

MIZZOU WEEKLY

University of Missouri-Columbia

Sept. 26, 1986

The Esterhazy Quartet will perform at 8 p.m. Sept. 29. See Calendar Highlights on Page 8.

Carole Patterson photo

Units increase efficiency

Emphasis on service means more business for campus units.

A penny saved is a penny earned. Benjamin Franklin's financial wisdom is the watchword at several Mizzou departments, where innovative ideas and programs have reduced service charges and increased business.

Consider the example of General Stores, the University's general maintenance and office supply store. It hired a marketing representative, reorganized its stock room and put special emphasis on staying up-to-date on products that the University needs.

"Our marketing rep is spreading our name around on campus and helping us stay current on what departments want in the way of office equipment," says Dan Johnson, assistant manager of the storeroom. "We've been able to get rid of obsolete stock and to bring in current products like computer diskettes." These and other changes resulted in a \$53,000 increase in sales from June 1985 to June 1986. General Stores had \$1.7 million in sales in 1985.

The marketing representative was added after a survey indicated that the General Stores name was largely unrecognized on campus. To build awareness, the marketing representative developed a comprehensive catalog of the store's products and began dealing with departments in person. Increased use of General Stores has enabled the department to buy a larger volume from vendors, resulting in lower product prices.

For instance, computer diskettes bought at volume prices were 50 percent below market price two years ago. That price continues to drop as more and more offices buy their diskettes from General Stores.

Other changes include adding a service counter and moving office and administrative staff to the same area for better communications. "We need to let customers know what we can do for them," says Guy Maddox, storeroom manager. "Nine times out of 10 we'll have the product they need at a cheaper price."

Efficiency also has paid off in Stenographic Services. Manager Dixie Van Hove says that because of close monitoring of expenses, her department has been able to reduce its service charge from 37 percent to 30 percent of the temporary employee's salary.

Another factor in the price reduction is customer satisfaction, Van Hove says, which has led to increased use of services. The number of requests for Steno Services' help increased from 566 in 1984-85 to 693 in 1985-86. "I've been more selective in hiring, and we've been doing a lot of training in the use of the various word processors and phones on campus," Van Hove says.

The department recently added a 5520 computer system to replace an outdated word processor. In the long run, Van Hove says, the department was spending as much on rental of the outdated system as it is investing in the 5520.

In another cost-cutting move, Van Hove sold outdated typewriters and replaced them with electric self-correcting models. The old typewriters had been stored away or lent to temporary employees without a fee. "These were expense items that we maintained service contracts on." Charging a fee to use the new machines means increased revenue for the department.

Over at A.K. Rahman's office they've been keeping an eye on Central Food Stores and the University Bookstore. Rahman began in 1984 as director of Memorial Union and Brady Commons. When he came to Mizzou, he inherited the Central Food Stores, formerly a UM operation.

Central Food Stores supplies goods to UM food service departments. It had been running at 17 percent commission cost for a long time. To cut costs, Rahman improved inventory control and communication with the Central Food Stores staff. Staff members who left or retired were not replaced, reducing the number of staff.

Rahman's plan worked. For the first time in more than a decade, Central Food Stores cut its costs by 2 percent, re-

ducing the service charge to 15 percent. Rahman's goal is to cut the cost to 13.5 percent.

"I couldn't have done this without the cooperation of the staff at Central Food Stores," Rahman says. He hopes that costs will be reduced further when Central Food Stores moves into its new building sometime next year. "The new building will improve efficiency and the quality of our product."

Rahman also is proud of increased sales at the University

Bookstore, where sales are up by 20 percent over last year. The store also has the highest buy-back rate for students' books. Rahman says that more students are patronizing the bookstore because prices, product quality and services have improved. Rahman credits those improvements to an eager new staff and the Valdine computer system that allows students to charge textbooks. The charge system uses the new University identification cards. A charge system for faculty and staff should be in operation soon, Rahman says.

A department united

Celebration marks opening of renovated Eckles.

Larry Boehm photo

William C. Stringer, chair of food science and nutrition, looks through the new window in his Eckles Hall office.

The \$1.4 million renovation of Eckles Hall, which brought together a department that had been scattered in five buildings, will be celebrated Sept. 29. "Coordination, cooperation and sharing of equipment are benefits of being in the same building," says William C. Stringer, professor and chair of the Food Science and Nutrition Department.

Festivities will begin at 11:30 a.m. in a tent west of the building, which is located off Rollins Road west of the College of Veterinary Medicine. A \$10 barbecue including roast loin of beef and a cake in the shape of Eckles Hall will begin at 12:15 p.m. For reservations, call 882-4113. Tours will begin at 2 p.m.

Luncheon speaker C. Peter Magrath, University president, will discuss "Impact of Food on Missouri's Economy." Also scheduled to speak are Roger Mitchell, dean of agriculture; Chancellor Barbara S. Uehling; James McHugh, president of Hussmann Technology; Denny Bond, general manager of Marriott Pavilion; William C. Stringer, department chair; and Wendell Arbuckle, MA '37, PhD '40, who will receive an alumni recognition award. Arbuckle is professor emeritus of dairy science at the University of Maryland.

Meritorious service awards will be presented to Dan Sidoti of Anheuser-Busch, a continuous supporter of Mizzou's food services program, and to Carl DiCapo of Italian Garden Restaurant in Kansas City, a continuous supporter of food science.

The renovation, which took about a year, is the second major modification to the original building, which was built at a cost of \$18,711 in 1910 for the dairy department. The building was named in honor of C.H. Eckles, chair of dairy husbandry from 1901 to 1919, after an addition was built in 1938. Another addition, totaling 15,000 square feet, is planned for the meat laboratory and other research facilities. The meat laboratory currently is located in the Agriculture Building.

