Send information about significant faculty and staff accomplishments to People, Mizzou Weekly, 1100 University Place. Include your telephone number so we can reach you, if necessary.

Offices draft smoking policies

As the smoke clears from city ordinance, campus looks at office smoking.

The effect of secondary cigarette smoke and the rights of both smokers and non-smokers have ignited debates and spurred the passage of a Columbia city ordinance that restricts smoking in public places.

The ordinance goes into effect May 18. And although the University isn't affected by the ordinance, the ruling has focused attention on individual office smoking policies and University programs that help employees kick the habit.

"The question of whether to create a smokeless environment in your office is a question you can't take lightly," says Connie Wood, associate director of Personnel Services/Employee Relations. "You have to consider the rights of both smokers and non-smokers." Wood says the University currently doesn't have a policy that restricts smoking in the workplace. Based on national averages, roughly 30 percent of the University population smokes. "Most units appear to be looking at the needs of their staff and dealing with it on an individual basis," she says.

Wood knows from first-hand experience. A smoking

policy goes into effect April 1 in the Heinkel Building, where the personnel office is located. The policy restricts smoking to the break/lunchroom and restrooms. The restriction doesn't pertain to Campus Computing, which just moved into the building and did not participate in the survey that helped establish the policy.

Across campus, the University Hospital and Clinics' Personnel Department has had a smoke-free environment for more than a year. Manager Mary Davis says the policy works because of staff support. "We tried to be sensitive to smokers' concerns and got their input. We tried to accommodate everyone," she says.

A hospital administrative committee is considering revising current smoking restrictions in the hospital. "The staff has fairly strong feelings about the rights of patients who smoke, but they also want to protect non-smokers' rights," says Steve Pearson, management analyst in the Hospital's Operations and Planning division.

The hospital offers a free smoking cessation program for its employees, and beginning with the May 11 session, the program will be open to faculty and staff campuswide. The six-day session meets one hour each day. For more information or to enroll call 882-3880.

A smoking cessation clinic also is offered on campus. Tom Dilorenzo, assistant professor of psychology, who developed the hospital cessation program with Mike Hosokawa, professor of family and community medicine, heads the campus smoking clinic.

Dilorenzo's campus program is funded by the National Cancer Institute and is open to faculty, staff and community members. Participants meet in groups once a week for seven weeks to discuss behavior modification techniques that will help them quit. The program fee is \$50, but \$40 is returned after participants complete a series of follow-up sessions, which Dilorenzo conducts as part of a research project for the National Cancer Institute.

The fee can be adjusted. To enroll call 882-6485.

A former smoker, Dilorenzo sympathizes with people who are trying to quit. "It's very difficult. The most important thing is that smokers are ready to quit and that they have some method to do it," he says.

Dilorenzo says legislation that prohibits smoking often provides the impetus to quit for some people. Yet others consider smoking legislation an infringement on their rights. He advocates smoking policies that would protect the rights of non-smokers as well as employee benefits that would help smokers quit.

"If we do offer something," says Mike Paden, director of UM Employee Benefits, "it should be part of a wellness operation that emphasizes taking care of oneself physically and mentally, rather than as part of the medical benefits plan."

Rescuing treasures

Maura Cornman's current conservation project is Pet-menekh, an Egyptian mummy who lived some 2,200 years ago.

Brian Trompeter photo

Museum conservator preserves history by combining skills in chemistry, art and archaeology.

Since being excavated from his Egyptian tomb, mummy Pet-menekh has endured changes in humidity and a broken glass display case. Now paint is popping off his wooden sarcophagus, or coffin, and glass chips have severed some threads in his wrappings. To the rescue is Maura Cornman, associate museum curator at the Museum of Art and Archaeology.

As a conservator, Cornman preserves all art materials, specializing in conservation of three-dimensional archaeological objects. She also serves as an adjunct assistant professor of art history and archaeology. A fellow of the International Institute for Conservation of Historic and Artistic Works, Cornman is the only conservator in Missouri outside of Kansas City and St. Louis. "I like the diversity and freedom one gets in a university," she says. "I work with a variety of collections and see many new and interesting things."

Cornman's skills helped bring the 2,200-year-old mummy to campus. In return for borrowing Pet-menekh for 10 years from Washington University, the museum is preserving the sarcophagus and wrappings.

Cornman is repairing the mummy's ripped linen wrappings with the assistance of Amparo Torres, a graduate student in clothing and textiles. One strip has the Book of the Dead written on it, Cornman says. "The book contains incantations to be said to help him to the other side. I want to preserve its historical integrity."

On the sarcophagus, Cornman will apply an adhesive beneath each peeling paint chip

and bond it to the case using a tiny tacking iron. She'll also restore the cartonnage, a decorative cover placed over the body.

Starting in October, the mummy will be part of an Egyptian exhibition at the museum. Other examples of Cornman's work already are displayed on campus.

