

MIZZOU WEEKLY

University of Missouri-Columbia May 8, 1987

Mizzou Weekly cools down its publication schedule for summer. May 15 will be the last issue of the winter semester. For summer session, biweekly publication begins June 12; copy deadline is noon June 5.

Monroe to take helm at Mizzou

Larry Boehm photo

Haskell Monroe will become chancellor July 1.

Texas native says he's proud and grateful to accept new job as chancellor of Mizzou.

In his first public appearance at Mizzou, the new chancellor volunteered to teach a 7:40 a.m. history course to freshmen. "The public expects us to be teachers first," Haskell Monroe said at a May 2 news conference in Ellis Library's newly dedicated addition. Monroe, who also stressed the importance of research and public service, currently is president and professor of history at the University of Texas in El Paso.

Monroe, 56, will start his new job July 1. "From the very first contact I had with this institution, I found people saying what I thought to be true already—that this is a great University but people are not satisfied. They want it to be better."

Monroe pledged to work with faculty, deans and administrators to improve Mizzou. "This is not an 'I' job, but a 'we' job," he said. Among his goals, Monroe listed recruiting top students and securing endowed chairs and professorships.

"I am concerned that we demonstrate that we are seeking black students of high talent. I am concerned that that effort has not been as successful as it could be. We also need more black faculty and more women faculty," Monroe, who plans to step up student-recruitment efforts in Kansas City and St. Louis, called for scholarships to attract talented students to campus.

Concerning faculty salaries, Monroe said, "Part of my job is to persuade the General Assembly and constituencies that this is the important item. Salaries here are not what they ought to be, but that is not unique."

The new chancellor plans to spend the summer traveling throughout Missouri. A member of the board of directors of Southwestern Bell Corp., Monroe already has a working relationship with several Missouri business leaders, including Henry Bloch, Zane Barnes, Charles F. "Chuck"

Knight, Clarence Barksdale and August A. Busch III.

At UTEP since 1980, Monroe successfully led a campaign for a \$28 million library. Research support tripled and private giving increased by five times during his tenure.

"Haskell Monroe has been preparing for this leadership assignment all of his life," said UM President C. Peter Magrath. "He is ready to work on behalf of the University of Missouri-Columbia, a land-grant institution. He is committed to access to public higher education."

Magrath and W.H. "Bert" Bates, president of the Board of Curators, presented Monroe with a black-and-gold Mizzou shirt. Faculty Council Chair John Bauman, a chemistry professor, gave Monroe a book on the University's history. History Professor Noble Cunningham Jr. presented Monroe with a copy of his new book on Thomas Jefferson.

The first member of his family to graduate from high school, Monroe went on to earn a bachelor's degree in history and English, and a master's in history from Austin College. He holds a PhD in history from Rice University. He married the former Jo Phillips in 1957; the couple has four children, Stephen, 28, Melanie, 26, Mark, 24, and John, 20.

Monroe will earn \$95,000 a year. He succeeds Barbara S. Uehling, who stepped down Dec. 31. Duane Stucky, vice chancellor for Administrative Services, served as interim chancellor "with high dedication and effectiveness," Magrath said, to which the audience responded with a standing ovation.

In a May 2 statement, Stucky said, "It's been a pleasure and an honor to serve as interim chancellor. I look forward to working with Chancellor Monroe to ensure a smooth transition." Stucky will return to his former position, vice chancellor for Administrative Services.

"During the months I have served as interim chancellor, the University has developed momentum in several important areas. I'd like to thank the administrators and staff for moving us ahead in these areas. I'd also like to thank the faculty and, in particular, Faculty Council for their support and advice."

Prominent trio to be honored at graduation

A renowned physicist, the owner of a pharmaceutical laboratory and a professional baseball team, and a longtime leader in broadcast journalism will receive honorary degrees during the Graduate School commencement ceremony at 10:30 a.m. in Jesse Auditorium.

To be recognized for their professional achievement and community service are William F. Brinkman, BS '60, MS '62, PhD '65, executive director of research, physics division, AT&T Bell Laboratories of Murray Hill, N.J.; Ewing M. Kauffman, founder and chairman of Marion Laboratories Inc. of Kansas City and owner of the Kansas City Royals; and Martin Umansky, BJ '40, general manager at KAKE radio and television in Wichita, Kan.

A Ste. Genevieve, Mo., native, Brinkman will receive an honorary doctor of science degree. He was chair of the physics survey committee of the National Academy of Sciences that produced an eight-volume report, "Physics Through the 1990s."

Kauffman also will receive an honorary

doctor of science degree. The Garden City, Mo., native built Marion Laboratories from a solo proprietorship, located in the basement of a rented cottage, into an industry leader that totals \$350 million in sales annually. He sponsors a number of health programs in Kansas City.

An honorary doctor of letters degree will be awarded to Umansky, a native New Yorker who has worked diligently to link closely the broadcast station and the community it serves. Umansky led a fund-raising campaign to establish the Leonard H. Goldenson Endowed Chair of Local Broadcasting at the Journalism School.

During commencement weekend May 15-16, some 2,200 candidates will receive bachelor's degrees. About 400 will receive master's or specialist's degrees, and 70 doctoral degrees will be awarded. Law, veterinary medicine and medicine degrees will number 300. Divisional ceremonies are listed in the Calendar on Page 12. Guest speakers at divisional convocations include:

- **College of Agriculture:** G. Ashby Green, product development manager for Monsanto's nutrition chemicals division.

- **College of Arts and Science:** Arthur Mallory, M Ed '57, EdD '59, state commissioner of education.

- **College of Business and Public Administration:** Harold S. Hook, BS BA '53, MA '54, DL '83, chief executive officer of American General Corp., Houston.

- **College of Education:** State Sen.

Roger Wilson.

- **College of Engineering:** F. Robert Naka, vice president engineering and planning, GTE, Government Systems Corp., Waltham, Mass.

- **School of Forestry, Fisheries and Wildlife:** Glen Chambers, MA '61, photographer for Ducks Unlimited.

- **School of Health Related Professions:** Aimee Moore, professor emeritus of medical dietetics.

- **College of Home Economics:** Dean Bea Smith.