PROFESSORS STUDY KEYBOARD SKILLS

Computer keyboarding skills should be taught to children as early as third grade, according to a study completed by Lonnie Echternacht and Jo Behymer, associate professors of practical arts and vocational-technical education.

The study, "Keyboarding Instruction—A Comparison of Second and Third Grade Students," evaluated 80 Columbia public school pupils.

Echternacht and Behymer concluded that third-graders achieved higher gross-words-per-minute speeds than second-graders. Availability of computers in homes of students contributed significantly to their speed.

Also, it was easier for students

to learn keyboarding on a microcomputer than a typewriter because they are motivated by seeing letters on the screen and because the keyboards are quieter.

Students learned best when equipment was properly maintained and positioned. The sex of the student was not related to learning keyboarding skills.

Some 82.2 percent of U.S. elementary schools currently use microcomputers for instruction.

CREAM OF THE CROP ENROLLS

Nearly half of this year's freshmen in the College of Agriculture ranked among the top 10 people in their graduating class. They had a high-school grade-point average of 3.43.

Animal sciences is the most popular major among the college's freshman class, chosen by 26 percent. Other top choices are agricultural economics and biochemistry.

"Studies across the country show that while the farm economy may be going through some tough times, there are still plenty of jobs available in food production, processing and a host of other businesses related to agriculture," says Dean Roger Mitchell.

PERSONNEL POLICY SEMINAR OFFERED

A seminar on personnel policy and resources will be offered from 9 a.m. to 4 p.m. Oct. 2 in the Education and Development Center in the Heinkel Building.

Charles Hunter and Roger Jett, personnel managers in Personnel Services, will discuss labor relations, wage/salary, classification, personnel records, employment, training and development.

The free seminar is designed for managers who wish to review personnel policies and resources. To register, call 882-4859.

Need Multiple Copies at Night or on Weekends?

Grants, manuscripts and proposals are not always written between 9 and 5. If you are working on projects in the evening or on weekends and "quick copy" is closed come to

Ellis Library Copy Service

On the second floor of the main library

We can run multiple copies, collate, and staple for you, all for only 5¢ a copy.

And, of course, we can also reduce, enlarge, make 11x17 copies and colored paper copies.

Hours: M-FRI 8-11 PM
SAT 9-9 PM
SUN Noon-Midnight

Provost asks for input from faculty

Provost Lois DeFleur asked Faculty Council's opinion of a proposed reorganization of her office at the Sept. 18 meeting. The provost had asked deans for their input earlier in the week.

DeFleur said she is trying to organize her office to be compatible with her style and reflect her priorities. She said she prefers organizing along functional lines, with more clearly defined areas of responsibility.

The present structure includes an assistant provost, an associate provost, a vice provost for extension who also serves as the UM associate vice president for academic affairs-extension and director of cooperative extension, and a vice provost for research and graduate studies who also is the graduate dean.

The proposed reorganization retains the two vice provost positions. There also would be an associate or vice provost for instruction or undergraduate studies, and an associate or vice provost for budget and academic personnel.

"I'm particularly interested in curriculum, instruction and teaching activities," DeFleur said of the instruction position. "It would be good to have someone who could stay on top of these issues."

Carl Settergren, professor of forestry, asked if DeFleur envisioned hiring new people to fill the positions. "I'm working that through," she said. "I'm motivated to do this for the needs of the organization. I have not connected them to people."

Food science and nutrition Professor Robert Marshall noted that the proposed structure separates undergraduate and graduate studies. Some faculty, he said, teach both levels. "We traditionally have separated the two," DeFleur said, "but that may not be the best thing to do."

Edward Metzen, professor of family economics and management, commented that issues related to academic personnel and budget affect all areas. The council planned to continue its discussion of the proposed reorganization at its Sept. 23 workshop.

Reporting on the Board of Curators, political science Professor David Leuthold said that amendments to the long-range plan will be presented to the board in December. "Most are editorial, but there probably will be some major amendments."

The proposed revisions remove some of the plan's original goals, said chemistry Professor John Bauman, council chair. "It doesn't say anything about achieving faculty salaries equal to average salaries in the Big Eight and Big 10, but it does address the salary question."

Leuthold also reported that faculty from all disciplines now are eligible to apply for research assistance act funding.

In other matters, the council heard a report on student recruitment from Chris Koukola, assistant vice chancellor for University Relations. The campus' new recruitment theme, "Meet Mizzou," is intended to increase awareness about Mizzou's quality, diversity and uniqueness.

Koukola thanked faculty for their assis-

tance during campus visits, noting that the number of visits by prospective students is up 52 percent this year. Koukola also encouraged faculty to participate in student-recruitment programs in communities throughout the state.

Honors College Director Ed Kaiser said he has warmed up to the term "Mizzou," which Koukola said was chosen after research indicated it was clearly identified with the University of Missouri-Columbia. Betty Crim, associate professor of nursing, said retention deserves as much attention as recruitment.

Mary Still, director of News Services, informed faculty of efforts to assist them in publishing articles in the media. The program is hoped to result in increased visibility for faculty.

Magrath names 13-member search group

University President C. Peter Magrath has announced a 13-member screening advisory committee to conduct a nationwide search for a new Mizzou chancellor. Barbara S. Uehling has announced her resignation effective Dec. 31.

The committee, headed by Truman Storvick, professor of chemical engineering, will recommend five to eight prospects to Magrath. The list is expected around Jan. 1.

