Strengthening the bonds

*University kicks off
1990 United Way drive
with a goal of \$200,000.*

MU United Way workers, on a breakfast of doughnuts, coffee, praise and thanks, kicked off the University's part of the annual fund-raising campaign Sept. 26 at the Memorial Union. The University's six fund-raising regions will pursue a total goal of \$200,000 this year.

"Our participation is a key part of the campaign," Chancellor Haskell Monroe, honorary chairman of MU's portion of the drive, told more than 100 gathered for the kickoff. "I see this as an opportunity to demonstrate how proud we are to be a part of the Columbia community — to strengthen the bonds between the University and the community."

Dick Dowdy, associate professor of human nutrition and foods and president of the Columbia Area United Way, thanked workers for their participation in the past and said another strong effort is needed this year. The community drive began Sept. 10 with a total goal of \$1.07 million. "Together we can bring out the best in everyone," Dowdy said. Also speaking briefly were Tom Gray, general manager of KOMU-TV and vice chairman of the Columbia Area

United Way, and Patsy Higgins, manager in Business Services and manager of MU's United Way office.

Leading MU's campaign this year will be Chris Koukola, assistant vice chancellor for University Relations, and Bob Bailey, assistant dean of law. They stressed that 85 percent of the money raised goes directly to 29 agencies in Columbia. MU's new Eldercare Center joins the list of agencies this year.

Charles Sampson, associate dean of the Graduate School, will lead Academic Region I, which has a goal of \$58,000. The region is made up of the College of Business and Public Administration, the College of Education, the College of Engineering, the College of Human Environmental Sciences, the Graduate School and Research Centers, the School of Journalism, the School of Library and Information Science, the School of Law and the School of Medicine.

Donna Dare, executive staff assistant in the College of Veterinary Medicine, will lead Academic Region II toward a goal of \$48,000. The College of Agriculture, the College of Arts and Science, the College of Veterinary Medicine, the Division of Extension and the School of Nursing comprise this region.

Carole Sue Delaite, assistant director of Development, will lead the Administrative Region toward a goal of \$31,600.

This region includes Administrative Services, Alumni Relations and Development, Business Services, Campus Facilities, the Chancellor's Office, Computing Services, Intercollegiate Athletics, KOMU-TV, Libraries, Personnel Services, Provost's Office, Research and Planning, Student Affairs and University Relations.

For the University Hospital and Clinics Region, David Corzine, assistant manager of radiology, and Lori Johnson, manager of ear, nose and throat services, will head efforts to raise \$19,000. This region consists of administrative and financial divisions, Nursing Operations and Planning, Professional Services, Medical Practice, Income Plan and University Physicians.

Blake Danuser, Human Resources and Student Aid administrator, will direct the University of Missouri System Region toward its goal of \$19,200. Academic Affairs, the Board of Curators, Computing and Informational Systems, General Counsel, Human Resource Development, Management and Financial Services, the President's Office, the State Historical Society and the Treasurer's Office and Auditing make up his region.

Robert S. Daniel, chairman of the chancellor's advisory committee on retired faculty and staff, will lead retiree efforts to raise \$23,000.

Besides meeting the dollar goal, MU United Way workers will seek 100 percent return of pledge cards. Senior administrators already have given \$5,080 in a pacesetter effort. Report meetings are scheduled during the next five weeks, and the campaign awards ceremony will be Nov. 28.

Each honoree will receive a print of 'Ol' Mizzou,' painted by the late MU art Professor Fred Shane. The original hangs in the Alumni/Faculty Lounge in the Memorial Union.

Staff photo

A quarter-century of service

*Ceremony today
to honor faculty
and staff who
have been at MU
25 years or more.*

Gov. John Ashcroft will join Chancellor Haskell Monroe today in honoring 460 faculty and staff members who have served the University for 25 years or more. At a 1:30 p.m. ceremony in Jesse Auditorium, Monroe and Ashcroft will thank the long-time employees for their years of service to MU and to the state.

During the ceremony, Monroe will give special recognition to 10 employees with 40 or more years of service, and will honor the

longest active faculty member and staff member at MU.

The honorees include those who have completed 25 years of service since Monroe came to MU. The chancellor began his duties here in the summer of 1987. Some of the honorees have retired in the months since.

Family and friends will join the honorees at a reception in the Jesse rotunda following the ceremony. Each of the long-time employees will receive a framed print of "Ol' Mizzou," a painting by the late Fred Shane, a member of the art faculty for more than 35 years.

Shane, a nationally recognized artist and educator, died Sept. 22. He was chairman of the Department of Art from 1958 to 1967 and was selected a Sesquicentennial Professor Emeritus in 1989.

A complete list of the honorees appears on pages 4 and 5.

ORDER OF EVENTS

25-YEAR EMPLOYEE RECOGNITION OCTOBER 2, 1990

ANOTHER TYPE OF BURNOUT

The Environmental Health and Safety Department, in cooperation with the Fire and Rescue Training Institute, will present a free fire extinguisher training session from 9 to 11 a.m. Oct. 11 in 12 Research Park Development Building.

The session will feature a training film and actual practice with various types of fire extinguishers. To register, call Ray Morrison at 882-7018.

FOOTBALL BALLOTS DUE SOON

Time is running out to cast your ballot for Mizzou's all-century football team.

Intercollegiate Athletics is conducting the event as part of the football centennial, and all ballots must be returned to the department by Oct. 8. Football fans are asked to vote for at least two players from five different eras, then 15 players in any combination to equal 25 total picks.