Last year, Cornman preserved the Scruggs-Vandervoort-Barney collection in Jesse Hall with the help of apprentice Aimee Leonard and graduate student assistants Linda Nieuwenhuizen and Carol Inge. The collection contains 100 watercolors and oils of scenes of Missouri life dating from 1945-46. "She did a marvelous job," Pat Higgins, manager of business/fiscal operations, says of Cornman's efforts.

For this and other projects, Cornman draws on her educational background in chemistry, anthropology and art conservation. "You have to know what chemical degradation product you're dealing with and how stable the object is."

For the Jesse Hall collection, the conservator cleaned and reframed the artwork, repairing nicks, dents and cuts. A mixture of magnesium bicarbonate and natural spring water deacidified the watercolor paper.

Cornman also has preserved materials for the Law School, the State Historical Society, the Western Historical Manuscript Collection and other museums. She serves on the Outdoor Bronze Sculpture Advisory Board for Kansas City and the Missouri Historical Records Advisory Board.

Closer to home, Cornman just finished assessing the condition of all 11,000 objects in the Museum of Art and Archaeology. Several pieces have bronze disease, and soluble salts are harming some pottery. A chemical treatment will protect the bronze; the pottery is soaking in deionized water, which pulls the salt from the object.

To Cornman, rescuing artwork means preserving history. "What concerns me is the significance of the piece as a work of art. It's a demonstration of the technology and stylistic approach of the time. I see it as a record of the past."

PLANNING, PARKING GROUPS TO MEET

Interested faculty and staff members are welcome to attend a joint meeting of the campus parking and transportation committee and the campus planning committee at 10 a.m. March 2 in S110 Memorial Union.

Agenda topics include discussion of the pedestrian campus and closing of surface lots when the parking structures open.

LECTURE PRESENTS GLOBAL OUTLOOK

"The University and the World Community" will be the topic of Clifton Wharton at 8 p.m. March 10 in Middlebush Auditorium.

Wharton is chair and chief executive officer of the Teachers Insurance Annuity Association and College Retirement Equities Fund. He also serves on the Board for International Agriculture Development and is president of the board of directors of the Rockefeller Foundation.

A follow-up panel discussion, "Strengthening the Commitment to Teaching and Research for the World Community," will be held at 9 a.m. March 11 in Memorial Union Auditorium. Mizzou faculty panelists are Gerald Barrier, Winfield

Burggraaff, Robert Terrell, Bob Woods, Melvin Blase, James Hamilton and Paul Wallace.

The event is sponsored by the Margaret Mangel Lecture Fund of the College of Home Economics. It is one in a series of 1987 events to celebrate the 100th anniversary of the Hatch Act, the legislation founding the Agricultural Experiment Stations. Other sponsors are Mid-America International Consortium, the Center for International Programs and Studies, and the Missouri Students Association.

REMINDERS FOR INJURED WORKERS

Employees who are injured on the job need to follow certain steps.

If you need medical attention, contact your supervisor for a medical referral form, UMUW 245. Mizzou employees who work in Columbia must obtain treatment for on-the-job injuries at University Hospital and Clinics or the University's Green Meadows Medical Clinic.

If you choose to use another facility, the costs for medical care will be your responsibility. However, if an emergency is life threatening, you may go to the nearest medical facility available.

Visitors ask council to back their cause

Divestment, student assessment and master plan top discussion items of Faculty Council.

Faculty Council members were urged to support divestment at the Feb. 19 meeting. Richard Fedder, who said he was representing 45 faculty from various departments, asked the council to pass a resolution calling on the University to divest its investments in companies operating in South Africa.

Fedder, an assistant professor of mathematics, also asked the council to pressure administrators to drop charges against 41 protesters arrested on Francis Quadrangle in early February. "It's ludicrous for students to be charged with trespassing on the same quadrangle where they play Frisbee," James Head, a Mizzou senior who has been arrested in the shanty town protests, also sought the council's support.

Council Chair John Bauman, professor of chemistry, encouraged council members to stop by the shanties and talk with students. Political science Professor David Leuthold informed the council that a visiting professor from the University of Western Cape in South Africa will be on campus in the fall to teach a course on South Africa.

The council's executive committee will continue discussion of South African issues. Faculty Council members already have recommended a lecture series on divestment and First Amendment rights, and are reviewing facilities-use guidelines regarding protests. The regulations prohibit the building of temporary structures on University property. However, exemptions may be requested for Peace Park and the area north of the Brady Commons addition.

In other matters, Provost Lois DeFleur updated the council on student assessment. A campus task force has recommended four methods to assess student learning: using writing as an assessment of critical thinking; a test being developed by Educational Testing Service to assess general education; tests for specific academic programs; and surveys of students, alumni and employers.

Doug Hunt, director of the Campus Writing Program, has convened a "working team" to develop by early March methods to test writing in the sciences, social sciences, humanities and the arts. Students will be sought to participate in pre-testing these methods.

DeFleur emphasized that the assessment plan is still developing. "I am concerned about being certain that faculty are informed and involved," she said. The task force will meet with faculty, departments or student groups upon request, DeFleur said.

