Making a difference

Various Staff Recognition Week events designed to celebrate 'Sparkle in the Black and Gold'.

Day in and day out, nearly 8,000 administrative and support staff make a difference at Mizzou. One week is set aside each year to honor their contributions with a full roster of activities and ceremonies. This year, Staff Recognition Week will be held from April 4 through 8.

Although a handful of staff members will be singled out to receive special awards that recognize their accomplishments, the activities really are a way to thank all University staff members for their efforts throughout the year.

"This is a way to let MU staff know that their work is important and appreciated," says Bob Smith, chairman of the Staff Advisory Council, which sponsors the special week. Smith, construction project manager with Campus Facilities, says that staff dedication shines through in the way everyone pitches in to help plan and carry out the activities. "The Staff Council couldn't do this alone," Smith says. "We rely on help from plenty of staff volunteers."

The week kicks off with an awards ceremony at 1:30 p.m. April 4 in Jesse Auditorium. At that ceremony, four winners of the \$1,000 Staff Recognition Awards will be honored.

Please see RECOGNITION on Page 6.

A message from the chancellor

This year, we will celebrate Staff Recognition Week from April 4 through 8. We will join in giving recognition to the fine achievements of our more than 8,000 administrative, service and support staff at Mizzou who do so much to make this such a fine place.

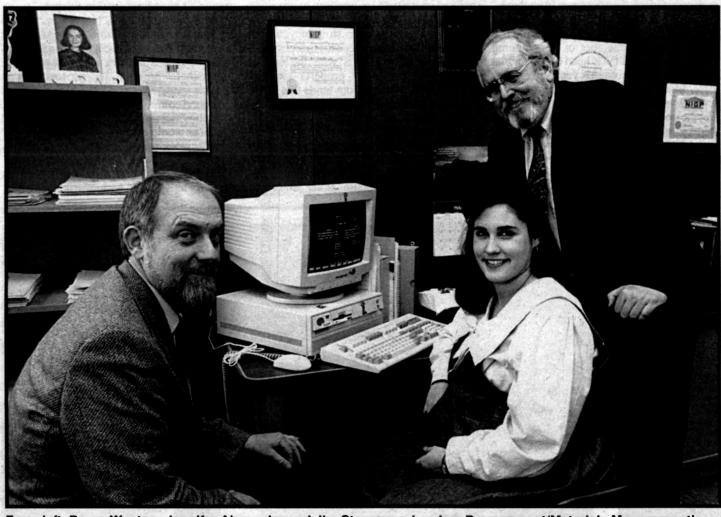

A calendar of events for the week has been distributed across campus. I encourage each member of the University community to participate in as many programs as possible, and I hope managers will be supportive of staff members who wish to participate. Most activities are scheduled during the noon hour.

The awards ceremony is scheduled for 1:30 to 3:30 p.m. Monday, April 4, in Jesse Auditorium, and I hope you will join in honoring these first-rate colleagues. Four staff members will receive Staff Recognition Awards, having been chosen by their peers for outstanding service to the University. In addition, two staff members will receive meritorious awards recognizing their particular contributions to the campus. A reception in Jesse Hall will follow the ceremony.

I look forward to seeing you at the ceremony.

Charles Q. Kulen

Charles Kiesler Chancellor

From left, Bruce Weston, Jennifer Alexander and Jim Stevenson head up Procurement/Materials Management's automated purchasing system, which is making life easier for MU departments.

Setting the pace

MU's automated purchasing system draws rave reviews from peer universities.

It may surprise some people that officials from Duke and Penn State universities know more about MU's automated purchasing system than does the average MU employee. But it really doesn't surprise Jim Stevenson.

"We work behind the scenes, and generally don't get a lot of publicity," says

Stevenson, director of Procurement/Materials Management. However, his department is receiving a lot of praise these days from similar units across the country that have viewed its Advanced Procurement System.

"Officials from Duke University came here recently to take a look at our system," Stevenson says. "They had four other schools on their list to visit, but stopped after seeing ours. They told us, 'We've seen the best and we're going to set up one just like it." Similar sentiments have been expressed by officials from Penn State, Southern Illinois University, Lincoln University, the states of Indiana and Ohio, and the city of Independence, Mo. -- all of whom were motivated to buy APS after viewing the MU model.

"It's not the computer system itself that everyone is talking about, but the way Jim and his staff have set it up to serve their customers, their vendors, and their own requirements," adds Kee Groshong, vice chancellor for Administrative Services. "That's what makes the difference, and they are to be commended. We're now a national leader in this regard."

When Stevenson came to Mizzou seven years ago, bid requests and purchase orders were all processed manually. Now the \$65 million operation is automated, serving all MU departments and doing business with thousands of vendors across the country and around the world.

APS allows University departments with either Macintosh or IBM compatible computers to submit requisitions to P/MM through its online system. If an item is put out on bid, the bid responses are summarized automatically using the same system. "In fact," says Jennifer Alexander, systems coordinator for P/MM, "about 40 departments have received one-on-one onsite training in the use of APS and now have the capability to create requests and track the progress of their orders from their office computers." Adds Bruce Weston, senior computer programmer/analyst: "There are many other advantages to automation. These all point to a bottom line of better and more timely service to our departmental customers and to our vendor community.

In addition, a term contract with Fisher Scientific of St. Louis allows Mizzou departments to order lab and scientific supplies directly from their computers. "When I came here, we were receiving thousands of different requisitions for these kinds of supplies. They all had to go through the same slow process, which could take a month or more," Stevenson says. "Now you can order them electronically in a minute, directly from the vendor, and get them at a much lower cost to boot."