Other members of the committee are Helen Anderson, professor of nutrition; Jay Barton, UM vice president for academic affairs; Michael Chippendale, professor of entomology; John Hall Dalton, an attorney in Kennett, Mo., and former curator; John M. Foley, professor of English; Milton D. Glick, dean of arts and science; Mary Lenox, dean of library and informational sciences; Joseph Moseley, Boone County prosecuting attorney and president of the Mizzou Alumni Association; Jo Pflieger, administrative assistant in veterinary microbiology and chair of Staff Advisory Council; Charles D. Schmitz, associate professor of education; Brad M. Scott, president of Missouri Students Association; and Robert B. Smith, director of University Hospital and Clinics.

Vol. 8

No. 5

A publication of the University of Missouri-Columbia faculty and staff, published every Friday during the academic year and twice a month during the summer by Publications and Alumni Communication, a department of Development, University and Alumni Relations Division, 1100 University Place, 882-7357. News deadline is noon Friday the week before publication. Annual subscriptions are available to retirees for \$10. Faculty Council and Staff Council communication committee members: Donald Anderson, Bob Derryberry, Gary Fields, Linda Holsinger, Gordon Kimber, C. Kirk Leeper, Mary Miller, Barbara Olson Smith and Donna Turner.

CREATIVE WAYS TO BOOST CALCIUM

Skimping on calcium today can lead to weak and brittle bones in later life, especially for women. To guard against osteoporosis, be sure to include calcium in your diet, says Lyn Konstant, extension nutritionist.

One of the cheapest and easiest ways is to add non-fat dry milk to recipes for casseroles and meatloaf. Cooked beans also are a good source of calcium.

Salmon and sardines with bones in them are good choices, too. Or try slicing tofu for use in stir-fry dishes. The cholesterol-free product is rich in protein and calcium.

HONORARY DEGREE NOMINATIONS DUE

The committee on honorary degrees invites nominations for 1987 honorary degree candidates.

Recipients may be people who have rendered outstanding service to the University or the state; graduates or former students who have achieved distinction; or a person of high distinction from this country or abroad who is not necessarily associated with the University or the state.

Nominations must contain a detailed biographical statement, a summary of relevant accomplishments and the nominee's current address.

Nominations of May 1987 commencement candidates are due Oct. 31. Candidates for August 1987

commencement must be nominated by Feb. 27. The committee welcomes nominations at anytime during the year for future commencements.

Candidates recommended by the committee must be approved by Faculty Council. The Board of Curators awards honorary degrees.

Send nominations to Samuel A. Werner, committee chair, 318 Physics Bldg., or any other members of the committee. Committee members are listed in Mizzou Weekly's 1986-87 committee supplement published Sept. 19.

Supercomputers join

A Midwestern data network that links Mizzou with seven other universities and five supercomputer centers goes on line this semester, thanks to a \$1 million National Science Foundation grant.

The computer network, MIDnet, will enhance research capabilities on each of the participating campuses.

Besides Mizzou, universities in the MIDnet network are Iowa State University, Oklahoma State University, University of Oklahoma, University of Nebraska-Lincoln, University of Kansas, Kansas State University and Washington University in St. Louis. Other UM campuses can access MIDnet through Mizzou computers.

The five NSF supercomputing centers are located at Cornell University in Ithaca, N.Y., the University of California-San Diego, Princeton University in New Jersey, the University of Illinois-Champaign-Urbana and the University of Pittsburgh.

The supercomputers will allow researchers to perform scientific computations at a high rate of speed. For example, a problem that may take a year to solve on a smaller machine can be solved overnight by a supercomputer.

Researchers must apply for a grant of computer time from NSF to access the supercomputers. Their requests are considered based on the scientific merit of the project. Researchers working on an NSF funded project automatically are granted

computer time.

"Because we have NSF support and superior facilities for hooking up to the supercomputers, our people will have a good chance at using the supercomputers, as well as an increased chance at research funding," says Bill Plummer, director of Campus Computing.

In the future, the NSF hopes to have a nationwide scientific link-up. MIDnet is one of the first pieces of that system. It is the second regional network funded by the NSF. The first system linked 17 universities in the Southeast.

"We got in on the ground floor with an idea that the NSF is very excited about," Plummer says. He says individuals from all eight campuses had approached NSF for supercomputer access. They secured the \$1 million grant when they joined forces to propose MIDnet.

The grant funds the lease of telephone lines which gives access to the network for three years. The universities pay any additional costs.

The NSF \$1 million grant continues the foundation's commitment to scientific computing. Plummer says the foundation made a major initiative in the field when it funded the five national supercomputer centers. "It was a key event to advancing science in the United States, especially for university researchers who want to gain access to high-level computers."

surface lots may be converted to green space as called for in the campus' master plan. The expansion of Brewer/Rothwell Gymnasium will eliminate some lots.

Concerning handicapped-parking spaces, Moore emphasized that 24-hour enforcement will continue. Signs identifying these spaces will be changed to blue, the official color for handicapped-parking symbols. A \$50 fine for violators is under consideration.

The committee also discussed metered parking on campus. Vehicles in student metered lots must have a student registration or student permit.

Visitor metered lots are reserved for visitors to campus. Family members of faculty and staff may use visitor metered lots if they visit campus. Employees may use visitor meters when space is available. Everyone using metered spaces, however, must deposit coins in the meter.

The committee's next meeting is tentatively scheduled for Oct. 16. The group will review parking problems and complaints received this semester, parking of official cars on core campus lots, and visitor parking, particularly for prospective students and job recruiters who visit campus.

at the airport in Karachi, Pakistan.