In other business, the council viewed a videotape on the campus master plan. This

spring, attention will be focused on areas south of Stadium Boulevard and west of Rock Quarry Road; east of College Avenue near Ashland Road; and on Francis Quadrangle, said Osmund Overby, chair of the campus planning committee and professor of art history and archaeology. A task force on Francis Quadrangle will be announced soon. Overby invited faculty to attend a joint meeting of the parking and transportation committee and planning committee, scheduled for 10 a.m. March 2 in S110 Memorial Union. The agenda includes discussion of the pedestrian campus and closing of surface lots when the parking structures open.

In committee reports, Al Hahn, chair of the special projects committee and professor of veterinary medicine and surgery, said a central campus location is being considered for a faculty club facility.

Peter Gardner, chair of the student affairs committee and professor of anthropology, reported that priority rankings of proposals from task forces on the undergraduate experience will be presented for action at the council's next meeting, scheduled for 3:40 p.m. March 5 in S110 Memorial Union.

Also at the March 5 meeting, the council will consider sending a letter to administrators concerning the manner in which the clinical laboratory science program was placed on inactive status. Some members said the decision lacked faculty input and did not make sufficient allowances for students enrolled in the program.

Please report any bumpers that need to be aligned and pinned in parking lots by calling our office.

Lot enforcement will be in effect during spring break. Please use your assigned lot.

Spruced up cashier area to open soon *Cashier renovation to help efficiency, service to students.*

It's "fancy, efficient and pleasing to the eye." That's Gary Zwonitzer's description of the soon-to-be-completed Cashiers' Office in the basement of Jesse Hall.

Zwonitzer, associate director of Business Services, says the renovation should be complete by the end of February, and office furnishings, now out on bid, should arrive sometime in May. The cashiers will move into their new office in May or June. The project's final price tag is estimated at \$600,000.

The new area features a lobby and cashier stations similar to teller windows found in a bank. An outside entrance and exit has been added to the south side of Jesse, allowing direct access to the cashier area. Separate areas for various account activities will speed up transaction time and eliminate the crowded conditions students experienced in the cashiers' current first-floor location.

Cora Johnson, assistant manager of Cashiers, says the move will improve the

morale of the cashiers. "It will change their outlook about their jobs and to the public," she says. "And it will improve communication with students."

Service also should be improved by point-of-service terminals, which will be installed in the new area. A cashier can call up a student's fee information by passing that student's ID card under the IBM 4700 system's scanner. "It's a split screen so we can make inquiries and update the information at the same time," Johnson says.

The Cashiers Office has been located on the first floor of Jesse since 1954. Prior to that, the office was across the hall in what is now Vice Provost Gerald Broder's office. Plans for the vacated Cashiers Office are not finalized. The Accounting Department, which last summer moved to 325 Jesse Hall to accommodate the renovation project, will remain on the third floor.

Before the cashiers move in downstairs, however, the Payroll Office, also located in the basement of Jesse, will be renovated. Payroll personnel will be relocated during the renovation. Jim Robinson, manager of Cashiers, Payroll and Student Loans, says he isn't sure when that relocation will take place, but faculty, staff and students who pick up their payroll check at Jesse will be notified prior to the move.

The renovation won't stop at the Payroll Office. New carpeting, floor tiles and fresh paint will spruce up the area outside the Financial Aids Office and the entrance to the basement.

When the renovation and relocation project is complete, the basement will house Payroll, Cashiers, Financial Aids and student ID card operations. The band office and a snack bar also will continue to be located in the basement.

LEARN TO DEAL WITH THE PUBLIC

An employee development seminar, "Public Contact," will be offered to office staff from 10 a.m. to 3 p.m. March 3 in the Education and Development Center of the Heinkel Building.

Instructor will be Wayne Anderson, professor of psychology. Participants will learn how to deal efficiently, effectively and politely with the public by understanding their attitudes, regardless of their anger, problems or confusion.

To enroll in the free seminar call 882-4859. Supervisory approval is required to complete enrollment.

"BUT, MOM, I HATE PEAS"

Wear 'em down. That's a philosophy that may help your children become better eaters. Serve them nutritious foods often enough and odds are that they'll like them—eventually.

"There's no doubt that there's a direct relationship between exposure to a food and liking the food," says Cheri Vermillion, an instructor in child and family development. She's also the head teacher at the day-care program there for 3- to 5-year-old children.

She advises starting good eating patterns early, since kids' eating habits are more moldable before age 6. "The atmosphere at meal time has a lot to do with children's acceptance of food, too," she says. It's

important to have rules and stick with them.

She has two she follows at the center. One is that children have to eat everything they take. In addition, children have to eat one bite of everything that's served.

Dessert should not be a reward, but it is a motivator. "I tell the children they have to eat the food that's good for them and then they can have cookies, which are not so good for them."

NAME THAT SNACK BAR

Put on your thinking cap! In an effort to "personalize our snack bars," Campus Dining Services is having a contest to name the snack bars in Clark Hall, Jesse Hall and the Electrical Engineering, Veterinary Medicine and Animal Science buildings.

