ON THE INSIDE

Page 2 Native Columbian Polly Whitney will read from her new mystery novel, *Until Death*, at 4 p.m. July 20.

Page 2 Faculty and staff committee on health care plan issues is meeting to assess the quality of service.

Page 4 Thirteen staff members are running for five positions on the Staff Advisory Council.

Funding MU's future

Statewide bond issue would finance three MU construction and renovation projects.

The state legislature this year approved a bill to place a \$250 million bond issue on the Aug. 2 statewide ballot. If approved by a majority of the voters, the bond issue will finance capital improvements for the state's prison system and provide for new and renovated facilities for higher education.

On this campus, the bond issue would provide \$3.1 million for the construction of a library storage facility; \$10.6 million for the construction of the Anheuser-Busch Natural Resources Building — the state's portion of the \$18 million needed; and \$4 million for the renovation of Schlundt Hall, which houses MU's chemistry labs.

The bond issue will not result in a tax increase since the bonds would be paid in a 20- to 25-year period. The state calculates that it can pay off the new bonds by budgeting an affordable amount of existing annual income for debt retire-

ment. With this bond issue added to existing debt, the state will still need less than two percent of its gross revenue to make its payments.

"This bond issue is a reasonable way to take care of many of the critical building needs for higher education around the state," said Chancellor Charles Kiesler. "It makes sense to renovate our older campus buildings as soon as possible,

Absentee voting

If you find you are going to be out of town on Aug. 2, here's how to make sure you perform your civic duty.

Absentee ballots can be obtained by writing to your local County Clerk's office. Be sure to include the correct address for where you want the absentee ballot mailed. The last day to request an absentee ballot by mail is July 27. You also can go to the County Clerk's office to vote absentee in person before 5 p.m. Monday, Aug. 1.

because the longer we wait, the more it will cost. The funding to completely gut and renovate Schlundt Hall and the state matching funds for the Natural Resources Building have been on the priority list for some time.

These construction projects will have a very positive impact on the local economy," Kiesler said. "More than \$17 million will flow into the Columbia area over the next two years as a result of the bonds."

The bond issue also will pay for needed Department of Corrections and Youth Services projects:

■ A \$53 million women's prison to replace the Renz Correctional Center destroyed by last year's flood.

■ A \$35.8 million renovation to convert the St. Joseph State Hospital into a men's prison.

■ \$19.6 million to build six centers to house juvenile offenders.

■ \$7.3 million for phase two of a Kansas City release center

In addition, \$48.6 million will fund projects on the other three University of Missouri System campuses.

MU's largest project funded through the bonds would be an \$18 million Natural Resources Building that would be constructed just east of the Agriculture Building. The bond issue would provide \$10.6 million; the U.S. Forest Service has pledged \$3.5 million; and Anheuser-Busch has donated \$1.5 million. The University is raising the remaining \$2.6 million from private contributions.

Building science careers

NSF grant helps attract women to graduate work.

Before this summer, going to graduate school seemed like a far-fetched dream for Janet Miller, an MU sophomore majoring in animal sciences. But now that she's had a close look at the rewards and rigors of graduate school, she knows it will be part of her future.

Miller is one of 15 women on campus this summer participating in a program designed to encourage promising female undergraduates to pursue graduate work in science, math and engineering. The pilot program, funded with a \$117,735 grant from the National Science Foundation, seeks to expand the ranks of women in academic areas traditionally dominated by men, said Vicki Curby, director of the MU program.

"The pool of women with advanced degrees in these fields needs to be expanded," said Curby.

The women, chosen from a pool of 50 applicants from across the state, will spend the summer conducting research with their faculty mentors in what amounts to a crash course in graduate school. Each participant submits a research proposal, conducts a literature review and at the end, presents a project paper and poster.

Not only do the research projects give participants an intimate look at the demands of graduate school, they give them real research experience — a plus when applying for programs later on.

That experience is especially helpful for

Lela Riley, right, assistant professor of veterinary pathology, helps Westminster College student Michelle Bond set up a DNA test as part of a summer science program for women. Bond is developing a test for canine ehrlichiosis.

Nancy O'Connor photo

students like Michelle Bond, a sophomore in biology at Westminster College. Because there is often not much opportunity for research at small liberal arts schools, Bond is gaining invaluable experience that may serve as a springboard for getting into a graduate program.

