratory - Honors/ Writing Intensive**

The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing; Biochemistry majors only. Honors eligibility required

---

### **BIOCHM 2950: Undergraduate Research in Biochemistry**

Research for students in which independent research is less than 50% of total. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

### **BIOCHM 3630: General Biochemistry**

Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism.

**Credit Hours:** 3

**Prerequisites:** CHEM 2030 or CHEM 2100

---

### **BIOCHM 4001: Topics in Biochemistry**

Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-99

---

### **BIOCHM 4120: Medicinal Plant Science**

Presentation of core topics, including an overview of plant groups with medicinal properties, botanical nomenclature, important biochemical pathways, exposure to journals, texts, and online databases that facilitate evidence-based research involving medicinal plants. Content of world-wide application. Has an international flavor. The course facilitates

students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies will also be emphasized. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CHEM 1100 or CHEM 1320

**Recommended:** BIO\_SC 1200 or BIO\_SC 1500 or BIOCHM 1090

---

#### **BIOCHM 4270: Biochemistry**

(cross-leveled with BIOCHM 7270). First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

**Credit Hours:** 3

**Prerequisites:** CHEM 2110

---

#### **BIOCHM 4272: Biochemistry**

(cross-leveled with BIOCHM 7272). Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

**Credit Hours:** 3

**Prerequisites:** C- or higher in BIOCHM 4270

---

#### **BIOCHM 4300: Physical Chemistry of Biological Systems**

To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** BIOCHM 4270

**Prerequisites:** MATH 1500 and PHYSCS 1210 or PHYSCS 2750

**Recommended:** MATH 1700 and PHYSCS 1220 or PHYSCS 2760

---

#### **BIOCHM 4376: Computer Assisted Sequence Analysis and Molecular Modeling**

(cross-leveled with BIOCHM 7376). Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules.

**Credit Hours:** 3

**Prerequisites:** CHEM 2110

---

#### **BIOCHM 4385: Problems in Biochemistry**

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

#### **BIOCHM 4510: Single Molecule Biophysics**

(same as PHYSCS 4510; cross-leveled with BIOCHM 7510, PHYSCS 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

#### **BIOCHM 4950: Advanced Undergraduate Research in Biochemistry**

Research credit for students doing an independent research project under the guidance of a faculty member. Project must be arranged by student and faculty member prior to registration. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

#### **BIOCHM 4964: Industrial Internship with ABC Laboratories**

This 5-credit course is a school and field-based learning experience combining the study, observation, and employment with ABC Laboratories in Columbia, MO. The internship provides opportunities to apply skills, concepts and theories about biochemistry and analytical chemistry in a practical context. The purpose of the internship experience is to provide the intern with the opportunity to develop knowledge and skills deemed desirable for a career in the biotechnology industries. During the time indicated in this agreement for the internship experience, the intern is expected to become a productive employee of ABC Laboratories. This course will provide technical instruction on commonly used laboratory skills and instrumentation at the University of Missouri followed by technical instruction on software and instrumentation at ABC Laboratories. After the training period, the interns will have the opportunity to work at ABC Laboratories full time for the summer.

**Credit Hours:** 5

**Prerequisites or Corequisites:** BIOCHEM 4272, CHEM 3200

**Prerequisites:** BIOCHM 1090, BIOCHM 2484, BIOCHM 4270

---

#### **BIOCHM 4970: Senior Capstone in Biochemistry**

Problem-based course on fundamental concepts of biochemistry. Requires written and oral presentations. One of two capstone courses required for biochemistry majors. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Departmental consent required

**Recommended:** Corequisite of BIOCHM 4974

---

#### **BIOCHM 4974: Biochemistry Laboratory**

(cross-leveled with BIOCHM 7274). Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.

**Credit Hours:** 5

**Prerequisites or Corequisites:** BIOCHM 4272

**Corequisites:** BIOCHM 4970

---

#### **BIOCHM 4974H: Biochemistry Laboratory - Honors**

(cross-leveled with BIOCHM 7274). Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.

**Credit Hours:** 5

**Prerequisites or Corequisites:** BIOCHM 4272; Honors eligibility required

**Corequisites:** BIOCHM 4970

---

---

**BIOCHM 4974W: Biochemistry Laboratory - Writing Intensive**

(cross-leveled with BIOCHM 7274). Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.

**Credit Hours:** 5

**Prerequisites or Corequisites:** BIOCHM 4272

**Corequisites:** BIOCHM 4970

---

**BIOCHM 4978: Cancer Biology**

(same as BIO\_SC 4978; cross-leveled with BIOCHM 7978, BIO\_SC 7978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300 or BIOCHM 4270

**Recommended:** BIO\_SCI 4976 or BIOCHM 4272

---

**BIOCHM 4996H: Honors Thesis Research in Biochemistry**

Laboratory research for honors students doing an honors thesis research project in their final two semesters. Enrollment limited to Honors eligible students with senior standing who have CAFNR honors approval. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

**BIOCHM 7085: Problems in Biochemistry**

Problems in Biochemistry.

**Credit Hour:** 1-6

**Prerequisites:** Consent of Director of Graduate Studies required

---

**BIOCHM 7270: Biochemistry**

(cross-leveled with BIOCHM 4270). First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

**Credit Hours:** 3

**Prerequisites:** CHEM 2110

---

**BIOCHM 7272: Biochemistry**

(cross-leveled with BIOCHM 4272). Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 7270

---

**BIOCHM 7274: Biochemistry Laboratory**

Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; radioisotope tracers in metabolism; isolation, purification and kinetics of enzymes.

**Credit Hours:** 5

**Corequisites:** concurrent enrollment in BIOCHM 7270

---

---

**BIOCHM 7376: Computer Assisted Sequence Analysis and Molecular Modeling**

(cross-leveled with BIOCHM 4376). This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures.

**Credit Hours:** 2

**Prerequisites:** CHEM 2110

---

**BIOCHM 7510: Single Molecule Biophysics**

(same as PHYSICS 7510; cross-leveled with BIOCHM 4510, PHYSICS 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2760

---

**BIOCHM 7978: Cancer Biology**

(same as BIO\_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 4270, BIO\_SC 2300 and BIO\_SC 4976

---

**BIOCHM 8060: Ethical Conduct of Research**

(same as BIO\_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

**Credit Hour:** 1

---

**BIOCHM 8090: Research in Biochemistry**

Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Consent of Director of Graduate Studies required

---

**BIOCHM 8120: Advanced Medicinal Plant Science**

Presentation of core topics in pharmacognosy, including an overview of plant groups with medicinal properties, essentials of botanical nomenclature, Overview of pharmacological activities of plant-sourced products and evidence-based research, phytochemical variation and significance, important biochemical pathways, origins of secondary metabolites, some major groups of phytochemicals, observations on economic and social trends in the use of medicinal plant products in developed and developing countries, overview of modern technology, high throughput screening, bioinformatics. Considerable exposure to key articles in journals, based on internationally accepted text (Trease & Evans), exposure to online databases - all sources of information that facilitate evidence-based research involving medicinal plants. Content of world-wide application. Has considerable international flavor and directly applicable to medicinal flora world-wide. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies is also emphasized. Graded on A-F basis only.

---

**Credit Hours:** 3

**Prerequisites:** CHEM 1100 or CHEM 1320 or BIOCHM 1090 and BIO\_SC 1200 or BIO\_SC 1500 or the equivalent of these courses for non-MU students

**Recommended:** A Freshman level course in the Life Sciences or General Botany will also be advantageous but not essential

---

**BIOCHM 8130: Commercial Use of Biodiversity**

Biological diversity/biodiversity - provides the basis for life on earth. The variability among living organisms and among the ecological complexes of which they are part - forms the basis of many commercial products and underpins our very existence by providing essential ecosystem services e.g. water purification, prevention of soil erosion and floods, and regulation of the climate. But biodiversity is declining. The rapidly growing demand for access to genetic resources, is raising the commercial value of biological diversity (especially plant diversity) for providing new genetic resources for enhancing existing crops species, developing new crops, phytopharmaceuticals, botanical medicines, horticulture - via GMO and plant breeding technologies. The course will address the commercial use of biodiversity - access to genetic resources and benefit-sharing via the following topics: Regulating access to genetic resources and benefit-sharing (legal aspects); Natural products and the pharmaceutical industry; Botanical medicine industry; Development of major crops by the seed industry; Horticulture; Crop protection; Biotechnology in fields other than healthcare and agriculture; Natural personal care and cosmetics industry; Industry and the Convention on Biodiversity (CBD). The areas of Technical Barriers to Trade (TBT) and the Regulatory Frameworks that govern the release of new crops and other plant-based products will also be addressed. Course is of world-wide appeal, facilitated by being 100% online and asynchronous (independent of time zones). This course is recommended (as an elective) for students desiring more understanding of the complexities associated with the commercial use of biodiversity (specifically the commercial use of genetic resources). Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Experience in some undergraduate course work in the life-science area would be advantageous

---

**BIOCHM 8240: Introduction to Graduate Biochemistry I**

Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination.

**Credit Hours:** 4

**Prerequisites:** Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor

---

**BIOCHM 8260: Macromolecular Systems Integration**

To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication; proteomics/cell signaling and metabolism. Course graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIOCHM 8240

---

**BIOCHM 8362: Introduction to Plant Metabolism**

(same as PLNT\_S 8362 and BIO\_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

**Credit Hours:** 2

---

**BIOCHM 8365: Introduction to Molecular Cell Biology**

(same as BIO\_SC 8365 and PLNT\_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

**Credit Hours:** 2

---

**BIOCHM 8432: Enzymology and Metabolic Regulation**

A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 7272

---

**BIOCHM 8434: Signaling in Molecular Cell Biology**

The objective of this course is to provide important foundations in cellular signaling in the context of biochemistry and cell biology for first and second year graduate students. The course focuses on cell-to-cell communication and intracellular signaling via different classes of cell surface receptors using specific receptor paradigms from human, other animals, plants, yeast and E.coli. Primary literature will be used for in-class discussions and homework assignments to highlight key experiments and introduce students to relevant experimental techniques. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** BIO\_SC 2300, BIOCHM 4270

---

**BIOCHM 8450: Rotation Research**

Introductory laboratory research. Graded on A-F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

**Credit Hour:** 1-2

---

**BIOCHM 9001: Topics in Biochemistry**

Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-9

---

**BIOCHM 9087: Seminar in Biochemistry**

Review of current literature; individual presentation of research or classical science topics.

**Credit Hour:** 1

---

---

**BIOCHM 9090: Research in Biochemistry**

Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**BIOCHM 9432: Molecular Biology II**

(same as MICROB and BIO\_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

**Credit Hours:** 4

---

**BIOCHM 9462: Hormone Action**

A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes.

**Credit Hours:** 2

**Prerequisites:** BIOCHM 7272

---

**BIOCHM 9468: Molecular Biology of Plant Growth and Development**

(same as BIO\_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

**Credit Hours:** 3

---

## Biological Engineering Courses

**BIOL\_EN 1000: Introduction to Biological Engineering**

For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.

**Credit Hour:** 1-2

---

**BIOL\_EN 2000: Professional Development in Engineering**

(same as BME 2000). A review of professional opportunities, registration, ethics, and societies. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** sophomore standing

---

**BIOL\_EN 2007: World of Neuroscience**

(same as BME 2007, CMP\_SC 2007, ECE 2007). This in-class course will introduce undergraduates to the growing area of neuroscience from the perspectives of three disciplines: engineering, biology and psychology. Topics in the course will span multiple levels of neuroscience including genomic, genetic, molecular, cellular, systems, behavioral and clinical levels. Due to the interdisciplinary nature of the neuroscience, the classes will cover diverse topics. The topics will range from overviews of the key neurobiology areas, to lab sessions involving how to analyze your own brain signals (EEG), and to visits to brain imaging center and EEG lab. The overall goal is to provide a broad exposure to the fascinating world of interdisciplinary neuroscience. Graded on A-F basis only.

**Credit Hour:** 1

---

**BIOL\_EN 2080: Introduction to Programming for Engineers**

(same as BME 2080). This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500

---

**BIOL\_EN 2180: Engineering Analysis of Bioprocesses**

(same as BME 2180). Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological/biomedical processes. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, CHEM 1320, PHYSICS 2750. Restricted to Biological Engineering students only

**Recommended:** BIOL\_EN 2080

---

**BIOL\_EN 2600: Sustainability Foundations: An Introduction to Sustainability**

(same as ENV\_SC 2600). This course introduces fundamental concepts of sustainability from sustainable development to sustainability science. It focuses on human-environment systems, the characteristics of these systems, and patterns of change. Course materials interrogate taken-for-granted assumptions that shape human relationships with the natural world. You will learn to identify common dynamics leading to social and environmental problems with the aim of identifying alternative actions (solutions) for transitioning towards sustainability. Sustainability integrates the social and biophysical sciences; and implementing solutions requires the integration of the social justice, the arts, and humanities. Through a variety of interdisciplinary perspectives and frameworks, you will learn about current sustainability research and be able to develop an understanding of what sustainability means to you and your field of study. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**BIOL\_EN 2600H: Sustainability Foundations: An Introduction to Sustainability - Honors**

(same as ENV\_SC 2600). This course introduces fundamental concepts of sustainability from sustainable development to sustainability science. It focuses on human-environment systems, the characteristics of these systems, and patterns of change. Course materials interrogate taken-for-granted assumptions that shape human relationships with the natural world. You will learn to identify common dynamics leading to social and environmental problems with the aim of identifying alternative actions (solutions) for transitioning towards sustainability. Sustainability integrates the social and biophysical sciences; and implementing solutions requires the integration of the social justice, the arts, and humanities. Through a variety of interdisciplinary perspectives and frameworks, you will learn about current sustainability research and be able to develop an understanding of what sustainability means to you and your field of study. Graded on A-F basis only. Honors eligibility required

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**BIOL\_EN 3070: Biological Fluid Mechanics**

(same as BME 3070). Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2750 and MATH 1700

---

**BIOL\_EN 3075: Introduction to Materials Engineering**

(same as BME 3075, CH\_ENG 3075). Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** One of the following BIOL\_EN 3180, CH\_ENG 3234, MAE 4231, MAE 4300, or instructor consent

**Prerequisites:** MATH 2300, ENGINR 1200

---

**BIOL\_EN 3170: Biomaterials**

(same as BME 3170). Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3075 or BME 3075

**Corequisites:** BIOL\_EN 2180, ENGINR 2200 or instructor's consent

---

**BIOL\_EN 3170W: Biomaterials - Writing Intensive**

(same as BME 3170W). Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3075 or BME 3075

**Corequisites:** BIOL\_EN 2180, ENGINR 2200 or instructor's consent

---

**BIOL\_EN 3180: Heat and Mass Transfer in Biological Systems**

(same as BME 3180). Principles of heat and mass transfer and their applications in biomedical, bioenvironmental, and bioprocessing engineering.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ENGINR 2300 or CH\_ENG 3261

**Prerequisites:** BIOL\_EN 2180 or CH\_ENG 2225

---

**BIOL\_EN 4001: Topics in Biological Engineering**

Current and new technical developments in biological engineering.

**Credit Hour:** 3-9

---

**BIOL\_EN 4001H: Topics in Biological Engineering - Honors**

Current and new technical developments in biological engineering.

**Credit Hour:** 3-9

**Prerequisites:** Honors eligibility required

---

**BIOL\_EN 4070: Bioelectricity**

(cross-leveled with BIOL\_EN 7070). Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760 and BIOL\_EN 3180

---

**BIOL\_EN 4075: Brain Signals and Brain Machine Interfaces**

(same as BME 4075; cross-leveled with BIOL\_EN 7075). The course introduces state-of-the-art technologies for monitoring and manipulating brain activity, as well as the design principles of modern brain-machine interfaces (BMIs) for interacting with the brain in health and disease. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 4070 or instructor's consent

---

**BIOL\_EN 4085: Problems in Biological Engineering**

Supervised independent study at the undergraduate level.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**BIOL\_EN 4150: Soil and Water Conservation Engineering**

(same as CV\_ENG 4710; cross-leveled with BIOL\_EN 7150, CV\_ENG 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3

**Recommended:** BIOL\_EN 2180 or CV\_ENG 3200

---

**BIOL\_EN 4160: Food Process Engineering**

(cross-leveled with BIOL\_EN 7160). Food engineering is an interdisciplinary field that connects agricultural and biological engineering, chemical engineering, food science, biochemistry, human nutrition, and other fields involving food systems to improve the health of people and planet. The course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, food packaging, emerging technologies, and sustainability.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3180

---

**BIOL\_EN 4170: Biomaterials Interfaces of Implantable Devices**

(same as BME 4170; cross-leveled with BIOL\_EN 7170). Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3170

---

**BIOL\_EN 4231: Transport Phenomena in Materials Processing**

(same as MAE 4231; cross-leveled with BIOL\_EN 7231, MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** MAE 4300

**Prerequisites:** C- or better in Math 4100

---

---

**BIOL\_EN 4250: Irrigation and Drainage Engineering**

(same as CV\_ENG 4740; cross-leveled with BIOL\_EN 7250). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 or MAE 3400 or BIOL\_EN 2180

---

**BIOL\_EN 4270: Design of Experiments and Statistical Quality Control for Process Engineers**

(same as CH\_ENG 4270; cross-leveled with BIOL\_EN 7270, CH\_ENG 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.

**Credit Hours:** 3

**Recommended:** experience with Excel or instructor's consent

---

**BIOL\_EN 4310: Feedback Control Systems**

(same as ECE 4310, MAE 4750; cross-leveled with BIOL\_EN 7310, ECE 7310, MAE 7750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 4100 and junior/senior standing

---

**BIOL\_EN 4315: Principles of Biochemical Engineering**

(same as CH\_ENG 4315; cross-leveled with BIOL\_EN 7315, CH\_ENG 7315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 (for Biological Engineering students) or CH\_ENG 2225 (for Chemical Engineering students) or Instructor's consent

**Recommended:** BIOL\_EN 3180 (for Biological Engineering students) or CH\_ENG 3234 (for Chemical Engineering students) as a prerequisite or a co-requisite

---

**BIOL\_EN 4316: Biomass Refinery Operations**

(same as CH\_ENG 4316; cross-leveled with BIOL\_EN 7316, CH\_ENG 7316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

**Credit Hours:** 3

**Recommended:** BIOL\_EN 2180 or CH\_ENG 2225 (for Chemical Engineering students) or instructor's consent

---

**BIOL\_EN 4350: Watershed Modeling Using GIS**

(same as CV\_ENG 4720; cross-leveled with BIOL\_EN 7350, CV\_ENG 7720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3

**Recommended:** BIOL\_EN 2180 or CV\_ENG 3200 or instructor's consent

---

**BIOL\_EN 4360: Biomufacturing Technologies**

(same as BME 4360). This course is an introduction to biomufacturing technologies and processes for manufacturing biological products (e.g., vaccine, antibodies, and therapeutic proteins). It mainly covers process development, unit operations, product evaluation, facilities, and regulatory compliance. It is an interdisciplinary course of biochemistry, microbiology, and engineering. The purpose of this course is to help the students acquire the knowledge of modern biomufacturing and prepare them for rapidly growing fields in biomufacturing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 and BIOL\_EN 3180 (for biological engineering students) -or- CH\_ENG 2225 and CH\_ENG 3234 (for chemical engineering students) -or- Consent of instructor

---

**BIOL\_EN 4370: Orthopaedic Biomechanics**

(same as BME 4370; cross-leveled with BIOL\_EN 7370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3075

**Recommended:** ENGINR 1200 and BIOL\_EN 3170

---

**BIOL\_EN 4380: Applied Electronic Instrumentation**

(same as BME 4380; cross-leveled with BIOL\_EN 7380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** PHYSCS 2750

---

**BIOL\_EN 4420: Introduction to Biomedical Imaging**

(same as BME 4420, PHYSCS 4420; cross-leveled with BIOL\_EN 7420, PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**BIOL\_EN 4470: Biomolecular Engineering and Nanobiotechnology**

(same as BME 4470; cross-leveled with BIOL\_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSCS 2760, CHEM 2100

**Recommended:** Senior/graduate standing or instructor's consent

---

---

**BIOL\_EN 4470H: Biomolecular Engineering and Nanobiotechnology - Honors**

(cross-leveled with BIOL\_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSCS 2760, CHEM 2100. Honors eligibility required

**Recommended:** Senior/graduate standing or instructor's consent

---

**BIOL\_EN 4480: Physics and Chemistry of Materials**

(same as PHYSCS 4190, CHEM 4490, NU\_ENG 4319 BME 4480; cross-leveled with BIOL\_EN 7480, PHYSIC 7190, CHEM 7490, NU\_ENG 7319). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2750, CHEM 1320 or equivalent, or instructor's consent

---

**BIOL\_EN 4540: Neural Models and Machine Learning**

(same as BME 4540, CMP\_SC 4540, ECE 4540; cross-leveled with CMP\_SC 7540, ECE 7540, BIOL\_EN 7540). The projects-based course has three inter-linked components: (I) math models of neurons and neural networks, (II) machine learning in neuroscience, after a brief introduction to python and (III) software automation and cyberinfrastructure to support neuroscience. Extensive projects focusing on software automation and machine learning components, with brief in-class presentations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500 or consent of instructor

**Recommended:** Introductory software programming, and introductory cell biology or consent of instructor

---

**BIOL\_EN 4570: Fluorescent Imaging**

(same as BME 4570; cross-leveled with BIOL\_EN 7570). Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1500 and BIOL\_EN 2180 or instructor's consent

---

**BIOL\_EN 4590: Computational Neuroscience**

(same as BIO\_SC 4590, ECE 4590, BME 4590; cross-leveled with BIOL\_EN 7590, BIO\_SC 7590, ECE 7590). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1010, BIO\_SC 1500; MATH 1500

---

**BIOL\_EN 4770: Biomedical Optics**

(same as BME 4770, cross-leveled with BIOL\_EN 7770). Essential concepts and methods for applying optical techniques to biomedical

diagnosis and therapy will be covered with major application examples being discussed.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

**Recommended:** BIOL\_EN 3180

---

**BIOL\_EN 4940: Engineering Internship**

(same as BME 4940). Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** advisor's consent

---

**BIOL\_EN 4970: Nuclear Magnetic Resonance and Magnetic Resonance Imaging**

(same as BME 4970). Nuclear Magnetic Resonance (NMR) is one of the most powerful methods of investigating the structure, composition, and dynamics of atoms and molecules. It is now ubiquitous in chemistry and engineering labs, and has blossomed into one of the most successful medical imaging modalities - Magnetic Resonance Imaging (MRI). This course is an in-depth examination of the relevant physical principles behind this technology: basic spin physics, spectrometer design and implementation, what it can be used to measure, and how it is currently being used in laboratory and clinical settings. In particular, students will gain a working knowledge of basic nuclear physics, spin precession, T1 and T2 weighting mechanisms, the pulse/acquire NMR experiment, the influence of magnetic field gradients, Fourier theory and k-space, imaging principles, and the many pulse sequences currently employed in NMR/MRI research labs around the world. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Senior Standing or Instructor Consent

---

**BIOL\_EN 4980: Bioengineering Design I**

(same as BME 4980). Capstone design course for Biological Engineering or Biomedical Engineering major. Design of devices or processes for biological or biomedical applications.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1100 or MAE 1100, ENGINR 2200, and BIOL\_EN 3180 or BME 3180, or instructor's consent

**Corequisites:** BIOL\_EN 4380 or BME 4380

---

**BIOL\_EN 4980W: Bioengineering Design I - Writing Intensive**

(same as BME 4980W). Capstone design course for Biological Engineering or Biomedical Engineering major. Design of devices or processes for biological or biomedical applications.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1100 or MAE 1100, ENGINR 2200, and BIOL\_EN 3180 or BME 3180, or instructor's consent

**Corequisites:** BIOL\_EN 4380 or BME 4380

---

**BIOL\_EN 4985: Bioengineering Design II**

(same as BME 4985). Second term of capstone, senior design course for the Biomedical Engineering major. Design of biological system devices

or processes. Includes prototyping and testing of design. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** BIOL\_EN 4980 or BME 4980

---

**BIOL\_EN 4990: Undergraduate Research in Biological Engineering**

Supervised independent study at the undergraduate level.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**BIOL\_EN 4995: Undergraduate Honors Research in Biological Engineering**

Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.

**Credit Hour:** 1-5

**Prerequisites:** advisor's consent

---

**BIOL\_EN 4995H: Undergraduate Honors Research in Biological Engineering**

Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.

**Credit Hour:** 1-5

**Prerequisites:** advisor's consent. Honors eligibility required

---

**BIOL\_EN 7001: Topics in Biological Engineering**

Study of advanced developments in biological engineering.

**Credit Hour:** 1-3

---

**BIOL\_EN 7070: Bioelectricity**

(cross-leveled with BIOL\_EN 4070). Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: PHYSCS 2760 and BIOL\_EN 3180 or instructor's consent

**Credit Hours:** 3

---

**BIOL\_EN 7075: Brain Signals and Brain Machine Interfaces**

(cross-leveled with BIOL\_EN 4075, BME 4075). The course introduces state-of-the-art technologies for monitoring and manipulating brain activity, as well as the design principles of modern brain-machine interfaces (BMIs) for interacting with the brain in health and disease. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**BIOL\_EN 7150: Soil and Water Conservation Engineering**

(same as CV\_ENG 7710; cross-leveled with BIOL\_EN 4150, CV\_ENG 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CV\_ENG 3200, or instructor's consent

---

**BIOL\_EN 7160: Food Process Engineering**

(cross-leveled with BIOL\_EN 4160). Food engineering is an interdisciplinary field that connects agricultural and biological engineering, chemical engineering, food science, biochemistry, human nutrition, and other fields involving food systems to improve the health of people and planet. The course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, food packaging, emerging technologies, and sustainability.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3180 or instructor's consent

---

**BIOL\_EN 7170: Biomaterials Interfaces of Implantable Devices**

(cross-leveled with BIOL\_EN 4170, BME 4170). Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3170 or instructor's consent

---

**BIOL\_EN 7250: Irrigation and Drainage Engineering**

(cross-leveled with BIOL\_EN 4250). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 or MAE 3400 or BIOL\_EN 2180

---

**BIOL\_EN 7310: Feedback Control Systems**

(same as ECE 7310, MAE 7750; cross-leveled with ECE 4310, BIOL\_EN 4310, MAE 4750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded A-F only. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

---

**BIOL\_EN 7315: Introduction to Bioprocess Engineering**

(same as CH\_ENG 7315; cross-leveled with BIOL\_EN 4315, CH\_ENG 4315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 (for Biological Engineering students) or CH\_ENG 2225 (for Chemical Engineering students) or Instructor's consent

**Recommended:** BIOL\_EN 3180 (for Biological Engineering students) or CH\_ENG 3234 (for Chemical Engineering students) as a prerequisite or a co-requisite

---

---

**BIOL\_EN 7316: Biomass Refinery Operation**

(same as CH\_ENG 7316; cross-leveled with BIOL\_EN 4316, CH\_ENG 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CH\_ENG 2225 or instructor's consent

---

**BIOL\_EN 7350: Watershed Modeling Using GIS**

(same as CV\_ENG 7720; cross-leveled with BIOL\_EN 4350, CV\_ENG 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CV\_ENG 3200 or instructor's consent

---

**BIOL\_EN 7370: Orthopaedic Biomechanics**

(same as V\_M\_S 7370; cross-leveled with BIOL\_EN 4370) . Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1200 and BIOL\_EN 3170, instructor's consent required

---

**BIOL\_EN 7380: Applied Electronic Instrumentation**

(cross-leveled with BIOL\_EN 4380; BME 4380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Graded on A-F basis only..

**Credit Hours:** 4

**Prerequisites:** PHYSCS 2750

---

**BIOL\_EN 7420: Introduction to Biomedical Imaging**

(same as PHYSCS 7420; cross-leveled with BIOL\_EN 4420, BME 4420, PHYSCS 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET , SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging, as well as recent developments in biomedical imaging.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**BIOL\_EN 7450: Environmental Hydrology**

(same as ENV\_SC 7450; cross-leveled with ENV\_SC 4450, BIOL\_EN 4450). This course provides an understanding, and the roles of natural processes and anthropogenic factors influencing the occurrence and the movement of water. Students will learn the quantitative basis of hydrology, which will help them to appreciate the scientific approach to understanding the observed phenomena. The material presented will provide sufficient knowledge for students to evaluate hydrologic processes associated with environmental systems and to develop conceptual evaluations that are part of water and natural resource assessments. Learning objectives: 1. Describe basic mechanisms and

variables of hydrologic fluxes and states 2. Describe and define different mathematical formulations of hydrologic fluxes and states 3. Understand key components of a watershed model 4. Analyze, synthesize and interpret hydrologic data.

**Credit Hours:** 3

**Prerequisites:** MATH 1100, MATH 1400 and STAT 1300 or consent of the instructor

---

**BIOL\_EN 7470: Biomolecular Engineering and Nanobiotechnology**

(cross-leveled with BIOL\_EN 4470; BME 4470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSCS 2760, CHEM 2100

**Recommended:** Senior/graduate standing or instructor's consent

---

**BIOL\_EN 7480: Physics and Chemistry of Materials**

(same as PHYSCS 7190, NU\_ENG 7319, CHEM 7490; cross-leveled with BIOL\_EN 4480, PHYSCS 4190, NU\_ENG 4319, CHEM 4490, BME 4480). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2750, CHEM 1320 or equivalent, or instructor's consent

---

**BIOL\_EN 7540: Neural Models and Machine Learning**

(same as CMP\_SC 7540, ECE 7540; cross-leveled with BIOL\_EN 4540, CMP\_SC 4540, ECE 4540). The projects-based course has three inter-linked components: (I) math models of neurons and neural networks, (II) machine learning in neuroscience, after a brief introduction to python and (III) software automation and cyberinfrastructure to support neuroscience. Extensive projects focusing on software automation and machine learning components, with brief in-class presentations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500 + at least Junior standing, or consent of instructor

**Recommended:** Introductory software programming, and introductory cell biology or consent of instructor

---

**BIOL\_EN 7560: Observing the Earth from Space**

(same as ENV\_SC 7560; cross-leveled with BIOL\_EN 4560, ENV\_SC 4560). This course provides an understanding of the theory and application of earth observing satellite remote sensing as a tool for environmental engineering and science. The topics include the fundamentals of electromagnetic radiation, satellite and sensor technology, integration of satellite and GIS data and digital image analysis. The lectures and homework assignments at the beginning of the course provide the necessary foundation to work with satellite imagery. Students will receive training with advanced image processing software and data acquisition techniques. The course will also cover case studies using remote sensing and image analysis techniques to answer real-world problems. The lectures and homework assignments

include applications in forest management, land use change detection, monitoring agricultural activities, water and air quality monitoring, climate studies, and ecology and infectious diseases. The course will cover lectures on advanced remote sensing techniques towards the end of the course. Students will work on their independent projects during the last three weeks, applying remote sensing techniques to satellite images.

**Credit Hours:** 3

**Prerequisites:** MATH 1100, MATH 1400 and STAT 1300 or consent of the instructor

---

#### **BIOL\_EN 7570: Fluorescent Imaging**

(cross-leveled with BIOL\_EN 4570, BME 4570). Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1500 and BIOL\_EN 2180 or instructor's consent

---

#### **BIOL\_EN 7590: Computational Neuroscience**

(same as BIO\_SC 7590, ECE 7590; cross-leveled with BIOL\_EN 4590, BIO\_SC 4590, ECE 4590; BME 4590). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1010, BIO\_SC 1500; MATH 1500

---

#### **BIOL\_EN 7770: Biomedical Optics**

(cross-leveled with BIOL\_EN 4770 and BME 4770). Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2760 and BIOL\_EN 3180; or instructor's consent

---

#### **BIOL\_EN 8000: Scientific Discovery Leading to Life Science Innovations**

(same as MPP 8000). The goal of this course is to provide participants with a conceptual and practical understanding of how life science research is conducted in a modern research institution in the US and the pathways involved in translating fundamental discoveries into products and services that affect healthcare. We will cover the transitions from initial discovery concepts to first-in-human studies, clinical trials, healthcare guidelines and policy to product development. We will provide an introduction to essential disciplines and interactions that enable scientific discoveries to move forward into novel device and drug therapies. Participants will come away with a very complete picture of how medical research happens, including: how it is funded; what is required to make discoveries and record and protect intellectual property that is created; how to advance innovations to clinical practice, how to navigate the regulatory and bioethical environment, and how discoveries reach practitioners and benefit patients. The Course is the first in a three course sequence leading to a Graduate Certificate in Life Science Innovation and Entrepreneurship. Graded on A-F basis only.

**Credit Hours:** 3

---

**Prerequisites:** Must be Graduate Standing or receive certificate program director's approval

---

#### **BIOL\_EN 8001: Advanced Topics in Biological Engineering**

Study of advanced developments in biological engineering.

**Credit Hour:** 1-3

---

#### **BIOL\_EN 8004: Regulatory Issues in Clinical Research and Clinical Trials**

(same as MPP 8004). The goal of the course is to highlight key FDA regulatory issues for conducting human clinical trials and clinical research. For clinical trials, FDA has set up several compliance programs and guidance documents as a part of human subject protection (HSP)/ Bioresearch Monitoring (BIMO) initiatives. The aim of the program was to strengthen FDA oversight and protection of subjects in clinical trials and to preserve confidentiality of data. The HSP/BIMO initiative comprehends all FDA regulated clinical trials including human drugs and biological drug products, devices, foods, and veterinary medicine. The course is designed for students in medical professions, management, biomedical engineering, and related areas. Adequate knowledge regarding FDA guidance in conducting human clinical trials and clinical research will help professionals steer drug/device development and commercialization in their respective field. This course will be offered online only. An introduction to essential disciplines for conducting clinical trials and clinical research will be provided. The basics of good clinical practices (GCPs), biostatistics and clinical epidemiology in relation to clinical trials will be presented. Several relevant case studies for conducting clinical trials, both nationally and internationally, will be discussed. The importance of data collection and data management while conducting clinical trials will be explained. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Knowledge in biomedical sciences, clinical sciences

---

#### **BIOL\_EN 8085: Problems in Biological Engineering**

Supervised individual study at the graduate level.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

#### **BIOL\_EN 8087: Seminar in Biological Engineering**

Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.

**Credit Hour:** 1

---

#### **BIOL\_EN 8100: Design and Development of Biomedical Innovations**

(same as ENGINR 8100, MPP 8100). The overarching goal of this course is to help participants understand the design and development (drug or device) process in biomedical innovation. This course will help participants to understand the process of choosing unmet clinical needs, articulate a need statement without integrating solution, design and develop a solution. Participants will learn to assess the commercial potential of clinical needs by performing market analysis and valuing customer needs. A conceptual understanding about development of a prototype for a device and also drug development by different brainstorming process will be provided. Details of regulatory, reimbursement, patenting process required for product development will be explained with examples. An overview about how to evaluate

preliminary designs, define product specifications, comply with manufacturing principles and methods, costs, cGMP requirements will be explained. Quality control and Quality assurance necessities for drug/device will be elucidated with case studies. Participants will gain knowledge about different business models for drug and devices, estimate market penetration and how to make profitable, patient-driven products. Graded on A-F basis only.

**Credit Hours:** 3

---

#### **BIOL\_EN 8170: Sensors and Biosensors**

The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors.

**Credit Hours:** 3

---

#### **BIOL\_EN 8180: Numerical Methods in Engineering Research**

Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

---

#### **BIOL\_EN 8200: Commercialization of Life Science Innovations**

(same as MANGMT 8200). This course will provide educational content and experiences that equip course participants to navigate the main pathways for commercialization of biomedical innovations. Students will also learn how to access sources of capital for R&D and develop an understanding of the role of FDA approval and the processes for approval of different types of biomedical products. Students will become familiar with quality assurance programs required in the biomedical industry. Students will also become familiar with the most common business models for biomedical companies and the importance of product development and commercialization alliances.

**Credit Hours:** 3

---

#### **BIOL\_EN 8230: Advanced Ceramic Materials**

(same as CH\_ENG 8230, MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

**Credit Hours:** 3

---

#### **BIOL\_EN 8250: Water Management Theory**

Advanced studies in erosion control, irrigation, and drainage. Water resources engineering.

**Credit Hours:** 3

**Prerequisites:** MATH 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course

---

#### **BIOL\_EN 8280: Advanced Biological Transport Processes**

Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required.

**Credit Hours:** 3

---

#### **BIOL\_EN 8370: Materials Characterization Techniques**

Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses.

**Credit Hours:** 3

**Prerequisites:** at least one undergraduate course in material science, engineer, or design

---

#### **BIOL\_EN 8402: Research Methods**

(same as F\_S 8402). Review of literature; planning research projects; publication procedures.

**Credit Hours:** 2

---

#### **BIOL\_EN 8470: Ultrasensitive Biodetection**

Multiplexing single-molecule, single-cell, nanobiotech analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required

---

#### **BIOL\_EN 8570: Microscopic Imaging**

Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 7570 or instructor's consent

---

#### **BIOL\_EN 8670: Orthopaedic Failure Modes and Effect Analysis**

Engineering sciences will be leveraged provide a comprehensive study of failure modes and related effects for orthopaedic devices, orthopaedic tissue repair, and surgical interventions. Clinical case studies will be analyzed to introduce real world problems of orthopaedic failures. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3170 or ENGINR 1200, BIOL\_EN 4370 or BIOL\_EN 7370 or instructor consent

**Recommended:** For department majors

---

#### **BIOL\_EN 8870: Molecular and Cell Mechanics**

Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGINR 2200

---

#### **BIOL\_EN 8990: Masters Thesis Research in Biological Engineering**

Independent investigation to be presented as a thesis. Graded on S/U basis only.

**Credit Hour:** 1-15

---

---

**BIOL\_EN 9990: Doctoral Dissertation Research in Biological Engineering**

Independent investigation to be presented as a thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

---

## Biological Sciences Courses

**BIO\_SC 1001: Topics in Biological Science - General**

Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

**Credit Hour:** 1-3

---

**BIO\_SC 1002: Topics in Biological Sciences - Biological Sciences**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

---

**BIO\_SC 1006: Topics in Biological Sciences - Mathematical Sciences**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-31

---

**BIO\_SC 1007: Topics in Biological Sciences - Physical Sciences**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

---

**BIO\_SC 1010: General Principles and Concepts of Biology**

Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. This course is intended for non-science majors. No more than 5 credits for BIO\_SC 1010, BIO\_SC 1020, and BIO\_SC 1030.

**Credit Hours:** 3

**Recommended:** MATH 1100

---

**BIO\_SC 1020: General Biology Laboratory**

Laboratory exercises dealing with representative organisms and methods of modern biological sciences. This course is intended for non-science majors. No more than 5 credits for BIO\_SC 1010, BIO\_SC 1020, and BIO\_SC 1030.

**Credit Hours:** 2

**Prerequisites or Corequisites:** BIO\_SC 1010

---

**BIO\_SC 1030: General Principles and Concepts of Biology with Laboratory**

Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. This course is intended for non-science majors. No more than 5 credits for BIO\_SC 1010, BIO\_SC 1020, and BIO\_SC 1030.

**Credit Hours:** 5

**Recommended:** MATH 1100 or concurrent enrollment

---

**BIO\_SC 1060: Basic Environmental Studies**

Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.

**Credit Hours:** 3

---

**BIO\_SC 1200: General Botany with Laboratory**

Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.

**Credit Hours:** 5

---

**BIO\_SC 1400: Evolution for Everyone**

This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO\_SC 2060 or BIO\_SC 4600.

**Credit Hours:** 3

---

**BIO\_SC 1500: Introduction to Biological Systems with Laboratory**

Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

**Credit Hours:** 5

**Recommended:** MATH 1100 or sufficient ALEKS score

---

**BIO\_SC 1500H: Introduction to Biological Systems with Laboratory Honors**

Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

**Credit Hour:** 3-5

**Prerequisites:** MATH 1100 and high school chemistry. Honors eligibility required

---

**BIO\_SC 2001: Topics in Biological Sciences - General**

Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

**Credit Hour:** 1-3

**Recommended:** One course in Biology

---

**BIO\_SC 2002: Topics in Biological Sciences- Biological Sciences**

Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** a course in general biology

---

---

**BIO\_SC 2002H: Topics in Biological Sciences- Biological Science - Honors**

Selected topics not covered in regularly offered courses. Recommended: a course in biology

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

**BIO\_SC 2006: Topics in Biological Sciences- Mathematical Sciences**

Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** a course in general biology

---

**BIO\_SC 2006H: Topics in Biological Sciences- Mathematical Science - Honors**

Selected topics not covered in regularly offered courses. Recommended: a course in biology

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

**BIO\_SC 2007: Topics in Biological Sciences- Physical Sciences**

Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** a course in general biology

---

**BIO\_SC 2007H: Topics in Biological Sciences- Physical Science - Honors**

Selected topics not covered in regularly offered courses. Recommended: a course in biology

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

**BIO\_SC 2010: Undergraduate Seminar in Biological Sciences**

Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing

---

**BIO\_SC 2015: Biological Career Explorations**

Students will learn about career options and choices, construct career portfolios, and interact with current biological professionals. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Departmental consent

**Recommended:** Sophomore standing

---

**BIO\_SC 2020: How the Brain Works**

Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders..

**Credit Hour:** 1

**Prerequisites:** C- or above in BIO\_SC 1010 or BIO\_SC 1500

---

**BIO\_SC 2030: Life of the Cell**

This course will help students understand basic concepts of biomolecular structure, cell organization, cell membranes, energy and metabolism, cellular communication, and cell division. This course is intended for non-science majors and may not be used to satisfy requirements for either a major or a minor in biological sciences.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1010

---

**BIO\_SC 2060: Community Biology**

Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1010 or equivalent. Not open to biology majors

---

**BIO\_SC 2100: Infectious Diseases**

An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1010, BIO\_SC 1200 or BIO\_SC 1500. Not open to Biology Majors

---

**BIO\_SC 2150: Genetic Diseases**

This course will discuss the biological basis for genetic diseases, including inherited diseases and non-inherited diseases such as cancer. The units will include an introduction providing necessary background information, as section studying the technology used to study genetic diseases and several units discussing specific diseases and their impact on history and society. This course is intended for non-science majors. Cannot be used to satisfy degree requirements for biology major or biology minor.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1010

---

**BIO\_SC 2200: General Genetics**

Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1100, BIO\_SC 1200 or BIO SC 1500 and CHEM 1320 (or concurrent enrollment)

---

**BIO\_SC 2200H: General Genetics - Honors**

Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics. Prerequisites:

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1100, BIO\_SC 1200 or BIO SC 1500 and CHEM 1320 (or concurrent enrollment). Honors eligibility required

---

---

**BIO\_SC 2300: Introduction to Cell Biology**

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 2200

---

**BIO\_SC 2300H: Introduction to Cell Biology- Honors**

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

**Credit Hours:** 5

**Prerequisites:** BIO\_SC 2200 or 2200H. Honors eligibility required

---

**BIO\_SC 2300HW: Introduction to Cell Biology - Honors/Writing Intensive**

Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

**Credit Hours:** 5

**Prerequisites:** BIO\_SC 2200 or 2200H. Honors eligibility required

---

**BIO\_SC 2940: Internship in Biological Science**

Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** junior standing, 12 hours of biological science and 2.70 GPA

---

**BIO\_SC 2950: Directed Independent Research**

Participation in faculty research activities. May not be used to satisfy degree requirements for BA or BS in biological sciences or the minor in biological sciences.

**Credit Hour:** 1-3

**Prerequisites:** Departmental consent

---

**BIO\_SC 2960: Readings in Biological Science**

Supervised reading in biological literature. May be repeated up to six hours total credit. Selected sections of this course may be graded either on A-F or S/U basis only. May not be used in partial fulfillment of Arts and Science foundation requirement.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**BIO\_SC 2965H: Honors Readings in Biological Literature**

Selected readings in biological literature for Honors, in consultation with instructor. May not be used in partial fulfillment of Arts and Science foundation requirement.

**Credit Hour:** 1-3

**Prerequisites:** overall 3.3 GPA; instructor's consent. Honors eligibility required

---

---

**BIO\_SC 3002: Topics in Biological Sciences - Biological Sciences**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** Junior Standing

---

**BIO\_SC 3002H: Topics in Biological Sciences- Biological Sciences - Honors**

Selected topics not offered in regular curriculum.

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

**BIO\_SC 3002W: Topics in Biological Sciences- Biological Sciences - Writing Intensive**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** Junior Standing

---

**BIO\_SC 3006: Topics in Biological Sciences - Mathematical Sciences**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** Junior Standing

---

**BIO\_SC 3006H: Topics in Biological Sciences- Mathematical Sciences - Honors**

Selected topics not offered in regular curriculum.

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

**BIO\_SC 3006W: Topics in Biological Sciences- Mathematical Sciences - Writing Intensive**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** Junior Standing

---

**BIO\_SC 3007: Topics in Biological Sciences - Physical Sciences**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** Junior Standing

---

**BIO\_SC 3007H: Topics in Biological Sciences- Physical Sciences - Honors**

Selected topics not offered in regular curriculum.

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

---

**BIO\_SC 3007W: Topics in Biological Sciences- Physical Sciences - Writing Intensive**

Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** Junior Standing

---

**BIO\_SC 3010: Professional Skills**

This course will focus on application and interview skills for students interested in medical school. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** instructor's consent

**Recommended:** junior standing; 3.4 GPA, and biological sciences majors

---

**BIO\_SC 3050: Genetics and Society**

Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.

**Credit Hours:** 3

---

**BIO\_SC 3050W: Genetics and Society - Writing Intensive**

Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.

**Credit Hours:** 3

---

**BIO\_SC 3075: The Human Microbiome**

This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and 'poop transplants' to the role of microbes in asthma and obesity.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200

---

**BIO\_SC 3075W: The Human Microbiome - Writing Intensive**

This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and 'poop transplants' to the role of microbes in asthma and obesity.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200

---

**BIO\_SC 3210: Plant Systematics**

Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.

**Credit Hours:** 4

**Recommended:** 8 hours of Biological Sciences

---

**BIO\_SC 3210W: Plant Systematics - Writing Intensive**

Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.

**Credit Hours:** 4

**Recommended:** 8 hours of Biological Sciences

---

---

**BIO\_SC 3260: Invertebrate Zoology**

Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1100 or BIO\_SC 1500

**Recommended:** Junior Standing

---

**BIO\_SC 3260W: Invertebrate Zoology - Writing Intensive**

Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1100 or BIO\_SC 1500

**Recommended:** Junior Standing

---

**BIO\_SC 3360: Herpetology**

The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips.

**Credit Hours:** 4

**Recommended:** 8 hours Biological Sciences or equivalent

---

**BIO\_SC 3400: Evolution and Ecology**

Introduction to principles of evolution and ecology. Topics include natural selection, adaptation, phylogenetic analysis, human evolution, population growth and regulation, population interactions, ecosystem ecology, and human impacts on ecological processes. No credit for this course if either BIO\_SC 3650 or BIO\_SC 4600 already completed; may not co-enroll in this course and BIO\_SC 4600.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200

---

**BIO\_SC 3510: Biology of Fungi**

(same as PLNT\_S 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1200 or BIO\_SC 1500 or equivalent

---

**BIO\_SC 3650: General Ecology**

Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO\_SC 3100: 2 hours credit.

**Credit Hours:** 5

**Prerequisites:** junior standing

**Recommended:** 10 hours in Biology

---

**BIO\_SC 3650W: General Ecology - Writing Intensive**

Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO\_SC 3100: 2 hours credit.

**Credit Hours:** 5

**Prerequisites:** junior standing

**Recommended:** 10 hours in Biology

---

**BIO\_SC 3655: Tropical Ecology: Methods and Applications**

Field study of tropical community; additional fee for transportation and accommodations required.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 or BIO\_SC 4600 or BIO\_SC 4660

---

**BIO\_SC 3700: Animal Physiology**

Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab.

**Credit Hours:** 5

**Prerequisites:** BIO\_SC 2300

---

**BIO\_SC 3710: Introductory Entomology**

(same as PLNT\_S 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management. Prerequisites: Completion of 60 credit hours and one of the following: BIO\_SC 1100 (or F\_W 1100) or BIO\_SC 1200, or BIO\_SC 1500.

**Credit Hours:** 3

---

**BIO\_SC 3715: Insect Diversity**

(same as PLNT\_S 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

**Credit Hours:** 2

**Prerequisites:** PLNT\_S 3710 (or BIO\_SC 3710) or concurrent registration

---

**BIO\_SC 3750: General Microbiology**

Explores the diversity and adaptive capabilities of microbial life. Topics include bacterial cell structure, metabolism, genetics, and ecology.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300

**Recommended:** grades in C range for prerequisites

---

**BIO\_SC 3760: Microbiology Laboratory**

This is a hands-on microbiology lab course which provides students with training in microbiology techniques, data collection and analysis, writing a research proposal and completing an independent project.

**Credit Hours:** 2

**Prerequisites or Corequisites:** BIO\_SC 3750 or MICROB 3200 or concurrent enrollment in BIO\_SC 3750

---

**BIO\_SC 3780: Genetics Laboratory**

Experimental genetic studies of *Drosophila*, corn and microorganisms.

**Credit Hours:** 2

**Prerequisites:** C range grade or better in BIO\_SC 2200 or instructor's consent

---

**BIO\_SC 4002: Topics in Biological Science - Biological Science**

Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

**Credit Hour:** 1-3

**Prerequisites:** senior standing

---

**BIO\_SC 4006: Topics in Biological Science - Mathematical Science**

Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

**Credit Hour:** 1-3

**Prerequisites:** senior standing

---

**BIO\_SC 4007: Topics in Biological Science - Physical Science**

Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

**Credit Hour:** 1-3

**Prerequisites:** senior standing

---

**BIO\_SC 4085: Problems in Biological Sciences**

Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** Junior Standing

---

**BIO\_SC 4085W: Problems in Biological Sciences - Writing Intensive**

Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** Junior Standing

---

**BIO\_SC 4320: Molecular Plant Physiology**

(same as PLNT\_S 4320; cross-leveled with BIO\_SC 7320, PLNT\_S 7320). Modern physiology of higher plants using common cultivated plants as examples.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1200 or BIO\_SC 1500 and CHEM 1320

---

**BIO\_SC 4328: Introductory Radiation Biology**

(same as NU\_ENG 4328, RADIOL 4328; cross-leveled with BIO\_SC 7328, NU\_ENG 7328, RADIOL 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

**Credit Hours:** 3

**Prerequisites:** junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

---

**BIO\_SC 4400: Plant Anatomy**

(same as PLNT\_S 4400; cross-leveled with BIO\_SC 7400, PLNT\_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues, tissue systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1200 or BIO\_SC 1500

---

**BIO\_SC 4500: Neurobiology**

(cross-leveled with BIO\_SC 7500). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, neuroethology and developmental neurobiology.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2300 or instructor's consent

**Recommended:** BIO\_SC 3700

---

**BIO\_SC 4560: Sensory Physiology and Behavior**

(cross-leveled with BIO\_SC 7560). Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 4500

---

**BIO\_SC 4590: Computational Neuroscience**

(same as ECE 4590, BIOL\_EN 4590, BME 4590; cross-leveled with ECE 7590, BIOL\_EN 7590, BIO\_SC 7590). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral science and an introduction to experimental methods for students from quantitative sciences.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1010 or BIO\_SC 1500; MATH 1500

---

**BIO\_SC 4600: Evolution**

Surveys various processes in organic evolution and underlying genetic mechanisms.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200

---

**BIO\_SC 4640: Behavioral Biology**

(cross-level with BIO\_SC 7640). Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. May be taken with Laboratory for 4 credits.

**Credit Hour:** 3-4

**Prerequisites:** BIO\_SC 1500

**Recommended:** one additional upper-level course in Biological Sciences or Psychology

---

**BIO\_SC 4642: Animal Communication**

Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3400 or BIO\_SC 4600

---

**BIO\_SC 4642W: Animal Communication - Writing Intensive**

Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3400 or BIO\_SC 4600

---

**BIO\_SC 4670: Avian Ecology**

(cross-level with BIO\_SC 7670). Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2600 or BIO\_SC 3650

---

**BIO\_SC 4950: Undergraduate Research in Biology**

Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** Overall GPA 2.75; 20 hours of Biological Sciences and/or Chemistry

---

**BIO\_SC 4950H: Honors Research in Biology**

Individually directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** overall GPA 3.3; instructor's consent; biology or microbiology major. Honors eligibility required

---

**BIO\_SC 4952: Undergraduate Research in Biology**

Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** BIO\_SC 4950; overall GPA 2.75; instructor's consent

---

**BIO\_SC 4952H: Honors Research in Biology**

Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** BIO\_SC 4950H; overall GPA 3.3; instructor's consent. Honors eligibility required

---

**BIO\_SC 4960: Special Readings in Biological Sciences**

Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** senior standing in Biological Sciences and instructor's consent

---

---

**BIO\_SC 4972: Developmental Biology**

Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200, BIO\_SC 2300, CHEM 2100

---

**BIO\_SC 4972W: Developmental Biology**

Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200, BIO\_SC 2300, CHEM 2100

---

**BIO\_SC 4976: Molecular Biology**

(cross-leveled with BIO\_SC 7976). Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300

---

**BIO\_SC 4978: Cancer Biology**

(same as BIOCHM 4978; cross-leveled with BIO\_SC 7978, BIOCHM 7978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300

**Recommended:** BIO\_SC 4976 or BIOCHM 4270 and BIOCHM 4272

---

**BIO\_SC 4982: Human Inherited Diseases**

(cross-leveled with BIO\_SC 7982). Advances in molecular genetics have led to a revolution in our understanding of human disease. This course will examine how molecular technologies, combined with detailed information on cell biology and biochemistry, have been used to unravel the causes of human inherited disease. In addition, we will examine how this new understanding is being used to design therapies for the diseases, and we will discuss some of the ethical and moral questions that have been generated by recent scientific progress.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300

---

**BIO\_SC 4982W: Human Inherited Diseases - Writing Intensive**

(cross-leveled with BIO\_SC 7982). Advances in molecular genetics have led to a revolution in our understanding of human disease. This course will examine how these technologies, combined with detailed information on cell biology and biochemistry, have been used to unravel the causes of human inherited disease. In addition, we will examine how this new understanding is being used to design therapies for the diseases, and we will discuss some of the ethical and moral questions that have been generated by recent scientific progress. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300

---

---

**BIO\_SC 4983: Molecular Ecology**

Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 3400 or BIO\_SC 2200 and BIO\_SC 3650

---

**BIO\_SC 4984: Mammalian Reproductive Biology**

Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology.

**Credit Hours:** 3

**Prerequisites:** junior standing

**Recommended:** 15 hours of Biological Sciences

---

**BIO\_SC 4986: Neurology of Motor Systems**

(cross-leveled with BIO\_SC 7986). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3700 or instructor's consent

---

**BIO\_SC 4988: Nerve Cells and Behavior**

The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3700 or instructor's consent

---

**BIO\_SC 4990: Vertebrate Histology and Microscopic Anatomy**

Microscopic anatomy of vertebrate tissues and organs. Includes lab.

**Credit Hours:** 5

**Prerequisites:** junior standing

**Recommended:** BIO\_SC 3700, or equivalent

---

**BIO\_SC 4994: Senior Seminar**

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

**Credit Hours:** 3

**Prerequisites:** Biological Sciences major, senior standing

---

**BIO\_SC 4994H: Senior Seminar - Honors**

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.

**Credit Hours:** 3

**Prerequisites:** Biological Sciences major, senior standing; Honors eligibility required

---

**BIO\_SC 4994HW: Senior Seminar - Honors/Writing Intensive**

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized sub disciplinary emphasis.

---

**Credit Hours:** 3

**Prerequisites:** Biological Sciences major, senior standing; Honors eligibility required

---

**BIO\_SC 4994W: Senior Seminar - Writing Intensive**

Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

**Credit Hours:** 3

**Prerequisites:** Biological Sciences major, senior standing

---

**BIO\_SC 7002: Topics in Biological Sciences**

Advanced topics not in regularly offered courses. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-6

---

**BIO\_SC 7320: Molecular Plant Physiology**

(same as PLNT\_S 7320; cross-leveled with BIO\_SC 4320, PLNT\_S 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1200 or BIO\_SC 1500 and 5 hours Chemistry

---

**BIO\_SC 7328: Introductory Radiation Biology**

(same as NU\_ENG 7328, RADIOL 7328, V\_M\_S 7328; cross-leveled with BIO\_SC 4328, NU\_ENG 4328, RADIOL 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

**Credit Hours:** 3

**Prerequisites:** Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

---

**BIO\_SC 7400: Plant Anatomy**

(same as PLNT\_S 7400; cross-leveled with BIO\_SC 4400, PLNT\_S 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1200 or equivalent

---

**BIO\_SC 7490: Vertebrate Histology and Microscopic Anatomy**

Microscopic anatomy of vertebrate tissues and organs. Graded on A-F basis only.

**Credit Hours:** 5

**Prerequisites:** BIO\_SC 2300 and BIO\_SC 3700, or equivalent

---

**BIO\_SC 7500: Neurobiology**

(cross-leveled with BIO\_SC 4500). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuranatomy, neurothology and developmental biology. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2300 or BIO\_SC 3700

---

---

**BIO\_SC 7560: Sensory Physiology and Behavior**

(cross-leveled with BIO\_SC 4560). Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 4500 or equivalent

---

**BIO\_SC 7590: Computational Neuroscience**

(same as BIOL\_EN 7590, ECE 7590; cross-leveled with BIO\_SC 4590, BIOL\_EN 4590, ECE 4590, BME 4590). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1010 or BIO\_SC 1500, MATH 1500

---

**BIO\_SC 7640: Behavioral Biology**

(cross-leveled with BIO\_SC 4640). Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

---

**BIO\_SC 7670: Avian Ecology**

(cross-leveled with BIO\_SC 4670). Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2060 or BIO\_SC 3650; BIO\_SC 2600

---

**BIO\_SC 7976: Molecular Biology**

(cross-leveled with BIO\_SC 4976). Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 2300

---

**BIO\_SC 7978: Cancer Biology**

(same as BIOCHM 7978; cross-leveled with BIO\_SC 4978, BIOCHM 4978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 4270, BIO\_SC 2300 and BIO\_SC 4976 or equivalent

---

**BIO\_SC 7982: Human Inherited Diseases**

(cross-leveled with BIO\_SC 4982). Advances in molecular genetics have led to a revolution in our understanding of human disease. This course will examine how molecular technologies, combined with detailed information on cell biology and biochemistry, have been used to unravel the causes of human inherited disease. In addition, we will examine how this new understanding is being used to design therapies for the

diseases, and we will discuss some of the ethical and moral questions that have been generated by recent scientific progress. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and instructor's consent

---

**BIO\_SC 7986: Neurology of Motor Systems**

(cross-leveled with BIO\_SC 4986). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3700

---

**BIO\_SC 7990: Non-thesis Research**

Independent research not leading to a thesis. Some sections may be offered on either A-F or S/U grading basis.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**BIO\_SC 8002: Topics in Biological Sciences- Biological/Physical/Mathematics**

Advanced topics not in regularly offered courses.

**Credit Hour:** 1-6

---

**BIO\_SC 8050: Professional Survival Skills**

Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.

**Credit Hours:** 2

---

**BIO\_SC 8060: Ethical Conduct of Research**

(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

**Credit Hour:** 1

---

**BIO\_SC 8070: Professional Communication Development**

The purpose of this course is to develop professional communication skills in students that are planning to attend (or are in their first year of) graduate training. Some sections may be offered with A-F or S/U grading option.

**Credit Hour:** 1-2

---

**BIO\_SC 8085: Problems in Biological Sciences**

Research not expected to terminate in thesis, or individual advanced study in special subjects.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**BIO\_SC 8087: Seminar**

Current topics in the biological sciences. Open to all graduate students. Graded S/U basis only.

**Credit Hour:** 1

---

**BIO\_SC 8090: Research in Biological Sciences**

Research leading to thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**BIO\_SC 8187: Seminar in Areas of Specialization**

Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only.

**Credit Hour:** 1

---

**BIO\_SC 8300: Advanced Plant Genetics**

Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis.

**Credit Hours:** 3

**Prerequisites:** General Genetics and course in Cell Biology or Plant Physiology

---

**BIO\_SC 8310: Fungal Genetics and Biology**

Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A-F only.

**Credit Hours:** 3

---

**BIO\_SC 8320: Developmental Genetics**

An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent

---

**BIO\_SC 8440: Integrative Neuroscience I**

(same as NEUROSCI 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.

**Credit Hours:** 3

---

**BIO\_SC 8442: Integrative Neuroscience II**

(same as NEUROSCI 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.

**Credit Hours:** 3

---

**BIO\_SC 8460: Advanced Cancer Biology**

A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.

**Credit Hours:** 3

---

---

**BIO\_SC 8505: Introduction to Plant Stress Biology**

(same as PLNT\_S 8505). This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only

**Credit Hours:** 2

---

**BIO\_SC 8600: Design of Ecological Experiments**

Principles of experimental design in the context of ecological, behavioral, and evolutionary research.

**Credit Hours:** 2

**Prerequisites:** STAT 1400

---

**BIO\_SC 8610: Current Concepts in Conservation Biology**

Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.

**Credit Hours:** 2

---

**BIO\_SC 8633: Molecular and Network Evolution**

(same as AN\_SCI 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required

---

**BIO\_SC 8700: Ecological Genetics**

Population genetics and evolutionary theory, with emphasis on studies of natural populations.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200, BIO\_SC 3100 or BIO\_SC 3650, and STAT 1400 or equivalent

---

**BIO\_SC 8720: Speciation**

Advanced discussion of species concepts and the processes of formation of species.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 2200 and BIO\_SC 4600

---

**BIO\_SC 8724: College Science Teaching**

(same as LTC 8724, PHYSCS 8310, ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

**Credit Hours:** 3

---

**BIO\_SC 8725: Science Outreach: Public Understanding of Science**

(same as AN\_SCI 8725, PHYSCS 8350, LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

**Credit Hour:** 1-2

---

**BIO\_SC 8726: Integrating Science with Outreach**

(same as LTC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.

**Credit Hour:** 1-6

---

**BIO\_SC 8740: Plant/Animal Interactions**

Discussion and lectures on herbivory, pollination biology, and dynamics of fruit and seed dispersal from ecological and evolutionary perspectives.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 or BIO\_SC 4660 or equivalent

---

**BIO\_SC 9090: Research in Biological Sciences**

Research leading to dissertation. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**BIO\_SC 9432: Molecular Biology II**

(same as MICROB 9432, BIOCHM 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling processes utilizing the current literature will be examined.

**Credit Hours:** 4

**Prerequisites:** MICROB 9430

---

**BIO\_SC 9468: Molecular Biology of Plant Growth and Development**

(same as BIOCHM 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 4976

---

## Biomedical Engineering Courses

**BME 2000: Professional Development in Engineering**

(same as BIOL\_EN 2000). A review of professional opportunities, registration, ethics, and societies. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Sophomore standing

---

**BME 2007: World of Neuroscience**

(same as BIOL\_EN 2007, CMP\_SC 2007, ECE 2007). This in-class course will introduce undergraduates to the growing area of neuroscience from the perspectives of three disciplines: engineering, biology and psychology. Topics in the course will span multiple levels of neuroscience including genomic, genetic, molecular, cellular, systems, behavioral and clinical levels. Due to the interdisciplinary nature of the neuroscience, the classes will cover diverse topics. The topics will range from overviews of the key neurobiology areas, to lab sessions involving how to analyze your own brain signals (EEG), and to visits to brain imaging center and EEG lab. The overall goal is to provide a broad exposure to the fascinating world of interdisciplinary neuroscience. Graded on A-F basis.

Credit Hour: 1

---

**BME 2080: Introduction to Programming for Engineers**

(same as BIOL\_EN 2080). This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using MATLAB. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: MATH 1500

---

**BME 2180: Engineering Analysis of Bioprocesses**

(same as BIOL\_EN 2180). Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological/biomedical processes. Graded on A-F basis only.

Credit Hours: 3

Recommended: MATH 1700, CHEM 1320, PHYSCS 2750

---

**BME 3070: Biological Fluid Mechanics**

(same as BIOL\_EN 3070). Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: PHYSCS 2750 and MATH 1700

---

**BME 3075: Introduction to Materials Engineering**

(same as BIOL\_EN 3075, CH\_ENG 3075). Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: One of the following BIOL\_EN 3180, CH\_ENG 3234, MAE 4231, MAE 4300, or instructor consent

Prerequisites: MATH 2300, ENGINR 1200, ENGINR 2200, or instructor's consent

---

**BME 3170: Biomaterials**

(same as BIOL\_EN 3170). Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: BIOL\_EN 2180, ENGINR 2200, or instructor's consent

Prerequisites: BIOL\_EN 3075 or BME 3075

---

**BME 3170W: Biomaterials - Writing Intensive**

(same as BIOL\_EN 3170W). Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: BIOL\_EN 2180, ENGINR 2200, or instructor's consent

Prerequisites: BIOL\_EN 3075 or BME 3075

---

**BME 3180: Heat and Mass Transfer in Biological Systems**

(same as BIOL\_EN 3180). Principles of heat and mass transfer and their applications in biomedical, bioenvironmental, and bioprocessing engineering. Graded on A-F basis only.

Credit Hours: 3

Prerequisites or Corequisites: ENGINR 2300 or CH\_ENG 3261

Prerequisites: BIOL\_EN 2180 or CH\_ENG 2225

---

**BME 4001: Topics in Biomedical Engineering**

Current and new technical developments in biomedical engineering.

Credit Hour: 3-9

---

**BME 4002: Scientific Discovery Leading to Life Science Innovations**

The overarching goal of this course is to introduce the concept of biomedical innovation and the pathways to succeed in drug or device product development. The importance of identifying appropriate unmet clinical needs, understanding stake holder perspectives, recording and protecting their ideas, and the commercialization potential of a product will be explained. The recent, innovation-based, life science research that is carried out in academic institutions, as well as the pathways involved in translating those fundamental discoveries into products and services that affect healthcare, will be explained. We will provide an outline about drug-discovery, device development, intellectual property protection, conflict of interests, ethical perspectives, and regulatory issues, as well as the transitions from initial discovery concepts to product development. An introduction to essential disciplines and interactions that enable scientific discoveries to move forward into novel drug and device development will be provided. Graded on A-F basis only.

Credit Hours: 3

---

**BME 4003: Design and Development of Biomedical Innovation**

The overarching goal of this course is to help participants understand the design and development (drug or device) process in biomedical innovation. This course will help participants to understand the process of choosing unmet clinical needs, articulate a need statement without integrating solution, design and develop a solution. Participants will learn to assess the commercial potential of clinical needs by performing market analysis and valuing customer needs. A conceptual understanding about development of a prototype for a device and also drug development by different brainstorming process will be provided. Details of regulatory, reimbursement, patenting process required for product development will be explained with examples. An overview about how to evaluate preliminary designs, define product specifications, comply with manufacturing principles and methods, costs, cGMP requirements will be explained. Quality control and Quality assurance necessities for drug/device will be elucidated with case studies. Participants will gain knowledge about different business models for drug and devices, estimate market penetration and how to make profitable, patient-driven products. Graded on A-F basis only.

Credit Hours: 3

---

**BME 4004: Regulatory Issues in Clinical Trials**

The overarching goal of this course is to help participants understand the essentials of compliance issues as it is related to conducting clinical trials using drugs and devices that have been or yet to be approved by FDA. This course will also help biomedical innovators recognize the importance of Human Subject Protection (HSP) and abide by the FDA regulations to

conduct clinical trials with the new drugs/devices that are being designed to advance patient-care. The course will describe regulatory standpoints for human subject protection, how to obtain approvals and develop clinical protocols for conducting clinical trials. An overview about clinical epidemiology, biostatistics and data management and analysis will be provided. Graded on A-F basis only.

**Credit Hours:** 3

---

**BME 4075: Brain Signals and Brain Machine Interfaces**

(same as BIOL\_EN 4075; cross-leveled with BIOL\_EN 7075). The course introduces state-of-the-art technologies for monitoring and manipulating brain activity, as well as the design principles of modern brain-machine interfaces (BMIs) for interacting with the brain in health and disease. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 4070 or instructor's consent

---

**BME 4085: Problems in Biomedical Engineering**

Supervised independent study at the undergraduate level.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**BME 4170: Biomaterials Interfaces of Implantable Devices**

(same as BIOL\_EN 4170; cross-leveled with BIOL\_EN 7170). This course introduces students to implantable devices and tissue engineering and the effects of biocompatibility of the performance of the devices and tissue engineered scaffolds. A number of implantable devices will be studied including VADs (ventricular assist devices), drug delivery systems and tissue engineered constructs/scaffolds. Special emphasis is placed on investigating the techniques to enhance biocompatibility of the devices/scaffolds and integration of host tissue. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3170

---

**BME 4360: Biomanufacturing Technologies**

(same as BIOL\_EN 4360). This course is an introduction to biomanufacturing technologies and processes for manufacturing biological products (e.g., vaccine, antibodies, and therapeutic proteins). It mainly covers process development, unit operations, product evaluation, facilities, and regulatory compliance. It is an interdisciplinary course of biochemistry, microbiology, and engineering. The purpose of this course is to help the students acquire the knowledge of modern biomanufacturing and prepare them for rapidly growing fields in biomanufacturing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 and BIOL\_EN 3180 (for biological engineering students) -or- CH\_ENG 2225 and CH\_ENG 3234 (for chemical engineering students) -or- Consent of instructor

---

**BME 4370: Orthopaedic Biomechanics**

(same as BIOL\_EN 4370; cross-leveled with BIOL\_EN 7370). Engineering sciences will be leveraged to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3170, ENGINR 1200, or instructor's consent

---

**BME 4380: Applied Electronic Instrumentation**

(same as BIOL\_EN 4380; cross-leveled with BIOL\_EN 7380).

Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** PHYSCS 2750

---

**BME 4420: Introduction to Biomedical Imaging**

(same as BIOL\_EN 4420, PHYSCS 4420; cross-leveled with BIOL\_EN 7420, PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

---

**BME 4470: Biomolecular Engineering and Nanobiotechnology**

(same as BIOL\_EN 4470; cross-leveled with BIOL\_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSCS 2760, CHEM 2100

**Recommended:** Senior/graduate standing or instructor's consent

---

**BME 4470H: Biomolecular Engineering and Nanobiotechnology - Honors**

(same as BIOL\_EN 4470H; cross-leveled with BIOL\_EN 7470).

Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSCS 2760, CHEM 2100. Honors eligibility required

**Recommended:** Senior/graduate standing or instructor's consent

---

**BME 4480: Physics and Chemistry of Materials**

(same as BIOL\_EN 4480, PHYSCS 4190, NU\_ENG 4319, CHEM 4490; cross-leveled with BIOL\_EN 7480, PHYSCS 7190, CHEM 7490, NU\_ENG 7319). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2750, CHEM 1320 or equivalent, or instructor's consent

---

**BME 4540: Neural Models and Machine Learning**

(same as ECE 4540, CMP\_SC 4540, BIOL\_EN 4540; cross-leveled with ECE 7540, BIOL\_EN 7540, CMP\_SC 7540). The projects-based course

has three inter-linked components: (I) math models of neurons and neural networks, (II) machine learning in neuroscience, after a brief introduction to python and (III) software automation and cyberinfrastructure to support neuroscience. Extensive projects focusing on software automation and machine learning components, with brief in-class presentations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500 or consent of instructor

**Recommended:** Introductory software programming, and introductory cell biology or consent of instructor

---

#### **BME 4570: Fluorescent Imaging**

(same as BIOL\_EN 4570; cross-leveled with BIOL\_EN 7570). Principles and applications of the modern technology of fluorescent imaging.

The course covers image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; Fluorescent probe and applications of molecular and cellular fluorescent imaging in life science research. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1500, BIO\_SC 2180

---

#### **BME 4590: Computational Neuroscience**

(same as BIOL\_EN 4590, BIO\_SC 4590, ECE 4590; cross-leveled with BIOL\_EN 7590, BIO\_SC 7590, ECE 7590). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1010, BIO\_SC 1500; MATH 1500

---

#### **BME 4770: Biomedical Optics**

(same as BIOL\_EN 4770; cross-leveled with BIOL\_EN 7770). Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760

**Recommended:** BIOL\_EN 3180

---

#### **BME 4940: Engineering Internship**

(same as BIOL\_EN 4940). Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** advisor's consent

---

#### **BME 4970: Nuclear Magnetic Resonance and Magnetic Resonance Imaging**

(same as BIOL\_EN 4970). Nuclear Magnetic Resonance (NMR) is one of the most powerful methods of investigating the structure, composition, and dynamics of atoms and molecules. It is now ubiquitous in chemistry and engineering labs, and has blossomed into one of the most successful medical imaging modalities - Magnetic Resonance Imaging (MRI). This course is an in-depth examination of the relevant physical principles behind this technology: basic spin physics, spectrometer design and

implementation, what it can be used to measure, and how it is currently being used in laboratory and clinical settings. In particular, students will gain a working knowledge of basic nuclear physics, spin precession, T1 and T2 weighting mechanisms, the pulse/acquire NMR experiment, the influence of magnetic field gradients, Fourier theory and k-space, imaging principles, and the many pulse sequences currently employed in NMR/MRI research labs around the world.

**Credit Hours:** 3

**Prerequisites:** Senior Standing or instructor consent

---

#### **BME 4980: Biomedical Engineering Design**

(same as BIOL\_EN 4980). Capstone design course for the biomedical engineering major. Design of biomedical devices or processes. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1100 or MAE 1100, and ENGINR 2200, and BIOL\_EN 3180 or BME 3180, or instructor's consent

**Corequisites:** BIOL\_EN 4380 or BME 4380

---

#### **BME 4980W: Biomedical Engineering Design - Writing Intensive**

(same as BIOL\_EN 4980W). Capstone design course for the biomedical engineering major. Design of biomedical devices or processes. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1100 or MAE 1100, and ENGINR 2200, and BIOL\_EN 3180 or BME 3180, or instructor's consent

**Corequisites:** BIOL\_EN 4380 or BME 4380

---

#### **BME 4985: Bioengineering Design II**

(same as BIOL\_EN 4985). This course is intended to serve as the second term of our capstone, or senior design experience, for the Bachelor of Science in Biological Engineering or Biomedical Engineering degree programs. During this term, students will be expected to continue the design project begun by their team in the fall semester, carrying it through to prototyping, testing, and redesign. Students will continue their project under the advisement of the same faculty mentor and industrial cooperator who led their first term capstone experience. Graded on A-F basis only.

**Credit Hour:** 1-5

**Prerequisites:** BIOL\_EN 4980 or BME 4980

---

#### **BME 4990: Undergraduate Research in Biomedical Engineering**

Supervised independent study at the undergraduate level. Graded on A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** Department consent

---

#### **BME 4995H: Undergraduate Honors Research in Biomedical Engineering**

(same as BIOL\_EN 4995H). Open only to honor students in Biological Engineering and Biomedical Engineering. Independent investigation in biological engineering to be presented as a thesis.

**Credit Hour:** 1-5

**Prerequisites:** Instructor consent, Honors eligibility required

---

## Biomedical Sciences Courses

### BIOMED 1010: Biomedical Career Explorations

An introduction to the variety of career possibilities within the growing field of biomedical sciences. Graded on A-F basis only.

**Credit Hour:** 1

---

### BIOMED 2110: Biomedical Terminology

Life science etymology (Greek for 'true meaning', means the study of word derivation) taught by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A-F basis only.

**Credit Hours:** 3

---

### BIOMED 2111: Veterinary Medical Terminology

Veterinary Medical Terminology is an extension of Biomedical Sciences 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** BIOMED 2110 or instructor's consent

---

### BIOMED 2120: Essentials of Animal Handling and Physical Restraint

Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets. Graded on A-F basis only.

**Credit Hours:** 2

---

### BIOMED 2130: Introduction to Veterinary Anatomy and Physiology

This introductory anatomy and physiology course describes the body and its functions from a systemic approach. Suitable for a student with no previous coursework in anatomy and physiology. Graded on A-F only.

**Credit Hours:** 3

---

### BIOMED 2140: Companion Animals

(same as AN\_SCI 2140). Companion animals form an important part of our society. They serve us, provide companionship and many become members of our families. This class focuses primarily on dogs, cats, and horses. Topics covered include: the pet industry, breeds, wellness, management, care, training, zoonotic diseases, evolution and domestication, toxicology, nutrition, reproduction, genetics, human animal interactions, companion animal enterprise, and biomedical research. Students may enroll in one of two sections: service learning section or traditional course section.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

### BIOMED 2230: Animal Sanitation and Disease Prevention

Preventative measures for diseases and parasites of farm animals.

**Credit Hours:** 3

---

### BIOMED 2940: Internship in Biomedical Sciences

Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** sophomore standing and instructor's consent

---

### BIOMED 3000: Specialty Careers for Veterinary Technicians

Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Course graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** AAS degree in veterinary technology or instructor's consent required

---

### BIOMED 3001: Topics in Biomedical Sciences

Topics in Biomedical Sciences.

**Credit Hour:** 1-99

---

### BIOMED 3100: Biomedical Pathophysiology

Pathophysiology is the study of changes in the body resulting from disease. This course requires knowledge of normal anatomy and physiology. A comparative approach is used involving both domestic animal and human examples. Course graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254 or BIO\_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

---

### BIOMED 3200: Comparative Hematology

Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Course graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254 or BIO\_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

---

### BIOMED 3219: Elements of Comparative Anatomy

This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** five hours of biological science or zoology or equivalent or instructor's consent or an AAS degree in veterinary technology

---

### BIOMED 3250: Parasitology

Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special

emphasis is given to parasites that can be transmitted from animals to man.

**Credit Hours:** 3

**Prerequisites:** 8 hours of biology or instructor's consent

---

#### **BIOMED 3300: Animal Welfare and Ethics**

An introductory examination of ethical issues related to animal welfare, including animal use for food, research, and companionship, plus contemporary issues affecting companion animals, farm animals, and horses. Topics related to animal pain and legal status will also be discussed. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** junior standing

---

#### **BIOMED 3326: Principles of Veterinary Pharmacology**

An introduction to the study of veterinary pharmacology. Topics to be covered include terminology, calculations, basic physiology, and basic pharmacokinetics and pharmacodynamics. Both small and large animal organ systems are discussed. Basic medicolegal aspects of pharmacology are also reviewed.

**Credit Hours:** 3

**Prerequisites:** an AAS degree in veterinary technology or AN\_SCI 3254 or BIO\_SC 3700, or equivalent, or instructor's consent

---

#### **BIOMED 3400: Domestic Animal Behavior in Veterinary Practice**

Students will be introduced to the key characteristics of behavior among common domestic animals such as dogs, pigs, cats, horses, cattle, sheep and goats. Topics include communication, aggression, biological rhythms, reproductive behavior, learning and development, ingestive behavior and genetics. This course will enable students to gain a thorough understanding of assessing animal behavior, as well as how to utilize the assessment to better the animal's health. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Junior standing

---

#### **BIOMED 4001: Topics in Biomedical Sciences**

Topics in Biomedical Sciences.

**Credit Hour:** 1-99

---

#### **BIOMED 4100: Veterinary Clinical Chemistry**

(cross-leveled with V\_PBIO 7100). This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

**Credit Hours:** 3

**Prerequisites:** An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited programs; Undergraduate physiology on mammals (AN\_SCI 3254, BIO\_SC 3700, or equivalent

**Recommended:** BIOMED 2110 and BIOMED 3200 or instructor's consent

---

#### **BIOMED 4110: Veterinary Cytology**

(cross-leveled with V\_PBIO 7110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association-accredited program, or instructor's consent

**Credit Hours:** 2

**Recommended:** BIOMED 3200 and BIOMED 2110

---

#### **BIOMED 4120: Principles of Toxicology**

(cross-leveled with V\_PBIO 7120). This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

**Credit Hours:** 3

**Prerequisites:** one year of college chemistry and biology, each or instructor's consent

---

#### **BIOMED 4210: Animal Issues in Disasters**

(cross-leveled with V\_PBIO 7210). This course describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

**Credit Hour:** 1

**Prerequisites:** an AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

---

#### **BIOMED 4300: Clinical Veterinary Neurology**

Clinical veterinary neurology will review the neurologic examination, common neurologic diseases and techniques to properly care for the neurologic patient. The course organization is based primarily on neuroanatomic localization of disease. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AAS in Veterinary Technology or BIOMED 3219 and 3100 or instructor's consent; junior or senior standing

---

#### **BIOMED 4320: Fundamentals of Small Animal Emergency and Critical Care**

(cross-leveled with V\_BSCI 7320). This course will provide students with the knowledge and skills to assist in small animal medical emergency and critical care facilities.

**Credit Hours:** 3

**Prerequisites:** An AAS in veterinary technology from an American Veterinary Medical Association accredited program, or equivalent training, or instructor's consent

---

**BIOMED 4333: Veterinary Cell Biology**

(same as V\_BSCI 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor's consent

---

**BIOMED 4400: Veterinary Surgical Nursing**

Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOMED 2111, BIOMED 3219, and BIOMED 3100, or instructor's consent

---

**BIOMED 4410: Small Animal Physical Rehabilitation**

This course will review the science of veterinary rehabilitation, assessment of rehabilitation patients, and the techniques used to treat these patients. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AAS degree in veterinary technology or BIOMED 2110 or HTH\_PR 2190 or equivalent, plus BIOMED 3219 or PTH\_AS 2201 or equivalent, or instructor's permission

---

**BIOMED 4500: Equine Critical Care and Nursing**

This course provides advanced information for veterinary technicians, veterinary assistants, and pre-veterinary students wishing to enhance and focus their understanding of equine critical care and nursing concepts. Course graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 2095 and AN\_SCI 3254 or BIO\_SC 3700 or equivalents, AAS or equivalent degree from AVMA-accredited program or instructor's consent

---

**BIOMED 4510: Equine Clinical Anatomy: Forelimbs**

(cross-leveled with V\_BSCI 7510). Basic foundation in selected aspects of equine clinical anatomy from veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structures of the horse's forelimbs.

**Credit Hour:** 1

**Prerequisites:** five hours of biologic science or zoology, or equivalent, or instructor's consent, or an AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited program

---

**BIOMED 4520: Equine Clinical Practice**

This course is an introduction to a common medical conditions of the horse. Emphasis will be placed on the presenting complaint and the veterinarians approach to diagnosis, treatment, and prognosis.

**Credit Hour:** 1

**Prerequisites:** BIOMED 2110, BIOMED 2111 and AN\_SCI 4977 or their equivalents, or an associate's degree in veterinary technology, or instructor's consent

---

**BIOMED 8100: Veterinary Online Course Development and Teaching**

Best practices of online teaching in veterinary medicine are taught. Emphasis is placed on proper course objectives, productive instructor and student interactions, appropriate student assessments, and essentials of course alignment. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ED\_LPA 9456

**Prerequisites:** ED\_LPA 9448

---

**BIOMED 8310: Advanced Topics in Stress Physiology**

An in-depth study of the causes and physiological responses to internal and external stress conditions that affect animals throughout life. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Admission to the MS in Biomedical Sciences program

---

**BIOMED 8311: Clinical Veterinary Physiology Review Series A: Cells, Circulation, Musculoskeletal, Renal, Immune**

This course will provide graduate level instruction to review cellular, circulation, musculoskeletal, renal, and immune physiology, and apply concepts to the veterinary patient. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Acceptance into program

---

**BIOMED 8312: Clinical Veterinary Physiology Review Series B: Respiration, Neurological, Gastrointestinal, Metabol**

This course will provide graduate level instruction to review respiratory, neurological, gastrointestinal, metabolic, and endocrine physiology, and apply concepts to the veterinary patient. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** admission into program

---

**BIOMED 8700: Principles of Veterinary Pain Management**

Pain pathophysiology, assessment, and management in veterinary patients. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Admission to the MS in Biomedical Sciences program

---

**BIOMED 8710: Essentials of Radiation Biology**

Essentials of Radiation Biology begins with an overview of pertinent medical physics and cell biology, then continues with the biologic, cellular and systemic responses to ionizing radiation. This course also includes a presentation of the early and late somatic and genetic effects of ionizing radiation. Required radiation protection guidelines and regulations will be taught as well as methods and techniques to reduce whole body and organ occupational radiation exposure. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Successful completion of undergraduate Biology; admission into the program

---

---

**BIOMED 8900: Small Animal Wound Management and Reconstructive Surgery**

This course addresses wound physiology, management and reconstructive surgery in small animal patients. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Admission to program

---

**Black Studies Courses**

**BL\_STU 1000: Introduction to Black Studies**

An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by Black Studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed. This course prepares students at all levels with a good foundation for advancement in Black Studies but also with a useful set of guidelines for further achievement in the humanities, behavioral and the social sciences.

**Credit Hours:** 3

---

**BL\_STU 1250: World Theatre Workshop**

(same as THEATR 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

**Credit Hours:** 2

---

**BL\_STU 1335: Introduction to Soul and Country**

(same as MUSIC\_NM 1335). Examination of musical cultures signified by 'soul' and 'country'. Study of the evolution and aesthetics of these genres and how they deal with concepts like identity, class, race, and ethnicity; gender and sexuality; politics and patriotism.

**Credit Hours:** 3

---

**BL\_STU 1410: African American History**

(same as HIST 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

**Credit Hours:** 3

---

**BL\_STU 1700: Black Studies in Gender, Race, Sexuality, and Class: Introduction**

This course introduces students to basic terminology, historical and contemporary dimensions of social inequality centered in race, gender, class and sexuality. Using multidisciplinary lenses to examine social, cultural, political and economic experiences of diverse Black populations, communities and individuals to learn core concepts: race, class, gender, and sexuality toward understanding the implications of socially-constructed identities for distinct groups of Black societies navigating various gendered modes of being. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** BL\_STU 1000

---

**BL\_STU 1704: Introduction to Black Politics**

(same as POL\_SC 1704). This course is oriented toward the development of concepts and theory in the study of black politics. The readings in the course are divided into political science categories such as ideology, electoral participation, movement politics and public policy. In addition, major periods in black political history are examined in the light of the behavioral and theoretical concerns prominent in political science. Black Politics seeks an increased understanding of Black Diaspora history as a group and the various political effects of the history of slavery and racism; and (2) studies Black Diaspora struggles for racial justice, civil rights, political equality, and fundamental respect in the face of both explicit and structural or systematic racism. Graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 1705: Introduction to Black Studies in Culture**

Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

**Credit Hours:** 3

---

**BL\_STU 1705H: Introduction to Black Studies in Culture - Honors**

Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**BL\_STU 1720: African-American Theatre History**

(same as THEATR 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.

**Credit Hours:** 3

---

**BL\_STU 1790: History of Early Africa**

(same as HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

**Credit Hours:** 3

---

**BL\_STU 1800: History of Modern Africa**

(same as HIST 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

**Credit Hours:** 3

---

**BL\_STU 1801: Introduction to the Black Diaspora**

This course introduces students to the content and contours of Diaspora Studies as a field of study--its genealogy, development, and

future challenges. The course focuses on historic and contemporary experiences of African-descended peoples in the Americas, particularly the United States, the Caribbean, and Latin America. We will also give some attention to how members of the Diaspora remember and encounter Africa, and to how Africans respond to the history of enslavement, colonialism, apartheid, racism and globalization. In addition to literature and research, film, music, photography, and artwork will be used to develop a critical understanding of the African Diaspora. These non-written texts will make abstract readings come to life while stimulating the development of critical thinking skills. Students are encouraged to draw connections between these visual/audio representations and the ideas and issues that we uncover from course readings. Graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 2001: Undergraduate Topics in Black Studies-General**

Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

**Credit Hour:** 1-3

---

**BL\_STU 2001H: Undergraduate Topics in Black Studies-General - Honors**

Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

---

**BL\_STU 2003: Undergraduate Topics in Black Studies-Behavioral Science**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

**Credit Hours:** 3

---

**BL\_STU 2003W: Undergraduate Topics in Black Studies-Behavioral Science - Writing Intensive**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

**Credit Hours:** 3

---

**BL\_STU 2004: Topics in Black Studies-Social Science**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 2004W: Topics in Black Studies-Social Science - Writing Intensive**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 2005: Topics in Black Studies - Humanities**

Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

**Credit Hours:** 3

---

**BL\_STU 2200: Social Inequalities**

(same as SOCIOL 2200). Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured.

**Credit Hours:** 3

---

**BL\_STU 2210: The Black Americans**

(same as SOCIOL 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations.

**Credit Hours:** 3

**Prerequisites:** SOCIOL 1000 or equivalent or instructor's consent

---

**BL\_STU 2303: Studies in Black Relationships**

This course examines constructions of Black American coupling and therefore, gender, race, sexuality, and class in the 20th and 21st centuries. Blackness has been and continues to be reconstructed via marriage, dating, and other forms of coupling. Emphasis will be placed on the role of socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.

**Credit Hours:** 3

---

**BL\_STU 2400: Introduction to African Diaspora Literature**

(same as ENGLSH 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

**Credit Hours:** 3

**Recommended:** ENGLSH 1000

---

**BL\_STU 2409: Introduction to African Diaspora Literature, 1890-Present**

(same as ENGLSH 2409). See BL\_STU 2400 for course description.

**Credit Hours:** 3

---

**BL\_STU 2410: African American Women in History**

(same as HIST 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.

**Credit Hours:** 3

---

**BL\_STU 2425: Race and the American Story**

(same as POL\_SC 2425, CNST\_DEM 2425). This course represents a collaboration between the University of Missouri's Department of Black

Studies and the Kinder Institute on Constitutional Democracy. Building upon the existing Citizenship@Mizzou program, the course aims to carry forward the goals of the Citizenship program and to further solidify and magnify its impact on campus. In so doing, the course will also serve as a model for improving diversity education on campuses across the country and contribute to a more informed and unified national culture. The core syllabus will consist in readings that tell the story of the confrontation between American political principles and the practice of racial injustice throughout our history. Students will read and discuss the Declaration of Independence, the slavery clauses in the Constitution, the poetry of Phillis Wheatley, and the speeches of Frederick Douglass, Abraham Lincoln, and Martin Luther King, Jr., among others. They will achieve a greater understanding of how diversity relates to humanity, and will learn to dialogue productively and civilly with others who may not share their background or opinions.

**Credit Hours:** 3

---

**BL\_STU 2601: Languages of Africa**

(same as ENGLISH 2601 and LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.

**Credit Hours:** 3

---

**BL\_STU 2604: Caribbean History and Culture**

This course surveys the historical and cultural development of the Caribbean region from colonial times to the present. It emphasizes the colonial decimation of Amerindians and the evolution from plantation societies to slave societies, along with tracing the history of racial and gender relations, imperial rivalries, economic dependency, and ultimately nationalism and political independence.

**Credit Hours:** 3

---

**BL\_STU 2700: Black Studies in Gender, Race, Sexuality, and Class: Intermediate**

This course explores the historical and contemporary dimensions of social inequality centered in gender, race, class and sexuality. Using an interdisciplinary lens and feminist analysis this course will analyze social, cultural, political and economic experiences of various individuals and communities. Readings, lectures, films and discussions will focus on diverse structures of power and inequality and their relationship to constructions of patriarchy, capitalism, heterosexism, racism, nationality, and ability. Emphasis will be placed on the socially constructed definitions of various groups and how these definitions affect individual and group experiences. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** BL\_STU 1000

---

**BL\_STU 2704: African Political Thought**

This course investigates African political philosophy and debate throughout the period leading to decolonization and the reflective years of thought following independence. Course will focus on individual political thinkers and cultural phenomena beginning with indigenous African theoretical approaches. Topics will include African Nationalism, populism and Marxism, Pan-Africanism, and concludes with contemporary perspectives on democracy, development, and the African State.

**Credit Hours:** 3

---

**BL\_STU 2715: Studies in Black Culture**

This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as well as other related disciplines. Program consent for repetition.

**Credit Hours:** 3

---

**BL\_STU 2715H: Studies in Black Culture - Honors**

This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as well as other related disciplines. Program consent for repetition.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**BL\_STU 2804: Black Political Thought**

Black Political Thought develops a set of critical tools to help explain the distinctiveness of Black Politics. The distinctiveness of Black Political Thought first emerged from spaces of exclusion in Western nations and colonies. The thinking surrounding Black Political Thought originates in a standpoint, or perspective, profoundly different from that of mainstream Political Theory. Out of this encounter comes a deeper understanding of Black intellectual traditions as well as an enhanced understanding of Political Theory's core concepts. Black Political Thought uses the lens of the African diaspora to investigate the abiding concerns of Political Theory, i.e. the meanings of justice, freedom, and equality; the nature of power, obligation, and 'the good life.'

**Credit Hours:** 3

---

**BL\_STU 2904: Black Studies in Slavery and Freedom**

(same as HIST 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

**Credit Hours:** 3

---

**BL\_STU 2940: African Religions**

(same as REL\_ST 2940). This course will serve as an introduction to various forms of religiosity in sub-Saharan Africa. Greater emphasis will be devoted to the indigenous religious traditions of the continent, but we will also examine Christianity and Islam as they are practiced on the continent. The aim of this class is to help students to better understand various aspects of African cultures by dismantling stereotypes and assumptions that have long characterized the study of religions in Africa. The readings and lectures will be drawn from historical, anthropological, sociological, and literary sources. Graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 2975: Traditions and Concepts in Black Studies**

This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities,

social and behavioral sciences, including literature, languages, and music, sociology, psychology, political science, women's and gender studies, and history. Course graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 3001: Undergraduate Topics in Black Studies - General**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

**Credit Hours:** 3

---

**BL\_STU 3003: Undergraduate Topics in Black Studies - Behavioral Sciences**

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

**Credit Hour:** 1-3

---

**BL\_STU 3004: Undergraduate Topics in Black Studies - Social Science**

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

**Credit Hour:** 1-3

---

**BL\_STU 3004W: Undergraduate Topics in Black Studies - Social Science - Writing Intensive**

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

**Credit Hour:** 1-3

---

**BL\_STU 3005: Undergraduate Topics in Black Studies - Humanities**

Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

**Credit Hour:** 1-3

---

**BL\_STU 3100: African American Psychology**

(same as ESC\_PS 3100 and PSYCH 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed.

**Credit Hours:** 3

**Recommended:** PSYCH 1000

---

**BL\_STU 3200: Black Freedom Movement, 1955-1973**

(same as HIST 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

**Credit Hours:** 3

---

**BL\_STU 3230: Studies in Black Sexual Politics**

Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. May be repeated for credit.

**Credit Hours:** 3

**Recommended:** sophomore standing required

---

**BL\_STU 3303: Black Athletes**

This course examines Black Athletes in the 20th and 21st centuries. Emphasis will be placed on how Blacks entered competitive athletics and the role of racism and power, socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.

**Credit Hours:** 3

---

**BL\_STU 3400: Survey of African American Literature, Beginnings to 1900**

(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**BL\_STU 3400W: Survey of African American Literature, Beginnings to 1900 - Writing Intensive**

(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**BL\_STU 3410: Survey of African American Literature, 1900-Present**

(same as ENGLISH 3410). A survey of major authors and movements in African American literature from 1900 to the present.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**BL\_STU 3605: The History of Blacks in Germany**

(same as GERMAN 3605). This course investigates the history of Africans and African Americans in Germany and Central Europe, from Antiquity to today. Special focus on Medieval Africans in Europe, travelling African American intellectuals around 1900, and African American GIs in occupied Germany. This course will challenge your understanding of race and racism.

**Credit Hours:** 3

---

**BL\_STU 3605H: The History of Blacks in Germany - Honors**

(same as GERMAN 3605). This course investigates the history of Africans and African Americans in Germany and Central Europe, from Antiquity to today. Special focus on Medieval Africans in Europe,

travelling African American intellectuals around 1900, and African American GIs in occupied Germany. This course will challenge your understanding of race and racism.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**BL\_STU 3624: Comparative Approaches to Black Studies in History**

(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.

**Credit Hours:** 3

---

**BL\_STU 3624W: Comparative Approaches to Black Studies in History - Writing Intensive**

(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.

**Credit Hours:** 3

---

**BL\_STU 3700: Black Studies in Gender, Race, Sexuality, and Class: Advanced**

This course provides in-depth study, reading, analysis, and application of key of race, class, gender, and sexuality, and related systemic racism, sexism, classism, and homophobia that impact social institutions, histories and cultural practices for diverse groups of Black people across the gender, color, age, and ability spectrums, with attention to intersecting modes of being that frame our understanding of Black culture, history, and societies and their implications for inequality and equity. Importantly the course examine the importance of social identities, oppression and privilege, social spaces and how differences and similarities historically, psychologically, and culturally construct symbolic and political Blackness that matters, to whom, for whom, and to what end, by exposing students to culturally-specific forms of internal and external oppression and suppression of voices and the responses of underrepresented, oppressed, and/or exploited groups to recover narratives of empowerment and effect change within their diverse communities and societies. Students will engage in diverse disciplinary methods for studying historical, cultural, and sociological phenomena in Black studies such as double-consciousness and internalized racism, and critique existing models and develop new ways of thinking about, engaging, and critically challenging socially constructed and reconstructed notions of Black gendered monolithic otherness. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** BL\_STU 1000

---

**BL\_STU 3703: Themes in Black Society**

Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.

**Credit Hours:** 3

---

**BL\_STU 3705: Themes in Black Culture**

Examines various themes, issues and perspective in literature, music, the arts, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.

**Credit Hours:** 3

---

**BL\_STU 3804: Resistance in the Black Atlantic**

Enslaved black people resisted slavery in the Americas in a variety of ways. From everyday forms of resistance to the planning of revolts, enslaved people displayed an unwillingness to yield to slavery, assertions of their freedom built on political, philosophical, and economic concepts about society and the rights of human beings. Resistance in what is known as the black Atlantic can be divided into nonviolent and violent forms, but within each of these categories were scores of activities validating the claim that the enslaved never accepted slavery or lost their sense of freedom as human beings. By focusing on nonviolent, violent, everyday and periodic forms of resistance, this course examines how the agency of the enslaved served as a foundation for the culture of freedom in the Americas. Resistance is used to explore the influence of blacks on the historical evolution of the Americas, and the overall aim of this course is to give students an understanding of black resistance as one of the most important sources of the progress of the Atlantic world.

**Credit Hours:** 3

---

**BL\_STU 3805: Hip-Hop: Global Music and Culture**

Hip-Hop has captured the minds of youth worldwide, spawning themes, trends, attitudes, and behaviors that are similar to but distinct from the manifestation of hip-hop in the US. This course is designed as an intellectual excursion to explore the US and global creation and consumption of hip-hop through the lens of cultural studies. The class will study processes of imitation, appropriation, translation, and customization and their impact on themes of gender, hegemony, commercialism, sexuality, race, and identity.

