

MIZZOU

W E E K L Y

University of Missouri - Columbia / July 24, 1990

As the summer session draws to a close, so does the production schedule for Mizzou Weekly. The next issue will be published Aug. 28.

ON THE INSIDE:

Page 2 The Campus Directory is being updated. A Change of Address Form is the only way to update information for your individual phone listing.

Getting a boost

Program intended to help MU's new clerical workers get off to more productive start.

A pilot program that began this month has one goal — to make the MU campus user-friendly for new clerical workers.

For the first time, new secretaries at Mizzou will sit at the keyboards of IBM-PCs for training in word processing and other computer skills. Another class will help new clerical workers understand University regulations and procedures, including everything from filling out basic forms and operating the office phone system to arranging for travel and catering.

At the same time, MU is stepping up its efforts to recruit

qualified secretaries. Recruiters are making more visits to area junior colleges and high schools. Through advertisements and lunchtime employment seminars, Mizzou is reaching out to the surrounding area to find potential clerical employees.

The emphasis on increased training was recommended last fall by a campuswide task force that examined problems of recruiting and keeping qualified secretaries. Competition from other large Columbia employers and increasingly complex technology in the office make it difficult for MU to attract enough qualified clerical workers, the task force found.

"Today's secretary is not someone who just types and answers the phone. He or she has to be a technical expert and also needs a pretty high level of organizational skills," says Dixie Lenau, manager of Stenographic Services, Human Resources Development, and director of the pilot program.

"The idea behind the training program is to make the new secretary more comfortable and productive," adds Debbie Prost, training and development coordinator in Personnel Services.

"We hope to get new secretaries up to speed more quickly. Having people learn on their own is not the most efficient way," Prost says. "The University is such a complex system, it's hard for someone to come in and understand who does what and what all the different forms are for."

MU is still experiencing a severe shortage in qualified office staff, says Karen Touzeau, assistant vice chancellor for Personnel Services and Affirmative Action. In its report, the task force said 87 percent of the departments that responded to a survey found secretarial applicants deficient in word processing or computer skills.

Although there are some word processing and computer classes available, new office workers sometimes had to wait several months for one to start. "A lot of secretaries in small offices around campus don't have a whole lot of support systems," Touzeau says.

The first classes in the pilot program began last week in a computer lab at Lewis Hall. In six-hour sessions, new clerical workers learned the basics of DOS, Lotus and WordPerfect software systems. They also were instructed in how to use University resources, including the telecommunications system.

And as a backup for the classes, Lenau and her staff have set up a help desk where new secretaries can call to get immediate answers to their questions. For now, because of limited funding, the computer classes and the help desk will be available only to new office workers.

"We're trying to solve the problem with a limited budget," Lenau says. "Hopefully, if more funds become available, we'll be able to expand the program to include all office workers on campus. If we see the need for additional clerical training, we'll try to meet that need."

Mizzou meal ticket

Thanks to MU's research mission, employees can buy eggs, ice cream and cuts of meat.

