Sen. Danforth tours Schweitzer Hall, supports Amendment 1

Passage of Amendment 1 is needed if the University's research activities are to be on the "cutting edge of science," U.S. Sen. John Danforth (R-Mo.) said Saturday, during a tour of Schweitzer Hall on the Columbia campus.

The Amendment would authorize the state to issue \$600 million in bonds for economic development and capital improvements. An estimated \$45 million of those funds could be appropriated over the next five years to UMC for construction and renovation projects, including the remodeling of Schweitzer Hall.

The 70-year-old building was closed in 1979 because of low-level radiation contamination resulting from radium and thorium ore processing conducted there during the 1920s and 1930s.

Schweitzer Hall requires \$3 million worth of renovation work to bring it into compliance with state and federal standards. In 1979, \$150,000 was appropriated by the University for the initial cleaning and repairing of the walls, floors and roof.

Danforth pointed out that the bond issue "is a painless way to maintain quality facilities for research and education."

He said that the end of federal general revenue sharing funds has made it necessary for the state to look elsewhere for the financing of capital improvements projects. "The federal government—which previously has been looked upon as being almost a bottomless source of funds for all kinds of good causes—is broke."

Danforth added that "it is unlikely that state government is going to be able to produce dramatic new sources of revenue to provide for major needs such as this."

"That leaves us two alternatives," Danforth said. "We could decline.... Unless we want to decline and to rule out a meaningful and exciting future, we must vote to approve Amendment 1."

An important aspect of the bond issue, he said, was that it would require no tax increase but would "finance itself" from the resulting growth and expansion of the state's economy.

Some 57,000 jobs could be created if Amendment 1 is passed and "at a time when some two hundred and some odd thousand Missourians are out of work...that's important."

Larry Boehm

Sen. John Danforth (second from left) tours Schweitzer Hall, which was closed in 1979 due to low-level radiation contamination. Accompanying Danforth on the tour are (from left) Duane Stucky, director of Institutional Research and Planning and deputy to the chancellor; UM President James C. Olson; Jim Clark, legislative director for ASUM; and Charles Lobeck, dean of the School of Medicine.

Staff Council endorses bond issue, urges co-workers to vote

The Staff Advisory Council has passed a resolution endorsing Amendment 1, the \$600 million state bond issue which could provide \$45 million in renovation and construction funds to the UMC campus.

Pat Ives, Council chairwoman, encouraged Council members to urge co-workers to vote June 8 for the bond issue. Ives stressed that Amendment 1 would provide a boost for the economy of the entire state without an increase in taxes.

"If the state revenue situation improves as a result of the boost provided by the bond issue," Ives said, "general operating funds will also

increase, which could benefit the University."

Ives added that the need for the state bond issue has increased as a result of the decline in federal revenue sharing funds to finance projects across the state.

The Council also urges all staff to respond to the chancellor's letter asking for opinions on the budget reductions. Members expressed concern that many staff were not writing to the chancellor because they believe it is too late. Ives explained that the Chancellor's Office is still accepting and reading letters and the opinions stated will be considered.

In other business at last week's meeting, the Council voted approval of an indirect compensation proposal drafted by a four-campus ad hoc committee appointed by UM President James Olson.

The committee submitted a report on proposed policies to Olson who sent it to the four chancellors for their review. Chancellor Barbara Uehling submitted the report to the Staff Council for their comments.

The proposal would eliminate the two floating holidays, traditionally held on the days following Christmas and New Year's, and the holiday on Friday of Spring Break.

In place of these three predetermined holidays, the proposal establishes four days of personal leave to be taken at the employee's discretion with supervisor approval.

In addition to the four personal leave days, the report also proposes two extra days of vacation.

Besides more personal vacation days, the report proposes changes in the accumulation of vacation. "One of the nicest things about the proposal," reported Ron Haffey, vice chairman of the Council, is that it allows an employee to accumulate up to two times what he or she earns annually in vacation.

For example, an employee who earns four weeks of vacation per year could now accumulate up to eight weeks vacation credit without losing any vacation. The current guidelines allow an employee to carry over only one week of vacation.

The proposal also allows retiring employees to receive credit toward retirement benefits for their accrued sick leave. The Council would like the

proposal also to allow for unused sick leave days to be used as service credit toward earlier retirement. For example, an employee who has accumulated 90 days of sick leave could retire 90 days before his or her retirement age.