"This will give her experience and let her decide if this is something she really wants to do," said Lela Riley, assistant professor in veterinary pathology and Bond's faculty mentor.

"Looking back, I wish I would have had this opportunity."

MU was one of 16 schools across the country to receive NSF funding for the program. A unique aspect of MU's program is that participants also get the chance to hook up with graduate students who join the faculty in serving as mentors.

The graduate students, all women, serve as real-life role models for the undergraduates, said Nan Unklesbay, professor of food science and human nutrition, who brought

the program to MU along with Judy Wall, professor of biochemistry.

Lori Keeling, an MU doctoral candidate in chemistry, knows what it's like to be interested in pursuing a Ph.D. but unsure of its feasibility. She hopes her insight can help some of the participants.

"I want them to see that even though these are male-dominated fields, they can still be successful," she said.

Please see SCIENCE on Page 2.

BLOCK THAT CALL

Callers on the MU campus may choose to block the display of their number to users of telephones equipped with caller ID.

To block your number from being displayed when you place a call, all you need to do is dial *67, listen for a new dial tone, then dial the last five digits of any campus number. Even if the recipient of your call has a business set (or Caller ID service), they will not be able to see your number in their display.

ELDERCARE REMINDER

The Eldercare Center, sponsored by the School of Health Related Professions, need your help.

Lois Long, director of the center, says that, "While we are grateful for the United Way support, other community support is needed to serve families in Columbia who need adult day care.

"Your gift of \$167.50, for example, allows someone to attend Eldercare for five days, providing 40 hours of respite for a family. There is a growing need for adult day care which allows a loved one to stay at home longer, prevents nursing home placement and gives the caregivers some time of their own."

Contributions can be sent to Eldercare Center, 137 Clark Hall. Checks should be made out to the University of Missouri, Eldercare Center.

WHODUNIT!

Polly Seewoster Whitney, a 1967 Hickman High School graduate, will return to her hometown of Columbia on a national book promotion campaign to read from her new mystery "Until Death."

The event, sponsored by the Friends of the University of Missouri-Columbia Library and the State Historical Society of Missouri Library, will be held at the Ellis Library Auditorium from 4 to 5 p.m. Wednesday, July 20.

Light refreshments will be served after the event, and Whitney will autograph books which will be available for purchase at the reading.

For more information, call Ellis Library, Administrative Offices, 882-4701.

Faculty and staff monitor managed health care plan

Since March, a committee of MU faculty and staff have been working to gain a better understanding of how the University's new managed health care plan operates. Committee members — 10 faculty and 10 staff — were appointed in February by Chancellor Charles Kiesler. The group's charge is to monitor the new system to ensure that faculty and staff receive high-quality service under the various options.

The group has met every several weeks, and to date has met with representatives of University Physicians and two primary care physicians in the managed care plan. Those physicians reported that initial problems in coping with a vastly increased patient load are being remedied. Additional physicians are scheduled to join the practice this summer.

In addition, the committee has established a liaison with the University's Faculty and Staff Benefits office and with GenCare/Sanus, the company which administers the managed care plans.

In one of its first actions, the oversight group established several methods for soliciting information from those insured under the new health plan. More than 60 people contacted the committee through letter, telephone or e-mail to comment on the new health plan. The committee is putting together a list for its report to Chancellor Kiesler that includes the types of issues that are being reported.

In the early going, committee members established the following goals:

- Provide surveillance of the health plan to identify problems in the quality of care

(which is not the same as technical quality) with particular reference to the availability, accessibility, acceptability and flexibility of clinical services.

- Provide surveillance of the health plan's fiscal intermediaries with reference to the expeditious and effective resolution of problems experienced by members in getting care.

- Provide surveillance of the operations of the health plan with particular reference to the referral process with the goal of ensuring that referrals are reviewed by competent personnel using acceptable medical standards for approval or denial. To see that market criteria do not override and undermine professional standards.

- Provide surveillance of the health plan to identify problems experienced by health care providers in giving high quality care to patients and to ensure that providers are compensated in a fair and timely manner by the fiscal intermediaries.

- Adopt or devise measures and procedures for documenting the above.

Science

Continued from Page 1.