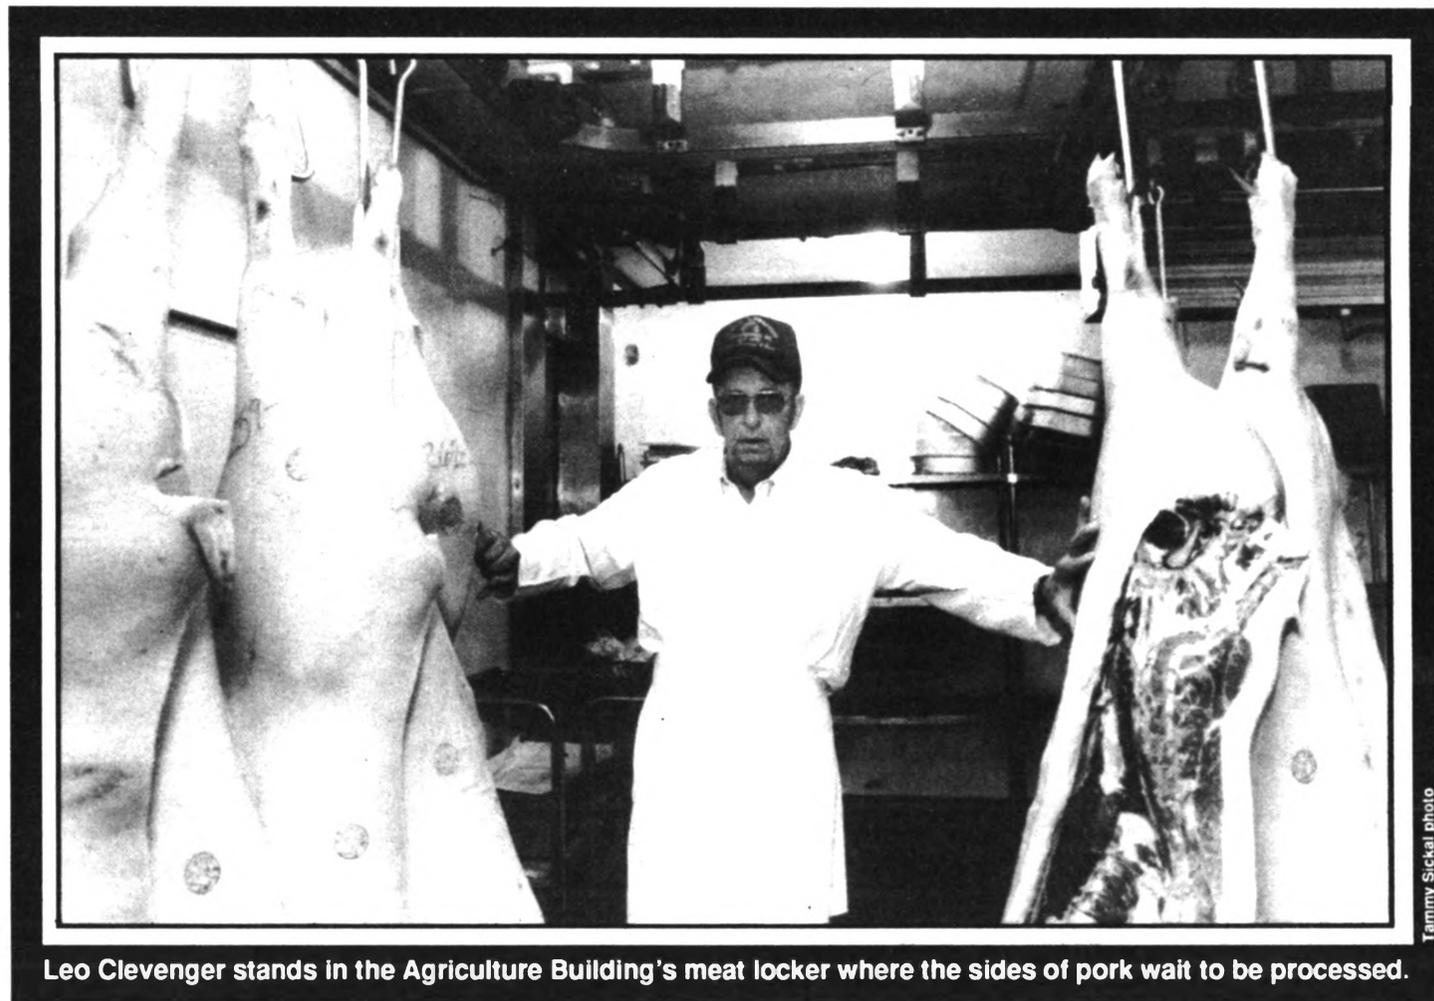

Most Friday afternoons, a steady trickle of customers find their way down the first-floor hallways of the Agriculture Building to the meat science lab. For some people, the University's weekly meat sales are a tradition. And the warm reception they get from Leo Clevenger has become another tradition.

For the past 17 years, Clevenger has been greeting customers, weighing out cuts of pork, beef and lamb and ringing up the sales. All the meat comes from University herds that are used either for research or for classroom demonstrations. The meat is processed, checked by a federal inspector and sold to the public at market prices.

All the work is done by Clevenger, a meat processor, and meat lab manager Greg Choate in the gleaming tile and stainless steel room. "There's one thing about this job," Clevenger says. "We take it all the way through, from the truck to the table."

"This operation is run just like any other meat plant," Choate explains. "We have to meet all the same standards. The only difference is that our meat sales are basically the byproduct of teaching and research. As soon as the meat comes in the door, it's used as a teaching tool every step of the way."

The lab has helped generations of Mizzou students learn the latest meat processing techniques — from making hot dogs, bologna and sausage to curing hams on the chest-high machine that injects a curing solution

Leo Clevenger stands in the Agriculture Building's meat locker where the sides of pork wait to be processed.

into green hams through rows of needles. The lab also is used for classes in meat judging and in hotel and restaurant management.

All that teaching activity translates into a mountain of roasts and ribs, chops and steaks that have graced dinner tables around Columbia for decades. On a recent Friday afternoon, different cuts of pork were featured — steaks, loin roasts, country-style ribs, neckbones and ground pork. At other times, customers can buy hamburger, steaks, roasts and legs of lamb. Sides of beef and whole lambs may be ordered. To find out what's

available on a particular sale day, call 882-2385.

The Animal Science Department also sponsors an egg sale from 4 p.m. to 5:15 p.m. each Wednesday and Friday. From time to time, live birds also are offered for sale. The egg sale room is in Building T-14 at the corner of College Avenue and Hospital Drive. Call 882-6649 for more information.

And while the egg and meat sales have been going strong for years, another old tradition returned to campus last year when Buck's Ice Cream opened in Eckles Hall. The giant ice cream cones offered at Buck's

are not generally a byproduct of teaching or research. They're made from commercial mixes, says Bob Marshall, professor of food science and nutrition. But it does give the public and the MU community a chance to do their own research in what good ice cream tastes like. Buck's, located in the rear of Eckles Hall, offers up to 10 flavors of ice cream and frozen yogurt, and is open weekdays from noon to 5 p.m.