Gadde was studying microbiology. Gopal, who is part-owner of India Cuisine restaurant in Columbia, is a student in biological sciences. Gopal was hospitalized in Bombay with a gunshot wound to the thigh.

A memorial fund for Gadde has been established to assist Mizzou graduate students in microbiology. Donations may be sent to 3207 Honeysuckle Drive, Columbia, Mo. 65203.

440 parking meters are located on campus lots for use by students and visitors.

Student metered lots are reserved for student use only and vehicles in those lots must have a student registration or student permit.

Visitor metered lots are reserved for visitors to

campus. Employees may use the visitors' meters when space is available. However, any person using meters must deposit coins in the meter.

==> Let's Compute!_

Have you read any good books lately? Do you know how to find them with the library's on-line catalog system (LUMIN)?

You don't have to be in the library to access LUMIN. You can now access LUMIN from the terminals in any public computing site on campus.

To access LUMIN, press return when you see the

Missouri map, then type **libcics**. When the LUMIN introductory menu appears, you may begin your search.

For information on accessing LUMIN contact the

Computing Services Help Desk, 107 Lefevre, 882-7686.

Information on searching LUMIN is available by calling the Ellis Library General Reference Desk, 882-4581.

Instruction sessions on using LUMIN are available from Goodie Bhullar at the General Reference Desk, 882-4692.

a member of the can do crew

Hangtags discussed

Norman Moore, vice chancellor for Student, Personnel and Auxiliary Services, met with the parking and transportation committee Sept. 18. The committee makes recommendations to the vice chancellor on the regulation of traffic flow and parking needs on and around campus.

Regarding the new hangtag parking permits, Moore said, "We want to continue to hear what people are saying, but we also want to give it a chance to work. It behooves us to monitor that and respond to needs expressed by various groups and sectors of campus."

The parking crunch should ease in May, when two parking structures under construction on University and Conley avenues should open. Because of construction, the core campus has lost more than 700 parking spaces this year. Together, the parking structures will have more than 1,700 spaces. When the garages open, Moore said, some

Fund established for grad student

Mizzou graduate student Krishna Gadde was killed by hijackers Sept. 6 aboard Pan American World Airways flight 073. Her husband, D. Hara Gopal, also a Mizzou graduate student, was injured in the attack

HRP names school chiefs

Two appointments have been announced in the School of Health Related Professions.

Richard Oliver has been named director after serving as interim director for the past year. Michael Prewitt has been appointed associate director for student affairs. His new responsibilities include student recruitment, coordination of advisement and supervision of student-related activities within the school. He also continues as the program director of the Respiratory Therapy Program.

Kaplan named PM&R chair

Paul Kaplan became chair of the Department of Physical Medicine and Rehabilitation Sept. 8. He also serves as medical director of the Rusk Rehabilitation

Center.

Kaplan formerly was a professor of rehabilitation medicine at Northwestern University. Robert Frank, who served as interim chair, will continue as the department's vice chair.

Kaplan is president-elect of the Association of Academic Physiatrists and is a fellow of the American College of Physicians and the American Academy of Physical Medicine and Rehabilitation.

Promotions announced

The following faculty received promotion and/or tenure effective Sept. 1.

College of Agriculture

Promoted to professor:

Dale W. Vogt, animal sciences.

Promoted to adjunct professor (non-regular):

Sharon Kay LeDuc, atmospheric science.

Promoted to associate professor with tenure:

Daryl D. Buchholz, agronomy; Diana G. Helsel, agronomy; Marc Jeffrey Linit, entomology; Wayne E. Loch, animal sciences; Mike Smith, animal sciences; Christopher J. Starbuck, horticulture; James E. Williams, animal sciences; and James Allen Wrather, plant pathology.

Awarded tenure:

Donald L. Pfost, agricultural engineering.

College of Arts and Science

Promoted to professor:

Richard Dohm, political science; Weldon B. Durham, speech and dramatic art; Richard W. Madsen, statistics; Betty Scott, music; and William S. Stark, biological sciences.

Promoted to associate professor with tenure:

Robert L. Bauer, geology; Meera Chandrasekhar, physics and astronomy; Steven R. Geibel, music; Kathleen Warner Slane, art history and archaeology; and Gerald Summers, biological sciences.

College of Business and Public Administration

Promoted to professor:

Stanley B. Botner, public administration; James C. Lampe, accountancy; and John D. Stowe, finance.

College of Education

Promoted to professor:

Robert F. Busch, special education; and Charles Dale Schmitz, educational and counseling psychology.

College of Engineering

Promoted to professor:

Aaron David Krawitz, mechanical and aerospace engineering.

Promoted to associate professor with tenure:

Rakesh K. Bajapi, chemical engineering; Paul C. Chan, chemical engineering; Eric Sandgren, mechanical and aerospace engineering; and M. Bala Subrahmanyam, electrical and computer engineering.

College of Home Economics

Promoted to professor:

Kitty Dickerson, clothing and textiles; and Sandra A. Helmick, family economics and management.

Promoted to associate professor with tenure:

Ruth Stumpe Brent, housing and interior design; Mary McPhail Gray, child and family development; and Karla Vollmar Hughes, human nutrition, foods and food systems management.

School of Journalism

Promoted to associate professor with tenure:

Karen K. List, editorial.

School of Law

Promoted to professor with tenure:

Peter J. Wiedenbeck.

School of Medicine

Promoted to professor:

Helen Braley-Mullen, medicine; David B. Bylund, pharmacology; William E. Davis, surgery; and Jerry W. Templer, surgery.