Winners will receive lunch or Sunday brunch for two at the Hawthorn Room in the lower level of Memorial Union.

Don't delay—deadline for entries is Feb. 27. Drop your entry in the box at the snack bar cash register.

Q. Why does the attendant at the entrance to the University Hospital and Clinics' parking garage stop each car upon entering and ask why the driver wants to park there? It is obvious that only people who are visiting a patient, have an appointment or need to go to the pharmacy will park in the garage. Even if people had a different reason, they could answer however they chose and still park there. I am asking because every time I have a doctor's appointment, it takes at least 10 minutes to reach the garage entrance from the four-way stop

due to the long line of traffic being held up by the attendant.

A. Tommy Carter, assistant division director of Operations and Planning Services at the Hospital and Clinics, says a security guard monitors vehicles entering the garage from 7 a.m. to 5:30 p.m. Monday through Friday.

"During those peak hours, our demand for parking by patients and visitors is very heavy. The guard is on duty to assist the public in finding a place to park and directing these people to the proper area of the Hospital and Clinics," Carter says. "Because demand is so heavy, we feel it is important to ensure parking for patients and visitors in the garage." Faculty and staff members or students who have an appointment in the outpatient clinics or are visiting someone in the hospital are encouraged to park in the garage.

Vehicles carrying passengers other than patients or visitors are directed to park in adjacent lots, Carter says. "The security guard soon recognizes familiar faces and

vehicles and can stop repeated abuses." However, illegal parking in the garage has not been a major problem. "We have a lot of honest people out there."

Q. Why does it take so long for some documents on the IBM 5520 to be transmitted via Host, Store and Forward? Sometimes it takes days for a document to reach its destination.

A. According to Donna Taylor, office systems specialist with Computing Facilities, the University no longer uses the Host, Store and Forward system. The University has been using a system called DISOSS for more than 18 months.

"An hour is too long for a message to reach its destination on the DISOSS system," Taylor says. "That rarely happens, but if it does there may be a problem at the mainframe, the receiving 5520 may be down, or the 5520 send session may be down." Frequently, Taylor says, people simply don't check their "mailboxes" to see if any documents have been delivered to them.

She says recent changes in the data line system also may have caused problems. "If the person you send the document to doesn't receive that information within an hour, and your system administrator can't find the problem, call the 5520 help desk at 882-3832 and we'll see if we can track down the problem."

Q. Does the University have a regulation that prohibits or restricts Bible study on campus during the lunch hour?

A. According to Connie Wood, associate director of Personnel Services/Employee Relations, there is no policy that prohibits voluntary Bible study during an employee's free time. "If it's voluntary study or prayer, it would not go against any University policy or state or federal requirement," Wood says. "In the same sense, there is no endorsement of it either."

Send your questions about campus matters to *Mizzou Weekly*, 1100 University Place. You must include your name and phone number so we can reach you, if necessary.

1985 bill ineffective in reducing farm debt

A study by an agricultural economist documents the ineffectiveness of the 1985 Farm Bill in reducing the massive farm debt.

"During the debate of the 1985 Farm Bill, we estimated that there was about \$35 billion in farm debt that could not be repaid unless there were drastic increases in farm income," says Bruce Bullock, chair of the Agricultural Economics Department. "The 1985 Farm Bill did nothing to alter that situation."

Bullock says there is no way a lender with its entire portfolio in agriculture can survive a situation where 20 percent to 25 percent of its portfolio cannot be repaid. This is the situation faced by many rural banks and explains why they are failing, he says. Excess debt, not low commodity prices nor low net farm income, is the cause of the problem.

"The excessive debt problem will have to be corrected by a policy that directly addresses the problem, not through the 1985 Farm Bill's price and income enhancement program," Bullock says.

Bullock matched the impact of the 1985 Farm Bill with each of the following categories:

Category A is made up of farmers who already have used too much credit. They are beyond the point of no return as viable businesses unless someone gives them money. This category includes 11 percent of farm households and 37 percent of the national farm debt.

Category B is made up of economically viable farmers who cannot absorb much more financial hardship. Many of these borrowers will slip into Category A unless there are substantial gains in their net income. This category accounts for 27 percent of households and 50 percent of the national farm debt.

Economically sound businesses with the financial ability to absorb some more hard times are in Category C. They account for 62 percent of households and 13 percent of the farm debt.

The Farm Bill provided no aid to those in Category A because these farmers are so far in debt that price increases won't help them at this point. He says the farmers are left with two options: liquidate or allow someone else to pay their debt.

Farm households in Category B, those who are still viable but can't afford any more debt, were provided with a little bit of breathing room. Most of these farmers still have the money to make their loan payments. He adds that a portion of this group will move into Category A because of no growth in income and declining asset values.

Farmers in Category C have had a loss in net worth, but it has not impacted their economic viability. Some of them are doing quite well.