And customers could get a bonus. "Once in a while they might get a surprise, because we could be testing a new flavor or a formula," Marshall says.

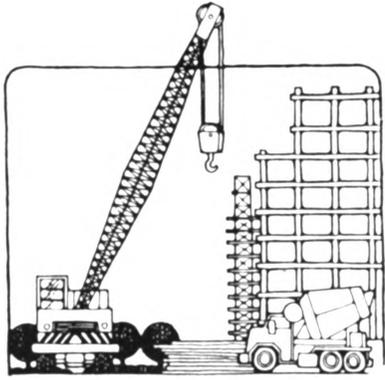

SIGN UP NOW FOR PARKING

If you want to get your name on the list to park in the future Turner Avenue garage, or if you're interested in a parking assignment in the Conley or University avenue garages, stop by Parking and Transportation Services, 107 Swallow Hall.

"We have applications for you to complete so you can be added to the waiting list for the location you choose," says Carol McAllister, administrative associate II. Or you can fill out an application at the Student Parking Services window, 128 Brady Commons.

The Turner Avenue garage, being constructed in the area bounded by

Conley, Maryland and Turner avenues and Sanford Street, is scheduled to be completed by fall 1991.

EMPLOYEES RECEIVE TICKET DISCOUNTS

Faculty and staff once again will receive a discount on MU season football tickets. Employees pay \$77 for the six-game home package this year, compared with the regular price of \$103.

You can take part in the family plan, which offers employees and their families season tickets in the south stands for \$62 per family member. Or you could buy your child under 12 a Junior Tiger season ticket for \$18.

There will be six home games this year: TCU, Sept. 8; Utah State, Sept. 15; Arizona State, Sept. 29; Colorado, Oct. 6; Kansas State (Homecoming), Oct. 20; and

Oklahoma, Nov. 3. The single-game ticket price is \$16, except for the Arizona State and Oklahoma games, which cost \$19.

This year marks the centennial of Mizzou's football program, and special events will be held during the season. With questions or to order tickets, call 882-2386.

EVENT TO HONOR RETIRING ADVISER

A reception to honor Reba A. Cassin, academic adviser in the College of Arts and Science, will be from 3:30-5 p.m. Aug. 1 in the Faculty-Alumni Lounge at Memorial Union.

Cassin is retiring after more than 20 years of service at MU. Friends and colleagues are invited to the reception.

Human resource classes to expand

At a June 12 meeting, MU's Staff Advisory Council members were updated on recent program improvements at Personnel Services. Karen Touzeau, assistant vice chancellor for Personnel Services and Affirmative Action, described a new orientation program for job applicants and outlined an expansion of MU's human resource development classes.

"There is probably nothing we've left untouched," Touzeau said of her department. "We're trying to become more efficient, to streamline our operation."

The new orientation program teaches job applicants how to apply for positions at MU and how to know what jobs are available. "People did not know how to get on at the University. They didn't know how to use the system effectively," she said. The new program makes that information available to

Staff Advisory Council

WORKING FOR YOU

applicants at noontime workshops and after-work sessions. The groups are small, generally 10 people or fewer and can help present MU employees learn about transferring to other jobs on campus.

Touzeau said the proposed expansion this fall of the human resource development classes were prompted by feedback from

departments around campus. "People said they wanted more classes in different subjects and in different locations," she said, and added that some classes could be tailored for the needs of individual departments and taught on-site. "We're trying to get the service where people want it."

Jo Pflieger, council chairwoman and administrative assistant in Veterinary Microbiology, asked about the status of University funding for individuals to take professional secretary certification classes. "We really support certification. We would love to see more people do it," Touzeau said, and added that at one time that funding was available from the UM System. "We no longer have those resources available," she said. "Another option would be for individuals to work with their departments to get funding."

GENERAL STORES
882-6906

How to keep those calls coming

To help ensure that your listing is correct in the 1990-91 Student, Faculty and Staff Telephone Directory, follow these steps.

First, be aware that information for the alphabetical listings in the faculty-staff section will be taken from the campus and hospital payroll-personnel data bases.

Names, titles, departmental addresses and phone numbers, and home addresses and phone numbers will be pulled in September for employees whose full-time equivalence at MU is from 75 percent to 100 percent.

Employees must fill out a Change of Address Form (UMUW 282) to make any additions or corrections to campus addresses and phone numbers or to restrict the listing of home addresses and phone numbers. This is the only way

these entries can be updated for the telephone directory.

The cutoff date is Aug. 17 for returning these forms to Jim Robinson, 16 Jesse Hall, or Janet Shackelford, 1W41 University Hospital and Clinics. Forms may be ordered from General Stores.