**Credit Hours:** 3

---

**BL\_STU 3977: Black Studies Methodologies**

Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** BL\_STU 2975

---

**BL\_STU 4001: Undergraduate Topics in Black Studies-General**

Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.

**Credit Hour:** 1-3

**Prerequisites:** junior standing

---

---

**BL\_STU 4001W: Undergraduate Topics in Black Studies-General - Writing Intensive**

Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.

**Credit Hour:** 1-3

**Prerequisites:** junior standing

---

**BL\_STU 4003: Topics in Black Studies-Behavioral Science**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 4004: Topics in Black Studies-Social Science**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 4005: Topics in Black Studies-Humanities**

Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 4020: Studies in Black Feminist Thought**

(same as WGST 4020; cross-leveled with BL\_STU 7020, WGST 7020). Examines recent problems and critical debates within feminist theory. May be repeated for credit (up to 6 credits) with different semester themes.

**Credit Hours:** 3

---

**BL\_STU 4040: Slavery and the Crisis of the Union: The American Civil War Era**

(same as HIST 4040, CNST\_DEM 4040). This class explores the history of the Civil War era, a transformative moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime 'nationalisms' that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, 'total' warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a 'second American revolution'? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least, how did the triumph of the Union condition the political and economic development of a rapidly globalizing world?

**Credit Hours:** 3

---

**BL\_STU 4130: African-American Politics**

(same as POL\_SC 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context

of elections, behavior of political organizations, social movements, parties, and level of government.

**Credit Hours:** 3

---

**BL\_STU 4210: African-American Religion**

(same as REL\_ST 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**BL\_STU 4230: Women, Development, and Globalization**

(same as SOCIOL 4230, WGST 4230, PEA\_ST 4230; cross-leveled with BL\_STU 7230, SOCIOL 7230, WGST 7230). Examines the history and structure of 'development' discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.

**Credit Hours:** 3

---

**BL\_STU 4270: African-Americans in the Twentieth Century**

(same as HIST 4270; cross-leveled with BL\_STU 7270, HIST 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

**Credit Hours:** 3

---

**BL\_STU 4300: The Black Family: Past, Present & Future**

(same as H\_D\_FS 4300; cross-leveled with BL\_STU 7300, H\_D\_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**BL\_STU 4303: Black Studies in Race, Class, Gender, and U.S. Policy**

(same as HIST 4303; cross-leveled with BL\_STU 7303, HIST 7303). Examines the causes and effects of the vast social and economic inequalities that exist between blacks and whites in US society, including the role federal, state and local government play in creating and addressing such inequalities as financial, tax, environmental, trade, and foreign policies as well as issues of human and social welfare.

**Credit Hours:** 3

---

**BL\_STU 4335: The Wire: Race, Urban Inequality, and the 'Crisis' of the American City**

(same as HIST 4235; cross-leveled with BL\_STU 7335, HIST 7235). The HBO series 'The Wire', a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, 'The Wire' complicates understandings of the 'urban crisis' through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents

negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality.

**Credit Hours:** 3

---

**BL\_STU 4352: Historical Studies in African Music**

(same as MUS\_H\_LI 4352). Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.

**Credit Hours:** 3

**Prerequisites:** Open to upper-level undergraduate students with instructor's consent

---

**BL\_STU 4400: Studies in African Diaspora Literature**

(same as ENGLISH 4400; cross-leveled with BL\_STU 7400, ENGLISH 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

**Credit Hours:** 3

**Recommended:** junior standing

---

**BL\_STU 4409: Studies in African Diaspora Literature, 1890 to Present**

(same as ENGLISH 4409; cross-leveled with BL\_STU 7409, ENGLISH 7409). See BL\_STU 4400 for course description.

**Credit Hours:** 3

---

**BL\_STU 4415: African Americans and American Justice**

(same as HIST 4415; cross-leveled with BL\_STU 7415, HIST 7415). This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

**Credit Hours:** 3

**Prerequisites:** senior standing required

---

**BL\_STU 4415W: African Americans and American Justice - Writing Intensive**

(same as HIST 4415; cross-leveled with BL\_STU 7415, HIST 7415). This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

**Credit Hours:** 3

**Prerequisites:** senior standing required

---

**BL\_STU 4420: Africana Womanism**

(same as ENGLISH 4420; cross-leveled with BL\_STU 7420, ENGLISH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**BL\_STU 4480: Major African Diaspora Women Writers**

(same as WGST 4480, ENGLISH 4480; cross-leveled with BL\_STU 7480, WGST 7480, ENGLISH 7480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Repeatable with department's consent. Maximum of 6 hours for Black Studies 4180 and 4480.

**Credit Hours:** 3

---

**BL\_STU 4488: Major African Diaspora Women Writers, 1789 to 1890**

(same as WGST 4488, ENGLISH 4488; cross-leveled with BL\_STU 7488, WGST 7488, ENGLISH 7488). See BL\_STU 4480 for course description.

**Credit Hours:** 3

---

**BL\_STU 4489: Major African Diaspora Women Writers, 1890 to Present**

(same as WGST 4489, ENGLISH 4489; cross-leveled with BL\_STU 7489, WGST 7489, ENGLISH 7489). See BL\_STU 4480 for course description.

**Credit Hours:** 3

---

**BL\_STU 4489W: Major African Diaspora Women Writers, 1890 to Present - Writing Intensive**

(same as WGST 4489W, ENGLISH 4489W; cross-leveled with BL\_STU 7489, WGST 7489, ENGLISH 7489). See BL\_STU 4480 for course description.

**Credit Hours:** 3

---

**BL\_STU 4500: Special Problems in Black Studies**

Independent project or paper, not leading to dissertation.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**BL\_STU 4604: Advanced Studies in Black Politics**

(cross-leveled with BL\_STU 7604). This is an advanced undergraduate, graduate cross-level course exploring political systems through the lens of the Black cultural and political experience. The overall goal of the course is to get students to think about and understand the importance of politics. The issues that will be focused upon are ones that are of specific importance to Black politics. This course is a challenging one in the sense that students will be required to think and write critically and thoughtfully about the issues. It will also be an interesting one given that all students keep up with the readings and participate actively and regularly. This course is intended to sharpen analytical thinking about Black politics, discuss contemporary issues and problems with respect to political systems, examine various avenues of political expression, and raise questions and new ideas pertaining to the exploration of Black politics. Graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 4640: African Politics**

(same as POL\_SC 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives.

**Credit Hours:** 3

---

**BL\_STU 4704: Religion and Black Freedom**

(same as REL\_ST 4704). In this course, we will explore the role of religion in the shaping of the African diaspora in the Americas through discussions of the readings. We will focus on the use of religion to pursue emancipation from enslavement and the concept of full freedom. Research and theories from mainly history, religious studies, and literature will be used to examine some of the ways in which black people have improved their condition through religion. The main objective of this course is to study the connections between religion and the fashioning of black resistance to slavery and systems of domination after slavery.

**Credit Hours:** 3

---

**BL\_STU 4705: Advanced Studies and Themes in Black Culture**

(cross-leveled with BL\_STU 7705). This cross-level course provides students with an advanced understanding of the cultural traditions and social organization of Black communities across the African Diaspora. The selected topics covered include family structure, social institutions, religious forms, musical genres, folklore and oral histories. The course explores the cultural continuities from a shared African heritage and emphasizes the regionally distinctive cultural practices resulting from local transformations through cultural adaptation. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** The Department recommends students complete BL\_STU 3977 or another approved methods or writing intensive course prior to registering for this course

---

**BL\_STU 4710: Themes in African Diaspora Folklore**

(same as ANTHRO 4160 and ENGLSH 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**BL\_STU 4773: Pan Africanism**

(cross-leveled with BL\_STU 7773). Geographically this course will focus heavily on Pan-Africanism in the United States and the U.K. as well as Africa and the Caribbean. The course will also touch briefly on Pan-Africanism in Latin America and Asia. In addition to the concept of Pan-Africanism, we will explore related themes such as Black Nationalism, Ethiopianism, and Negritude while situating key figures of the African diaspora within the intellectual genealogy of Pan-African thought. Lectures will be supplemented with documentary films and other multimedia sources. Graded on A-F basis only. **Recommended:** The department recommends that students complete BLSTU\_3977: Methodologies or another writing intensive course.

**Credit Hours:** 3

---

**BL\_STU 4804: Historical Studies of Black Women**

This course offers a comprehensive examination of the origins, developments, and productions of the specified time period with emphases on black women as creative artists, activists, performers, musicians, and writers.

**Credit Hours:** 3

---

**BL\_STU 4875: Black Studies: Study Abroad-Humanities**

This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture, augment their 'global competencies,' and support their study and/or career development.

**Credit Hours:** 3

---

**BL\_STU 4877: Black Studies: Study Abroad-Social Science**

This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their 'global competencies' and support their study and/or career development. Graded A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 4904: Historical and Contemporary Slavery**

(same as HIST 4904). An exploration of slavery in both its historical and contemporary context, focusing on the origins, characteristics, and struggles to abolish the practice. Historical slavery examined using African enslavement in the Americas, and contemporary slavery using human trafficking and forced labor in the developed and developing world.

**Credit Hours:** 3

---

**BL\_STU 4977: Black Studies Capstone**

This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Junior standing

---

**BL\_STU 7020: Studies in Black Feminist Thought**

(same as WGST 7020; cross-leveled with BL\_STU 4020 and WGST 4020). Examines recent problems and critical debates within black feminist theory.

**Credit Hours:** 3

---

**BL\_STU 7270: African-Americans in the Twentieth Century**

(same as HIST 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

**Credit Hours:** 3

---

**BL\_STU 7300: The Black Family: Past, Present & Future**

(same as H\_D\_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

**Credit Hours:** 3

---

**BL\_STU 7303: Black Studies in Race, Class, Gender, and U.S. Policy**

(same as HIST 7303; cross-leveled with BL\_STU 4303, HIST 4303). Examines the causes and effects of the vast social and economic

inequalities that exist between blacks and whites in US society, including the role federal, state and local government plays in creating and addressing such inequalities as financial, tax, environmental, trade and foreign policies as well as issues of human and social welfare.

**Credit Hours:** 3

---

**BL\_STU 7335: The Wire: Race, Urban Inequality, and the 'Crisis' of the American City**

(same as HIST 7235; cross-leveled with HIST 4235, BL\_STU 4335). The HBO series 'The Wire', a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, 'The Wire' complicates understandings of the 'urban crisis' through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality.

**Credit Hours:** 3

---

**BL\_STU 7420: Africana Womanism**

(same as ENGLSH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 7480: Major African Diaspora Women Writers**

(same as WGST 7480 and ENGLSH 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for Black Studies 7180 and 7480.

**Credit Hours:** 3

---

**BL\_STU 7604: Advanced Studies in Black Politics**

(cross-leveled with BL\_STU 4604). This is an advanced undergraduate, graduate cross-level course exploring political systems through the lens of the Black cultural and political experience. The overall goal of the course is to get students to think about and understand the importance of politics. The issues that will be focused upon are ones that are of specific importance to Black politics. This course is a challenging one in the sense that students will be required to think and write critically and thoughtfully about the issues. It will also be an interesting one given that all students keep up with the readings and participate actively and regularly. This course is intended to sharpen analytical thinking about Black politics, discuss contemporary issues and problems with respect to political systems, examine various avenues of political expression, and raise questions and new ideas pertaining to the exploration of Black politics. Graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 7705: Advanced Studies and Themes in Black Culture**

(cross-leveled with BL\_STU 4705). This cross-level course provides students with an advanced understanding of the cultural traditions and social organization of Black communities across the African Diaspora.

The selected topics covered include family structure, social institutions, religious forms, musical genres, folklore and oral histories. The course explores the cultural continuities from a shared African heritage and emphasizes the regionally distinctive cultural practices resulting from local transformations through cultural adaptation. Graded on A-F basis only.

**Credit Hours:** 3

---

**BL\_STU 7773: Pan Africanism**

(cross-leveled with BL\_STU 4773). Geographically this course will focus heavily on Pan-Africanism in the United States and the U.K. as well as Africa and the Caribbean. The course will also touch briefly on Pan-Africanism in Latin America and Asia. In addition to the concept of Pan-Africanism, we will explore related themes such as Black Nationalism, Ethiopianism, and Negritude while situating key figures of the African diaspora within the intellectual genealogy of Pan-African thought. Lectures will be supplemented with documentary films and other multimedia sources.

**Credit Hours:** 3

---

**BL\_STU 8000: Independent Readings in Black Studies**

Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours.

**Credit Hours:** 3

**Prerequisites:** Department Consent Required

---

**BL\_STU 8001: Graduate Seminar in Black Studies**

This research seminar introduces students to the central themes, traditions, and scholarly work in Black Studies on a graduate level. It also emphasizes critical thinking, research, and writing in order to prepare students for undertaking effective and successful scholarly writing projects. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** This course is designed for graduate and professional students

---

**BL\_STU 8400: Seminar in African Diaspora Literature**

(same as ENGLSH 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

**Credit Hours:** 3

---

**BL\_STU 8510: Ecology, Conservation, and Environmental Justice**

(same as F\_W 8510). The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Graded on A-F basis only. Prerequisites: One undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent.

**Credit Hours:** 2

---

**BL\_STU 8901: Graduate Topics in Black Studies**

Graduate seminar arranged by topics or themes related to Black Studies. Graded on A-F basis only.

**Credit Hours:** 3

---

**Business Administration Courses****BUS\_AD\_0501: College of Business Study Abroad Pre-departure required on-Campus Information Session**

Place holder Course for required per-departure on campus information sessions Zero credit and billing hours No term finalization

**Credit Hours:** 0

---

**BUS\_AD 1500: Foundations of Business and Professional Development Principles**

This course will provide students the opportunity to learn how to be successful in the Trulaske College of Business (TCoB) as they prepare for a career in business. Students will be led through an exploration of opportunities in our college as well as their personal strengths and how those strengths match with various business academic and career paths. Further, students will learn competencies that are necessary for both academic and professional success. This course is offered as a component of the college's unique Professional Development Program. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to freshman and sophomore students during early registration

---

**BUS\_AD 2500: Intermediate Professional Development Principles**

Introduction to Professional Development in Business, will provide students the opportunity to learn about professional interpersonal dynamics - understanding and working with others. Students will learn skills imperative to forming and nurturing professional relationships and will have the opportunity to practice these skills via field experience. Throughout the course, students will continue to develop the professional competencies necessary for career success. This course is offered as a component of the college's unique Professional Development Program. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** 27 credit hours

**Corequisites:** BUS\_AD 1500 or MNGMT 1050

---

**BUS\_AD 3500: Advanced Professional Development Principles**

Provides a discussion of professional competencies important for success as a business professional. Includes the assessment, communication and development of competencies valued by employers. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Must be a BSBA or ACCT\_BSACC major

---

**BUS\_AD 4500: Professional Development Program - Internship**

This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.

**Credit Hours:** 3

**Prerequisites:** BUS\_AD 3500; Restricted to Upper Level Business Majors who have had their internship approved by the Professional Development Program

---

**BUS\_AD 7050: MBA Communications Practice**

Special laboratory instruction in oral and written communication skills with an emphasis on business communications.

**Credit Hours:** 3

---

**BUS\_AD 7340: Business Ethics and Leadership**

Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks.

**Credit Hour:** 1.5

---

**BUS\_AD 8001: Topics in Business Administration**

Selected topics in administration offered on experimental basis.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**BUS\_AD 8010: MBA Seminar**

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated. Some sections may be graded on A-F or S/U basis.

**Credit Hour:** 1-3

**Prerequisites:** MBA students only

---

**BUS\_AD 8020: MBA Seminar**

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated. Some sections may be graded on A-F or S/U basis.

**Credit Hour:** 1-3

**Prerequisites:** MBA students only

---

**BUS\_AD 8030: MBA Seminar**

Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Some sections may be graded A-F or S/U only. May be repeated.

**Credit Hour:** 1-3

**Prerequisites:** MBA students only

---

**BUS\_AD 8500: Business Problem Analysis: Field Project**

Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience.

**Credit Hours:** 3

---

**BUS\_AD 8600: Business Consulting**

Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often

ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.

**Credit Hours:** 3

---

#### **BUS\_AD 8730: International Study Abroad**

Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Some sections may be graded on A-F or S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** consent required

---

## **Chemical Engineering Courses**

#### **CH\_ENG 1000: Introduction to Chemical Engineering**

Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

**Credit Hours:** 2

**Prerequisites or Corequisites:** MATH 1500, CHEM 1320

---

#### **CH\_ENG 1000H: Introduction to Chemical Engineering - Honors**

Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

**Credit Hours:** 2

**Prerequisites or Corequisites:** MATH 1500, CHEM 1320. Honors eligibility required

---

#### **CH\_ENG 2225: Mass and Energy Balance**

Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** PHYSCS 2750, CHEM 1330

---

#### **CH\_ENG 2225H: Mass and Energy Balance - Honors**

Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** PHYSCS 2750, CHEM 1330

**Prerequisites:** Honors eligibility required

---

#### **CH\_ENG 2226: Engineering Process Computations**

Introduction to the effective use of computer software with emphasis on chemical engineering applications, which include solutions for systems of algebraic equations using matrix methods; solutions of ordinary differential equations and partial differential equations and visualization of those solutions; linear, multilinear, and nonlinear regression for data analysis; 2D and 3D plotting, symbolic calculations, process control simulations, and text processing.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 2225, MATH 2300

**Prerequisites:** MATH 1700

---

#### **CH\_ENG 3075: Introduction to Materials Engineering**

(same as BIOL\_EN 3075, BME 3075). Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only. Prerequisites or Corequisites: One of the following: BIOL\_EN 3180, BME 3180, CH\_ENG 3234, MAE 4231, MAE 4300, or instructor's consent.

**Credit Hours:** 3

**Prerequisites:** MATH 2300, ENGINR 1200 (or instructor's consent)

---

#### **CH\_ENG 3233: Chemical Engineering Fluid Dynamics**

Introductory-level continuum mechanics of fluid flow (first in a two-course series on transport phenomena). Topics emphasized include buoyancy; stress; integral and differential conservation of mass, momentum, and energy; the viscous stress equations of motion; Newtonian fluids, viscosity, creeping flow, and the Navier-Stokes equations; turbulence; dimensionless parameters and correlations; and solutions to partial differential equations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** MATH 4100

**Prerequisites:** PHYSCS 2750, MATH 2300, and a grade of C- or better in CH\_ENG 2225

---

#### **CH\_ENG 3234: Momentum, Heat, and Mass Transfer**

Fluid flow, heat and mass transfer. A comprehensive treatment of the transport processes related to chemical engineering operations, with focus on both theory and applications.

**Credit Hours:** 4

**Prerequisites or Corequisites:** MATH 4100

**Prerequisites:** grade of C- or better in CH\_ENG 2225; PHYSCS 2750, MATH 2300

---

#### **CH\_ENG 3235: Separation Processes**

Separation processes in chemical engineering, including: Evaporation, absorption, distillation, extraction, leaching, membrane separation, and drying.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 3262

**Prerequisites:** CH\_ENG 2225, CH\_ENG 2226

---

#### **CH\_ENG 3243: Chemical Engineering Laboratory I**

Laboratory study of some principal unit operations of chemical engineering.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 3235, CH\_ENG 4363

**Prerequisites:** CH\_ENG 2226, CH\_ENG 3234, PHYSCS 2760

**Recommended:** CH\_ENG 4370 or concurrent enrollment

---

#### **CH\_ENG 3243W: Chemical Engineering Laboratory I - Writing Intensive**

Laboratory study of some principal unit operations of chemical engineering. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 3235, CH\_ENG 4363

**Prerequisites:** CH\_ENG 2226, CH\_ENG 3234

**Recommended:** CH\_ENG 4370 or concurrent enrollment

---

**CH\_ENG 3261: Chemical Engineering Thermodynamics I**

Introduction to classical thermodynamics with chemical engineering applications. Heat, work, and energy; Application of the Laws of Thermodynamics to closed systems, open systems, and power and refrigeration cycles; Thermochemical calculations; Equations of state; Phase equilibrium properties of pure fluids.

**Credit Hours:** 3

**Prerequisites or Corequisites:** MATH 2300

**Prerequisites:** PHYSICS 2750; grade of C or better in CH\_ENG 2225

---

**CH\_ENG 3262: Chemical Engineering Thermodynamics II**

Chemical thermodynamics, with emphasis on mixtures. Multicomponent systems and phase diagrams; residual and excess properties; chemical potential, fugacity, and activity; models of non-ideal mixtures; phase and surface equilibria; chemical reaction equilibria.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3261, MATH 2300

**Recommended:** CHEM 2110 or concurrent enrollment

---

**CH\_ENG 3307: Chemical Process Safety and Professional Ethics**

A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 2225

---

**CH\_ENG 4001: Topics in Chemical Engineering**

Current and new technical developments in chemical engineering.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**CH\_ENG 4085: Problems in Chemical Engineering**

Directed study of chemical engineering problems.

**Credit Hour:** 2-4

**Prerequisites:** instructor's consent

---

**CH\_ENG 4220: Hazardous Waste Management**

(same as CV\_ENG 4220; cross-leveled with CH\_ENG 7220, CV\_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous waste, waste minimization, legislation on hazardous wastes and groundwater contamination.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**CH\_ENG 4232: Ceramic Materials and Processing**

(same as MAE 4232; cross-leveled with MAE 7232, CH\_ENG 7232). Treatment of ceramics materials, structure, and ceramic processing with hands-on demonstration/labs.

**Credit Hours:** 3

**Prerequisites:** C- or better in MAE 2200, BIOL\_EN 3075, BME 3075, or CH\_ENG 3075

---

**CH\_ENG 4270: Design of Experiments and Statistical Quality Control for Process Engineers**

(same as BIOL\_EN 4270; cross-leveled with CH\_ENG 7270, BIOL\_EN 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

**Credit Hours:** 3

**Recommended:** experience with Excel or instructor's consent

---

**CH\_ENG 4285: Pollution Prevention**

Identify, analyze, and solve energy, water, and raw materials inefficiencies common to industrial processes and facilities. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Thermodynamics (ENGINR 2300, MAE 2300, or CH\_ENG 3261); Sophomore standing

**Recommended:** CHEM 1320

---

**CH\_ENG 4306: Advanced Engineering Math**

(same as NU\_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

---

**CH\_ENG 4311: Chemodynamics**

(cross-leveled with CH\_ENG 7311). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3234 or instructor's consent

---

**CH\_ENG 4312: Air Pollution Control**

(cross-leveled with CH\_ENG 7312). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3234 or instructor's consent

---

**CH\_ENG 4315: Principles of Biochemical Engineering**

(same as BIOL\_EN 4315; cross-leveled with CH\_ENG 7315, BIOL\_EN 7315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 (for Biological Engineering students) or CH\_ENG 2225 (for Chemical Engineering students) or Instructor's consent

**Recommended:** BIOL\_EN 3180 (for Biological Engineering students) or CH\_ENG 3234 (for Chemical Engineering students) as a prerequisite or a co-requisite

---

**CH\_ENG 4316: Biomass Refinery Operations**

(same as BIOL\_EN 4316; cross-leveled with CH\_ENG 7316, BIOL\_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 (for Biological Engineering students) or CH\_ENG 2225 (for Chemical Engineering students) or instructor's consent

---

**CH\_ENG 4317: Chemical Processing in Semiconductor Device**

(cross-leveled with CH\_ENG 7317). This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760, CHEM 1320, and MATH 4100 or MATH 7100

---

**CH\_ENG 4318: Energy Technology and Sustainability**

An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. May be repeated for credit. Recommended: at least one thermodynamics or physical chemistry course (examples: CHEM 3310, CH\_ENG 3261, ENGINR 2300, MAE 2300, PHYSCS 4120) or instructor's consent.

**Credit Hours:** 3

---

**CH\_ENG 4319: Introduction to Polymers**

(cross-leveled with CH\_ENG 7319). This course provides a general introduction to polymer materials and their engineering applications. The course centers on two aspects: (i) fundamental knowledge about polymer properties and synthesis; and (ii) an introduction of some emerging polymer materials, including polymer nanocomposites, conductive polymers, biodegradable polymers, self-healing polymers, and hydrogels. Examples from current literature are also introduced to expose students to the frontier research in the field.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 4363

**Prerequisites:** CHEM 2110, CH\_ENG 3234, CH\_ENG 3262

---

**CH\_ENG 4335: Intermediate Transport Phenomena**

(cross-leveled with CH\_ENG 7335). Integrated study of momentum, heat and mass transport.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3234, and MATH 4100 or MATH 7100

---

**CH\_ENG 4363: Chemical Reaction Engineering and Technology**

Reactor design and optimization; rate equations; thermal effects in reactor.

**Credit Hours:** 3

**Prerequisites:** CHEM 1330, CH\_ENG 2226, CH\_ENG 3234

**Recommended:** CH\_ENG 3262

---

**CH\_ENG 4370: Process Control**

State-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 2225, CH\_ENG 2226, MATH 4100

**Recommended:** CH\_ENG 3261, MATH 4140

---

**CH\_ENG 4385: Chemical Engineering Design I**

The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 4363

**Prerequisites:** CH\_ENG 2226, CH\_ENG 3234, CH\_ENG 3235, CH\_ENG 3262, CHEM 2110

**Recommended:** CH\_ENG 4370 or concurrent enrollment

---

**CH\_ENG 4401: Finite Element Methods in Chemical Engineering**

(cross-leveled with CH\_ENG 7401). The numerical solution of engineering problems in heat and mass transport, computational fluid dynamics, and chemical reactions including electromagnetic effects are treated in full detail using finite element methods and computational software to solve problems in one, two, and three dimensional spaces. Both time dependent and steady state solutions are considered. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** MATH 4100

**Prerequisites:** CHEM 1330, CH\_ENG 2226

**Recommended:** CH\_ENG 3234 and CH\_ENG 4363, or concurrent enrollment

---

**CH\_ENG 4464: Electrochemical Reaction Engineering Science**

(cross-leveled with CH\_ENG 7464). Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3261 or MAE 2300 or CHEM 4310 or instructor's consent

**Recommended:** A course in thermodynamics or physical chemistry

---

**CH\_ENG 4980: Process Synthesis and Design**

(cross-leveled with CH\_ENG 7980). Continuation of CH\_ENG 4385: application of chemical analysis and modeling to a capstone design project.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3262, CH\_ENG 4363, CH\_ENG 4385

**Recommended:** CH\_ENG 4370 or concurrent enrollment

---

**CH\_ENG 4980W: Process Synthesis and Design - Writing Intensive**  
(cross-leveled with CH\_ENG 7980). Continuation of CH\_ENG 4385: application of chemical analysis and modeling to a capstone design project.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3262, CH\_ENG 4363, CH\_ENG 4385

**Recommended:** CH\_ENG 4370 or concurrent enrollment

---

**CH\_ENG 4990: Undergraduate Research in Chemical Engineering**  
Directed study of chemical engineering problems.

**Credit Hour:** 2-4

**Prerequisites:** instructor's consent

---

**CH\_ENG 4995: Undergraduate Research in Chemical Engineering - Honors**

Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee.

**Credit Hour:** 3-6

**Prerequisites:** senior standing

---

**CH\_ENG 7001: Topics in Chemical Engineering**

Current and new technical developments in chemical engineering.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**CH\_ENG 7220: Hazardous Waste Management**

(same as CV\_ENG 7220; cross-leveled with CH\_ENG 4220, CV\_ENG 4220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination.

**Credit Hours:** 3

---

**CH\_ENG 7232: Ceramic Materials and Processing**

(same as MAE 7232; cross-leveled with CH\_ENG 4232, MAE 4232). Treatment of ceramics materials, structure, and ceramic processing with hands-on demonstration/labs. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MAE 2200 or equivalent course

---

**CH\_ENG 7270: Design of Experiments and Statistical Quality Control for Process Engineers**

(same as BIOL\_EN 7270; cross-leveled with CH\_ENG 4270, BIOL\_EN 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

**Credit Hours:** 3

**Prerequisites:** experience with Excel or instructor's consent

---

**CH\_ENG 7311: Chemodynamics**

(cross-leveled with CH\_ENG 4311). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3234 or instructor's consent

---

**CH\_ENG 7312: Air Pollution Control**

(cross-leveled with CH\_ENG 4312). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3234 or instructor's consent

---

**CH\_ENG 7315: Principles of Biochemical Engineering**

(same as BIOL\_EN 7315; cross-leveled with CH\_ENG 4315, BIOL\_EN 4315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 (for biological engineering students) or CH\_ENG 2225 (for chemical engineering students) or Instructor's consent

**Recommended:** BIOL\_EN 3180 (for Biological Engineering students) or CH\_ENG 3234 (for Chemical Engineering students) as a prerequisite or a co-requisite

---

**CH\_ENG 7316: Biomass Refinery Operation**

(same as BIOL\_EN 7316; cross-leveled with CH\_ENG 4316, BIOL\_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CH\_ENG 2225 or instructor's consent

---

**CH\_ENG 7317: Chemical Processing in Semiconductor Device**

(cross-leveled with CH\_ENG 4317). This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2760, CHEM 1320, and MATH 4100 or MATH 7100

---

**CH\_ENG 7319: Introduction to Polymers**

(cross-leveled with CH\_ENG 7319). This course provides a general introduction to polymer materials and their engineering applications. The course centers on two aspects: (i) fundamental knowledge about polymer properties and synthesis; and (ii) an introduction of some emerging polymer materials, including polymer nanocomposites, conductive polymers, biodegradable polymers, self-healing polymers, and hydrogels. Examples from current literature are also introduced to expose students to the frontier research in the field.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CH\_ENG 4363

**Prerequisites:** CHEM 2110, CH\_ENG 3234, CH\_ENG 3262

---

**CH\_ENG 7335: Intermediate Transport Phenomena**

(cross-leveled with CH\_ENG 4335). Integrated study of momentum, heat and mass transport.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3234, and MATH 4100 or MATH 7100

---

**CH\_ENG 7401: Finite Element Methods in Chemical Engineering**

(cross-leveled with CH\_ENG 4401). The numerical solution of engineering problems in heat and mass transport, computational fluid dynamics, and chemical reactions including electromagnetic effects are treated in full detail using finite element methods and computational software to solve problems in one, two, and three dimensional spaces. Both time dependent and steady state solutions are considered. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** MATH 4100

**Prerequisites:** CHEM 1330, CH\_ENG 2226

**Recommended:** CH\_ENG 3234 and CH\_ENG 4363, or concurrent enrollment

---

**CH\_ENG 7464: Electrochemical Reaction Engineering Science**

(cross-leveled with CH\_ENG 4464). Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3261 or MAE 2300 or CHEM 4310 or instructor's consent

**Recommended:** A course in thermodynamics or physical chemistry

---

**CH\_ENG 7980: Synthesis and Design of Chemical Process**

(cross-leveled with CH\_ENG 4980). This is a heuristics-based design course intended to assist students in bringing together capabilities from previous course. An emphasis is placed on the creation process of design. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3262, CH\_ENG 4363, CH\_ENG 4385

**Recommended:** CH\_ENG 4370 or concurrent enrollment

---

**CH\_ENG 8001: Advanced Topics in Chemical Engineering**

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**CH\_ENG 8029: Advanced Plasma Processing**

Concepts and techniques in novel plasma processing: plasma characteristics, plasma sputtering, plasma enhanced chemical vapor deposition (PECVD), plasma etching, plasma treatment, plasma fabrication of nano-structured materials and diamondlike films, biomedical applications.

**Credit Hours:** 3

---

**CH\_ENG 8085: Problems in Chemical Engineering**

Supervised investigation in chemical engineering to be presented in the form of a report.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**CH\_ENG 8087: Seminar in Chemical Engineering**

Reviews investigations and projects of importance in chemical engineering.

**Credit Hour:** 1

---

**CH\_ENG 8230: Advanced Ceramic Materials**

(same as BIOL\_EN 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

**Credit Hours:** 3

---

**CH\_ENG 8336: Advanced Heat and Momentum Transfer**

Advanced study of these transport phenomena.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3235 or instructor's consent

---

**CH\_ENG 8337: Advanced Mass Transfer**

Advanced study of mass transfer.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 4336 or instructor's consent

---

**CH\_ENG 8338: Analysis of Equilibrium Stage Processes**

Advanced study of stage processes.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 2226, CH\_ENG 3235 and CH\_ENG 3262

---

**CH\_ENG 8451: Advanced Chemical Engineering Thermodynamics I**

Advanced thermodynamics; particular reference to its application to chemical engineering.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 3262 or instructor's consent

---

**CH\_ENG 8452: Advanced Chemical Engineering Thermodynamics II**

Introduction to the methods of statistical thermodynamics and statistical mechanics. The method of ensembles, Maxwell-Boltzmann statistics, the kinetic theory of gases, and theories of liquids. Applications of statistical mechanics to the prediction of physical and chemical properties such as rate coefficients, diffusion coefficients, and conductivities. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 8451 or instructor's consent

---

**CH\_ENG 8463: Chemical Reaction Engineering Science**

Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts.

---

**Credit Hours:** 3

**Prerequisites:** CH\_ENG 4363

---

**CH\_ENG 8470: Mathematical Studies of Chemical Engineering Operation**

Analytical methods applied to solution of chemical engineering problems.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

---

**CH\_ENG 8990: Research-Masters Thesis in Chemical Engineering**

Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Masters candidate

---

**CH\_ENG 9990: Research-Doctoral Dissertation in Chemical Engineering**

Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. candidate

**Credit Hour:** 1-99

**Prerequisites:** Ph.D

---

## Chemistry Courses

**CHEM 1000: Introductory Chemistry**

Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100 or CHEM 1320 .

**Credit Hours:** 2

**Prerequisites or Corequisites:** MATH 1100 or MATH 1120

---

**CHEM 1100: Atoms and Molecules with Lab**

One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1000, CHEM 1310 or CHEM 1320.

**Credit Hours:** 3

---

**CHEM 1100H: Atoms and Molecules with Laboratory - Honors**

One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**CHEM 1320: College Chemistry I**

First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

**Credit Hours:** 4

**Prerequisites:** MATH 1100. MATH 1050 is NOT an appropriate substitution for College Algebra

---

**CHEM 1320H: College Chemistry I - Honors**

First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

**Credit Hours:** 4

**Prerequisites:** MATH 1100 or equivalent. Honors eligibility required. MATH 1050 does not satisfy the math requirement

---

**CHEM 1330: College Chemistry II**

Continuation of CHEM 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in CHEM 1320 or CHEM 1320H

---

**CHEM 1330H: College Chemistry II- Honors**

Continuation of CHEM 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in CHEM 1320 or CHEM 1320H. Honors eligibility required

---

**CHEM 2030: Survey of Organic Chemistry**

One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CHEM 1320 or CHEM 1320H or equivalent. Recommended CHEM 1330, or CHEM 1330 concurrently

---

**CHEM 2100: Organic Chemistry I**

First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after CHEM 2030 or equivalent.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CHEM 1320 or equivalent or CHEM 1330 concurrently

**Recommended:** CHEM 1330

---

**CHEM 2110: Organic Chemistry II**

Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CHEM 2100 or equivalent, or departmental consent

---

**CHEM 2130: Organic Laboratory I**

Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week.

**Credit Hours:** 2

**Recommended:** Concurrent enrollment in CHEM 2110 or CHEM 2030. No credit for students who have previous organic laboratory credit

---

**CHEM 2130H: Organic Laboratory I - Honors**

Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week.

**Credit Hours:** 2

**Prerequisites:** Honors eligibility required

**Recommended:** Concurrent enrollment in CHEM 2110 or CHEM 2030. No credit for students who have previous organic laboratory credit

---

**CHEM 2140: Organic Laboratory II**

Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week.

**Credit Hours:** 2

**Prerequisites:** grade of C- or better in CHEM 2110 and CHEM 2130 or equivalent

---

**CHEM 2170H: Honors Organic Chemistry II with Lab - Honors**

Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2110, but with increased depth and breadth.

**Credit Hours:** 5

**Prerequisites:** honors eligibility, grade of B or better in CHEM 2160H or instructor's permission

---

**CHEM 2400: Fundamentals of Inorganic Chemistry with Lab**

A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CHEM 2130

---

**CHEM 2950: Undergraduate Research in Chemistry**

A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing, 2.75 GPA and/or instructor's consent

---

**CHEM 3200: Quantitative Methods of Analysis with Lab**

Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods.

**Credit Hours:** 4

**Prerequisites:** CHEM 1330 or CHEM 1500H

---

**CHEM 3300: Fundamentals of Physical Chemistry**

Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, a course in organic chemistry; PHYSCS 1210 and PHYSCS 1220 or PHYSCS 2750, or PHYSCS 2760

---

**CHEM 3700: Undergraduate Seminar in Chemistry**

Methods for locating and presenting chemical information, data analysis techniques, professional issues.

**Credit Hours:** 3

**Prerequisites:** CHEM 1330 and CHEM 2100

---

**CHEM 3700W: Undergraduate Seminar in Chemistry - Writing Intensive**

Methods for locating and presenting chemical information, data analysis techniques, professional issues.

**Credit Hours:** 3

**Prerequisites:** CHEM 1330 and CHEM 2100

---

**CHEM 3800: Internship in Chemistry**

Cannot be substituted for other chemistry courses required for B.S. or B.A. degree.

**Credit Hour:** 1-6

**Prerequisites:** departmental consent

---

**CHEM 4001: Topics in Chemistry - General**

Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

**CHEM 4010: Advanced Chemistry Laboratory**

Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds.

**Credit Hours:** 3

**Prerequisites:** CHEM 2400, CHEM 2140, or CHEM 2190H, CHEM 3200, CHEM 4330 (or CHEM 4330 corequisite)

---

**CHEM 4050: Problems in Chemistry**

Individual study under the direction of a faculty member that supplements regular course work.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**CHEM 4160: Intermediate Organic Chemistry**

Stresses synthetic organic chemistry at an intermediate level.

**Credit Hours:** 3

**Prerequisites:** at least one year organic chemistry

---

**CHEM 4170: Medicinal Chemistry**

Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies.

**Credit Hours:** 3

**Prerequisites:** CHEM 2110 or instructor's consent

---

**CHEM 4200: Instrumental Methods of Analysis with Lab**

(cross-leveled with CHEM 7200). Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.

**Credit Hours:** 3

**Prerequisites:** CHEM 3200, a semester of physical chemistry

---

**CHEM 4280: Environmental Chemistry**

Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment.

**Credit Hours:** 3

**Prerequisites:** 8 hours chemistry including organic and analytical

---

**CHEM 4310: Physical Chemistry I**

Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium.

**Credit Hours:** 3

**Prerequisites:** CHEM 2100, MATH 1700, and PHYSICS 1220 or 2760

---

**CHEM 4330: Physical Chemistry II**

Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

**Credit Hours:** 3

**Prerequisites:** MATH 2300 or instructor approval. May be taken independently of CHEM 4310

---

**CHEM 4330H: Physical Chemistry II - Honors**

Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

**Credit Hours:** 3

**Prerequisites:** MATH 2300 or instructor approval. May be taken independently of CHEM 4310. Honors eligibility required

---

**CHEM 4340: Physical Chemistry Laboratory**

This course is intended to introduce the practice of experimental physical chemistry including applying the principles of thermodynamics, kinetics, and spectroscopy in experiments.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CHEM 3200; CHEM 4330 or CHEM 4330 concurrently

---

**CHEM 4400: Inorganic Chemistry**

(cross-leveled with CHEM 7400). Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

**Credit Hours:** 3

**Prerequisites:** CHEM 2400

---

**CHEM 4490: Physics and Chemistry of Materials**

(same as NU\_ENG 4319, PHYSICS 4190, BIOL\_EN 4480; BME 4480; cross-leveled with CHEM 7490, NU\_ENG 7319, PHYSICS 7190,

BIOL\_EN 7480). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2750, CHEM 1320 or equivalent, or instructor's consent

---

**CHEM 4600: Introduction to Radiochemistry with Lab**

Introduces application of radio-tracer techniques to chemical research.

**Credit Hours:** 3

**Prerequisites:** CHEM 1330

---

**CHEM 4800: Chemistry Teaching Practicum**

Provides practical experience teaching introductory chemistry in discussion and laboratory settings. For students pursuing dual degrees in chemistry and secondary education. For students pursuing simultaneous dual degrees in chemistry and secondary education. Graded on S/U basis only.

**Credit Hours:** 3

**Prerequisites:** senior standing; departmental consent required

---

**CHEM 4950: Senior Research**

A laboratory research project with approved written goals and a final written report. It may be taken twice.

**Credit Hours:** 3

**Prerequisites:** a 2.75 GPA, departmental consent

---

**CHEM 4990H: Senior Honors Research I**

A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination. May replace CHEM 4950 in ACS Certification Track or 4000+ level elective requirement for Medicinal Chemistry track. Must take CHEM 4990H and CHEM 4991H for departmental honors.

**Credit Hours:** 3

**Prerequisites:** a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required

---

**CHEM 4991H: Senior Honors Research II**

A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.

**Credit Hours:** 3

**Prerequisites:** a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

---

**CHEM 7087: Seminar in Chemistry for Beginning Graduate Students**

Seminar in Chemistry for Beginning Graduate Students

**Credit Hour:** 1

---

**CHEM 7200: Instrumental Methods of Analysis with Lab**  
(cross-leveled with CHEM 4200). Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.

**Credit Hours:** 3

**Prerequisites:** CHEM 3200, a semester of physical chemistry

---

**CHEM 7300: Intermediate Physical Chemistry**  
Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**CHEM 7400: Inorganic Chemistry**  
(cross-leveled with CHEM 4400). Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.

**Credit Hours:** 3

**Prerequisites:** CHEM 2400

---

**CHEM 7490: Physics and Chemistry of Materials**  
(same as NU\_ENG 7319, PHYSCS 7190, BIOL\_EN 7480; cross-leveled with CHEM 4490, NU\_ENG 4319, PHYSCS 4190, BIOL\_EN 4480, BME 4480). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2750, CHEM 1320 or equivalent, or instructor's consent

---

**CHEM 8003: Topics in Chemistry - Natural Science**  
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**CHEM 8050: Non-Thesis Research in Chemistry**  
Does not lead to dissertation.

**Credit Hour:** 1-99

---

**CHEM 8085: Topics in Chemistry**  
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**CHEM 8087: Seminar in Chemistry**  
Seminar in Chemistry

**Credit Hour:** 1

---

**CHEM 8090: Thesis/Dissertation (pre-candidacy) Research in Chemistry**

Research leading to thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**CHEM 8150: Organic Reaction Mechanisms**  
Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts.

**Credit Hours:** 3

**Prerequisites:** 1 year of Organic Chemistry and Physical Chemistry

---

**CHEM 8160: Organic Spectroscopy**  
Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques.

**Credit Hours:** 3

**Prerequisites:** CHEM 3330 or equivalent or instructor's consent

---

**CHEM 8170: Applications of the Reactions of Organic Chemistry**  
**Credit Hours:** 3

**Prerequisites:** CHEM 8150

---

**CHEM 8210: Analytical Measurement**  
Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.

**Credit Hours:** 3

---

**CHEM 8230: Separations and Chromatography**  
Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.

**Credit Hours:** 3

---

**CHEM 8240: Mass Spectrometry**  
This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 8250: Analytical Spectroscopy**  
Selected topics dealing with recent advances in analytical chemistry.

**Credit Hours:** 3

---

**CHEM 8260: Surface Analysis and Characterization**  
Covers various aspects of modern methods of surface analysis and characterization. Topics include instrumentation, theory, and data reduction methods. Major sections include electron spectroscopy, microscopy, and vibrational spectroscopy as applied to surfaces. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 8265: Fluorescence Spectroscopy**

Advanced analytical chemistry course that explores the fundamental principles and uses of modern fluorescence spectroscopy in biology, materials science, chemistry, physics and engineering. Special emphasis is placed on the methodologies used to obtain specific information about a particular chemical system. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 8270: Advanced Analytical Chemistry**

Continuation of CHEM 8250.

**Credit Hours:** 3

---

**CHEM 8280: Bioanalytical Chemistry**

This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding for how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 8285: Nanochemistry**

Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 8310: Quantum Chemistry**

Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation principle, WKB), and the structure of many-electron atoms.

**Credit Hours:** 3

**Prerequisites:** CHEM 4330 or equivalent or instructor's consent

---

**CHEM 8320: Chemical Kinetics**

Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques.

**Credit Hours:** 3

**Prerequisites:** CHEM 4330 or equivalent or instructor's consent

---

**CHEM 8330: Computational Chemistry**

Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems.

**Credit Hours:** 3

---

**Prerequisites:** CHEM 3300 or equivalent or instructor's consent

---

**CHEM 8340: Statistical Mechanics**

Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases.

**Credit Hours:** 3

**Prerequisites:** CHEM 4330 or equivalent or instructor's consent

---

**CHEM 8360: Atomic-Scale Simulations**

This course will provide an in-depth introduction to the methods and applications of atomic-scale simulation methods (mainly classical molecular dynamics, hereafter 'MD') for graduate students in chemistry, physics, materials science, and engineering. One of the beauties of MD methods is that, if applied judiciously and with skill, they provide exquisitely high-fidelity information about the fundamental properties and processes that occur on time scales ranging from femtoseconds to nanoseconds (or longer) and space scales ranging from Ångstroms to approximately microns. In many cases, this information can be used to guide or assess theoretical developments, interpret experiments, or provide insights or predictions for thermodynamic or non-equilibrium states that are not easily achieved or are difficult to probe experimentally. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor consent

---

**CHEM 8410: Chemistry of the Main Group Elements**

Descriptive inorganic chemistry of the main group elements. Textbook material extensively supplemented with information from the current chemical literature.

**Credit Hours:** 3

---

**CHEM 8420: Supramolecular Chemistry**

The basics of supramolecular chemistry will be covered, including host-guest complexes, reorganization, complementarity, thermodynamic interactions, self assembly and biochemical, molecular device and crystal engineering applications. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BS in Chemistry, Biochemistry or Chemical Engineering

---

**CHEM 8430: Coordination Chemistry and Reactivity**

The chemistry of the transition elements (d-block) and their reactivity will be discussed, including bonding, coordination numbers, oxidation states, and reactivity (kinetics). Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CHEM 4400 or equivalent; graduate standing in chemistry or instructor's consent

---

**CHEM 8440: Inorganic Structural Methods**

Chemical bonding, application of group theory, spectroscopy; diffraction as applied to structure determination; structural implications of dipole moment and magnetic susceptibility measurements.

**Credit Hours:** 3

---

---

**CHEM 8450: Organometallics**

Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.

**Credit Hours:** 3

---

**CHEM 8470: Actinide Chemistry**

The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 8480: Chemistry of Nanomaterials**

This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photonic materials. The nanostructure of organic polymers, micelles, and the process of biomineralization to make organic-inorganic hybrid materials will also be discussed.

**Credit Hours:** 3

---

**CHEM 8600: Radiochemistry and Detection with Lab**

An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.

**Credit Hours:** 3

---

**CHEM 8610: Advanced Radiochemistry**

Reviews current advances in radiochemistry, hot atom chemistry, radiation chemistry, nuclear spectrometry.

**Credit Hours:** 3

**Prerequisites:** CHEM 8600 or equivalent

---

**CHEM 8630: Radiopharmaceutical Chemistry**

The radiotracer concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor's consent

---

**CHEM 8640: Biological Radiochemistry**

(same as V\_M\_S 8640). Covers the interaction of radiation on biological material. The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.

**Credit Hours:** 3

---

**CHEM 9090: Post-candidacy Dissertation Research in Chemistry**

Research leading to Ph.D. dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

## Child Health Courses

**CH\_HTH 6000: Child Health Clerkship**

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

**Credit Hours:** 8

---

**CH\_HTH 6010: Rural Child Health Clerkship**

Rural Child Health Clerkship

**Credit Hours:** 8

---

**CH\_HTH 6020: Springfield Child Health Clerkship**

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

**Credit Hours:** 8

**Prerequisites:** Successful completion of the first two years of medical school

---

**CH\_HTH 6037: SCC Pediatric Intensive Care**

Student will learn the initial approach and daily management of children requiring care in the Pediatric Intensive Care Unit. Students will learn the evaluation of and the management of critically ill or injured children focusing on airway and pulmonary physiology, cardiac physiology, neurological diseases, traumatic injuries, acute overdoses, endocrine emergencies, basic fluid management, and the medically complex child. Pharmacologic and nutritional management of the critically ill or injured child will also be reviewed.

**Credit Hours:** 5

**Prerequisites:** Successful completion of 5 of the 7 core clerkships. One of the 5 must be the Child Health clerkship. CH\_HTH 6000, 6010, 6020, or 6100

---

**CH\_HTH 6043: SCC Pediatric Allergy and Immunology**

This subspecialty elective emphasizes experience in the evaluation and management of common clinical problems in allergy and immunology. The learner will assist in the diagnosis and management of asthma, rhinitis/conjunctivitis/rhinosinusitis, atopic dermatitis, contact dermatitis, urticaria, angioedema, anaphylaxis and adverse reactions to foods, drugs and stinging insects. Additional experience in immunodeficiency disorders, as well as experience in allergy skin testing, administration of allergen immunotherapy, performance and interpretation of pulmonary function tests, and performance of food challenges and/or drug challenges/desensitizations may also be provided. Outpatients will be evaluated by the student under supervision of the faculty physician. In addition, it is expected that the learner will complete recommended readings, participate in selected on-line learning activities and complete both pre-test and post-test assessments.

**Credit Hours:** 5

**Recommended:** Successful completion of the Child Health clerkship

---

---

**CH\_HTH 6045: SCC Neonatal Intensive Care Unit Selective**

Students will gain experience in the evaluation, diagnosis, and management of sick newborns, and in the performance of specialized procedures necessary for ICU care.

**Credit Hours:** 5

**Prerequisites:** Successful completion of 5 of the 7 core clerkships. One of the 5 must be Child Health clerkship

---

**CH\_HTH 6055: Springfield Pediatric Endocrinology**

This rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician. This elective will present an in-depth experience of diabetes/endocrinology as a subspecialty, including but not limited to exposure to disorders in growth and puberty, obesity, abnormalities in thyroid function, and managing blood glucose levels in patients with type 1 diabetes. Additional teaching methods used may include mini-lectures and readings relevant to this subspecialty.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the first two years of medical school. Completion of M3 CH clerkship suggested but not required

---

**CH\_HTH 6100: Remediation Child Health Clerkship**

Enrolled students are those who received an unsatisfactory grade in a Child Health Clerkship at any Mizzou Med location or site. This course gives them the opportunity to rectify a deficiency.

**Credit Hours:** 8

**Prerequisites:** CH\_HTH 6000 Child Health Clerkship, received unsatisfactory grade

---

**CH\_HTH 6221: Advanced Biomedical Science Medicine Problem Premature Infant**

Advanced Biomedical Science Medicine Problem Premature Infant

**Credit Hours:** 5

---

**CH\_HTH 6223: ABS Child Health Research**

ABS Child Health Research

**Credit Hour:** 5-10

---

**CH\_HTH 6225: ABS Child Health Research and Review**

ABS Child Health Research and Review

**Credit Hour:** 5-10

---

**CH\_HTH 6425: Child Health Genetics**

Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases. CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available.

**Credit Hours:** 5

**Prerequisites:** Child Health clerkship

---

---

**CH\_HTH 6426: Child Health Infectious Disease**

Child Health Infectious Disease

**Credit Hours:** 5

---

**CH\_HTH 6427: Pediatric Hematology/Oncology**

Pediatric Hematology/Oncology

**Credit Hours:** 5

---

**CH\_HTH 6428: Pediatric Diabetes and Endocrinology**

Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence. CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program. Thus, students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6429: Developmental Pediatrics**

Developmental Pediatrics

**Credit Hours:** 5

---

**CH\_HTH 6430: Pediatric Cardiology**

Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6431: Pediatric Pulmonology**

Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6432: Pediatric Gastroenterology**

Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management. 3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric

subspecialist for four weeks will include inpatient and outpatient service activities.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6434: Child Adolescent Medicine**

Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent 'check-up', and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents.

CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extern level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6435: Ped Renal and Rheumatology**

4th year elective for renal/rheumatology rotation, four weeks.

**Credit Hours:** 5

**Prerequisites:** 3rd year Pediatrics/Child Health or Internal Medicine rotation

---

**CH\_HTH 6726: Child Health Rural Elective**

Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well.

**Credit Hours:** 5

**Prerequisites:** CH\_HTH 6000; restricted to medical students only

---

**CH\_HTH 6825: General Child Health - Inpatient**

Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient's management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6826: General Child Health - Outpatient**

Goals/Objectives: To provide additional experience in general pediatrics in outpatient care. CURRICULUM: The student will function as a member

of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6827: Neonatology/Neonatal Intensive Care Unit**

Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital)

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6828: Pediatric Intensive Care Unit**

Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

**Credit Hours:** 5

**Prerequisites:** Child Health Clerkship

---

**CH\_HTH 6829: Pediatric Neurology**

Pediatric Neurology

**Credit Hours:** 5

---

**CH\_HTH 6912: Introduction to Adolescent Medicine**

The rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician on service. In addition to learning and practicing primary care of adolescent patients the elective will present an in-depth experience of adolescent medicine as a subspecialty, including, but not limited to, conditions such as eating disorders, disorders of puberty and menstruation, obesity, ADHD, and substance abuse. Additional teaching methods used include a pre-post test, lectures, and readings relevant to adolescent medicine. Completion of the Child Health Clerkship: CH\_HTH 6000 and CH\_HTH 6010.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

---

**CH\_HTH 6913: Introduction to Pediatric Endocrinology**

The rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician on service. The elective will present an in-depth experience of diabetes/endocrinology as a subspecialty, including, but not limited to, exposure to

disorders in growth and puberty, obesity, abnormalities in thyroid function and managing blood glucose levels in patients with type 1 diabetes. Additional teaching methods used may include lectures and readings relevant to this subspecialty.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

**Recommended:** Completion of the Child Health Clerkship (CH\_HTH 6000 or CH\_HTH 6010) is suggested but not required

---

#### **CH\_HTH 6951: SCC Pediatric Allergy and Immunology 2 week**

This subspecialty elective emphasizes an introductory experience in the evaluation and management of common clinical problems in allergy and immunology. The learner will assist in the diagnosis and management of asthma, rhinitis/conjunctivitis/rhinosinusitis, atopic dermatitis, contact dermatitis, urticaria, angioedema, anaphylaxis and adverse reactions to foods, drugs and stinging insects. Additional experience in immunodeficiency disorders, as well as experience in allergy skin testing, administration of allergen immunotherapy, performance and interpretation of pulmonary function tests, and performance of food challenges and/or drug challenges/desensitizations may also be provided. Outpatients will be evaluated by the student under supervision of the faculty physician. In addition, it is expected that the learner will complete recommended readings, participate in selected on-line learning activities and complete both pre-test and post-test assessments.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

---

#### **CH\_HTH 6953: SCC Neonatal Intensive Care Unit 2-Week**

The course goals are for the student to gain the knowledge and experience in the evaluation, diagnosis, and management of sick newborns, and in the performance of specialized procedures necessary for ICU care. The student will demonstrate an introductory level working understanding of these areas.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school and a core rotation in family medicine or pediatrics

---

## **Chinese Courses**

#### **CHINSE 1100: Elementary Chinese I**

For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

**Credit Hours:** 6

---

#### **CHINSE 1200: Elementary Chinese II**

This course is a continuation of Elementary Chinese I, consisting of 5 hours of classroom instruction and 1 hour of lab work weekly.

**Credit Hours:** 6

**Prerequisites:** C- or better in CHINSE 1100 or equivalent

---

#### **CHINSE 2100: Everyday Spoken Chinese Level I**

Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations.

Intended to supplement, not replace, Chinese language courses taught on MU campus. Students must be enrolled in MU China Study Abroad.

**Credit Hours:** 3

**Prerequisites:** C- or better in CHINSE 1200

---

#### **CHINSE 2160: Intermediate Chinese I Conversation and Composition**

This course builds on Chinese language learned in the elementary Chinese Language Sequences I & II through conversation and writing.

**Credit Hours:** 3

**Prerequisites:** C- or better in CHINSE 1200 or equivalent

---

#### **CHINSE 2310: Chinese Civilization I**

Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

**Credit Hours:** 3

---

#### **CHINSE 2330: Chinese Language and Culture**

Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese.

**Credit Hours:** 3

**Prerequisites:** Must be enrolled in MU China Study Abroad; sophomore standing required

---

#### **CHINSE 3001: Topics in Chinese - General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Sophomore standing and instructor consent

---

#### **CHINSE 3005: Topics in Chinese - Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing and instructor's consent

---

#### **CHINSE 3005H: Topics in Chinese - Humanities - Honors**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing and instructor's consent, Honors eligibility required

---

#### **CHINSE 3085: Problems in Chinese**

Supervised study in Chinese language and/or culture.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**CHINSE 3160: Intermediate Chinese II Conversation and Composition**

Continuation of CHINSE 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CHINSE 2160

---

**CHINSE 3170: Everyday Spoken Chinese Level II**

For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus. Students must be enrolled in MU China Study Abroad.

**Credit Hours:** 3

**Prerequisites:** C- or better in CHINSE 3160 or consent of instructor

---

**CHINSE 3180: Advanced Chinese I**

Improves vocabulary, listening, spoken and written Chinese Skills. Discusses basic cultural ideas. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CHINSE 3160, or equivalent

---

**CHINSE 3190: Advanced Chinese II**

Students will build on grammatical patterns and vocabulary learned in Advanced Chinese 1, and will be able to use the Chinese language to discuss, read, and write about topics related to Chinese culture and modern society. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C- or above in CHINSE 3180, or equivalent

---

**CHINSE 3300: Chinese Traditions and Global Integration**

Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

**Credit Hours:** 3

**Prerequisites:** Must be enrolled in MU China Study Abroad; sophomore standing required

---

**CHINSE 3300H: Chinese Traditions and Global Integration - Honors**

Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

**Credit Hours:** 3

**Prerequisites:** Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required

---

---

**CHINSE 3310: Chinese Poetry**

This is an introductory course to Chinese poetry, both classical and contemporary, in English. It will explore issues in the intercultural and interlingual interpretation of foreign literature through the study of Western translations of and scholarship on selected Chinese poets.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

---

**CHINSE 3320: Modern and Contemporary Chinese Fiction (in translation)**

Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

---

**CHINSE 3400: Negotiating Chinese Culture**

As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course address issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be applied to more fruitful and positive cross-cultural interactions in multiple contexts.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**CHINSE 3880: Contemporary Chinese Film**

(same as FILMS\_VS 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**CHINSE 4730: Chinese Teaching Methods**

(same as GERMAN 4730). Supervised introduction to the methodology of the teaching of elementary-level language; conducted in a classroom environment.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

## Civil Engineering Courses

### CV\_ENG 1001: Experimental Course

For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

**Credit Hour:** 1-99

---

### CV\_ENG 2001: Experimental Course

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

**Credit Hour:** 1-99

---

### CV\_ENG 2080: Introduction to Dynamics

Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1200

---

### CV\_ENG 3010: Decision Methods for Civil Engineering Design

Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ENGINR 1200

**Prerequisites:** grade of C- or better in ENGLSH 1000

---

### CV\_ENG 3010W: Decision Methods for Civil Engineering Design - Writing Intensive

Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in ENGLSH 1000

**Corequisites:** ENGINR 1200

---

### CV\_ENG 3050: Introduction to Geographic Information Systems GIS

(same as GEOG 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

### CV\_ENG 3100: Fundamentals of Transportation Engineering

Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning.

**Credit Hours:** 4

**Prerequisites or Corequisites:** CV\_ENG 3010

**Prerequisites:** grade of C- or better in ENGINR 1100

---

### CV\_ENG 3200: Fundamentals of Environmental Engineering

Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste

management, air pollution, environmental regulation, and environmental ethics.

**Credit Hours:** 4

**Prerequisites or Corequisites:** CV\_ENG 3010

**Prerequisites:** grade of C- or better in CHEM 1320 or equivalent

---

### CV\_ENG 3250: Pollutant Fate and Transport

(same as ENV\_SC 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.

**Credit Hours:** 3

**Prerequisites:** ENV\_SC 1100 or SOIL 2100 or CV\_ENG 3200; and

CHEM 1320; or instructor's permission

---

### CV\_ENG 3300: Structural Analysis I

Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in ENGINR 1200 and ENGINR 2200

---

### CV\_ENG 3300H: Structural Analysis I - Honors

Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in ENGINR 1200 and ENGINR 2200.

Honors Eligibility required

---

### CV\_ENG 3312: Reinforced Concrete Design

Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisites: CV\_ENG 3300;

**Credit Hours:** 3

**Prerequisites or Corequisites:** CV\_ENG 3600

---

### CV\_ENG 3313: Structural Steel Design

Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections.

**Credit Hours:** 3

**Corequisites:** CV\_ENG 3300 and CV\_ENG 3600

---

### CV\_ENG 3400: Fundamentals of Geotechnical Engineering

Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better in ENGINR 2200; Restricted to Civil Engineering major students only

---

---

**CV\_ENG 3600: Civil Engineering Materials**

Introduces composition, structure, properties, behavior, and selection of civil engineering materials.

**Credit Hours:** 4

**Prerequisites or Corequisites:** CV\_ENG 3010

**Prerequisites:** grade of C- or better in ENGINR 2200 or instructor's consent

---

**CV\_ENG 3700: Fluid Mechanics**

Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better PHYSCS 2750

---

**CV\_ENG 3702: Hydrology**

Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency; and open channel flow considerations from stream-flow. Fluid Mechanics lab with lab reports.

**Credit Hours:** 4

**Prerequisites:** grade of C- or better MATH 2300 and CV\_ENG 3200 and CV\_ENG 3700

---

**CV\_ENG 4001: Topics in Civil Engineering**

Study of current and new technical developments in civil engineering.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**CV\_ENG 4006: Computational Methods in Civil Engineering**

(cross-leveled with CV\_ENG 7006). Use of numerical methods for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, optimization, differentiation, and differential equations. The numerical methods are demonstrated through computer implementation and application to engineering design problems.

**Credit Hours:** 3

**Prerequisites:** MATH 2300

**Corequisites:** MATH 4100

---

**CV\_ENG 4008: Risk and Reliability for Civil Engineers**

(cross-leveled with CV\_ENG 7008). This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3010 or other introductory probability/statistics course

---

**CV\_ENG 4085: Problems in Civil and Environmental Engineering**

Directed investigation of civil engineering.

**Credit Hour:** 2-4

**Prerequisites:** instructor's consent

---

**CV\_ENG 4100: Traffic Engineering**

(cross-leveled with CV\_ENG 7100). Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

**CV\_ENG 4104: Pavement Materials and Design**

(cross-leveled with CV\_ENG 7104). Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in ENGINR 2200

---

**CV\_ENG 4105: Asphalt Materials and Mixture Design**

(cross-leveled with CV\_ENG 7105). This course consists of a combination of interactive classroom lectures and discussions, group activities, hands-on laboratory exercises, laboratory demonstrations, and field trips (live and/or recorded) to observe asphalt binder and mixture design, production, and control. Upon completion of the course, the student will be able to: (1) select, specify, and design an asphalt paving mixture for specific climatic and traffic conditions using the SUPERPAVE mixture design system; (2) understand the sources, types, and manufacturing aspects of asphalt binders and aggregates; (3) understand the key elements of asphalt mixture construction, process control, and acceptance; (4) perform key SUPERPAVE laboratory tests for asphalt binders, aggregates, and mixtures and master the analysis and interpretation of data collected; (5) understand contemporary concepts and approaches in sustainable asphalt mixture design and construction; (6) understand and mathematically describe fundamental properties of asphalt binders and mixtures, which is a critical step in mastering mixture/pavement design, evaluation, and rehabilitation, and; (7) understand and describe the key types and uses of special asphalt binder and mixture products, including emulsions, cutbacks, polymer-modified binders, warm-mix asphalt, other additives, and mixtures containing recycled asphalt pavement (RAP) and recycled asphalt shingles (RAS). Graded on A-F only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CV\_ENG 3600

---

**CV\_ENG 4106: Intelligent Transportation Systems**

(cross-leveled with CV\_ENG 7106). This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

**CV\_ENG 4110: Transportation Simulation**

(cross-leveled with CV\_ENG 7110). Theory and application of simulation in transportation engineering.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

---

**CV\_ENG 4120: Airport Engineering**

(cross-leveled with CV\_ENG 7120). Airport systems planning, design, and management.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

**CV\_ENG 4125: Transportation Legal Issues**

(cross-leveled with CV\_ENG 7125). This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3100

---

**CV\_ENG 4130: Transportation Safety**

(cross-leveled with CV\_ENG 7130). This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3100

---

**CV\_ENG 4145: Civil and Environmental Engineering Legal Issues**

(cross-leveled with CV\_ENG 7145). Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3100

---

**CV\_ENG 4155: Transportation Geography**

(same as GEOG 4850; cross-leveled with CV\_ENG 7155; GEOG 7850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

**Credit Hours:** 3

---

**CV\_ENG 4175: The Geospatial Science in National Security**

(Same as GEOG 4130; cross-leveled with CV\_ENG 4175, GEOG 7130). This course explores the critical contribution of the geospatial sciences in the collection processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**Recommended:** junior standing

---

**CV\_ENG 4185: Location Analysis/Site Selection**

(same as GEOG 4740; cross-leveled with CV\_ENG 7185; GEOG 7740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. Maybe be repeated for credit.

**Credit Hours:** 3

---

**CV\_ENG 4190: Infrastructure Project Development**

(cross-leveled with CV\_ENG 7190). Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only. Prerequisites: junior standing

**Credit Hours:** 3

---

**CV\_ENG 4220: Hazardous Waste Management**

(same as CH\_ENG 4220; cross-leveled with CV\_ENG 7220, CH\_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

**Credit Hours:** 3

---

**CV\_ENG 4230: Introduction to Water Quality**

(cross-leveled with CV\_ENG 7230). Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**CV\_ENG 4232: Water and Wastewater Treatment Facilities**

(cross-leveled with CV\_ENG 7232). Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4230 or CV\_ENG 7230 or instructor's consent

---

**CV\_ENG 4240: Water Quality Analysis**

(cross-leveled with CV\_ENG 7240). Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 4230 or instructor's consent

---

**CV\_ENG 4245: Environmental Chemistry for Engineers**

(cross-leveled with CV\_ENG 7245). This course will cover the fundamentals of environmental chemistry. Physical, equilibrium, organic and colloid chemistry topics will be presented from an environmental perspective with a focus on their relevant engineering applications.

**Credit Hours:** 3

**Prerequisites:** CHEM 1320 or CV\_ENG 3200

---

**CV\_ENG 4250: Environmental Regulatory Compliance**

(cross-leveled with CV\_ENG 7250). Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

**Credit Hours:** 3

---

---

**CV\_ENG 4270: Environmental Engineering Microbiology**

(cross-leveled with CV\_ENG 7270). Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

**Credit Hours:** 3

**Prerequisites:** senior standing or instructor's consent

---

**CV\_ENG 4286: Environmental Sustainability**

(cross-leveled with CV\_ENG 7286). This course will present an introduction to sustainability in engineering, tools for assessing sustainability and principles of sustainable design practices. Topics include climate change, energy and renewable resources, limits to growth, risk assessment, life cycle assessments, water and energy footprints, green buildings, and the water-food-energy-nexus. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3200

---

**CV\_ENG 4290: Wastewater Treatment and Process Design**

(cross-leveled with CV\_ENG 7290). Selection and use of wastewater and sludge treatment processes, disposal methods, sustainable wastewater treatment including anaerobic treatment of wastewater reuse.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3200. Instructor's consent required

---

**CV\_ENG 4300: Advanced Structural Steel Design**

(cross-leveled with CV\_ENG 7300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3313

---

**CV\_ENG 4302: Prestressed/Advanced Reinforced Concrete**

(cross-leveled with CV\_ENG 7302). Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CV\_ENG 3312

---

**CV\_ENG 4320: Energy Methods in Mechanics**

(cross-leveled with CV\_ENG 7320). Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.

**Credit Hours:** 3

**Prerequisites:** senior or graduate standing required

---

**CV\_ENG 4330: Structural System Design**

(cross-leveled with CV\_ENG 7330). Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3312 and CV\_ENG 3313

---

**CV\_ENG 4350: Matrix Methods of Structural Analysis**

(cross-leveled with CV\_ENG 7350). An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

**Credit Hours:** 3

**Prerequisites:** senior standing; grade of C- or better in CV\_ENG 3300

---

**CV\_ENG 4360: Bridge Engineering**

(cross-leveled with CV\_ENG 7360). Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and Shear and Moment Envelopes. Design of Medium- and Short-Span Girder Bridges based on AASHTO LRFD specs.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3312 and CV\_ENG 3313

---

**CV\_ENG 4404: Geotechnical Earthquake Engineering**

(cross-leveled with CV\_ENG 7404). This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3400 or instructor's consent

---

**CV\_ENG 4406: Geotechnics of Landfill Design**

(cross-leveled with CV\_ENG 7406). This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**CV\_ENG 4410: Foundation Engineering**

(cross-leveled with CV\_ENG 7410). Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3400

---

**CV\_ENG 4412: Applied Geotechnical Engineering**

(cross-leveled with CV\_ENG 7412). Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3400

---

**CV\_ENG 4500: Introduction to Construction Management**  
(cross-leveled with CV\_ENG 7500). Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**CV\_ENG 4600: Advanced Mechanics of Materials**  
(same as MAE 4600; cross-leveled with CV\_ENG 7600 and MAE 7600). Analysis of more complicated problems in stresses, strains.

**Credit Hours:** 3

**Prerequisites:** C- or better in ENGINR 2200, MAE 3200 and Junior standing

---

**CV\_ENG 4610: Sensors and Experimental Stress Analysis**  
(cross-leveled with CV\_ENG 7610). Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in ENGINR 2200 and PHYSCS 2760

---

**CV\_ENG 4660: Vibration Analysis**  
(same as MAE 4660; crossleveled with CV\_ENG 7660, MAE 7660). Vibration theory and its application to mechanical systems. Topics include free and forced vibration analysis of single- and multi-degree of freedom systems.

**Credit Hours:** 3

**Prerequisites:** C- or better in MATH 4100 and MAE 2600

---

**CV\_ENG 4692: Introduction to Structural Dynamics**  
(cross-leveled with CV\_ENG 7692). Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3300

---

**CV\_ENG 4700: Hydraulics of Open Channels**  
(cross-leveled with CV\_ENG 7700). Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3700

---

**CV\_ENG 4710: Soil and Water Conservation Engineering**  
(same as BIOL\_EN 4150; cross-leveled with CV\_ENG 7710, BIOL\_EN 7150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CV\_ENG 3200

---

**CV\_ENG 4720: Watershed Modeling Using GIS**  
(same as BIOL\_EN 4350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CV\_ENG 3200

---

**CV\_ENG 4730: Hydraulic Design**  
(cross-leveled with CV\_ENG 7730). Design of hydraulic infrastructure utilizing principles of both pressure conduits and open channels. Hand calculations and use of commercial design software for water distribution (quantity and quality), stormwater collection and sanitary sewer systems, and detention basins. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 or equivalent

---

**CV\_ENG 4740: Irrigation and Drainage Engineering**  
(same as BIOL\_EN 4250; cross-leveled with CV\_ENG 7740). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 or MAE 3400 or BIOL\_EN 2180

---

**CV\_ENG 4980: Civil Engineering Systems Design**  
Design of civil engineering systems.

**Credit Hours:** 3

**Prerequisites:** senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman

---

**CV\_ENG 4980W: Civil Engineering Systems Design - Writing Intensive**  
Design of civil engineering systems.

**Credit Hours:** 3

**Prerequisites:** senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman

---

**CV\_ENG 4990: Undergraduate Research in Civil and Environmental Engineering**  
Independent investigation or project in Civil Engineering. May be repeated to 6 hours. Enrollment limited to seniors in Civil and Environmental Engineering.

**Credit Hour:** 1-4

**Prerequisites:** instructor's consent

---

**CV\_ENG 4995: Research in Civil and Environmental Engineering- Undergraduate Honors**  
Independent project, supervised by the honors advisor, to be presented as a formal written report.

**Credit Hour:** 1-3

**Prerequisites:** Civil Engineering students only

**Recommended:** participation in the Civil and Environmental Engineering Departmental Honors Program

---

---

**CV\_ENG 7001: Topics in Civil Engineering**

Study of current and new technical developments in civil engineering.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**CV\_ENG 7002: Analysis of Civil Engineering Decisions**

Formulates and analyzes probabilistic models of civil engineering systems and their environment. Elementary theory of decision making under uncertainty. Application to selected civil engineering problems.

**Credit Hours:** 3

---

**CV\_ENG 7003: Optimization of Civil Engineering Systems**

Automated design techniques such as linear, nonlinear, and dynamic programming; gradient and random searching. Civil engineering applications emphasized throughout.

**Credit Hours:** 3

---

**CV\_ENG 7004: Engineering Administration**

Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.

**Credit Hours:** 3

**Prerequisites:** MATH 1300 or MATH 1500, or instructor's consent

---

**CV\_ENG 7006: Computational Methods in Civil Engineering**

(cross-leveled with CV\_ENG 4006). Use of numerical methods for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, optimization, differentiation, and differential equations. The numerical methods are demonstrated through computer implementation and application to engineering design problems.

**Credit Hours:** 3

**Prerequisites:** MATH 2300

**Corequisites:** MATH 4100

---

**CV\_ENG 7007: Quality Management in Civil Engineering**

Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 7008: Risk and Reliability for Civil Engineers**

(cross-leveled with CV\_ENG 4008). This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3010 or other introductory probability/statistics course

---

**CV\_ENG 7080: Advanced Surveying**

(cross-leveled with CV\_ENG 4080). Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

**Credit Hours:** 3

**Prerequisites:** MATH 1500

---

**CV\_ENG 7082: Property Boundary Location**

Principles of real property ownership, deeds, property boundary surveying, legal principles of original and retracement surveys Missouri statutes and regulations affecting surveying, GLO corner restoration and re-establishment.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1500 and CV\_ENG 2090

---

**CV\_ENG 7100: Traffic Engineering**

(cross-leveled with CV\_ENG 4100). Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

**CV\_ENG 7104: Pavement Materials and Design**

(cross-leveled with CV\_ENG 4104). Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in ENGINR 2200

---

**CV\_ENG 7105: Asphalt Materials and Mixture Design**

(cross-leveled with CV\_ENG 4105). This course consists of a combination of interactive classroom lectures and discussions, group activities, hands-on laboratory exercises, laboratory demonstrations, and field trips (live and/or recorded) to observe asphalt binder and mixture design, production, and control. Upon completion of the course, the student will be able to: (1) select, specify, and design an asphalt paving mixture for specific climatic and traffic conditions using the SUPERPAVE mixture design system; (2) understand the sources, types, and manufacturing aspects of asphalt binders and aggregates; (3) understand the key elements of asphalt mixture construction, process control, and acceptance; (4) perform key SUPERPAVE laboratory tests for asphalt binders, aggregates, and mixtures and master the analysis and interpretation of data collected; (5) understand contemporary concepts and approaches in sustainable asphalt mixture design and construction; (6) understand and mathematically describe fundamental properties of asphalt binders and mixtures, which is a critical step in mastering mixture/pavement design, evaluation, and rehabilitation, and; (7) understand and describe the key types and uses of special asphalt binder and mixture products, including emulsions, cutbacks, polymer-modified binders, warm-mix asphalt, other additives, and mixtures containing recycled asphalt pavement (RAP) and recycled asphalt shingles (RAS). Graded on A-F only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** CV\_ENG 3600

---

**CV\_ENG 7106: Intelligent Transportation Systems**

(cross-leveled with CV\_ENG 4106). This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the

theory of transportation networks and systems optimization, current implementations of ITS, and its practical issues and implications of ITS.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

**CV\_ENG 7109: Urban Development and Planning**

Introduction to planning processes; procedures and forces that shape urbanization.

**Credit Hours:** 3

---

**CV\_ENG 7110: Transportation Simulation**

(cross-leveled with CV\_ENG 7110). Theory and application of simulation in transportation engineering.

**Credit Hours:** 3

**Prerequisites:** C- or better in CV\_ENG 3100

---

**CV\_ENG 7120: Airport Engineering**

(cross-leveled with CV\_ENG 4120). Airport systems planning, design, and management.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3100

---

**CV\_ENG 7125: Transportation Legal Issues**

(cross-leveled with CV\_ENG 4125). This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3100

---

**CV\_ENG 7130: Transportation Safety**

(cross-leveled with CV\_ENG 4130). This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3100

---

**CV\_ENG 7145: Civil and Environmental Engineering Legal Issues**

(cross-leveled with CV\_ENG 4125). Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3100

---

**CV\_ENG 7155: Transportation Geography**

(same as GEOG 7850; cross-leveled with CV\_ENG 4155, GEOG 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

**Credit Hours:** 3

---

**CV\_ENG 7165: Geographic Information Systems I**

Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework.

**Credit Hours:** 3

**Prerequisites:** instructor's consent; GEOG 2840

---

**CV\_ENG 7175: The Geospatial Sciences in National Security**

(Same as GEOG 7130; cross-leveled with CV\_ENG 4175, GEOG 4130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**CV\_ENG 7185: Location Analysis/Site Selection**

(same as GEOG 7740; cross-leveled with CV\_ENG 4185, GEOG 4740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

**Credit Hours:** 3

---

**CV\_ENG 7190: Infrastructure Project Development**

(cross-leveled with CV\_ENG 4190). Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 7200: Remote Sensing of the Environment**

(cross-leveled with CV\_ENG 4200). Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

**Credit Hours:** 3

---

**CV\_ENG 7220: Hazardous Waste Management**

(same as CH\_ENG 7220; cross-leveled with CV\_ENG 4220, CH\_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

**Credit Hours:** 3

---

**CV\_ENG 7230: Introduction to Water Quality**

(cross-leveled with CV\_ENG 4230). Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

**Credit Hours:** 3

---

**CV\_ENG 7232: Water and Wastewater Treatment Facilities**

(cross-leveled with CV\_ENG 4232). Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4230 or CV\_ENG 7230 or instructor's consent

---

**CV\_ENG 7240: Water Quality Analysis**

(cross-leveled with CV\_ENG 4240). Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

**Credit Hours:** 3

**Prerequisites:** C- or better in CV\_ENG 4230 or instructor's consent

---

**CV\_ENG 7245: Environmental Chemistry for Engineers**

(cross-leveled with CV\_ENG 4245). This course will cover the fundamentals of environmental chemistry. Physical, equilibrium, organic and colloid chemistry topics will be presented from an environmental perspective with a focus on their relevant engineering applications. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 7250: Environmental Regulatory Compliance**

(cross-leveled with CV\_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development or regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

**Credit Hours:** 3

---

**CV\_ENG 7260: Environmental Public Policy**

(cross-leveled with CV\_ENG 4260). Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graded on A-F basis.

**Credit Hours:** 3

---

**CV\_ENG 7270: Environmental Engineering Microbiology**

(cross-leveled with CV\_ENG 4270). Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

**Credit Hours:** 3

---

**CV\_ENG 7286: Environmental Sustainability**

(cross-leveled with CV\_ENG 4286). This course will present an introduction to sustainability in engineering, tools for assessing sustainability and principles of sustainable design practices. Topics include climate change, energy and renewable resources, limits to growth, risk assessment, life cycle assessments, water and energy footprints, green buildings, and the water-food-energy-nexus. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3200

---

**CV\_ENG 7290: Wastewater Treatment and Process Design**

(cross-leveled with CV\_ENG 4290). Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 7300: Advanced Structural Steel Design**

(cross-leveled with CV\_ENG 4300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3313

---

**CV\_ENG 7302: Prestressed/Advanced Reinforced Concrete**

(cross-leveled with CV\_ENG 4302). Principles of prestressing. Constituent materials, loading and allowable stresses. Working and ultimate stress analysis and design. Shear and torsion. Deflections. Prestress losses. Continuous beams. Composite beams. Compression members. Footings.

**Credit Hours:** 3

**Corequisites:** CV\_ENG 3312

---

**CV\_ENG 7310: Structural Design and Analysis**

(cross-leveled with CV\_ENG 7310). Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 4300

---

**CV\_ENG 7320: Energy Methods in Mechanics**

(cross-leveled with CV\_ENG 4320). Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.

**Credit Hours:** 3

---

**CV\_ENG 7330: Structural System Design**

(cross-leveled with CV\_ENG 4330). Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3312 and CV\_ENG 3313

---

**CV\_ENG 7350: Matrix Methods of Structural Analysis**

(cross-leveled with CV\_ENG 4350). An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3300

---

**CV\_ENG 7360: Bridge Engineering**

(cross-leveled with CV\_ENG 4360). Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and shear and Moment Envelopes. Design of medium-and Sort-Span Girder Bridges based on AASHTO LRFD Specs. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV\_ENG 3312 and CV\_ENG 3313

---

**CV\_ENG 7404: Geotechnical Earthquake Engineering**

(cross-leveled with CV\_ENG 4404). This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include; basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV\_ENG 3400 or instructor's consent

---

**CV\_ENG 7410: Foundation Engineering**

(cross-leveled with CV\_ENG 4410). Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV\_ENG 3400

---

**CV\_ENG 7412: Applied Geotechnical Engineering**

(cross-leveled with CV\_ENG 4412). Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

**Credit Hours:** 3

**Prerequisites:** grade or C- or better in CV\_ENG 3400

---

**CV\_ENG 7500: Introduction to Construction Management**

(cross-leveled with CV\_ENG 4500). Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

**Credit Hours:** 3

---

**CV\_ENG 7510: Construction Methods and Equipment**

Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses.

**Credit Hours:** 3

**Prerequisites:** MATH 1300 or MATH 1500, or instructor's consent

---

**CV\_ENG 7600: Advanced Mechanics of Materials**

(same as MAE 7600; cross-leveled with CV\_ENG 4600 and MAE 4600). Analysis of more complicated problems in stresses, strains.

**Credit Hours:** 3

**Prerequisites:** C- or better in ENGINR 2200, MAE 3200

---

---

**CV\_ENG 7610: Sensors and Experimental Stress Analysis**

(cross-leveled with CV\_ENG 4610). Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in ENGINR 2200 and PHYSCS 2760

---

**CV\_ENG 7660: Vibration Analysis**

(same as MAE 7660; cross-leveled with CV\_ENG 4660, MAE 4660). Vibration theory with application to mechanical systems.

**Credit Hours:** 3

**Prerequisites:** C- or better in MATH 4100 and MAE 2600

---

**CV\_ENG 7692: Introduction to Structural Dynamics**

(cross-leveled with CV\_ENG 4692). Theory of structural response to dynamics loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV\_ENG 3300

---

**CV\_ENG 7700: Hydraulics of Open Channels**

(cross-leveled with CV\_ENG 4700). Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves.

**Credit Hours:** 3

**Prerequisites:** graduate standing and Grade of C- or better in CV\_ENG 3700

---

**CV\_ENG 7702: Pipeline Engineering**

Theoretical and practical aspects of pipeline engineering including pipeline transport of natural gas and various solids such as coal, sand and solid wastes.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 and MAE 3400

---

**CV\_ENG 7703: Applied Hydrology**

(cross-leveled with CV\_ENG 4703). Modern methods of applied hydrologic analysis and synthesis of hydrologic records.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV\_ENG 3700 and CV\_ENG 3702, or instructor's consent

---

**CV\_ENG 7710: Soil and Water Conservation Engineering**

(same as BIOL\_EN 7150; cross-leveled with CV\_ENG 4710, BIOL\_EN 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 3200 or CV\_ENG 3200 or instructor's consent

---

---

**CV\_ENG 7720: Watershed Modeling Using GIS**

(same as BIOL\_EN 7350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis.

**Credit Hours:** 3

**Prerequisites:** BIOL\_EN 2180 or CV\_ENG 3200 or instructor's consent

---

**CV\_ENG 7730: Hydraulic Design**

(cross-leveled with CV\_ENG 4730). Design of hydraulic infrastructure utilizing principles of both pressure conduits and open channels. Hand calculations and use of commercial design software for water distribution (quantity and quality), stormwater collection and sanitary sewer systems, and detention basins. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 or equivalent

---

**CV\_ENG 7740: Irrigation and Drainage Engineering**

(same as BIOL\_EN 7250; cross-leveled with CV\_ENG 4740). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700 or MAE 3400 or BIOL\_EN 2180

---

**CV\_ENG 7792: Analysis of Water-Resource Systems**

(cross-leveled with CV\_ENG 4792). Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**CV\_ENG 8001: Advanced Topics in Civil Engineering**

New and current technical developments in civil engineering.

**Credit Hour:** 1-3

**Prerequisites:** CV\_ENG 4006 or equivalent

---

**CV\_ENG 8002: Directed Reading In Civil Engineering**

Faculty supervised readings course.

**Credit Hour:** 1-3

---

**CV\_ENG 8085: Problems in Civil Engineering**

Supervised investigation in civil engineering to be presented in the form of a report.

**Credit Hour:** 1-6

---

**CV\_ENG 8100: Transportation Planning and Models**

Regional and metropolitan transportation studies; land use, traffic generation, distribution and assignment models.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4002 or CV\_ENG 4003

---

**CV\_ENG 8106: Advanced Intelligent Transportation Systems**

This course is intended to be an introductory course in Intelligent Transportation Systems (ITS). This course includes the background of

ITS, current implementations, sample deployments, and practical issues and implications.

**Credit Hours:** 3

---

**CV\_ENG 8107: Transportation Safety Modeling**

This course covers the transportation safety modeling process and focuses on the modeling of crash frequencies. Class topics include background, the Highway Safety Manual, exploratory data analysis, curve-fitting, safety-performance functions, model optimization, goodness-of-fit measures, variable introduction, and model equation. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 8110: Theory of Traffic Flow**

Scientific approach to study of traffic phenomena with emphasis on applications. Deterministic and stochastic models of traffic flow; optimization of intersection controls; computer simulation of traffic problems.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4002 or instructor's consent

---

**CV\_ENG 8140: Highway Transportation**

Economics of transportation on highways. Comparison of vehicle operation costs. Project studies of highway problems in general.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4103 or equivalent

---

**CV\_ENG 8150: Transportation Networks**

This course presents techniques used in equilibrium analysis of transportation networks. The details of traffic assignment algorithms will be discussed along with theory and practical algorithms.

**Credit Hours:** 3

---

**CV\_ENG 8160: Advanced Research Methods in Transportation Engineering**

This course will cover advanced research methods used in transportation. A special focus will be on the state-of-art approaches in traffic engineering. Mathematical and analytical models will be reviewed in detail. This is a reading intensive course where students are expected to review research articles on various topics. The methods used in the articles and a critical review of the article findings will be discussed in an interactive manner in the class. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 8187: Seminar in Transportation Engineering**

Review of research in progress in the area of transportation engineering.

**Credit Hour:** 1

---

**CV\_ENG 8200: Water Quality Modeling**

Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 7230

---

**CV\_ENG 8215: Environmental Transport Phenomena**

Fundamental processes that control the transport of constituents substances in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.

**Credit Hours:** 3

---

**CV\_ENG 8220: Advanced Hazardous Waste Treatment Processes**

Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, soil-vapor extraction, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4220

---

**CV\_ENG 8225: Aquatic Chemistry**

Principles of chemical thermodynamics and equilibrium applied to processes in natural water and water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 8230: Unit Process Laboratory**

Studies chemical and physical relationships as applied to unit processes of water and wastewater.

**Credit Hours:** 3

---

**CV\_ENG 8240: Physiochemical Treatment Processes**

Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.

**Credit Hours:** 3

---

**CV\_ENG 8245: Particles in the Environment**

This course is an introduction to interfacial and colloid science, with an emphasis on aqueous systems of natural colloids and engineered nanomaterials. Graded on A-F basis only.

**Credit Hours:** 3

---

**CV\_ENG 8250: Biochemical Treatment Processes**

Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.

**Credit Hours:** 3

---

**CV\_ENG 8260: Environmental Biotechnology**

Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 8250 or instructor's consent

---

**CV\_ENG 8270: Design of Water and Wastewater Treatment Facilities**

Development of design criteria and their application to the design of water and wastewater treatment facilities.

**Credit Hours:** 3

---

**CV\_ENG 8287: Seminar in Environmental Engineering**

Review of research in progress in the area of environmental engineering.

**Credit Hour:** 1

---

**CV\_ENG 8295: Environmental Regulatory Policy**

Discussion of the various policy aspects of environmental regulation: economic and non-economic impacts of degradation; risk assessment and management; distribution of environmental risks; regulatory tools; federal vs. state; disclosure; enforcement. Relation to environmental laws. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4250 or CV\_ENG 7250 or equivalent

---

**CV\_ENG 8303: Behavior of Reinforced Concrete Members**

The design philosophy, constitutive laws, creep rate sensitivity and aging, shrinkage. Nonlinear response of reinforced concrete members. Deflection computation and control. Bond and anchorage.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3312

---

**CV\_ENG 8311: Nondestructive Evaluation Engineering**

This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2760, ENGINR 1200, MATH 4100

---

**CV\_ENG 8312: Advanced Structural Analysis**

Current trends in structural analysis. Elastic analysis of curved beams, arches and suspensions. Finite element and nonlinear methods of analysis.

**Credit Hours:** 3

---

**CV\_ENG 8313: Random Vibration**

Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4606

---

**CV\_ENG 8320: Continuum Mechanics**

(same as MAE 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3700, MATH 7100, ENGINR 2200

---

**CV\_ENG 8330: Theory of Elasticity**

(same as MAE 8330). Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods.

**Credit Hours:** 3

---

**CV\_ENG 8340: Theory of Plates and Shells**

(same as MAE 8340). Rectangular and circular plates. Variational methods in the analysis of plates and shells. Plates of unusual shape. Shear deformation effects. Large deformation analysis. Analysis of cylindrical shells.

**Credit Hours:** 3

---

**CV\_ENG 8342: Space Mechanics**

Rigid body dynamics analysis of satellites, space vehicles. Trajectories, time of flight optimization.

**Credit Hours:** 3

**Prerequisites:** MAE 3600 or equivalent, and MATH 4100

---

**CV\_ENG 8350: Theory of Elastic Stability**

(Same as MAE 8350). Buckling of Columns, frames, arches and other structural systems. Kinematic approach to stability. Large deflections. Energy approach to buckling. Plate and shell buckling. Inelastic buckling of columns. Creep buckling.

**Credit Hours:** 3

---

**CV\_ENG 8360: Theory of Plasticity**

(same as MAE 8360). Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 8330 or instructor's consent

---

**CV\_ENG 8372: Reinforced Concrete Theory and Design**

Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4350 or equivalent

---

**CV\_ENG 8380: Nonlinear Mechanical Analysis**

Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design.

**Credit Hours:** 3

**Prerequisites:** MAE 3600 or equivalent and MATH 4100

---

**CV\_ENG 8387: Seminar in Structural Engineering**

Review of research in progress in the area of structural engineering.

**Credit Hour:** 1

---

**CV\_ENG 8390: Advanced Topics Structural Analysis**

Computer implementation and application of finite element analysis. Material and geometric nonlinearities. Plastic analysis of structures. Code provisions for analysis of seismic and wind loadings.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4350

---

**CV\_ENG 8392: Dynamics of Structures**

(same as MAE 8392). Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.

**Credit Hours:** 3

**Prerequisites:** MAE 2600 and MATH 4100 or MATH 7100

---

**CV\_ENG 8402: Advanced Shear Strength of Soils**

Theoretical soil mechanics as applied to solution of specific engineering problems.

**Credit Hours:** 3

---

**CV\_ENG 8403: Consolidation and Settlement**

Settlement of soil, Theory of Consolidation, consolidation testing, settlements of earth fills and embankments, stress distribution in soils, elastic settlement, bearing capacity of shallow foundations, shallow foundations design.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3400

---

**CV\_ENG 8404: Seepage in Soils**

General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3400 or instructor's consent

---

**CV\_ENG 8407: Soil Behavior**

Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3400 or instructor's consent

---

**CV\_ENG 8408: Soil Dynamics**

Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3400 and instructor's consent

---

**CV\_ENG 8410: Advanced Foundation Engineering**

Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations -

static capacity, lateral loads, bucklin, dynamic analysis load tests, pile groups, drilled piers.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4410

---

**CV\_ENG 8412: Stability and Performance of Earth Slopes**

Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3400 or instructor's consent

---

**CV\_ENG 8413: Design and Analysis of Earth Retaining Structures**

General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3400 or instructor's consent

---

**CV\_ENG 8487: Seminar in Geotechnical Engineering**

Review of research in progress in the area of geotechnical engineering.

**Credit Hour:** 1

---

**CV\_ENG 8610: Materials and Measurement**

About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 3600 or equivalent

---

**CV\_ENG 8620: Advanced Dynamics**

(same as MAE 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 2080 and MATH 4100

---

**CV\_ENG 8630: Vibrations of Distributed Parameter Systems**

(same as MAE 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.

**Credit Hours:** 3

**Prerequisites:** CV\_ENG 4660

---

**CV\_ENG 8720: Hydrotechnical Practicum**

Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.

**Credit Hour:** 2-4

**Prerequisites:** graduate standing in Civil Engineering

---

---

**CV\_ENG 8990: Research-Masters Thesis in Civil & Environmental Engineering**

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**CV\_ENG 9990: Research-Doctoral Dissertation Civil & Environmental Engineering**

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

## Clinical & Diagnostic Sciences Courses

**CDS 2190: Medical Terminology**

Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**CDS 3200: Essentials of Pathology**

Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students.

**Credit Hours:** 2

**Recommended:** general biology and one course in either physiology or anatomy

---

**CDS 3460: Cardiovascular and Pulmonary Diagnostic Applications I**

(same as RA\_SCI 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.

**Credit Hours:** 3

**Prerequisites:** Acceptance into Radiologic Sciences, Radiography Program

---

**CDS 3460W: Cardiovascular and Pulmonary Diagnostic Applications I - Writing Intensive**

(same as RA\_SCI 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.

**Credit Hours:** 3

**Prerequisites:** Acceptance into Radiologic Sciences, Radiography Program

---

**CDS 4085: Problems in Clinical and Diagnostic Sciences**

Supervised investigation in an aspect of Clinical and Diagnostic Sciences usually culminating in a written report.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

---

**CDS 4328: Radiation Safety and Biology**

Regulations and procedures for safe uses of radiation to heighten student understanding of radiation physics, radiation biology, and radiation safety. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Junior standing

**Recommended:** One course in Biological Sciences and Physics/Chemistry

---

**CDS 4440: Organization and Administration**

(same as RA\_SCI 4440 and RS\_THR 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

**Credit Hours:** 3

---

**CDS 4460: Cardiovascular and Pulmonary Diagnostic Applications II**

Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.

**Credit Hours:** 3

---

**CDS 4480: Clinical Ethics**

(same as HLTH\_SCI 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.

**Credit Hours:** 3

---

**CDS 4480W: Clinical Ethics - Writing Intensive**

(same as HLTH\_SCI 4480W). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.

**Credit Hours:** 3

---

**CDS 4500: Emergency and Disaster Management in Healthcare**

This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Restricted to students in the Undergraduate Academic Program of Health Professions

---

**CDS 4840: Asthma Education**

This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** instructor's consent

---

---

**CDS 4955: Introduction to Research**

(same as RS\_THR 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

**Credit Hours:** 3

---

**CDS 4955W: Introduction to Research - Writing Intensive**

(same as RS\_THR 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

**Credit Hours:** 3

---

**CDS 4985: Healthcare Organization and Leadership**

In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Senior standing

---

**CDS 4985W: Healthcare Organization and Leadership - Writing Intensive**

In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Senior standing

---

**CDS 7025: CDS Electronic Communication and Informatics**

The course presents an overview of healthcare informatics pertaining to all clinical and diagnostic sciences (CDS) constituent programs and of medical informatics. The course introduces all possible electronic communication avenues and methods used in clinical and diagnostic sciences. It provides a comprehensive introduction to the applications of information systems in a range of healthcare environments including clinical and diagnostic sciences education, clinical research, and diverse clinical settings where students will be employed upon graduation. It includes extensive readings and critical discussions of relevant professional research literature. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

**CDS 7027: Techniques for Teaching CDS Courses Traditionally or Online**

Clinical and Diagnostic Sciences (CDS) is a new model that integrates multiple dissimilar programs in the allied health and medical fields. This course is designed to prepare CDS professionals to design, organize, conduct and evaluate professional educational offerings, including pre-professional didactic and clinical coursework, in-service trainings, and continuing professional education sessions conducted through traditional

and/or online formats. The course will guide the student in developing critical thinking and problem solving strategies necessary in the clinical, therapeutic and diagnostic imaging modalities, as well as the relationship between theoretical and practical aspects of teaching techniques specific to CDS. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7110: Management Approaches in CDS**

Clinical and Diagnostic Sciences (CDS) is a multiple discipline program in allied health sciences and medical fields. This course is designed to prepare CDS professionals to effectively explore the variety of styles and effective approaches of management. The course will guide the student in developing critical thinking and problem solving strategies necessary in the clear understanding of the strategic avenues required by the appropriate management methods that lead to a harmonic decorum of integration between multiple programs and departments in CDS. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7112: Leadership Styles in CDS**

The course is designed to prepare clinical and diagnostic sciences (CDS) professionals from various integrated programs of CDS fields to understand and apply effective leadership styles and methods in order to be efficient, dynamic, and successful leader. The course will guide the students in developing critical thinking and problem solving strategies necessary to expand their strategic leadership knowledge and skills to function in diverse environments of the CDS fields as integrated units or separately. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7113: Practical Multidiscipline Laboratory Organization in CDS**

The course is designed to prepare clinical and diagnostic sciences (CDS) professionals from various integrated programs of CDS fields to understand and effectively apply practical organizational skills when dealing with multidisciplinary clinical laboratory settings. The course will guide the students to explore all available practical methods in order to construct an efficient, dynamic, and flowchart accessible laboratory within the CDS department and the fields. The outcome of this course will augment the student's abilities to develop critical thinking and problem solving strategies necessary to function in diverse laboratory environments within the CDS integrated fields. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7114: Organizational Design and Dynamics in CDS**

The course is designed to prepare clinical and diagnostic sciences (CDS) professionals from various integrated programs of CDS fields to understand and conceptualize the most appropriate model of structure design of an organization as part of the CDS constituent fields and holistically integrated CDS organization as a whole. Students will learn and be instructed to understand the dynamics that occur within the CDS organizational design. The course will guide the students as they explore various examples available for designs of a CDS organization. The outcome of this course will enhance the student's abilities to develop

critical thinking and problem solving strategies necessary to function in diverse clinical and diagnostic environments within the CDS integrated fields. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7116: Administration of Educational Programs in CDS**

Clinical and Diagnostic Sciences (CDS) is a new model that integrates multiple dissimilar programs in the allied health and medical fields. This course is designed to prepare CDS professionals to effectively administer and articulate with educational programs. The course will guide the student in developing critical thinking and problem solving strategies necessary to implement strategic plans, institute clinical affiliation agreements, establish thoughtful and consistent policies and procedures, evaluate student selection criteria and pursue accreditation for education programs in CDS. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7118: Telecommunication and Reporting in CDS**

Clinical and Diagnostic Sciences (CDS) is a new model that integrates multiple dissimilar programs in the allied health and medical fields. This course will introduce and prepare CDS professionals to telecommunication avenues of interacting, transmitting, and mobilizing the data and pertinent information to the countless outlets of information distribution areas. The course will provide the professional student with the tools and means to understand how to report all the relevant data and information essential to the process to interact and disseminate significant events and results used within the CDS constituent programs. The course will guide the student in developing critical thinking and problem solving strategies necessary in the clinical, therapeutic, and diagnostic imaging modalities in the process of telecommunication skills and reporting methods among all the CDS fields. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Program and instructor's consent

---

#### **CDS 7840: Asthma Education**

This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** instructor's consent required

---

#### **CDS 8001: Topics in Clinical and Diagnostic Sciences**

This course is designed to explore, through selected themes assigned by the instructor, advanced clinical and diagnostic sciences (CDS) topics in psychosocial, professional, educational, and technical areas. The organized study of a specific CDS topic will be conducted in a holistic manner. Graded on A-F basis only.