- **School of Journalism:** John Ferrugia, BJ '75, principal correspondent for CBS News' "Prime Time Magazine—West 57th."

- **School of Law:** Karen M. See, JD '78, a Kansas City bankruptcy judge.

- **School of Medicine:** Ted D. Groshong, AB '63, MD '67, associate professor of child health.

- **School of Nursing:** Caroline Davis, executive director of the Missouri Nurses Association.

- **Tri-Service ROTC Commissioning:** Army Lt. Gen. Charles D. Franklin.

- **School of Public and Community Services:** Karen Bonner, BSW '79, MSW '81, policy associate for social services, American Public Welfare Association, Washington.

- **College of Veterinary Medicine:** William W. Armistead, vice president for agriculture, University of Tennessee.

Passers-by say, 'Stay off grass'

More than 20 passers-by offered their opinions on the use of Francis Quadrangle April 28. Members of the Francis Quadrangle task force stood on the north steps of Jesse Hall from 3-4 p.m. that afternoon to solicit ideas from the University and Columbia community.

"I guess the one I heard the most was to prohibit all pedestrians from walking on the quadrangle," says Chair Dale Whitman, dean of law. "A lot of people want to return to the 'good old days' when no one was allowed on the grass." Whitman says other suggestions included adding brick walkways to the quadrangle.

The group met with landscape architects this week to discuss plans for the quadrangle. "We'll work through summer to develop a few concrete alternatives and then present three or four ideas to the public in the fall," Whitman says. The task force hopes to present its recommendation to the chancellor's capital review group in October.

COMMITTEE SEEKS PROJECT IDEAS

Faculty, staff and students may submit ideas for capital improvements projects to the student fee capital improvements committee until May 15.

A portion of the student activity fee pays for the projects, which in the past included lighting in Jesse Auditorium and renovation of the Fine Arts Gallery.

Send proposals to David Litteken, A022 Brady Commons. Include your name, campus address, phone number, an explanation of how the project will benefit the campus and any supporting information such as cost or contact people. With questions call 882-2530.

NOW WHERE COULD THAT BUILDING BE?

Campus maps in quantity are available at cost from Visitor and Guest Relations, 103 Heinkel Building. The maps cost 4 cents each; minimum order is 25. To place an order, call 882-6333.

STOP TERMITES FROM SNACKING ON YOUR HOME

Termite swarming season is here, so homeowners should be on the lookout for the wood-feeding insects.

The winged form of the termite has four wings equal in length, a straight "waistline" and beaded antennae, says Darryl Sanders, Mizzou entomologist.

"If you have termites, you can find them in and around windows where they have been attracted to the light." A guide called "Termite Control" is available from Extension Publications, 115 S. Fifth St. Sanders suggests having a professional termite inspector check your home if you see any termite-like activity.

KBIA BROADCASTS CONTRA HEARINGS

Radio station KBIA is broadcasting half-hour news specials on the Iran-Contra hearings taking place in the U.S. House and Senate. National Public Radio is producing the specials.

The 7 p.m. broadcasts began May 5 and will continue Monday through Thursday and Tuesday through Friday on alternating weeks through July. Program dates will be announced on KBIA each week. Regular programs normally broadcast in the evening will continue in their entirety following the special programs on the hearings.

Chinn named vice provost

Jeffrey B. Chinn, assistant provost and dean of undergraduate studies at Illinois State University, was named vice provost for instruction May 1.

The new position is part of the reorganization of the provost's office and was created to direct attention to improvement in the undergraduate curriculum.

"This appointment is a significant step in accomplishing the goal of improving the educational process on this campus and making the classroom experience challenging and rewarding for all students," says Provost Lois DeFleur.

In his current position, Chinn is responsible for the undergraduate curriculum, including liberal arts requirements, major and minor course requirements and the coordination and development of minority services. He also is responsible for the ethnic studies program, a retention service for

minority and disadvantaged students, as well as a professional opportunities program for minority students.

Prior to serving at Illinois State, Chinn was the assistant vice chancellor for academic affairs at the State University System of Minnesota from 1979-82. He earned his master's and doctorate in political science from the University of Wisconsin, and his undergraduate degree from Stanford University.

A Fulbright scholar and author of a book and several articles about the Soviet Union, Chinn has taught political science courses at Illinois State University and at the University of Minnesota. He also was an assistant professor in the political science and Soviet studies department at the University of Louisville and was chair of that university's political science graduate program.

Searches continue for a vice provost for research and a vice provost for extension. An additional search will be started for a vice provost for minority affairs, a new position announced at the April 30 Board of Curator's meeting.

Minority effort begins

The School of Journalism will use a \$541,000 grant from the Knight Foundation to boost long-range recruitment efforts of minority high-school students.

The five-year program will identify promising minority students in high school, guide them into a journalism education, then track their scholastic and career progress. Also included in the grant is \$100,000 for scholarships and \$14,000 for research to determine the program's impact.

"We are excited and pleased to be working with the Knight Foundation," says Dean James Atwater. "Asking talented young minority students to consider journalism as a career is a goal shared by the foundation and the School of Journalism."

James Knight, chair of the Knight Foundation, calls the school's program ambi-

tious, practical and promising.

"While a number of programs exist to address some part of the problem of attracting more minorities to newspapers as a career, we saw a clear need to test the effectiveness of comprehensive programs," Knight says.

The program will focus on junior high and high schools in Kansas City and St. Louis and will feature informational meetings, skills classes, summer internships, summer workshops, scholarships, and tutoring and placement help for summer and permanent jobs. The foundation also is funding a similar program at the University of Florida.

The grant also will pay for a new faculty member to direct the program. Atwater says a national search will be conducted and the director named this fall.

Campus Dining Services would like to thank everyone who entered our name the snack bars contest. And the winners are:

- Electrical Engineering-"E.E.'s Eatery"
- Vet Medicine-"Veterinary Vittles"
- Animal Science-"Noah's Nibbles"
- Jesse-"The Snackery"
- Lewis & Clark-"The Lunch Landing"

We invite you to stop by one of the above eateries for breakfast, lunch or just a snack. Be sure to let Melva, Dorthy, Shirley, Margaret or Marie know how you like the new names.