The Ad Hoc Committee also discussed an educational assistance plan for employees' dependents, but no recommendation was forwarded.

The Council did endorse the report in its present form, but when the policies are put into effect, the Council would like two concerns addressed.

First, the Council is concerned that employees working in small offices would be penalized by the proposed personal leave policy. The proposal would require all offices to be open during the traditional floating holidays following Christmas and New Year's. There would be a possibility under this proposed policy that in the small offices, an employee wanting vacation might have to work in order to keep the office open. In larger offices, there would be a greater possibility of soliciting a skeleton crew to keep the office open.

Second, the Council feels a desirable benefit to be considered is an educational assistance plan for employees' dependents.

Haffey also reported that the system-wide staff layoff policy drafted by Ken Hutchinson, UMCA assistant vice president of Personnel Services and Staff Relations, is under discussion. Council members do not endorse the proposal because they feel it is too vague, Haffey said.

The Council Task Force which has been working to develop

Election to be held Tuesday, June 8, at new locations

Faculty and staff are urged to vote June 8 on the state's \$600 million bond issue.

"I sincerely hope that all faculty and staff will choose to support this campus by voting 'yes' on June 8," said Sharon Yoder, chairwoman of the University Committee to Approve Amendment 1. "Passage of this amendment would substantially benefit the Columbia campus by providing as much as \$45 million for renovation and construction projects."

UM President James C. Olson has encouraged faculty and staff to vote for the \$600 million bond

issue. In a letter distributed with University paychecks, Olson reminded those planning to vote by absentee ballot that the deadline for doing so was June 7.

Polling places have been changed for some Columbia voters. Residents of Precinct B in Ward IV, who formerly voted at the Broadway Christian Church, will be voting at the Fairview Elementary School on Fairview Lane. Residents of Precinct E, also in Ward IV, who formerly voted at St. Andrew's Lutheran Church, will be voting at the Russell Boulevard School, 1800 W. Rollins Road.

(Continued on page 4)

Around the campus

MAIL BALLOT RESULTS—On April 29, the Graduate Faculty Senate voted to have a mailed ballot for the following motion:

The program of study for the degree Doctor of Philosophy (Ph.D.) requires a minimum of 15 hours of 400-level coursework (excluding research, problems and independent study experiences) beyond the baccalaureate degree.

The results of the vote are: 48 in favor, 36 opposed to the motion.

THE HERBERT SCHOOLING CONCERT SERIES ENDOWMENT FUND is requesting contributions for the 1982-83 Concert Series.

Since ticket revenue pays only about 40 percent of the costs for the Concert Series, other sources are needed to finance the concerts.

Contributors' names are printed in each program for Concert Series performances and contributors are given priority seating whenever possible.

The contribution plan includes donation levels from \$10 to \$5,000. For more information, call the Concert Series at 882-3875 or stop by 135 Fine Arts.

REQUEST FOR ASSISTANCE—UMC is once again preparing to begin another Summer Orientation and Registration Program for new students and their parents from June 20 to July 20.

This year's programming will include a luncheon and a social hour for those parents who accompany their children to one of the sessions. Sharon Pope, Bill Seymour and Sam Cochran, coordinators of the Summer Welcome program, would like to request faculty and staff assistance for these two informal events.

The luncheon will be held in Rollins Cafeteria with students and their parents from 12:15 to 1 p.m. The social hour will be held from 3 to 3:45 p.m. in the Faculty Alumni Lounge in the Memorial Union, providing an opportunity for the parents of new students to meet faculty members to discuss any questions regarding the University.

Plans have been made to hold 17 sessions during the four-week period, when it is expected that more than 200 students per session and their parents will be on campus for two-day periods.

If you would be interested in attending any of the luncheons and/or social hours, contact Sam Cochran at 882-4634 or 882-3621 by June 7.

THE FRIENDS OF THE LIBRARIES has voted full support for the proposed state bond issue Amendment 1.

The organization is urging its more than 2,500 members to work for the amendment, which could improve University libraries and other educational facilities. The bond issue could bring the University \$71 million for new construction and \$20 million for much needed repair and replacement. In addition to the benefits for education, the bond issue could provide money to develop local water and sewer systems, transportation facilities, soil conservation programs and many other important statewide improvements.

Amendment 1 will not require a tax increase.