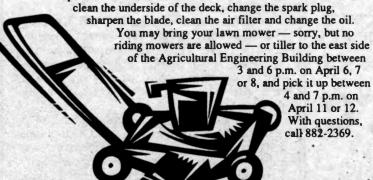

He acknowledges that most University departments may not know about all of the available ordering options, which will be discussed at a Business Services seminar April 19. One topic to be discussed at the seminar is a new way for departments to order from General Stores, which already is automated through APS and will introduce online requisitioning in April. This will allow departments to create and track stores requisitions from their offices electronically. P/MM is already preparing for an influx of requests to be connected to APS after the General Stores option is put into place. "We'll be happy to come to your site and train your people on the system," Stevenson says.

TUNE UP THAT LAWN MOWER!

It's time to pull that dusty lawn mower out of the garage and get it ready for another spring and summer of activity. And MU's Agricultural Mechanization Club is ready to help.

The club will have its annual lawn mower and tiller tune-up clinic on April 9. For \$15, club members — all students at Mizzou clean the underside of the deck, change the spark plug, sharpen the blade, clean the air filter and change the oil.

SORORITY JOINS CANCER FIGHT

Mizzou's Zeta Tau Alpha sorority is doing its part to help educate women on breast cancer.

On April 4 from 10 a.m. to 8 p.m., the sorority will distribute shower cards at Brady Commons and at the Wal-Mart on Stadium Boulevard. The cards illustrate breast self-examinations, an effective way of determining lumps in the breast.

The name of our campaign is 'Don't be a Fool — Do Monthly Breast Self-Examinations," says Janae Holt of the sorority, which is working with the Cancer Research Center on the project. With questions, call Jennifer Salley at 875-2255.

TAKE A WALK IN THE SUNSHINE

Spring has sprung, and Recreational Services is offering two activities to help faculty and staff get a little sun - and get back into shape at the same time.

The Sunshine Walkers meet Mondays and Thursdays over the noon hour, beginning this week and continuing through May 5. The group meets at Stankowski track at 12:10 p.m. and walks various routes until 12:50 p.m. A \$4 fee covers the cost of T-shirts for each walker.

Non-credit tennis begins next week. A session for beginners meets Tuesday

evenings and Saturday mornings for four weeks, while an intermediate group will meet Wednesday evenings and Saturday mornings. All classes will be on the College Avenue courts, and the cost is \$25.

With questions or to sign up, call 882-2066 or stop by 320 Student Recreation Center.

Planning group discusses bicycles

A group authorized to address bicycle issues at MU would probably best function as a subgroup of the campus planning committee, says Kee Groshong, vice chancellor for Administrative Services.

'I don't know that we'd want to start another full-blown campus committee to study bicycles only, and I'm not sure that a subcommittee of the parking and transportation committee would be the best place for it," Groshong told the campus planning committee March 22. "But we do need to have a group that could answer to bicycle issues.

'Since the planning committee discusses streets, walkways and grounds in general, and works closely with Jack Robinson, our planning consultant, I'd say that would be the most logical place for it." While some members of the group would be on the campus planning committee, others could come from the general MU community. "You'd want the group to be made up of people knowledgeable about and interested in bicycle issues.

Groshong added that such a subcommittee should first set priorities and then seek funding. "Things like bicycle paths are going to cost money. It would be best to start with one project, then continue from there."

The vice chancellor's comments followed a presentation by Speer Morgan, professor of English and a member of the planning committee. Morgan was head of a team that studied bicycle issues this year and offered three principal suggestions at the meeting:

■ Establish some type of a permanent bicycle committee that reviews changes in the physical campus, arranges to have proposed bicycle paths listed on the Campus Master Plan map, and educates the MU community on bicycle issues.

■ Construct bicycle paths with an eye to

design as well as usefulness. "For instance, we would suggest shaded concrete aggregate — or whatever preparation would last for 20 years of more — with a yellow stripe down the middle," Morgan said. "Such paths are clearly bikeways, not pedestrian paths." In addition, yield and stop signs should be painted on the path (as opposed to installing free-standing signs), and planters and other baffles could be used to slow bicyclists at busy streets and heavy pedestrian crossways.

Coordinate efforts with the city of Columbia. "University property includes considerable creek bottom lands that could be a part of recreational bicycling through the Columbia Greenbelt plan," Morgan said.

He also distributed a map showing possible bicycle routes across campus. Regarding the first trail to be built, committee member Peter Davis, professor of law, suggested that it run south along Maryland

Avenue, since that street is to be redesigned in the next few years. "That would also help tie the route into the MKT trail, which is another priority," Morgan added.

Jim Joy, director of Parking and Transportation Services, noted that more bicycle racks are being built across campus, and are worked into the landscape when new buildings are constructed. "The plans for Lee Hills Hall (under construction at the School of Journalism) include a bike rack. That wouldn't have happened in the past.'

Morgan stressed that bicycles serve both a recreational and a commuter purpose. "The basic problem is that we have too many cars on campus, and building more garages won't solve that," he said. "If we had a good bicycle route system through the campus and good commuter routes through the city. I'm convinced that more faculty, staff and students would ride in every day.

Bicycles provide exercise, and selecting bikes over cars helps the environment. I'd like to see a campus that is bicyclefriendly as opposed to auto-friendly.'

Nobel Laureate Douglass C. North, right, speaks with Chancellor **Charles Kiesler** before his lecture March 28 in Townsend Auditorium. North, the 1993 recipient of the **Nobel Prize in** Economics, is the Luce **Professor of** Law and Liberty in Washington University's economics department.

GET READY TO MOVE YOUR CLOCKS UP

Daylight Savings Time begins this coming Sunday — which is Easter Sunday, by the way — so be sure to set your clocks ahead one hour before retiring Saturday night.