FACULTY, STAFF TAPPED FOR HONORS

Faculty and staff were among those initiated into campus honoraries on Tap Day April 8.

Interim Chancellor Duane Stucky and George Jesse, associate professor of animal sciences, were tapped for Omicron Delta Kappa.

Mortar Board tapped Frederick Spiegel, professor of political science.

Arts and science Dean Milton Glick and Kim Dude, assistant director of residence hall programs, were initiated into QEBH.

Mystical Seven tapped Diana Helsel, interim associate dean of agriculture.

INDEPENDENT STUDY HAS NEW LOCATION

The Center for Independent Study has moved to 136 Clark Hall, the former athletic dining room.

The new location houses all of the center's staff, including the Video Credit Course Program. Major telephone numbers remain the same.

"For the first time, the center is housed in quarters that are a positive reflection of Missouri's No. 1 status in university independent study circles," says Director Roger Young.

WHITTLE AWAY CONSUMER DEBT

If you want to get rid of your consumer credit debt, there's only one solution, says Patrice Dollar, extension family and economics specialist. You need to come up with a plan to pay off the consumer debt you now have. Then, use credit less often.

Dollar suggests paying off the bulk of your consumer debt in the years that the highest percentage of interest is deductible. Under the new tax law, the deductibility of consumer credit debt, other than home mortgages, is being phased out as follows: 65 percent of consumer interest is deductible for 1987; 40 percent for 1988; 20 percent for 1989; 10 percent for 1990; and 0 percent for 1991.

First, list all your debts, including

annual percentage rate, monthly payment and balance. Then figure how much you can put toward debt repayment. You may need to reduce the amount spent on flexible expenses like clothing and recreation and increase the amount set aside for debt.

After paying off small loans, add that amount to increase the payment of other loans. Then, avoid buying small or everyday living items on credit. Use credit only for big-ticket items, such as cars or major appliances.

For more information, ask your local extension center for the free guide sheet, GH3342, "Reducing Consumer Credit."

Q. Does the University have plans to upgrade the status of women's sports at Mizzou? I hear a great deal about the men's programs, and there's certainly plenty of television coverage for them, but I'm a bit perplexed at the minimal coverage of women's sports.

A. "We think in terms of a total athletic program, not men's or women's sports. And we try to provide upward mobility for all sports," says Jack Lengyel, director of Intercollegiate Athletics. "We are always trying to upgrade the entire program. But our cash flow is such that we're in a cash-containment mode right now." Lengyel says as soon as the football program, the financial power behind the athletic pro-

gram, begins to pull in more revenue, his department can begin plans to upgrade all sports.

Q. Every day around noon, for some reason, the right-hand door of the doorways into Lewis and Clark halls' lobby is locked. Why?

A. "These doors are unlocked each morning by the watch force, and remain unlocked by securing the panic bar in an unlocked position by means of a set screw," says Phil Shocklee, assistant director of communications in Campus Facilities. "Through use, the set screw in this particular door apparently works loose by noon, allowing the panic bar to return to a locked position. New set screws have been installed and, hopefully, this will correct the problem."

Q. Who designed the University-wide official letterhead? It certainly isn't very impressive for a major university.

A. A former Mizzou graphic designer, Jill Swenson, drew the symbol in the early 1970s at the direction of the Board of Curators, which wanted one modern symbol to represent UM. At one point in the late '60s, a variety of public symbols were used to represent the University.

"The symbol is intended to represent the four campuses, and to be open, intriguing and imaginative," says Guy Horton, executive assistant to the president. "Of course, any kind of logo is up to personal judgment. It does have wide usage throughout the state and is highly recognized as representing the University."

Q. Why does the air conditioning in Ellis Library not get turned on until the day after final exams when all the students have left? The students pay for the air conditioning and also should have the benefit of it.

The unseasonably hot temperatures must be damaging the books. Why doesn't the library have the right to control its own air conditioning?

A. According to Phil Shocklee, assistant director of communications in Campus Facilities, May 1 is the target date each year for starting the air conditioning on campus. "If we have unseasonably warm weather prior to that date, air conditioning units are turned on as needed," he says.

The air conditioning in Ellis Library was turned on this year during the week of April 20. Librarian Bob Almony, the building coordinator, calls Campus Facilities if he

thinks, as he did this year, that warm temperatures merit turning on the air conditioning early.

Vol. 8 No. 30

A publication of the University of Missouri-Columbia faculty and staff, published every Friday during the academic year and twice a month during the summer by Publications and Alumni Communication, a department of Development, University and Alumni Relations Division, 1100 University Place, 882-7357. News deadline is noon Friday the week before publication. Annual subscriptions are available to retirees for \$10. Faculty Council and Staff Council communication committee members: Donald Anderson, Bob Derryberry, Gary Fields, Linda Holsinger, Gordon Kimber, C. Kirk Leeper, Mary Miller, Barbara Olson Smith and Donna Turner.

Editor: Karen Worley
Assistant editor: Carol Hunter
Staff writer: Mary Vermillion

==> Let's Compute!_

The weather is getting warm, the sun is shining, and summer is almost here.

And we all know what summer means. It means the end of the winter semester and the end of the fiscal year. And that means the rush is on to order computing equipment.

You can avoid this rush. Don't wait until the last minute to encumber year-end funds! The Computing Services Demo Room staff can work with you NOW to place your equipment and software order.

The Demo Room, 102 Lefevre Hall, 882-9400, is open 12:00 noon - 4:00 pm Monday, and 9:00 am - 4:00 pm Tuesday - Friday.

Focusing on recruitment of minorities

The University will commit \$500,000 to attract and retain more minority students, faculty and staff, University President C. Peter Magrath announced at the April 30 Board of Curators meeting in Rolla.

Magrath told the board the University could not take a "business as usual" approach to improving the University's minority programs.

"We must set our sights higher and move with greater effectiveness and creativity in achieving this most fundamentally important goal of the University," he said.

Noting that black enrollment has declined both nationally and at the University since 1978, Magrath said UM must develop new means of expanding educational op-

portunities for academically superior minority students and must aggressively recruit and retain outstanding minority faculty and staff. That effort will include hiring a vice provost for minority affairs at Mizzou.