GUARANTEED STUDENT LOANS—TRUE: Federal financial aid to help students pay for education after high school has been reduced sharply. In fact, since 1980, federal allocations for student aid programs at UMC have dropped 47.4 percent.

FALSE: Because of new federal rules, the Guaranteed Student Loan (GSL)—a low-interest education loan—is no longer available to students whose

family annual gross income exceeds \$30,000.

"There has been much confusion over recent changes in federal financial aid programs, especially the GSL," says George Brooks, director of the UMC Student Financial Aids Office.

"The GSL is automatically available to students whose family annual gross income is equal to or less than \$30,000, but the new federal rules now require students with gross family incomes exceeding \$30,000 to submit documented proof of financial need.

Before this change, the GSL was a loan of convenience available to any college student, regardless of family income."

Brooks encourages students and parents to investigate GSL requirements before passing up the opportunity for the low-interest education loan.

"For families with incomes exceeding \$30,000, approval of a GSL application depends on factors such as the total number of family dependents, whether it is a single-parent household and the costs for tuition, books, room and board," he says. "It is possible, for example, that a student from a large family attending an expensive, private school could qualify for the GSL despite a high family income."

The GSL, a loan made by a bank, credit union or savings and loan association, is insured by either the federal government or guarantee agencies in each state. For new borrowers, the interest rate is 9 percent. For students who currently have a 7 percent GSL, the interest rate on additional GSLs will continue to be 7 percent. Undergraduate students may borrow up to \$2,500 a year and graduate students may borrow up to \$5,000 a year. Loan amounts are limited to cost of attendance at the student's school, less any other financial aid the student receives.

In addition to interest, the student will pay a non-refundable 5 percent "origination fee" and a 1 percent insurance premium. This money will be deducted from the student's loan check to help defray the federal government's costs for GSL interest subsidy. Although the student never receives this money, it will be included in the total amount the student must repay following graduation.

For more information and GSL applications contact the Student Financial Aids Office, 11 Jesse.

At this time there is no deadline for GSL applications, but Brooks recommends applying as soon as possible.

SPINAL CORD INJURY EDUCATION—The Missouri Regional Model Spinal Cord Injury System, located at the UMC Hospital and Clinics, is presenting education programs to mid-Missouri high schools on how to avoid such injuries.

Although traumatic spinal cord injury is possible at any age, 62 percent occurs in the 16- to 29-year-old age group. Males are four times more likely to sustain the injury than are females.

In addition, the frequency of this injury increases greatly in the summer months; two-thirds of all spinal cord injuries occur from May to August.

Three ways to avoid spinal cord injury are:

- wear seat belts
 - check the depth of the water before diving
 - limit alcohol consumption if planning to drive or be active.
- Once an injury has occurred, there are things that a bystander can do to minimize the risk of further injury:
- do not move the victim and tell the victim not to move him or herself.
 - call for trained assistance (911)
 - do not put that well-meaning pillow under the patient's head.

OPTIMIST CLUB—A new chapter of the Optimist Club is being formed for members from the south side of Columbia, particularly from the UMC campus, according to Maj. Jack Watring of the campus police.

Members of the club are holding organizational meetings at noon every Tuesday at the Campus Inn. Anyone interested in joining is welcome.

For more information, call Luke Chase evenings at 474-7324.

BOONVILLE VAN POOL—A vacancy is available on the Boonville van pool for UMC employees who work 8 a.m. to 5 p.m. Monday through Friday.

For more information, call David Mize at 882-6589.

A BAKE SALE to raise money for the Mid-Missouri Ronald McDonald House fund will be held Saturday, June 19, beginning at 10 a.m. at the Biscayne Mall.

Interested individuals may help by contributing baked goods to the sale.

The Ronald McDonald House will provide inexpensive lodging for out-of-town families whose children are receiving medical treatment in Columbia. The 10-bedroom house will be located south of the UMC Hospital and Clinics' visitor parking lot at the northeast corner of Monk Drive and Stadium Boulevard.

For more information about the bake sale, call Liz Anglen at 882-8391 or at 443-4659 during the evenings.

THE BED AND BREAKFAST SERVICE is seeking people who are interested in being either hosts or referrers for the nationwide program.

An organized system of referrers, hosts and a special travel book make this service easily accessible and economical for people traveling across the United States, Canada and Mexico.