Promoted to associate professor with tenure:

Robert G. Frank, medicine/psychiatry/psychology; Lanis L. Hicks, health related professions; Mark A. McIntosh, microbiology; Joyce A. Mitchell, child health; Martha M. Parnell, health related professions; John F. Sanfelippo, medicine; and Joseph T. Walls, surgery.

Awarded tenure:

David K. Ducker, ophthalmology; and Amolak Singh, radiology.

School of Nursing

Promoted to associate professor with tenure:

Lawrence Ganong.

College of Public and Community Services

Promoted to associate professor:

Gerald L. Hitzhusen, recreation and park administration.

Promoted to associate professor with tenure:

Jaclyn Ann Card, recreation and park administration.

College of Veterinary Medicine

Promoted to professor:

William H. Fales, veterinary microbiology; David G. Thawley, veterinary microbiology; and Robert S. Youngquist, veterinary medicine and surgery.

Promoted to associate professor with tenure:

Everett Aronson, veterinary medicine and surgery; C.B. Chastain, veterinary medicine and surgery; Linda L. Collier, veterinary pathology; Gary S. Johnson, veterinary pathology; and Jimmy C. Latimer, veterinary medicine and surgery.

We're flying high with pride!

Especially when Frances Fisher, Senior Secretary, Materials Management pulls off the sale of an airplane—which she has!

Frances has spent the last 10 of her 12 years with the university working in Materials Management where among her many responsibilities is coordinating the sale of surplus university property. Her wheeling and dealing has involved everything from antique dresses and hats to airplanes.

Materially speaking, we couldn't manage without Frances. She handles payroll for the staff, arranges for pick-up and delivery of items bought or sold by the university, coordinates the licensing of all university vehicles and authorizes university personnel to buy

equipment from the State Surplus Property Agency in Jefferson City. But the real crown jewel in Frances' royal collection of gem-like qualities is her ability to organize the monthly Surplus Warehouse auctions. She prepares and distributes the lists of items to be sold with fiery brilliance.

She's also a sleuth. At one point an antique table had mistakenly been purchased and picked-up by another department. Frances was notified of the mishap, retrieved the piece, and returned it to its proper home. Score another one for the Nancy Drew of Materials Management.

Frances Fisher—saleswoman, supervisor and sleuth. One of the reasons we are The Can Do Crew.

BUSINESS SERVICES

MIZZOU PEOPLE

JAVAD H. KASHANI, professor of psychology, presented a talk on "Depression Among Preschoolers" at the Missouri Institute of Psychiatry in St. Louis.

DONALD W. LITRELL, associate professor of community development, was selected a Fulbright consultant in extension services and continuing education in Thailand. He will work at the Prince of Songkla University in Haadyai/Pattani to develop a graduate program in community development education and to establish a university-wide extension system.

CHRISTOPHER LUCAS, professor of higher and adult education and foundations, was chair of a plenary session at the annual meeting of the Society of Professors of Education in Chicago. He will serve as the group's president in 1987-88.

STANLEY E. MANAHAN, professor of chemistry, published a textbook, "Quantitative Chemical Analysis," Brooks/Cole Publishing Co., Monterey, Calif.

JOSEPH J. MARKS, professor of agriculture and news director in the agricultural editor's office, was presented with the Agricultural Communicators in Education Professional Award June 23 during the 1986 ACE national meeting in Fargo, N.D.

HOWARD W. MARSHALL, associate professor of art history, and **WALTER A. SCHROEDER**, instructor in geography, wrote a new introduction to The WPA Guide to 1930's Missouri, the 1941 guidebook reissued by the University of Kansas Press.

BETTY MARTIN, associate professor of practical arts and vocational-technical education, received the Future Homemakers' Distinguished Service Award at the State FHA/HERO meeting June 8.

Martin and **JOAN QUILLING**, assistant professor of practical arts and vocational-technical education, presented "Status of Home Economics Occupational Programs in Missouri" during the research section at the Vocational Home Economics Conference in Columbus, Ohio, in February.

J. RICARDO MARTINEZ, professor of child health and physiology, was an invited speaker at the Conference on the Evaluation and Management of Salivary Gland Dysfunction sponsored by the National Institutes of Health in Bethesda, Md., and at the first Latin Congress of Cystic Fibrosis held in Buenos Aires, Argentina. He presented two main lectures and was moderator of a round table discussion at the congress. He is 1986-87 president of the CF Club, an association of researchers working in cystic fibrosis.

TIMOTHY MATERER, professor and chair of English, was awarded a 1986 Guggenheim Fellowship for his work, "Pound/Quinn: The Correspondence of Ezra Pound and John Quinn," to be published in New Directions.

JEAN MCGARRY, assistant professor of English, gave readings from her book, "Airs of Providence," at the Johns Hopkins Writing Seminars, the Labyrinth of Language Conference at Johns Hopkins Medical School and at the Providence Journal-Bulletin Book Fair.

ROLAND MEINERT, director and professor of social work, was elected president of the Missouri Consortium of Social Work Education Programs. The consortium consists of social work programs in seven Missouri colleges and universities.

ED METZEN, professor of family economics and management, served on a review team for the College of Home Economics program at The Ohio State University in March. Metzen has published a chapter called "Consumerism in the Evolving Future" in a new book, "The Future of Consumerism." Metzen was in Washington, D.C., April 18 to serve as the spokesperson for consumer interests on aspects of the U.S. Senate's tax bill.

RUSS MEYER, associate professor of

English, discussed "The Personal Computer as an Aid to Scientific Writing" at the 23rd annual Rocky Mountain Biomedical Engineering Symposium held in Columbia in April. His essay on the same subject appeared in Biomedical Sciences Instrumentation.