The chancellors presented overviews of their equal opportunity and affirmative action programs. In reference to the Office of Civil Rights report on Mizzou's performance, interim Chancellor Duane Stucky said, "The report revealed that despite many efforts, we fell short of our goals for increasing the numbers of black undergraduate students, black graduate students and black faculty members."

"On the brighter side, the campus did succeed in its goal of increasing the number of black students in schools offering the first professional degree."

It was clear even before the report was issued, Stucky said, that Mizzou was failing to reach its goals of increasing black representation on campus. "We were failing despite the fact that we had implemented many new, imaginative programs in the past few years."

Stucky proposed a four-point plan to

begin a successful minority recruitment and retention program. Those points are: establish 50 full scholarships for talented new students from underrepresented groups; establish a senior administrative position in the provost's office with responsibility for minority affairs; make a commitment to actively establish and review plans to increase participation of underrepresented groups; and continue implementing new initiatives.

In other business, the board:

- added political science at UM-St. Louis and basic life sciences at UM-Kansas City to the list of eminence programs identified in September 1985 as part of the University's long-range plan. The other eight programs previously targeted for eminence include journalism, Food for the 21st Century and microbiology at Mizzou.

- heard from Arthur Mallory, state commissioner of elementary and secondary education. He said elementary and secondary education will be improved through the strengthening of the teaching profession, and that colleges of education will play a major role in the reform movement.

- approved the purchase of a satellite

news-gathering vehicle for KOMU, Mizzou's commercial television station. The \$356,200 vehicle will permit KOMU reporters to broadcast news live from around the state and send stories via satellite to stations across the country.

- heard from a student group representing Mizzou's College of Veterinary Medicine about student concerns at the college.

- approved a \$683,083 contract for resurfacing and other improvements to parking lot HSC4, near University Hospital and Clinics.

- approved a \$104,869 contract for Agricultural Engineering Building site improvements, including walkways.

- granted a \$158,100 contract for remodeling of Rothwell Gymnasium locker rooms. The construction will be paid through student fee increases, approved last fall by a student vote.

- awarded a \$356,000 contract for installation of an energy management system at University Hospital, including computerized controls of heating, ventilating systems and air conditioning.

- awarded a contract to Executive Consulting Group Inc. of Bellevue, Wash., for a management study of the School of Medicine's administrative and clerical services, with an emphasis on the clinical departments.

- approved procedures governing disposition of charges of research dishonesty by academic faculty and staff.

Adams

Alpert

Barlow

Kudos for top faculty

Fifteen of Mizzou's most talented professors won awards for teaching and research during Faculty Recognition Day May 5.

John E. Adams **Amoco Foundation Undergraduate Teaching Award**

Chemistry has never been very high on the list of favorite undergraduate subjects. So John E. Adams, assistant professor of chemistry, says it is nice to be recognized as a good teacher with a hard course. "I don't make my course popular by making it easy," Adams says.

Adams is winner of the \$1,500 Amoco Foundation Undergraduate Teaching Award.

Adams, a faculty member for six years, usually teaches undergraduate physical chemistry. He recently began teaching in the freshman program. Adams' research involves theoretical chemical dynamics and computer calculations. But students are his first priority.

"Anyone who teaches has to do it because they like the students," Adams says. "It takes a lot of time and effort to teach, and there's not a lot of time to do it," he says. "It is nice to be recognized for teaching excellence at such an early stage in my career."

Martin A. Alpert **Burlington Northern Foundation Faculty Achievement Award**

Students pass under the tutelage of Martin Alpert in terms of weeks rather than semesters. In the short time he serves as their mentor, however, he instructs them in the intricacies of sustaining human life. Alpert, a cardiologist, is an associate professor of medicine.

Alpert came to the University as an intern in 1973. In 1979 he joined the faculty.

Alpert says he chose the University because of the teaching hospital's excellent staff. As winner of the \$4,000 Burlington Northern Foundation Faculty Achievement Award, Alpert is now part of what makes that staff excellent.

"The department creates an environment that allows you to be creative in terms of curriculum," Alpert says. "The trick lies in having the energy and desire to accomplish the task."

Tani E. Barlow **Provost Outstanding Junior Faculty Teaching Award**

Curiosity draws many students to Tani E. Barlow's courses on Japan, imperial China, modern China, Chinese women's history and a comparative class on China and Japan. "Students don't know very much about my subject, but they are intensely curious. They come to class because they have an urge to learn," says the assistant professor of history, who is winner of a \$1,000 Provost Outstanding Junior Faculty Teaching Award.

Barlow's students discover a professor who loves to teach. "The most exciting and interesting and fun part of the job is teaching students. I get enormous pleasure from that. There's an absence of cynicism here, and students are very open to teaching and learning."

A faculty member since 1985, Barlow research specialty is Chinese women's history.

Collins

Cunningham

Fair

Flader

Robert M. Collins
Maxine Christopher Shutz
Award and Lecturer

For Robert M. Collins, the best thing about teaching is "the idea that you might change the way somebody looks at the world, hopefully for the better."

Collins, an associate professor of history, is winner of the \$2,000 Maxine Christopher Shutz Award for Distinguished Teaching. As part of the honor, he presented the Shutz lecture Nov. 17 in Memorial Union, speaking on "Shifting Gears: The American Economy in Transition, 1930-50."

With Mizzou since 1980, Collins developed a course on America in the 1960s, one of the most popular classes in the College of Arts and Science. He also teaches a survey course on 20th-century America.

His research interests include popular economic ideology, or how Americans have thought about the economic growth over the past 100 years and how they have acted on those thoughts.

Noble Cunningham
Frederick A. and Catherine
Paine Middlebush Chair

Jeffersonian scholar Noble E. Cunningham Jr. is winner of a Frederick A. and Catherine Paine Middlebush Chair. The three-year appointment provides an annual stipend of \$5,000 plus \$1,500 per year for research.

Cunningham, a professor of history, teaches a survey of American history to 1865 and graduate courses on the Jeffersonian and Jacksonian period. He came to Mizzou in 1964, attracted by its good graduate program and strong History Department.

"The opportunity to pursue research in one's own special field is the best thing about the University," he says. Cunningham's biography of Jefferson, "In Pursuit of Reason: The Life of Thomas Jefferson," will be published in May by LSU Press. The book will be a history book club main selection. Appropriately, Cunningham won the Thomas Jefferson Award, a University-wide honor, in 1979.