The standardized prices are \$18 per couple in a standard home to a maximum of \$28 per couple in a normally high cost area. Thus, a spare bedroom or a telephone can be a tax credit and a source of income to hosts and referrers.

For more information, send a stamped, self-addressed envelope to Bed And Breakfast Service, P. O. Box 5025, Bellingham, WA 98227.

A BEGINNING PIANO CLASS for adults is being offered by UMC extension during the summer semester for credit or personal enjoyment.

Classes will be held Tuesdays and Thursdays, June 22 through July 29, from 6:30 to 8 p.m. in Room 1, Stewart Hall. A \$45 fee is charged. Enrollment is limited, and applications are due by June 18. For more information, call 882-7460.

SUBSCRIPTIONS—Effective June 1, 1982, purchase orders will no longer be issued for subscriptions. Departments are requested to send subscription invoice vouchers directly to Accounting Services, 23 Jesse, for payment.

Departments having questions should contact Dale Trask, senior buyer at 882-3201, extension 23.

EMERGENCY PURCHASE ORDER NUMBERS—Effective June 1 through June 30, the Purchasing Department will issue emergency purchase order numbers only upon receipt of a properly funded, coded and signed requisition on form UMUW 10.

This requirement is necessary to ensure the encumbrance of funds for the fiscal year 1981-1982.

For more information, contact Robert Menzel, senior buyer, at 882-3201, extension 29.

NEW X-RAY TECHNOLOGY now in use at the University Hospital and Clinics can significantly reduce the amount of radiation needed to make X-rays.

The system, the only one of its kind in mid-Missouri, can also provide better imaging detail.

Quality X-ray images of areas other than extremities may now be taken using only half as much radiation as conventional X-ray techniques, says Dr. Anthony Wilson, chief of diagnostic radiology.

Clearer images of extremities can now be obtained without increasing radiation dosage. Previously, larger dosages of radiation were required to order to show the fine details of finger and bone structures.

When an X-ray is taken, radiation strikes the body, where part of it is absorbed. The remaining radiation passes through and strikes a chemically treated screen, causing it to light up, which then exposes a sheet of film.

The system in use at the Hospital and Clinics has a highly sensitive screen coated with special rare-earth phosphors. These screens give off the same amount of light as conventional ones when bombarded at half the conventional radiation level, so patients receive only half the radiation dosage previously required.

The shorter radiation exposure time also helps prevent blurring caused by the patient's accidental movements, decreasing the need to re-take X-rays.

THE BUSINESS POLICY AND PROCEDURE MANUAL Office has a new address and telephone number, effective April 5.

The new address is Office of Assistant Vice President of Business Services, 225 University Hall. The new phone number is 882-2705.

EFFECTIVE WRITING WORKSHOP, sponsored by the Personnel Office and the Office of Human Resource Development, will assist participants in the development of effective writing skills.

Topics to be covered include organizing and developing ideas, using transitions, writing clearly and concisely, and identifying the principles of effective communication.

The workshop will be held from 10 a.m. to noon on June 7, 9, 11, 14, 16, 18, 21, 23, 25 and 28 in the Training and Development Conference Room in Lewis Hall. Terry G. Harris, from the UMC English department, will be the workshop instructor.

Enrollment is required. Call 882-4859 for more information and to enroll.

MUSEUM REINSTALLS PALESTINIAN MATERIAL—The Museum of Art and Archaeology has reinstalled its collection of artifacts from ancient Palestine, one of the best and most extensive of its kind in the United States.

(Continued on page 4)

MIZZOU WEEKLY

Vol. 3, No. 33

A publication of the University of Missouri-Columbia faculty and staff, published every Friday during the academic year and once a month during the summer by the Office of Internal Communication, University Relations Division, 606 Maryland Ave. News deadline is noon Friday of the week before the issue.

Advisory Board: Keith Sanders, Delmar Hatesohl, Roy Utz, Luverne Walton, Marjorie Marberry, Leroy Harrison, Harri Palmer, Jim Brechbuhler, Bob Derryberry, Lealure Tindall.

Editor: Diana Reese Gard
Asst. Editor: Barbara Smith Mellott
Editorial Staff: Susan Thornsberry
Patti Muck
Telephone: 882-6004

Past bond issues financed construction of UMC buildings

Constitutional Amendment No. 1, which will appear before Missouri's voters June 8, is not the first such bond issue in the state providing funds for construction of University buildings.