Nominations for MU's all-time coach are being taken as well. The final 25 players and coach will be announced at the Homecoming game Oct. 20 against Kansas State.

After five weeks, former tight end Kellen Winslow leads the voting with

777 votes out of a total 1,014 ballots cast. Second is former quarterback Paul Christman with 772 votes. Next in line are former defensive back Roger Wehrli, 725 votes; halfback Johnny Roland, 637; wide receiver Mel Gray, 623; running back James Wilder, 542; and linebacker Andy Russell, 532. Ballots may be obtained at the Intercollegiate Athletics office, and will appear in Saturday's Colorado game-day program.

FUNDS AVAILABLE FOR LECTURES

The University lectures committee may be able to give you a financial hand with your event.

The committee urges departments and units to apply for funds to help support lectures this academic year. The group particularly favors projects that involve several units or disciplines and that do not rely solely upon the committee's funds.

To obtain an application form, contact John B. Miles, professor of mechanical and aerospace engineering and chairman of the committee, at 1021 Engineering Building, or call 882-4048.

Athletics, academics to be studied

Faculty Council will appoint members to a task force that will examine the relationship between athletics and academics, council members were told Sept. 27.

Allen Hahn, professor of veterinary medicine and surgery and Faculty Council chairman, said he has received a number of inquiries on the subject. "The committee will examine how well we are addressing the mission of the University and our relationship with students who participate in athlet-

ics," Hahn said. The council went into closed session after the regular meeting to discuss membership on the task force.

Bob Stewart, professor of practical arts and vocational-technical education and a member of the committee on intercollegiate athletics, told the council that his group is encouraged by recent advances in academics and athletics at MU. "Our Total Person Program is making good progress in seeing that athletes receive the academic help they need," Stewart said. As an example, he noted that athletes considered "at risk" academically are assigned to tutors and placed in special study groups.

"And during the 1988-89 year, the cumulative ACT score of our new freshman athletes was 22 — the highest in the Big Eight," Stewart said.

Council member Rob Logan, associate

professor of journalism, applauded the move to establish a task force. "In recent months, Penn State, Miami and Arkansas have all been asked to either join conferences or to change conferences," he said. "In these cases it appears that athletics is driving academics."

"There's a larger issue at work here, and I think we need to look at it. This will be a very important and very sensitive issue in the coming years."

In other matters, the council:

- was urged to make colleagues and students aware of the McNair Program, which helps prepare promising junior and senior minority students for postgraduate work. "We need faculty mentors," Vicki Curby, who helps direct the program, told council mem-

bers. The program is administered through the office of Charles Sampson, associate dean of the Graduate School.

- was told that its help may be needed in reviewing MU's smoking policy. "The UM System is asking us what we can do to have a smoke-free campus," Hahn said. "We'll be discussing this more in the future." Currently, smoking is permitted in most buildings at MU, but only in designated areas.

- was told that its fiscal affairs committee is examining the percentage of new funds applied toward faculty salaries this year. Andrew Twaddle, professor and chairman of sociology and chairman of the committee, said his group hopes to meet with MU budget officers to discuss the matter.

Nominate staff members for Staff Advisory Council

Take the time to make a difference at Mizzou — nominate a fellow staff member to represent you on MU's Staff Advisory Council. The council is now seeking nominations for its upcoming fall election when five new members will be selected to serve three-year terms.

The council was formed in 1978 to advise the chancellor on matters of concern to staff at MU. Council members are an important link between employees and the administration, providing information and many other services.

The council is made up of 16 members, with four members from each of the follow-

ing job classifications: administrative/professional, crafts/maintenance, secretarial/clerkal, and technical paraprofessional.

To nominate someone, fill out the form below and return it by Oct. 5 to: Staff Advisory Council Election, 305 Jesse Hall. For more information, call Darlene Schroeder at 882-4269, or contact one of the Staff Council members listed in the campus telephone directory.

A slate of candidates will be prepared from the list of nominations. Ballots will be mailed to eligible staff in early November. Election results will be announced immediately after the close of the election Nov. 20.

Educational assistance discussed

The topic of educational assistance for dependents of University employees surfaced again during a Sept. 27 meeting of Staff Advisory Council.

Under the current educational assistance program, faculty and staff can take up to six hours of courses each semester at

count for spouses and dependents," she said. "We're trying to get a ballpark figure from the UM System on how many dependents are enrolled in classes." Another possibility discussed by the committee is a scholarship fund to benefit dependents and spouses of MU employees.

Another benefits committee and council member, Stephen Briscoe, second shift sergeant at University Police, suggested that a limit could be placed on the amount of money currently used for educational assistance. If all the money wasn't used by faculty and staff, then the program could be open to dependents on a first-come, first-served basis, he proposed.

Briscoe also questioned whether money was available to expand the program. He said the administration might be more likely to expand the program if a cap was first set on its cost. "I think the administration is concerned that if they open it up to dependents, the cost would shoot right up," Briscoe said.

In the last fiscal year, \$330,000 was used by faculty and staff taking courses at MU through educational assistance. "I never realized it was that much," Briscoe said.

Wimmenauer noted there is no cost limit now set on the program, which is available to all employees. "I would hesitate putting ourselves in the position of accepting a limit of \$330,000," she said. "Once we accept that, it's hard to change later on."