Nancy Fair
Provost Outstanding Junior
Faculty Teaching Award

Some of Nancy Fair's students aren't excited about the subject matter she teaches when they enter the class. But the assistant professor of textile and apparel management changes all that by semester's end. One colleague says Fair is a "textile evangelist" whose mission is to "turn her students on" to the subject of textiles. Fair tries to show her students the subject is a blend of art and science.

She brings no less enthusiasm to her research in the structure-property relationships in fibers. Although Fair has only been on the faculty for four years, she has established herself as effective, energetic and innovative.

Fair is winner of a \$1,000 Provost's Outstanding Junior Faculty Teaching Award.

Credit for her success should be shared, Fair says. "I've found intellectually stimulating colleagues and good students in this department. There is a lot of mutual respect here."

Susan L. Flader
Byler Distinguished
Professor Award

Interaction with students is the best thing about being a faculty member at Mizzou, says history Professor Susan L. Flader, winner of the \$2,000 Byler Distinguished Professor Award. "The students have a wide range of interests, which comes from the wide array of schools and colleges represented on this campus."

Flader's courses on history of the West, environmental history, history of Missouri and historic preservation attract students from numerous divisions outside of arts and science, including agriculture, home economics, engineering, education and journalism. She also teaches graduate seminars.

Flader's research includes a study of Ste. Genevieve, Mo., the state's first European settlement. Material from the study will be available on computer to other researchers. "The project is a resource for an untold number of possibilities," she says. "The information could be used for a wide array of studies."

Hoffman

Kalton

Marlin

Miller

Stevie Hoffman
Elizabeth F. Cooper Faculty of Excellence Award

"Teacher" is a special word, says Stevie Hoffman, recipient of the \$500 Elizabeth F. Cooper Faculty of Excellence Award.

"Teachers are not for students to model, but to enable others to learn," says Hoffman, a professor of curriculum and instruction. "I want to share my knowledge base of how children learn and grow as well as share my own professional experience. You can talk theory, but if you can't put it in practice it's no good."

Hoffman, who joined the faculty in 1977, teaches both undergraduates and graduate students. The opportunity to work with teachers in the field is one of the best things about Mizzou, she says.

Another plus, Hoffman says, is her department. "It's marvelous. My colleagues keep me intellectually curious."

Nigel J. Kalton
Weldon Spring Presidential Award for Research and Creativity

Nigel J. Kalton came to America from Great Britain searching for better research opportunities. He found them at the University.

A professor of mathematics, Kalton teaches a variety of courses, including calculus and linear algebra analysis. His main area of research is functional analysis.

Kalton is winner of the \$10,000 Weldon Spring Presidential Award for Research and Creativity. He also was the 1984 recipient of the Chancellor's Award for Outstanding Faculty Research in the Physical and Mathematical Sciences.

"The University offers a competitive environment and encouragement to do research," says Kalton, who joined the University in 1979. "It also has the means and the facilities necessary to do research."

Marjorie M. Marlin
Alumnae Anniversary Faculty Award

Marjorie M. Marlin's expertise in statistics and experimental design seems outdone only by her expertise in helping students master the concepts. "Students must become knowledgeable in statistics and experimental design, but they must be treated gently until they realize they can succeed at it," she says.

Marlin, an associate professor of psychology, enrolled in college at age 37, when the youngest of her four children began kindergarten. She has taught at the University for 19 years.

"Women didn't have both careers and families when I chose to do so. I represent the first trickle of what has since become a flood," says Marlin, recipient of the \$2,000 Alumnae Anniversary Faculty Award.

"I enjoy the opportunity to contribute to so many students. There's a lot more to being an educator of women than just working in the classroom. I had a family and a career. It's important for women to know they don't have to give up one to get the other."

Kerby A. Miller
Chancellor's Award for Outstanding Faculty Research and Creativity in the Performing Arts and the Humanities

A Pulitzer Prize nomination was among the honors bestowed upon Kerby A. Miller's book, "Emigrants and Exiles: Ireland and the Irish Exodus to North America." The book won the Merle Curti award for the best book in social history published in 1985.

Miller, associate professor of history, is winner of the Chancellor's Award for Outstanding Faculty Research and Creativity in the Performing Arts and the Humanities. The award includes a \$1,000 prize and \$2,000 for professional use to enhance research.

His next book will be an edited collection of the best of the Irish emigrants' letters and memoirs, which he discovered in research. Miller teaches American history, history of the American city, history of modern Ireland and graduate seminars on emigration history.

"The best thing about being a faculty member here is that provisions for summer research are pretty generous," he says.

Riddle

Sims

Watson

Wood

Donald L. Riddle
Chancellor's Award for
Outstanding Faculty Research
and Creativity in Biological
Sciences

In his research, Donald L. Riddle seeks an understanding of how genes control the development of an animal. "It's important to understand how the process works because of the problem of genetic diseases in humans," says the professor of biological sciences who teaches developmental biology and genetics.

Riddle is winner of the Chancellor's Award for Outstanding Faculty Research and Creativity in Biological Sciences, which carries a \$1,000 prize plus \$2,000 for professional use to enhance research.

He cites professional interaction with colleagues as one of the best things Mizzou offers. "Deans support cross-campus collaboration, and it was out of this atmosphere of community that interdisciplinary programs in molecular biology and Food for the 21st Century developed. These programs will be of immense benefit to the campus, University and state."

Wendy L. Sims
Provost Outstanding Junior
Faculty Teaching Award

Wendy L. Sims' students range from toddlers to young adults. The assistant professor of music education teaches pre-school music at the campus Child Development Laboratory in addition to college courses in elementary music methods, basic music skills, beginning guitar, research and music education. Sims has a dual appointment in education and arts and science.

"I didn't want to stop teaching children," says the former elementary school music teacher who joined the faculty two years ago. "I want to get them so hooked on music when they're little that they'll tolerate good music when they become teenagers."

Sims is a winner of a \$1,000 Provost Outstanding Junior Faculty Teaching Award.