LIBBY MIEDERHOFF, manager, accounting services, and **PAULETTA KING**, supervisor, accounting services data control, presented "Specialized Management Reporting-Financial Accounting System" at the National Association of College and University Business Officers annual meeting in Seattle July 15.

W.R. MILLER, dean of education, was elected president of the Missouri Association of Colleges of Teacher Education. He has been the association's legislative liaison for the past five years.

NANCY MOFFITT, University police officer, and **DOROTHY SIKYTA**, women studies graduate research assistant and instructor, presented a paper, "Women and Violence: Perpetrators, Victims and Avengers," at the National Women Studies Association conference at the University of Illinois June 11-15.

MOSES MOORE, instructor in history and in religious studies, participated in a National Endowment for the Humanities Summer Institute at Princeton on "Afro-American Religious Studies for College Teachers."

DON MUHM, farm editor of the Des Moines Register, has been named a visiting professor in the College of Agriculture. Muhm will teach and advise students in the college's agricultural journalism program. The appointment, for the fall semester that began Aug. 27, was made possible by funds provided by the Meredith Corp.

EDWARD MULLEN, professor of Romance languages, published a book, "Critical Essays on Langston Hughes," Boston: G.K. Hall. He also published two articles: "Some Early Readings of Motivos de son" in Homenaje a Pedro Frank de Andrea, and "De Harlem a La Habana: La poesia negra en mundo hispanico" in La Palabra y el Hombre.

MARY JO MURATORE, assistant professor of Romance languages, published "Theater as Theater: The Language of Cornelian Illusion" in Romantic Review. Her article on "The Sanctioning Power of Theatricality in Corneille's Horace" will be published in Papers on French Seventeenth-century Literature. Muratore received the Purple Chalk Award for outstanding teaching in the College of Arts and Science this spring.

CAROLE MYSCOFSKI, visiting assistant professor of religious studies, participated in a National Endowment for the Humanities Summer Institute on "Religious Studies and Liberal Education: Opportunities and New Directions" at the University of Chicago.

PAM NORUM, assistant professor of clothing and textiles, received a \$700 award from the Research Council to study "Economic Analysis of Textile and Apparel Expenditures."

LEROY OLSON, professor of veterinary pathology, presented several seminars on swine disease control and prevention to the Peruvian swine industry in Lima from March 30 to April 6.

CATHERINE PARKE, associate professor of English, read her poetry at the Missouri Philological Association meeting in Kansas City in March, in the Columbia Public Library Poetry Series and at the Women's Center annual poetry reading. She read a paper, "The Director's Contract: Peter Greenaway and the Riddle of History," at the annual meeting of the American Society for 18th-century Studies in Williamsburg, Va., in March.

SIMONE PARKS, instructor in Romance languages, took 12 Mizzou students to France this summer for a study-travel program.

MARGARET S. PEDEN, professor of Romance languages, read a paper on "The Apple Philosophy of Translation" at a Washington University faculty seminar. Performances of her translation of a play by Emilio Carballido, "Orinoco!" were given in New York and Seattle. Peden's translation of "The Old Gringo" by Carlos Fuentes was published by Farrar, Straus

and Giroux. Her translation of poems by Sor Juana was published under the title "Poems: Sor Juana de la Cruz."

GERALD PERKOFF, professor of family and community medicine, received a one-year, \$91,293 grant from the Robert Wood Johnson Foundation for "Technical Assistance for the Foundation's Research and Development Program to Improve Patient Functional Status."

LEADELLE PHELPS, assistant professor of educational and counseling psychology, conducted a workshop on "Training School Psychologists in Psychotherapy" for the University Trainees of School Psychologists in Hollywood, Fla. She is president of the Missouri Association of School Psychologists, and was chair of the Central States School Psychology Conference in Kansas City. She wrote an article called "Concurrent Validity of the WISC-R Using Deaf Norms and the Hiskey-Nebraska" that appeared in the April issue of Psychology in the Schools. Also, she and **CHARLES SCHMITZ**, professor of psychology, co-wrote "A Performance-Based Cooperating Teacher Report" for the July issue of the Journal of Teacher Education.

RONALD PHILLIPS, assistant profes-

sor of housing and interior design, was a panel discussant at the National Association of Home Builders convention in Dallas on the topic of "Changing Educational Needs of the Building Industry." He also participated in the faculty round table dialogue to plan future educational program opportunities.

GLENN PIERCE, associate professor of Romance languages, wrote a book on the character mask in the "Commedia dell'arte." He was a reader for sessions on architecture and literature, and Manzoni at the American Association for Italian Studies meeting in Toronto. This summer he is finishing a critical edition of a Milanese play from the 17th century.

JOAN QUILLING, assistant professor of practical arts and vocational-technical education, presented "Problem Solving Paradigms: Implications for Home Economics" at the International Conference on Thinking and Problem Solving sponsored by the Home Economics Education Department and the College of Home Economics of The Ohio State University.

TOM QUIRK, associate professor of English, lectured on "Impressionism as a Literary Phenomenon" for the Interdisciplinary Symposium, and "Impressionism in

Art, Literature and Music" at the Museum of Art and Archaeology.

JILL RAITT, professor and chair of religious studies, published "Queen Elizabeth, John Casimir and the Protestant League" in *Controversy and Conciliation: The Reformation and the Palatinate, 1559-1583*, and "Deserts, Glades and Precipices" in *A Time to Weep, A Time to Sing: Faith Journeys of Women Scholars in Religion*. With a \$50,000 grant from the Exxon Education Foundation, she brought to campus some of the leading figures in religion and journalism during two symposia for religion newswriters and managing editors, "American Religion and International Relations" in March 1985 and "Contemporary Islam" in March 1986.