In other action, council members discussed building a Staff Council float for the Homecoming parade later this month. Jo Pflieger, council chairwoman and administrative assistant in veterinary microbiology, said the Chancellor's Office is asking for council input in a review of MU's smoking policy. Pflieger also asked for suggestions on staff members to recommend for appointment to a faculty and staff campus committee that compares University benefits to the benefits packages for other Missouri state employees and at other universities.

Staff Advisory Council
WORKING FOR YOU

MU, and the University will pay 75 percent of the academic fees. The UM System administration is exploring ways to expand the program to offer courses at other colleges or universities if they are not available at MU, or if they conflict with an employee's work schedule.

In the past, Staff Council has pushed to include dependents of MU employees in the program. Lisa Wimmenauer, administrative associate II in Business Services, is chairwoman of the council's benefits committee. She told council members that the committee is looking at a variety of ways to include dependents in the educational program. Wimmenauer added that because of tight budgets, she thought full participation in the program by dependents was probably a "dead issue for the time being."

"A couple of different ideas were discussed, including the possibility of pursuing from the administration a token dis-

COLLEGE RECEIVES \$150,000 IN CATTLE

The College of Veterinary Medicine has added \$150,000 worth of cattle to its herd.

On Sept. 21 the college accepted its largest gift ever from a living individual donor or couple. Leonard and Doris O'Brien, farmers from Foristell, Mo., gave the college a variety of cattle to be used in embryo transfer research and in the food animal program.

The donation included 36 Santa Gertrudis cows, one short-horned cow, one purebred, short-horned bull, 13 calves and nine unborn calves.

COURSE DESIGNED FOR PARENTS

One out of every four Missouri ninth-graders does not graduate from high school. That's one of the facts that prompted development of a new four-session course, "Building a Network: Family, School and Community," which University Extension will offer in Columbia this academic year.

Sessions are planned Oct. 18, Nov. 8, Jan. 9 and March 5. Some locations are still being arranged.

"The course is designed for parents as well as school professionals," says Mary McPhail Gray, one of five MU instructors who will teach the class. "It will deal with such issues as the high illiteracy rate,

single parenting and motivation for academic achievement."

There is a \$50 fee. With questions or to register, call 882-7460.

PRINTING SERVICES PLANNING SEMINAR

Printing Services wants your help in planning a seminar.

The event is designed to inform the University community of products, equipment and services offered by Printing Services. "One area we want to address is desktop publishing, and how we can best serve your needs," says Rick Wise, customer services director. "We also want to discuss non-profit mailing."

Wise says he envisions a morning session, followed by lunch, probably at the Memorial Union in November. If your office or department is interested, contact Wise at 882-7801.

HANDBOOK OFFERS USEFUL INFORMATION

It's all in there. If you're locked out of the office and have to get a new key quickly, it's in there. If the light bulb needs replacing, or the sink won't drain, or the air conditioner conks out, Campus Facilities' new service guide tells you what to do.

The guide, which describes all services provided by Campus Facilities, has an easy-to-read format and gives telephone numbers for routine or emergency services. To obtain your copy, call 882-3091.

Making the grade

Task force says colleagues' reports would be helpful when conducting teacher evaluations.

While student evaluations of faculty are beneficial in some regards, they cannot offer a completely accurate view of the teacher or the methods used in the studio, lab or classroom. That's the principal idea that emerged from a series of forums on teaching evaluation, held last week in Memorial Union Auditorium.

"We found that peer evaluations are helpful," said Russ Zguta, professor and chairman of history and a member of the faculty task force on teaching evaluation. "And there are many ways you can do it. Your colleagues can review your book lists. They can go over your exam questions.

"Peer evaluation is more than looking into a classroom once or twice during the semester. In fact, just doing that would be useless. If you're going to include classroom visitation, you should make at least five or six trips."

Dudley McCaw, associate professor of veterinary medicine and surgery and a member of the task force, told those in attendance that peer evaluations can address issues that may not be covered in student evaluations. "In what type of climate is this class being taught?" McCaw asked. "Is it the sort of class that students want to take and that teachers want to teach? Has the teacher been using the same notes for 20 years? Student evaluations can't answer those things."

When asked whether more than one method should be used in evaluating teachers, nearly all those in attendance answered yes. The three forums drew more than 125 faculty, staff and students.

Erik Fritzell, professor of fisheries and wildlife, is chairman of the 12-member task

force, which is working with the Office of the Provost and a subcommittee of the Council of Deans on the subject. Fritzell says the group hopes to complete its report in November.

"Teaching evaluation is used for a number of things, including promotion and tenure," Fritzell says. "Ultimately, though, we're talking about the improvement of teaching. To do that, we need to look at what we're doing now and see if we can improve upon it."

Zguta said the task force examined a number of student evaluation forms from other institutions and seemed to favor one used at the University of Washington. "It has 22 items and the room to add your own comments," he said. "Some of the items are used to show student satisfaction and others are used for administrative review. Other items are used to improve teaching." Bonnie Zelenak, director of the Learning Center, urged that if MU adopts a similar plan, there be a "clear delineation" of information used

by administrators and information used to improve teaching. "I think that's important," she added.

Zguta noted that current evaluation methods at MU vary from division to division. Many professors use a standard form that has "been around for years," he added. "Are these forms the best we can do?" asked Ted Tarkow, associate dean of arts and science. "We certainly believe they could be improved," Zguta replied.