Some employees who need to be included in the faculty-staff section might not be pulled from the data bases in September. These include key part-time personnel who are less than 75 percent FTE; military, medical, USDA, or other federal employees who have campus appointments but are paid primarily from non-university funds; and professors emeriti who have offices on campus. All offices and departments are requested to send a list of these employees to the Publications Office, 1100 University Place, by Aug. 24.

Please submit the information in alphabetical order as follows:

Line 1 must contain name (last, first) and percent of FTE

Line 2 must contain title, department and home phone number if employee wants it listed

Line 3 must contain campus address and phone number

Line 4 must contain home address if employee wants it listed

Here's an example:
Doe, John F. (50%)
Professor, Engineering 555-5555
200 Engineering Bldg. 882-0000
1234 St. Louis Ave.

Please do not list employees who are 75 percent FTE and above. With questions, call Sue Richardson at 882-7357.

CLASSIFIEDS

FOR SALE

COLUMBIA'S ORIGINAL condominium, ideal for faculty/staff. Across from campus, convenient to everything. Two 2-bedroom apartments (or combined). Moderate upkeep, central air. \$33,000 each apartment, \$65,000 for both. Phone 442-4370.

3600-SQUARE-FOOT brick home on 19.6 acres within city limits, four-car garage, 36 x 52 workshop, 36 x 60 livestock barn, lake and two ponds. 449-4031.

FIVE-ACRE HOME SITES: Woods and/or meadow, southern exposures, 4 miles southwest. \$14,000 & up, w/\$1,000 down, remainder over 10 years. All underground utilities; no trailers. 449-5620 before 6 p.m.

The Classified Advertising Section is open only to faculty and staff members. A home phone number is required in all classified ads.

Ads must be typed.
Rates: 30-word maximum \$3.

Publication deadlines:
Aug. 17 for Aug. 28
Aug. 24 for Sept. 4

WATCH THOSE ZUCCHINI RECIPES!

Don't get in a jam with your zucchini. An unsafe recipe for zucchini jam is being circulated around the state, which has led to a sticky situation. The recipe does not call for refrigeration or freezing, both of which are essential to make the jam safe to eat, says Melinda Hemmelgam, MU extension food and nutrition specialist. "Zucchini is low-acid foods, so they have to be handled differently from high-acid foods like fruit," she says. "A jam with zucchini in it has to be refrigerated or frozen. Most fruit jams and jellies can be home-canned safely.

Low-acid foods can cause the most problems in home canning because they can create an ideal environment for the microorganism that causes botulism food poisoning. "Even a taste of food containing this toxin can be fatal," Hemmelgam says.

She urges people to be skeptical of home-canning recipes that are old or that appear in community recipe books that have not been approved by an authority in food science. "Sometimes recipes are passed down from generations, and some could be unsafe. We now know more about food safety."

USE CAMPUS MAIL FOR BUSINESS ONLY

Campus mail is for official University business only. That's a reminder from Patsy Higgins, manager in Business Services. "Recently, some employees have received chain letters through campus mail, along with mail advertising personal items for sale," Higgins says. "These things seem to go in cycles, and this has been happening more lately. "Please use campus mail for business only. Campus Mail Service will appreciate your cooperation."

RECEPTION TODAY FOR PROVOST

A reception will be held this afternoon for Provost Lois DeFleur, who will become president of the State University of New York at Binghamton in August. The reception will be at 4 p.m. in N201-202 Memorial Union. Refreshments will be served.

Commercial license needed to drive for MU

MU employees who drive buses or large trucks in connection with their jobs, or who transport hazardous materials, must obtain a commercial driver's license.

The Department of Revenue has told MU that University employees are no longer exempt from the requirement of holding a commercial driver's license if the employee:

- operates a vehicle weighing more than 26,000 pounds;
- hauls hazardous materials;
- operates a vehicle designed to transport more than 15 passengers.

Patsy Higgins, manager in Business Services, says most employees to whom this would apply are in Campus Facilities, the

College of Agriculture and Environmental Health and Safety.

"The employees who drive for a living most likely know about this already," she says. "But there may be others out there who this would apply to on certain occasions, and they need to know about it, too."

An example, Higgins says, would be a coach or faculty adviser who transports students to an event in a bus or similar vehicle. If the bus or other vehicle is designed to hold more than 15 people, the

driver needs a commercial license. Under the law, drivers who hold a chauffeur's or operator's license may continue to perform their jobs until the date their license is renewed or until April 1, 1992, when enforcement takes effect. "It is important to note that once enforcement takes effect, employers as well as employees are subject to substantial fines for non-compliance," Higgins says. Such fines could range up to \$5,000. With questions, call Higgins at 882-7254.

Neutron expert to head Mizzou's research reactor

James Rhyne, one of the world's leading experts in using neutrons to probe the structure of magnetic materials, has been selected director of MU's research reactor. He will begin his duties in January.

Rhyne, research physicist and director of the Center for High Resolution Neutron Scattering at the National Institute of Standards and Technology in Gaithersburg, Md., was selected from a pool of national and international scientists. He also will be a full professor in the Physics Department.