Raitt and colleagues **JOEL BRERETON**, **BOB ROBINSON** and **CAROLE MYSCOFSKI** presented a panel on their National Endowment for the Humanities seminar, "Building a Department of Religious Studies in the '80s," to the Caucus of Chairs at the annual meeting of the American Academy of Religion in Anaheim, Calif.

JOHN C. REID, professor of higher and

adult education and foundations, gave an invited paper on the general linear model in Jefferson City.

DAVID ROELTGEN, assistant professor of neurology, received funding from the communicative disorders section of the National Institute of Health to study patients with stroke, brain tumor and other brain lesions, and those who have acquired disorders of spelling and writing.

MARLIN N. ROGERS, professor of horticulture, was elected a fellow in the American Society for Horticultural Science at its annual meeting at the University of California August 16. Rogers, one of 14 honorees, was recognized for his research, teaching and service to the society.

BRUCE ROSENQUIST, professor of veterinary medicine, attended the annual meeting and presented the Missouri station report to the NC107 Committee-Bovine Respiratory Diseases Sept. 3-4 in Lansing, Mich.

BETTY COOK ROTTMANN, coordinator of Visitor and Guest Relations, read poetry from her manuscript, "A Watch With Night," at the National Women's Studies Association Conference at the University of

Illinois, June 11-15.

CHARLES D. SCHMITZ, department of educational and counseling psychology, and **ROBERT F. BUSCH**, department of special education, were promoted from associate professor to professor. Schmitz and **SUSAN KENT**, an educational and counseling psychology masters student, had "Orthomolecular Predictors of Psychological Maladjustment" accepted for publication in the fall issue of the *Journal of Orthomolecular Medicine*.

JOHN C. SCHUDER, professor of surgery, has received a one-year grant of \$21,906 from Cardiac Pacemakers Inc. for "A Paired Study of the Comparative Effectiveness of Certain Unidirectional and Bidirectional Rectangular Waveforms of Current in the Catheter."

BYRON SCOTT, a former reporter for the Miami Herald and a former editor of the *Journal of the American Medical Association*, has been selected to fill the newly created Meredith Chair in service journalism at the School of Journalism. He will be an associate professor. Scott, who comes to Mizzou from Ohio University, began his duties when the fall semester opened.

BARRY SIMS has been named head of the weed control extension and research programs at the Delta Center in Portageville, Mo.

BARBARA OLSON SMITH, senior secretary in the Department of Special Education, has been appointed as chairperson of Professional Secretary International's certified professional secretary committee, Missouri division. She also is chairperson of the international secretary of the year committee for the Mizzou chapter.

JIM SNODGRASS, assistant superintendent, Building Services, attended the National Executive Housekeepers Association National Biannual Congress in July in New Orleans, La.

WENDY SIMS, assistant professor of music education, has returned from Hungary and Austria where she traveled this summer to present invited papers at the International Society for Music Education Early Childhood seminar, "Reaching the Young Child through Music," and at the society's world congress.

CAREY SOUTHALL, professor of curriculum and instruction, has returned from Northern Arizona University, Flagstaff, Ariz., where he served as a visiting professor of education for five weeks last summer.

VINCENT ST. OMER, professor of veterinary medicine, presented "Some Reproductive Hazards of Industrial Chemicals" at the Hazardous Waste Management summer institute Aug. 4-8 in Columbia.

DAVID THAWLEY, professor of veterinary microbiology, received the Meritorious Service Award from the Livestock Conservation Institute at its 1986 annual meeting.

A.L. THOMPSON, assistant professor of agricultural engineering, received an award from the American Society of Agricultural Engineers for a paper he co-wrote, "Water Droplet Impact and Its Effect on Infiltration," at the society's annual meeting in San Luis Obispo, Calif., July 2. The paper was published in *Transactions of the ASAE* during 1985.

JIM TOMLINSON, assistant professor of veterinary medicine, presented "Partial Cruciate Rupture in the Dog" to practitioner groups Aug. 7-10 in Denver and Vail, Colo. Tomlinson also attended the Midwest Veterinary Orthopedic meeting Aug. 15-16 in Madison, Wis.

JERRY VALENTINE, associate professor of educational administration, was named director of a grant from the National Conference on State Legislatures' committee on education and labor through the Missouri House of Representatives and the COE Office of Research and Development. The grant will be used to study the development and implementation of career ladder plans in Missouri so that other states may benefit from Missouri's experiences.

DOROTHY WATSON, professor of curriculum and instruction, was awarded the status of fellow by the Executive Committee of the National Conference on Research in English for her research in literacy education.

ROB WEAGLEY, assistant professor of family economics and management, received \$20,000 from the Extension Innovation Project Program to fund his project, "Increasing the Efficiency of Financial Management Practices."

DAVID WEAVER, professor of veterinary medicine and surgery, has written "Bovine Surgery and Lameness," published in April 1986 by Blackwell Scientific Publishers of Oxford, England. He also translated Hanns-Jurgen Wintzer's text, "Equine Diseases: A Textbook for Students and Practitioners," from German to English. Weaver and **GRANT GUILFORD**, resident, attended the Northeast Veterinary Medical Association meeting July 31 in Macon, Mo. Guilford presented "Canine Bladder Stones."

TERESA WINEGAR, senior data entry operator, Finance Services, was selected as Campus Facilities' employee of the month for May.

THOMAS D. WYLLIE, professor of plant pathology, was presented with the Distinguished Service Award by the North Central Division of The American Phytopathological Society at its June 17 meeting in Lincoln, Neb.