You'll "lose" an hour in the process, but will gain it back in the fall. A good way to remember which way to set your clocks is with this saying: "Spring forward, fall

GET YOUR PLANTS FOR SPRING HERE

The Horticulture Club is having its spring planting sale today and Friday — just in time for Arbor Day.

Spring bedding plants, vegetables and some foliage plants will be available from 8 a.m. to 5 p.m. both days at the north end of Greenhouse 11, just south of Curtis Hall. Brices will vary. Also, a limited number of white and Austrian pines will be distributed free in honor of Arbor Day on Friday.

REMEMBERING **50 YEARS AGO**

The Missouri Alumnus magazine is planning to do a story commemorating the 50th anniversary of D-Day.

If you have written a book about D-Day or related events, are an expert on World War II history, or know of alumni who played a vital role in this chapter of history, we would like to hear from you.

With information, please call Ernie Gutiérrez, Publications and Alumni Communication, at

ATHLETICS SEEKING FACULTY MENTORS

If you're a faculty member and you'd like to serve as a mentor to student-athletes, Intercollegiate Athletics wants you.

The department's Total Person Program is looking for faculty to assist with a mentoring program. With questions, or to sign up, call Chris Sinatra at 882-0708.

University developing solutions to radioactive materials concerns

Three categories of concern are cited in an inspection report issued by the Nuclear Regulatory Commission to Mizzou, and University officials already have begun a review of improvements in the handling of radioactive materials on campus.

The report is the result of an NRC inspection Jan. 24 to 28, which was followed up with an exit interview on Jan. 28, a manage-

> While training in the handling of radioactive materials has been required for users, the NRC findings show that not all users have implemented what they learned. 'It's not only a question of learning, but also living what you have learned.'

> > -Gerald Brouder, Provost

ment meeting on Feb. 24 and enforcement conference on Feb. 28. Each meeting involved representatives of Region III of the NRC and University officials.

In the report, the NRC categorizes the violations it found on campus as those occurring from insufficient knowledge of license conditions and NRC regulations by the University's radiation safety officer and radioactive material users; those occurring from an inadequate sense of accountability regarding compliance with safety requirements by the radiation safety staff and radioactive material users; and those occurring from ineffective self-assessment of the University's radiation safety program and its implementation.

MU already has started looking at improvements to correct the problems listed by the NRC, says Kee Groshong, vice chancellor for Administrative Services. "We are

now working to identify what the root causes of these violations are and develop solutions to correct them," he says. "We are doing this on two fronts: taking short-term corrective action to address the immediate problems; and developing long-term corrective action to improve procedures and compliance with requirements.

One action already taken was the naming of Susan Langhorst as Mizzou's radiation safety officer. Langhorst is the former manager of health physics at the MU Research Reactor Center and had been on sabbatical leave to serve for the past year in Washington, D.C., on a government committee on radiation research and policy.

While the NRC does not make direct recommendations about personnel changes, they did indicate that there was insufficient oversight of enforcing requirements," Groshong says. "For that reason, we felt a change in staffing was needed to effect the level of enforcement indicated by these violations."

The proper training of radioactive materials users and enforcement in following training requirements are of primary importance, Provost Gerald Brouder says. "Our research faculty apply for the privilege of working with the radioactive materials necessary to their research when they apply to be designated as radioactive materials users under MU's NRC license," Brouder says. "That privilege carries with it a responsibility to handle these materials in a safe manner as mandated by NRC regulations and University policies.

"Not only are these researchers responsible for their own actions, they also set examples for the students and staff who work with them. Now that we have received notice of the NRC's findings, we will work to develop and implement the type of strong compliance program that is needed."

While training in the handling of radioactive materials has been required for users, the NRC findings show that not all users have implemented what they learned in training. "It's not only a question of learning," Brouder says, "but also living what you have learned.'

The University has 30 days from the official notice of the NRC findings to respond. That response will provide an evaluation of radiation safety practices on campus, a compilation of radiation safety deficiencies, a root-cause analysis of deficiencies and a description of corrective actions in addition to responses to specific viola-

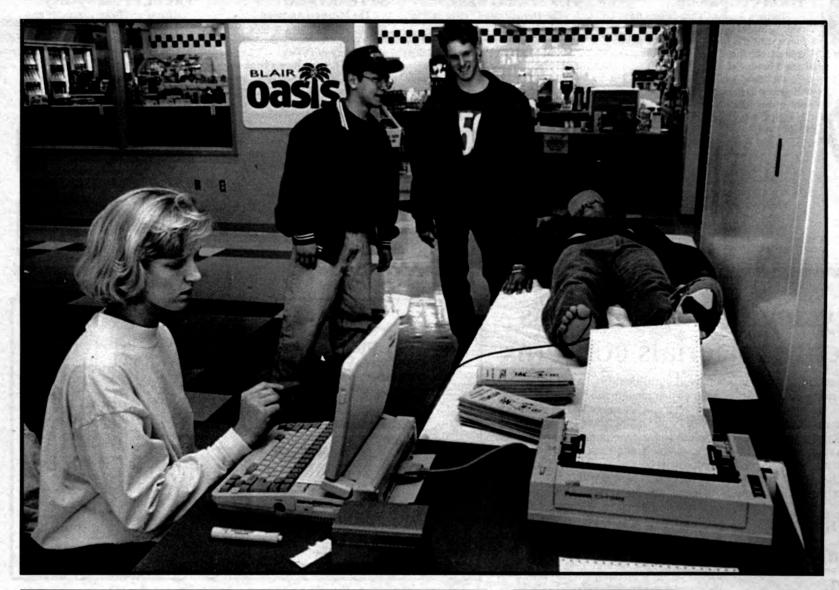

The NRC has classified the violations as a Severity Level III problem, with Level I categorized as most severe and Level V as least, and has issued a \$5,000 fine. Notice of the findings was issued on March 9.