"We are extremely fortunate to have attracted someone with such strong scientific credentials and a clear vision for enhancing the academic research and educational programs of our unique resource," says Judson Sheridan, vice provost for research and dean of the Graduate School. "He has the unqualified and enthusiastic support of all of us interested in seeing the reactor achieve its potential as a national and world-class facility."

Originally from Oklahoma, Rhyne received his doctorate in physics from Iowa State in 1965 and has had a distinguished career that included 15 years with the NIST. He has published nearly 200 papers, book

chapters and reviews and is a frequent participant and organizer of national and international symposia in the neutron scattering area.

He has been recognized with several research awards and has been on numerous national and international advisory boards and committees.

Rhyne says he sees the reactor as a unique resource that can attract students and scientists from around the world.

"At a minimum, the goal is to use this facility to augment the quality and visibility of research programs and to exploit the reactor's uniqueness as a mechanism for attracting outstanding students, faculty and visitors," he says. "In short, our mission is to use MURR to the fullest extent possible and thus to promote the international reputation of the University of Missouri-Columbia."

MU's research reactor is the highest-powered, highest steady-state flux university research reactor in the United States. It was constructed in the 1960s and has been in operation almost continuously since 1965. Research at the reactor centers around a number of areas, including solid state physics, engineering, chemistry and medicine.

When life's little emergencies throw you a fast one...

Don't take any chances. Head for the Emergency Center at University Hospital. It's the only place to go when you need the most professional, well-trained and fully-staffed emergency center in Columbia. Our Emergency Center is the only Level One Trauma Center in mid-Missouri. So when life's little emergencies throw you

a fast one, make the Emergency Center at University Hospital your first choice.

Sign painter Bobby Morris stands with replacement signs in the warehouse at Campus Facilities.

Creating his own sign language

While Bobby Morris probably does not have a recognizable face around campus, his signs are certainly familiar.

"No Parking," "Loading Zone" and "Unauthorized Vehicles Will be Towed" are only a few of the messages Morris has made during his 35 years with the University.

"It's a full-time job," says Morris, who constantly works on painting new signs or replacing old ones that have been weathered or desecrated.

"Signs that restrict parking or state DO's and DONT's are popular targets for vandalism."

But aside from the minor irritation of having to redo the sign, Morris is relatively unbothered. "I just keep putting them back," he says. "It's kind of like the grass — it just keeps coming back."

However, Morris' biggest worry concerning the sign-painting business is computers. He predicts that new vinyl lettering, which can be quickly sized, spaced and assembled on a computer at minimal cost, will eventually replace the traditional sign painters of the past.

"Fortunately," says Morris, "I plan to retire soon." — *Story and photo by Tammy Sickal*

PEOPLE

Laura Bullion, senior manuscript specialist at the Western Historical Manuscript Collection, has been selected to the executive committee of National History Day. She is director of History Day in Missouri, a statewide program for students in grades 6 through 12.

Roger Casadei, groundskeeper, has been selected as Campus Facilities' employee of the month for July.

Dan Clay, graduate student in physical medicine and rehabilitation, had his proposal, "Diagnosing Depression in Patients with SCI," accepted for presentation at the 1990 convention of the American Psychological Association. The paper was co-written by Associate Professor **Robert G. Frank**.

Marcy Coley, accountant in Campus Facilities, celebrated 10 years with the University in June.

Three Computing Services staff members gave presentations at a seminar for city employees in May. **Kim Ross**, programmer/analyst II, presented "Spreadsheet Potentials." **Robin Reasoner**, programmer/analyst I, demonstrated dynamic database exchange using a database and Microsoft EXCEL. **Gerry Novak**, programmer/analyst I, discussed hard disk backup and hardware maintenance.

Robert Conway, assistant professor of physical medicine and rehabilitation, had an article, "Isolated Complete Denervation of the Flexor Pollicis Longus," published in the May 1990 issue of the Archives of Physical Medicine and Rehabilitation. He also was selected for membership in the Peripheral Neuropathy Institute.

Jack Curtis, chief of cardiothoracic surgery at University Hospital and Clinics, has been elected president of the Missouri chapter of the American College of Surgeons.

Samuel Davee, building trades specialist in Campus Facilities, celebrated 20 years with the University in July.

Jerry DeHaven, mechanical trades specialist/electrician in Campus Facilities, celebrated 25 years with the University in July.

Michael A. Diamond, associate professor of public administration, presented "Monkey Business: Taking Humor at Work Seriously," at the International Society of Political Psychology's annual workshop in Washington D.C. July 11 through 15.

Sonya Duhé, a former faculty member at Louisiana State University, is the new anchor for KOMU-TV's NewsCenter 8 at Six. She has a bachelor's degree from LSU and a master's in broadcasting from Northwestern University. In addition to her anchoring duties, Duhé will teach at the School of Journalism and serve as faculty editor in the KOMU newsroom.

Larry "Lee" Eckerle, materials management, has been selected as Printing Services' employee of the month for July.

Wilbur Gilmore, service station attendant in Campus Facilities, celebrated 10 years with the University in July.