There is also a practical side to the program that goes beyond abstracts and posters. A series of workshops gives the students a well-rounded view of a career as a scientist by addressing issues that arise in and out of the laboratory.

A needs assessment taken before the program showed many of the students wondered how female researchers balance work and family. A workshop on the topic was helpful for Bond, who had been leaning away from graduate school because she didn't think she could do both. Without graduate school, many of the students would opt for a job in teaching or as a research assistant in a laboratory.

"It's been encouraging for me to know there are women out there who can do it," she said.

Another workshop covers the art of networking, a crucial skill that doesn't come naturally for a lot of female scientists, said Unklesbay. By covering such topics as getting to know who's who in the field and hooking up to the Internet, participants gain valuable insight on ways to increase their chances at success.

From a graduate student's perspective, Keeling said this is particularly important for young female scientists.

"Most women think all they need is to work really hard in the lab. That's not true. They also need to get out there, find role models and meet people," she said.

In fact, the program has cleared up a lot of misconceptions about graduate school, said Unklesbay. For example, many of the participants didn't know funding was available for graduate school.

Journalist Tom French relates stories from a year he spent at Largo High School to educators and administrators attending the Violence in Education conference July 11-12 on the MU campus. French, whose book *South of Heaven*, documents the troubles and triumphs of high school students in their west Florida school, says students today face a multitude of problems, many of which relate to violence in society. French, however, says he is upbeat. "I'm amazed more kids don't go over the edge and resort to violence than do." The two-day conference at the Reynolds Alumni Center was sponsored by the MU School of Law, the College of Education Alumni Association and Ryder Student Transportation Services.

MIZZOU

WEEKLY

Vol. 15

No. 33

A publication of the University of Missouri-Columbia faculty and staff, published every Thursday during the academic year and twice a month during the summer by Publications and Alumni Communication, a department of University Affairs, 407 Reynolds Alumni and Visitor Center, 882-7357. News deadline is noon Thursday the week before publication. Annual subscriptions are available for \$20.

Interim editor: Ernie Gutiérrez
 Assistant editor: John Beahler
 Staff writers: Sue Richardson, Jim Kelty
 Director of Advertising: Tanya Stitt
 Graphic editor: Nancy Daniel

Printed with soy ink on recycled newsprint containing 90 to 100 percent post-consumer waste.

PANIC ATTACKS

A **PANIC ATTACK** is defined as the sudden onset of intense apprehension, fear or terror often associated with feelings of impending doom. Or it can involve the sudden onset of intense physical sensations or symptoms. These may include the following:

- Racing, pounding heartbeat or chest pressure
- Shortness of breath or smothering sensations
- Sweating, hot flashes or chills
- Fear of dying or doing something uncontrolled
- Trembling, shaking, numbness or tingling sensations
- Dizziness, unsteady feelings or faintness
- Nausea or abdominal distress

If you have at least four **PANIC ATTACKS** per month, you may qualify for a free research program being conducted at the University of Missouri Hospital and Clinics involving the use of an investigational anxiety-reducing medication. If you are between the ages of 18 and 60, and have no serious medical illness, please contact Lynn or Judy at **882-0408**.

We're Open This Summer!

Due to construction this summer some Union Cafe entrances may be temporarily closed. The Memorial Union south entrance next to the new computer lab (behind A.P. Green Chapel) will be open all summer and is accessible. Just follow the tunnel hallway next to the vending machines to get to the Cafe.

YOU
KNOW,
HAVE

The University of Missouri-Columbia School of Medicine is conducting a study of a new investigational medication for the treatment of Alzheimer's disease.

Qualifying participants need to meet the following criteria:

- Between the ages of 41-90 years
- Mild to moderate Alzheimer's disease
- Living at home with a care giver
- Have a care giver who is able to participate in the study
- Be in general good health
- Minimum one-year history of Alzheimer's disease symptoms

If you are interested in participating or would like more information about this study, please call (314) 882-8040.

ALZHEIMER'S DISEASE?

MU's master gardener!

Charles Paxton's creativity impacts MU landscape.

The whole University campus is a garden to Charles Paxton, grounds supervisor. Charles oversees MU's beautiful flower displays, green lawns and landscape construction. He draws on his degree in nursery and landscape management, five years' experience at Denver Botanical Garden, the talents of the entire Grounds Department, and his own creative imagination.