—Ken Brogdon

==> Let's Compute!_

If you're thinking of buying a computer, but you're afraid your imagination is bigger than the computer's, think of a Macintosh. The 512K Enhanced Macintosh is a computer that will let your imagination run wild.

Write a novel with Microsoft Word. Illustrate it with MacDraw or MacPaint. And put it all together with Pagemaker. Anything you can dream, you can create.

The 512K Enhanced Macintosh even comes with an 800K internal drive, just in case you dream REAL big.

Contact the Computing Services Demo Room in 102 Lefevre Hall, 882-9400 and team up with a Macintosh today. See what you can dream up together.

Vol. 8 No. 21

A publication of the University of Missouri-Columbia faculty and staff, published every Friday during the academic year and twice a month during the summer by Publications and Alumni Communication, a department of Development, University and Alumni Relations Division, 1100 University Place, 882-7357. News deadline is noon Friday the week before publication. Annual subscriptions are available to retirees for \$10. Faculty Council and Staff Council communication committee members: Donald Anderson, Bob Derryberry, Gary Fields, Linda Holsinger, Gordon Kimber, C. Kirk Leeper, Mary Miller, Barbara Olson Smith and Donna Turner.

Editor: Karen Worley
Assistant editor: Carol Hunter
Staff writer: Mary Vermillion
Advertising coordinator: Sherrill Harsh
Graphic editor: Larry Boehm

Three Cheers for One Neat Lady!

Lou Frances Maxwell has a spotless record. She's been tidying up MU for thirty-one years... twenty of them at Tiger football games. Even now fans seek her out at the stadium, to give her a hug and a "Hi."

Lou's clean living started at the student union. She polished up her skills in Jesse and Tate Halls, the J-school, and the library. Today she keeps the School of Nursing shining.

But Lou's smile has brightened more MU days than her service has its buildings.

If she's off, people ask when she'll be back. A graduating law student once thanked her with a rose.

At Campus Facilities, we're proud of Lou Frances Maxwell. Proud to honor her too. So from Faurot Field—to a lot of spick-and-span corners—we send up a rousing Mizzou-RAH! all her own.

JOBS

Recorded listings of new campus and UM job openings are available 24 hours a day. For professional vacancies call 882-2345; for secretarial/clerical positions call 882-2041; and for technical/service/maintenance openings call 882-2916.

Anyone with UMCVMB CMS computer access may view campus and UM vacancies by logging on and entering command jobs. For more information or to apply for a job, contact Personnel Services, 201 S. Seventh St., west entrance, at 882-7976.

For information on job openings at University Hospital and Clinics, contact the hospital Personnel Department, 1W42 UMCHC, telephone 882-8186.

For more information on the following teaching and research positions, contact the appropriate individual listed below. All positions are contingent upon funding and enrollment.

Child and family development: Assistant professor, deadline March 30. Contact Jean Ispa, 882-2796.

Computer science: Assistant or associate professor, deadline April 15. Contact Paul Blackwell, 882-3842.

Geography: Assistant professor, deadline May 1. Contact Walter Schroeder, 882-8265.

Health and physical education: Assistant or associate professor, deadline March 1. Contact James D. Brown, 882-7342.

Industrial engineering: Assistant, associate or full professor. Contact Owen Miller, 882-2691.

Pathology: Assistant professor, deadline March 31. Contact J.F. Townsend, 882-1201.

Social work: Assistant or associate professor, deadline March 15. Contact Roland Meinert, 882-6206.

Social work: Assistant or associate professor, deadline May 1. Contact Roland Meinert, 882-6206.

Special education: Associate professor-behavior disorders, deadline April 15. Contact Sharon Huntze, 882-3741.

Statistics: Assistant or associate professor, deadline April 15. Contact John E. Hewett, 882-6376.

Veterinary medicine and surgery: Assistant professor-veterinary ophthalmology, deadline May 15. Contact Cecil P. Moore, 882-6849.

Veterinary medicine and surgery: Assistant professor-anesthesiology, deadline May 1. Contact Jimmy Lattimer, 882-7679.

An open invitation:

We are Campus Dining Services, a department of the University now in charge of food service in the Memorial Union, Brady Commons and satellite snack bars.

Customer satisfaction is very important to us. That is why we have helped organize an advisory group made up of long-time customers of the campus food service centers. The object is not only to restore what used to be a good system, but improve on it.

If you have any comments pertinent to the advisory committee, or would like to be a part of the group, feel free to contact Lorraine Kalen, manager of Campus Dining Services, at 882-4005 or Jack Timmons, associate professor of community development, at 882-8395.

We hope to hear from you soon, and see you often.