Harold B. Hedrick and **H. Donald Naumann**, professors of food science, have been honored by the American Meat Science Association. Hedrick was given the R.C. Pollack Award for teaching and research that represents an extraordinary and lasting contribution to the meat industry. Naumann was given the Signal Service Award for devoted service and lasting contributions to the meat industry.

Kenny Hinds, custodian in Campus Facilities, celebrated five years with the University in July.

Barbra Horrell, coordinator of student recruitment in the School of Medicine, recently was selected to an office for the central

region of the Association of American Medical Colleges. She will serve a two-year term as vice chairwoman of the Group on Student Affairs' Minority Affairs Section.

Raymond Leaton, custodian, has been selected Campus Facilities' employee of the month for June.

Mary Lenox, dean of library and informational science, is attending Harvard University's Institute for Educational Management through Aug. 4 in Cambridge, Mass.

Richard Miller, electronics system specialist in Campus Facilities, celebrated five years with the University in June.

Bobby Morris, sign painter in Campus Facilities, celebrated 35 years with the University in July.

Albert Palmer, custodian in Campus Facilities, celebrated 10 years with the University in June.

Jody Pestle, secretary in agricultural economics, has been selected as the July recipient of the College of Agriculture Staff Recognition Award.

Tim Phillips, small engine mechanic in Campus Facilities, celebrated 15 years with the University in June.

The Department of Physical Medicine and Rehabilitation had its annual Rusk celebration at the Haden House Restaurant in June. **Ken Reed**, fifth-floor program manager and primary nurse, won the Rehabilitation Nursing Award. **Jarvis Hall**, therapeutic recreation specialist, won the Rehabilitation General Award. The Teacher of the Year Award went to Assistant Professor **Robert Conway**, and the Chief Resident Award was given to **Jem Hof**.

The Department of Psychiatry presented awards to three faculty members and three residents in April. Assistant Professor **Johnna L. Russell** received the Guhleman Award for Clinical Excellence. The Residents' Award for Teaching Excellence went to **M. Marga Dick**, clinical assistant professor, and **John F. Patterson**, clinical associate professor. Outstanding senior resident awards were given to **G. Douglas Frisch** and **Jerome C.M. Peters**. The outstanding junior resident award was presented to **Alejandro V. Natividad**.

James Putnam, assistant supervisor of building services in Campus Facilities, celebrated 10 years with the University in July.

Joie Schoonover, manager at Dobbs Dining Hall, attended the National Association of College and University Food Services' leadership institute in June at Russellville, Ark.

Shivendra D. Shukla, associate professor of pharmacology, has returned from Paris, where he presented a paper, "Platelet Activating Factor Receptor Signalling in Platelets from Normal and Pathophysiological States" at a XI International Union of Pharmacology seminar June 28 and 29.

Ruth Souder, custodian at Gillett Hall, has been selected as Residential Life's employee of the month for July.

Robert Southerland, supervisor of materials at the power plant, celebrated 20 years with the University in July.

Ann Statler, graphic artist at the Academic Support Center, received the Award of Excellence in the annual Communicators of Mid-America (COMMA) competition. Her first-place logo was designed for the Heartland Network for Town and Rural Ministries, Judith Bortner Heffernan, executive director.

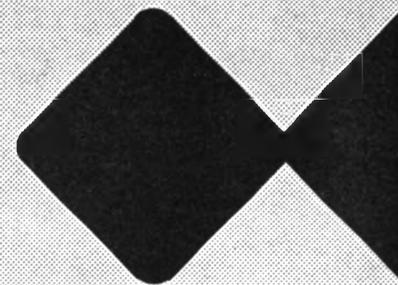

Donald Stevens, senior construction project manager in Campus Facilities, celebrated five years with the University in June.

Vernon Stone, professor of journalism, has been selected chairman of the nominations and elections committee of the Association for Education in Journalism and Mass Communication.

Robert Tharp, high-voltage electrician in Campus Facilities, celebrated five years with the University in June.

The Hitt Street visitor's lot will be undergoing major renovation, including new lighting and surfacing, through August. Space will be limited at that location.

Also, during the same time period, roadway improvements will be made south of the Hearnes Center between Mick Deaver Drive and the General Services Building.

License To **Roar!**

For the first time, Missourians may purchase personalized MU license plates for their vehicles. These distinctive plates, issued by the state's Department of Revenue, display Truman the Tiger and the MU trademark—symbols of loyalty and pride in Ol' Mizzou.

Alumni, students, friends, fans—any motorist who is a resident of Missouri—may apply for the collegiate plates.

It's easy to start the wheels rolling. Just return the coupon with a donation of \$25, which will boost academic scholarships for students from Missouri. Total cost of plates, including the annual \$15 vanity plate fee and the donation, will range from \$58 to \$91 annually, depending on horsepower. MU plates issued this year will expire in October 1991.

Personalized plates may have one to five letters or numbers, or four characters with a dash. Show your creativity and pride—return the coupon for your collegiate license plates today.