**Credit Hour:** 1-3

---

---

**CDS 8050: Research in Clinical and Diagnostic Sciences**

This course is designed for the clinical and diagnostic sciences (CDS) programs' graduates and health science degree holders who wish to explore advanced opportunities in CDS through a research component and scientific investigations. It will allow the students to formulate appropriate reasons for pursuing a specific area of interest. The course will provide knowledge about research methodology in CDS, the operation of, and how to conduct a research in a CDS department and in a clinical setting. It will guide the student to develop appropriate research qualities associated with the CDS constituent programs. The course guides the students in developing independent study and scientific investigation skills. The course does not lead to a thesis or dissertation. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Program and instructor's consent

---

**CDS 8085: Problems in Clinical and Diagnostic Sciences**

Clinical and Diagnostic Sciences (CDS) field is still an emerging profession in the medical field. This course is designed to provide a broad overview of multiple 'problems' faced by CDS in the health care context. Through a variety of themes exploring theoretical and clinical aspects of the constituent professions, the course will guide the student in developing critical thinking and problem solving strategies necessary in the analysis of the controversial aspects of a chosen subject. Issues will include, but not limited to the role and function of CDS in health care in general and clinical and diagnostic imaging in special, the relationship between theoretical and practical aspects of the imaging modality and clinical aspects (fast pace of advancing technology versus slow pace of clinical application, education, literature of specialty, etc.), ethical and legal issues in the CDS constituent professions, problems faced by a clinical and diagnostic educational program, CDS graduates' role in diagnosis, education, management, and CDS clinical applications. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Program and instructor's consent

---

**CDS 8090: Research in Clinical and Diagnostic Sciences**

This course is designed for the clinical and diagnostic sciences (CDS) constituents programs and health science graduates who wish to explore through the methods of scientific research any area of interest in CDS fields. It leads to a thesis or dissertation. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Program and instructor's consent

---

**CDS 8430: Clinical Leadership**

Leadership theory for practicing clinical and diagnostic health professionals. Exploration of theoretical foundations and models of leadership. Emphasis given to clinical practice trends, reflective self-assessment. Analysis of leadership cases in hospitals/clinics, industry, and entry-into-practice educational settings. Graded on A-F basis only.

**Credit Hours:** 2

---

**CDS 8920: Applied Research Methodologies in Clinical and Diagnostic Sciences**

Practical research application of clinical and diagnostic sciences (CDS) in a real time clinical environment: exploring the various methods of applied clinical research and how they relate to decision making, patient

handling, technical applications, instrumentation and image processing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BHS degree in CDS and or allied health professions, and Program and instructor's consent

---

**Clinical Laboratory Sciences Courses****CL\_L\_S 1000: Orientation to Clinical Laboratory Science**

The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** HLTH\_SCI 1000

---

**CL\_L\_S 4407: Clinical Laboratory Operations**

This course provides a basic introduction to the theory, practical application, technical performance and evaluation of laboratory skills specific to the practice of clinical laboratory science. Laboratory safety; microscopy; pipetting; general laboratory equipment; quality control; mathematics; phlebotomy; pre-analytic, analytic and post-analytic processes, including specimen collection, processing and transport to maintain test result integrity, will be addressed. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL\_L\_S 4408: Introduction to Clinical Hematology**

This course introduces the theory, practical application, technical performance and evaluation of hematological and hemostasis procedures. Correlation of laboratory data with the diagnosis of erythrocyte, leukocyte and bleeding/clotting disorders will be introduced. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL\_L\_S 4409: Introduction to Clinical Microbiology**

This course introduces the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. The course primarily focuses on bacteriology, but will include introductory coverage of parasitology, mycology and virology. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL\_L\_S 4410: Introduction to Clinical Chemistry and Urinalysis**

This course introduces the theory, practical application, technical performance and evaluation of basic laboratory skills and methods in clinical chemistry and urinalysis. The course focuses on the correlation of laboratory data with the diagnosis of renal conditions, but will include introductory coverage of carbohydrate, liver and protein conditions, as well as enzymes. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

---

**CL\_L\_S 4411: Introduction to Clinical Immunohematology**

This course introduces the theory, practical application, technical performance and evaluation of immunohematology procedures required to provide compatible blood components for transfusion. Methods for collection, processing, storage and transfusion of blood and blood components will be presented. Immunohematology procedures that assist in the diagnosis and management of hemolytic conditions will be introduced. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL\_L\_S 4412: Clinical Laboratory Science Theory, Application and Correlation**

Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Course may be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 5

**Prerequisites:** departmental consent, accepted in into the Medical Technology Program

---

**CL\_L\_S 4413: Clinical Endocrinology and Toxicology**

This course introduces the theory, practical application, and evaluation of clinical chemistry laboratory procedures. Correlation of clinical laboratory data with the diagnosis and treatment of endocrine disorders, toxicology disturbances and therapeutic drug monitoring is emphasized. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL\_L\_S 4414: Clinical Chemistry and Urinalysis I**

This course expands on the theory, practical application, and evaluation of basic laboratory procedures introduced in CL\_L\_S 4407 Clinical Laboratory Operations and CL\_L\_S 4410 Introduction to Clinical Chemistry and Urinalysis, with an emphasis on common automated methodologies used in clinical chemistry and urinalysis laboratories. This course will focus on the interpretation, evaluation and correlation of clinical laboratory data with the diagnosis and treatment monitoring of carbohydrate, renal, hepatic, protein, cardiac, lipid/lipoprotein, major and minor electrolyte, enzyme, pancreatic-gastrointestinal and acid-base disorders. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL\_L\_S 4415: Clinical Chemistry and Urinalysis II**

This course expands on the theory, practical application, and evaluation of laboratory procedures introduced in CL\_L\_S 4414 Clinical Chemistry and Urinalysis I and CL\_L\_S 4444 Clinical Core Laboratory Practical I. Correlation of clinical laboratory data with the diagnosis and treatment monitoring of carbohydrate, renal, hepatic, cardiac, lipid/lipoprotein, protein, major and minor electrolyte, trace element, enzyme, pancreatic-gastrointestinal and acid-base disorders; tumor markers; and inborn errors of metabolism is emphasized. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL\_L\_S 4416: Clinical Hematology I**

Introduction to the theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** departmental consent, accepted into the Medical Technology Program

---

**CL\_L\_S 4417: Clinical Hematology II**

This course expands on the theory, practical application, and evaluation of hematological and hemostasis procedures introduced in CL\_L\_S 4416 Clinical Hematology I and CL\_L\_S 4444 Clinical Core Laboratory Practicum I, and includes the analysis of cerebrospinal, synovial and serous fluids. Correlation of clinical laboratory data with the diagnosis and treatment of erythrocyte, leukocyte and bleeding/clotting disorders will be emphasized. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL\_L\_S 4418: Clinical Microbiology I**

This course includes the theory, practical application, and evaluation of immunological components and infection disease serology. The principles and methodologies used in the assessment of immunologically related disorders, including hypersensitivity reactions, autoimmune, Immunoproliferative, immunodeficient disorders and infectious disease are included. The course emphasizes the correlation of clinical laboratory data with the patient's diagnosis and treatment. The theory and application of molecular diagnostic tools, such as polymerase chain reaction (PCR), nucleic acid probes, and microarrays are also addressed. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL\_L\_S 4419: Clinical Microbiology II**

This course builds on the theory, practical application and evaluation of the procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans introduced in CL\_L\_S 4418 Clinical Microbiology I and CL\_L\_S 4448 Clinical Microbiology Laboratory Practicum I. This course includes bacteriology, mycology, parasitology, and virology content, and will emphasize the correlation of clinical laboratory data with the patient's diagnosis and treatment. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL\_L\_S 4420: Clinical Immunology and Molecular Diagnostics**

This course includes the theory, practical application, and evaluation of immunological components and infection disease serology. The

principles and methodologies used in the assessment of immunologically related disorders, including hypersensitivity reactions, autoimmune, Immunoproliferative, immunodeficient disorders and infectious disease are included. The course emphasizes the correlation of clinical laboratory data with the patient's diagnosis and treatment. The theory and application of molecular diagnostic tools, such as polymerase chain reaction (PCR), nucleic acid probes, and microarrays are also addressed. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

#### **CL\_L\_S 4422: Immunohematology I**

Introduction to the theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. May be repeated for credit. Graded on A/F basis only.

**Credit Hour:** 1-4

**Prerequisites:** departmental approval, accepted into the Medical Terminology Program

---

#### **CL\_L\_S 4423: Clinical Immunohematology II**

This course expands on the theory, practical application, and evaluation of immunohematology procedures presented in CL\_L\_S 4422 Clinical Immunohematology I and CL\_L\_S 4442 Clinical Immunohematology Laboratory Practicum I. There is an emphasis on the application of immunohematology procedures used for the resolution of complex immunohematology problems. Proper selection of immunohematology procedures that assist in the diagnosis and management of hemolytic conditions will be discussed. Concepts in patient blood management and the adverse effects of transfusion will be presented. Quality management as it applies to transfusion medicine will be addressed. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

#### **CL\_L\_S 4424: Phlebotomy**

Theory, practical application, technical performance and evaluation of procedures used in collecting, handling and processing blood specimens. May be repeated for credit. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** departmental approval, accepted into the Medical Technology Program

---

#### **CL\_L\_S 4426: Body Fluid Analysis**

Theory, practical application, technical performance and evaluation of procedures used in the analysis of urine and other body fluids, including cerebrospinal, synovial, serous, seminal, amniotic and feces. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** departmental consent, accepted into the Medical Technology Program

---

#### **CL\_L\_S 4442: Clinical Immunohematology Laboratory Practicum I**

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical immunohematology procedures and preparation of blood components. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL\_L\_S 4407 Clinical Laboratory Operations and CL\_L\_S 4411 Introduction to Clinical Immunohematology. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

#### **CL\_L\_S 4443: Clinical Immunohematology Laboratory Practicum II**

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical immunohematology procedures and preparation of blood components. Course content will include new skills procedures, in addition to the skills and procedures presented in CL\_L\_S 4442 Clinical Immunohematology Laboratory Practicum I. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

#### **CL\_L\_S 4444: Clinical Core Laboratory Practicum**

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical hematology/hemostasis, chemistry and urinalysis procedures. Course content will include new skills and procedures and the application of automation and automatic verification techniques, building on the skills and procedures presented in CL\_L\_S 4407 Clinical Laboratory Operations, CL\_L\_S 4408 Introduction to Clinical Hematology and CL\_L\_S 4410 Introduction to Clinical Chemistry and Urinalysis. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

#### **CL\_L\_S 4445: Clinical Core Laboratory Practicum II**

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical hematology/hemostasis, chemistry and urinalysis procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL\_L\_S 4444 Clinical Core Laboratory Practicum. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

#### **CL\_L\_S 4448: Clinical Microbiology Laboratory Practicum I**

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical microbiology procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL\_L\_S 4407 Clinical Laboratory Operations and CL\_L\_S 4409 Introduction to Clinical Microbiology. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

#### **CL\_L\_S 4449: Clinical Microbiology Laboratory Practicum II**

This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical microbiology

procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL\_L\_S 4448 Clinical Microbiology Laboratory Practicum I. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Restricted to Clinical Laboratory Students only

---

#### **CL\_L\_S 4970: Clinical Laboratory Management I**

This course introduces the theory, practical application and evaluation of laboratory management principles in healthcare, including safety, research, educational methodology, quality control, ethics, laboratory operations, point-of-care testing, scope of practice, and the job application process. Opportunities for building critical thinking, problem-solving, research, communication, professionalism, management and leadership skills are provided. Graded on A-F basis only. May be repeated for credit.

**Credit Hours:** 2

**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

#### **CL\_L\_S 4980: Clinical Lab Management II**

Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CL\_L\_S 4970 or departmental consent

---

#### **CL\_L\_S 4980W: Clinical Lab Management II - Writing Intensive**

Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CL\_L\_S 4970 or departmental consent

---

## **Communication Courses**

#### **COMMUN 1200: Public Speaking**

Principles, process of speech communication in small group and public speaking situations.

**Credit Hours:** 3

---

#### **COMMUN 1200H: Public Speaking - Honors**

Principles, process of speech communication in small group and public speaking situations.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

#### **COMMUN 1880: Introduction to Digital Media Production**

(same as DST\_VS 1880, FILMS\_VS 1880, ENGLSH 1880, ARTGE\_VS 1920). Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts

that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Consent of instructor

---

#### **COMMUN 2100: Media Communication in Society**

An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

**Credit Hours:** 3

---

#### **COMMUN 2100H: Media Communication in Society - Honors**

An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

#### **COMMUN 2200: Video Workshop: Sports Broadcast Production**

A hands-on workshop; students will learn live sports video production theory and techniques from Mizzou Athletics broadcast professionals. Students will participate in all phases of video production (camera operations, directing, graphics, video replay, and live audio production and digital editing) in a variety of live sports projects. The class will help produce games for SEC Network Plus. There is no requirement of previous production experience or course work. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Communication majors

---

#### **COMMUN 2315: Basic Audio Production and Performance**

Radio speaking in varied types of programs; console operations, tape editing, microphone techniques.

**Credit Hours:** 3

**Prerequisites:** may be restricted to Communication majors only during early registration

---

#### **COMMUN 2500: Introduction to Communication**

Introduction to four main areas of the field of communication, interpersonal, organizational, political, and mass communication.

**Credit Hours:** 3

---

#### **COMMUN 2530: Screenwriting I**

(same as FILMS\_VS 2530). Analyze various script formats and apply different writing techniques and styles to create screenplays and teleplays. Work inside a creative critique environment to craft vivid storytelling and character elements while developing viable loglines and pitches for their stories. Screenwriting concepts include the three-act structure and the timing and placement of plot points. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor Permission

---

**COMMUN 2701: Topics in Communication - General**

Topics in Communication - General.

**Credit Hours:** 3

**Prerequisites:** may be restricted to Communication majors only during early registration

---

**COMMUN 2703: Topics in Communication - Behavioral Science**

Topics in Communication - Behavioral Science.

**Credit Hours:** 3

**Prerequisites:** may be restricted to Communication majors only during early registration

---

**COMMUN 2703W: Topics in Communication - Behavioral Science - Writing Intensive**

Topics in Communication - Behavioral Science.

**Credit Hours:** 3

**Prerequisites:** may be restricted to Communication majors only during early registration

---

**COMMUN 2705: Topics in Communication - Humanities/Fine Arts**

Topics in Communication - Humanities/Fine Arts.

**Credit Hours:** 3

**Prerequisites:** may be restricted to Communication majors only during early registration

---

**COMMUN 2810: Story Development**

(same as DST\_VS 2810). In this course students will learn about storytelling across time and media, beginning with definitions and fundamentals of narrative and oral storytelling, theories of narrative and its cultural functions, and basic narrative analysis. The course then turns to the close study of structure, narration, character, plot, action, dialogue, and other narrative elements, with a wide variety of examples and prompts. Throughout the course, students practice the development of their own stories in multiple versions and formats, with attention to the ways that formal structures such as blogs, tweets, podcasts, and scripts affect their storytelling strategies. By the end of the course, students will produce a short shooting script or equivalent project ready for production. Thus, the course functions as preparation for audio-visual production courses in Communication, Film Studies, Media Studies, Film and Media Arts, and Digital Storytelling degree programs. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Consent of instructor

---

**COMMUN 2880: Digital Storytelling Production I**

(same as ENGLSH 2880, DST\_VS 2880). Digital Storytelling Production I teaches agility with digital video technology through applied experiences. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1880 and consent of instructor

---

**COMMUN 3050: Survey of Communication Studies**

A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

**Credit Hours:** 3

**Prerequisites:** May be restricted to Communications majors through early registration

---

**COMMUN 3050W: Survey of Communication Studies - Writing Intensive**

A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

**Credit Hours:** 3

**Prerequisites:** May be restricted to Communications majors through early registration

---

**COMMUN 3310: Message Design and Writing for the Media**

This course introduces students to writing for the media in various contexts including television, film and new media (e.g., websites and social media).

**Credit Hours:** 3

**Prerequisites:** COMMUN 2100. May be restricted to Communication majors only during early registration

---

**COMMUN 3390: Digital Production I**

Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3395: Digital Production II**

Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure.

**Credit Hours:** 3

**Prerequisites:** COMMUN 3390 or instructor's consent. May be restricted to Communication majors only during early registration

---

**COMMUN 3422: Communication Research Methods**

Focuses on writing and administering surveys, conducting field research, and designing experimental studies.

**Credit Hours:** 3

**Prerequisites:** sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 3441: Nonverbal Communication**

Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication.

**Credit Hours:** 3

**Prerequisites:** sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 3460: Organizational Advocacy**

Theory and analysis of communication to promote organizational culture and image.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors during early registration

---

**COMMUN 3470: Culture as Communication**

(same as ANTHRO 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3490: Media Effects**

Survey of the topics, research, and theories in the study of media effects.

**Credit Hours:** 3

**Prerequisites:** COMMUN 2100 or senior standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3525: Conflict and Communication**

Theory and analysis of communication in conflict situations across a variety of contexts.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required. May be restricted to Communication majors only during early registration

---

**COMMUN 3561: Relational Communication**

Analysis of communication influences on relational identities and development.

**Credit Hours:** 3

**Prerequisites:** sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 3570: Performance of Literature**

(same as ENGLSH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**COMMUN 3571: Group Decision Making Processes**

(same as PEA\_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3572: Argument and Advocacy**

Critical analysis and production of argument emphasizing evidence, reasoning, and refutation.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 3575: Business and Professional Communication**

Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3575W: Business and Professional Communication - Writing Intensive**

Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3580: Crisis Communication**

The theory and practice of corporate and political communication responses to crisis situations.

**Credit Hours:** 3

**Prerequisites:** sophomore standing. May be restricted to Communication majors only during early registration

---

**COMMUN 3701: Topics in Communication-General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1200 and COMMUN 2100. May be restricted to Communication majors only during early registration

---

**COMMUN 3701W: Topics in Communication - General - Writing Intensive**

Topics in Communication - General.

**Credit Hours:** 3

**Prerequisites:** may be restricted to Communication majors only during early registration

---

**COMMUN 3703: Topics in Communication-Behavioral Sciences**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor's consent, May be restricted to Communication majors only during early registration

---

---

**COMMUN 3705: Topics in Communication-Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor's consent. May be restricted to Communications majors only during early registration

---

**COMMUN 4395: Professional Seminar in Television Production**

Application of principles to advanced television production, direction.

**Credit Hours:** 3

**Prerequisites:** COMMUN 3390 and instructor's consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4412: Gender, Language, and Communication**

(same as LINGST 4412, ANTHRO 4412; cross-leveled with COMMUN 7412, LINGST 7412, ANTHRO 7412). Relationship among gender, language, nonverbal communication, and culture.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4440: Ethical Issues in Communication**

(same as PEA\_ST 4440; cross-leveled with COMMUN 7440). Exploration and analysis of ethical dimensions intrinsic to human communication.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4473: Political Communication**

(cross-leveled with COMMUN 7473). Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4474: Theory and Research in Persuasion**

(cross-leveled with COMMUN 7474). Studies the persuasive process, attitude formation, modification.

**Credit Hours:** 3

**Prerequisites:** junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 4476: Organizational Communication**

(cross-leveled with COMMUN 7476). Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings.

**Credit Hours:** 3

**Prerequisites:** junior standing and COMMUN 1200. May be restricted to Communication majors only during early registration

---

**COMMUN 4478: Communication Competencies for a Diverse Workplace**

Review of communication skills that can help students provide leadership around diversity and inclusion issues in the workplace, work more effectively in diverse work environments, and make workplaces more welcoming and inclusive for everyone. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Junior standing. May be restricted to Communication majors only during early registration

---

**COMMUN 4491: Political Public Address**

Course focuses on the rhetorical criticism of public address; which involves analyzing the use of symbolic communication - primarily persuasive argument - in public settings on issues of political, social and cultural significance. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** COMMUN 1200

**Recommended:** COMMUN 3572

---

**COMMUN 4510: Children's Communication**

Course focuses on the nature of children's communication. Students will examine the communicative abilities, practices, and behaviors of children ranging across preschool and school age years. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4520: Family Communication**

(same as H\_D\_FS 4680; cross-leveled with COMMUN 7520, H\_D\_FS 7680). Analysis of the functions and processes of communication within families.

**Credit Hours:** 3

**Prerequisites:** junior standing or departmental consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4530: Health Communication**

(cross-leveled with COMMUN 7530). A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

**Credit Hours:** 3

---

**COMMUN 4628: Children, Adolescents and the Media**

Focus on social scientific research concerning the mass media and social media in the lives of children and adolescents. The course centers on media effects literature and controversies relevant to child and adolescent media users. Course involves readings, lectures, discussions of theories, concepts, methods, and findings. We will also consider social implication and personal choices in media use. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** junior standing required

---

---

**COMMUN 4638: New Technologies and Communication**

(cross-leveled with COMMUN 7638). Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

**Credit Hours:** 3

**Prerequisites:** junior standing or instructor's consent. May be restricted to Communication Majors only during early registration

---

**COMMUN 4648: Race, Ethnicity, and the Media**

Presents an overview of how social identities of race and ethnicity are constructed within the media landscape. Provides an overview of the effects of stereotypical imagery and prosocial representations on users across a variety of media. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** COMMUN 2100

---

**COMMUN 4701: Topics in Communication-General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor's consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4705: Topics in Communication-Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

**Credit Hour:** 1-99

**Prerequisites:** junior standing and instructor's consent. May be restricted to Communication majors only during early registration

---

**COMMUN 4880: Digital Storytelling Production II**

(same as ENGLISH 4880, DST\_VS 4880). Digital Storytelling Production II introduces students to advanced techniques in digital storytelling production, while further developing skills in script writing, storyboarding, Adobe Premiere Pro, and video production with DSLR cameras. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Consent of instructor

**Recommended:** COMMUN 1880 and COMMUN 2880

---

**COMMUN 4940: Internship**

Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Admission to department, junior standing, instructor's consent, 2.5 GPA

---

**COMMUN 4950: Research Project**

Student contributes to a research project with approved goals and a final written report. As part of the project, student will read articles in the

communication research literature. Project can be independent or in conjunction with a faculty research project. Course may be repeated once for credit. Graded on A-F basis only

**Credit Hour:** 1-3

**Prerequisites:** COMMUN 3050; junior standing and instructor's consent. Approval by a faculty member who will serve as project supervisor

---

**COMMUN 4960: Directed Reading**

Independent reading, reports.

**Credit Hour:** 1-99

**Prerequisites:** junior standing or instructor's consent

---

**COMMUN 4970: Communication Practicum**

Special applied instruction in an advanced area of communication or media. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** COMMUN 1200, COMMUN 3050, Communication major with junior standing and GPA of 2.5

---

**COMMUN 4974: Senior Project**

Integration and adaptation of communication theories to an applied communication problem. Required for all majors.

**Credit Hours:** 3

**Prerequisites:** admission to department, senior standing, and departmental consent

---

**COMMUN 7412: Gender, Language, and Communication**

(same as LINGST 7412, ANTHRO 7412; cross-leveled with COMMUN 4412, LINGST 4412, ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture.

**Credit Hours:** 3

---

**COMMUN 7473: Political Communication**

(cross-leveled with COMMUN 4473). Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

**Credit Hours:** 3

**Prerequisites:** graduate standing or departmental consent

---

**COMMUN 7530: Health Communication**

A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

**Credit Hours:** 3

---

**COMMUN 7638: New Technologies and Communication**

Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

**Credit Hours:** 3

---

**COMMUN 8000: Pro-Seminar in Communication**

Obtaining a graduate degree requires that students become excellent researchers, teachers, and colleagues. To support learning toward these proficiencies, the Pro-Seminar course supplements classroom learning

and faculty mentoring through formal departmental offerings. Graded on S/U basis only.

**Credit Hour:** 1

---

**COMMUN 8001: Topics in Communication-General**

Study of selected topics in communication. Topic and credit may vary semester to semester. Repeatable upon consent of department.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**COMMUN 8085: Problems**

Individual study not leading to thesis or dissertation.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**COMMUN 8090: Master's Thesis Research in Communication**

Research leading to thesis. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**COMMUN 8110: Introduction to Graduate Study in Communication**

Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.

**Credit Hours:** 3

---

**COMMUN 8120: Introduction to Communication Research Methods**

Introduction to communication research, including research design and academic writing.

**Credit Hours:** 3

---

**COMMUN 8130: Topics in Qualitative Research Methods**

Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. May be repeated for credit.

**Credit Hours:** 3

---

**COMMUN 8140: Content Analysis**

Introduction to content analysis as a method. Students will learn about issues of sampling, codebook construction, intercoder reliability, validity, and analysis of content analytic data, including computer assisted content analysis.

**Credit Hours:** 3

---

**COMMUN 8160: Rhetorical Criticism**

Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.

**Credit Hours:** 3

---

**COMMUN 8170: Seminar in Quantitative Methods in Communication II**

The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** COMMUN 8120; instructor's consent required

---

**COMMUN 8180: Advanced Topics in Quantitative Methods**

Seminar in advanced topics in quantitative methods and statistics. Topics will vary. Course may be repeated up to two times for a total of six credit hours. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** COMMUN 8120

---

**COMMUN 8310: Seminar in Interpersonal Communication**

Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.

**Credit Hours:** 3

---

**COMMUN 8410: Seminar in Organizational Communication Theory**

Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.

**Credit Hours:** 3

---

**COMMUN 8510: Seminar in Mediated Communication Theory**

This course will offer graduate students a broad overview of extant theories employed in the study of mediated communication. The class will be a survey of theory from foundation to modern conceptions of the study of mediated communication, from mass communication to interactive media contexts.

**Credit Hours:** 3

---

**COMMUN 8610: Survey of Political Communication**

Survey of theory and research on political communication; emphasis on messages and audience responses to messages.

**Credit Hours:** 3

---

**COMMUN 9050: Research**

Completes comprehensive exams and writes a literature review.

**Credit Hour:** 1-9

---

**COMMUN 9090: Doctoral Dissertation Research in Communication**

Research leading to dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**COMMUN 9170: Research Practicum**

Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. May be repeated once for credit.

**Credit Hours:** 3

**Prerequisites:** consent of mentor required; for advanced graduate students

---

**COMMUN 9280: Seminar in Communication Theory**

Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.

**Credit Hours:** 3

---

**COMMUN 9310: Seminar in Family Communication**

Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graded on A-F basis only.

**Credit Hours:** 3

---

**COMMUN 9330: Topics in Interpersonal and Family Communication**

The course will review theory and research on topics related to the study of family communication and/or interpersonal communication. Subjects will rotate and include areas such as relational conflict, gender communication, narrative theory, family diversity, or intercultural communication.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**COMMUN 9430: Topics in Organizational Communication**

Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated for credit.

**Credit Hours:** 3

---

**COMMUN 9460: Topics in Political Communication**

Examination of theory and research in selected areas of political communication. Topics vary by semester. Topics may include political polarization, political socialization, politics and the media, political advertising, politics and new media.

**Credit Hours:** 3

---

**COMMUN 9520: Seminar in Media Processes and Effects**

Explores current research in the processes and effects of mediated communication. Readings pertain to the current social and psychological effects of media on users.

**Credit Hours:** 3

---

**COMMUN 9530: Topics in Mediated Communication**

Examination of theory and research in selected areas of mediated communication. Topics vary by semester. Topics include mass media and social relationships, digital media, social identity and media, health and media, and media diversity. May be repeated two times for credit.

**Credit Hours:** 3

---

**COMMUN 9610: Seminar in Disaster, Crisis, and Risk**

This course examines several lines of research from multiple disciplines that influence communication during disasters, crises, and emergencies.

Topics may include federal government paradigms for disaster communication, crisis communication perspectives, risk perception, resilience, social media and emerging technologies in disasters, and media coverage of disasters.

**Credit Hours:** 3

---

**COMMUN 9620: Political Campaign Debates**

Theory and research on political campaign debates applied to analyses of candidate debates. Focus on primary and general presidential debates.

**Credit Hours:** 3

---

**COMMUN 9630: Political Advertising**

Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

**Credit Hours:** 3

---

## Computer Science Courses

**CMP\_SC 1000: Introduction to Computer Science**

This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives. Prerequisites: Restricted to freshman/sophomore students who are BS Computer Science, BS Information Technology and Undeclared Engineering or Pre-Engineering may enroll in the class without permission

**Credit Hour:** 1

---

**CMP\_SC 1001: Topics in Computer Science**

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

**Credit Hour:** 1-99

---

**CMP\_SC 1050: Algorithm Design and Programming I**

This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers.

**Credit Hours:** 4

**Prerequisites:** C- or higher in MATH 1100 or MATH 1160 or MATH 1500. May be restricted to Engineering majors only

---

**CMP\_SC 1050H: Algorithm Design and Programming I - Honors**

This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers.

**Credit Hours:** 4

**Prerequisites:** C- or higher in MATH 1100 or MATH 1160 or MATH 1500. Honor eligibility required. May be restricted to Engineering majors only

---

---

**CMP\_SC 2001: Topics in Computer Science**

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

**CMP\_SC 2007: World of Neuroscience**

(same as BIOL\_EN 2007, BME 2007, ECE 2007). This in-class course will introduce undergraduates to the growing area of neuroscience from the perspectives of three disciplines: engineering, biology and psychology. Topics in the course will span multiple levels of neuroscience including genomic, genetic, molecular, cellular, systems, behavioral and clinical levels. Due to the interdisciplinary nature of the neuroscience, the classes will cover diverse topics. The topics will range from overviews of the key neurobiology areas, to lab sessions involving how to analyze your own brain signals (EEG), and to visits to brain imaging center and EEG lab. The overall goal is to provide a broad exposure to the fascinating world of interdisciplinary neuroscience. Graded on A-F basis only.

**Credit Hour:** 1

---

**CMP\_SC 2010: Intellectual Property for Engineers**

The objective of the course is to enable students to understand and develop informed opinions about issues relating to IP and its increasing influence on the control and use of information in society. A secondary objective is to provide a practical understanding of how to establish copyright, trademark, and/or patent protection for IP. Particular emphasis will be given to the complexities associated with IP in the fields of information technology and computer science.

**Credit Hours:** 3

**Recommended:** Any 1000 level Engineering course or instructor permission

---

**CMP\_SC 2050: Algorithm Design and Programming II**

A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis.

**Credit Hours:** 4

**Prerequisites:** C or higher in CMP\_SC 1050. May be restricted to Engineering majors only

---

**CMP\_SC 2085: Problems in Computer Science**

Independent investigation or project in Computer Science. May be repeated to up 6 hours.

**Credit Hour:** 1-6

**Prerequisites:** C or higher in CMP\_SC 1050

---

**CMP\_SC 2111: Production Languages**

The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit.

**Credit Hour:** 1-3

**Prerequisites:** C- or higher in CMP\_SC 2050 or INFOTC 2040

---

**CMP\_SC 2270: Introduction to Logic Systems**

(same as ECE 2210). Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 1050 or INFOTC 1040

---

**CMP\_SC 2830: Web Application Development I**

(same as INFOTC 2830). This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 or INFOTC 2040

---

**CMP\_SC 3050: Advanced Algorithm Design**

This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050 with a C or higher

---

**CMP\_SC 3280: Computer Organization and Assembly Language**

(same as ECE 3280). Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 2270 or ECE 2210 or ECE 1210, and C or higher in CMP\_SC 2050

---

**CMP\_SC 3330: Object Oriented Programming**

(same as INFOTC 3330). This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050 or INFOTC 2040 with a C or higher grade

---

**CMP\_SC 3380: Database Applications and Information Systems**

Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 2050 or INFOTC 2040

---

**CMP\_SC 3530: UNIX Operating System**

(same as INFOTC 3530). This course is an introduction to UNIX and UNIX-like operating systems and interfaces, to include the file system, command shells, text editors, pipes and filters, input/output system, shell

scripting and Regular Expressions. The course will also incorporate an aspect of programming in a UNIX environment, cloud computing, containers and an introduction to System Administration. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 or INFOTC 2040

---

#### **CMP\_SC 3940: Internship in Computer Science**

Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on a S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** CMP\_SC 2050

---

#### **CMP\_SC 4001: Topics in Computer Science**

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

**Credit Hour:** 1-99

---

#### **CMP\_SC 4050: Design and Analysis of Algorithms I**

(cross-leveled with CMP\_SC 7050). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 3050 and MATH 2320

---

#### **CMP\_SC 4060: String Algorithms**

(cross-leveled with CMP\_SC 7060). This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 4050

---

#### **CMP\_SC 4070: Numerical Methods for Science and Engineering**

(same as ECE 4070; cross-leveled with CMP\_SC 7070, ECE 7070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 and junior standing or instructor's consent

**Recommended:** Students are expected to have basic knowledge in discrete math and algorithms

---

#### **CMP\_SC 4080: Parallel Programming for High Performance Computing**

(cross-leveled with CMP\_SC 7080) This course will provide in-depth treatment of the evolution high performance computing architectures

and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3280 or ECE 3210 and C- or higher in CMP\_SC 3050 or ECE 3220

---

#### **CMP\_SC 4085: Problems in Computer Science**

Independent investigation or project in Computer Science. May be repeated to up 6 hours.

**Credit Hour:** 1-6

**Prerequisites:** senior standing in Computer Science

---

#### **CMP\_SC 4270: Computer Architecture**

(same as ECE 4270; cross-leveled with CMP\_SC 7270, ECE 7270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

**Credit Hours:** 4

**Prerequisites:** C or higher in CMP\_SC 2050 and CMP\_SC 3280 or ECE 3280

---

#### **CMP\_SC 4280: Network Systems Architecture**

(same as ECE 4280; cross-leveled with CMP\_SC 7280, ECE 7280). The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer.

**Credit Hours:** 4

**Prerequisites:** C- or higher in CMP\_SC 2050 or ECE 3220 and C- or higher in CMP\_SC 3280 or ECE 3210

---

#### **CMP\_SC 4320: Software Engineering I**

(cross-leveled with CMP\_SC 7320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 3380

---

#### **CMP\_SC 4320W: Software Engineering I - Writing Intensive**

(cross-leveled with CMP\_SC 7320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.

---

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 3380

---

**CMP\_SC 4330: Object Oriented Design I**

(cross-leveled with CMP\_SC 7330). Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3330

---

**CMP\_SC 4350: Big Data Analytics**

(cross-leveled with CMP\_SC 7350). Big Data Analytics represents a new era of computing, where data in any format maybe processed and exploited to extract insights for industries and organizations to make informed decisions, whether that data is in-place, in-motion or at-rest, in large volume, structured or unstructured. More and more companies are embracing open source Big Data technologies, such as Hadoop and extending it into an enterprise ready Big Data Platform. This course will cover advanced analytics technologies and techniques that enable industries to extract insights from data with sophistication, speed and accuracy. You will learn practical industry best practices to bridge the gap between classroom learning and real world; and have access to cloud services for labs/projects.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3330 and CMP\_SC 3380

---

**CMP\_SC 4380: Database Management Systems I**

(cross-leveled with CMP\_SC 7380). Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3380

---

**CMP\_SC 4405: iOS App Development I**

(same as INFOTC 4405). This is a first in a series of courses on developing iOS applications using Xcode, and the Swift programming language on the macOS platform.

**Credit Hours:** 3

**Prerequisites:** INFOTC 1040 or CMP\_SC 1050, or consent of instructor

**Recommended:** Prior experience programming in any programming language. The student should understand basic language concepts such as variables, data structures, control structures, and functions

---

**CMP\_SC 4410: Theory of Computation I**

(cross-leveled with CMP\_SC 7410). An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3

**Prerequisites:** C- or higher in MATH 2320

---

---

**CMP\_SC 4430: Compilers I**

(cross-leveled with CMP\_SC 7430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3

**Prerequisites:** C- or higher in MATH 2320, CMP\_SC 3280 and CMP\_SC 4450

---

**CMP\_SC 4440: Malware Analysis and Defense**

(cross-leveled with CMP\_SC 7440). Malicious software or 'malware' is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and teaches ethical issues surrounding computer security violations.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3280 or ECE 3210

---

**CMP\_SC 4450: Principles of Programming Languages**

(cross-leveled with CMP\_SC 7450). An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050

---

**CMP\_SC 4460: Introduction to Cryptography**

(cross-leveled with CMP\_SC 7460). Cryptography is an important technique used to achieve security goals in an untrusted and possibly adversarial environment. The goals of this course are: (1) to provide students with a solid background with basic cryptographic techniques and their applications, (2) to impart knowledge of standard cryptographic algorithms and (3) to foster understanding of the correct use of cryptographic techniques.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3050 and MATH 2320

---

**CMP\_SC 4520: Operating Systems I**

(cross-leveled with CMP\_SC 7520). Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 3050, CMP\_SC 3280 and MATH 1700

---

**CMP\_SC 4530: Cloud Computing**

(cross-leveled with CMP\_SC 7530). This course covers principles that integrate computing theories and information technologies with the design, programming and application of distributed systems. The

course topics will familiarize students with distributed system models and enabling technologies; virtual machines and virtualization of clusters, networks and data centers; cloud platform architecture with security over virtualized data centers; service-oriented architectures for distributed computing; and cloud programming and software environments.

Additionally, students will learn how to conduct some parallel and distributed programming and performance evaluation experiments on applications within available cloud platforms. Finally we will survey research literature and latest technology trends that are shaping the future of high performance, distributed and cloud computing.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3330 or instructor's consent

---

#### **CMP\_SC 4540: Neural Models and Machine Learning**

(same as ECE 4540, BME 4540, BIOL\_EN 4540; cross-leveled with CMP\_SC 7540, ECE 7540, BIOL\_EN 7540). The projects-based course has three inter-linked components: (I) math models of neurons and neural networks, (II) machine learning in neuroscience, after a brief introduction to python and (III) software automation and cyberinfrastructure to support neuroscience. Extensive projects focusing on software automation and machine learning components, with brief in-class presentations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500 or consent of instructor

**Recommended:** Introductory software programming, and introductory cell biology or consent of instructor

---

#### **CMP\_SC 4590: Computational Neuroscience**

(same as BIO\_SC 4590, BIOL\_EN 4590, ECE 4590, BME 4590; cross-leveled with BIO\_SC 7590, ECE 7590, BIOL\_EN 7590). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** MATH 1500 or equivalent

---

#### **CMP\_SC 4610: Computer Graphics I**

(cross-leveled with CMP\_SC 7610). Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3050 and MATH 1500 or C- or higher in CMP\_SC 3050 and MATH 1300 and MATH 1400

---

#### **CMP\_SC 4620: Physically Based Modeling and Animation**

(cross-leveled with CMP\_SC 7620). This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 4610

**Recommended:** Good knowledge of C or C++ programming, no physics background necessary

---

#### **CMP\_SC 4630: Game Development**

(same as INFOTC 4630). The course focuses on rapid game prototyping and development utilizing the Unity game engine and C#. tools. You will learn the fundamentals of game programming and also a platform which is actually used to make published games across multiple platforms (Mac, PC, web, iOS, Android etc). Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOTC 3630 or CMP\_SC 2050 with a C- or Higher

---

#### **CMP\_SC 4650: Digital Image Processing**

(same as ECE 4655; cross-leveled with CMP\_SC 7650, ECE 7655). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 and STAT 4710 or instructor's consent

---

#### **CMP\_SC 4670: Digital Image Compression**

(same as ECE 4675; cross-leveled with ECE 7675, CMP\_SC 7670). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050

---

#### **CMP\_SC 4720: Introduction to Machine Learning and Pattern Recognition**

(same as ECE 4720; cross-leveled with ECE 7720, CMP\_SC 7720) This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 and STAT 4710 or instructor consent

---

#### **CMP\_SC 4730: Building Intelligent Robots**

(same as ECE 4340; cross-leveled with CMP\_SC 7730, ECE 7340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.

**Credit Hours:** 4

**Prerequisites:** junior standing

**Recommended:** programming experience in one of the following programming languages - Basic, C, C++, or Java

---

---

**CMP\_SC 4740: Interdisciplinary Introduction to NLP**

(same as LINGST 4740; cross-leveled with CMP\_SC 7740; LINGST 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.

**Credit Hours:** 3

**Prerequisites:** senior standing

---

**CMP\_SC 4750: Artificial Intelligence I**

(cross-leveled with CMP\_SC 7750). This course is intended to be a general introduction to the field of Artificial Intelligence (AI). It will provide exposure to a range of core AI topics including intelligent agent, problem solving by search and game playing, constraint satisfaction problems, propositional and first-order logic, probability in AI, and machine learning. The topics covered in this course are closely related to the common core of Computing & Information education -- about C&I know-how and the ways of thinking and problem solving that characterize C&I community: a system view of the world, a focus on mathematical and computational representation of systems, information representation and transformation, and so forth.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 3050 and junior standing

---

**CMP\_SC 4770: Introduction to Computational Intelligence**

(same as ECE 4870; cross-leveled with CMP\_SC 7770, ECE 7870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

**Credit Hours:** 3

---

**CMP\_SC 4830: Web Application Development II**

(same as INFOTC 4830; cross-leveled with CMP\_SC 7830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2830

---

**CMP\_SC 4850: Computer Networks I**

(cross-leveled with CMP\_SC 7850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 2270 or ECE 2210 and C- or higher in MATH 2320

---

**CMP\_SC 4910: Digital Forensics**

(same as INFOTC 4910). This course introduces an overview of basic Digital Forensics procedures and techniques to enable students to perform a digital investigation of physical storage media and volume analysis, including preservation, analysis and acquisition of artifacts that resides in hard disk and random access memory, for Linux and Windows systems. Work is completed in Unix/Linux environments and in Microsoft Windows environment. Students will need to setup a virtual

private infrastructure to perform multiple tasks. The course emphasizes 'learning by doing' and has a 90% hands-on and 10% theory. Much of this information consists of skills and abilities that employers want and expect in the real world of IT - in a small to medium size organization. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOTC 2910 and INFOTC 3910

---

**CMP\_SC 4970: Senior Capstone Design I**

Communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 4320 and senior standing

---

**CMP\_SC 4970W: Senior Capstone Design I - Writing Intensive**

Communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 4320 and senior standing

---

**CMP\_SC 4980: Senior Capstone Design II**

Course entails completion of CMP\_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 4970

---

**CMP\_SC 4990: Undergraduate Research in Computer Science**

Independent investigation or project in Computer Science. May be repeated to 6 hours.

**Credit Hour:** 0-6

**Prerequisites:** senior standing in Computer Science

---

**CMP\_SC 4995: Undergraduate Research in Computer Science - Honors**

Independent investigation to be presented as an undergraduate honors thesis.

**Credit Hour:** 1-6

**Prerequisites:** honors student in Computer Science

---

**CMP\_SC 7001: Topics in Computer Science**

Topic and credit may vary from semester to semester. May be repeated upon consent of department.

**Credit Hour:** 1-99

---

**CMP\_SC 7010: Computational Methods in Bioinformatics**

(same as INFOINST 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem,

design of scoring functions and algorithms, confidence assessment of prediction results and software development.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4050 and STAT 4710

---

#### **CMP\_SC 7050: Design and Analysis of Algorithms I**

(cross-leveled with CMP\_SC 4050). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3050 and MATH 2320

---

#### **CMP\_SC 7060: String Algorithms**

(cross-leveled with CMP\_SC 4060). This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4050

---

#### **CMP\_SC 7070: Numerical Methods for Science and Engineering**

(cross-leveled with CMP\_SC 4070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 or instructor's consent

**Recommended:** Students are expected to have basic knowledge in discrete math and algorithms

---

#### **CMP\_SC 7080: Parallel Programming for High Performance Computing**

(cross-leveled with CMP\_SC 4080). This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3280 or ECE 3210 and CMP\_SC 3050 or ECE 3220

---

#### **CMP\_SC 7270: Computer Architecture**

(same as ECE 7270; cross-leveled with CMP\_SC 4270, ECE 4270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

**Credit Hours:** 4

**Prerequisites:** C or higher in CMP\_SC 2050 and CMP\_SC 3280 or ECE 3280

---

#### **CMP\_SC 7320: Software Engineering I**

(cross-leveled with CMP\_SC 4320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3380

---

#### **CMP\_SC 7330: Object Oriented Design I**

(cross-leveled with CMP\_SC 4330). Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3330

---

#### **CMP\_SC 7350: Big Data Analytics**

(cross-leveled with CMP\_SC 4350). Big Data Analytics represents a new era of computing, where data in any format maybe processed and exploited to extract insights for industries and organizations to make informed decisions, whether that data is in-place, in-motion or at-rest, in large volume, structured or unstructured. More and more companies are embracing open source Big Data technologies, such as Hadoop and extending it into an enterprise ready Big Data Platform. This course will cover advanced analytics technologies and techniques that enable industries to extract insights from data with sophistication, speed and accuracy. You will learn practical industry best practices to bridge the gap between classroom learning and real world; and have access to cloud services for labs/projects.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3330 and CMP\_SC 3380

---

#### **CMP\_SC 7380: Database Management Systems I**

(cross-leveled with CMP\_SC 4380). Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050

---

---

**CMP\_SC 7410: Theory of Computation I**

(cross-leveled with CMP\_SC 4410). An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD.

**Credit Hours:** 3

**Prerequisites:** MATH 2320

---

**CMP\_SC 7430: Compilers I**

(cross-leveled with CMP\_SC 4430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for blockstructured languages, and run-time storage organization. May not be counted toward CS MS/PHD.

**Credit Hours:** 3

**Prerequisites:** MATH 2320 and CMP\_SC 3280 and CMP\_SC 4450

---

**CMP\_SC 7440: Malware Analysis and Defense**

(cross-leveled with CMP\_SC 4440). Malicious software or 'malware' is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and ethical issues surround computer security violations.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3280, ECE 3210 or equivalent

---

**CMP\_SC 7450: Principles of Programming Languages**

(cross-leveled with CMP\_SC 4450). An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050

---

**CMP\_SC 7460: Introduction to Cryptography**

(cross-leveled with CMP\_SC 4460). Cryptography is an important technique used to achieve security goals in an untrusted and (possibly) adversarial environment. The goals of this course are: (1) to provide students with a solid back-ground with basic cryptographic techniques and their applications, (2) impart knowledge of standard cryptographic algorithms and (3) foster understanding of the correct use of cryptographic techniques.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3050 and MATH 2320

---

**CMP\_SC 7520: Operating Systems I**

(cross-leveled with CMP\_SC 4520). Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 3050, CMP\_SC 3280 and MATH 1700

---

**CMP\_SC 7530: Cloud Computing**

(cross-leveled with CMP\_SC 4530). This course covers principles that integrate computing theories and information technologies with the design, programming and application of distributed systems. The course topics will familiarize students with distributed system models and enabling technologies; virtual machines and virtualization of clusters, networks and data centers; cloud platform architecture with security over virtualized data centers; service-oriented architectures for distributed computing; and cloud programming and software environments. Additionally, students will learn how to conduct some parallel and distributed programming and performance evaluation experiments on applications within available cloud platforms. Finally we will survey research literature and latest technology trends that are shaping the future of high performance, distributed and cloud computing.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3330 or instructor's consent

---

**CMP\_SC 7540: Neural Models and Machine Learning**

(same as ECE 7540, BIOL\_EN 7540; cross-leveled with ECE 4540). The projects-based course has three inter-linked components: (I) math models of neurons and neural networks, (II) machine learning in neuroscience, after a brief introduction to python and (III) software automation and cyberinfrastructure to support neuroscience. Extensive projects focusing on software automation and machine learning components, with brief in-class presentations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500 or consent of instructor

**Recommended:** Introductory software programming, and introductory cell biology or consent of instructor

---

**CMP\_SC 7590: Computational Neuroscience**

(same as BIOL\_EN 7590, BIO\_SC 7590, ECE 7590; cross-leveled with BIO\_SC 4590). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** MATH 1500 or equivalent

---

**CMP\_SC 7610: Computer Graphics I**

(cross-leveled with CMP\_SC 4610). Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3050 and either MATH 1500 or MATH 1300 and MATH 1400

---

**CMP\_SC 7620: Physically Based Modeling and Animation**

(cross-leveled with CMP\_SC 4620). Introduces fundamental algorithms and techniques including interpolation, quaternions, rigid body dynamics,

kinematics, particle systems, free form and dynamic deformations, spring and damper systems and computational natural phenomena simulation.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4610 or CMP\_SC 7610

**Recommended:** Good knowledge of C or C++ programming, no physics background necessary

---

**CMP\_SC 7650: Digital Image Processing**

(same as ECE 7655; cross-leveled with CMP\_SC 4650, ECE 4655). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050, STAT 7710 or instructor's consent

---

**CMP\_SC 7670: Digital Image Compression**

(same as ECE 7675; cross-leveled with CMP\_SC 4670, ECE 4675). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050

---

**CMP\_SC 7720: Introduction to Machine Learning and Pattern Recognition**

(same as ECE 7720; cross-leveled with CMP\_SC 4720, ECE 4720). This course provides foundation knowledge and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050 and STAT 4710 or instructor's consent

---

**CMP\_SC 7730: Building Intelligent Robots**

(same as ECE 7340; cross-leveled with CMP\_SC 4730, ECE 4730). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: programming experience in one of the following programming languages: Basic, C, C++, or Java.

**Credit Hours:** 4

---

**CMP\_SC 7740: Interdisciplinary Introduction to Natural Language Processing**

(same as LINGST 7740; cross-leveled with CMP\_SC 4740; LINGST 4740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of text.

**Credit Hours:** 3

---

**CMP\_SC 7750: Artificial Intelligence I**

(cross-leveled with CMP\_SC 4750). This course is intended to be a general introduction to the field of Artificial Intelligence (AI). It will provide exposure to a range of core AI topics including intelligent agent, problem

solving by search and game playing, constraint satisfaction problems, propositional and first-order logic, probability in AI, and machine learning. The topics covered in this course are closely related to the common core of Computing & Information education -- about C&I know-how and the ways of thinking and problem solving that characterize C&I community: a system view to the world, a focus on mathematical and computational representation of systems, information representation and transformation, and so forth.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3050

---

**CMP\_SC 7770: Introduction to Computational Intelligence**

(same as ECE 7870; cross-leveled with CMP\_SC 4770, ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

**Credit Hours:** 3

---

**CMP\_SC 7830: Web Application Development II**

(cross-leveled with CMP\_SC 4830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 3330 and CMP\_SC 2830

---

**CMP\_SC 7850: Computer Networks I**

(cross-leveled with CMP\_SC 4850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2270 or ECE 1210 and MATH 2320

---

**CMP\_SC 8001: Advanced Topics in Computer Science**

Topic may vary from semester to semester. May be repeated upon consent of department.

**Credit Hours:** 3

**Prerequisites:** varies by topic

---

**CMP\_SC 8050: Design and Analysis of Algorithms II**

Techniques for the design and analysis of correct, efficient algorithms. Topics include graph, geometric, and algebraic/ numeric algorithms, NP-completeness, and parallel algorithms.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4050

---

**CMP\_SC 8060: Survey of Advanced Algorithm Techniques**

This class provides a survey of important algorithmic techniques, some of which are emerging right now, and show that they are much easier to understand than they first appear. The class will create a renewed appreciation for what makes Computer Science such a fun/interesting discipline.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4050

---

**CMP\_SC 8085: Problems in Computer Science**

Independent study project work with a professor in computer science.

**Credit Hour:** 1-4

**Prerequisites:** instructor consent

---

**CMP\_SC 8130: Computational Genomics**

(same as INFOINST 8310). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOINST 7010 or CMP\_SC 7010

---

**CMP\_SC 8150: Integrative Methods in Bioinformatics**

(same as INFOINST 8150). Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOINST 7010 or CMP\_SC 7010

---

**CMP\_SC 8160: Content Management in Biomedical Informatics**

(same as INFOINST 8860). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 7380, INFOINST 7010

---

**CMP\_SC 8170: Computational Modeling of Molecular Structures**

This course uses a problem solving paradigm to investigate common principles, data structures, algorithms, challenges, and solutions in computationally modeling (constructing) 3D structures of proteins, RNAs, chromosomes, and genomes.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 7010

---

**CMP\_SC 8180: Machine Learning Methods for Biomedical Informatics**

(same as INFOINST 8880). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 7050 and INFOINST 7010 or CMP\_SC 7010 or INFOINST 7005

---

**CMP\_SC 8190: Computational Systems Biology**

(same as INFOINST 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** INFOINST 7010 or CMP\_SC 7010; INFOINST 8010

---

**CMP\_SC 8370: Data Mining and Knowledge Discovery**

Course topics include an introduction to fundamental concepts, data mining techniques from machine learning and pattern recognition areas, association rules, web mining, spatial mining, temporal mining, multimedia/multimodal database mining, and database mining, and geospatial information mining.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 7380

---

**CMP\_SC 8440: Information Security: A Language-Based Approach**

This course focuses on language-based techniques for information flow security. Students will gain a solid background in information security, be encouraged to do further research and be exposed to important/promising trends in state-of-the-art computer security.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4450 or CMP\_SC 7450

---

**CMP\_SC 8450: Formal Engineering Methods for Software and Security**

Designing scalable exhaustive methods to ensure reliability of computer systems is an important challenge in computer science as even simple errors can have serious socio-economic-political consequences. This challenge is the focus of the field of automated verification techniques which draws techniques from complexity theory, automata theory, programming languages and logic, and provides tools to ensure that the computer systems are reliable. Computer-assisted techniques for verifying hardware implementations are regularly employed in the industry, and are also being increasingly adopted in the software industry as the costs of software bugs and security flaws escalate. The goals of this course are: (1) to provide students with a solid background in the fundamental techniques used in this field, (2) to encourage further research in software and security verification, and (3) to introduce students to important upcoming trends in verifying security protocols. The students will get theoretical background as well as learn to use some standard tools in this field. Students will also explore topics of particular interest to them through the performance of a significant semester project.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4450 or CMP\_SC 7450 or CMP\_SC 4430 or CMP\_SC 7430 or instructor's consent. A reasonable level of mathematical maturity and significant programming experience is expected

---

**CMP\_SC 8530: Cloud Computing II**

This course covers advanced principles of distributed system models and enabling technologies relating to cloud computing; latest advances in management and security of virtual machines and virtualization of clusters, networks, and data centers will be studied; additionally, students

will survey research literature and perform cloud programming as well as performance evaluation experiments on applications within available cloud platforms. Students will learn project-based: problem solving, collaborative programming, technical writing and presentation skills. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4530 or CMP\_SC 7530 or instructor's consent

---

#### **CMP\_SC 8570: Neural Dynamics and Communication**

(same as ECE 8570). Properties of nerve cells including membrane potential, action potential, ion channel dynamics, GHK equation, dynamical properties of excitable membranes, neuronal communication and plasticity. Entrainment, synchronization and oscillations in neuronal networks, and their functional significance. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4590/CMP\_SC 4590 or consent of instructor

---

#### **CMP\_SC 8580: Machine Learning in Neuroscience**

(same as ECE 8580). Basics of neuronal and network dynamics including spikes and communication between regions, including via competing hypotheses. Machine learning fundamentals including linear, logistic and artificial neural network mappings. Integration of data-driven and theory-driven models, with emphasis on insights into neuroscience via XAI approaches. Software automation in neuroscience including python notebooks and cyberinfrastructure tools for interacting with software repositories and HPC resources. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4590/CMP\_SC 4590 or consent of instructor

---

#### **CMP\_SC 8610: Computer Graphics II**

Further study of computer graphics, focused on 3-D graphics, transformations, geometric and surface modeling, color models, visible surface determination, lighting and shading, standard graphics software (Phigs/OpenGL). Selected current topics in graphics such as visualization, animation and realism.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 7610

---

#### **CMP\_SC 8620: Physically Based Modeling and Animation II**

This course introduces students to physical based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4610 or CMP\_SC 7610

---

#### **CMP\_SC 8630: Data Visualization**

Data visualization broadly covers transforming multidimensional and timevarying datasets to dynamic visual representations and encodings that facilitate exploratory data mining, knowledge discovery, improved understanding, summarization, structural modeling, collaboration and decision making using interactive methods.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4610 or CMP\_SC 7610 or instructor's consent

---

#### **CMP\_SC 8650: Advanced Image Processing**

(same as ECE 8855). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4650 or CMP\_SC 7650 or instructor's consent

---

#### **CMP\_SC 8660: Multimedia Security**

This course offers a comprehensive coverage of the theoretical foundation of multimedia security technologies, including encryption, authentication, digital watermarking, key management, copy control, fingerprinting/tracing, digital media forensics, and biometrics, provides an in-depth study of the state-of-the-art digital rights management systems and the underlying security technologies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4670 or CMP\_SC 4650; instructor's consent

---

#### **CMP\_SC 8675: Biomedical Image Processing**

(same as ECE 8675). This course introduces students to the fundamentals of biomedical image processing and analysis with an emphasis on cellular and tissue microscopy along with anatomical imaging. The course will cover image and video processing techniques and pipelines for image enhancement, restoration, registration, detection, segmentation, classification, and motion analysis that are tailored for biomedical image informatics. This course will provide a rich exposure to a broad range of imaging datasets from the molecular to the anatomical; and train students to implement algorithms for moderately complex tasks in biomedical image analysis. This course is suitable for graduate students in all fields of engineering and science who are interested in understanding and implementing biomedical and biological image analytics and are seeking pointers to the broad literature in the field.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4650 or CMP\_SC 7650, ECE 4655 or ECE 7655 or instructor's consent

---

#### **CMP\_SC 8680: 3-D Computer Vision**

This course introduces students to a central problem in computer vision - how to recover 3-D structure and motion from a collection of 2-D images, using techniques drawn mainly from linear algebra and matrix theory. The main focus is on developing a unified framework for studying the geometry of multiple images of a 3-D scene and reconstructing geometric models from those images. The course also covers relevant aspects of image formation, basic image processing, and feature extraction.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4650 or CMP\_SC 7650

**Recommended:** Good knowledge of C or C++ programming, linear algebra and data structures

---

#### **CMP\_SC 8690: Computer Vision**

(same as ECE 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4655 or ECE 7655 or CMP\_SC 4650 or CMP\_SC 7650 or instructor's consent

---

**CMP\_SC 8725: Supervised Learning**

(same as ECE 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4720 or CMP\_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

---

**CMP\_SC 8735: Unsupervised Learning**

(same as ECE 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4720 or CMP\_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

---

**CMP\_SC 8740: Advanced Natural Language Processing**

What do Google, the New York Times, Facebook, Cerner, and other big companies know that you don't? Natural language processing. This course considers open and compelling problems in contemporary research in the processing and analysis of text, focusing on both the underlying theory and its practical application. The goal is to help students understand the nature of these problems, the current approaches to them, the strengths and weaknesses of those approaches, and other possible ways forward.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4740 or CMP\_SC 7740

**Recommended:** CMP\_SC 2050; students should be facile in programming at least one high-level language. Good knowledge of univariate, parametric statistics

---

**CMP\_SC 8750: Artificial Intelligence II**

Further discussion of theories and techniques of artificial intelligence. Investigating state-of-the-art systems with capabilities to perceive, reason, learn and react intelligently to their environment.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4750 or CMP\_SC 7750 or instructor's consent

---

**CMP\_SC 8770: Neural Networks**

(same as ECE 8890). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4870 or CMP\_SC 7870 or instructor's consent

---

**CMP\_SC 8780: Advanced Topics in Computational Intelligence**

(same as ECE 8875). This course is a continuation of ECE 7870/ CMP\_SC 7770 Introduction to Computational Intelligence in the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation, and swarm intelligence. Advanced topics in these areas will be discussed with a focus on applications of these technologies.

**Credit Hours:** 3

**Prerequisites:** ECE 4870 or ECE 7870 or CMP\_SC 4770 or CMP\_SC 7770

---

**CMP\_SC 8790: Filtering, Tracking and Data Fusion**

This course will cover theory and applications of rigorous and efficient techniques for determining the state of an observed system from a series of imperfect observations or measurements. Specific topics to be covered include semidefinite matrix theory, the Kalman filter, the Unscented Transform, Covariance Intersection and related techniques. Applications of these techniques include head and hand tracking in virtual reality systems, robotics, and distributed information fusion.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050, MATH 2300 or Linear Algebra or Matrix Theory

---

**CMP\_SC 8850: Computer Networks II**

In-depth analysis and evaluation of computer networking architectures, protocols and algorithms, network security, distributed database and computational networks, routing and congestion control, domains and internetworking.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 7850

---

**CMP\_SC 8860: Parallel and Distributed Processing**

This course covers basic issues of parallel and distributed processing, including parallel and distributed architectures and models, parallel programming, and parallel algorithms and applications.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4050

---

**CMP\_SC 8870: Modeling and Management of Uncertainty**

(same as ECE 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4870 or ECE 7870 or CMP\_SC 4770 or CMP\_SC 7770 or instructor's consent

---

**CMP\_SC 8980: Research Masters Project in Computer Science**

Investigation and research of a topic, not leading to a thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

**CMP\_SC 8990: Research-Masters Thesis Computer Science**

Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** advisor's consent

---

**CMP\_SC 9990: Research-Doctoral Dissertation Computer Science**

Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** advisor's consent

---

**Constitutional Democracy Courses****CNST\_DEM 2004: Topics in Constitutional Democracy - Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-6

---

**CNST\_DEM 2100: The Revolutionary Transformation of Early America**

(same as HIST 2100). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing 'the causes which impelled' the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.

**Credit Hours:** 3

---

**CNST\_DEM 2100H: The Revolutionary Transformation of Early America - Honors**

(same as HIST 2100H). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing 'the causes which impelled' the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**CNST\_DEM 2120: The Young Republic**

(same as CNST\_DEM 2120). This course examines the early years of the United States under the (then) new Constitution, an important historical period with which present-day Americans are increasingly unfamiliar. Our focus will be on abandoning our preconceptions about the nation's early history and thoroughly understanding the choices that were posed and made in the years after 1789 and that would determine what type of nation the U.S. would become.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**CNST\_DEM 2120H: The Young Republic - Honors**

(same as HIST 2120H). This course examines the early years of the United States under the (then) new Constitution, an important historical period with which present-day Americans are increasingly unfamiliar. Our focus will be on abandoning our preconceptions about the nation's early history and thoroughly understanding the choices that were posed and made in the years after 1789 and that would determine what type of nation the U.S. would become.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**CNST\_DEM 2150: The American Civil War: A Global History**

(same as HIST 2150). In this class students will study the American Civil War from the perspective of global history. The familiar actors and events will be covered - the debate over slavery, the secession of the South, the rise of Abraham Lincoln, the great battles and generals, etc. But these familiar episodes will take on different meanings when viewed in relation to global structures of politics, economics, social relations, and ideology. The 1860s was at once a formative moment in the history of globalization and the key decade for the formation and consolidation of modern nations.

**Credit Hours:** 3

---

**CNST\_DEM 2210: Twentieth Century America**

(same as HIST 2210). Survey of American development from 1900 to present. For students who have not taken advanced courses in American history, especially HIST 4210, HIST 4220, or HIST 4230.

**Credit Hours:** 3

---

**CNST\_DEM 2425: Race and the American Story**

(same as BL\_STU 2425, POL\_SC 2425). This course represents a collaboration between the University of Missouri's Department of Black Studies and the Kinder Institute on Constitutional Democracy. Building upon the existing Citizenship@Mizzou program, the course aims to carry forward the goals of the Citizenship program and to further solidify and magnify its impact on campus. In so doing, the course will also serve as a model for improving diversity education on campuses across the country and contribute to a more informed and unified national culture. The core syllabus will consist in readings that tell the story of the confrontation between American political principles and the practice of racial injustice throughout our history. Students will read and discuss the Declaration of Independence, the slavery clauses in the Constitution, the poetry of Phillis Wheatley, and the speeches of Frederick Douglass, Abraham Lincoln, and Martin Luther King, Jr., among others. They will achieve a greater understanding of how diversity relates to humanity, and will learn to dialogue productively and civilly with others who may not share their background or opinions.

**Credit Hours:** 3

---

**CNST\_DEM 2445: American Constitutional Democracy**

(same as POL\_SC 2445, HIST 2445). This course offers an introduction to American constitutional democracy. On the one hand, this course will strive to set the development of America's constitutional democracy into its historical context and to explain it in relation to larger social, political, military, and economic events. A second emphasis is on the nature and character of the American democratic system. Graded on A-F basis only.

**Credit Hours:** 3

---

**CNST\_DEM 2450: The Intellectual World of the American Founders**

(same as POL\_SC 2450). This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.

**Credit Hours:** 3

---

**CNST\_DEM 2450H: The Intellectual World of the American Founders - Honors**

(same as POL\_SC 2450H). This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**CNST\_DEM 2455: Constitutional Debates**

(same as POL\_SC 2455). While we will make reference to the work of canonical political thinkers from the Western tradition during the semester - and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in 'high theory.' Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framer-worship. While we will discuss why the Federalists ultimately 'won the day,' we will also devote significant attention to how the Anti-Federalists both profoundly influenced how we understand constitutional democracy in the United States and provided an intellectual lineage that still informs contemporary political debate. We will, that is, give each side their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left un-answered and some of the problems that it left un-solved.

**Credit Hours:** 3

---

**CNST\_DEM 2455H: Constitutional Debates - Honors**

(same as POL\_SC 2455H). While we will make reference to the work of canonical political thinkers from the Western tradition during the semester--and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in 'high theory'. Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framer-worship. While we will discuss why the Federalists ultimately 'won the day,' we will also devote significant attention to how the Anti-Federalists both profoundly influenced how we understand constitutional democracy in the United States and provided an intellectual lineage that still informs contemporary political debate. We will, that is, give each side their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left un-answered and some of the problems that it left un-solved.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required; POL\_SC 1100

---

**CNST\_DEM 2570: The First World War and its Aftermath**

(same as HIST 2570). This course examines the experience of Europeans in the turbulent years during and immediately following the First World War. After investigating the origins and nature of WWI, we will then examine the political, social and cultural climate of the interwar years.

**Credit Hours:** 3

---

**CNST\_DEM 2800: Liberty, Justice and the Common Good**

(same as POL\_SC 2800). Selected great political theorists and their contemporary relevance. How to think critically about political ideas and ideologies.

**Credit Hours:** 3

---

**CNST\_DEM 4000: Age of Jefferson**

(same as HIST 4000). Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.

**Credit Hours:** 3

---

**CNST\_DEM 4040: Slavery and the Crisis of the Union: The American Civil War Era**

(same as BL\_STU 4040, HIST 4040; cross-leveled with HIST 7040). This class explores the history of the Civil War era, a transformative

moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime 'nationalisms' that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, 'total' warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a 'second American revolution'? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least, how did the triumph of the Union condition the political and economic development of a rapidly globalizing world?

**Credit Hours:** 3

---

**CNST\_DEM 4075: Global History in Oxford**

(same as HIST 4075). This course examines global and transnational history in the 'modern' period since 1400. It includes an embedded week of study abroad at Oxford University (United Kingdom) over spring break.

**Credit Hours:** 4

---

**CNST\_DEM 4080: American Foreign Policy from Colonial Times to 1898**

(same as HIST 4080, PEA\_ST 4080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.

**Credit Hours:** 3

---

**CNST\_DEM 4100: American Cultural and Intellectual History to 1865**

(same as HIST 4100). Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.

**Credit Hours:** 3

---

**CNST\_DEM 4130: African-American Politics**

(same as POL\_SC 4130, BL\_STU 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

**Credit Hours:** 3

---

**CNST\_DEM 4400: History of American Law**

(same as HIST 4400). American law from English origins to present. Reviews common law, codification, legal reform movements, slavery law, administrative state, formalism, legal realism, jurisprudential questions concerning rule of law.

**Credit Hours:** 3

**Recommended:** HIST 1100, HIST 1200, or HIST 1400

---

**CNST\_DEM 4800: Political Thought in Classical and Christian Antiquity**

(same as POL\_SC 4800, AMS 4800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations.

**Credit Hours:** 3

**Recommended:** AMS 1060 and junior standing

---

**CNST\_DEM 4810: Modern Political Theory**

(same as POL\_SC 4810). Great political theorists from Machiavelli through Marx on the nation state, capitalism, liberalism, conservatism, and Marxism.

**Credit Hours:** 3

---

**CNST\_DEM 4830: Democracy in America (and Elsewhere)**

(same as POL\_SC 4830). This course focuses on the dynamics of democracy. We will explore various topics in the history, development, and practice of democracy through an examination of the writings of Alexis de Tocqueville, one of the most insightful and prescient observers of American political culture.

**Credit Hours:** 3

**Prerequisites:** POL\_SC 1100

---

**CNST\_DEM 4840: Developing Dynamics of Democracy**

(same as POL\_SC 4840). This course examines developments in the theory and practice of democracy from the ancient Greeks to the present. Beginning with the origins of democracy in the Hellenic city states, we consider the transformation of democratic concepts in the classical liberal period, review the development of democratic institutions in the United States and Europe, examine the emergence of supra-national democratic institutions such as the European Union, and assess the future of democratization in the 21st century.

**Credit Hours:** 3

**Prerequisites:** POL\_SC 1100

---

**CNST\_DEM 4850: Scots and the Making of America**

(same as POL\_SC 4850). This class is on the influence of the Scottish Enlightenment on the founding of the United States. The Scottish Enlightenment refers to uniquely Scottish advances in social, political, scientific and literary thought that transpired in the 18th and early 19th centuries. This line of thought, especially in its social and political dimensions, was especially influential in shaping the founding of the United States.

**Credit Hours:** 3

**Prerequisites:** POL\_SC 1100

---

**CNST\_DEM 4900: Beltway History and Politics: American Constitutional Democracy in Theory and Practice**

(same as HIST 4900, POL\_SC 4900). This course is an experiential overview of American political history for students participating in the Kinder Forum's Washington internship program, showing how American constitutional democracy was developed and implemented right here on the Potomac, as much as possible in the actual places where the events occurred. Emphasis will be placed on the interplay between

constitutional theory and actual political experience over time, and the tensions and institutional changes that emerged as Americans and their government coped with cataclysmic social changes, unparalleled economic development, and fearsome international challenges.

**Credit Hours:** 3

---

**CNST\_DEM 4975: Journal on Constitutional Democracy**

(same as HIST 4975, POL\_SC 4975). The Journal is sponsored by the Kinder Institute on Constitutional Democracy and staffed by current and former participants in the Institute's undergraduate Society of Fellows program. Each volume of the Journal is organized around a student-selected idea or era central to the historical development and philosophical foundations of constitutional democracy in the United States. Student-authored essays address this theme via arguments and historical overviews crafted from the close reading and analysis of primary source documents, with the exception being that participating in the Journal will relate back to and advance students' study of American political thought and history.

**Credit Hour:** 1-3

---

**CNST\_DEM 4996: Thesis in Constitutional Democracy**

At the end of their junior year, students majoring in Constitutional Democracy can apply to be a part of one of two, ten-person thesis cohorts who enroll in CNST\_DEM 4996 during the following fall semester (for two credit hours) and the following spring semester (for one credit hour). Students will complete their thesis over the course of this year by hitting certain writing benchmarks along the way and meeting on a consistent basis with their individual advisors as well as their thesis cohort and course instructor. Course meetings will happen once per month during both the fall and spring semesters, at a to be determined time that fits with all thesis cohort members. Graded on A-F basis only.

**Credit Hour:** 1-2

---

**CNST\_DEM 7004: Topics in Constitutional Democracy - Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-6

---

**CNST\_DEM 8041: The Making of the Atlantic World**

(same as HIST 8041). Commerce, colonization, enslavement, and warfare connected western Europe, West Africa, and the Americas into an Atlantic world from the fifteenth to the eighteenth century. This course introduces students to several key themes in the scholarship of the Atlantic world: contact and imperial conquest, migration, slavery, servitude, and race, and the interaction of law and society. We will focus on the British Atlantic, and also engage with other framings, including the Iberian and African Atlantics. Graded on A-F basis only.

**Credit Hours:** 3

---

**CNST\_DEM 8042: From the Age of Revolutions to the Age of Nation-States, 1760-1900**

(same as HIST 8042). This course will immerse students in the history and historiography of the nineteenth century Atlantic World. The key arc that students will trace is the move from the age of revolutions to

the formation of modern, bureaucratic nation-states, a process which unfolded across the Atlantic basin. Graded on A-F basis only.

**Credit Hours:** 3

---

**CNST\_DEM 8045: Atlantic History and Politics**

(same as HIST 8045). In this interdisciplinary graduate course, students will examine some of the most significant texts of the Atlantic world c. 1750-present. They will track the evolution of ideas of liberty, natural rights, politics, and empire that have conditioned the historical development of the Atlantic basin. Graded on A-F basis only.

**Credit Hours:** 3

---

**CNST\_DEM 8050: Britain and the World**

(same as HIST 8050). In this course students will engage with the rich and dynamic global history of Great Britain. The core of the course will be daily guest lectures delivered by faculty members of Oxford University. The course also includes three excursions to sites of historical significance within England. Graded on A-F basis only.

**Credit Hours:** 3

---

**CNST\_DEM 8060: Kinder Institute Colloquia**

(same as HIST 8060). In this year-long course, students will actively participate in the regular events put on by the Kinder Institute on Constitutional Democracy. The core of the course will be the public lectures, seminar presentations/discussions, workshops, and annual conference sponsored by the Kinder Institute. In addition to actively participating in these events, students will produce reaction papers that provide their assessment and analysis. Graded on A-F only.

**Credit Hours:** 3

---

## Data Science Courses

**DATA\_SCI 4001: Topic in Data Science and Analytics**

This course will act as a placeholder for departmental topics course in Data Science and Analytics. The topics and credits may vary, but will pertain to core instructional or emphasis area topics. Graded on A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** Instructor consent

---

**DATA\_SCI 4085: Problems in Data Science and Analytics**

Directed study on a topic in data science and analytics.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**DATA\_SCI 4087: Seminar in Data Science and Analytics**

Directed study on a topic in data science and analytics.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**DATA\_SCI 7001: Topics in Data Science and Analytics**

Topics and credit may vary from semester to semester. Can be repeated with departmental approval. Graded on A-F basis only.

**Credit Hour:** 1-6

---

**DATA\_SCI 7002: Python Programming Boot Camp**

This course teaches students how to program in Python, including use of auxiliary libraries various Python ecosystems. Students are introduced to the iPython notebooks from the SciPy ecosystem, as well Python's use across the spectrum of Data Science courses and topics. Many activities are focus on data ingestion, cleaning, manipulation, and restructuring (e.g., ETL). Graded on A-F basis only.

**Credit Hour:** 1

**Recommended:** Instructor consent

---

**DATA\_SCI 7003: Database Basics and SQL Boot Camp**

This course covers a core concepts to heterogeneous data management, including relational databases, NoSQL databases, and other data storage systems. The focus is on making students quickly productive in the use of multiple types of database management systems available on the market for data science work. This includes traditional relational databases, NOSQL databases and graph databases. This course is a 1 credit hour course using the JupyterHub learning environment. Graded on A-F basis only.

**Credit Hour:** 1

**Recommended:** Instructor consent

---

**DATA\_SCI 7004: R Statistical Programming Boot Camp**

This course teaches students how to program in R, including use of auxiliary libraries in R focused on various statistical and visualization oriented techniques. Students are introduced to R's use across the spectrum of Data Science courses and topics. Many activities focus on the development of statistical tests, and the use of R for statistical exploration. This course teaches students how to program in R, including use of auxiliary libraries in R focused on various statistical and visualization oriented techniques. Students are introduced to R's use across the spectrum of Data Science courses and topics. Many activities focus on the development of statistical tests, and the use of R for statistical exploration. Graded on A-F basis only.

**Credit Hour:** 1

**Recommended:** Instructor consent

---

**DATA\_SCI 7005: Introduction to Statistics for Data Analytics Boot Camp**

This course explores the use of inferential and predictive statistics for data modeling and analytics. Single--variate and multivariate statistical concepts are discussed, as well as intermediate exposure to statistical modeling. Students learn to evaluate model effectiveness and conduct results driven model selection. Statistical and modeling techniques focus on high dimensional data analytics. Topics related to dimensionality reduction are also covered, such as principal component analysis and factor analysis. Graded on A-F basis only.

**Credit Hours:** 2

**Recommended:** Instructor consent

---

**DATA\_SCI 7010: Introduction to Data Analytics**

(cross-leveled with DATA\_SCI 4010). An introductory course in data science and analytics. The objective of the course is to give students a broad overview of the various aspects of data analytics such as accessing, cleansing, modeling, visualizing, and interpreting data.

Students will perform hands-on learning of data analytic topics, using technologies such as Python, R, and open source analytic tools. Two Big Data cyberinfrastructure platforms will be introduced through case studies, allowing students to perform data analytical learning modules on modern cloud infrastructure and other relevant technologies. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Basic programming and basic database experience including R, Python, and SQL

---

**DATA\_SCI 7011: Introduction to Data Science**

This course is an introduction to the NGA Program of Study in Data Science (PSDS), the concentration areas, and the role of each concentration area in data science. Participants will learn how to receive, if desired, an accredited Graduate Certificate and/or a Master of Science degree in Data Science and Analytics from the University of Missouri. Participants will receive an introduction to software, tools, and resources to be utilized throughout the program. Participants will learn of systematic methodologies for data science projects and the data science pipeline through review of case studies. Graded on S/U basis only.

**Credit Hours:** 2

**Recommended:** Enrollment in NGA Training Program or instructor consent

---

**DATA\_SCI 7020: Statistical and Mathematical Foundations for Data Analytics**

(cross-leveled with DATA\_SCI 4020). An intermediate statistics class designed to build the mathematical foundation for students dealing with Big Data phenomena. Topics include discussions of probability, data sampling, data summarization, sampling distributions, statistical inference, statistical pattern analysis, hypothesis testing, regression, and nonparametric inference over multidimensional data collections. Students will engage in Big Data projects using various publicly available data sets and leveraging modern Data Science tools, techniques, and cyberinfrastructure. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Basic understanding of mathematical principles of vectors and matrices, and basic course in probability and statistics

---

**DATA\_SCI 7030: Database and Analytics**

(cross-leveled with DATA\_SCI 4030). Covers the Fundamental concepts of current database systems and query methods with emphasis on relational model and non-relational techniques in Big Data environments. Topics include entity-relationship model, relational algebra, indexing, query optimization, normal forms, tuning, security, NoSQL, and data analytics skills in both relational and non-relational environments. Project work involves modern relational DBMS systems and NoSQL environments. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Basic understanding of mathematical principles of vectors and matrices, and basic course in probability and statistics

---

**DATA\_SCI 7040: Big Data Visualization**

(cross-leveled with DATA\_SCI 4040). Covers the fundamental concepts of current visualization concepts and technologies. Unlike many data visualization courses, this one focuses on principles of visualization design and the grammar of graphics. These principles are then

implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 and DATA\_SCI 7030 or instructor's consent

---

#### **DATA\_SCI 7263: Digital Strategy II**

This course provides hands on experience using several digital platforms such as Facebook Insights, Google AdWords, Google Analytics, Adobe Analytics, Clarabridge and Topsy. In this course you'll learn digital advertising terminology and jargon, the importance of digital analytics, the role of analysts, qualities of effective analysts, the digital optimization process, web metrics and key performance indicators, as well as the essentials of collaboration and generating support and buy-in while gaining your executive's attention. Graded on A-F basis only.

**Credit Hours:** 3

---

#### **DATA\_SCI 8000: Data and Information Ethics**

Introduces the ethics related to Big Data in industry, business, academia, and research settings. Students will learn the social, ethical, legal and policy issues that underpin the big data phenomenon. Discussions and case studies will help guard against the repetition of known mistakes and inadequate preparation. The course content will follow the guidelines to be developed by the Council for Big Data, Ethics, and Society. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** DATA\_SCI 7010 and DATA\_SCI 7040 or instructor's consent

---

#### **DATA\_SCI 8001: Advanced Topics in Data Science and Analytics**

Topics and credit may vary from semester to semester. Can be repeated with departmental approval. Graded on A-F basis only.

**Credit Hour:** 1-6

---

#### **DATA\_SCI 8010: Data Analytics from Applied Machine Learning**

This course leverages the foundations in statistics and modeling to teach applied concepts in machine learning. Participants will learn various classes of machine learning and modeling techniques, and gain an in-depth understanding how to select appropriate techniques for various data science tasks. Topics cover a spectrum from simple Bayesian modeling to more advanced algorithms such as support vector machines, decision trees/forests, and neural networks. Students learn to incorporate machine learning workflows into data-intensive analytical processes. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7020 or instructor's consent

---

#### **DATA\_SCI 8020: Big Data Security**

This course provides an overview of state-of-the-art topics in Big Data Security, looking at data collection (smartphones, sensors, the Web), data storage and processing (scalable relational databases, Hadoop, Spark, etc.), extracting structured data from unstructured data, systems issues (exploiting multicore, security). Securing sensitive data, personal

data and behavioral data while ensuring a respect for privacy will be a focus point in the course Graded on A-F only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 and DATA\_SCI 7030 or instructor's consent

---

#### **DATA\_SCI 8080: Big Data Analysis Case Study**

Using a case-study approach, students will engage in discussions on a variety of big data topics relevant to their emphasis area and the realm of Big Data. This course will help students generate ideas and prepare them for the Big Data Capstone. Course work will be performed in small teams, mentored by faculty and/or industry advisors. Teams will research, cultivate, curate, and leverage large data sets. Students will gain hands-on experience applying relevant data science and analytical technology and techniques to gain insight and information from these real-world data sets. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8410, DATA\_SCI 8020, and DATA\_SCI 7040 or instructor's consent

---

#### **DATA\_SCI 8085: Problems in Data Science and Analytics**

Directed study on a topic in data science and analytics. Graded on A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

#### **DATA\_SCI 8090: Big Data Capstone**

This course provides an opportunity for participants to tackle a real-world data science project, delivered as a problem-based exercise. Participants will perform the full data science lifecycle methodology on a relevant challenge problem as final learning activity that draws upon all the foundational data science concepts and technologies, as well as specialized technologies and concepts relative to a particular concentration area. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8080 or instructor's consent

---

#### **DATA\_SCI 8110: Genomics Analytics**

This course will introduce the foundational concepts of genomics and bioinformatics. Genomics is a combination of biological and computational methods that explore the roles of DNA, genes, and proteins on a very large scale. However, understanding how to interpret and understand the results depends (at least) on a basic understanding of biology. The course does not assume a student has a biological background and it will cover the concepts necessary to implement genomics methods. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 or instructor's consent

---

#### **DATA\_SCI 8120: Multi-Omics Analytics**

The integration of multiple types of omics data set such as genomics, epigenomics, transcriptomic, proteomic and metabolomics are very important to understand the pathophysiology of human complex diseases. This course will describe the basic concepts of Multiple types of Omics datasets and databases. This course will also focus on various tools and its application in knowledge discovery from multi-omics data set

and its challenges related to preprocessing, analysis and visualization. Hands-on computer experience will be provided through web resources and Jupyter notebook environment. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8110 or instructor's consent

---

**DATA\_SCI 8130: Data Science for Health Care**

This course covers the basic concepts surrounding the analysis of health data. Topics include ethics and regulations of protected health data, healthcare data standards, and statistical analysis and dissemination techniques suitable for health care settings. Project work involves accessing and analyzing real (de-identified) health care data. This course focuses on health data analysis that is done in industry, insurance, hospitals and research. Practical, hands-on course with focus on fundamental data science skillsets such as programming in Python and data carpentry. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010, DATA\_SCI 7030, DATA\_SCI 7040, or instructor's consent

---

**DATA\_SCI 8140: Advanced Methods in Health Data Science**

This course covers advanced topics in health data analysis. Students will learn about research informatics and clinical trials, and advanced statistical methods used in health data analysis. Additionally, students will be exposed to new forms of health data processing such as free text data, image data, and longitudinal data. Students will explore the use of machine learning and AI in health care settings, and applied clinical informatics in the form of decision support. Project work involves accessing and analyzing real (de-identified) health care data. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8130 or instructor's consent

---

**DATA\_SCI 8150: Precision Medicine Analytics**

This course will provide a wealth of knowledge about understanding translational research and its application in precision medicine. Students will also learn how to leverage the multi-omics data set to improve the clinical outcome and advance the precision medicine strategies by accounting individuals' biological variability. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8110 and DATA\_SCI 8130 or instructor's consent

---

**DATA\_SCI 8160: Population Health Analytics**

This course provides an introduction to population health analytics, with a focus on Big Data ecosystem skillsets. Students will gain hands-on experience with large-scale population health data and will prepare original quantitative analysis for presentation. Instructors' lectures are delivered by video and face-to-face interaction. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8130 or instructor's consent

---

**DATA\_SCI 8220: Communication Network Analytics**

This course is intended to review theoretical, conceptual, and analytic issues associated with network perspectives on communicating and

organizing. The course will review scholarship on the science of networks in communication across a wide array of disciplines in order to take an in-depth look at theories, methods, and tools to examine the structure and dynamics of networks. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 or instructor's consent

---

**DATA\_SCI 8230: Streaming Social Media Data Management and Analytics**

An intermediate data wrangling and analysis class designed to provide students with an in-depth overview of collecting and analyzing Twitter data. Computational topics include composing, sending, and receiving Hypertext Transfer Protocol (HTTP) messages. Data wrangling topics include parsing json files, navigating recursively nested structures, and processing textual data. Analysis methods include machine learning, network analysis, topic modeling, time series, etc. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 or Instructor's consent

---

**DATA\_SCI 8310: Advanced Visualization I**

Covers the fundamental concepts of current visualization concepts and technologies, adding in Infographic and Interactive Visualization Design. Unlike many data visualization courses, this one focuses on principles of visualization design and the grammar of graphics as they can be applied to combining art and technology to tell data stories. These principles are then implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 or instructor's consent

**Recommended:** Instructor consent

---

**DATA\_SCI 8320: Advanced Visualization II**

Covers the fundamental concepts of animated visualization design that build on Infographic and Interactive Visualization Design techniques. Unlike many data visualization courses, this one focuses building animations and highly interactive representations of data. These principles are then implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8310 or instructor's consent

---

**DATA\_SCI 8410: Data Mining and Information Retrieval**

The course introduces the main concepts and techniques of data mining and information retrieval. It covers a variety of data mining topics and methods to extract hidden and predictive patterns from large data collections. Furthermore, theory and techniques for the modeling, indexing, and retrieval of relational, nonrelational, textbased and multimedia databases is covered. Topics include introduction to data mining process, mining frequent patterns, and pattern analysis, as well as different information retrieval models and evaluation, query languages and operations, and indexing/searching methods. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7010 and DATA\_SCI 7030 or instructor's consent

---

**DATA\_SCI 8420: Cloud Computing for Data Analytics**

This course introduces students to cluster and cloud computing big data ecosystems. Topics include a survey of cloud computing platforms, architectures, and use-cases. Students will examine scaling data science techniques and algorithms using a variety of cluster and cloud paradigms, such as those built atop Hadoop (Map-Reduce) concepts, and others. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7020 and DATA\_SCI 7030 or instructor's consent

---

**DATA\_SCI 8430: Parallel Computing for Data Analytics**

This course will provide in-depth treatment of the evolution of high performance, parallel computing architectures and how these architectures and computational ecosystems support data science. We will cover topics such as: parallel algorithms for numerical processing, parallel data search, and other parallel computing algorithms which facilitate advanced analytics. To reinforce lecture topics, learning activities will be completed using parallel computing techniques for modern multicore and multi-node systems. Parallel algorithms will be investigated, selected, and then developed for various scientific data analytics problems. Programming projects will be completed using Python and R, leveraging various parallel and distributed computing infrastructure such as AWS Elastic Map Reduce and Google Big Query. Students will research emerging parallel and scalable architectures for data analytics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7020 and DATA\_SCI 7030 or instructor's consent

---

**DATA\_SCI 8510: Geospatial Data Engineering**

This course provides an overview of theoretical and practical issues encountered when working with geospatial data for both the vector and raster data models with a focus on incorporating geospatial data into the data science lifecycle. Data access, indexing, retrieval, and other technical concepts are investigated. Important data storage paradigms such as enterprise geospatial databases and desktop GIS systems are explored along with scalable computational tools beyond desktop computing for Geospatial Big Data. Core issues in geospatial data storage, management, exploitation, and multi-data set entity resolution / correlation are examined. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 7030 or instructor's consent

---

**DATA\_SCI 8520: Spatial and Geostatistical Analysis**

This course will provide a practical overview of key issues encountered when working with and analyzing spatial data as well as an overview of major spatial analysis approaches. Discussions and laboratory work will focus on implementation, analysis, and interpretive issues given constraining factors that commonly arise in practice. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8510 or instructor's consent

---

**DATA\_SCI 8530: Remote Sensing Data Analytics**

Introduction to the principles of remote sensing of the environment leading to information extraction from remote sensing geospatial raster data sets. Examines theoretical and practical issues associated with digital imagery from spacecraft and airborne systems, thermal imaging, and microwave remote sensing. Covers standard processing techniques, including preprocessing and normalization, pixel-level feature extraction, information extraction, and structural/object extraction. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DATA\_SCI 8510 or instructor's consent

---

## Dermatology Courses

**DERM 6047: SCC Dermatology Elective**

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology. Dermatology Clinic is an integral part of the student's experience on this rotation. Students participate in the evaluation of patients with skin disease at a community based clinic. Students may participate in the evaluation and management of patients with complex, often serious, dermatologic conditions under the supervision of the attending physician. Students may also participate in Dermatologic inpatient consultations. Students may also assist in Dermatologic procedures.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the first two years of medical school. Successful completion of the Medicine Clerkship

---

**DERM 6233: ABS Dermatology Research**

ABS Dermatology Research

**Credit Hours:** 5

---

**DERM 6450: Dermatology I**

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Students are evaluated using a standard evaluation. The student's knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences.

**Credit Hours:** 5

**Prerequisites:** Internal Medicine Clerkship

---

---

**DERM 6750: Dermatology I - Rural**

The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer.

**Credit Hours:** 5

---

**DERM 6856: Dermatology II**

This elective rotation is an expansion of the objective goals outlined for Dermatology I. The student is expected to expand the depth and breadth of his/her dermatology experiences and knowledge. Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer. As Dermatology II is an extension of the Dermatology I curriculum, Dermatology II students are expected to master the above objectives. In addition, they are expected to expand their clinical skills related to the diagnosis and treatment of dermatologic diseases and they will have increased responsibilities for patient education. It is expected that they will further their surgical skills including biopsies, simple excisions, and basic cryotherapy. They will also become proficient in basic laboratory procedures including KOH and scabies prep.

**Credit Hours:** 5

---

**DERM 6901: SCC Dermatology 2-week**

The two-week elective in Dermatology will allow students to participate in a wide breadth of general, pediatric, and surgical dermatology. Students will also complete the American Academy of Dermatology online student modules and the self-evaluation that is provided.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

---

**DERM 6910: Clinical Dermatology Elective**

The 2 week elective in Dermatology will allow students to participate in a wide breadth of general, pediatric, and surgical dermatology. Students will participate in clinics and in weekly didactic sessions. Students will also complete the American Academy of Dermatology online student modules and the self-evaluation that is provided.

**Credit Hours:** 2

---

**Prerequisites:** Successful completion of the first two years of medical school. Must have completed at least 1 core clinical rotation

---

## Diagnostic Medical Ultrasound Courses

**DMU 1000: Introduction to Diagnostic Medical Ultrasound**

Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Departmental consent required

---

**DMU 3212: Sectional Anatomy**

A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 3309: Normal Ultrasound Clinical**

Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

**Credit Hours:** 5

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 3313: Ultrasound Physics**

Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 3315: Ultrasound Instrumentation**

Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 3322: Superficial Organs Ultrasound**

Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4001: Topics in Diagnostic Medical Ultrasound**

Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-99

**Prerequisites:** restricted to Diagnostic Medical Ultrasound undergraduate students

---

---

**DMU 4001W: Topics in Diagnostic Medical Ultrasound - Writing Intensive**

Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-99

**Prerequisites:** restricted to Diagnostic Medical Ultrasound undergraduate students

---

**DMU 4085: Problems in Diagnostic Medical Ultrasound**

Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-99

**Prerequisites:** restricted to Diagnostic Medical Ultrasound undergraduate students only

---

**DMU 4085W: Problems in Diagnostic Medical Ultrasound - Writing Intensive**

Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-99

**Prerequisites:** restricted to Diagnostic Medical Ultrasound undergraduate students only

---

**DMU 4200: Principles of Diagnostic Medical Ultrasound**

Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students only

---

**DMU 4234: Clinical Pathophysiology**

(cross-leveled with DMU 7234). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

**Credit Hours:** 3

---

**DMU 4234W: Clinical Pathophysiology - Writing Intensive**

Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

**Credit Hours:** 3

---

**DMU 4311: Pathological Images of Ultrasound**

(cross-leveled with DMU 7311). Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4314: Abdominal Ultrasound**

(cross-leveled with DMU 7314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

**Credit Hours:** 5

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4318: Gynecology Ultrasound**

(cross-leveled with DMU 7318). Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4320: Obstetrics Ultrasound**

(cross-leveled with DMU 7320). Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4325: Ultrasound Clinical Pharmacology and Contrast Agents**

(cross-leveled with DMU 7325). Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in Diagnostic Medical Ultrasound and their pharmacodynamics.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound

---

**DMU 4326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics**

(cross-leveled with DMU 7326). Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4330: Vascular Ultrasound Lab**

(cross-leveled with DMU 7330). Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4332: Vascular Ultrasound**

(cross-leveled with DMU 7332). Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

**Credit Hours:** 4

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4342: Adult Cardiac Ultrasound**

(cross-leveled with DMU 7342). Provides principles of diagnostic adult cardiac ultrasound in relation to pathology, further presenting the practical aspects of scanning techniques, exam critique, patient care in relation to cardiac US exams. Graded on A-F basis only.

**Credit Hours:** 5

**Prerequisites:** DMU 3313, DMU 3315 and DMU 4338; instructor's consent

---

---

**DMU 4941: Ultrasound Clinical I**

(cross-leveled with DMU 7941). Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

**Credit Hours:** 7

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4943: Ultrasound Clinical III**

(cross-leveled with DMU 7943). Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

**Credit Hours:** 6

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4944: Vascular Ultrasound Clinical IV**

(cross-leveled with DMU 7944). Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

**Credit Hours:** 7

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 4945: Cardiac Ultrasound Clinical V**

(cross-leveled with DMU 7945). Application of ultrasonography in real clinical settings for learning, practicing and decision making regarding, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

**Credit Hours:** 6

**Prerequisites:** DMU 3313, DMU 3315, and DMU 4944. Instructor and Departmental permission required

---

**DMU 4946: Cardiac Ultrasound Clinical VI**

(cross-leveled with DMU 7946). Further application of ultrasonography for continuation of learning, practicing and decision making, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.

**Credit Hours:** 6

**Prerequisites:** DMU 3313, DMU 3315, DMU 4338 and DMU 4945. Instructor and Departmental permission required

---

**DMU 4993: Ultrasound Clinical II**

(cross-leveled with DMU 7993). Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

**Credit Hours:** 8

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7200: Diagnostic Medical Ultrasound Principles and Patient Care**

Introduction diagnostic medical ultrasound principles including history, development, ultrasound physics - equipment fundamentals. Provides introduction to concepts of sonographic techniques, positioning, image critique, aspects of patient care and professional organizations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Graduate Diagnostic Medical Ultrasound students

---

**DMU 7234: Clinical Pathophysiology**

(cross-leveled with DMU 4234). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

**Credit Hours:** 3

---

**DMU 7309: Normal Ultrasound Clinical**

Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.

**Credit Hours:** 5

**Prerequisites:** admitted to the DMU program

---

**DMU 7311: Pathological Images Ultrasound**

(cross-leveled with DMU 4311). Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7312: Sectional Anatomy**

(same as RA\_SCI 7110; cross-leveled with RA\_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques.

**Credit Hours:** 3

**Prerequisites:** Restricted to Graduate Diagnostic Medical Ultrasound students

---

**DMU 7313: Ultrasound Physics**

Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7314: Abdominal Ultrasound**

(cross-leveled with DMU 4314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.

**Credit Hours:** 5

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7315: Ultrasound Instrumentation**

Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7318: Gynecology Ultrasound**

(cross-leveled with DMU 4318). Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis.

---

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7320: Obstetrics Ultrasound**

(cross-leveled with DMU 4320). Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7322: Superficial Organs Ultrasound**

Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7325: Ultrasound Clinical Pharmacology and Contrast Agents**

(cross-leveled with DMU 4325). Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics.

**Credit Hours:** 3

**Prerequisites:** Restricted to Graduate Diagnostic Medical Ultrasound majors

---

**DMU 7326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics**

(cross-leveled with DMU 4326). Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7330: Vascular Ultrasound Lab**

(cross-leveled with DMU 4330). Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7332: Vascular Ultrasound**

(cross-leveled with DMU 4332). Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.

**Credit Hours:** 4

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7338: Cardiac Ultrasound, Principles and Hemodynamics**

(cross-leveled with DMU 4338). Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

---

**DMU 7342: Adult Cardiac Ultrasound**

(cross-leveled with DMU 4342). Study of adult cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

**Credit Hours:** 5

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7941: Ultrasound Clinical I**

(cross-leveled with DMU 4941). Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging.

**Credit Hours:** 7

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7943: Ultrasound Clinical III**

(cross-leveled with DMU 4943). Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.

**Credit Hours:** 6

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7944: Vascular Ultrasound Clinical IV**

(cross-leveled with DMU 4944). Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.