University Gas Station **Re-Opening April 4th!**

The newly renovated University Gasoline Station (located on the East-side of the General Services Building) will open Monday, April 4th at 12:01 AM. If your department has not received its gasoline key card yet, please contact Dan Johnson, General

Stores @ 882-6908. The new station will offer Unleaded and Ethanol gasoline at prices lower than other For More Information, Columbia stations. CALL General Stores 882-6908 NOTE: Gasoline Not for sale to the public -- University Vehicles ONLY!

Susan Nelson of **MU's Fitwell** program measures the body composition of George Sorio, a freshman from Kansas City, on a blo-electrical **Impedance** computer at the Blair Fair, an open house held last week in the Blair Residence Hall group. Sorio's classmates, Tony Phan, left, of Chesterfield, Mo. and Matt Garrison, of Ozark, Mo., await their turns to be analyzed on the computer, which records body fat and muscle mass through electrodes attached to the foot and arm. The fair marked the grand opening of the **University Sport** and Supply Shop and the Blair Oasis convenience store. The Health **Sciences Bookstore** also was featured.

Veterinary neurology specialist named to veterinary medicine post

Kornegay plans to continue his research on a canine model of Duchenne muscular dystrophy, the most severe of the several forms of MD in humans.

Joe N. Kornegay, a specialist in veterinary neurology, has begun work as chairman of veterinary medicine and surgery at Mizzou.

At MU, Kornegay plans to continue his research on a canine model of Duchenne muscular dystrophy, the most severe of the several forms of muscular dystrophy in humans. Affected boys are confined to wheelchairs by their teens and die before turning 25. Golden retriever dogs with a comparable form of muscular dystrophy have similar symptoms. By studying the disease's progression and effects in dogs, Kornegay hopes to discover new therapies that may eventually be effective in people.

Kornegay hopes to collaborate with other researchers at the college, as well as with individuals at the Dalton Cardiovascular Research Center and the School of Medi-

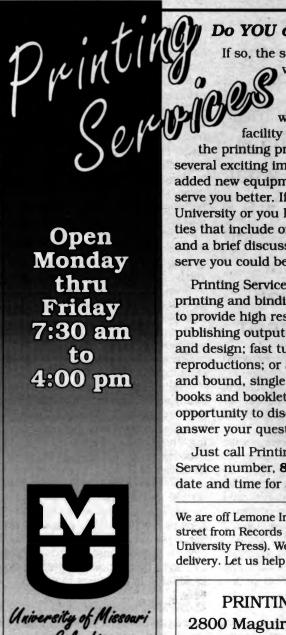

cine. "MU has strong cardiovascular research programs across its medical disciplines," he says. "Techniques used in studying cardiac muscle can also be applied to skeletal muscle."

In pursuing his research, Kornegay will transfer a colony of about 30 golden retrievers from his former laboratory to MU. These dogs either have muscular dystrophy or carry the defective gene. The colony is one of only four in the world used to study the disease and possible treatments for it.

Kornegay earned a bachelor's degree in veterinary sciences in 1972 and a doctorate in veterinary medicine in 1973 from Texas A&M University. After several years in private practice, he pursued residency and graduate training at the University of Georgia. He earned a master's degree in veterinary anatomy in 1980, followed by a doctorate in veterinary pathology in 1982. Kornegay joined the faculty of North Carolina State University as an associate professor in 1982 and was promoted to professor in 1986.

A recipient of numerous honors and awards, Kornegay was chosen as teacher of the year several times and also received the Norden Distinguished Teacher Award while at North Carolina State University. He is a member of the American Veterinary Medical Association, the American College of Veterinary Internal Medicine and the American Association for the Advancement of Science.

The author of 45 papers in refereed journals, Kornegay wrote or edited two books on veterinary neurology. He also has served on several editorial review boards and been a consultant for Burroughs Wellcome Laboratories, Norwich Eaton Pharmaceuticals Inc., Merck Sharpe and Dohme Research Laboratories, and Glaxo Inc.

Do YOU order Printing?

We can arrange for you and any of your co-workers to tour our

facility and learn more about the printing process. We have made several exciting improvements and have added new equipment that allows us to serve you better. If you are new to the University or you have new responsibilities that include ordering printing, a tour and a brief discussion on how we can serve you could be very helpful.

Printing Services is a full service printing and binding facility that is ready to provide high resolution, desktop publishing output; typesetting, paste-up and design; fast turnaround, quick copy reproductions; or a wide variety of printed and bound, single or full-color brochures, books and booklets. Please give us an opportunity to discuss your needs and answer your questions.

Just call Printing Services' Customer Service number, **882-7801** to set up a date and time for a tour and meeting.

We are off Lemone Industrial Blvd. (up the street from Records Management and University Press). We are on Campus Mail delivery. Let us help you with your next project.

Recognition

Continued from Page 1.

Also recognized will be the winners of the Mick Deaver Memorial Award for staff contribution to student life, and the Barbara Uehling Award to an outstanding administrator. In addition, hundreds of staff members will be recognized at the ceremony for their years of service to Mizzou.

Other activities throughout the week include a variety

show, a fashion show and an outdoor show. And for the first time this year, there will be a series of seminars for staff on topics that range from financial and retirement planning to an open house at the Natatorium.

Another new activity is a special MU staff T-shirt sale, with \$2 of the \$8 cost of the shirt to be donated to the Children's Miracle Network at University Hospital and Clinics. The shirts feature Truman the Tiger and bear this year's recogntion week slogan, "The Sparkle in the Black and Gold." Karen Maddox, administrative assistant at Cam-

pus Dining Services, notes that faculty and staff can still buy the shirts through order forms in *Mizzou Weekly*. In addition, shirts will be sold at events throughout Staff Recognition Week. "Any Staff Council member will be more than happy to take orders for the T-shirts," Maddox said.