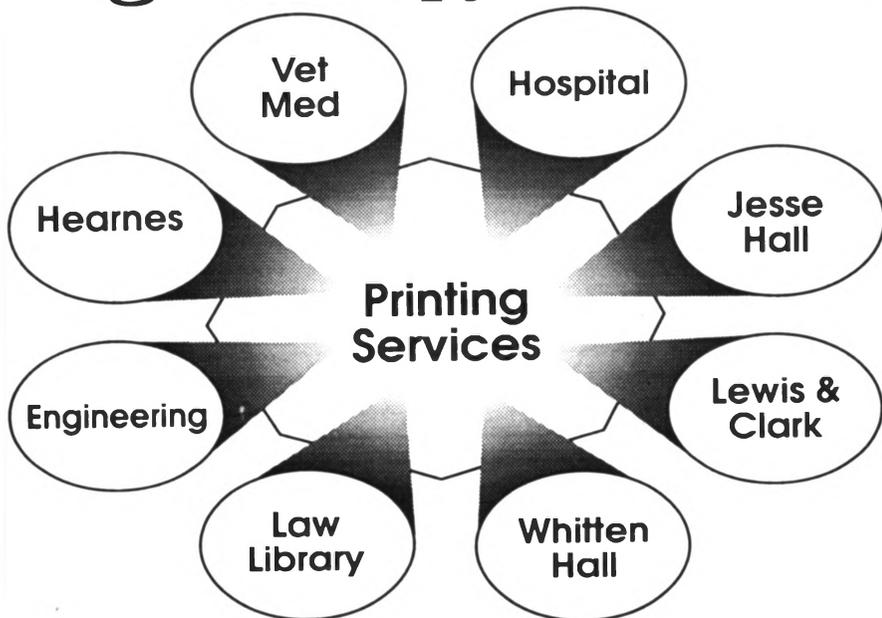

**Yes, I want to apply for MU license plates.
My \$25 scholarship donation is enclosed.**

====> Let's Compute!

ATTENTION: UMCVMB USERS

UMCVMB will be Unavailable August 4-10 due to Upgrade

MU is upgrading its main-frame computer from an IBM 4381-R14 to an IBM 3090-170J, adding cartridge tape facilities and disk space, and upgrading communications equipment. Consequently, all userids, including VMBATCH and disconnected userids, will be forced off the system August 4.

When you log on to UMCVMB on August 10, you'll find it the same as before—except faster. The new system will retain the node name UMCVMB and all functions of the old system.

We hope you enjoy your time off from CMS while we work feverishly to bring you improved computing. To find out

more information about the upgrade and new features that will become available, see the Campus Computing *Special Edition* Newsletter, July 1990, or call 882-5000.

Campus Computing Lab Intersession Hours

Intersession hours begin Saturday, August 4. Labs resume regular hours of operation Tuesday, September 4.

23 Heinkel Building	
7 am - midnight	Monday - Friday
8 am - 7 pm	Saturday
4 pm - midnight	Sunday
10 Arts & Science	
8 Middlebush	Monday - Friday
8 am - 8 pm	

Hours are subject to change pending renovation schedules.

Organizers are gearing up for Show-Me State Games

The Show-Me State Games will be held in and around Columbia this weekend, but the festivities won't necessarily end with the final horn or whistle on Sunday. For the first time, a special recognition week in August will honor the game's participants, coaches and volunteers.

"In the past, the games have ended, everyone has gone home and that's been it," says Sara Parker, information specialist. "For some people, it's been sort of a letdown. This is a way to extend the spirit of the games and honor the people who make the event such a success."

The recognition week will be Aug. 19 through 26. Festivities begin in St. Louis with a Cardinals-Astros game at Busch Stadium at 1:15 p.m. Aug. 19. A regular \$8.50 ticket will cost \$7.50, and the state games contingent will sit in a special section and be recognized during the game.

The celebration shifts to Kansas City and Royals Stadium a week later, when the state games contingent will be honored during a Royals-Mariners game at 1:15 p.m. Aug. 26. A regular \$7.50 ticket will cost \$7. And on Aug. 24, state games participants and volunteers will receive half-price admission to the Missouri State Fair in Sedalia. The rodeo at the fair also will be half-price.

But first things first. Parker and other games organizers are gearing up for the beginning of Missouri's premier athletic event. The Show-Me State Games have grown significantly since starting in 1985. There were 600 participants that first year; more than 13,000 athletes are expected this year. A program of the Governor's Council on Physical Fitness and Health, the games are open to Missourians of all ages and athletic ability. The University serves as host to the games.

The Olympic-style festival features 23 sports, including archery, wrestling, softball, and events for people with disabilities. District competitions in basketball, soccer and track and field began in the spring. Competitors in cycling, road racing and a triathlon can wait until the day of the events to enter. A horseshoes event is new this year.