Fritzell said that no matter what type of general evaluation form is used, there still will be, and should be, differences among schools and colleges. "There should be differences even within one school, such as Arts and Science," Tarkow said. "It would be preposterous to use the same method for art and physics."

Other members of the task force are Allen Bluedorn, associate professor of management; Jean Hamilton, associate professor of textile and apparel management; Rob Logan, associate professor of journalism; Brooke Cameron, associate professor of art; Leslie Lukin, assistant professor of education and counseling psychology; Steve Matthews, professor of agricultural economics; Ronald Powell, associate professor of library science; Cliff Tompson, professor of physics; and Diane vom Saal, director of the Program for Excellence in Teaching.

'Ultimately, we're talking about the improvement of teaching. To do that, we need to look at what we're doing now and see if we can improve upon it.'

— Erik Fritzell
chairman of the faculty task force on teaching evaluation.

CLASSIFIEDS

FOR RENT

NEWLY RENOVATED duplex in quiet family neighborhood near MU. Two bedrooms, sun porch, dining room, kitchen with pantry, fireplace. Quiet adults only, no smokers, no pets. 443-4370 after 7 p.m.

FOR SALE

3600-SQUARE-FOOT brick home on 19.6 acres within city limits. Four-car garage, 36x52 workshop, 36x60 livestock barn, lake, mobile home and two ponds. 449-4031.

FIVE-ACRE HOME SITES: Woods and/or meadow, southern exposures, 4 miles southwest of city limits. \$14,000 & up, w/\$1,000 down, remainder over 10

years. All underground utilities; no trailers. 449-5620 before 7 p.m.

MISCELLANEOUS

MISSOURI'S NEWEST attraction — Onyx Mountain Caverns. Natural, scenic, historical. 17 miles west of Rolla, Mo., between exits 172-D and 169-J on north outer road. Box 549, Newburg, Mo. 65550. (314) 762-3341.

My Macintosh is more important to me than my car.
I lent my car to my sister. But nobody's taking my Macintosh.

Jason Jimerson
B.A. Sociology, Earlham College
M.A. Sociology, University of Virginia
Ph.D. Candidate, Sociology, University of Chicago

"I don't know how anybody gets through college today without a Macintosh. Sometimes I have so many assignments that I barely have time for sleep. Yet my Macintosh allows me to get my work done on time — without making sacrifices.

"Working on my dissertation and field studies means collecting an incredible amount of information. So jumping from one program to another with ease is imperative, as is quickly making charts and graphs. By enabling me to do these things, Macintosh probably saves me an hour and a half each day.

"Another great thing about the Macintosh is that it makes you feel technically confident. Remember putting toys together when you were a kid? Who reads the directions? Nobody. You look at the picture of the bike and you know exactly what to do. The Macintosh operates the same way. I actually taught a friend to use one in two minutes.

"What would my life be like without a Macintosh? Scary."

Why do people love Macintosh?
Ask them.

====> Let's Compute!_

The student computing fee is already hard at work! Here are just a few of the ways it's being used:

- **146 Stanley:** A 20-station Macintosh IICI Network was installed in August, replacing the Macintosh Plus Network.
- **17 Electrical Engineering:** The IBM AT network was expanded to include twenty IBM PS/2 Model 55SXs. The server was replaced by an IBM PS/2 Model 80.
- **127 Physics:** It joins 10 Arts & Science as our second 24-hour facility. These two labs are open from noon Sunday to midnight Friday and 10:00 am to 7:00 pm Saturday. In addition, an 18-station Macintosh Plus network has been installed in the Physics lab.
- **Hours of operation** in other labs have been lengthened. More labs are open Saturdays and several labs open at noon on Sundays instead of 4:00 pm. Call 882-5000 for more information.

Other changes are planned for this semester and next. Look for updates in the Mizzou Weekly, the Campus Computing Newsletter, and the Maneater.

Bill Plummer, director of Campus Computing, is shown in the new Macintosh II lab in Stanley Hall. The lab is equipped with Apple Macintosh II computers with color graphic monitors.

'THE YEAR OF THE COMPUTER'

New mainframe, funds from special student fee boost computing services at MU.

Bill Plummer, director of Campus Computing, is encouraged by the responses he's received since MU's new \$3 million mainframe computer went into operation in early August. "Several faculty members have called to say that they're receiving information faster," he says. "They can get more disc storage in their systems and they're appreciative of that, too."

While Plummer is pleased by this recent return on MU's investment, he holds even brighter promise for the long term. "This system will enable us to build networks with other computing systems around the state, the country and the world," he says. "Professors and

their students will be able to communicate through their computers. It will be possible to do grant submissions through the University's computer system.

"Some of these things are being done in a limited fashion now and others will take time to develop. What's important is that we now have the full capability to carry out these tasks, when we didn't before."

The new IBM 3090-170J system, installed in a 4,000-square-foot area at the Telecommunications Building, more than doubles MU's academic computing capacity. In addition to providing faster processing, Plummer says the system can handle more data. "Researchers will be able to address larger, more detailed problems," he says. "Using an analogy, let's say that a chemist was able to work with five atoms before. With the new system, he or she could work with 50."

That's not all. A new, \$2-per-credit-hour

student fee increase for computing will bring in \$1.2 million this academic year. Plummer says part of the money already has been spent for 30 new and 120 replacement microcomputers for use by students in the 13 computing labs spread across campus. In addition, MU's

'We know the money will be coming in, so we know things are going to get better every year.'