The final event of the week will be the MU Staff Walk, from 11 a.m. to 1 p.m. April 8. Staff are encouraged to wear their "colors," grab a friend or colleague, and get out for a stroll anywhere on campus to exercise and meet fellow staff members

April 4-8

A week of programs and activities for staff in recognition of service to the University.

Programs are free, and ALL STAFF ARE ENCOURAGED TO PARTICIPATE.

presented by

TUESDAY, APRIL

Variety Show

Noon to 1 p.m.

Whitmore Recital Hall, Fine Arts Bldg. (No Food Please)

Skip lunch or eat early and then relax and see the "Sparkling" talents of MU staff. Musicians and entertainers of all kinds have gotten their acts together and will take to the stage to entertain their fellow staff members. This variety show will be fun for one and all.

WEDNESDAY, APRIL 6

Outdoor Show

10 a.m. to 4 p.m.

Stotler Lounge, Memorial Union

Spring and summer activities will be highlighted. See what Missouri has to offer in recreation activities and outdoor fun.

THURSDAY, APRI

Fashion Show

Noon to 1 p.m.

Jesse Hall Auditorium (No Food Please)

Take a break. Come to a fashion show that features attractive, yet affordable styles. You'll see a variety of outfits for men and women of all sizes. Mizzou staff will model work, play and evening clothes. See the "Sparkle."

FRIDAY, APRIL 8

Staff Walk

11 a.m. to 1 p.m.

Anywhere on campus

Grab a friend, colleague, faculty member or your boss. Take a stroll around the campus and make new friends.

OTHER ACTIVITIES

Financial Seminar

11 a.m. to noon, April 5, S204 Memorial Union Learn some tips for managing your finances and investing in the future.

Open House

Noon to 1 p.m., April 6, in the Student Recreation Center

Come see what's available in the way of health and recreation possibilities in the renovated recreation center.

Open House

Noon to 1 p.m., April 7, at the MU Natatorium Ever wonder what that building is on the corner of Rollins Street and Maryland Avenue? Visit the MU swimming pool.

Retirement Seminar

1 to 2 p.m., April 7, in S207 Memorial Union
Learn what to consider in retirement planning, or find
out what you should have considered. Information for
those with retirement plans in the near — or not so near
— future.

Staff Recognition Ceremonies

Monday, April 4 1:30 to 3:30 p.m. Jesse Hall Auditorium

Chancellor Charles Kiesler will present the four \$1,000 Staff Recognition Awards to one member of each subgroup: Administrative/Professional, Crafts/Maintenance, Secretarial/Clerical and Technical/Paraprofessional. The Mick Deaver and the Barbara S. Uehling Awards of \$500 also will be presented. Staff with 20, 25, 30 and 35 years of service will receive individual certificates. Staff with 5, 10 or 15 years of service to the University will be recognized. Refreshments will be served following the ceremony.

MICK DEAVER **MEMORIAL AWARD**

The award, established in 1980 by the Staff Advisory Council, recognizes a staff member who exemplifies the late University Police major's concern for fostering good relations with students. Deaver, a 1966 MU graduate, was associate director of University Police at the time of his death in an automobile accident in 1980.

Kim Dude's bottom-up philosophy puts MU students in the driver's seat. As director of the Project ADAPT office, she works with students to establish a dialogue about responsible use of alcohol.

ADAPT — the acronym stands for Alcohol and Drug Abuse Prevention Team — is Mizzou's nationally recognized alcohol education program. Last fall it was selected from among programs on 3,000 campuses as one of the best comprehensive alcohol and drub abuse prevention programs in the nation. MU has won the award six of the last

seven years, an accomplishment unmatched by any other school in the country.

For the last 11 years, Dude has been planning and putting into practice a variety of alcohol education programs on campus. In addition to ADAPT, there is PARTY, the award-winning student organization. Each October, Dude coordinates Alcohol Awareness Month, and each spring she helps organize the Safe Spring Break program.

Dude stresses that the success of the programs rests with students. "We have a tremendous amount of student involvement,"

she says. "Students are involved intensively in every event." The building block of the programs are "peer educators," students who are trained to counsel other students.

Students say that Dude makes the difference. "Kim is an administrator with an exceptionally high ability to relate to students," says one student who works as a peer educator in Dude's office. "She is a supervisor, but her open-door policy makes her a friend, mentor, helper and adviser. She represents the University admirably.'

Another peer educator disagrees with the

'supervisor' label: "Nobody really works for Kim," he says. "Rather, you work with her."

Dude helps her student workers hone their speaking and organizing skills. "Many students have changed their majors or future plans because of her positive influence," one student says. In fact, Dude has so impressed several students that they've opted for careers in student development.

Dude says her programs put a high priority on creativity. "Students think they've heard it all before, so we need to be as creative as we can to get their attention."

Engineering a difference

When birthdays roll around for employees at Ellis Fischel Cancer Center, they each receive a birthday card. The cards are signed personally by Patsy Hart, hospital operations director, not by her clerical staff. And because the cancer center is staffed around

the clock, Hart drops by at night and on weekends to keep in touch with workers she might not otherwise have contact with.

Ellis Fischel staff say Hart encourages them to excel. "Patsy Hart understands extremely well the concept of a system that

functions best by empowering its employees to have an active part in the management process," says one staff member. "She interacts with all staff in the same way - positively, with genuine interest and caring."

