## Making the grade

*Graduate, undergraduate commencement ceremonies scheduled May 16, 17.*

Motel rooms have been booked for months. Campus bookstores are selling hundreds of caps and gowns. Across campus, students, faculty and staff are gearing up for graduation.

Commencement will be the weekend of May 16 and 17, when a total of 3,459 Mizzou students will receive degrees. That number includes 2,200 students who will receive bachelor's degrees and about 860 receiving graduate degrees.

The graduate ceremony will be at 4 p.m. May 16 at the Hearnes Center, and the undergraduate ceremony will be at 1:30 p.m. May 17 at the Hearnes Center.

In addition, MU's professional schools will have their

own ceremonies, with this schedule: veterinary medicine, 3 p.m. May 15 in Jesse Auditorium; law, 1 p.m. May 16 in Jesse Auditorium; and medicine, 4 p.m. May 16 in Jesse Auditorium.

Henry W. Bloch, chairman and chief executive officer of H&R Block Inc., will be the keynote speaker at the undergraduate ceremony. Bloch, a Kansas City native, has received numerous honors and awards for his service in business and philanthropic fields.

Gerald Brouder, provost and interim chancellor, will preside at the undergraduate ceremony. Honorary degree recipients will be Donald A. Henderson, associate director for life sciences for the President's Office of Science and Technology Policy, who was in the forefront of the effort to eradicate smallpox, Doctor of Science; Kenneth L. Lay, chairman and chief executive officer of Enron Corp., a diversified energy company, Doctor of Laws; and Peter Raven, director of the Missouri Botanical Gardens in St. Louis and a former member of the Board of Curators, Doctor of Science.

Judson Sheridan, vice provost for research and dean of the Graduate School, will preside at the graduate ceremony, and Richard Wallace, UM System vice president for academic affairs, will confer the degrees to doctoral, educational specialist and master's candidates.

In addition, Mizzou's schools and colleges will hold these receptions: College of Agriculture, Food and Natural Resources, 7 p.m. May 16 in Jesse Auditorium; College of Arts and Science, immediately following the undergraduate ceremony at the Hearnes Center; College of Business and Public Administration, 7 p.m. May 16 at the Hearnes Center; College of Education, 11 a.m. May 17 in 330 Hearnes Center; College of Engineering, 11:30 a.m. May 17 in 307 Hearnes Center; College of Human Environmental Sciences, 10 a.m. May 17 in Jesse Auditorium; School of Fine Arts, 3 p.m. May 8 in Rhynsburger Theater; School of Health Related Professions, 6:30 p.m. May 16 at the Missouri United Methodist Church, 204 S. Ninth St.; School of Journalism, 10:30 a.m. May 16 in Peace Park; School of Nursing, 9 a.m. May 17 at the Ramada Inn, 1100 Vandiver Drive; School of Natural Resources, 4 p.m. May 17 in Middlebush Auditorium; School of Social Work, immediately following the graduate ceremony at the Donald W. Reynolds Alumni Center. The ROTC commissioning will be at 7 p.m. May 16 in Townsend Auditorium.

## Lending a hand

*Alumni Association awards \$10,004 in grant money to help faculty in their teaching.*

Some of Yuyi Lin's mechanical engineering students work part time at companies such as 3-M, A.B. Chance, Wallow and Square D. Lin would like to see them become product engineers for such firms someday.

To gain those positions, however, the students must keep up with innovations in their field. A faculty instructional development grant from the MU Alumni Association is helping them do just that.

Lin, assistant professor of mechanical and aerospace engineering, was one of 30 MU faculty members to win such a grant this year. His \$750 award is being used to buy books including *Standard Handbook of Mechanical Design*, *Dudley's Gear Handbook* and *Human Engineering Design Criteria*. Needed computer software also is being purchased with the money.

"This is a field where the technology is constantly changing," Lin says. "Our department doesn't have the money to buy new mechanical design handbooks every two or three years. This will help our students keep current."

Lin's students design projects that range from heating and refrigeration components to assembly line improvements. The projects then are submitted to industries. "This is more than just theoretical," he says. "The students are gaining practical experience, which will carry over when they're looking for jobs after graduation."

Across campus, Flore Zephir, assistant

Yuyi Lin's students will benefit from books purchased with an MU Alumni Association faculty development grant.

professor of French, is similarly pleased. She received a \$426 grant to buy audio and video materials for her Oral French for Teachers course. The money will help foreign language education majors, graduate assistants and in-service teachers learn more about modern-day France.

"The tapes will raise the discussion level of the class and provide a good supplement to the regular materials," Zephir says. Tapes cover the current school system in France, women and professions, and a newsmagazine series.