**Credit Hours:** 7

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7945: Cardiac Ultrasound Clinical V**

(cross-leveled with DMU 4945). Application of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

**Credit Hours:** 6

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7946: Cardiac Ultrasound Clinical VI**

(cross-leveled with DMU 4946). Further enhancement of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.

**Credit Hours:** 6

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 7993: Ultrasound Clinical II**

(cross-leveled with DMU 4993). Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing.

**Credit Hours:** 8

**Prerequisites:** Restricted to Graduate Diagnostic Medical Ultrasound students

---

---

**DMU 8001: Topics in Diagnostic Medical Ultrasound**

Organized study of selected topics. Topic may vary.

**Credit Hour:** 1-3

**Prerequisites:** restricted to students enrolled in the Diagnostic Medical Ultrasound program only

---

**DMU 8050: Research in Diagnostic Medical Ultrasound**

Research not leading to a thesis or dissertation. Graded on an A-F basis only.

**Credit Hour:** 1-99

**Prerequisites:** restricted to students enrolled in the Diagnostic Medical Ultrasound program only

---

**DMU 8085: Problems in Diagnostic Medical Ultrasound**

Independent study of a special project involving clinical applications or research. Topic may vary.

**Credit Hour:** 1-99

**Prerequisites:** restricted to students enrolled in the Diagnostic Medical Ultrasound program only

---

**DMU 8346: Pediatric Cardiac Ultrasound**

Study of pediatric cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.

**Credit Hours:** 4

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

**DMU 8947: Applied Clinical Research & Practicum**

Clinical research application of cardiovascular & general ultrasound in clinical environment: clinical research, practicum, decision making, patient handling, and image processing. Graded on A-F basis only.

**Credit Hour:** 5-8

**Prerequisites:** Restricted to Diagnostic Medical Ultrasound students

---

## Digital Storytelling-Visual Studies Courses

**DST\_VS 1800: Introduction to Film Studies**

(same as FILMS\_VS 1800, ENGLSH 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound, narrative, genre, and other elements. No credit for students who have completed FILMS\_VS 2810. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Freshmen and sophomores only or instructor's consent

---

**DST\_VS 1880: Introduction to Digital Media Production**

(same as ENGLSH 1880, FILMS\_VS 1880, ARTGE\_VS 1920, COMMUN 1880). Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Enrollment limited to declared DST majors during early registration

---

**DST\_VS 1880H: Introduction to Digital Media Production - Honors**

(same as ENGLSH 1880, FILM\_S 1880, ARTGE\_VS 1920, COMMUN 1880). Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Enrollment limited to declared DST majors during early registration; Honors eligibility required

---

**DST\_VS 2001: Topics in Digital Storytelling**

Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

---

**DST\_VS 2005: Topics in Digital Storytelling**

Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

---

**DST\_VS 2005H: Topics in Digital Storytelling - Honors**

Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only. Prerequisites: Honors eligibility required

**Credit Hours:** 3

---

**DST\_VS 2810: Story Development**

(same as COMMUN 2810). In this course students will learn about storytelling across time and media, beginning with definitions and fundamentals of narrative and oral storytelling, theories of narrative and its cultural functions, and basic narrative analysis. The course then turns to the close study of structure, narration, character, plot, action, dialogue, and other narrative elements, with a wide variety of examples and prompts. Throughout the course, students practice the development of their own stories in multiple versions and formats, with attention to the ways that formal structures such as blogs, tweets, podcasts, and scripts affect their storytelling strategies. By the end of the course, students will produce a short shooting script or equivalent project ready for production. Thus, the course functions as preparation for audio-visual production courses in Film Studies, Media Studies, Film and Media Arts, and Digital Storytelling degree programs. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Enrollment limited to declared DST majors during early registration

---

**DST\_VS 2820: Immersive Storytelling**

(same as THEATR 2220). This class introduces the student to the basic principles of immersive theatre and immersive storytelling. Students

learn about the history, practice, theory, and critical issues related to immersive theatre and immersive storytelling, including performance art, environmental theatre, happenings, interactive theatre, site specific performance, installation art, video art, projection art, multimedia, intermediality, mediatization, 3D video, 360 video, augmented reality, virtual reality, and mixed reality. Projects provide opportunities for experiences in immersive theatre and immersive storytelling.

**Credit Hours:** 3

**Recommended:** DST\_VS 1880

---

#### **DST\_VS 2830: Video Art I**

Video as a fine art form intersecting with sculpture, experimental filmmaking, and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880, FILMS\_VS 1880, ENGLSH 1880 or ARTGE\_VS 1920

---

#### **DST\_VS 2860: Film Themes and Genres**

(same as ENGLSH 2860, FILMS\_VS 2860). Topics (e.g. film noir, African-American filmmakers, food and film, the western) announced at time of registration.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1800 or FILMS\_VS 1800

**Recommended:** ENGLSH 1000

---

#### **DST\_VS 2880: Digital Storytelling Production I**

(same as ENGLSH 2880, COMMUN 2880). Digital Storytelling Production I teaches agility with digital video technology through applied experiences. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880 or ENGLSH 1880 or FILMS\_VS 1880 or ARTGE\_VS 1920 or consent of instructor. Enrollment limited to declared DST majors during early registration

---

#### **DST\_VS 2885: Digital Storytelling Animation Production I**

(same as ENGLSH 2885). Introduction to all aspects of digital animation and elements of the 3D computer animation production pipeline, including story drafting and production planning, polygonal modeling and texturing, rigging, key framing, lighting, compositing rendered images, and editing into a short finished film. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880 or ENGLSH 1880 or FILMS\_VS 1880 or ARTGE\_VS 1920 or instructor consent. Enrollment limited to declared DST majors during early enrollment

**Recommended:** ENGLSH 1000

---

#### **DST\_VS 3001: Topics in Digital Storytelling**

Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

#### **DST\_VS 3005: Topics in Digital Storytelling**

Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

#### **DST\_VS 3005W: Topics in Digital Storytelling**

Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

#### **DST\_VS 3510: Think Global: Fundamentals of Globalization and Digital Technology**

(same as GERMAN 3510, JOURN 3510, PEA\_ST 3510, T\_A\_M 3010). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

---

#### **DST\_VS 3510H: Think Global: Fundamentals of Globalization and Digital Technologies - Honors**

(same as GERMAN 3510H, JOURN 3510H, PEA\_ST 3510H, T\_A\_M 3010H). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent. Honors eligibility required

---

#### **DST\_VS 3510HW: Think Global: Fundamentals of Globalization and Digital Technologies - Honors/Writing Intensive**

(same as JOURN 3510HW, T\_A\_M 3010HW, PEA\_ST 3510HW, GERMAN 3510HW). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent. Honors eligibility required

---

**DST\_VS 3510W: Think Global: Fundamentals of Globalization and Digital Technology - Writing Intensive**

(same as GERMAN 3510W, JOURN 3510W, PEA\_ST 3510W, T\_A\_M 3010W). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

---

**DST\_VS 3855: Documentary Film**

(same as ENGLISH 3855, FILMS\_VS 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**DST\_VS 3860: Special Themes in Digital Storytelling**

Themes (e.g., Indigenous digital studies, folklore and the internet) announced at time of registration. No more than six hours may be taken in the Special Themes in Digital Storytelling. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**DST\_VS 3880: Writing and Theory for Digital Media**

(same as ENGLISH 3880). Writing and Theory for Digital Media teaches the skills, methods and theoretical frameworks needed to write for new media. Students will study and practice writing for web-based and digital media platforms, including short-form modes such as Twitter and various social media sites; longer-form modes such as blogs, vlogs and podcasts; and the emerging possibilities of locative and interactive media. Assignments emphasize the professional and creative possibilities of new media production. In addition to the hands-on creation for audio, screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by new media theorists. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST 1880 or ENGLISH 1880 or FILM\_S 1880 or ART\_GNRL 1920 or instructor consent. Enrollment limited to declared DST majors during early enrollment

**Recommended:** Sophomore standing or above; ENGLISH 1000

---

**DST\_VS 3880W: Writing and Theory for Digital Media - Writing Intensive**

(same as ENGLISH 3880W). Writing and Theory for Digital Media teaches the skills, methods and theoretical frameworks needed to write for new media. Students will study and practice writing for web-based and digital media platforms, including blogs, podcasts, vlogs, and the emerging possibilities of locative and interactive media. Assignments emphasize the professional and creative possibilities of new media production. In addition to the hands-on creation for audio, screen-based, networked,

and hybrid forms of digital media, students will also read, discuss, and write about work by new media theorists. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880 or ENGLISH 1880 or FILMS\_VS 1880 or ARTGE\_VS 1920 or instructor consent. Enrollment limited to declared DST majors during early enrollment

**Recommended:** Sophomore standing or above; ENGLISH 1000

---

**DST\_VS 3885: Audio Storytelling**

Students in this course explore the skills, methods and theoretical frameworks needed to produce audio for new media and to understand the relationship between audio and digital culture. Students will study and practice writing and producing for web-based and digital media platforms. Assignments emphasize the professional and creative possibilities of new media production with an emphasis on audio. In addition to the hands-on creation of audio for radio, podcast, as well as screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by producers and radio historians and theorists. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880/ENGLISH 1880/FILMS\_VS 1880/ARTGE\_VS 1920 or consent of instructor

---

**DST\_VS 3885W: Audio Storytelling - Writing Intensive**

Students in this course explore the skills, methods and theoretical frameworks needed to produce audio for new media and to understand the relationship between audio and digital culture. Students will study and practice writing and producing for web-based and digital media platforms. Assignments emphasize the professional and creative possibilities of new media production with an emphasis on audio. In addition to the hands-on creation of audio for radio, podcast, as well as screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by producers and radio historians and theorists. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880/ENGLISH 1880/FILMS\_VS 1880/ARTGE\_VS 1920 or consent of instructor

---

**DST\_VS 4005: Topics in Digital Storytelling**

Advanced study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

**DST\_VS 4005W: Topics in Digital Storytelling - Humanities - Writing Intensive**

Advanced study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Sophomore standing

---

**DST\_VS 4805: Case Studies in an Inter/Multicultural World**

(same as GERMAN 4810, PEA\_ST 4810, T\_A\_M 4810). This interdepartmental course examines the ways in which people across the

globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

---

**DST\_VS 4810: Film Theory**

(same as ENGLISH 4810, FILMS\_VS 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, post colonialism, among others.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800; junior standing

---

**DST\_VS 4830: Video Art II**

Video as a fine art form intersecting with sculpture, experimental filmmaking, and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create more advanced video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. Projections and video installation works will be emphasized. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880, FILMS\_VS 1880, ENGLISH 1880 or ARTGE\_VS 1920 and DST\_VS 2830 or ARTGE\_VS 4030

---

**DST\_VS 4840: Culture and Media**

(same as ENGLISH 4840, FILMS\_VS 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800; junior standing or instructor's consent required

---

**DST\_VS 4880: Digital Storytelling Production II**

(same as ENGLISH 4880, COMMUN 4880). Digital Storytelling Production II introduces students to advanced techniques in digital storytelling production, while further developing skills in script writing, storyboarding, Adobe Premiere Pro, and video production with DSLR cameras. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and DST\_VS 1880 or ENGLISH 1880 or FILMS\_VS 1880 or ARTGE\_VS 1920 and DST\_VS 2880 or ENGLISH 2880 and sophomore standing, or consent of instructor. Enrollment is limited to declared DST majors during early registration

---

**DST\_VS 4885: Digital Storytelling Animation Production II**

Advanced instruction in various aspects of digital animation and elements of the 3D computer animation production pipeline, including story drafting and production planning, polygonal modeling and texturing, rigging, key

framing, lighting, compositing rendered images, and editing into a short finished film. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and DST 1880 or ENGLISH 1880 or FILM\_S 1880 or ART\_GNRL 1920 and DST 2885 or ENGLISH 2885 and sophomore standing, or consent of instructor. Enrollment limited to DST majors during early registration

---

**DST\_VS 4930: Digital Storytelling Practicum**

This course provides an opportunity for experiential learning in digital storytelling practice. Students will receive hands-on training through an intensive master class. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**DST\_VS 4940: Digital Storytelling Internship**

Students work in an agency or institution using their digital storytelling skills for one to three credit hours. Graded on an S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** Program consent

---

**DST\_VS 4955: Independent Research in Digital Storytelling**

Development of a carefully considered research project under close supervision of a faculty member. Open to undergraduate students only. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Instructor consent required

---

**DST\_VS 4970: Digital Storytelling Capstone**

For students in their senior year who have completed the core requirements for the Digital Storytelling program, this course focuses on advanced studies in the field and a major project involving the processes of selection, research, and production or writing leading to its completion. May include a professional component. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880, and DST\_VS 2880 or DST\_VS 2885, and DST\_VS 4880 or DST\_VS 4885

---

## Economics Courses

**ECONOM 1000: General Economics for Journalists**

One semester course covering similar material as ECONOM 1014 and ECONOM 1015, but for Journalism majors. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Includes applications for Journalism students. Not open to students who have completed ECONOM 1014, ECONOM 1024, or ECONOM 1051. Graded on A-F basis only.

**Credit Hours:** 5

**Prerequisites:** Open to majors and pre-majors in Journalism; also open to majors outside of Arts and Sciences and Business

---

---

**ECONOM 1014: Principles of Microeconomics**

A broad survey of microeconomics, from the basic market model and its many applications to market failures and policy responses. Topics include potential trade offs between efficiency and equity in competition and trade policy; determinants of wage differentials, poverty and inequality; and evaluation of the benefits and costs of government interventions in markets. Not open to students who have completed ECONOM 1000, ECONOM 1024 or ECONOM 1051.

**Credit Hours:** 3

---

**ECONOM 1014H: Principles of Microeconomics-Honors**

A broad introduction to microeconomics that is similar in coverage to ECONOM 1014, but with a more rigorous and quantitative approach. Not open to students who have completed ECONOM 1000, ECONOM 1024, or ECONOM 1051. Math Reasoning Proficiency Course. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required and a grade of 'C' or higher in MATH 1050, MATH 1100, MATH 1400, MATH 1500 or earn sufficient MyMathTest College Algebra score of 70% or higher

---

**ECONOM 1015: Principles of Macroeconomics**

An introduction to the study of how macroeconomic forces and public policy affect the welfare of a nation. Topics include understanding the business cycle, economic growth, inflation, interest rates, and unemployment, as well as the effects of fiscal and monetary policy. Not open to students who have completed ECONOM 1000 or ECONOM 1051. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1014 or ABM 1041

---

**ECONOM 1015H: Principles of Macroeconomics - Honors**

A broad introduction to macroeconomics that is similar in coverage to ECONOM 1015, but with a more rigorous approach. Not open to students who have completed ECONOM 1000 or ECONOM 1051. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1014, ECONOM 1024, or ABM 1041 or equivalent; Honors eligibility required

---

**ECONOM 1051H: General Economics - Honors**

One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and ECONOM 1015. Math Reasoning Proficiency Course.

**Credit Hours:** 5

**Prerequisites:** Honors eligibility required and C- or higher in MATH 1050 or MATH 1100

---

**ECONOM 2004: Undergraduate Topics in Economics - Social Science**

Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ECONOM 2004H: Undergraduate Topics in Economics - Social Science - Honors**

Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent; honors eligibility required

---

**ECONOM 2004W: Undergraduate Topics in Economics - Social Science - Writing Intensive**

Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ECONOM 3224: Introduction to International Economics**

A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations, trade and development, exchange rates, the International Monetary System, and economic integration.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1000, ECONOM 1014, ECONOM 1024 or ECONOM 1051

---

**ECONOM 3229: Money, Banking and Financial Markets**

Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ABM 1041) and (ECONOM 1015 or ABM 1042); or ECONOM 1000 or ECONOM 1051

---

**ECONOM 3229H: Money, Banking and Financial Markets - Honors**

Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1014 and ECONOM 1015; or ECONOM 1000; or ECONOM 1051; or ABM 1041 and ABM 1042. Honors eligibility required

---

**ECONOM 3251: Managerial Economics**

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed ECONOM 4351.

**Credit Hours:** 3

**Prerequisites:** MATH 1400 or MATH 1500 or equivalent and (ECONOM 1000 or ECONOM 1014 or ABM 1041)

---

**ECONOM 3271: Introduction to Applied Econometric Practice**

Introduction to the use of regression analysis of economic data, including simple and multiple regression, dummy variables. Econometric problems considered include heteroscedasticity, autocorrelation, multicollinearity and simultaneous equation issues.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1014 or ECONOM 1024 and ECONOM 1015, or ECONOM 1051H and STAT 2500

---

**ECONOM 3323: Capitalism, Democracy and Society**

This is a one-credit seminar course for students interested in careers involving social science research and analysis; topics covered will be a selection of classic and contemporary debates in the social sciences.

**Credit Hour:** 1

**Prerequisites:** ECONOM 1014 and ECONOM 1015, or ECONOM 1051

---

**ECONOM 3367: Law and Economics**

This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomics, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024 or ABM 1041) and (STAT 1200 or STAT 2500) or equivalent

---

**ECONOM 3367W: Law and Economics - Writing Intensive**

This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomics, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024 or ABM 1041) and (STAT 1200 or STAT 2500) or equivalent

---

**ECONOM 3940: Internship**

Internship experience for students interested in economics. Supervised internship work with approval of Director of Undergraduate Studies and academic adviser. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** ECONOM 1014 or ECONOM 1000 or ECONOM 1051

---

**ECONOM 3950: Practicum in Economics**

Practical experience in consulting, teaching or research guided by faculty advisor. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** consent of Director of Undergraduate Studies and faculty advisor

**Recommended:** Grade of B or higher in ECONOM 4351 and ECONOM 4371

---

**ECONOM 4004: Topics in Economics- Social Science**

Study in applied or theoretical economics; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ECONOM 4004W: Topics in Economics- Social Science - Writing Intensive**

Study in applied or theoretical economics; covers subjects not included in regularly offered courses.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ECONOM 4311: Labor Economics**

(cross-leveled with ECONOM 7311). Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4311W: Labor Economics - Writing Intensive**

Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4315: Public Economics**

(cross-leveled with ECONOM 4315). Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4315W: Public Economics - Writing Intensive**

Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4317: Urban Economics**

(cross-leveled with ECONOM 7317). This is a class in urban economics. Topics covered include: formation of cities, land markets, housing markets, economics of transportation and commuting, cities as engines of growth and issues affecting cities such as crime, poverty and migration. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4317W: Urban Economics - Writing Intensive**

(cross-leveled with ECONOM 7317). This is a class in urban economics. Topics covered include: formation of cities, land markets, housing markets, economics of transportation and commuting, cities as engines of growth and issues affecting cities such as crime, poverty and migration. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4320: History of Economic Thought**

(cross-leveled with ECONOM 7320). Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1014 and ECONOM 1015; or ECONOM 1000 or ECONOM 1051

---

**ECONOM 4320W: History of Economic Thought**

Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1051

---

**ECONOM 4326: Economics of International Trade**

(cross-leveled with ECONOM 7326). The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4326W: Economics of International Trade - Writing Intensive**

(cross-leveled with ECONOM 7326). The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4329: The Banking System and the Money Market**

(cross-leveled with ECONOM 7329). Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1015 or ABM 1042 or ECONOM 1000 or ECONOM 1051

---

**ECONOM 4329W: The Banking System and the Money Market - Writing Intensive**

Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1015 or ABM 1042 or ECONOM 1000 or ECONOM 1051

---

**ECONOM 4340: Introduction to Game Theory**

(cross-leveled with ECONOM 7340). An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4345: Economics of Education**

(cross-leveled with ECONOM 7345). Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024 or ABM 1041 or ECONOM 1000) and (STAT 2200 or STAT 2500) or equivalent

---

**ECONOM 4345W: Economics of Education - Writing Intensive**

Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024 or ABM 1041 or ECONOM 1000) and (STAT 2200 or STAT 2500) or equivalent

---

**ECONOM 4351: Intermediate Microeconomics**

(cross-leveled with ECONOM 7351). Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ABM 1041 or ECONOM 1000 or ECONOM 1051) and (MATH 1400 or MATH 1500) or equivalent

---

**ECONOM 4351H: Intermediate Microeconomics - Honors**

Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024 or ABM 1041) and MATH 1400 or equivalent. Honors eligibility required

---

**ECONOM 4353: Intermediate Macroeconomics**

(cross-leveled with ECONOM 7353). The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation;

consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1000 or ECONOM 1015 or ABM 1042) and (MATH 1400 or MATH 1500) or equivalent

---

**ECONOM 4355: Industrial Organization and Competitive Strategy** (cross-leveled with ECONOM 7355). Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4355W: Industrial Organization and Competitive Strategy - Writing Intensive**

Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4357: Health Economics**

(cross-leveled with ECONOM 7357, PUB\_AF 7357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351 and (STAT 2200 or STAT 2500) or equivalent

---

**ECONOM 4357W: Health Economics - Writing Intensive**

Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351 and (STAT 2200 or STAT 2500) or equivalent

---

**ECONOM 4370: Quantitative Economics**

(cross-leveled with ECONOM 7370). The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

**Credit Hours:** 3

**Prerequisites:** MATH 1300 and MATH 1400 or MATH 1500 or equivalent

---

**ECONOM 4371: Introductory Econometrics**

(cross-leveled with ECONOM 7371). Study methods for quantitative analysis of economic data. Estimation techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351 and (STAT 2200 or STAT 2500) or equivalent

---

**ECONOM 4385: Problems in Economics**

Directed readings in advanced economics. Students develop and complete a directed readings program on a focused economics topic that covers content appropriate for an advanced undergraduate economics course under the guidance of a faculty mentor. Credit arranged by the instructor.

**Credit Hour:** 1-3

**Prerequisites:** ECONOM 4351, ECONOM 4371, and instructor's consent. Not open to non-majors

---

**ECONOM 4775: Dynamic Optimization and its Applications to the Natural Sciences and Economics**

(cross-leveled with ECONOM 7775). Development of Calculus of Variations and Optimal Control Theory. Applications. Extensions to stochastic and robust control.

**Credit Hour:** 1-3

**Prerequisites:** ECONOM 4370 or instructor's consent

---

**ECONOM 4940: Internship in Economics**

Internship experience for Economics majors. 40 hours of supervised internship work with approval of Director of Undergraduate Studies and academic advisor. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** C or higher in ECONOM 4351 and ECONOM 4371; Declared economics majors who have a minimum overall CUM GPA of 2.75 and have junior or senior standing

**Recommended:** Students must have completed at least 15 credit hours at MU

---

**ECONOM 4965: Independent Research in Economics**

Development of a carefully considered research project under close supervision of a faculty member. Credit arranged by instructor.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ECONOM 4970: Senior Seminar in Economics**

Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

**Credit Hours:** 3

---

---

**ECONOM 4995: Honors Thesis**

Not open to non-majors. Capstone course required for Economics honors students.

**Credit Hours:** 3

**Prerequisites:** ECONOM 4351

---

**ECONOM 7001: Topics in Economics - General**

Study in applied or theoretical economics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ECONOM 7311: Labor Economics**

(cross-leveled with ECONOM 4311). Surveys theoretical explanations of wage and employment determination in contemporary labor markets.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 7351

---

**ECONOM 7315: Public Economics**

(cross-leveled with ECONOM 4315). Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 7317: Urban Economics**

(cross-leveled with ECONOM 4317). This is a class in urban economics. Topics covered include: formation of cities, land markets, housing markets, economics of transportation and commuting, cities as engines of growth and issues affecting cities such as crime, poverty and migration. Graded on A-F basis only.

**Credit Hours:** 3

---

**ECONOM 7320: History of Economic Thought**

(cross-leveled with ECONOM 4320). Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.

**Credit Hours:** 3

**Prerequisites:** ECONOM 1014 or ECONOM 1024 and ECONOM 1015 or ECONOM 1051H

---

**ECONOM 7326: Economics of International Trade**

(cross-leveled with ECONOM 4326). The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC's and the trade effects of economic growth.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7351 or instructor's consent

---

**ECONOM 7329: The Banking System and the Money Market**

(cross-leveled with ECONOM 4329) Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

**Credit Hours:** 3

---

**Prerequisites:** ECONOM 1015 or ABM 1042 or ECONOM 1000 or ECONOM 1051

---

**ECONOM 7340: Introduction to Game Theory**

(cross-leveled with ECONOM 4340). An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 7351 or instructor's consent

---

**ECONOM 7345: Economics of Education**

(cross-leveled with ECONOM 4345). Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1024 or ABM 1041 or ECONOM 1000) and (STAT 2200 or STAT 2500) or equivalent

---

**ECONOM 7351: Intermediate Microeconomics**

(cross-leveled with ECONOM 4351). Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed 3251.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1014 or ECONOM 1051) and MATH 1400 or equivalent

---

**ECONOM 7353: Intermediate Macroeconomics**

(cross-leveled with ECONOM 4353). The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

**Credit Hours:** 3

**Prerequisites:** (ECONOM 1000 or ECONOM 1015 or ABM 1042) and (MATH 1400 or MATH 1500) or equivalent

---

**ECONOM 7355: Industrial Organization and Competitive Strategy**

(cross-leveled with ECONOM 4355). Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 7351

---

**ECONOM 7357: Health Economics**

(same as PUB\_AF 7357; cross-leveled with ECONOM 4357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health

care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine: and examination of recent proposals and initiatives for health care reform.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351 and (STAT 2200 or STAT 2500) or equivalent

---

### **ECONOM 7361: Comparative Economic Systems**

(cross-leveled with Econom 4361). Study of capitalism, market socialism, and central planning.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3229 and ECONOM 3251 or ECONOM 4351

---

### **ECONOM 7370: Quantitative Economics**

(cross-leveled with ECONOM 4370). The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

**Credit Hours:** 3

**Prerequisites:** MATH 1300 and MATH 1400 or MATH 1500 or equivalent

---

### **ECONOM 7371: Introductory Econometrics**

(cross-leveled with ECONOM 4371). Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

**Credit Hours:** 3

**Prerequisites:** ECONOM 3251 or ECONOM 4351 and (STAT 2200 or STAT 2500) or equivalent

---

### **ECONOM 7775: Dynamic Optimization and its Applications to the Natural Sciences and Economics**

(cross-leveled with ECONOM 4775). Development of Calculus of Variations and Optimal Control Theory. Applications. Extensions to stochastic and robust control.

**Credit Hour:** 1-3

**Prerequisites:** ECONOM 7370 or instructor's consent

---

### **ECONOM 8001: Topics in Economics- General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

### **ECONOM 8085: Problems in Economics**

Graduate students may select topics for study and investigation subject to approval by supervising faculty.

**Credit Hour:** 1-99

---

### **ECONOM 8340: Game Theory**

Game theory is the study of strategic behavior by agents who perceive themselves as 'large' relative to the market and who therefore consider the effect of their behavior on others. This course examines the rigorous theory of strategic interaction of rational agents. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** ECONOM 4351 or equivalent; MATH 1320 or equivalent. . Graded on A-F basis only

---

### **ECONOM 8370: Mathematics for Economics**

The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

---

### **ECONOM 8413: Research Workshop I**

Required course for economics MA students. Combines instruction, student presentations, and seminar participation to introduce research methods and practice. A major research paper are required.

**Credit Hours:** 3

**Prerequisites:** ECONOM 8451, ECONOM 8453, and ECONOM 8473 or instructor's consent

---

### **ECONOM 8451: Microeconomic Theory**

MA-level course in microeconomic theory. The course relies extensively on calculus to survey theories of: rational behavior in consumption, production, and pricing decisions of households and firms; partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition; and general equilibrium and welfare.

**Credit Hours:** 3

---

### **ECONOM 8453: Macroeconomic Theory**

Basic models in macroeconomics will be covered with emphasis on assumptions and on how hypotheses can be tested. Course is an introductory survey for students intending to develop ability for research in macroeconomics.

**Credit Hours:** 3

**Prerequisites:** ECONOM 4353 or equivalent; at least concurrent enrollment in ECONOM 8451. Instructor's consent required for non graduate level students

---

### **ECONOM 8472: Econometric Methods I**

Familiarizes students with fundamental techniques found and used in applied economic research. Topics include: ordinary least squares, generalized least square, instrumental variables, maximum likelihood estimation, and generalized methods of moments.

**Credit Hours:** 3

**Prerequisites:** STAT 7710 or instructor's consent

---

---

**ECONOM 8473: Applied Econometrics**

Topics include: nonlinear least squares, numerical optimization, maximum likelihood and basic panel data and time series methods. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 7371 and MATH 7140 or equivalent, or instructor's consent

---

**ECONOM 9001: Topics in Economics**

Selected current topics in economics.

**Credit Hours:** 3

---

**ECONOM 9085: Problems in Economics**

Graduate students may select topics for study and investigation subject to approval by supervising faculty.

**Credit Hour:** 1-99

---

**ECONOM 9090: Research in Economics**

Thesis research for Ph.D. degree. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**ECONOM 9413: Research Workshop II**

Introduces doctoral students to practices of preparing scholarly economic research by moving through the process of selecting a topic, identifying relevant literature, and communicating results. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** ECONOM 9452, ECONOM 9454 and ECONOM 9474; PhD standing

---

**ECONOM 9430: Advanced Money and Banking**

The working and structure of institutional arrangements, welfare aspects of structural policies, operation of money and credit markets, and behavior of returns on assets.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9452 or instructor's consent

---

**ECONOM 9431: Central Banking Policies**

Examines central banking procedures, policies and the role they play in maintaining economic stability. Special attention to connection of Federal Reserve System with money and capital markets.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9452 or instructor's consent

---

**ECONOM 9446: Advanced Empirical Methods**

Empirical and modeling techniques for evaluation of microeconomic policy questions.

**Credit Hours:** 3

**Prerequisites:** ECONOM 8451, ECONOM 8473

**Recommended:** Concurrent enrollment in ECONOM 8473 or ECONOM 9473

---

**ECONOM 9447: Topics in Microeconomic Policy Analysis**

(same as PUB\_AF 9447). Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by

applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the economics of education, health economics, and other applied areas of microeconomics.

**Credit Hours:** 3

**Prerequisites:** ECONOM 8451, ECONOM 8473

**Recommended:** Concurrent enrollment in ECONOM 8473 or ECONOM 9473

---

**ECONOM 9451: Advanced Microeconomic Theory I**

The theory of rational behavior and partial equilibrium in markets. Topics include consumer behavior, theory of the firm, decisions making under uncertainty, perfect competition, monopoly and monopsony, and imperfect competition. Graded on A/F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9451 or instructor's consent; PhD standing

---

**ECONOM 9452: Advanced Microeconomic Theory II**

Survey of equilibrium theory and market failures in economics. Topics include the structure and modeling of games, and cooperative and non-cooperative equilibrium concepts.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9451 or instructor's consent

---

**ECONOM 9453: Advanced Macroeconomic Theory I**

Aggregate models of life-cycle microfoundations, of macroeconomics fluctuations and growth. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** departmental consent; PhD standing

---

**ECONOM 9454: Advanced Macroeconomic Theory II**

Analyzes topics in income analysis, including capital theory and economic dynamics.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9453 or instructor's consent

---

**ECONOM 9455: Monopoly and Competition**

A survey of the theoretical and empirical literature on the organization of industries. Includes study of monopolized markets, competitive markets, and strategic interaction among firms in imperfectly competitive markets. Both the rationale and practice of anti-trust policy are studied.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9452 and ECONOM 9471 or instructor's consent

---

**ECONOM 9457: Computational Economics**

Covers numerical and computational methods to solve economic models at the research frontier. Emphasis is on practical applications to prepare students for independent research. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 8451 and ECONOM 8453 and ECONOM 8472

---

**ECONOM 9471: Advanced Game Theory**

Presents core concepts in game theory and illustrates their uses with a range of applications.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9452 or instructor's consent

---

**ECONOM 9472: Econometric Theory I**

Analysis of linear regression models from an advanced statistical perspective.

**Credit Hours:** 3

**Prerequisites:** Department consent required

---

**ECONOM 9473: Econometric Theory II**

Analysis of nonlinear regression models and other essential econometric tools not covered in ECONOM 9472 from an advanced statistical perspective.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9472 or instructor's consent

---

**ECONOM 9474: Advanced Topics in Econometrics I**

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically time series analysis. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9473 or instructor's consent

---

**ECONOM 9476: Advanced Topics in Econometrics II**

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically microeconometrics.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9473 or instructor's consent

---

**ECONOM 9477: Advanced Topics in Econometrics III**

Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically the second semester of a two-semester time series sequence beginning with ECONOM 9474 or a two-semester microeconometrics sequence beginning with ECONOM 9476.

**Credit Hours:** 3

**Prerequisites:** ECONOM 9473 or instructor's consent

---

## Education Honors Courses

**EDUC\_H 4996H: Undergraduate Reading Honors**

This course is designed to introduce students to a variety of readings from a broad array of research, historical, contemporary and philosophical documents and writings. Selection of topics and additional readings are determined by the faculty instructor for the course. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent; Honors eligibility required

---

**EDUC\_H 4997H: Honors Undergraduate Seminar I**

This class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The culminating assignment for the class is a proposal for a

research poster or presentation to be presented at the undergraduate research fair held each year in May. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** instructor's consent; Honors eligibility required

---

**EDUC\_H 4998H: Honors Undergraduate Seminar II**

The class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The culminating assignment for the class is the production of a research poster or presentation at the undergraduate research fair held each year in May. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** instructor's consent; GPA of 3.5 or higher. Honors eligibility required

---

**EDUC\_H 4999H: Honors Undergraduate Research Seminar**

This class will be offered over 2 academic semesters and will consist of a 1-2 credit hour lab each semester with a College of Education faculty member working on an undergraduate research project. This course is designed as part of the Honors sequence. Graded on A-F only. Corequisites: EDUC\_H 4997H and EDUC\_H 4998H

**Credit Hour:** 1-2

**Prerequisites:** instructor's consent; Honors eligibility required

---

## Educational Leadership and Policy Analysis Courses

**ED\_LPA 3100: Foundations of Education**

Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development.

**Credit Hour:** 1-3

---

**ED\_LPA 3450: Introduction to Research in Educational Settings**

(same as IS\_LT 3450). This course provides an introduction to quantitative, qualitative, and mixed methods research, with an emphasis on how various forms of data collection and prior research can inform and improve practice. Students will: (1) develop skills in locating research relevant to their professional interests; (2) understand multiple forms of data collection strategies; and (3) identify ethical considerations associated with research. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 4060: Inquiring into Schools, Community and Society II**

(same as ED\_LPA 7060). Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts.

**Credit Hours:** 3

**Prerequisites:** LTC 2040

---

**ED\_LPA 4100: ELPA Undergraduate Seminar**

Seminar in ELPA on a special topic. Graded on A-F basis only.

---

**Credit Hours:** 3

---

**ED\_LPA 4115: Introduction to Learning Spaces**

(cross-leveled with ED\_LPA 7115). Learning takes place in a variety of settings beyond the classroom. This course highlights the teaching and learning at play within professional, community, educational, and organizational spaces. Students will explore the interaction between individuals and their learning environments to determine how the learning environments vary based upon how the organization transmits knowledge and the opportunities that individuals have within the environment for understanding. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 4151: Leading Educational Organizations in Global Contexts**

(cross-leveled with ED\_LPA 7151). Through equity-focused, critical and comparative analyses, this course centers on developing locally relevant understandings of educational organizations in the global context. The course will cover theories of effective leadership; organizational theory, structure, and analysis; and leading reform and innovation in response to changes in culture, technology, and globalization in various national and regional contexts. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 4152: Leadership for Student Learning in a Global Context**

(cross-leveled with ED\_LPA 7152). This course explores learning, curriculum, and assessment for globally-minded, multicultural, and equitable education. Topics include curriculum design and articulation, integration of state standards with international curricular frameworks, globally-minded instructional design, authentic assessment, and reporting student learning and progress to diverse students. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 4151

---

**ED\_LPA 4153: Leading Professional Development in Global Contexts**

(cross-leveled with ED\_LPA 7153). This course examines the role of professional development in the continuous improvement of educational organizations from a global perspective. Inquiry activities and readings will explore equitable practices for building collaborative learning communities; planning professional development; and developing leadership capacity, inclusive decision-making processes, and performance evaluations in globally-minded schools. Students will be asked to contribute locally relevant theories and best practices to enhance the scope of cross-cultural understanding. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 4151

---

**ED\_LPA 4154: Leadership for School-Community Partnerships in a Global Context**

(cross-leveled with ED\_LPA 7154). This course develops globally-minded leadership capacity by building knowledge in five interrelated domains: 1) school-home relationships; 2) locally relevant legal and political environments; 3) external relations and communications; 4)

community participation; and 5) inter-institutional alliances. Authentic inquiry assignments will prepare students to build effective and equitable community partnerships based on reciprocity and mutual respect. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 4151

---

**ED\_LPA 4428: Curriculum Leadership**

(cross-leveled with ED\_LPA 7428). This course is a study of research, theory, and skills necessary for curriculum leadership in educational organizations. This course includes generic curriculum management processes, design trends, controversial curriculum, issues, multimedia, innovative instructional techniques, and program evaluation. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 4481: Undergraduate Administrative Internships**

(cross-leveled with ED\_LPA 7481). These administrative internships are designed for students in the Bachelor's of Educational Studies (BES) degree program and those students who are a part of the Dean of Students Internship Program. It may also serve as an elective for any undergraduate student at the University of Missouri. The intent of this course is to integrate practice, theory, and ethical standards within a supervised education setting called an internship. Specific activities during the internship may vary greatly from one field placement to another in that different students may have different learning needs and desires, and different settings will offer different learning opportunities. In some circumstances and situations, an off-campus/off-site setting for an internship is also possible. The course may be repeated depending on student interests, internship site availability, and additional experiences needed by the student. Graded on S/U basis only.

**Credit Hours:** 3

**Prerequisites:** departmental consent required

---

**ED\_LPA 4975: Educational Studies Senior Capstone**

The senior capstone course is designed to allow a rigorous and in depth study area of inquiry within the field of education. The area of inquiry is cumulative and includes critical analysis and theoretical and/or pragmatic integration of scholarly materials. The course of study is individualized under the guidance of a faculty member. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Senior Standing, 90+ credit hours, Bachelor of Educational Studies major

---

**ED\_LPA 7060: Inquiring into Schools, Community and Society II**

(same as ED\_LPA 4060). Required 3 hours course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts.

**Credit Hours:** 3

**Prerequisites:** LTC 2040 and LTC 7040

---

**ED\_LPA 7115: Introduction to Learning Spaces**

(cross-leveled with ED\_LPA 4115). Learning takes place in a variety of settings beyond the classroom. This course highlights the teaching and learning at play within professional, community, educational, and

organizational spaces. Students will explore the interaction between individuals and their learning environments to determine how the learning environments vary based upon how the organization transmits knowledge and the opportunities that individuals have within the environment for understanding. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 7151: Leading Educational Organizations in Global Contexts**

(cross-leveled with ED\_LPA 4151). Through equity-focused, critical and comparative analyses, this course centers on developing locally relevant understandings of educational organizations in the global context. The course will cover theories of effective leadership; organizational theory, structure, and analysis; and leading reform and innovation in response to changes in culture, technology, and globalization in various national and regional contexts. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 7152: Leadership for Student Learning in a Global Context**

(cross-leveled with ED\_LPA 4152). This course explores learning, curriculum, and assessment for globally-minded, multicultural, and equitable education. Topics include curriculum design and articulation, integration of state standards with international curricular frameworks, globally-minded instructional design, authentic assessment, and reporting student learning and progress to diverse students. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 7151

---

**ED\_LPA 7153: Leading Professional Development in Global Contexts**

(cross-leveled with ED\_LPA 4153). This course examines the role of professional development in the continuous improvement of educational organizations from a global perspective. Inquiry activities and readings will explore equitable practices for building collaborative learning communities; planning professional development; and developing leadership capacity, inclusive decision-making processes, and performance evaluations in globally-minded schools. Students will be asked to contribute locally relevant theories and best practices to enhance the scope of cross-cultural understanding. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 7151

---

**ED\_LPA 7154: Leadership for School-Community Partnerships in a Global Context**

(cross-leveled with ED\_LPA 4154). This course develops globally-minded leadership capacity by building knowledge in five interrelated domains: 1) school-home relationships; 2) locally relevant legal and political environments; 3) external relations and communications; 4) community participation; and 5) inter-institutional alliances. Authentic inquiry assignments will prepare students to build effective and equitable community partnerships based on reciprocity and mutual respect. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 7151

---

**ED\_LPA 7428: Curriculum Leadership**

(cross-leveled with ED\_LPA 4428). A study of research, theory, and skills necessary for curriculum leadership in educational organizations. Course includes generic curriculum management processes, design trends, controversial issues multi-media, innovative instructional techniques, and program evaluation. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 7439: Applying Higher Education Research to Practice**

This course introduces quantitative, qualitative, and mixed within a student affairs context. Students will become familiar with, and able to critique research. Course graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 7452: Overview of Higher Education**

This course provides an overview of American Higher education. Emphasis is placed on how these institutions currently operate and what issues dominate current discussions of academe. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 7458: Sociology of Education**

(same as SOCIOL 7410; cross-leveled with SOCIOL 4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.

**Credit Hours:** 3

**Prerequisites:** SOCIOL 1000 or equivalent

---

**ED\_LPA 7481: Graduate Administrative Internships**

(cross-leveled with ED\_LPA 4481). For students pursuing the MEd with a concentration in Student Affairs Leadership, the Council for the Advancement of Standards in Higher Education requires students to complete 300 hours of practical experience. To meet this requirement, students must take a 150-hour internship course and either work in a higher education position or have an assistantship. If students are not working in higher education during their academic program, they must complete a second 150-hour internship course. The base time commitment is one credit for 50 clock hours of internship experience. This course may also serve as an elective for graduate students from around the university, and particularly those in the Higher Education Administration graduate certificate and the MEd with a concentration in Higher Education Leadership. The intent of this course is to integrate professional practice, theory, and ethical standards within a supervised student affairs leadership setting called an internship. Specific activities during the internship may vary greatly from one field placement to another in that different students may have different learning needs and desires, and different settings will offer different learning opportunities. In some circumstances and situations, an off-campus/off-site setting for an internship is also possible. The course may be repeated depending on student interests, internship site availability, and additional experiences needed by the student. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** departmental consent

---

---

**ED\_LPA 8408: Introduction to Ethics and PK-12 Policymaking**

This course examines the interplay of ethics and Pk-12 policymaking. Educational leaders today are practicing in a policy environment that continues to grow in complexity. Within this environment, leaders make choices that have ethical implications for richly diverse school communities. Values drive both ethical choices and the setting of policy goals. The intentions behind a policy may be 'good,' or 'right,' but are policies and how they are implemented unequivocally ethical? Are ethics and ethical policy conflated? History is replete with examples of policy, laws, and programs that haven't necessarily been ethical (e.g. doctrine of 'separate but equal') - and have had to be changed. Together, we will examine the intersections of ethics and policy. We will start at the beginning with a bit of philosophy for this introductory course, asking ourselves, 'what is the purpose of education?' From there, we will move toward defining our own personal and professional ethical leadership approaches and put it in relation to understandings of policy, questioning the values steering modern-day education policy. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 8409: Learning, Curriculum and Assessment for School Leaders**

Addresses assessment, learning and curriculum and the integration of the instructional and assessment processes. Topics include authentic assessment, curriculum alignment, cognition and learning, instructional approaches, and application of student learning theory to the curriculum.

**Credit Hours:** 3

---

**ED\_LPA 8410: Learning Cultures**

Integrates the themes of building a common purpose to enhance school culture, empowering teachers and students, and diversity. Topics include importance of shared mission and vision, the use of group processes and collaboration, the intricacies of school culture, and ethical and moral leadership.

**Credit Hours:** 3

---

**ED\_LPA 8411: Professional Development for Learning**

Focuses on the professional development and reflection on practice. Topics include organizational actions and personal responsibility, life-long learning, and public education in a democratic society.

**Credit Hours:** 3

---

**ED\_LPA 8412: School Improvement**

This course addresses the topics of organizational management and personal inquiry. It covers issues such as organizational effectiveness, organizing for an effective school environment, legal and fiscal decision-making and responsibilities of school leaders, creating an environment where stakeholders acquire and utilized data to inform decisions and practice, and where action research methods are utilized to evaluate and inform practice.

**Credit Hours:** 3

---

**ED\_LPA 8416: Foundations of School Leadership**

School leader knowledge of student learning theory and related instructional practices is the focus of this course. The problem-based learning format will include topics on school culture, leadership

communication, technology, and conflict resolution. Issues concerning professional relationships are also addressed.

**Credit Hours:** 3

---

**ED\_LPA 8417: Site-Level Organization and Leadership**

Student will study state and national regulations that affect Missouri school policies. The student will develop a database on various legal issues. A study of middle level education will conclude with on-site evaluation of a local middle school.

**Credit Hours:** 3

---

**ED\_LPA 8418: Supervision for Learning Environments**

Students are prepared to articulate, recognize, and support classroom practices that reflect the most current principles of learning. Effective instructional strategies that link this knowledge to practice will be entered into a computer database.

**Credit Hours:** 3

---

**ED\_LPA 8419: Structures and Processes for Effective Schools**

Emphasis is placed on the Missouri Comprehensive Guidance Program and positive strategies for working with challenging students. A continuation of the study of state and national legal and policy issues will focus on special programs and services.

**Credit Hours:** 3

---

**ED\_LPA 8423: Advanced Leadership for Learning Environments**

Students will demonstrate their understanding of instructional improvement for all teachers and students by designing and defending a comprehensive strategy for instructional changes in a simulated school. The ongoing study of learning principles and effective instructional practices will be concluded.

**Credit Hours:** 3

---

**ED\_LPA 8424: Education Politics and Policymaking**

This course examines the politics and policymaking process of education in the United States, paying particular attention to the influence of various institutions and actors at local, state, and federal levels. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 8430: School Law and Finance for Principal Leadership**

Designed to engage learners in examination of the legal (judicial and legislative) system, school law, and finance policies that govern public schools and their fiscal resources in the United States and the State of Missouri. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 8431: Leadership for Data-Driven Change**

This course instructs school leaders on how to use data for school improvement. Students will: identify reliable sources of data; develop, implement, and monitor strategic School Improvement Plans using data; analyze data using technology; and describe evidence-based strategies that respond to data analysis. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 8653: Education Toward Bi/Multilingualism: Theory, Policy, and Practice**

(same as LTC 8653). Overview of the theory, policy, and practice of using at least two languages in education to develop children's bi/multilingualism. Key topics include: (1) models of bilingual/multilingual education; (2) policy and politics of language education in the U.S. and international contexts; (3) psycholinguistic and sociocultural perspectives on bi/multilingual language development, as related to schooling; and (4) evaluation and assessment issues in bi/multilingual education.

**Credit Hours:** 3

---

**ED\_LPA 8951: Grounded Theory and Situated Inquiry**

(same as LTC 8951). For qualitative researchers attempting to understand social processes, Grounded Theory (GT) offers a way of developing theory empirically, 'from the bottom up.' In fact, this is what most distinguishes GT from other methods. It is explicitly emergent. It does not test a hypothesis. It provides useful tools to learn about participants' understandings and experiences of a social issue, process, or phenomena and to discover and construct theory to account for the social processes being studied. In this course, we will consider the theoretical underpinnings and practices of classic and contemporary GT methodologies. Importantly, we will conduct research and a GT analysis of data. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ED\_LPA 8957, LTC 8957, or ESC\_PS 8957

**Recommended:** ED\_LPA 9620, LTC 9620, or ESC\_PS 9620

---

**ED\_LPA 8955: Discourse Analysis in Education**

(same as LTC 8955). This course introduces the theories and methods of discourse analysis, including conversation, critical discourse, and multimodal. Students will analyze the role of context and ethics, as they transcribe and analyze discourse, especially from analytical settings. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8957 and ESC\_PS 9620

---

**ED\_LPA 8957: Qualitative Methods in Educational Research I**

(same as LTC 8957 and ESC\_PS 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9000: ELPA EdD Outgoing Visiting Student**

This class is a placeholder for students in their Statewide Cooperative EdD Program who take classes at their regional site during the fall and spring. There is 0 billing hours and it is not term finalized.

**Credit Hours:** 4

---

**ED\_LPA 9090: Research in Educational Leadership and Policy Analysis**

Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

**ED\_LPA 9095: Problems in Educational Leadership and Policy Analysis**

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**ED\_LPA 9400: Social Theory in Education**

Students will examine the relationship of society and education through a variety of theoretical perspectives and empirical studies. These theories deal with the relation of education to society as a whole, and the relation between education and the state. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9401: Educational Leadership**

Critical examination of key leadership theories and their application to various educational contexts. Includes consideration of research methods and designs appropriate for the study of leadership and the spectrum of lenses through which educational leadership is studied.

**Credit Hours:** 3

---

**ED\_LPA 9402: Educational Policy Analysis**

Course centers on developing multiple understandings of the education policy making process. Theoretical constructs used to advance those understandings are eclectic in nature, drawing from the fields of political science, history, sociology and economics.

**Credit Hours:** 3

---

**ED\_LPA 9403: Organizational Analysis**

Analysis of organizational characteristics and principles in educational organizations. Topics include: Organizational theories and models, organizational culture, communication, innovation, planning, leadership, power and influence, and external environment influences.

**Credit Hours:** 3

---

**ED\_LPA 9404: Inquiry into Educational Leadership and Policy Analysis**

A critical overview of theory development, research paradigms, and research ethics in the department of Educational Leadership and Policy Analysis. Required for all ELPA Ph.D. students.

**Credit Hours:** 3

**Recommended:** for students who have completed at least 2 semesters of coursework

---

**ED\_LPA 9405: Seminar in Educational Leadership and Policy Analysis**

Seminar in Educational Leadership and Policy Analysis

**Credit Hour:** 1-99

---

**ED\_LPA 9406: Seminar in Educational Administration**

Seminar in Educational Administration

**Credit Hour:** 1-99

---

**ED\_LPA 9407: Seminar in Educational Policy**

Seminar in Educational Policy

**Credit Hour:** 1-99

---

**ED\_LPA 9408: Seminar in Higher Education**

Seminar in Higher Education

**Credit Hour:** 1-99

---

**ED\_LPA 9409: Introduction to Research Design**

This course provides an introduction to quantitative, qualitative, and mixed methods research, with an emphasis on the epistemological and ontological issues that inform our choice of research methods. This course is intended for first year doctoral students. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9410: Proseminar in Educational Leadership and Policy Analysis**

The purpose of the proseminar course is twofold. First, students will gain an understanding of the systems, processes, and procedures associated with graduate studies, particularly the ELPA department's PhD program. Students will gain experience with critical writing and analysis, using library and electronic resources, and engaging faculty and peers in scholarly dialogues. Second, the course will allow students to engage in preliminary discussions around educational research, including literature, theories, and methodologies related to educational leadership and policy. Students will have the opportunity to begin working on their own research and sharpen their analytic skills through academic writing. We will also discuss educational topics, problems, and policies of current importance. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** This course is required and appropriate for all ELPA PhD students

---

**ED\_LPA 9420: Superintendent: Fiscal Leadership and Management**

This course focuses on a critical task for superintendents and school leaders: managing district revenues, expenditures, and facilities. This course covers the history of school finance, state funding formula, school district budgeting, development of facility plans, and the impact of financial decisions. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9424: Superintendent: Instructional Leadership**

Effective superintendents understand educational core knowledge of curriculum, instructional and assessment. They establish an exception for the use of best instructional practices for all students among both the educational and public communities. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9429: Superintendent: Communication, Team Leadership**

Effective superintendents negotiate political and cultural challenges to lead diverse, socially-just school systems. Reflective practices that enhance competence in public board member, and district personnel relationships are essential skills. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9430: Superintendent: Fiscal, Legal Leadership**

Effective superintendents efficiently manage finances and ensure that rules, regulations, and policies adhere to statutory/case law. Fiscal and legal practices ensure equity of educational experiences for all students. Open to all graduate students. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9435: Superintendent: Legal Leadership and Management**

This course focuses on the necessary legal knowledge superintendents must have to guide their school districts in adherence to statutory and case law. This course examines the legal system, lawful and wise use and allocation of district resources, management and evaluation of personnel, and equity issues. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9440: Race, Gender, and Ethnicity in Higher Education**

(same as WGST 9440). Historical and current issues of race, gender, and ethnicity in colleges and universities in the U.S. Issues include: students, faculty, and staff experiences of diversity, access and equity, and salience of diversity in a higher education setting.

**Credit Hours:** 3

---

**ED\_LPA 9442: Curriculum Philosophy and Development in Higher Education**

A study of the philosophical foundations of postsecondary curricula, current trends and issues, and approaches to curriculum reforms and revisions.

**Credit Hours:** 3

---

**ED\_LPA 9444: Program Planning in Higher Education**

Analysis of program planning and evaluation in higher education. Topics include: conceptualizations of program planning, situational analysis, needs assessment, priority setting, marketing and promotion, and program evaluation.

**Credit Hours:** 3

---

**ED\_LPA 9445: College Student Development**

Emphasis on college student development theory and its application in student affairs work.

**Credit Hours:** 3

---

**ED\_LPA 9446: Student Affairs Administration**

History, philosophy, theory, and issues pertinent to student affairs work.

**Credit Hours:** 3

---

**ED\_LPA 9447: College Student Culture and Environment**

This course examines the characteristics and outcomes of American undergraduates, and the aspects of the college environment the differentially influence students. Topics include: theoretical models of students change, campus climate and cultures, learning communities, institutional differences, and conditions for success.

**Credit Hours:** 3

---

---

**ED\_LPA 9448: College Teaching**

Designed to introduce students to theories and practices central to teaching in a higher education setting. Teaching related to institutional contexts and disciplines will be considered. Teaching and learning theories will be introduced.

**Credit Hours:** 3

---

**ED\_LPA 9449: History of Higher Education in the United States**

A study of the transformation of the English college tradition to what higher education is currently in the United States. The emphasis is on how institutions of higher learning changed to meet the needs of the nation or failed to do so.

**Credit Hours:** 3

---

**ED\_LPA 9450: Administration and Governance of Higher Education**

Principles of administration, academic culture and environment, and structures of governance of higher education will be explored.

**Credit Hours:** 3

---

**ED\_LPA 9451: Higher Education Finance**

How students pay for college and how institutions finance their operations is explored through the lens of economics. Topics include: Theories of student access, tuition and financial aid policy, institutional costs and revenue patterns, and resource allocation models.

**Credit Hours:** 3

---

**ED\_LPA 9454: Introduction to Post-Secondary Law**

Examination of the legal structure within which higher education operates. Includes consideration of legal analysis of case law, institutional responsibilities under the law, and analysis of legal issues within postsecondary education.

**Credit Hours:** 3

---

**ED\_LPA 9455: The Community College**

An overview of the community college. Topics include historical roots and development of the community college, organization and governance, finance, students, faculty, administrators, curriculum, social role, and recurring and emerging issues.

**Credit Hours:** 3

---

**ED\_LPA 9456: The Professoriate**

Overview of faculty roles and work in U.S. colleges and universities. Explores institutional and disciplinary differences and seeks to prepare future faculty for academic life.

**Credit Hours:** 3

---

**ED\_LPA 9457: Higher Education Policy**

An overview of current higher education policy issues facing governmental bodies and institutions. An emphasis is placed on investigating both the policy-making and policy-evaluation processes through multiple theoretical lenses. Specific topics explored include access, equity, and accountability within the higher education setting.

**Credit Hours:** 3

---

**ED\_LPA 9458: Helping Skills for Student Affairs**

This course is designed to prepare student affairs professionals with the basic awareness, knowledge, and helping skills needed to respond appropriately and effectively with students experiencing distress. The course will introduce students to general helping skills that are appropriate for the types of relationships, interactions, and contexts that they will commonly encounter in their work. Thus, students in this course will learn how to identify students experiencing different types of distress, consider and respond to immediate needs, and make appropriate referrals. The course will provide opportunities for students to observe and practice individual helping skills. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9459: Comparative and International Education**

Theories, methods and issues in the field of comparative and international education. Topics cover PK-16 education and include globalization, centralization and decentralization, equity and equity, teaching and student learning, and social context of education.

**Credit Hours:** 3

---

**ED\_LPA 9461: Ethics in Education**

Explores the ethical dimensions of work within and related to educational settings focusing on dilemmas that occur in professional practice, theories that inform thinking about ethical issues, and frameworks that guide ethical decision making.

**Credit Hours:** 3

---

**ED\_LPA 9462: History of U.S. Education Policy**

Provides overview of major US education issues (primary K-12), explores analytic tools for studying history of education and introduces multiple ways of constructing the history of a particular movement reform or era in education.

**Credit Hours:** 3

---

**ED\_LPA 9463: Politics of Education**

Focuses on politics of education in the United States, attending to the influence of various institutions and actors at local, state, and federal levels. Students will examine current reforms in PK-12 education and their impact on the future of education.

**Credit Hours:** 3

---

**ED\_LPA 9465: Policy Analysis Using Large Data Bases**

Intends to develop students' capacity to process national level large databases and to conduct policy-related research.

**Credit Hours:** 3

**Prerequisites:** an understanding of inferential statistics and experience with SPSS and SAS program

---

**ED\_LPA 9466: College Access**

This course examines theories and research on issues related to college going behaviors and inequalities in college access. The course will address college access through different levels of analyses: individual levels (e.g. race, ethnicity, gender, status, ability, social class, and transnational), organizational levels (e.g., geography, K-12 schools,

postsecondary institutions), and field levels (e.g., policy, media, admissions). Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9467: International Higher Education**

The purpose of this class is to learn the major trends and issues facing postsecondary education around the world and critically engage in comparative analysis with emphasis on lessons for the U.S. higher education system. In particular, this course will cover global trends around governance, accountability, funding, and internationalization. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9468: Educational Policy Implementation**

This course provides the theories and tools to understand and study the implementation of educational policies in K-12 schools and higher education. Drawing from various disciplinary perspectives, students will analyze and apply multiple approaches, including but not limited to technical-rational, street-level bureaucracy, sense-making, and policy enactment. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ED\_LPA 9402 or the equivalent (including prior courses or relevant experiences) is recommended as a prerequisite

---

**ED\_LPA 9469: Education Leadership Inquiry IV**

Developing and writing research proposals and conducting pilot studies. Knowledge and skills in writing the research report and sharing research with others.

**Credit Hour:** 1

**Prerequisites:** ED\_LPA 9471, ED\_LPA 9472 and ED\_LPA 9473. Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9470: Organizational Analysis for Educational Leadership**

Schools of organizational theory, six frames to analyze organizations and their underlying concepts, organizational change and leadership for change, and rationale for reframing organizations.

**Credit Hours:** 4

**Prerequisites:** Open only to students in Ed.D. program in Educational Leadership

---

**ED\_LPA 9471: Educational Leadership Inquiry I**

Introductory seminar on evaluating research using, APA Publication guidelines, writing scholarly publications, and using computer technology for literature searches.

**Credit Hours:** 2

**Prerequisites:** Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9472: Educational Leadership Inquiry II**

MU Graduate School policies related to doctoral research, use of multiple search sources, human subjects review process, and research ethics.

**Credit Hour:** 1

**Prerequisites:** Open only to students in Ed.D. program in Educational Leadership

---

**ED\_LPA 9473: Educational Leadership Inquiry III**

This advanced seminar assists scholarly practitioners in developing strategies for collecting, organizing, and outlining literature reviews. This course builds upon previous instruction in identifying problems of practice and the development of research questions. Course topics include selecting topics, searching databases, organizing resources, writing summaries, critiquing research, and crafting arguments. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Open only to students in EdD Program in Educational Leadership

---

**ED\_LPA 9474: Professional Seminar I**

Focuses on diversity and ethics in educational leadership and educational organizations. Students learn about professional development, professional practice, and professional service. May be repeated for credit.

**Credit Hour:** 1

**Prerequisites:** Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9475: Professional Seminar II**

This advanced course builds on previous coursework related to leaders and data to include considerations such as survey development, effective communication of findings, and data-driven decision making. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Open only to students in EdD Program in Educational Leadership

---

**ED\_LPA 9476: Leadership Theory and Practice**

An advanced study of leadership theories, concepts, and inquiry as applied to educational organizations. Explores power and authority in organizations, leader effectiveness, and organizational reform.

**Credit Hours:** 3

**Prerequisites:** Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9477: Leadership Theory and Practice Application**

Focuses on building understanding of the conduct of leadership in organizations through application and extension of leadership theories in practice.

**Credit Hour:** 1

**Prerequisites:** Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9478: Policy Analysis for Educational Leadership**

Analysis and investigation of educational policy utilizing various knowledge bases; organizational politics and culture's impact on policy processes; interpretation and application of policy-making activities.

**Credit Hours:** 4

**Prerequisites:** Open only to students in Ed.D. Program in Ed. Leadership

---

---

**ED\_LPA 9479: Content and Context of Learning**

Students develop the knowledge and skills for examining designing, and implementing organizational, classroom, and training conditions that support quality learning experiences for learners.

**Credit Hours:** 3

**Prerequisites:** Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9480: Team Building and Group Dynamics**

Stages of group development, team building and maintenance, team/group structures, team performance, problem-based learning as team process, and empowerment through development of self-managed teams.

**Credit Hour:** 1

**Prerequisites:** Open only to students in Ed.D. Program in Educational Leadership

---

**ED\_LPA 9481: Internship in Educational Leadership and Policy Analysis**

Some sections may be graded on A-F or S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

**ED\_LPA 9482: Quantitative Tools for Applied Research in Educational Leadership**

General introduction to quantitative methods of data analysis. Develop concepts of measurement, design, and analysis. The focus is on data driven decision making and using various quantitative methods to investigate problems of educational leadership practice. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Only students in the Statewide Cooperative Ed.D. program in Educational Leadership can enroll

---

**ED\_LPA 9483: Qualitative Tools for Applied Research in Educational Leadership**

Students will learn about a number of qualitative research designs that leaders can use to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to students in the Statewide Cooperative Ed.D. Program in Educational Leadership

---

**ED\_LPA 9484: Program Evaluation and Planning for Educational Leaders**

Participants develop thorough knowledge of theoretical underpinnings of selected approaches to program planning and evaluation and their necessary integration. Affords participants the opportunity to plan, conduct and deliver the results of a program evaluation to actual client. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Only students in the Statewide Cooperative Ed.D. Program in Educational Leadership can enroll

---

**ED\_LPA 9485: Assessment in Higher Education**

Accountability and accreditation on the local, state, and national levels make understanding how institutions work more important than ever. Higher education leaders need strong data to support decision making. Assessment and program planning live at the intersection of higher education policy and applied research design, analysis, and presentation. Assessment supports organizational effectiveness by providing timely and accurate information to both internal and external constituencies. This course is designed to help students understand the vital role of assessment, and planning and evaluation in the contemporary landscape of higher education by providing an introduction to the theoretical underpinnings and practical applications of the work. The course is relevant for students across higher education functions, particularly those interested in pursuing careers in institutional research and assessment and evaluation. Graded on A-F basis only.

**Credit Hours:** 3

---

**ED\_LPA 9620: Qualitative Methods in Educational Research II**

(same as ESC\_PS 9620 and LTC 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8957

---

## Educational, School and Counseling Psychology Courses

**ESC\_PS 2000: Experiencing Cultural Diversity in the United States**

The purpose of this course is to examine cultural diversity in U.S. Society, to increase self-awareness related to worldviews and beliefs about diversity issues, and to increase understanding of the intersections of multiple group identities. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 2010: Inquiry Into Learning I**

This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase II of the certification program.

**Credit Hours:** 3

---

**ESC\_PS 2014: Inquiry into Learning I - Field Experience**

This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

**Credit Hour:** 1

**Recommended:** departmental consent

---

**ESC\_PS 2014H: Inquiry into Learning I - Field Experience - Honors**

This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Honors eligibility required

**Recommended:** Departmental consent

---

**ESC\_PS 2100: Career Explorations**

Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center. Some sections may be graded on either A-F basis or S/U basis only.

**Credit Hour:** 1-3

---

**ESC\_PS 2400: Learning and Instruction**

The nature of human learning processes with implications for instruction. Emphasis on bases of and readiness for learning, types of learning, memory forgetting and transfer, and related topics.

**Credit Hours:** 2

---

**ESC\_PS 2500: Child Development**

The psychological, intellectual, social, and physical development of children.

**Credit Hours:** 3

---

**ESC\_PS 2700: Psychological Perspectives in Sport**

Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.

**Credit Hours:** 3

---

**ESC\_PS 3085: Problems in Educational, School, and Counseling Psychology**

**Credit Hour:** 1-3

**Recommended:** instructor's consent

---

**ESC\_PS 3100: African-American Psychology**

(same as BL\_STU 3100 and PSYCH 3880). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**ESC\_PS 3200: Black Feminism**

This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women's lives and Black women's collective actions against social structures will occur.

**Credit Hours:** 3

**Recommended:** PSYCH 1000 or instructor's consent

---

**ESC\_PS 4087: Seminar in Educational, School, and Counseling Psychology**

**Credit Hour:** 1-3

**Recommended:** instructor's consent

---

**ESC\_PS 4115: Human Learning**

An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning.

**Credit Hours:** 3

---

**ESC\_PS 4170: Introduction to Applied Statistics**

Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Math Reasoning Proficiency Course.

**Credit Hours:** 3

**Recommended:** College Algebra or equivalent

---

**ESC\_PS 4185: Health Behavior: Drug and Sexuality Education**

Psychological, social, and physical factors related to drug taking and sexuality behaviors.

**Credit Hours:** 3

**Recommended:** instructor's consent

---

**ESC\_PS 4200: Positive Psychology**

Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Some sections graded on either A-F or S/U basis only.

**Credit Hours:** 3

---

**ESC\_PS 4460: Exploring Mental Health Issues in Schools**

This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools.

**Credit Hours:** 3

---

**ESC\_PS 4575: MU Youth Development Academy: Positive Youth Development in Practice**

(cross-leveled with ESC\_PS 7575). This course prepares students to apply principles of positive youth development to practice, including leading youth programs, developing organizational and community systems that support youth, and engaging others to create positive environments in which youth ages 5-19 grow, thrive, and make successful transitions to adulthood. Course topics include ages and stages of development, experiential learning, program planning, diversity and inclusion, youth/adult partnerships, volunteer systems, risk management, community partnerships, and creating environments for healthy relationships. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to upper level (junior/senior standing) students

---

**ESC\_PS 7000: Foundation of Teacher Prep I**

Designed for graduate students seeking teacher certification, this course addresses content and application in comprehensive classroom management, development, behavior management, and diversity. Field work is required and integrated with course content.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**ESC\_PS 7087: Seminar in Educational, School, and Counseling Psychology**

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ESC\_PS 7115: Human Learning**

An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 4100 or ESC\_PS 7100

---

**ESC\_PS 7120: Theories and Techniques of Counseling**

Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**ESC\_PS 7130: Parent Counseling and Consultation**

For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 4120 or ESC\_PS 7120

---

**ESC\_PS 7160: Developmental Aspects of Human Learning**

Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play aggression, culture, and media. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 7170: Introduction to Applied Statistics**

Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** College Algebra or equivalent

---

**ESC\_PS 7185: Health Behaviors: Drug and Sexuality Education**

Psychological, social and physical factors related to drug taking and sexuality behaviors.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 7195: Sport and Applied Coaching Psychology**

Sport and Applied Coaching Psychology is a fusion of positive psychology and sport psychology. Positive psychology teaches coaches a healthy approach based in positive motivation and behavior modeling. Sport psychology helps coaches identify with the mental training of

athletes and its role in delivering maximum performance. Course focus is on helping coaches maximize the potential of their athletes and teams, while also building upon their emotional and psychological wellbeing.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 7200: Positive Psychology**

Positive psychology explores what is positive, creative, and fulfilling in human behavior. It is the scientific study of well-being and flourishing: what people do right. This course will examine cornerstones and key concepts such as emotions, engagement, relationships, strengths, virtues, meaning, and purpose. Proven as a very effective application in the realms of organizations, governments, businesses, education, counseling, etc., it is best originally understood by applying it to oneself.

**Credit Hours:** 3

---

**ESC\_PS 7260: Development of Character and Talent Strengths**

This course will explore the development and application of psychological strengths through the lens of positive psychology theory, research, and intervention. Lessons feature strengths topics including identification, leadership, flow and engagement, regulation, goal-setting and motivation. At the end of the course, students will be proficient in the languages of the StrengthsFinder and VIA Character Strengths assessments, exploration and development oriented activities, and basic facilitator techniques. Graded on A-F basis only.

**Credit Hour:** 1

---

**ESC\_PS 7270: Motivation and Positive Psychology**

This course is designed to give you a better understanding of your own motivation and the motivations of others. We will explore the whether, the what, the why, and the how of motivation through the study of Self-Determination, Self-Concordance and Goal Systems, as well as Attribution and Achievement goal theories. In addition to conceptual knowledge, it is our hope that you broaden your personal knowledge, such as gain new insights on how to set and select self-appropriate goals. Additionally, we will explore techniques and recommendations for motivating others towards better performance, learning, and development. Graded on A-F basis only.

**Credit Hour:** 1

---

**ESC\_PS 7280: Mindfulness, Meditation and Wellbeing**

This class explores both the historical roots and contemporary research related to mindfulness, meditation, and their impacts on wellbeing. Through readings, video presentations and applied practices students will expand their knowledge of meditation and Eastern influences on psychology. Students will also be encouraged to increase their personal awareness of the relationships between stress reduction, present moment and mind/ body awareness, and mindfulness practices. Students will be challenged to integrate a regular meditation practice into their daily routine and, through diverse readings, be introduced to cross-cultural perspectives on human health, psychology, and wellbeing. Graded on A-F basis only.

**Credit Hour:** 1

---

---

**ESC\_PS 7460: Foundations of School Mental Health**

Explores the history, foundations, and implementation of an expanded framework of school mental health focusing on collaborative and interdisciplinary approaches to supporting the wellness and school success of youth. Introduces professional working in or with schools to the school mental health framework emphasizing a behavioral health continuum of care, links between mental health and academic performance, a comprehensive system of learning supports, and data-based decision-making.

**Credit Hours:** 3

---

**ESC\_PS 7575: MU Youth Development Academy: Positive Youth Development in Practice**

(cross-leveled with ESC\_PS 4575). This course prepares students to apply principles of positive youth development to practice, including leading youth programs, developing organizational and community systems that support youth, and engaging others to create positive environments in which youth ages 5-19 grow, thrive, and make successful transitions to adulthood. Course topics include ages and stages of development, experiential learning, program planning, diversity and inclusion, youth/adult partnerships, volunteer systems, risk management, community partnerships, and creating environments for healthy relationships. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** restricted to graduate students (Master's and PhD)

**Recommended:** Prior course work in education, human development, family studies, sociology, social work, or other child and youth-related programs is highly preferred

---

**ESC\_PS 8020: Overview of Research Methods**

Survey of research design and methods of data collection for masters, educational specialists, and doctoral students.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7170 or instructor's consent

---

**ESC\_PS 8040: Counseling Methods and Practices**

Introduction to counseling microskills and techniques, with attention to case conceptualization, therapeutic alliance, and counseling process. Laboratory experience in demonstrating skills and the ability to form an effective counseling relationship is required.

**Credit Hours:** 3

---

**ESC\_PS 8060: Lifespan Development**

A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral, social/cultural/racial, religious/spiritual and sexual domains. Examples of atypical development will be discussed.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 4100 or equivalent. Consent of instructor required

---

**ESC\_PS 8070: Ethical and Legal Issues in Psychological Practice**

Legal and ethical concepts and issues relevant to the practice of psychology and student personnel services.

**Credit Hours:** 3

---

**Prerequisites:** ESC\_PS 4120 or ESC\_PS 7120 or instructor's consent

---

**ESC\_PS 8082: Foundations of Educational and Psychological Measurement**

Basic principles of educational and psychological measurement including test construction, validity, reliability, item analysis, and derived scores.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 4170 or ESC\_PS 7170 or instructor's consent

---

**ESC\_PS 8085: Problems in Educational, School, and Counseling Psychology**

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ESC\_PS 8087: Seminar in Educational, School, and Counseling Psychology**

Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ESC\_PS 8090: Master's Thesis in Educational, School, and Counseling Psychology**

Independent research leading to Master's Thesis. Graded on S/U basis only. Prerequisites: advisor's consent

**Credit Hour:** 3-6

---

**ESC\_PS 8095: Research in Educational, School, and Counseling Psychology**

Supervised research that is independent of master's thesis or doctoral dissertation. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** advisor's consent

---

**ESC\_PS 8100: Psychological Assessment of Children and Adolescents: Cognitive Assessment**

Basic principles in intelligence theory and intermediate measurement concepts. Practice in administering, scoring, and interpretation of data from individually administered intelligence tests with school aged children and adolescents. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**ESC\_PS 8110: Methods in Group Counseling**

Study of group counseling methods and techniques. Participation in a group is required.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8040, demonstrated knowledge of ethical principles and departmental consent

---

**ESC\_PS 8120: Psychological Assessment of Children and Adolescents: Psychoeducational Assessment**

Practice in administering, scoring, and interpretation of data from academic achievement, nonverbal intelligence, memory, adaptive

behavior, and perceptual/motor assessments with school-age youth and adolescents.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8100 and instructor's consent

---

**ESC\_PS 8125: Professional Iss. in Sch. Psych. I:Hist., Trends & Ethical Pract.**

For first-year doctoral students in school psychology. History, current issues, trends, professional organizations, legal-ethical standards of doctoral level school psychology are discussed. The scientist-practitioner model and scientific reasoning process as they apply to both science and practice are reviewed.

**Credit Hours:** 3

**Prerequisites:** Must be admitted to school psychology program

---

**ESC\_PS 8130: Psychological Assessment of Adults**

Students develop and practice skills in writing psychological reports with special emphasis on assessing psychological social-vocational functioning.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8100

---

**ESC\_PS 8135: Foundations of Career Psychology**

Theoretical orientations to counseling for career development; nature and structure of work, education, and leisure; work and family issues; career concerns of special populations; use of career information in counseling.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**ESC\_PS 8140: Psychological Assessment in Children and Adolescents: Behavior and Social Emotional Assessment**

This course introduces behavior theory, behavioral and social-emotional assessment techniques (including observations, interviewing, rating scales, and projective techniques) and their link to relevant interventions, with a primary focus on school-age youth and adolescents.

**Credit Hours:** 3

---

**ESC\_PS 8145: Psychological Interventions with Children and Adolescents: Behavioral Intervention**

This course will emphasize behavioral theory, assessment, and intervention, including functional behavior assessment, positive behavior supports, and the conceptualization from an individual, systems, and public health perspective. Graded on A-F basis only

**Credit Hours:** 3

---

**ESC\_PS 8155: Crisis Prevention, Intervention, and Response in Schools**

The course provides students with basic knowledge, theoretical frameworks, and skills/strategies for crisis prevention, intervention, response, and recovery in school and community settings, with a primary focus on addressing the mental health needs.

**Credit Hours:** 3

**Prerequisites:** Instructor consent

---

**ESC\_PS 8160: Psychological Interventions with Children and Adolescents: Educational Instruction**

This course investigates models of school instruction in both general and special education, and how instruction can be adapted for learners who exhibit a range of academic and psychological problems and disabling conditions.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8100, ESC\_PS 8120 and instructor's consent

---

**ESC\_PS 8165: Psychological Interventions with Children and Adolescents: Evidence-Based Therapies**

An introduction to evidence-based child and adolescent psychotherapies, including individual and group interventions. Various aspects will be considered including assessment, diagnosis, and treatment planning. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8175: Applied Behavior Analysis: Principles, Assessment, and Evaluation**

This course is designed to provide students with an understanding of operant conditioning principles and concepts, single-case design methodology, and behavior analytic assessments and evaluation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**ESC\_PS 8185: Health Promotion**

An overview of the important concepts of health promotion. Emphasis on specific health-related problems and issues, health behavior change, and the design, development implementation, and evaluation of comprehensive health promotion programs.

**Credit Hours:** 3

**Prerequisites:** LTC 1310 or equivalent or instructor's consent

---

**ESC\_PS 8195: Applied Positive Coaching**

Explores concepts of sport, coaching and positive psychology, particularly the interventions and applications designed to further develop a coach's philosophy, communication skills, understanding of motivation, leadership skills, and the coach's and athlete's well-being.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 8200: Applied Positive Psychology**

This course will require students to implement positive psychology concepts from the introductory course into their personal, professional, and/or social lives. We will also study specific ways in which these concepts and theories are being applied throughout various realms of well-being. Among the topics in this course are therapeutic lifestyles, goal-setting and attainment, self-care, meaning making, transformational leadership, influence and sustainable happiness theory.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7200

---

---

**ESC\_PS 8232: Foundations of Sport Performance**

Focuses on principles and methods to become an effective sport performance coach. Examines the development of athletes and education of basic sports nutrition, strength, and conditioning.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 8240: Sport in America**

Sociological perspectives of sport in America. Attention given to the influence of society on sport as in institution, and the role of sport as an agent of social change.

**Credit Hours:** 3

**Prerequisites:** SOCIOL 1000 or PSYCH 1000

---

**ESC\_PS 8250: School Psychology Practicum: Introduction**

This course is an intro practicum that exposes students to the organization and functions of schools. Students work with psychologists and other school personnel on academic and behavioral interventions to learn how schools serve children and their families. Graded on S/U basis only. May be repeated for credit.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**ESC\_PS 8255: Legal Aspects of Sport and Coaching**

Emphasis is to provide insight about how the law is applied in sport settings, the types of litigation involved, and the standard of care required. Fundamental terminology and concepts, and contemporary issues in sport law will be addressed.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 8260: School Psychology Practicum: Intermediate**

Intermediate School Psychology Practicum provides students with experience in school-based psychological service delivery. Students gain experience with psychoeducational assessment and diagnosis, intervention planning and delivery, consultation, and serving on multidisciplinary teams. Graded S/U basis only. May be repeated for credit.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**ESC\_PS 8265: Administration of Athletic Programs**

Examines methods, principles, and roles of athletic administrators. Also, examines the job responsibilities and competencies required of sport leaders in athletic administration.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 8270: Student-Athlete Wellbeing**

As a positive coach and career educator, your knowledge of student wellbeing is critical to support your students' physical, mental, and social health alongside their academic success and development beyond sport.

Although our semester will focus largely on the most critical components of student welfare, we will also frame our study of student wellbeing using the tenets of Positive Psychology, a discipline that champions a strengths-based approach to guide positive behaviors associated with health and wellbeing. Health promotion theory will also guide our course of study as we examine: (a) individual student-athlete wellbeing with a focus on physical, mental, and social health (b) wellbeing in the context of student services provided by the school or organization, and (c) program evaluation methodology to identify strengths and opportunities for program improvement to enhance wellbeing and welfare for all student-athletes. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

**Recommended:** ESC\_PS 7200 Positive Psychology

---

**ESC\_PS 8280: Gender Issues in Sport**

Through a study of theory and applied practice, students will explore personal biases, understand intersecting identities and explore privilege and oppression at the individual, interpersonal, structural, and cultural level when considering gender awareness in sport.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 8290: Multicultural Issues in Sport**

The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of athletic coaches working with diverse student populations. Activities and assignments are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings.

**Credit Hours:** 3

**Prerequisites:** Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC\_PS 8300: Positive Leadership in Sport**

A Positive Leadership philosophy requires Positive Leadership delivery. Course is designed to prepare leaders to bridge content knowledge to practical application. Students will use core competencies learned throughout their program to develop their leadership approach.

**Credit Hours:** 3

---

**ESC\_PS 8320: Advanced Human Learning**

A study of behavioral and cognitive theories of learning with an emphasis on those greatest utility for educators. Experimental evidence forming the theoretical base for educational practice is examined.

**Credit Hours:** 3

**Recommended:** ESC\_PS 2400 or ESC\_PS 7100

---

**ESC\_PS 8330: Motivating At-Risk and Diverse Students**

This course examines motivational concepts that apply to students of all ages. The course is designed to help teachers design classrooms and assignments that would improve the motivation of students, especially

at-risk students. The course pays special attention to issues of diversity relevant to motivation. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8340: Cultural Backgrounds and Learning**

The course explores the influence of culture on the process of learning. Topics and discussions will center on learning within the K-12 classroom. Readings and assignments are tailored to engage students in practical classroom applications of the information and discussions within the course. At the conclusion of the course students will have a deep understanding of how culture shapes thinking, learning, behavior, and the classroom environment. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8350: Cognition, Learning and Instruction**

Examines the topics of memory and cognition as they apply to the process of learning and instruction.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8320 or instructor's consent

---

**ESC\_PS 8355: Cognition and Emotion**

This course looks at human cognition and emotions and their influence on learning, self-control, motivation, executive processes, and behavior change. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8360: Advanced Counseling Theories and Interventions**

Contemporary theories and interventions of counseling. Advanced study of efficacious techniques. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8040 or ESC\_PS 8342

---

**ESC\_PS 8370: Social Emotional Learning**

The development and support of social emotional learning will be examined for K-12 age students. The course is both theoretical and application based and is appropriate for all levels of graduate students. Research strongly supports the importance of social emotional regulation in increasing and supporting academic achievement and well-being. Specific topics covered in the class include: the integration of SEL with related prevention approaches, SEL and student-teacher relationships, SEL in connection with PBIS, and accountability in SEL programs. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8380: Data-Driven Instructional Decisions**

This course explores the uses of assessments and evaluation techniques for practical applications within the classroom. Focus is on use of data gathering techniques to increase student academic performance and inform classroom instruction. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8400: Analysis of Research in Career Psychology**

Examination of career development theories, the research supporting the theories, and the practical application of these ideas in career counseling and career programs.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8135

---

**ESC\_PS 8410: School Guidance Programs**

Provides knowledge and skills in the development and management of school guidance programs including program planning, structuring, implementing, and evaluating.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7120

---

**ESC\_PS 8415: Program Evaluation for School Counselors**

Program Evaluation is a graduate seminar intended to provide students with the skills needed to evaluate comprehensive guidance and counseling programs. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7120

---

**ESC\_PS 8425: Effects of Maltreatment on Child and Adolescent Development**

Course topics to be covered include 1) definitions of child maltreatment, 2) incidence and prevalence rates, 3) possible causes and consequences associated with child maltreatment, 4) treatment of survivors and perpetrators, and 5) prevention efforts. Important legal and ethical issues will be discussed, such as children's competence and eyewitness abilities, false allegations of abuse, mandated reporting, and investigative interviewing of children. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8430: Mental, Emotional, and Behavioral Disorders in Youth**

The course will include an overview of normal development and an investigation into specific deviations in intensity, frequency, and/or duration of normal development which impact the individual in his or her home, school, and community.

**Credit Hours:** 3

---

**ESC\_PS 8435: Wellness Management for School Personnel**

The current climate in schools places considerable demands on teachers and other school personnel. Often, those working in schools find themselves under enormous stress and pressure. In this course, school personnel will examine a variety of topics related to both identifying and effectively dealing with these pressures. Topics include communication skills, dealing with challenging individuals in the school system, recognizing and effectively managing stress, and recognizing burnout and re-energizing. The course will provide an overview of the research on these topics, as well as numerous effective strategies to deal with these pressures. Students in the course will have opportunities to apply learned strategies to real-life situations in the schools. Graded on A-F basis only.

**Credit Hours:** 3

---

---

**ESC\_PS 8440: School Mental Health: Policy, Law and Ethics**

This course is designed to familiarize school-based professionals with policies, laws and ethics associated with children and youth and schools.

**Credit Hours:** 3

---

**ESC\_PS 8445: Building Resiliency and Optimism in Youth**

Examines risk and resiliency processes during childhood and adolescence. Focuses on defining resilience; sources of risks and protective factors within families, schools, and communities; prevention programs targeting early, middle childhood and adolescence. Promotion of one's own resilience and well-being discussed. Special topics include strengths-based models of resiliency, resilience and family difficulties, violence and maltreatment, poverty, dropout, and school/community-based prevention and intervention.

**Credit Hours:** 3

---

**ESC\_PS 8450: Diversity Issues in School Mental Health**

The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of school personnel working with diverse student populations.

**Credit Hours:** 3

---

**ESC\_PS 8455: Bully and Youth Violence: Prevention and Reduction**

This course is a survey of current issues in bullying and youth violence with an emphasis on applications in the school environment. The course will present effective strategies for bullying and violence prevention within the school and in collaboration with the community at large. Students are encouraged to apply the course concepts to their work environment and develop tools for future practice in schools and other youth-serving settings. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8460: Communication and Collaboration with Children and Families**

This course will provide education professionals with the knowledge and basic skills to address common mental health issues through positive and solution focused communication and collaboration.

**Credit Hours:** 3

---

**ESC\_PS 8465: Vital Issues in School Mental Health**

The course is highly individualized in that students, as a group, will choose the specific topics to be covered. Readings and assignments have three foci: 1) improve understanding of each issue within a broader context of public mental health policy, prevention, intervention, and maintenance; 2) deepen student knowledge of the topic from practice and research-based sources; and 3) enable students to deal more effectively with those issues within relevant settings. Topics may include, but are not limited to: school dropout, substance use, self-injury/cutting, relational aggression, management of extreme behaviors, homelessness, divorce/death, eating disorders, pregnancy, ADHD, and many others. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8470: Preventions and Interventions in School Mental Health**

This course explores the role that educators and school mental health professionals play in promoting, prevention and early intervention practices for mental, emotional, and behavioral disorders in youth and considers the basic steps for designing, implementing and evaluating evidence based interventions.

**Credit Hours:** 3

---

**ESC\_PS 8475: Proactive Behavior Management**

This course provides a framework to a prevention-focused model of classroom support and behavior management. Prevention is less time-consuming in the long run and leads to more opportunities for learning and social engagement because discipline problems are not interfering with teaching. This course will include evidence based strategies to structure proactive learning environments that promote students' academic skills and competencies as well as their social and emotional development. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8490: Mental Health in Schools Capstone Paper**

Course focuses on writing a capstone integration paper that is intended to be a culminating experience. Allows students to reflect on the content of their course work, evaluate the knowledge and skills acquired, and apply what they have learned into their professional practice.

**Credit Hour:** 1

**Prerequisites:** instructor's consent

---

**ESC\_PS 8515: Sport Psychology**

Current topics of research in sport psychology are examined. Topics include: sport personality, attention, activation and anxiety intervention, motivation, sport aggression, audience effects, team cohesion, leadership, and health psychology.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**ESC\_PS 8530: Developmental Psychopathology and Exceptionality**

An investigation into the presentation, diagnosis, and treatment of psychopathologies in individuals, emphasizing causal pathways, risks/resiliency, prevalence, incidence, and continuity/discontinuity of the disorders from research in the field of developmental psychopathology. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8550: Diversity and Multiculturalism II - Practical Application**

This course is part two in the Multicultural Education Certificate series of online courses designed for students working in a broad range of professions, such as health care, social work, education, school counseling, administration, etc. Students will examine various topics on diversity and multiculturalism to enhance their personal and professional development. To this end, the milieu of this course will be a safe online environment that is conducive to open dialogue, self-reflection, critical thinking, and questioning, and one in which students can actively engage in the learning process through affective and cognitive approaches. Postings, along with relevant readings and assignments, will be used as

the primary tools and resources for this collective learning experience.  
Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ESC\_PS 8450

---

**ESC\_PS 8555: African American Education - Historic and Current Issues**

Critical examination of the deculturalization of American educational system. Concepts of race, culture, and 'post racial society' are juxtaposed with social and systemic trends impacting African American students both in and out of the classroom. Pedagogical strategies are discussed. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ESC\_PS 8450

---

**ESC\_PS 8560: Immigrant Issues in Education**

The purpose of this course is to increase the level of cross-cultural awareness, knowledge, and skills of school personnel working with students who are immigrants. It is designed to be practically and experientially oriented. Activities and assignments in the class are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings. The anticipated outcome includes improved skills in conceptualizing the unique needs of and responding with appropriate approaches to effectively assist students who are immigrants. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ESC\_PS 8450

---

**ESC\_PS 8565: Gay, Lesbian and Bisexual Issues in the Schools**

This online course seeks to expand your perspective, worldview, and knowledge of GLB individuals and in your work environments as well as an invitation to promote social justice to make positive changes for the benefit of GLB individuals. Individuals who identify as GLB face many unique experiences, challenges, and opportunities during their developmental life span including issues related to coming out, psychological well-being and mental health development, heterosexism and homophobia, stereotypes and myths, and sexual identity. These issues and more are discussed in the course. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ESC\_PS 8450

---

**ESC\_PS 8590: Multicultural Counseling Competencies: Theory and Research**

This course will introduce students to the current status of multicultural counseling theories and research issues and help students to increase their knowledge of cultural differences in counseling and psychology. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8640: Interviewing, Diagnosis, and Assessment**

Introduction to clinical, psychometric assessment, and diagnosis. Data-gathering methods include interviews and tests/inventories of intellectual functioning, abilities, personality, and interests. Students

utilize psychological reports to inform assessment, diagnosis and treatment.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ESC\_PS 8082

---

**ESC\_PS 8655: Item Response Theory**

Introduces modern scaling with Item Response Theory, and includes how it can be used to statistically specify information about latent variables and the stimuli (e.g., tests) used to represent them.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 9640 and ESC\_PS 9650

---

**ESC\_PS 8690: Educational Planning and Evaluation**

This course addresses major issues and models used in educational program planning and evaluation, including the appropriate use of various evaluation models and different types of data.

**Credit Hours:** 3

**Prerequisites:** departmental inquiry course, ESC\_PS 8830 and/or ESC\_PS 8957

---

**ESC\_PS 8700: Life/Career Coaching and Development**

Designed to teach life and career coaching strategies with roots in career psychology and positive psychology. It provides the tools and knowledge on how to coach people to achieve their personal and professional goals.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7200

---

**ESC\_PS 8710: Meaning In Work**

Covers a broad look at meaning and vocation using theoretical and empirical frameworks. Also explores the influence of culture, environment, relationships and personal values on meaning development while providing a framework for working from a coaching/counseling standpoint to help others identify or develop meaningful vocations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7200

---

**ESC\_PS 8720: Community and Stewardship**

Examines the concepts of community and stewardship, explores the literal roots of the word (common-unity) and our ability to respond (responsibility) to and build our communities. Also explores the connections between altruism, personal well-being, and social stewardship.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7200

---

**ESC\_PS 8730: Positive Organizational Psychology**

Surveys the impact of positive organizational psychology research throughout professional organizations. Students will learn empirically defined elements of positive work environments and learn the building blocks associated with this field including: Appreciative Inquiry, the Abundance Approach, Strengths-Based Organizations, Positive Work Environments, and Employee Engagement and Satisfaction.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7200

---

**ESC\_PS 8850: Quantitative Foundations in Educational Research**

This course is designed to provide students the fundamental and necessary quantitative methods skills in educational research. Topics include one-way and factorial analysis of variance (ANOVA), analysis of covariance (ANCOVA), repeated measures ANOVA, random-effects ANOVA, simple linear regression, multiple regression, regression diagnostics, introduction to logistic regression, and statistical power analysis. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7170

---

**ESC\_PS 8860: Statistical Data Management and Analysis in Educational Research**

Good data management is a prerequisite for successful research, needed for reproducibility of results, and essential when collaborating with others. The focus of this course is the application of various techniques with different educational databases using R. By the end of the class, students should feel comfortable importing data using different formats, recoding/renaming variables, merging data from different sources, reshaping data, handling missing values, and creating graphs/tables/plots. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8940: Counseling Psychology Practicum**

Supervised practice of counseling in an approved counseling setting. May be repeated. Graded on S/U basis only.

**Credit Hour:** 3-9

**Prerequisites:** ESC\_PS 8040, ESC\_PS 8135, and ESC\_PS 8640 and consent of counseling area faculty

---

**ESC\_PS 8943: Practicum in Multicultural Counseling Interventions**

Supervised practice of applied multicultural counseling interventions in a wide variety of approved community and university settings. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** ESC\_PS 8040 and either ESC\_PS 8570 or ESC\_PS 8590

---

**ESC\_PS 8948: Field Placement in Counseling/Supervision**

Students will conduct counseling and/or supervision in approved community agencies under the supervision of licensed practitioners. Graded on S/U basis only.

**Credit Hour:** 1-12

**Prerequisites:** completion of 9 credit hours of ESC\_PS 8040, and consent of the Counseling Area Faculty

---

**ESC\_PS 8957: Qualitative Methods in Educational Research I**

(same as LTC 8957 and ED\_LPA 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 8960: Interdisciplinary Child and Family Practicum**

This class includes a focus on child/family services with a systems/interdisciplinary approach. Students provide services via a mentorship model (strong supervision initially moving toward autonomy). Services include evaluations, therapy, consultation, psychiatric cross-training, and others. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** ESC\_PS 8040 and instructor's consent

---

**ESC\_PS 8990: Career Development Theory for Women**

Consideration of the relevance of theories of career development for women, and their application to the counseling of women. Supervised clinical experience in the application of theories to counseling high school age women.

**Credit Hours:** 3

---

**ESC\_PS 9000: Multicultural Issues in Counseling**

This course covers the research and theories of counseling racial/ethnic minorities and gays, lesbians, and bisexuals in the U.S. Examination of personal values and education about the interrelationship between race, class, gender, and sexuality are accomplished via structured activities.

**Credit Hours:** 3

**Recommended:** ESC\_PS 8340

---

**ESC\_PS 9020: Psychology of Crossing Cultural Borders**

The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. Students acquire knowledge of psychological processes associated with crossing cultural borders, and translate that knowledge into practical applications. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 9030: Social Bases of Behavior**

This courses provides an advanced level, broad overview of the field of social psychology in relation to applied psychology. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 9060: Advanced History and Systems of Psychology**

This course explores the origins of psychology in philosophy and the sciences, the development of the science of psychology in the 19th and 20th centuries, and current theoretical perspectives and research in relation to the enduring issues in psychology. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 9080: Biological Basis of Behavior**

This course is an advanced level doctoral seminar that provides a broad overview of biological bases for human behavior. It will examine the neurophysiological bases of 'normal' and 'abnormal' behavior using a developmental perspective. Graded on A-F basis only.

**Credit Hours:** 3

---

---

**ESC\_PS 9090: Doctoral Dissertation Educational School & Counseling Psychology**

Independent research leading to dissertation. Graded on S/U basis only.

**Credit Hour:** 1-12

**Prerequisites:** departmental consent

---

**ESC\_PS 9091: Internship in Counseling Psychology**

Supervised experience in counseling psychology on half- or full-time basis in approved internship station. May be repeated. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** departmental consent

---

**ESC\_PS 9092: Internship in School Psychology**

Supervised practice in school psychology in an educational setting. May be repeated. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** departmental consent

---

**ESC\_PS 9093: Doctoral Internship in School Psychology**

Supervised practice in doctoral-level school psychology in an institutional or applied setting. May be repeated. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** departmental consent

---

**ESC\_PS 9100: Advanced Psychological Measurement and Assessment**

Introduction to the scientific and psychometric foundations of clinical assessment, including measurement theory, reliability, validity, and scale/test construction. Primary focus on the development and validation of evidence-based, psychometrically-sound assessment tools. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor consent

---

**ESC\_PS 9125: Professional Iss. in Sch. Psych. II: Rsrch. Design & Application**

For first-year doctoral students in school psychology. Includes study of research design and methodological issues in the field of school psychology.

**Credit Hours:** 3

**Prerequisites:** Must be admitted to school psychology doctoral program

---

**ESC\_PS 9126: Prevention Science Research Design and Analysis**

Prevention Science Research is a graduate seminar intended to provide students with the theoretical and empirical foundations of prevention science. In particular, students will learn how to conceptualize problems from a prevention science perspective and design and evaluate preventive interventions using advanced methodologies. Opportunities for community based participatory research including research design and analysis, papers and briefs, grantwriting, and community collaborations regarding prevention programming particularly pertaining to children's mental health.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

---

**ESC\_PS 9250: School Psychology Practicum: Advanced**

This course is an advanced practicum for students providing school psychology services. Students develop higher-level skills in the areas of case coordination, diagnostic decision-making, intervention, and systems change. Graded S/U basis only. May be repeated for credit.

**Credit Hour:** 1-6

**Prerequisites:** Instructor's consent

---

**ESC\_PS 9260: Policy Practicum in Professional Psychology**

Policy Practicum is an advanced practicum focused on macro level skills for shaping policy and systems-level intervention. Students work within agencies that establish policy for special education, mental health, and other education/psychology-related issues. May be repeated for credit.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ESC\_PS 9400: Theories and Practices in Supervision**

Instruction and practice in the supervision of psychological services conducted in appropriate laboratories and agencies. Sections titled Counseling Psychology are graded on S/U basis only. Sections titled School Psychology are on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8940 or ESC\_PS 8944 and instructor's consent

---

**ESC\_PS 9450: Motivation**

Investigates human motivation applied to performance in schools, athletics, and personal life. Topics include goals, attributions, self-efficacy, interest, cultural differences, and rewards. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8320 or equivalent

---

**ESC\_PS 9530: Scientific Fdns of Counseling Psych I: Prof Iss &**

For first-year doctoral students in counseling psychology. This course focuses on the history of counseling psychology, in and scientific reasoning processes as they apply to both science and practice.

**Credit Hours:** 3

---

**ESC\_PS 9540: Scientific Foundations of Counseling Psych II: Rsrch, Dsgn & Appl**

For first-year doctoral students in applied psychology. Includes study of research design and methodological issues in the field of counseling psychology.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 9530

---

**ESC\_PS 9550: Scientific Writing in Counseling Psychology**

This course focuses on the technical skills needed for developing a scientific research proposal in counseling psychology.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 9530 and ESC\_PS 9540 and instructor's consent

---

---

**ESC\_PS 9560: Psychological Consultation: Schools**

The individual psychological consultation process between the mental health professional and school personnel. Techniques, models, research roles, and responsibilities are discussed. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 9570: Psychological Consultation: Organizations**

This course provides an introduction to the theory and practical skills required to effectively consult at the organizational level in a variety of settings and contexts. Graded on A-F basis only.

**Credit Hours:** 3

---

**ESC\_PS 9610: Applied Sport Psychology**

Building upon the knowledge base of sport psychology, this course integrates and synthesizes student's understandings of the wide array of concepts and theories of the field into meaningful applications and strategies aimed at enhancing the sport experience of others. A case study approach will be employed.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8515

---

**ESC\_PS 9620: Qualitative Methods in Educational Research II**

(same as ED\_LPA 9620 and LTC 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8957

---

**ESC\_PS 9640: Introduction to Theory of Educational Measurement**

Classical and modern test theory, including IRT, generalizability theory and test bias. Also covered are advanced strategies for investigating reliability and validity.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7170 and ESC\_PS 8082

---

**ESC\_PS 9650: Application of Multivariate Analysis in Educational Research**

The focus of this course will be on applications of multivariate analysis in educational research.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 8830 and ESC\_PS 8840 or equivalent and instructor's consent

---

**ESC\_PS 9660: Generalized Linear Modeling**

This course is designed to introduce students to the theory and application of generalized linear models (GLMs). GLMs provide a flexible generalization of the ordinary linear regression model. While the latter is restricted to continuous dependent variables (with normal error term), the GLM framework has been developed to analyze dependent variables that are, e.g., binary, polytomous nominal, ordinal, counted, censored, or bounded continuous. Graded on A-F basis only.