Plummer stresses that some improvements in teacher-student computer communication will take time. "Let's take a situation where the student writes a term paper on his computer, then sends it directly to the teacher over the system. We may be set up to do that before the class is ready to do it. Some improvements even could require curriculum changes."

Plummer, noting that MU had fallen behind other Big Eight and Big Ten schools in computing services, says Mizzou is taking "a giant step" with the new mainframe and other improvements.

"The good thing about the fee increase is that it enables us to set up a planned program of improvements," he says. "We know the money will be coming in, so we know things are going to get better every year. I would think that would give our employees, especially new faculty and staff, a great deal of confidence in the future of computing at this University."

Changes set at Campus Computing

A number of organizational changes will allow Campus Computing to better serve the University community, Director Bill Plummer says.

"This is a big year for computing on this campus," Plummer says. "In many ways, it's 'The Year of the Computer' at MU. We want to make sure we're doing our best to serve the University community."

The Office of Institutional Research and Planning will join Campus Computing in a new initiative to better support the campus. The change will allow the office to make its information available to a wider audience, Director Diane Oerly says.

"I can foresee the day when faculty will be able to call up their class roles on their computers, rather than receive them on paper," Oerly says. "And let's say that a school or college at MU requests information on a similar graduate program at another institution. We should be able to provide that."

"Campus Computing has the technology, and we have the information. We see it as a really good combination." Information Services will be the working title of the office.

In addition, Campus Computing will establish an Advanced Projects Group that will focus on specific, possibly detailed, topics. "As one example, the group will conduct studies on office automation and changing technology," Plummer says. The group also will lead a National Science Foundation project for statewide networking, the Missouri Research and Education Network (MORENET). Bill Mitchell will lead this group.

Mary Stampley will direct a new computing liaison service that will work with the user community. The operation will be similar to a customer services department. "This is a step forward in facilitating quality assurance for our services," Stampley says. "We will follow up complaints, act as ombudsman and help users get connected with the right staff to address their needs."

Also, Carmel "Merc" Mazzocco, former director of academic computing for the University System, has joined Campus Computing in a similar capacity. "He'll be able to work with the faculty to make sure their computing needs are being met," Plummer says.

And the Help Desk is being combined with Campus Computing's consulting functions. "This will enable the desk to answer a wider range of questions," Plummer says. Margie Gurwit, computer programming analyst II, will manage this operation.

Grand Marshal Phil Bradley Chicago White Sox outfielder and former MU quarterback.

LABORATORY FOR FERTILITY AND CRYOBIOLOGY

Semen Donors Wanted

The laboratory is seeking semen donors for its sperm bank program. The program is confidential and all donors will be compensated.

As a potential donor, you will undergo non-invasive screening procedures to insure good health and fertility potential. You must be between the ages of 20 and 40. If you are interested, call 882-7199.

MINORITIES ARE NEEDED

CAMPUS CATERING CORNER

A Holiday Wonderland

By Donna Lamb, Marketing Representative

As the holiday season quickly approaches, many of you may be struggling to design the perfect festive holiday ball. Arranging flowers, finding decorations, sending out invitations, getting back RSVPs and calling Campus Catering are all aspects of preparing for this special occasion.

While many of you are in the process of handling these arrangements, others may feel there is plenty of time to arrange your holiday events. Campus Catering is encouraging everyone to plan now. Food preparation can be a most time consuming process as there are many ideas and details that need to be discussed.

Walking into a winter wonderland, one may see such glamorous center pieces as an ice carving or an array of poinsettias and holly to draw attention to the elaborate buffet table filled with holiday splendors. Shrimp cocktail, salmon, and scallops wrapped in bacon may be some of the eye catchers, followed by the cascade of fresh seasonal fruits and gourmet cheeses. Of course, no party would be complete without visions of sugar plums and other holiday treats. The aromas of sugar cookies, decorated cakes, petit fours and Russian tea cookies fill the room, while the lights on the tree dance to the soft music of the piano playing in the background. Adding an elegant touch, chrome punch bowls can be seen filled with a seasonal cranberry punch or silver urns filled with hot apple cider accompanied by cinnamon sticks. Of course, candlabrum, red and green

linen, fountains and votive candles also add to the ambiance of the room.

Although these ideas may not be exactly what your group is planning, Campus Catering can certainly help design a holiday feast to meet your specific wants and needs.

The important point to remember is to plan ahead. If you have not already chosen a location for your holiday party, you may want to consider the Memorial Union, as many of the rooms may still be available.

In the meantime, may we suggest a wonderful holiday punch recipe. Not only is it the perfect touch to a Christmas party, but also is great for those cold winter days to come.

HOT PUNCH DELUXE

May prepare ahead 3 quarts

- 1 12-ounce bag fresh cranberries
- 2 quarts water
- 2 tablespoons grated orange rind
- 1 teaspoon cinnamon
- 12 whole cloves
- 1 quart freshly squeezed orange juice
- 1 cup freshly squeezed lemon juice
- 1 1/2 cups sugar

Wash cranberries, and drain well. Heat cranberries, water, orange rind, cinnamon and cloves in a large pot. Bring to a boil, reduce heat, and simmer 5 minutes or until cranberries pop. Strain, discard pulp, and add juices and sugar. Stir constantly over medium heat until sugar is dissolved and punch is thoroughly heated. Serve hot.

The south part of RP-6 is scheduled for repaving beginning Oct. 2. Persons going to the Research Reactor should use the north part of RP-6, or RP-4 near the picnic shelter, during the repaving.