"We have the regular French language materials, but our department does not have the money to buy the tapes that discuss current events," she says. "This grant will really help us."

Dick Moore, president of the MU Alumni Association, says that is precisely the point. "We want to help — to let faculty know that we care about them and are aware of funding problems," he says. "We wish we had more money ourselves to do more of these things."

The alumni fund provided \$10,004 this year to finance 10 projects. Other grant winners are:

■ Ellen Blossman, assistant professor; Magdalena Garcia-Pinto, associate professor; and Judith Elliott, assistant instructor, all of romance languages, \$750 for presentations by returning study abroad students to faculty and elementary classes.

■ Joseph Hobbs, assistant professor of geography, \$718 for new maps.

■ Robert Kaiser, assistant professor of

geography, \$750 to update materials for his book-length manuscript *The Geography of Nationalism in the U.S.S.R.*

■ Glenn Pierce, associate professor of romance languages, \$400 to buy Italian films for his classes.

■ Kit Salter, professor and chairman of geography, \$460 to sponsor geography field trips.

■ Walter Schroeder, assistant professor of geography, \$750 to develop a course manual.

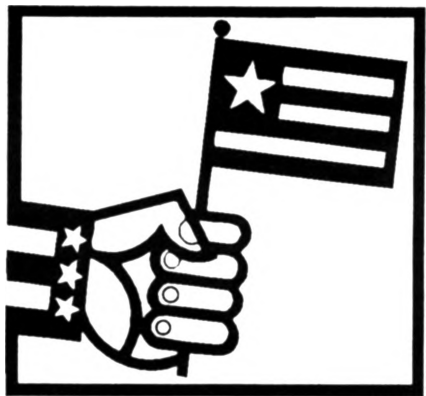

■ \$5,000 to allow 20 MU faculty members to attend the 1992 Wakonse Conference on College Teaching in Michigan this summer. Ten of the members will be selected on the basis of their involvement in the Honors College.

## MEL CARNAHAN ON CAMPUS TODAY

Mel Carnahan, Democratic candidate for governor, will speak at 2:45 p.m. today in the Columns Room at the Donald W. Reynolds Alumni and Visitors Center. The MU community is invited.

Carnahan will tour the campus after his talk. The visit is sponsored by the MU Alumni Association and its LINC committee; MU-PAC; the Associated Students of the University of Missouri; and the Political Science Department.

Visits by gubernatorial candidates are designed to inform the candidates of Mizzou's role in and service to the state, and to give the MU community a better understanding of the candidates' positions on public higher education.

## FACULTY MEETING SET APRIL 30

Several items are on the agenda for the spring general faculty meeting, at 3:40 p.m. April 30 in Jesse Auditorium.

Gerald Brouder, provost and interim chancellor, will give a report, as will Faculty Council Chairman Rob Logan, associate professor of journalism. Reports also are expected from the MU Planning Council, the academic planning committee and the chancellor's search committee.

All faculty members are invited.

## UNIVERSITY CLUB MEETS MAY 5

Mark your calendars to attend the University Club's first luncheon event at the new Donald W. Reynolds Alumni and Visitors Center, at 11:40 a.m. May 5.

Bill Bondeson, professor of philosophy and of family and community medicine, will speak on "The Case of Nancy Cruzan: The Politics of Living and Dying." The cost is \$8 for members and \$9 for non-members, and reservations must be made by April 30. Call Lisa Cooper at 882-6811.

# Council asks UM System to restore budget funds

The Faculty Council called on the UM System April 23 to restore \$4.1 million to MU's budget and to withhold no additional funds in the near future.

"We believe the current climate of crisis at MU is a direct result of pressures from University Hall and the Board of Curators to make rushed budget reduction decisions," the resolution reads in part. "The Faculty Council believes additional requests to withhold significant funds in the near future is neither financially nor academically defensible."

The resolution, written by Chairman Rob Logan, associate professor of journalism, passed unanimously and will be sent to UM System President George Russell, the curators and chancellors on the four campuses.

The action followed presentations from Judson Sheridan, vice provost for research and a representative of the MU Planning Council, and Peter Markie, professor of phi-

losophy and chairman of the academic planning committee. The two discussed the budget, with Sheridan recounting events that led to the \$4.1 million reduction.

Mizzou started the 1991-92 fiscal year July 1 with \$131.1 million in state appropriations, but in October learned that Gov. John Ashcroft was withholding 3 percent, or \$4.1 million, due to state revenue shortfalls. The University implemented one-time measures to meet the reduction, including a hiring freeze, construction delays, a cut in non-faculty travel and reductions in the emergency reserve fund. "We were operating on the good-faith principle that the money would be restored to us this year," Sheridan said.