He describes the current floral display at Memorial Union as "elements of fire" - flaming red flowers balanced by plants with smoky textures. In contrast, the beds by Jesse Hall contain cool colors and plants that move in the breeze. "People appreciate that the flower beds look different each year," says Charles. "It helps to study and work in an attractive environment."

Planting for the future, Charles also is responsible for the installation of many landscape projects each year involving longer-lived plants such as trees, shrubs, perennials and groundcovers.

And Charles helped develop MU's landscape management plan. "We put a lot of time into planning how to use our resources appropriately to provide a quality landscape," he says.

"Charles takes pride in his work at MU and tries to instill that pride in all our employees," says Grounds Superintendent Tom Flood. "Their efforts make a difference."

We're glad Charles Paxton is part of the team working hard to make MU the pride of Missouri.

Slates set for staff election

Thirteen staff members are candidates for five positions on the Staff Advisory Council, a 16-member group that serves as an advisory board to the chancellor.

Mizzou Weekly asked each nominee to describe current employee issues and how he or she would contribute to the council. Ballots have been mailed to all staff who are 75 percent FTE or more. Employees vote only for candidates in their peer groups, and ballots must be returned by July 27.

There is one opening each in the administrative/professional, crafts/maintenance and technical/paraprofessional categories. There are two openings in the secretarial/clerical category.

Council members whose terms expire are Bob Smith, administrative/professional; Jim Rogers, crafts/maintenance; Evelyn Gallup and JoAnn Williamson, secretarial/clerical; and Kay Glass, technical/paraprofessional.

Photos by Rob Hill and Nancy O'Connor.

Administrative/Professional

GINA KINCAID, special events coordinator for University Hospital and Clinics, has worked at the University for 20 years. Because MU is such a large organization, Kincaid feels that effective communication is the key to a good working environment. "We can all learn from one another. Ideas from one part of campus might work just as well in another part," she says.

Kincaid would look for ways to promote more staff input, including suggestions to improve working conditions and contain costs. "Getting suggestions from all staff could help us work smarter," she says. Issues that Kincaid thinks are of concern to staff include changes to the medical insurance program as well as job satisfaction. "With tighter budgets, staff want to know how that affects them personally," she adds.

DEBBIE MITCHELL, administrative associate I in the Ag Business Services office, has been with the University for nine years. She's interested in serving on Staff Council because she welcomes an opportunity to be a voice for staff.

Improving staff morale, and helping to ensure that staff are compensated for their workloads and responsibilities are issues that Mitchell would address as a council member. She would like to see incentives for high-performing staff. "If it can't be monetary, possibly we could offer alternative rewards in career growth opportunities or professional education," Mitchell says.

"I would like to focus on reclassification of the personnel system, to see it based on responsibility, workloads and demands rather than the number of people supervised," she says.

RICK WISE, customer services manager with Printing Services, has worked at MU for five years. "I like working for the University and I think we all have an obligation to make the organization work," Wise says.

Although Wise points to the University's benefit package and to child care as issues of concern to staff, he says he would come to the council with a clean slate. "I would not bring any preconceived notions or agendas to the council," Wise says.

"I like the representative nature of the council; I believe that's the way to get things done. With 8,000 employees at the University, every issue cannot be addressed to the administration. The council's role is to distill those concerns to the chancellor. I would like to be part of that process."

Technical/Paraprofessional

KAY GLASS, radiation therapist at Ellis Fischel Cancer Center, has worked at the cancer center for 16 years. Glass is running for a second term on Staff Council. As a council member she has "found an outlet for some of the ideas I've had," Glass says. "Council members are receptive and easy to work with. Maybe we can get some things done that are different." Working on council's benefits committee, she has been concerned with expanding education benefits for staff. "It can be another tool to get excellent people into our University system," she says and adds that equity in salaries is another important issue.

The council's job is to "bring up issues, discuss them and find ways to implement ideas and suggestions in ways that will be acceptable," Glass says.

SUZANNE LIPPARD, library assistant II at Ellis Library, has worked at MU for five years. She's interested in serving on the council "to help make this an even better place to work," Lippard says. "I think staff are in a unique position. Our work affects every part of the University."