Time well spent

Stephen Briscoe, University police officer, has gained a lot from his Staff Council work.

Stephen Briscoe

For Stephen Briscoe, Staff Advisory Council is a place where he can put his ideas to work. Briscoe, second shift sergeant with University Police, was elected to the council last year. Since then, he's taken an active role in the council's discussions on issues that affect staff all over campus.

For instance, in the last year Staff Council has provided feedback on a revamped benefits package for all University employees. Members have debated such issues as day care, sick leave policies and educational assistance. The council helped develop the

new Staff Development Awards, which provide grants to MU staff members for professional and personal development.

"Being on Staff Council is time consuming, but I think it's time well spent. It gives you a chance to have a voice in a lot of things that go on here," Briscoe says. "It gives you a chance to do something for the University, to help it grow and to deal with the growing pains."

Although his job gets him to every corner of campus, he says that being on Staff Council gives him an opportunity to meet people from all over the University.

"When I started on the council I had a lot of ideas, like everyone else. What I found out is there are a lot of different views on a lot of different subjects. It helps you see things from a different perspective.

"I guess what I'm really learning is that the University is a team effort. It takes everybody to make things work."

As a former council member, Jack Watring, associate director of University Police, knows how important a voice on Staff Council can be. He says his department makes time for police employees to work with the council.

"Staff Council is an avenue for staff to have an input in the University. Our department has always considered it important to participate in those types of things," Watring says. "It does take time away from our assigned duties, but our people make time for it and our department makes time for it."

Staff Council is looking for nominations for five new members. The nominations will be made from each of the four job categories on campus: administrative/professional, crafts/maintenance, secretarial/clerical and technical paraprofessional. There's still time to nominate someone before the Oct. 5 deadline. For more information, contact the Staff Council office at 882-4269.

Retiree group to meet Oct. 13

The new MU Retirees Association will have its fall membership meeting from 9:30 a.m. to noon Oct. 13 in the Hearnes Center Fieldhouse.

C.V. Ross, professor emeritus of animal sciences and president of the group, says more than 475 retired faculty and staff members have joined the association since it was formed in the spring. "We hope they'll attend the meeting, as well as others who are not members yet," Ross says. "There are more than 2,000 University retirees in mid-Missouri, and we can always use more members."

The program will begin with a reception and social hour, followed by a business meeting. David West, MU professor of fi-

nance, will discuss the University's benefits package. William Fratcher, professor emeritus of law, will discuss wills and trusts. A question-answer period will follow.

In addition, progress reports will be given by chairmen and chairwomen of the group's seven standing committees. They are: Luverne Walton, communications; Marc DeChazal, constitution/bylaws; Rex Dillow, finance; Arthur Rikli, membership; Robert Daniel, ombudsman; George Preckshot, program; and William Pfander, benefits.

According to its bylaws, the association was formed "to represent, promote and protect the interest of retirees, and to promote the welfare of the University." The group will meet twice a year. It also is mailing a newsletter to retirees.

Membership is open to all MU or UM System retired faculty and staff or surviving spouses. Annual dues are \$3. To join the group, call Rikli at 445-6480.

Women's network proves popular

The first meeting of MU's Network for Faculty and Professional Women drew nearly 100 last month. That fact pleases Betty Hosokawa, director of the Employee Assistance Program, which sponsors the group.

"We were pleased with the turnout, and imagine there will be a similar number, or perhaps more, for our second meeting," she says. Diane vom Saal, director of the Program for Excellence in Teaching, will discuss "Gender and Communication" at 12:30 p.m. Oct. 10 in 234-235 Brady Commons.

The group will meet the second Wednesday of each month, except December. Hosokawa says many new faculty and professional women on campus told her of the need for such a group. "It enables women to meet others from outside their departments with whom they can exchange information or enhance skills," she says. "It definitely fills a void."

Hosokawa says her office sponsors a number of peer group meetings on campus, and she encourages more to form. "If you're a member of a constituency that you think should be represented, let us know," she says. "We're willing to help start other groups, provided there is enough interest." With questions, call Hosokawa at 882-6701.

Weekend of fun planned for parents

Parents of MU students coming to Columbia for Parents Weekend this Friday, Saturday and Sunday will be greeted with a variety of events and activities. Included is a ballet, a football game, a play and a performance of the Royal Lipizzaner Stallions, along with special tours and open houses.

"There will be something for everyone this weekend," says Robert Jennings, a graduate student in finance and coordinator of Parents Weekend. "Parents bringing their entire families to Columbia will find a lot of things for the young kids to do, too."

As examples, Jennings noted a tour of Buck's Ice Cream Parlor and MU's ice cream-making operation at 10:45 a.m. Saturday in Eckles Hall, and rides on Hilda and Louise, the College of Veterinary Medicine's mule team, from 10 to 11:30 a.m. Saturday on Rollins Street in front of Brady Commons. Other tours Saturday morning will be of Ellis Library, the Animal Science Research Center, the Student Recreation Center, the Research Reactor and the Museum of Art and Archaeology.

"We expect about 2,000 for Parents Weekend," Jennings says. "We're happy that so many activities are being offered." Here's a schedule:

Friday, Oct. 5

- The student Governments, Organizations, Activities and Leadership (GOAL) office, in the lower level of Brady Commons, will have an open house from 8 a.m. to 5 p.m.
- A film, "The Little Mermaid," will be

shown at 7 and 9 p.m. in Ellis Auditorium.