Offering free phone changes

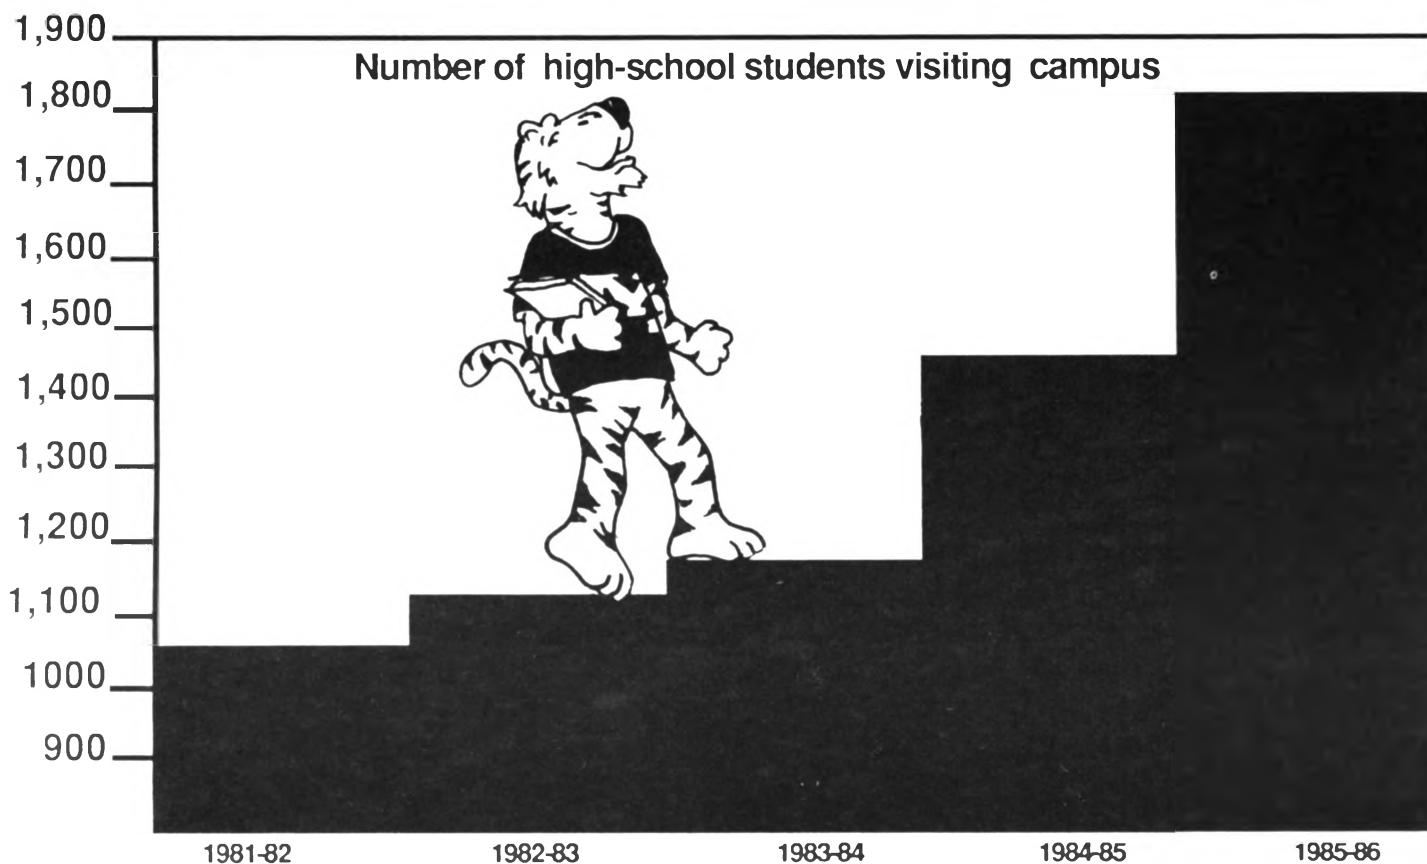

The Telecommunications Office has processed more than 900 orders for telephone system software changes. Departments may continue to request free software changes until March 31.

"The goal of offering the 90-day free changes is to give departments the opportunity to make adjustments that will enable their phone system to function optimally. Departments can analyze their needs much easier on a working system," says Beverly Blackwell, manager of Telecommunications. There will be a charge for requests received after March 31.

Blackwell suggests that departments that need to make a change or addition to their current office phone system send a letter detailing the needed services to the Telecommunications Office, 5 Telecommunications Building. The letter should be signed by an authorized department member or departmental telecom coordinator. Any requests received after March 31 should include a department account number against which to charge the services.

Blackwell says her department is getting to the requested changes as soon as possible. "When we receive a letter, we document it. We're working on a first-come, first-serve basis."

To discuss your office's telecommunications needs, call the Telecommunications Office at 882-2177.

John Godsey illustration

In addition, "It's a buyer's market. An ever-increasing number of potential students and their parents want to sample the educational environment that they are going to purchase."

Smith says it's difficult for potential students to make an informed choice without visiting the campus and talking with students and faculty. "We encourage visits at anytime, but we do try to discourage people from visiting when school is not in session. Visitors don't get a realistic view of the University, or a feel for the activity and excitement, when school is not in session."

Regarding the increase in admitted students, "Demographics that reflect a decline in high-school graduates through the mid-1990s level off this year and next, and then begin to drop again," he says. "The increased student-recruitment effort by many facets of the University community also has influenced the number of applications."