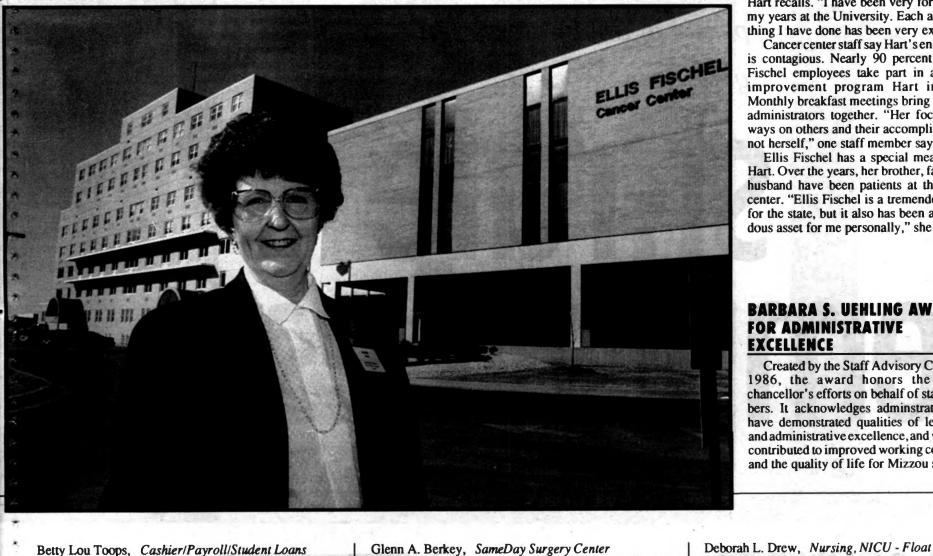

Hart says her goal is to help employees feel that they're part owners of Ellis Fischel. "If I can create an atmosphere for people to succeed, then that is what my role is all about. My job is to let people do their very, very best," she says.

'I want every staff member who works here to know they do have the authority to make a difference. Each of us can be a leader in solving problems.

Hart joined MU in 1979, when she took a finance job with University Hospital and Clinics. It was a time, she says, when the hospital was being challenged to create a more self-supporting atmosphere. "It was an exciting time and a very rewarding time," Hart recalls. "I have been very fortunate in my years at the University. Each and every thing I have done has been very exciting.'

Cancer center staff say Hart's enthusiasm is contagious. Nearly 90 percent of Ellis Fischel employees take part in a quality improvement program Hart initiated. Monthly breakfast meetings bring staff and administrators together. "Her focus is always on others and their accomplishments, not herself," one staff member says.

Ellis Fischel has a special meaning for Hart. Over the years, her brother, father and husband have been patients at the cancer center. "Ellis Fischel is a tremendous asset for the state, but it also has been a tremendous asset for me personally," she says.

BARBARA S. UEHLING AWARD FOR ADMINISTRATIVE **EXCELLENCE**

Created by the Staff Advisory Council in 1986, the award honors the former chancellor's efforts on behalf of staff members. It acknowledges adminstrators who have demonstrated qualities of leadership and administrative excellence, and who have contributed to improved working conditions and the quality of life for Mizzou staff.

retarial and support staff.

youth involved in 4-H programs might not know it, but Robinson's work

involves everything from career planning programs at inner-city schools to

When the Great Flood of 1993 rolled through Missouri last year,

Robinson put in long hours coordinating 4-H relief activities around the

state. Colleagues say her commitment extends outside the office. As the

floodwaters rose, Robinson was on the line, sandbagging and helping local

way; she regularly donates a rare blood product for cancer and heart surgery

For Robinson, that sense of caring comes with the job. She knows that

Finalists in the administrative/professional category are Jerry Hemeyer,

pharmacist at Ellis Fischel Cancer Center; Eddie Hedrick, infection control

manager at University Hospital and Clinics; and John Gordon, manager of

growing up can be a difficult task for kids today. "I enjoy working with youth

and all the problems they're facing," she says. "Before, just a percentage of

scheduling 4-H food and animal demonstrations at the state fair.

nities clean up. Robinson also gives of hersel

youth were at risk. Now they're all at risk.

pathology at Ellis Fischel Cancer Center.

The Chancellor's **Staff Recognition** Award winners fo 1994 are, from left, Randall Simmons, Rosa Lee Dudley **Brenda Robinson** and Elda Carothers

Brenda Robinson

Her co-workers say that Brenda Robinson builds solutions to problems. "She has the ability to work in a stressful environment, to listen to others and empathize with their needs," one colleague says. "Brenda motivates subordinates while supporting them with a sense of team Robinson, administrative associate in the University Extension Department of 4-H Youth, is the Staff

Carothers 믕 Recognition Award winner in the ad-

Before Elda Carothers started working as a secretary in the Intercollegiate Athletics football office 12 years ago, she never had seen a high-school or college football game. "I had to learn it all," Carothers recalls. "I made up my mind that I wasn't going to just type Xs and Os."

Now when she attends games, Carothers can spot a screen pass or a draw play as well as any die-hard Tiger fan. And her workload would bring down a fullback. Carothers handles secretarial work for nine assistant football coaches, three strength coaches, and helps coordinate travel for recruiting. But it doesn't stop there. She also deals with local and national news media, high school and

college coaches as well as pro football scouts, alumni and parents. Carothers is the Staff Recognition Award winner in the secretarial/ clerical category. "Elda has more energy than anyone I know. Likewise, she

is the most dependable person in our department," says one colleague. "She often handles the responsibilities of fellow workers; she doesn't care who

Football season is Carothers' favorite time of year. "I enjoy working with the coaches, working on playbooks," she says. "There's a certain camarade. rie ulat we all have. Everybody in this building works as a team. She say: the coaches and players who have come and gone still maintain ties to the Mizzou tradition.