- The University Concert Series will present Les Grands Ballets Canadiens at 8 p.m. in Jesse Auditorium.

Saturday, Oct. 6

- A services fair, describing services available to MU students, will be from 8:30-10 a.m. in the Memorial Union Lounge.

- Chancellor Haskell Monroe will speak to members of the MU Parents Association at 10 a.m. in the Memorial Union Auditorium.

- The Black Culture Center, 823 Virginia Ave., will have a variety of activities from 10 a.m. to 1 p.m., including an open house; an address by Gerald Brouder, deputy chancellor and interim provost; and a tailgate party.

- The Conley House, at Conley Avenue and Sanford Street, will have an open house from 10 a.m. to 2 p.m.

- Tours of various MU sites will leave from Brady Commons at 10:45 a.m.

- The football Tigers will play Colorado at 1:30 p.m. on Faurot Field. Marching Mizzou will perform in a pregame concert at 12:15 p.m. at the Hearnes Center.

- "The Little Mermaid" will be shown at 7 and 9:30 p.m. in Ellis Auditorium.

- The Royal Lipizzaner Stallions will perform at the Hearnes Center at 8 p.m.

- The Department of Theater will present "Beyond Therapy," a comedy, at 8 p.m. in the Corner Playhouse, University Avenue and Hitt Street.

Sunday, Oct. 7

- The Union Cafe will be open for a special Sunday brunch from 10 a.m. to 1 p.m.

- The Museum of Art and Archaeology will be open from noon to 5 p.m.

- "Beyond Therapy" will be shown in the Corner Playhouse at 2 p.m.

In addition, several schools and colleges will have open houses. With questions, call 882-3621.

M I Z Z O U PEOPLE

Laurie Abramowicz, administrative assistant in Campus Facilities, celebrated five years with the University in September.

Barbara Benney, senior secretary in Campus Facilities, celebrated 10 years with the University in September.

Walter C. Daniel, director of the College of General Studies and professor emeritus of

English, had an article, "W.E.B. Du Bois' First Efforts as a Playwright," published in the June 1990 issue of the College Language Association Journal.

Michael A. Diamond, associate professor of public administration, has been elected chairman of the International Society for the Psychoanalytic Study of Organizations. His term will be from 1991 through 1993.

Jackie England, scientific programmer-analyst in the Animal Sciences Department, has been selected the October recipient of the College of Agriculture's Staff Recognition Award.

Wilbert Jones, custodian in Campus Facilities, celebrated 20 years with the University in September.

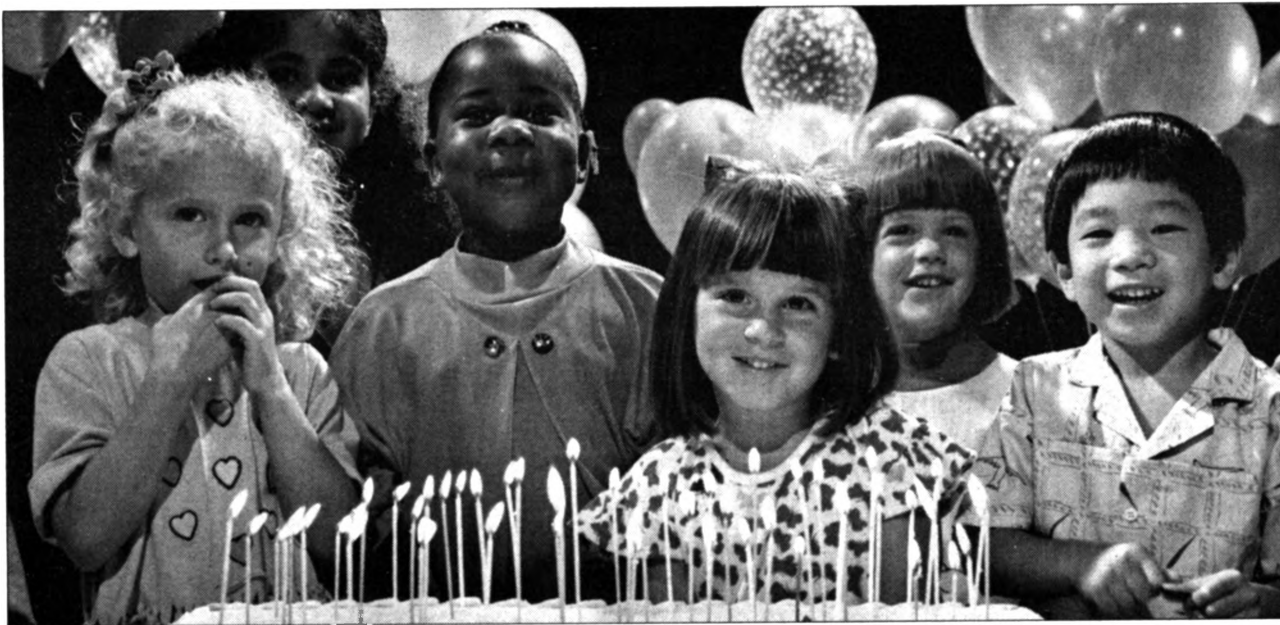

Pauletta King, formerly of Accounting Services, is administrative associate in the Veterinary Medical Diagnostic Laboratory.

Richard Mead, operator at the power plant, celebrated 10 years with the University in September.