All recruitment efforts are designed to complement long-range plan goals of attracting more high-achieving students and achieving the University's affirmative-action goals, Smith says.

Statistics from the current school year are encouraging. The number of freshman Curators Scholars increased from 243 to 286. Curators Scholars are students who rank in the top 3 percent of their senior class and score in the top 10 percent on college aptitude tests and are recommended by their high-school counselor. They receive a full fee waiver their freshman year and thereafter depending on grade-point average. The number of National Merit Scholars increased from 23 to 28.

The percentage of the freshman class who graduated in the top 20 percent of their high-school class increased from 44.3 percent to 47.6 percent. The freshman class also includes 110 valedictorians.

The number of black first-time freshmen at Mizzou increased 15 percent over last year, from 122 to 142.

Visits up 73% in five years

Campus visits by potential students and the number of students admitted are increasing, reports Gary Smith, director of Admissions and Registrar.

The number of campus visits by prospective students has increased 73 percent in the past five years. In 1981-82, some 1,058

students visited campus, compared with 1,830 in 1985-86.

As of Feb. 1, the number of students admitted for next fall was up about 15 percent, from 3,300 in 1986 to 3,857 this year. Usually, about 65 percent of students admitted actually enroll, Smith says. Admit-

ted students are those who have completed the application process and are eligible to attend Mizzou.

Smith credits two factors to the increase in campus visits. Efforts including the "Meet Mizzou" campaign have increased the visibility of the University, Smith says.

Flutist Paula Robison and guitarist Eliot Fisk will perform March 6.

Prominent duo to give recital

Classical guitarist Eliot Fisk and flutist Paula Robison will give a duo-recital at 8 p.m. March 6 in Jesse Auditorium.

Fisk will present works by Barrios-Mangore. Robison will perform selections from "The Bird Fancier's Delight" and "Syrinx" by Debussy. They will join in concert with pieces by Haydn and Giuliani and conclude with Robert Beaser's "Mountain Songs."

Fisk rose to prominence in 1976 with his Alice Tully Hall debut performance in New York City. Since then, he placed first at the

1980 International Classical Guitar Competition in Gargnano, Italy, and has performed in the Spoleto USA Festival in Charleston, S.C. Fisk was selected to serve as president of the First Guitar Congress of America at the University of Maryland in June 1986.

At 19, Robison began her studies at the Juilliard School and the following year was invited by Leonard Bernstein to be a soloist with the New York Philharmonic. Since then, she has appeared in concert halls throughout the United States, Canada, Europe and Japan. She co-directs chamber music at the Spoleto Festivals in Spoleto, Italy, Charleston, S.C., and Melbourne, Australia.

For information about tickets (\$13 faculty/staff, \$12 students) call 882-3781 or 882-3875.

==> Let's Compute!_

A long time ago, a pen and paper was revolutionary. It took a few years, but man has finally found something better. It's called a **PC Convertible** and it's made by IBM.

Just like a pen and paper, the Convertible can help you with your work any where you choose to do it: in the classroom, in a meeting, at home, or in the car on the way back and forth.

For a limited time only, you can get a special deal on this special product.

For only **\$999**, the Convertible comes with:

- 512K memory
- DOS 3.2
- Enhanced LED display
- Compact carrying case
- Choice of charger

Contact the **Computing Services Demo Room**, 102 Lefevre Hall, 882-9400 for more information.

This is a special promotion in cooperation with IBM. Supply is limited. Availability is based on a first come first served, hand-carried IDO or check.

FOR THE RECORD

RESEARCH FORUM: Graduate and professional student entries are due March 13 for the fourth annual Research and Creative Activities Forum, to be held April 27 in Memorial Union and the Fine Arts Complex.

Entrants should submit abstracts to the Graduate-Professional Council office, A028 Brady Commons.

Entry categories are behavioral sciences, biological sciences, health-related sciences, humanities, mathematical sciences, physical sciences, social/legal sciences and fine arts.

Twelve entries from each division will be selected for presentation during the forum. One \$350 first-place award and one \$150 second-place award will be given. For more information call 882-3492.

CLOSED: Jo Ann Tuckwood, acquisition specialist, reports that the State Historical Society of Missouri will be closed March 1 until further notice because of renovation.

FOR SALE: A Zeiss PMQ11 variable wavelength spectrophotometer in good working order. Call Dick Guenther at 882-3481.

ESSAY PRIZE: Faculty and staff members may encourage students to submit essays on women/gender/feminism for a Women Studies Undergraduate Essay Award of \$100. Details are available from the Women Studies office, 213 Swallow Hall.

AIRLINE SCHEDULE: Gary Zwonitzer, associate director of Business Services, has copies of Columbia Regional Airport's airline schedule. Individuals who travel frequently may obtain a copy from Zwonitzer, 311 Jesse Hall, 882-7254.