"This campus provides me with an opportunity to teach at a university and live in a community where the teaching and learning processes are valued and the arts are considered important."

Richard A. Watson
Thomas Jefferson Award

A faculty member since 1959, Richard A. Watson once thought he might be interested in attending the University's School of Journalism. Instead he became a professor of political science.

Watson still ended up in print. In July he expects to add a book called "The Politics of the Presidency" to his long list of publications.

Watson is the recipient of the \$1,000 Thomas Jefferson Award. The award is given to individuals whose lives are thought to uphold Jeffersonian principles.

"I am pleased with the students I teach, both graduate and undergraduate," Watson says of his career at the University. "I have freedom to develop my career the way I want. The department is always supportive of my research efforts."

David Wood
Frederick A. and Catherine
Paine Middlebush Chair Award

When David Wood began his job search 26 years ago, he was looking for a place that offered academic freedom to develop his career. He chose the University of Missouri-Columbia, and it has lived up to his expectation.

Wood, a professor of political science, teaches comparative politics. His research emphasis is the legislative politics of France and Britain.

The faculty in Wood's department voted to award him a 1987 Frederick A. and Catherine Paine Middlebush Chair, which provides a \$5,000 stipend for three years and \$1,500 a year for research.

"It is gratifying to be recognized by one's colleagues," Wood says. "I'm in a good department and it makes me feel that good people in the department show respect for my work."

Wood says he appreciates this campus. "The University tries to keep people from feeling their options are limited. It is better than many campuses in that respect."

Faculty designated emeritus professors

College of Agriculture

- Thomas S. Baskett, 1973-1987, professor emeritus of forestry, fisheries and wildlife**
Harold Biellier, 1946-1987, professor emeritus of animal sciences
Glenn Stuart Geiger, 1957-1987, associate professor emeritus of animal sciences
John S. Holik, 1956-1987, associate professor emeritus of rural sociology
Hugh Donald Naumann, 1955-1987, professor emeritus of food science and nutrition
Marlin N. Rogers, 1951-1987, professor emeritus of horticulture

College of Arts and Science

- Ernst Braun, 1962-1987, professor emeritus of Germanic and Slavic studies**
Robert P. Breitenbach, 1958-1986, professor emeritus of biological sciences
Allan B. Burdick, 1969-1986, professor emeritus of biological sciences
Ebion DeLima, 1965-1987, professor emeritus of Romance languages
John P. Doll, 1959-1986, professor emeritus of economics
Charles S. Gowans, 1957-1986, professor emeritus of biological sciences
Louis V. Holroyd, 1950-1987, professor emeritus of physics
J. Trenton Kostbade, 1962-1987, associate professor emeritus of geography
Claudia Kren, 1965-1986, professor emeritus of history
Clair Leonard Kucera, 1950-1987, professor emeritus of biological sciences
James Allen Middleton, 1973-1987, professor emeritus of music and education
Frederick C. Spiegel, 1955-1986, professor emeritus of political science
Robert F.G. Spier, 1949-1987, professor

emeritus of anthropology
Joseph L. Zemmer, 1950-1987, professor emeritus of mathematics

College of Business and Public Administration

- Robert Dale Schooler, 1964-1987, professor emeritus of marketing**
Donald L. Shawver, 1951-1986, professor emeritus of marketing
Ralph Edward Skelly, 1954-1986, associate professor emeritus of accountancy

College of Education

- Veralee Hardin, 1957-1987, professor emeritus of special education**
Paul C. Ritchie, 1951-1987, professor emeritus of physical education
Allan William Sturges, 1971-1986, professor emeritus of education

College of Home Economics

- Marilyn W. Caselman, 1961-1986, associate professor emeritus of family economics and management**
Treva C. Kintner, 1972-1986, assistant professor emeritus of human nutrition,

foods and food systems management

School of Journalism

- John C. Merrill, 1966-1979, professor emeritus of journalism**
Ernest C. Morgan, 1969-1987, professor emeritus of editorial journalism

School of Medicine

- William C. Allen, 1965-1987, professor emeritus of family and community medicine**
Raymond L. Hodges, 1972-1987, professor emeritus of pathology
David M. Witten, 1982-1987, professor emeritus of radiology
Calvin Watts Woodruff, 1965-1987, professor emeritus of child health

College of Public and Community Services

- Lee James Cary, 1966-1987, professor emeritus of community development**

College of Veterinary Medicine

- Lawrence G. Morehouse, 1964-1987, professor emeritus of veterinary pathology**

This Week

MAY 8 - MAY 14

FRIDAY, MAY 8:

- 5:30 NBC Nightly News
- * 6:00 NEWSCENTER 8
- * 6:30 Wheel of Fortune
- 7:00 Roomies
- 7:30 Amazing Stories
- 8:00 Miami Vice
- 9:00 Stingray
- *10:00 NEWSCENTER 8
- 10:30 The Tonight Show
- 11:30 Friday Night Videos

SATURDAY, MAY 9:

- * 6:30 Bullwinkle
- 7:00 Snorks
- 7:30 Gummi Bears
- 8:00 Smurfs
- 9:30 Alvin and the Chipmunks
- 10:00 Foofur
- 10:30 Punky Brewster
- 11:00 Lazer Tag Academy
- 11:30 Kidd Video
- *12:00 Modified Miller 200
- 1:00 NBC Major League Baseball: New York Mets @ Atlanta Braves
- * 4:00 Lorne Greene's New Wilderness

Offices to switch to summer schedule

Warm weather signals summer hours for some University employees. Many campus offices will switch to a 7:30 a.m. to 4 p.m. work day, with a half-hour lunch, effective May 18. Regular hours of 8 a.m. to 5 p.m. will resume Aug. 24.