However, MU officials learned earlier this month that the after-withholding figure, \$127 million, would be their base budget appropriation from the UM System for the 1992-93 fiscal year. Russell is holding the \$4.1 million in reserve, along with \$9 million

in other funds, and the four campuses are being asked to compete for that money.

"A permanent \$4.1 million budget reduction will seriously undermine MU's academic core programs and mission," the Faculty Council resolution reads. "We ask University Hall officials to rescind their decision, and urge that alumni, students, staff and friends of MU join us to support this request."

Sheridan said the planning council is discussing ways to meet the shortfall. He added that the University has requested \$8.7 million in the funds being withheld, which, if approved, could go for salaries, equipment and expenses, and the libraries, among other purposes. Russell is not expected to announce his decision on those funds until mid-May.

Markie told the council that the academic planning committee is discussing possible departmental mergers and reconfigurations. A draft document has been written and may be announced soon. "We're trying to set the criteria and process for these changes," he said. "Our aim is to strengthen the quality of programs, not just reduce possible duplication."

In other news, the council:

- discussed a proposal to strengthen admission requirements for all UM System students by the mid-1990s. Under the plan, the number of required high school credit units would be increased from 15 to 17, eliminating some electives in the process. Several council members were concerned that some Missouri high schools may not be equipped to handle such a challenge, particularly regarding tougher foreign language requirements. Curators are expected to continue discussion of the plan.

- learned that the chancellor search committee has narrowed the field of candidates to a "focal group" of about 20. Jay Dix, associate professor of pathology and a member of the committee, said the group will begin calling the candidates' references this week.

- was urged to encourage colleagues to attend the spring general faculty meeting, at 3:40 p.m. April 30 in Jesse Auditorium. Logan noted that he will give a report, as will Gerald Brouder, provost and interim chancellor, along with representatives of the MU Planning Council, the academic planning committee and the chancellor search committee.

# Staff members get update on 1992-93 budget

Members of the Staff Advisory Council heard an update April 23 on the progress of reallocation and budget review being conducted by the MU Planning Council. Kee Groshong, vice chancellor for Administrative Services and a member of the planning council, said the group is taking a long, hard look at issues facing MU.

"In a way, we're doing things today that have been talked about for years," Groshong said. "The best I can tell you about the budget for the coming year is that it's in a state of flux. There are several pieces of information

**Staff Advisory Council**

WORKING FOR YOU

that we just don't have at this point."

Each year, the governor typically withholds 3 percent of the money that the legislature appropriates for the UM System. Last

year, Gov. John Ashcroft withheld an additional 5 percent from the University's budget, for a total withholding of 8 percent.

For the coming fiscal year, administrators expect the governor to withhold the standard 3 percent. However, \$13 million will be retained at the UM System level, and President George Russell has asked campuses to apply for the money in \$500,000 increments.

"What we don't know is how much of that we will get," Groshong said.

The Staff Council also went to work on

the election process for new members. Last fall, the group agreed to change members' terms to match the academic calendar — from September to August, rather than from January to December.

Committee Chairman Alan Jones, library assistant II at Ellis Library, told the council that six new members will be elected: two from the crafts/maintenance category, two from the administrative/professional category, one from technical/paraprofessional category and one from the secretarial/clerical category. Jones said his committee plans to mail nomination forms to all staff members by the middle of May, and voting will be during the first week in July.

## Don't Get Caught Uncovered!

Your department-owned refrigeration and air-conditioning equipment is valuable...not just in dollars and cents, but think about the ramifications if the equipment broke down. Ruined experiments...computer equipment failures...not to mention the inconvenience of getting your equipment fixed. On top of that department-owned equipment repairs are not covered in the general operating budget.

There is an alternative. Campus Facilities can set you up on a scheduled maintenance program so you don't have to worry about your equipment. Refrigeration Specialist Keith Ziegelbein will regularly check and maintain your equipment, keeping it always in working order. You don't have time to worry about equipment failures. Let Keith do it for you. Call 882-6682.

## Lack of adequate funding places B&PA on probation

Citing inadequate funding as an overriding concern, a national accrediting agency has placed the College of Business and Public Administration on probation and recommended a continuing review for the School of Accountancy.

Dean Bruce Walker says he is disappointed in the decision made by the American Academy of Collegiate Schools of Business. He emphasizes that the college remains fully accredited as it works to satisfy AACSB's concerns. Only about one-third of the business schools in the country are accredited by AACSB.

"Essentially, the agency is concerned that our college has insufficient resources, especially in the number of faculty, to fulfill its

current activities," Walker says. He notes that there were no specific criticisms regarding student quality or the quality of instruction.