Lippard says she would like to see a more flexible benefits package that staff could tailor to their individual needs. For instance, some individuals might be interested in day care for their children, and others in educational assistance for family members. She sees development opportunities for staff as another important issue. "I think if you have those opportunities, your talents can be used in lots of different ways," Lippard says. "You're happier with your job; it makes you want to come to work."

RON PARKER, teleprocessing technician II with Campus Computing, has worked at the University for 14 years.

"I think staff are an underutilized part of the University," Parker says. "I work with a lot of people who have good ideas." As a volunteer interviewer for the Staff Recognition Awards, Parker says he's amazed by the level of staff accomplishments he sees. "I think a lot more people need to be recognized every year. Maybe there's a way to do that."

The benefits package is one of the big concerns facing staff, Parker says. "Staff Council is not a bargaining unit, but it can discuss changes with administrators. Communication works both ways; the council can report back to staff and clarify issues."

Crafts/Maintenance

STANLEY HUGHES, building maintenance mechanic with Campus Facilities, has been with MU for 21 years. His job takes him to all corners of campus, and that's one asset he says will bring a wider perspective to Staff Council.

Hughes would like to see expanded adult education opportunities for staff, a change he thinks would result in better possibilities for promotion and advancements. Salaries are another issue he thinks is of concern to staff, as are the recent changes in medical benefits.

He sees the council's role as a liaison between staff and the administration. "Sometimes staff do have ideas that can be worked out," Huges says. "The more people involved, the more likely you are to have an improved product or service."

DENNIS MEYER, power plant maintenance specialist III with Energy Management, has worked at the University for eight years. "One of the issues I'm concerned about is communication between the administration and staff," Meyer says. "It's getting better all the time, but I'd like to try to improve on that. If we're not communicating, we're not working together." Some of the concerns he's heard discussed among staff members include parking and changes in the University's health insurance plan.

Communication is a big role performed by Staff Council, Meyer says, by sharing information between the administration and staff. He points to the council's annual Staff Recognition Week as a valuable way to acknowledge the staff's contribution to MU.

JIM ROGERS, a plasterer at Ellis Fischel Cancer Center, has worked at the University for eight years. Rogers has been on the council since April, when he was appointed to complete Stan Freeman's term. The experience, he says, has given him a better insight into how the University operates. "The council is trying to make a difference for the people who work here."

"Benefits are a real big issue for staff," Rogers adds, and he welcomes the recent policy change, supported by Staff Council, that allows staff to take as many as 12 days of sick leave each year to care for ill family members. Rogers also would like to see a streamlined process that would help employees in the building trades work their way to the journeyman level.

Secretarial/Clerical

SUSAN CESSAC, administrative assistant in the School of Law, has been at MU for four years. Serving on Staff Council, she says, would be an opportunity for her to get more involved in the University community and at the same time help the council relate staff concerns to the administration.

"The University's health-care package is a major issue for staff, Cessac says. "There have been many changes in our medical insurance recently; some are good and some areas still need to be looked at." Staff salaries are another concern she would like to work on with the council.

DEBBIE DUNAVANT, senior secretary in the Department of Internal Medicine, has worked at the University for five years. Serving on the council would be a "learning and growing experience," she says. "I would like to deal with communications issues between the administration and staff. I would like to see communications for common goals opened up to all levels."

Dunavant supports the University's renewed emphasis on quality improvement. "I think all staff are open to that," she says. "The concept always has been to improve and grow." Dunavant adds one of the most important issues facing staff is the recent change in the University's health care plan.

EVELYN GALLUP, data entry operator II in Accounting Services, has been at MU for 11 years. Gallup is running for a second term on the council. "I feel that I now have the experience to work on some of the issues," she says.

One of the concerns for staff, she says, is the new health insurance program. "It's working out for the most part, but I think there are still a few problems with that program."

If she's re-elected, Gallup would like to encourage all MU staff to get involved with the council. "I would really like to stay in contact with staff and have them call us with their opinions."

KIMBERLY HICKS, administrative assistant in the Department of Psychology, has worked at the University for four years. As a council member, Hicks would like to stress the importance of staff. "The campus couldn't function without staff," she says. "A lot of people at MU put their hearts and souls into their jobs. It's more than just a job to them."