**Credit Hours:** 3

---

**Prerequisites:** ESC\_PS 8850

**Recommended:** Familiarity with the basics of the R statistical programming environment (see [www.r-project.org](http://www.r-project.org)) is assumed

---

**ESC\_PS 9710: Structural Equation Modeling**

Simultaneous analysis of relationships among variables. Topics included are path analysis, confirmatory factor analysis, hybrid models, and special types of structural models involving longitudinal data, multiple groups and analysis of means. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7170, ESC\_PS 8830, ESC\_PS 8840, ESC\_PS 9650

---

**ESC\_PS 9720: Hierarchical Linear Modeling**

Hierarchical Linear Modeling (HLM), including multilevel and longitudinal approaches, in applied research settings for the social, educational psychological, and health-related sciences. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** ESC\_PS 7170, ESC\_PS 8830, ESC\_PS 8840, ESC\_PS 9650; consent required

---

## Electrical And Computer Engineering Courses

**ECE 1000: Introduction to Electrical and Computer Engineering**

Introduction to the basic principles of electrical and computer engineering through hands-on activity. Course includes fundamentals of programming using Matlab, applied to electrical and computer engineering problems.

**Credit Hours:** 2

---

**ECE 2001: Experimental Course**

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

**Credit Hour:** 1-99

---

**ECE 2007: World of Neuroscience**

(same as BIOL\_EN 2007, BME 2007, CMP\_SC 2007). This in-class course will introduce undergraduates to the growing area of neuroscience from the perspectives of three disciplines: engineering, biology and psychology. Topics in the course will span multiple levels of neuroscience including genomic, genetic, molecular, cellular, systems, behavioral and clinical levels. Due to the interdisciplinary nature of the neuroscience, the classes will cover diverse topics. The topics will range from overviews of the key neurobiology areas, to lab sessions involving how to analyze your own brain signals (EEG), and to visits to brain imaging center and EEG lab. The overall goal is to provide a broad exposure to the fascinating world of interdisciplinary neuroscience. Graded on A-F basis only.

**Credit Hour:** 1

---

**ECE 2100: Circuit Theory I**

DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** A grade of C- or better in MATH 1700

---

---

**ECE 2210: Introduction to Logic Systems**

(same as CMP\_SC 2270). Introduces basic tools, methods and procedures to design combinational and sequential digital circuits and systems. Topics include number systems, Boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 1050 or INFOTC 1040

---

**ECE 3210: Microprocessor Engineering for Electrical Engineers**

Introduction to microprocessor architectures and programming; memory, memory management and cache organizations, bus configurations and timing implications; parallel I/O and serial communication interfaces.

**Credit Hours:** 4

**Prerequisites:** A grade of C or better in CMP\_SC 1050 and ECE 2210 or CMP\_SC 2270

---

**ECE 3220: Software Design in C and C++**

Software/Hardware development for embedded systems, including memory, I/O and interrupts; an overview of C and C++, class structures in object oriented programming; software development with UML and testing and debugging strategies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3280 or CMP\_SC 3280 or ECE 3210 with a grade of C or better

---

**ECE 3280: Computer Organization and Assembly Language**

(same as CMP\_SC 3280). Introduces computer architectures, programming concepts including parameter passing, I/O interrupt handling, DMA, memory systems, cache, and virtual memory. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** C or higher in CMP\_SC 2270 or ECE 2210, and C or higher in CMP\_SC 2050

---

**ECE 3410: Electronic Circuits and Signals I**

Electron Devices, modeling and applications to basic electronic circuits, including RC amplifiers and power supplies.

**Credit Hours:** 4

**Corequisites:** ECE 3810

---

**ECE 3510: Electromagnetic Fields**

Elements of vector analysis, transmission line theory, electrostatics, magnetostatics, time varying fields and plane waves. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** A grade of C- or better in PHYSCS 2760 and a grade of C or better in ECE 2100

**Corequisites:** MATH 4100

---

**ECE 3610: Semiconductors and Devices**

Crystal structure; quantum aspects of energy, radiation and matter; quantum mechanics and energy bands in solids; electronic and optical properties of semiconductors; p-n junctions and diodes; bipolar and field-effect transistors.

**Credit Hours:** 3

**Prerequisites:** A grade of C or better in ECE 3510

---

**ECE 3810: Circuit Theory II**

Impulse and step responses, RLC circuits, classical differential equations solutions, complex plane stability, frequency and Bode Analysis, Resonance, Laplace transforms, two-port networks, mutual inductance and transformers. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** A grade of C or better in ECE 2100

**Corequisites:** MATH 4100

---

**ECE 3830: Signals and Linear Systems**

Transform Analysis of Signals and Linear Systems. Laplace transforms, z-transforms, Fourier series and transforms.

**Credit Hours:** 3

**Prerequisites:** A grade of C or better in ECE 3810

---

**ECE 3840: Measurement and Instrumentation**

Covers 1) theory and applications of measurement and instrumentation systems; 2) signal conditioning circuits; 3) software-controlled automatic test equipment (ATE); and 4) software-controlled data acquisition systems. Graded on an A-F basis only.

**Credit Hours:** 3

**Prerequisites:** A grade of C or better ECE 3210 or ECE 3280, ECE 3410, ECE 3830, and a grade of C- or better in STAT 4710

---

**ECE 4001: Topics in Electrical and Computer Engineering**

Current and new technical developments in electrical engineering.

**Credit Hour:** 1-4

**Prerequisites:** senior standing

---

**ECE 4020: Energy Systems and Resources**

(same as NU\_ENG 4315, MAE 4371; cross-leveled with ECE 7020, NU\_ENG 7315). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

**Credit Hours:** 3

**Prerequisites:** ENGINR 2300

---

**ECE 4030: Introduction to Nuclear Reactor Engineering**

(same as NU\_ENG 4346; cross-leveled with ECE 7030, NU\_ENG 7346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1200, ENGINR 2300

---

**ECE 4040: Introduction to Nuclear Physics**

(cross-leveled with ECE 7040). Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** senior standing or graduate standing in engineering or equivalent mathematical preparation

---

**ECE 4070: Numerical Methods for Science and Engineering**

(same as CMP\_SC 4070; cross-leveled with ECE 7070, CMP\_SC 7070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050, junior standing, or Instructor's consent

**Recommended:** Students are expected to have basic knowledge in discrete math and algorithms

---

**ECE 4085: Problems in Electrical and Computer Engineering**

Analytical or experimental problems pertaining to electric circuits, machines, fields or electronics.

**Credit Hour:** 1-3

**Recommended:** 12 hours Electrical and Computer Engineering credit or instructor's consent

---

**ECE 4220: Real Time Embedded Computing**

(cross-leveled with ECE 7220). Embedded systems development with real time constraints including RTOS, task management and synchronization, real time scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3220

---

**ECE 4250: VHDL and Programmable Logic Devices**

(cross-leveled with ECE 7250). Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors.

**Credit Hours:** 4

**Prerequisites:** ECE 3210 or ECE 3280 or CMP\_SC 3280 with a grade of C or better

---

**ECE 4270: Computer Architecture**

(same as CMP\_SC 4270; cross-leveled with ECE 7270, CMP\_SC 7270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

**Credit Hours:** 4

**Prerequisites:** CMP\_SC 2050 and ECE 3280 or CMP\_SC 3280 or ECE 3210 with a grade of C or better

---

**ECE 4280: Network Systems Architecture**

(same as CMP\_SC 4280; cross-leveled with ECE 7280, CMP\_SC 7280). The course covers network systems interconnects and switch fabrics, network considerations: and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** C- or higher in CMP\_SC 2050 or ECE 3220 and C- or higher in CMP\_SC 3280 or ECE 3210

---

**ECE 4310: Feedback Control Systems**

(same as BIOL\_EN 4310, MAE 4750; cross-leveled with BIOL\_EN 7310, ECE 7310, MAE 7750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

---

**ECE 4320: Architectural Robotics**

(cross-leveled with ECE 7320). Architectural robotics has been defined as 'intelligent and adaptable built environments (featuring embedded robotic components) that sense, plan, and act'. This course will cover the basic concepts required for understanding, developing, and testing embedded robotic systems for the built environment. Students will work together in teams in a studio-style format which emphasizes hands-on projects to develop working prototypes. The goal is to offer students an opportunity for creativity in an interdisciplinary setting. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** junior or senior standing

---

**ECE 4330: Introduction to Mechatronics and Robotic Vision**

(cross-leveled with ECE 7330). Covers 1) mechatronic systems; 2) the mathematical tools used to model industrial and mobile robots; and 3) vision sensors, their underlying models and algorithms that allow us to control and interact with robots.

**Credit Hours:** 4

**Prerequisites:** ECE 3220 or ECE 4220

**Recommended:** a C/C++ languages

---

**ECE 4340: Building Intelligent Robots**

(same as CMP\_SC 4730; cross-leveled with ECE 7340, CMP\_SC 7740). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Recommended: programming experience in one of the following programming languages: Basic, C, C++, or Java.

**Credit Hours:** 4

**Prerequisites:** junior standing

---

**ECE 4350: Programmable Logic Controllers**

(cross-leveled with ECE 7350). Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.

**Credit Hours:** 4

**Prerequisites:** junior standing

---

---

**ECE 4410: Power Electronics I**

(cross-leveled with ECE 7410). Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.

**Credit Hours:** 4

**Prerequisites:** ECE 3410

---

**ECE 4430: Electronic Circuits and Signals II**

(cross-leveled with ECE 7430). Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.

**Credit Hours:** 3

**Prerequisites:** ECE 3830 and ECE 3410

---

**ECE 4440: Power Systems Analysis**

(cross-leveled with ECE 7440). Selected topics related to modern power system analysis. Single and three-phase balanced power; Transformers and the per unit concept; Properties and analysis of transmission lines; power flow analysis; symmetrical and asymmetrical faults; system stability; power distribution; use of Powerworld software. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3810 and MATH 4100 or instructor's consent

---

**ECE 4460: Energy and Machines**

(cross-leveled with ECE 7460). Theory and applications of electric machines. Performance analysis of AC Synchronous, Induction and DC machines with emphasis on modern efficiency improvements. Fundamentals of electronic speed controls.

**Credit Hours:** 3

**Prerequisites:** ECE 3510

---

**ECE 4470: Sustainable Electrical Energy Resources**

(cross-leveled with ECE 7470). Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.

**Credit Hours:** 3

**Prerequisites:** ECE 2100 or ENGINR 2100

---

**ECE 4510: Pulsed Power Engineering**

(cross-leveled with ECE 7510). Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety.

**Credit Hours:** 3

**Prerequisites:** ECE 3510

---

**ECE 4550: Introduction to Plasmas**

(same as NU\_ENG 4375; cross-leveled with ECE 7550, NU\_ENG 7375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

**Credit Hours:** 3

**Prerequisites:** ECE 3510

---

---

**ECE 4590: Computational Neuroscience**

(same as BIOL\_EN 4590, BIO\_SC 4590, BME 4590; cross-leveled with ECE 7590, BIOL\_EN 7590, BIO\_SC 7590). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** MATH 1500 or equivalent

---

**ECE 4620: Introduction to BioMEMS**

(cross-leveled with ECE 7620). Study of BioMEMS devices and applications. Topics cover BioMEMS including overview of microfabrication techniques, common bioMEMS material, microfluidic principles, microfluidic devices, drug delivery, biomedical microdevices for neural implants, patch-clamping and single cell based analysis systems, microelectroporation, DNA microarrays, Polymerase Chain Reaction and biopolymers, chemical and gas sensors and biosensors. Graded on A-F basis only.

**Credit Hours:** 3

---

**ECE 4630: Introduction to Optical Electronics**

(cross-leveled with ECE 7640). Principles, devices and materials used to generate, modulate, and detect optical radiation. Review of important properties of light and semiconductors. Light-emitting diodes and lasers. Electro-optic modulation. Thermal and quantum detection. Emphasis on semiconductor-based devices and application to fiber-optical communications.

**Credit Hours:** 3

**Prerequisites:** ECE 3610

---

**ECE 4640: MEMS Laboratory**

(cross-leveled with ECE 7640). The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical Systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** PHYSCS 2760, CHEM 1320, or ECE 2100

---

**ECE 4650: Semiconductor Device Theory**

(cross-leveled with ECE 7650). Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.

**Credit Hours:** 3

**Prerequisites:** ECE 3610

---

**ECE 4655: Digital image Processing**

(same as CMP\_SC 4650; cross-leveled with ECE 7655, CMP\_SC 7650). This course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 and STAT 4710 or instructor's consent

---

**ECE 4670: Microelectronic Fabrication**

(cross-leveled with ECE 7670). Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.

**Credit Hours:** 4

**Prerequisites:** ECE 3610

---

**ECE 4675: Digital Image Compression**

(same as CMP\_SC 4670; cross-leveled with ECE 7675, CMP\_SC 7670). This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.)

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050

---

**ECE 4710: Communications Systems**

(cross-leveled with ECE 7710). Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.

**Credit Hours:** 3

**Prerequisites:** ECE 3830

---

**ECE 4720: Introduction to Machine Learning and Pattern Recognition**

(Same as CMP\_SC 4720; cross-leveled with ECE 7720, CMP\_SC 7720) This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problems of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications.

**Credit Hours:** 3

**Prerequisites:** C- or higher in CMP\_SC 2050 and STAT 4710 or instructor consent

---

**ECE 4730: Introduction to Wireless Communication System**

(cross-leveled with ECE 7730). Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

**Credit Hours:** 3

---

**ECE 4830: Introduction to Digital Signal Processing**

(cross-leveled with ECE 7830). Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform.

**Credit Hours:** 4

**Prerequisites:** ECE 2210, ECE 3830

---

**ECE 4870: Introduction to Computational Intelligence**

(same as CMP\_SC 4770; cross-leveled with ECE 7870, CMP\_SC 7770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects

---

**ECE 4880: Micro/Nano Systems**

(cross-leveled with ECE 7880). Micro/nano systems covers various micro/nanotechnologies, micro sensors and actuators including digital light processors, accelerometers, gyroscopes, micro optical switches and components, micro speakers, RF switches, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Major mechanisms/principles for micro/Nano devices and systems are also covered. The Micro/Nano Systems focuses on the miniaturization technologies that have important roles in materials, mechanical, and biomedical engineering practice. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3610 or instructor's consent

---

**ECE 4930: Intermediate Electromagnetics**

(cross-leveled with ECE 7930). Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems.

**Credit Hours:** 4

**Prerequisites:** ECE 3510

---

**ECE 4940: Antenna Theory, Design and Laboratory**

(cross-leveled with ECE 7940). Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, various antennas.

**Credit Hours:** 4

**Prerequisites:** ECE 3510

---

**ECE 4960W: Senior Capstone Design I - Writing Intensive**

Lectures on safety, ethics, professionalism, intellectual property, product liability, contemporary issues, and project management. Provides the senior Capstone project proposal experience, incorporating multidisciplinary project design and project management skills. Oral presentations and written reports. Not for graduate credit. Graded A-F only. Recommended: Post-requisite: ECE 4980.

**Credit Hours:** 3

**Prerequisites:** Restricted to EECS Department students only, or instructor's consent

---

**ECE 4970: Senior Capstone Design**

Group Design Projects. Design methodology, project management, development of specifications, examination of alternatives, preparation

of proposal. Lectures on safety, ethics, professionalism, and economics. Oral and written reports. Not for graduate credit.

**Credit Hours:** 3

**Prerequisites:** A grade of C or better in ECE 3110 or ECE 3840 and senior standing. Restricted to Electrical and Computer Engineering students only or instructor's consent

---

#### **ECE 4970W: Senior Capstone Design - WI**

Group Design Projects. Design methodology, project management, development of specifications, examination of alternatives, preparation of proposal. Lectures on safety, ethics, professionalism, and economics. Oral and written reports. Not for graduate credit.

**Credit Hours:** 3

**Prerequisites:** A grade of C or better in ECE 3110 or ECE 3840 and senior standing. Restricted to Electrical and Computer Engineering students only or instructor's consent

---

#### **ECE 4980: Senior Capstone Design II**

Provides the senior Capstone design experience where multidisciplinary teams reduce to practice a proposed product. Oral and written reports. Not for graduate credit. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** ECE 3840, ECE 4960, Senior standing, Restricted to EECS Department students only, or instructor's consent

---

#### **ECE 4990: Undergraduate Research in Electrical Computer Engineering**

Supervised independent study or project in electrical or computer engineering, culminating in a written report.

**Credit Hour:** 1-3

**Prerequisites:** Undergraduate Program Director's consent

---

#### **ECE 4995: Undergraduate Honors Research in Electrical Computer Engineering**

Independent investigation or project in electrical or computer engineering to be presented as an undergraduate honors thesis. Enrollment is limited to students participation in the Electrical and Computer Engineering Honors Program.

**Credit Hour:** 1-3

---

#### **ECE 7001: Advanced Topics in Electrical and Computer Engineering**

Current and new technical developments in electrical engineering.

**Credit Hour:** 1-4

---

#### **ECE 7010: Digital Computer Applications in Engineering**

Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation and differential equations.

**Credit Hours:** 3

**Prerequisites:** MATH 2300

---

#### **ECE 7020: Energy Systems and Resources**

(same as NU\_ENG 7315, MAE 7371; cross-leveled with ECE 4020, NU\_ENG 4315, MAE 4371). Analysis of present energy usage in

Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

**Credit Hours:** 3

**Prerequisites:** ENGINR 2300

---

#### **ECE 7030: Introduction to Nuclear Reactor Engineering**

(same as NU\_ENG 7346; cross-leveled with ECE 4030, NU\_ENG 4346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.

**Credit Hours:** 3

**Prerequisites:** graduate ENGINR 1200, ENGINR 2300

---

#### **ECE 7040: Introduction to Nuclear Physics**

(cross-leveled with ECE 4040). Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** senior standing or graduate standing in engineering or equivalent mathematical preparation

---

#### **ECE 7070: Numerical Methods for Science and Engineering**

(same as CMP\_SC 7070; cross-leveled with ECE 4070, CMP\_SC 4070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050, junior standing, or Instructor's consent

**Recommended:** Students are expected to have basic knowledge in discrete math and algorithms

---

#### **ECE 7220: Real Time Embedded Computing**

(cross-level with ECE 4220). Embedded systems development with real time constraints including RTOS, task management and synchronization, realtime scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Graded A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3220

---

#### **ECE 7250: VHDL and Programmable Logic Devices**

(cross-leveled with ECE 4250). Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors.

**Credit Hours:** 4

**Prerequisites:** ECE 3210 or ECE 3280 or CMP\_SC 3280 with a grade of C or better

---

---

**ECE 7270: Computer Architecture**

(same as CMP\_SC 7270; cross-leveled with ECE 4270, CMP\_SC 4270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

**Credit Hours:** 4

**Prerequisites:** CMP\_SC 2050 and ECE 3280 or CMP\_SC 3280 or ECE 3210 with a grade of C or better

---

**ECE 7280: Network Systems Architecture**

(same as CMP\_SC 7280; cross-leveled with ECE 4280, CMP\_SC 4280). The course covers network systems interconnects and switch fabrics, network considerations and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** CMP\_SC 2050 or ECE 3200 and CMP\_SC 3280 or ECE 3210

---

**ECE 7310: Feedback Control Systems**

(same as BIOL\_EN 7310, MAE 7750; cross-leveled with ECE 4310, BIOL\_EN 4310, MAE 4750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control.

**Credit Hours:** 3

**Prerequisites:** MATH 4100

---

**ECE 7320: Architectural Robotics**

(cross-leveled with ECE 4320). Architectural robotics has been defined as "intelligent and adaptable built environments (featuring embedded robotic components) that sense, plan, and act". This course will cover the basic concepts required for understanding, developing, and testing embedded robotic systems for the built environment. Students will work together in teams in a studio-style format which emphasizes hands-on projects to develop working prototypes. The goal is to offer students an opportunity for creativity in an interdisciplinary setting. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** ECE 4970 or equivalent

---

**ECE 7330: Introduction to Mechatronics and Robotic Vision**

(cross-leveled with ECE 4330). Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuation function; robots and AI; microprocessor applications. Lecture and Laboratory. Recommended: a C/C++ Language course.

**Credit Hours:** 4

**Prerequisites:** ECE 3220 or ECE 4220

---

**ECE 7335: Nuclear Safeguards Science and Technology**

(same as NU\_ENG 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues.

**Credit Hours:** 3

**Prerequisites:** NU\_ENG 4303 or NU\_ENG 7303

---

---

**ECE 7340: Building Intelligent Robots**

(same as CMP\_SC 7730; cross-leveled with ECE 4340, CMP\_SC 4730). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.

**Credit Hours:** 4

**Recommended:** some programming experience

---

**ECE 7350: Programmable Logic Controllers**

(cross-leveled with ECE 4350). Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.

**Credit Hours:** 4

---

**ECE 7370: Automatic Control System Design**

(cross-leveled with ECE 4370). Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems.

**Credit Hours:** 3

**Prerequisites:** ECE 4310

---

**ECE 7410: Power Electronics I**

(cross-leveled with ECE 4410). Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.

**Credit Hours:** 4

**Prerequisites:** ECE 3410

---

**ECE 7430: Electronic Circuits and Signals II**

(cross-leveled with ECE 4430). Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.

**Credit Hours:** 3

**Prerequisites:** ECE 3830 and ECE 3410

---

**ECE 7440: Power Systems Analysis**

(cross-leveled with ECE 4440). Selected Topics related to modern power system analysis. Single and three-phase balanced power; Transformers and the per unit concept; Properties and analysis of transmission lines; power flow analysis; symmetrical and asymmetrical faults; system stability; power distribution; use of Powerworld software. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3810 and MATH 4100 or instructor's consent

---

**ECE 7460: Energy and Machines**

(cross-leveled with ECE 4460). Theory and applications of electric machines. Performance analysis of AC synchronous induction and

DC machines with emphasis on modern efficiency improvements.  
Fundamentals of electronic speed controls.

**Credit Hours:** 3

**Prerequisites:** ECE 3510

---

**ECE 7470: Sustainable Electrical Energy Resources**

(cross-leveled with ECE 4470). Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.

**Credit Hours:** 3

**Prerequisites:** ECE 2100 or ENGINR 2100

---

**ECE 7510: Pulsed Power Engineering**

(cross-leveled with ECE 4510). Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety.

**Credit Hours:** 3

**Prerequisites:** ECE 3510

---

**ECE 7540: Neural Models and Machine Learning**

(same as CMP\_SC 7540, BIOL\_en 7540; cross-leveled with BME 4540, CMP\_SC 4540, ECE 4540, BIOL\_EN 4540). The projects-based course has three inter-linked components: (I) math models of neurons and neural networks, (II) machine learning in neuroscience, after a brief introduction to python and (III) software automation and cyberinfrastructure to support neuroscience. Extensive projects focusing on software automation and machine learning components, with brief in-class presentations. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1500 or consent of instructor

**Recommended:** Introductory software programming, and introductory cell biology or consent of instructor

---

**ECE 7550: Introduction to Plasmas**

(same as NU\_ENG 7375; cross-leveled with ECE 4550, NU\_ENG 4375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

**Credit Hours:** 3

**Prerequisites:** ECE 4930

---

**ECE 7590: Computational Neuroscience**

(same as BIOL\_EN 7590, BIO\_SC 7590; cross-leveled with BIOL\_EN 4590, BIO\_SC 4590, ECE 4590, BME 4590). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** MATH 1500 or equivalent

---

**ECE 7620: Introduction to BioMEMS**

(cross-leveled ECE 4620). BioMEMS materials, fabrication techniques, micro-fluidic principles and devices, drug delivery, biomedical micro-devices for neural implants, patch clamping and single cell based systems, micro-electroporation, DNA microarrays, Polymerase Chain Reaction, chemical/gas/bio-sensors. Graded on A-F basis only.

**Credit Hours:** 3

---

**ECE 7630: Introduction to Optical Electronics**

(cross-leveled with ECE 4630). Principles, devices and materials used to generate, modulate, and detect optical radiation. Review of important properties of light and semiconductors. Light-emitting diodes and lasers. Electro-optic modulation. Thermal and quantum detection. Emphasis on semiconductor-based devices and application to fiber-optical communications.

**Credit Hours:** 3

**Prerequisites:** ECE 3610

---

**ECE 7640: MEMS Laboratory**

(cross-leveled with ECE 4640). The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** PHYSICS 2760, CHEM 1320 or ECE 2100; instructor's consent

---

**ECE 7650: Semiconductor Device Theory**

(cross-leveled with ECE 4650). Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.

**Credit Hours:** 3

**Prerequisites:** ECE 3610

---

**ECE 7655: Digital Image Processing**

(same as CMP\_SC 7650; cross-leveled with ECE 4655, CMP\_SC 4650). The course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3

**Prerequisites:** STAT 4710 and CMP\_SC 2050 or instructor's consent

---

**ECE 7670: Microelectronic Fabrication**

(cross-leveled with ECE 4670). Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.

**Credit Hours:** 4

**Prerequisites:** ECE 3610

---

**ECE 7675: Digital Image Compression**

(same as CMP\_SC 7670; cross-leveled with ECE 4675, CMP\_SC 4670). This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer

design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.)

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050

---

**ECE 7690: Design and Simulation of VLSI Circuits**

(cross-leveled with ECE 4690). Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory.

**Credit Hours:** 4

**Prerequisites:** ECE 4670

---

**ECE 7710: Communications Systems**

(cross-leveled with ECE 4710). Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.

**Credit Hours:** 3

**Prerequisites:** ECE 3830

---

**ECE 7720: Introduction to Machine Learning and Pattern Recognition**

(same as CMP\_SC 7720; cross-leveled with ECE 4720, CMP\_SC 4720). This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problem of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 2050 and STAT 4710 or instructor's consent

---

**ECE 7730: Introduction to Wireless Communication System**

(cross-leveled with ECE 4730). Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

**Credit Hours:** 3

---

**ECE 7810: Multimedia Engineering and Technology**

(same as CMP\_SC 7810). Survey of multimedia applications. Capture, coding, storage, transmission, and software tools for developing productions involving text, graphics, images, animation, sound and video. Term projects. Lecture and laboratory.

**Credit Hours:** 4

**Prerequisites:** ECE 3210 and ECE 3830

---

**ECE 7830: Introduction to Digital Signal Processing**

(cross-leveled with ECE 4830). Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform.

**Credit Hours:** 4

**Prerequisites:** ECE 2210, ECE 3830

---

**ECE 7870: Introduction to Computational Intelligence**

(same as CMP\_SC 7770; cross-leveled with ECE 4870, CMP\_SC 4770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects

---

**ECE 7880: Micro/Nano Systems**

(cross-leveled with ECE 4880). Micro/Nano systems covers various micro/nanotechnologies, micro sensors and actuators including digital light processors, accelerometers, gyroscopes, micro optical switches and components, micro speakers, RF switches, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Major mechanisms/principles for micro/Nano devices and systems are also covered. The Micro/Nano Systems focuses on the miniaturization technologies that have important roles in materials, mechanical, and biomedical engineering practice. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 3610 or instructor's approval

---

**ECE 7930: Intermediate Electromagnetics**

(cross-leveled with ECE 4930). Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems

**Credit Hours:** 4

**Prerequisites:** ECE 3510

---

**ECE 7940: Antenna Theory, Design and Laboratory**

(cross-leveled with ECE 4940). Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, and various wire antennas.

**Credit Hours:** 4

**Prerequisites:** ECE 3510

---

**ECE 7950: Microwave Principles**

(cross-leveled with ECE 4950). Maxwell's Equations, transmission lines, plane wave propagation and reflection, waveguides, resonant cavities, microwave devices and components, radiation, radio wave propagation. Lecture and laboratory.

**Credit Hours:** 4

**Prerequisites:** ECE 3510 and ECE 3410

---

**ECE 8001: Advanced Topics in Electrical and Computer Engineering**

Advanced Topics in Electrical and Computer Engineering. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** may vary from semester to semester depending on topic

---

---

**ECE 8010: Supervised Study in Electrical Engineering**

Supervised individual study at the graduate level to be completed within the course of one semester in the form of a brief report. Graded on S/U basis only

**Credit Hour:** 1-3

---

**ECE 8011: Software and Cyber Automation in Neuroscience**

This seminar course will emphasize software and cyber automation tools in neuroscience to address the emerging needs of big data in neuroscience. Students will work in pairs to address such needs of various neuroscience Labs both within MU and with collaborators outside MU. The students pairs will be provided a list of automation projects to work on (one or maximum two) during the semester, under close supervision of the instructors. They will also be provided access to local cyberinfrastructure at MU, national cyberinfrastructure resources such as CyVerse ([www.cyverse.org](http://www.cyverse.org)) and Neuroscience Gateway (<https://www.nsgportal.org>), as well as public clouds such as XSEDE and Amazon Web Services. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Basic software programming, basic cell biology, or consent of instructor

---

**ECE 8085: Problems in Electrical and Computer Engineering**

Supervised investigation of an electrical engineering problem for an MS project. Study culminates in a project report. Graded on a S/U basis only.

**Credit Hour:** 2-5

---

**ECE 8110: Preparing Advanced Professionals - I**

Discussions on a variety of topics: Pedagogy - latest from cognitive science and learning theory, effective teaching, how a university functions, engineering teaching and research; how leading industries perform research and the importance of soft skills, etc. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** restricted to graduate Engineering majors only

---

**ECE 8120: Preparing Advanced Professionals - II**

Continues format of ECE 8110 with group discussions and seminars by experts on how to write an effective proposal, including a review of model proposals, model proposal reviews, and a 'hands-on' proposal writing followed by globalization and its effects on professionals. Graded on A-F only.

**Credit Hour:** 1

**Prerequisites:** graduate engineering majors only

---

**ECE 8270: Parallel Computer Architecture**

The course covers parallel computer architecture (general purpose multi-core and many-core processors, shared and distributed memory systems, clusters). Emphasis will be given to both architectural and programmability aspects. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4270 or ECE 7270, ECE 4220 or ECE 7220 or CMP\_SC 4250 or CMP\_SC 7250

---

**ECE 8320: Nonlinear Systems**

Nonlinear systems including topics such as limit cycles, phase plane analysis, bifurcation, Lyapunov stability, input-output stability, passivity. Topics from control such as feedback linearization, sliding control, and Lyapunov redesign. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4310

---

**ECE 8510: Advanced Electromagnetics**

Advanced theoretical electromagnetic theory. Investigation of summation problems with general boundary conditions, time varying fields, and time harmonic currents. Basic applications and relationships in classical and relativistic physics.

**Credit Hours:** 3

**Prerequisites:** ECE 3510

---

**ECE 8520: Direct Energy Conversion Technologies**

Study of direct energy conversion technology and research trends in this area. Topics include energy storage techniques (mechanical, chemical, thermal, inductive, capacitive), thermoelectric generators, photovoltaic generators, thermionic generators, magnetohydrodynamic generators, piezoelectric generators, wind generators, fuel cells. Current research trends in this area will also be examined. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE Majors or instructors consent

---

**ECE 8530: Advanced Photonics**

Concentrated study of optical system design, including integrated optics, semiconductor lasers, quantum wells, optical materials, and electro-optical effects used in modern optical systems.

**Credit Hours:** 3

**Prerequisites:** ECE 4530

---

**ECE 8540: Advanced Network Theory and Applications**

Advanced study of network theorems including compensation, reciprocity, duality, and maximum power. Theory and application of N-port parameters. Linear and non-linear network synthesis techniques. Analysis of ordinary and partial differential equations to develop electrical analogs for mechanical, pneumatic, thermal, hydraulic systems. Study of non-linear circuit analysis and modeling techniques. Current research trends in this area will also be examined. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE Majors or instructors consent

---

**ECE 8570: Neural Dynamics and Communication**

(same as CMP\_SC 8570). Properties of nerve cells including membrane potential, action potential, ion channel dynamics, GHK equation, dynamical properties of excitable membranes, neuronal communication and plasticity. Entrainment, synchronization and oscillations in neuronal networks, and their functional significance. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE4590/CMP\_SC 4590/BIOL\_EN 4590/BME 4590 or consent of instructor

---

---

**ECE 8580: Machine Learning in Neuroscience**

(same as CMP\_SC 8580). Basics of neuronal and network dynamics including spikes and communication between regions, including via competing hypotheses. Machine learning fundamentals including linear, logistic and artificial neural network mappings. Integration of data-driven and theory-driven models, with emphasis on insights into neuroscience via XAI approaches. Software automation in neuroscience including python notebooks and cyberinfrastructure tools for interacting with repositories and HPC resources. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4590/CMP\_SC 4590 or consent of instructor

---

**ECE 8610: Power Semiconductor Devices**

A study of the semiconductor devices used in switch-mode power converter circuits. Course surveys the field and discusses selected devices in depth.

**Credit Hours:** 3

**Prerequisites:** ECE 3610, ECE 4630 and ECE 4650

---

**ECE 8620: Advanced Microelectromechanical Systems**

MEMS development cycle, overview of microfabrication, microsystem modeling, mechanical analysis, thermal analysis, transduction mechanism, case studies; Micromirror, accelerometers, pressure sensors, force sensors, RF MEMS switches, Infrared sensors, and Microsystem packaging.

**Credit Hours:** 3

---

**ECE 8675: Biomedical Image Processing**

(same as CMP\_SC 8675). This course introduces students to the fundamentals of biomedical image processing and analysis with an emphasis on cellular and tissue microscopy along with anatomical imaging. The course will cover image and video processing techniques and pipelines for image enhancement, restoration, registration, detection, segmentation, classification, and motion analysis that are tailored for biomedical image informatics. This course will provide a rich exposure to a broad range of imaging datasets from the molecular to the anatomical; and train students to implement algorithms for moderately complex tasks in biomedical image analysis. This course is suitable for graduate students in all fields of engineering and science who are interested in understanding and implementing biomedical and biological image analytics and are seeking pointers to the broad literature in the field. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4655/ECE 7655 or CMP\_SC 4650/CMP\_SC 7650 or instructor's consent

---

**ECE 8690: Computer Vision**

(same as CMP\_SC 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 4655 or ECE 7655 or CMP\_SC 4650 or CMP\_SC 7650 or instructor's consent

---

**ECE 8695: Cognitive Computer Vision**

One of the more recent trends in computer vision research in the pursuit of human-like capability is the coupling of cognition and vision into cognitive computer vision. This course will emphasize the advanced topics in applying machine learning techniques in computer vision.

**Credit Hours:** 3

**Prerequisites:** ECE 4850 or ECE 7850 or CMP\_SC 4650 or CMP\_SC 7650 or consent of instructor

---

**ECE 8725: Supervised Learning**

(same as CMP\_SC 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4720 or CMP\_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

---

**ECE 8730: Fundamentals of Radar Signal Processing**

Study of radar signal processing fundamentals. Topics include radar systems, signal models, sampling and quantization of radar signals, radar waveforms, Doppler processing, detection fundamentals, radar imaging.

**Credit Hours:** 3

---

**ECE 8735: Unsupervised Learning**

(same as CMP\_SC 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4720 or CMP\_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

---

**ECE 8790: Digital Processing of SAR Data**

Study of digital processing of synthetic aperture radar (SAR) data. Topics cover SAR data fundamentals including concepts, signal processing, pulse compression, signal properties, processing algorithms, and image processing.

**Credit Hours:** 3

---

**ECE 8800: Sensor Array and Statistical Signal Processing**

Introduce the basics on sensor array processing, signal detection and parameter estimation, with their applications in communications and signal processing. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ECE 7830 and ECE 8860 or with instructor consent

---

**ECE 8810: Advanced Digital Signal Processing**

Topics in digital signal analysis and filtering. Including hardware implementation, speech synthesis and recognition, multi-dimensional transforms, random-signal concepts, design methods and computer aids to analysis and design.

**Credit Hours:** 3

**Prerequisites:** ECE 4830

---

**ECE 8830: Visual Signal Processing and Communications**

Threats visual digital signal processing and network communications covering both theory and application of coding, compression and communications via the web. Covers such standards as JPEG, MPEG-2 and MPEG-4 as well as motion detection. Graded on A-F basis only.

**Credit Hours:** 3

---

**ECE 8855: Advanced Image Processing**

(same as CMP\_SC 8650). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.

**Credit Hours:** 3

**Prerequisites:** CMP\_SC 4650 or CMP\_SC 7650 or instructor's consent

---

**ECE 8860: Probability and Stochastic Processes for Engineers**

Introduction to probability, multidimensional complex (phasor) random variables and stochastic processes in electrical engineering.

**Credit Hours:** 3

**Prerequisites:** ECE 4830, ECE 4710, or ECE 8620

---

**ECE 8875: Advanced Topics in Computational Intelligence**

(same as CMP\_SC 8780). This course is a continuation of ECE 7870 in the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation, and swarm intelligence. Advanced topics in these areas will be discussed with a focus on applications of these technologies.

**Credit Hours:** 3

**Prerequisites:** ECE 4870 or ECE 7870

---

**ECE 8890: Neural Networks**

(same as CMP\_SC 8770). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems.

**Credit Hours:** 3

**Prerequisites:** ECE 4870 or ECE 7870 or instructor's consent

---

**ECE 8990: Research-Master Thesis in Electrical and Computer Engineering**

Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**ECE 9001: Advanced Topics in Electrical and Computer Engineering**

Advanced Topics in Electrical and Computer Engineering

**Credit Hours:** 3

---

**ECE 9990: Research-Doctoral Dissertation Electrical & Computer Engineering**

Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

## Emergency Medicine Courses

**EMR\_ME 6034: SCC Emergency Medicine Selective**

This selective is designed to offer an introductory experience in Emergency Medicine, including all levels of acuity and pre-hospital emergency care. The student will work 15-16 (~140 hours) rotating shifts in the Emergency Department. During that time, the student will have free access to all patient care activities. The student will assist with patient evaluations and procedures under the close supervision of the Emergency attending physicians, residents, or physician assistants. Specific time will be devoted to learning basic skills needed in emergency medicine. An orientation skills lab will be provided early in the rotation to cover suturing, splinting, etc. Teaching will be primarily a one-on-one exchange with the residents and PA's/Attendings. There are night shifts in this rotation.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the first two years of medical school. Successful completion of 5 of the 7 core clerkships. Three of the 5 must be the Surgery Clerkship, Internal Medicine Clerkship, and either the Pediatrics or Family Medicine Clerkship

---

**EMR\_ME 6245: ABS Emergency Medicine Research and Review**

ABS Emergency Medicine Research and Review

**Credit Hour:** 5-10

---

**EMR\_ME 6461: Emergency Medicine-Ultrasound**

The purpose of this rotation is to provide M4 students the opportunity to understand the indications for and the physics behind Point of Care Ultrasound (POCUS) in the Emergency Department (ED). Additionally students will develop the mechanical skills necessary to obtain adequate images through real-time bedside image acquisition, as well as learn how to interpret the images and apply them to patients clinically. POCUS applications that will be of particular focus include some or all of the following: FAST, Early pregnancy, Abdominal aorta, Focused cardiac, Biliary, Renal/bladder, DVT evaluation, Lung, Soft tissue/musculoskeletal, Procedures.

**Credit Hours:** 5

**Prerequisites:** Successful completion of Emergency Medicine course 6860 (or equivalent) and faculty approval prior to enrollment

---

**EMR\_ME 6760: Emergency Medicine - Rural**

Emergency Medicine - Rural

**Credit Hours:** 5

---

**EMR\_ME 6860: EMERGENCY MEDICINE**

Emergency Medicine

**Credit Hours:** 5

---

**EMR\_ME 6919: Introduction to Emergency Medicine**

This elective is designed to offer an introductory experience in Emergency Medicine, including all levels of acuity and pre-hospital emergency care.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

---

**EMR\_ME 6920: Introduction to Pediatric Emergency Medicine**

This elective is designed to offer an introductory experience in Pediatric Emergency Medicine (PEM) including all levels of acuity and pre-hospital emergency care.

**Credit Hours:** 2

**Prerequisites:** successful completion of the first two years of medical school

---

**EMR\_ME 6943: SCC Emergency Medicine 2-week**

This elective is designed to offer an introductory experience in Emergency Medicine, including all levels of acuity and pre-hospital emergency care. The student will work rotating shifts of 10 hours each in the Emergency Department at Cox South or Mercy Hospital. During that time, the student will have access to all patient care activities. The student will assist with patient evaluations and select procedures under the close supervision of the Emergency Medicine attending physician. Specific time will be devoted to learning basic skills needed in Emergency Medicine. Teaching will be primarily a one-on-one exchange with the attending physicians.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

---

## Engineering Courses

**ENGINR 1000: Introduction to Engineering**

This course will help students identify a field of engineering that they will pursue during their studies at MU. This objective will be achieved by exposing students to design in the different engineering disciplines, overviews of the individual departments, and guest lecturers from industry. Other lectures will be given to help acclimate students to university life. Graded on A-F basis only.

**Credit Hour:** 1

---

**ENGINR 1100: Engineering Graphics Fundamentals**

Introduction to computer-aided design and drafting. Topics include visualization methods and standards techniques for communication and presenting engineering design graphics information.

**Credit Hours:** 2

**Prerequisites or Corequisites:** MATH 1500

**Prerequisites:** Restricted to Engineering Students only, or by departmental consent

---

**ENGINR 1100H: Engineering Graphics Fundamentals - Honors**

Introduction to computer-aided design and drafting. Topics include visualization methods and standards techniques for communication and presenting engineering design graphics information.

**Credit Hours:** 2

**Prerequisites or Corequisites:** MATH 1500

**Prerequisites:** Restricted to Engineering Students only, or by departmental consent. Honors Eligibility required

---

**ENGINR 1110: Solid Modeling for Engineering Design**

Introduction to 3D (three dimensional) modeling techniques using computer aided design software. Topics include model creation techniques and advanced graphical presentation practices. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** ENGINR 1100 or instructor's consent. Restricted to Engineering Students Only or by departmental consent

---

**ENGINR 1200: Statics and Elementary Strength of Materials**

Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials.

**Credit Hours:** 3

**Prerequisites or Corequisites:** PHYSCS 2750 C- or higher. Restricted to Engineering Students only or with departmental consent

**Prerequisites:** MATH 1500 C- or higher

---

**ENGINR 1200H: Statics and Elementary Strength of Materials - Honors**

Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials.

**Credit Hours:** 3

**Prerequisites or Corequisites:** PHYSCS 2750 C- or higher. Restricted to Engineering Students only or with departmental consent

**Prerequisites:** MATH 1500 C- or higher. Honors eligibility required

---

**ENGINR 2001: Experimental Course**

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

**Credit Hour:** 1-99

---

**ENGINR 2001W: Experimental Course - Writing Intensive**

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

**Credit Hour:** 1-99

---

**ENGINR 2100: Circuit Theory for Engineers**

DC circuit analysis, inductors and capacitors, first-order response, AC circuit analysis, single-phase AC power and three-phase, transformers.

**Credit Hours:** 3

**Prerequisites:** MATH 1700. For Non-Electrical and Computer Engineering Majors. Restricted to Engineering Students only or with departmental consent

---

**ENGINR 2100H: Circuit Theory for Engineers - Honors**

DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power.

**Credit Hours:** 3

**Prerequisites:** MATH 1700. Honors eligibility required

---

**ENGINR 2200: Intermediate Strength of Materials**

Elements of mechanics of elastic materials.

**Credit Hours:** 3

**Prerequisites:** ENGINR 1200 C- or higher. Restricted to Engineering Students only or with departmental consent

---

**ENGINR 2300: Engineering Thermodynamics**

(same as MAE 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes.

**Credit Hours:** 3

**Prerequisites:** PHYSCS 2750. Restricted to Engineering Students Only or departmental consent

---

**ENGINR 2500: A History of Modern Engineering**

This course will introduce the student to significant engineering events that have shaped the late modern-era from the French Revolution to the end of World War II (1789-1945). Radical inventions and their dates will be used as historical landmarks throughout the course. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENGINR 2600H: History of Human Spaceflight - Honors**

This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGINR 2600HW: History of Human Spaceflight - Honors/ Writing Intensive**

This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGINR 3000: Short Term Education Abroad**

Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required. Students must be in Academic Good Standing

---

**ENGINR 3000H: Short Term Education Abroad - Honors**

Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent required. Students must be in Academic Good Standing

---

**ENGINR 4000: Study Abroad Technical Elective**

This course is designed to provide students with an international experience while also potentially fulfilling a required engineering technical elective course. Engineering technical electives are courses that are relevant or related to engineering from a broad range of fields including math and science as well as the various engineering departments. This course will be used as the umbrella course for all Engineering Technical Elective Study Abroad Opportunities and each course will provide a separate section number.

**Credit Hour:** 3-6

---

**ENGINR 4050: Cooperative Education Program**

For Engineering Cooperative Education Program Students. No billing hours, No term finalization.

**Credit Hours:** 0

---

**ENGINR 4890: Multi-disciplinary Senior Engineering Capstone Design**

Engineering design and prototyping including reliability, testing, evaluation, preparation of documentation, safety, ethics, manufacturing, intellectual property, economic and environmental constraints. Oral and written reports. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent. Student's department consent also required

**Recommended:** Senior standing

---

**ENGINR 4890W: Multi-disciplinary Senior Engineering Capstone Design - Writing Intensive**

Engineering design and prototyping including reliability, testing, evaluation, preparation of documentation, safety, ethics, manufacturing, intellectual property, economic and environmental constraints. Oral and written reports. Graded A-F only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent. Student's department consent also required

**Recommended:** Senior standing

---

**ENGINR 8100: Design and Development of Biomedical Innovations**

(same as BIOL\_EN 8100, MPP 8100). The overarching goal of this course is to help participants understand the design and development (drug or device) process in biomedical innovation. This course will help participants to understand the process of choosing unmet clinical needs, articulate a need statement without integrating solution, design and develop a solution. Participants will learn to assess the commercial potential of clinical needs by performing market analysis and valuing customer needs. A conceptual understanding about development of a prototype for a device and also drug development by different brainstorming process will be provided. Details of regulatory, reimbursement, patenting process required for product development will be explained with examples. An overview about how to evaluate preliminary designs, define product specifications, comply with

manufacturing principles and methods, costs, cGMP requirements will be explained. Quality control and Quality assurance necessities for drug/device will be elucidated with case studies. Participants will gain knowledge about different business models for drug and devices, estimate market penetration and how to make profitable, patient-driven products. Graded on A-F basis only.

**Credit Hours:** 3

---

## English Courses

### **ENGLISH 1000: Exposition and Argumentation**

Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

**Credit Hours:** 3

---

### **ENGLISH 1000H: Honors Exposition English**

Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### **ENGLISH 1010W: Missouri Transfer Equivalent to Comp 1**

Equivalent to COMP 1 taken at a Missouri Institutions. For transfer purposes only in accordance with the Missouri Department of Higher Education standards for the 42 general education block. Guaranteed transfer course as part of Missouri transfer policies. Fulfills MU lower division Writing Intensive.

**Credit Hour:** 1-10

---

### **ENGLISH 1060: Human Language**

(same as ANTHRO 1060, SLHS 1060 and LINGST 1060). General introduction of various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

**Credit Hours:** 3

---

### **ENGLISH 1100: Reading Literature**

Introduces the student to the values, rigors, and pleasures of reading literature. Intended for first-year, non-English majors. No more than six hours may be taken in the Reading Literature Series.

**Credit Hours:** 3

---

### **ENGLISH 1100H: Reading Literature - Honors**

Introduces the student to the values, rigors, and pleasures of reading literature. Intended for first-year, non-English majors. No more than six hours may be taken in the Reading Literature Series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### **ENGLISH 1106: Reading Literature, Beginnings to 1603**

See ENGLISH 1100 course for description.

**Credit Hours:** 3

---

### **ENGLISH 1107: Reading Literature, 1603 to 1789**

See ENGLISH 1100 course for description.

**Credit Hours:** 3

---

### **ENGLISH 1108: Reading Literature, 1789-1890**

See ENGLISH 1100 course for description.

**Credit Hours:** 3

---

### **ENGLISH 1109: Reading Literature, 1890 to Present**

See ENGLISH 1100 course for description.

**Credit Hours:** 3

---

### **ENGLISH 1160: Themes in Literature**

Topics (e.g., The Idea of Progress, Images of Women) announced at time of registration. No more than six hours may be taken in the Themes in Literature series.

**Credit Hours:** 3

---

### **ENGLISH 1160H: Themes in Literature - Honors**

Topics (e.g., The Idea of Progress, Images of Women) announced at time of registration. No more than six hours may be taken in the Themes in Literature series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### **ENGLISH 1166: Themes in Literature, Beginnings to 1603**

See ENGLISH 1160 for course description.

**Credit Hours:** 3

---

### **ENGLISH 1167: Themes in Literature, 1603 to 1789**

See ENGLISH 1160 for course description.

**Credit Hours:** 3

---

### **ENGLISH 1168: Themes in Literature, 1789 to 1890**

See ENGLISH 1160 for course description.

**Credit Hours:** 3

---

### **ENGLISH 1169: Themes in Literature, 1890 to Present**

See ENGLISH 1160 for course description.

**Credit Hours:** 3

---

### **ENGLISH 1169H: Themes in Literature, 1890 to Present - Honors**

See ENGLISH 1160 for course description.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### **ENGLISH 1206: Readings in British Literature, Beginning to 1603**

See ENGLISH 1200 for course description.

**Credit Hours:** 3

---

**ENGLISH 1207: Readings in British Literature, 1603 to 1789**

See ENGLISH 1200 for course description.

**Credit Hours:** 3

---

**ENGLISH 1208: Readings in British Literature, 1789 to 1890**

See ENGLISH 1200 for course description.

**Credit Hours:** 3

---

**ENGLISH 1209: Readings in British Literature, 1890 to Present**

See ENGLISH 1200 for course description.

**Credit Hours:** 3

---

**ENGLISH 1210: Introduction to British Literature**

A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of British literature that appropriately demonstrate such concepts, terms, and practices. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENGLISH 1210H: Introduction to British Literature - Honors**

A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of British literature that appropriately demonstrate such concepts, terms, and practices. This course is recommended for prospective majors. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** honors eligibility required

---

**ENGLISH 1300: Readings in American Literature**

Focuses on reading and interpreting selected texts in American literature. No more than six hours may be taken in the Readings in American Literature series.

**Credit Hours:** 3

---

**ENGLISH 1307: Readings in American Literature, 1603 to 1789**

See ENGLISH 1300 for course description.

**Credit Hours:** 3

---

**ENGLISH 1308: Readings in American Literature, 1789 to 1890**

See ENGLISH 1300 for course description.

**Credit Hours:** 3

---

**ENGLISH 1309: Readings in American Literature, 1890 to Present**

See ENGLISH 1300 for course description.

**Credit Hours:** 3

---

**ENGLISH 1310: Introduction to American Literature**

A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of American literature that appropriately demonstrate such concepts, terms, and practices. Graded on A/F basis only.

**Credit Hours:** 3

---

**ENGLISH 1310H: Introduction to American Literature - Honors**

A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of American literature that appropriately demonstrates such concepts, terms, and practices. Graded A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGLISH 1400: Themes in African Diaspora Studies**

Topic (e.g. Writing Early Black Women's Spiritual Identity) announced at time of registration. No more than six hours may be taken in ENGLISH 1400.

**Credit Hours:** 3

---

**ENGLISH 1500: Creative Writing: Introduction to Multiple Genres**

Introduces basic techniques of writing fiction, creative nonfiction, and poetry, including writing original works.

**Credit Hours:** 3

---

**ENGLISH 1510: Creative Writing: Introduction to Fiction**

Introduces basic narrative techniques, including writing original stories.

**Credit Hours:** 3

---

**ENGLISH 1520: Creative Writing: Introduction to Nonfiction Prose**

Introduces the range and basic techniques of creative nonfiction, including composing original work in the genre.

**Credit Hours:** 3

---

**ENGLISH 1530: Creative Writing: Introduction to Poetry**

Introduces basic poetic techniques, including writing original poems.

**Credit Hours:** 3

---

**ENGLISH 1700: Introduction to Folklore Genres**

(same as ANTHRO 1150). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A/F basis only.

**Credit Hours:** 3

---

**ENGLISH 1700W: Introduction to Folklore Genres - Writing Intensive**

(same as ANTHRO 1150). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A/F basis only.

**Credit Hours:** 3

---

**ENGLISH 1800: Introduction to Film Studies**

(same as FILMS\_VS 1800, DST\_FS 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography,

editing, sound narrative, genre, and other elements. No credit for students who have completed FILMS\_VS 2810. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** freshman and sophomores only or instructor's consent

---

**ENGLISH 1880: Introduction to Digital Media Production**

(same as DST\_VS 1880, FILMS\_VS 1880, ARTGE\_VS 1920, COMMUN 1880). Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Enrollment limited to declared English majors during early registration

---

**ENGLISH 2000: Studies in English**

Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series.

**Credit Hours:** 3

---

**ENGLISH 2000H: Studies in English - Honors**

Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGLISH 2000HW: Studies in English - Honors/Writing Intensive**

Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGLISH 2000W: Studies in English - Writing Intensive**

Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series.

**Credit Hours:** 3

---

**ENGLISH 2005: Topics in English - Humanities**

Underclass topics. Subjects vary from semester to semester. May be repeated to 6 hours maximum.

**Credit Hours:** 3

---

**ENGLISH 2006: Studies in English, Beginning to 1603**

See ENGLISH 2000 for course description.

**Credit Hour:** 1-3

---

**ENGLISH 2006W: Studies in English, Beginning to 1603 - Writing Intensive**

See ENGLISH 2000 for course description.

**Credit Hour:** 1-3

---

**ENGLISH 2009: Studies in English, 1890 to Present**

See ENGLISH 2000 for course description.

**Credit Hour:** 1-3

---

**ENGLISH 2010: Intermediate Composition**

Provides intensive guided practice in expository and persuasive writing.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 2015H: Theory and Practice of Tutoring Writing Seminar - Honors**

(same as GN\_HON 2015H). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies students for a part-time job working as Writing Lab/Online Writery tutors in future semester.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000; instructor's consent. Honors eligibility required

---

**ENGLISH 2015HW: Theory and Practice of Tutoring Writing Seminar - Honors/Writing Intensive**

(same as GN\_HON 2015H). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies students for a part-time job working as Writing Lab/Online Writery tutors in future semester.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000; instructor's consent. Honors eligibility required

---

**ENGLISH 2030: Professional Writing**

Introduction to the communication required in any professional field, including basic letters and resumes, reviews, reports, and electronic networking, culminating in an extensive report and a related oral presentation.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 2100: Writing About Literature**

Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 2100H: Writing About Literature - Honors**

Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000. Honors eligibility required

---

**ENGLISH 2140: Twentieth-Century Literature**

A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2140W: Twentieth-Century Literature - Writing Intensive**

A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2150: Popular Literature**

Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2150W: Popular Literature - Writing Intensive**

Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2155: Introduction to World Literatures**

Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.

**Credit Hours:** 3

---

**ENGLISH 2159: Introduction to World Literatures, 1890 to Present**

Presents and puts into context works by writers from different nations or ethnic backgrounds, includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.

**Credit Hours:** 3

---

**ENGLISH 2160: Major Authors**

Focuses on the works of a single writer (e.g., Shakespeare) or set of writers (e.g., William Faulkner and Flannery O'Connor). Topic announced at time of registration. No more than six hours may be taken in the Major Authors series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2167: Major Authors, 1603 TO 1789**

See ENGLISH 2160 for course description.

**Credit Hours:** 3

---

**ENGLISH 2168: Major Authors, 1789 to 1890**

See ENGLISH 2160 for course description.

**Credit Hours:** 3

---

---

**ENGLISH 2169: Major Authors, 1890 to Present**

See ENGLISH 2160 for course description.

**Credit Hours:** 3

---

**ENGLISH 2180: Introduction to Women's Literature**

(same as WGST 2180). A study of traditional and nontraditional literature written by women from the perspective of feminist themes-love, power, work, family and other relations. No more than six hours may be taken in the Introduction to Women's Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2180W: Introduction to Women's Literature - Writing Intensive**

(same as WGST 2180W). A study of traditional and nontraditional literature written by women from the perspective of feminist themes-love, power, work, family and other relations. No more than six hours may be taken in the Introduction to Women's Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2186: Introduction to Women's Literature, Beginning to 1603**

(same as WGST 2186). See ENGLISH 2180 for course description.

**Credit Hours:** 3

---

**ENGLISH 2187: Introduction to Women's Literature, 1603 to 1789**

(same as WGST 2187). See ENGLISH 2180 for course description.

**Credit Hours:** 3

---

**ENGLISH 2188: Introduction to Women's Literature, 1789 to 1890**

(same as WGST 2188). See ENGLISH 2180 for course description.

**Credit Hours:** 3

---

**ENGLISH 2189W: Introduction to Women's Literature, 1890 to Present - Writing Intensive**

(same as WGST 2189). See ENGLISH 2180 for course description.

**Credit Hour:** 1-3

---

**ENGLISH 2200: Studies in British Literature**

Topic (e.g., Gothic Literature, The Domestic Novel) announced at time of registration. No more than six hours may be taken in the Topics in British Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2200H: Studies in British Literature - Honors**

Topic (e.g., Gothic Literature, The Domestic Novel) announced at time of registration. No more than six hours may be taken in the Topics in British Literature series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** ENGLISH 1000

---

**ENGLISH 2200W: Studies in British Literature - Writing Intensive**

Topic (e.g., Gothic Literature, The Domestic Novel) announced at time of registration. No more than six hours may be taken in the Topics in British Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2206: Studies in British Literature, Beginning to 1603**

See ENGLISH 2200 for course description.

**Credit Hours:** 3

---

**ENGLISH 2207: Studies in British Literature, 1603 to 1789**

See ENGLISH 2200 for course description.

**Credit Hours:** 3

---

**ENGLISH 2208: Studies in British Literature, 1789 to 1890**

See ENGLISH 2200 for course description.

**Credit Hours:** 3

---

**ENGLISH 2209W: Studies in British Literature, 1890 to Present - Writing Intensive**

See ENGLISH 2200 for course description.

**Credit Hours:** 3

---

**ENGLISH 2300: Studies in American Literature**

Topic (e.g., American Culture, The Frontier) announced at time of registration. No more than six hours may be taken in the Topics in American Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2300W: Studies in American Literature - Writing Intensive**

Topic (e.g., American Culture, The Frontier) announced at time of registration. No more than six hours may be taken in the Topics in American Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2306: Studies in American Literature, Beginning to 1603**

See ENGLISH 2300 for course description.

**Credit Hours:** 3

---

**ENGLISH 2307: Studies in American Literature, 1603 to 1789**

See ENGLISH 2300 for course description.

**Credit Hours:** 3

---

**ENGLISH 2308: Studies in American Literature, 1789-1890**

See ENGLISH 2300 for course description.

**Credit Hours:** 3

---

**ENGLISH 2309: Studies in American Literature, 1890 to Present**

See ENGLISH 2300 for course description.

**Credit Hours:** 3

---

**ENGLISH 2309W: Studies in American Literature, 1890 to Present - Writing Intensive**

See ENGLISH 2300 for course description.

**Credit Hours:** 3

---

**ENGLISH 2310: Missouri Writers**

A survey of literature written by Missourians. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2310H: Missouri Writers - Honors**

A survey of literature written by Missourians. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** ENGLISH 1000

---

**ENGLISH 2400: Introduction to African Diaspora Literature**

(same as BL\_STU 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2407: Introduction to African Diaspora Literature, 1603 to 1789**

(same as BL\_STU 2407). See ENGLISH 2400 for course description.

**Credit Hours:** 3

---

**ENGLISH 2408: Introduction to African Diaspora Literature, 1789 to 1890**

(same as BL\_STU 2408). See ENGLISH 2400 for course description.

**Credit Hours:** 3

---

**ENGLISH 2490: Introduction to Indigenous Literatures**

(same as PEA\_ST 2490). Introduces students to global indigenous literatures in English and translation. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENGLISH 2510: Creative Writing: Intermediate Fiction**

Provides intensive guided practice in the writing of short fiction.

**Credit Hours:** 3

---

**ENGLISH 2520: Creative Writing: Intermediate Nonfiction Prose**

Provides guided practice in the writing of creative nonfiction.

**Credit Hours:** 3

---

---

**ENGLISH 2530: Creative Writing: Intermediate Poetry**

Provides intensive guided practice in the writing of poetry.

**Credit Hours:** 3

---

**ENGLISH 2560: Beginning Playwriting**

(same as THEATR 2920). Study and practice of playwriting fundamentals; emphasizes the one-act play.

**Credit Hours:** 3

---

**ENGLISH 2601: Languages of Africa**

(same as BL\_STU 2601, LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.

**Credit Hours:** 3

---

**ENGLISH 2700: Introduction to Folklore Field Research**

(same as ANTHRO 2150). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2830: American Film History I, 1895-1950**

(same as FILMS\_VS 2830). Examines the development of American cinema in relation to other national cinemas, from 1895-1950. No credit for students who have completed ENGLISH 1810 or FILM\_S 1810.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1800 or FILMS\_VS 1800

**Recommended:** ENGLISH 1000

---

**ENGLISH 2840: American Film History II, 1950-Present**

(same as FILMS\_VS 2840). Examines American film history in an international context, from 1950-present. No credit for students who have completed ENGLISH 1820 or FILM\_S 1820.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1800 or FILMS\_VS 1800

---

**ENGLISH 2860: Film Themes and Genres**

(same as FILMS\_VS 2860, DST\_VS 2860). Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in ENGLISH 2680.

**Credit Hours:** 3

**Recommended:** ENGLISH 1000

---

**ENGLISH 2870W: Film and Literature - Writing Intensive**

(same as FILMS\_VS 2870). Explores the complex interplay between film and literature in order to gain an understanding of the possibilities - and problems - involved in the transposition from literature to film. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 2885: Digital Storytelling Animation Production I**

(same as DST\_VS 2885). Introduction to all aspects of digital animation and elements of the 3D computer animation production pipeline, including story drafting and production planning, polygonal modeling and texturing, rigging, key framing, lighting, compositing rendered images, and editing into a short finished film. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** DST\_VS 1880 or ENGLISH 1880 or FILMS\_VS 1880 or ARTGE\_VS 1920 or instructor consent. Enrollment limited to declared English majors during early enrollment

---

**ENGLISH 3000: Intermediate Studies in English**

An intermediate examination of subjects within English studies. Subjects vary from semester to semester.

**Credit Hour:** 1-3

---

**ENGLISH 3010: Advanced Composition**

An intensive writing workshop in which student essays and related texts receive close reading and analysis. Focus (e.g. The Essay, The Research Paper) announced at time of registration.

**Credit Hours:** 3

---

**ENGLISH 3080: Sexuality and Gender Theory**

(same as WGST 3080). Examination of major theoretical approaches and debates in the study of gender and sexuality, with particular attention to the intersection of culture, representation, and identity. May be repeated to 6 hours with department consent.

**Credit Hours:** 3

---

**ENGLISH 3100: Introduction to Literary Theory**

Introduction to the range of theoretical approaches to the study of literature; intended as a broad survey of literary theory, whether from the Classical era onward or 20th century literary theory and beyond.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3110: Special Themes in Literature**

Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. No more than six hours may be taken in the Special Themes in Literature series.

**Credit Hour:** 1-3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3110H: Special Themes in Literature - Honors**

Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. No more than six hours may be taken in the Special Themes in Literature series.

**Credit Hour:** 1-3

**Prerequisites:** ENGLISH 1000, Honors eligibility required

---

**ENGLISH 3110W: Special Themes in Literature - Writing Intensive**

Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. No more than six hours may be taken in the Special Themes in Literature series.

**Credit Hour:** 1-3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3116: Special Themes in Literature, Beginning to 1603**

See ENGLISH 3110 for course descriptions.

**Credit Hours:** 3

---

**ENGLISH 3116W: Special Themes in Literature, Beginning to 1603 - Writing Intensive**

See ENGLISH 3110 for course descriptions.

**Credit Hours:** 3

---

**ENGLISH 3118H: Special Themes in Literature, 1789 to 1890 - Honors**

See ENGLISH 3110H for course descriptions.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGLISH 3119: Special Themes in Literature, 1890 to Present**

See ENGLISH 3110 for course descriptions.

**Credit Hours:** 3

---

**ENGLISH 3170: World Dramatic Literature**

(same as THEATR 3700). Survey of world drama from Greeks to present, focusing on structure, theory, and performance. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

**ENGLISH 3170W: World Dramatic Literature - Writing Intensive**

(same as THEATR 3700). Survey of world drama from Greeks to present, focusing on structure, theory, and performance. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

**ENGLISH 3180: Survey of Women Writers**

(same as WGST 3180). A study of writing by women from the Middle Ages to the present.

**Credit Hours:** 3

---

**ENGLISH 3180H: Survey of Women Writers - Honors**

A study of writing by women from the Middle Ages to the present.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**ENGLISH 3180W: Survey of Women Writers - Writing Intensive**

(same as WGST 3180). A study of writing by women from the Middle Ages to the present.

**Credit Hours:** 3

---

**ENGLISH 3200: Survey of British Literature: Beginnings to 1784**

Historical survey from beginnings of British literature through the age of Johnson, with readings representing significant writers, works and currents of thought.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3200W: Survey of British Literature: Beginnings to 1784 - Writing Intensive**

Historical survey from beginnings of British literature through the age of Johnson, with readings representing significant writers, works and currents of thought.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3210: Survey of British Literature: Romanticism to the Present**

Historical survey of British literature from the Romantic period to the present, emphasizing important writers and significant intellectual and cultural movements.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3210H: Survey of British Literature: Romanticism to the Present - Honors**

Historical survey of British literature from the Romantic period to the present, emphasizing important writers and significant intellectual and cultural movements.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000; Honors eligibility required

---

**ENGLISH 3210W: Survey of British Literature: Romanticism to the Present - Writing Intensive**

Historical survey of British literature from the Romantic period to the present, emphasizing important writers and significant intellectual and cultural movements.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3300: Survey of American Literature: Beginnings to 1865**

A survey of major writers and movements in American literature from Colonialism to Romanticism.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3300W: Survey of American Literature: Beginnings to 1865 - Writing Intensive**

A survey of major writers and movements in American literature from Colonialism to Romanticism.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

---

**ENGLISH 3310: Survey of American Literature: 1865-Present**

A survey of major writers and movements in American literature from realism to postmodernism.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3310W: Survey of American Literature: 1865-Present - Writing Intensive**

A survey of major writers and movements in American literature from realism to postmodernism.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3400: Survey of African American Literature, Beginnings to 1900**

(same as BL\_STU 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3400W: Survey of African American Literature, Beginnings to 1900 - Writing Intensive**

(same as BL\_STU 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3410: Survey of African American Literature, 1900-Present**

(same as BL\_STU 3410). A survey of major authors and movements in African American literature from 1900 to the present.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3430: Introduction to African Diaspora Literary Theory**

Introduction to the range of theoretical approaches to the study of African Diaspora literature, with particular attention to the diverse socio-political contexts that undergird range of literary, historical, and cultural theories; intended as a broad survey of African Diaspora literary theory, whether from the Slavery era onward or 20th century literary theory and beyond. May be repeated for credit with consent.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3490: Special Themes in Native American and Indigenous Studies**

(same as PEA\_ST 3490). Topics (e.g., Indigenous Novel; Oral Tradition; Indigenous Science Fiction; Law and Indigenous Literature) announced at the time of registration. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENGLISH 3560: Intermediate Playwriting**

(same as THEATR 3920). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 2560

---

**ENGLISH 3560W: Intermediate Playwriting - Writing Intensive**

(same as THEATR 3920W). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 2560

---

**ENGLISH 3570: Performance of Literature**

(same as COMMUN 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** sophomore standing

---

**ENGLISH 3620: Languages of the World**

(same as LINGST 3620). Introduction to the diversity of the world's languages emphasizing historical relations and structural similarities and differences.

**Credit Hours:** 3

---

**ENGLISH 3700: American Folklore**

(same as ANTHRO 3150). Focus on regional and ethnic folklore; emphasis on analysis of folklore in context. Requirements include book reports and two analytical papers based on student field research. May be repeated for a maximum of six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 3820: Major Directors**

(same as FILMS\_VS 3820, RM\_LAN 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Graded on A/F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3850: Studies in Film History**

(same as FILMS\_VS 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**ENGLISH 3855: Documentary Film**

(same as FILMS\_VS 3855, DST\_VS 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

---

**ENGLISH 3880W: Writing and Theory for Digital Media - Writing Intensive**

(same as DST\_VS 3880W). Writing and Theory for Digital Media teaches the skills, methods and theoretical frameworks needed to write for new media. Students will study and practice writing for web-based and digital media platforms, including blogs, podcasts, vlogs, and the emerging possibilities of locative and interactive media. **Recommended:** junior standing

---

---

**ENGLISH 4060: Studies in Critical Theory**

(cross-leveled with ENGLISH 7060). Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4100: Genres**

(cross-leveled with ENGLISH 7100). Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4100H: Genres - Honors**

Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** junior standing

---

**ENGLISH 4100HW: Genres - Honors/Writing Intensive**

Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** junior standing

---

**ENGLISH 4100W: Genres - Writing Intensive**

Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4106: Genres, Beginning to 1603**

(cross-leveled with ENGLISH 7106). See ENGLISH 4100 for course description.

**Credit Hours:** 3

---

**ENGLISH 4107: Genres, 1603 to 1789**

(cross-leveled with ENGLISH 7107). See ENGLISH 4100 for course description.

**Credit Hours:** 3

---

---

**ENGLISH 4108: Genres, 1789 to 1890**

(cross-leveled with ENGLISH 7108). See ENGLISH 4100 for course description.

**Credit Hours:** 3

---

**ENGLISH 4109: Genres, 1890 to Present**

(cross-leveled with ENGLISH 7109). See ENGLISH 4100 for course description.

**Credit Hours:** 3

---

**ENGLISH 4109W: Genres, 1890 to Present - Writing Intensive**

See ENGLISH 4100 for course description.

**Credit Hours:** 3

---

**ENGLISH 4129: Ethnic Literature, 1890 to Present**

(cross-leveled with ENGLISH 7129). See ENGLISH 4120 for course description.

**Credit Hours:** 3

---

**ENGLISH 4140: Modern Literature**

(cross-leveled with ENGLISH 7140). A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era.

**Credit Hours:** 3

---

**ENGLISH 4159: World Literatures, 1890 to Present**

(cross-leveled with ENGLISH 7159). See ENGLISH 4150 for course description.

**Credit Hours:** 3

---

**ENGLISH 4159W: World Literatures, 1890 to Present - Writing Intensive**

See ENGLISH 4150 for course description.

**Credit Hours:** 3

---

**ENGLISH 4166: Major Authors, Beginning to 1603**

(cross-leveled with ENGLISH 7166). See ENGLISH 4160 for course description.

**Credit Hours:** 3

---

**ENGLISH 4166W: Major Authors, Beginning to 1603 - Writing Intensive**

See ENGLISH 4160 for course description.

**Credit Hours:** 3

---

**ENGLISH 4167: Major Authors, 1603-1789**

(cross-leveled with ENGLISH 7167). See ENGLISH 4160 for course description.

**Credit Hours:** 3

---

**ENGLISH 4167W: Major Authors, 1603-1789 - Writing Intensive**

See ENGLISH 4160 for course description.

**Credit Hours:** 3

---

**ENGLISH 4168: Major Authors, 1789-1890**

(cross-leveled with ENGLISH 7168). See ENGLISH 4160 for course description.

**Credit Hours:** 3

---

**ENGLISH 4169: Major Authors, 1890-Present**

(cross-leveled with ENGLISH 7169). See ENGLISH 4160 for course description.

**Credit Hours:** 3

---

(cross-leveled with ENGLISH 7260). Topics (e.g. Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4300: Early American Literature**

(cross-leveled with ENGLISH 7300). Topics (e.g., Narratives of Discovery and Exploration, The Puritan Heritage) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4310: 19th-Century American Literature**

(cross-leveled with ENGLISH 7310). Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

---

**ENGLISH 4310W: 19th-Century American Literature - Writing Intensive**

(cross-leveled with ENGLISH 7310). Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4320: 20th-Century American Literature**

(cross-leveled with ENGLISH 7320). Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4320W: 20th-Century American Literature - Writing Intensive**

(cross-leveled with ENGLISH 7320). Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4400: Studies in African Diaspora Literature**

(same as BL\_STU 4400; cross-leveled with ENGLISH 7400, BL\_STU 7400). Topics (e.g., African American Poetry, Africana Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in Africana Literature series.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4409: Studies in African Diaspora Literature, 1890 to Present**

(same as BL\_STU 4409; cross-leveled with ENGLISH 7409, BL\_STU 7409). See ENGLISH 4400 for course description.

**Credit Hours:** 3

---

**ENGLISH 4410: Major Africana Diaspora Writers**

(same as BL\_STU 4410; cross-leveled with ENGLISH 7410, BL\_STU 7410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major African Diaspora Writers series.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4420: Africana Womanism**

(same as BL\_STU 4420; cross-leveled with ENGLISH 7420, BL\_STU 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4480: Major African Diaspora Women Writers**

(same as WGST 4480, BL\_STU 4480; cross-leveled with ENGLISH 7480, BL\_STU 7480, WGST 7480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Maybe repeated for credit with departmental consent. Maximum of 6 hours for ENGLISH 4180 and ENGLISH 4480.

**Credit Hours:** 3

---

**ENGLISH 4480W: Major African Diaspora Women Writers - Writing Intensive**

(same as WGST 4480 and BL\_STU 4480). Study of selected Africana Diaspora women writers, focusing on texts originally in English. Maybe repeated for credit with departmental consent. Maximum of 6 hours for ENGLISH 4180 and ENGLISH 4480.

**Credit Hours:** 3

---

**ENGLISH 4488: Major African Diaspora Women Writers, 1789 to 1890**

(same as WGST 4488, BL\_STU 4488; cross-leveled with ENGLISH 7488, BL\_STU 7488, WGST 7488). See ENGLISH 4480 for course description.

**Credit Hours:** 3

---

**ENGLISH 4489: Major African Diaspora Women Writers, 1890 to Present**

(same as WGST 4489, BL\_STU 4489; cross-leveled with ENGLISH 7489, BL\_STU 7489, WGST 7489). See ENGLISH 4480 for course description.

**Credit Hours:** 3

---

**ENGLISH 4489W: Major African Diaspora Women Writers, 1890 to Present - Writing Intensive**

(same as WGST 4489W, BL\_STU 4489W; cross-leveled with ENGLISH 7489, BL\_STU 7489, WGST 7489). See ENGLISH 4480 for course description.

**Credit Hours:** 3

---

**ENGLISH 4490: Studies in Native American and Indigenous Studies**

In-depth study of topics in Native American and Indigenous Studies, such as tribal intellectual histories, defined historical periods, or specific genres or media. Examples of course titles include Ojibwe Writing, Native Film and Video, and Contemporary Native Literature.

**Credit Hours:** 3

---

**ENGLISH 4510: Creative Writing: Advanced Fiction**

(cross-leveled with ENGLISH 7510). An intensive writing workshop in which student stories and related literary texts receive close reading and analysis. Prerequisites: Any ONE of the following: ENGLISH 1510, ENGLISH 1520, ENGLISH 1530, ENGLISH 2510, ENGLISH 2520, or ENGLISH 2530.

**Credit Hours:** 3

---

**ENGLISH 4520: Creative Writing: Advanced Nonfiction Prose**

(cross-leveled with ENGLISH 7520). An intensive writing workshop in which a student's creative nonfiction receives close reading and analysis. Prerequisites: Any ONE of the following: ENGLISH 1510, ENGLISH 1520, ENGLISH 1530, ENGLISH 2510, ENGLISH 2520, or ENGLISH 2530.

---

**Credit Hours:** 3

---

**ENGLISH 4530: Creative Writing: Advanced Poetry**

(cross-leveled with ENGLISH 7530). Poetry regarded as a mode of understanding. Poetic values related to other values. Practical consideration of verse techniques. Prerequisites: Any ONE of the following: ENGLISH 1510, ENGLISH 1520, ENGLISH 1530, ENGLISH 2510, ENGLISH 2520, or ENGLISH 2530.

**Credit Hours:** 3

---

**ENGLISH 4560: Advanced Playwriting: Problems**

(same as THEATR 4920; cross-leveled with ENGLISH 7560 and THEATR 7920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 3560

---

**ENGLISH 4560W: Advanced Playwriting: Problems - Writing Intensive**

(same as THEATR 4920; cross-leveled with ENGLISH 7560 and THEATR 7920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 3560

---

**ENGLISH 4570: Adaptation of Literature for the Stage**

(same as THEATR 4930; cross-leveled with ENGLISH 7570 and THEATR 7930). Explores adaptation principles and practices with literature not originally written for the stage. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENGLISH 4600: Structure of American English**

(same as LINGST 4600; cross-leveled with LINGST 7600, ENGLISH 7600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4610: History of the English Language**

(same as LINGST 4610; cross-leveled with ENGLISH 7610, LINGST 7610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4620: Regional and Social Dialects of American English**

(same as LINGST 4620; cross-leveled with ENGLISH 7620, LINGST 7620). The study of regional and social variation in pronunciation, vocabulary, and grammar of American English.

**Credit Hours:** 3

**Recommended:** ENGLISH 4600 and ENGLISH 4610 or equivalent

---

---

**ENGLISH 4630: Phonology**

(same as LINGST 4630; cross-leveled with ENGLISH 7630, LINGST 7630). Survey of the sound patterns of English and other languages.

**Credit Hours:** 3

**Recommended:** ENGLISH 1060 or ENGLISH 4600 or equivalent

---

**ENGLISH 4640: Syntax**

(same as LINGST 4640; cross-leveled with ENGLISH 7640, LINGST 7640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages.

**Credit Hours:** 3

**Recommended:** ENGLISH 1060 or ENGLISH 4600 or equivalent

---

**ENGLISH 4660: Historical Linguistics**

(same as LINGST 4420, ANTHRO 4420; cross-leveled with ENGLISH 7660, ANTHRO 7420, LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

**Credit Hours:** 3

**Recommended:** junior/senior standing

---

**ENGLISH 4670: Field Methods in Linguistics**

(same as LINGST 4870, ANTHRO 4870; cross-leveled with ENGLISH 7670, LINGST 7870, ANTHRO 7870). Intensive training in collection and analysis of data elicited from a native speaker of a non-Indo-European language. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Contact the Linguistics advisor to request permission

**Recommended:** 9 hours of linguistics

---

**ENGLISH 4670W: Field Methods in Linguistics - Writing Intensive**

(same as LINGST 4870 and ANTHRO 4870). Intensive training in collection and analysis of data elicited from a native speaker of a non-Indo-European language. May be repeated for credit. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Contact Linguistics advisor to request permission

**Recommended:** 9 hours of linguistics

---

**ENGLISH 4700: Special Themes in Folklore**

(same as ANTHRO 4150; cross-leveled with ENGLISH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 4710: Themes in African Diaspora Folklore**

(same as ANTHRO 4160 and BL\_STU 4710; cross-leveled with ENGLISH 7710, ANTHRO 7160, BL\_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLISH 4700 and ENGLISH 4710 may be repeated for a maximum of six hours with instructor's consent.

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4770: Oral Tradition**

(same as ANTHRO 4170; cross-leveled with ENGLISH 7770, ANTHRO 7170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and sophomore standing

---

**ENGLISH 4770H: Oral Tradition - Honors**

(same as ANTHRO 4170; cross-leveled with ENGLISH 7770, ANTHRO 7170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses. Prerequisites: ENGLISH 1000 and sophomore standing; Honors eligibility required

**Credit Hours:** 3

---

**ENGLISH 4780: Women's Folklore and Feminist Theory**

(same as WGST 4780; cross-leveled with ENGLISH 7780, WGST 7780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).

**Credit Hours:** 3

**Recommended:** junior standing

---

**ENGLISH 4810: Film Theory**

(same as FILMS\_VS 4810, DST\_VS 4810; cross-leveled with ENGLISH 7810, FILMS\_VS 7810, DST\_VS 7810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

**Recommended:** Junior standing

---

**ENGLISH 4820: Studies in Film Genre**

(same as FILMS\_VS 4820; cross-leveled with ENGLISH 7820). Topics (e.g. The Western, Film Noir) announced at time of registration. No more than six hours may be taken for credit toward the major.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

**Recommended:** junior standing

---

**ENGLISH 4840: Culture and Media**

(same as FILMS\_VS 4840, DST\_VS 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

**Recommended:** Junior standing

---

**ENGLISH 4935: Adaptation of Literature for Film**

(same as FILMS\_VS 4935 and THEATR 4935; cross-leveled with ENGLISH 7580, FILMS\_VS 7935 and THEATR 7935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

**Credit Hours:** 3

---

**ENGLISH 4938: Advanced Screenwriting: Styles**

(same as THEATR 4938; cross-leveled with ENGLISH 7938, THEATR 7938). Students develop advanced skills of screenwriting through a focus on non-realistic, non-linear dramatic writing styles in development of a full-length screenplay. Areas of study will include techniques of magic realism, symbolism, expressionism, absurdism, surrealism/dada, mythic/fantasy, musicals, political docudrama, and science fiction.

**Credit Hours:** 3

**Prerequisites:** THEATR 2920 or ENGLISH 2560

**Recommended:** THEATR 3930

---

**ENGLISH 4938W: Advanced Screenwriting: Styles - Writing Intensive**

(same as THEATR 4938; cross-leveled with ENGLISH 7938, THEATR 7938). Students develop advanced skills of screenwriting through a focus on non-realistic, non-linear dramatic writing styles in development of a full-length screenplay. Areas of study will include techniques of magic realism, symbolism, expressionism, absurdism, surrealism/dada, mythic/fantasy, musicals, political docudrama, and science fiction.

**Credit Hours:** 3

**Prerequisites:** THEATR 2920 or ENGLISH 2560

**Recommended:** THEATR 3930

---

**ENGLISH 4940: Internship in English**

Students work in an agency or institution using their English-related skills for one to three credit hours. Graded on an S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** Department consent

---

**ENGLISH 4950: Internship in Publishing**

Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ENGLISH 4955: Independent Research in English**

Development of a carefully considered research project under close supervision of a faculty member. Open to undergraduate students only.

**Credit Hour:** 1-3

**Prerequisites:** junior standing and departmental consent

---

**ENGLISH 4960: Special Readings in English**

Individual work with conferences adjusted to needs of student.

**Credit Hour:** 1-99

**Prerequisites:** Consent of instructor

---

**ENGLISH 4970: Capstone Experience**

For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter).

**Credit Hours:** 3

---

**ENGLISH 4970W: Capstone Experience - Writing Intensive**

For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter).

**Credit Hours:** 3

---

**ENGLISH 4995: Senior Honors Thesis**

Independent research under direction of faculty. Second course of two part Honors Sequence. Students must have successfully completed English 4996 before taking English 4995.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 4996

---

**ENGLISH 4996: Honors Seminar in English**

First of two major semester Honors sequence. Studies literary topic, critical approaches and advanced literary research methodology in preparation for Honors Senior Thesis.

**Credit Hours:** 3

---

**ENGLISH 4996W: Honors Seminar in English - Writing Intensive**

First of two major semester Honors sequence. Studies literary topic, critical approaches and advanced literary research methodology in preparation for Honors Senior Thesis.

**Credit Hours:** 3

---

**ENGLISH 7040: Studies in Writing**

(cross-leveled with ENGLISH 4040). A hybrid reading/writing course that focuses on a form of nonfiction prose, such as the experimental essay, art criticism, book reviews, spiritual writing, nature writing, etc. This course is not a workshop, although it may incorporate workshop elements. Designed for students who may or may not have taken previous creative writing courses. May repeat to six hours with departmental consent.

**Credit Hours:** 3

---

**ENGLISH 7045: Rhetorical Studies**

(cross-leveled with ENGLISH 4045), Examines questions related to rhetoric, the study of symbols used for persuasion, justification, or communication. Specific topics are announced at time of registration and

may involve the rhetorical study of fiction or nonfiction, oral or written texts, verbal or visual modes.

**Credit Hours:** 3

---

**ENGLISH 7060: Studies in Critical Theory**

(cross-leveled with ENGLISH 4060). Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with departmental consent.

**Credit Hours:** 3

---

**ENGLISH 7100: Genres**

(cross-leveled with ENGLISH 4100). Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. No more than six hours may be taken in the Genres series.

**Credit Hours:** 3

---

**ENGLISH 7106: Genres, Beginning to 1603**

(cross-leveled with ENGLISH 4106). See ENGLISH 7100 for course description.

**Credit Hours:** 3

---

**ENGLISH 7107: Genres, 1603 to 1789**

(cross-leveled with ENGLISH 4107). See ENGLISH 7100 for course description.

**Credit Hours:** 3

---

**ENGLISH 7109: Genres, 1890 to Present**

(cross-leveled with ENGLISH 4109). See ENGLISH 7100 for course description.

**Credit Hours:** 3

---

**ENGLISH 7129: Ethnic Literature, 1890 to Present**

(cross-leveled with ENGLISH 4129). See ENGLISH 7120 for course description.

**Credit Hours:** 3

---

**ENGLISH 7140: Modern Literature**

(cross-leveled with ENGLISH 4140). A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era.

**Credit Hours:** 3

---

**ENGLISH 7159: World Literatures, 1890 to Present**

(cross-leveled with ENGLISH 4159). See ENGLISH 7150 for course description.

**Credit Hours:** 3

---

**ENGLISH 7166: Major Authors, Beginning to 1603**

(cross-leveled with ENGLISH 7166). See ENGLISH 7160 for course description.

**Credit Hours:** 3

---

**ENGLISH 7167: Major Authors, 1603-1789**

(cross-leveled with ENGLISH 4167). See ENGLISH 7160 for course description.

**Credit Hours:** 3

---

**ENGLISH 7168: Major Authors, 1789-1890**

(cross-leveled with ENGLISH 4168). See ENGLISH 7160 for course description.

**Credit Hours:** 3

---

**ENGLISH 7169: Major Authors, 1890-Present**

(cross-leveled with ENGLISH 4169). See ENGLISH 7160 for course description.

**Credit Hours:** 3

---

**ENGLISH 7179: Comparative Approaches to Literature, 1890-Present**

(cross-leveled with ENGLISH 4179). See ENGLISH 7170 for course description.

**Credit Hours:** 3

---

**ENGLISH 7180: Major Women Writers**

(same as WGST 7180; cross-leveled with ENGLISH 4180, WGST 4180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. No more than six hours may be taken in the Major Women Writers series.

**Credit Hours:** 3

---

**ENGLISH 7188: Major Women Writers, 1789-1890**

(same as WGST 7188; cross-leveled with ENGLISH 4188, WGST 4188). See ENGLISH 7180 for course description.

**Credit Hours:** 3

---

**ENGLISH 7200: Introduction to Old English**

(same as LINGST 7200; cross-leveled with ENGLISH 4200, LINGST 4200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge.

**Credit Hours:** 3

---

**ENGLISH 7206: Anglo-Saxon Literature**

(cross-leveled with ENGLISH 4206). Readings in the literature of Anglo-Saxon England (ca.500-ca.1100 C.E.). Specific topics (e.g., Women in the Early Middle Ages, Beowulf, Old English Heroic Poetry) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7210: Medieval Literature**

(cross-leveled with ENGLISH 4210). Topics (e.g., Age of Chaucer, Chivalry and Courtly Love, Allegory and Satire) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7220: Renaissance and 17th-Century English Literature**

(cross-leveled with ENGLISH 4220). Topics (e.g., The Metaphysical Poets, Themes in Shakespeare) announced at time of registration. No more than six hours may be taken in the Renaissance and Seventeenth Century Literature series.

**Credit Hours:** 3

---

**ENGLISH 7240: Restoration and 18th-Century English Literature**

(cross-leveled with ENGLISH 4240). Topics (e.g., Restoration Drama, Johnson and his Circle) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7250: 19th-Century English Literature**

(cross-leveled with ENGLISH 4250). Topics (e.g., Victorian Poetry, Non-Fiction Prose) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7260: 20th-Century British Literature**

(cross-leveled with ENGLISH 4260). Topics (e.g., Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7300: Early American Literature**

(cross-leveled with ENGLISH 4300). Topics (e.g., Narratives of Discovery and Exploration, The Puritan Heritage) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7310: 19th-Century American Literature**

(cross-leveled with ENGLISH 4310). Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7320: 20th-Century American Literature**

(cross-leveled with ENGLISH 4320). Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 7400: Studies in African Diaspora Literature**

(same as BL\_STU 7400; cross-level with ENGLISH 4400, BL\_STU 4400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.

**Credit Hours:** 3

---

**ENGLISH 7409: Studies in African Diaspora Literature, 1890-to Present**

(same as BL\_STU 7409; cross-leveled with ENGLISH 4409, BL\_STU 4409). See ENGLISH 7400 for course description.

**Credit Hours:** 3

---

**ENGLISH 7420: Africana Womanism**

(same as BL\_STU 7420; cross-leveled with ENGLISH 4420, BL\_STU 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers.

**Credit Hours:** 3

**Prerequisites:** graduate standing or instructor's consent. May be repeated to six hours with departmental consent

---

**ENGLISH 7480: Major African Diaspora Women Writers**

(same as WGST 7480, BL\_STU 7480; cross-leveled with ENGLISH 4480, BL\_STU 4480, WGST 4480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for ENGLISH 7180 and ENGLISH 7480

**Credit Hours:** 3

---

**ENGLISH 7489: Major African Diaspora Women Writers, 1789 to 1890**

(same as WGST 7489, BL\_STU 7489; cross-leveled with ENGLISH 4489, BL\_STU 4489, WGST 4489). See ENGLISH 7480 for course description.

**Credit Hours:** 3

---

**ENGLISH 7510: Creative Writing: Advanced Fiction**

(cross-leveled with ENGLISH 4510). An intensive writing workshop in which student stories and related literary texts receive close reading and analysis. Prerequisites: Any ONE of the following: ENGLISH 1510, ENGLISH 1520, ENGLISH 1530, ENGLISH 2510, ENGLISH 2520, or ENGLISH 2530.

**Credit Hours:** 3

---

**ENGLISH 7520: Creative Writing: Advanced Nonfiction Prose**

(cross-leveled with ENGLISH 4520). An intensive writing workshop in which a student's creative nonfiction receives close reading and analysis. Prerequisites: Any ONE of the following: ENGLISH 1510, ENGLISH 1520, ENGLISH 1530, ENGLISH 2510, ENGLISH 2520, or ENGLISH 2530.

**Credit Hours:** 3

---

**ENGLISH 7530: Creative Writing: Advanced Poetry**

(cross-leveled with ENGLISH 4530). Poetry regarded as a mode of understanding. Poetic values related to other values. Practical consideration of verse techniques. Prerequisites: Any ONE of the following: ENGLISH 1510, ENGLISH 1520, ENGLISH 1530, ENGLISH 2510, ENGLISH 2520, or ENGLISH 2530.

**Credit Hours:** 3

---

**ENGLISH 7560: Advanced Playwriting: Problems**

(same as THEATR 7920; cross-leveled with ENGLISH 4650 and THEATR 4920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 3560

---

**ENGLISH 7580: Adaptation of Literature for Film**

(same as FILMS\_V S 7935 and THEATR 7935; cross-leveled with ENGLISH 4935, FILMS\_VS 4935 and THEATR 4935). This upper division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

**Credit Hours:** 3

---

**ENGLISH 7600: Structure of American English**

(same as LINGST 7600; cross-leveled with ENGLISH 4600, LINGST 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.

**Credit Hours:** 3

---

**ENGLISH 7610: History of the English Language**

(same as LINGST 7610; cross-leveled with ENGLISH 4610, LINGST 4610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.

**Credit Hours:** 3

---

**ENGLISH 7611: The Story of English: Medieval to Modern**

History of the English language, explored through literature, with an emphasis on its development from the early Middle Ages through the Early Modern period (ca. 500-ca. 1700).

**Credit Hours:** 3

---

**ENGLISH 7620: Regional and Social Dialects of American English**

(same as LINGST 7620; cross-leveled with ENGLISH 4620, LINGST 7620). The study of regional and social variation in pronunciation, vocabulary, and grammar of American English.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 4600 and ENGLISH 4610 or equivalent

---

**ENGLISH 7630: Phonology**

(same as LINGST 7630; cross-leveled with LINGST 4630, ENGLISH 4630). Survey of the sound patterns of English and other languages.

**Credit Hours:** 3

**Recommended:** at least one course in linguistics

---

**ENGLISH 7640: Syntax**

(same as LINGST 7640; cross-leveled with LINGST 4640, ENGLISH 4640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages.

**Credit Hours:** 3

**Recommended:** at least one course in linguistics

---

**ENGLISH 7660: Historical Linguistics**

(same as LINGST 7420, ANTHRO 7420; cross-leveled with ENGLISH 4660, ANTHRO 4420, LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

**Credit Hours:** 3

---

---

**ENGLISH 7670: Field Methods in Linguistics**

(same as LINGST 7870, ANTHRO 7870; cross-leveled with LINGST 4870, ENGLISH 4670, ANTHRO 4870). Intensive training in collection and analysis of data elicited from a native speaker of a non-Indo-European language. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** instructor's consent

**Recommended:** 9 hours in linguistics

---

**ENGLISH 7700: Special Themes in Folklore**

(same as ANTHRO 7150; cross-leveled with ENGLISH 4770, ANTHRO 4170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses. Prerequisites: Instructor's consent

**Credit Hours:** 3

---

**ENGLISH 7770: Oral Tradition**

(same as ANTHRO 7170; cross-leveled with ENGLISH 4770, ANTHRO 4170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**ENGLISH 7780: Women's Folklore and Feminist Theory**

(same as WGST 7780; cross-leveled with ENGLISH 4780, WGST 4780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).

**Credit Hours:** 3

---

**ENGLISH 7820: Studies in Film Genre**

(cross-leveled with ENGLISH 4820, FILMS\_VS 4820). Topics (e.g. The Western, Film Noir) announced at time of registration. No more than six hours may be taken.

**Credit Hours:** 3

---

**ENGLISH 7938: Advanced Screenwriting: Styles**

(same as THEATR 7938; cross-leveled with ENGLISH 4938, THEATR 4938). Students develop advanced skills of screenwriting through a focus on non-realistic, non-linear dramatic writing styles in development of a full-length screenplay. Areas of study will include techniques of magic realism, symbolism, expressionism, absurdism, surrealism/dada, mythic/fantasy, musicals, political docudrama, and science fiction.

**Credit Hours:** 3

---

**ENGLISH 7950: Internship in Publishing**

(cross-leveled with ENGLISH 4950). Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**ENGLISH 8001: Topics in English-General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

---

**ENGLISH 8005: Introduction to Graduate Study**

Introduces entering MA and PhD students to the profession of English and the intellectual resources needed to complete their degrees successfully.

**Credit Hour:** 1

---

**ENGLISH 8006: Professional Issues in English Studies**

Introduces advanced graduate students to issues relevant to their professional training, including entering the job market and preparing work for publication. May be repeated for credit.

**Credit Hour:** 1-3

---

**ENGLISH 8010: Theory and Practice of Composition**

Current and historical theories of rhetoric and composition as applied to the teaching of college composition.

**Credit Hours:** 3

**Prerequisites:** department's consent

---

**ENGLISH 8020: The Theory and Practice of Teaching in English**

This course is designed to acquaint students with the history, theory, and practice of teaching in undergraduate English classrooms.

**Credit Hour:** 1-3

---

**ENGLISH 8030: The Theory and Practice of Teaching Creative Writing**

Current and historical theories of Creative Writing pedagogy and its application in the creative writing classroom.

**Credit Hour:** 1-3

---

**ENGLISH 8040: Seminar in Rhetoric and Composition**

Topics (e.g., The Institutionalization of Rhetoric, Writing Across the Curriculum) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8050: Contemporary Critical Approaches**

A survey of contemporary professional critical methods, such as formalism, poststructuralism, feminism, Marxism, new historicism, psychoanalysis, identity studies, and cultural studies.

**Credit Hours:** 3

---

**ENGLISH 8060: Seminar in Criticism and Theory**

Principles and practices of selected critics. May repeat to twelve hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 8070: History of Criticism and Theory**

A survey of the history of literary criticism and theory. While comprehensive in scope, the course might focus on specific topics in the history of criticism, such as the dialectic between rhetoric and poetics, the rise of aesthetics, or the relation of art and culture to society. Figures studied will extend from early philosophers such as Plato and Aristotle, through eighteenth-century thinkers such as Kant and Johnson, up to present theorists such as Derrida and Butler.

**Credit Hours:** 3

---

**ENGLISH 8090: Masters Thesis Research**

Leads to preparation of masters thesis. Graded on S/U basis only.

**Credit Hour:** 1-99

---

**ENGLISH 8095: Problems in English**

Individual work not leading to preparation of dissertation.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

---

**ENGLISH 8110: Forms**

Topics (e.g., The Epic, The Epistolary Novel) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8200: Seminar in Old English Literature**

Topics in Old English or Anglo-Saxon literature, such as Beowulf, the Exeter Book poems, or the genres of elegy, Biblical narrative, or wisdom poetry. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 4200 or equivalent

---

**ENGLISH 8210: Seminar in Middle English Literature**

Topics (e.g., Medieval Drama, Chaucer) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8220: Seminar in Renaissance British Literature**

Topics (e.g., Tudor and Stuart Drama, Shakespearean Tragedy) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8230: Seminar in 17th-Century British Literature**

Topics (e.g., The Metaphysical Poets, Restoration Drama) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

---

**ENGLISH 8240: Seminar in 18th-Century British Literature**

Topics (e.g., The 18th-Century Novel, Historical and Biographical Prose) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8250: Seminar in 19th-Century British Literature**

Topics (e.g., The Later Romantics, Victorian Poetry) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8260: Seminar in 20th-Century British Literature**

Topics (e.g., Chief Contemporary Poets, Modernism and the Novel) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8310: Seminar in 19th Century American Literature**

Topics (e.g., The Transcendentalists, American Realism) announced at time of registration. May repeat to twelve hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 8320: Seminar in 20th-Century American Literature**

Topics (e.g., The African-American Novel, Chief Contemporary Poets) announced at time of registration. May repeat to twelve hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 8400: Seminar in African Diaspora Literature**

(same as BL\_STU 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

**Credit Hours:** 3

---

**ENGLISH 8510: Advanced Writing of Fiction**

Advanced fiction writing designed for graduate students, with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor.