JOBS

Recorded listings of new campus and UM job openings are available 24 hours a day. For professional vacancies call 882-2345; for secretarial/clerical positions call 882-2041; and for technical/service/maintenance openings call 882-2916.

Anyone with CMS computer access may view campus and UM vacancies by logging on to CMS and typing help jobs. If your

terminal is not linked to the campus disk, type link UMCCMS 191 192 RR, enter, access 192 D, enter, help jobs.

For more information or to apply for a job, contact Personnel Services, 201 S. Seventh St., west entrance, at 882-7976.

For information on job openings at University Hospital and Clinics, contact the hospital Personnel Department, 1W42 UMCHC, telephone 882-8186.

For more information on the following teaching and research positions, contact the appropriate individual listed below. All positions are contingent upon funding and enrollment.

Biological sciences: Assistant professor-evolutionary biology, deadline Oct. 31. Contact Louis Sherman, 882-6659.
Electrical and computer engineering: Assistant,

associate or full professor-power electronics, deadline Dec. 31. Contact Charles Slivinsky, 882-6387.

Nursing: Instructor or assistant, associate or full professor-psyche mental health, available fall 1987. Contact Phyllis Drennan, 882-6403.

Nursing: Instructor or assistant, associate or full professor-child health nursing, available fall 1987. Contact Phyllis Drennan, 882-6403.

Nursing: Instructor or assistant, associate or full professor of nursing-maternal infant/family. Contact Phyllis Drennan, 882-6403.

Western Historical Manuscript Collection: Manuscript specialist, deadline Nov. 14. Contact Nancy Lankford, 882-6028.

Western Historical Manuscript Collection: Associate director (UMSL campus), deadline Nov. 7. Contact James W. Goodrich, 2 Ellis Library.

Time or money?

Departments can choose to give time off instead of pay to non-exempt staff for working overtime.

A Sept. 1 personnel policy change allows Mizzou employees to opt for time instead of money.

The policy change gives departments the option of granting employees classified as non-exempt by the Fair Labor Standards Act and who work an excess of 40 hours a week compensatory time off at time and a half instead of time-and-a-half pay.

A 1985 Supreme Court ruling on the Fair Labor Standards Act prompted the change. That decision maintained that public sector employers, including the University, were subject to all provisions of the federal law. The law sets minimum wage, overtime pay, equal pay and child labor standards.

The University added the compensatory time policy at the request of departments from all four campuses.

Roger Jett, manager of Wage and Salary Administration, says the policy change will mean more flexibility for departments that choose to offer the option.

"It's a cost-efficient program. Some departments can't afford to pay overtime, but they have busy periods when they need employees to work longer hours," he says. "Some departments work more heavily during the academic year. Employees can save compensatory time for summer months when there may be less work to be done."

Departments are not required to offer the policy, but if it is an option, an agreement between the employee and the department concerning the use of compensatory time off must be reached prior to the work being done. A record of time earned and taken must be noted in the employee's time record and be signed by the employee and an appropriate supervisor.

Departmental use of comp time in lieu of overtime cash payments must be approved by the University general officers—president, chancellors or vice presidents—or their designees.

Employees may accumulate a maximum of 45 comp time hours, representing 30 hours of actual overtime. This 45 hour limit may be waived in certain cases as long as the total hours do not exceed 240.

Any balance of unused time must be paid to the employee before the employee transfers from one department or campus to another. If an employee leaves the University, payment for all accumulated compensatory time will be paid in a lump sum.

Q. Is there an orientation program for new University employees?

A. Human Resource Development offers an orientation program from 9 to 11:30 a.m. the first and third Wednesday of every month in the Education and Development Center in the Heinkel Building.

The program covers medical, dental and other benefits offered to Mizzou employ-

ees. Contact Human Resource Development at 882-4859 with questions about the program.

Q. Do employees paid biweekly (26 times a year) end up paying an extra \$10.50 a year for parking? Those paid biweekly have \$5.25 taken out of their paycheck, while those paid monthly have \$10.50 deducted from each check.

A. Employees paid biweekly pay the same annual parking fee as those paid monthly, says Jim Joy, director of Parking and Transportation Services. In months when biweekly paid employees receive three paychecks, the \$5.25 is deducted only from the first two.

Send your questions about campus matters to Mizzou Weekly, 1100 University Place. You must include your name and phone number so we can reach you, if necessary.

CLARIFICATION: The "Wood Biomass Guide" mentioned in the Sept. 12 Mizzou Weekly discusses heating of institutions such as schools, hospitals and industrial buildings. It does not examine the conversion of home heating systems.

FULBRIGHT DEADLINE: Mizzou graduate

students who wish to apply for a Fulbright grant must do so by Oct. 13. Applications are available from William Jones, program adviser, in 101 Gentry Hall.

TRUMAN SCHOLARSHIP: Students may be nominated for 1987-88 Harry S. Truman Scholarships until Oct. 31. The scholarships cover tuition, fees, books and room and board to a maximum of \$6,500 annually. Eligible students must be sophomores, have a B average and rank in the upper fourth of their class, be U.S. citizens or U.S. nationals, and have a major that will permit them to enter a graduate program leading to a career in public service.

Application materials are available in 116 Jesse Hall. With questions, call Assistant Provost Otis Jackson at 882-2094.

"There Is No Substitute For Quality"

THE UMC SCIENCE INSTRUMENT SHOP has a complete line of machine and welding shop equipment to provide you a broad range of skillful services in the development of your research projects. Our staff has more than 180 years of combined experience to assist you with each stage of your project from design to finish.

The total range of services available are:

- Consultation
- Design
- Estimates
- Fabrication
- Installation
- Testing
- Maintenance
- Repair