The University's new health care plan is a concern for Hicks, and she would work to improve staff salaries and staff morale. Day care for MU employees is another important issue, she says. "We need good day care on campus."

CALENDAR

Send calendar items in Campus Mail to *Mizzou Weekly Calendar*, 407 Reynolds Center, by noon Thursday the week before publication. Events are free and open to the public unless otherwise noted.

July 14 Thursday

SAFETY PROGRAM: Children's Hospital will offer a two-day class to teach youngsters ages 11 to 13 how handle emergencies when caring for young children. The program lasts from 9 a.m.-4 p.m. today and tomorrow at the old alumni center. Cost: \$30. Call 882-6565 to register.

STAFF ADVISORY COUNCIL: Group will meet at 1:15 p.m. in N243 Memorial Union.

PROFESSIONAL SUMMER REPERTORY THEATER: *The Good Doctor*, by Neil Simon, will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

15 Friday

PROFESSIONAL SUMMER REPERTORY THEATER: *Master Harold ...and the boys*, by Athol Fugard, will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

16 Saturday

PROFESSIONAL SUMMER REPERTORY THEATER: *Some Enchanted Evening: The Songs of Rodgers & Hammerstein* will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

17 Sunday

PROFESSIONAL SUMMER REPERTORY THEATER: *Some Enchanted Evening: The Songs of Rodgers & Hammerstein* will be presented at 2 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

19 Tuesday

HEALTH SCREENINGS: University Hospitals & Clinics will offer glucose screenings from 1-5:30 p.m. at the Health Information Center in the Columbia Mall.

TELECOMMUNICATIONS: Warren Mayer, senior information specialist, will discuss the effective use of VoiceMemo from 1:30-3:30 p.m. in the telecom conference room. Reservations are required for this session. Call 882-2177.

SUPPORT GROUP: Nicotine Anonymous will meet at 7 p.m. in room 125 Ellis Fischel Cancer Center. Call 882-7353 for more information.

UNIVERSITY SUMMER BAND: The Music Department will present the third of its bi-weekly outdoor summer band concerts at 7:30 p.m. from the front steps on the south side of Jesse Hall. Call 882-2604 for more information.

20 Wednesday

MEDICAL INFORMATICS SEMINAR: Craig Klimczak, postdoctoral fellow, will present "Suitability of SNOMED to Code Veterinary Problem" from noon-1 p.m. in 606 Lewis Hall.

MIDDAY GALLERY EVENT: The video "Islamic Art" will be shown at 12:15 p.m. at the Museum of Art and Archaeology.

TELECOMMUNICATIONS: Warren

Mayer, senior information specialist, will discuss telephone etiquette from 1:30-3:30 p.m. in the telecom conference room. Reservations are required for this session. Call 882-2177.

CHILDBIRTH CLASS: A two-part class designed for couples in the first months of pregnancy will be held from 7-9 p.m. today and July 27 in the seventh-floor classroom at Ellis Fischel Cancer Center. Cost: \$20. Call 882-6973.

PROFESSIONAL SUMMER REPERTORY THEATER: *The Good Doctor*, by Neil Simon, will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

21 Thursday

HEALTH SCREENINGS: University Hospitals & Clinics will offer body composition measurements from 8-10 a.m. and 4-6 p.m. at the Health Information Center in the Columbia Mall. Call 882-6565 to schedule an appointment.

SUPPORT GROUP: Hearts for Life, a group open to anyone interested in heart care, will meet at 7 p.m. in the Main Street Conference Room at University Hospital & Clinics. Call 882-1081 for more information.

BREAST CANCER SUPPORT GROUP: S.H.A.R.E. will meet at 7 p.m. in the doctors lounge on the ground floor of Ellis Fischel Cancer Center. Call 882-7373 for more information.

PROFESSIONAL SUMMER REPERTORY THEATER: *Some Enchanted Evening: The Songs of Rodgers & Hammerstein* will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

22 Friday

KOMU-TV: "Fair Weather at the Boone County Fair," featuring NewsCenter Eight's Randy Wright, will be held at 6 p.m. and 10 p.m. Call 474-9435 for more information.