**Credit Hours:** 3

---

**ENGLISH 8520: Advanced Writing of Nonfiction Prose**

Advanced workshop in nonfiction prose for graduate students intending to produce professional quality work. May repeat to twelve hours with consent of instructor.

**Credit Hours:** 3

---

**ENGLISH 8530: Advanced Writing of Poetry**

Advanced poetry writing designed for graduate students with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor.

**Credit Hours:** 3

---

---

**ENGLISH 8560: Graduate Seminar in Playwriting**

(same as THEATR 8987). Seminar in theory, practice, and pedagogy of playwriting, students a mid-term in playwriting theory, a full-length play, a research paper, and a syllabus and lesson plans for an undergraduate playwriting course.

**Credit Hours:** 3

---

**ENGLISH 8600: Seminar in the English Language**

(same as LINGST 8600). Descriptive and historical studies of the English language. Topics (e.g., The Germanic Origins, Modern Syntactic Analysis) announced at time of registration. May repeat to twelve hours with department's approval.

**Credit Hours:** 3

---

**ENGLISH 8700: Seminar in Folklore**

(same as ANTHRO 8157 and REL\_ST 8700). Focus on the roots of folklore scholarship and methodology and their evolution in modern approaches to the study of oral, traditional verbal genres and their performance in natural folk groups. May repeat to twelve hours with department's consent.

**Credit Hours:** 3

---

**ENGLISH 9090: Doctoral Dissertation Research**

Leads to preparation of dissertation. Graded on S/U basis only.

**Credit Hour:** 1-12

---

## English Language Support Program Courses

**ELSP \_0100: Grammar and Composition I**

Students learn grammatical patterns and sentence construction used in academic writing and focus on improving sentence-level grammatical accuracy in the writing of coherent, well-developed paragraphs. Graded S/U only.

**Credit Hours:** 3

---

**ELSP \_0200: Reading and Vocabulary**

Students develop vocabulary and reading strategies required to comprehend academic textbooks and literature in various fields of study. Graded on S/U basis only.

**Credit Hours:** 3

---

**ELSP \_0300: Grammar and Composition II**

Students learn how to write clear and well-developed multi-paragraph academic essays using various methods of organization through the process of planning, drafting, revising, editing, and peer reviewing. Students also learn to work with sources. Grammatical structures relevant to the methods of organization are reviewed and practiced. Graded S/U Only.

**Credit Hours:** 3

---

**ELSP \_0400: Oral Communication**

This course emphasizes the development of fluency and intelligibility in spoken English. Through individual and group activities, students

work on improving pronunciation, practicing conversation strategies, and delivering oral presentations. Enrollment in ELSP \_0400 is restricted to graduate students and scholars who have attained a satisfactory score on the Test of English as a Foreign Language (TOEFL). Graded S/U Only.

**Credit Hours:** 3

---

## Environmental Science Courses

**ENV\_SC 1100: Introduction to Environmental Science**

This class provides an opportunity to develop an understanding of environment, physical and social causes of environmental problems, their impacts, and strategies to manage these issues.

**Credit Hours:** 3

**Prerequisites:** Enrollment restricted to College of Agriculture, Food and Natural Resources undergraduates and students minoring in Environmental Science

---

**ENV\_SC 2001: Topics in Environmental Science - General**

Organized study of selected topics. Subjects and credit may vary from semester to semester.

**Credit Hour:** 1-99

---

**ENV\_SC 2600: Sustainability Foundations: An Introduction to Sustainability**

(same as BIOL\_EN 2600). This course introduces fundamental concepts of sustainability from sustainable development to sustainability science. It focuses on human-environment systems, the characteristics of these systems, and patterns of change. Course materials interrogate taken-for-granted assumptions that shape human relationships with the natural world. You will learn to identify common dynamics leading to social and environmental problems with the aim of identifying alternative actions (solutions) for transitioning towards sustainability. Sustainability integrates the social and biophysical sciences; and implementing solutions requires the integration of the social justice, the arts, and humanities. Through a variety of interdisciplinary perspectives and frameworks, you will learn about current sustainability research and be able to develop an understanding of what sustainability means to you and your field of study. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENV\_SC 2600H: Sustainability Foundations: An Introduction to Sustainability - Honors**

(same as BIOL\_EN 2600). This course introduces fundamental concepts of sustainability from sustainable development to sustainability science. It focuses on human-environment systems, the characteristics of these systems, and patterns of change. Course materials interrogate taken-for-granted assumptions that shape human relationships with the natural world. You will learn to identify common dynamics leading to social and environmental problems with the aim of identifying alternative actions (solutions) for transitioning towards sustainability. Sustainability integrates the social and biophysical sciences; and implementing solutions requires the integration of the social justice, the arts, and humanities. Through a variety of interdisciplinary perspectives and frameworks, you will learn about current sustainability research and be able to develop an understanding of what sustainability means to you and your field of study. Graded on A-F basis only.

---

**Credit Hours:** 3

---

**ENV\_SC 3085: Problems in Environmental Science**

Special individualized projects or readings in environmental science.

**Credit Hour:** 1-99

---

**ENV\_SC 3250: Pollutant Fate and Transport**

(same as CV\_ENG 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.

**Credit Hours:** 3

**Prerequisites:** ENV\_SC 1100 or SOIL 2100 or CV\_ENG 3200; and CHEM 1320

---

**ENV\_SC 3290: Soils and the Environment**

(same as SOIL 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100, ENGLSH 1000. Recommended 3 hours of CHEM courses

---

**ENV\_SC 3290W: Soils and the Environment - Writing Intensive**

(same as SOIL 3290W). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100, ENGLSH 1000. Recommended 3 hours of CHEM courses

---

**ENV\_SC 3330: Environmental Land Use Management**

An introduction to environmentally sustainable use and management of land.

**Credit Hours:** 3

---

**ENV\_SC 3400: Water Quality and Natural Resources Management**

(same as NAT\_R 3400). Introduction to broad aspects of water quality science, management, and policy. Topics include aquatic ecology, eutrophication, lake and coastal management, water supply and treatment, watershed management with respect to agriculture and urban development, and toxicology. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** CHEM 1320 and ENV\_SC 1100 or NAT\_R 1070

---

**ENV\_SC 3500: Pollutant Fate and Transport**

This course introduces students to concepts governing pollutant fate and transport in the environment, and it provides students with the quantitative tools necessary to estimate the fate and transport of pollutants in the environment.

---

**Credit Hours:** 3

**Prerequisites:** ENV\_SC 1100 or SOIL 2100, and CHEM 1320

---

**ENV\_SC 4001: Topics in Environmental Science - General**

Organized study of selected topics in environmental science.

**Credit Hour:** 1-99

---

**ENV\_SC 4024: Foundations of Environmental Education**

(same as NAT\_R 4024; cross-leveled with NAT\_R 7024) This course provides a theoretical foundation to environmental education (EE). The purpose of this course is to develop the knowledge and skills for developing quality, age-appropriate EE for students in both formal and non-formal education setting. The emphasis is on EE curriculum materials, resources, and programs that can be used with students in settings at classrooms, nature centers, museums, and parks. This course involves training in the Missouri Department of Conservation Discover Nature School educational materials, and in observing and teaching EE lessons in a local nature center. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1010 or ENV\_SC 1100 or NAT\_R 1060 or NAT\_R 1070 or NAT\_R 2160 or Instructor's consent

---

**ENV\_SC 4085: Problems in Environmental Science**

Special individualized research projects or readings in environmental science.

**Credit Hour:** 1-99

---

**ENV\_SC 4100: Lake Ecology**

(same as NAT\_R 4100; cross-leveled with ENV\_SC 7100, NAT\_R 7100). Ecology of inland waters with emphasis on productivity. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** senior standing or BIO\_SC 3650

---

**ENV\_SC 4200: Stream Ecology and Hydrology**

(cross-leveled with ENV\_SC 7200). This senior/grad course in stream ecology will provide students an opportunity to increase their knowledge about the ecology of flowing waters. The course will cover physical and biological elements of fluvial ecosystems, with a focus on mechanisms and processes and the discussion of critical issues associated with the conservation and management of streams and their biota. The course is built around lectures, assigned readings, and class and home activities. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** 60 credit hours, MATH 1100

**Recommended:** BIO\_SC 3650 or FOREST 4320

---

**ENV\_SC 4300: Methods in Aquatic Ecology**

(same as NAT\_R 4300; cross-leveled with ENV\_SC 7300, NAT\_R 7300). Methods used for quantitative assessment of water quality and quantity in inland waters. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** senior standing or BIO\_SC 3650 and ENV\_SC 4100/ NAT\_R 4100 or ENV\_SC 3400/NAT\_R 3400 or FOREST 4390

---

**ENV\_SC 4305: Environmental Soil Physics**

(same as SOIL 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100

**Recommended:** PHYSICS 1210 or equivalent

---

**ENV\_SC 4306: Environmental Soil Physics Laboratory**

(same as SOIL 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes.

**Credit Hours:** 2

**Prerequisites or Corequisites:** ENV\_SC 4305

---

**ENV\_SC 4312: Environmental Soil Microbiology**

(same as SOIL 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100

**Recommended:** general microbiology

---

**ENV\_SC 4318: Environmental Soil Chemistry**

(same as SOIL 4318 and GEOL 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330; junior standing or instructor's consent

---

**ENV\_SC 4320: Hydrologic and Water Quality Modeling**

(same as NAT\_R 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making.

**Credit Hours:** 3

**Prerequisites:** ENV\_SC 1100 or SOIL 2100

---

**ENV\_SC 4396: Agroforestry for Watershed Restoration**

Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FOREST 4385 or FOREST 7385

---

**ENV\_SC 4400: Environmental Law, Policy, and Justice**

(cross-leveled with ENV\_SC 7400, AAE 7400). This course will examine the intersection of environmental law, policy, and justice. We will first cover the building blocks of U.S. environmental law, including common law and statutes such as the Clean Air Act and the Clean Water Act. We will then turn to international environmental policy issues such as climate change, marine pollution, and the hazardous waste trade.

We will approach these laws and treaties through the lens of equity and environmental justice. The course will use a variety of teaching methods, including lecture and classroom discussion using cold calling and the Socratic Method. We will also have student presentations, guest speakers, a moot court, a negotiation simulation, and a field trip in the Columbia, Missouri area. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Junior, senior, or graduate student status

---

**ENV\_SC 4400W: Environmental Law, Policy, and Justice - Writing Intensive**

(cross-leveled with ENV\_SC 7400, AAE 7400). This course will examine the intersection of environmental law, policy, and justice. We will first cover the building blocks of U.S. environmental law, including common law and statutes such as the Clean Air Act and the Clean Water Act. We will then turn to international environmental policy issues such as climate change, marine pollution, and the hazardous waste trade. We will approach these laws and treaties through the lens of equity and environmental justice. The course will use a variety of teaching methods, including lecture and classroom discussion using cold calling and the Socratic Method. We will also have student presentations, guest speakers, a moot court, a negotiation simulation, and a field trip in the Columbia, Missouri area. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Junior, senior, or graduate student status

---

**ENV\_SC 4600: Sustainability Science Problem Solving**

This course introduces fundamental concepts of sustainability science. It provides a survey of perspectives, frameworks, and competencies to engage in sustainability problem-solving. Students will develop an understanding for integrating critical concepts from economics and business, social and public policy, and environmental science and law to address pressing sustainability challenges. Through student-selected and student-led individual or group projects, principles learned will be used to analyze complex social-ecological problems to design alternative pathways towards sustainability. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites or Corequisites:** ENV\_SC 2600 or BIOL\_EN 2600

---

**ENV\_SC 4940: Environmental Science Internship**

Supervised professional experience with an approved public or private organization. Graded on S/U basis only.

**Credit Hour:** 1-99

---

**ENV\_SC 4950: Undergraduate Research in Environmental Science**

Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.

**Credit Hour:** 1-4

**Prerequisites:** ENV\_SC 1100, STAT 1200

**Recommended:** 9 hours of Environmental Science with at least 3 hours above the 3000-level

---

**ENV\_SC 7001: Topics in Environmental Science**

Organized study of selected topics in environmental science. Intended for graduate students.

**Credit Hour:** 1-99

---

**ENV\_SC 7100: Lake Ecology**

(same as NAT\_R 7100; cross-leveled with ENV\_SC 4100, NAT\_R 4100). Ecology of inland waters with emphasis on productivity. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** BIO\_SC 3650

---

**ENV\_SC 7200: Stream Ecology and Hydrology**

(cross-leveled with ENV\_SC 4200). This senior/grad course in stream ecology will provide students an opportunity to increase their knowledge about the ecology of flowing waters. The course will cover physical and biological elements of fluvial ecosystems, with a focus on mechanisms and processes and the discussion of critical issues associated with the conservation and management of streams and their biota. The course is built around lectures, assigned readings, and class and home activities. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** 60 credit hours, MATH 1100

**Recommended:** BIO\_SC 3650 or FOREST 4320

---

**ENV\_SC 7300: Methods in Aquatic Ecology**

(same as NAT\_R 7300; cross-leveled with ENV\_SC 4300, NAT\_R 4300). Methods used for quantitative assessment of water quality and quantity in inland waters. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** senior standing or BIO\_SC 3650. ENV\_SC 4100 or NAT\_R 4100 or NAT\_R 3400 or FOREST 4390

---

**ENV\_SC 7305: Environmental Soil Physics**

(same as SOIL 7305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100, PHYSCS 1210 or equivalent

---

**ENV\_SC 7306: Environmental Soil Physics Laboratory**

(same as SOIL 7306). Introduction to the methodology and equipment for measurement of soil physical properties and properties and processes. Prerequisites or Corerequisites: SOIL 4305.

**Credit Hours:** 2

---

**ENV\_SC 7312: Environmental Soil Microbiology**

(same as SOIL 7312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic degradation and bioremediateion, soil quality and pathogen regulation in the environment. Nitrogen fixation, mycorrhizal processes are discussed.

**Credit Hours:** 3

---

**ENV\_SC 7318: Environmental Soil Chemistry**

(same as SOIL 7318 and GEOL 7318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and

weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330

---

**ENV\_SC 7320: Hydrologic and Water Quality Modeling**

(same as NAT\_R 7320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making.

**Credit Hours:** 3

**Prerequisites:** ENV\_SC 1100 or SOIL 2100 or equivalent

---

**ENV\_SC 7396: Agroforestry for Watershed Restoration**

Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FOREST 4385 or FOREST 7385 or permission of instructor

---

**ENV\_SC 7400: Environmental Law, Policy, and Justice**

(same as with AAE 7400; cross-leveled with ENV\_SC 4400). This course will examine the intersection of environmental law, policy, and justice. We will first cover the building blocks of U.S. environmental law, including common law and statutes such as the Clean Air Act and the Clean Water Act. We will then turn to international environmental policy issues such as climate change, marine pollution, and the hazardous waste trade. We will approach these laws and treaties through the lens of equity and environmental justice. The course will use a variety of teaching methods, including lecture and classroom discussion using cold calling and the Socratic Method. We will also have student presentations, guest speakers, a moot court, a negotiation simulation, and a field trip in the Columbia, Missouri area. Graded on A-F basis only.

**Credit Hours:** 3

---

**ENV\_SC 8090: Masters Research in Environmental Science**

Original investigations in environmental science for presentation in a thesis. Graded on S/U basis only.

**Credit Hour:** 1-10

---

**ENV\_SC 8400: Solute Transport in the Vadose Zone**

(same as SOIL 8400). Transport of water and solutes in geomedia with emphasis on development of the equations of flow. Evaluation of analytical and numeral solutions to equations describing transport phenomena.

**Credit Hours:** 3

**Prerequisites:** ENV\_SC 7305 or SOIL 7305

---

## Environmental Studies Courses

### ENV\_ST 2150: Directed Independent Study

Working with Environmental Studies you will find and develop a research project or an internship with the university, a government agency, a business or a non-profit agency. The project will be directed towards solving an environmental problem.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

## Family And Community Medicine Courses

### F\_C\_MD 6001: Family Medicine Clerkship

Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, nursing home settings and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

**Credit Hours:** 8

---

### F\_C\_MD 6011: Rural Family Medicine Clerkship

Rural Family Medicine Clerkship

**Credit Hours:** 8

---

### F\_C\_MD 6021: Springfield Family Medicine Clerkship

Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, nursing home settings and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

**Credit Hours:** 8

**Prerequisites:** successful completion of the first two years of medical school

---

### F\_C\_MD 6036: SCC Palliative Care Elective

Students will learn a multidisciplinary approach to the care of the palliative care patient while working in a variety of clinical settings. This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with a terminal condition. Each week students will work with palliative care physicians at either Cox or Mercy Palliative Care Service and/or a Hospice agency. Students will have the opportunity to see patients undergoing palliative care assessment and observe nursing staff and professional therapy staff in their work with patients and families. Students will participate in various palliative care- related conferences. Students will participate in inpatient palliative care services as well as outpatient palliative care clinics. The student will work with faculty in the Departments of Family and Community Medicine as well as Internal Medicine.

**Credit Hours:** 5

---

**Prerequisites:** Successful completion of 5 of 7 core clerkships, one of which must be either Family Medicine or Internal Medicine. IN\_MED 6002, 6012, 6022, or 6102. F\_C\_MD 6001, 6011, 6021, or 6101

---

### F\_C\_MD 6048: SCC Rural Family Medicine Selective

The selective is designed for self-motivated students interested in rural primary care, who are willing to explore a variety of outpatient clinical and community experiences. During this block, students will primarily be working with a faculty member in an outpatient Mercy or Cox Family Medicine Clinic in Southwest Missouri. Up to a 50 mile commute from Springfield may be required. There may be opportunities to participate in the care of patients in a variety of settings including nursing home visits, home visits, and urgent care. There will be the opportunity to participate in the care of patients in all life stages (pregnancy, pediatrics, geriatrics) as well as participate in office based procedures. To gain a better understanding of community resources and needs, students will visit local agencies such as the County Health Department, WIC, Parents as Teachers, the public school system, the Chamber of Commerce, or other community resources as identified by the student and faculty. Students will also spend time with the front office, nursing, and laboratory staff to learn about practice management. During this month, students will work on a scholarly project to improve patient care and present this educational topic to the faculty and staff at the clinic.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the first two years of medical school. Successful completion of five of the seven core clerkships. One of the five must be the Family Medicine Clerkship

---

### F\_C\_MD 6049: SCC Palliative Care Selective

This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with a terminal condition. The student will be expected to function at a sub-intern level and will be expected to document advance care planning and lead discussions with patients and their families. Each week students will work with palliative care physicians at either Cox or Mercy Palliative Care Service and/or a Hospice agency. Students will have the opportunity to see patients undergoing palliative care assessment and observe nursing staff and professional therapy staff in their work with patients and families. Students will participate in various palliative care- related conferences. Students will participate in inpatient palliative care services as well as outpatient palliative care clinics. The student will work with faculty in the Departments of Family and Community Medicine as well as Internal Medicine.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the first two years of medical school as well as five of the seven core clerkship. Two of the five must be the Medicine Clerkship and Family Medicine Clerkship

---

### F\_C\_MD 6051: SCC Primary Care Dermatology 4WK Elective

Students participate in the evaluation of patients with skin disease Primary Care Outpatient clinic. Students will also complete the American Academy of Dermatology online student modules designed for a 4 week curriculum and the self-evaluation that is provided. Students will gain knowledge and demonstrate comprehension of a breadth of basic general dermatologic diseases. They will care for adults and pediatric patients as well as review supplied photographs for supplementation to develop their clinical diagnostic skills. The rotation is designed to provide

the medical student with a broad general base in clinical dermatology for the non-dermatologist.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the Family Medicine clerkship. Faculty approval is required of all Springfield electives

---

**F\_C\_MD 6058: FM Federally Qualified Health Center(FQHC) Clinical Experience**

This course is designed for self-motivated students interested in working in underserved (rural or urban) settings. Students will work with physicians at a Federally Qualified Health Center (FQHC) in Missouri. The primary mission of FQHCs is to enhance primary care services in underserved urban and rural communities. Coordinating with the FQHC's medical director (or designee), the student will develop a schedule of activities including items from the educational opportunities listed below. At least 50% of the student's time should be in patient care-related activities.

**Credit Hours:** 5

**Prerequisites:** Successful completion of the first two years of medical school and the family medicine clerkship

---

**F\_C\_MD 6101: Remediation Family Medicine Clerkship**

Enrolled students are those who received an unsatisfactory grade in a Family Medicine Clerkship at any Mizzou Med location or site. This course allows them the opportunity to rectify a deficiency.

**Credit Hours:** 8

**Prerequisites:** F\_C\_MD 6001 Family Medicine Clerkship, received unsatisfactory grade

---

**F\_C\_MD 6253: ABS Family and Community Medicine Research**  
ABS Family and Community Medicine Research

**Credit Hour:** 5-10

---

**F\_C\_MD 6475: Family Medicine Elective (FP Orientation)**

This elective is for Integrated Residents in the Department of Family and Community Medicine only. Two core clinical rotations are required, including Family Medicine Clerkship. During this one year longitudinal experience, Integrated Residents will work closely with senior residents and faculty members to enhance the knowledge and skills needed to care for patients in a comprehensive family medicine continuity clinic. Integrated Residents are required to attend orientation activities during 15A. Regular attendance to Wednesday departmental Grand Rounds and Tuesday afternoon Resident Seminars is also expected.

**Credit Hours:** 5

---

**F\_C\_MD 6477: Family Medicine Elective Preceptorship**

May be available as a rural offsite elective: contact the MU-AHEC Coordinator. Goals/Objectives: During this elective the student works closely with a family physician in private practice. Students both observe the preceptor's patient encounters and take primary responsibility for several patients each day, discussing diagnosis and formulating management plans with supervision by the preceptor. The Preceptorship also provides opportunities not available elsewhere in the medical school curriculum, including seeing the patient's illness in its context, assessing a community's health care system, and learning about practice management. Evaluations: Evaluation of the student is based on the

preceptor's evaluation and comments. Notes: Site must be pre-approved by the Course Director.

**Credit Hours:** 5

**Prerequisites:** Students should have completed at least two clinical blocks, plus the Family Practice Clerkship

---

**F\_C\_MD 6483: Preventive/Community Medicine**  
Preventive/Community Medicine

**Credit Hours:** 5

---

**F\_C\_MD 6485: Geriatrics-Family and Community Medicine Elective**

Goals/Objectives: This is an outpatient experience in a variety of settings. Each week students will: 1. Work with Dr. David Cravens and other health care providers at Lenoir Village, Lenoir Manor, Lenoir Health Care and Maplewood Apartments. These all represent different levels and types of care available to elders. a. Students will develop an understanding of the available care and residential options that elders utilize. 2. Work with several geriatricians in the SAGE Clinic and/or Geriatrics Clinic at Green Meadows. a. Students will improve their understanding of care of elders in the outpatient setting. b. Students will also see patients undergoing geriatric assessment and thus develop a better understanding of the multidisciplinary approach to geriatric assessment. 3. Additional experiences may be arranged depending on the student's interests. 4. Participate in the various conferences related to geriatrics. Evaluations: Final evaluation will be determined by the attending physicians supervising the student during the block.

**Credit Hours:** 5

**Prerequisites:** Must have completed all core clerkships

---

**F\_C\_MD 6486: Evidence Based Medical Writing in Family Medicine**

Student will co-author a draft of an evidence-based article under the supervision of FCM faculty with evidence-based writing experience. Before writing begins, students complete an evidence-based medicine curriculum using online modules. FCM integrated residents will also participate in a departmental editorial review session.

**Credit Hours:** 5

**Prerequisites:** restricted to 4th year medical students

---

**F\_C\_MD 6487: Family and Community Medicine Palliative Care Elective**

This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with terminal condition.

**Credit Hours:** 5

**Prerequisites:** F\_C\_MD 6001; restricted to 4th year medical students

---

**F\_C\_MD 6488: Family Medicine Outpatient Elective**

Students will have the opportunity to work with two to four Family Medicine physicians at one of our UMHC Family Medicine clinics (South Providence Medical Building, Keene Family Medicine clinic, Smiley Family Medicine clinic, Ashland Family Medicine clinic, Callaway physicians, Fulton Family Health, or Fayette Medical clinic). Students will be paired with two to four faculty members or senior FM residents and will be responsible for seeing patients in the outpatient setting. Duties include obtaining appropriate history and performing a physical exam, medical decision making, patient education, documenting a clinic encounter,

patient follow up after the visit, and reading about common acute and chronic illnesses seen in Family Medicine). If the preceptor participates in patient care in the hospital or nursing home, the student will have the opportunity to participate in hospital rounds or nursing home/hospice care.

**Credit Hours:** 5

**Prerequisites:** Successful completion of three of the seven core clerkships including Family Medicine

---

**F\_C\_MD 6775: Family Medicine Preceptorship - Rural**  
Family Medicine Preceptorship - Rural

**Credit Hours:** 5

---

**F\_C\_MD 6777: Rural Health Policy and Legislative Advocacy**

Elective content will focus on the intersection of rural medicine, health policy, and legislative advocacy. Course Goals: 1) To inform and educate students about rural health policy issues at the local, state, and national levels. 2) To train medical students to be informed advocates of rural health policy issues at the local, state, and national levels. To apply, medical students must complete the Rural Track Elective Application posted on the MU AHEC website <http://medicine.missouri.edu/ahec/rural-track-elective.html>. In the notes section of the application, the student must document a rationale for applying for this course. (Maximum length - 1 paragraph).

**Credit Hours:** 5

**Prerequisites:** M4 status. Applicants must complete either the Rural Track Summer Community Program or the Rural Track Clerkship Program prior to enrollment. Students will share first-hand experiences from rural track placement(s) with legislators to advocate for the MU Rural Track Pipeline Program and to influence rural health policy in Missouri

---

**F\_C\_MD 6875: Family Medicine Onsite Externship**

Goals/Objectives: The student who is on the onsite track of the externship will be a member of the Family Practice Inpatient Team that is responsible for providing care to Family Practice patients in the hospital. The team consists of an attending, physician, two third-year residents, and two or three first-year residents. The student will be expected to function as a member of the team, attending rounds on a daily basis and assuming responsibility, under supervision, for the care of some of the patients. Each student will have 4-5 nights of call including weekend days. Students will be responsible for providing care, with supervision, to those patients admitted while they are on call. Students will also be expected to follow their patients after discharge, making home visits or nursing home visits and seeing them in follow-up at the clinic as indicated. Students will also have exposure to ambulatory family medicine. Each student will work closely in the clinic with one of the third-year residents assigned to the inpatient team. The student will attend each of the resident's clinics whether they are at Green Meadows, Fulton, or Fayette.

**Credit Hours:** 5

**Prerequisites:** Students should have completed at least two clinical blocks, plus the Family Practice Clerkship

---

**F\_C\_MD 6876: Family Medicine Offsite Externship**

Several different types of experiences are available for the offsite track of the externship. Students have the opportunity to work at selected

Indian Health Service sites that provide the appropriate mix of inpatient and outpatient experiences. A list of these IHS sites and the students' evaluations are available in the course office. These offer high volume and high levels of responsibility. Planning needs to begin early in the third year. Offsite externship experiences are also available in certain community-based family practices and in certain family practice residency programs. A list of pre-approved sites is available in the course office. All of the sites available for the offsite experience have been carefully selected by the faculty based on previous experiences of fourth-year students. These sites offer an appropriate level of patient care responsibility with supervision. Offsite practices need to be approved in advance by the course director and often require planning 6 to 12 months in advance. Students considering offsite rotations will be expected to have a clear idea of how these experiences will offer unique advantages to their personal and professional development, and how they will meet the course criteria. Many offsite locations used in the past for the Family Medicine Clerkship will not satisfy the externship requirement. They still offer excellent experiences and could be taken as electives. Students on the offsite track will be evaluated with respect to their ability to collect, process, and analyze information, engage in clinical reasoning, and formulate appropriate diagnoses and treatment plans. Sites must be pre-approved by the Course director.

**Credit Hours:** 5

---

**F\_C\_MD 6877: Rural Family Medicine Elective**  
Rural Family Medicine Elective

**Credit Hours:** 5

---

**F\_C\_MD 6878: Family Medicine Maternity Care-Advanced Selective**  
Family Medicine Maternity Care-Advanced Selective

**Credit Hours:** 5

---

**F\_C\_MD 6879: Palliative Care Selective**

This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with a terminal condition. Each day the student will work directly with palliative care physicians, as well as the rest of the multidisciplinary team, as part of the University Hospital Supportive and Palliative Care Service. They will also have the opportunity to work with a medical director of a local Hospice agency, who is a faculty member of the University of Missouri. Students will be expected to function as a member of the Palliative Care Team. Students will have the opportunity to actively participate in the assessment and care of patients under the direction of the Palliative Care Interdisciplinary team. Students will work alongside palliative care attending physicians, nursing staff, social workers, and pastoral care team members in their work with patients and families. Students will participate in various palliative care-related conferences including Interdisciplinary Team Meetings, didactics, patient remembrance and memorial services, self-care rounds, monthly team business meetings and the monthly Palliative Care hospital committee meeting. Additional experiences will include outpatient palliative care clinics at Ellis Fischel, bi-weekly community Hospice Interdisciplinary team meetings, patient home assessments and nursing visits with hospice staff, and completion of an oral presentation to the Palliative Care Team as part of their assessment and evidence of mastery of course objectives.

**Credit Hours:** 5

**Prerequisites:** Fourth year medical student. Must have completed 6 of the 7 core clerkships

---

**F\_C\_MD 6905: SCC Primary Care Dermatology 2-week Elective**

This curriculum is designed to introduce the student to common dermatologic issues that are encountered in a primary care practice location. Students will also complete the American Academy of Dermatology online student modules designed for a 2 week curriculum and the self-evaluation that is provided. Students will gain knowledge and demonstrate comprehension of a breadth of basic general dermatologic diseases. They will care for adults and pediatric patients as well as review supplied photographs for supplementation to develop their clinical diagnostic skills.

**Credit Hours:** 2

**Prerequisites:** Successful completion of the first two years of medical school

---

**F\_C\_MD 6928: Primary Care Sports Medicine Elective**

Students will work with a multi-disciplinary sports medicine team, providing hands on clinical services in an outpatient setting. Participants will gain experience working with primary care sports medicine physicians, orthopedic surgeons, physical therapists and cast technicians.

**Credit Hours:** 2

**Prerequisites:** successful completion of the first two years of medical school

---

**F\_C\_MD 7310: The Health Care System**

Overview of health care system and relationship between its components. Focuses on changing nature of the system and issues confronting the future health care system.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 7350: Special Readings in Community Health**

Extensive reading and critical analysis of classical and current studies in selected areas of community health.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 7400: Problems in Community Health**

Intensive study of an area of community health.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 8410: Principles and Practices in Medical Education**

An examination of the past and present influences on the education of physicians, the application of adult education principles and the future approaches to medical education.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 8411: Learning Strategies in Preclinical & Clinical Educ. of Physicians**

Examination of curricular strategies in preclinical and clinical education of medical students and graduate medical education. Emphasis will be placed on different types of instructional strategies.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 8420: Principles of Epidemiology**

Examines methods of study of disease frequency and distribution in populations. Utilizes small group discussions for understanding of current medical literature.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 8422: Clinical Research Methods I**

Principles of designing, implementing and reviewing research in the health sciences.

**Credit Hours:** 3

---

**F\_C\_MD 8423: Clinical Research Methods II**

This is a continuation of the Clinical Research Methods I (CRM\_I) introductory course on the multi-method approach to clinical research. Similar to the previous course, it covers both quantitative and qualitative research methods, but includes advanced applications.

**Credit Hours:** 3

---

**F\_C\_MD 8424: Comparative Effectiveness Research**

Advanced research class that presents a framework for analyzing observational studies and randomized trials for comparative effectiveness. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Two recent semester-length courses in statistics such as NURSE 8020 or STAT 2500 or above; Working knowledge of managing and analyzing data in SPSS or SAS; Research methods; or consent of instructor

**Recommended:** One semester of epidemiology is strongly recommended

---

**F\_C\_MD 8425: Participatory Approaches for Health and Health Systems**

(same as NURSE 8425). Focuses on the use of participatory approaches for the design of health and health-system interventions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** NURSE 8100 or F\_C\_MD 8420 or instructor consent

---

**F\_C\_MD 8430: Applications of Evidence-Based Medicine I**

Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

---

**F\_C\_MD 8431: Applications of Evidence-Based Medicine II**

Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_C\_MD 8450: Research in Community Health**

Original research in community health not leading to a thesis but requiring a formal research report.

**Credit Hour:** 1-99

---

**F\_C\_MD 8491: Field Experience in Family and Community Medicine**

Supervised teaching experience in the preclinical, clinical, and residency programs.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

## Film Studies - Visual Studies Courses

**FILMS\_VS 1000: Introduction to Film for Non-Majors**

Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. No credit for students who have completed FILM\_S 1800. No credit for film majors or minors. Graded on A-F basis only.

**Credit Hours:** 3

---

**FILMS\_VS 1800: Introduction to Film Studies**

(same as ENGLSH 1800, DST\_VS 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. No credit for students who have completed FILMS\_VS 2810. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Freshmen and Sophomores only or instructor's consent

---

**FILMS\_VS 1800H: Introduction to Film Studies - Honors**

(same as DST\_VS 1800, ENGLSH 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound, narrative, genre, and other elements. No credit for students who have completed FILMS\_VS 2810. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Freshmen and sophomores only or instructor's consent; Honors eligibility required

---

**FILMS\_VS 1880: Introduction to Digital Media Production**

(same as DST\_VS 1880, ENGLSH 1880, ARTGE\_VS 1920, COMMUN 1880). Introduction to concepts and skills for film making, video art, and digital storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

**Credit Hours:** 3

---

**Prerequisites:** Enrollment limited to declared FILMS\_VS majors during early registration

---

**FILMS\_VS 2001: Topics in Film Studies-General**

Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

**Credit Hour:** 1-3

---

**FILMS\_VS 2005: Topics in Film Studies- Humanities**

Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

**Credit Hour:** 1-3

---

**FILMS\_VS 2010: The Philosophy of Film**

(same as PHIL 2010). Philosophical problems having to do with film. Topic may include the nature of films, the differences between fiction and documentary film, ethical issues with film and filmmaking.

**Credit Hours:** 3

---

**FILMS\_VS 2020: World Cinema for Non-Majors**

World Cinema introduces students to the history of international cinema. The course focuses on particular cinematic movements and national cinemas as case studies for trends and trajectories that also characterize the national and non-Hollywood cinemas not covered in the course. Examines the relationship of form and genre to individual national, or localized, cultural contexts. No credit for students who have completed FILMS\_VS 2820. No credit for film majors or minors. Graded on A-F basis only.

**Credit Hours:** 3

---

**FILMS\_VS 2160: Film Adaptation of Shakespeare - Non Majors**

This course serves as an introduction to the problems and complexities that arise when adapting William Shakespeare's plays to contemporary film. One basic task of the course is to develop students' ideas about adaptation, especially with reference to contemporary adaptation theory. This course hopes both to explain and discredit the value of 'fidelity discourse,' students should be liberated from the notion of 'faithfulness' to the texts. No credit for film majors or minors. Graded on A-F basis only.

**Credit Hours:** 3

---

**FILMS\_VS 2530: Screenwriting I**

(same as COMMUN 2530). Analyze various script formats and apply different writing techniques and styles to create screenplays and teleplays. Work inside a creative critique environment to craft vivid storytelling and character elements while developing viable loglines and pitches for their stories. Screenwriting concepts include the three-act structure and the timing and placement of plot points. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 or ENGLSH 1800; sophomore standing or higher. May be restricted to Film Studies majors and minors during early registration

---

---

**FILMS\_VS 2540: Introduction to Film Management**

Film Production Management is a hands-on exploration of the roles of feature film executive producers, producers and unit production managers. Creating balanced budgets, hiring personnel, creating meaningful business relationships, and managing post-production responsibilities are investigated. The feature film budget will be examined in each phase of the production; creating a sales pitch for a film, and developing a detailed approach to distribution is explored. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 or ENGLISH 1800; sophomore standing or higher

---

**FILMS\_VS 2820: Trends in World Cinema**

(same as GERMAN 2820 and RM\_LAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing, ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 2830: American Film History I, 1895-1950**

(same as ENGLISH 2830). Examines the development of American cinema in relation to other national cinemas, from 1895-1950. No credit for students who have completed ENGLISH or FILM\_S 1810.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 2840: American Film History II, 1950-Present**

(same as ENGLISH 2840). Examines American film history in an international context, from 1950-present. No credit for students who have completed ENGLISH or FILM\_S 1820.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 2850: Italian Cinema**

(same as ITAL 2850). It offers a historical overview of Italian Cinema from the silent era to the present. The course will provide the analytical skills necessary to read and critically analyze a film. Social and historical issues will be raised and examined for each film as appropriate. No knowledge of Italian required.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

---

**FILMS\_VS 2860: Film Themes and Genres**

(same as ENGLISH 2860, DST\_VS 2860) Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 2680.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 2865: The Art of Soviet and Russian Cinema**

(Same as RUSS 2865) Topics (e.g. Distorted Picture: Post-War Cinema in a Soviet State, Cinema in the Soviet Times and Beyond, etc.)

announced at time of registration. Only 6 hours may be taken toward major.

**Credit Hours:** 3

---

**FILMS\_VS 2865W: The Art of Soviet and Russian Cinema - Writing Intensive**

(Same as RUSS 2865) Topics (e.g. Distorted Picture: Post-War Cinema in a Soviet State, Cinema in the Soviet Times and Beyond, etc.) announced at time of registration. Only 6 hours may be taken toward major.

**Credit Hours:** 3

---

**FILMS\_VS 2870W: Film and Literature - Writing Intensive**

(same as ENGLISH 2870W). Explores the complex interplay between film and literature in order to gain an understanding of the possibilities - and problems - involved in the transposition from literature to film. Graded A-F basis only

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 3005: Topics in Film Studies - Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** Sophomore standing

---

**FILMS\_VS 3005W: Topics in Film Studies - Humanities - Writing Intensive**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** Sophomore standing

---

**FILMS\_VS 3490: Indian Cinema**

(same as S\_A\_ST 3490, ANTHRO 3490, VS\_ARH 3790). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or higher

---

**FILMS\_VS 3520: Post Production**

Editing above all else is about feeling and rhythm. This course immerses students in the complete filmmaking editorial process from ingesting the footage to final delivery. Using non-linear editing software students will sharpen their sensibilities through hands on learning and practice. While editing scenes from both fiction and non-fiction cinema - students can expect to learn the ins and outs of media management and organization, the language of the edit, basic toolset navigation and color correction. Graded A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 or ENGLISH 1800; sophomore standing or higher

---

**FILMS\_VS 3530: Screenwriting II**

Builds upon principles of story arc and screenwriting techniques, while providing an in-depth study of character psyche and unique voice. Students will master the skills necessary to create vibrant, memorable characters through the exploration and development of unique character traits, physical imagery development and distinctive voice. Students will analyze dialog traits of scripts and films of industry professionals, and will craft their own characters using industry standard technology, adhering to the principles of industry standard formatting. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 and FILMS\_VS 2530 or FILMS\_VS 3930 or THEATR 3930

---

**FILMS\_VS 3540: Cinematography I**

An exploration of the principles and techniques of cinematography that includes shot composition lighting styles, and storytelling, using the moving image. Students will examine historical and contemporary approaches to cinematography used in Hollywood, foreign and independent films. Analyzing cinematographic approaches of a wide range of work will help the students discriminate the quality of their own creative work. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 or ENGLISH 1800, and FILMS\_VS 1880, DST\_VS 1880, ENGLISH 1880 or ARTGE\_VSL 1920, or JOURN 2150 or JOURN 1400. Sophomore standing or higher. May be restricted to Film Studies majors and minors during early registration

---

**FILMS\_VS 3550: Field Production I**

Collaborating in crews of five, students are exposed to a broad range of production techniques through practical production experience and in class discussion. During the semester students will produce 3 short projects, and in class workshops. As a group member, each student may serve in rotation as Director, Producer, Camera, Sound recordist and AC/Gaffer. Students will also be developing their own short scripts and are expected to pitch the projects (for production in Field Production II) in front of faculty and industry professionals in the final weeks of the semester. Graded A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 or ENGLISH 1800, FILMS\_VS 1880 or DST\_VS 1880 or ARTGE\_VS 1920, and FILMS\_VS 3540

---

**FILMS\_VS 3555: Directing for the Screen**

Directing for the Screen combines previous knowledge of the cinematic frame with the power of communication. This course focuses on developing the student's ability to effectively communicate to actors, cinematographers, and art departments, while also commanding a film crew and managing relationships with producers. Students develop concise personal vision and aesthetics with respect to scripts, and will work directly with actors to achieve performances that suit the project.

**Credit Hours:** 3

---

**FILMS\_VS 3560: Audio Engineering for the Screen**

This course is an intensive study of the techniques and science behind the use of audio in today's cinema. The course will focus on four major

areas of study: sound in cinema, sound creation, sound manipulation, and environmental sound layering.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800 or ENGLISH 1800, Sophomore standing. May be restricted to Film Studies majors and minors during early registration

---

**FILMS\_VS 3775: The Ancient World on Film**

(same as AMS 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues.

**Credit Hours:** 3

**Prerequisites:** Prior 2000 level coursework in AMS, ARH\_VS or FILMS\_VS. Instructors consent required

---

**FILMS\_VS 3780: Architecture in Film**

(same as ARH\_VS 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

**Credit Hours:** 3

---

**FILMS\_VS 3785: Art and Artists on Film**

(same as ARH\_VS 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

**Credit Hours:** 3

---

**FILMS\_VS 3820: Major Directors**

(same as ENGLISH 3820 and RM\_LAN 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 3830: History of German Film**

(same as GERMAN 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or instructor's consent

---

**FILMS\_VS 3845: Modern Israeli Film**

(same as HEBREW 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces concepts of Hebrew language and its use in the arts world-wide. Discusses varied communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or consent of instructor required

---

**FILMS\_VS 3850: Studies in Film History**

(same as ENGLISH 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 3855: Documentary Film**

(same as ENGLISH 3855; DST-VS 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**FILMS\_VS 3861: Film Themes and Genres**

Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 3861.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 or ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 3865: The Holocaust on Screen**

(same as GERMAN 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

---

**FILMS\_VS 3875: Brazilian Cinema**

(same as PORT 3875). An introduction to Brazilian cinema, culture, and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; redefinition of national identity and history, representations of race and gender.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**FILMS\_VS 3880: Contemporary Chinese Film**

(same as CHINSE 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or instructor's consent

---

**FILMS\_VS 3885: Twenty-First Century South American Cinema**

(same as SPAN 3885, PORT 3885). Broad overview of the major national cinemas of the 21st century in South America. Approximately 14 feature films screened from Argentina, Brazil, Chile and other nations of the

region. Instructor provides a thematic framework for films within the context of film theory, Latin American cinematic history and cultural studies. Course taught in English. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 or ENGLISH 1000H

---

**FILMS\_VS 3890: Russian and Soviet Film**

(same as RUSS 3890). Introduces three significant genres of Russian cinema: comedy, literary adaptations, and films that explore issues of identity and autobiography. Includes examples from different epochs. Considers Soviet and post-Soviet films. Russia and Russian culture. Course conducted in English; films have English subtitles.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or instructor's consent

---

**FILMS\_VS 3930: Screenwriting for Television and Film**

(same as THEATR 3930). Fundamentals of storytelling utilizing tools and structure used by television and film.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

**FILMS\_VS 4001: Topics in Film-General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** Sophomore standing

---

**FILMS\_VS 4005: Topics in Film Studies - Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing

---

**FILMS\_VS 4005W: Topics in Film Studies - Humanities - Writing Intensive**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing

---

**FILMS\_VS 4030: Video Art and the Moving Image**

(same as ARTGE\_VS 4030; cross-leveled with ARTGE\_VS 7030). Video as a fine art form intersecting with sculpture, experimental filmmaking, DIY and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. May be repeated up to 9 hours maximum.

**Credit Hours:** 3

---

**FILMS\_VS 4370: Film Studies: The Intersection of Documentary Film and Journalism**

(same as JOURN 4370; cross-leveled with FILMS\_VS 7370, JOURN 7370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as

Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public's growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/ False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

**Credit Hours:** 3

---

**FILMS\_VS 4370W: Film Studies: The Intersection of Documentary Film and Journalism-Writing Intensive**

(same as JOURN 4370; cross-leveled with FILMS\_VS 7370, JOURN 7370). Attendance at some sessions is required. Graded on A-F basis only.

**Credit Hours:** 3

---

**FILMS\_VS 4540: Cinematography II**

This workshop explores advanced cinema camera systems, lighting techniques, cine lenses and rigging equipment. We will view examples of camera and lighting work, both historical and contemporary, and develop scenes with complex blocking and camera movement. Expect to spend time outside of class working to ensure a successful semester. Graded A-F basis only.

**Credit Hours:** 4

**Prerequisites:** FILMS\_VS 1800 or ENGLISH 1800; FILMS\_VS 3540; sophomore standing or higher

---

**FILMS\_VS 4560: Field Production II**

This workshop is a senior level course that serves as the capstone of our production emphasis curriculum. Students entering the class must be prepared to submit a short script (no longer than 15 minutes) at the first class of the term, and complete the entire filmmaking process by close of the semester. Participants are required to assist fellow students in the

production of their films. Expect to spend a significant amount of time outside of class to ensure a successful semester. Works will be screened in our senior showcase. Graded A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 1800, FILMS\_VS 1880, FILMS\_VS 3540, and FILMS\_VS 3550

---

**FILMS\_VS 4580: Production Practicum**

Provides an intensive, comprehensive experience in film production. Students will receive hands-on experience in lightning and set design, camera operation, grip/electrical and sound capture. The course pits students against a rigorous industry standard shooting schedule - long hours are to be expected each day. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FILMS\_VS 3540

---

**FILMS\_VS 4810: Film Theory**

(same as ENGLISH 4810, DST\_vs 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH or FILMS\_VS 1800. Junior standing or above required

---

**FILMS\_VS 4820: Studies in Film Genre**

(same as ENGLISH 4820). Topics (e.g. The Western, film noir) announced at time of registration. No more than six hours may be taken toward the major.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800; Junior Standing or instructor's consent

---

**FILMS\_VS 4840: Culture and Media**

(Same as ENGLISH 4840, DST\_VS 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800. Junior standing or instructor's consent required

---

**FILMS\_VS 4860: Film Themes and Genres**

Topics (e.g. Film noir, African-American filmmakers, Food and Film., The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 4860.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800

---

**FILMS\_VS 4880: Capstone Experience**

This course is for Film Studies students who have completed their concentration requirements. The main objective is to help students independently create and complete a capstone project. The project should allow you to conceptualize and enter professional life after commencement.

**Credit Hours:** 3

**Prerequisites:** Film Studies majors only. Consent of instructor required

---

**FILMS\_VS 4935: Adaptation of Literature for Film**

(same as ENGLISH 4935 and THEATR 4935; cross-leveled with FILMS\_VS 7935, ENGLISH 7580 and THEATR 7935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

**Credit Hours:** 3

---

**FILMS\_VS 4940: Internship**

This course is for Film Studies students who have the opportunity to work in an internship position in a related industry or at a government agency where they can gain valuable on the job experience and knowledge. The student must register for the Internship course in the semester in which the work takes place. Graded S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILM\_S 1800. Must have at least 15 hours of Films Studies credit. Online courses do not count for the 15 hours of Film Credit

---

**FILMS\_VS 4960: Special Readings in Film Studies**

Arranged. Individual work with conferences adjusted to needs of student.

**Credit Hour:** 1-3

**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILMS\_VS 1800. Consent of instructor required. Restricted to Film Studies majors in their final year

---

**FILMS\_VS 4963: Latin American Cinema (in Spanish)**

(same as SPAN 4960). Subject varies according to instructor.

**Credit Hour:** 2-3

**Prerequisites:** SPAN 3420 and SPAN 3430

---

**FILMS\_VS 4995: Senior Honors Thesis**

Independent honors research under direction of faculty. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** Senior standing required, consent of instructor required, Honors eligibility required

---

**FILMS\_VS 7001: Topics in Film Studies-General**

Topics in Film Studies-General

**Credit Hour:** 1-3

---

**FILMS\_VS 7370: The Intersections of Documentary Film and Journalism**

(same as JOURN 7370). (cross-leveled with JOURN 4370 and FILMS\_VS 4370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public's growing fascination with documentary? How is documentary film reacting

to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/ False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

**Credit Hours:** 3

---

**FILMS\_VS 8005: Topics in Film Studies - Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

## Finance Courses

**FINANC 1000: Principles of Finance**

Financing business, consumer, and government activity; stocks, bonds, real estate, and financial markets; risk; insurance; inflation; cash and income management; capital accumulation and appreciation.

**Credit Hours:** 3

**Prerequisites:** Students admitted to COB upper level degree program cannot enroll

---

**FINANC 2000: Survey of Business Finance**

An overview of the global financial system, financial markets, financial institutions, and principles of financial management.

**Credit Hours:** 3

**Prerequisites:** Students admitted to COB upper level degree program cannot enroll

---

**FINANC 3000: Corporate Finance**

Financial decision-making in a corporate environment. Time value of money, capital budgeting, cost of capital, working capital management and financial instruments issued by the firm.

**Credit Hours:** 3

**Prerequisites:** Completed 45 semester hours; STAT 2500 (or STAT 2200 and STAT 1200 or STAT 1300 or STAT 1400); ECONOM 1014 or ECONOM 1024; ECONOM 1015 or ECONOM 1051 or ECONOM 1051H  
**Corequisites:** ACCTCY 2027 or ACCTCY 2037 or ACCTCY 2137H

---

**FINANC 3300: Personal Risk Management and Insurance**

Teaches the importance of risk in personal endeavors and the intelligent handling of such risk. Life, health, auto, homeowner and liability risks are treated.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

---

**FINANC 4010: Financial Management**

(cross-leveled with FINANC 7010). Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000

---

**FINANC 4020: Investments**

(cross-leveled with FINANC 7020). Security valuation and analysis, formulation of personal and professional investment programs.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000

---

**FINANC 4030: Financial Intermediaries and Markets**

Functions of intermediaries in the aggregation and allocation of funds, creation and transfer of assets, and distribution of risks. Regulation of financial institutions; financial institutions as instruments of public policy.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000 and ECONOM 3229

---

**FINANC 4110: Financial Management Policy**

Application of the concepts and tools of finance to cases in working capital management, capital budgeting analysis and capital structure decisions.

**Credit Hours:** 3

**Prerequisites:** FINANC 4010

---

**FINANC 4120: Security Analysis**

Classifies and analyzes securities, markets, industries. Formulation of investment policy for institutions, aggressive personal investors.

**Credit Hours:** 3

**Prerequisites:** FINANC 4020

---

**FINANC 4130: Management of Financial Institutions**

Operating principles of major financial intermediaries, including commercial banking, savings, insuring, lending and investing institutions. Analysis of cases; study of current problems. Some sections of the course may be graded on A-F or S/U graded basis only.

**Credit Hours:** 3

**Prerequisites:** FINANC 4030

---

**FINANC 4185: Problems in Finance**

Independent study, reports on selected topics. Some sections of this course may be offered A-F only or S/U only.

**Credit Hour:** 1-99

---

**FINANC 4201: Topics in Finance**

Selected topics in finance, insurance or real estate. Offered on an experimental basis. Some sections of this course may be offered A-F only or S/U only.

**Credit Hours:** 3

---

**FINANC 4220: Portfolio Management**

Development and application of the principles of modern portfolio theory to financial assets. Analysis of the concepts of diversification, portfolio construction, portfolio revision, and use of types of financial assets in effective portfolio management.

**Credit Hours:** 3

**Prerequisites:** FINANC 4020

---

**FINANC 4310: Financial Modeling and Databases**

Financial modeling and using online databases to retrieve data, data analysis, spreadsheet design, excel VBA programming, interpreting results. Graded on A-F basis only.

**Credit Hours:** 3

---

**FINANC 4320: Financial Futures and Options**

A basic overview of financial futures and options markets. Topics include: theoretical pricing of financial futures contracts and stock options, institutional aspects of these markets, hedging, and speculative strategies.

**Credit Hours:** 3

**Prerequisites:** FINANC 4020

---

**FINANC 4450: Financial Ethics and Professional Standards**

The course comprises an intensive study of the CFA Institute Code of Ethics and Standards of Professional Conduct and Global Investment Performance Standards. It also includes a review of corporate governance issues.

**Credit Hours:** 3

**Recommended:** FINANC 4010 or departmental consent

---

**FINANC 4500: Principles of Real Estate**

Principle factors influencing land use, practices in real estate business.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000

---

**FINANC 4510: Real Estate Appraisal**

Procedures for valuing industrial, commercial, residential realty by market, income, replacement cost approaches. Case method, field investigations.

**Credit Hours:** 3

**Prerequisites:** FINANC 4500

---

**FINANC 4520: Real Estate Finance and Investment**

Financing of residential, commercial, and industrial real estate and real estate development. Instruments, institutions, and markets; role of government agencies; investment qualities of real estate.

**Credit Hours:** 3

**Prerequisites:** FINANC 4500

---

**FINANC 4530: Real Estate Portfolio Analysis and REITs**

Management of real estate portfolios and analysis of real estate investment trusts including financial statement analysis, cash flows, and valuation techniques.

**Credit Hours:** 3

---

**Prerequisites:** FINANC 3000

---

**FINANC 4620: Investment Strategy of Warren Buffett**

(cross-leveled with FINANC 7620). Survey and application of the investment philosophy and valuation methods of Warren Buffett.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000

**Corequisites:** FINANC 4020

---

**FINANC 4630: Introduction to Risk Management and Insurance**

Basic principles of risk management and insurance focusing on operational risks faced by organizations. Covers terminology, sources, dimensions, characteristics, measurement, and assessment of risk along with design and implementation of techniques to mitigate and control risk.

**Credit Hours:** 3

**Prerequisites or Corequisites:** FINANC 2000 or FINANC 3000

---

**FINANC 4632: Principles of Commercial Property and Liability Insurance**

The objective of this course is to examine the principles and key elements of commercial property and liability insurance. The primary emphasis will be on the property and liability loss exposures faced by organizations and the corresponding types of insurance for covering those loss exposures. This course qualifies students who make a 'B' or better to receive credit for CPCU 552 Commercial Liability Risk Management and Insurance.

**Credit Hours:** 3

**Prerequisites:** FINANC 2000 or FINANC 3000 or FINANC 4630, or permission of the instructor

---

**FINANC 4640: Enterprise Risk Management**

This course addresses the principles, concepts, key elements and applications of Enterprise Risk Management (ERM) to businesses and other organizations. The principal objective of this course is to prepare students to understand the principles of ERM and to be able to integrate sound risk management principles into their work.

**Credit Hours:** 3

**Prerequisites:** FINANC 4630, or permission of instructor

---

**FINANC 4710: Topics in International Finance**

Available during study abroad session. Emphasis is on international corporate governance, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Graded on A-F basis only.

**Credit Hours:** 3

---

**FINANC 4720: International Finance**

Application of domestic corporate finance to the international arena. Emphasis on international capital budgeting, working capital management, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Some sections may be graded on A-F or S/U basis only.

**Credit Hours:** 3

---

**FINANC 4820: Investment Fund Management**

Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated once for credit for a total of six credits.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000, FINANC 4120 or FINANC 4620, instructor's consent required each enrollment

---

**FINANC 4830: Chartered Financial Analyst Exam Review Course**

(cross-leveled with FINANC 7830). A review of the content and format of the chartered financial analyst (CFA) examination. Students need to be registered for the CFA exam to enroll in the class.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**FINANC 4840: Angel Capital Education Program**

(cross-leveled with FINANC 7840). In depth understanding of investing in start up enterprises, including structuring investment deals, doing due diligence, and monitoring of prior investments. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent

---

**FINANC 7010: Financial Management**

(cross-leveled with FINANC 4010). Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000

---

**FINANC 7020: Investments**

(cross-leveled with FINANC 4020). Security valuation and analysis, formulation of personal and professional investment programs.

**Credit Hours:** 3

**Prerequisites:** FINANC 3000

---

**FINANC 7201: Special Topics in Finance**

Selected topics in Finance, insurance, or real estate. Offered on an experimental basis.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**FINANC 7210: Microeconomics for Business**

Examination of how the behavior of consumers and the business decisions of firms affect supply, demand, and the resulting prices of goods and services in the market.

**Credit Hour:** 1-3

---

**FINANC 7220: Economics for Managers**

Applies the concepts and tools of economics to management issues and problems.

**Credit Hour:** 1.5-3

**Prerequisites:** FINANC 7210 or equivalent

---

---

**FINANC 7410: Managerial Finance I**

Introduction to financial management including the time value of money capital budgeting techniques, risk measurement, and the valuation of financial securities.

**Credit Hour:** 1-3

---

**FINANC 7420: Managerial Finance II**

Continuation of the study of financial management with focus on the risk-return tradeoff, capital structure, corporate layout polices, long-term financing, elementary options pricing, and mergers and acquisitions.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7410

---

**FINANC 7440: Managerial Finance**

Analyzes financial information relative to acquisition, management of assets; costs of alternative financial contracts; effect of mix of outstanding securities on entity's cost of capital; interaction between funding/ investment decisions.

**Credit Hours:** 3

**Prerequisites:** ACCTCY 7310 or departmental consent

---

**FINANC 7620: Investment Strategy of Warren Buffett**

(cross-leveled with FINANC 7620). Survey and application of the investment philosophy and valuation methods of Warren Buffett.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 3000 or FINANC 7440

---

**FINANC 7820: Investment Fund Management**

(cross-leveled with FINANC 4820). Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated 1 time for credit.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 3000 or FINANC 7440; instructor's consent

---

**FINANC 7830: Chartered Financial Analyst Exam Review Course**

(cross-leveled with FINANC 4830). A review of the content and format of the chartered financial analyst (CFA) examination. Students need to be registered for the CFA exam to enroll in the class.

**Credit Hour:** 1-3

**Prerequisites:** Instructor's consent

---

**FINANC 7840: Angel Capital Education Program**

(cross-leveled with FINANC 4840). Hands-on experiential investing in start-up enterprises from sourcing, evaluating, and investing to monitoring those investments. Students will learn about angel and venture capital investment strategies, perform pre-screening duties, complete due diligence, structure investment contracts, and monitor portfolio holdings. Graded on A-F basis only. Repeat course is allowed, participating two semesters is preferred. Application to the program is required.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**FINANC 8001: Topics in Finance**

Selected topics in finance, insurance or real estate. Offered on experimental basis.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**FINANC 8010: Multicultural and Global Finance Study Abroad**

International topical issues in finance including cultural difference, corporate governance, differential approaches to regulation across countries, and cross-risk. Includes a study abroad component with on-site visits to businesses and other organizations. May be repeated as venues change.

**Credit Hour:** 1-3

**Prerequisites:** Consent required

---

**FINANC 8012: International Financial Markets**

International capital, foreign exchange, money markets, and financial institutions including exchange rates, instruments and securities, and multinational risk exposure. May include a study-abroad component with on-site visits to businesses and other organizations. May be repeated as venues change. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Consent required

---

**FINANC 8085: Problems in Finance**

For independent investigation and analysis, graduate students select topics suggested by the foregoing undergraduate courses.

**Credit Hour:** 1-3

---

**FINANC 8090: Master's Thesis Research**

Advanced research leading to thesis. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** Consent required

---

**FINANC 8310: Financial Databases and Analysis**

Financial modeling and using online databases to retrieve data, data analysis, spreadsheet design, excel VBA programming, interpreting results. Graded on A-F basis only.

**Credit Hour:** 1-3

---

**FINANC 8312: Financial Modeling**

Financial modeling using Excel spreadsheet design and VBA programming. Includes alternative computational methods, simulation and the use of information retrieved from financial databases. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 8310

---

**FINANC 8320: Financial Markets**

Operation and structure of money markets and capital markets, including markets for stocks, bonds and derivatives securities. Study of the securities that trade in those markets including characteristics, valuation and diversification.

**Credit Hour:** 1-3

---

**FINANC 8330: Investment Policy and Portfolio Management**

Study of investment policies and the effects of risk and diversification on investment management including measurement of risk, identification of investment policy, and construction and maintenance of investment portfolios.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 8320

---

**FINANC 8340: Derivative Financial Securities**

Comprehensive overview of derivative securities including financial futures and options, swaps, and financial engineering. Major topics: institutional aspects of these markets, advanced pricing models, pricing relationships among derivative securities, and risk shifting.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 8070

---

**FINANC 8350: Financial Statement Analysis I**

An introduction to financial statement analysis with emphasis on interpretation and understanding of the balance sheet income statement, and statement of cash flows.

**Credit Hour:** 1-3

**Prerequisites:** ACCTCY 7310

---

**FINANC 8352: Financial Statement Analysis II**

Analysis of company financial statements and related accounting information with emphasis on investors' decisions to invest in the company.

**Credit Hour:** 1.5-3

**Prerequisites:** FINANC 8350

---

**FINANC 8360: Equity Securities Analysis**

Theory and application of models and methods for valuing common stocks.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420 or FINANC 7440

---

**FINANC 8370: Fixed-Income Securities Analysis**

Markets for fixed-income securities and theory and application of models for valuing bonds and other fixed-income securities.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420

---

**FINANC 8380: Investment Banking**

Topics in investment banking including types of offerings and securities, analysis of comparable companies and transactions, valuation methods, and hedge funds and private equity. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420 or equivalent

---

**FINANC 8410: Advanced Financial Management**

Examination of the modern theory of finance. Capital budgeting capital structure, dividend theory and valuation.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7440

---

**FINANC 8430: Capital Budgeting**

An investigation of long-term financial decisions. Topics include capital budgeting, leasing, long-term financing. Extensive use of cases.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7440

---

**FINANC 8440: Financing Multinational Business**

Study of foreign exchange markets, currency derivatives, global capital budgeting, and international financial decision strategy. Some sections of this course may be offered on an A-F or S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420

---

**FINANC 8450: Ethics and Standards of Financial Practice**

Study of financial ethics with particular focus on standards of practice for investment performance standards. Recommended for students planning to take the CFA exam.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420

---

**FINANC 8460: Mergers and Acquisitions**

Analysis of merger and acquisition transactions. Includes methods of financing, valuation and deal structure, hostile takeovers and restructuring.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420 or equivalent

---

**FINANC 8510: Management of Financial Institutions**

Study and analysis of policies, goals, practices and organizational changes in the management of financial institutions and intermediaries.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7440

---

**FINANC 8530: Real Estate Portfolio Analysis**

Portfolio analysis applied to real estate investment including diversification, portfolio theory, and management of real estate portfolios including real estate investment trusts (REITs).

**Credit Hour:** 1.5-3

**Prerequisites:** FINANC 7420

---

**FINANC 8540: Real Estate Finance**

Instruments and methods of financing real estate including fixed and variable rate mortgages, the mortgage loan underwriting process, financing investment property, and alternative financing methods. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420 or equivalent

---

**FINANC 8550: Real Estate Valuation I**

Valuation and appraisal methods for real estate. Includes cost, comparable sales, and income capitalization approaches. Credit may

not be earned for both FINANC 7510 and FINANC 8550. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420 or equivalent

---

**FINANC 8552: Real Estate Valuation II**

A continuation of FINANC 8550. Focus is on advanced methods and the use of case analyses. Credit may not be earned for both FINANC 7510 and FINANC 8552. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 8550

---

**FINANC 8560: Real Estate Securities Analysis**

Analysis of real estate securities including in-depth financial statement analysis and valuation of real estate investment trusts (REITs) and real estate operating companies (REOCs).

**Credit Hour:** 1.5-3

**Prerequisites:** FINANC 8530 or instructor's consent

---

**FINANC 8570: Real Estate Development**

Developing real estate properties. Topics include organizational forms, land development, construction, and environmental issues. Includes issues specific to residential, office, industrial, and retail properties. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420 or equivalent

---

**FINANC 8620: Investment Strategy of Warren Buffett**

This course is designed to familiarize students with the investment philosophy of Warren Buffett. Buffett's criteria for evaluating potential acquisitions and investments will be analyzed in detail.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 7420

---

**FINANC 8630: Corporate Risk Management**

Principles of identifying, analyzing, assessing, and managing operational risks faced by large organizations. Sources, dimensions, and qualities of risk as well as development and implementation of methods to avoid, control, or transfer risk.

**Credit Hour:** 1-3

**Prerequisites or Corequisites:** FINANC 7420

**Recommended:** Undergraduate Business degree with major/emphasis/minor in Finance, Accounting or Economics

---

**FINANC 8632: Corporate Insurance and Alternative Financing Mechanisms**

Basis and techniques for insuring hazard and operational risks encountered by large organizations. Analysis of insurance policies, determination of optimal limits and retentions, and assessment of alternative risk financing methods.

**Credit Hour:** 1-3

**Prerequisites:** FINANC 8630

---

**FINANC 9001: Advanced Topics in Finance**

Selected topics in finance.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**FINANC 9090: Research in Finance**

Thesis research for Ph.D. degree. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**FINANC 9100: Seminar in Corporate Finance**

Advanced theory, investigation of current research in financial management.

**Credit Hours:** 3

---

**FINANC 9101: Topics Seminar in Finance**

Reading and critical evaluation of selected current finance literature and research. Departmental consent. May be repeated. Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** Ph.D. students only

---

**FINANC 9200: Research in Corporate Finance**

Advanced topics in corporate finance.

**Credit Hours:** 3

**Prerequisites:** FINANC 9100

---

**FINANC 9300: Financial Economics**

Utility analysis, efficient frontier mathematics, asset pricing and related topics.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**FINANC 9400: Seminar in Investment Analysis**

Develops integrated theory and analytic techniques for evaluating investment potential of financial instruments. Emphasizes corporate securities. Selected cases and readings.

**Credit Hours:** 3

---

**Fisheries And Wildlife Courses**

**F\_W 1012: Introduction to Captive Wild Animal Management**

(same as AN\_SCI 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

**Credit Hours:** 3

---

**F\_W 1100: Introductory Zoology with Laboratory**

(same as BIO\_SC 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

**Credit Hours:** 5

---

**F\_W 2500: Introduction to Genetics and Evolution for Conservation**

Basic principles and processes of genetics and evolution and their importance for management and conservation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1100, F\_W 1100 or BIO\_SC 1500

**Recommended:** NAT\_R 1070, CHEM 1320

---

**F\_W 2600: Ornithology**

(same as BIO\_SC 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.

**Credit Hours:** 5

**Prerequisites:** F\_W 1100

**Recommended:** 5 hours Biological Sciences

---

**F\_W 2700: Ichthyology**

A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment.

**Credit Hours:** 4

**Prerequisites:** F\_W 1100

**Recommended:** 8 hours Biological Sciences

---

**F\_W 2900: Principles of Wildlife Management**

Expose students to the principles of wildlife management with emphasis on current issues faced by wildlife researchers and managers in the field. Graded on A-F basis only.

**Credit Hours:** 4

**Recommended:** NAT\_R 1070 and one other course in biological or environmental science; sophomore standing or higher

---

**F\_W 3085: Problems in Fisheries and Wildlife**

Individual problems studies to supplement regularly organized undergraduate courses in Fisheries and Wildlife. Proposal for problems study must be arranged by student and supervising faculty member prior to registration.

**Credit Hour:** 1-99

**Prerequisites:** consent of supervising faculty member

---

**F\_W 3600: Introduction to Conservation Biology**

Introduction to principles of conservation biology. Application of ecological concepts and conservation biology principles to management of endangered species, biodiversity and threatened ecosystems.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 or BIO\_SC 3400

---

**F\_W 3660: Mammalogy**

Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States.

**Credit Hours:** 4

**Recommended:** F\_W 1100 and Junior standing

---

**F\_W 3700: Animal Behavior**

Behavior allows animals to react promptly to environmental changes, and is how they interact with others and their surroundings. Because behaving is central to an animal's life, knowing about behavior is fundamental to understanding animal ecology and to conservation efforts. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** F\_W 1100

---

**F\_W 3900: Ecology of Fishes**

This course considers fishes' interactions with their environments in relation to survival, growth and population processes. The course is for mid- to upper-level undergraduates interested in fisheries science, management and fish conservation. May be repeated once for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1500 or F\_W 1100; sophomore standing

**Recommended:** STAT 2500

---

**F\_W 4002: Topics in Fisheries and Wildlife - Biological**

Organized study of selected topics intended primarily for senior-level students in Fisheries and Wildlife Sciences.

**Credit Hour:** 1-99

---

**F\_W 4200: Urban Wildlife Conservation**

(cross-leveled with F\_W 7200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 or FOREST 4320

---

**F\_W 4200W: Urban Wildlife Conservation - Writing Intensive**

(cross-leveled with F\_W 7200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 or FOREST 4320

---

**F\_W 4220: Human Dimensions of Fish and Wildlife Conservation**

Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.

**Credit Hours:** 3

**Recommended:** One 3000-level or above professional Fisheries and Wildlife management or techniques course

---

**F\_W 4300: Fisheries Management**

(cross-leveled with F\_W 7300). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.

**Credit Hours:** 3

**Recommended:** BIO\_SC 3650 and STAT 2500

---

---

**F\_W 4400: Techniques for Fisheries Management and Conservation**

Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Graded on A-F basis only.

**Credit Hours:** 4

**Recommended:** BIO\_SC 3650; STAT 2500 or NAT\_R 3110; F\_W 2700 or F\_W 4300

---

**F\_W 4400W: Techniques for Fisheries Management and Conservation - Writing Intensive**

Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Graded on A-F basis only.

**Credit Hours:** 4

**Recommended:** BIO\_SC 3650; STAT 2500 or NAT\_R 3110; F\_W 2700 or F\_W 4300

---

**F\_W 4500: Animal Population Dynamics and Management**

(cross-leveled with F\_W 7500). Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species.

**Credit Hours:** 3

**Prerequisites:** MATH 1400; STAT 2500 or NAT\_R 3110; BIO\_SC 3650 or FOREST 4320

---

**F\_W 4600: Ecosystem Management**

(cross-leveled with F\_W 7600). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 3650 or FOREST 4320

---

**F\_W 4600W: Ecosystem Management - Writing Intensive**

Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 3650

---

**F\_W 4650: Natural Resource Planning and Management**

Students will be exposed to various natural resource planning tools. Student teams will develop natural resource management plans with strategic and operational components for current conservation issues in Missouri. Plans will be critiqued by peers and outside professionals. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** FOREST 4320 or BIO\_SC 3650 and senior standing

---

---

**F\_W 4700: Wildlife Ecology Methods**

(cross-leveled with F\_W 7700). Techniques for conducting wildlife research. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 3650 and STAT 2500

**Recommended:** F\_W 2900, NATR 3110

---

**F\_W 4700W: WILDLIFE METHODS - Writing Intensive**

(cross-leveled with F\_W 7700). Techniques for conducting wildlife research. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 3650 and STAT 2500

**Recommended:** F\_W 2900, NATR 3110

---

**F\_W 4800: Environmental Toxicology**

(cross-leveled with F\_W 7800). Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment.

**Credit Hours:** 3

**Prerequisites:** CHEM 1320

**Recommended:** Junior standing

---

**F\_W 4810: Wildlife Disease Ecology**

An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650

---

**F\_W 4880: Waterfowl Ecology and Management**

Ecology and management of North American waterfowl and their habitats. Laboratory exercises focus on identification, life histories, sex and age determination, and survey methods. Lectures cover taxonomy, ecology, behavior, population dynamics, harvest management, and habitat management and conservation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** F\_W 2600; BIO\_SC 3650; instructor's consent

---

**F\_W 4910: Senior Seminar in Captive Wild Animal Management**

(same as AN\_SCI 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** AN\_SCI 1012 or F\_W 1012; junior or senior standing

---

**F\_W 4940: Fisheries and Wildlife Internship**

Supervised professional experience with an approval public or private organization. May be repeated for credit. Graded on S/U basis only.

---

**Credit Hour:** 1-12

**Prerequisites:** Fisheries and Wildlife majors only

---

**F\_W 4950: Undergraduate Research in Fisheries and Wildlife**

Individually directed field or laboratory research for students under faculty supervision. Project must be arranged by student and faculty member prior to registration.

**Credit Hour:** 1-99

**Prerequisites:** consent of supervising faculty member

---

**F\_W 7002: Graduate Topics in Fisheries and Wildlife**

Organized study of selected topics intended primarily for graduate students in Fisheries and Wildlife Sciences. Graded on A-F basis only.

**Credit Hour:** 1-99

---

**F\_W 7200: Urban Wildlife Conservation**

(cross-leveled with F\_W 4200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 or FOREST 4320

---

**F\_W 7220: Human Dimensions of Fish and Wildlife Conservation**

Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.

**Credit Hours:** 3

**Prerequisites:** One 3000-level or above professional management or techniques course or instructor consent

---

**F\_W 7300: Fisheries Management**

(cross-leveled with F\_W 4300). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 3650 and STAT 2500

---

**F\_W 7500: Animal Population Dynamics and Management**

(cross-leveled with F\_W 7500). Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** MATH 1400; STAT 2500 or NAT\_R 3110; BIO\_SC 3650 or FOREST 4320

---

**F\_W 7600: Ecosystem Management**

(cross-leveled with F\_W 4600). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, social-economic, and institutional factors that influence natural resource management agencies. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 3650 or FOREST 4320

---

**F\_W 7700: Wildlife Ecology Methods**

(cross-leveled with F\_W 4700). Techniques for conducting wildlife research. Graded on an A-F basis only.

**Credit Hours:** 4

**Recommended:** Ecology and basic statistics course

---

**F\_W 7800: Environmental Toxicology**

(cross-leveled with F\_W 4800). Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment.

**Credit Hours:** 3

**Prerequisites:** CHEM 1320

---

**F\_W 7810: Wildlife Disease Ecology**

(cross-leveled with F\_W 7810). An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_W 7880: Waterfowl Ecology and Management**

(cross-leveled with F\_W 4880). Ecology and Management of North American waterfowl and their habitats. Laboratory exercises focuses on identification, life histories, sex and age determination, and survey methods. Lectures cover taxonomy, ecology, behavior, population dynamics, harvest management, and habitat management and conservation. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** F\_W 2600; BIO\_SC 3650; instructor's consent

---

**F\_W 8001: Topics in Fisheries and Wildlife**

Organized study of selected topics. Subjects and credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**F\_W 8050: Non-Thesis Research in Fisheries and Wildlife**

Independent research not leading to a thesis.

**Credit Hour:** 1-99

---

**F\_W 8085: Graduate Problems in Fisheries and Wildlife**

Individualized problems studies to supplement regularly organized graduate courses in Fisheries and Wildlife.

**Credit Hour:** 1-5

**Prerequisites:** consent of supervising faculty member

---

**F\_W 8087: Masters Seminar in Fisheries and Wildlife**

Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.

**Credit Hour:** 1

---

---

**F\_W 8090: Masters Thesis Research in Fisheries and Wildlife**

Research leading to a thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**F\_W 8300: Professional Development and Communications**

Intended to foster professional growth and development of graduate students. The course will present a rigorous introduction to professionalism, ethics, career development, and professional communications skills and techniques. Graded on A-F basis only.

**Credit Hour:** 1-3

---

**F\_W 8460: Wetland Ecology**

A survey of the wetlands of North America; emphasis on nutrient dynamics, habitat structure, management, legislation and regulations, and man's impacts.

**Credit Hours:** 3

**Prerequisites:** NAT\_R 4100, BIO\_SC 3650 and instructor's consent

---

**F\_W 8510: Ecology, Conservation, and Environmental Justice**

The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Graded on A-F basis only. Prerequisites: one undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent.

**Credit Hours:** 2

---

**F\_W 8520: Stream Ecology**

Ecological principles applied to flowing waters. Emphasis on ecological processes within algal, invertebrate and fish communities. The influence of geomorphic processes, hydrologic principles and physical-chemical factors on the biota.

**Credit Hours:** 3

---

**F\_W 8530: Quantitative Ecology**

Methods to assess space use patterns, animal abundance and population status are drawn into quantitative framework for making ecological inferences. Practical application and limitations of techniques are emphasized through analysis and interpretation of field and simulated data.

**Credit Hours:** 4

**Recommended:** F\_W 4500 or equivalent

---

**F\_W 9001: Selected Topics in Fisheries and Wildlife Sciences for Doctoral Students**

Organized study of selected topics for PhD students in Fisheries and Wildlife Sciences. Subjects and credits may vary from semester to semester. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** PhD standing and instructor consent

---

**F\_W 9087: PhD Seminar in Fisheries and Wildlife**

Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.

**Credit Hour:** 1

---

**F\_W 9090: Ph. D. Dissertation Research in Fisheries and Wildlife**

Research leading to a thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

## Food Science Courses

**F\_S 1010: Introduction to Viticulture and Enology**

This course will give a general overview of growing grapes (viticulture) and winemaking (enology) with an emphasis on Missouri wines and wineries. This course is the first course in a sequence of courses in the viticulture and enology track of the food science degree program.

**Credit Hour:** 1

---

**F\_S 1020: World Food and You**

(same as PLNT\_S 1020). Basic scientific principles involved in production agriculture, food processing, marketing and consumption. Evaluation and understanding of current agriculture issues that affect human foods and required nutrients.

**Credit Hours:** 3

---

**F\_S 1030: Food Science and Nutrition**

Basic principles of science and technology as applied to the problem of providing safe, nutritious, and desirable food for man.

**Credit Hours:** 3

---

**F\_S 2131: Dairy Products Evaluation**

(same as AN\_SCI 2131). Sensory Evaluation and judging of dairy products.

**Credit Hours:** 2

---

**F\_S 2172: Elements of Food Microbiology**

Introductory microbiology course stressing basic principles as related to foods.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing. Restricted to Food Science Students during Early Registration

---

**F\_S 2195: Grapes and Wines of the World**

(same as PLNT\_S 2195). Explores the world of wine through study of viticultural principles and practices, wine styles, classifying wine, the winemaking process and New World and Old World wine regions. Learn wine tasting skills and experience wines from around the world. World wine consumption, social and physical health benefits of moderate wine consumption.

**Credit Hours:** 3

---

**F\_S 2199: Seminar in Professional Development**

Readings and discussion related to professional development for the industry.

**Credit Hour:** 1

---

**F\_S 3190: Study Abroad: International Meat, Dairy and Enology**  
(same as AN\_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit. Prerequisites: instructor's consent

**Credit Hours:** 3

---

**F\_S 3190H: Study Abroad: International Meat, Dairy and Enology - Honors**  
(same as AN\_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit. Enrollment is limited to Honors eligible students.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**F\_S 3210: Kitchen Chemistry**

This course is targeted at current Food Science, Hospitality Management, Nutrition or Biochemistry students who wish to study the application of scientific principles to the practice of cooking. This on-line summer class assumes students have access to a working kitchen. Video cooking projects are submitted weekly. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** CHEM 1100 or higher

---

**F\_S 3214: Principles of Meat Science**

(same as AN\_SCI 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

**Credit Hours:** 3

**Recommended:** one course in Biological Sciences

---

**F\_S 3231: Principles of Dairy Foods Science**

(same as AN\_SCI 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

**Credit Hours:** 3

**Recommended:** One course in Chemistry or Biological Sciences

---

**F\_S 3240: Principles of Viticulture I**

(same as PLNT\_S 3240). Grapevine growth, development, selection, propagation, training systems, pruning, and harvesting; vineyard site selection, design, and development. Graded on A-F basis only. Prerequisites: F\_S 1010 and one of the following: F\_S 2195 or PLNT\_S 2195 or PLNT\_S 2100 or SOIL 2100 or PLNT\_S 2110 or PLNT\_S 2125.

**Credit Hours:** 4

---

**F\_S 3385: Problems in Food Science**

Supervised study in a specialized phase of food science and nutrition.

**Credit Hour:** 1-99

---

**F\_S 4160: Food Process Engineering**

(same as BIOL\_EN 4160; cross-leveled with BIOL\_EN 7160). This course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, emerging technologies, food packaging, and sustainability. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 1210, AG\_S\_M 1040 or Consent of Instructor

---

**F\_S 4199: Food Industry Senior Seminar**

The course explores the structure and the various branches of the food industry. Emphasis is placed on industry trends and the manufacture of specific selected food products and their ingredients. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** F\_S 1030 or equivalent, F\_S 2199 or equivalent; junior or senior standing

---

**F\_S 4301: Topics in Food Science**

Instruction in specific subject matter areas in the field of food science and nutrition.

**Credit Hour:** 1-99

---

**F\_S 4310: Food Chemistry and Analysis**

(cross-leveled with F\_S 7310). Structure, composition and chemical properties of food.

**Credit Hours:** 4

**Recommended:** 5 hours Chemistry or Biochemistry

---

**F\_S 4311: Investigation of Food Properties**

(cross-leveled with F\_S 7311). Study of the chemical and physical properties of foods and the interaction of food components.

**Credit Hours:** 3

**Recommended:** F\_S 4310 or equivalent, or instructor's consent

---

**F\_S 4315: Food Chemistry and Analysis Laboratory**

(cross-leveled with F\_S 7315). The quantitative determination of the constituents of food.

**Credit Hours:** 3

---

**F\_S 4315W: Food Chemistry and Analysis Laboratory - Writing Intensive**

(cross-leveled with F\_S 7315). The quantitative determination of the constituents of food.

**Credit Hours:** 3

---

**F\_S 4330: Principles of Food Processing**

(same as AG\_S\_M 4330; cross-leveled with F\_S 7330, AG\_S\_M 7330). Introduction to basic engineering concepts used to process raw materials.

Principle topics include energy, material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 and AG\_S\_M 1040 or PHYSICS 1210

---

**F\_S 4331: Technology of Dairy Products and Ingredients**

(cross-leveled with F\_S 7331). Technology, chemistry, and nutrition of dairy foods as well as functional properties of dairy ingredients.

**Credit Hours:** 3

**Prerequisites:** F\_S 3231 or equivalent

**Recommended:** one Chemistry course

---

**F\_S 4340: Principles of Viticulture II**

(same as PLNT\_S 4340). Environmental and biological factors influencing vine physiology and winegrape quality. Irrigation, canopy management, pest and disease control, budgets and current trends in viticulture. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** F\_S 3240 or PLNT\_S 3240

---

**F\_S 4344: Processing Muscle Foods**

(same as AN\_SCI 4344; cross-leveled with F\_S 7344, AN\_SCI 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

**Credit Hours:** 3

**Recommended:** One Chemistry course

---

**F\_S 4345: Principles of Viticulture and Winemaking**

(same as PLNT\_S 4345; cross-leveled with PLNT\_S 7345, F\_S 7345). This course will cover the basics needed by viticulturists and winemakers to understand grape vine growth and vineyard considerations along with winemaking principles. Viticultural topics will include grapevine growth and development, vineyard design and development, cultivar selection, grapevine propagation, training systems, and harvest and pruning. Winemaking topics will include sensory analysis of grapes, chemical, microbiological and technological aspects of winemaking, and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIO\_SC 1010 and BIO\_SC 1020 or BIO\_SC 1030 or BIO\_SC 1200 or BIO\_SC 1500

---

**F\_S 4354: Physiology and Biochemistry of Muscle as Food**

(same as AN\_SCI 4354; F\_S 7354, AN\_SCI 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 2001 or AN\_SCI 2214 or AN\_SCI 2114 or AN\_SCI 3214 or F\_S 3214 or AN\_SCI 3231 or F\_S 3231

**Recommended:** Any Biochemistry or Organic Chemistry course

---

**F\_S 4370: Food Microbiology**

(cross-leveled with F\_S 7370). Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups.

**Credit Hours:** 3

**Prerequisites:** F\_S 2172

**Recommended:** one Biochemistry course

---

**F\_S 4375: Food Microbiology Laboratory**

(cross-leveled with F\_S 7375). Examination of foods for microorganisms and characterization of major species.

**Credit Hours:** 2

**Prerequisites or Corequisites:** F\_S 4370

---

**F\_S 4380: Sensory Analysis of Food and Beverages**

(cross-leveled with F\_S 7380). Methodological principles of the sensory analysis of food and beverages.

**Credit Hours:** 3

**Prerequisites:** F\_S 1030; junior or senior standing

**Recommended:** one statistics course

---

**F\_S 4385: Problems in Food Science**

Advanced problems in a selected field of food science and nutrition.

**Credit Hour:** 1-99

---

**F\_S 4390: Optimization and Management of Food and Agricultural Systems**

(same as AG\_S\_M 4390; cross-leveled with F\_S 7390; AG\_S\_M 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**F\_S 4440: Principles of Winemaking and Wine Chemical Analysis**

(cross-leveled with F\_S 7440). The theoretical and practical basics needed by enologists/winemakers including sensory analysis of grapes; chemical, microbiological and technological aspects of winemaking; and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

**Credit Hours:** 4

**Recommended:** 5 credit hours inorganic chemistry and organic chemistry or concurrent, or instructors consent

---

**F\_S 4441: Cellar Operations and Special Vinifications**

(cross-leveled with F\_S 7441). The theoretical and practical basics needed by winemakers to supervise the operations of the winemaking, wine stabilization and packaging equipment. The theoretical and practical basics needed by winemakers to make special wines including rose, dessert, carbonic maceration, and sparkling wines. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** F\_S 4440

**Recommended:** 5 credit hours inorganic chemistry and organic chemistry or instructor's consent

---

**F\_S 4941: Internship in Food Science**

Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

**Recommended:** one Food Science course

---

**F\_S 4970: Food Product Development**

(cross-leveled with F\_S 7970). Capstone course integrating the various disciplines of food science to create new food products.

**Credit Hours:** 3

**Prerequisites:** Junior or Senior standing, or instructor's consent.

ENGLSH 1000 required if course is taught Writing Intensive

**Recommended:** 9 credit hours of Food Science

---

**F\_S 4970W: Food Product Development - Writing Intensive**

Capstone course integrating the various disciplines of food science to create new food products.

**Credit Hours:** 3

**Prerequisites:** Junior or Senior standing, or instructor's consent.

ENGLSH 1000 required if course is taught Writing Intensive

**Recommended:** 9 credit hours of Food Science

---

**F\_S 4980: Food Quality Assurance**

(cross-leveled with F\_S 7360). Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation's food supply. Applies practices to insure consumers of healthful foods.

**Credit Hours:** 3

**Prerequisites:** Junior or Senior standing or instructor's consent

**Recommended:** 9 credit hours of food science

---

**F\_S 7160: Food Process Engineering**

(same as with BIOL\_EN 7160; cross-leveled with F\_S 4160, BIOL\_EN 4160). This course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, emerging technologies, food packaging, and sustainability. Graded on A-F basis only.

**Credit Hours:** 3

---

**F\_S 7310: Food Chemistry and Analysis**

(cross-leveled with F\_S 4310). Structure, composition and chemical properties of food.

**Credit Hours:** 4

**Prerequisites:** 5 hours Chemistry or Biochemistry

---

**F\_S 7311: Investigation of Food Properties**

(cross-leveled with F\_S 4311). Study of the chemical and physical properties of foods and the interaction of food components. Lecture.

**Credit Hours:** 3

**Prerequisites:** F\_S 4310 or F\_S 7310 or equivalent, or instructor's consent

---

**F\_S 7315: Food Chemistry and Analysis Laboratory**

(cross-leveled with F\_S 4315). The quantitative determination of the constituents of food.

**Credit Hours:** 3

**Prerequisites:** F\_S 4310 or concurrent enrollment

---

**F\_S 7330: Principles of Food Processing**

(same as AG\_S\_M 7330; cross-leveled with F\_S 4330, AG\_S\_M 4330). Basic principles of food processing, with emphasis on blanching, pasteurization, commercial sterilization, refrigeration, freezing, concentration, dehydration and packing. Impacts of processing on product quality are evaluated.

**Credit Hours:** 3

---

**F\_S 7331: Technology of Dairy Products and Ingredients**

(cross-leveled with F\_S 4331). Technology, chemistry, and nutrition of dairy foods as well as functional properties of dairy ingredients.

**Credit Hours:** 3

**Prerequisites:** one Chemistry course and F\_S 3231 or equivalent

---

**F\_S 7344: Processing Muscle Foods**

(same as AN\_SCI 7344; cross-leveled with F\_S 4344, AN\_SCI 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.

**Credit Hours:** 3

**Prerequisites:** one Chemistry course

---

**F\_S 7345: Principles of Viticulture and Winemaking**

(same as PLNT\_S 7345; cross-leveled with PLNT\_S 4345, F\_S 4345). This course will cover the basics needed by viticulturists and winemakers to understand grape vine growth and vineyard considerations along with winemaking principles. Viticultural topics will include grapevine growth and development, vineyard design and development, cultivar selection, grapevine propagation, training systems, and harvest and pruning. Winemaking topics will include sensory analysis of grapes, chemical, microbiological and technological aspects of winemaking, and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

**Credit Hours:** 3

---

**F\_S 7350: Microbiology of Fermented Foods**

Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages. Graded on A-F basis only.

**Credit Hours:** 2

---

---

**F\_S 7351: Food Laws and Regulations**

Policy, law and regulation development related to food. Introduction to major US regulatory agencies impacting food law and discussion on major food safety and food labeling laws and regulations. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 7354: Physiology and Biochemistry of Muscle as Food**

(same as AN\_SCI 7354; cross-leveled with F\_S 4354, AN\_SCI 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

**Credit Hours:** 3

**Prerequisites:** AN\_SCI 3254 or MPP 3202 or BIO\_SC 3700; AN\_SCI 2001 or AN\_SCI 2214 or AN\_SCI 2114 or AN\_SCI 3214 or F\_S 3214 or AN\_SCI 3231 or F\_S 3231

**Recommended:** Any Biochemistry or Organic Chemistry course

---

**F\_S 7360: Food Quality Assurance**

(cross-leveled with F\_S 4980). Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation's food supply. Applies practices to insure consumers of healthful foods.

**Credit Hours:** 3

---

**F\_S 7370: Food Microbiology**

(cross-leveled with F\_S 4370). Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups.

**Credit Hours:** 3

**Prerequisites:** F\_S 2172 and one Biochemistry course or concurrent enrollment

---

**F\_S 7375: Food Microbiology Laboratory**

(cross-leveled with F\_S 4375). Examination of foods for microorganisms and characterization of major species.

**Credit Hours:** 2

**Prerequisites:** F\_S 4370 or concurrent enrollment

---

**F\_S 7380: Sensory Analysis of Food and Beverages**

(cross-leveled with F\_S 4380). Methodological principles of the sensory analysis of food and beverages.

**Credit Hours:** 3

**Prerequisites:** F\_S 1030; junior or senior standing

**Recommended:** one statistics course

---

**F\_S 7390: Optimization and Management of Food and Agriculture Systems**

(same as AG\_S\_M 7390; cross-leveled with F\_S 4390, AG\_S\_M 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or higher

**Recommended:** AG\_S\_M 1040

---

**F\_S 7440: Principles of Winemaking and Wine Chemical Analysis**

(cross-leveled with F\_S 4440). The theoretical and practical basics needed by enologist/winemakers including sensory analysis of grapes; chemical, microbiological and technological aspects of winemaking; and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** 5 hours inorganic chemistry and organic chemistry or concurrent, or instructor's consent

---

**F\_S 7441: Cellar Operations and Special Vinifications**

(cross-leveled with F\_S 4441). The theoretical and practical basics needed by winemakers to supervise the operations of the winemaking, wine stabilization and packaging equipment. The theoretical and practical basics needed by winemakers to make special wines including rose, dessert, carbonic maceration, and sparkling wines. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** 5 credit hours inorganic chemistry and organic chemistry and F\_S 4440 or instructor's consent

---

**F\_S 7941: Internship in Food Science**

Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation.

**Credit Hour:** 1-6

**Prerequisites:** One Food Science course and instructor's consent

---

**F\_S 7970: Food Product Development**

Capstone course integrating the various disciplines of food science to create new food products.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000, and instructor's consent

---

**F\_S 8085: Problems in Food Science**

Individual studies include a minor research problems.

**Credit Hour:** 1-99

**Prerequisites:** Restricted to Food Science MS Students only

---

**F\_S 8087: Seminar in Food Science**

Provides students with opportunities for development in depth of advanced aspects of food science through reviews of research in progress and of current scientific publications.

**Credit Hour:** 1

**Prerequisites:** Masters standing

---

**F\_S 8090: Research in Food Science**

Original investigations, usually in connection with one of the research projects of Agricultural Experiment Station. Written report required. Graded on S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Restricted to Food Science MS Students Only

---

**F\_S 8100: Strategic Human Resource Management in Hospitality**

This course is designed to familiarize students with a wide range of theories, concepts, business practices and applications associated with managing human resources in business. Topics include micro-human resource issues such as recruitment, hiring, performance measurements, employee relations, and retention, macro human resource topics such as organizational performance measurement, and interrelationship between micro and macro human resources such as individual differences and job performance and organizational performance. Students will learn the key theories and applications through reading, discussion, research, and writings. Graded on A-F only.

**Credit Hours:** 3

**Prerequisites:** HSP\_MGMT 7100

---

**F\_S 8110: Advanced Hospitality Marketing**

This course provides students with an advanced-level view of marketing strategies with the focus in hospitality and tourism. Students will be exposed to a general overview of theoretical frameworks and seminal work in this field. They will gain appreciation of the contemporary social-scientific research on marketing and persuasion. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** HSP\_MGMT 7110 or instructor's consent

---

**F\_S 8180: Strategic Management and Competitive Strategy in the Hospitality Industries**

This course introduces to students and enables them to develop a comprehensive understanding of the concepts and principles of strategic management and competitive strategy as applied to the hospitality industries. Students will be acquainted with the key concepts of strategic management through discussions, research, critiquing and writings. This course will cover a wide variety of topics related to environmental scanning, strategic direction, organizational structure and culture, administration and evaluation of existing and challenging business practices, concepts and theories in the management distinctive to that of hospitality, tourism and service. Emphasis will place on the identification of relevant interdisciplinary paradigms and theory and research techniques for analysis, using advanced concepts and quantitative methods in the scientific investigation problems related to hospitality. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** HSP\_MGMT 7180 or instructor's consent

---

**F\_S 8263: Service Operations Management: Revenue Management**

This course offers an opportunity for students to learn the theory, concepts, and knowledge applied in service operations management. Students will find them useful in trying to cope with the dilemmas faced by operating managers in the hospitality industry. Especially, the course focuses on revenue management.

**Credit Hours:** 3

**Prerequisites:** HSP\_MGMT 3310 or instructor's consent

---

**F\_S 8301: Ethnic Foods: Food Safety, Food Protection and Defense Challenges**

An overview of the safety concerns and risks associated with ethnic and imported ethnic foods. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8302: Food Protection and Defense-Essential Concepts**

This course presents foundational concepts relevant to protecting the food supply from intentional contamination. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8303: A Multidisciplinary Overview of Food Safety and Security**

This course provides students with an understanding of a host of multidisciplinary aspects of food safety, particularly in the context of public health. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8304: HACCP**

This course focuses on procedures and processes which can affect the overall microbiological safety of food and the Hazard Analysis Critical Control Point (HACCP) system. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8401: Topics in Food Science**

Specialized topics in the area of food science and nutrition.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**F\_S 8402: Research Methods in Food Science**

(same as BIOL\_EN 8402). Introduction to research. Defining research problems, developing hypotheses, searching scientific literature, designing experiments, presenting data, writing scientific papers and theses, making oral presentations.

**Credit Hours:** 2

---

**F\_S 8404: Advanced Food Microbiology and Biotechnology**

Covers basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8405: Advanced Microbiology of Foods**

Principles of microbial physiology, taxonomy, analytical methods applied to study of microorganisms added to foods and those causing food spoilage or food-borne illness. Roles of microorganisms in manufacture/distribution of foods.

**Credit Hours:** 3

**Prerequisites:** F\_S 4370 or equivalent

---

**F\_S 8406: Foodborne Toxicants**

This course covers human risks from foodborne toxicants, remediation and detoxification strategies for key foodborne toxicants and major modes of toxicity of key foodborne toxicants. Principles of food toxicology

will be applied to optimize hazard analysis within HACCP for the prevention of foodborne toxicities. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8408: Risk Assessment for Food, Agriculture and Veterinary Medicine**

Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis. Graded on A-F basis only.

**Credit Hours:** 2

---

**F\_S 8410: Food Chemistry II**

Study of chemical content of food, emphasizing aspects that exist uniquely in food.

**Credit Hours:** 4

**Prerequisites:** F\_S 4310 or equivalent

---

**F\_S 8414: Meat Quality**

(same as AN\_SCI 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** F\_S 3214 or equivalent

---

**F\_S 8424: Meat Investigations**

(same as AN\_SCI 8424). Discussion of literature, special reports, assigned readings, techniques, interpretation of results.

**Credit Hours:** 3

**Prerequisites:** F\_S 4344 and F\_S 4310 or equivalent

---

**F\_S 8440: Functional Foods and Nutraceuticals**

Principles and challenges involved in developing foods with health benefits beyond basic nutrition; efficacy, safety, regulatory and marketing aspects of functional foods and nutraceutical; current controversies and evidence of therapeutic properties of functional foods and Dietary supplements. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 3630 or equivalent and F\_S 4310 or equivalent, or instructor's consent

---

**F\_S 8460: Food Biopolymers**

Study of physical, chemical, and functional properties of food biopolymers and their applications in food and other industries. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** Organic chemistry and food chemistry

---

**F\_S 8470: Advanced Food Technology**

To understand the physical and chemical changes that occur during the processing and storage of food; study the quality and safety issues of foods and learn traditional and recent advances in food science and technology.

**Credit Hours:** 3

**Prerequisites:** F\_S 4310, or equivalent or instructor's consent

---

**F\_S 9085: Problems in Food Science**

Individual studies includes minor research problems.

**Credit Hour:** 1-99

**Prerequisites:** Food Science PhD students

---

**F\_S 9087: Seminar in Food Science**

Provides students with opportunities for development in depth of advanced aspects of food science through reviews of research in progress and of current scientific publications. Prerequisites: PhD standing

**Credit Hour:** 1

---

**F\_S 9090: Research in Foods Science**

Original investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** Food Science PhD students

---

**F\_S 9402: Advanced Research Methods in Food and Hospitality Systems**

This course provides doctoral students with introduction and review of research methods available for use in the study of food science, hospitality management and agricultural system management. Hence, the emphasis of this course is on empirical studies in the field, and will examine research conducted by scholars in the academic area. This course assists as baseline preparation for graduate students' continuing work in the graduate program. Specifically, the course provides students with knowledge and research experience in regard to 1) research fundamentals and backgrounds, 2) types of research, and 3) data analysis.