Walker says the college has received a commitment for additional funding from the administration. In addition, it will have to curtail some current activities. The college will be re-evaluated next spring.

"The AACSB is primarily concerned about faculty-to-student ratio, salaries of faculty members compared with their peers, lack of computer facilities and the number of courses taught to non-majors by business faculty," Walker says. The probation does not affect the Department of Public Administration, which is credited by another agency.

## Former IBM executive to head University's computer operations

A longtime IBM executive has been chosen to define and direct the University's mainframe computing operations and, working with faculty and administrators, to develop a comprehensive plan for University computing.

Ralph Caruso was named chief information officer by UM System President George Russell. The president has called for a study of the campus, hospital and UM System computing systems to determine whether those three mainframes should be consolidated and run by the University; consolidated and run by an independent firm; or whether an independent firm should be hired to provide computing resources. Caruso's first assignment will be to prepare a plan to deliver mainframe computing services most effectively and efficiently.

"I'm excited about the assignment, and I'm looking forward to working with others and doing all I can for computing services at the University of Missouri," says Caruso, a resident of Gaithersburg, Md. His appointment is effective June 1.

"Mr. Caruso, who comes to the University with extraordinary credentials, will report directly to me and will work closely with the committee I am appointing to shape a vision for computing for the University of Missouri," Russell says. Names of committee members, representing administrative and faculty users on the four campuses, will be announced when all have accepted their appointments.

"I am confident that Mr. Caruso's management expertise and his knowledge of the field will lead to long-term benefits for the University and its supporters," Russell says. "We are fortunate to have attracted a profes-

sional of his caliber to address this important issue."

Caruso has worked for International Business Machines since 1966. He became controller for IBM Instruments, a Danbury, Conn. subsidiary, in 1980, and was named director four years later. In 1985, Caruso became assistant general manager for Saudi Business Machines in Jidda, Saudi Arabia, and in 1987 was named network program manager for IBM's systems integration division in Gaithersburg. He was selected manager of general and public sector solution development in 1988.

Caruso received a bachelor's degree in commercial science from Benjamin Franklin University in Washington, D.C., in 1961, and his master's in commercial science from that institution in 1964. He is a graduate of the IBM advanced management school and the IBM executive program of the Wharton School of Business.

# THE COLOR LINE

Legacy for the Twenty-first Century

The problem of the twentieth century will be the problem of the color line," wrote W. E. B. DuBois in *The Souls of Black Folk*. As the twentieth century comes to a close, how dismayed DuBois would be to discover that "the color line" continues to be the most pressing issue of our time. John Hope Franklin will visit the University of Missouri-Columbia to deliver a series of public lectures on race relations in the 1980s and '90s entitled "The Color Line": Legacy for the Twenty-first Century.

YOU ARE CORDIALLY INVITED TO ATTEND THE 1992 BRICK LECTURE SERIES TO BE DELIVERED BY EMINENT HISTORIAN JOHN HOPE FRANKLIN.

# Q&A

**Q.** A recent Q&A column had a question about preferential treatment in rehiring University employees who are laid off. What about employees who are paid with money from grants? Are they eligible for preferential hiring by the University?

**A.** Most employees whose salaries come from grant money are not eligible for provisions of the University's layoff policy, including preferential hiring status, says Susan Rutan, manager of Employment Services. The distinction is made by looking at appointment ending dates on the employee's personnel action form. Employees who have definite ending dates on their personnel form are not eligible for layoff benefits. Those with indefinite appointments are eligible for the benefits, including preferential hiring.

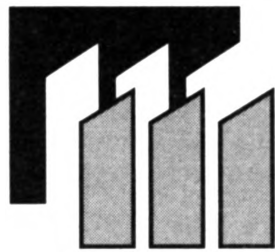

**Q.** Has any consideration been given to changing the salary year (Sept. 1 to Aug. 31) so that it coincides with the fiscal year (July 1 to June 30)? It seems to me that having the salary year different than the fiscal year requires additional record keeping and complicates the budgeting process.

**A.** The University used to give raises that were effective July 1 for staff and Sept. 1 for academic employees, says Jim Bunton, associate director of Business Services. The change to Sept. 1 for all employees was made due to the lateness each year of the final decisions regarding state appropriations. Those appropriations must be passed by the General Assembly, then signed into law by the governor before the Board of Curators can set salary guidelines for the upcoming year. Since this process was seldom complete until late June or early July, Bunton says, the turnaround time for adjusting salaries was so short that the University felt that everyone benefited by making salary increases effective Sept. 1 for all employees.