"It was interesting — when Coach Dan Devine came back, he brought back a lot of that tradition. Don Faurot still comes by quite a bit," she says. "To be involved in athletics, you really have to love your university."

Finalists in the secretarial/clerical category are Patty Eggleston, word processor operator III in the Department of History; Lisa Toler, secretary with the Campus Writing Program; and Betty Wefenstette, office support staff III with Human Resource Services.

mmons Randall

Randy Simmons is the kind of employee every supervisor would love to clone. He is a self-starter and works hard all day," is the way faculty and staff describe Randall Simmons. They say Simmons, a custodian with Building Services, always seems to know where cleaning needs exist before others are even aware of the problem.

Simmons is the Staff Recognition Award winner in the crafts/maintenance category. His custodial route includes the Veterinary Medicine Diagnostic Lab and two annexes, the abattoir and the fire station on Ashland

And Simmons returns his coworkers' praise. "Without exception, the people I work with are super,

from the people in the labs to the faculty, students and staff," he says. "I couldn't have done better if I went out and picked the people I work with."

Simmons and his wife live in Hallsville and share a number of interests, including the long hours they put in as volunteers with the Boone County Fire Protection District. His experience as a firefighter and emergency medical technician makes his colleagues feel more secure. When an individual suffered an asthma attack recently and fainted. Simmons went to her

That's just one example of the way he "goes miles above and beyond what's expected of him," one co-workers says. "I recently observed him cleaning the stairwell with a toothbrush to get off the grime.'

They say he attacks any job with a "can-do" attitude. Simmons agrees that a good attitude is a big part of his work philosophy. "Work is whatever you want to make of it," he says. "It's the people who make it enjoyable."

Finalists in the crafts/maintenance category are Greg Flippin, veterinary facilities supervisor at the Veterinary Teaching Hospital; Scott Keith, arborist with Maintenance and Grounds; and Byron Smith, custodian with Building Services.

Rosa Lee

After nearly 37 years of working at Ellis Fischel Cancer Center, Rosa Lee Dudley says the hospital is almost a second home. "Sometimes it seems like I grew up here," says Dudley, a nursing technician in the radiation oncology unit. "It's a wonderful place to work. We're all just like a family.'

Her co-workers say she is the glue that holds this family together. Dudley is the Staff Recognition Award winner in the technical/paraprofessional

"She doesn't know a stranger, and is the best example of a caring, conscientious, capable representative of Ellis Fischel," one colleague says. "Rosa Lee is probably one of the

best-loved individuals within this facility, due to her boundless enthusiasm, her sense of humor, and her genuine interest in each individual with whom

She covers a lot of bases on the job. Dudley works as a receptionist, file clerk and patient chart coordinator. She assists physicians and nurses, handles radiology films and charts patient information.

To Dudley, it all comes naturally. "I'm a people person; I like people," she says, adding that working with patients is her favorite part of the job. Iney're all different, unique people. They come from all walks of life young and old, people who have money and people who don't."

But patient care also can be the biggest challenge Dudley faces on the job. "The first time patients come in, it can be a challenge to make them feel relaxed, feel confident," she says. "The word 'cancer' - just the thought of it can scare you to death."

Finalists in the technical/paraprofessional category are Marsha Arnett, licensed practical nurse at the Student Health Center; Luann Billeck, medical student/residency program coordinator at the School of Medicine; and Lisa Boland, senior veterinary technician with the Department of Veterinary Medicine and Surgery.

CONGRATULATIONS ON A GREAT SEASON

to MU Gymnasts

and MU Basketball

(Men's & Women's)

To the Person in the Arena

"It is not the critic who counts, not the person who points out how the strong stumbled or where the doer of deeds could have done them better. The credit belongs to those in the arena: whose face is marred by dust and sweat and blood; who strives valiantly; who errs and comes short again and again; who knows the great enthusiasms, the great devotions, and spends him/herself in a worthy cause; who, at the best knows the triumph of high achievement; and who, at the worst, if she/he fails, at least fails while daring greatly, so that his/her place shall never be with those cold and timid souls who know neither victory nor defeat."

— Teddy Roosevelt

Specific congratulations to scholar-gymnasts Leah Hicks and Jenny Schmidt for making Phillips 66 All-Academic Honors

Limit 10. Good 'til April 30, 1994.

WANTED: Used centrifuge. Contact Jimmy Lattimer, associate professor of veterinary medicine, at 882-7821.

FOR SALE: Lab cabinets and counters, along with two lab benches. Excellent for outfitting laboratory space. Call the Missouri Innovation Center at 446-3100.

Q. For a number of years, University employees have received an annual statement that listed the value of the benefits we received, such as life insurance, medical insurance and projected retirement benefits. That form — we called it the "blue sheet" — usually came out around the first of the year. I haven't seen one yet this year; have they been discontinued?

A. No, they have not been discontinued, says Ron Monroe, manager of Faculty and Staff Benefits. The official name of the form is the "personal benefits statement." They're being processed and should be out fairly soon, perhaps as early as the end of March, Monroe adds. When the forms first came out, they were distributed each year in late January or early February. However, as the benefit package becomes more complicated, it takes more time to generate the forms. Last year the personal benefit statement increased to two pages and the color was changed from blue to gray. But it's probably fine to keep calling the personal benefits statement the "blue sheet." Over the years, for instance, the color of the official Missouri State Manual has changed from blue to green; the latest edition is mauve, and it's still known as the "Blue Book."

Send your questions about campus matters to Mizzou Weekly, 407 Reynolds Center. You must include your name and

phone number so we can reach you, if necessary. All questions remain anonymous. *Mizzou Weekly* will not answer unsigned questions.

The state of the property of the state of th

Energy Experts!