Offices in the following areas will switch to summer hours:

- Agriculture
- Arts and Science
- Business and Public Administration
- Education
- Engineering
- Graduate School, except the Office of Research, and Grants and Contracts
- Home Economics
- Journalism
- Nursing
- Public and Community Services
- Office of Admissions and Registrar
- Veterinary Medicine, except the Diagnostic Laboratory and the Teaching Hospital
- Extension Division
- Academic Support Center
- Black Studies
- International Programs
- Learning Center
- Women Studies
- Accounting Services
- Business Services
- Campus Computing
- Campus Facilities, which maintains the summer hours schedule year 'round.
- Campus Mail Service
- Cashiers/Payroll/Student Loans
- Computing Facilities
- Environmental Health and Safety
- Facilities Utilization
- Procurement/Materials Control
- Telecommunications
- Vice Chancellor for Administrative Services
- Athletic Department
- Vice Chancellor for Student, Personnel and Auxiliary Services
- Counseling Services
- Hearnes Center
- Memorial Union/Brady Commons administrative office
- Office of Student Development Fiscal Office, Governments and Activities, International Student Programs, Recreation/Intramurals, Black Culture

- Center, Women's Center, and Developmental Programs and Publications (Maneater and Savitar offices)
- Parking and Transportation Services
- Residential Life
- Student Financial Aids
- Student Health Service

Offices that will be open from 7:30 a.m. to 5 p.m. are:

- Office of Development
- Alumni/Development Records
- Alumni Relations
- Office of Student Development director's office

The Office of Equal Opportunity will be open from 7:30 a.m. to 4:30 p.m.

Campus Dining Services administrative office and catering office will be open from 8 a.m. to 4:30 p.m.

MIZZOU PEOPLE

WON H. CHANG, professor of journalism, received a Fulbright Scholar award to conduct research in Korea for a year, beginning in August 1987. He will be assigned to the Research Institute of Asian Affairs at Korea University in Seoul as a distinguished visiting professor. Chang will teach a graduate course in theory of international communication while researching "Korea in the Global Village: Media Effects on Her Pivotal Role in East-West Relations."

IRVING EPSTEIN, assistant professor of higher and adult education and foundations, delivered a paper, "Special Education in the People's Republic of China," at the 31st annual meeting of the Comparative and International Education Society in Washington. He also presented "Education as State-Sponsored Coercion: The Case of the Taiwan Juvenile Training Institute" at the annual meeting of the Academy of Criminal Justice Sciences in St. Louis.

STEVEN W. GRAHAM, director of professional continuing education and assistant professor of higher and adult education and foundations, had an article, "Continuing Education Activities Among Post-Baccalaureate Degree Adults: Examining Motivations," published in the Journal of Continuing Higher Education.

THEODORE J. GREEN, associate professor of veterinary medicine, attended the Giardia and Giardiasis Conference Feb. 23-25 in Calgary, Alberta.

SHARON L. HUNTZE, assistant professor of special education, presented a keynote session on "Ecological Intervention and Project ReEd" at the Midwest Symposium for Leadership in Behavior Disorders in Kansas City. She also served on the symposium's steering committee.

DALE E. KENNEDY, director of bands and professor of music, was elected and inducted into the American Bandmasters Association at its joint meeting with the Japan Bandmasters Association in Knoxville, Tenn.

BETTY B. MARTIN, associate professor of practical arts and vocational-technical education and coordinator of home economics education, served as a member of the North Central Association evaluation team that visited Jefferson Junior High School March 8-10 in Columbia.

FREDERICK N. SPRINGSTEEL, associate professor of computer science, recently returned from a half-year Fulbright visit to Yugoslavia, where he was accommodated at the University of Novi Sad. While there, he was the invited guest of the Hungarian Academy of Sciences. He attended 10 days of lectures and consultations at its Computer and Automation Institute in Budapest, Hungary. Last October, Springsteel was the guest of the Slovak Academy of Sciences. He gave an invited address, "Basic Complexity Analysis of Hypothesis

Share The Magic Of Your Telethon

Watch the Children's Miracle Network Telethon May 30-31 on KOMU-TV.

See the magic unfold on Channel 8, Saturday evening, May 30, and throughout the day, Sunday, May 31. When University Hospital and Clinics again joins the Children's Miracle Network Telethon, you'll see national programming from Disneyland — and local segments, direct from University Hospital's lobby.

Every mid-Missouri gift stays at home, to benefit the children who are cared for by The Staff for Life. Portions of this year's donations will renovate the general pediatric unit's examination room. Share the magic... and help make miracles happen.

We know some kids who need your help.

National Telethon Chairperson Marie Osmond with 1987 poster child Andy Jablonski at University of Missouri Columbia Hospital and Clinics

Honoring superior graduate students

Brian Trompeter photo

Shamsul Alam was among 76 students recognized for their achievements.

A record 76 departments nominated graduate students for this year's superior graduate achievement awards, which were presented at an April 28 ceremony in Memorial Union. The award, sponsored by the Graduate Student Association, recognizes excellence in academics, teaching, research and extension.

One of those honored, Shamsul Alam, has been singled out for honors before. In 1984, the graduate student in statistics won a graduate student teaching award. Of the most recent award, Alam says being recognized by his department as one of the outstanding graduate students on campus means "someone recognizes and appreciates the hard work of graduate assistants."

"Awards like this one give you an incentive to work harder," he says. "And they boost your morale."

Student reviews from the business statistics classes he teaches rave about his ability to teach the tricky mathematics course. Although he isn't teaching this semester, Alam, a native of Bangladesh, does occasionally fill in for professors when they are out of town. He says he likes the challenge of facing a class full of questioning students.

This semester he is concentrating on his work with the Center for National Food and Agricultural Policy and Institute in the Department of Agricultural Economics.

Alam will graduate with a doctoral degree in statistics this summer. He says his ideal job would combine teaching and research.