ID CARDS: University faculty/staff identification cards are issued each Friday from 2 to 4:30 p.m. at Personnel Services, 130 Heinkel Building. A handout with ID card guidelines and procedures and a list of ID card benefits is available at Personnel Services. Lost or stolen ID cards should be reported to University Police or the Cashiers Office. There is a \$5 charge to replace a lost, stolen or excessively worn card. No holes may be put in the ID card.

MEMORIAL: Carl Chapman, professor emeritus of anthropology, and his wife, Eleanor Chapman, former art editor of *The Midwest Archaeologist*, died Feb. 18 as the result of an automobile accident. Memorial contributions may be sent to the Carl H. and Eleanor F. Chapman Memorial Anthropology Scholarship Fund, UM Development Office, 125 Alumni Center.

EXHIBITS

STATE HISTORICAL SOCIETY GALLERY: "Framed Historic Maps" will be on display through Feb. 28. Hours are 8:30 a.m.-4:30 p.m. weekdays.

MUSEUM OF ART AND ARCHAEOLOGY: "Corinthian Vase Painters in Missouri" will be on display through March 1. Hours are 8 a.m.-5 p.m. Tuesday through Friday and noon-5 p.m. weekends.

FINE ARTS GALLERY: "Promising Young Artists of Missouri Exhibition" will be on display through March 6. Hours are 9 a.m.-3 p.m. weekdays and 2-4 p.m. Sundays.

BRADY COMMONS GALLERY: Student chapter of the National Art Educators Association will sponsor a display March 2-13. Hours are 10-5 p.m. Monday-Saturday and 3-5 p.m. Sundays.

FINE ARTS GALLERY: "Marcel Salinas/Picasso Print Exhibition" will be on display Feb. 27 and March 8-27. Hours are 9 a.m.-3 p.m. weekdays and 2-4 p.m. Sundays.

ELLIS LIBRARY: A display in celebration of Women's History Month will be presented in the second floor exhibit cases through March 31.

Relax after lunch,
your coffee refills are on us.

At the Union Cafe, we believe lunch should be a time you can relax—savoring dessert and a free second cup of coffee. We believe lunch is a well deserved respite that should be carefully prepared, cheerfully served and thoroughly enjoyed.

Come in soon and try the Cafe's wide variety of

entrees. Help yourself to coffee and decaf refills from our beverage station in the dining area. When you eat at the cafe, there is no need to rush—just enjoy.

Rewarding staff for excellence

"Receiving a Staff Recognition Week Award doesn't mean you're better than anyone else. It just means it was your time and it will be someone else's the next time," says Jeanette Jefferson, nursing team leader at the University Hospital's Family Medical Care Center.

Last year it was Jefferson's time. She won the award in the technical/paraprofessional category.

According to Jefferson, the \$750 award is a great morale booster. The money helped her take evening business classes. But even after the money was spent, the thrill of winning the award continued. "It gave me an extra boost all year," she says.

Jefferson also credits the award as a means of building teamwork on campus. "Employees are separated from each other, but it takes all of us to successfully complete our mission. This award shows that someone cared that you went that extra mile in your efforts," she says.

"It's something I wish could happen to all staff members. It's a great experience and honor. I was especially flattered because the award is from your co-workers."

Nominations for this year's Staff Recognition Week awards are now being accepted. Nomination forms were mailed last week to staff members. If you have not received a form, contact Bonnie Bass at 882-6833 or Carol McAllister at 882-0032.

Nominations for the Mick Deaver Memorial Award also are being accepted. The award recognizes a staff member who best exemplifies the late University police major's concern for fostering good relations with students. Letters of nomination should be mailed to Bonnie Bass, 2 Johnston Hall.

Volunteers are needed to read the nomination forms on March 11 and 12. To volunteer fill out the form that ran in the Feb. 13 and 20 Mizzou Weekly.

The deadline for nominations is March 6. Staff Recognition Week—Mizzou Showcase—is April 6-10.

Four finalists announced for vice provost

The search for a vice provost for instruction has been narrowed to four finalists, including two internal candidates.

Ted Tarkow, associate dean of arts and science, and John Bauman, professor of chemistry and chair of Faculty Council, are among the contenders. Other finalists are Jeffrey Chinn, assistant provost for instruction at Illinois State University, and Richard Anderson, director of the honors studies program for the College of Arts and Sciences at the University of Arkansas.

The new position, created by Provost Lois DeFleur, will be a key component to improving undergraduate education.

Dean finalists to interview

Four finalists for dean of the College of Engineering have been selected from more than 70 applicants, Provost Lois DeFleur announced. The finalists will visit campus within the next few weeks to interview with the search committee and the provost.

Finalists are Anthony L. Hines, professor and associate dean for engineering research at Oklahoma State University; Harold R. Jacobs, professor and head of the department of mechanical engineering at Pennsylvania State University; Yatish T. Shah, professor of chemical and petroleum engineering at the University of Pittsburgh; and Miles A. Townsend, professor and chair of mechanical and aerospace engineering at the University of Virginia in Charlottesville.

"We are pleased with the quality of the candidates in the pool and are particularly impressed with the distinguished backgrounds of the finalists," DeFleur says.