**Credit Hours:** 3

**Prerequisites:** Introductory research method course or statistics course; instructor's consent required

---

## Forestry Courses

**FOREST 2151: Dendrology**

An introduction to the biology of trees, emphasizing identification in the field, taxonomy, ecology, geographic distribution and economic significance of forest species.

**Credit Hours:** 4

**Prerequisites:** BIO\_SC 1200 or PLNT\_S 2120

---

**FOREST 2541: Forest Utilization**

Field studies of logging and milling of timber.

**Credit Hour:** 1

**Prerequisites:** SOIL 2100, FOREST 2151

**Corequisites:** FOREST 2540, FOREST 2542, FOREST 2543, FOREST 2544 and FOREST 2545

---

---

**FOREST 2542: Forest Measurement and Inventory**

Field measurement of standing trees including diameter, height and age. Estimation of forest timber resources using a variety of sampling schemes and techniques. Introduction to Arcview and growth models.

**Credit Hour:** 1

**Prerequisites:** SOIL 2100, FOREST 2151

**Corequisites:** FOREST 2543 and FOREST 2544

---

**FOREST 2543: Forest Ecology Field Studies**

Field studies of vegetation, soils, habitats and ecological units. Application of ecological principles of natural resource management and understanding of natural and managed forested communities with an emphasis on southeastern Missouri.

**Credit Hour:** 1

**Prerequisites:** SOIL 2100 and FOREST 2151

**Corequisites:** FOREST 2542 and FOREST 2544

---

**FOREST 2544: Introduction to Silviculture and Management**

Management objectives and stand prescriptions, regeneration and intermediate silvicultural treatments, management on private and federal forest lands, tree evaluation and timber marking.

**Credit Hour:** 1

**Prerequisites:** SOIL 2100 and FOREST 2151

**Corequisites:** FOREST 2542 and FOREST 2543

---

**FOREST 2545: Forest Management Planning**

Preparation and presentation of a written forest management plan using material and data developed in prerequisite courses.

**Credit Hour:** 1

**Prerequisites:** SOIL 2100, FOREST 2151

**Corequisites:** FOREST 2540, FOREST 2541, FOREST 2542, FOREST 2543 and FOREST 2544 concurrently

---

**FOREST 3207: Forest Fire Control and Use**

Fundamentals of all phases of fire protection. Objectives and techniques in use of fire.

**Credit Hours:** 2

---

**FOREST 3212: Forest Health and Protection**

Fundamental concepts of forest pathology and forest entomology including emphasis on ecological principles and management strategies.

**Credit Hours:** 4

**Recommended:** FOREST 2151

---

**FOREST 3212W: Forest Health and Protection - Writing Intensive**

Fundamental concepts of forest pathology and forest entomology including emphasis on ecological principles and management strategies.

**Credit Hours:** 4

**Recommended:** FOREST 2151

---

**FOREST 3290: Urban Forestry**

The culture and management of trees in urban areas, including ownership patterns, species composition, growth environment, amenities provided and evaluation. One-day field trip required.

**Credit Hours:** 2

**Prerequisites:** FOREST 2151 or PLNT\_S 2210

---

**FOREST 3300: Problems in Forestry**

Problems in Forestry

**Credit Hour:** 1-99

---

**FOREST 3350: Special Readings in Forestry**

Critical review of current literature and research in forestry, fisheries and wildlife, and methods of presenting research results.

**Credit Hour:** 1-99

---

**FOREST 4320: Forest Ecology**

Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.

**Credit Hours:** 5

**Prerequisites:** At least Junior standing. Recommended FOREST 2151

---

**FOREST 4320W: Forest Ecology - Writing Intensive**

Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.

**Credit Hours:** 5

**Prerequisites:** At least Junior standing

**Recommended:** FOREST 2151

---

**FOREST 4330: Practice of Silviculture**

(cross-leveled with FOREST 7330). Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services.

**Credit Hours:** 4

**Prerequisites:** FOREST 4320

**Recommended:** FOREST 4375

---

**FOREST 4350: Forest Economics**

Economic principles applied to production/marketing of goods and services from forest land: emphasizes capital and land factors and investment alternatives related to time.

**Credit Hours:** 3

**Prerequisites:** ABM 1042 or ABM 1041 or ABM 2070

---

**FOREST 4360: Photogrammetry, Inventory and Models**

Applied course in the area of aerial photogrammetry, forest inventory, and forest growth models for developing, maintaining, and utilizing these tools in a forest management.

**Credit Hours:** 3

**Recommended:** NAT\_R 3110

---

**FOREST 4375: Forest Stand Dynamics**

Examines the development of forest structure, the role of disturbance on forest change and the use of this knowledge in applying silvicultural systems. Both forest stand dynamics theories, structure diagrams, forest

growth models, and long term data sets are used to understand stand dynamics.

**Credit Hours:** 3

**Recommended:** FOREST 4330

---

**FOREST 4380: Forest Resource Management**

Teaches resource managers how to develop a plan for the management of forest resources using managerial, economic, silvical and wildlife techniques for its enhancement and to meet the landowner's objectives.

**Credit Hours:** 3

**Prerequisites:** FOREST 4330 and FOREST 4350; Senior Standing only

---

**FOREST 4385: Agroforestry I: Theory, Practice and Adoption**

Understand biophysical, ecological, social and economic features of temperate and tropical agroforestry. Covers the basics of design, planning and implementation of agroforestry practices.

**Credit Hours:** 3

**Prerequisites:** Senior standing

---

**FOREST 4390: Watershed Management and Water Quality**

(cross-leveled with FOREST 7390). Hydrologic processes on wildland watersheds. Effects of forest land management on streamflow, erosion and water quality.

**Credit Hours:** 3

**Prerequisites:** MATH 1400; Senior standing only

---

**FOREST 4940: Forestry Internship**

Supervised professional experience with an approved public or private organization. May be repeated for credit. Graded on S/U basis only.

**Credit Hour:** 1-12

**Prerequisites:** Instructor's consent required

---

**FOREST 4950: Forestry Undergraduate Research**

Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance. Graded on A-F basis only.

**Credit Hour:** 1-4

**Prerequisites:** Senior standing, STAT 2530

---

**FOREST 4994: Senior Honors Research in Forestry**

**Credit Hour:** 1-3

**Prerequisites:** Instructor Consent Required

---

**FOREST 4995: Senior Honors Research in Forestry**

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**FOREST 7301: Topics in Forestry**

Organized study of selected topics. Intended for upper-division and graduate students. Subjects and credit may vary from semester to semester.

**Credit Hour:** 1-99

---

**FOREST 7320: Forest Ecology**

(cross-leveled with FOREST 4320). Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.

**Credit Hours:** 5

**Prerequisites:** FOREST 2151 or BIO\_SC 3210 or instructor's consent

---

**FOREST 7330: Practice of Silviculture**

(cross-leveled with FOREST 4330). Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services.

**Credit Hours:** 4

**Prerequisites:** FOREST 4320

---

**FOREST 7350: Forest Economics**

(cross-leveled with FOREST 4350). Economic principles applied to production/marketing of goods and services from forest land: emphasizes capital and land factors and investment alternatives related to time.

**Credit Hours:** 3

**Prerequisites:** Mathematics requirement completed; AG\_EC 1041, or AG\_EC 3080

---

**FOREST 7360: Photogrammetry, Inventory and Models**

(cross-leveled with FOREST 4360). Applied course in the area of aerial photogrammetry, forest inventory, and forest growth models for developing, maintaining, and utilizing these tools in a forest management.

**Credit Hours:** 3

---

**FOREST 7375: Forest Stand Dynamics**

(cross-leveled with FOREST 4375). Examines the development of forest structure, the role of disturbance on forest change and the use of this knowledge in applying silvicultural systems. Both forest stand dynamics theories, structure diagrams, forest growth models, and long term data sets are used to understand stand dynamics.

**Credit Hours:** 3

**Prerequisites:** FOREST 4330 or instructor's consent

---

**FOREST 7380: Forest Resource Management**

(cross-leveled with FOREST 4380). Teaches resource managers how to develop a plan for the management of forest resources using managerial, economic, silvical and wildlife techniques for its enhancement and to meet the landowner's objectives.

**Credit Hours:** 3

**Prerequisites:** FOREST 4330 and FOREST 4350

---

**FOREST 7385: Agroforestry I: Theory, Practice and Adoption**

(cross-leveled with FOREST 4385). Understand biophysical, ecological social and economic features of temperate and tropical agroforestry. Covers the basics of design, planning and implementation of agroforestry practices.

**Credit Hours:** 3

---

---

**FOREST 7390: Watershed Management and Water Quality**

(cross-leveled with FOREST 4390). Hydrologic processes on wildland watersheds. Effects of forest land management on streamflow, erosion and water quality.

**Credit Hours:** 3

**Prerequisites:** MATH 1400 or instructor's consent

---

**FOREST 8050: Research in Forestry**

Original research not leading to preparation of dissertation.

**Credit Hour:** 1-99

---

**FOREST 8090: Masters Thesis Research in Forestry**

Original investigation for presentation in a M.S. thesis. Graded on a S/U basis only.

**Credit Hour:** 1-10

---

**FOREST 8385: Ecological Principles of Agroforestry**

The course prepares students to develop an understanding of the complexity of agroforestry. Students will critically analyze classical and contemporary ecological theories and apply them in designing agroforestry practices to solve complex production and environmental issues. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FOREST 4385 or FOREST 7385 or permission of instructor

---

**FOREST 8390: Physical Hydrology**

Students will obtain an understanding of hydrologic processes in terms of the occurrence, distribution and movement of water spanning the atmosphere and lithosphere. Students will have an opportunity to develop an understanding of physical processes governing mass and energy flux in wildland and anthropogenic systems. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** College Physics and Calculus I

---

**FOREST 8395: Agroforestry Economics and Policy**

This course discusses basic economic and financial principles, and their applications in agroforestry. Specifically, the discussion includes market demand and supply, market failure, non-market valuations, cost and benefit analysis, short term and long term economic analysis, economic valuation of ecosystem services, and the applications in agroforestry. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** FOREST 4385 or FOREST 7385, ABM 1041 or permission of instructor

---

**FOREST 8401: Topics in Forestry**

Organized study of selected topics. Subjects and credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**FOREST 8430: Applied Silviculture**

Ecological and economic factors affecting application of silviculture in each of eighteen forest regions in United States.

**Credit Hours:** 3

**Prerequisites:** FOREST 4330

---

**FOREST 8450: Forest Soils**

Physical, chemical and biological properties of forest soils in relation to tree growth.

**Credit Hours:** 3

**Prerequisites:** FOREST 4330 or instructor's consent

---

**FOREST 8460: Advanced Forest Ecology**

Lecture/discussion based course emphasizing contemporary and classic ecological studies and concepts in the context of current forest ecology issues and research. Prerequisites: undergraduate ecology course

**Credit Hours:** 3

---

**FOREST 8490: Advanced Forest Management**

Modern quantitative methods to facilitate decision-making in harvest scheduling and regulation, land use allocation, and production planning in natural resource management.

**Credit Hours:** 3

**Prerequisites:** FOREST 4380

---

**FOREST 8515: Advanced Forest Biometrics**

An introduction to the topics and philosophy of ecological modeling. The course will guide students through the process of developing a conceptual model, formalizing the model, formulating, parameterizing, and running the model as well as analyzing the results.

**Credit Hours:** 3

**Prerequisites:** STAT 7070 or instructor's consent

---

**FOREST 8530: Ecosystem Management: The Human Dimension**

Overview of cultural, social, political and economic dimensions of natural resource problems and issues from an ecologically grounded management perspective.

**Credit Hours:** 3

**Prerequisites:** NAT\_R 4353 or equivalent

---

**FOREST 8620: Plant-Water Relations**

Absorption, translocation, utilization and loss of water by plants. Biophysics of water movement in the soil-plant-atmosphere continuum. Effects of water deficits on physiological processes.

**Credit Hours:** 3

---

**FOREST 9087: Seminar in Forestry**

Discussions of current developments in Forestry, and critical study of research programs. Graded on S/U basis only.

**Credit Hour:** 1

---

**FOREST 9090: Dissertation Research in Forestry**

Original investigation for presentation in a doctoral dissertation. Graded on a S/U basis only.

Credit Hour: 1-10

---

## French Courses

### **FRENCH 1100: Elementary French I**

French 1100 is a beginning French course, but many students will have had 1 or 2 years of high school French. Students will learn using all four skills--listening, speaking, reading, and writing with an emphasis on communication. The class meets four days a week and will be taught in French. The pace of the course is much faster than a high school class and should be accompanied by 2 hours of study for each hour spent in class. Class time is used to integrate new structures and vocabulary.

**Credit Hours:** 4

---

### **FRENCH 1100H: Elementary French I - Honors**

French 1100 Honors is an introductory course that emphasizes correct pronunciation, speaking and class interaction. French is the language of instruction and students are expected to quickly grasp concepts taught in French. The class meets four days a week. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Honors eligibility required

---

### **FRENCH 1200: Elementary French II**

The second course of the beginning language sequence is the continuation of FRENCH 1100. It places equal emphasis on the four skills; listening, speaking, reading, and writing. Students who have prior knowledge of French are encouraged to take this course.

**Credit Hours:** 4

**Recommended:** Grade in the C range or better in FRENCH 1100 or equivalent

---

### **FRENCH 1200H: Elementary French II - Honors**

The second course of the beginning language sequence is the continuation of FRENCH 1100. It places equal emphasis on the four skills; listening, speaking, reading, and writing. Students who have prior knowledge of French are encouraged to take this course.

**Credit Hours:** 4

**Prerequisites:** Honors eligibility required

**Recommended:** Grade in the C range or better in FRENCH 1100 or equivalent

---

### **FRENCH 2001: Undergraduate Topics in French-General**

Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with consent of department.

**Credit Hour:** 1-3

**Prerequisites:** FRENCH 1200 with a grade of C or better

---

### **FRENCH 2100: Elementary French III**

A multi-skill course following FRENCH 1200, centering on cultural/literary reading, and including a grammar review, practice of the spoken language, as well as some practice in written expression.

**Credit Hours:** 4

**Recommended:** Grade in the C range or better in FRENCH 1200, or equivalent course

---

### **FRENCH 2100H: Elementary French III - Honors**

A multi-skill course following FRENCH 1200, centering on cultural/literary reading, and including a grammar review, practice of the spoken language, as well as some practice in written expression.

**Credit Hours:** 4

**Prerequisites:** grade in the C range or better in FRENCH 1200, or equivalent course. Honors eligibility required

---

### **FRENCH 2160: Intermediate French Composition and Conversation**

A course designed to develop the ability to speak, read, and write in French via the reading of French short stories and/or a short novel. Grammar review.

**Credit Hours:** 3

**Prerequisites:** FRENCH 2100

---

### **FRENCH 2310: French Civilization**

Open to any student interested. No knowledge of French required. May not be included in area of concentration in French.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

### **FRENCH 2310W: French Civilization - Writing Intensive**

Open to any student interested. No knowledge of French required. May not be included in area of concentration in French.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

### **FRENCH 2320: French Literature and Thought in English Translation I**

This course examines how the masterworks of French literature, from the Middle Ages to the eighteenth century, have influenced Western literary, cultural and philosophical traditions.

**Credit Hours:** 3

**Prerequisites:** sophomore standing or instructor's consent

---

### **FRENCH 2330: French Literature in Translation II**

This course examines how the masterworks of French literature of the nineteenth and twentieth centuries have influenced Western literary, cultural and philosophical traditions.

**Credit Hours:** 3

**Prerequisites:** sophomore standing or instructor's consent

---

### **FRENCH 2350: New World Francophone Literature in Translation**

A survey of literature written by Caribbean writers of French expression. Writers include M. Conde, P. Chamoiseau, A. Césaire, E. Glissant, S. Bart-Schwartz, R. Depestre and G. Etienne.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

---

### **FRENCH 3001: Topics in French-General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing, departmental consent for repetition

---

**FRENCH 3004: Topics in French-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing, departmental consent for repetition

---

**FRENCH 3005: Topics in French-Humanities/Fine Arts**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition. Prerequisites: sophomore standing

**Credit Hour:** 1-3

---

**FRENCH 3160: Advanced French Composition and Conversation I**

Development of more sophisticated skills of written and oral expression.

**Credit Hours:** 3

**Prerequisites:** FRENCH 2160 or equivalent

---

**FRENCH 3180: Les Fondations de la Civilisation Francaise**

Overview of French civilization from its origins to French Revolution. Studies will examine key cultural objects from art, literature, and popular culture as well as political and historical movements that have shaped development of French civilization. Ideal for students interested in engaging with issues, debates, and problems that helped to define the nascent French state.

**Credit Hours:** 3

**Prerequisites:** FRENCH 2160

---

**FRENCH 3280: Commercial French**

Composition and Conversation course based on materials related to the French business world. Acquisition of business-related vocabulary. Introduction to French business operations and correspondence.

**Credit Hours:** 3

**Prerequisites:** FRENCH 2160 or equivalent

---

**FRENCH 3410: Introduction to Literary Analysis**

Will acquaint students with vocabulary required for analysis of literary texts. Along with the traditional French method of poetry explication, students will learn to analyze the major literary genres (poetry, theatre, prose).

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160

---

**FRENCH 3420: Introduction to French Literature I**

Study of selected masterpieces of French literature from the Middle Ages through the 18th century.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 and FRENCH 3410

---

**FRENCH 3420W: Introduction to French Literature I - Writing Intensive**

Study of selected masterpieces of French literature from the Middle Ages through the 18th century..

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 and FRENCH 3410

---

**FRENCH 3430: French Masterworks: Texts and Contexts**

This course will prepare students to analyze masterworks of French expression and develop an understanding of the historical and literary contexts in which they were written. It will also promote a deeper awareness of the French-speaking world's cultural specificity and diversity. Tracking texts across time periods (medieval to present) and, on occasion, across continents as well (Africa, Canada, the Caribbean), students will focus on how literary expression responds to cultural crises and consider how writers deal with issues of gender, race, ideology, class and/or self-actualization. As they make their way through a select group of works, students will have the opportunity to hone their language skills in all four fundamental areas (speaking, listening, reading comprehension, and writing). Beyond the scope of literary texts, reference to a variety of visual arts will inform and enhance class discussion.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160

**Recommended:** FRENCH 3410

---

**FRENCH 3430W: French Masterworks: Texts and Contexts - Writing Intensive**

This course will prepare students to analyze masterworks of French expression and develop an understanding of the historical and literary contexts in which they were written. It will also promote a deeper awareness of the French-speaking world's cultural specificity and diversity. Tracking texts across time periods (medieval to present) and, on occasion, across continents as well (Africa, Canada, the Caribbean), students will focus on how literary expression responds to cultural crises and consider how writers deal with issues of gender, race, ideology, class and/or self-actualization. As they make their way through a select group of works, students will have the opportunity to hone their language skills in all four fundamental areas (speaking, listening, reading comprehension, and writing). Beyond the scope of literary texts, reference to a variety of visual arts will inform and enhance class discussion.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160

**Recommended:** FRENCH 3410

---

**FRENCH 3440: Francophone Literature of North America**

A survey course of Francophone literature of New France, Louisiana territory and the French West Indies from its beginnings in the seventeenth century to the late twentieth century. Selected novels, poems and plays will be studied in their historical and social context.

**Credit Hours:** 3

**Prerequisites:** FRENCH 2160

---

**FRENCH 3710: Survey of Minority and Creole Languages of the U.S. and the Caribbean**

(same as SPAN 3710 and LINGST 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in the context of ethnic, cultural and national identity (taught in English).

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**FRENCH 4004: Topics in French-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** junior standing, departmental consent for repetition

---

**FRENCH 4070: Intensive Beginning French**

Rapid acquisition of a reading knowledge of French. Cannot be taken to fulfill undergraduate language requirement.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**FRENCH 4120: Foreign Language Teaching Methodology**

(same as SPAN 4120, LATIN 4121; cross-leveled with FRENCH 7120, SPAN 7120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used toward Arts and Science major.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**FRENCH 4130: Stylistics**

(cross-leveled with FRENCH 7130). A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 or FRENCH 3280

**Recommended:** FRENCH 3420, FRENCH 3430 or FRENCH 3410

---

**FRENCH 4130W: Stylistics - Writing Intensive**

A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 or FRENCH 3280

**Recommended:** FRENCH 3420, FRENCH 3430 or FRENCH 3410

---

**FRENCH 4410: French Medieval Literature**

(cross-leveled with FRENCH 7410). Survey of representative works from the principal literary genres of the Middle Ages: epic (La Chanson de Roland), courtly romance (Chretien de Troyes), chantefable (Aucassin et Nicolette), short story (lai, fabliau), theatre, and lyric poetry.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4420: French Renaissance**

(cross-leveled with FRENCH 7420). Survey of prose and poetry of the sixteenth century with significant emphasis on Montaigne, Rabelais, and the poetry of the Pleiade.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4440: Eighteenth-Century French Literature**

(cross-leveled with FRENCH 7440). Through systematic and representative readings, this course familiarizes students with the literary trends and intellectual currents of 18th century France. The course includes works by Montesquieu, Voltaire, Rousseau, Laclos, Diderot, Marivaux, Prevost, and Beaumarchais.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4460: Twentieth-Century French Novel**

(cross-leveled with FRENCH 7460). The course is a historical survey that deals with three topics: the modernist writings of the early twentieth century. (Proust, Gide, and Colette), existentialism of the mid-century (Sartre, Camus), and contemporary forms of writing (Beckett, Robbe-Grillet, Sarraute, among others).

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4470: Introduction to the Contemporary French Theatre**

Survey of twentieth-century French drama. Students read plays by Claudel, Giraudoux, Sartre, Anouilh, Beckett, Ionesco, Genet, and others. Strong emphasis is played on class discussions. Written analyses of two plays are assigned, and there is an hourly exam and a final.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4490: Nineteenth-Century French Novel**

(cross-leveled with FRENCH 7490). Study of the three major currents in prose fiction: romanticism, realism, and naturalism. Representative readings from Chateaubriand, Balzac, Stendhal, Flaubert, and Zola are included.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4710: History of the French Language**

(same as LINGST 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external social, political, and historical factors that have affected the development of French, followed by a diachronic study of the internal structural features of the language.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4720: Structure of Modern French**

(same as LINGST 4720; cross-leveled with FRENCH 7720, LINGST 7720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 or equivalent or instructor's consent

---

**FRENCH 4820: Blogging the World: The Web in Cultural Context**

(same as GERMAN 4820 and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in

journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**FRENCH 4820W: Blogging the World: The Web in Cultural Context - Writing Intensive**

(same as GERMAN 4820 and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**FRENCH 4960: Special Readings in French**

Independent study through readings, conferences, reports.

**Credit Hour:** 1-3

**Prerequisites:** FRENCH 3420 and FRENCH 3430 and departmental consent

---

**FRENCH 4980: Special Themes in French**

Subject varies according to instructor. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 4993: The Capstone Experience in French**

This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.

**Credit Hours:** 3

---

**FRENCH 4993H: The Capstone Experience in French - Honors**

This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**FRENCH 7004: Topics in French-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

**Credit Hour:** 1-99

---

**FRENCH 7120: Foreign Language Teaching Methodology**

(same as SPAN 7120, cross-leveled with SPAN 4120, FRENCH 4120, LATIN 4121). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used toward Arts and Science major.

**Credit Hours:** 3

---

**FRENCH 7130: Stylistics**

(same as FRENCH 4130). A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 or FRENCH 3280 and FRENCH 3420 or FRENCH 3430

---

**FRENCH 7410: French Medieval Literature**

(cross-leveled with FRENCH 4410).

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 7420: French Renaissance**

(cross-leveled with FRENCH 4420). Survey of prose and poetry of the sixteenth century with significant emphasis on Montaigne, Rabelais, and the poetry of the Pleiade.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 7440: Eighteenth-Century French Literature**

(cross-leveled with FRENCH 4440). Through systematic and representative readings, this course familiarizes students with the literary trends and intellectual currents of 18th century France. The course includes works by Montesquieu, Voltaire, Rousseau, Laclous, Diderot, Marivaux, Prevost, and Beaumarchais.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

---

**FRENCH 7490: Nineteenth-Century French Novel**

(cross-leveled with FRENCH 4490). Study of the three major currents in prose fiction: romanticism, realism, and naturalism. Representative readings from Chateaubriand, Balzac, Stendhal, Flaubert, and Zola are included.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 7710: History of the French Language**

(same as LINGST 7710; cross-leveled with FRENCH 4710, LINGST 4710). Required of M.A. candidates.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3420 and FRENCH 3430

---

**FRENCH 7720: Structure of Modern French**

(same as LINGST 7720; cross-leveled with FRENCH 4720, LINGST 4720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.

**Credit Hours:** 3

**Prerequisites:** FRENCH 3160 or equivalent or instructor's consent

---

**FRENCH 7960: Special Readings in French**

Independent study through readings, conferences, reports.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent

---

**FRENCH 7980: Special Themes in French**

Subject varies according to instructor.

**Credit Hours:** 3

---

**FRENCH 7993: The Capstone Experience in French**

This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.

**Credit Hours:** 3

---

**FRENCH 8080: Readings in French**

Independent readings in preparation for MA or MALT comprehensive examination in French. Graded on A-F basis only.

**Credit Hour:** 1-3

---

**FRENCH 8085: Problems in French**

Problems in French.

**Credit Hour:** 1-99

---

**FRENCH 8087: Seminar in French**

Subject varies according to instructor.

**Credit Hour:** 2-3

---

**FRENCH 8120: Bilingualism and Language Contact**

(same as SPAN 8120 and LINGST 8120). Global analysis of the study of Bilingualism from a combined sociocultural, sociolinguistic and

psycholinguistic perspective based on current research and examination of various phenomena of language contact (taught in English).

**Credit Hours:** 3

---

**FRENCH 8411: Old French**

Old French.

**Credit Hours:** 3

**Recommended:** FRENCH 4710 or FRENCH 7710 and some knowledge of Latin

---

**FRENCH 8416: Studies in the French Renaissance**

Studies in the French Renaissance.

**Credit Hours:** 3

**Recommended:** FRENCH 4420 or FRENCH 7420

---

**FRENCH 8417: Studies in Seventeenth-Century French Literature**

Studies in Seventeenth-Century French Literature.

**Credit Hours:** 3

**Recommended:** FRENCH 4430 or FRENCH 7430

---

**FRENCH 8418: Studies in Eighteenth-Century French Literature**

Studies in Eighteenth-Century French Literature.

**Credit Hours:** 3

**Recommended:** FRENCH 4440 or FRENCH 7440

---

**FRENCH 8420: Studies in Twentieth-Century French Literature**

Studies in Twentieth-Century French Literature.

**Credit Hours:** 3

**Recommended:** FRENCH 4460 or FRENCH 7460, FRENCH 4470 or FRENCH 7470 or FRENCH 4480 or FRENCH 7480

---

**FRENCH 9080: Readings in French**

Independent readings in preparation for the PhD comprehensive examination in French.

**Credit Hour:** 3-6

---

**FRENCH 9090: Research in French**

Leads to preparation of PhD dissertation in French. Graded on S/U basis only.

**Credit Hour:** 1-99

---

## General Human Environmental Sciences Courses

**GN\_HES 1100: Introduction to Human Environmental Sciences**

Introduction to Human Environmental Sciences

**Credit Hour:** 1

---

**GN\_HES 1234: Successful Adulting**

Understanding what it means to be an adult; identify challenges of transition to adulthood and empower students to overcome these challenges by developing identity and life skills; build moral capacity to guide responsible citizenship and leadership.

Credit Hours: 3

---

## General Studies Courses

### **G\_STDY 4940: Internship in General Studies**

Internship limited to students pursuing the Bachelor of General Studies degree. Graded on S/U basis only.

Credit Hour: 1-6

---

### **G\_STDY 4960: Readings in General Studies**

Independent readings with supervisory faculty member. May be repeated to a maximum of six hours.

Credit Hour: 1-6

Prerequisites: Open only to General Studies majors

---

## Geography Courses

### **GEOG 1050: Introductory Meteorology**

(same as ATM\_SC 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

Credit Hours: 3

Prerequisites: Enrollment restricted to students enrolled in the College of Arts and Science

---

### **GEOG 1050H: Introductory Meteorology - Honors**

(same as ATM\_SC 1050H). Physical processes of atmosphere in relation to day-to-day changes in weather.

Credit Hours: 3

Prerequisites: Enrollment restricted to students enrolled in the College of Arts and Science; Honors eligibility required

---

### **GEOG 1100: Regions and Nations of the World I**

Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.

Credit Hours: 3

---

### **GEOG 1100H: Regions and Nations of the World I - Honors**

Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.

Credit Hours: 3

Prerequisites: Honors eligibility required

---

### **GEOG 1200: Regions and Nations of the World II**

Introductory analysis for general education. Regional character, spatial relationships, problems of environment and development of the former Soviet Union, Pacific World, South and East Asia, Africa and Middle East. Organized around basic concepts in the field of geography. May be taken independently of GEOG 1100.

Credit Hours: 3

---

### **GEOG 1205H: Regions and Nations General Honors**

Credit Hours: 3

Prerequisites: Honors eligibility required

---

### **GEOG 1550: Introduction to the Humanized Earth**

Examines human culture as a geographical element; the power of culture and human institutions in human-environmental interaction and the creation of agriculture, folk culture, popular culture, cities, and a broad range of cultural landscapes.

Credit Hours: 3

---

### **GEOG 1600: Climate Change: Science and Public Policy**

Explores the role of physical science, environmental politics and public policy in shaping contemporary debate concerning climate change, mitigation, and adaptation strategies. Examines the scientific rationale and statistical basis underwriting the concept of climate change, why aspects of the science remain controversial, the prospects of institutional action and the difficulties inherent in developing public policies targeting mitigation and adaptation. Course includes a role-playing simulation where students will play roles based on 2009 climate negotiations in Copenhagen, Denmark. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Freshman and sophomores only

---

### **GEOG 1800: Digital Earth: Introduction to the Geospatial Technologies**

Introduction to technologies used to map a changing world, with an emphasis on digital mapping explorations of human and environmental interactions on Earth. Course includes lab and fieldwork to introduce geographic information data collection and analysis techniques. Graded on A/F basis only. May be repeated for credit.

Credit Hours: 3

Prerequisites: Freshman and sophomore standing or instructor's consent

---

### **GEOG 1840: Global Environmental Change**

Course uses a geographic framework to study patterns and processes related to global environmental change. Topics include environmental reconstruction, water resources, human-environment interactions, glaciers, fire, and climate.

Credit Hours: 3

---

### **GEOG 1900: Our Dynamic Planet in Film**

Focuses on using documentary films (e.g., Planet Earth) as a medium for studying how global environmental change is impacting all spheres of our dynamic planet. To ensure a more complete understanding of course material, films are supplemented with active lectures and discussions of assigned readings from both periodicals and peer-reviewed literature that emphasize key points illustrated in the films. In doing so, this course synthesizes material from numerous fields of study that fall under the burgeoning umbrella field of global-change ecology. This synthetic approach is used to highlight the formidable linkages on Earth between the nonliving and living, thus permitting students to gain an appreciation and holistic understanding of how global environmental change is impacting Earth processes responsible for creating both our current landscapes and the remarkable diversity of life that inhabit them.

**Credit Hours:** 3

---

**GEOG 2010: Exploring Geography**

We are all explorers. As children, we grew up testing the boundaries of our known worlds and trying to understand what was beyond. Geography gives us the means to formalize this impulse to explore the world around us, both local and distant. It allows us to make sense of the ways in which space and relationships between objects drives much of human, social, and environmental interaction. In this course, we will illustrate some of the principle ways in which Geographers investigate, explain, and map meaning, pushing the boundaries of what we know as individuals and society. Using a combination of discussion and field exercises, students will be asked to engage with a number of critical societal issues that have geographical elements at their core. Examples include the Geography of crime, imagining place, the city of the future, environmental change, terrorism, human trafficking, drones, and sustainability.

**Credit Hour:** 1

---

**GEOG 2120: United States and Canada**

Intensive examination of selected areas and distributions. Regional systems, problems and planning.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing

---

**GEOG 2130: Geography of Missouri**

Physical, human, economic, and political geography of Missouri; regions of the state; geography applied to current state issues.

**Credit Hours:** 3

**Prerequisites:** GEOG 1100

---

**GEOG 2280: Race, Democracy, and Violence in Cuba and Haiti**

(same as PEA\_ST 2280, SOCIOL 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

**Credit Hours:** 3

---

**GEOG 2280W: Race, Democracy, and Violence in Cuba and Haiti - Writing Intensive**

(same as PEA\_ST 2280W, SOCIOL 2280W). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

**Credit Hours:** 3

---

**GEOG 2289: Towns in Missouri and the Midwest: Voices and Inequalities**

(same as PEA\_ST 2289, RU\_SOC 2289). Focusing on towns and communities and their regional history and cultural traditions. Examines the issues and concerns of small-town America in the context of recent hardships and adverse economic trends. Examples of topics covered include case studies of communities such as Marceline, Missouri (Walt Disney's boyhood home), race and the immigration of non-whites in to rural areas; gender roles in small communities, the role of religion in

small-town identity formation, and other current issues faced by 'middle America.' The responsiveness of government, large corporations, and institutions to the problems of diverse communities will be critically examined, with a multidisciplinary approach that draws on key theories and works in the disciplines of sociology, rural sociology, community development, and geography. Graded on A-F basis only.

**Credit Hours:** 3

---

**GEOG 2293: Globalization, Identity and Citizenship**

(same as PEA\_ST 2293, POL\_SC 2293). This course examines the forces of globalization that are transforming our world, and explores the various responses - psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of 'global citizenship'. Graded on A-F basis only.

**Credit Hours:** 3

---

**GEOG 2293W: Globalization, Identity and Citizenship - Writing Intensive**

(same as PEA\_ST 2293W, POL\_SC 2293W). This course examines the forces of globalization that are transforming our world, and explores the various responses - psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of 'global citizenship'. Graded on A-F basis only.

**Credit Hours:** 3

---

**GEOG 2340: South America**

Physical environment and culture in the regional development of South America.

**Credit Hours:** 3

**Prerequisites:** One course in geography or instructor's consent

---

**GEOG 2610: Climate, Landforms and Vegetation: Introduction to Physical Geography**

Examination of the interacting natural systems comprising the Earth's physical environment, including the atmosphere, biosphere, and land forms. Focus on relating fundamental physical, chemical and ecological processes to the global geographic patterns they produce.

**Credit Hours:** 3

---

**GEOG 2660: Environmental Geography**

Historical perspectives on the human agency in transforming the earth, with emphasis on international environmental problems. Topics include basic biogeography; environmental impacts of population growth, underdevelopment and overdevelopment; and new approaches to management of global resources.

**Credit Hours:** 3

---

**GEOG 2710: Economic Geography**

Geographical location and organization of world's major economic activities. Emphasizes agricultural and industrial patterns, commodity flows, transport networks, geographical principles of market and industrial location, internal spatial organization of cities, land-use models, geographic aspects of economics growth.

**Credit Hours:** 3

**Prerequisites:** GEOG 1100 or GEOG 1200 or sophomore standing

---

**GEOG 2720: The City**

Study of cities: origin, development, distribution; social, economic, and demographic significance. Consideration of theories of structure, urban hierarchies, and land-use planning.

**Credit Hours:** 3

---

**GEOG 2904: Topics in Geography-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing, departmental consent for repetition

---

**GEOG 2904W: Topics in Geography-Social Science - Writing Intensive**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** sophomore standing, departmental consent for repetition

---

**GEOG 3040: Introduction to Geographic Information Systems GIS**

(same as CV\_ENG 3050). Introduces theory, concepts, and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using Geographic Information Systems (GIS). Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or instructor's consent

---

**GEOG 3140: Mexico, Central America, and the Caribbean**

Physical environment and culture in the regional development of Mexico, Central America, and the Caribbean.

**Credit Hours:** 3

---

**GEOG 3270: Geography of the Middle East**

Cultural, physical and historical geography of Middle East, with emphasis on cultural adaptations to environments and conflicts over the resources.

**Credit Hours:** 3

---

**GEOG 3385: Special Problems in Geography**

Independent investigation leading to a paper or project. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**GEOG 3496: Digital Indigenous Studies**

(same as PEA\_ST 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.

**Credit Hours:** 3

---

**GEOG 3496W: Digital Indigenous Studies - Writing Intensive**

(same as PEA\_ST 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.

**Credit Hours:** 3

---

---

**GEOG 3510: Historical Geography of North America**

Analysis of selected geographical patterns and themes in the continent's past. Focus is explicitly geographical, stressing extensive use of maps and recent scholarly work by historical geographers.

**Credit Hours:** 3

**Prerequisites:** Junior standing, or instructor's consent

---

**GEOG 3560: Native American Geographies**

A survey of the Native American geographies in the United States. Historical and contemporary topics are covered employing cross-cultural perspectives, including some philosophical views of the Earth and society, sense of place, memory, sacred land, colonialism and Geographic Information Systems (GIS) representations, and natural resources.

**Credit Hours:** 3

**Recommended:** This is an upper-division course. Junior standing is recommended

---

**GEOG 3560W: Native American Geographies - Writing Intensive**

A survey of the Native American geographies in the United States. Historical and contemporary topics are covered employing cross-cultural perspectives including some philosophical views of the Earth and society, sense of place, memory, sacred land, colonialism and GIS representations, and natural resources.

**Credit Hours:** 3

---

**GEOG 3580: Placewriting**

This class explores creative nonfiction work that attends to the geographical dimensions of human experience and the character of place - 'placewriting'. Students will investigate how creative nonfiction evokes the human relationship with place and the geographical dimensions of personal and group identity. The class consists of two parts: discussion and critique of six creative nonfiction works on place, and a writer's workshop designed to enable students produce their own work in the genre focused on a local community or place.

**Credit Hours:** 3

**Recommended:** GEOG 1550

---

**GEOG 3600: Climates of the World**

(same as ATM\_SC 3600). A study of the world distribution of climates based on 'cause and effect' relationships. Special attention is given to the impacts of climate on humanity.

**Credit Hours:** 3

**Prerequisites:** GEOG 1050 or equivalent or graduate standing

**Corequisites:** By permission, only

---

**GEOG 3610: Physical Geography of the United States**

Study of natural regions of the United States by integrating topics from landforms, geology, climate, soils, vegetation, resources, and land use.

**Credit Hours:** 3

**Prerequisites:** GEOG 2610

---

**GEOG 3630: Earth Surface Systems**

Systematic study of landforms geomorphic processes governing them. Provides a foundation for the theoretical, technical, and practical understanding of environmental systems.

**Credit Hours:** 3

---

**GEOG 3740: Geography and Planning**

Emphasis on geographic techniques for gathering and generating environmental information for planners. Principles of land-use planning will be applied to selected regions.

**Credit Hour:** 1-3

---

**GEOG 3760: Geography of the World's Religions**

(same as REL\_ST 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.

**Credit Hours:** 3

---

**GEOG 3760W: Geography of the World's Religions - Writing Intensive**

(same as REL\_ST 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.

**Credit Hours:** 3

---

**GEOG 3780: World Political Geography: Patterns and Processes**

(same as PEA\_ST 3780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world.

**Credit Hours:** 3

---

**GEOG 3800: Geography of Travel and Tourism**

Examines the fundamentals of the geography of tourism and travel in both foreign and domestic contexts. During the past few decades, tourism has been a fast-growing industry around the world, although tourism can easily be negatively influenced by terrorism, natural disasters, and economic downturns. Looks at several common types of tourism and focus on the positive and negative impacts of tourism upon local cultures, the environment, and economic development. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** GEOG 1100 or GEOG 1200 or sophomore standing

---

**GEOG 3830: Remote Sensing**

Introduction to the principles of remote sensing of the environment. Digital imagery from spacecraft, conventional and high-altitude aerial photography, thermal imaging, and microwave remote sensing.

**Credit Hours:** 3

**Recommended:** GEOG 2840

---

**GEOG 3840: Cartography**

Principles of computer-assisted cartography. Automated cartographic display. Hands-on experience with computer-mapping software and

hardware systems. Role of computers in map design. Digital encoding of geographic data.

**Credit Hours:** 3

**Prerequisites:** GEOG 2840

---

**GEOG 4130: The Geospatial Sciences in National Security**

(same as CV\_ENG 4175; cross-leveled with GEOG 7130, CV\_ENG 7175). Explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** Junior standing or above required

---

**GEOG 4200: Geopolitics**

(cross-leveled with GEOG 7200). Geopolitics examines politics, especially international relations, as influenced by geographical factors. To reveal and forecast global trends, we examine the interactions of geographical contexts and perspectives with international and domestic political processes. Our geopolitical analysis is both thematic and regional. Geographical themes are multi-disciplinary and include location and place, physical geography and natural resources, population and immigration, culture and ethnicity, religion, economics and trade, foreign policy, conflict, globalization, and development. These are examined in the context of eight world regions and the polar realms. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** GEOG 1100 or GEOG 1200

---

**GEOG 4390: Special Readings in Geography**

Independent readings selected in consultation with supervisory faculty member. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent and independent study contract

---

**GEOG 4400: Geographies of Terrorism and Drugs**

(cross-leveled with GEOG 7400). The course examines the parallel and independent geographies of terrorism and drugs. Their common features include dangerous cultural landscapes that cannot sustain other forms of land use. They are typically marginal, remote, and beyond the reach of authorities. Crackdowns on terrorists and drug producers in one locale usually fails to eradicate the problems as they emerge elsewhere. The wars on terrorism and drugs often stimulate greater enrollments and production. Where poverty and alienation are common, both livelihoods offer social accommodation and ready entry into the cash economy. Alternative means of combating terrorism and drug production are explored. Grading on A-F basis only.

**Credit Hours:** 3

**Recommended:** GEOG 1100 and GEOG 1200

---

**GEOG 4560: Resources and Indigenous Peoples**

(cross-leveled with GEOG 7560). Survey of Indigenous peoples' struggle to control and use natural resources, to have a say in determining the path of economic development, and to restrain the destructive tendencies of colonialism and capitalism, challenging traditional state-to-state relations.

**Credit Hours:** 3

**Prerequisites:** Junior standing required

---

**GEOG 4560W: Resources and Indigenous Peoples - Writing Intensive**

(cross-leveled with GEOG 7560). Survey of Indigenous peoples' struggle to control and use natural resources, to have a say in determining the path of economic development, and to restrain the destructive tendencies of colonialism and capitalism, challenging traditional state-to-state relations.

**Credit Hours:** 3

**Prerequisites:** Junior standing required

---

**GEOG 4620: Biogeography: Global Patterns of Life**

(cross-leveled with GEOG 7620). Analysis of the patterns and processes of plant distribution in the contemporary landscape, stressing environmental influences and vegetation dynamics, particularly as they relate to North American vegetation.

**Credit Hours:** 3

**Recommended:** GEOG 2610

---

**GEOG 4630: River and Stream Dynamics**

(cross-leveled with GEOG 7630). Systematic study of river mechanics, stream-channel form, river management and restoration. Provides a theoretical and practical understanding of stream systems.

**Credit Hours:** 3

**Prerequisites:** GEOG 2610 and GEOG 3630, or instructor's consent

---

**GEOG 4710: Spatial Analysis in Geography**

(cross-leveled with GEOG 7710). Application of statistical methods to geographic research. Prepares students to utilize advanced methodologies and models in spatial analysis. Includes computer analysis of geographical data. Math Reasoning Proficiency Course.

**Credit Hours:** 3

**Recommended:** MATH 1100 or MATH 1120

---

**GEOG 4740: Location Analysis and Site Selection**

(same as CV\_ENG 4185; cross-leveled with GEOG 7740, CV\_ENG 7185). Overview of location analysis in regional-planning and spatial-decision support. Focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

**Credit Hours:** 3

---

**GEOG 4770: Migration and Immigration**

(cross-leveled with GEOG 7770). Explores demographic, economic, and social issues surrounding immigration and migration. Focuses on the global labor migration system, immigration to the United States, and internal migration within the U.S., as well as the linkages between these systems.

**Credit Hours:** 3

---

**GEOG 4790: Geographic Information Systems for the Social Sciences**

(cross-leveled with GEOG 7790). Designed for social science students interested in learning about the tools available in Geographic Information

Systems (GIS) for linking to and analyzing spatial qualitative data. Uses multiple data sources (qualitative and quantitative), applied within a social context, using spatial investigation procedures to detect geographical trends in data sets. Primary focus is on how GIS can enhance social science research.

**Credit Hours:** 3

**Prerequisites:** Juniors and seniors only

---

**GEOG 4810: Landscape Ecology and GIS Analysis I**

(same as NAT\_R 4385). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.

**Credit Hours:** 3

**Prerequisites:** GEOG 3040, or instructor's consent

---

**GEOG 4850: Transportation Geography**

(same as CV\_ENG 4155; cross-leveled with GEOG 7850, CV\_ENG 7155). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

**Credit Hours:** 3

---

**GEOG 4860: Advanced Remote Sensing**

(cross-leveled with GEOG 7860). Advanced remote sensing to provide digital-image processing techniques for satellite and airborne imagery; emphasis on spatial/spectral analysis, image classification and land-use/land-cover change detection. Class project heavily involved.

**Credit Hours:** 3

**Prerequisites:** GEOG 3830

---

**GEOG 4904: Topics in Geography-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Must get departmental consent for repetition.

**Credit Hour:** 1-12

**Prerequisites:** Junior standing

---

**GEOG 4904W: Topics in Geography-Social Science - Writing Intensive**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Must get departmental consent for repetition.

**Credit Hour:** 1-12

**Prerequisites:** Junior standing

---

**GEOG 4940: Advanced Geographic Information Systems (GIS II)**

(cross-leveled with GEOG 7940). Advanced study of geographic and spatial analysis and modeling utilizing Geographic Information Systems (GIS) technology. Focus on project management, research applications, and geostatistical analysis through independent research projects.

**Credit Hours:** 3

**Prerequisites:** GEOG 3040 or instructor's permission

---

---

**GEOG 4945: Internship in Applied Geography and Cartography**

Regularized individual work experience with local, regional, state or national agencies, with guidance and readings supplied by faculty coordinator. May repeat to maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** Departmental consent required

---

**GEOG 4990: Senior Seminar in Geography**

A seminar in selected themes in geography. Class will focus on research, writing, presenting, and discussing themes in contemporary geography. Required of all majors prior to graduation.

**Credit Hours:** 3

**Prerequisites:** Five courses in geography or instructor's consent

---

**GEOG 4996H: Honors in Geography**

Special work for Honors candidates in geography. Prerequisites: Honors eligibility required

**Credit Hours:** 3

---

**GEOG 4996HW: Honors in Geography - Honors/Writing Intensive**

Special work for Honors candidates in geography. Prerequisites: Honors eligibility required

**Credit Hours:** 3

---

**GEOG 4997H: Honors in Geography**

Special work for Honors candidates in geography.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**GEOG 7130: The Geospatial Sciences in National Security**

(same as CV\_ENG 7175; cross-leveled with GEOG 4130). Explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**GEOG 7200: Geopolitics**

(cross-leveled with GEOG 4200). Geopolitics examines politics, especially international relations, as influenced by geographical factors. To reveal and forecast global trends, we examine the interactions of geographical contexts and perspectives with international and domestic political processes. Our geopolitical analysis is both thematic and regional. Geographical themes are multi-disciplinary and include location and place, physical geography and natural resources, population and immigration, culture and ethnicity, religion, economics and trade, foreign policy, conflict, globalization, and development. These are examined in the context of eight world regions and the polar realms. Graded on A-F basis only.

**Credit Hours:** 3

---

---

**GEOG 7400: Geographies of Terrorism and Drugs**

(cross-leveled with GEOG 4400). The course examines the parallel and independent geographies of terrorism and drugs. Their common features include dangerous cultural landscapes that cannot sustain other forms of land use. They are typically marginal, remote, and beyond the reach of authorities. Crackdowns on terrorists and drug producers in one locale usually fails to eradicate the problems as they emerge elsewhere. The wars on terrorism and drugs often stimulate greater enrollments and production. Where poverty and alienation are common, both livelihoods offer social accommodation and ready entry into the cash economy. Alternative means of combating terrorism and drug production are explored. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** GEOG 7200

---

**GEOG 7560: Resources and Indigenous Peoples**

(cross-leveled with GEOG 4560). Survey of Indigenous peoples' struggle to control and use natural resources, to have a say in determining the path of economic development, and to restrain the destructive tendencies of colonialism and capitalism, challenging traditional state-to-state relations.

**Credit Hours:** 3

---

**GEOG 7620: Biogeography: Global Patterns of Life**

(cross-leveled with GEOG 4620). Analysis of the patterns and processes of plant distribution in the contemporary landscape, stressing environmental influences and vegetation dynamics, particularly as they relate to North American vegetation.

**Credit Hours:** 3

**Prerequisites:** GEOG 2610 or instructor's consent

---

**GEOG 7710: Spatial Analysis in Geography**

(cross-leveled with GEOG 4710). Application of statistical methods to geographic research. Prepares students to utilize advanced methodologies and models in spatial analysis. Includes computer analysis of geographical data.

**Credit Hours:** 3

**Recommended:** MATH 1100 or MATH 1120

---

**GEOG 7740: Location Analysis and Site Selection**

(same as CV\_ENG 7185; cross-leveled with GEOG 4740, CV\_ENG 4185). Overview of location analysis in regional planning and spatial decision support. Focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

**Credit Hours:** 3

---

**GEOG 7770: Migration and Immigration**

(cross-leveled with GEOG 4770). As fertility and mortality decline to record low levels, immigration and migration have become the primary components of population change. Changes brought on by immigration to a country and the internal redistribution of population via migration pose challenges to governments, economic development, social and cultural relations, and environmental sustainability. Explores issues surrounding immigration and migration. Beginning with the demographic overview of immigration, it focuses on the challenges faced by immigrant, sending,

and receiving nations in the global migration system. The second part of the course focuses on the array of issues surrounding immigration to the United States, including the socio-economic adaptation of immigrants, the economic and cultural impacts of immigration, and illegal immigration. The third part of the course focuses on internal migration within migration within the US, discussing topics such as migration to the Sunbelt, Great Plains depopulation, poverty migration, migration to the suburbs, and migration's impact on community. Linkages between domestic migration and immigration will also be explored.

**Credit Hours:** 3

---

**GEOG 7790: Geographic Information Systems for the Social Sciences**

(cross-leveled with GEOG 4790). Designed for social science students interested in learning about the tools available in Geographic Information Systems (GIS) for linking to an analyzing spatial qualitative data. Uses multiple data sources (qualitative and quantitative), applied within a social context, using spatial investigation procedures to detect geographical trends in data sets. Primary focus is on how GIS can enhance social science research.

**Credit Hours:** 3

---

**GEOG 7810: Landscape Ecology and GIS Analysis I**

(same as NAT\_R 7385). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**GEOG 7840: Geographic Information Systems I**

Introductory study of theory, concepts and techniques related to basic analysis, creation and processing of geographic and spatial data using Geographic Information Systems (GIS). Independent learning and computer-based laboratory exercises supplement theoretical lectures and discussion.

**Credit Hours:** 3

---

**GEOG 7850: Transportation Geography**

(same as CV\_ENG 7155). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

**Credit Hours:** 3

---

**GEOG 7860: Advanced Remote Sensing**

(cross-leveled with GEOG 4860). Advanced remote sensing to provide digital-image processing techniques for satellite and airborne imagery; emphasis on spatial/spectral analysis, image classification and land-use/land-cover change detection. Class project heavily involved.

**Credit Hours:** 3

**Prerequisites:** GEOG 3830

---

---

**GEOG 7904: Topics in Geography-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-12

**Prerequisites:** Instructor's consent

---

**GEOG 7940: Advanced Geographic Information Systems (GIS II)**

(cross-leveled with GEOG 4940). Advanced study of geographic and spatial analysis and modeling utilizing Geographic Information Systems (GIS) technology. Focus on project management, research applications, and geostatistical analysis through independent research projects.

**Credit Hours:** 3

**Prerequisites:** GEOG 7840 or instructor's consent

---

**GEOG 8080: Research in Geography**

Research not leading to thesis. May be repeated to a maximum of 6 hours. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**GEOG 8085: Special Investigations in Geography**

Advanced studies to meet the needs of the individual student. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent and independent study contract

---

**GEOG 8090: Research in Geography**

Research leading to a thesis. May be repeated to a maximum of 8 hours. Graded on S/U basis only.

**Credit Hour:** 1-8

**Prerequisites:** instructor's consent and independent study contract

---

**GEOG 8270: Seminar in the Geography of the Middle East**

Advanced readings and analysis of topics in the geography of the Middle East.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**GEOG 8710: Seminar**

May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3

**Prerequisites:** Departmental consent

---

**GEOG 8750: Research Design**

Application of scientific methods in geographic research. Critical evaluation of current geographical methodology.

**Credit Hours:** 3

**Prerequisites:** Restricted to graduate geography majors graduate or instructor's consent

---

**GEOG 8760: Geographic Thought**

Discussion of the historic roots of the discipline, especially the ideas, theories and underlying philosophies that have defined Geography in the

past century and a half. Students will also explore the philosophical and theoretical ideas that shape the way geographers approach the study of the world.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent

---

**GEOG 8820: Field Geography**

Techniques of geographical investigation in the field.

**Credit Hours:** 3

**Prerequisites:** restricted to graduate Geography majors or instructor's consent

---

**GEOG 8840: Seminar: Applied Remote Sensing**

Applied project in remote sensing. Data selection, image processing, land-use and land-cover change, and quantitative biophysical information extraction from remotely sensed data.

**Credit Hours:** 3

**Prerequisites:** GEOG 3830 or instructor's consent

---

**GEOG 8902: Topics in Geography-Biological/Physical/Mathematical**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

## Geology Courses

**GEOL 1050: Planet Earth**

An introduction to Earth Science. Topics include: evidence for continental drift and plate tectonics, causes and prediction of natural hazards, the scale of geological time.

**Credit Hours:** 3

---

**GEOL 1100: Principles of Geology with Laboratory**

Three lectures, 2-hours lab. Earth processes and products and their impact on human needs and the environment. One field trip. For the Mizzou Online sections, there will not be required lectures, lab, and field trip.

**Credit Hours:** 4

---

**GEOL 1120: Laboratory Investigations of the Earth**

This hybrid-lab course introduces basic methods of earth science investigation and inquiry with an emphasis on earth sciences. Key concepts include basic scientific methodology, earth materials and processes, and the societal relevance of geoscience research and application. Upon completion of the course, the successful student will have learned to apply course material to improve thinking, problem solving and decision-making. Graded on A-F basis only.

**Credit Hours:** 2

**Recommended:** GEOL 1050 as a corequisite (although the course will be a stand-alone introduction to the geosciences)

---

---

**GEOL 1200: Environmental Geology with Laboratory**

The interaction between geologic processes and human society. Topics include mineral, water, and energy resources, volcanic hazards, earthquakes, landslides, floods, coastal erosion, pollution problems and environmental management.

**Credit Hours:** 4

---

**GEOL 1250: The World's Oceans**

An interdisciplinary introduction to oceanography. Topics include: geologic evolution of ocean basins, properties of seawater, ocean circulation (waves, tides, and currents), marine ecosystems, instability of beaches and coastlines, coastal development and engineering.

**Credit Hours:** 3

---

**GEOL 1400: Themes in Geology**

5-week course organized around a central theme or topic, up to 3 different sections can be taken for credit.

**Credit Hour:** 1

---

**GEOL 2100: Independent Study in Geology**

Directed Library research in geological topics, under the supervision of faculty sponsor. May be repeated for a maximum of 3 hours credit.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**GEOL 2110: Introduction to Soil Science with Laboratory**

(same as SOIL 2110). Introduction to Soil Science with emphasis placed on physical, biological, and chemical properties and applications to land use, plant growth, and environmental problems with laboratory application of these concepts.

**Credit Hours:** 5

**Prerequisites:** CHEM 1320

---

**GEOL 2120H: Faults and Earthquakes: Past, Present, and Future - Honors**

Seminar in science and societal ramifications of earthquakes. Geologic background includes causes, behavior, and distribution of faults. Student-led discussions cover historical disasters, economic, political, psychological, and cultural perspectives.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

**Recommended:** Honors eligibility

---

**GEOL 2130: Physical Geology for Scientists and Engineers**

Introduction to physical geology and Earth processes with a focus on applications and societal relevance. In addition to basic geologic processes, physical principles will illustrate the interactions between geology and engineering, using a calculus-based approach.

**Credit Hours:** 4

**Prerequisites:** MATH 1500

---

**GEOL 2150: The Age of the Dinosaurs**

Study of the evolution of dinosaurs during the Mesozoic Era. New information on dinosaur life habits, food resources, dispersal by plate tectonics, and theories of extinction will be covered.

**Credit Hours:** 3

**Prerequisites:** 1000-level science course

---

**GEOL 2160H: Volcanoes and the Human Environment - Honors**

(same as GN\_HON 2450H). This course gives students an understanding of how volcanoes work, how they are studied, and how they have impacted human cultures. Students will gain appreciation of volcanology as a broad scientific discipline within geology and the role that science plays in public policy. Graded on A/F basis only.

**Credit Hours:** 3

**Recommended:** Honors eligibility required

---

**GEOL 2220: Seminar: Headline Topics in the Geological Sciences**

(same as GEOL 2220H). Seminar organized around a central theme that is the focus of intense ongoing research and public debate.

**Credit Hours:** 3

---

**GEOL 2220H: Honors Seminar: Headline Topics in the Geological Science**

Seminar organized around a central theme that is the focus of intense ongoing research and public debate.

**Credit Hours:** 3

**Prerequisites:** ENGLISH 1000

**Recommended:** Honors eligibility

---

**GEOL 2300: Earth Systems and Global Change**

Study of the earth as a whole, taking into account the many interwoven components of the geosphere, hydrosphere, atmosphere and biosphere.

**Credit Hours:** 3

**Recommended:** 1000-level Science course

---

**GEOL 2350: Historical Geology**

Summary of principles and techniques used in reconstructing Earth's history. Survey of major events that have affected Earth and its inhabitants. Review of geologic history of North America.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200

---

**GEOL 2360: Historical Geology Laboratory**

A laboratory course designed to improve understanding of Earth History by examination of maps and mineral, rock, sediment and fossil samples.

**Credit Hour:** 1

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200

**Corequisites:** GEOL 2350

---

**GEOL 2400: Surficial Earth Processes and Products with Laboratory**

Semiquantitative analysis of geologic processes that shape the earth's surface. Includes topics in sedimentation and geomorphology.

**Credit Hours:** 4

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200, and MATH 1100

---

**GEOL 2450: Global Water Cycle**

Study of environmental geochemical factors controlling the composition of natural waters, and sources of water's constituents (natural or human-produced). Math Reasoning Proficiency Course.

**Credit Hours:** 3

**Prerequisites:** MATH 1100

**Recommended:** 1000-level science course

---

**GEOL 2500: Regional Geology Field Trip**

Field based study of a particular geologic region, including classroom preparation prior to the field trip. The trip will last 7-10 days, either during Spring Break or immediately after finals week. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200

---

**GEOL 2600: Mineral and Energy Resources of the Earth**

This course examines the geology of Earth's major mineral and energy resources--their origin, distribution, and characteristics--and societal implications of their use and abundance. Major topics: fossil fuels, nuclear energy, base & precious metals, non-metallic minerals, water.

**Credit Hours:** 3

---

**GEOL 3085: Problems in Geological Sciences**

Problems in Geological Sciences.

**Credit Hour:** 1-5

**Prerequisites:** instructor's consent

---

**GEOL 3110: Geology of Missouri**

The physical, historical, and environmental geology of Missouri are described, discussed and interpreted.

**Credit Hours:** 3

**Prerequisites:** ENGLSH 1000 and either GEOL 1100 or GEOL 1200

---

**GEOL 3250: Mineralogy**

Introduction to crystallography, crystal chemistry and crystal structures. Systematic study of mineral groups. Includes identification of minerals by physical, chemical and optical properties.

**Credit Hours:** 5

---

**GEOL 3300: Introduction to Geochemistry**

Fundamentals of chemistry as applied to geology. Includes phase diagrams, thermodynamics, redox chemistry, aqueous chemistry, stable and radiogenic isotopes. Computer-based homework problems (satisfies computing requirement for Geology majors).

**Credit Hours:** 3

**Prerequisites or Corequisites:** CHEM 1330

**Prerequisites:** MATH 1400 or MATH 1500, and GEOL 1100 or GEOL 2130 or GEOL 1200

---

**GEOL 3550: Introduction to Paleontology with Laboratory**

Study of the morphology, paleontology, patterns of evolution, and causes of extinction in geologically important groups of invertebrate and vertebrate fossils. Lab concentrates on identification of biostratigraphically important fossils (mostly invertebrates). Several half-day field trips.

**Credit Hours:** 4

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200

---

**GEOL 3650: Structural Geology**

The mechanical behavior of earth materials. Analysis of the geometry and mechanics of faults, fractures, and folds. Laboratory includes problems on stresses and strains associated with deformation, geometric analysis of deformation structures, and interpretation of geologic maps.

**Credit Hours:** 4

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200 and MATH 1140 or MATH 1160 or MATH 1500

---

**GEOL 3800: Sedimentology and Stratigraphy with Lab**

Mechanics of sediment transport by fluid flow and gravity flow, origins of stratification and sedimentary structures, facies characteristics depositional environments.

**Credit Hours:** 4

**Prerequisites:** GEOL 3250

---

**GEOL 4002: Topics in Geological Sciences-Biological Science**

Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**GEOL 4006: Topics in Geological Sciences-Mathematical Science**

Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**GEOL 4007: Topics in Geological Sciences-Physical Science**

Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**GEOL 4100: Groundwater Hydrology**

(cross-leveled with GEOL 7100). Analysis of groundwater occurrence, flow, recovery, and solute transport within shallow levels of the Earth's crust.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200, and PHYSCS 1210 or PHYSCS 2750, and MATH 1400 or MATH 1500

---

**GEOL 4120: Engineering Geology**

(cross-leveled with GEOL 7120). Fundamentals of earth materials and geological processes and their applications in engineering works and

environmental sciences. Includes properties of minerals and rocks, rock and soil mechanics, surficial geological processes, and practice of engineering.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200, and MATH 1500, or instructor's consent

---

#### **GEOL 4130: Groundwater Modeling**

(cross-leveled with GEOL 7130). Use of leading groundwater flow and contamination modeling software. Theory of groundwater flow, solute transport, and selected numerical solution techniques. Applications to water resource, environmental, and geological problems.

**Credit Hours:** 3

**Prerequisites:** GEOL 4100 or equivalent

---

#### **GEOL 4180: Solar System Science**

(same as PHYSCS 4180, ASTRON 4180; cross-leveled with GEOL 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

**Credit Hours:** 3

**Prerequisites:** MATH 1700 and PHYSCS 1220 or PHYSCS 2760 or instructor's consent

---

#### **GEOL 4200: Economic Geology with Laboratory**

Geochemistry of ore deposits. Introduction to types of mineral deposits, genesis of ore, and current areas of research. Laboratory emphasizes hand-specimen and polished-section studies of a wide variety of ore deposit types.

**Credit Hours:** 4

**Prerequisites:** GEOL 4900

---

#### **GEOL 4300: Introduction to Low-Temperature Geochemistry**

Introduction to the chemical alteration of rock-forming minerals in weathering environments and to factors controlling the chemical composition of subsurface water.

**Credit Hours:** 3

**Prerequisites:** GEOL 3300 or instructor's consent

---

#### **GEOL 4318: Environmental Soil Chemistry**

(same as SOIL 4318 and ENV\_SC 4318; cross-leveled with GEOL 7318, SOIL 7318, ENV\_SC 7318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330. Junior standing or instructor's consent

---

#### **GEOL 4350: Patterns and Processes in the Fossil Record**

(cross-leveled with GEOL 7350). The purposes of this course are to 1) analyze patterns in the history of life and 2) to recognize the biased processes that led to its preservation. We will accomplish these goals by examining two disparate fossil preservation pathways: 1) Konservat lagerstätten: fossil deposits that are notorious for the exceptional and

rare preservation of soft tissues and 2) Konzentrat lagerstätten: fossil deposits that are exceptional for the enormous amount of fossilized skeletal material they contain. Through careful examination of both the rare and the hyper-abundant, we can address the fundamental question of paleobiology: how literally can the fossil record be read as the history of life? Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** GEOL 2350, GEOL 2360

---

#### **GEOL 4500: Organic Geochemistry**

(cross-leveled with GEOL 7500). Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth's atmosphere.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

#### **GEOL 4650: Plate Tectonics**

(cross-leveled with GEOL 7650). Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.

**Credit Hours:** 3

**Prerequisites:** GEOL 3250 or GEOL 3650 or instructor's consent

---

#### **GEOL 4650W: Plate Tectonics - Writing Intensive**

Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.

**Credit Hours:** 3

**Prerequisites:** GEOL 3250 or GEOL 3650 or instructor's consent

---

#### **GEOL 4680: Neotectonics and Earthquake Geology**

(cross-leveled with GEOL 7680). Introduction to techniques and concepts of active crustal deformation from the geological and geodetic perspectives. Topics include tectonic geomorphology, paleoseismology, Quaternary dating, tectonic geodesy, numerical models of faults, and earthquake hazard assessment.

**Credit Hours:** 3

**Prerequisites:** GEOL 3650 or GEOL 4650

---

#### **GEOL 4750: Microanalysis for Geological Sciences**

(cross-leveled with GEOL 7750). This course is intended to provide a working knowledge of electron and X-ray microbeam analytical instruments - both in principle and in practice. Lectures will focus on the physics of how these instruments collect data, and how these data can be interpreted. In addition, students will gain hands-on experience with operating these instruments, specifically on their own samples, as well as preparing their samples for microanalysis and interpreting/manipulating the resulting data. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's Consent (instrument time is limited so enrollment must also be limited)

---

#### **GEOL 4800: Introduction to Geophysics**

(cross-leveled with GEOL 7800). Introduction to the fundamentals of geophysical methods and their applications in geology, environmental

studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200 and MATH 1700 or instructor's consent

---

**GEOL 4900: Igneous and Metamorphic Petrology with Laboratory**

Introduction to igneous and metamorphic rock associations and rock-forming processes. Emphasis on understanding the evolution of the Earth in view of igneous and metamorphic rock petrogenesis.

**Credit Hours:** 4

**Prerequisites:** GEOL 3250

**Recommended:** GEOL 3300

---

**GEOL 4950: Senior Thesis**

Research conducted in an area of the Geological Sciences under the auspices of a member of the faculty. Under normal circumstances, this research should be completed over two semesters. May be repeated for a maximum of 3 hours credit.

**Credit Hour:** 1-3

---

**GEOL 4992: Geology Field Camp**

Field study of sedimentary, igneous and metamorphic rocks. Facies analysis of sedimentary rocks, mapping of folded and faulted sedimentary strata and fabric analysis of an igneous-metamorphic terrane. Excursion to Yellowstone and Grand Teton National Parks.

**Credit Hours:** 6

**Recommended:** GEOL 2350, GEOL 3650, and GEOL 3800

---

**GEOL 7002: Topics in Geological Sciences-Biological/Physical/Mathematics**

Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent.

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

**GEOL 7085: Problems in Geological Sciences**

**Credit Hour:** 1-8

**Prerequisites:** instructor's consent

---

**GEOL 7100: Groundwater Hydrology**

(cross-leveled with GEOL 4100). Analysis of groundwater occurrence, flow, recovery, and solute transport within shallow levels of the Earth's crust.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200, and PHYSCS 1210 or PHYSCS 2750, and MATH 1400 or MATH 1500

---

**GEOL 7120: Engineering Geology**

(cross-leveled with GEOL 4120). Fundamentals of earth materials and geological processes and their applications in engineering works and environmental sciences. Includes properties of minerals and rocks, rock and soil mechanics, surficial geological processes, and practice of engineering.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200 and MATH 1500, or instructor's consent

---

**GEOL 7130: Groundwater Modeling**

(cross-leveled with GEOL 4130). Use of leading groundwater flow and contamination modeling software. Theory of groundwater flow, solute transport, and selected numerical solution techniques. Applications to water resource, environmental, and geological problems.

**Credit Hours:** 3

**Prerequisites:** GEOL 4100 or equivalent

---

**GEOL 7180: Solar System Science**

(same as PHYSCS 7180 and ASTRON 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

**Credit Hours:** 3

**Prerequisites:** MATH 1700 and PHYSCS 1220 or PHYSCS 2760 or instructor's consent

---

**GEOL 7200: Economic Geology with Laboratory**

Geochemistry of ore deposits. Introduction to types of mineral deposits, genesis of ore, and current areas of research. Laboratory emphasizes hand-specimen and polished-section studies of a wide variety of ore deposit types.

**Credit Hours:** 4

**Prerequisites:** GEOL 4900

---

**GEOL 7300: Introduction to Low-Temperature Geochemistry**

Introduction to the chemical alteration of rock-forming minerals in weathering environments and to factors controlling the chemical composition of subsurface water.

**Credit Hours:** 3

**Prerequisites:** GEOL 3300 or instructor's consent

---

**GEOL 7318: Environmental Soil Chemistry**

(same as SOIL 7318 and ENV\_SC 7318; cross-leveled with GEOL 4318, SOIL 4318, ENV\_SC 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals, and weathering processes organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

**Credit Hours:** 3

**Prerequisites:** SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330 or instructor's consent

---

**GEOL 7350: Patterns and Processes in the Fossil Record**

(cross-leveled with GEOL 4350). The purposes of this course are to 1) analyze patterns in the history of life and 2) to recognize the biased processes that led to its preservation. We will accomplish these goals by examining two disparate fossil preservation pathways: 1) Konservat lagerstätten: fossil deposits that are notorious for the exceptional and rare preservation of soft tissues and 2) Konzentrat lagerstätten: fossil deposits that are exceptional for the enormous amount of fossilized skeletal material they contain. Through careful examination of both the rare and hyper-abundant we can address the fundamental question of

paleobiology: how literally can the fossil record be read as the history of life? Graded on A-F basis only.

**Credit Hours:** 3

---

**GEOL 7500: Organic Geochemistry**

(cross-leveled with GEOL 4500). Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth's atmosphere.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**GEOL 7650: Plate Tectonics**

(cross-leveled with GEOL 4650). Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.

**Credit Hours:** 3

**Prerequisites:** GEOL 3250, GEOL 3650 or instructor's consent

---

**GEOL 7680: Neotectonics and Earthquake Geology**

(cross-leveled with GEOL 4680). Introduction to techniques and concepts of active crustal deformation from the geological and geodetic perspectives. Topics include tectonic geomorphology, paleoseismology, Quaternary dating, tectonic geodesy, numerical models of faults, and earthquake hazard assessment.

**Credit Hours:** 3

**Prerequisites:** GEOL 3650 or GEOL 4650

---

**GEOL 7700: Theoretical Geochemistry**

Introduction to theoretical concepts in low and high temperature geochemistry. Topics include thermodynamics of fluids, gases and solids in geological materials, phase diagrams, equilibrium constants, electrolyte theory, oxidation-reduction reactions.

**Credit Hours:** 3

**Prerequisites:** GEOL 3250, CHEM 1330 and MATH 1700

---

**GEOL 7750: Microanalysis for Geological Sciences**

(cross-leveled with GEOL 4750). This course is intended to provide a working knowledge of electron and X-ray microbeam analytical instruments - both in principle and in practice. Lectures will focus on the physics of how these instruments collect data, and how these data can be interpreted. In addition, students will gain hands-on experience with operating these instruments, specifically on their own samples, as well as preparing their samples for microanalysis and interpreting/manipulating the resulting data. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Instructor's consent (Instrument time is limited; graduate students who will use the instruments in their research will have priority)

---

**GEOL 7800: Introduction to Geophysics**

(cross-leveled with GEOL 4800). Introduction to the fundamentals of geophysical methods and their applications in geology, environmental studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods.

**Credit Hours:** 3

**Prerequisites:** GEOL 1100 or GEOL 2130 or GEOL 1200 and MATH 1700 or instructor's consent

---

**GEOL 7990: Research in Geological Sciences-Masters**

Does not lead to dissertation.

**Credit Hour:** 1-8

---

**GEOL 8002: Topics in Geological Sciences**

Organized study of selected topics. May be repeated with departmental consent.

**Credit Hour:** 1-99

**Prerequisites:** PhD standing, instructor's consent

---

**GEOL 8050: Research in Geological Sciences-Masters Non-Thesis**

Research leading to a non-thesis Masters project. Graded on S/U basis only.

**Credit Hour:** 1-3

---

**GEOL 8085: Problems in Geological Sciences**

**Credit Hour:** 1-8

**Prerequisites:** instructor's consent

---

**GEOL 8090: Research in Geological Sciences-Masters Thesis**

Preparation of dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

**GEOL 8100: Continental Tectonics**

The structural, metamorphic, and igneous evolution of mountain belts and continental rifts with emphasis on convergent margin settings and terrane accretion processes and products. Case studies are considered from the Precambrian to the recent.

**Credit Hours:** 3

**Prerequisites:** GEOL 3650 and GEOL 4900

---

**GEOL 8140: Metamorphic Petrology**

Petrography and petrology of metamorphic rocks. Emphasis on textures, mineral assemblages, and mineral chemistry in order to determine the physico-chemical condition of metamorphism.

**Credit Hours:** 3

**Prerequisites:** GEOL 3250 and GEOL 4900

---

**GEOL 8150: Earthquake Seismology**

Theory and techniques used in analyzing earthquake seismograms and seismicity data. Ray theory and phase identification for the whole earth. Epicenter determination. Frequency-magnitude relationships. Earthquake source mechanisms and parameters.

**Credit Hours:** 3

**Prerequisites:** GEOL 8320

---

**GEOL 8160: Igneous Petrology**

Studies of the origin and evolution of magmas with use of phase equilibria, physical properties, and kinetics.

**Credit Hours:** 3

**Prerequisites:** GEOL 3250 and GEOL 4900

---

**GEOL 8170: Radiogenic Isotope Geochemistry**

Studies of the application of trace element and radiogenic isotope systematics to petrogenesis of rocks.

**Credit Hours:** 3

**Prerequisites:** GEOL 4900

---

**GEOL 8190: Advanced Paleontology**

Principles of taxonomy, biostratigraphy, functional morphology and paleoecology are illustrated by individual projects that combine field collecting, laboratory examination and literature research.

**Credit Hours:** 3

**Prerequisites:** GEOL 3550

---

**GEOL 8200: Advanced Structural Geology**

Advanced analysis of deformation structures in rocks. Theory and techniques of stress and strain analysis and their application to the mechanics of formation of faults, folds, shear zones, and rock fabric. Techniques of multideformation structural analysis.

**Credit Hours:** 3

**Prerequisites:** GEOL 3650

---

**GEOL 8240: Hydrogeologic Processes**

Quantitative analysis of role of groundwater in major geologic processes. Theory review of fluid flow, heat transport, reactive solute transport in porous media. Applications to sedimentary diagenesis, hydrothermal ore deposits, petroleum migration, earthquakes, magmatism, metamorphism.

**Credit Hours:** 3

**Prerequisites:** GEOL 4100 or GEOL 7100 or equivalent

---

**GEOL 8300: Precambrian History**

Coupled evolution of the biosphere, lithosphere, hydrosphere, and atmosphere over the span of Precambrian history. Topics will be discussed largely in the context of biological evolutionary events and the fossil record, as well as with a focus on geochemical records.

**Credit Hours:** 3

---

**GEOL 8320: Introduction to Seismology**

Principles of wave propagation in layered elastic media. Applications of digital signal processing to seismological problems. Emphasis on theoretical basis behind modern analysis techniques.

**Credit Hours:** 3

**Prerequisites:** PHYSICS 2760, MATH 4500 and CMP\_SC 1050

---

**GEOL 8400: Ancient Greenhouse Climate**

Will explore a wide range of data concerning greenhouse climates and different techniques used in paleoclimatology. Graded on A/F basis only.

**Credit Hours:** 3

**Prerequisites:** GEOL 3800, GEOL 3550 and GEOL 4300

---

**GEOL 8450: Tectonics and Sedimentation**

Global survey of modern and ancient convergent plate boundaries with an emphasis on sedimentary facies and structural styles.

**Credit Hours:** 3

**Prerequisites:** GEOL 3650, GEOL 3800 and instructor's consent

---

**GEOL 8510: Geodynamics**

This course is designed to cover the fundamentals of the quantitative aspects of Plate Tectonics. The study of these subjects is generally referred to as Geodynamics or Geodynamic Theory. This theory revolutionized the earth sciences and the way people think of earth processes. By definition Geodynamics is an interdisciplinary paradigm therefore it is necessary to cover a wide range of topics from heat transfer to gravity. This course will overlap with subjects covered in both Plate Tectonics and Geophysics but we will emphasize the quantitative aspects of this theory in this course.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSICS 2760

---

**GEOL 8550: Stable Isotope Geochemistry**

Mechanisms and fundamental concepts of fractionation of light stable isotopes in nature. Emphasizes application of hydrogen, carbon, oxygen and sulfur isotopes to igneous, metamorphic and sedimentary rocks, metallic ore deposits, and to natural waters.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**GEOL 8650: Thermal Processes in the Solid Earth**

Principles of heat transfer in solid earth by conduction, advection and convection. Basic analytic and numerical solutions. Application in Earth's dynamic system, environmental sciences, and geological problems.

**Credit Hours:** 3

**Prerequisites:** MATH 1700, PHYSICS 1220 or PHYSICS 2750

---

**GEOL 8750: Silicate Glasses, Liquids and Magmas**

Theory of silicate liquid viscosity, heat capacity and configurational entropy, emphasizing the role of volatile components. Applications to magma rheology and eruptive behavior. Lab instruction in viscometry techniques.

**Credit Hours:** 3

**Prerequisites:** GEOL 4900 and GEOL 4700, or instructor's consent

---

**GEOL 8800: Applied Numerical Analysis**

A study of applied mathematical analysis of spatial and temporal data as applied in the geosciences.

**Credit Hours:** 3

**Prerequisites:** MATH 1700 or MATH 2300, PHYSICS 1220 or PHYSICS 2760

---

**GEOL 8990: Research**

Does not lead to dissertation.

**Credit Hour:** 1-8

---

**GEOL 9090: Research in Geological Sciences-Doctoral Dissertation**

Preparation of dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

---

## German Courses

### GERMAN 1100: Elementary German I

For beginners with no prior knowledge of German. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication--oral and listening skills, reading and writing.

**Credit Hours:** 5

---

### GERMAN 1100H: Elementary German I - Honors

This course is designed for Honors students with little or no German language background and will provide students with a foundation in vocabulary and grammar in order to develop communication proficiency in German. Students will be trained using the five skills: listening, speaking, writing, reading and cultural knowledge. The course will be taught as a total immersion class and thus differs from the standard elementary German sequence. Furthermore, students will be required to complete lengthier reading and writing tasks as well as present a final oral multimedia project at the end of the semester.

**Credit Hours:** 5

**Prerequisites:** Honors eligibility required

---

### GERMAN 1150: Freshman Introduction to German Studies

Introduction to German Studies as academic field. Small seminar setting with senior faculty, their favorite texts, and questions pursued in the research and teaching. Recommended for all students interested in integrating German studies into their academic career, conducted in English.

**Credit Hour:** 1

**Prerequisites:** Restricted to Freshman students only

---

### GERMAN 1200: Elementary German II

A continuation of GERMAN 1100. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing.

**Credit Hours:** 5

**Recommended:** C- or better in GERMAN 1100, or equivalent

---

### GERMAN 1200H: Elementary German II - Honors

This course is designed for Honors students who either took the GERMAN 1100H section or are placing into GERMAN 1200 as honors eligible students. The main focus of this course is on further development of basic communication skills in speaking, listening, reading, and writing in German adding more nuanced cultural and sociolinguistic competencies in a total immersion environment.

**Credit Hours:** 5

**Prerequisites:** Honors eligibility required

---

### GERMAN 2001: Undergraduate Topics in German-General

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

**Credit Hour:** 1-3

---

### GERMAN 2005: Undergraduate Topics in German-Humanities

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.

**Credit Hour:** 1-3

---

### GERMAN 2005W: Undergraduate Topics in German-Humanities - Writing Intensive

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.

**Credit Hour:** 1-3

---

### GERMAN 2100: Intermediate German I

A continuation of GERMAN 1200. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing.

**Credit Hours:** 3

**Recommended:** C- or better in GERMAN 1200, or equivalent

---

### GERMAN 2260: Intermediate German II: Language and Culture

This course continues to help learners develop the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.

**Credit Hours:** 3

**Recommended:** C- in GERMAN 2100 or equivalent

---

### GERMAN 2310: German Civilization: Beginning to 1850

Major historical, social, artistic, literary themes from beginnings to end of Revolution of 1848. Films and recordings. May be taken independently of GERMAN 2320. No foreign language credit. Some sections may enforce prerequisite of ENGLISH 1000.

**Credit Hours:** 3

---

### GERMAN 2310W: German Civilization: Beginning to 1850 - Writing Intensive

Major historical, social, artistic, literary themes from beginnings to end of Revolution of 1848. Films and recordings. May be taken independently of GERMAN 2320. No foreign language credit. Some sections may enforce prerequisite of ENGLISH 1000.

**Credit Hours:** 3

---

### GERMAN 2320: German Civilization: 1850 to Present

Second Empire, Weimar Republic, Nazi era, two Germanies after 1949. Historical, social, artistic, literary themes. Films and recordings. May be taken independently of GERMAN 2310. No foreign language credit.

**Credit Hours:** 3

**Prerequisites:** some sections may enforce prerequisite of ENGLISH 1000

---

---

**GERMAN 2320W: German Civilization: 1850 to Present - Writing Intensive**

Second Empire, Weimar Republic, Nazi era, two Germanies after 1949. Historical, social, artistic, literary themes. Films and recordings. May be taken independently of GERMAN 2310. No foreign language credit.

**Credit Hours:** 3

**Prerequisites:** some sections may enforce prerequisite of ENGLSH 1000

---

**GERMAN 2820: Trends in World Cinema**

(same as FILMS\_VS 2820 and RM\_LAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.

**Credit Hours:** 3

**Prerequisites:** sophomore standing, ENGLSH 1800 or FILM\_S 1800 or instructor's consent

---

**GERMAN 3001: Topics in German-General**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** sophomore standing

---

**GERMAN 3005: Topics in German-Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** sophomore standing

---

**GERMAN 3160: German Conversation and Composition**

This course expands communicative competence in German and provides a review of advanced grammar concepts. Primary emphasis is on the further development of oral and written skills, reading comprehension, vocabulary expansion, and a broad exposure to relevant topics of contemporary German culture and society. Conducted in German.

**Credit Hours:** 3

**Prerequisites:** GERMAN 2260 or equivalent

---

**GERMAN 3180: Business German**

Examines language within the economic and professional context of German-speaking countries. Introduces different economic concepts of Germany's turbulent 20th century, modern-day business systems and everyday commercial activities such as job applications, professional routines, capital investment and banking. Provides students with vocabulary, cultural knowledge and communicative abilities in order to participate in the professional German-speaking world using linguistically-solid and stylistically-persuasive writing and speaking skills.

**Credit Hours:** 3

**Prerequisites:** GERMAN 2260 or equivalent

---

**GERMAN 3190: Contemporary German Culture**

This content-driven course provides insights into essential subjects of 20th century German history and contemporary society, using a variety of literature, journalistic sources and film. The course will improve German conversation and literacy skills, and will strengthen critical reading and writing, as well as interpretative abilities. Significant grammatical concepts will be thoroughly reviewed throughout the semester. Conducted in German.

**Credit Hours:** 3

**Prerequisites:** GERMAN 2260 or instructor's consent

---

**GERMAN 3230: Introduction to German Literature**

This course introduces students to German-language literary texts, images, and films in their cultural and historical context through exposure to major genres (poetry, drama, short stories, and the novel). It further builds their vocabulary and teaches them critical interpretive skills as preparation for the analysis of literary texts in upper-division courses - and in life.

**Credit Hours:** 3

**Prerequisites:** C- or better in either GERMAN 3160 or GERMAN 3190

---

**GERMAN 3320: Readings in German Literature**

Readings in English of selected works of German literature from Goethe to the present, with a particular emphasis on writers and texts that have had a strong influence on European thought and culture.

**Credit Hours:** 3

**Prerequisites:** sophomore standing, ENGLSH 1000

---

**GERMAN 3510: Think Global: Fundamentals of Globalization and Digital Technologies**

(same as PEA\_ST 3510, JOURN 3510, T\_A\_M 3010, DST\_VS 3510). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or instructor's consent

---

**GERMAN 3510H: Think Global: Fundamentals of Globalization and Digital Technologies - Honors**

(same as JOURN 3510H, PEA\_ST 3510H, T\_A\_M 3010H, DST\_VS 3510H). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent. Honors eligibility required

---

---

**GERMAN 3510HW: Think Global: Fundamentals of Globalization and Digital Technologies - Honors/Writing Intensive**

(same as JOURN 3510HW, T\_A\_M 3010HW, PEA\_ST 3510HW, DST\_VS 3510HW). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent. Honors eligibility required

---

**GERMAN 3510W: Think Global: Fundamentals of Globalization and Digital Technologies - Writing Intensive**

(same as T\_A\_M 3010W, PEA\_ST 3510W, JOURN 3510W, DST\_VS 3510W). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or instructor's consent

---

**GERMAN 3520: Folk and Fairytales in a Global Context**

Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**GERMAN 3520H: Folk and Fairytales in a Global Context - Honors**

Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required. Honors eligibility required

---

**GERMAN 3520HW: Folk and Fairytales in a Global Context - Honors/Writing Intensive**

Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required. Honors eligibility required

---

**GERMAN 3520W: Folk and Fairytales in a Global Context - Writing Intensive**

Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**GERMAN 3550: Resistance is Futile: The Advance of the Cyborg**

Contemporary culture is haunted by the image of artificial killing machine as metaphor for technology run rampant. Fears may be prompted by feelings of alienation in automated society and underlying suspicion that humans may be nothing more than sophisticated machines. Course maps history of 'l'homme machine, focusing on fictional representation of creatures that consist of both human and technological 'parts.' Goal is to discern source of fascination and sociopolitical mechanism behind evocation of 'human machine.'

**Credit Hours:** 3

**Prerequisites:** Sophomore standing or consent of instructor

---

**GERMAN 3605: The History of Blacks in Germany**

(same as BL\_STU 3605). This course investigates the history of Africans and African Americans in Germany and Central Europe, from Antiquity to today. Special focus on Medieval Africans in Europe, traveling African American intellectuals around 1900, and African American GIs in occupied Germany. This course will challenge your understanding of race and racism.

**Credit Hours:** 3

---

**GERMAN 3605H: The History of Blacks in Germany - Honors**  
(same as BL\_STU 3605). This course investigates the history of Africans and African Americans in Germany and Central Europe, from Antiquity to today. Special focus on Medieval Africans in Europe, traveling African American intellectuals around 1900, and African American GIs in occupied Germany. This course will challenge your understanding of race and racism.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**GERMAN 3830: History of the German Film**  
(same as FILMS\_VS 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit.

**Credit Hours:** 3

**Prerequisites:** sophomore standing or instructor's consent

---

**GERMAN 3865: The Holocaust on Screen**  
(same as FILMS\_VS 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**GERMAN 3895: Service Learning in German Studies**  
Service learning offers students a chance to put into practice what they have learned in theory. Students work as teacher-aids or tutors in foreign language/culture classes at area schools. Does not meet Arts and Science foundation requirements. Graded on S/U basis only.

**Credit Hours:** 2

**Prerequisites:** GERMAN 2260, or instructor's consent

---

**GERMAN 4001: Topics in German-General**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** junior standing

---

**GERMAN 4005: Topics in German-Humanities**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** junior standing

---

**GERMAN 4005H: Topics in German-Humanities - Honors**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** junior standing and instructor's consent. Honors eligibility required

---

**GERMAN 4005W: Topics in German-Humanities - Writing Intensive**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

**Recommended:** junior standing

---

**GERMAN 4070: Intensive Beginning German**  
Designed to lead to a reading knowledge of German.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

---

**GERMAN 4160: Advanced Language Proficiency**  
(cross-leveled with GERMAN 7160). A course for intermediate to advanced students of German. This course helps learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.

**Credit Hours:** 3

**Prerequisites:** GERMAN 3230 or equivalent

---

**GERMAN 4220: Eerie Tales: Classic German Narratives**  
In this class, we will read classic uncanny tales in German by major authors, and will explore the traits of this category across a variety of literary movements.

**Credit Hours:** 3

**Prerequisites:** GERMAN 3230 or equivalent language capacity

---

**GERMAN 4230: Enlightenment and Revolution**  
Reading and discussion of selected works by major German writers from 1740 to 1870.

**Credit Hours:** 3

**Prerequisites:** GERMAN 3230 or equivalent

---

**GERMAN 4240: Modernism and Modernity**  
Reading and discussion of selected works by major German writers from 1870 to the present.

**Credit Hours:** 3

**Prerequisites:** GERMAN 3230 or equivalent

---

**GERMAN 4260: Recent German Literature**  
This course examines 'post-unification' works (i.e. by formerly East and West German authors) of literature and film written since 1989 that addresses social and political changes leading to or resulting from unification and the experience of WWII. Students will analyze the

diverse cultural, political and economic factors that influence writers and filmmakers whose aesthetic production in turn helps shape contemporary German society.

**Credit Hours:** 3

**Prerequisites:** GERMAN 3230

---

**GERMAN 4730: German Internship and Methods**

(cross-leveled with GERMAN 7730). Supervised introduction to the methodology of the teaching of elementary German; conducted in a classroom environment.

**Credit Hours:** 3

**Prerequisites:** junior standing, GERMAN 4230, or instructor's consent

---

**GERMAN 4810: Case Studies in an Inter/Multicultural World**

(same as T\_A\_M 4810, PEA\_ST 4810, DST\_VS 4805). This inter-departmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent

---

**GERMAN 4820: Blogging the World: The Web in Cultural Context**

(same as FRENCH 4820 and RUSS 4820; cross-leveled GERMAN 7820, FRENCH 7820, RUSS 7820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**GERMAN 4820W: Blogging the World: The Web in Cultural Context - Writing Intensive**

(same as FRENCH 4820 and RUSS 4820; cross-leveled with GERMAN 7820, FRENCH 7820, RUSS 7820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. **Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**GERMAN 4840: Totalitarianism and Culture**

(same as RUSS 4840; cross-leveled with GERMAN 7840, RUSS 7840). In this course, we will explore the politics and poetics of totalitarian culture by examining the paintings, music, sculptures, buildings, and films produced under the rule of these regimes. In the process, we will learn how Nazi and Soviet culture producers made carefully calibrated appeals to their respective mass audiences, drawing upon the German and Russian cultural traditions - and on scientific rhetorics of cultural history and racial destiny - in crafting their utopian visions of worlds transformed, wrongs righted, and societies perfected.

**Credit Hours:** 3

**Recommended:** Junior standing or above; students taking this course for WI should have taken a 2000- or 3000-level WI course before beginning this class

---

**GERMAN 4840H: Totalitarianism and Culture - Honors**

(same as RUSS 4840H; cross-leveled with GERMAN 7840, RUSS 7840). In this course, we will explore the politics and poetics of totalitarian culture by examining the paintings, music, sculptures, buildings, and films produced under the rule of these regimes. In the process, we will learn how Nazi and Soviet culture producers made carefully calibrated appeals to their respective mass audiences, drawing upon the German and Russian cultural traditions - and on scientific rhetorics of cultural history and racial destiny - in crafting their utopian visions of worlds transformed, wrongs righted, and societies perfected.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

**Recommended:** Junior standing or above; students taking this course for WI should have taken a 2000- or 3000-level WI course before beginning this class

---

**GERMAN 4840HW: Totalitarianism and Culture - Honors/Writing Intensive**

(same as RUSS 4840HW; cross-leveled with GERMAN 7840, RUSS 7840). In this course, we will explore the politics and poetics of totalitarian culture by examining the paintings, music, sculptures, buildings, and films produced under the rule of these regimes. In the process, we will learn how Nazi and Soviet culture producers made carefully calibrated appeals to their respective mass audiences, drawing upon the German and Russian cultural traditions - and on scientific rhetorics of cultural history and racial destiny - in crafting their utopian visions of worlds transformed, wrongs righted, and societies perfected.

**Credit Hours:** 3

---

**GERMAN 4850: Revolution and Media in a Global Perspective** (same as RUSS 4850; cross-leveled with RUSS 7850). This course offers a historical and global survey of the rise of modern revolution, from France to Haiti to Russia to the Black Power movement and beyond. Drawing on media studies and cultural studies, we will explore how revolutions are tied up in specific medial environments. This entails asking how media spread revolution, whether in print and visual culture, in the broadcast media of the twentieth century, or in the digital landscapes of the twenty-first century, and how revolutions can be understood themselves as media events. In the process students will develop a critical vocabulary for discussing the role of media in political and cultural revolution and counter-revolution in a global perspective. Graded on A-F basis only.

**Credit Hours:** 3

---

**GERMAN 4960: Special Readings in German**  
Independent study through readings, conferences, and reports.

**Credit Hour:** 1-3  
**Prerequisites:** instructor's consent  
**Recommended:** junior standing

---

**GERMAN 4980: German Capstone Seminar** (cross-leveled with GERMAN 7980). Required of all senior German majors; usually taken in the senior year. Focuses on contemporary Germany and brings together aspects of German literature and culture studies during the degree program.

**Credit Hours:** 3  
**Prerequisites:** senior standing or departmental consent

---

**GERMAN 7001: Topics in German-General**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-3

---

**GERMAN 7005: Topics in German - Humanities**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-99

---

**GERMAN 7070: Intensive Beginning German**  
This course is primarily designed for graduate students seeking reading knowledge of German. It is conducted in English and consequently students do not learn how to speak or write German as they typically do in language acquisition classes. The focus instead lies on grammar, vocabulary building, and translation. No previous familiarity with German is expected, but by the end of the course students will ideally be able to understand the basic gist of scholarly texts in their respective disciplines. Graded on A-F basis only.

**Credit Hours:** 3

---

**GERMAN 7085: Problems in German**  
**Credit Hour:** 1-3  
**Prerequisites:** chairman's consent

---

**GERMAN 7160: German Conversation and Composition III** (cross-leveled with GERMAN 4160). A course for intermediate to advanced students of German. This course helps learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.

**Credit Hours:** 3  
**Prerequisites:** GERMAN 3230 or equivalent

---

**GERMAN 7650: Faust** (cross-leveled with GERMAN 4650). Faust.

**Credit Hours:** 3  
**Prerequisites:** GERMAN 4230 or equivalent

---

**GERMAN 7670: Medieval German Literature 1170-1210** (cross-leveled with GERMAN 4670). Analysis of major narrative and lyric poetry of the Age of Chivalry.

**Credit Hours:** 3  
**Prerequisites:** GERMAN 4230 or equivalent

---

**GERMAN 7730: German Internship and Methods** (cross-leveled with GERMAN 4730). Supervised introduction to the methodology of the teaching of elementary German; conducted in a classroom environment.

**Credit Hours:** 3  
**Prerequisites:** GERMAN 4230 or equivalent, or instructor's consent

---

**GERMAN 7960: Special Readings in German**

Independent study through readings, conferences, and reports.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**GERMAN 7980: German Capstone Seminar**

(cross-leveled with GERMAN 4980). Focuses on contemporary Germany and brings together aspects of German literature and culture studies during the degree program.

**Credit Hours:** 3

**Prerequisites:** one 3000-level literature course or equivalent, or instructor's consent

---

**GERMAN 8005: Topics in German - Humanities**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 1-99

---

**GERMAN 8050: Research in German**

Translations or creative work not leading to thesis. Credit hours arranged.

**Credit Hour:** 1-3

---

**GERMAN 8085: Problems in German**

**Credit Hour:** 1-3

**Prerequisites:** chairman's consent

---

**GERMAN 8087: Seminar in German**

Course content varies.

**Credit Hours:** 3

---

**GERMAN 8090: Research in German**

Graded on S/U basis only.

**Credit Hour:** 1-3

**Prerequisites:** graduate director's consent

---

## Graduate School Courses

**GRAD 4000: Supporting Your Professional Goals**

(Cross-Listed with GRAD 7000). This course will help you set professional goals and gain knowledge and skills by participating a series of professional development workshops to help you meet those goals.

**Credit Hour:** 1

---

**GRAD 4010: Preparing To Be A Graduate Teaching Assistant**

Provides an understanding of the roles and responsibilities of teaching assistants to prepare students for graduate school. Learning will take place through observation, lecture, reading and discussion. Graded on S/U basis only.

**Credit Hour:** 1

---

**GRAD 7000: Supporting Your Professional Goals**

(Cross-Listed with GRAD 4000). This course will help you set professional goals and gain knowledge and skills by participating a series of professional development workshops to help you meet those goals.

**Credit Hour:** 1

---

**GRAD 7302: Tools for Teaching American Students**

Emphasis on advanced academic listening, discrete pronunciation skills, techniques for laboratory teaching and one-to-one interactions. Integrated with a general overview of American classroom culture.

**Credit Hours:** 4

---

**GRAD 7303: Communication and Culture for American College Teaching**

This class will focus on the linguistic aspects of teaching, as well as specific pedagogical; and cultural aspects of the American classroom. It will emphasize fluency development at the suprasegmental level, and interactive teaching skills, like organizational, questioning and compensation strategies.

**Credit Hours:** 4

---

**GRAD 9001: Topics in Graduate School**

Organized study of selected professional and career development topics. Subjects and course credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** instructor's and academic advisor's consent

---

**GRAD 9010: Preparing Future Faculty I**

First course in a two-semester Preparing Future Faculty program that introduces Ph.D. students to a variety of faculty roles and work environments. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** instructor's consent

---

**GRAD 9020: Preparing Future Faculty II**

Second course in a two-semester Preparing Future Faculty program that introduces Ph.D. students to a variety of faculty roles and work environments. Topics build upon those presented in GRAD 9010 and focus on the job search and career development processes. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** GRAD 9010

---

#### **GRAD 9050: Preparing Future Professionals for Post-Graduate Studies Careers**

Specialized leadership and transferable skills course that helps students recognize their potential and versatility for careers within and beyond the academy. Beyond leadership theory, the course is framed by 4 competency areas: 1) Analytic competencies; 2) Personal competencies; 3) Communication competencies and 4) Organizational competencies. Learning is enhanced with short text readings and videos in the course management system. Guest speakers. To pass the course, students must attend class; complete a self-assessment; complete an informational interview or job shadow with a leader of choice; and submit 3 short assignments including an Individual Development Plan with goals. Graded on S/U basis only.