Energy efficiency is a hot topic these days. And with good reason. Efficient use of energy can save a lot of money and help preserve the environment.

Meet MU's ...

The Energy Management staff at Campus Facilities works hard to apply new technology to reduce energy consumption at MU.

For example, in the past several years the Electronic Systems Group has designed and installed these energy-saving projects:

Computerized utility metering

accurately monitors use of steam, water and electricity on campus and pinpoints savings opportunities.

- Energy management control systems, currently installed in 21 campus buildings, save \$500,000 per year in heating, ventilating and air conditioning costs.
- New emission monitoring controls, designed in-house, saved \$100,000 over a consultant's proposal.

 New Power Plant control systems saved \$350,000 over the lowest alternative cost.

"This group is not afraid of a challenge," says Paul Hoemann, director of energy management. "Working together and sharing ideas, they take the initiative to find creative, cost-saving solutions to MU's energy needs."

Campus Facilities is proud to recognize the members of the Electronic Systems Group for their important contributions to energy efficiency at MU.

Energy Management's team of electronics experts finds innovative solutions to MU's energy needs. From left, Michael Jones, Jim Taylor, Rick Miller, Larry Lentz, Dan Bailey, Jim Baumgartner, David Moore, Bob Kiker, Kevin Kaufman, Jim Oney, George Mackley, Nirupa Posani.

"Waiting, hoping, coping...
the infertility experience"

Infertility Conference 8 a.m. - 4 p.m., Saturday, April 9 Holiday Inn Executive Center Columbia, Missouri \$20 per person (includes lunch)

One of every six couples in America will have difficulty conceiving a child. Understanding infertility and coping with the wide range of emotions over the inability to conceive can be a traumatic event for a couple.

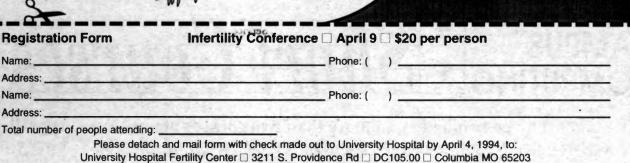

This program will offer both basic and advanced information regarding infertility. It is designed for those just beginning an evaluation, as well as those requiring advanced technologies.

Family members and friends are encouraged to attend the program to obtain a better understanding of infertility issues. The conference also is recommended for healthcare professionals.

Topics covered by physicians and other professionals will include making love while trying to make a baby, the art of IVF/GIFT, a behind-the-scenes look at the IVF lab, confronting secondary infertility, coping with a miscarriage or stillbirth, assessing sperm function, ovulation induction and intrauterine insemination.

For more information, call 882-7199.

We've got an Apple for the teacher.

Explore the core at *POWER MAC MANIA*. We invite you to watch as we unleash the power of the Power Macintosh™ computer against other high-end Macintosh® models. Join us Wednesday and Thursday, April 6th and 7th from 11am-2pm at the Faculty-Alumni Lounge S304 Memorial Union. Enjoy refreshments and register to win a LaserWriter® 300. Witness the performance that has put the Power Macintosh™ computer at the head of the class.

Power Macintosh.More power from the core.

CAMPUS COMPUTING

Short Courses

The following non-credit short courses are offered at no charge to MU faculty, staff and graduate students unless otherwise noted. Registration is required.

Participants may be enrolled in **no more than two courses** at one time. To enroll, please call 882-2000. *Note:* This is only a partial list; additional courses will be advertised in future issues of the *Mizzou Weekly*.

Focus on Faculty Courses

LISTSERV for Class Use

Section 1: April 8, 1:30 - 4:30 pm Section 2: April 22, 1:30 - 4:30 pm 226/266 Heinkel Building

The focus of this course is the use of electronic discussion lists as a means of increasing the level of communication among members of a class. Bob Bender of the English department will present his experiences using LISTSERV to facilitate class discussions.

Prerequisite(s): None.

Using Telnet To Access Remote Computers

April 15, 1:30 - 4:30 pm 266 Heinkel Building

This class demonstrates the use of telnet for on-line access to remote computers. Use of card catalogs will be demonstrated by Mike Muchow of Ellis Library. Prerequisite(s): None.

Microcomputer Courses — DOS/Intel

WordPerfect Topics—Graphics

Section 1: April 12, 1:30 - 4:30 pm Section 2: April 14, 9:00 am - noon 266 Heinkel Building

This hands-on class will cover the three steps of how to use graphics images in WordPerfect documents, how to change the borders around the image, and how to "edit" the image by resizing, rotating, and moving it within the borders. Prerequisite(s): Working knowledge of WordPerfect text entry techniques, including blocking and moving text, saving files and using codes.

WordPerfect Topics—Merge and Sort

April 14, 1:30 - 4:30 pm 266 Heinkel Building

This hands-on course shows you how the Merge feature can be used to mass-produce personalized form letters and mailing labels and how the Sort feature allows you to alphabetize merge files or select a certain group of records for processing. Prerequisite(s): Working knowledge of WordPerfect text entry techniques, including blocking and moving text, saving files, and using codes.

Email, Internet and Information Resources

Introduction to Email—cc:Mail for Windows

April 11, 1:30 - 3:00 pm 266 Heinkel Building

This hands-on class covers the basics of using cc:Mail with Windows on an IBM PC. Topics covered are email etiquette, how to send and receive mail and some of the available options. Prerequisite(s): Introduction to Windows 3.1, or basic knowledge of using Windows.

Internet Topic: FTP for DOS

April 13, 1:30 - 4:00 pm 266 Heinkel Building

This course will show you how to transfer files from the Internet to your desktop DOS-based machine.

Prerequisite(s): Introduction to DOS I or basic knowledge of DOS.

Call 882-2000 to register.