PROFESSIONAL SUMMER REPERTORY THEATER: *Master Harold ...and the boys*, by Athol Fugard, will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

SHOW-ME STATE GAMES: Opening ceremonies, featuring Tom McMillian of the President's Council on Physical Fitness and Sports, will be at 7 p.m. at the Hearnes Center. State games will be July 22-24 and July 29-31 at various sites in and around Columbia.

SUMMER CONCERT: The MU Summer Singers will present the concert version of Bizet's *Carmen* at 8 p.m. at the Missouri Theater. The work, accompanied by the Missouri Symphony Society Chamber Orchestra, will be conducted by Hugo Vianello. Call 882-2604 for more information.

23 Saturday

PROFESSIONAL SUMMER REPERTORY THEATER: *The Good Doctor*, by Neil Simon, will be presented at 8 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

24 Sunday

PROFESSIONAL SUMMER REPERTORY THEATER: *The Good Doctor*, by Neil Simon, will be presented at 2 p.m. in the Rhynsburger Theatre. Cost: \$9 faculty and staff.

26 Tuesday

SUPPORT GROUP: Nicotine Anonymous will meet at 7 p.m. in room 125 Ellis Fischel Cancer Center. Call 882-7353 for more information.

SUPPORT GROUP: PEPL (Parents Experiencing Perinatal Loss) will meet from 7-9 p.m. in room 1W19 University Hospital & Clinics. Call 882-2221 for more information.

27 Wednesday

MEDICAL INFORMATICS SEMINAR: Melissa Poole, postdoctoral fellow, will speak from noon-1 p.m. in 606 Lewis Hall.

EXHIBITS

BINGHAM GALLERY: An exhibition of paintings, drawings and sculptures by Patrick Schuchard of Washington University will be on display through July 30. The gallery, in the Fine Arts Building on the corner of Hitt Street and University Avenue, is open from 10 a.m.-4 p.m. Monday through Friday.

BRADY COMMONS GALLERY: An exhibition of photography by Chris Flinchpaugh will be on display from July 11-21. A group exhibition of student photography will be on display from July 25-Aug. 4. The gallery, on the second floor of Brady Commons, is open from 10 a.m.-5 p.m. Monday through Friday.

MUSEUM OF ART AND ARCHAEOLOGY: On display is "Isms and Others in the 20th Century." The museum, in Pickard Hall, is open from 9 a.m.-5 p.m. Tuesday through Friday; 6:30-8:30 p.m. Thursday; and noon-5 p.m. Saturday and Sunday.

ROGERS GALLERY: "Space and Imagination: Watercolors of the Land of Israel," a collection of paintings by Benyamin Schwarz, MU assistant professor of environmental design, is on display through July 29 in the gallery in Stanley Hall. The gallery is open from 7:30 a.m.-4 p.m. Monday through Friday.

STATE HISTORICAL SOCIETY: "Western America: Landscapes and Indians, an Exhibition" is on display in the gallery through August 15. Corridor exhibits are "The Contemporary Artists Collection" and "Decades: 1893 to 1964, Editorial Cartoons." The gallery, in the east end of Ellis Library, is open from 8:30 a.m.-4 p.m. Monday through Friday. The corridors are open from 8 a.m.-4 p.m. Monday through Friday and 9 a.m.-4:30 p.m. Saturday.

Some Enchanted Evening. *The Songs of Rodgers & Hammerstein*

Vacation with Us

Looking for something unique, fun and affordable to do with your family over the long, hot Missouri summer without all the preparation? Come join Wilderness Adventures and other families as we canoe the scenic Current River on July 23 and 24; and experience live wildlife, stories and horseback riding with the Runge Conservation

Center and Ozark Homestead Riding Stable on July 30.

Cost:
Canoe trips: \$45 per adult, \$10 for children under 13.
Horseback Riding and Nature Day: \$45 per adult, \$25 children under 13

To reserve spots now call us at: 882-3066 or stop by 726 South William (across from the Vet College)

Lisa McCoy, physical therapist at MU, and Miles McCoy with the help of their children Casey and Christian, hold their new auto shade they received when signing their new car loan. They came to their credit union because they "like the interest rates on autos" and MCU's low interest rate was a "big thing" for them.

Did you buy a car or truck after April 1, 1994?

If your rate was higher than 6.75%,
**You may qualify*
for a lower rate!**