"Some of the buildings containing the most heavily used classrooms were constructed primarily with bond issue funds," said Sharon Yoder, chairwoman of the University Committee to Approve Amendment 1. "Middlebush Hall and the Arts and Science and Fine Arts buildings were built in the late 1950s with such funds."

Financing for those buildings came from the state's last major bond issue which was approved in 1957 and provided funds for 10 construction and renovation projects at UMC and three at UMR.

More than \$12.8 million of the \$75 million of bonds issued from 1958 to

1960 were appropriated to UMC for those projects. The bond issue was paid off in 1979.

Other UMC buildings partially funded by the bond issue were Agriculture, Stanley Hall and Electrical Engineering. Additions to Ellis Library and Tate Hall, as well as remodeling of McAlester Hall, also were financed by those bonds.

Since that time, the state of Missouri has generally relied upon federal funding, particularly general revenue sharing, for construction projects.

Bond issues to fund water pollution control, however, were passed by Missouri's voters in recent years; one for \$150 million in 1971 and another for \$200 million in 1979.

Appearing on the ballot June 8 is the state's most recent bond issue, known as Amendment 1, which, if approved, would provide \$600 million for economic development and capital improvements. Over a five-year period, \$390 million of those funds would be used to build facilities for higher education, mental health, public safety, expanded health care, parks and agriculture; \$90 million for economic purposes, including soil conservation, local water and sewer systems, transportation facilities and improvements to serve business and industry; and \$120 million for repair and upkeep of existing state facilities.

As much as \$71 million for construction and \$20 million for renovation projects could be allocated to the University's four-campus system over this five-year period.

Approximately \$45 million of those funds could go to the Columbia campus, Yoder said, where proposed construction projects include a new Health Sciences Library, Agricultural Engineering building, Law School building, Engineering laboratories and classrooms, small animal care facilities and a natural resources building.

Renovation projects include Ellis Library, Agricultural Experiment Station, Schweitzer Hall, Education Building, Read Hall, Sociology Building, Swallow Hall and Switzer Hall.

Yoder pointed out that the University's capital appropriations request for 1982-83 was more than \$46 million, but the Missouri General Assembly approved only \$2.76 million.

A state bond issue approved in 1957 provided funds for UMC construction and renovation projects, including the Arts and Science Building (top), the Fine Arts Building and Middlebush Hall, the Business and Public Administration Building.

People

KRISTIN K. OFFUTT, promotion manager for UMC radio station KBIA-FM, has been elected to serve a two-year term on National Public Radio's Public Information Advisory Committee. The committee of seven individuals represents NPR member stations across the country in advising NPR's public information department in Washington, D.C.

The committee meets quarterly to review the procedures and services provided by NPR's public information department to its more than 200 member stations. Members of the advisory committee are elected by the public information/promotion managers from member stations.

Offutt is a 1976 graduate of the UMC School of Journalism.

Seven UMC faculty were honored

April 22 at the spring banquet of the Missouri chapter of Gamma Sigma Delta, a UMC agricultural honorary society.

C.J. NELSON, professor of agronomy, received two Gamma Sigma Delta awards—the undergraduate superior teaching award in agriculture and the distinguished award in research.

RALPH R. ANDERSON, professor of dairy science, received the superior teaching award at the graduate level.

ROBERT R. HURST, associate professor of physics, received the superior teaching award that Gamma Sigma Delta presents annually to a faculty member outside the College of Agriculture who teaches a large number of undergraduate agriculture students.

DALE G. BLEVINS, associate professor of agronomy, received the distinguished junior faculty award in research.

NORMAN E. JUSTUS, superintendent of the UMC Southwest Missouri Center, Mount Vernon, and professor of agronomy, received the distinguished award in administration.

JOHN W. MASSEY, professor of animal science, received the distinguished award in extension.

HOMER J. L'HOTE, assistant director of the Agricultural Experiment Station, was recognized for long and meritorious service to the Gamma Sigma Delta International. He retired as international treasurer after 44 years of service and was presented a plaque by Herman Brown, international president from Texas A&M University. The Missouri chapter also recognized L'Hote by naming one of its undergraduate awards the Homer J. L'Hote Scholarship Award.

The new president-elect of the 140,000 member American Association for the Advancement of Science (AAAS) is **ANNA J. HARRISON**, who holds four

degrees from UMC.