A torch run from Jefferson City to Columbia will mark the official beginning of the games July 27. Gov. John Ashcroft will run part of the distance. At 4 p.m., the torch runner will arrive at the Shelter Insurance Cos. building at 1817 W. Broadway, where Columbia Mayor Mary Anne McCollum and other dignitaries will read a proclamation.

The opening ceremonies will be at 8 that evening at the Hearnes Center. There also will be a parade of athletes, video and light shows and the lighting of the flame by former Olympians Larry Young and Helen Stephens.

A highlight this year will be a rodeo July 28 at the Midway Exposition Center. There will be a 2 p.m. matinee and an 8 p.m. show, featuring more than 200 cowboys and cowgirls in eight events. The cost is \$3 for the matinee and \$6 for the evening show, but games participants will receive \$1 off. "This is the first year we've done this, and we think it will be a big success," Parker says. "It will give people something to do on Saturday night."

Parker says about 300 people have volunteered for such jobs as timers and scorekeepers. "But if a faculty or staff member still wants to volunteer, I'm sure we can put him or her to work," she adds.

Except for the rodeo, there is no admission fee for the events. For information, for Cardinals or Royals tickets, or to volunteer to work at an event, call the games office at 882-2101.

Q&A

Q. Is there a way to get my office telephone's Voice Mail messages from home or a distant location?

A. To access Voice Mail from a local number, call 882-1111; listen for a special tone; dial your six-digit WATS authorization number and the # symbol; listen for a dial tone; then dial 11 to access Voice Mail. "When the Voice Mail system answers, just follow the prompts as you do from campus," says Terry Robb, assistant manager of customer services for Telecommunications.

If you're calling long distance, dial 1-800-325-2541. After you hear a special tone, dial your WATS authorization number. You'll hear a special tone. Dial 11 to access Voice Mail, then proceed as you would if you were on campus.

Q. I am interested in knowing how many departments on campus participate in recycling. Civic Recycling does a wonderful job in regards to supplying containers and pickup service for free. I contacted Civic and started the recycling program in my department and I think it would be fantastic if the University would make recycling mandatory for all departments.

A. Although it is not mandatory, the University strongly encourages all departments to participate in the recycling program on campus, says Larry Baumgartner, manager of Materials Management. At the present time there are 104 pickup sites on campus where Civic Recycling has placed collection bins and periodically picks up waste paper for recycling. In addition, Printing Services collects waste paper from its operations and sells it by the tractor-trailer load to paper recycling mills. MU also recycles aluminum printing plates, silver from X-ray film, scrap metal and crushed glass. Baumgartner adds that a new committee was recently formed on campus to look into ways to enhance the University's recycling operation.

Any office or department that would like to begin collecting waste paper for recycling, should contact Baumgartner at 882-5051 to arrange for pickup by Civic Recycling. If there is a sufficient volume of paper from a pickup site, Materials Management will pass on 75 percent of the \$30 per ton that Civic Recycling currently pays MU for waste paper. Baumgartner says a video also is available that details MU's surplus property operation

and recycling program.

Q. Several months ago, Mizzou Weekly had a story that said a committee was being formed to study whether MU should provide day care on campus. Was this committee ever formed? What options for day care will it be looking at and when will it make a recommendation?

A. Chancellor Haskell Monroe has named seven people to a campuswide committee that will examine options for day care at MU. Monroe has asked the committee to make recommendations to him by Nov. 1, says Gerald Brouder, deputy chancellor. The chairwoman of the committee is Sharon Stark, administrative assistant in the College of Education. Stark says the committee has been meeting regularly and that members are researching the issue by trying to document how many children would likely be enrolled in day care on campus. Members also are looking at how day care centers are operated on campuses across the country.

Other members of the committee are Kathy Thornburg, professor of human development and family studies; Donna Otto, associate hospital director for nursing services at University Hospital and Clinics; Melanie Derendinger, coordinator of purchasing and real estate for the UM System; Mary Gray, associate professor of human development and family studies; Pamela Norum, assistant professor of textile and apparel management; and Sara Stemberger, administrative associate II at University Hospital and Clinics.

Q. The swimming pool at Lewis and Clark halls, which I understand is owned by the University, is not open this summer. My children and I have used it for years and love it. Why is the pool closed? Is it too late to do anything about it?

A. It's probably too late to get the pool open this summer, but there's a good chance it will reopen next summer. Although the University owns Lewis and Clark halls, it leases the swimming pool at a nominal charge to the Lewis and Clark Swimming Association, an independent group of faculty and staff that share the cost of operated the pool. Organization members say that this year they were unable to recruit enough people to cover the cost of maintenance, insurance, chemicals and lifeguards. "There wasn't enough membership to get it going this year," says Peggy Dawson, a member of the swimming association. Dawson says the group mounted a membership drive earlier this summer, but by that time all the Red Cross-certified lifeguards who were going to work at the pool had found other jobs.

administration, says the MPA program has been found to conform with standards of the National Association of Schools of Public Affairs and Administration, the accrediting agency for public administration. The MPA program is offered on the MU campus and in Jefferson City for the benefit of state employees. The program currently has 140 participants.