Jim Muench, senior information specialist in Campus Computing, had a short story, *Arthur*, published in the fall 1990 issue of the Memphis State University magazine *Arthurian Interpretations*.

Fifi Ahmad Oldfield, research assistant professor of pharmacology, was the primary author of a paper presented recently at the Fifth Congress of the International Society for Biomedical Research on Alcoholism at the University of Toronto.

Barbara Reys, associate professor of mathematics education, and **Robert Reys**, professor of mathematics education, participated in a joint Japan-United States seminar in Honolulu, Hawaii. The event, entitled "Computation for the 21st Century: Cross Cultural Perspectives," was funded by the National Science Foundation.

For Many of Our Young Graduates, Every Day is a Celebration.

 University
Hospital & Clinics
The Staff for Life

Graduates of University Hospital's Children's Center have reason to celebrate. Thousands of children are leading happier, healthier lives as a result of the expert skill and specialized services designed especially for kids and found only at University Hospital's Children's Center.

Our Children's Center offers one-of-a-kind services like emergency helicopter transport, pediatric and newborn intensive care units, and expert physicians and staff providing specialized pediatric care. And our child life therapy and hospital school programs make our Center unique. In fact, no other hospital in mid-Missouri offers such comprehensive, specialized children's services. Now you know why we're celebrating.

While there are other fine hospitals in mid-Missouri... **There's Only One University Hospital.**

**LIBRARY ANNEX
and
TATE HALL LIBRARY**

The Library Annex has been moved and is closed to the public except by appointment. Materials will be brought back to campus each day. You may request materials or an appointment at the Ellis Circulation Desk or by calling 882-3362.

Tate Hall Library hours are Mondays 1-5, Thursdays 1-5, and Saturdays 10-2 during the fall semester. For materials needed at other times, please call 882-3362 or come to the Ellis Circulation Desk.

A REMINDER

The Mizzou Weekly news deadline is Tuesday, one week before publication. Please let us know about your upcoming event as soon as possible so we may include it in our Calendar.

Rob Hill photo

Robert Thompson, breakfast cook at Brady Grill, instructs Suzanne Holland, assistant vice chancellor for Student Affairs, in the intricacies of grill work. Holland cooked for a time last week during a campuswide campaign honoring Herb Bruner, the longtime breakfast cook at Brady who has cancer. A number of events were held to raise money for Bruner, who has worked at the University 40 years.

Q&A

Q. In the Sept. 25 Mizzou Weekly, there is an article stating that Homecoming is being promoted as "alcohol free." Is this targeted specifically to the underage crowd or will it apply to alumni, staff and faculty as well? How will the policy be enforced? What about events other than Greek house decorations?

A. The "alcohol free" policy will be in effect for all those who attend the house decoration competition the evening of Oct. 19 in Greektown, regardless of age or status, says Matt Adrian, a senior in journalism and a co-director of the Homecoming steering committee. "Police officers and cadets will be present throughout the crowd and at the street barricades, checking for alcoholic beverages," Adrian says.

Homecoming Week, Oct. 14 through 20, features other events including a blood drive,

talent skits and a parade. "Alcohol is not permitted at those events, either," he says.

Q. Why does it take so long to deliver copies of the *Maneater* to the east side of campus? I work on the White Campus and like to read the *Maneater* during lunch on Tuesdays and Fridays. But many times that is not possible because it doesn't arrive at the Memorial Union and other spots in this area until the afternoon. However, I know it normally is available at Brady Commons in the morning. Can this discrepancy be corrected?

A. David Roloff, business manager for the *Maneater*, says copies of the student newspaper are first delivered to Brady Commons after they roll off the presses at the Tribune Publishing Co. "Since Brady has replaced the Union as the 'hub' of campus, we feel this location best serves the majority of our readers," Roloff adds. "Since the General Classroom Building and the Arts and Science Building are next to Brady, they too are among the first spots to get papers."

Roloff says the Memorial Union is next in priority. But the delivery truck must return to the Tribune at that point to get more copies.

"Pedestrian traffic along Rollins Street and University Avenue can add to the delivery time, and newspaper inserts also delay delivery," Roloff says. The normal delivery time to the Union should be from 11:30 a.m. to 1:30 p.m., he adds.

"We strive to get the *Maneater* out as soon as humanly possible," Roloff says. "Besides the sites mentioned above, the *Maneater* can be found at 42 MU locations and at Columbia College, Stephens College and 12 locations in the city."

Q. I realize that with all the construction on campus, parking lots and garages on campus are at capacity. What can we do when we arrive on campus for a class and cannot find a space in the lot for which we have a paid permit to park?

A. "You go to the next available lot and find a legitimate space to park, then file a complaint with Parking Services that your assigned parking lot was full," says Jim Joy, director of Parking and Transportation Services. "That way, we can request enforcement from University Police." He adds that you must notify Parking Services immediately so you won't be ticketed.

Campus Facilities General Services Building
Heinkel Building KOMU-TV Jesse Hall, Room 311
University Hospital and Clinics:
Personnel Hospital Accounting

HENRY MARSHALL. . . Former Missouri record-setting wide receiver between 1972 and 1975. Henry still holds Mizzou records for most yards gained by a receiver in a single game (207) and in a single season (945). After achieving All-American recognition as a Missouri Tiger, he went on to play for 12 years with the Kansas City Chiefs (1976-1987) and to become the Chiefs all-time leading receiver. Come meet Henry Marshall as he comes back to ol' Mizzou!