Harrison is the fourth woman to assume the post in the nation's largest general scientific organization, which includes nearly 300 affiliated societies.

Now professor emeritus of chemistry at Mount Holyoke College, Harrison received a bachelor of arts degree from UMC in 1933, a bachelor of science in education in 1935, a master's in 1937 and, in 1940, a doctorate in chemistry.

JAMES E. WESTBROOK, interim dean of the UMC School of Law, has been elected president of the Central States Law School Association comprised of 15 law schools from Arkansas, Oklahoma, Missouri, Kansas, Nebraska and Iowa.

Member schools from the association exchange information on improving legal education. The organization has helped coordinate law library holdings and has presented programs on topics such as innovative teaching techniques.

This week

To list your department or division's events in the next *Mizzou Weekly*, write or call the Office of Internal Communication, 606 Maryland, 882-6004, by Friday two weeks before the event is scheduled.

All events are free and open to the public unless otherwise noted.

4 Friday

Friday Night Family Film: "The Muppet Movie," 9 p.m. or dark, Columbia Public Library parking lot.

7 Monday

UMC Chess Club: 7 p.m., 200A Waters Hall.

9 Wednesday

Medical Workshop: "The Problems of Dual Diagnosis: Administrative and

Program Issues," 8:45 a.m. to 4 p.m., Hilton Inn. Call 882-3910 for more information.

Museum of Art and Archaeology Lunchtime Tour: "Search for Apollo," award-winning film about UMC excavations in Cyprus, 12:25 p.m., 1 Pickard.

Microbiology Lecture: "Isolation and Characterization of Pleiotropic Mutants of *V. Cholerae* altered in Virulence," in defense of master thesis, Yassmin B. Mukhtar Ahmad, 1 p.m., M582 Medical Sciences.

Bring chairs or blankets.

12 Saturday

W.V. Brown Memorial Chess Tournament: Three-round Swiss-paired tourney, registration 8:15-9:15 a.m., first round at 9:45 a.m., entry fee \$12, 208 Middlebush. Call 882-4947 for more information.

Adopt a Pet: Presented by the Central Mo. Humane Society, 10 a.m. to 1 p.m., Columbia Public Library lobby. Call 445-1438 for more information.

Women's Center offers summer support groups, workshops

The UMC Women's Center is offering a variety of support groups and workshops this summer. Registration is required for all activities.

To register, visit the Center at 1 Gentry Hall, or call 882-6621 or 882-6549. Space is limited and groups are filled on a first-come, first-serve basis.

Most groups require an intake interview which is scheduled for the week before the group begins. All activities are free and open to the public.

Assertion Training:

Through assertion training, individuals can learn how to stand up for their rights without violating the rights of others. Assertion training enhances self-confidence by enabling a person to effectively and appropriately express feelings, beliefs and opinions. The following assertion groups will be offered this summer.

Assertion Training for Women: 6 to 8 p.m. on Mondays for six weeks beginning June 21.

Assertion Training for Women and Men: 8 to 10 p.m. on Mondays for six weeks beginning June 21.

Other support groups available:

Body Image Support Group: 6:30 to 8:30 p.m. on Wednesdays for six weeks beginning June 23, conducted by Luci Lee, Women's Center staff member.

This group is for women struggling to understand and/or accept their body images and eating behaviors. Our attitudes toward food and ourselves will be explored through movies, discussion and experiential exercises. Register by June 18.

Stress Management Group: 6 to 8 p.m. on Tuesdays and Thursdays for three weeks beginning June 22, conducted by Bob Reitz, Helping Professional from Fulton State Hospital staff, and Dorothy Sikyta, Women's Center staff member.

The goal of this group is to develop effective ways of coping with stress. Creative leisure planning, relaxation techniques, time management, fantasy and journal writing will be among the topics discussed. Members need not be experiencing stress to profit from this group. Register by June 18.

Support Group for Women in Transition: 6 to 8 p.m. on Tuesdays and Thursdays for three weeks beginning July 13, conducted by Dorothy Sikyta,

Women's Center staff member.

This is a support group for women experiencing a change in their lives. The group will focus on understanding ourselves in relation to change and to others, and will provide an opportunity to explore our values and beliefs as we go through change. Register by July 8.

Dialogue Among Women: (if sufficient interest).

This group will allow participants to examine their lives in terms of roles and feelings by helping them to understand the large culture in which we live. Issues discussed will be male/female relationships, female/female relationships and socialization. Register by June 25.