Graduate students recognized at the April 28 ceremony for their outstanding service to the University are:

College of Agriculture

- Jennifer Donaldson, forestry
- Vivek Fellner, dairy science
- Carol Ferguson, entomology
- William L. Flowers, animal sciences
- Satish Jaiswal, extension education
- Don Johnson, agricultural education
- Niaz Latif, agricultural engineering
- John Lawrence, agricultural economics
- Rochelle Renken, fisheries and wildlife
- Dan Schober, food science and nutrition
- Joseph Slater, horticulture
- William G. Spollen, agronomy
- Hiroshi Tanaka, atmospheric science
- Arthur Thomas Trese, plant pathology

College of Arts and Science

- Shamsul Alam, statistics

Lawrence Edison Banks III, computer science

- Karen Bartman, music
- Daniel Burbach, psychology
- David Cochran, history
- Carolyn Eoff, mathematics
- Paul Gullifor, communication
- Lori A. Hathon, geology
- Russell Lee Ivy, geography
- Jeff Johnson, English
- Elizabeth Knox, philosophy
- Melissa Lowe, classical studies
- James Newton, physics
- Kathleen O'Hanlon, Romance languages
- Karen Parsons, political science
- Christopher Pulliam, anthropology
- Maureen Ann Regan, economics
- Harold Riethman, biological sciences
- Jan Motyka Sanders, art history and archaeology
- Suzanne Schmoll, art
- Kenneth Stilson, theater
- Silvia Twardawa, Germanic and Slavic studies

College of Business and Public Administration

- Julie Arauza, public administration
- Juanita Brown, business administration
- Jeffrey D. Gramlich, School of Accountancy

College of Education

- Carole Sue Gile, curriculum and instruction
- Catherine Ann Grove, health and physical education
- E. Grant Jones, educational and counseling psychology
- Sheila Jones, special education
- Sandra Suttie, higher and adult education
- Earl Wellborn, educational administration
- Julie Whitaker, practical arts and vocational-technical education

College of Engineering

- Phil Bennett, nuclear engineering
- Raymond Kowalik, civil engineering
- Bill M. Maloney, industrial engineering
- Roya Rezvani, electrical and computer engineering
- Bob West, mechanical and aerospace engineering

College of Home Economics

- Patricia Bonner, family economics and management

- Denise Brown, human nutrition, foods and food systems management
- Mary Beth Megrew, housing and interior design
- Carol Mertensmeyer, child and family development
- Margie Meyer, textile and apparel management

School of Health Related Professions

- Lisa English, communicative disorders
- Richard Speck, health services management

School of Journalism

- Eronini Raphael Megwa, journalism

School of Medicine

- Michael J. Boyer, microbiology
- Matt Cowlen, pharmacology
- Steven Huang, anatomy
- Deborah Landrum, biochemistry
- Kathryn Lynn Owen, laboratory animal medicine
- William H. Thornton Jr., pathology
- Vicky L. Tucker, physiology

School of Nursing

- Katherine Frazier Darnell, nursing

College of Public and Community Services

- Curtis W. Hendricks, community development
- Nora Lertitz, School of Social Work
- Cris Rodriguez, parks, recreation and tourism

College of Veterinary Medicine

- Michael E. Johnson, veterinary microbiology
- Michael T. Parker, veterinary pathology
- Karla Rugh, veterinary medicine and surgery
- Joseph A. Safron, veterinary pathology
- Melissa K. Stuart, veterinary microbiology

Continued from Page 10.

Formation Problems," at the fourth international meeting of Young Computer Scientists held at Smolenice Castle near Bratislava, Czechoslovakia.

WILLIAM M. STEPHENS, assistant professor and law enforcement specialist at the University's Law Enforcement Institute, was honored as the first Missouri Certified Law Enforcement Instructor of the Year.

SAM D. STOUT, associate professor of anthropology and director of the Human Skeletal Identification Laboratory, presented a paper, "Intraskelatal Variability in Cortical Bone Histomorphometry," at the annual meeting of the American Academy of Forensic Sciences Feb. 18-21 in San Diego. He presented the paper to the physical anthropology and patho-biology sections of the meeting.

WILLIAM H. TAFT, professor emeritus of journalism, will receive the Alumni Achievement Award from Westminster College May 2. Taft, one of five award recipients, also will attend his 50th class reunion.

LLOYD B. THOMAS, professor emeritus of chemistry, presented "Chemistry: Seeing is Believing" March 3 in Schlundt Hall. The talk was sponsored by Beta Iota chapter of Phi Lambda Upsilon, the chemical society honorary.

TOM R. THOMAS, associate professor of health and physical education, recently had a second edition of "Scientific Exercise Training," a textbook he co-wrote, published by the Kendall/Hunt publishing

company.

LARRY THORNBURG, associate professor of veterinary medicine, presented a short course on liver disease to the Greater St. Louis Veterinary Medical Association March 6 in St. Louis.

JUNE TIPTON, food service worker II, was recognized for her five years of service to the University at the College of Home Economics staff recognition reception March 31 in Gwynn Lounge.

M.J. TORRES-ANJEL, associate professor of veterinary medicine, presented "Improvements of Rabies Diagnosis" and "The Study of AIDS-like Wasting Syndrome in Animal Models" March 9-20 in Costa Rica.

JOAN TRIMBLE, a secretary in the Department of Child and Family Development Extension, was recognized for her 20 years of service to the University at the College of Home Economics staff recognition reception March 31 in Gwynn Lounge.

HARRY TYRER, professor of electrical and computer engineering, attended the 15th annual Association for Computing Machinery Computer Science Conference Feb. 17-19 in St. Louis. Tyrer led a session on operating systems and co-presented the paper, "Load Leveling for Control of Distributed Processing Systems." Tyrer attended a short course on ADA programming Jan. 26-30 in Toronto to help him integrate the ADA programming language into two of his classes. Funds to attend the short course were provided by a faculty development grant.

DABIR VISWANATH, professor of chemical engineering, has been named a fellow in the American Institute of Chemists. Fellowships are offered by invitation only and are not restricted to members of the organization. Viswanath previously had not been connected with the institute.

CARLA WAAL, professor of theater, had one of her translations, "Free Pass to Soria Moria," presented by Pan Viking Productions March 9 at the City University of New York Graduate Center. The reading was sponsored by the Royal Norwegian Consulate General.

PAUL WALLACE, professor of political science, presented "Sikh Minority Attitudes in India's Federal System" at a Sikh studies conference Feb. 12-14 at the University of Toronto. Wallace also was part of a panel discussion at a Sikh conference Feb. 20-22 at the University of California-Berkeley.

ALAN R. WARDEN, director of Campus Facilities, has been certified a cogeneration professional by the Cogeneration Institute of the Association of Energy Engineers. The title recognizes that Warden has demonstrated a high level of competence and ethical fitness in the cogeneration field.

RICHARD A. WATSON, professor of political science, spoke to the Columbia Hillel group last December about the 1986 congressional re-elections. He also addressed the Muleskinners about party realignment Feb. 6.