**Credit Hour:** 1

---

#### **GRAD 9072: Science Policy and Public Engagement**

It is important the STEM professionals to understand the intersections between science, politics, and society to understand how the decisions that affect them are made. Junior scholars who understand the goals and implications of publicly funded science will likely have an advantage when seeking jobs and funding. This program also will explore numerous careers in the science policy realm.

**Credit Hours:** 3

---

#### **GRAD 9080: Essentials for Public Engagement**

This course will focus on understanding the role of scholarship and research in society and how to integrate public needs with research, ways to the public engages with scholarly research and how researchers can effectively engage individuals and groups. Topics covered include: different types of public engagement, public policy, ethics, broader impacts of research, extension education, public communication, theoretical rationale for engagement, historical trends in public engagement.

**Credit Hour:** 1

---

#### **GRAD 9082: Science Policy and Public Engagement**

It is important the STEM professionals to understand the intersections between science, politics, and society to understand how the decisions that affect them are made. Junior scholars who understand the goals and implications of publicly funded science will likely have an advantage when seeking jobs and funding. This program also will explore numerous careers in the science policy realm.

**Credit Hour:** 1

---

#### **GRAD 9304: Instructional and Communication Strategies for Effective College Teaching**

This class will focus on teaching and presentation strategies such as lesson design, using case studies and problem based learning, interactive learning, and classroom and course management. The linguistic emphasis will be on reduction, linking and speech patterns as well as pragmatic issues of organizing, clarifying and emphasizing ideas. Requires an MU Oral Language Proficiency Assessment score of 3 and course consent. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** ITAP language level 3P or GRAD 7303 and level 2; consent required

---

## **Grammar (Intensive English Program) Courses**

### **IEPG \_0001: Grammar with Writing I**

Students will learn to recognize and use basic grammatical structures. Students will use these structures to produce basic sentences and short paragraphs on topics from daily life. Not open to native speakers of English. No college credit.

**Credit Hours:** 3

**Prerequisites:** must be admitted to the IEP program and placed into the course by the IEP; consent of department required

---

### **IEPG \_0002: Grammar II**

Students will learn low-intermediate grammatical structures including modals, simple and progressive verb tenses, and expressions of quantity. Not open to native speakers of English. No college credit.

**Credit Hours:** 3

**Prerequisites:** must be admitted to the IEP program and placed into the course by the IEP; consent of department required

---

### **IEPG \_0030: Grammar for Academic Purposes III**

Students will learn intermediate grammatical structures including present perfect tense, simple gerunds and infinitives, comparatives and superlatives, and restrictive adjective clauses. Not open to native speakers of English. No college credit.

**Credit Hours:** 3

**Prerequisites:** must be admitted to the IEP program and placed into the course by the IEP; consent of department required

---

### **IEPG \_0040: Grammar for Academic Purposes IV**

Students will learn high-intermediate grammatical structures including past perfect tense, passive voice, noun clauses, adjective clauses, and adverb clauses. Not open to native speakers of English. No college credit.

**Credit Hours:** 3

**Prerequisites:** must be admitted to the IEP program and placed into the course by the IEP; consent of department required

---

### **IEPG \_0050: Grammar for Academic Purposes V**

Students will learn advanced grammatical structures including passive and perfect modals, passive gerunds and infinitives, conditionals, and reported speech. Not open to native speakers of English. No college credit.

**Credit Hours:** 3

**Prerequisites:** must be admitted to the IEP program and placed into the course by the IEP; consent of department required

---

## **Greek Courses**

### **GREEK 1100: Elementary Ancient Greek I**

Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

---

**Credit Hours:** 4

---

**GREEK 1100H: Elementary Ancient Greek I - Honors**

Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

**Credit Hours:** 4

**Prerequisites:** Honors eligibility required

---

**GREEK 1200: Elementary Ancient Greek II**

Continuation of GREEK 1100. Readings in Attic prose.

**Credit Hours:** 4

**Prerequisites:** GREEK 1100

---

**GREEK 1200H: Elementary Ancient Greek II - Honors**

Continuation of GREEK 1100H. Readings in Attic prose.

**Credit Hours:** 4

**Prerequisites:** GREEK 1100, Honors eligibility required

---

**GREEK 2000: Greek Reading**

Selected works of Greek literature.

**Credit Hours:** 3

**Prerequisites:** GREEK 1200

---

**GREEK 2000H: Greek Reading - Honors**

Selected works of Greek literature.

**Credit Hours:** 3

**Prerequisites:** GREEK 1200, Honors eligibility required

---

**GREEK 4300: Intermediate Readings**

Selected advanced readings in prose and poetry. Introduction to Homer.

**Credit Hours:** 3

**Prerequisites:** GREEK 2000

---

**GREEK 4300H: Intermediate Readings - Honors**

Selected advanced readings in prose and poetry. Introduction to Homer.

**Credit Hours:** 3

**Prerequisites:** GREEK 2000; honors eligibility required

---

**GREEK 4500: Greek Stylistics**

(cross-leveled with GREEK 7500). Study and practice of Greek prose, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4510: Greek Tragedy**

(cross-leveled with GREEK 7510). Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4520: Greek Comedy**

(cross-leveled with GREEK 7520). Selected plays of Aristophanes and Menander, with special attention to cultural contexts.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4530: Greek Lyric Poetry**

(cross-leveled with GREEK 7530). Selected readings from lyric poets, with attention to verse forms, and dialects.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4540: Greek Oratory**

(cross-leveled with GREEK 7540). Selections from Greek orators, with emphasis on Lysias and Demosthenes.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4560: Greek Historians**

(cross-leveled with GREEK 7560). Reading and analysis of selected texts of major Greek historians.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4700: Survey of Greek Literature**

(cross-leveled with GREEK 7700). Greek literature from origins to end of Roman period; emphasis on authors not covered in other courses, to provide general view of styles and genres.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 4960: Special Readings in Greek**

Readings in authors and texts not covered in other courses.

**Credit Hours:** 3

**Recommended:** GREEK 4300

---

**GREEK 7300: Intermediate Readings in Greek**

Selected advanced readings in prose and poetry. Introduction to Homer.

**Credit Hours:** 3

**Prerequisites:** GREEK 2000 or equivalent. Available to students for graduate credit in departments other than Classical Studies

---

**GREEK 7500: Greek Stylistics**

(cross-leveled with GREEK 4500). Study and practice of general Greek prose tendencies, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.

**Credit Hours:** 3

---

**GREEK 7510: Greek Tragedy**

(cross-leveled with GREEK 4510). Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques.

---

**Credit Hours:** 3

**Prerequisites:** wo years Classical Greek or equivalent

---

**GREEK 7520: Greek Comedy**

(cross-leveled with GREEK 4520). Selected plays of Aristophanes and Menander, with special attention to cultural contexts.

**Credit Hours:** 3

**Prerequisites:** two years Classical Greek or equivalent

---

**GREEK 7530: Greek Lyric Poetry**

(cross-leveled with GREEK 4530). Selected readings from lyric poets, with attention to verse forms, and dialects.

**Credit Hours:** 3

**Prerequisites:** two years Classical Greek or equivalent

---

**GREEK 7540: Greek Oratory**

(cross-leveled with GREEK 7530). Selections from Greek orators, with emphasis on Lysias and Demosthenes.

**Credit Hours:** 3

**Prerequisites:** two years Classical Greek or equivalent

---

**GREEK 7560: Greek Historians**

(cross-leveled with GREEK 7560). Reading and analysis of selected texts of major Greek historians.

**Credit Hours:** 3

**Prerequisites:** two years Classical Greek or equivalent

---

**GREEK 7700: Survey of Greek Literature**

(cross-leveled with GREEK 4700). Greek literature from origins to end of Roman period; emphasis on authors not covered in other courses, to provide general view of styles and genres.

**Credit Hours:** 3

**Prerequisites:** two years Classical Greek or equivalent

---

**GREEK 7960: Special Readings in Greek**

Readings in authors and texts not covered in other courses.

**Credit Hour:** 1-3

**Prerequisites:** departmental consent and two years Classical Greek or equivalent

---

**GREEK 8000: Proseminar in Greek Texts**

This is a seminar-level introduction to Greek literary and historical texts. The emphasis in this course will be on wide and intensive reading, with the objective of helping the new graduate student quickly develop a sound literary and linguistic competence.

**Credit Hours:** 3

---

**GREEK 8010: Greek Rough Guide**

Intensive exploration of Greek Literature from its earliest appearance through the Roman period. Emphasis upon texts as both literary and cultural artifacts whose interpretation requires familiarity with the historical and archaeological legacy of antiquity as well as modern exegetical strategies. Graded on A-F basis only.

**Credit Hours:** 3

**GREEK 9287: Seminar in Greek Drama**

May be repeated to a maximum of 6 hours.

**Credit Hours:** 3

---

**GREEK 9487: Seminar in the Greek Philosophers**

Seminar in the Greek Philosophers.

**Credit Hours:** 3

---

**GREEK 9887: Seminar in Special Fields**

Seminar in Special Fields.

**Credit Hours:** 3

---

## Health and Rehabilitation Science Courses

**HR\_SCI 8001: Topics in Health and Rehabilitation Science**

Organized study of selected topics in health and/or healthcare. Topic and credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**HR\_SCI 8085: Problems in Health and Rehabilitation Science**

Individual study not leading to thesis or dissertation.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**HR\_SCI 8440: Health and Rehabilitation Science I**

This course focuses on major methods and techniques of research in disciplines within Health and Rehabilitation Science. It is primarily intended for students in the Health and Rehabilitation Science doctoral program.

**Credit Hour:** 2-3

**Prerequisites:** Graduate standing within the Health and Rehabilitation Science program or permission from the instructor

---

**HR\_SCI 8442: Health and Rehabilitation Science II**

This course focuses on major methods and techniques of research in disciplines within Health and Rehabilitation Science. It is primarily intended for students in the Health and Rehabilitation Science doctoral program.

**Credit Hour:** 2-3

**Prerequisites:** Graduate standing within the Health and Rehabilitation Science program or permission from the instructor. Completion of HR\_SCI 8440

---

## Health Management and Informatics Courses

**HMI 4420: Fundamentals of Bioinformatics**

(cross-leveled with HMI 7420). The purpose of this course is to provide perspective on the fundamentals of exploration of biological knowledge using computers. As technologies such as microarray, sequencing, and biomarkers become more pervasive, they are impacting not only the development of science, but also domains such as health care, nutrition, and ethics. This course provides a description of fundamental bioinformatics concepts such as sequencing, proteomics, metabolomics,

and biological pathways, and illustrates them with short informatics experiments. Mainly online resources will be used, so no programming is necessary. Also, the course includes a short primer of molecular biology, so background in molecular biology is not required.

**Credit Hours:** 3

**Prerequisites:** Departmental consent required

---

#### **HMI 4440: Health Information Technology**

(cross-leveled with HMI 7440). In this course, the student will learn 1) The Python programming language and how to use it for biomedical applications 2) the SQL database language and how to design and operate a database, and 3) HTML and javascript languages and how to design a web application. Applications will be healthcare focused.

**Credit Hours:** 3

**Prerequisites:** Departmental consent required

---

#### **HMI 7410: Introduction to the US Health Care System**

This is a survey course about the American health system, meant to provide a conceptual foundation for students to think critically about the US health system and to build upon in their future related courses. It includes concepts and language in health care, public health, and personal health and provides an understanding of how these domains of health interrelate. Particular focus is given to health care delivery, including how health care services are organized, delivered, paid for, and measured. Selected key, forward-looking issues are covered. The roles of management, leadership, and physicians are highlighted. A resource bank and regular flow of good information sources is developed. Business writing skills are emphasized.

**Credit Hours:** 3

---

#### **HMI 7420: Fundamentals of Bioinformatics**

(cross-leveled with HMI 4420). The purpose of this course is to provide perspective on the fundamentals of exploration of biological knowledge using computers. As technologies such as microarray, sequencing, and biomarkers become more pervasive, they are impacting not only the development of science, but also domains such as health care, nutrition, and ethics. This course provides a description of fundamental bioinformatics concepts such as sequencing, proteomics, metabolomics, and biological pathways, and illustrates them with short informatics experiments. Mainly online resources will be used, so no programming is necessary. Also, the course includes a short primer of molecular biology, so background in molecular biology is not required.

**Credit Hours:** 3

**Prerequisites:** Open to undergraduates with dual enrollment

---

#### **HMI 7430: Introduction to Health Informatics**

Introduction to the use of clinical information systems in healthcare. Topics include clinical data, standards, electronic medical records, computerized provider order entry, decision support, telemedicine, and consumer applications.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

#### **HMI 7431: Foundation of Public Health Informatics**

This course will cover foundational knowledge relevant to Public Health Informatics (PHI). The purpose of this course is to expose students

to emerging research and application areas in the field of PHI. It will enhance abilities to know when and how to use theories, concepts, and tools of informatics applied to public health. The emphasis of the course is on the use of informatics tools and practices in public health and the existing and evolving relationship between clinical and public health systems. The focus is on PHI including topics such as data exchange and standards, interoperability, use of informatics tools, applying informatics to public health communication and dissemination, surveillance systems, public health policy and project management.

**Credit Hours:** 3

---

#### **HMI 7432: Health Database Management and Public Health Data Systems**

This course will cover foundational knowledge relevant to database management and public health data systems for Public Health Informatics (PHI). The purpose of this course is to provide students with concepts relevant to the effective use of data, information, and knowledge tools to build, manage, merge, retrieve, and analyze public health data from appropriate health data systems. The emphasis of the course is to use, develop and adapt public health information systems as needed to support public health efforts through use of public health informatics tools and practices to support existing and evolving relationships between clinical and public health systems. The focus is to plan, develop, implement, manage and evaluate database management systems and health data systems that meet the needs of public health practice through PHI.

**Credit Hours:** 3

---

#### **HMI 7435: Scripting for Public Health Informatics**

In this online course, the student will learn 1) the Python programming language and how to use it to manipulate common forms of public health data, 2) the SQL language and how to design and interact with a relational database and its contents.

**Credit Hours:** 3

**Prerequisites:** College-level Statistics; Graduate standing or permission of the instructor

---

#### **HMI 7440: Health Information Technology**

(cross-leveled with HMI 4440). In this course, the student will learn 1) The Python programming language and how to use it for biomedical applications 2) the SQL database language and how to design and operate a database, and 3) HTML and javascript languages and how to design a web application. Applications will be healthcare focused.

**Credit Hours:** 3

**Prerequisites:** college algebra and statistics

---

#### **HMI 7471: Introduction to Accounting and Finance in Health Care**

This course introduces the current financial environment in which providers operate and the fundamentals of financial accounting, with an emphasis on accounting and financial management principles and concepts that are critical to decision making for department-level management of health services organizations. This course provides the foundation for the second healthcare financial management course offered in the second year of this program.

**Credit Hours:** 3

**Prerequisites:** Graduate standing or consent of instructor

---

**HMI 7564: Health Ethics Theory**

An introduction to health ethics theory and methodology. We discuss metaethics and normative ethics theories, normative ethics in health ethics and methods of ethics case work up.

**Credit Hours:** 3

---

**HMI 7566: Health Informatics Ethics**

An introduction to how the increasing use of distance-based technologies, computers, and online communications may impact the ethical delivery of health care. Examples of questions to be addressed: Is it possible that the increasing use of computers in healthcare has made things worse? How should HIPAA be interpreted and why is there such confusion about it? Should patients be able to 'post' negative comments about providers on social media sites? What should be done about the increasing amounts of personal information healthcare corporations are collecting on patients?

**Credit Hours:** 3

---

**HMI 7567: Health Organizational Ethics**

Examples of questions to be addressed: Should hospitals and doctors try to maximize profits? Do providers have a moral obligation to serve people who cannot pay? Is it okay to deceive an insurance company if it means better patient care? What should employees do if their employer is committing fraud? Is it ethical for hospitals to drug-test employees and investigate their private lives? What is the ethical way to hire and fire healthcare staff? What should you do if your supervisor is evil?

**Credit Hours:** 3

**Prerequisites:** HMI 7564 or equivalent course, or permission of instructor

---

**HMI 8090: Thesis Research in Health Management and Informatics**

Research leading to a thesis. May be repeated to maximum of 9 hours. Graded on S/U basis only.

**Credit Hour:** 1-6

**Prerequisites:** Advisor's consent

---

**HMI 8401: Topics in Health Management and Informatics**

Organized study of selected topics. Subjects will vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hours:** 3

---

**HMI 8435: Information Security, Evaluation and Policy**

The purpose of this course is to provide an extensive overview, practical applications and analyses of functionality and usability evaluations of health care information technology, and to discuss the impact of security on the present and future health care settings.

**Credit Hours:** 3

---

**HMI 8437: Data Warehousing and Data/Text Mining for Health Care**

An introduction to the basic concepts of data warehouse and data/text mining, creating an understanding of why we need those technologies and how they can be applied to healthcare problems.

**Credit Hours:** 3

**Prerequisites:** HMI 8441

---

---

**HMI 8441: Biomedical and Health Vocabularies and Ontologies**

Basic and advanced concepts of controlled terminologies and their use in the representation of biomedical information and knowledge, with emphasis on terminology management in the health care enterprise. Syntactic and semantic structure of controlled terminologies are examined and a number of representative terminologies are analyzed.

**Credit Hours:** 3

---

**HMI 8443: Enterprise Information and Solutions Architecture for Strategic Healthcare Operations**

Organization and development of infrastructure necessary to support an enterprise information system for patient care. Components of architecture are introduced in a problem-based approach, case examples are presented as the basis for addressing specific attributes of the components, as well as problems facing the design of an enterprise information system for health care.

**Credit Hours:** 3

---

**HMI 8450: Methods of Health Services Research**

Writing intensive course provides students with basic understanding of literature search, experimental designs, evaluation methods, ethics, reporting and application of health services research. Practical research problems are discussed and students prepare a professional, managerially relevant research proposal.

**Credit Hours:** 3

**Prerequisites:** HMI 7410; Satisfactory completion of a college-level course in statistics

---

**HMI 8451: Individual Executive Management Studies**

Students will investigate and address important issues in their organizations. Students will use scientific evidence and techniques to solve applied problems. They will develop data collection protocols, collect and analyze data, draw conclusions, and develop recommendations using basic research methods tools. They will provide actionable and feasible recommendations based on their analysis. Graded on S/U basis only.

**Credit Hours:** 3

**Prerequisites:** HMI 7410, HMI 8450 or permission of instructor

---

**HMI 8453: Executive Management Studies**

Students will use scientific evidence and techniques to solve applied problems in health care organizations. Students will serve as professional consultants, working within small teams to develop project specifications and plans in collaboration with their clients. They will develop data collection protocols, collect and analyze data, draw conclusions and develop recommendations using basic research methods tools. They will provide actionable, feasible recommendations to their clients based on their analysis. Graded on A/F basis only.

**Credit Hours:** 3

**Prerequisites:** HMI 7410; Graduate standing or permission of the instructor

---

**HMI 8460: Administration of Health Care Organizations**

Analyzes health care organizations, emphasizing organizational structure, and strategy, and managerial leadership. Topics include governance,

adaptation, design, interorganizational networks, and organizational performance.

**Credit Hours:** 3

---

**HMI 8461: Managing Human Resources in Health Care Organizations**

Provides a framework for understanding and thinking strategically about employee relations and management of people in organizations, drawing on insights from social sciences to explore how psychological, economic, social, and cultural forces influence human resources management in health care.

**Credit Hours:** 3

---

**HMI 8470: Strategic Planning and Marketing for Health Care Organizations**

Analysis of strategic planning and services management and marketing concepts, techniques, and tools in the health care industry. Includes analyzing the environment, assessing the organization's strengths and weaknesses, formulating strategy to achieve competitive advantage, and implementing strategy through service management and marketing.

**Credit Hours:** 3

**Prerequisites:** HMI 7410, and HMI 8524

---

**HMI 8472: Financial Management for Health Care Organizations**

Application of concepts, tools and techniques of financial management and their interrelationships as they apply to current and future operation of health care organizations. Prerequisites: For Residential students: HMI 7410, HMI 7471, HMI 8460, HMI 8524. For Executive students: HMI 7410, HMI 8460, HMI 8524, and satisfactory completion of college-level courses in managerial accounting and financial management or satisfactory completion of HMI's online accounting and finance module.

**Credit Hours:** 3

---

**HMI 8478: Knowledge Management in Health Care**

Representing clinical terms, concepts and knowledge in a form for manipulation by intelligent systems. Theoretical formalisms and conceptual representations of medical information. Examination of knowledge engineering tools and decision support systems.

**Credit Hours:** 3

---

**HMI 8485: Problems in Health Management and Informatics**

Intensive study of an area of health services management.

**Credit Hour:** 1-6

**Prerequisites:** instructor's consent

---

**HMI 8515: Problems in Medical Ethics and Clinical Ethics Consultation Practicum**

The Problems in Medical Ethics Course is a practicum based course with a hands-on clinical ethics consultation component. The course will provide the student with a tailored learning experience that will encourage and develop skills and a working knowledge about health care ethics, and the ability to respond effectively when confronted with the difficult ethical dilemmas that may be encountered at multiple levels in the complex arena of health care. Specifically students will cultivate skills which will optimize their ability to work as an ethics consultant in a multidimensional and diverse society as well as an inclusive health care environment. The

course is designed with flexibility in mind, however there are mandatory onsite components which will require the student to attend structured meetings, consultations and presentations.

**Credit Hours:** 5

**Prerequisites:** M-4 status for medical students. For Graduate students, HMI 7564 - Health Ethics Theory and HMI 8565 - Health Care Ethics and permission of instructor

---

**HMI 8524: Health Economics**

Building upon previous knowledge of basic economic theories, concepts, and tools, the structure, organization, activities, functions, and problems of health and medical care are considered from an economics perspective.

**Credit Hours:** 3

**Prerequisites:** microeconomics

---

**HMI 8544: Managerial Epidemiology (Population Health Management)**

Examination of basic epidemiological concepts and methods as they apply to health services management. Lectures and discussions focus on the most useful measures of occurrence of health events, methods of data collection, research study design, the interpretation of epidemiological data, and the limitations of epidemiological methods, providing the background needed by students to critically review, draw conclusions from, and use information encountered in their roles as healthcare managers. Emphasis is placed on practical applications of epidemiology to health services planning, problem solving, policy development, and systems-thinking.

**Credit Hours:** 3

**Prerequisites:** Restricted to HMI students only

---

**HMI 8545: Methods in Public Health Informatics/Biostatistics**

This course will cover foundational statistical knowledge and methods relevant to Public Health Informatics (PHI). The purpose of this course is to teach students to identify and perform appropriate statistical methods for the data analysis of data from many commonly used experimental designs in the field of PHI. The emphasis of the course is on the understanding of theoretical assumptions underlying these statistical methods. The focus of this course is to perform selected statistical analyses using, SPSS and/or R and to interpret statistical results, in a manner relevant to public health informatics in the context of public health. This course builds upon previous knowledge of basic statistics, concepts, and tools by applying them specifically to the public health field.

**Credit Hours:** 3

**Recommended:** college algebra

---

**HMI 8546: Public Health Information and Visualization (GIS) in Public Health**

This course will cover foundational knowledge of Geographic Information Systems (GIS) relevant to Public Health Informatics (PHI). The purpose of this course is to learn basic descriptive and analytical functions of GIS for research and application areas in the field of PHI. The course emphasis is for students to gain hands-on experience in the use of GIS, mapping, and spatial data analysis software such as ArcGIS, R, and Instant Atlas. The focus is on the use of geographic information systems (GISs) in the analysis of public health data. No previous knowledge

of mapping or GIS is required, but one is expected to have a working knowledge of MS Office, Windows operating systems, and Biostatistics (prerequisites Methods in Public Health Informatics/Biostatistics). This course builds upon previous knowledge of basic statistics, concepts, and tools by applying them in a GIS context specific to Public Health Informatics.

**Credit Hours:** 3

**Prerequisites:** HMI 8545

---

#### **HMI 8550: Health Data Analytics**

The purpose of this course is to provide you with an applied approach to analyze healthcare data. It will enhance abilities to know when and how to use theories, concepts, and tools of data analysis and statistics to evaluate and analyze health care data systematically. The emphasis of the course is on the use of data analysis in the health care field. The focus is on applying data analysis to health care data, problems and issues in the health care system, and on the data application necessary to make decisions based on the analysis. This course builds upon previous knowledge of basic statistics and analytics, concepts, and tools by applying them specifically to the health care system.

**Credit Hours:** 3

**Prerequisites:** college algebra and statistics or permission of instructor

---

#### **HMI 8565: Health Care Ethics**

Explores ethics issues and controversies facing clinicians and healthcare administrators. Topics may include end-of-life care, imperiled newborns, maternal-fetal conflict, procreative liberty, genetic screening and enhancement, organ procurement and allocation, rationing, public health, workplace relationships, and conflicts of interest.

**Credit Hours:** 3

---

#### **HMI 8571: Decision Support in Health Care Systems**

Applies principles and techniques of computer-assisted decision making to solve health care problems. Clinical and managerial applications of artificial intelligence, including expert systems reviewed. Advantages of integrating decision support programs with databases are discussed.

**Credit Hours:** 3

---

#### **HMI 8573: Decision Making for Health Care Organizations**

Applies and integrates data and decision making techniques with process analytic and improvement tools and techniques. Also includes applications of spread sheets and relational databases in healthcare settings.

**Credit Hours:** 3

**Prerequisites:** Restricted to HMI students

---

#### **HMI 8574: Health Care Law**

Survey of the function and methods of law as applied to health care administration and health care.

**Credit Hours:** 3

**Prerequisites:** HMI 7410, HMI 7471, HMI 8460, HMI 8524. Non HMI students with a Graduate or professional school career may be able to take the course with instructor consent

---

#### **HMI 8575: Health Policy and Politics**

Overview and critical analysis of health policy issues in the United States, including how the dynamics of the policy making process have shaped outcomes, successful and unsuccessful, of a number of important policy initiatives.

**Credit Hours:** 3

---

#### **HMI 8580: Project Management**

This course is designed to provide an in-depth understanding of the fundamentals of project management and its application to the provision of health care. A problem-based approach is used to frame both the theoretical underpinnings of project management and hands-on practical application. Students will develop an understanding of the foundations of project management designed to enable them to successfully complete the certification exam to become a certified project manager. Course content includes project scope development, project work breakdown, financial control, and human resources management for projects.

**Credit Hours:** 3

---

#### **HMI 8610: Consumer Health Informatics**

Consumer health informatics explores the branch of medical informatics that analyzes consumers' needs for information; studies and implements methods of making information accessible to consumers; and models and integrates consumers' preferences into medical information systems.

**Credit Hours:** 3

**Prerequisites:** HMI 7430 or instructor's consent

---

#### **HMI 8689: Field Experience in Health Management and Informatics**

Supervised field experience in approved health agencies and institutions. Opportunity for observation and service participation in various fields of health. Graded on an A-F basis only.

**Credit Hours:** 3

---

#### **HMI 8810: Research Methods in Informatics**

Research Methods in Health and Bioinformatics is a writing intensive course that provides students with an understanding of research proposal development, literature searching, research synthesis, research designs, evaluation methods, and ethics. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Second semester or later in PhD program or instructor's consent

---

#### **HMI 8870: Knowledge Representation in Biology and Medicine**

The main topics presented in the course are: logic systems, knowledge representation methods, production systems and representation of statistical and uncertain knowledge. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** HMI 7430 and HMI 7440

---

#### **HMI 8880: Agile Project Management in Healthcare**

Overview of the theory and methods associated with agile project management within the context of healthcare operations. Focus of the course is on knowledge of agile principles and agile techniques and the use of appropriate analysis tools. Course encompasses many approaches to agile project management including Scrum, Kanban, Lean,

extreme programming (XP) and test driven development (TDD), and appropriate construction and management of information projects that are supportive of best practice clinical, administrative, and strategic policy and procedure in the delivery of health. A problem-based approach is used to provide the basis for addressing issues and solutions specific to the health delivery environment. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** HMI 8580

---

## Health Professions Courses

### HTH\_PR 1001: Topics in Health Professions

Organized study of selected topics in Health Professions. Particular topics and credit may vary each semester.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### HTH\_PR 1100: Introductory Topics in Pharmacy

The course includes presentations and discussions on the profession of pharmacy including: the roles and responsibilities of the pharmacist, educational requirements to obtain the degree, career opportunities, student life, legal and ethical issues, and study skills development. Enrollment limited to Freshman enrolled in Early Assurance Program. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Instructor's consent

---

### HTH\_PR 2000: Leadership in Health Care

This course will cover a broad range of concepts in leadership and professional development. Focus will be placed on knowledge and skills necessary for effective leadership in the Health Professions. The first of two semesters series. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** instructors consent

**Recommended:** to students in specified leadership programs

---

### HTH\_PR 2001: Topics in Health Professions

Organized study of selected topics in health professions. Particular topics and earnable credit may vary from semester to semester.

**Credit Hour:** 1-99

**Prerequisites:** sophomore standing and instructor's consent

---

### HTH\_PR 2960: Special Readings in Health Professions

Directed study of literature and research reports in the health-related professions.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### HTH\_PR 4085: Problems in Health Professions

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

---

### HTH\_PR 4100: Introduction to Interprofessional Practice

(cross-leveled with HTH\_PR 7100) This course serves as a foundation and introduction to interprofessional education and collaboration.

Students who enroll in this course will be assigned to mini-teams of students from a range of disciplines. Through this course, students will develop an understanding of their own unique role as a healthcare provider and the importance of client- and community-centered care and effective teamwork, as well as communication skills. Graded on A-F basis only. Recommended: Students must be enrolled in one of the following programs in order to take this course: Communication Sciences, Athletic Training, Respiratory therapy, Radiography, Clinical Laboratory Sciences, Diagnostic Ultrasound. Undeclared/non-professional program students may not enroll.

**Credit Hour:** 1

---

### HTH\_PR 4250: Human Kinesiology

(same as PH\_THR 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Application through analysis of daily functional performance, exercise and sport.

**Credit Hours:** 3

**Prerequisites:** PTH\_AS 2201

---

### HTH\_PR 4950: Research Apprenticeship in Health Professions

This course provides undergraduate students in the health professions and related disciplines experience with research in the health professions and related disciplines experience with research in the health professions. Students will assist in the development and execution of research projects under the supervision of an SHP faculty member.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### HTH\_PR 7001: Topics in Health Professions

Organized study of selected topics in health and/or healthcare. Topic and credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### HTH\_PR 7100: Introduction to Interprofessional Practice

(cross-leveled with HTH\_PR 4100). This course serves as a foundation and introduction to interprofessional education and collaboration. Students will develop an understanding of their own unique role as a healthcare provider and the importance of client- and community-centered care and effective teamwork, as well as communication skills. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Students must be enrolled in a professional graduate program (Occupational therapy, Physical Therapy, Communication Sciences and Disorders, Athletic Training within the School of Health Professions or other approved programs (Applied Behavioral Analysis)

---

### HTH\_PR 7300: Health Care in the United States

Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.

**Credit Hours:** 3

---

---

**HTH\_PR 8001: Topics in Health Professions**

Organized study of selected topics in health and/or healthcare. Topic and credit may vary from semester to semester.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

**HTH\_PR 8085: Problems in Health Professions**

Individual study not leading to thesis or dissertation.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

## Health Psychology Courses

**HLTHPSYC 8200: Advanced Applied Behavior Analysis**

This course provides students with a basic understanding of the fundamentals of behavior analysis and behavioral interventions designed to establish, shape, strengthen and maintain desirable behavior and reduce aberrant behavior. The course focuses on the application of behavioral principles using procedures such as differential reinforcement, extinction, antecedent interventions, and punishment. Graded on A-F basis only.

**Credit Hours:** 3

---

**HLTHPSYC 8250: Methods in Applied Behavior Analysis**

This course provides students with a basic understanding of systematic data collection and analysis methods used in applied behavior analysis to make informed (data-driven) clinical decisions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** One of the following - HLTHPSYC 8200, ESC\_PS 8087 or SPC\_ED 8440

---

## Health Sciences Courses

**HLTH\_SCI 1000: Introduction to the Health Professions**

Overview of clinical/non-clinical health careers; aptitudes/abilities needed for each; the history, current and future state of health care in the U.S.; introduction to diverse populations and patient/family issues; Assists with career planning/selection of appropriate majors. Graded on A-F basis only.

**Credit Hours:** 3

---

**HLTH\_SCI 1000H: Introduction to the Health Professions - Honors**

Overview of clinical/non-clinical health careers; aptitudes/abilities needed for each; the history, current and future state of health care in the U.S.; introduction to diverse populations and patient/family issues; Assists with career planning/selection of appropriate majors. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors Eligibility required

---

**HLTH\_SCI 2100: Health Sciences Seminar**

Professional Development course for Health Science Majors. Topics include resume development/ revision, interviewing skills, applying to graduate/professional programs and/or jobs, professional communication, etc. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** sophomore standing required; restricted to Health Science majors only

---

**HLTH\_SCI 2200: Nuclear Weapons: Environmental, Health and Social Effects**

(same as SOCIOL 2281 and PEA\_ST 2200). Environmental consequences of the nuclear arms race, 'regional' nuclear war, and weapons testing for human health, agriculture, and society. Examining 'a world without nuclear weapons'; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.

**Credit Hours:** 3

---

**HLTH\_SCI 2200W: Nuclear Weapons: Environmental, Health and Social Effects - Writing Intensive**

(same as SOCIOL 2281 and PEA\_ST 2200). Environmental consequences of the nuclear arms race, 'regional' nuclear war, and weapons testing for human health, agriculture, and society. Examining 'a world without nuclear weapons'; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.

**Credit Hours:** 3

---

**HLTH\_SCI 2300: Health Care In Missouri**

This course focuses primarily on application of general health concepts and tools specifically from the perspective of the State of Missouri. It is known for its mixture of large urban areas with rural regions and an extensive farming culture. Missouri has a population of six million people. The state's capitol is in Jefferson City and the most populated cities are: Kansas City-459,787; St. Louis-319,294; Springfield-159,498; Independence-116,830 and Columbia-108,500. Thirty-seven percent of Missouri's population is rural (MO Health Assessment). This course will assist the 69% of Department of Health Science majors, who stay in Missouri after graduation, to better understand the unique issues facing their future patients and clientele. Students will be exposed to specific challenges and successes in Missouri as they relate to health care and public health from a variety of perspectives. This course will examine the health of all Missourians; however, the course will highlight the challenges facing vulnerable populations within the state (minorities, women, LGBT and rural/urban community members) in order to increase cultural competence. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Health Sciences Majors only

---

**HLTH\_SCI 2300H: Health Care In Missouri - Honors**

This course focuses primarily on application of general health concepts and tools specifically from the perspective of the State of Missouri. It is known for its mixture of large urban areas with rural regions and an extensive farming culture. Missouri has a population of six million people. The state's capitol is in Jefferson City and the most populated cities are: Kansas City-459,787; St. Louis-319,294; Springfield-159,498; Independence-116,830 and Columbia-108,500. Thirty-seven percent of Missouri's population is rural (MO Health Assessment). This course will assist the 69% of Department of Health Science majors, who stay in Missouri after graduation, to better understand the unique issues facing their future patients and clientele. Students will be exposed to

specific challenges and successes in Missouri as they relate to health care and public health from a variety of perspectives. This course will examine the health of all Missourians; however, the course will highlight the challenges facing vulnerable populations within the state (minorities, women, LGBT and rural/urban community members) in order to increase cultural competence. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Health Sciences Majors only; Honors eligibility required

---

#### **HLTH\_SCI 2500: Introduction to Rehabilitation Science**

This course provides a comprehensive introduction to health care rehabilitation. Topics explored will provide foundational knowledge for future rehabilitation professionals and will facilitate the development of skills necessary for success in rehabilitation science graduate and professional degree programs. These topics include the development of the field of rehabilitation, models of disablement/enabement, interprofessional collaboration among rehabilitation providers, and development and growth of critical thinking skills in the rehabilitation sciences. Graded on A-F basis only.

**Credit Hours:** 3

---

#### **HLTH\_SCI 2800: Social Justice in Health**

This course introduces the social justice framework and the building of inclusive classrooms and clinics. It includes weekly topics on inclusion, social identities, implicit bias, socioeconomic status, allyship and intrusion. Tools examined include: good personal communication, understanding an inclusive culture, how to be an ally, strategies to recognize and mitigate bias in health situations. Experiential activities and dialogue are the main avenues of learning in this course. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Restricted to Health Sciences Majors during preregistration

---

#### **HLTH\_SCI 2850: Introduction to The Impact of Bias, Prejudice and Discrimination on Health Care**

The course is an introduction to concepts of bias, prejudice and discrimination that occurs within health care settings in the United States. We will examine the problem from multiple disciplines, including evidence from sociology, psychology, anthropology, history, and health sciences. Examining these materials will help students better understand the impact of bias, prejudice, and discrimination on access to health care, and on the overall health of people and populations who are impacted by prejudice and discrimination. With the completion of this course, students will be better equipped to provide quality person-centered care and be able to think critically about how to begin the process of ending harmful discriminatory practices. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors

---

#### **HLTH\_SCI 2850H: Introduction to The Impact of Bias, Prejudice and Discrimination on Health Care - Honors**

The course is an introduction to concepts of bias, prejudice and discrimination that occurs within health care settings in the United States. We will examine the problem from multiple disciplines, including evidence from sociology, psychology, anthropology, history, and health sciences. Examining these materials will help students better understand the impact

of bias, prejudice, and discrimination on access to health care, and on the overall health of people and populations who are impacted by prejudice and discrimination. With the completion of this course, students will be better equipped to provide quality person-centered care and be able to think critically about how to begin the process of ending harmful discriminatory practices. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors. Honors eligibility required

---

#### **HLTH\_SCI 3300: Public Health Principles, Practice, and Education**

Public Health is the science and practice of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. This course focuses on the basic structures of the Public Health system in the U.S. and provides an introduction to the factors that influence and shape that system. Among others, factors include socioeconomic, financing, politics and global issues. Students in this course will be challenged to consider the complex web of factors affecting the health of communities. The course will explore: health needs assessments, examining relationships among behavioral, environmental and genetic factors that enhance or compromise health, examining factors that influence the learning process, and examining factors that enhance or compromise the process of health education. Graded on an A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors during pre-registration

---

#### **HLTH\_SCI 3300H: Public Health Principles, Practice, & Education - Honors**

Public Health is the science and practice of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. This course focuses on the basic structures of the Public Health system in the U.S. and provides an introduction to the factors that influence and shape that system. Among others, factors include socioeconomic, financing, politics and global issues. Students in this course will be challenged to consider the complex web of factors affecting the health of communities. The course will explore: health needs assessments, examining relationships among behavioral, environmental and genetic factors that enhance or compromise health, examining factors that influence the learning process, and examining factors that enhance or compromise the process of health education. Graded on an A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

#### **HLTH\_SCI 3300W: Public Health Principles, Practice, and Education - Writing Intensive**

Public Health is the science and practice of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. This course focuses on the basic structures of the Public Health system in the U.S. and provides an introduction to the factors that influence and shape that system. Among others, factors include socioeconomic, financing, politics and global issues. Students in this course will be challenged to consider the complex web of factors affecting the health of communities. The course will explore: health needs assessments, examining relationships among behavioral, environmental and genetic factors that enhance or

compromise health, examining factors that influence the learning process, and examining factors that enhance or compromise the process of health education. Graded on an A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors during pre-registration

---

**HLTH\_SCI 3310: Social and Behavioral Health Theory and Practice**

Social and Behavioral Health (SBH) is the core discipline of public health that focuses on the factors that influence individuals' and communities health actions and decisions. This course will take both a theoretical and a practical approach to understanding SBH. Students will gain an understanding of theory and develop practical skills to apply theories to real world health issues. Readings, assignments, and discussions will focus largely on ways to understand and change health behaviors and various individual, relational, community, and social-level influences on health. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors during pre-registration. Sophomore standing required

---

**HLTH\_SCI 3400: Global Public Health and Health Care Systems**

(same as PEA\_ST 3401). An introduction to public health in a global context, with an emphasis on understanding how disparities in socioeconomic status, differences in political and national health care systems and the work of international organizations impact health in communities around the world. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Science majors only, in junior or senior status

---

**HLTH\_SCI 3450: Introduction to Epidemiology**

(same as P\_HLTH 3450). Epidemiology is the basic science of Public Health, focusing on the study of distribution and determinants of health-related states and events. The purpose of this course is to gain a basic understand of Epidemiology principles and methods and how to use these as a framework in assessing and addressing population health issues. Employing a mix of lecture, discussion, and assignments, students will explore the epidemiological investigation process, the etiology of disease, disability, and death, how to identify population subgroups with increased risk of disease, disability, and death and how to contribute to the development and evaluation of public health programs and services that improve the health of subgroups at risk and the general population. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Acceptance into the Public Health Undergraduate Program or by Department Consent

---

**HLTH\_SCI 3500: Mental Health**

This course provides a look at mental health problems with regard to influences, etiology, diagnosis, and treatment. Students learn theories of mental health, diagnostic criteria, treatment modalities, and community issues concerning the mental health system. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** HLTH\_SCI 2100

---

**HLTH\_SCI 3600: Health Promotion Programs I: Assessment and Planning**

(same as P\_HLTH 3600). Health promotion planning is the development and implementation of a well-researched and tailored intervention to increase the health status of an individual and population. This course will provide a comprehensive introduction to health promotion planning and assessment by integrating a solid theoretical foundation of the discipline with hands-on experience in assessing needs, assets and capacity for health education, health education and project planning, funding, intervention development, implementation of health education projects, and evaluation. Special attention placed on implementing health education and promotion programs that are tailored to the particular population in need as well as specialized for the appropriate setting be it school, work, health care clinic, or the community. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Science majors

**Corequisites:** HLTH\_SCI 3610

---

**HLTH\_SCI 3610: Health Promotion Programs II: Implementation, Evaluation, and Communication**

(same as P\_HLTH 3610). This course builds on topics covered in Health Promotion Programs I: Assessment and Planning. It will provide a comprehensive introduction to the implementation, evaluation and communication required for successful health promotion programs by integrating a solid theoretical foundation of the discipline with hands-on experience in the implementation of health promotion program, developing an evaluation and communication strategies for successful health education and health promotion programs in a variety of community-based settings. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors only

**Corequisites:** HLTH\_SCI 3600

---

**HLTH\_SCI 3680: Autism Spectrum Disorder and Public Health**

This class is designed to help students think critically about the identification and treatment of autism spectrum disorder (ASD) in the United States. Students will explore current research and debates surrounding the definition, prevention and treatment of ASD in the United States. In addition to learning about the presentation and treatment of ASD, they will also be introduced to concepts in public health, psychology, psychiatry, and health services research. We will also discuss the history of our beliefs about ASD and how these beliefs have influenced policy, systems, services and treatment over the last century. Graded on A-F basis only.

**Credit Hours:** 3

---

**HLTH\_SCI 3800: Holistic Health Systems for the Health Professions**

This course will explore the various aspects of the holistic health movement and how they interact with American health care. Topics will include complementary and alternative medicine, or CAM, acupuncture, chiropractic, herbal remedies, naturopathy, traditional Chinese medicine, Ayurveda, midwifery, New Age healing, and others. Students will learn about the underlying philosophical principles of these practices, cultures of origin, treatments offered, and what consumers of health care as well as members of the health care workforce need to know about them. Graded on A-F basis only. Recommended: The most successful students

will have taken other Health Sciences courses, particularly HLTH\_SCI 3300: Public Health, prior to enrolling in this course.

**Credit Hours:** 3

**Prerequisites:** Restricted to students in junior or senior status. Restricted to Health Sciences Majors during pre-registration

---

**HLTH\_SCI 3900: Introduction to The Research Process and Evidence Base**

This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors with junior or senior standing

---

**HLTH\_SCI 3900H: Introduction to The Research Process and Evidence Base - Honors**

This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors with junior or senior standing. Honors eligibility required

---

**HLTH\_SCI 3900HW: Introduction to The Research Process and Evidence Base - Honors/Writing Intensive**

This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors with junior or senior standing. Honors eligibility required

---

**HLTH\_SCI 3900W: Introduction to The Research Process and Evidence Base - Writing Intensive**

(same as P\_HLTH 3900W). This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors with junior or senior standing

---

**HLTH\_SCI 3965: Strategies for Effective Peer Education in Health Sciences**

(same as WGST 3960, P\_HLTH 3965). Course designed to promote effective presentation skills on a variety of health topics, specifically sexual health. Students will engage in experiential practice and skill building surrounding cultural competency, difficult discourses, discussion facilitation and behavior management. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Instructor's consent

---

**HLTH\_SCI 4001: Topics in Health Science**

Organized study of selected topics. Subjects will vary from semester to semester. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Restricted to Health Sciences Majors during preregistration

---

**HLTH\_SCI 4002: Health Sciences Study Abroad - not for capstone**

This course gives students the opportunity to apply critical thinking and analysis to various health issues through the global lens of a study abroad experience. Health issues are affected and complicated by cultural, educational, political, and environmental systems. This program is designed to allow students to gain firsthand knowledge in disease prevention and disability, compliance, health education, and the specific health issues in a local community. Course work will vary based on the study abroad location. This section is not eligible for Health Sciences major's internship/capstone credit. Graded A-F only.

**Credit Hour:** 1-6

**Prerequisites:** Sophomore Standing Required

---

**HLTH\_SCI 4085: Problems in Health Sciences**

Students will individually examine a specific health related problem, conduct research, and pose solutions to the problem as related to a health science course or a health field. Course work and content will vary based on the subject and may supplement regular course enrollment. Communication with instructor on topic, progress, and feedback should be timely for successful completion of course. Graded on A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** Instructor consent

---

**HLTH\_SCI 4300: Health Care in the United States**

Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing; Restricted to Health Sciences Majors during pre-registration

---

**HLTH\_SCI 4300H: Health Care in the United States - Honors**

Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**HLTH\_SCI 4400: Culture and Health Literacy for the Health Professions**

This course will explore differences and attitudes towards the health care industry across various social, cultural and ability groups. This exploration will result in more culturally competent health professionals by promoting self-awareness and challenging the existing assumptions and biases of the health care system. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** junior or senior standing or instructor's consent.  
Restricted to Health Sciences Majors

---

**HLTH\_SCI 4410: Humanism and Health Literacy**

This class will teach how the humanities can help students become better health professionals. Topics include: spirituality and health; non-medical factors that impact health; representation of disability in art history; and literature and health. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors during pre-registration

---

**HLTH\_SCI 4420: Health Literacy and Behavioral Compliance**

Students will learn about the behavioral, psychological, and cognitive factors that impact health literacy and the ability to follow healthcare recommendations.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Sciences Majors during pre-registration

---

**HLTH\_SCI 4480: Clinical Ethics**

(same as CDS 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.

**Credit Hours:** 3

**Prerequisites:** junior or senior standing; Restricted to Health Science majors only

---

**HLTH\_SCI 4480W: Clinical Ethics - Writing Intensive**

(same as CDS 4480W). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.

**Credit Hours:** 3

**Prerequisites:** junior or senior standing; Restricted to Health Science majors only

---

**HLTH\_SCI 4500: Health Care Management**

(same as P\_HLTH 4500). Examines various management concepts as they relate to the unique environment of health care. Concepts include planning, decision making, budgeting, staffing, organizing, and motivating for working with individuals or teams. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Science majors only with junior or senior status

---

**HLTH\_SCI 4510: Essential Tools for the Health Care Leader: A Problem-Based Approach**

This course is designed to increase students' ability to evaluate, synthesize, and perform tasks in the areas of business intelligence, business analysis, performance and process improvement, data management and mining, information security and privacy, and project management. Graded A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Science majors only in junior or senior status

**Recommended:** Access to and experience using Microsoft Excel 2010

---

**HLTH\_SCI 4520: Health Care Project Management**

Examines various project management concepts, both universal and as they relate to the unique environment of health care. Concepts include project, program and portfolio management, initiating projects, planning projects, executing projects, monitoring and controlling projects, closing projects, and using industry best practices and tools. This course will enable you to work with other project management professionals across various industries and in the changing health care setting. You will learn how good project, program, and portfolio management can help you achieve organizational and individual success. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Health Science majors only in junior or senior status

---

**HLTH\_SCI 4900: Seminar in Health Education**

(cross-leveled with P\_HLTH 7900). This course provides students pursuing careers in health education/promotion and public health with the opportunity to synthesize their relevant coursework and prepare for the Certified Health Education Specialist (CHES) examination. Graded on S/U basis only.

**Credit Hour:** 1

**Prerequisites:** Instructor consent required

**Recommended:** Intended as preparation for the Certified Health Education Specialist (CHES) Exam

---

**HLTH\_SCI 4975: Internship in Health Sciences**

Focuses on knowledge, skills and attitudes that enhance personal effectiveness and professional success. Opportunities to research selected career paths and related topics in health sciences and participate in directed service learning projects or internships in selected emphasis area. Graded on A-F basis only.

**Credit Hour:** 1-6

**Prerequisites:** HLTH\_SCI 2100

---

**HLTH\_SCI 4985: Healthcare Organization and Leadership**

In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** HLTH\_SCI 2100; senior standing required

---

## Hebrew Courses

### HEBREW 1100: Elementary Hebrew I

For beginners with no prior knowledge of Hebrew. Five hours of classroom instruction, with one hour lab work weekly.

**Credit Hours:** 6

---

### HEBREW 1200: Elementary Hebrew II

Five hours of classroom instruction, with one hour lab work weekly.

**Credit Hours:** 6

**Prerequisites:** C- or better in HEBREW 1100, or equivalent

---

### HEBREW 3085: Problems in Hebrew

Supervised study of Hebrew language and/or culture.

**Credit Hour:** 1-3

**Prerequisites:** instructor's consent

---

### HEBREW 3845: Modern Israeli Film

(same as FILMS\_VS 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces concepts of Hebrew language and its use in the arts world-wide. Discusses varied communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** sophomore standing or instructor's consent required

---

## History Courses

### HIST 1004: Undergraduate Topics in History-Social Science

Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

---

### HIST 1100: Survey of American History to 1865

Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

**Credit Hours:** 3

---

### HIST 1100H: Survey of American History to 1865 - Honors

Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### HIST 1200: Survey of American History Since 1865

Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people. No credit will be

given to students who have received credit in HIST 1400 (AP credit for US History).

**Credit Hours:** 3

---

### HIST 1200H: Survey of American History Since 1865 - Honors

Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### HIST 1400: American History

Broad survey of political, economic, social, intellectual, diplomatic and constitutional development of American people from first English settlements to present day; emphasizes evolution of American culture and institutions. Students may not receive additional credit for HIST 1100 and/or HIST 1200.

**Credit Hours:** 5

---

### HIST 1410: African American History

(same as BL\_STU 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

**Credit Hours:** 3

---

### HIST 1500: Origins of European History

(same as HIST 1500H). The roots and development of European culture, society, and institutions in the ancient, medieval, and early modern periods.

**Credit Hours:** 3

---

### HIST 1500H: Origins of European History - Honors

(same as HIST 1500) The roots and development of European culture, society, and institutions in the ancient, medieval, and early modern periods.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

### HIST 1510: History of Modern Europe

Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.

**Credit Hours:** 3

---

### HIST 1510H: History of Modern Europe - Honors

Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**HIST 1510HW: History of Modern Europe - Honors/Writing Intensive**

Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**HIST 1520: The Ancient World**

Survey of institutional and cultural development of ancient Near East, Greece, Rome, and Asia.

**Credit Hours:** 3

---

**HIST 1540: England Before the Glorious Revolution**

Survey of English institutions, culture and politics from the Roman invasion to the Revolution of 1688.

**Credit Hours:** 3

---

**HIST 1550: Britain 1688 to the Present**

Surveys British history from 1688 to present. Emphasizes social and economic change.

**Credit Hours:** 3

---

**HIST 1570: Survey of Early Modern Europe, 1350-1650**

Survey of Western and Central Europe (including Britain) from the Black Death to the end of the Thirty Years' War. This period comprises late medieval crises, the Renaissance, Reformation, Counter-Reformation, Exploration and the New World, the Confessional Age, early modern state-building, and the Thirty Years' War.

**Credit Hours:** 3

---

**HIST 1590: Women and the Family in the Pre-Modern West**

Examines the changing roles of women and familial structures from the Ancient Mediterranean World to the Protestant Reformation and the effects of religious, political and economic change on the family.

**Credit Hours:** 3

---

**HIST 1600: Foundations of Russian History**

A survey of the Kievan and Muscovite period to the end of the 17th century.

**Credit Hours:** 3

---

**HIST 1790: History of Early Africa**

(same as BL\_STU 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

**Credit Hours:** 3

---

**HIST 1800: History of Modern Africa**

(same as BL\_STU 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.

**Credit Hours:** 3

---

**HIST 1830: Survey of East Asian History**

(same as KOREAN 1830). Introductory survey of the history of East Asian countries (China, Korea, Vietnam, and Japan) in the past two thousand years, focusing on their cultural, economic, and political traditions as well as their transformations in the modern era.

**Credit Hours:** 3

---

**HIST 1840: Colonial Latin America**

Survey of Latin America, 1492-1825; Exploration and conquest; European settlement; colonial government and institutions; economy and society; cultural and intellectual life, independence movements.

**Credit Hours:** 3

---

**HIST 1850: Latin America Since Independence**

Political, social and economic developments; nationalism; revolutionary movements; U.S. influence.

**Credit Hours:** 3

---

**HIST 1861: History of Modern India**

(same as S\_A\_ST 1861). This course surveys the history of the South Asian subcontinent from the early seventeenth through the twentieth century. Emphasis will be placed on cultural and social history, religion, arts and literature, imperialism and colonialism, and the sources used for the study of modern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.

**Credit Hours:** 3

---

**HIST 1871: History of China in Modern Times**

This is a lecture course designed to introduce to beginning level students the epic journey of China's historical transformation since c. 1600. This survey provides a basis for understanding the painstaking transition from 'tradition' to 'modernity' in China.

**Credit Hours:** 3

---

**HIST 1872: Mao's China and Beyond: China Since 1949**

Through a series of readings, images, and film we will look at the dramatic cultural, economic, social and intellectual changes the People's Republic of China has experienced since 1949, and look at the interrelated, yet often contradictory, challenges facing Beijing in regards to the task of furthering economic prosperity while promoting policies of integrating with the international society.

**Credit Hours:** 3

---

**HIST 2004: Topics in History-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-6

---

**HIST 2100: The Revolutionary Transformation of America**

(same as CNST\_DEM 2100). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing 'the causes which impelled' the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.

**Credit Hours:** 3

---

**HIST 2100H: The Revolutionary Transformation of America - Honors**

(same as CNST\_DEM 2100H). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing 'the causes which impelled' the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**HIST 2120: The Young Republic**

(same as CNST\_DEM 2120). This course examines the early years of the United States under the (then) new Constitution, an important historical period with which present-day Americans are increasingly unfamiliar. Our focus will be on abandoning our preconceptions about the nation's early history and thoroughly understanding the choices that were posed and made in the years after 1789 and that would determine what type of nation the U.S. would become.

**Credit Hours:** 3

---

**HIST 2120H: The Young Republic - Honors**

(same as CNST\_DEM 2120H). This course examines the early years of the United States under the (then) new Constitution, an important historical period with which present-day Americans are increasingly unfamiliar. Our focus will be on abandoning our preconceptions about the nation's early history and thoroughly understanding the choices that were posed and made in the years after 1789 and that would determine what type of nation the U.S. would become.

**Credit Hours:** 3

**Prerequisites:** Honors eligibility required

---

**HIST 2150: The American Civil War: A Global History**

(same as CNST\_DEM 2150). In this class students will study the American Civil War from the perspective of global history. The familiar actors and events will be covered - the debate over slavery, the secession of the South, the rise of Abraham Lincoln, the great battles and generals, etc. But these familiar episodes will take on different meanings when viewed in relation to global structures of politics, economics, social relations, and ideology. The 1860s was at once a formative moment in the history of globalization and the key decade for the formation and consolidation of modern nations.

**Credit Hours:** 3

---

**HIST 2210: Twentieth Century America**

(same as CNST\_DEM 2210). Survey of American development from 1900 to present. For students who have not taken advanced courses in American history, especially HIST 4210, HIST 4220, or HIST 4230.

**Credit Hours:** 3

---

**HIST 2220: America in the 1960's**

(same as PEA\_ST 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America's political leadership to the ferment of the period.

**Credit Hours:** 3

---

**HIST 2230: Walt Disney and American Culture**

Examines Walt Disney's influence on shaping of modern American culture.

**Credit Hours:** 3

---

**HIST 2240: Flight in America: From the Wright Brothers to the Space Age**

This course focuses on the history of flying in the U.S. from its beginnings to the Apollo moon missions. In a little over a century, aviation and space flight have transformed our world in deep and enduring ways. We will focus on key innovations and the people behind them. This is an exciting story, full of fascinating men and women.

**Credit Hours:** 3

---

**HIST 2400: Social History of U.S. Women**

(same as WGST 2400). This course, the social History of US Women, offers a general overview of US Women, beginning with the colonial period up to the present day.

**Credit Hours:** 3

---

**HIST 2410: African American Women in History**

(same as BL\_STU 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.

**Credit Hours:** 3

---

**HIST 2430: History of American Religion**

This course focuses on the overall development of American religion from the 17th century to the present. Students will be invited to think about the larger questions concerning American religion, including why religion in America has developed in the way that it has, and how and why it continues to thrive in American popular culture.

**Credit Hours:** 3

---

**HIST 2440: History of Missouri**

Survey of Missouri's development from the beginning of settlement to present.

**Credit Hours:** 3

---

**HIST 2445: American Constitutional Democracy**

(same as POL\_SC 2445, CNST\_DEM 2445). This course offers an introduction to American constitutional democracy. On the one hand, this course will strive to set the development of America's constitutional democracy into its historical context and to explain it in relation to larger social, political, military, and economic events. A second emphasis is on the nature and character of the American democratic system. Graded on A-F basis only.

**Credit Hours:** 3

---

**HIST 2520: From Waterloo to Sarajevo: European History, 1815-1914**

Political, social, economic, and cultural development of Europe from French Revolution to outbreak of World War I.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**HIST 2520W: From Waterloo to Sarajevo: European History, 1815-1914 - Writing Intensive**

Political, social, economic, and cultural development of Europe from French Revolution to outbreak of World War I.

**Credit Hours:** 3

**Prerequisites:** sophomore standing required

---

**HIST 2530: Ukrainian History from Medieval to Modern Times**

A successor state of the former Soviet Union, Ukraine occupies a strategic position in Eastern Europe. The course will trace the long, turbulent history of this East Slavic nation, culminating the independence in 1991.

**Credit Hours:** 3

---

**HIST 2570: The First World War and its Aftermath**

(same as CNST\_DEM 2570). This course examines the experience of Europeans in the turbulent years during and immediately following the First World War. After investigating the origins and nature of WWI, we will then examine the political, social and cultural climate of the interwar years.

**Credit Hours:** 3

---

**HIST 2580: Mafia Myth and Reality: The Italian Mafia and the Nation-State, 1860 to the Present**

This course explores contemporary cultural representations of the Mafia in film and literature and grounds these fictional representations in the history of modern Italy. We trace the emergence of the various Mafia networks during the wars of the Risorgimento and the construction of the 'southern problem', and the impact transnational Italian migration, the rise of Fascism and the postwar reconstruction had on the form and function of these networks.

**Credit Hours:** 3

---

**HIST 2590: Epidemics and Society**

This course is an interdisciplinary survey of epidemic diseases from the ancient to modern eras. We will focus on the conditions that have given rise to epidemics and how different societies have understood and responded to them. We will trace the connections of epidemic diseases to

increased globalization, examining links between epidemics and warfare, exploration, colonization, and trade networks. This course will conclude with a discussion of newly emerging diseases in the contemporary world.

**Credit Hours:** 3

---

**HIST 2630: History of Christian Traditions**

(same as REL\_ST 2630). An overview of the origins and development of Christianities from the first century of the Common Era to the present day. Topics will include competing Christian theologies, colonialism, conversion narratives, globalization, religious violence, and heresy.

**Credit Hours:** 3

---

**HIST 2700: History of Pirates: Maritime Raiding From the Ancient to the Modern Eras**

This course examines piracy from the ancient to the modern world, with a particular focus on the Mediterranean and Atlantic from the 15th through the 18th centuries. We'll look at a variety of firsthand accounts of piracy as well as historical interpretations of the motivations for and impact of piracy.

**Credit Hours:** 3

---

**HIST 2810: History of Korea: Premodern to Hypermodern**

(same as KOREAN 2810). This course examines Korea historically. The area known as Korea and the people identified as Korean are considered temporally from the ancient times to the contemporary period. This course begins with the questions of what is Korea and when it became a distinct place in world history.

**Credit Hours:** 3

---

**HIST 2820: Taiwan: The First Chinese Democracy**

This course is an introduction to the history of Taiwan, from the seventeenth century to the present day. This course examines historical development leading to the contemporary situation. It problematizes the notion that 'democracy is not suitable for Chinese society.'

**Credit Hours:** 3

---

**HIST 2904: Black Studies in Slavery and Freedom**

(same as BL\_STU 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

**Credit Hours:** 3

---

**HIST 2950: Sophomore Seminar**

This course is designed to introduce history majors to the experience of doing original research early in their undergraduate career. Topic will vary.

**Credit Hours:** 3

**Prerequisites:** departmental consent required

---

---

**HIST 2950W: Sophomore Seminar - Writing Intensive**

This course is designed to introduce history majors to the experience of doing original research early in their undergraduate career. Topic will vary.

**Credit Hours:** 3

**Prerequisites:** departmental consent required

---

**HIST 3000: History of Religion in America to the Civil War**

(same as REL\_ST 3000). Studies major American religious traditions from the Age of Discovery to the Civil War, especially the evolution of religious practices and institutions and their influence upon American social, intellectual and political developments.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3010: Colonial America**

This course will examine major colonial American events from a cultural history standpoint. We will explore the ways in which the famous and not so famous shaped and were shaped by events of the seventeenth and eighteenth centuries and how these people understood the changing meaning of American liberty.

**Credit Hours:** 3

---

**HIST 3200: Black Freedom Movement, 1955-1973**

(same as BL\_STU 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

**Credit Hours:** 3

---

**HIST 3210: History of Religion in Post-Civil War America**

(same as REL\_ST 3210). Surveys major American religious traditions from 1865 to the present. Focuses on the evaluation of religious practices and institutions and their interaction with and influence upon American social, intellectual and political developments.

**Credit Hours:** 3

---

**HIST 3220: U.S. Women's Political History, 1880-Present**

(same as WGST 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3230: Individualism and Success in Modern America, 1830-Present**

This course explores changing notions of individualism and success in American culture during the 19th and 20th centuries. Standards defining achievement, gain, and happiness for the individual citizen have evolved over time, and we will examine a wide variety of sources - advice literature, essays, novels, historical texts, plays and movies, political and religious texts, social criticism - to analyze this broad evolution. The resulting insights into a variety of historical issues and values, problems and possibilities, promise to forge a deeper understanding of what it has

meant to be a successful individual in the United States over the last two hundred years.

**Credit Hours:** 3

---

**HIST 3485: The United States and the Middle East**

This course will explore the history of American relations with the Middle East. How have U.S. Policy-makers defined American interests in this region? How have they sought to protect and advance those interests? We will consider the cultural stereotypes and assumptions Americans have brought to their relations with the Middle East, and the images of the Middle East that have been projected in American popular culture. Finally, we will explore the ways in which the current political situations in the Middle East reflects the results of past U.S.

**Credit Hours:** 3

---

**HIST 3510: The Ancient Greek World**

Political and social institutions, intellectual life of Greek city-states to time of Alexander.

**Credit Hours:** 3

---

**HIST 3520: The Roman World**

Rise and development of Roman institutions, Rome's imperialism and culture through reign of Marcus Aurelius.

**Credit Hours:** 3

---

**HIST 3530: The Hellenistic World: From Alexander to Rome**

The achievements of Alexander the Great; political, social, economic development of Hellenistic kingdoms from his death to 31 B. C.

**Credit Hours:** 3

---

**HIST 3540: 20th Century Europe**

Political, social, and economic development of Europe from 1900 to the present, with emphasis on the period between the two world wars.

**Credit Hours:** 3

---

**HIST 3540W: 20th Century Europe - Writing Intensive**

Political, social, and economic development of Europe from 1900 to the present, with emphasis on the period between the two world wars.

**Credit Hours:** 3

---

**HIST 3550: Science and Medicine in Ancient and Medieval Europe**

This course explores how ancient observations and theories about the natural world and the human body led to the development of 'natural philosophy' and medicine as fields of expertise. We will be examining attitudes and beliefs about the natural world and man's place within it from Egyptian-Babylonian roots through the Middle Ages.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3555: Galileo and His World**

(same as GN\_HON 3230H). The purpose of this course is to evaluate Galileo's contribution to modern science on the basis, primarily, of his actual writings. In the process, we will examine the 'Galileo Myth', focusing on the problem of scientific truth and freedom of thought.

**Credit Hours:** 3

---

**HIST 3560: The Scientific Revolution**

We will examine changing scientific beliefs and practices from 1500 to 1800, a time often referred to as the Scientific Revolution and as the birth of modern science. At the core, this is an examination of how knowledge itself changed: how it was gathered, tested and disseminated. We will also examine how the study of the natural world branched from one subject ('natural philosophy') into multiple specialized disciplines including astronomy, physics, botany, biology, geology and chemistry.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3570: European Women in the 19th Century**

(same as WGST 3570). Examines the history of European women from 1750 to 1900. The course focuses on how industrialization, the French Revolution and nation-formation changed women's roles in the family, workplace and the state. Grading: exams, papers and discussions.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3580: Modern Italy, 1815 to the Present**

Political, cultural and social history of Italy since 1815. Looks at how Unification, World War, Fascism, the Cold War, Student protests, the women's movement and the end of the USSR shaped contemporary Italy.

**Credit Hours:** 3

---

**HIST 3590: The Early Middle Ages**

This course will focus on the social, political, economic, and cultural development of Europe from roughly 300 to 1050.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3600: The Later Middle Ages**

This course will focus on the social, political, economic, and cultural development of Europe from roughly 1050 to 1500. Prerequisites: sophomore standing

**Credit Hours:** 3

---

**HIST 3610: Ireland, 1100s to 1850**

(same as PEA\_ST 3610). Ireland, from Conquest to Famine: Ireland's history as the first British Colony, from the conquests of the 1100s and 1500s-1600s to the Irish rebellion of 1798 and the Great Famine and mass emigration of 1845-50.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 3611: Ireland, 1850-1923**

(same as PEA\_ST 3611). Ireland, from Famine to Partition: Irish history from the Great Famine of 1845-50 to the revolutions of 1916-23 that brought partial independence from Britain but partitioned Ireland into two hostile and trouble states.

**Credit Hours:** 3

---

**HIST 3612: Ireland, 1920-Present**

(same as PEA\_ST 3612). Ireland, from Partition to the Present: After surveying the conflicts that led to Irish revolution and partition in 1916-23, the course focuses on the development of post partition Ireland and Northern Ireland, and on the violence that has scarred Northern Ireland since the 1960s.

**Credit Hours:** 3

**Prerequisites:** May be restricted to History majors only during preregistration

**Recommended:** HIST 3610 and/or HIST 3611

---

**HIST 3624: Comparative Approaches to Black Studies in History**

(same as BL\_STU 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Program consent for repetition.

**Credit Hours:** 3

---

**HIST 3624W: Comparative Approaches to Black Studies in History - Writing Intensive**

(same as BL\_STU 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Program consent for repetition.

**Credit Hours:** 3

---

**HIST 3820: Twentieth Century China**

History of China from Nationalist Revolution of 1911 to present. A problem-oriented course: special emphasis on Mao and Maoist ideology, social, literary and cultural history also receive attention.

**Credit Hours:** 3

---

**HIST 3850: Islam and the West**

(same as PEA\_ST 3850). This course provides a historical intellectual context for the raging debate on Islam and the West. It will discuss how Muslims conceived and reacted variously to the political and cultural challenge the West posed in the nineteenth and twentieth century. It will focus on the discourse on the reception of modernization in Islam. It will highlight the political and cultural energies invested by various Muslim elite communities to distinguish between modernization and Westernization. Islamic fundamentalism, the dominant Islamic expression of our time, will be usefully discussed in the context of this debate and praxis about modernization, authenticity, and Westernization.

**Credit Hours:** 3

**Prerequisites:** junior/senior standing

---

**HIST 3860: History of Mexico**

Survey of Mexican history from Cortes to present day.

**Credit Hours:** 3

---

**HIST 3870: Social Revolution in Latin America**

(same as PEA\_ST 3870). Twentieth century social revolutions in selected Latin American countries.

**Credit Hours:** 3

---

**HIST 4000: Age of Jefferson**

(same as CNST\_DEM 4000; cross-leveled with HIST 7000). Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.

**Credit Hours:** 3

---

**HIST 4004: Topics in History-Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-6

---

**HIST 4004H: Topics in History-Social Science - Honors**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-6

**Prerequisites:** Honors eligibility required

---

**HIST 4004W: Topics in History-Social Science - Writing Intensive**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

**Credit Hour:** 1-6

---

**HIST 4010: The Age of Jackson**

(cross-leveled with HIST 7010). This course will examine American Politics, society and culture in the 1820's, 1830's, and 1840's. Considerable attention will be devoted to Andrew Jackson himself, as a figure who both shaped and represented his era, for better or worse.

**Credit Hours:** 3

---

**HIST 4030: History of the Old South**

(cross-leveled with HIST 4030). Study of the South to 1860.

**Credit Hours:** 3

---

**HIST 4040: Slavery and the Crisis of the Union: The American Civil War Era**

(same as BL\_STU 4040, CNST\_DEM 4040; cross-leveled with HIST 7040). This class explores the history of the Civil War era, a transformative moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime 'nationalisms' that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, 'total' warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a 'second American revolution'? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least,

how did the triumph of the Union condition the political and economic development of a rapidly globalizing world?

**Credit Hours:** 3

---

**HIST 4060: The Period of the American Revolution, 1760-1789**

Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.

**Credit Hours:** 3

---

**HIST 4070: Indians and Europeans in Early America**

(cross-leveled with HIST 7070). A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada.

**Credit Hours:** 3

---

**HIST 4075: Global History in Oxford**

(same as CNST\_DEM 4075). This course examines global and transnational history in the 'modern' period since 1400. It includes an embedded week of study abroad at Oxford University (United Kingdom) over spring break.

**Credit Hours:** 4

---

**HIST 4075H: Global History in Oxford - Honors**

This course examines global and transnational history in the 'modern' period since 1400. It includes an embedded week of study abroad at Oxford University (United Kingdom) over spring break.

**Credit Hours:** 4

**Prerequisites:** Honors eligibility required

---

**HIST 4080: American Foreign Policy from Colonial Times to 1898**

(same as PEA\_ST 4080, CNST\_DEM 4080; cross-leveled with PEA\_ST 7080, HIST 7080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.

**Credit Hours:** 3

---

**HIST 4085: Special Problems in History**

Independent investigation leading to a paper or project.

**Credit Hour:** 1-6

**Prerequisites:** Department consent required

---

**HIST 4085H: Special Problems in History - Honors**

Independent investigation leading to a paper or project.

**Credit Hour:** 1-99

**Prerequisites:** Honors eligibility required

---

**HIST 4085W: Special Problems in History - Writing Intensive**

Independent investigation leading to a paper or project.

**Credit Hour:** 1-6

**Prerequisites:** Department consent required

---

---

**HIST 4100: American Cultural and Intellectual History to 1865**

(same as CNST\_DEM 4100; cross-level with HIST 7100). Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.

**Credit Hours:** 3

---

**HIST 4200: American Cultural and Intellectual History Since 1865**

Tensions and transformations in American culture to the present. Topics include: spiritual crisis in Christianity; rise of welfare state liberalism; socialist and feminist alternatives; literature and the arts.

**Credit Hours:** 3

---

**HIST 4220: U.S. Society Between the Wars 1918-1945**

(cross-leveled with HIST 7220). Detailed examination of American history from end of World War I to end of World War II.

**Credit Hours:** 3

---

**HIST 4230: Our Times: United States Since 1945**

(cross-leveled with HIST 7230). Detailed examination of American history from end of World War II to the present.

**Credit Hours:** 3

---

**HIST 4235: The Wire: Race, Urban Inequality, and the 'Crisis' of the American City**

(cross-leveled with HIST 7235). The HBO series 'The Wire', a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, 'The Wire' complicates understandings of the 'urban crisis' through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality.

**Credit Hours:** 3

---

**HIST 4240: History of the New South**

(cross-leveled with HIST 7240). Study of the South since 1860.

**Credit Hours:** 3

---

**HIST 4250: U.S. Foreign Relations, 1898-1945**

(cross-leveled with HIST 4250). A history of American Foreign Policy from the Spanish American War to the end of World War II.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 4260: The Age of Ascendancy: U.S. Foreign Relations, 1945 - Present**

(same as PEA\_ST 4260; cross-leveled with HIST 7260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.

**Credit Hours:** 3

**Prerequisites:** sophomore standing

---

**HIST 4270: African-Americans in the Twentieth Century**

(same as BL\_STU 4270; cross-leveled with HIST 7270, BL\_STU 7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

**Credit Hours:** 3

---

**HIST 4280: America in the Reagan Years**

(cross-leveled with HIST 7280). Examines the major political, economic, social, and cultural currents and developments of the 'Long Eighties,' from Jimmy Carter's 'malaise speech' of July 1979 to Bill Clinton's mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.

**Credit Hours:** 3

---

**HIST 4290: Innovation in 20th and 21st Century America**

(cross-leveled with HIST 7290). This course focuses on innovations that have shaped our world and the people behind them, from Edison and the introduction of electric light to airplanes, transistors, semiconductors, fracking, subprime mortgages, televangelism, Uber, and Airbnb. The idea is not to determine which innovations are most important, but to examine how innovations are created and why some are successful and others are not.

**Credit Hours:** 3

---

**HIST 4303: Black Studies in Race, Class, Gender and U.S. Policy**

(same as BL\_STU 4303; cross-leveled with HIST 7303, BL\_STU 7303). Examines the causes and effects of the vast social and economic inequalities that exist between blacks and whites in US society, including the role federal, state and local government plays in creating and addressing such inequalities as financial, tax, environmental, trade, and foreign policies as well as issues of human and social welfare.

**Credit Hours:** 3

---

**HIST 4310: Adoption, Child Welfare and the Family, 1850-Present**

(same as WGST 4310; cross-leveled with HIST 7310 and WGST 7310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meaning of adoption since 1850; historical connections between adoption and poverty, family, gender race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

**Credit Hours:** 3

---

**HIST 4400: History of American Law**

(same as CNST\_DEM 4400; cross-leveled with HIST 7400). American law from English origins to present. Reviews common law, codification, legal reform movements, slavery law, administrative state, formalism, legal realism, jurisprudential questions concerning rule of law.

**Credit Hours:** 3

**Recommended:** HIST 1100, HIST 1200, or HIST 1400

---

**HIST 4415: African Americans and American Justice**

(same as BL\_STU 4415; cross-leveled with HIST 7415, BL\_STU 7415). This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

**Credit Hours:** 3

---

**HIST 4415W: African Americans and American Justice - Writing Intensive**

(same as BL\_STU 4415W; cross-leveled with HIST 7415, BL\_STU 7415). This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

**Credit Hours:** 3

---

**HIST 4425: The Superhero in American Culture From Washington to Wolverine**

This course aims to help students become better informed and more critical consumers of popular culture by situating a selection of important American works and genres within the historical context of their creation, and in the history of American culture. Students will be challenged to look for historical patterns in popular culture and to consider the particular habits of thought and action that American popular culture seems to reinforce.

**Credit Hours:** 3

**Prerequisites:** HIST 1100 or HIST 1200 or HIST 1400 or HIST 2210

---

**HIST 4430: The Great West in American History**

(cross-leveled with HIST 7430). Historical development of major regions, with emphasis on response to environment, public land policy, role of government in economic and resource development, citizen action, and cultural pluralism.

**Credit Hours:** 3

---

**HIST 4440: History of the American Environment**

(cross-leveled with HIST 7440). A reading and discussion course exploring diverse responses to the changing American environment from early man to the present, including ecological, institutional, and philosophical aspects.

**Credit Hours:** 3

---

**HIST 4445: American Political Economy from the Commerce Clause to the Great Recession**

This course examines the history of the American political economy from the founding of the United States to the recent Great Recession. Scholars of political economy explore the ways in which politics and public policy intersect with economics, such as the operation of the institutions like the tax system, the first and second Banks of the United States in the late 18th and early 19th centuries, and the Federal Reserve after 1913. We will focus on efforts by the U.S. federal government to regulate the American economy and bring economic affairs under the control of the American people and their representatives through a wide variety of

political, legal, and institutional mechanisms. A specialized knowledge of economics is not required for this course.

**Credit Hours:** 3

---

**HIST 4445W: American Political Economy from the Commerce Clause to the Great Recession - Writing Intensive**

This course examines the history of the American political economy from the founding of the United States to the recent Great Recession. Scholars of political economy explore the ways in which politics and public policy intersect with economics, such as the operation of the institutions like the tax system, the first and second Banks of the United States in the late 18th and early 19th centuries, and the Federal Reserve after 1913. We will focus on efforts by the U.S. federal government to regulate the American economy and bring economic affairs under the control of the American people and their representatives through a wide variety of political, legal, and institutional mechanisms. A specialized knowledge of economics is not required for this course.

**Credit Hours:** 3

---

**HIST 4500: Philip II and Alexander the Great of Macadonia**

(cross-leveled with HIST 7500). Concentrates on the history and politics of Greece during reigns of these two kings along with Alexander's military conquests and various controversies from the period.

**Credit Hours:** 3

---

**HIST 4510: Crime and Punishment: Law in Classical Athens**

(cross-leveled with HIST 7510). Examines the main principles of Athenian law and judicial procedures including history of law code and study of actual speeches from a variety of law suits and procedures.

**Credit Hours:** 3

---

**HIST 4515: Power and Oratory in Ancient Greece**

(cross-leveled with HIST 7515). Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

**Credit Hours:** 3

---

**HIST 4520: The Rise and Fall of the Roman Republic**

(cross-leveled with HIST 7520). Analysis of the downfall of Republican institutions and the origins of autocracy, from the Gracchi to the death of Augustus in A.D. 14.

**Credit Hours:** 3

---

**HIST 4530: The Roman Empire**

(cross-leveled with HIST 7530). Roman imperialism; management of, and rebellion in, the Empire; cultural exchange between Rome and its provinces.

**Credit Hours:** 3

---

**HIST 4535: Monastic Worlds**

(same as REL\_ST 4535, MDVL\_REN 4535; cross-leveled with REL\_ST 7535, MDVL\_REN 7535). Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and

early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. Following two weeks of online course modules, students will travel to the Benedictine communities of Conception Abbey in Conception, Missouri and Mount Saint Scholastica's in Atchison, Kansas, for additional face-to-face classes and research projects. On-site, students will participate in communal living and attend face-to-face classes on the historical and cultural worlds of medieval and early modern Europe. They will practice ethnography through observation of and participation in communal life of prayer, study, book production, and labor. Students will also have the opportunity to work with the manuscripts and rare books owned by these communities and visit the largest reliquary collection in North America, housed at the nearby Benedictine community of the Sisters of Perpetual Adoration in Clyde, MO. This course has an associated fee. Contact teaching faculty for this year's fee details. Graded on A/F basis only.

**Credit Hours:** 3

---

#### **HIST 4540: The Later Roman Empire**

(cross-leveled with HIST 7540). Political, religious and cultural life in Late Antiquity, from the 'soldier emperors,' to the barbarian kingdoms and early Byzantium.

**Credit Hours:** 3

---

#### **HIST 4550: Age of the Vikings**

(cross-leveled with HIST 7550). Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement.

**Credit Hours:** 3

**Prerequisites:** junior standing required

**Recommended:** HIST 1500, HIST 1540, HIST 1600 or HIST 2560

---

#### **HIST 4550W: Age of the Vikings - Writing Intensive**

(cross-leveled with HIST 7550). Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement.

**Credit Hours:** 3

**Prerequisites:** junior standing required

**Recommended:** HIST 1500, HIST 1540, HIST 1600 or HIST 2560

---

#### **HIST 4555W: Medieval France - Writing Intensive**

(cross-leveled with HIST 7555). This course covers the area that became the kingdom of France from the end of the Roman era until the end of the Hundred Years War; emphasis on political and cultural developments.

**Credit Hours:** 3

**Prerequisites:** junior standing

**Recommended:** Previous coursework in medieval history

---

#### **HIST 4560: The Crusades**

(cross-leveled with HIST 4560). Survey of the European crusading movement from its inception in the late eleventh century to its decline during the later Middle Ages.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

#### **HIST 4580: The 'Making' of Modern Europe: Identity, Culture, Empire**

(cross-leveled with HIST 7580). This course will explore some of the ideas, institutions and events that shaped modern Western civilization and thought, focusing on Western Europe, but also giving attention to the relationship between the West and the rest of the world. The course will introduce topics such as the rise of, nationalism, the cult of science, scientific racism and sexism, consumer mass culture, fascist ideology, existentialism, psychoanalysis, the modern city, gender and sexuality.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

#### **HIST 4585: Rome from Fascism to Liberation, 1922-1944**

In this course we will explore the history of Fascism and German occupation in Italy through the city of Rome. We will study how fascism remade Rome, the arrival of the Germans, the history of the Jewish community and the deportations and the resistance.

**Credit Hours:** 3

---

#### **HIST 4605: Early Modern Spain, 1450-1750**

(cross-leveled with HIST 7605). In this course, we begin with Fernando and Isabel, whose marriage brought together the two principle territories of Castile and Aragon, leading to the beginnings of a 'united' Spain. As we trace the political and social history of Spain through the early modern era, we'll also be examining the many myths surrounding Spanish history including topics such as the Columbus' voyages, the Spanish Inquisition and the Black Legend.

**Credit Hours:** 3

---

#### **HIST 4620: Modern England**

(cross-leveled with HIST 7620). Surveys British history in the 18th and 19th centuries. Emphasizes social and economic change.

**Credit Hours:** 3

---

#### **HIST 4625: Nature vs. Nurture: The History of a Debate**

(cross-leveled with HIST 7625). The purpose of this course is to explore the debate on nature vs. nurture in human society from the late eighteenth century to the present. The goal of this course is to give biology, history, and social science (including journalism) majors a better understanding of how this debate between nature and culture has played out over the past 250 years, and what impact it has left on biology, the social sciences, and public discourse today.

**Credit Hours:** 3

---

#### **HIST 4630: The Age of the Renaissance**

(cross-leveled with HIST 7630). Major changes in European economic, social, political, religious, and intellectual life between 1250-1500. Humanism and Renaissance. The 'Renaissance problem'.

**Credit Hours:** 3

---

#### **HIST 4640: The Age of the Reformation**

(cross-leveled with HIST 7640). State of Europe about 1500. Political, diplomatic, social, and intellectual changes to 1648. Humanistic reform

movements. Protestant-Catholic Reformation. Development of the modern state and international relations.

**Credit Hours:** 3

---

**HIST 4645: Witchcraft and Witch Hunting in Pre-Modern Europe**

(cross-leveled with HIST 7645). The surviving evidence indicates that between 1400 and 1700, at least 50,000 women, men, and children were executed for practicing witchcraft. Is there an explanation for this? Does it make any sense in terms of the intellectual, religious, social, political, and economic contexts of this period in European history? Fundamental to this course are the assumptions that there are many, not one, reasonable explanations for witchcraft beliefs and persecutions, and that when studied in terms of the various historical contexts this phenomenon must be understood as an integral part of European society during these centuries.

**Credit Hours:** 3

---

**HIST 4650: Revolutionary France, 1789-1815**

(cross-leveled with HIST 7650). Revolutionary upheavals of the revolutionary-Napoleonic era, which destroyed traditional French society and laid the basis for modern France.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**HIST 4660: Gender, War, and Migration: Europe, 1914 to the Present**

(same as WGST 4660; cross-leveled with HIST 7660, WGST 7660). Scholars have long recognized the fundamental ways that war and migration marked the lives of European women and men in the 20th century, and yet, rarely have they focused on the interrelations between mobilities, violence and gender. This class explores how war and mass migrations inscribed new gendered, racial and class hierarchies into the European landscape, and created new kinds of political and social divides. The total wars of World War I and World War II, requiring the participation of civilians and soldiers, erasing lines separating the home front from the battlefield, forcing millions to flee their homes, and drawing men and women from the colonies into the war effort reshaped notions of gender, work, family, nation and citizenship within Europe. The subsequent wars of decolonization and post war migrations, followed by the conflicts that erupted at the end of the Cold War challenged the postwar gender ideals underpinning the European welfare state and the European Union, and fueled the rise of contemporary xenophobic and racist populist movements. Course materials will include historical monographs, articles, novels, memoirs and films.

**Credit Hours:** 3

---

**HIST 4670: From the Holy Roman Empire to the First World War: German History, 1750-1918**

(cross-leveled with HIST 7670). Cultural, social and political history of Central Europe from 1800 to 1914. A case study in incomplete modernization, focused on industrialization, unification, cultural crisis and imperialism.

**Credit Hours:** 3

---

**HIST 4670W: From the Holy Roman Empire to the First World War: German History, 1750-1918 - Writing Intensive**

(cross-leveled with HIST 7670). Cultural, social and political history of Central Europe from 1800 to 1914. A case study in incomplete modernization, focused on industrialization, unification, cultural crisis and imperialism.

**Credit Hours:** 3

---

**HIST 4680: From the Rise of the Nazis to the Fall of the Wall: German History in the Twentieth Century**

(cross-leveled with HIST 7680). Cultural, social and political history from 1914 to present day. Focus on world wars, national socialism, the holocaust, the cold war and the emergence of East and West Germany.

**Credit Hours:** 3

---

**HIST 4700: Imperial Russia, 1682-1825**

(cross-leveled with HIST 7700). Russia in the 18th and early 19th centuries, with special emphasis on the reigns of Peter I, Catherine II, and Alexander I.

**Credit Hours:** 3

---

**HIST 4710: The Russian Revolution**

(cross-leveled with HIST 7710). Analyzes the transformation of Russian society that produced the collapse of autocracy, efforts to create a parliamentary government, the Bolshevik seizure of power in 1917, and the civil war that followed.

**Credit Hours:** 3

---

**HIST 4800: Modern China and Japan: War, Imperialism and Memory**

(cross-leveled with HIST 7800). This course examines the interaction between Japan and China since the late nineteenth century in an effort to understand deeper historical reasons behind the rising tension in East Asia at the present time.

**Credit Hours:** 3

---

**HIST 4815: African History Through the Digital Medium**

(cross-leveled with HIST 7815). This course invites students to explore the history of Africa through the digital medium. It offers a hands-on approach to understand how knowledge about African history, culture, and society is produced and disseminated over the World Wide Web.

**Credit Hours:** 3

---

**HIST 4815W: African History Through the Digital Medium - Writing Intensive**

(cross-leveled with HIST 7815). This course invites students to explore the history of Africa through the digital medium. It offers a hands-on approach to understand how knowledge about African history, culture, and society is produced and disseminated over the World Wide Web.

**Credit Hours:** 3

---

**HIST 4821: Constitutionalism in the Americas**

(cross-leveled with HIST 7821). This course looks at the history of constitutions and constitutional democracy in the Americas as a whole - the United States and Latin America. The U.S. Constitution was a

pioneering document in the Americas, and this course examines the international influence of the United States' experiment with constitutional democracy. While the course will examine the inspiration of the U.S. Constitution, it will also examine republics that drew upon the same philosophical antecedents that inspired the founders of the United States but may have opted for different forms and practices.

**Credit Hours:** 3

---

**HIST 4821W: Constitutionalism in the Americas - Writing Intensive**

(cross-leveled with HIST 7821). This course looks at the history of constitutions and constitutional democracy in the Americas as a whole - the United States and Latin America. The U.S. Constitution was a pioneering document in the Americas, and this course examines the international influence of the United States' experiment with constitutional democracy. While the course will examine the inspiration of the U.S. Constitution, it will also examine republics that drew upon the same philosophical antecedents that inspired the founders of the United States but may have opted for different forms and practices.

**Credit Hours:** 3

---

**HIST 4840: History of the Mongols**

(cross-leveled with HIST 7840). In the 13th century, the Mongols went from warring tribes to the largest Eurasian empire in history. This course examines the Mongol tribes, Chinggis Khan's unification of the tribes, the Mongols rapid military victories across Eurasian and their equally rapid decline.

**Credit Hours:** 3

---

**HIST 4850: Traversing the Muslim World**

(same as S\_A\_ST 4850; cross-leveled with HIST 7850). The traveler's tale formed an important part of the medieval world's system of knowledge. This writing intensive seminar-style course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Battuta, Benjamin of Tudela and Marco Polo.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**HIST 4850W: Traversing the Muslim World - Writing Intensive**

(same as S\_A\_ST 4850; cross-leveled with HIST 7850). The traveler's tale formed an important part of the medieval world's system of knowledge. This writing intensive seminar-style course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Battuta, Benjamin of Tudela and Marco Polo.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**HIST 4860: Colonial Masculinity/Colonial Frontier**

(same as S\_A\_ST 4860; cross-leveled with HIST 7860). This writing intensive seminar-style course examines how the Indian Army acted as a colonial army in the British Empire, including Africa, the Boxer Rebellion, and the World Wars. Focus is on the role of the Indian Army, impact of the Sepoy Mutiny, and martial race ideology.

**Credit Hours:** 3

**Prerequisites:** junior standing

---

**HIST 4865: Buying Desire: History of Consumption**

(cross-leveled with HIST 7865). This course explores the history of consumption practice in various cultural contexts. The course is divided into four parts: 'Masses As Consumers', 'Selling/Consuming Cultures', 'Consumption as (Postcolonial) Modernity', and 'Consumption and the Nation'. Under each section are thematically related texts on particular cultural contexts. The reading of ethnographic texts on consumption is to be accompanied by critical discussions that locate consumption within the practices of the nation-state-making and global product-marketing.

**Credit Hours:** 3

---

**HIST 4867: North Korea: History, Political Economy, Culture**

(same as KOREAN 4867; cross-leveled with HIST 7867). The aim of this course is to survey North Korea's history, especially in terms of political economy and culture. Through several themes, we will examine the historical situations of North Korea from its beginnings in the postliberation period to the present, as North Korea undergoes monumental changes.

**Credit Hours:** 3

---

**HIST 4870: Southeast Asia Since the Eighteenth Century**

The general objective of this course is to introduce students to the fascinating world of Southeast Asia. We will look at the shared history of commodity, cultural, and religious exchanges that gave this region a collective character, as well as explore the historical conditions from which individual modern Southeast Asian state emerged.

**Credit Hours:** 3

---

**HIST 4880: Chinese Migration: From Yellow Peril to Model Minority**

(cross-leveled with HIST 7880). This course surveys Chinese emigration in the global context over the span of five centuries. We will pay special attention to the changing relationships between China and Chinese migrants. Our emphasis will be on history as a process of negotiation and contestation of heterogeneous groups or individuals through creative and selective activities.

**Credit Hours:** 3

---

**HIST 4900: Beltway History: American Constitutional Democracy in Theory and Practice**

(same as POL\_SC 4900, CNST\_DEM 4900). This course is an experiential overview of American political history for students participating in the Kinder Forum's Washington internship program, showing how American constitutional democracy was developed and implemented right here on the Potomac, as much as possible in the actual places where the events occurred. Emphasis will be placed on the interplay between constitutional theory and actual political experience over time, and the tensions and institutional changes that emerged as Americans and their government coped with cataclysmic social changes, unparalleled economic development, and fearsome international challenges.

**Credit Hours:** 3

---

**HIST 4904: Historical and Contemporary Slavery**

(same as BL\_STU 4904). An exploration of slavery in both its historical and contemporary context, focusing on the origins, characteristics, and struggles to abolish the practice. Historical slavery examined using

African enslavement in the Americas, and contemporary slavery using human trafficking and forced labor in the developed and developing world.

**Credit Hours:** 3

---

**HIST 4910: History in the Public: An Introduction to the Theory and Practice of Public History**

(cross-leveled with HIST 7910). The purpose of this course is to introduce students to the world of public history, the central questions and debates in the field, and to offer students the opportunity to practice public history.

**Credit Hours:** 3

---

**HIST 4910W: History in the Public An Introduction to the Theory & Practice of Public History - Writing Intensive**

(cross-leveled with HIST 7910). The purpose of this course is to introduce students to the world of public history, the central questions and debates in the field, and to offer students the opportunity to practice public history.

**Credit Hours:** 3

---

**HIST 4940: Internship in History**

Professional training in history and archive-related fields. Graded on S/U basis only.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4970: Undergraduate Seminar in Third World History**

Readings in selected problems in the history of Africa, Asia or Latin America with reports and discussion.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4970W: Undergraduate Seminar in Third World History - Writing Intensive**

Readings in selected problems in the history of Africa, Asia or Latin America with reports and discussion.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4971: Undergraduate Seminar in European History**

Readings in problems in European history with reports and discussion.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4971W: Undergraduate Seminar in European History - Writing Intensive**

Readings in problems in European history with reports and discussion.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4972: Undergraduate Seminar in American History**

Readings in selected problems in American history with reports and discussion on selected topics.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4972W: Undergraduate Seminar in American History - Writing Intensive**

Readings in selected problems in American history with reports and discussion on selected topics.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4975: Journal on Constitutional Democracy**

(same as POL\_SC 4975, CNST\_DEM 4975). The Journal is sponsored by the Kinder Institute on Constitutional Democracy and staffed by current and former participants in the Institute's undergraduate Society of Fellows program. Each volume of the Journal is organized around a student-selected idea or era central to the historical development and philosophical foundations of constitutional democracy in the United States. Student-authored essays address this theme via arguments and historical overviews crafted from the close reading and analysis of primary source documents, with the exception being that participating in the Journal will relate back to and advance students' study of American political thought and history.

**Credit Hour:** 1-3

---

**HIST 4980: Undergraduate Thesis in History**

Individually directed research leading to a senior thesis.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4981: Undergraduate Thesis in History**

Continuation of HIST 4980.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4981W: Undergraduate Thesis in History - Writing Intensive**

Continuation of HIST 4980.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4995: Honors Thesis in History**

Research and completion of the thesis required for graduation with Honors in History.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4995W: Honors Thesis in History - Writing Intensive**

Research and completion of the thesis required for graduation with Honors in History.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4996: Honors Thesis in History**

Continuation of HIST 4995.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 4996W: Honors Thesis in History - Writing Intensive**

Continuation of HIST 4995.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 7000: Age of Jefferson**

(cross-leveled with HIST 4000, CNST\_DEM 4000). Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.

**Credit Hours:** 3

---

**HIST 7004: Topics in History - Social Science**

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Graduate students will be expected to complete additional reading and writing assignments commiserate with graduate level course requirements. May be repeated to maximum of 6 hours.

**Credit Hours:** 3

**Prerequisites:** departmental consent

---

**HIST 7010: The Age of Jackson**

(cross-leveled with HIST 4010). This course will examine American politics, society and culture in the 1820's, 1830's, and 1840's. Considerable attention will be devoted to Andrew Jackson himself, as a figure who both shaped and represented his era, for better or worse.

**Credit Hours:** 3

---

**HIST 7030: History of the Old South**

(cross-leveled with HIST 4030). Study of the South to 1860.

**Credit Hours:** 3

---

**HIST 7040: Slavery and the Crisis of the Union: The American Civil War Era**

(cross-leveled with HIST 4040). This class explores the history of the Civil War era, a transformative moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime 'nationalisms' that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, 'total' warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a 'second American revolution'? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least, how did the triumph of the Union condition the political and economic development of a rapidly globalizing world? Graded on A-F basis only.

**Credit Hours:** 3

---

**HIST 7060: The Period of the American Revolution, 1760-1789**

Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.

**Credit Hours:** 3

---

**HIST 7070: Indians and Europeans in Early America**

(cross-leveled with HIST 4070). A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada.

**Credit Hours:** 3

---

**HIST 7080: American Foreign Policy from Colonial Times to 1898**

(same as PEA\_ST 7080; cross-leveled PEA\_ST 4080, HIST 4080, CNST\_DEM 4080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.

**Credit Hours:** 3

---

**HIST 7100: American Cultural and Intellectual History to 1865**

(cross-leveled with HIST 4100, CNST\_DEM 4100). Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.

**Credit Hours:** 3

---

**HIST 7220: U.S. Society Between the Wars 1918-1945**

(cross-leveled with HIST 4220). Detailed examination of American history from end of World War I to end of World War II.

**Credit Hours:** 3

---

**HIST 7230: Our Times: United States Since 1945**

(cross-leveled with HIST 4230). Detailed examination of American history from end of World War II to the present.

**Credit Hours:** 3

---

**HIST 7235: The Wire: Race, Urban Inequality, and the 'Crisis' of the American City**

(cross-leveled with HIST 4235). The HBO series 'The Wire', a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, 'The Wire' complicates understandings of the 'urban crisis' through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality. Graded on A-F basis only.

**Credit Hours:** 3

---

---

**HIST 7240: History of the New South**

(cross-leveled with HIST 4240). Study of the South since 1860.

**Credit Hours:** 3

---

**HIST 7260: The Age of Ascendancy: U.S. Foreign Relations, 1945-Present**

(same as PEA\_ST 7260; cross-leveled with HIST 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.

**Credit Hours:** 3

---

**HIST 7270: African-Americans in the Twentieth Century**

(same as BL\_STU 7270; cross-leveled with HIST 4270, BL\_STU 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

**Credit Hours:** 3

---

**HIST 7280: America in the Reagan Years**

(cross-leveled with HIST 4280). Examines the major political, economic, social, and cultural currents and developments of the 'Long Eighties,' from Jimmy Carter's 'malaise speech' of July 1979 to Bill Clinton's mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.

**Credit Hours:** 3

---

**HIST 7290: Innovation in 20th and 21st Century America**

(cross-leveled with HIST 4290). This course focuses on innovations that have shaped our world and the people behind them, from Edison and the introduction of electric light to airplanes, transistors, semiconductors, fracking, subprime mortgages, televangelism, Uber, and Airbnb. The idea is not to determine which innovations are most important, but to examine how innovations are created and why some are successful and others are not.

**Credit Hours:** 3

---