Workshops available this summer:

Bike Repair Workshop: 10 a.m. to 1 p.m. Saturday, June 26, conducted by Roxy Durham.

This workshop will familiarize you with the basic works of your bicycle and methods of maintenance and repair from basic to intermediate repair. Bring your bike and repair tools if you have them.

Financial Planning for Women in Transition: 7 to 10 p.m. Tuesday, June 29, conducted by Mary Epstein, marketing representative for TransAmerica Corp.

This is a workshop for women who are widowed, divorced, facing retirement, changing jobs or undergoing other life changes. It is mainly directed toward single women or women becoming single again but will be helpful to married women going through significant changes. Topics include the basics on taxes, stock market, money market funds, insurance, etc. This workshop does not assume participants have any previous knowledge of financial planning.

Breaking Up is Hard to Do: noon to 2 p.m. Wednesday, June 30, conducted by Janet Hibbel and Lisa Emmenegger, Ph.D. candidates in counseling psychology.

The ending of relationships brings a myriad of feelings and conflicts. Topics for discussion include how to survive the loss of a love, how to fall out of love, and how to hold yourself together when everything else is falling apart.

Specific Communication: 10 a.m. to 3 p.m. Saturday, July 17, conducted by David Patterson, from Frontier

Associates, and Luci Lee, Women's Center staff member.

This workshop for women and men will focus on verbal communication. A primary difficulty in communication

between people is a failure to be specific—much information is deliberately or inadvertently left out. Participants will discuss and practice completeness in communication.

Staff Council

(From page 1)

recommendations for a campus staff layoff policy will be meeting next week with Hutchinson to discuss their concerns.

Ives reported that the personnel office will be interviewing applicants for the UMC Director of Training and Development. Staff Council members have been invited to participate in the interviews.

Sandy Clark, Staff Development Committee co-chairperson, reported that Blake Danuser, UMca director of training and development, has plans to develop a system-wide survey to determine training needs on campus.

The Council also discussed possible changes to be made in the Staff

Recognition Week activities and procedures. The committee on Staff Recognition recommended that the nomination forms be revised.

Council members reported that there were still problems with employees receiving release time to attend Staff Recognition Week activities. Plans were made for next year to better advertise the fact that release time is available.

The Council also moved to continue Staff Recognition Week as a separate event, rather than combining it with other recognition events for employee groups, such as National Secretaries Week.

The next Staff Council meeting is scheduled for June 10 in 215 Brady Commons. All staff members are invited to attend.

Announcements

(From page 2)

The collection has not been on view for nearly two years, because a large percentage of it had been on loan to the Spertus Museum of Judaica in Chicago.

Among the many objects on display are pottery vases for eating and drinking, terracotta lamps, articles connected with personal adornment such as pins, a bronze mirror and a kohl, and bronze weapons such as swords, spearheads and arrowheads.

The exhibit is on view during regular museum hours from 12 to 5 p.m. Tuesday through Sunday. The museum is closed Mondays and holidays.

POISON TREATMENT

CENTER—University Hospital has recently been designated an official Poison Treatment Center by being part of a statewide network linked to the Poison Control Center at Cardinal Glennon Memorial Hospital for Children in St. Louis.

Information about poisoning is

available 24 hours a day by calling 882-8091, which is a direct line to the poison control center. If required, the center will advise callers to seek treatment at University Hospital's emergency room. At the same time, the hospital will be advised that someone with a particular type of poisoning is on the way.

A written treatment protocol, if needed, will be sent from St. Louis via telephone to University Hospital's teletype machine within minutes. The hospital also maintains its own comprehensive file on poison and poison treatment, which is updated several times a year.

University Hospital is the only official Poison Treatment Center in Columbia.

THE UNIVERSITY CAREER PLANNING AND PLACEMENT CENTER offers free assistance to area adults who are considering changing careers, returning to school or improving their job seeking skills.

The center is open from 5 to 9 p.m. Tuesdays. Call 882-6803 for an appointment.

Jobs

Staff openings

The following job openings at the University were approved and posted Tuesday, June 1, and include the department where the vacancy exists. The openings are listed under the name of the Personnel recruiting staff member handling the positions. For more information or to apply for a job, contact the appropriate recruiter at the Personnel Office, 309 Hitt St., at 882-4221.

CHARLES HUNTER
